1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the configuration appraisal functionality on the Talent Dashboard.

 **Note:** Before configuring appraisals, review the content in the following user guide for some standard configuration details:

- Talent Management: Configuring Talent Setup - User Guide

1.2. Initial Configuration

The Talent Dashboard is where Talent administrators configure the system for the organisation. From here, users can create appraisal cycles, manage the cycles, assign employees and managers as well as monitor progress on appraisal cycles. XD Insight can also be used to monitor information through the creation of reports in the dedicated XD Talent business area.

1.3. What is an Appraisal Cycle?

Appraisal cycles allow you to configure and assign a standard appraisal form to employees. The process for configuring an appraisal cycle is as follows:

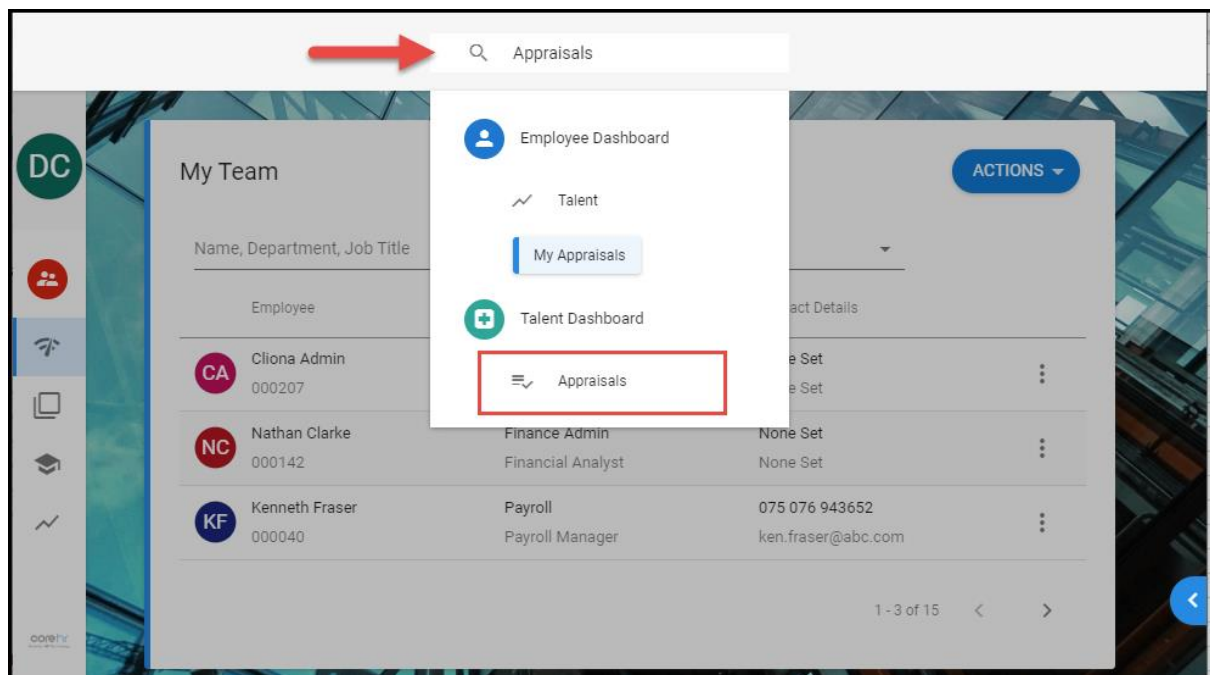

1. Configure & confirm Talent Setup (& Reference Items)
2. Create appraisal cycle
3. Create stages
4. Create steps
5. Assign appraisal cycle
6. Activate appraisal cycle
7. Manage appraisal cycle via administration options
8. Run reports via Insight

2. Appraisal Cycles

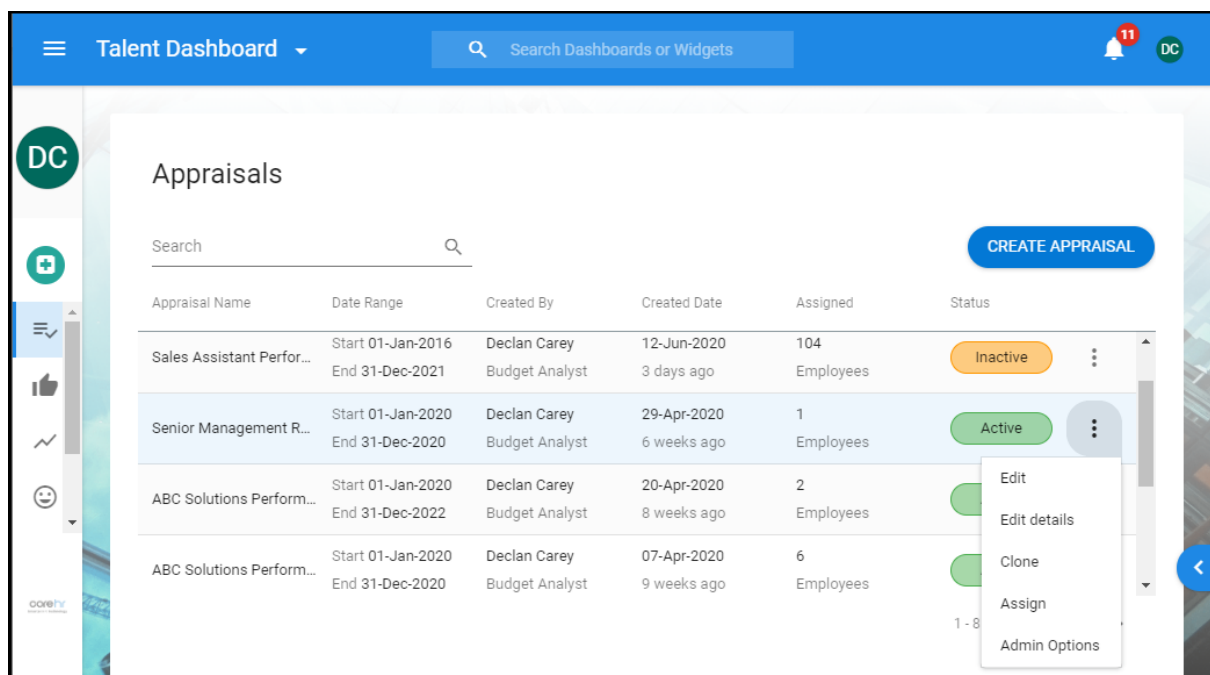

2.1. Accessing Appraisal Admin widget

To access the appraisal admin widget:

1. Quick Jump to *Appraisals* on the Talent Dashboard.

2. The *Appraisals* tab opens, showing the following items:

The below table outlines what appears on this screen.

Item	Description
Search	This allows you to search on the title of the appraisal.
Appraisal Name	This shows the name / title of the appraisal.
Date Range	This shows the start date and the end date of the appraisal cycle.
Created By	This shows the name and job title of the user that created the appraisal.
Created Date	This shows the date the appraisal cycle was created and how many weeks has elapsed since.
Assigned	This shows the number of employees currently assigned to this appraisal. This is blank if the cycle hasn't been assigned yet.
Status	This shows the current status of an appraisal. The following are the types of status available for an appraisal cycle: - Active (currently in use, cannot be deleted) - Inactive (not in use, can be activated or deleted.)
Further Appraisal Options	Within the  button, there are additional options for appraisal administration.

2.2. Creating a New Appraisal Cycle

To create a new appraisal cycle, follow the below steps:

1. Click **Create Appraisal**.
2. Complete the fields on the Create Appraisal form:

Item	Description
Appraisal Title	This is the name of the appraisal cycle. Enter up to 200 alphanumeric characters.
Document	This allows you to upload any supporting documentation to the manager or employee who may be completing it. This is not employee specific.
Start Date	This is the opening date of the appraisal. This also populates as the opening date of the first stage.
End Date	This is the closing date and the due date for final sign off.
Move with persons	Enabled by default. Active appraisals will follow the employee to their new position and new manager if this is enabled.

Item	Description
contract changes	- If your organisation is following appointment-based appraisals, keep this enabled. - If your organisation is not configuring appointment-based appraisals, disable this setting. Once this is deactivated, appraisals end once the employee's contract has ended.
Allow manager to drill to sub teams	Enabled by default. This option allows the user to view different team structures underneath the manager.

- Once all required fields have been populated, click **OK**.
- The appraisal cycle automatically displays on screen. From here, you can complete the creation of the cycle or save and come back to it at a later time.

2.2.1. Configuring Appraisal Stages

The appraisal cycle is a combination of stages within the cycle and steps within the stages.

Stage Options

During the configuration of an appraisal cycle, one stage is automatically created for you, with a default sign off step. This can be edited by adding steps. If adding any additional stages, the date intervals of the initial stage should be adjusted.

← Talent Dashboard DC

Edit Appraisal
Talent Dashboard > Edit Appraisal

If you want to add another stage, please change the date intervals for the current stages

Performance Excellence Cycle 2020-2021 Date Range 01-Jan-2020 - 31-Dec-2020 Inactive

Title	Stage Date	Step Type
▼ Stage 1	01-Jan-2020 - 31-Dec-2020	ADD STEP ⋮
Sign Off	Sign Off	⋮

Multiple stages can be created as required. A typical example of this may be the following:

1. Initial Stage Goal Setting.
2. Mid-Year Appraisal.
3. Final Appraisal.

There is no limit to the number of stages that can be added to the appraisal. Each stage block shows the stage name and the start and end date of the stage.

Note:

- Each stage will have a sign off step.
- It is recommended that the user creates all required stages first before adding steps.

Add New Stage

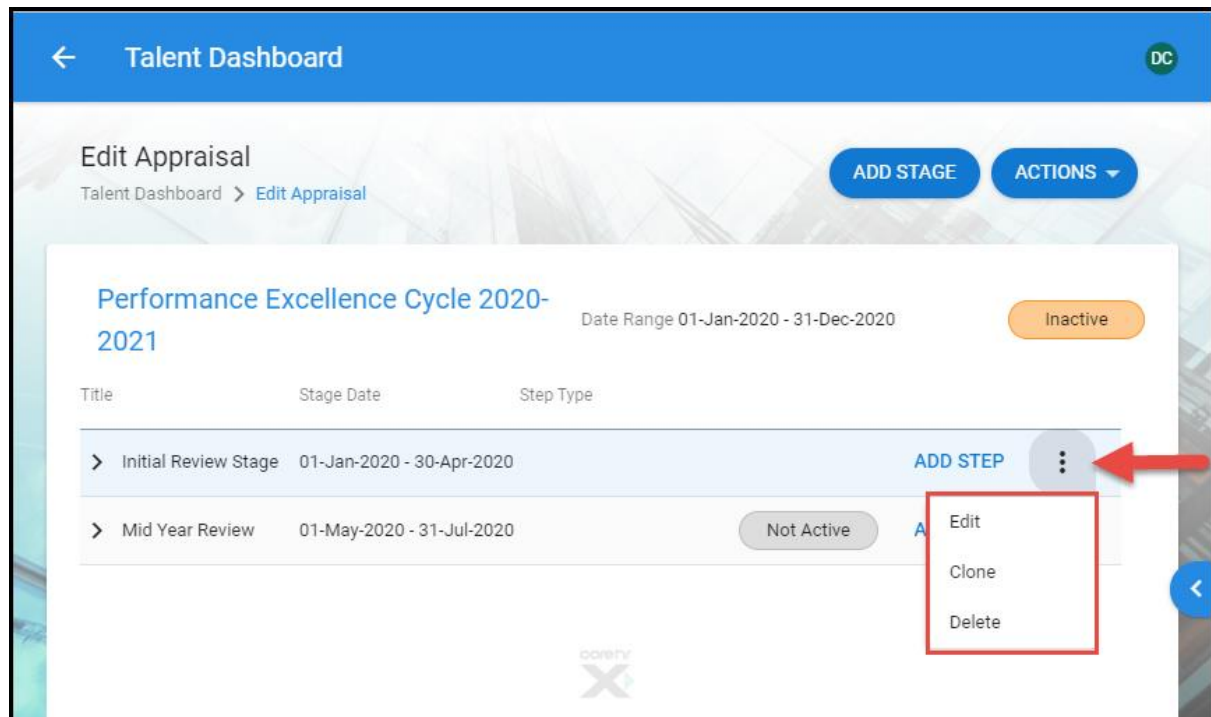

To add a new stage to the appraisal cycle, follow the below steps.

1. Click **Add Stage**.
2. Fill in the required fields. The table below explains the items you can edit when creating a stage:

Item	Description	Mandatory
Stage Title	This is the name of the stage. A maximum of 200 alphanumeric characters are allowed.	Yes
Description	This gives a detailed explanation of what this stage consists of. A maximum of 2000 alphanumeric characters are allowed	No
Start Date	This is the start date of the current stage.	Yes
End Date	This is the end date of the current stage. The Start and End Date cannot be the same day.	Yes
Activate Stage	Enabled this setting once all steps have been added to the stage.	No

Edit Stage

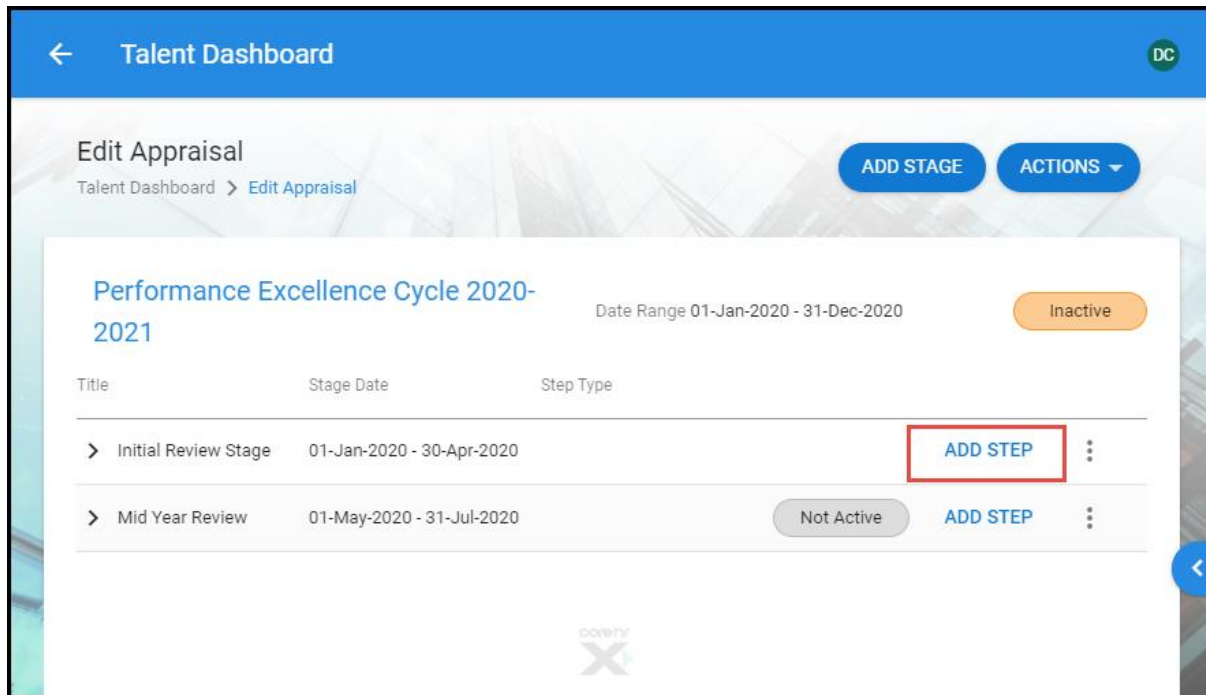

Any stage can be edited at a later time if required. Click the  button to view the options.

Item	Description
Edit	This allows you to edit the following information: • Stage Title • Description • Start Date • End Date • Activation Status
Clone	This allows you clone the stage title and all linked steps of the stage. The date range needs to be updated to follow the correct timelines of the cycle before saving the cloned stage.
Delete	This allows you to delete the stage. All related steps are deleted, and it is not possible to recover them.

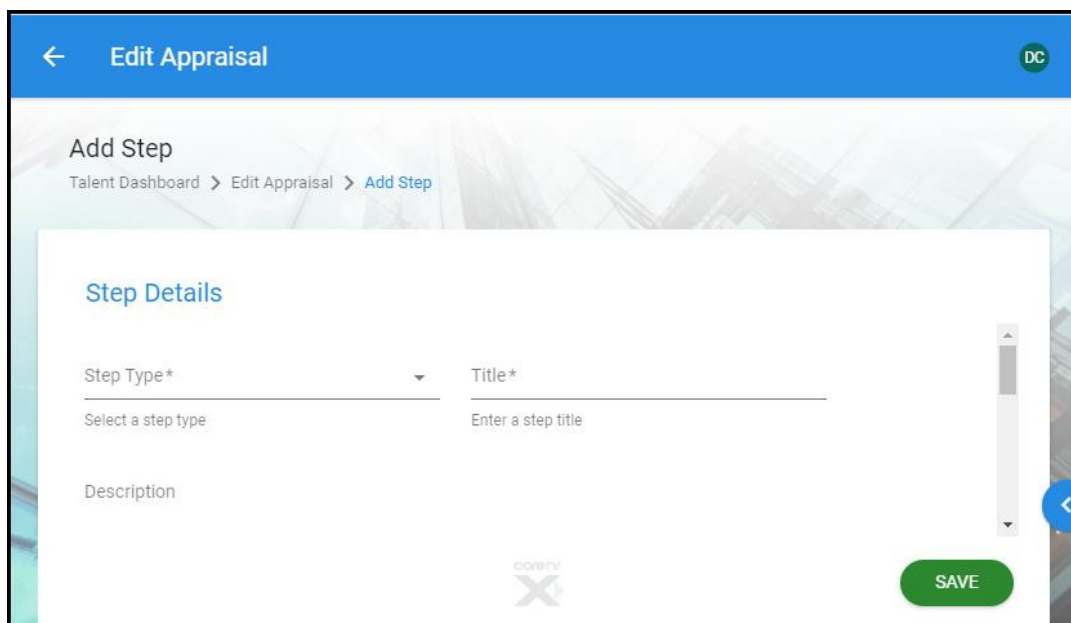

2.2.2. Repeated Configuration for Appraisal Steps

Steps can be added to any stage by clicking **Add Step**. There are currently a number of steps that are available as part of the appraisal cycle.

Follow the below guidance on how to add a new step to a stage. This process is repeatable for all steps, with the addition / removal of certain settings depending on the step type.

1. The *Add Step* screen opens.

2. Input the following details:

Item	Description	Mandatory
Step Type	Select the type of step to be added. See sections below for more information on step types.	Yes
Title	This is the name of the step. A maximum of 200 alphanumeric characters can be entered.	Yes
Description	This allows you to enter further information and details surrounding the step. A maximum of 4000 alphanumeric characters can be entered.	No
Applicable People	This restricts the step to be viewed or edited by this person. The options here are: - Employee - Manager - Employee and Manager	Yes
Position of Step	This is where the step is to be situated within the stage. The last step of the final stage needs to be the Final Rating.	Yes
Mandatory Step	This allows you to flag a step as compulsory or optional.	No
Other Party Information	This setting controls the access for other parties not selected during the <i>Applicable People</i> setting.	Yes

The following are the available step types:

360 Reviews

This adds the 360-review widget to the step, which displays all active 360 reviews. Employees can use this to request or provide 360 feedback and view their feedback. Managers can use this to view the 360 feedback that was submitted during the appraisal cycle.

 **Note:** Configuration is carried out by administrators in the 360-review widget of the Talent dashboard.

Manager Analytics

This makes any Insight analytics widget available as part of the appraisal. You can then define what report is to be made available. This step is only visible to the manager so that it can be used to view team analytics and compare an individual when assessing their performance. To create an Insight widget, follow the below steps:

1. Go to Insight and open an existing report or create a new one based on the talent management business area.
2. Select *Manage Report* option.
3. Select *Chart* option.

The screenshot shows the 'Manager's Team Performance Update' interface. At the top, there's a blue header with a back arrow and the title 'Manager's Team Performance Update'. Below this, the 'Manage Report' section is active, with a breadcrumb trail: 'CoreInsight > Manager's Team Performance Update > Manage Report'. A 'RUN' button is in the top right. On the left, a 'Settings' sidebar lists 'Columns' (34), 'Tabs' (1), 'Filters' (0), 'Calculations' (0), 'Sorting' (0), and 'Chart' (highlighted with a red box). The main area is titled 'Chart' and contains several configuration fields: 'Chart Title' (Team Performance Update), 'Chart Type' (Line), 'Select X axis column' (Employee Rating), 'Select Y axis column' (Max Value), and 'Select function type' (Sum). A checkbox labeled 'Make chart available as widget' is checked and highlighted with a red box. At the bottom, there are 'DELETE' and 'SAVE' buttons, and a 'Chart Preview' label.

4. The *Create Chart* screen appears.
5. Create the chart based on the options on screen, and enable the *Make chart available as widget* option before saving.
6. The chart appears in preview mode for you to check that it looks ok before saving.
7. Click **Save**.
8. The chart is now available to be selected from the analytics step on the appraisal.

9. To add the chart to the appraisal step, select the report and click the arrows to bring it across to the *Selected items to appear in your Report* section.

Career Planning

This step allows the employee to create a new career development plan.

Competencies

This provides a window into the competencies area, where employees and managers can score their competencies that have been assigned to them through a job family or job title. A competency framework needs to be linked to this step using the *Framework* dropdown menu.

Note: Configuration is carried out by administrators in the competencies widget of the *Talent Administrator* dashboard.

Document

This allows employees or managers upload any supporting documents that may be part of the appraisal process, such as proof of qualifications. These documents are employee specific.

Meeting

This allows a manager to create a meeting request (as an email attachment / .ics file) that can be sent to an employee where the employee can accept, decline or propose a different time. This is used to facilitate any meetings that may take place.

Objectives

This provides a window into an objective cycle, where employees and managers can view and manage their objectives. An objective cycle needs to be linked to this step using the *Objective Cycle* dropdown menu.

Note:

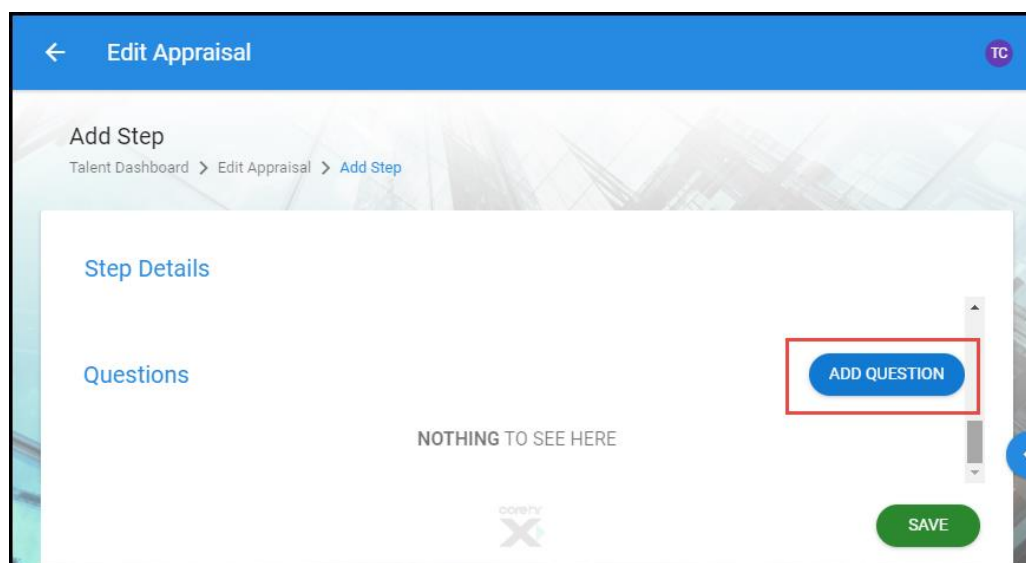

- You can define what cycle is available per stage. If objectives are set at the end of the appraisal year, a new objective cycle for the new year can be linked at the final stage.
- All active cycles are available for the user to select.

Questionnaire

A custom questionnaire can be configured that participants complete as part of the appraisal. This includes who can answer or view the questions. This is best practice configuration to form the basis of the conversation that occurs between the employee and manager.

To add a question to the questionnaire:

1. Click **Add Question**.

This allows you to add multiple questions to a questionnaire, with the following items available on screen:

Item	Description	Mandatory
Question Title	This is the name of the question. A maximum of 200 alphanumeric characters can be entered.	Yes
Question Description	This allows you to enter in further details and an explanation of the question. A maximum of 2000 alphanumeric characters can be added.	No
Answer Type	This gives the option of multiple choice or comments. If multiple choice is selected, up to 100 options can be provided as answers, along with a rating and label.	Yes
Applicable People	This restricts access to view and answer the question. The options here are: - Employee - Manager - Employee and Manager	Yes
Position of Question	This allows you to arrange the position of each question.	Yes
Mandatory Question	This allows you to flag a question as compulsory or optional.	No
Include Comments	This allows the employee or manager to add comments in addition to their answer.	No
Other Party Information	This setting controls the access of other parties not selected during the <i>Applicable People</i> setting.	Yes

2. Click **Save** once the question has been configured to add it to the questionnaire.

Note:

- Multiple questionnaire steps can be added per stage if required.
- If you are editing a question that already exists, you must save on the step screen for all changes to the questionnaire to be saved correctly.

Rating

This step is used to provide a rating to a stage or to an overall appraisal. You can select the type of rating scale to use, and define the workflow that takes place if the appraisal is to be approved by a second manager or not. This can be used to rate something as part of an appraisal process.

The three types of rating available are:

1. Star
 - a. This allows you to add up to five stars to the rating for an employee or manager to rate themselves against.
2. Numeric
 - a. This allows you to create a minimum and maximum value for employees or managers to rate themselves as.
 - b. Maximum value is 100, with the minimum value allowed being 0.
3. Descriptor
 - a. This allows you to select a pre-defined reference list from the *Scaled Reference List* configuration.
 - b. Select a *Descriptor Group*, which populates the rating with the active reference items.

Recognition

This step is used to view the employee's recognition level based on feedback received from other employees. This functionality is separate to 360 feedback and is a view-only record of recognition received throughout the employee's time in the company.

Talent Factors

These items are grouped together to allow the manager to review and report on certain aspects of the employee that drive performance, talent and predictive analytics. All options available on this screen are managed by your organisation and can be renamed or re-used in many ways. The following items are configured using the *Talent Setup* widget:

- Readiness
- Promotability
- Flight Risk

- Impact of Loss
- Willing to Relocate
- Relocate to
- Employee Talent Pools

Training

 **Note:** This stage only applies where the Learning and Development module is active.

Add this step to a stage to include the two training widgets available on the employee dashboard:

1. Book a Course
2. My Training History

Publications, Research & Supervision

These are based on an employee's educational details surrounding any publications, research or supervision information. To configure these sections, review the Talent Management: Configuring Talent Setup - User Guide.

Sign Off / Final Sign Off

The sign off step is automatically created as part of the stage creation process as it is not possible to create a stage without this step. This step is defaulted to the last step of the stage and cannot be amended. In addition to the repeated configuration per step, the table below shows the items to configure for the sign off and final sign off step.

Item	Description	Mandatory
Step Type	This is automatically selected as <i>Sign Off</i> and cannot be edited.	Yes
Applicable People	This is automatically selected as <i>Manager and Employee</i> and cannot be edited.	Yes
Position of Step	This is automatically selected as <i>99</i> and cannot be edited.	Yes
Mandatory Step	This is automatically selected as <i>Mandatory</i> and cannot be edited	Yes

Item	Description	Mandatory
Final Rating	If you are using appraisal calibration, at least one of the sign off steps on the appraisal cycle has to be marked as the final rating.	No
Employee Feedback	- No, don't allow employee feedback. - Yes, allow employee feedback.	Yes
Manager Feedback	- No, don't allow manager feedback. - Yes, allow employee feedback.	Yes
Allow Employee Rating	This gives the option to an employee to give a rating.	No
Allow Manager Rating	This allows managers to give a rating. This is mandatory and has to be enabled.	Yes

 **Note:** An appraisal always requires a manager to sign off to mark it as *Completed*.

Step Options

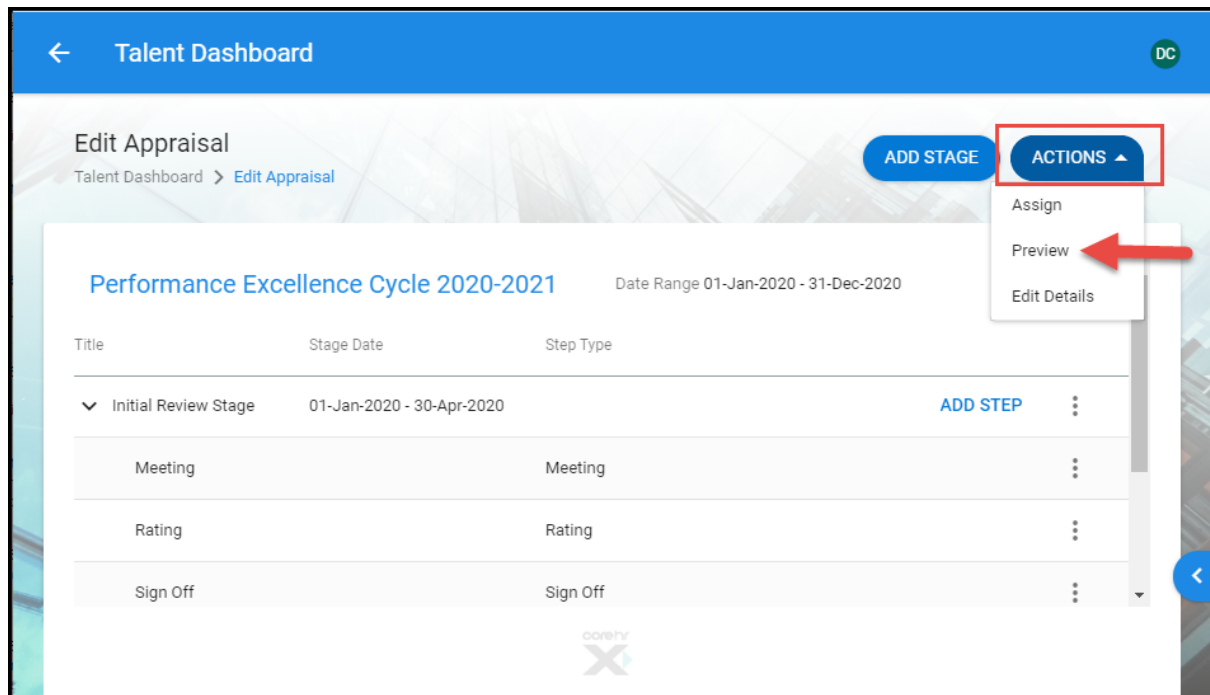

1. Click on the  button.
2. The edit and delete options appear.

 **Note:** If you are editing an active appraisal, the details within a step that are changed or removed effects the appraisals that are already assigned to or completed by employees.

2.3. Previewing an Appraisal Cycle

To preview an appraisal cycle, follow the below steps:

1. Click **Actions** within the *Edit Appraisal* screen.
2. Select **Preview**.

3. This opens the appraisal wizard as it would be seen from the employee and manager's perspective, and acts as a guideline as to how it would look once activated.

Note: In some cases, data may not display as it may not exist yet or is related to the person that is actually carrying out the appraisal.

2.4. Assigning Appraisal Cycles

Once you are happy with the appraisal cycle setup, it can be assigned out to employees and managers. This is done via criteria groups or individual employees.

Once employees have been assigned to the appraisal cycle, the appraisal can then be activated. This allows you to save and come back to this at a later time if required to update the assignee list.

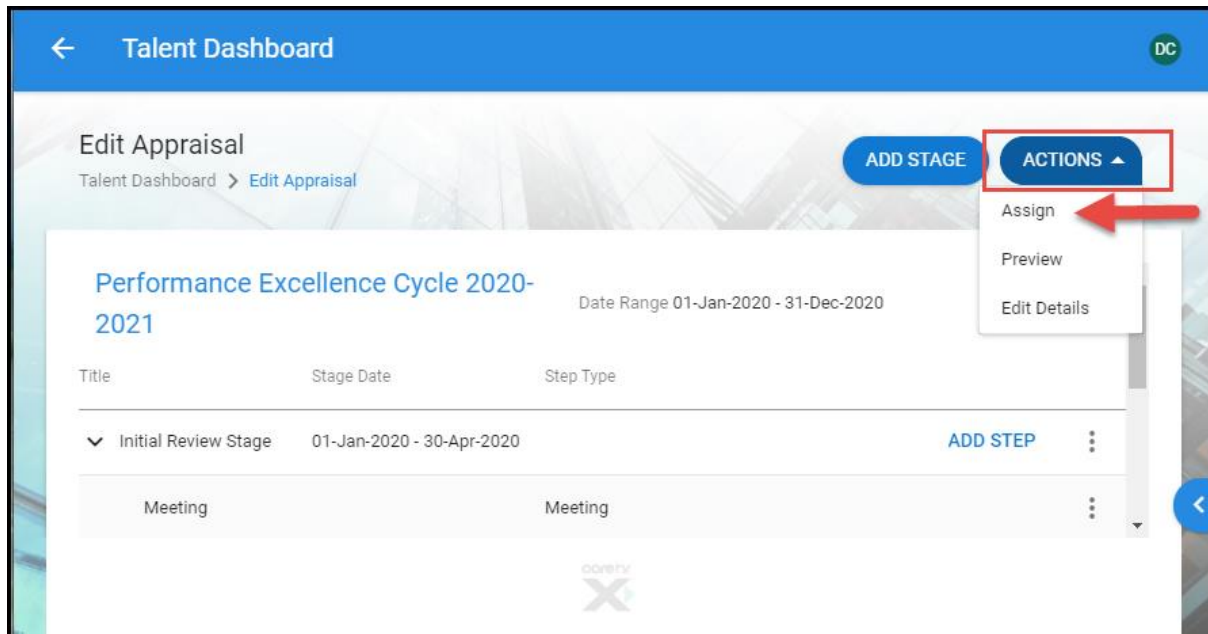

2.4.1. Assign by Criteria Groups

These are groups of employees where an administrator can choose to assign people together who sit in a certain position in the company. This functionality creates groups for different types of staff based on their employee / appointment record.

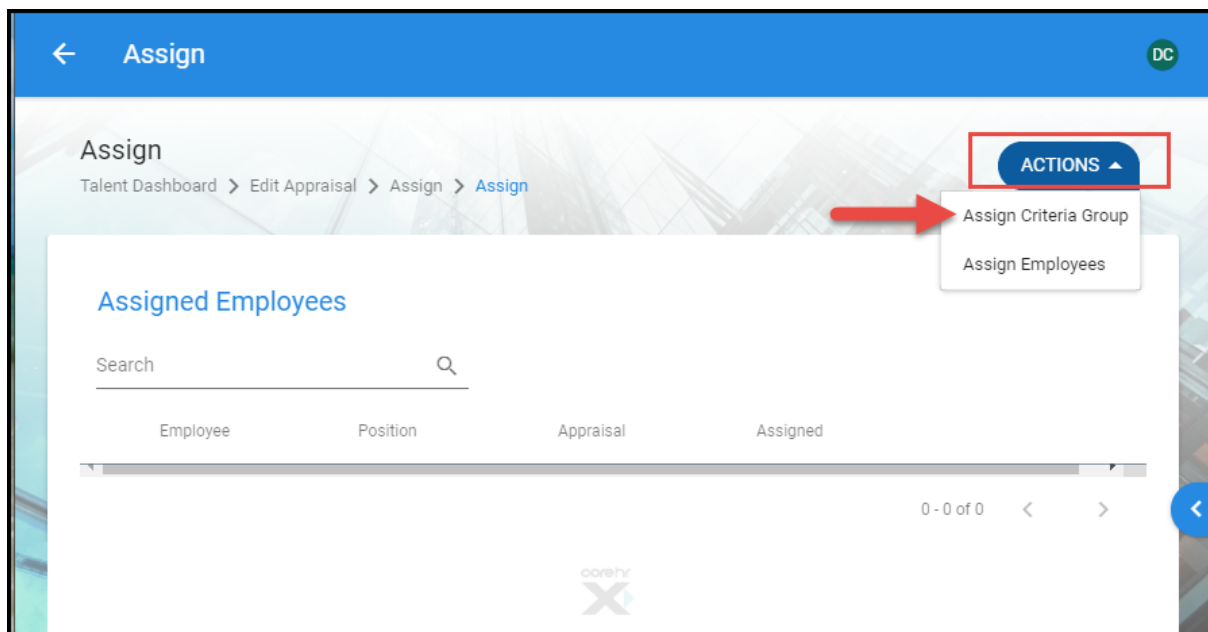

Creating a Criteria Group

To create a new criteria group:

1. Within the *Edit Appraisal* screen, click **Actions** and select **Assign**.

2. This opens the *Assigned Employees* screen.
3. To create a criteria group, click **Actions** and select **Assign Criteria Group**.

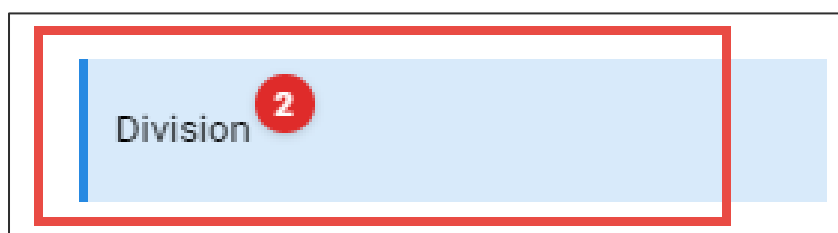

4. Click **Add Group**.

5. Input a name for the group. This is mandatory, you can enter up to 200 alphanumeric characters.
6. Click **OK**.
7. To add organisational attributes and employee attributes to this criteria group, click **Add**.
8. Select your required reference date from the left hand menu. The following list of items / reference fields can be added:

Item	Item
Action	Management Unit
Category	Organisation
Cost Centre	Post Title
Department	Reason Codes
Division	Sub Category
Employee Status	Sub Status
Grade	User Fields 1 - 5
Job Category	Work Group
Location	

9. Tick the relevant attributes and use the directional arrows to move it to the Assigned column. The list is automatically saved.
10. The attribute is updated with a notification number which relates to the number of items added.

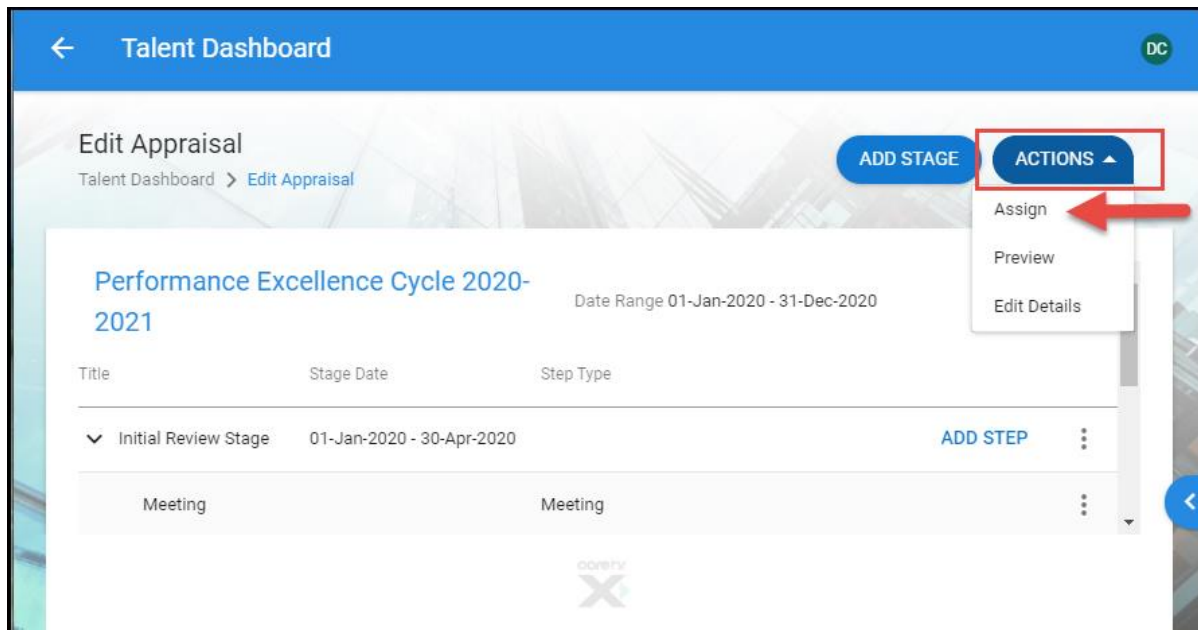

11. Return to the Group Creator screen and confirm the criteria is correct. This shows the attribute assigned and the rule against it.
12. To edit or delete a criteria rule, click the  button.
13. Click **Save**.

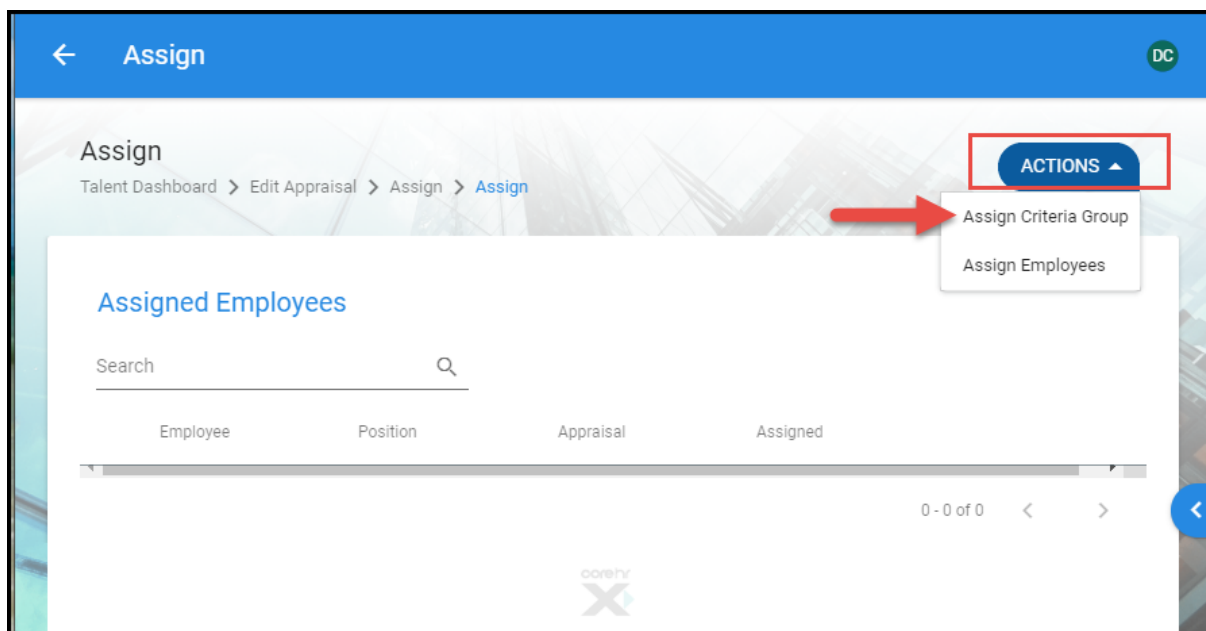

Assigning a Criteria Group

To add a criteria group to an appraisal cycle:

1. Within the *Edit Appraisal* screen, click **Actions** and select **Assign**.

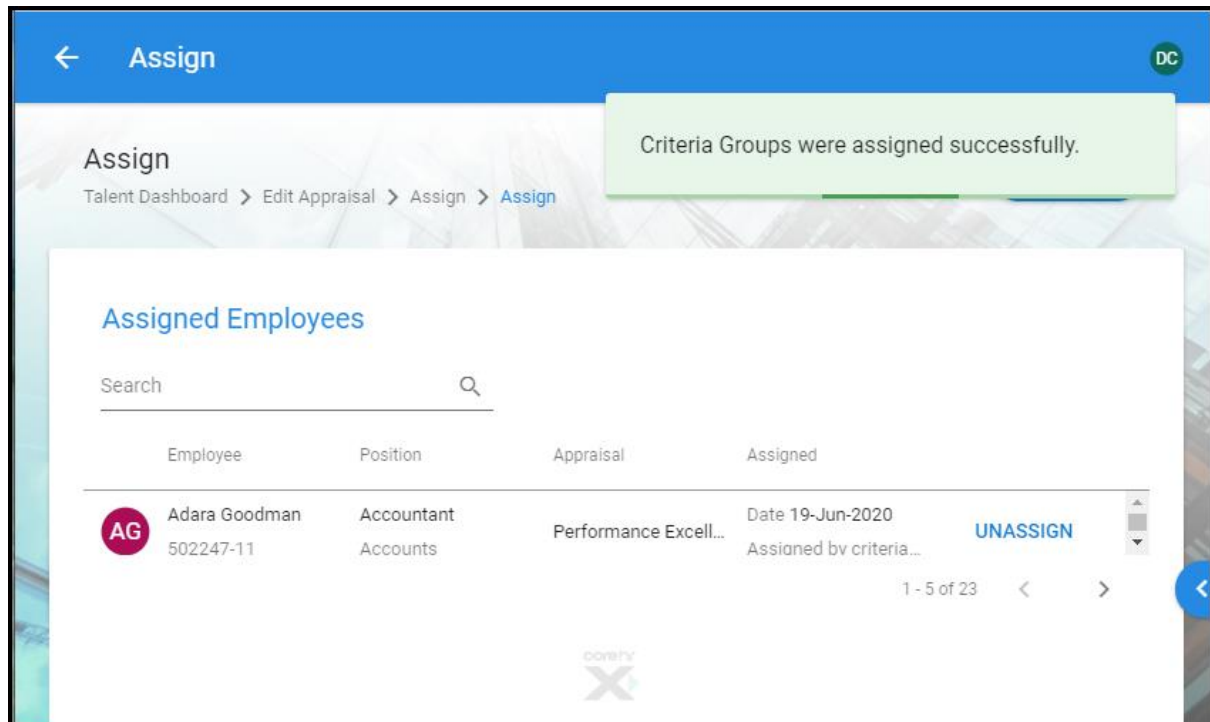

2. Click **Actions** and select **Assign Criteria Group**.

3. Enable / Disable the Active indicator against any criteria group to add / remove it from an appraisal cycle.

4. Click **Save**.
5. The employee list is populated with all the employees that match the conditions.

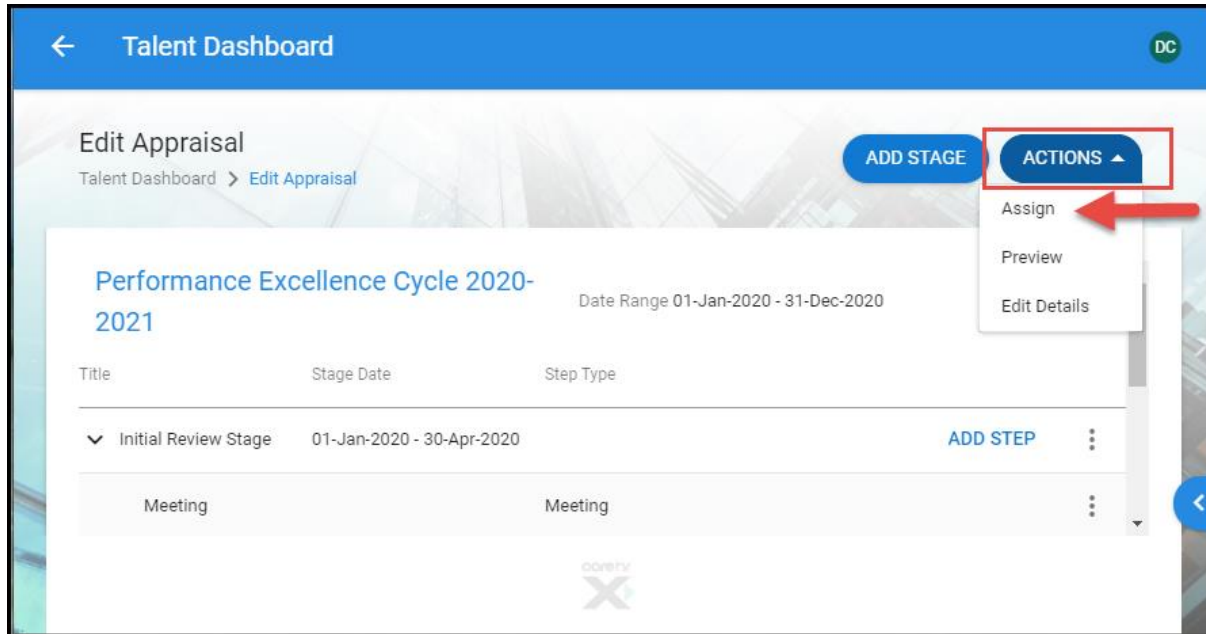

The following additional options can be enabled per appraisal cycle when assigning a criteria group:

Item	Option
Do not include employees with a future probation expiry date from profile criteria grouping selected above	Yes / No
Only include employees with a future probation expiry date from profile criteria grouping selected above	Yes / No
Automatically assign to employees whose probation date is number of days after the Start Date	Yes / No Number of Days
Automatically assign to employees whose start date is number of days after the Start Date	Yes / No Number of Days

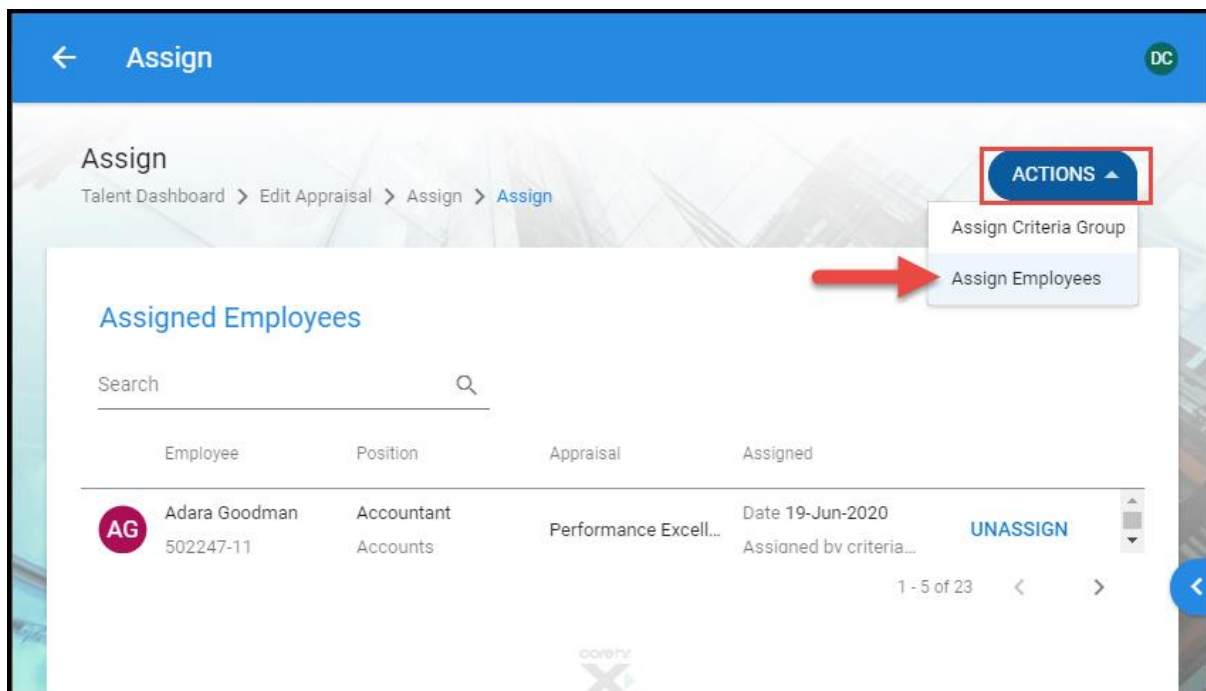

2.4.2. Assign by Employee

To add an individual employee to an appraisal cycle:

1. Within the *Edit Appraisal* screen, click **Actions** and select **Assign**.

2. Click **Actions** and select **Assign Employees**.

3. This opens a list of all the employees you have access to, that have not been assigned to any active criteria group yet.
4. Search for the employee you want to add and enable the *Assign* indicator to add them to an appraisal.
5. Click **Save**.

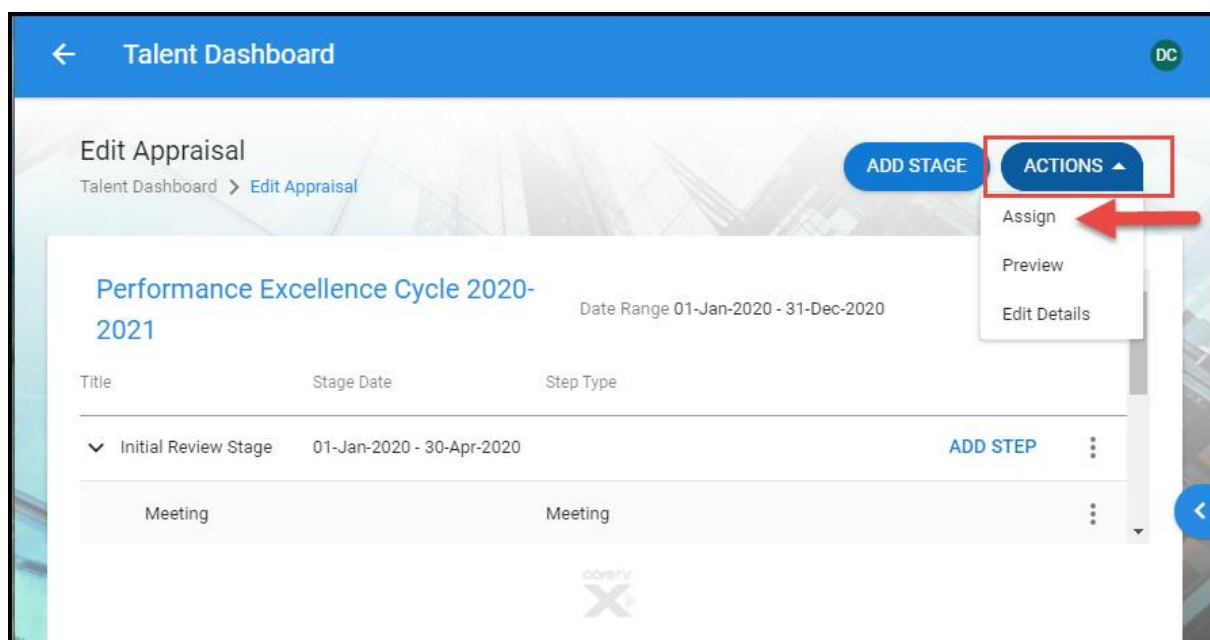

2.5. Unassigning an Appraisal Cycle

An employee can only be unassigned from an appraisal cycle if:

- The cycle has not been activated yet.
- The employee was assigned by employee, not by criteria group.

To unassign an employee, follow the below steps:

1. Within the *Edit Appraisal* screen, click **Actions** and select **Assign**.

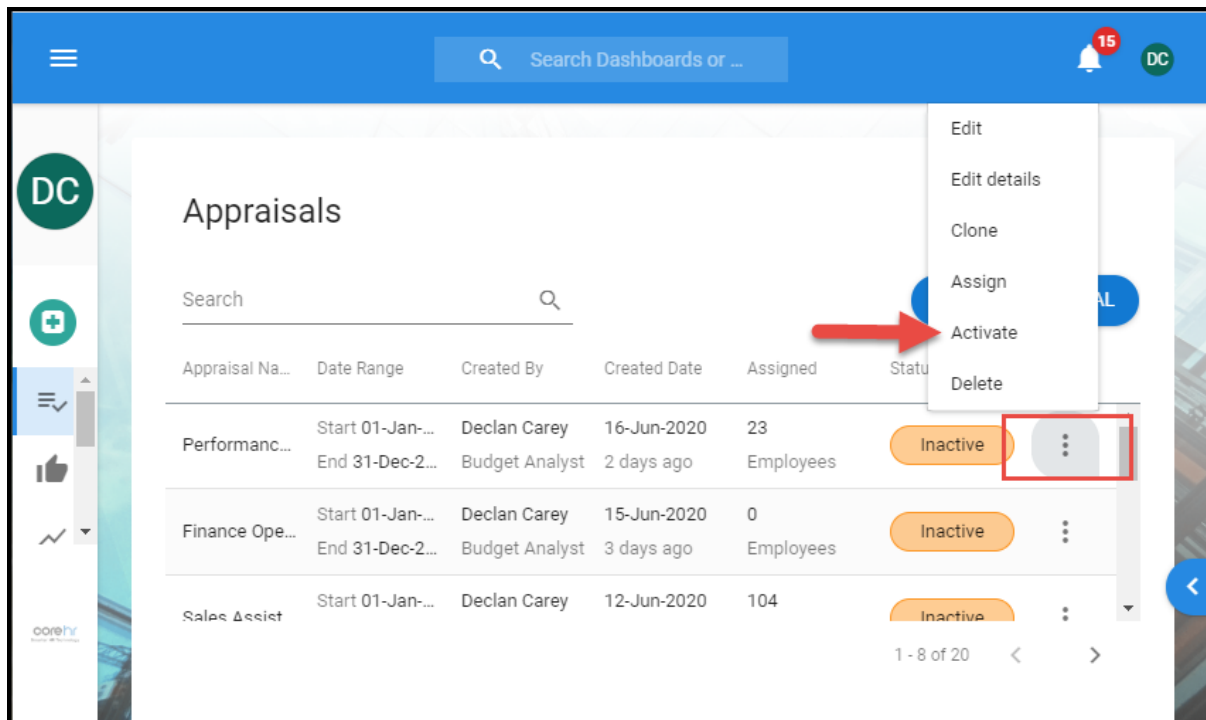

2. Search for the employee.
3. Click **Unassign**. The employee is automatically removed from the assigned list.

2.6. Activating an Appraisal Cycle

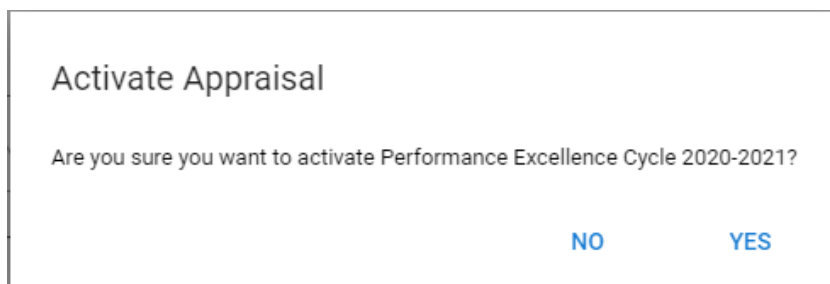

Once you have finalised the configuration and assigned employees to an appraisal, it can be activated so that it shows up for employees and managers in their respective dashboards.

To activate an appraisal cycle:

1. On the Appraisal widget, click the  button on the relevant inactive appraisal.

2. Click **Yes** on the following confirmation message.

3. The system generates the manager details of the employees assigned, and the appraisal moves from inactive to active status.

3. Administration Options

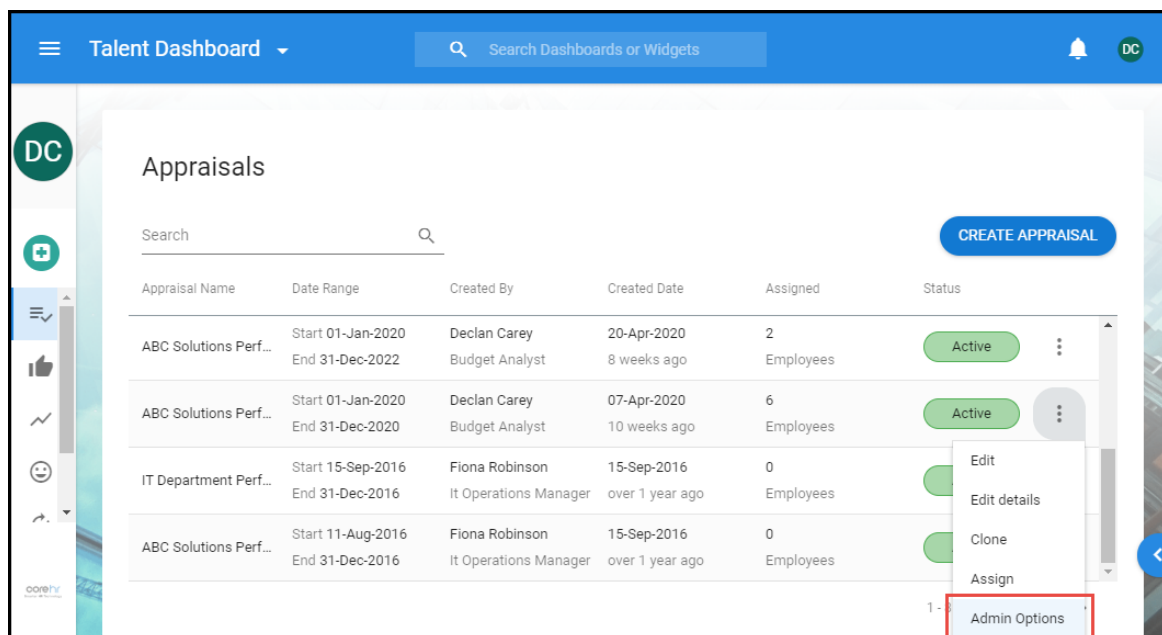

Once the appraisal is active, the options to activate and assign are no longer available.

The following table outlines the options available to a user when the  is clicked.

Item	Description
Edit	This allows you to edit the stages and steps on an active appraisal. A warning message will appear: <i>xxxxx is an active appraisal. Editing will affect reviews that are already assigned.</i>
Edit Details	This allows you to edit the title and the date periods that the appraisal is active for. However, if changing dates here, you need to be aware of the date ranges of each stage. Otherwise the following error message appears: <i>Invalid date range. To date must be on or after the stages end dates. Please edit the stages end dates first.</i>
Clone	This allows you to copy all dates, stages & steps to a new inactive appraisal cycle if further editing is needed, or to save time on creating a new appraisal year.
Admin Options	For more detail on the administration options, see section 3.1 Admin Options .

3.1. Admin Options

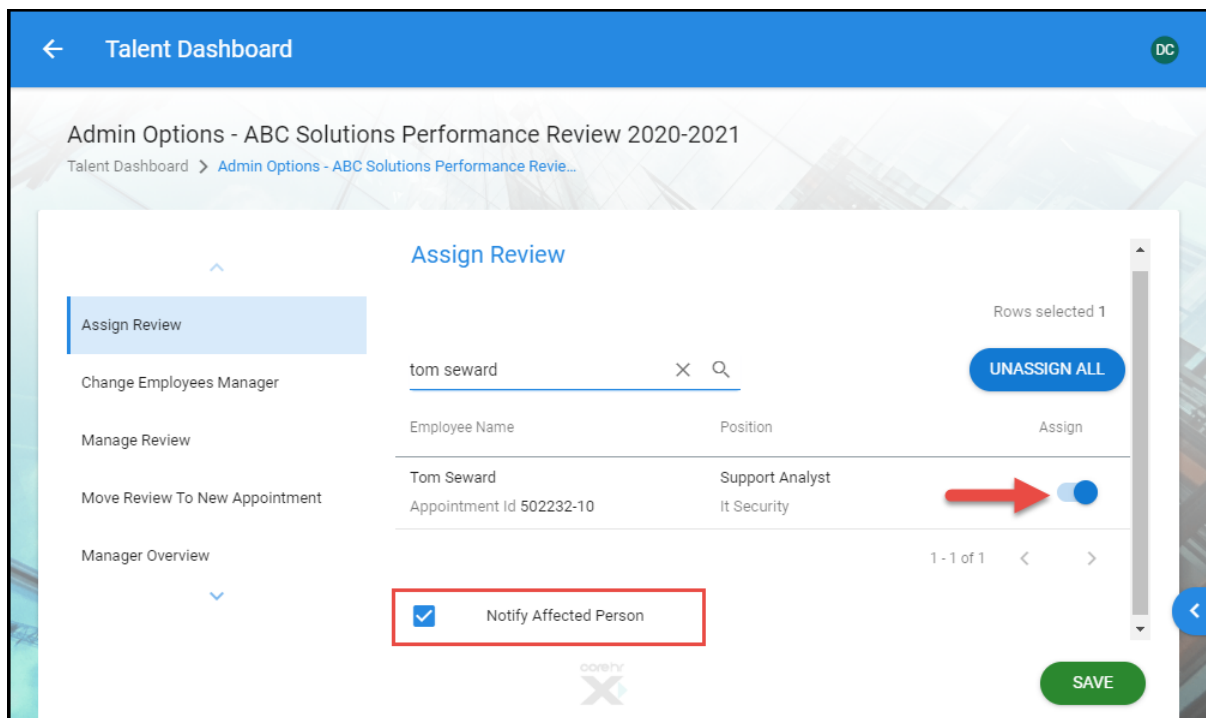

This section is used to handle ad hoc changes and day to day maintenance of active appraisals cycles. To access the *Admin Options* screen, click the  button and select **Admin Options**.

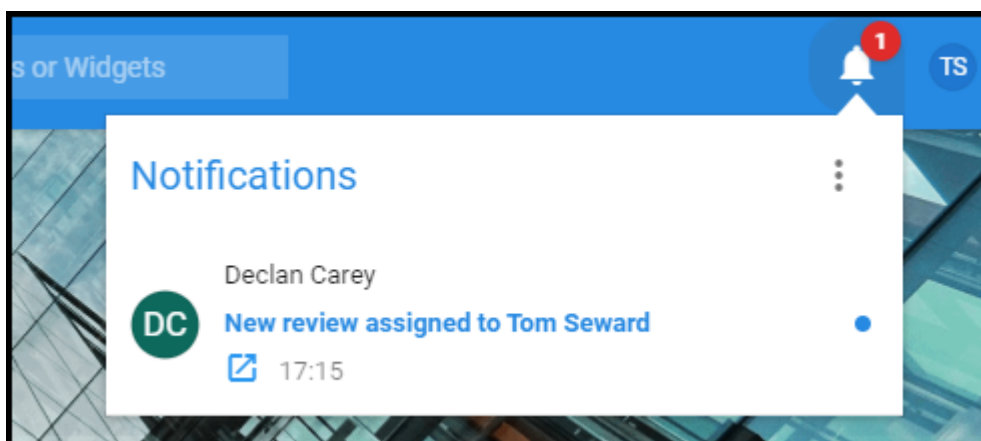

3.1.1. Assign Review

To assign an appraisal to an individual employee after it has been activated, follow the below steps:

1. Go to the *Assign Review* screen.
2. Search for the employee in question and enable the **Assign** toggle.

3. To notify the employee, tick *Notify Affected Person*. This sends the following notification:

4. Click **Save**.
5. Confirm your changes.

3.1.2. Change Employee Manager

To change an employee's appraisal manager after the cycle has been activated:

1. Go to the *Change Employees Manager* tab.

The following details appear:

Item	Description
Search	This allows you to search for employees not already assigned to this appraisal.
All Employees / Employee with no manager	This allows you to toggle between employees with or without a manager assigned to them.
Employee	This shows the employee's name and substantive appointment ID.
Position	This shows the employee's job title and department.
Manager	This shows the name of the employee's current manager or if the employee does not have one.
New Manager	This is a drop-down list of all users in the system.

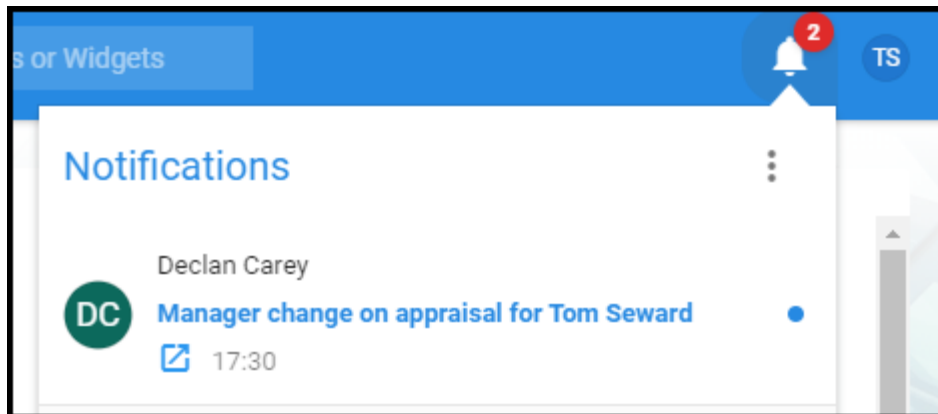

3. Search for the employee whose manager needs to be updated.
4. Click on the *New Manager* drop-down list to change their manager to the correct one.

The screenshot displays the 'Change Employees Manager' interface within the Talent Dashboard. The interface includes a search bar with the text 'tom seward' and a dropdown menu set to 'All Employees'. Below this is a table with the following data:

Employee	Position	Manager	New Manager
Tom Seward	Support Analyst	No manager	Trevor Hemmings (000204)

At the bottom of the interface, there is a checkbox labeled 'Notify Affected Person' which is checked, and a green 'SAVE' button.

5. To notify the employee, tick the *Notify Affected Person*. This sends the following notification:

6. Click **Save**.
7. Confirm your changes.

Note:

- This option does not change an employee's line manager in People Management or WFM. This update is only linked to their appraisal manager.
- If you update an appraisal manager, it updates all appraisals where the End Date is greater than or equal to today's date.
- If you update an appraisal manager, it updates all active & future cycles.

3.1.3. Manage Review

This allows you to carry out the following tasks on an active appraisal per employee:

- Send it back to the employee to sign off again.
- Send it back to the manager to sign off again.
- Send it back to the indirect manager to sign off again.
- Mark as HR reviewed.
- Delete/remove the review from the employee.

To action on these items, follow the below steps:

1. Go to the *Manage Review* tab.

The following details appear:

Item	Description
Search	This allows you to search for the employee's name.
Review Filter	This allows you to search by the appraisal status: • All Reviews • Incomplete Reviews • Complete Reviews • Reviewed by HR • Not reviewed by HR
Employee	This shows the employee's name and their corresponding appointment-ID.
Position	This shows the employee's job title and department.
Manager	This shows the employee's appraisal manager.
Status	This shows the following: • If the appraisal has been completed or is due to be completed. • Date Due / Date Completed • Stage currently open and action required.
Actions	This allows you to update the appraisal with the following: • Send Back to Employee • Send Back to Manager • Send Back to Indirect Manager • Mark as HR Reviewed • Delete Review • Complete Review
Open Appraisal button	This allows you to open the full employee's appraisal

Send Back to Employee

To send an appraisal back to an employee:

1. Search for the employee in question.
2. Select **Send Back to Employee** from the *Actions* drop-down list.
3. Mark the *Notify Affected Person* checkbox if a notification is to be sent to the employee making them aware of this change.

4. Click **Save** and confirm changes. This sends the appraisal back to the employee to sign off the final stage again.

Note: Sending back the appraisal only takes effect on the final stage.

Send Back to Manager / Indirect Manager

To send an appraisal back to a manager:

1. Search for the employee in question.
2. Select **Send Back to Manager / Send Back to Indirect Manager** from the *Actions* drop-down list.
3. Mark the *Notify Affected Person* checkbox if a notification is to be sent to the employee making them aware of this change. The manager receives a notification telling them the appraisal has been sent back to them to sign off.

Note: Sending back the appraisal only takes effect on the final stage.

Mark as HR reviewed

This allows you to update the status of the appraisal from *Completed* to *HR reviewed*.

Complete Review

As an administrator, you can complete the appraisal on behalf of the employee or the manager.

Delete Review

This allows you to remove the appraisal from the employee and all the data associated with it. Once this is done, you can re-assign the appraisal to the employee if needed. However, the appraisal process needs to start again from the first stage.

3.1.4. Move Review to New Contract

This allows you to move an appraisal to an additional contract that an employee may have on top of their substantive contract. By default, all appraisals get assigned to an employee's main

appointment ID, and are not linked to any additional appointment IDs. To link the appraisal to an additional appointment, follow the below steps:

1. Go to the *Move Review to New Appointment* tab. The following details appear on screen:

Item	Description
Search	This allows you to search for the employee's name.
Employee	This shows the employee's name and corresponding appointment ID.
Position	This shows the employee's job title and department.
Manager	This shows the employee's appraisal manager.
New Appointment ID	This allows you to move the appraisal to an additional contract.

3. Search for the employee in question and select a new appointment ID from the appointment ID drop-down box.
4. Click **Save**.
5. Confirm your changes.

3.1.5. Manager Overview

This displays the appraisal status for each manager's reportees and the manager's average final rating score.

Manager Overview

Manager	Reportees	Complete	Incomplete	Average Score	
Brian O'Keeffe	18	0	18	Not applicable	⋮
Fiona Robinson	1	0	1	Not applicable	⋮
John Wallis	3	0	3	Not appl	⋮

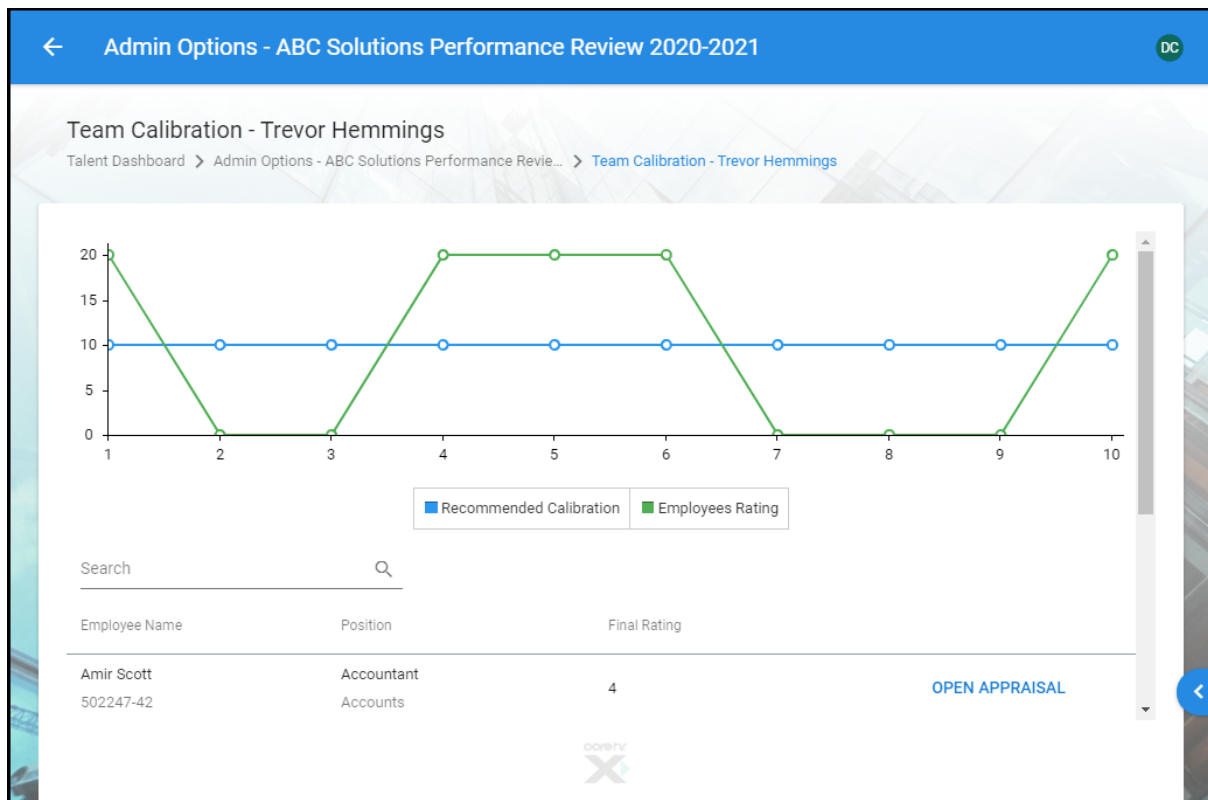

View Team
Send Notification

The following table outlines what is shown on the Manager Overview screen:

Item	Description
Search	This returns the manager based on first name and surname.
Manager	This shows the name of an employee's direct manager.
Reportees	This shows the number of reportees the manager has.
Complete	This shows how many appraisals have been completed in a manager's team.
Incomplete	This shows how many appraisals are awaiting employee, manager or HR action.
Average Score	This brings back the average score across a manager's team based on each appraisal's final rating score. This is based on the company calibration data.
View Team	This allows you to view all the manager's direct reportees and open their appraisal form.
Send Notification	This allows you to send a custom notification to a manager.

View Team

This option shows the following graph section along with the option to view an employee's appraisal.

The calibration graph is based on the calibration data configured in [section 3.1.7 Appraisal Calibration](#). It returns the value of the final rating that the employee has entered against their appraisal. To view an employee's appraisal, click **Open Appraisal**.

Warning Messages

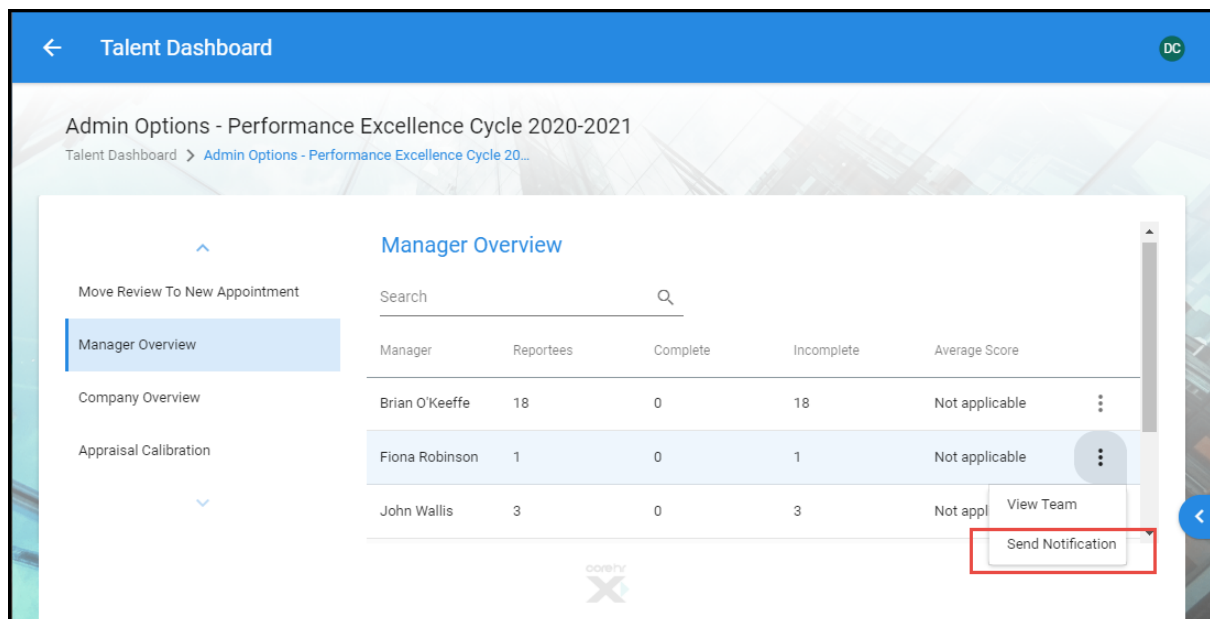

The following warning messages appear on screen, depending on different configuration and data scenarios. The graph does not show data until all credentials are met.

Message	Explanation
This appraisal is not using final rating data	The appraisal assigned to employees is not using any active rating data on their final rating stage.
This appraisal has no calibration set-up	The appraisal does not have any calibration data created yet. To create this data, refer to section 3.1.7 Appraisal Calibration .

Send Notification

To send a custom notification to a manager:

1. Click **Send Notification** against a specific manager.

2. Enter your custom text (maximum 4000 alphanumeric characters).
3. Click **OK**.

3.1.6. Company Overview

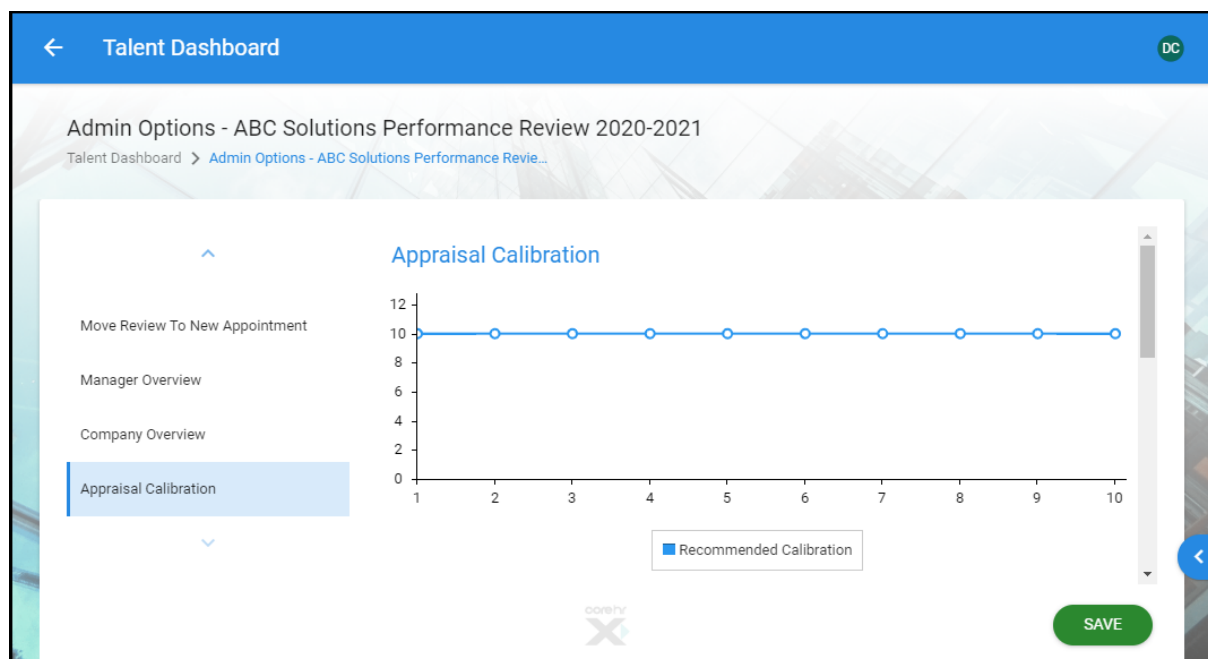

This screen gives a summary of all employee's final ratings, against the recommended calibration as per [section 3.1.7 Appraisal Calibration](#).

3.1.7. Appraisal Calibration

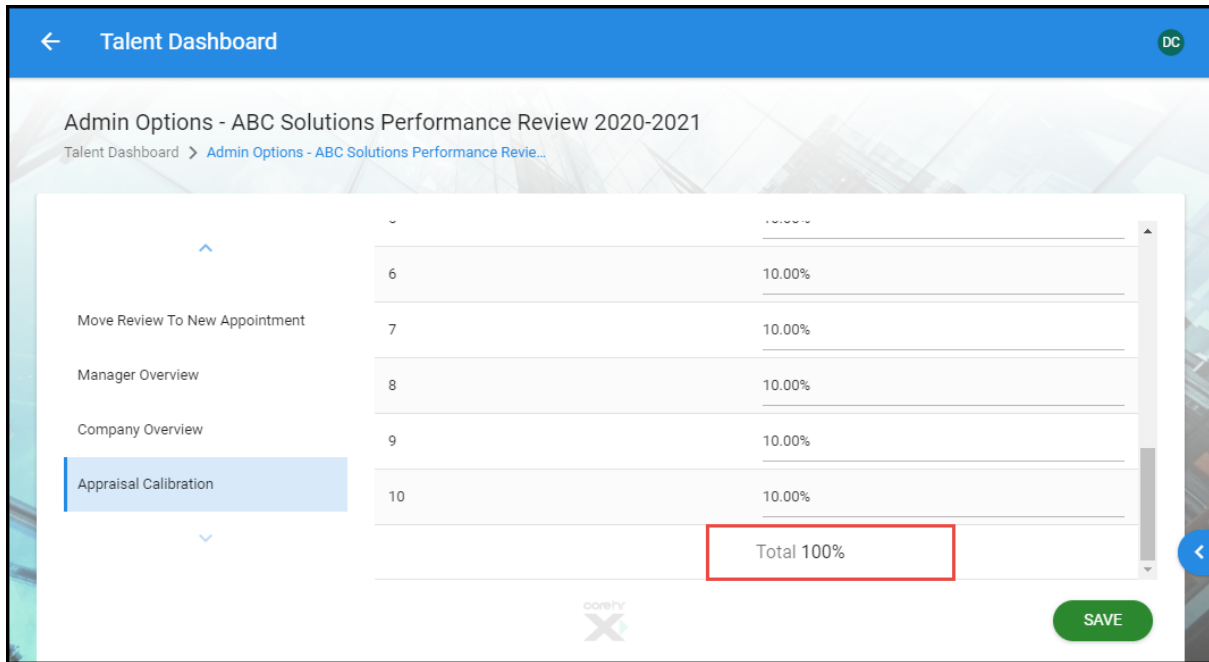

Appraisal Calibration is a process in which managers (typically within a department or function) discuss the performance of employees and agree on appraisal ratings. The calibration process assists managers in delivering appraisals that are accurate, ensures fair allocation of rewards, and helps organisations retain high performers.

To view the existing calibration details for an appraisal or create the data, follow these steps:

1. The initial graph appears on screen.

2. Along each rating, assign a percentage value. Note: the total value cannot exceed 100%.
3. Update each % by either typing in a value manually or using the arrows available to increase or decrease the % value.

The screenshot shows the 'Talent Dashboard' with a blue header. Below the header, the title 'Admin Options - ABC Solutions Performance Review 2020-2021' is displayed. The breadcrumb trail is 'Talent Dashboard > Admin Options - ABC Solutions Performance Review...'. The main content area shows a configuration table for 'Appraisal Calibration'. The table has four columns: 'Move Review To New Appointment', 'Manager Overview', 'Company Overview', and 'Appraisal Calibration'. The 'Appraisal Calibration' column shows a total of 100%.

Move Review To New Appointment	Manager Overview	Company Overview	Appraisal Calibration
6	7	8	10
10.00%	10.00%	10.00%	10.00%
			Total 100%

A red box highlights the 'Total 100%' text. A green 'SAVE' button is located at the bottom right of the table.

4. Click **Save**.
5. The details and graphs with the Manager Overview and Company Overview screens update to show the % set vs actual employee details

4. Notifications

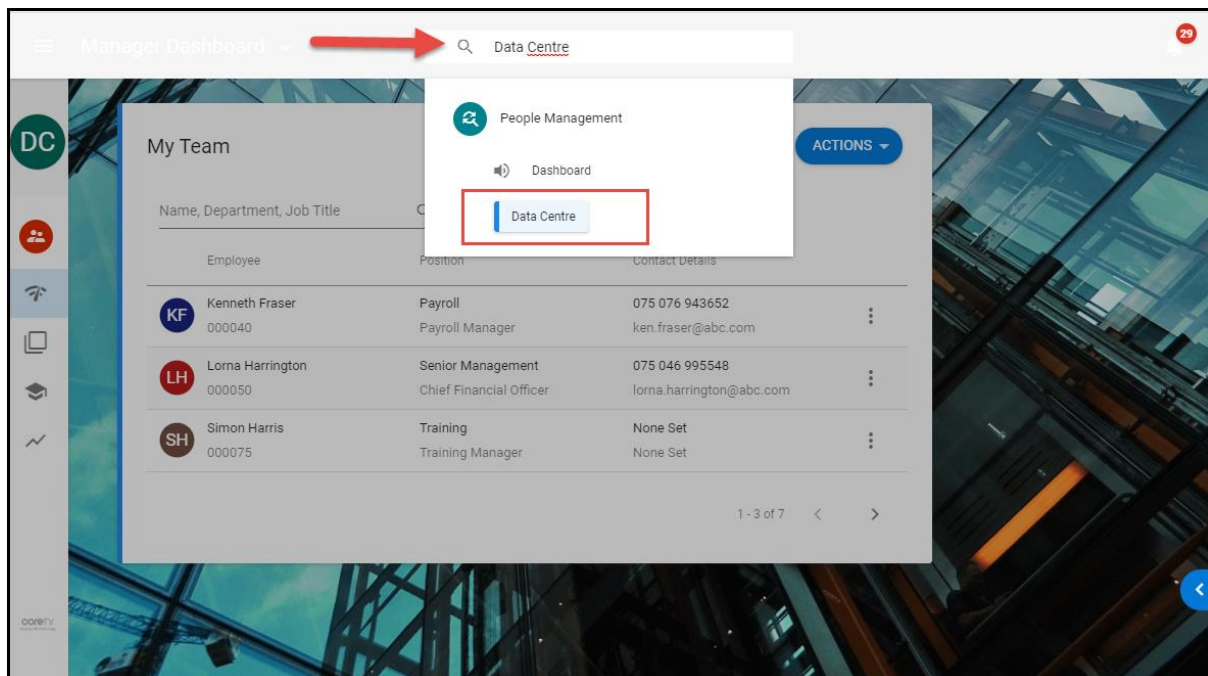

4.1. Event Management

There are three event categories that notifications and emails can be created from the talent management module:

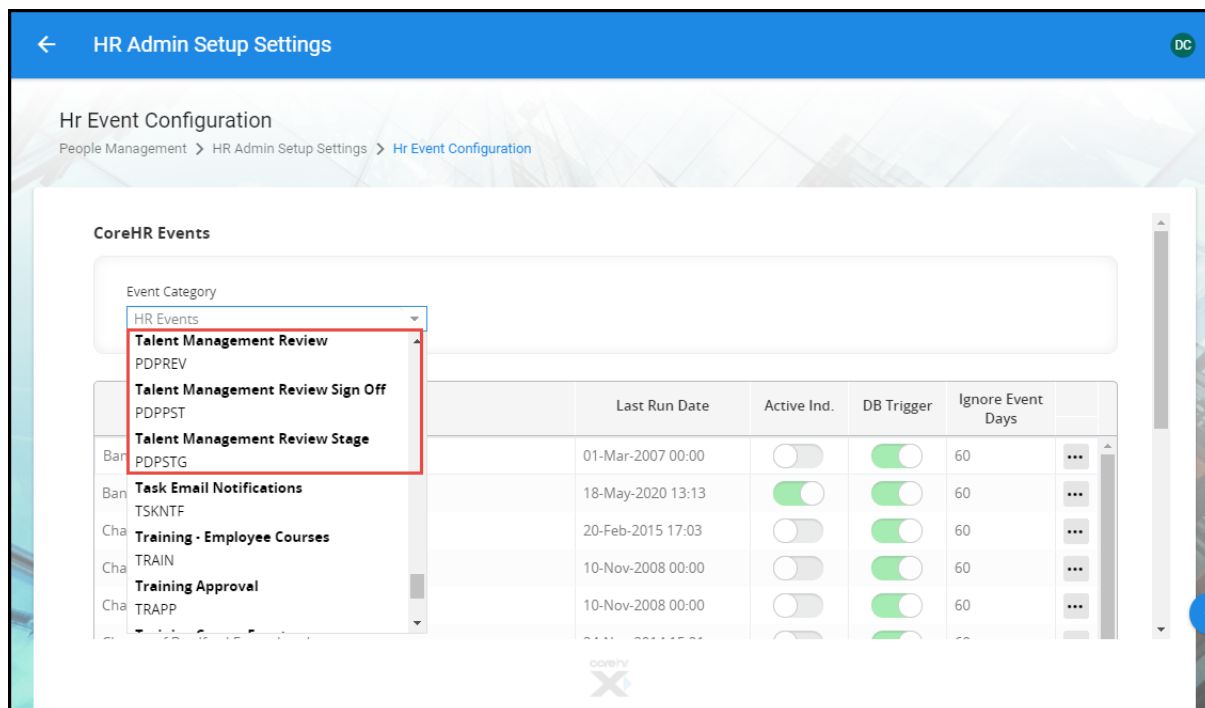

1. Talent Management Review
2. Talent Management Review Sign Off
3. Talent Management Review Stage

These can be configured using the following steps:

1. Quick Jump to *Data Centre* on the People Management dashboard

2. Click **Open** on the *HR Setup Settings* option.
3. Search for HR Event Configuration
4. Once on the HR Event Configuration screen, select the Talent Management Review options from the event category drop down list.
