1. Overview

1.1. Purpose of the Guide

This document provides a user with basic understanding of the XD Talent performance reviews and appraisal functionality. Through using this document users gain an understanding on how to implement this system to meet an organisation's talent strategy. This can be used in conjunction with other features within the XD Talent suite to meet an organisations talent strategy.

Note:

Before configuring Performance Appraisals, review the content in the following user guide for some standard configuration details:

- Talent Management: Configuring Talent Setup - User Guide

1.2. Initial Configuration

The Talent Administrator Dashboard is where Talent administrators configure the system for the organisation. From here, users can create appraisal cycles, manage the cycles, assign employees and managers as well as monitor progress on appraisal cycles. XD Insight can also be used to monitor information through the creation of reports in the dedicated XD Talent business area.

1.3. What is a Performance Review Cycle?

The following steps clarify the process that is to take place when creating a Performance Review Cycle on PeopleXD.

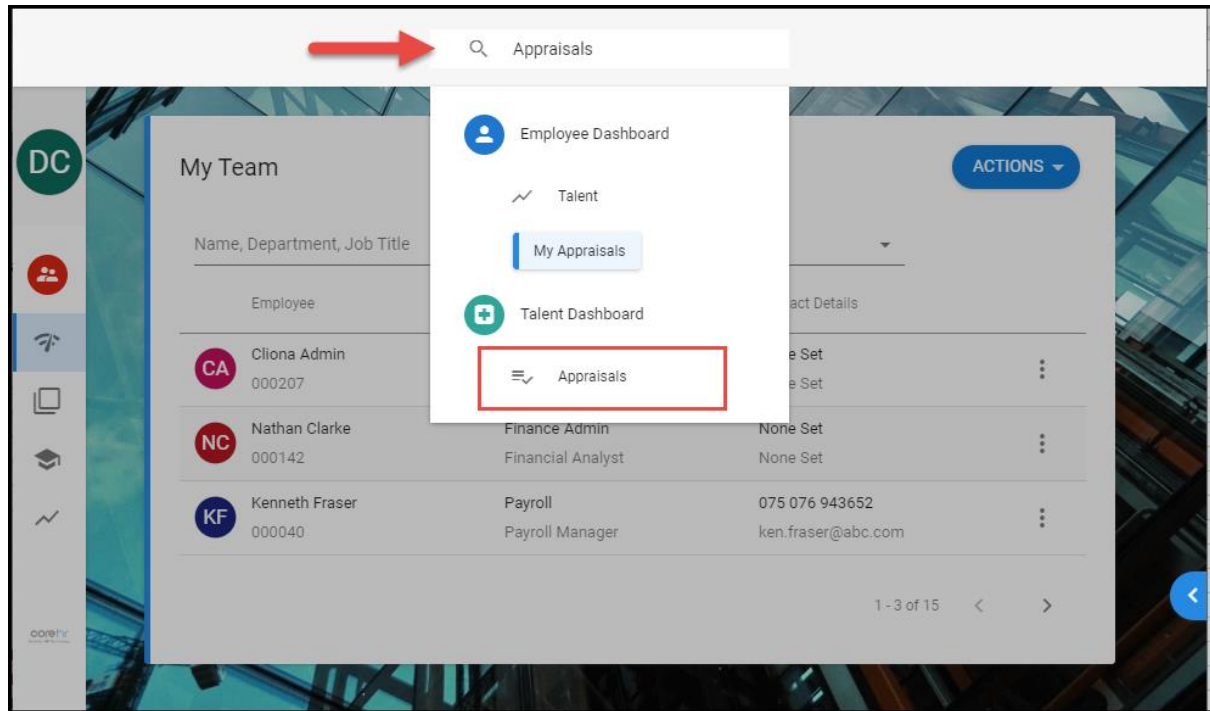

1. Configure & confirm Talent Setup (& Reference Items)
2. Create Performance Appraisal
3. Create Stages
4. Create Steps
5. Assign Performance Appraisal
6. Activate Appraisal
7. Manage Appraisal via Administration options
8. Run reports via Insight

2. Appraisals / Reviews

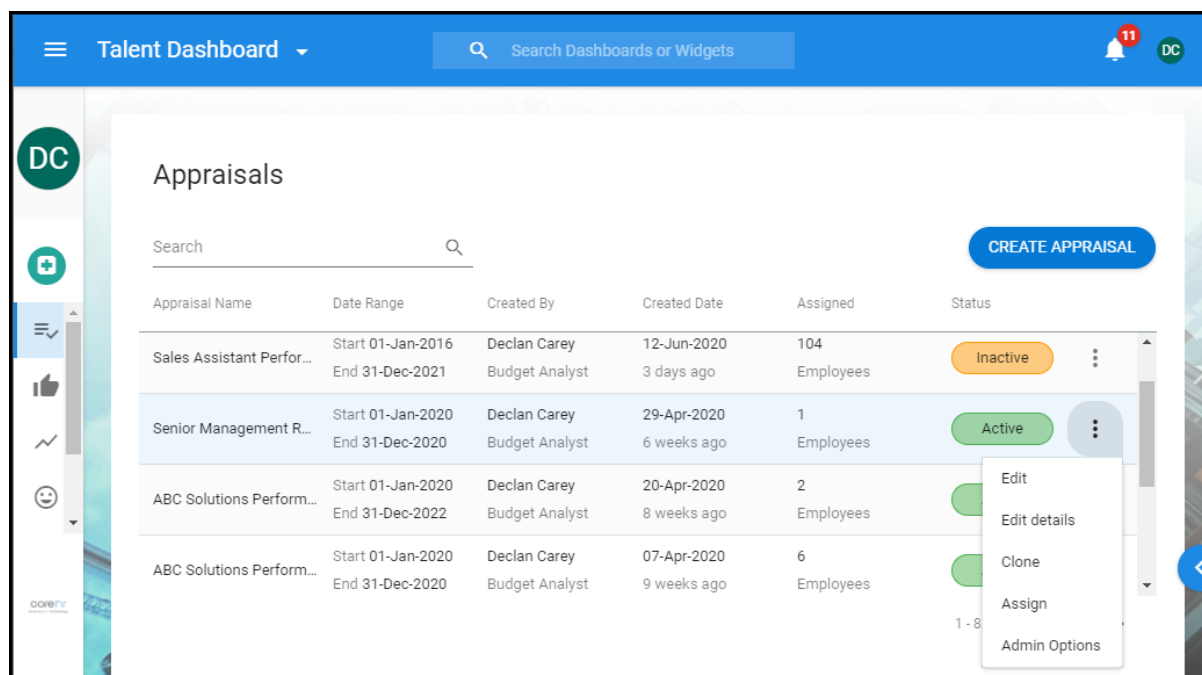

2.1. Accessing Appraisal Admin widget

To access the appraisal admin widget:

1. Quick Jump to *Appraisals* on the Talent Dashboard.

2. The *Appraisals* tab opens, showing the following items:

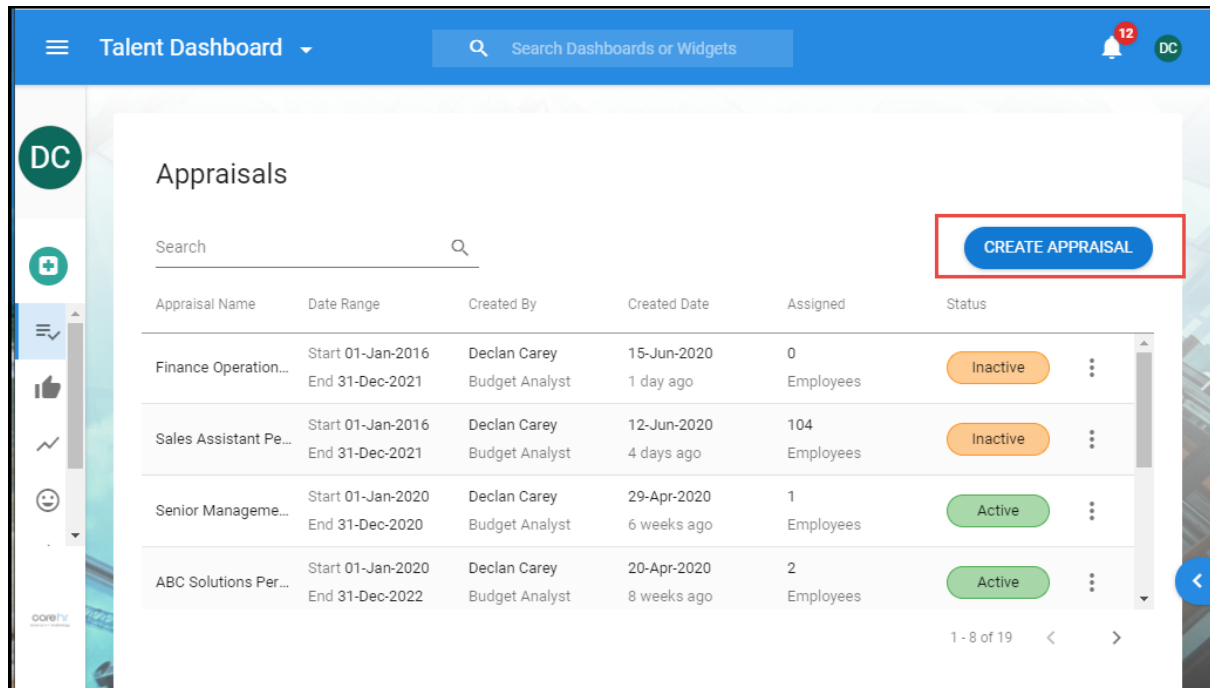

The below table outlines what appears on this screen.

Item	Description
Search	This allows you to search on the title of the appraisal.
Appraisal Name	This shows the name / title of the appraisal.
Date Range	This shows the start date and the end date of the appraisal cycle.
Created By	This shows the name and job title of the user that created the appraisal.
Created Date	This shows the date the appraisal cycle was created and how many weeks has elapsed since.
Assigned	This shows the number of employees currently assigned to this appraisal. This is blank if the cycle hasn't been assigned yet.
Status	This shows the current status of an appraisal. The following are the types of status available for an appraisal cycle: - Active (currently in use, cannot be deleted) - Inactive (not in use, can be activated or deleted.)
Further Appraisal Options	Within the  button, there are additional options for appraisal administration.

2.2. Creating a New Appraisal / Review Cycle

To create a new appraisal / review cycle to be activated and assigned to employees follow the below steps:

1. Click on the **Create Appraisal** button.

2. The Create Appraisal screen appears, and the following image and table shows what is recorded on screen.

Create Appraisal

Appraisal Title *
Enter a title

Document
Select a file

Start Date *
Select a start date

End Date *
Select an end date

Move with persons contract changes

Allow manager drill to subteams

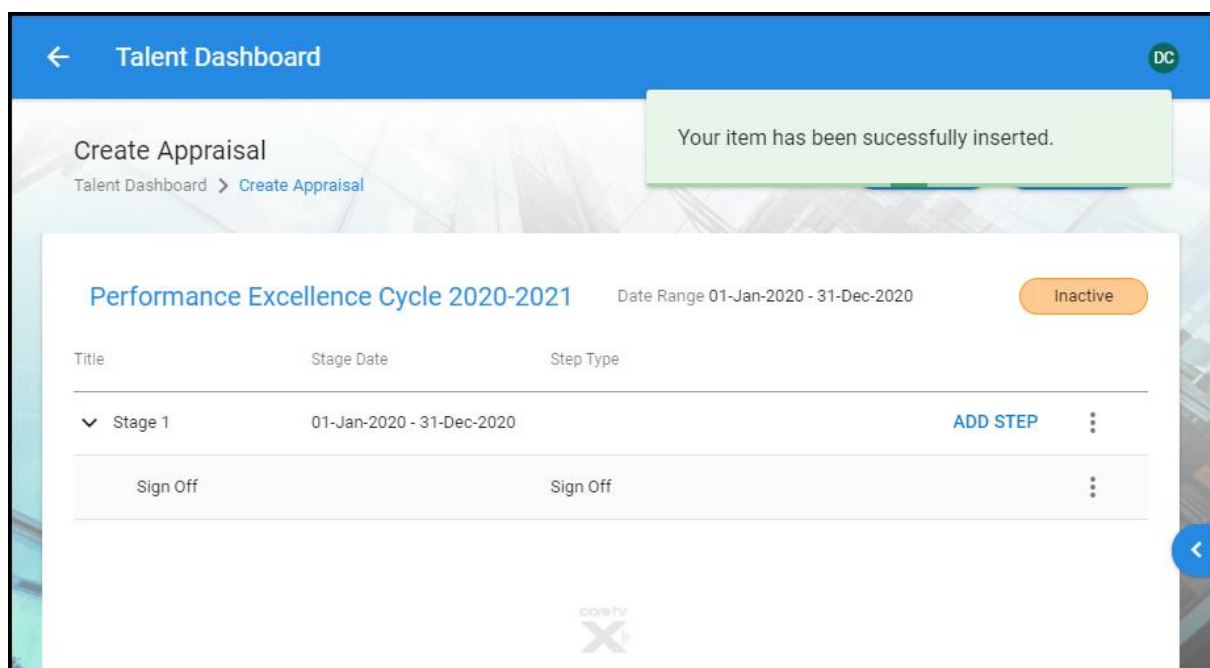

CANCEL

OK

Item	Description
Appraisal Title	This is the name of the appraisal / review cycle. A maximum of 200 alphanumeric characters are allowed.
Document	This allows you to upload any general supporting documentation to the manager or employee who may be completing it. This is not employee specific.
Start Date	This is the opening date of the appraisal. This also populates as the opening date of the first stage.
End Date	This is the closing date and the date by which the appraisal has to have final sign off completed.
Move with persons contract changes	Enabled by default. This comes into play when an employee gets a new contract. Appraisals that have already started follow with the employee to the new position and new manager if this is enabled. If your organisation is following appointment-based appraisals, keep this enabled.

Item	Description
	If your organisation is not configuring appointment-based appraisals, disable this setting. Once this is deactivated, appraisals end once the employees contract has ended.
Allow manager to drill to sub teams	Enabled by default. This option allows the user to view different team structures underneath the manager.

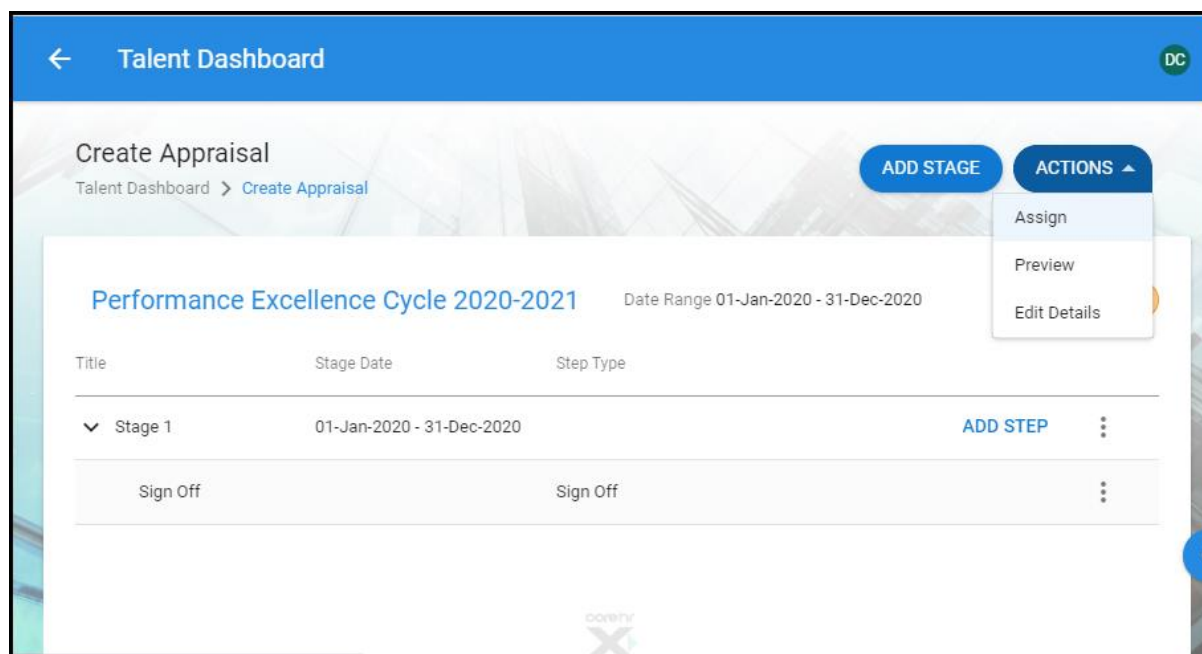

- Once all required fields have been populated, click the **Ok** button.
- The appraisal / review cycle automatically displays on screen. From here, you can complete the creation of the cycle or save and come back to it at a later time.

2.2.1. Configuring Review Stages

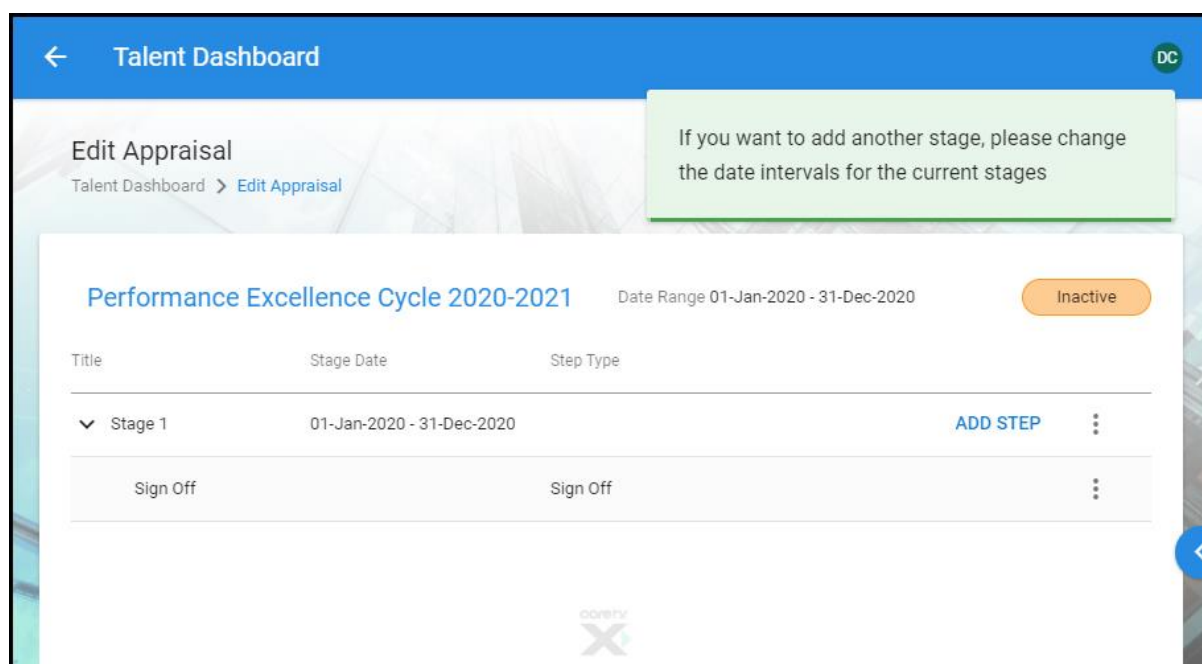

The appraisal cycle is a combination of stages within the cycle and steps within the stages. This can be visually seen through the initial page that is displayed below. The user can create stages by using the **Add Stage** button

Within this screen, the following items are available as outlined in the image below.

Stage Options

During the configuration of an appraisal cycle, one stage is automatically created as soon as the cycle has been created. This can be edited by adding steps, in addition to the default sign off step that is also created. This can again be edited as required. However, if adding any additional stages to the cycle, the date intervals of the initial stage have to be adjusted, as is seen on the below image after clicking the **Add Stage** button.

Note:

- Each appraisal cycle requires one final sign off step to be created.
- It is recommended that the user creates all required stages first before adding steps.

Add New Stage

To add a new stage to the appraisal cycle, follow the below steps.

1. Click the **Add Stage** button. The *Add Stage* screen appears.

The screenshot shows the 'Add Stage' modal in the Talent Dashboard. The modal is titled 'Add Stage' and contains the following fields:

- Stage Title***: A text input field with the placeholder 'Enter a title'.
- Description**: A text input field with the placeholder 'Enter a description'.
- Start Date***: A date picker field with the placeholder 'Select a start date'.
- End Date***: A date picker field with the placeholder 'Select an end date'.
- Activate Stage**: A toggle switch.

At the bottom of the modal are 'CANCEL' and 'OK' buttons. In the background, the 'Edit Appraisal' screen is visible, showing a red arrow pointing to the 'ADD STAGE' button.

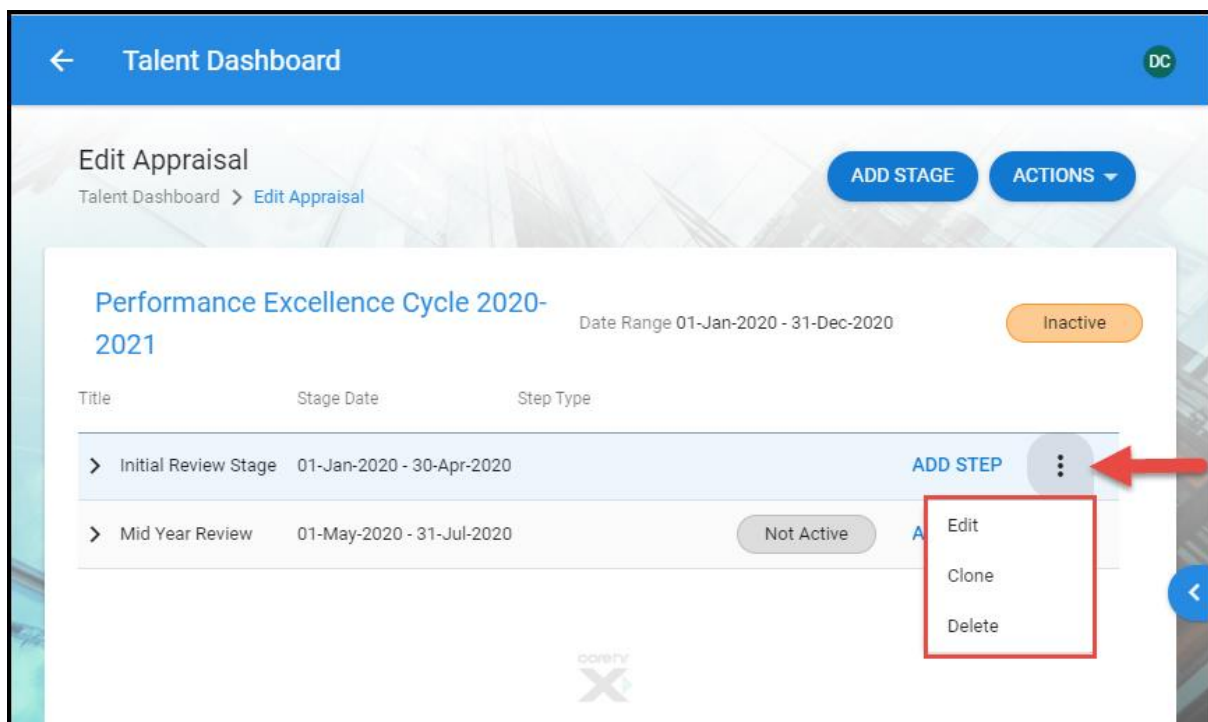

The table below explains the items on screen that are to be populated before a stage can be created.

Item	Description	Mandatory
Stage Title	This is the name of the stage. A maximum of 200 alphanumeric characters are allowed.	Yes
Description	This gives a detailed explanation of what this stage consists of. A maximum of 2000 alphanumeric characters are allowed	No

Item	Description	Mandatory
Start Date	This is the start date of the current stage. The system does not allow you to enter a date prior to the end date of the previous stage.	Yes
End Date	This is the end date of the current stage. The Start and End Date cannot be the same day.	Yes
Activate Stage	Enabled this setting once all steps have been added to the stage.	No

Edit Stage

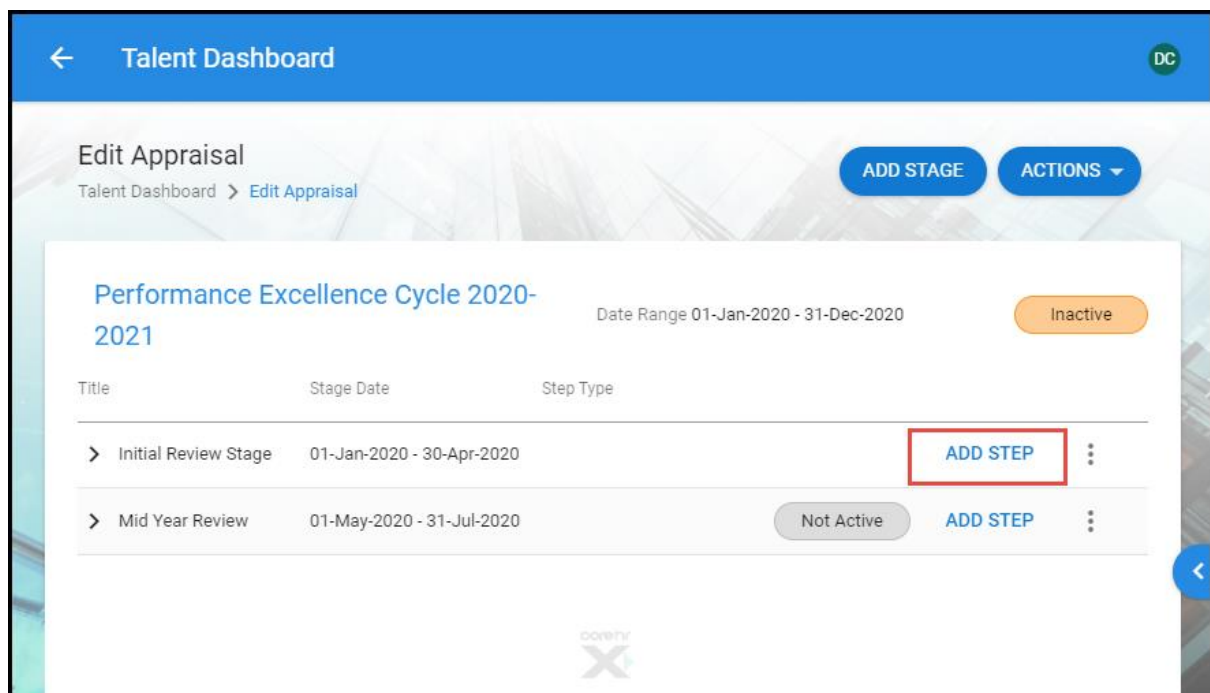

Any stage can be edited at a later time if required. The options to available when the  button is clicked.

Item	Description
Edit	This allows you to edit the following information: • Stage Title • Description • Start Date • End Date • Activation Status
Clone	This allows you clone the stage title and all linked steps of the stage. The date range needs to be updated to follow the correct timelines of the cycle before saving the cloned stage.
Delete	This allows you to delete the stage, along with all linked steps of the stage. All related steps are deleted, and it is not possible to recover them.

2.2.2. Repeated Configuration for Appraisal / Review Steps

Steps can be added to any stage by clicking on the **Add Step** button to add a relative step. There are currently a number of steps that are available to make part of the appraisal / review cycle.

Follow the below guidance on how to add a new step to a stage. This process is repeatable for all steps, with the addition / removal of certain settings depending on the step type.

1. The *Add Step* screen opens.

2. The following items appear on screen, to be completed before the step can be created.

Item	Description	Mandatory
Step Type	Select the type of step to be added. See sections below as to what types are available	Yes
Title	This is the name of the step. A maximum of 200 alphanumeric characters are allowed to be entered.	Yes
Description	This allows you to enter further information and details surrounding the step. A maximum of 4000 alphanumeric characters are allowed to be entered.	No
Applicable People	This restricts the step to be viewed or edited by this person. The options here are: • Employee • Manager • Employee and Manager	Yes

Item	Description	Mandatory
Position of Step	This is where the step is to be situated within the stage. The last step of the final stage needs to be the Final Rating.	Yes
Mandatory Step	This allows you to flag a step as compulsory or optional.	No
Other Party Information	This setting controls the other parties not selected during the <i>Applicable People</i> setting access to the step	Yes

- The following are the step types available to be added to a review stage.

360 Reviews

This adds the 360-review widget to the step, which displays all active 360 reviews. Employees can use this to request or provide 360 feedback and view their feedback. Managers can use this to view the 360 feedback that was garnished during the appraisal cycle.

 **Note:** Configuration is carried out by administrators in the 360-review widget of the *Talent Administrator* dashboard.

Manager Analytics

This makes any CoreInsight analytics widget available as part of the appraisal. A user can then define what report is to be made available. This step is only visible to the manager so that it can be used to view team analytics and compare an individual when assessing their performance. To create a CoreInsight widget to appear here, follow the below steps:

- Go to a CoreInsight and open an existing report or create a new one based on the talent management business area.
- Select *Manage Report* option.
- Select *Chart* option.

← Manager's Team Performance Update

Manage Report

CoreInsight > Manager's Team Performance Update > Manage Report

- To add the chart to the appraisal step, select the report and click the arrows to bring it across to the *Selected items to appear in your Report* section.

Career Planning

This step allows the employee to create a new career development plan for the employee in question

Competencies

This provides a window into the competencies area where employees and managers can score their competencies that have been assigned to them through a job family or job title.

A competency framework needs to be linked to this step, which is in addition to the standard step configuration mentioned above.

Note: Configuration is carried out by administrators in the competencies widget of the *Talent Administrator* dashboard.

The screenshot displays the 'Edit Appraisal' interface. At the top, there is a blue header with a back arrow and the text 'Edit Appraisal', and a 'TC' icon in the top right corner. Below the header, the 'Add Step' section is visible, with a breadcrumb trail: 'Talent Dashboard > Edit Appraisal > Add Step'. A red rectangular box highlights a dropdown menu titled 'Competency Legacy Company 1000'. This menu lists two items: 'ABC Solutions Competency Framework 20...' and 'ABC Solutions Competency Framework 20...'. Below the list, it shows '1 - 3 of 3' with left and right navigation arrows. Underneath the dropdown is a text input field labeled 'Framework*' with a placeholder 'Select a Framework'. To the right of the dropdown, there is a dropdown menu showing the number '2' and a label 'Select the order of position for this step'. At the bottom right of the interface is a green 'SAVE' button. The 'corehr' logo is visible at the bottom center.

Document

This facility allows employees or managers upload any supporting documents that may be part of the appraisal process such as proof of qualifications, etc. These documents are employee specific.

Meeting

This allows a manager to create a meeting request (as an email attachment / .ics file) that can be sent to an employee where the employee can accept, decline or propose a different time. This is used to facilitate any meetings that may take place.

Objectives

This provides a window into an objective cycle where employees and managers can view and manage their objectives. An objective cycle needs to be linked to this step, which is in addition to the standard step configuration mentioned above.

The screenshot shows the 'Edit Appraisal' interface. At the top, there's a blue header with a back arrow and the title 'Edit Appraisal'. Below this, the 'Add Step' section is visible, with a breadcrumb trail: 'Talent Dashboard > Edit Appraisal > Add Step'. The 'Step Details' section contains a 'Manager and Employee' dropdown set to '2' with a note 'Select the order of position for this step'. Below this, the 'Objective Cycle' dropdown is highlighted with a red box. It shows two options: 'ABC Solutions Objective Cycle 2020-2021 ...' and 'Balance Score Card Test (01/Jan/2020 - 3...'. A green 'SAVE' button is at the bottom right.

Note:

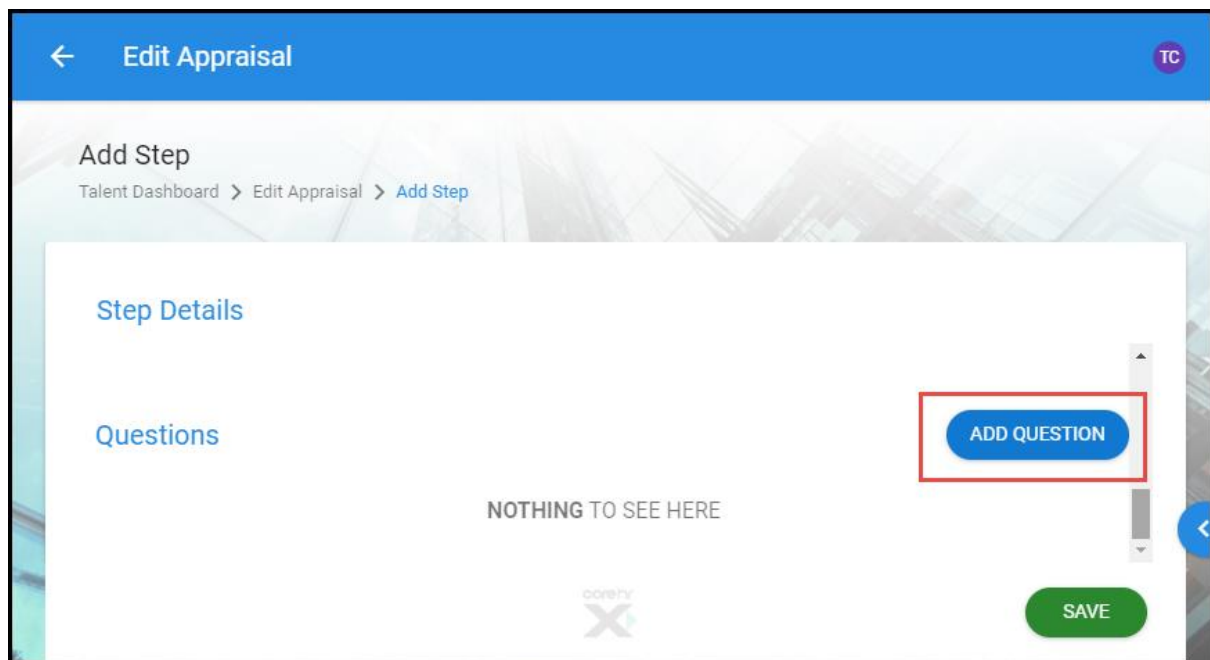

- The user can define per stage what cycle is available so that if objectives are set at the end of the appraisal year, a different objective cycle for the new year can be linked at that stage. This way, a user can create an appraisal where the employee can work on objectives during the year and in December stage can set objectives for the new year.
- All active cycles area available for the user to select.

Questionnaire

A questionnaire can be provided where an administrator defines questions that participants complete as part of the appraisal. This includes who can answer or view the questions. This is best practice configuration to form the basis of the conversation that occurs between the employee and manager.

To add a question to the questionnaire:

1. Click on the **Add Question** button.

This allows you to add multiple questions to a questionnaire, with the following items available on screen:

Item	Description	Mandatory
Question Title	This is the name of the question. A maximum of 200 alphanumeric characters are allowed to be entered.	Yes
Question Description	This allows you to enter in further details and an explanation of the question. A maximum of 2000 alphanumeric characters can be added here.	No
Answer Type	This gives the option of multiple choice or comments. If multiple choice is selected, up to 100 options can be provided as answers, along with a rating and label.	Yes
Applicable People	This restricts the question to be viewed or answered by this person. The options here are: - Employee - Manager Employee and Manager	Yes
Position of Question	This allows you to arrange the position of each question.	Yes
Mandatory Question	This allows you to flag a question as compulsory or optional.	No
Include Comments	This allows the employee or manager to add comments in addition to their answer.	No
Other Party Information	This setting controls the other parties not selected during the <i>Applicable People</i> setting access to the question.	Yes

- Click the **Save** button once the question has been configured to add it to the questionnaire.

Note:

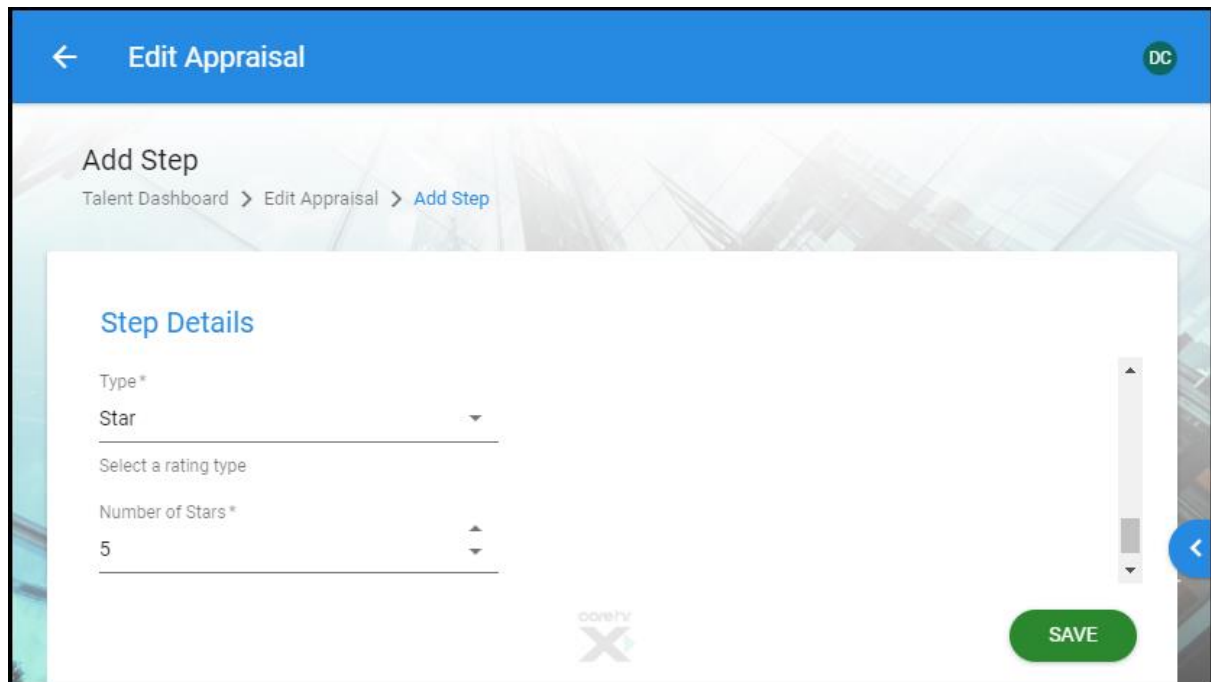

- Multiple questionnaire steps can be added per stage if required.
- If you are editing a question that already exists, you must save on the step screen for all changes to the questionnaire to be saved correctly.

Rating

This step is used to provide a rating to a stage or to an overall review. It also allows the user to select the type of rating scale to use. It also allows the user to select the type of workflow that takes place if the appraisal is to be approved by a second manager or not. This can be used to rate something as part of an appraisal process. For example, how do you rate the learning and development opportunities you have had throughout the year or how do you rate your manager's performance this year?

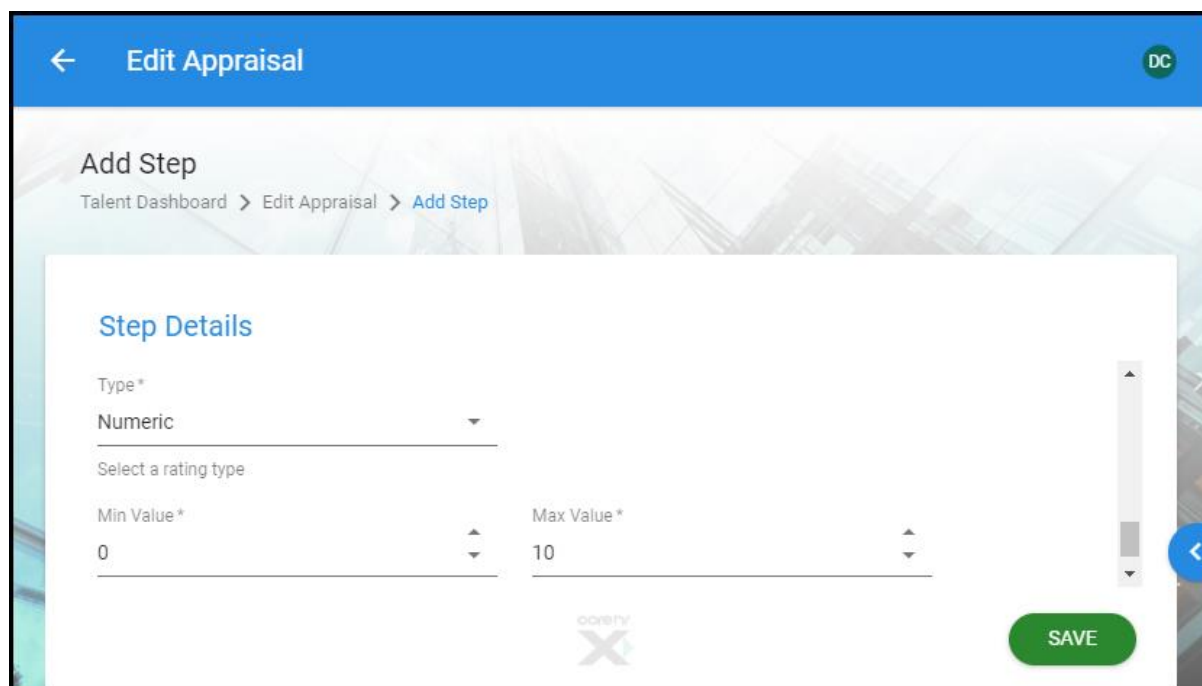

The three types of rating available are:

1. Star
 - a. This allows you to add up to five stars to the rating for an employee or manager to rate themselves against.

The screenshot shows a mobile application interface for editing an appraisal. At the top, there is a blue header bar with a back arrow, the text 'Edit Appraisal', and a user icon labeled 'DC'. Below the header, the main content area has a light blue background with a grid pattern. A white card titled 'Add Step' is centered on the screen. Inside the card, there is a breadcrumb trail: 'Talent Dashboard > Edit Appraisal > Add Step'. Below this, the 'Step Details' section contains two dropdown menus. The first is labeled 'Type*' and has 'Star' selected. The second is labeled 'Number of Stars*' and has '5' selected. A green 'SAVE' button is located at the bottom right of the card. A vertical scrollbar is visible on the right side of the card.

2. Numeric
 - a. This allows you to create a minimum and maximum value for employees or managers to rate themselves as.
 - b. Maximum value is 100, with the minimum value allowed being 0

← Edit Appraisal DC

Recognition

This step is used to view the employee's recognition level based on feedback received from other employees. This functionality is separate to 360 feedback and is a view-only record of recognition received throughout the employees time in the company.

Talent Factors

These items are grouped together to allow the manager review and report on certain aspects of the employee that drive performance, talent and predictive analytics. All options available on this screen are managed by your organisation and can be renamed or re-used in many ways. The following items are configured using the *Talent Setup* widget:

- Readiness
- Promotability
- Flight Risk
- Impact of Loss
- Willing to Relocate
- Relocate to
- Employee Talent Pools

Training

 **Note:** This stage only applies where the Learning and Development module is active.

Add this step to a stage to include the same functionality as the two training widgets available on the employee dashboard:

1. Book a Course
2. My Training History

Publications, Research & Supervision

These are based on an employee's educational details surrounding any publications, research or supervision information. To configure these sections, review the Talent Management: Configuring Talent Setup - User Guide.

Sign Off / Final Sign Off

The sign off step is automatically created as part of the stage creation process as it is not possible to create a stage without this step. This step is defaulted to the last step of the stage and cannot be amended. In addition to the repeated configuration per step, the table below shows the items to maintain for the sign off and final sign off step.

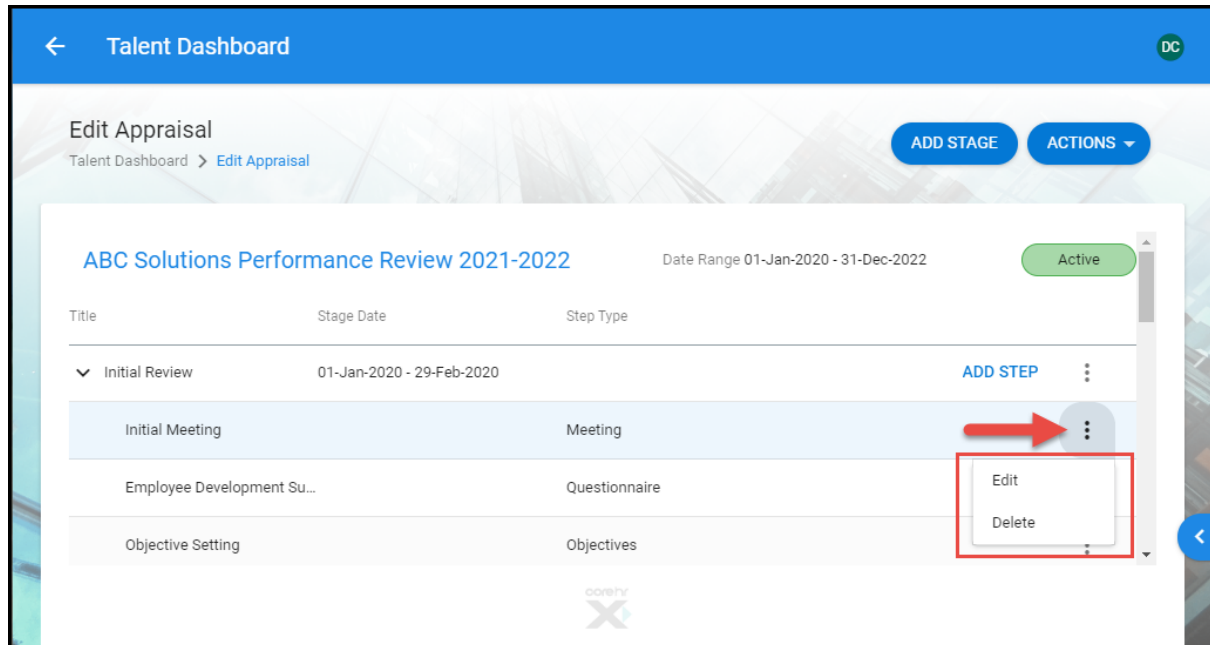

Item	Description	Mandatory
Step Type	This is automatically selected as <i>Sign Off</i> and cannot be edited.	Yes
Applicable People	This is automatically selected as <i>Manager and Employee</i> and cannot be edited.	Yes
Position of Step	This is automatically selected as 99 and cannot be edited.	Yes
Mandatory Step	This is automatically selected as <i>Mandatory</i> and cannot be edited	Yes
Final Rating	At least one of the sign off steps on the review cycle has to be marked as the final rating. This dictates the workflow of the appraisal as well as how the rating is scored with the overall score being used across the application in areas such as compensation.	No
Employee Feedback	- No, don't allow employee feedback. - Yes, allow employee feedback.	Yes
Manager Feedback	- No, don't allow manager feedback. - Yes, allow employee feedback.	Yes
Allow Employee Rating	This gives the option to an employee to give a rating.	No
Allow Manager Rating	This gives the option to a manager to give a rating. This is mandatory and has to be enabled.	Yes

Note: An appraisal always requires a manager to sign off to mark the review as *Completed*.

Step Options

1. Click on the  button.
2. The edit and delete options appear.

Note: If you are editing an active appraisal, the details within a step that are changed or removed effects the reviews that are already assigned to and already completed by employees.

Stage Options

Multiple stages can be created as required. A typical example of this may be the following:

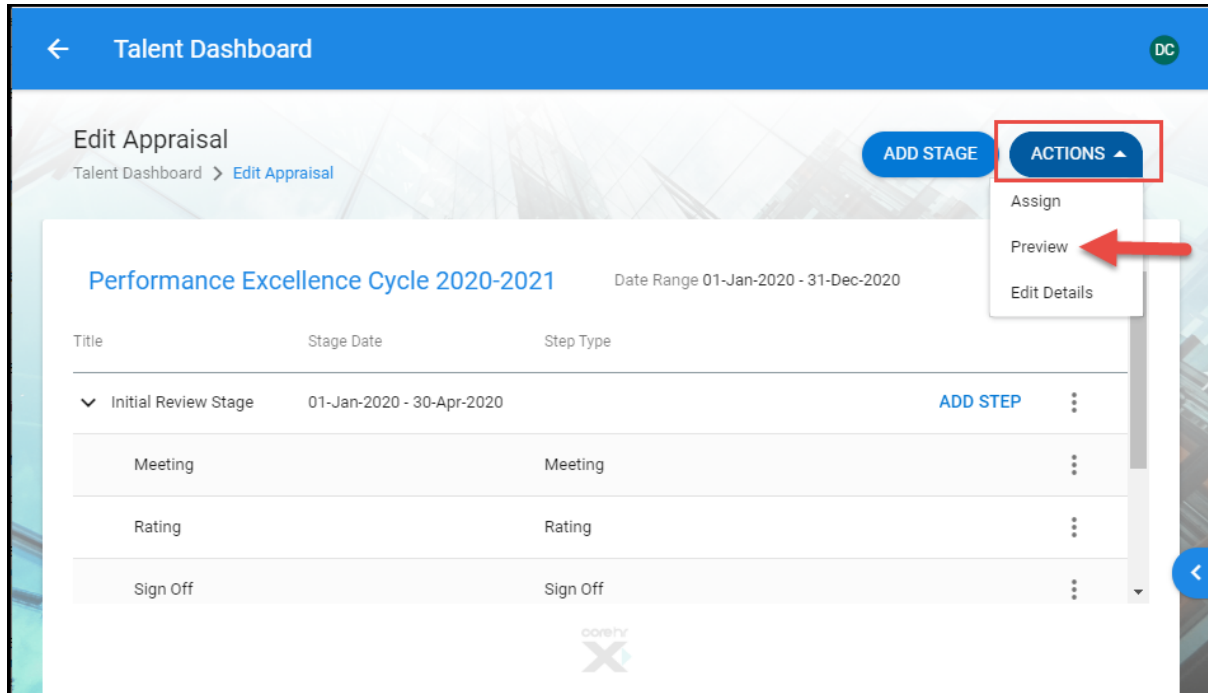

1. Initial Stage Goal Setting
2. Mid-Year Review
3. Final Review.

There is no limit to the number of stages that can be added to the appraisal. Likewise, there are no limit to the number of steps in an appraisal. Each stage block shows the stage name and the start and end date of the stage.

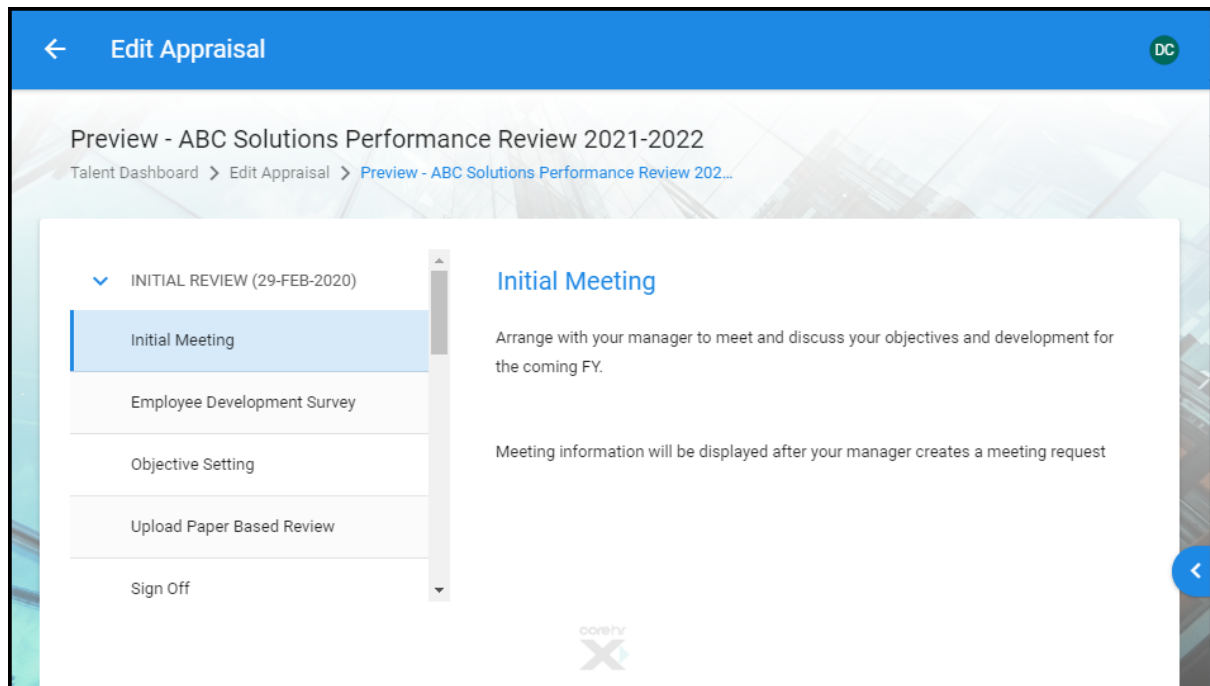

2.3. Previewing a Review Cycle

To preview a performance review cycle to confirm what it looks like to the end user:

1. Click on the **Actions** button within the *Edit Appraisal* screen.
2. Click on the **Preview** button.

3. This opens the appraisal wizard as it would be seen from the employee and managers perspective, and acts as a guideline as to how it would look.

Note: In some cases, data may not display as it may not exist yet or is related to the person that is actually carrying out the appraisal.

2.4. Assigning Review Cycle

Once you are happy with the appraisal cycle setup, it can be assigned out to employee and managers. This is done via criteria groups or individual employees.

Once employees have been assigned to the review cycle, the review can then be activated. This allows the user to save and come back to this at a later time if required to update the assignee list.

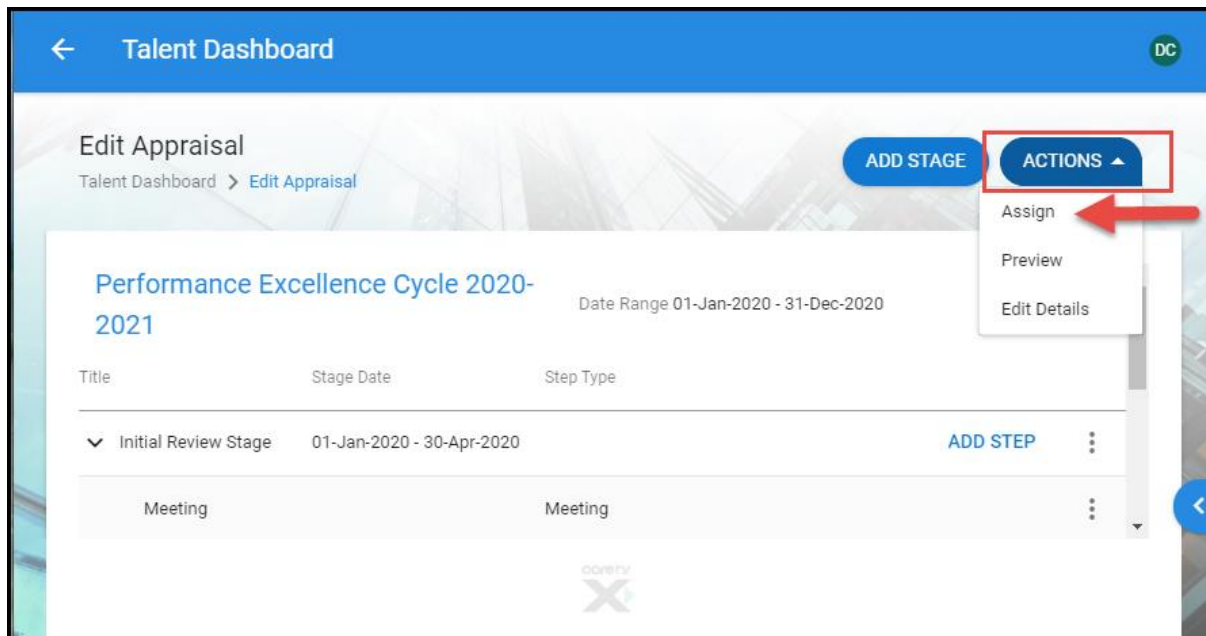

2.4.1. Assign by Criteria Groups

These are groups of employees where an administrator can choose to assign people together who sit in a certain position in the company. This functionality creates groups that can be reused to allocate items in other CoreHR products as well as to allocate different appraisals and reviews to different types of staff based on their employee / appointment record.

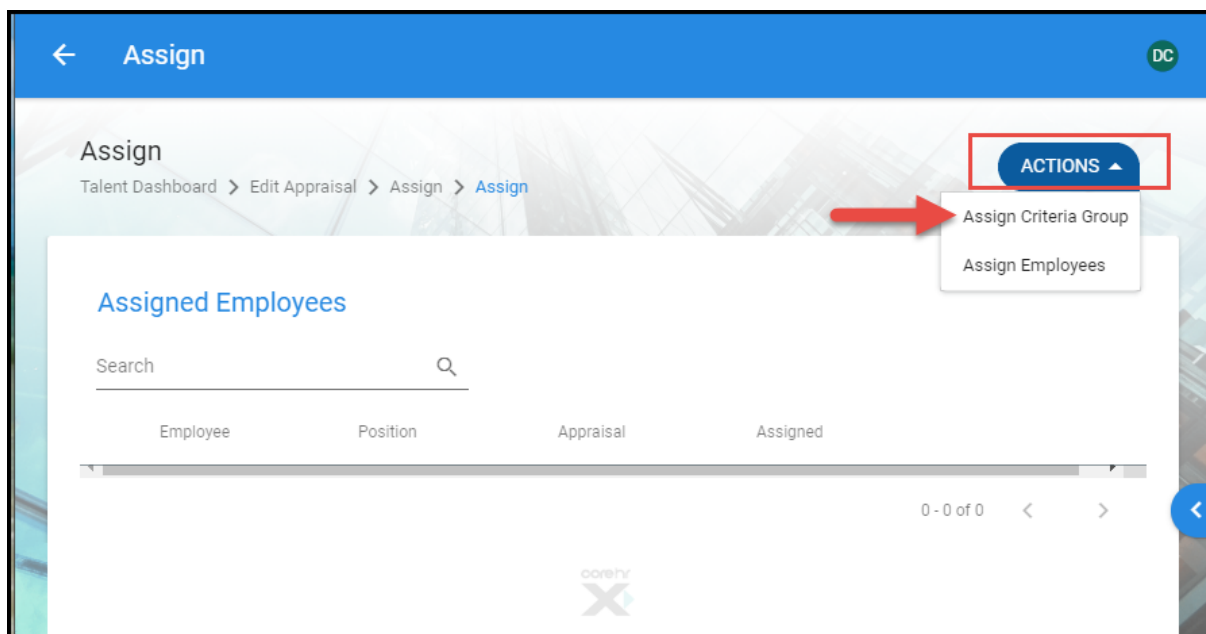

Creating a Criteria Group

To create a new criteria group:

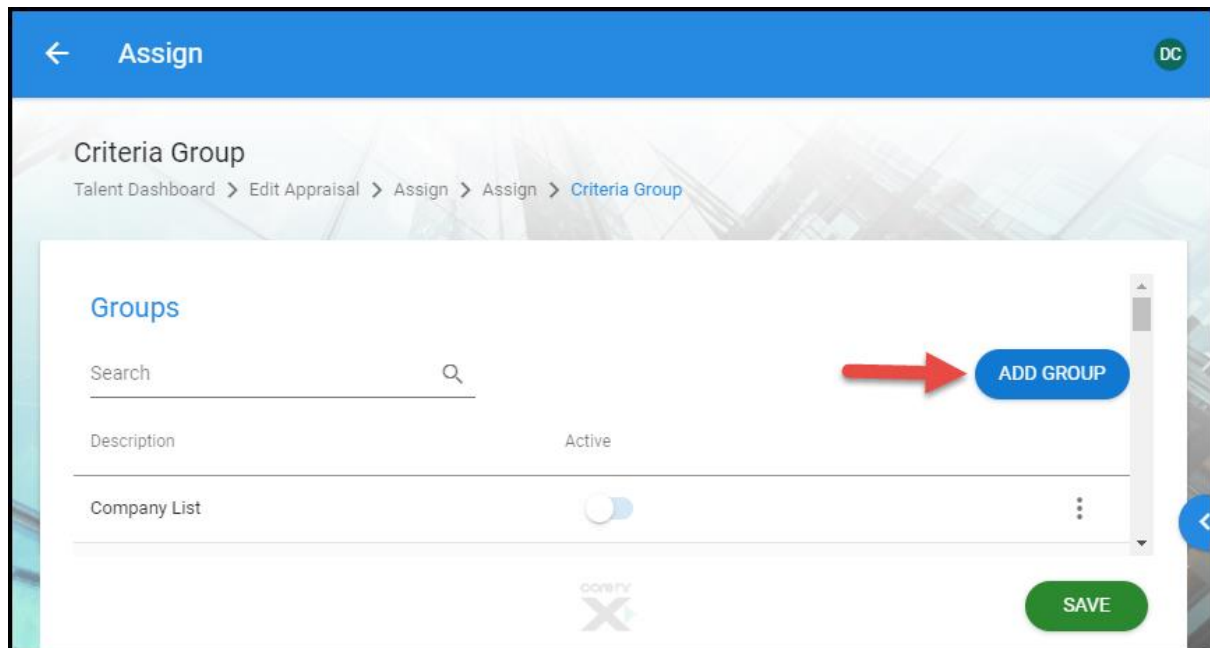

1. Within the *Edit Appraisal* screen, click the **Actions** button.
2. Click the **Assign** button.

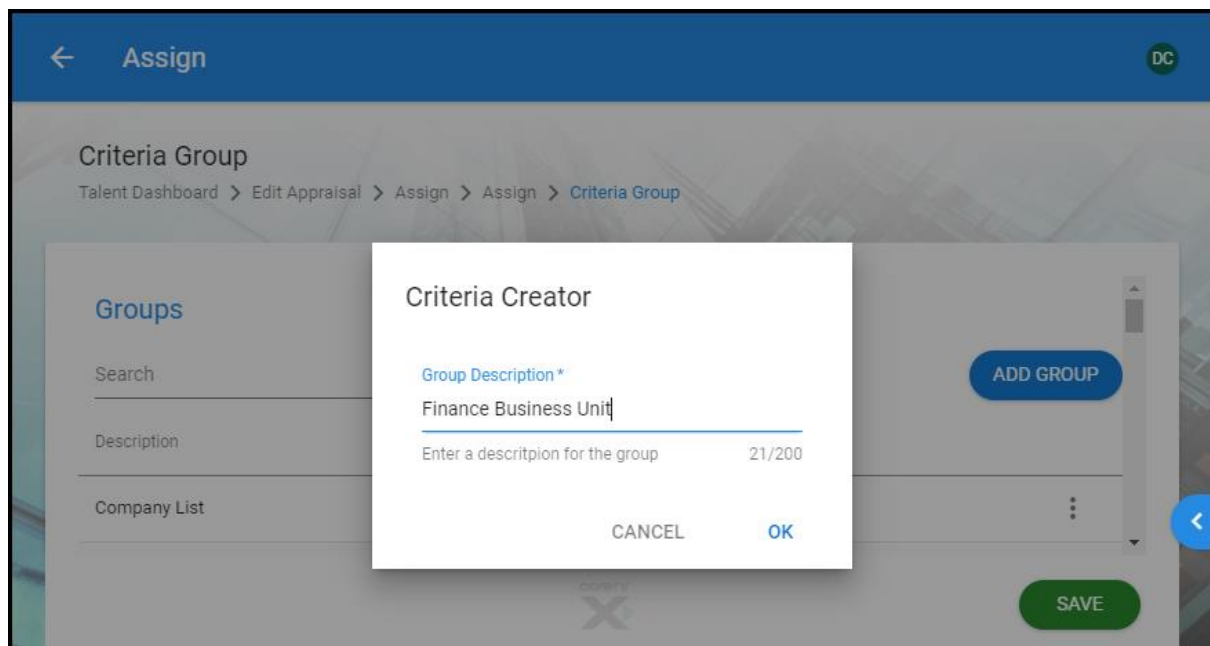

3. This opens the *Assigned Employees* screen.
4. To create a criteria group, click the **Actions** button.
5. Click the **Assign Criteria Group** button.

6. This opens the Criteria Group screen.
7. To create a new group, click the **Add Group** button.

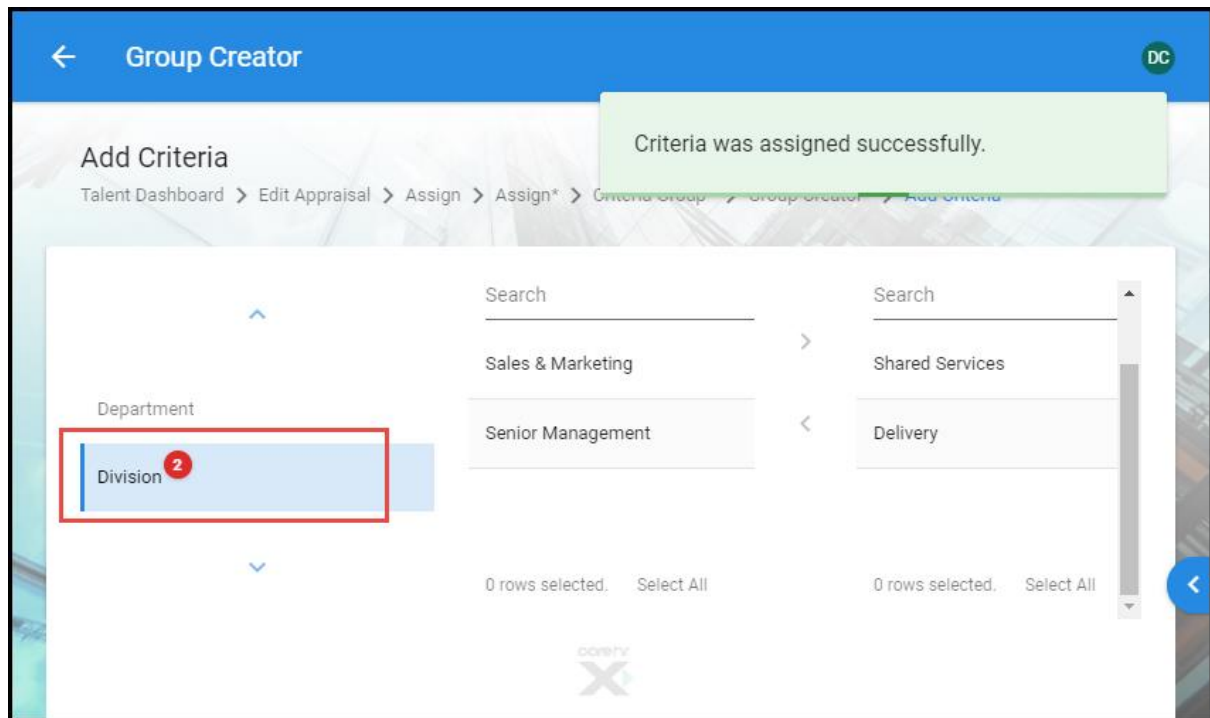

8. The criteria creator prompt opens on screen, asking you to create the name of the group. This is mandatory and allows a maximum of 200 alphanumeric characters to be entered.

9. Click **OK**.
10. To add organisational attributes and employee attributes to this criteria group, click the **Add** button on the *Add Criteria* screen.
11. Within this screen, the following list of items / reference fields can be added:

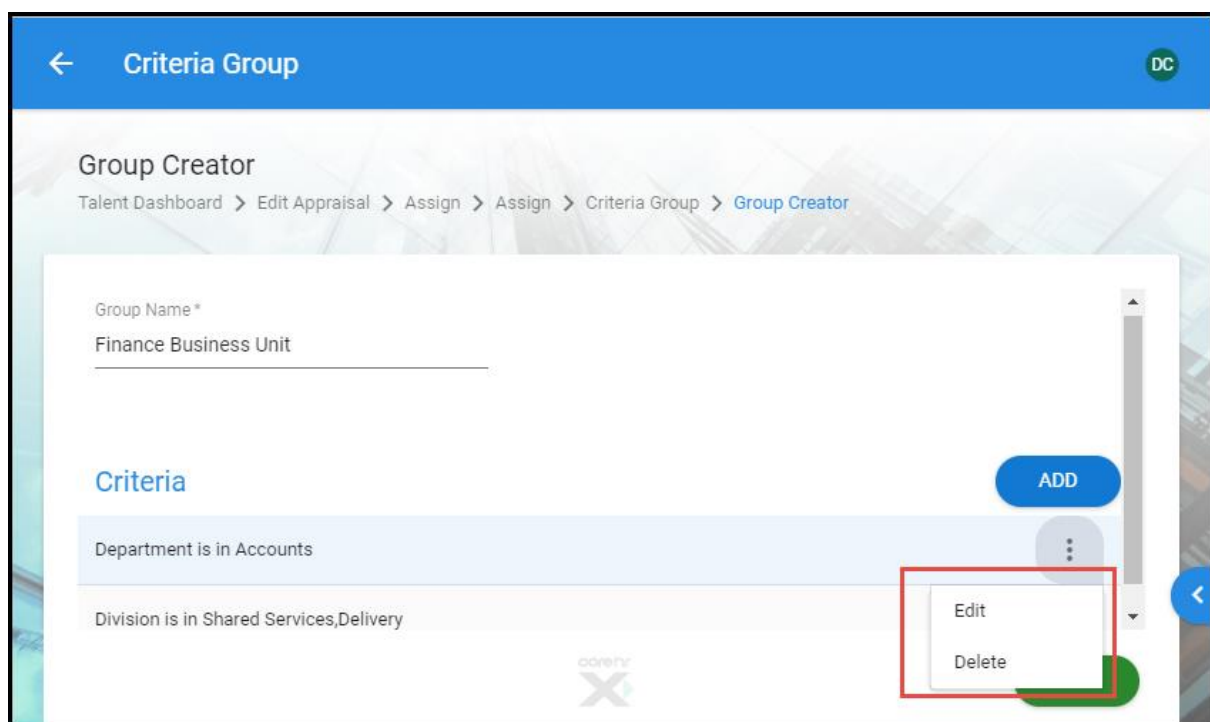

Item	Item
Action	Management Unit
Category	Organisation
Cost Centre	Post Title
Department	Reason Codes
Division	Sub Category
Employee Status	Sub Status
Grade	User Fields 1 - 5
Job Category	Work Group
Location	

12. To add an item, highlight the item from the Available list and use the directional arrows to bring across to the Assigned list.
13. The list is automatically saved.
14. The attribute is updated with a notification number which relates to the number of items added.

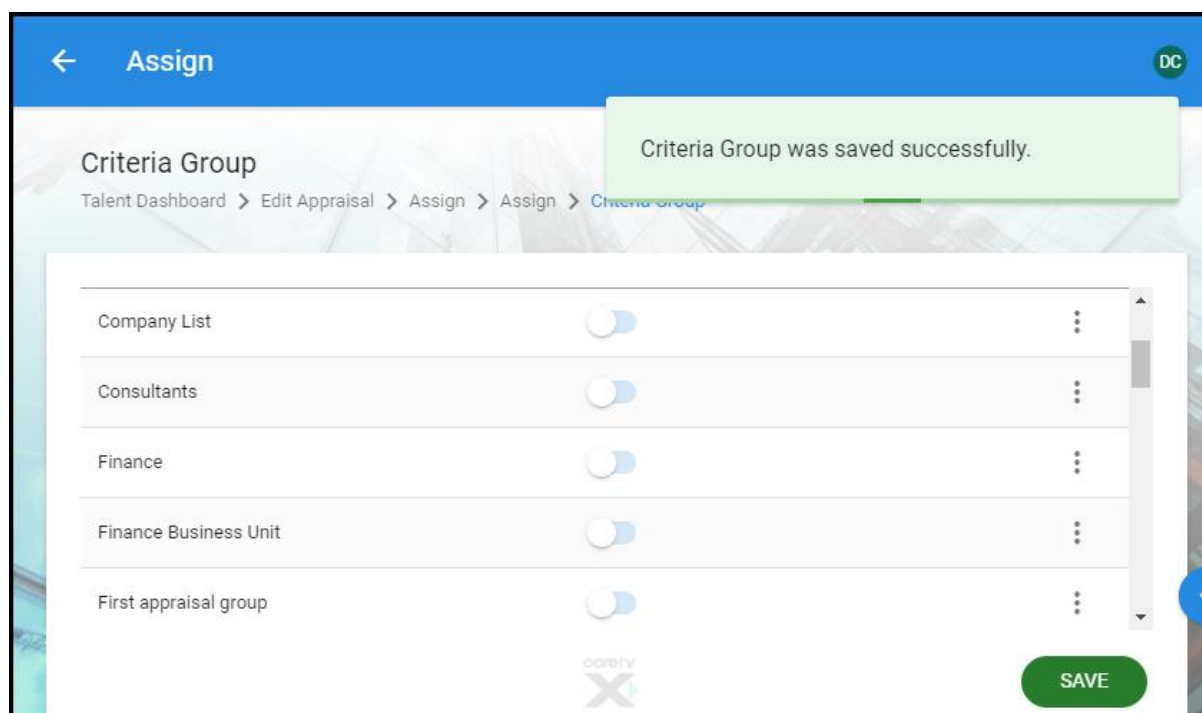

15. Return to the Group Creator screen and confirm the criteria is correct. This shows the attribute assigned and the rule against it.

16. To edit or delete a criteria rule, click the  button.

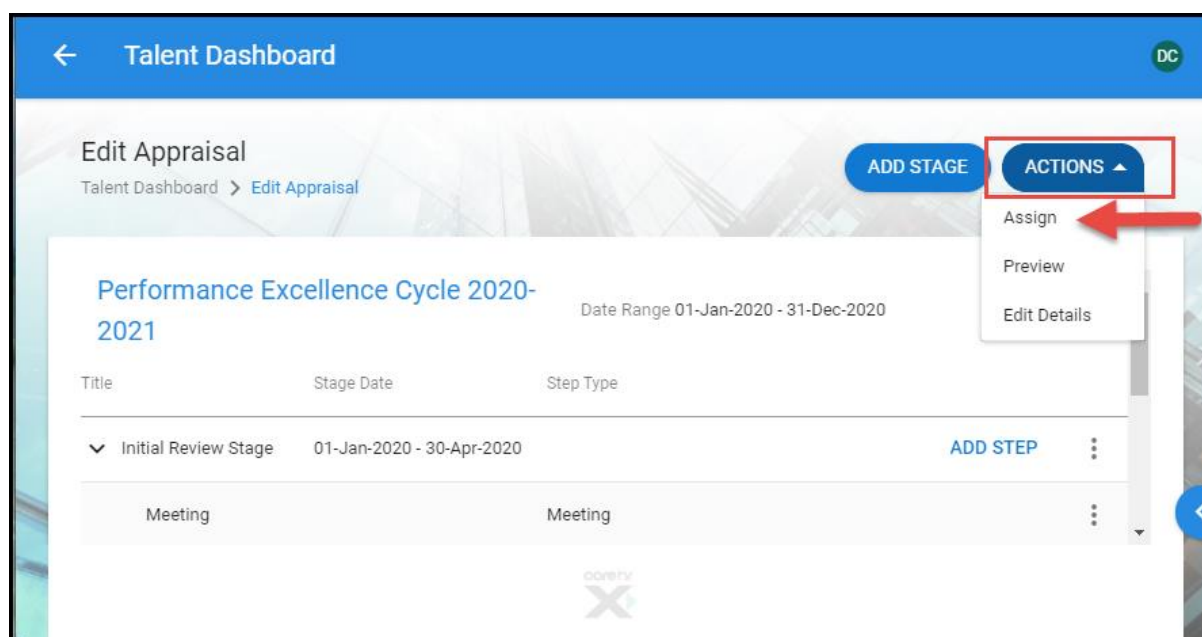

17. Click the **Save** button to create the criteria list.

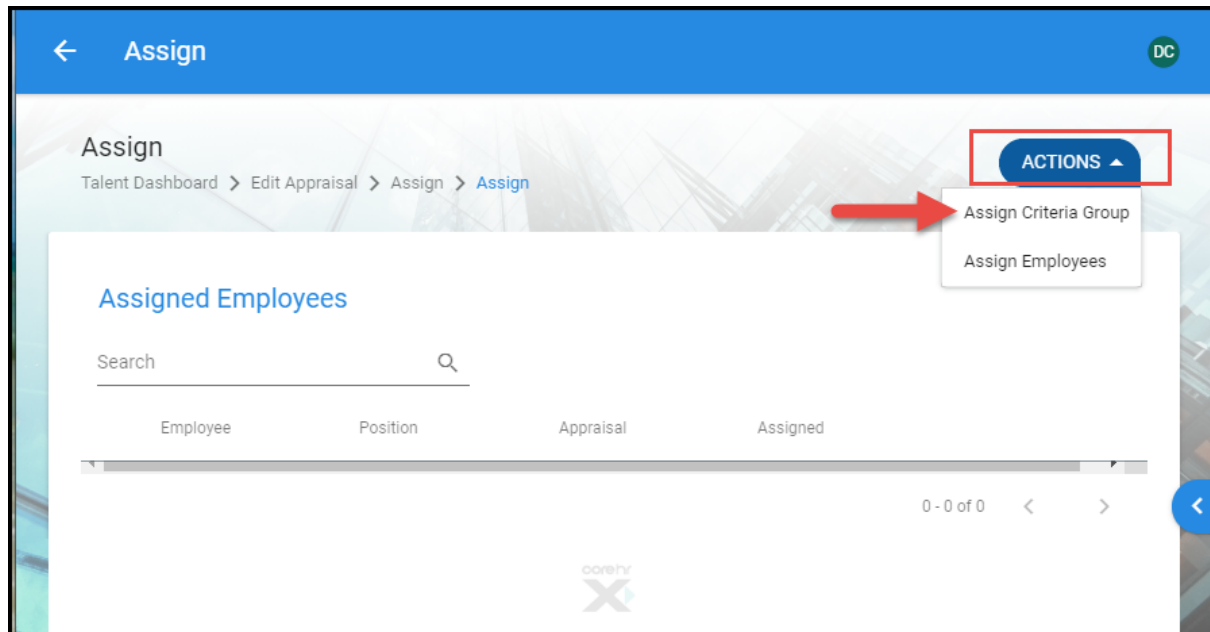

Assigning a Criteria Group

To add a criteria group to an appraisal cycle:

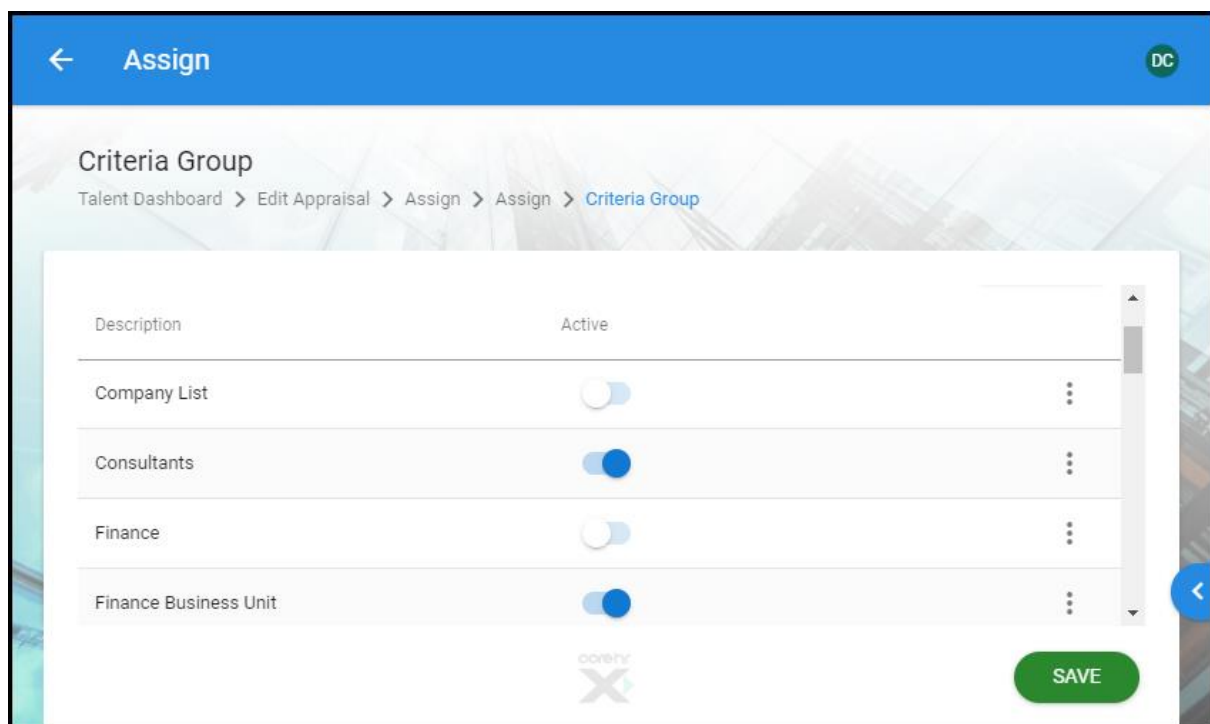

1. Within the *Edit Appraisal* screen, click the **Actions** button.
2. Click the **Assign** button.

3. This opens the *Assigned Employees* screen.
4. To assign a criteria group, click the **Actions** button.
5. Click the **Assign Criteria Group** button.

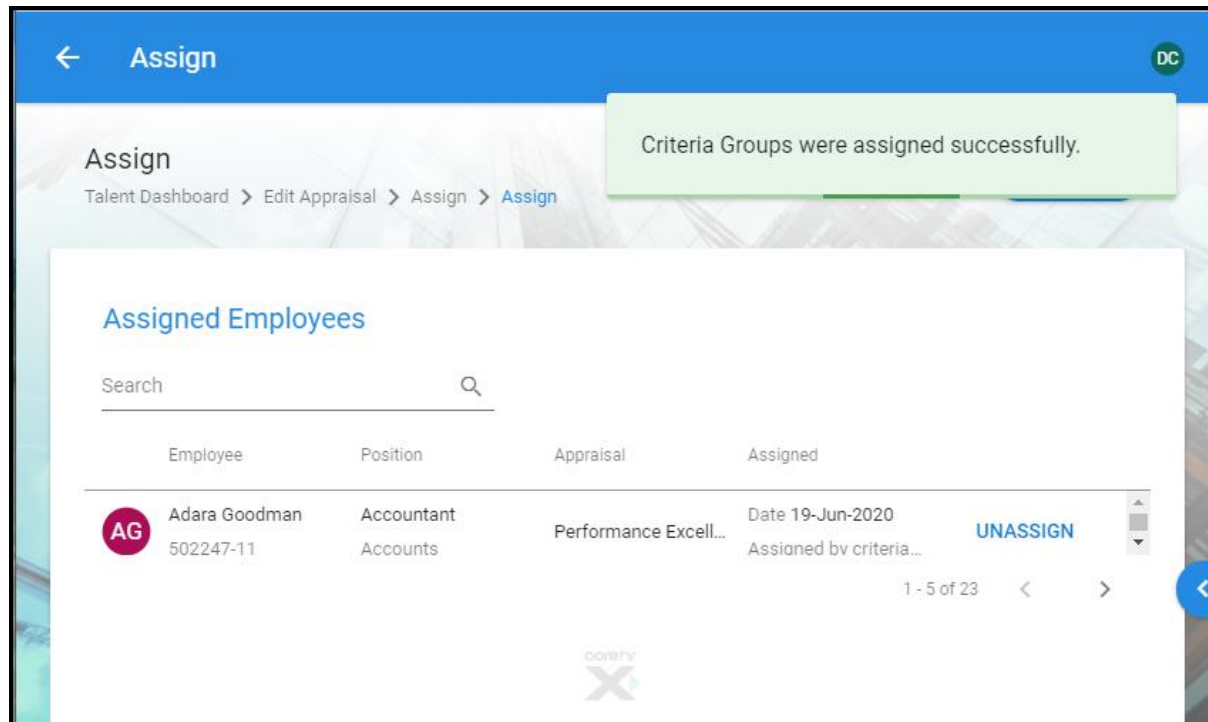

6. Enable / Disable the Active indicator against any criteria group to add / remove it from an appraisal cycle.

7. Click the **Save** button.

- Criteria groups get created and the employee list is populated with all the employees than match the conditions.

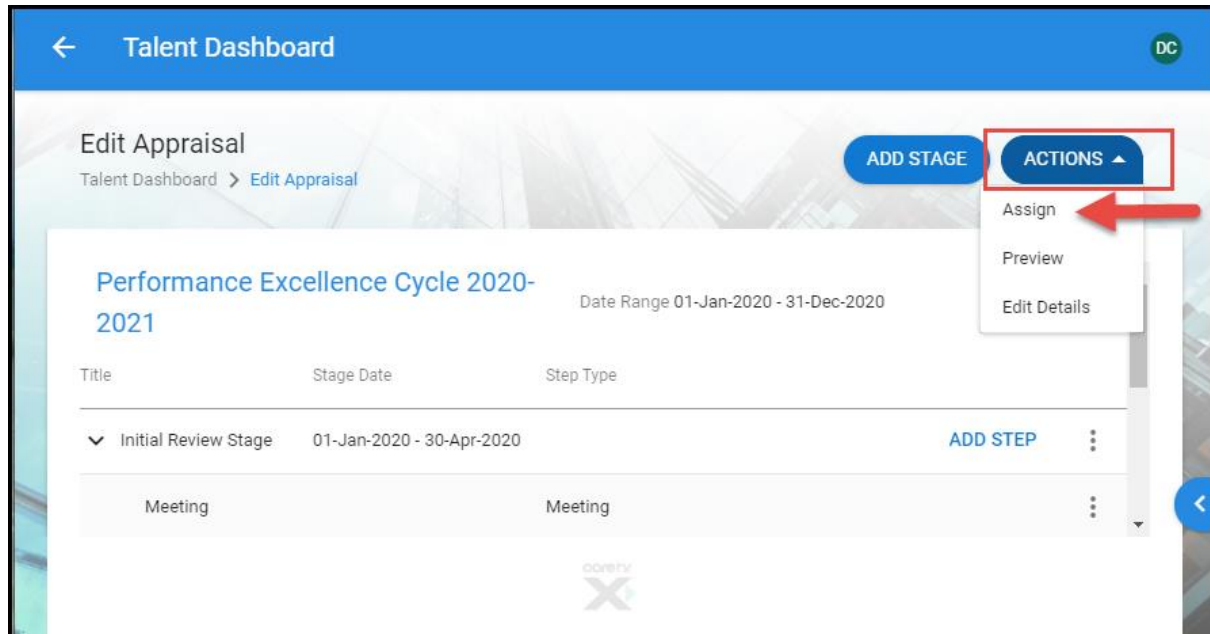

The following additional options can be enabled per review cycle when assigning a criteria group:

Item	Option
Do not include employees with a future probation expiry date from profile criteria grouping selected above	Yes / No
Only include employees with a future probation expiry date from profile criteria grouping selected above	Yes / No
Automatically assign to employees whose probation date is number of days after the Start Date	Yes / No Number of Days
Automatically assign to employees whose start date is number of days after the Start Date	Yes / No Number of Days

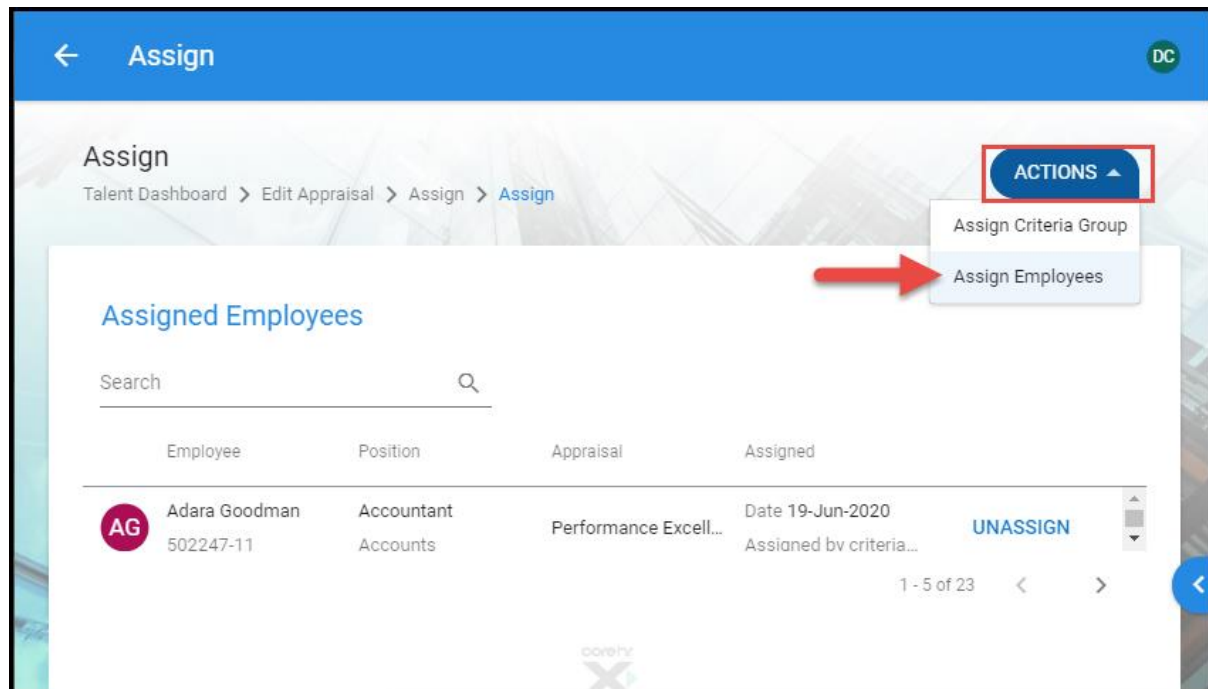

2.4.2. Assign by Employee

To add an individual employee to an appraisal cycle:

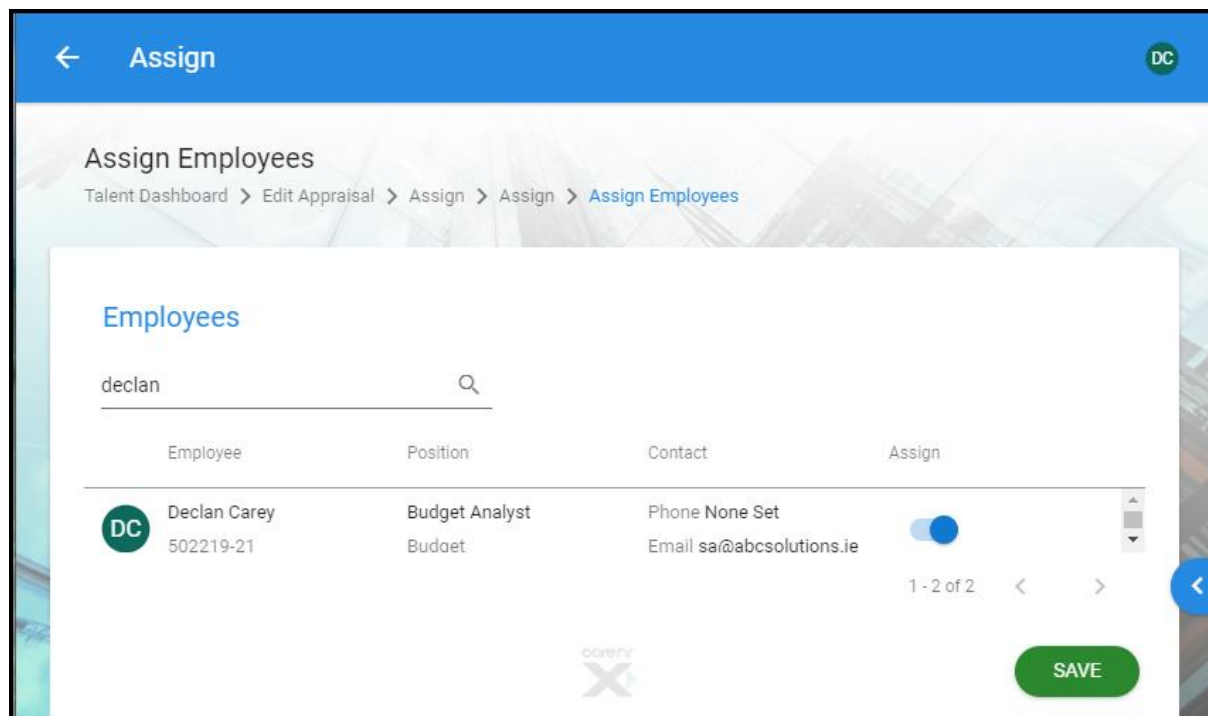

1. Within the *Edit Appraisal* screen, click the **Actions** button.
2. Click the **Assign** button.

3. This opens the *Assigned Employees* screen.
4. To assign an employee, click the **Actions** button.
5. Click the **Assign Employees** button.

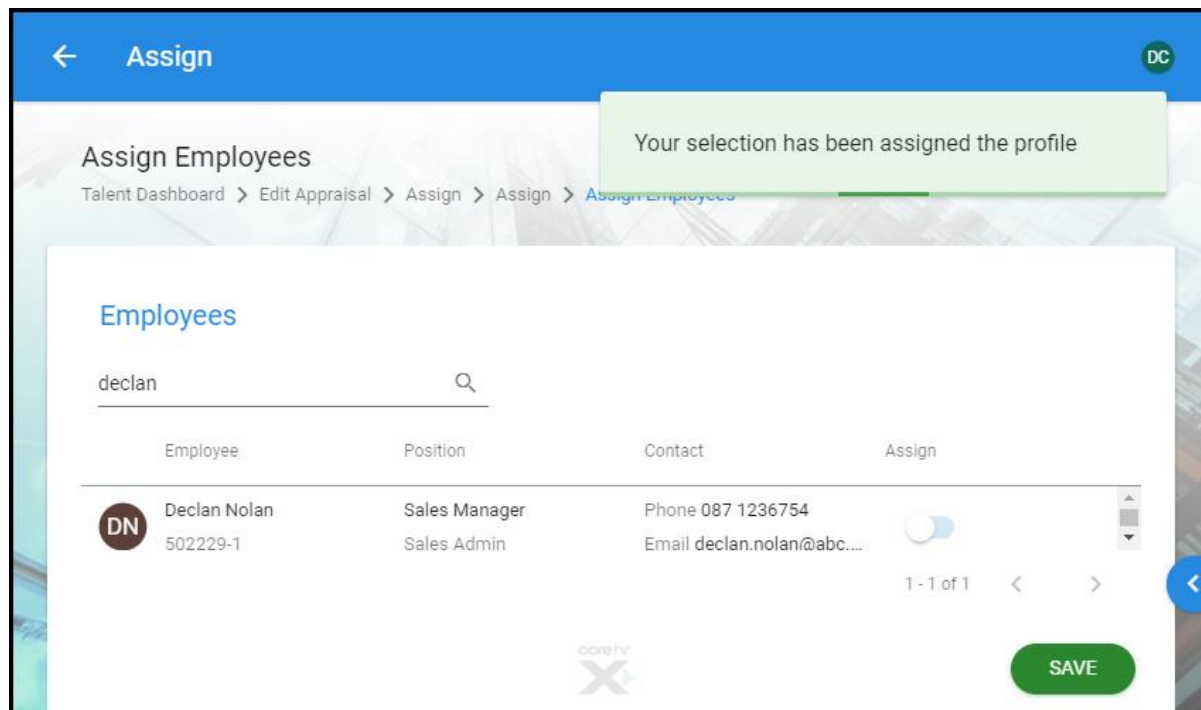

6. This opens a list of all the employees you have access to, that have not been assigned to any active criteria group yet.
7. Search for the employee you want to add and enable the *Assign* indicator to add them to an appraisal.

8. Click the **Save** button.

9. The message “Your selection has been assigned the profile” confirming the employee has now been added to the appraisal. The selected employee is removed from this list.

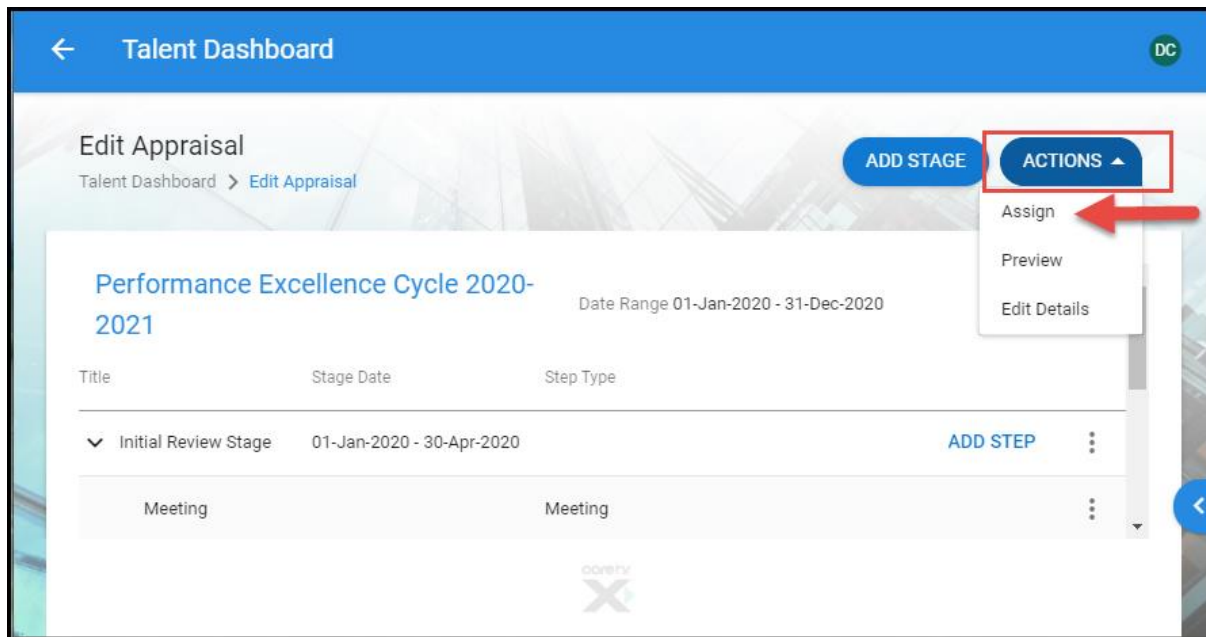

2.5. Unassigning Review Cycle

An employee can only be unassigned from a review cycle if:

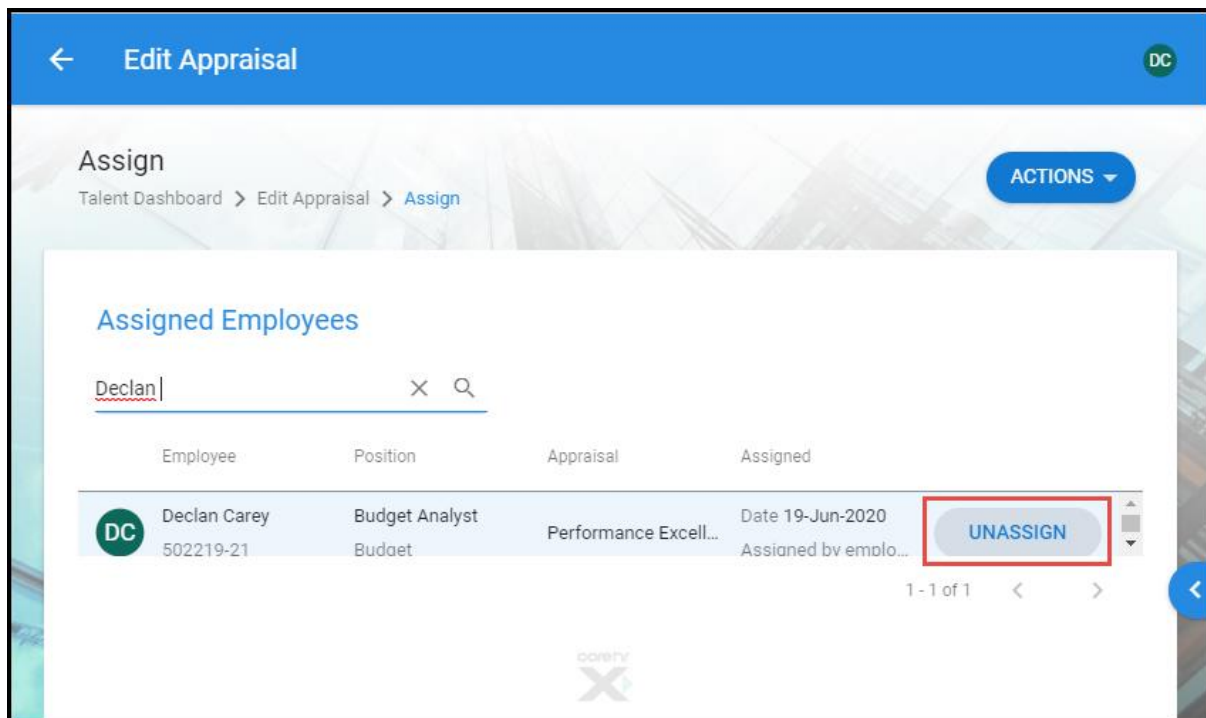

- The cycle has not been activated yet.
- The employee was assigned by employee, not by criteria group.

To unassign an employee, follow the below steps:

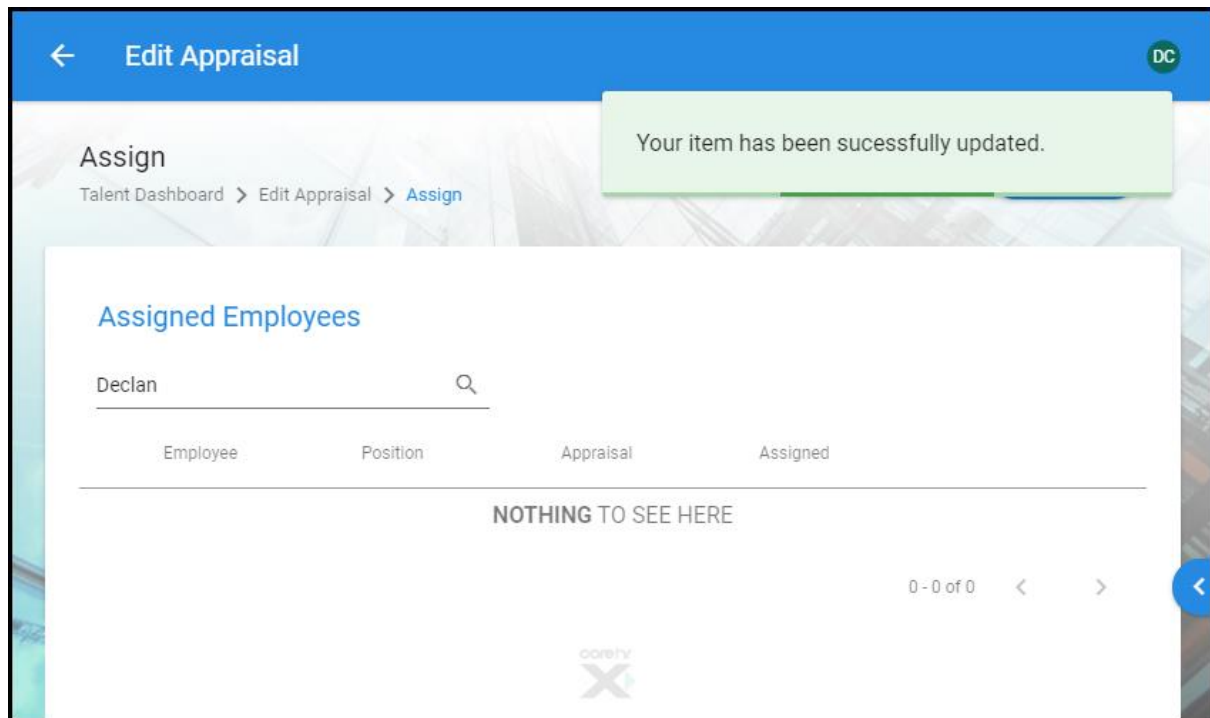

1. Within the *Edit Appraisal* screen, click the **Actions** button.
2. Click the **Assign** button.

3. This opens the *Assigned Employees* screen.
4. Search for the employee to remove them from an appraisal
5. Click the **Unassign** button.

6. The employee is automatically removed from the assigned list.

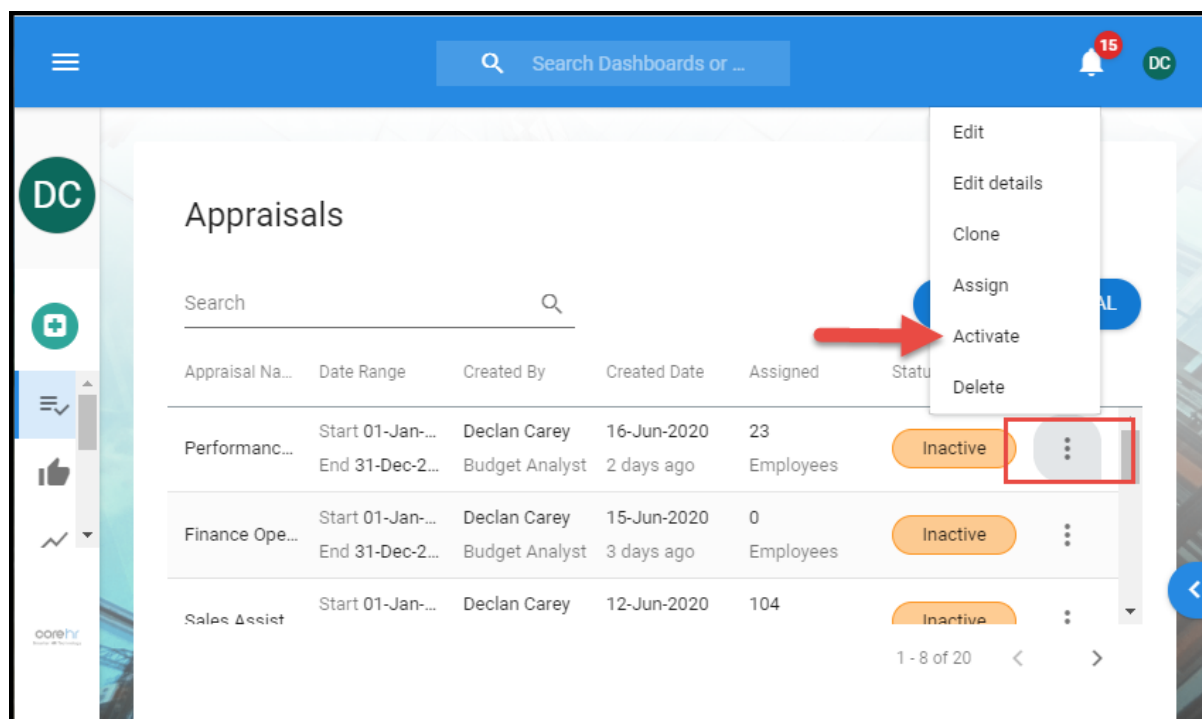

2.6. Activating Review Cycle

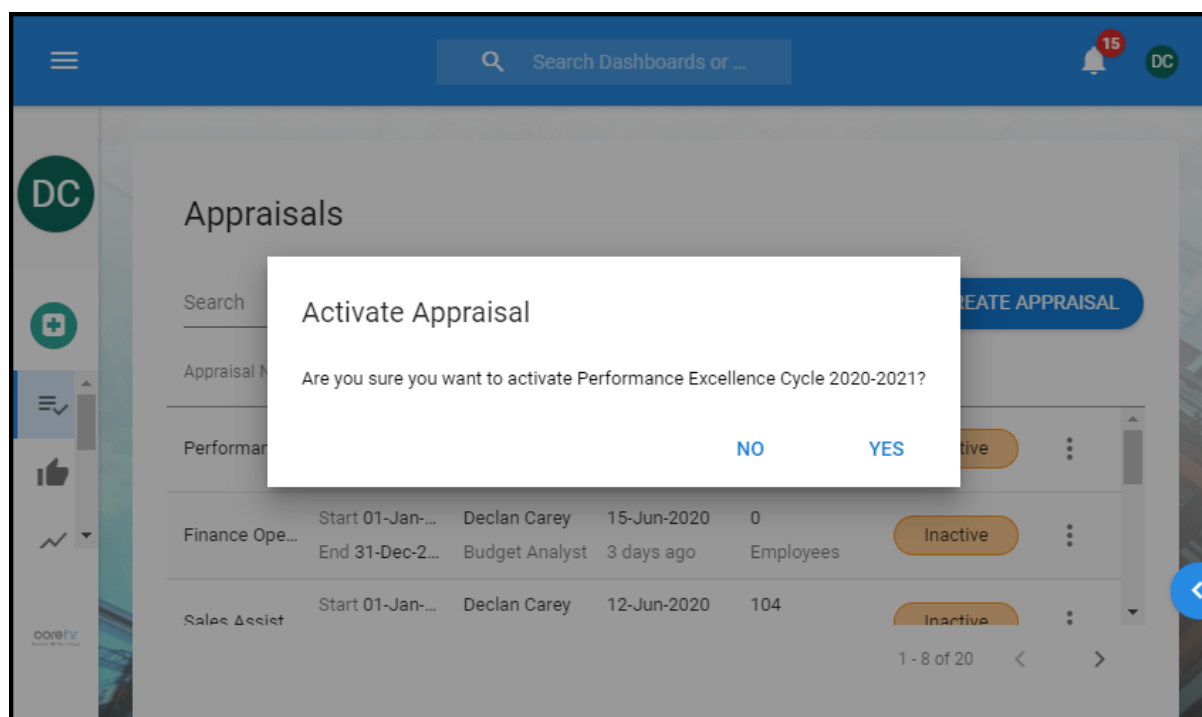

Once employees have been assigned to an appraisal and you are happy with the layout and content, the appraisal can be activated so that it shows up for employees and managers in their respective dashboards.

To activate an appraisal cycle:

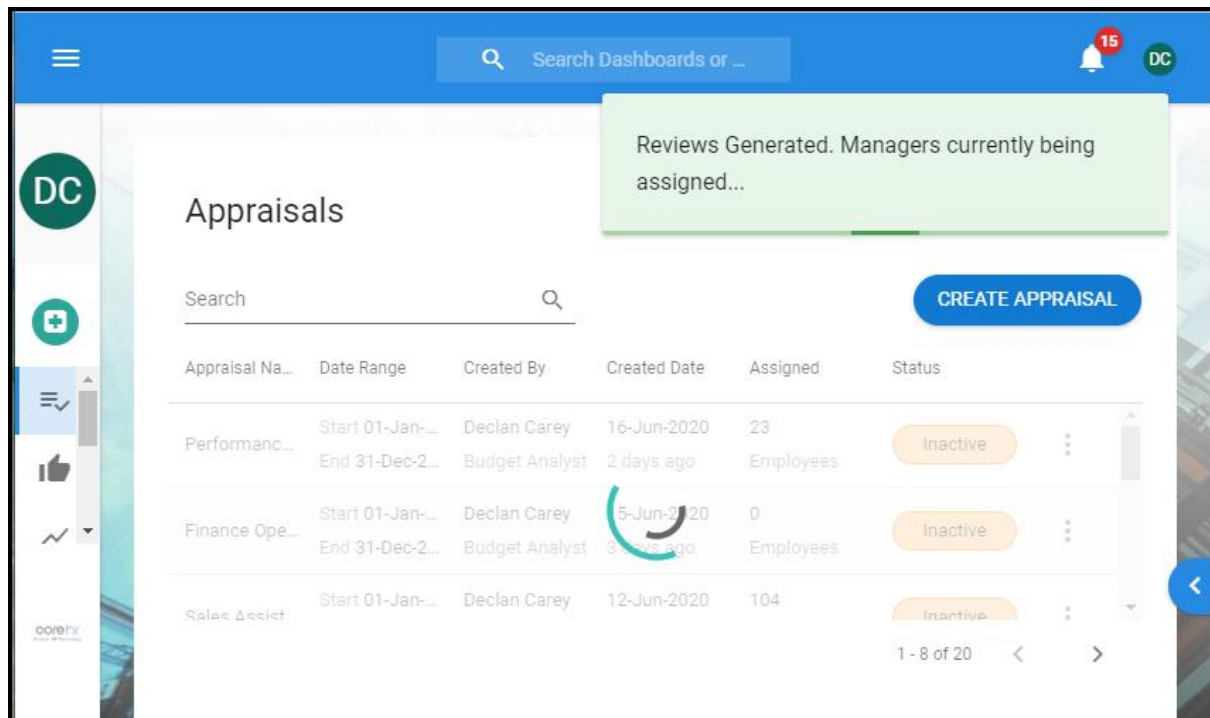

1. On the Appraisal widget, click the  button corresponding to the inactive appraisal that is required to be activated.

- The following confirmation message appears, including the name of the appraisal form. Click **Yes**.

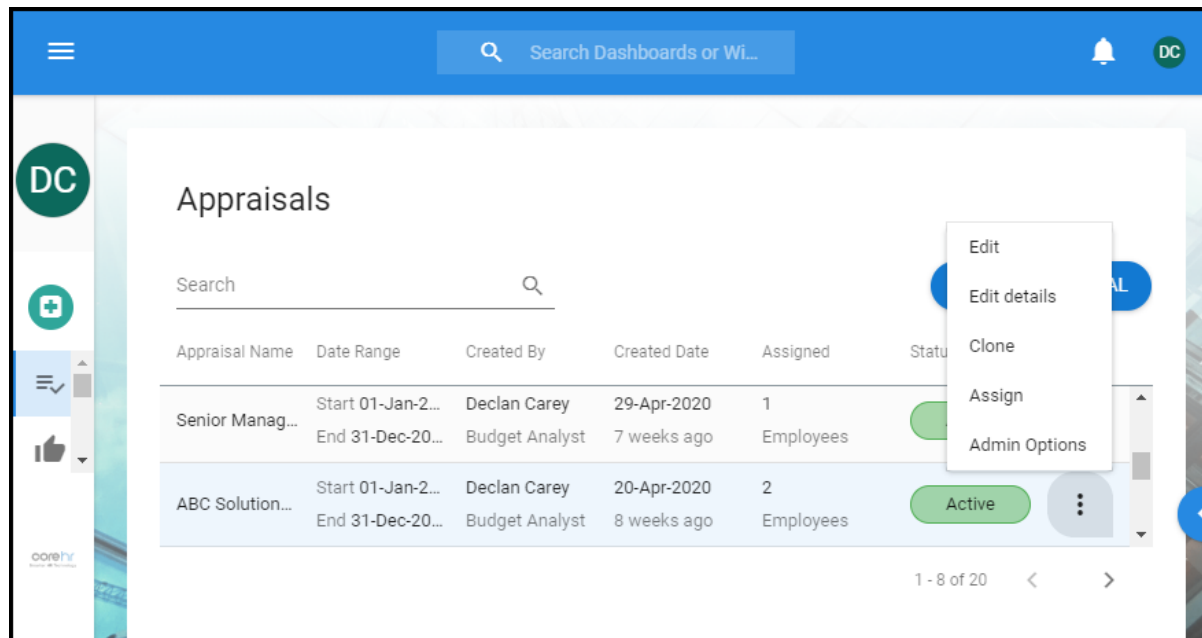

- The system starts to generate the manager details of the employees assigned.

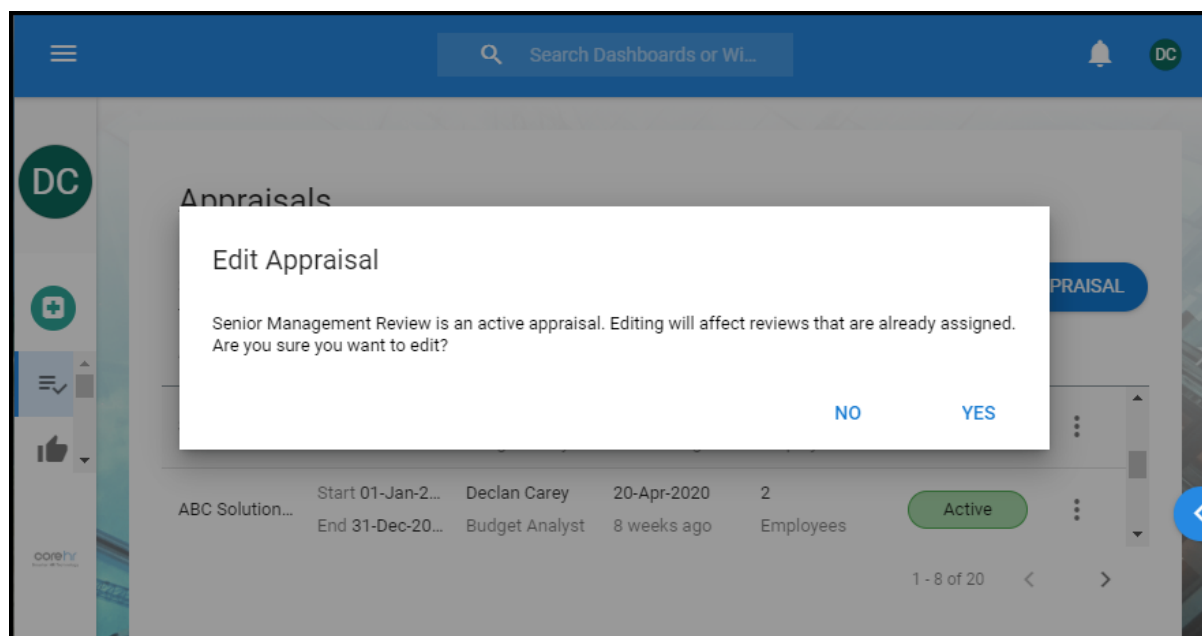

4. The appraisal moves from having an inactive status to an active status.

3. Administration Options

Once the appraisal is active, the options to assign and activate are replaced, and the following admin options appear on the appraisal

The user is able to edit the appraisal but a warning message appears stating that it may alter details that employees and managers can now access.

The following table outlines the options available to a user when the  is clicked.

Item	Description
Edit	This allows you to edit the stage and step items on an active review.
Edit Details	This allows you to edit the title and the date periods that the appraisal is active for. However, if changing dates here, you need to be aware of the date ranges of the review stages. Otherwise the following error message appears: <i>Invalid date range. To date must be on or after the stages end dates. Please edit the stages end dates first.</i>
Clone	This allows you to copy all dates, stages & steps to a new inactive appraisal cycle if further editing is needed, or to save time on creating a new appraisal year.
Assign	This is a read-only version of the assign employees screen.
Admin Options	For more detail on the additional administration options, see section 3.1 Admin Options

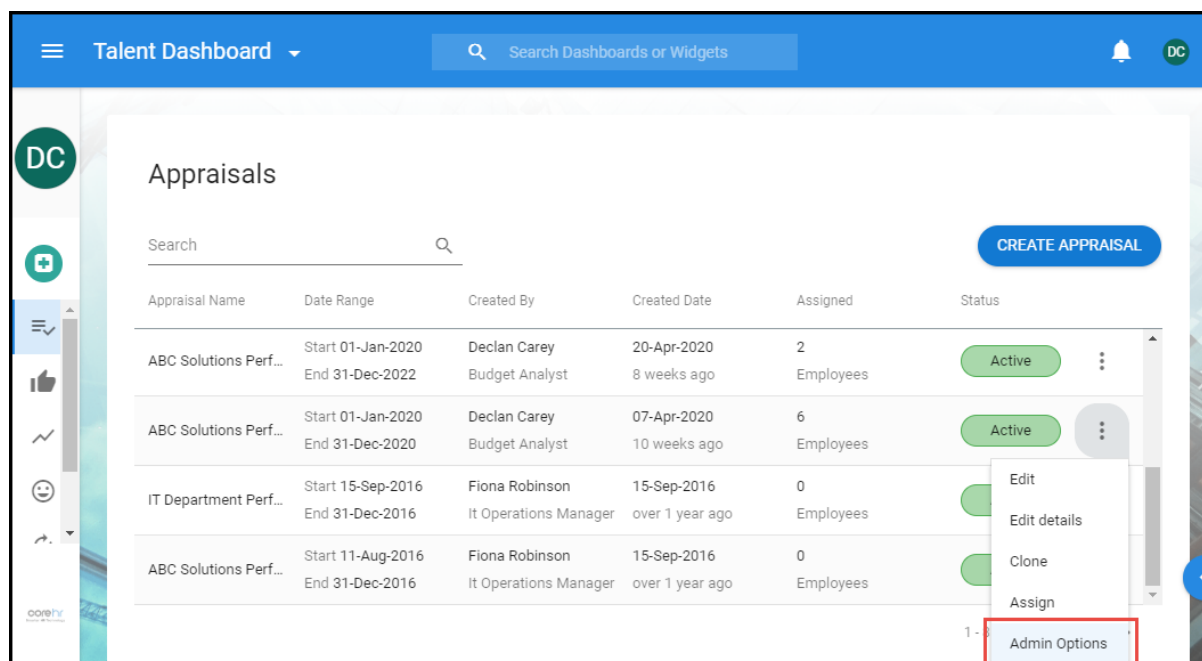

3.1. Admin Options

This section is used to handle ad hoc changes and day to day maintenance of appraisals and can be updated and amended when an appraisal is active and has been assigned to employees

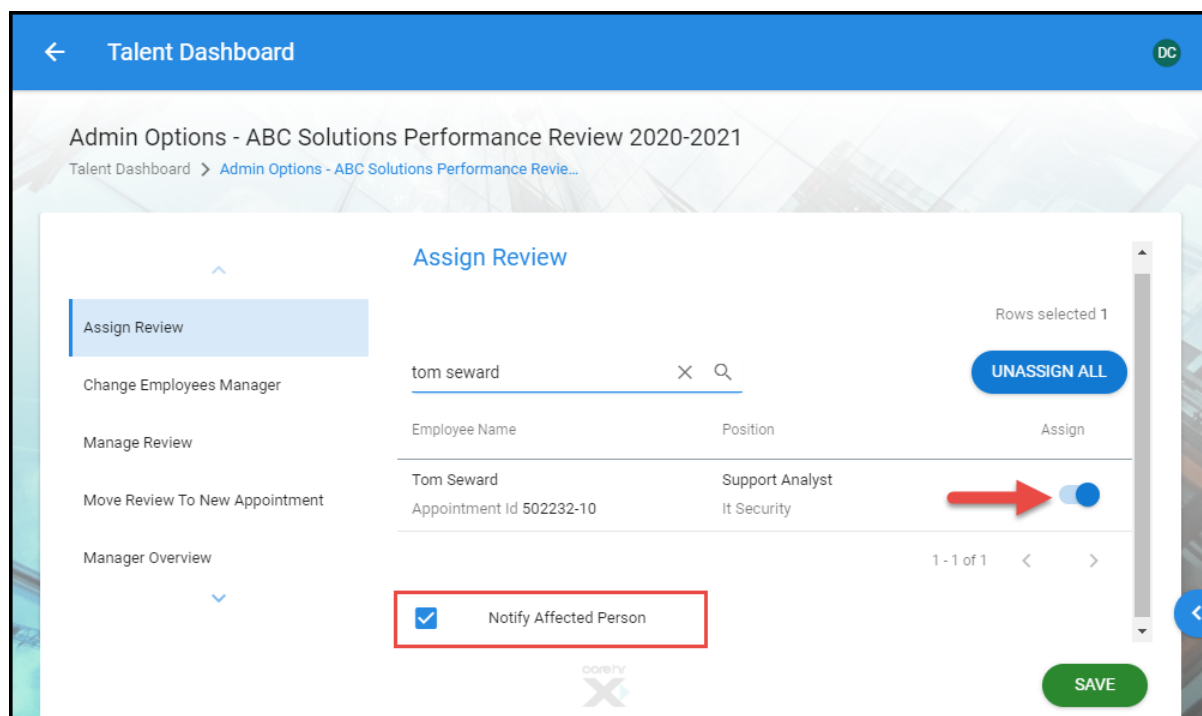

3.1.1. Assign Review

To assign a review to an individual employee after the review has been activated:

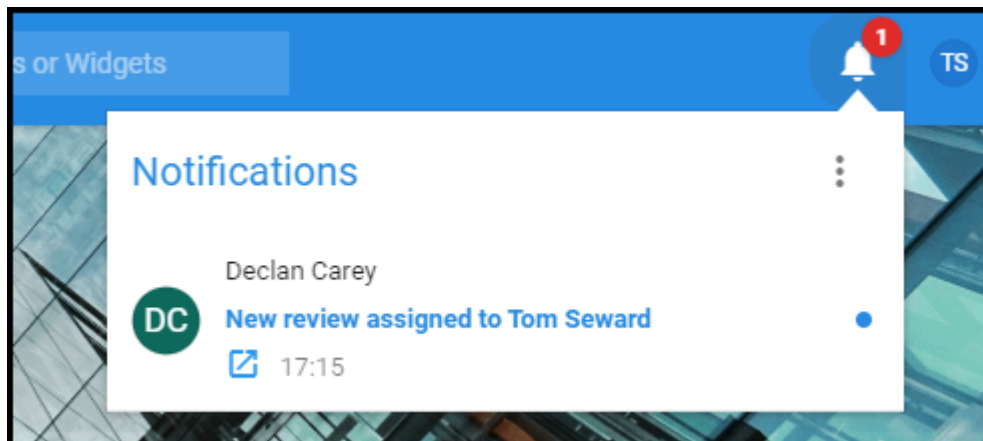

1. Click on the **Admin Options** button against the active appraisal

2. The *Assign Review* screen opens as default.
3. This allows you to assign an employee to a review after the review has been activated.
4. Search for the employee in question and enable the **assign** toggle.

5. To notify the employee by sending them an in-app notification, tick the *Notify Affected Person* checkbox. This sends the following notification:

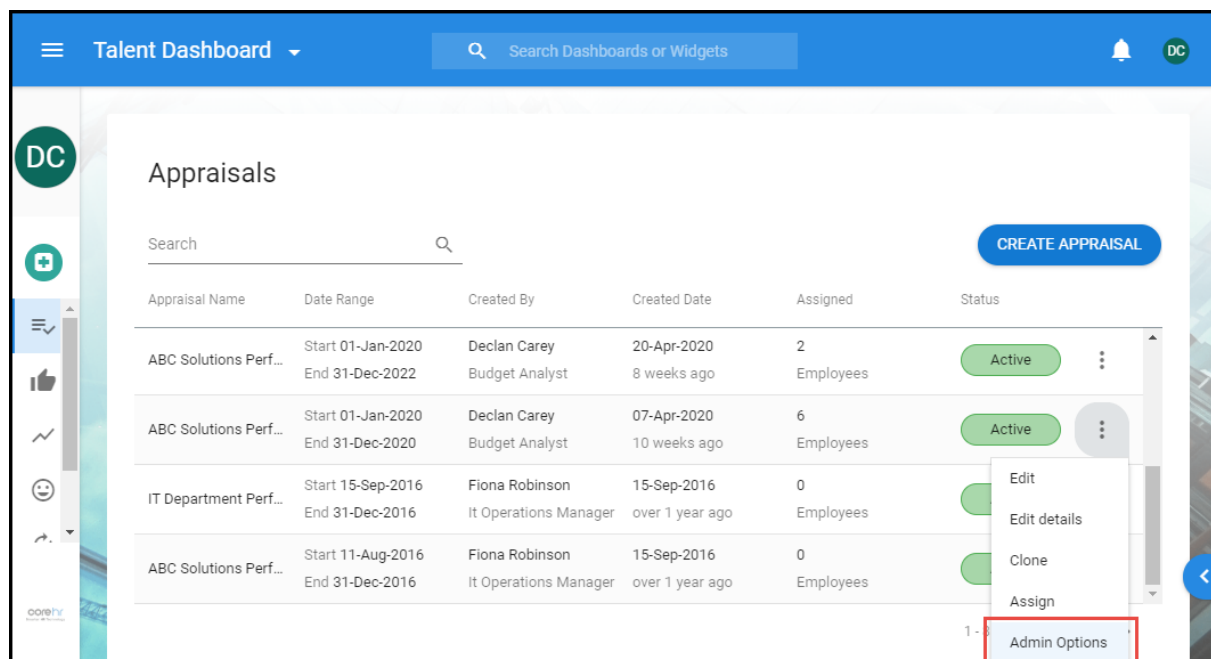

6. Click the **Save** button.
7. Confirm your changes.

3.1.2. Change Employee Manager

To change an employee's review manager after the review has been activated:

1. Click on the **Admin Options** button against the active appraisal.

2. Go to the *Change Employees Manager* tab.
3. The following details appear:

Item	Description
Search	This allows you to search for an employee not already assigned to this review.
All Employees / Employee with no manager	This allows you to toggle between employees with or without a manager assigned to them.
Employee	This shows the employees name and substantive appointment ID.
Position	This shows the employees job title and department.
Manager	This shows the name of the employees current manager or if the employee does not have one.
New Manager	This is a drop-down list of all the managers in the system

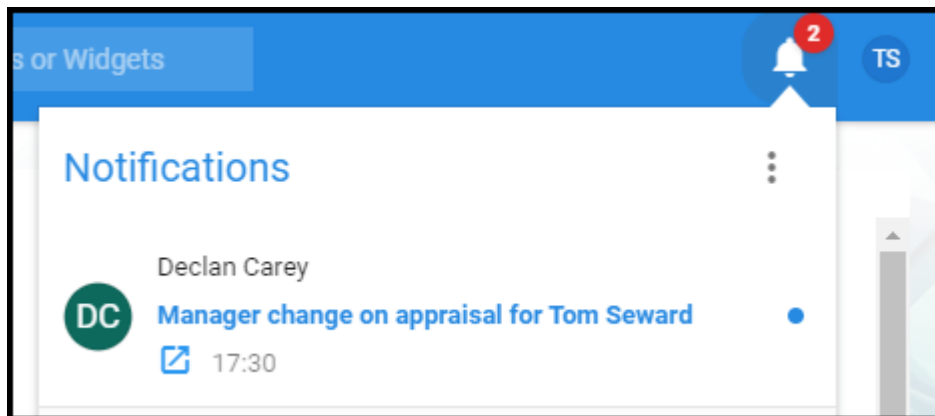

4. Search for the employee whose manager needs to be updated.
5. Click on the *New Manager* drop-down list to change their manager to the correct one.

The screenshot displays the 'Change Employees Manager' screen within the 'Admin Options - ABC Solutions Performance Review 2020-2021' section. On the left, a sidebar lists navigation options: Assign Review, Change Employees Manager (selected), Manage Review, Move Review To New Appointment, Manager Overview, Company Overview, and Appraisal Calibration. The main area features a search bar containing 'tom seward' and a dropdown menu set to 'All Employees'. Below this is a table with the following data:

Employee	Position	Manager	New Manager
Tom Seward	Support Analyst	No manager	Trevor Hemmin
Appointment Id 5022...	It Security		

A dropdown menu for the 'New Manager' field is open, showing 'Trevor Hemmings (000204)'. At the bottom, there is a checked checkbox for 'Notify Affected Person' and a green 'SAVE' button.

6. To notify the employee by sending them an in-app notification, tick the *Notify Affected Person* checkbox. This sends the following notification:

7. Click the **Save** button.
8. Confirm your changes.

Note:

- This option does not change an employee's line manager in People Management or WFM. This update is only linked to their appraisal manager.
- If you update an appraisal manager, it updates all appraisals where the End Date is greater than or equal to today's date.
- If you update an appraisal manager, it updates all active & future cycles.

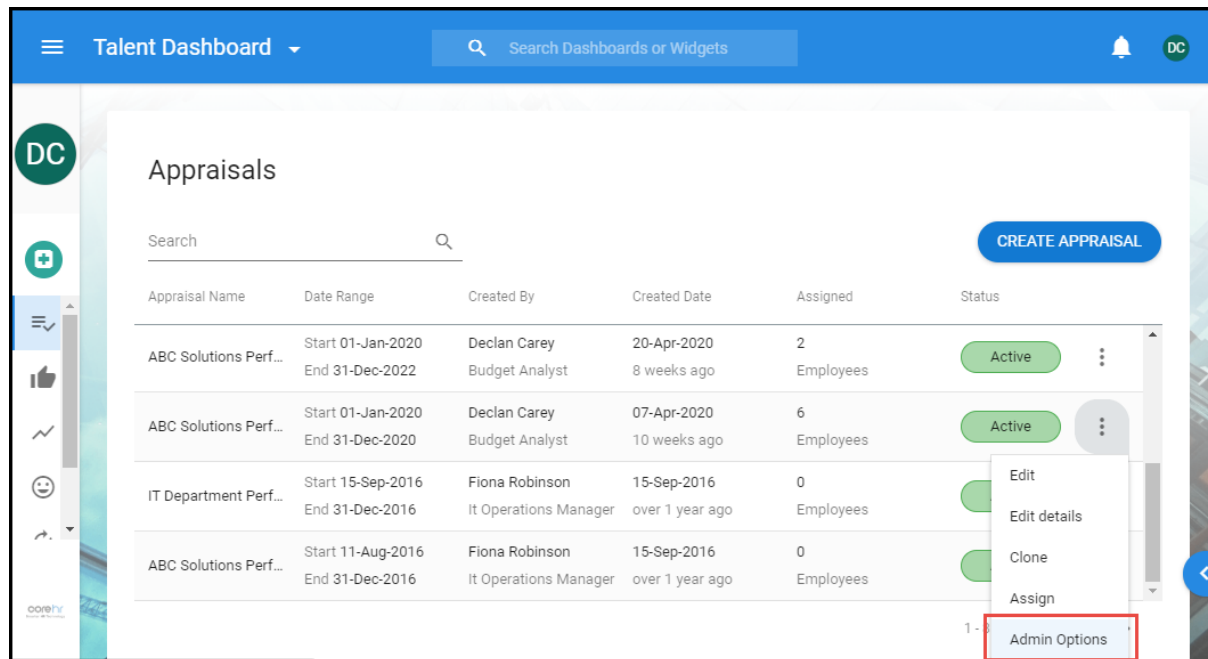

3.1.3. Manage Review

This allows you to carry out the following tasks on an active review per employee:

- Send it back to the employee to sign off again.
- Send it back to the manager to sign off again.
- Send it back to the indirect manager to sign off again.
- Mark as HR reviewed
- Delete / Removed the review from the employee

To action on these items, follow the below steps:

1. Click on the **Admin Options** button against the active appraisal.

2. Go to the *Manage Review* tab.
3. The following details appear:

Item	Description
Search	This allows you to search for the employees name.
Review Filter	This allows you to search on the review status: • All Reviews • Incomplete Reviews • Complete Reviews • Reviewed by HR • Not reviewed by HR
Employee	This shows the employees name and their corresponding appointment-ID.
Position	This shows the employees job title and department.
Manager	This shows the employees review manager.
Status	This shows the following: • If the review has been completed or is due to be completed. • Date Due / Date Completed • Stage currently open and action required.
Actions	This allows you to update the review with the following:

Item	Description
	• Send Back to Employee • Send Back to Manager • Send Back to Indirect Manager • Mark as HR Reviewed • Delete Review • Complete Review
Open Appraisal button	This allows you to open the full employees review

Send Back to Employee

To send a review back to an employee:

1. Search for the employee in question.
2. Click the **Send Back to Employee** button on the *Actions* drop-down list.
3. Mark the *Notify Affected Person* checkbox if a notification is to be sent to the employee making them aware of this change.

Manage Review

Note Sending back a review will only take effect on the final stage of the review. Rows selected 0

DC Appraisal sent back to manager Trevor Hemmi... •

11:36

Note: Sending back the review only takes effect on the final stage of a review.

Mark as HR reviewed

This allows you to update the status of the review from *Completed* to *HR reviewed*.

Complete Review

As a HR administrator, you can complete the review on behalf of the employee or the manager if they are not able to.

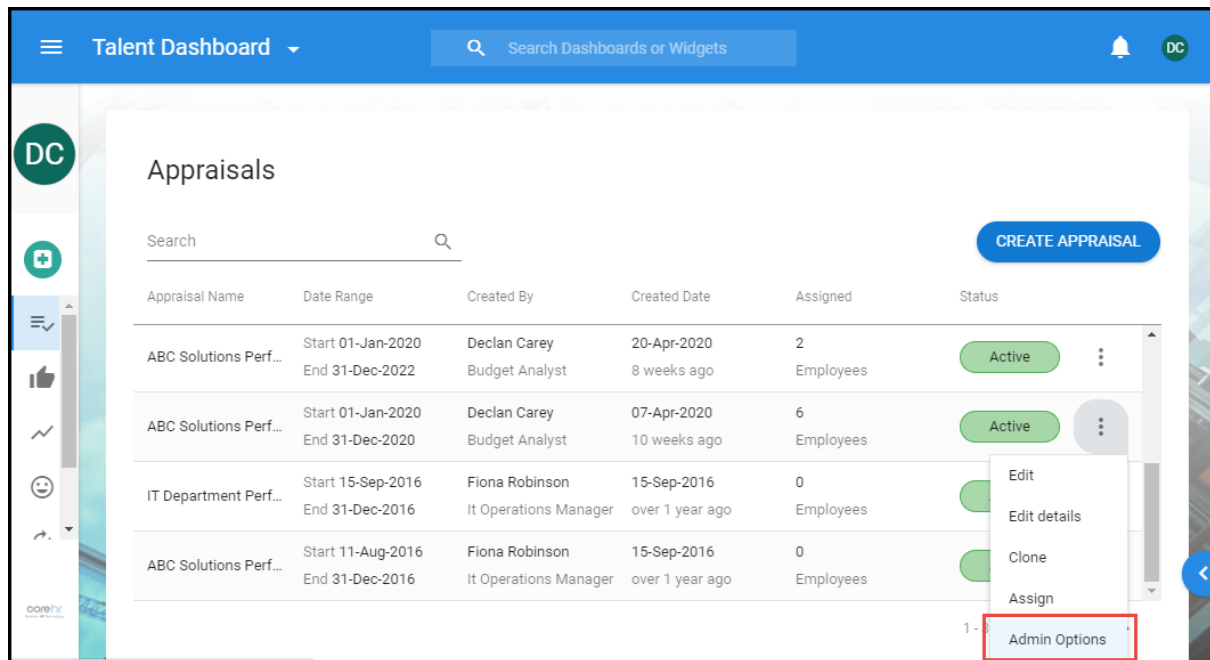

Delete Review

This allows you to remove the review from the employee and all the data associated with it. Once this is done, you can re-assign the review to the employee if needed. However, the review process needs to start again from the first stage.

3.1.4. Move Review to New Contract

This allows you to move a review to an additional contract that an employee may have on top of their substantive contract in CoreHR. All reviews get assigned to an employee's main appointment-id, and are not linked to any additional appointment-ids unless updated using the below steps:

1. Click on the **Admin Options** button against the active appraisal.

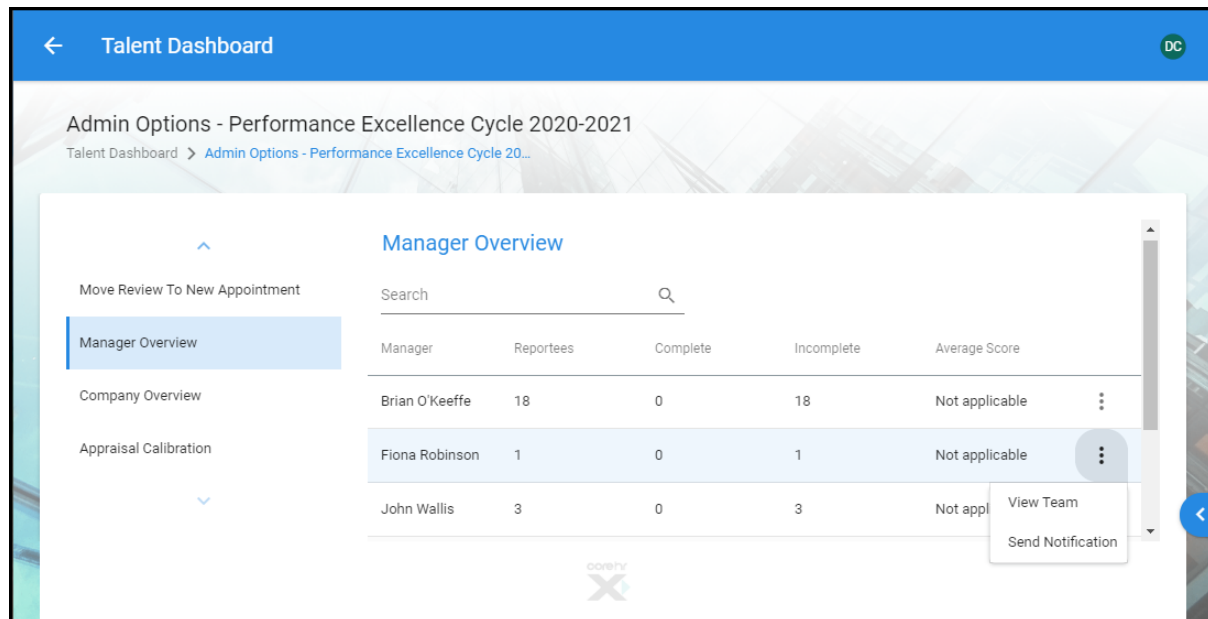

2. Go to the *Move Review to New Appointment* tab
3. The following details appear on screen:

Item	Description
Search	This allows you to search for the employees name.
Employee	This shows the employees name and their corresponding appointment-ID.
Position	This shows the employees job title and department.
Manager	This shows the employees review manager.
New Appointment ID	This allows you to move the review to an additional contract that the employee may have on their record.

4. Search for the employee in question and select a new appointment ID from the appointment ID drop-down box

3.1.5. Manager Overview

This allows you to have an overall view of the status of each manager's reportees reviews and their average final rating score.

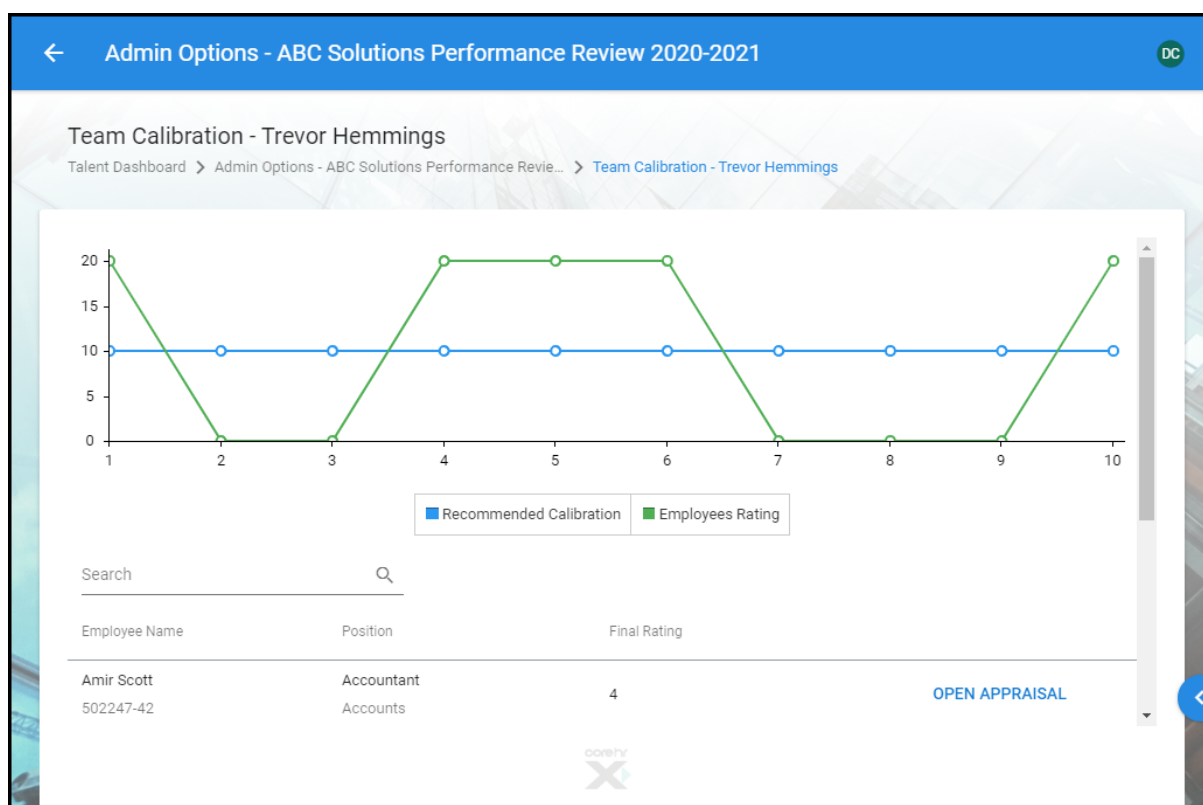

The following table outlines what is shown on the Manager Overview screen

Item	Description
Search	This returns the manager based on first name and surname.
Manager	This shows the name of the employees direct manager.
Reportees	This shows the number of reportees and manager has.
Complete	This shows how many appraisals / reviews have been completed by a managers team and HR.
Incomplete	This shows how many appraisals / reviews are awaiting either employee, manager or HR action.
Average Score	This brings back the average score across a managers team based on each review's final rating score. This is based on the company calibration data.

Item	Description
View Team	This allows you to view all the managers direct reportees and open their appraisal form
Send Notification	This allows you to send a reminder notification to a manager with a custom text to complete their review sign off stage.

View Team

This option shows the following graph section along with the option to view an employee's appraisal.

The calibration graph is based on the calibration data configured in [section 3.1.7 Appraisal Calibration](#). It returns the value of the final rating that the employee has entered against their performance review for the year. To view an employee's performance appraisal click the **Open Appraisal** button.

Warning Messages

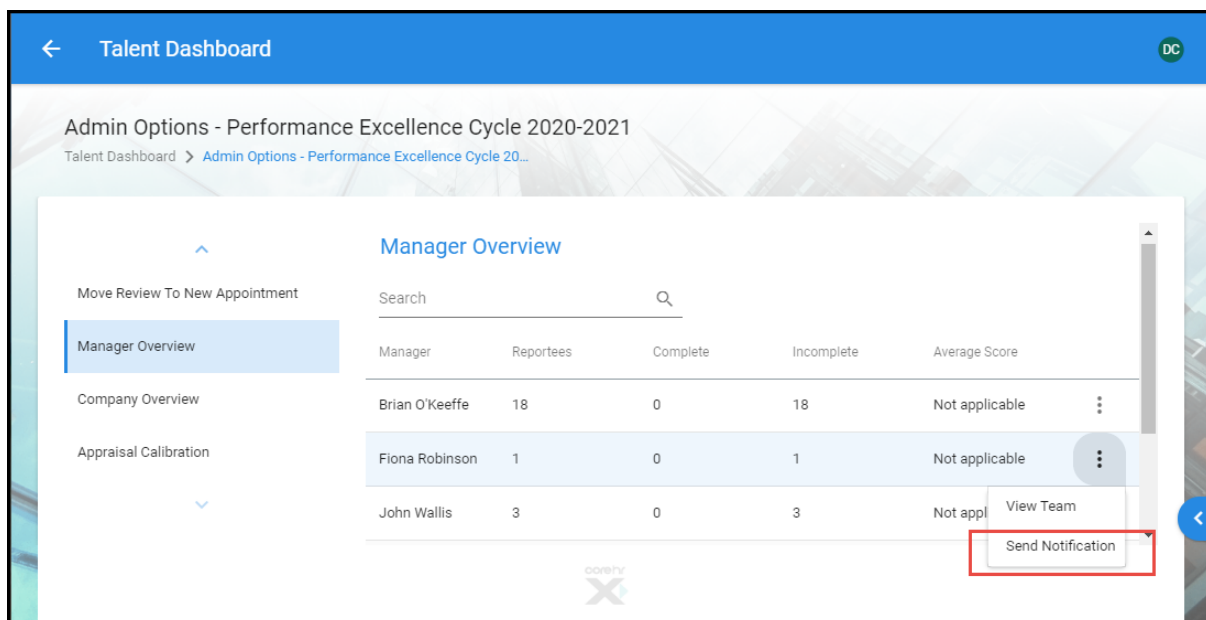

The following warning messages appear on screen, depending on different configuration and data scenarios. The graph does not show data until all credentials are met.

Message	Explanation
This appraisal is not using final rating data	The appraisal assigned to employees is not using any active rating data on their final rating stage.
This appraisal has no calibration set-up	The appraisal does not have any calibration data created yet. To create this data, refer to section 3.1.7 Appraisal Calibration .
This appraisal has no final rating recorded for any employee	The appraisal has yet to have any final rating data recorded by its employees and / or their managers

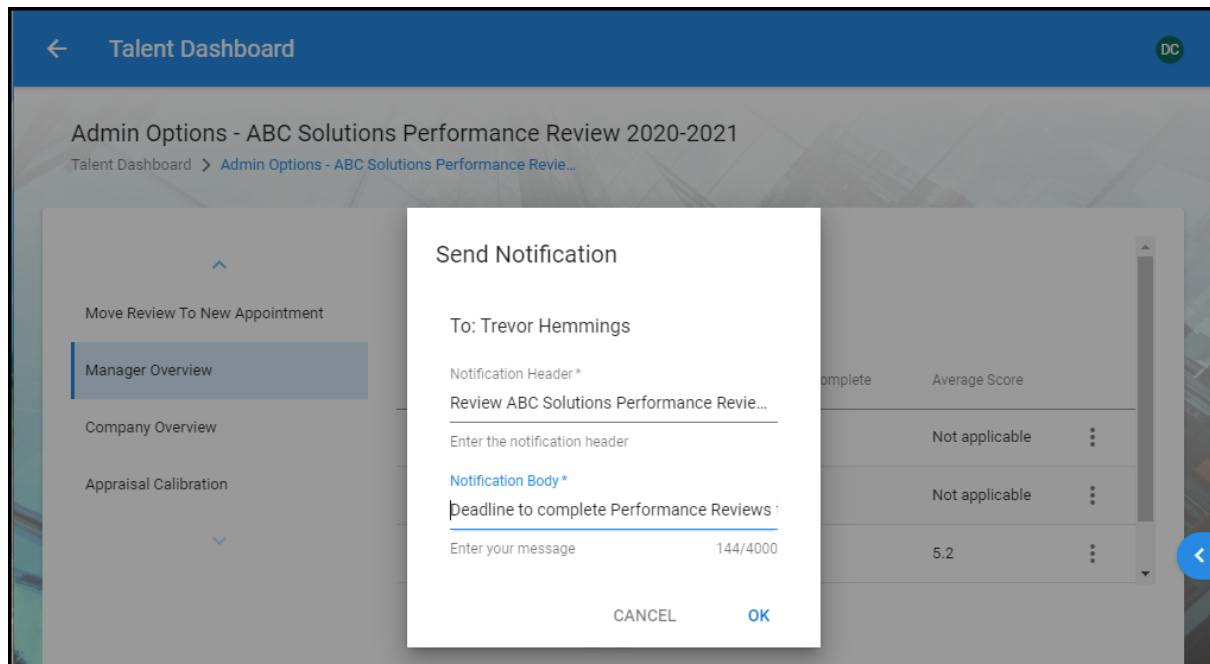

Send Notification

To send a custom notification to a manager:

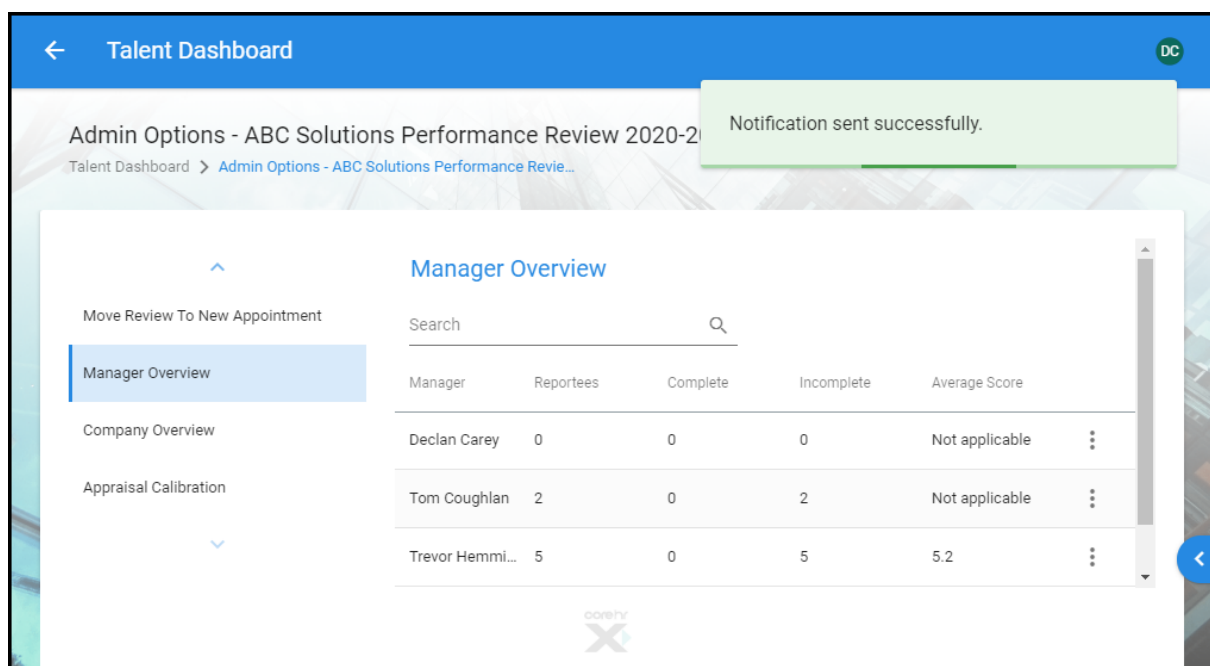

1. Click the Send Notification button against a specific manager

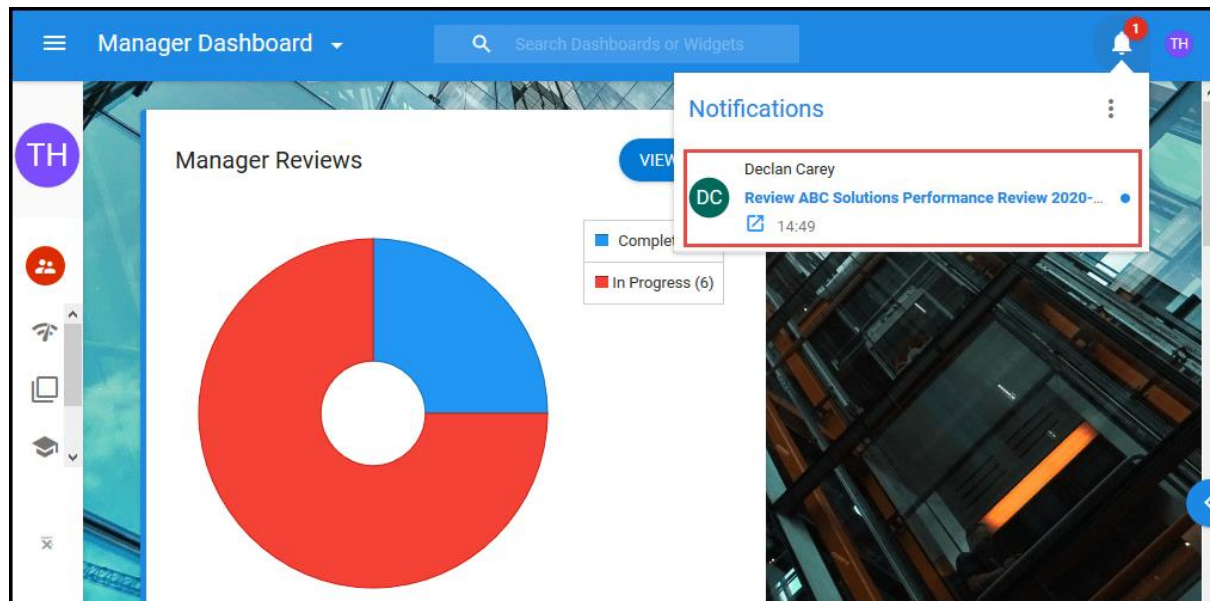

2. Enter your custom text (maximum 4000 alphanumeric characters)

3. Click **OK**
4. The following Notification sent successfully message appears on screen

5. The manager receives the notification in their notification centre detailing the appraisal's custom text created by the admin once opened.

3.1.6. Company Overview

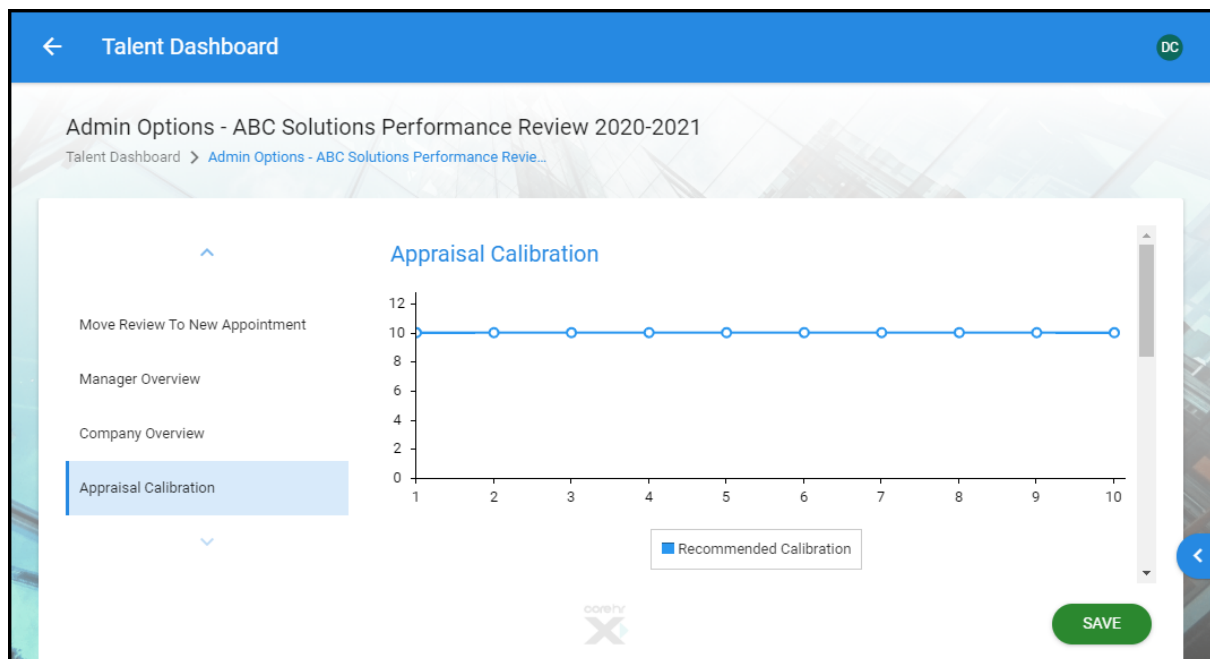

This screen gives a summary of all employee's final ratings, against the recommended calibration as per [section 3.1.7 Appraisal Calibration](#).

3.1.7. Appraisal Calibration

Performance Calibration is a process in which managers (typically within a department or function) come together to discuss the performance of employees and achieve agreement on performance appraisal ratings. The calibration process assists managers in delivering performance appraisals that are accurate, ensures the fair allocation of rewards, and helps organisations retain high performers.

To view the existing calibration details for an appraisal or create the data, following these steps:

1. The initial graph appears on screen

2. Along each rating, assign a percentage value. Note: the total value cannot exceed 100%
3. Update each % by either typing in a value manually or using the arrows available to increase or decrease the % value.

The screenshot shows the 'Appraisal Calibration' table. The table has two columns: 'Rating' and 'Percentage'. The ratings 6 through 10 are visible, each with a corresponding '10.00%' value. A 'Total 100%' row is at the bottom, highlighted with a red border. A green 'SAVE' button is at the bottom right.

Rating	Percentage
6	10.00%
7	10.00%
8	10.00%
9	10.00%
10	10.00%
Total 100%	

4. Click the **Save** button

4. Notifications

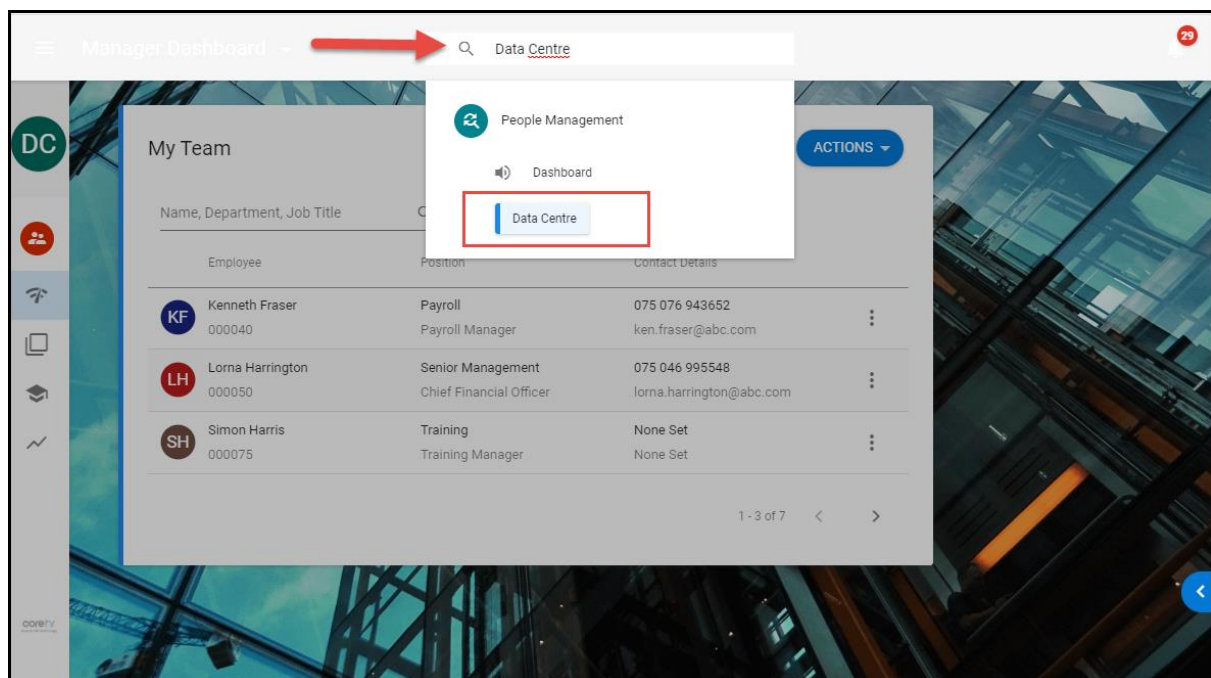

4.1. Event Management

There are three event categories that notifications and emails can be created from the talent management module:

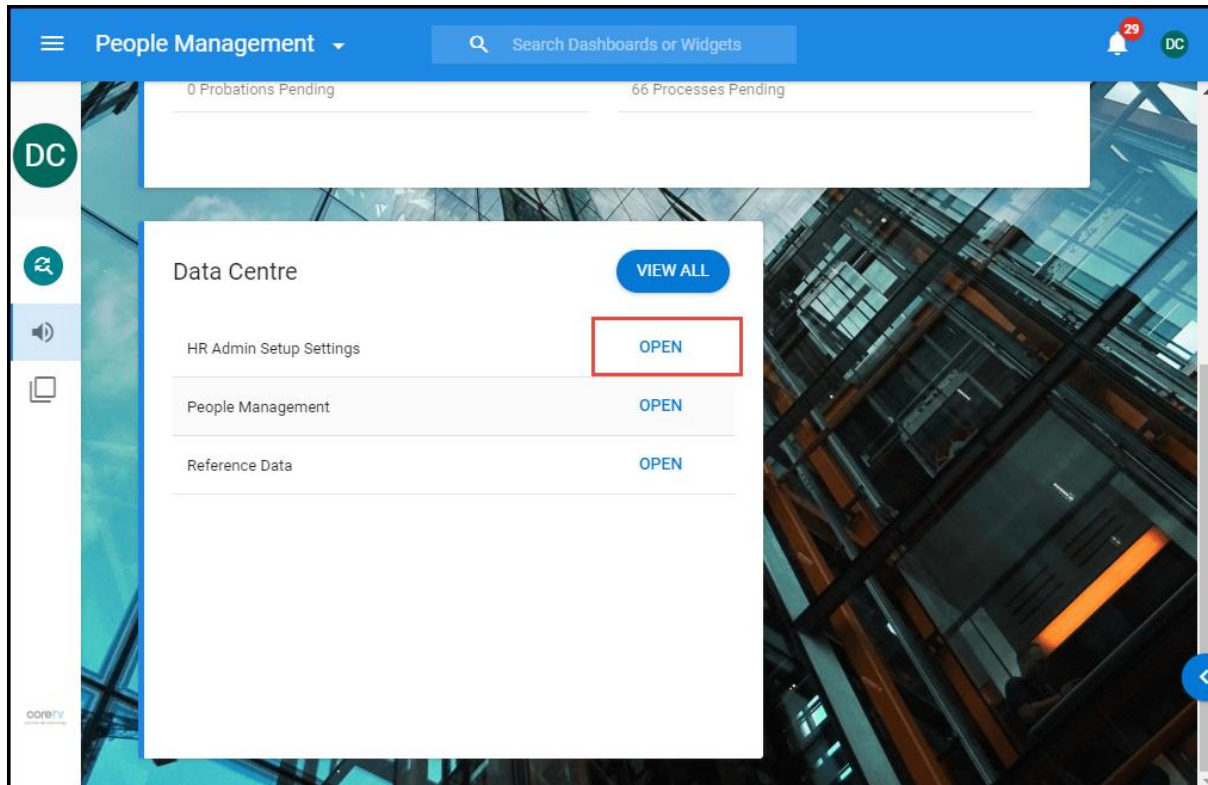

1. Talent Management Review
2. Talent Management Review Sign Off
3. Talent Management Review Stage

These can be configured using the following steps:

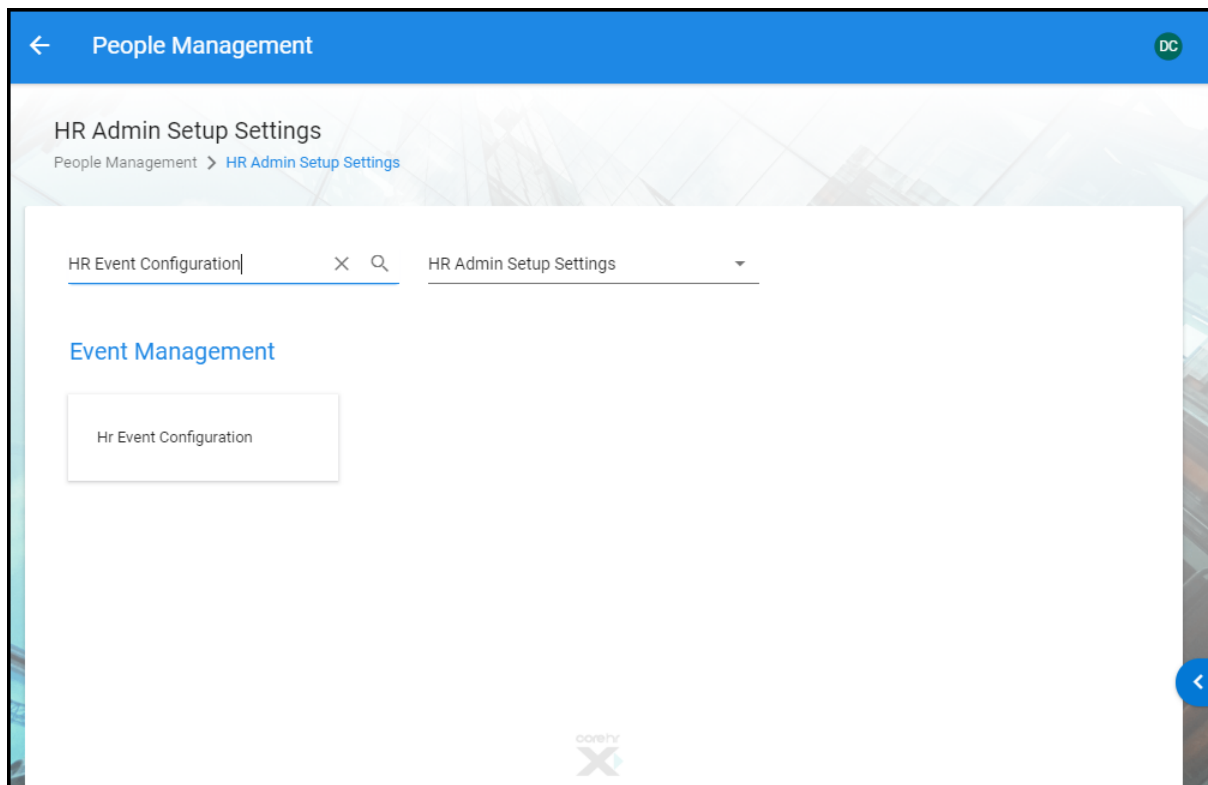

1. Quick Jump to *Data Centre* on the People Management dashboard

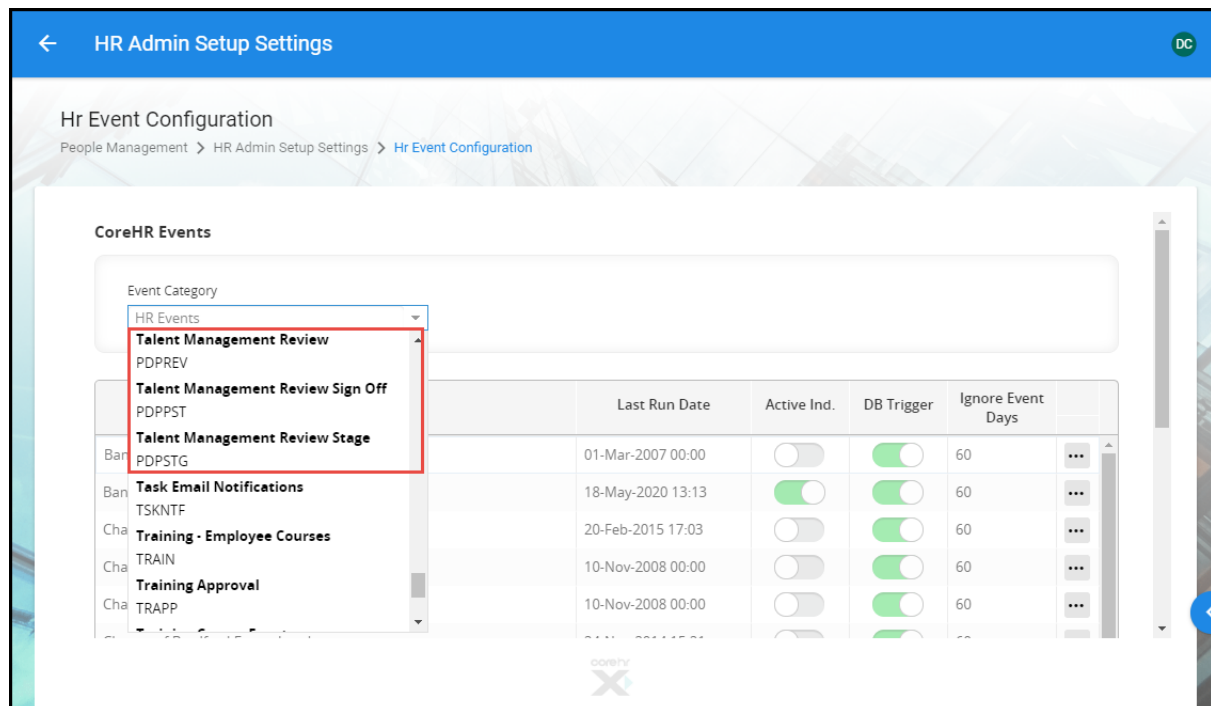

2. Click on the **Open** button aligned to the *HR Setup Settings* option.

3. Search for HR Event Configuration

- Once on the HR Event Configuration screen, select the Talent Management Review options from the event category drop down list.

- Create and manage all notification events available.
