# 1. Overview

## 1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure Competency frameworks in the Talent module. These are broken down into three areas for this piece of content:

1. Job Families
2. Creating Competency Frameworks
3. Mapping Competencies

This guide includes how to navigate and use the competency widget available to CorePortal users for Talent

### **Note:**

Before configuring Competency Frameworks, review the content in the following user guide for some standard configuration details:

- [Talent Management: Configuring Talent Setup - User Guide](#)

## 1.2. What is a Competency Framework?

A 'competency framework' is a structure that sets out and defines each individual competency (i.e. personal attributes or behaviours) that an employee has. Individuals must have, or must acquire, these competencies to perform effectively at work

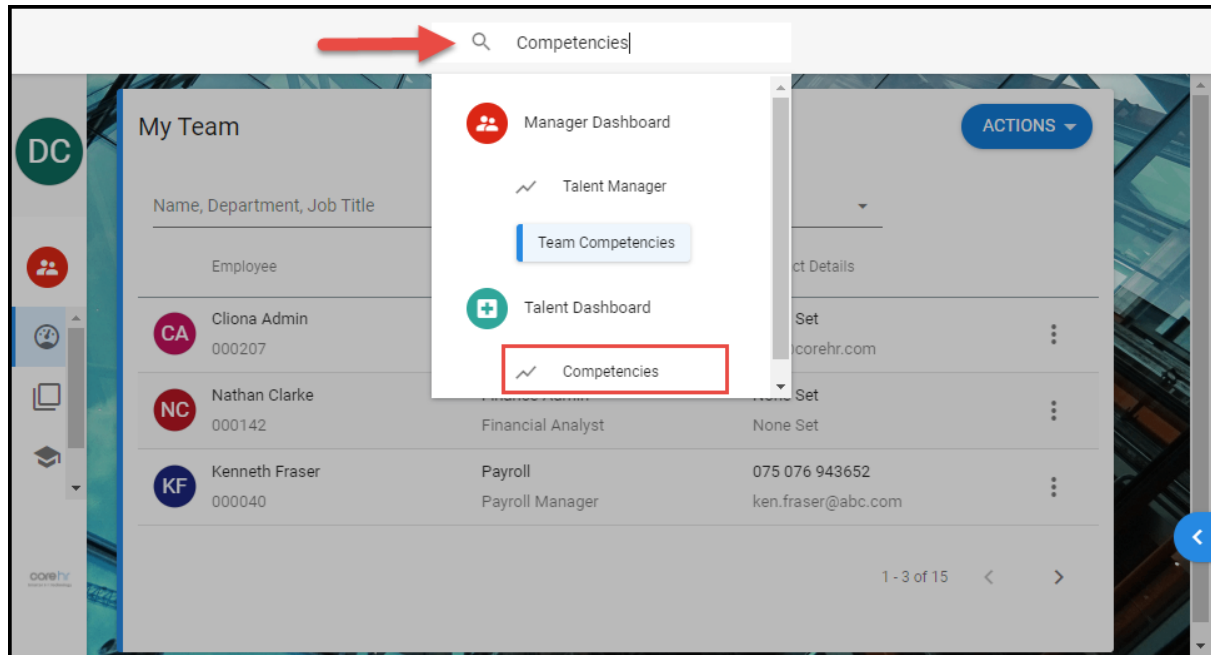

Competencies are abilities or attributes, described in terms of behavior, key to effective and / or highly effective performance within a role.

## 2. Competency Management

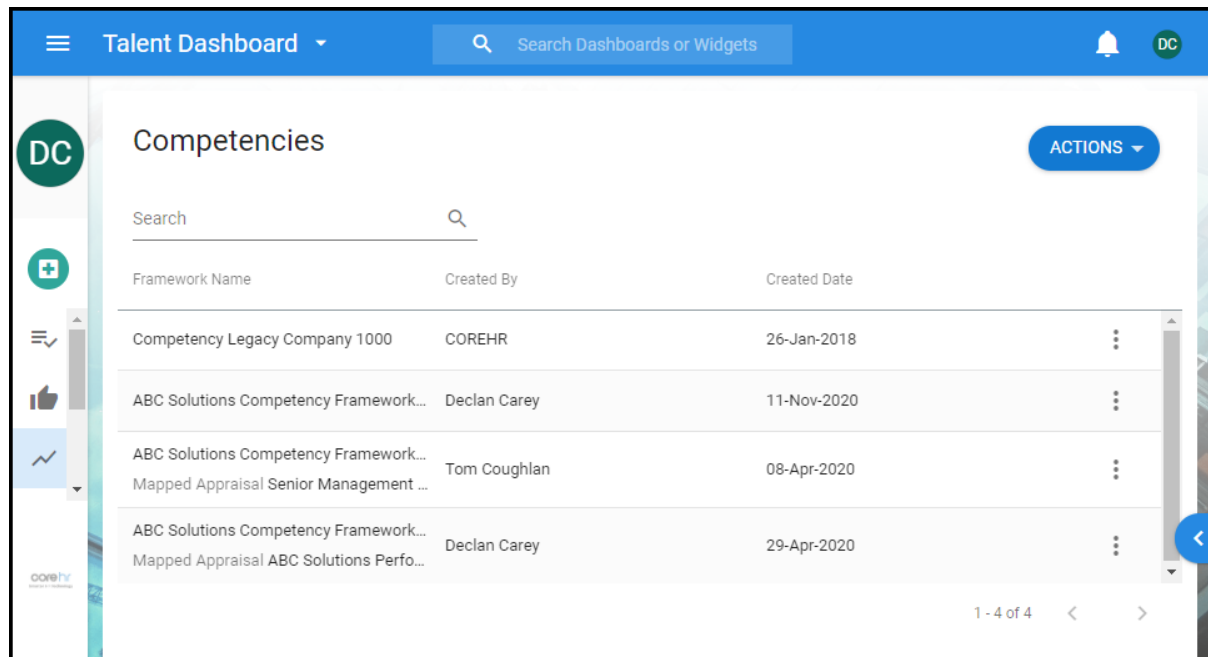

### 2.1. Accessing the Competency Admin widget

To access the competencies admin widget:

1. Quick jump to Competencies on the Talent Dashboard.

2. The Competencies tab opens, showing the following items:

3. The below table outlines what is shown on this screen.

| Item                             | Description                                                                                                                                                                      |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Search                           | This allow you to search on the title of the competency framework.                                                                                                               |
| Framework Name                   | This shows the name / title of the competency framework.                                                                                                                         |
| Created By                       | This shows the name of the user who created the competency framework.                                                                                                            |
| Created Date                     | This shows the date the competency framework was created.                                                                                                                        |
| Actions                          | This allows the user to carry out the following actions <ul style="list-style-type: none"> <li>• Map Competencies</li> <li>• Job Families</li> <li>• Create Framework</li> </ul> |
| Further Competency Admin Options | Within the  button, there are additional options for competency administration.               |

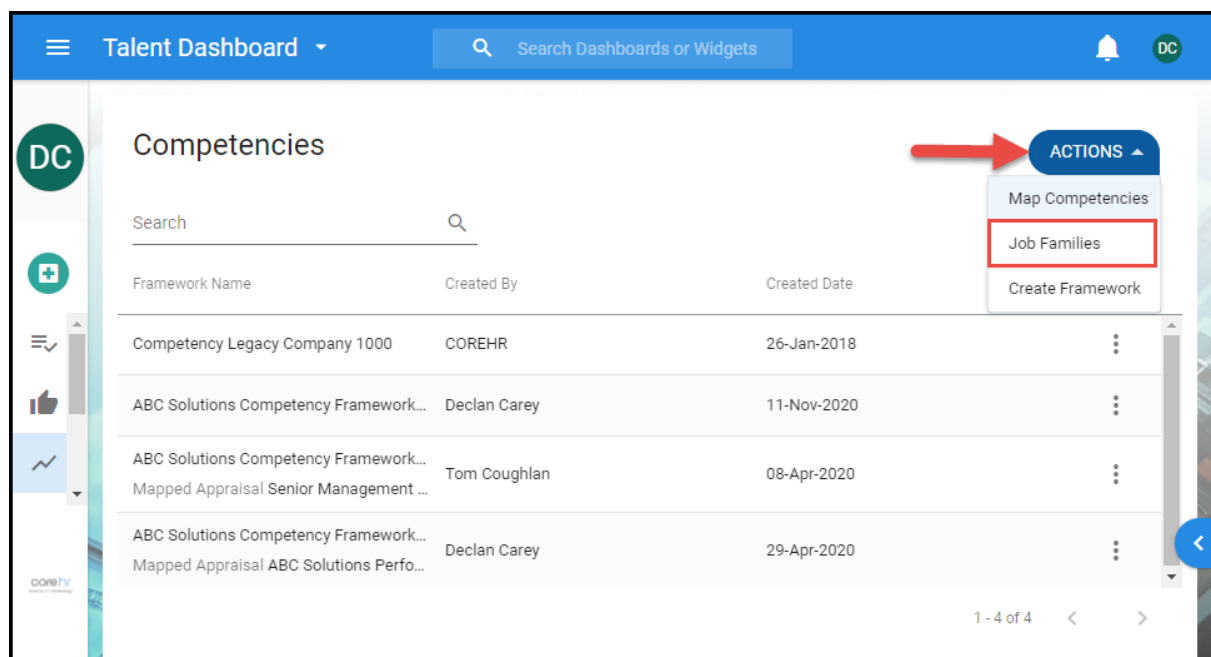

### 2.2. Creating a new Job Family

Before building a Competency Framework, it is necessary to decide upon who and where the Competency Framework is to be applied to.

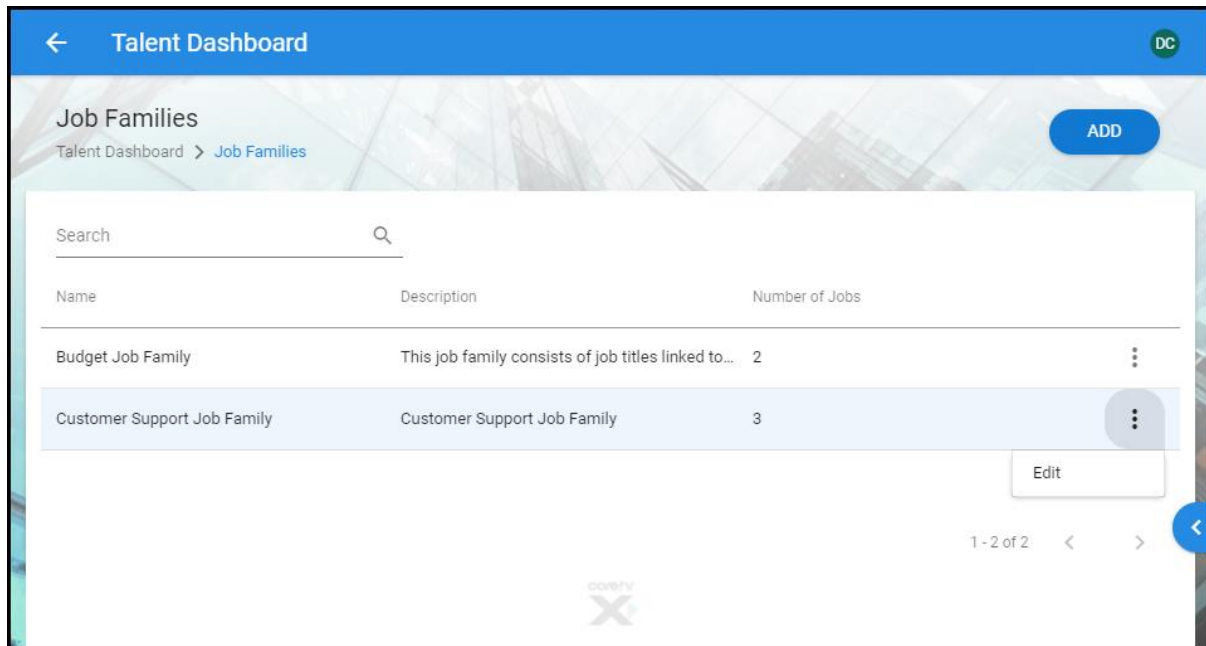

- A job family is a group of CoreHR configured Job Titles from People Management. These can be assigned to one Job Family and built into a Competency Framework.
- It is a way of grouping roles that are related to each other as they are carrying out work in a similar field of activity as opposed to being in the same Division, Department or Work Group.
- For Example: A Business Analyst Job Family can be made up of employees from across the business in Sales, Marketing, Customer Support, HR, R&D, IT etc.

To create a new job family, follow the below steps.

1. Click on the **Actions** button on the Competencies widget.
2. Click on the **Job Families** button.

- The Job Families screen appears, and the following image and table outlines what is shown here.

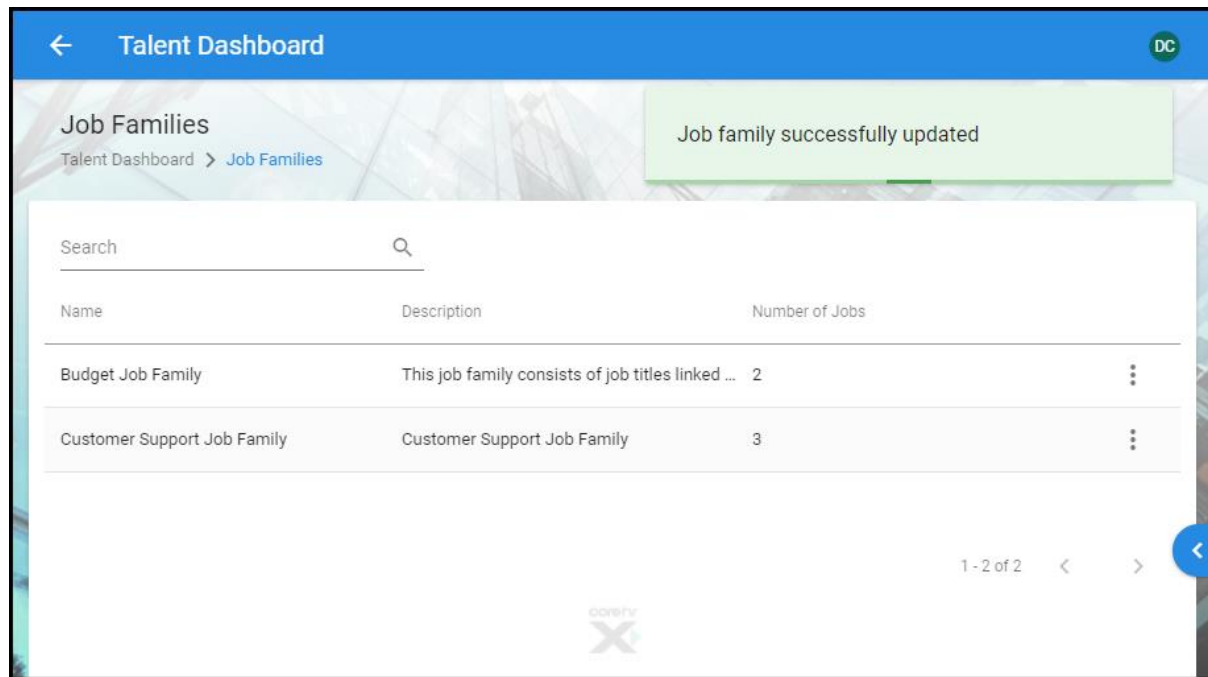

| Item           | Description                                                                  |
|----------------|------------------------------------------------------------------------------|
| Search         | This allows you to search on the job family name and job family description. |
| Add            | This allows you to add a new job family.                                     |
| Name           | This is the name / title of the job family.                                  |
| Description    | This is the description of the job family.                                   |
| Number of Jobs | This shows how many job titles have been linked to this job family.          |
| Edit           | This allows you to edit the job family name, description and job titles.     |

- Click on the **Add** button.
- The Add Job Family screen appears, the table below outlines what details need to be added to create the job family.

| Item                   | Description                                                                                           | Mandatory |
|------------------------|-------------------------------------------------------------------------------------------------------|-----------|
| Job Family Title       | This creates the title / name of the job family. Maximum of 100 alpha numeric characters are allowed. | Yes       |
| Job Family Description | This allows you to enter a maximum of 20,000 alpha numeric characters to describe the job family.     | No        |
| Not Added Jobs         | This lists out all available job titles to be added to this job family.                               | N/A       |
| Added Jobs             | This lists out all the relevant job titles that have been added manually to the job family.           | Yes       |

- To add a job title to the Added Jobs section, use the   arrows to add or remove a job title.
- Click on the **Save** button.

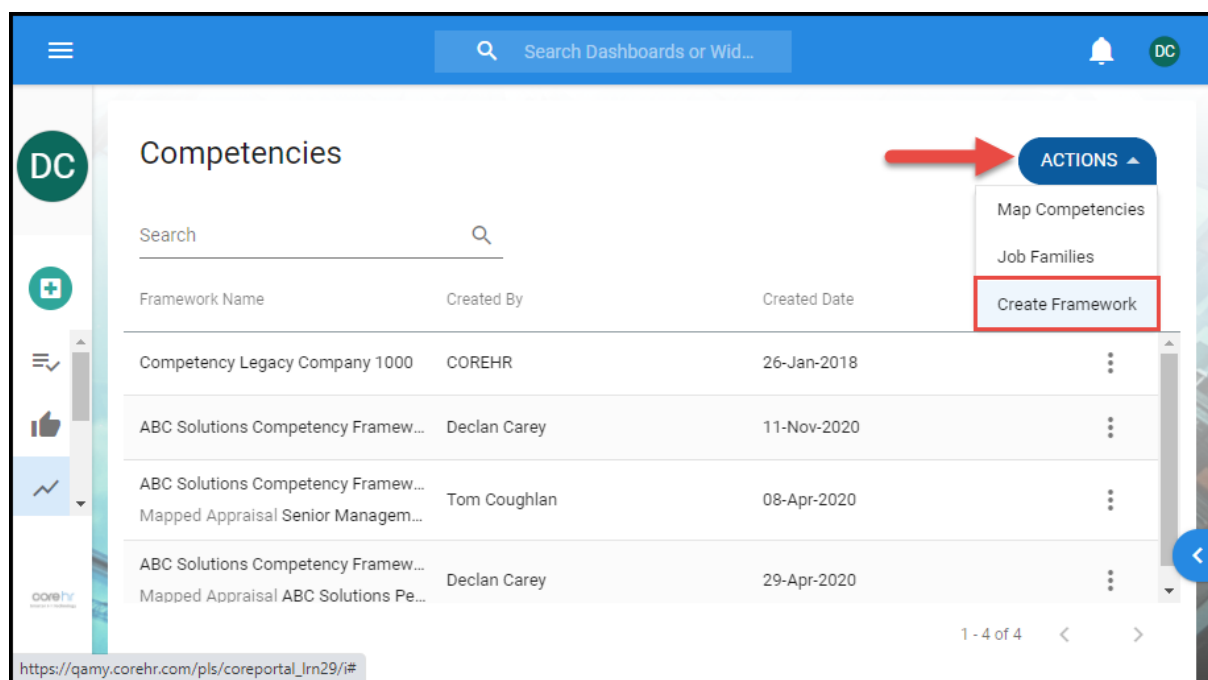

### 2.3. Creating a new Competency Framework

#### 2.3.1. Create Framework

To create a new competency framework, follow the below steps.

1. Click on the Actions button and then click on the Create Framework button

2. The *Create Competency Framework* screen appears.
3. Enter the following information:
  - a. Title: This is mandatory and a maximum 200 alpha numeric characters are allowed.
  - b. Framework Description: A maximum 2,000 alpha numeric characters are allowed.

### Configuration section

The following settings can be amended before creating a framework:

| Item                                           | Description                                                                                                                                                                           | Mandatory          |
|------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| Desired Ratings for Competencies               | This enables the following settings: <ol style="list-style-type: none"> <li>1. Core Competencies Desired Level.</li> <li>2. Display Gap between desired and manager rating</li> </ol> | No                 |
| Core Competencies Desired Level                | This allows you to set the rating that all employees are to be classed as on the system.                                                                                              | Yes, when enabled. |
| Display Gap between desired and manager rating | This allows the employee and manager to compare actually rating versus desired rating.                                                                                                | Yes, when enabled. |
| Allow Employee Rating                          | This allows the employee to rate themselves.                                                                                                                                          | No                 |
| Allow Manager Rating                           | This allows the manager to rate their employees                                                                                                                                       | No                 |
| Include Importance / Relevance to Role         | -                                                                                                                                                                                     | No, when enabled.  |
| Include Comments                               | Allows users to enter comments linked to a rating they provide                                                                                                                        | No, when enabled   |
| Include Questions                              | -                                                                                                                                                                                     | No, when enabled   |

**Note:** When creating a competency framework, the configuration settings "Include Importance / Relevance to Role" and "Include Comments" cannot be enabled when the "Include Questions" settings is enabled and vice versa.

### 2.3.2. Add Category

When the Competency Framework has been created, click on the Edit button. The Edit Competency Framework screen appears.

To populate the framework, both a Competency Category and an individual competency needs to be created before the framework can be assigned to a Job Family or a Job Title. To add a category, follow the below steps.

1. Click the **Add Category** button.
2. Enter in a Title and a Description for the new category.

The screenshot shows a mobile application interface for editing a competency framework. The top blue header bar contains a back arrow, the title 'Edit Competency Framework - ABC Solutions Competency Framework 2019-2020', and a 'DC' icon. Below the header, the page title is 'Edit - Functional Competencies'. A breadcrumb trail reads: 'Talent Dashboard > Edit Competency Framework - ABC Solutions Com... > Edit - Functional Competencies'. The main form area has two sections: 'Title \*' with the text 'Functional Competencies' and a placeholder 'Enter a title for the category'; and 'Description' with the text 'Functional competencies are specific to a specific department or a type of job.' and a placeholder 'Enter a description for the category'. At the bottom right, there is a green 'SAVE' button and a blue back arrow.

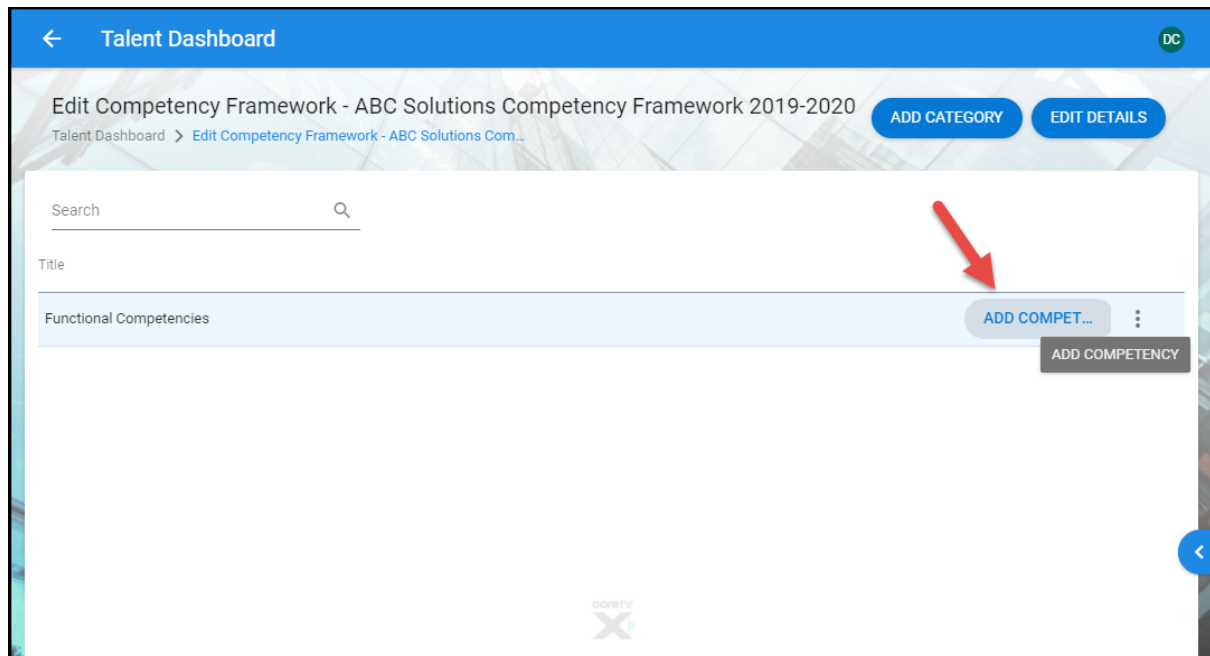

3. Click on the **Save** button.
4. Category has been successfully created.

The screenshot shows the 'Talent Dashboard' page. The top blue header bar contains a back arrow, the title 'Talent Dashboard', and a 'DC' icon. Below the header, the page title is 'Edit Competency Framework - ABC Solutions Competency Framework'. A green success message banner at the top right says 'Category saved successfully'. A breadcrumb trail reads: 'Talent Dashboard > Edit Competency Framework - ABC Solutions Com...'. The main form area has a search bar with a magnifying glass icon. Below the search bar, the text 'Functional Competencies' is displayed. To the right of this text, there is a blue link 'ADD COMPET...' and a three-dot menu icon. At the bottom right, there is a blue back arrow.

5. Repeat this configuration for any further competency categories that need to be added to the framework.

### 2.3.3. Add Competency

To add a competency to an existing category, click the Add Competency button linked to a competency category.

The Add Competency screen appears.

### Competency Details

The following image and table outlines the details that can be created and entered on screen.

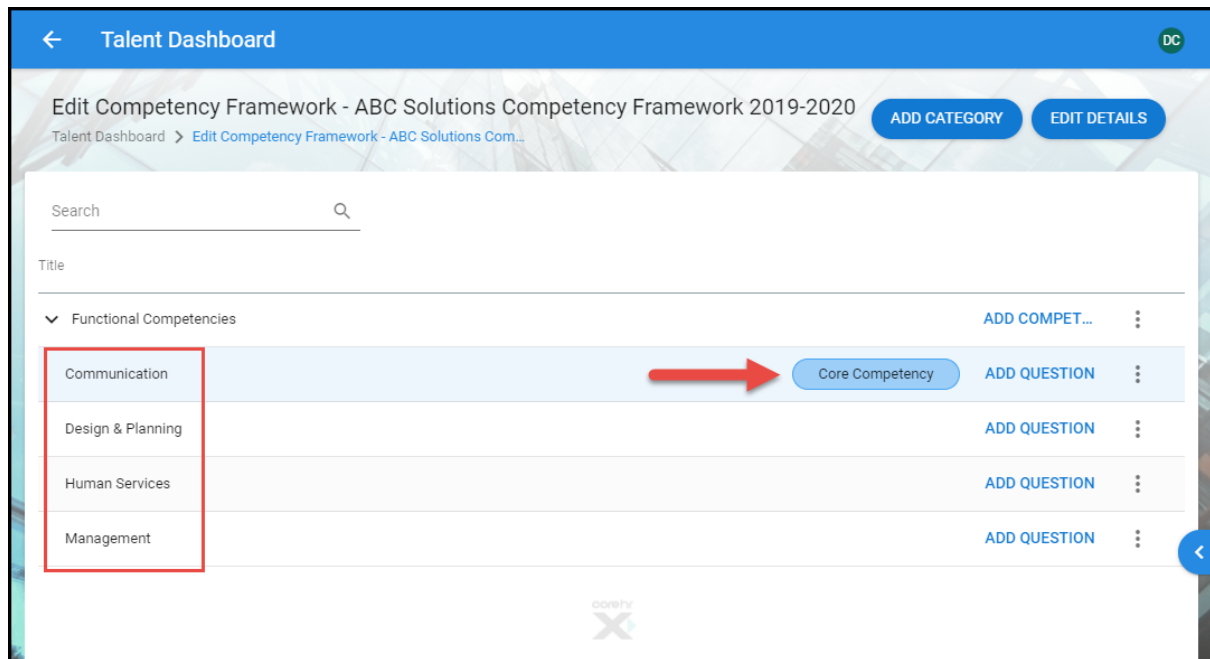

The screenshot shows the 'Add Competency' form within the 'Edit Competency Framework - ABC Solutions Competency Framework 2019-2020' interface. The form includes the following fields and controls:

- Functional Competencies:** A dropdown menu with the instruction 'Select a category for the competency'.
- Competency Title\*:** A text input field with the instruction 'Enter a title for the competency'.
- Competency Description:** A large text area with the instruction 'Enter a description for the competency'.
- Core Competency:** A toggle switch (currently turned on) with the text 'Core Competencies are assigned to everyone, otherwise the competency is treated as a job competency'.
- SAVE:** A green button at the bottom right to save the competency.

| Item                   | Description                                                                                                                   | Mandatory? |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|------------|
| Category               | Select the Competency Category this competency is to be assigned to. This defaults to the category you have already selected. | Y          |
| Competency Title       | This is the name of the competency details that are being created.                                                            | Y          |
| Competency Description | This allows you to enter in a maximum of 4000 alphanumeric characters to further explain the competency.                      | N          |
| Core Competency        | Core Competencies are assigned to everyone, otherwise the competency is treated as a job competency                           | N          |

1. Enter in the details as per table above
2. Click on the Save button.
3. Once created, the competency appears on the outer Competency framework screen.
  - a. If it has been flagged as a Core Competency, an additional label is applied to distinguish it from others.

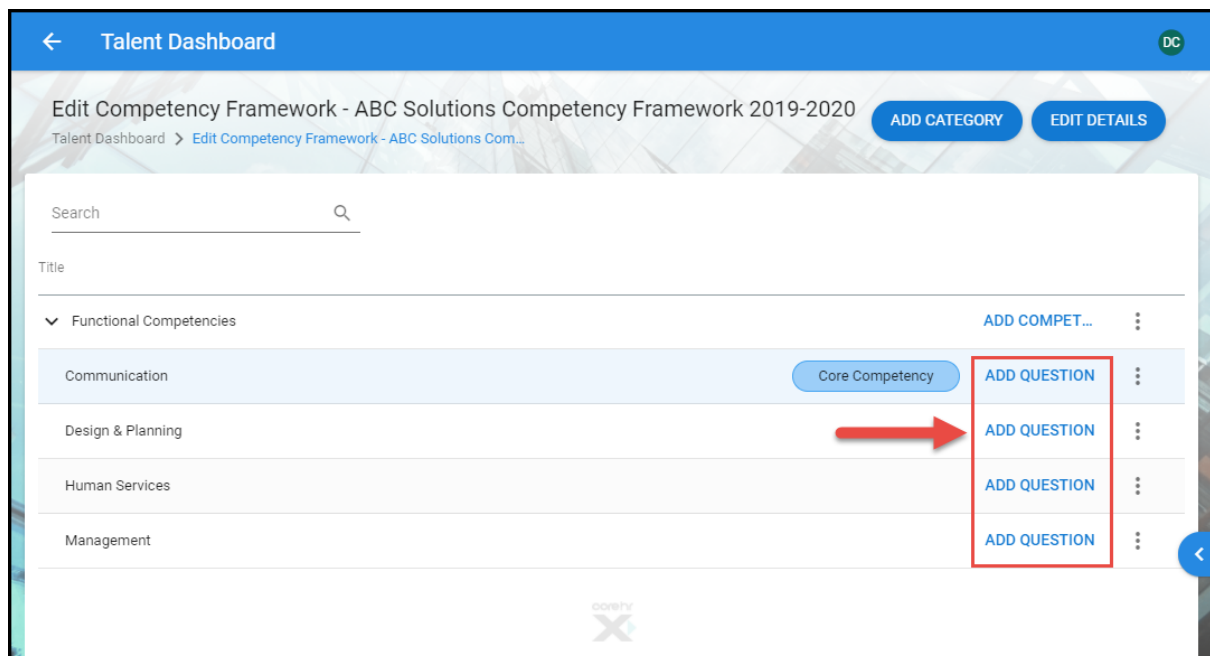

### 2.3.4. Add Question

To allow an employee and a manager to input in information against a competency, a question must be created.

1. Click on the corresponding Add Question button alongside a competency.

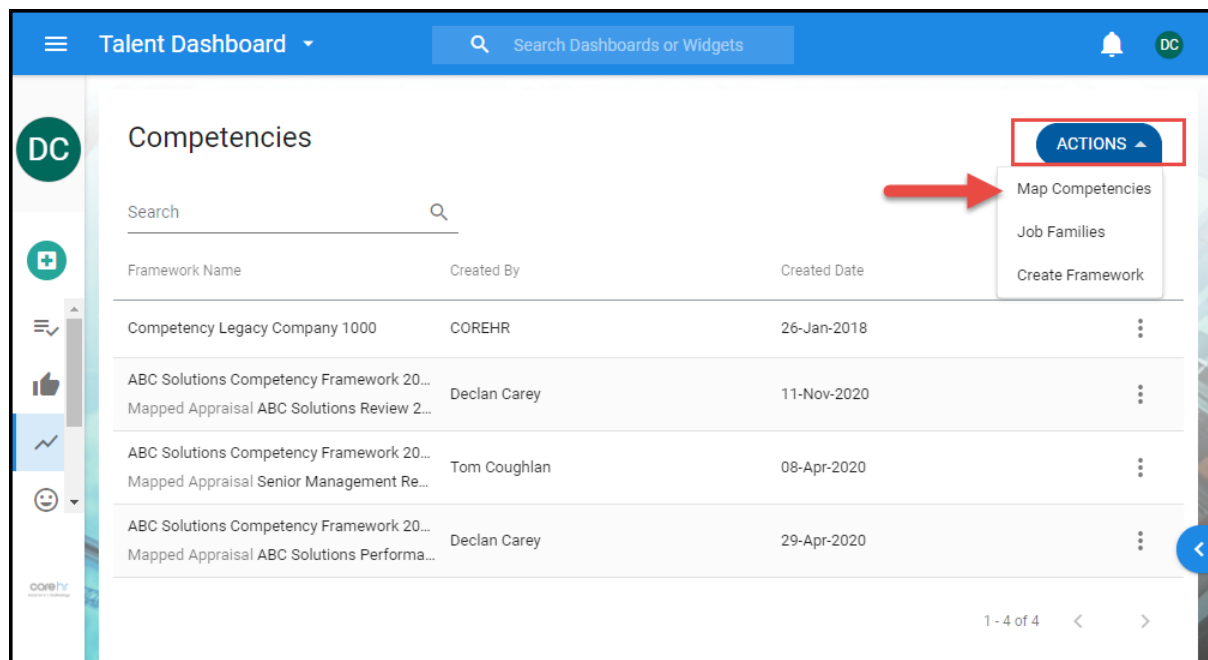

2. Enter a question title and a description.
3. Click the **Save** button
4. This question now appears against a competency when an employee or manager opens up the Competency step of an appraisal / review/

### 2.4. Mapping Competencies

#### 2.4.1. Assign Competencies

To map (assign) a competency framework:

1. Click on the Actions button on the Competency widget
2. Select the Map Competencies button.

3. The Map Competencies screen contains the following:
  - a. Job Group selection i.e. Job Title or Job Family
  - b. Job Group reference item i.e. Job Title or Job Family Reference Item.
  - c. Assigned Competencies
