1. Overview

1.1. Purpose of the Guide

Balances are a key element of the PeopleXD WFM system allowing the user the flexibility to monitor many situations such as Annual Leave, Time in Lieu, Flexi Time, Study Leave, Parental Leave, Sick Leave and Holiday Entitlement Accrual for temporary workers.

PeopleXD WFM allows any number of balances to be set up. Each balance will have its own rules.

- What is to happen when a balance entitlement is exceeded?
- Is the balance calendar based or on a specified number of rolling weeks.
- Balances can in turn be allocated to requisite Work Groups, Departments or individuals.

Balances are comprised of 'Entitlements' where are assigned to employees. As staff record and request leave the taken and booked are update which are in turn subtracted from the person's entitlement balances remaining including and excluding booked values.

The purpose of this guide is to show how to manage Balances and their configuration to aid Administrators complete their day-to-day tasks and explain the various configuration screens.

1.2. Terminology

Balances are assigned to employees and/or employee appointments. Balances are comprised of Set-up (Parameters/Calendars etc...), Entitlements (Balance Elements), Pay code/hours (taken and booked transactions), Adjustments (manual override) and Period Ends (balance period close downs)

1.2.1. Balance Elements

The following table list the balance elements available.

Element	Description										
Reserved	The Person cannot book time off from this element, it reserved by the company and the staff member cannot book leave to this slot e.g. Company Shutdown. This is used in specific Flexitime configurations, where the persons flexi leave entitlement is based on the flexi (+) hours worked up/carried from the previous month e.g. Standard working day is 7 hours = 1 flexi leave day, min blocks = ½ days, carried limit 7.00 hrs from one period to the next <table border="1"> <tr> <td>October – Reserved Hours</td><td>November – Allowed Time off</td></tr> <tr> <td>Person A (+) 7.00 hrs</td><td>Allowed 7 hours or 1 Flexi Leave day</td></tr> <tr> <td>Person B (+) 6.00 hrs</td><td>Allowed 3.5 hours or 0.5 flex leave days</td></tr> <tr> <td>Person C (+) 3.00 hrs</td><td>Allowed 0 flexi leave days, as not enough carried</td></tr> <tr> <td>Person D (+) 20.00 hrs</td><td>Allowed 1 Flexi Leave day, Limit allowed is 7 hrs</td></tr> </table>	October – Reserved Hours	November – Allowed Time off	Person A (+) 7.00 hrs	Allowed 7 hours or 1 Flexi Leave day	Person B (+) 6.00 hrs	Allowed 3.5 hours or 0.5 flex leave days	Person C (+) 3.00 hrs	Allowed 0 flexi leave days, as not enough carried	Person D (+) 20.00 hrs	Allowed 1 Flexi Leave day, Limit allowed is 7 hrs
October – Reserved Hours	November – Allowed Time off										
Person A (+) 7.00 hrs	Allowed 7 hours or 1 Flexi Leave day										
Person B (+) 6.00 hrs	Allowed 3.5 hours or 0.5 flex leave days										
Person C (+) 3.00 hrs	Allowed 0 flexi leave days, as not enough carried										
Person D (+) 20.00 hrs	Allowed 1 Flexi Leave day, Limit allowed is 7 hrs										
Floating	The entitlement that is floating and available to the employee to take as required.										
Accrued	Element can be configured to store the accrued element of a person's balance e.g. Employees accrued 1.75 days per month (see Accrual Calendars)										
Carried	Carried from one period to the next, typically used in conjunction with Annual Leave and flexitime, for example 3 days carried annual leave carried over from last year 7.00 hours flexi carried form the last flexi period										
Taken	The days/hours/occurrences taken during the balance period e.g. 10 days annual leave taken.										
Booked	The number of days/hours/occurrence planned in the future										
Balance	The balance remaining which is the sum of <u>On an 'Entitlement' based balance</u> a) Reserved + Floating + Accrued + Carried – Taken – Booked = Balance in an 'Entitlement' balance b) Summed (+) Taken (-) Taken = Balance in a '<u>Balance Only</u>' balance										

1.2.2. Pay Codes

Within PeopleXD Pay/Time codes are required to operate the balances where each pay code represents a leave or absence type (e.g. 3400 Annual Leave). The appropriate pay code(s) are attached to the various 'affecting' elements of a balance, example may include:

- **Annual Leave** - Annual Leave pay code is assigned to the 'Taken' element
- **Parental Leave** - Parental Leave pay code is assigned to the 'Taken' element
- **Time in Lieu** - Time in Lieu Worked & Taken codes are assigned to the 'Balance' element

Any number of pay codes can be linked to a balance. Every time a new leave pay code is set up it must be considered if the particular pay code needs to be assigned within the balance configuration.

1.2.3. Balance Parameters

Balances must be set up with a unique balance code and description. The balance parameters required certain parameters/rules to be configured to control how the balance will operate after been assigned to employees, examples include:

- What is the balance code and the description to describe the balance?
- What Time (pay) codes affect the balance?
- What elements are affected by the pay codes?
- What are Employee Entitlement based 'on' (direct assignment, grade, position etc.)?
- Does the balance need to link to personnel for the FTE history
- Do Length of service rules apply?
- Should the system 'Stop' or 'Warn' where a person exceeds their entitlement
- Is the balance based on a rolling period or a fixed calendar

1.2.4. Balance Calendars

The balance duration e.g. Annual Leave calendar year, flexitime monthly or 4 weekly. All balances require their own calendars. The calendar specifies the start and end dates of each balance period. In addition, when creating the calendar, you can impose any required restrictions that are required, for example you might want to restrict the number of hours that are 'Carried Forward' into the next flexitime accounting period.

2. Balance Configuration Summary Screen

The Balance Configuration Summary screen is where administrators can manage balances for their organisation. The screen lists all Balances created and shows if they are active or not. This screen can be used to further configure balance to organisational requirements.

2.1. Accessing the Balance Configuration Summary Screen

To access the *Balance Configuration* screen, complete the following:

1. Quick jump to the *WFM Admin Dashboard*
2. Select **WFM Configuration**
3. Select the **Balance Configuration** tile.
4. The screen displays.

Code	Balance Name	Current Period	Type	Display Type	Appt. Based	Length of Service Based On	Entitlements Based On	Entitlement Exceeded	Label	Emp./A...	Active
7040AL	Annual Leave 7040	2020 (01-Jan-2020-31-Dec-20...	Fixed	Decimal	☒			Warn		67	☒
7040PL	Parental Leave 7040	2024 (01-Jan-2024-31-Dec-20...	Fixed	Decimal	☒			Warn		0	☒
7050AL	Annual Leave 7050	2018 (01-Jan-2018-31-Dec-20...	Fixed	Decimal	☐		Company	Warn		15072	☒
7050PL	Parental Leave 7050	2017 (01-Jan-2017-31-Dec-20...	Fixed	Decimal	☐			Warn		1	☒
7051AL	Annual Leave 7051	2024 (01-Jan-2024-31-Dec-20...	Fixed	Decimal	☒			Warn		67	☒
7051PL	Parental Leave 7051	2017 (01-Jan-2017-31-Dec-20...	Fixed	Decimal	☒			Warn		0	☒
7052AL	Annual Leave 7052	2023 (01-Jan-2023-31-Dec-20...	Fixed	Decimal	☒			Warn		67	☒
7052PL	Parental Leave 7052	2017 (01-Jan-2017-31-Dec-20...	Fixed	Decimal	☒			Warn		0	☒

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific balance you wish to configure.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. • Display Type • Entitlement Based On • Entitlement Exceeded • Label

Option	Details
	- Appointment Based - Active

The **Balance Configuration Summary** screen displays the following fields:

Options	Details
Code	This is the unique code associated with balance. Balances are displayed in Numerical & Alphabetical order. It's recommended to leave a predefined gaps between codes to facility extra balances configured post implementations e.g. AL01 - Annual Leave FL01 - Flexi Leave
Balance Name	This displays the name describing the balance, this name is display to all users of the system e.g. Annual Leave. This can be edited directly from the grid.
Current Period	This displays the current period of the Balance.
Type	This displays the type of Balance. It will be one of the following options: Fixed Personal Rolling
Display Type	This displays the format for the balance used on forms and reports. This can be edited directly from the grid and can be either: Minutes Decimal  Note: If the Balance Type is to be held in <i>Days</i> at the person level, <i>Person Maintenance</i>, the indicator should be set to DECIMAL to facilitate part days e.g. 5.50 represents 5 ½ days.
Appt. Based	Will only be enabled where sites are appointment driven e.g., multi-appointment.
Length of Service Based On	Displays what the employees Length of Service (LOS) is based on.

Options	Details
Entitlement Based On	This identifies what the balance entitlement is based on e.g. Company, Department, Cost Centre, Work Group, Location. This can be edited directly from the grid.
Entitlement Exceeded	This indicator provides 3 levels of warning when the entitlement has been exceeded. This can be edited directly from the grid, the options are: • Stop - the entitlement from being exceeded. • Warn - the user that the entitlement has been exceeded. • Allow - the entitlement to be exceeded.
Label	This is the label given to the balance to make it more searchable/memorable. The Maximum characters length is 150.
Active Emp. / Appt.	This displays the total number of active people assigned to the balance.
Inactive Emp. / Appt.	This displays the total number people who were assigned to this balance historically.
Active Indicator	By default, any new or existing Balance will be marked as Active.  Note: Balances can only be Inactive if both the active and inactive employee counts are Zero.

From the 3-dot menu of any Balance, you can:

- **View/Edit Balance** – gives you access to the configuration screens for the balance. See [Section 3 – Configuration](#) for details.
- **Copy Balance** – allows you to copy an existing balance. This may be beneficial as it maintains a number of parameter configurations of the balance being copied thus saving you time.

 **Note:** Only current and future Calendar details will be copied, any historical calendar information is not included when copying a balance.

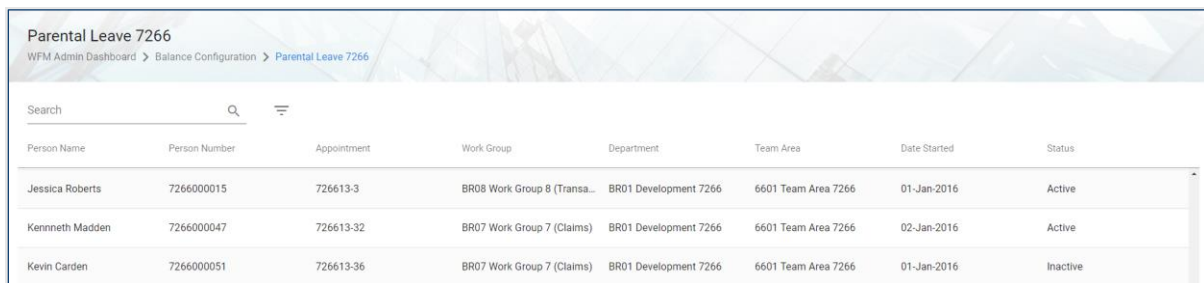

- **View Employees** – allows you to view a list of employees assigned to the balance.

2.1.1. To Copy a Balance:

1. From the 3-dot menu of the balance you would like to copy, select **Copy Balance**.
2. Enter a **Code**, for the copied balance.
3. Enter a **Balance Name**, for the copied balance.
4. Click **OK**.
5. Your copied balance will display in the list for you to use and further configure, if required.

2.1.2. To View Employees:

1. From the 3-dot menu of the relevant balance, select **View Employees**.
2. The list of employees assigned to the balance displays.
 - The list contains both active and inactive employee assigned to the balance.

Person Name	Person Number	Appointment	Work Group	Department	Team Area	Date Started	Status
Jessica Roberts	7266000015	726613-3	BR08 Work Group 8 (Transa...	BR01 Development 7266	6601 Team Area 7266	01-Jan-2016	Active
Kenneth Madden	7266000047	726613-32	BR07 Work Group 7 (Claims)	BR01 Development 7266	6601 Team Area 7266	02-Jan-2016	Active
Kevin Carden	7266000051	726613-36	BR07 Work Group 7 (Claims)	BR01 Development 7266	6601 Team Area 7266	01-Jan-2016	Inactive

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific employee.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. • Work Group • Status • Department

2.2. Actions button

From the *Actions* button on the Balance configuration screen, you have access to create a new balance as well as view and manage your balance entitlements. The options available are:

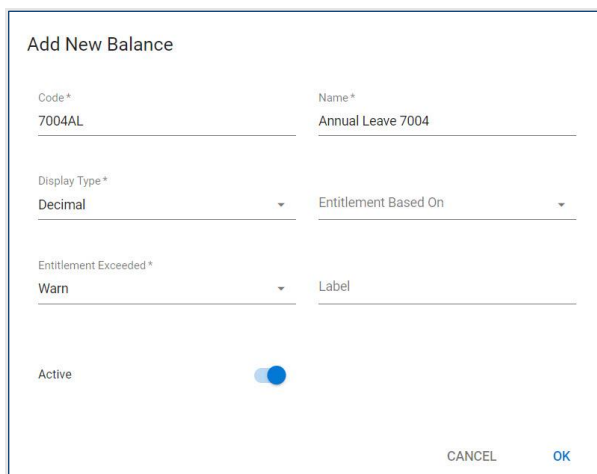

- Add Balance
- Balance Entitlements
- Pro Rate Entitlements
- Length of Service Increments

- Balance Bonus
- Standard Hours
- Balance Rules

2.2.1. Add Balance

To add a new balance, from the Actions dropdown:

1. Select **Add Balance**.
2. Enter a **Code & Name** for your balance.
 - Maximum character length for Code is 6 and Name is 40.
3. Select the **Balance Type**.
 - This is the format of the balance used on forms and reports.
4. Select the **Entitlement** the balance is based on, from the dropdown options.
5. Select the relevant **Entitlement exceeded** option, from the dropdown options.
 - This indicator provides the level of warning when the entitlement has been exceeded.
6. Add a Label to the balance, if required.
7. The Active toggle will be enabled by default.
8. Click **OK**.

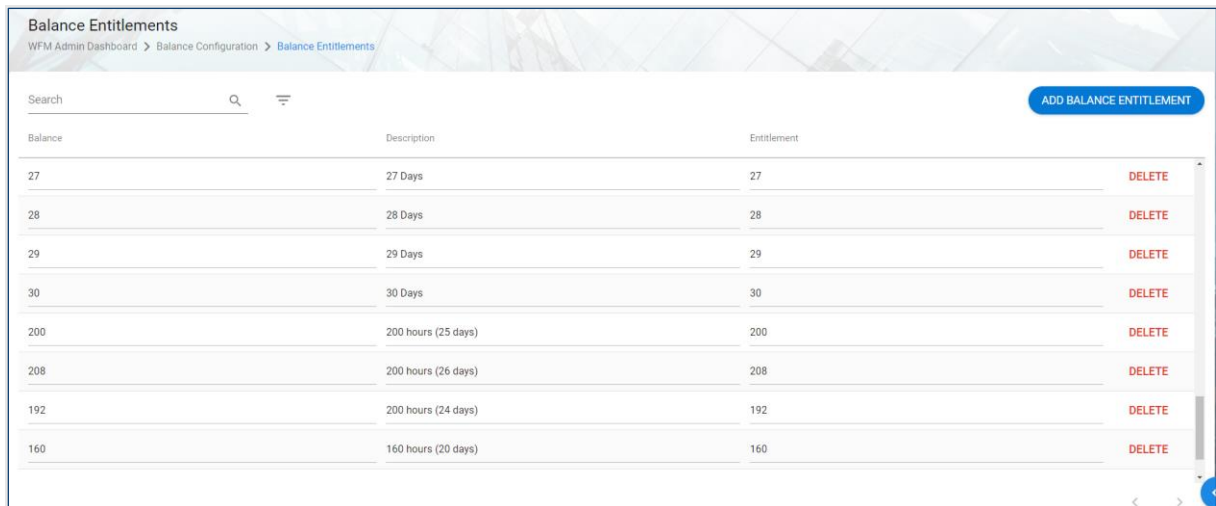

The screenshot shows a dialog box titled "Add New Balance". It contains several input fields and dropdown menus. The "Code*" field has the value "7004AL". The "Name*" field has the value "Annual Leave 7004". The "Display Type*" dropdown is set to "Decimal". The "Entitlement Based On" dropdown is set to "Entitlement Based On". The "Entitlement Exceeded*" dropdown is set to "Warn". There is a "Label" field which is currently empty. At the bottom, there is an "Active" toggle switch which is turned on (blue). In the bottom right corner, there are "CANCEL" and "OK" buttons.

9. Your New Balance will open for you to further configure. See [Section 3 Configuration](#) for further guidance.

2.2.2. Balance Entitlements

This screen will display a list of all Balance Entitlements, from here you can manage your Balance Entitlement.

WFM Balances – Configuration Guide

Balance	Description	Entitlement	
27	27 Days	27	DELETE
28	28 Days	28	DELETE
29	29 Days	29	DELETE
30	30 Days	30	DELETE
200	200 hours (25 days)	200	DELETE
208	200 hours (26 days)	208	DELETE
192	200 hours (24 days)	192	DELETE
160	160 hours (20 days)	160	DELETE

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific balance entitlement.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. • Balance • Entitlement

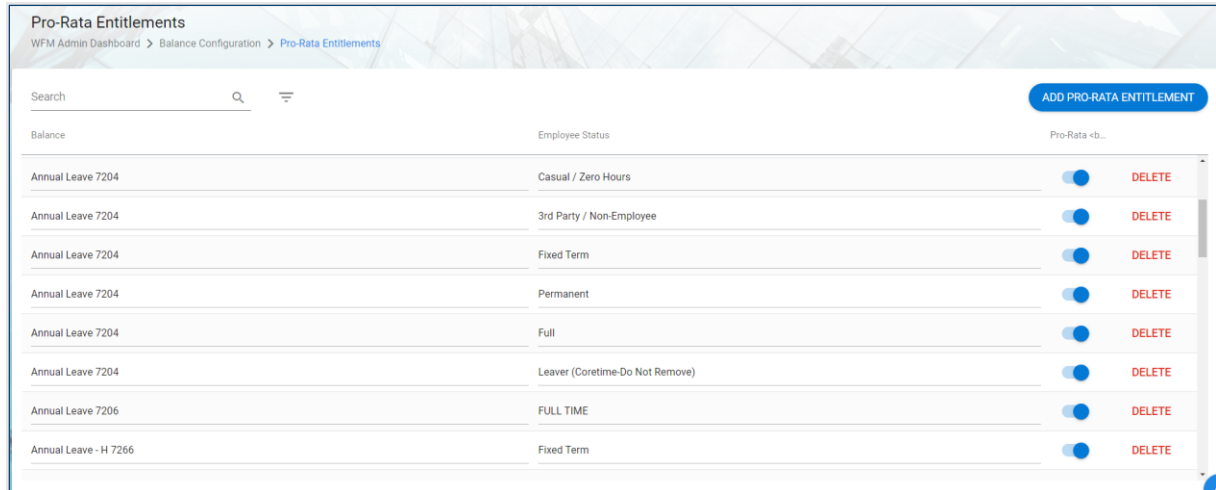

To Add a Balance Entitlement:

1. Click **Add Balance Entitlement**.
2. Enter a **Code** for your Balance Entitlement, maximum 4 characters.
3. Enter a **Description**, maximum 40 characters.
4. Enter an **Entitlement** number, this can be used to group related entitlements so when applied to the filter it returns all related entitlements.
5. Click **OK**.
6. Your balance entitlement will display.

2.2.3. Pro-Rata Entitlements

This screen will display a list of all Pro-Rata Entitlements, from here you can manage your Pro-Rata Entitlement.

WFM Balances – Configuration Guide

Balance	Employee Status	Pro-Rata ...
Annual Leave 7204	Casual / Zero Hours	☒ DELETE
Annual Leave 7204	3rd Party / Non-Employee	☒ DELETE
Annual Leave 7204	Fixed Term	☒ DELETE
Annual Leave 7204	Permanent	☒ DELETE
Annual Leave 7204	Full	☒ DELETE
Annual Leave 7204	Leaver (Coretime-Do Not Remove)	☒ DELETE
Annual Leave 7206	FULL TIME	☒ DELETE
Annual Leave - H 7266	Fixed Term	☒ DELETE

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific pro-rata entitlement.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. - Balance - Pro-Rata Leave Date - Employee Status

To Add a Pro-Rata Entitlement:

1. Click **Add Pro-Rata Entitlement**.
2. Select the **Balance** the entitlement will be applied to, from the dropdown options.
3. Select the **Employee Status** the entitlement will be applied to, from the dropdown options.
4. By enabling the **Pro-Rata Leave Date** toggle, this will pro-rate the entitlement based on the leave date for example, If the balance starts 01-Jan-2023 and the entitlement is 20 days and the user leaves on the 01-Jul-2023, then they will receive 50% of the years entitlement – 10 days.
5. Click **OK**.
6. Your pro-rata entitlement will display.

2.2.4. Length of Service Increments

This screen will display a list of all Length of Service Increments, from here you can manage your LOS Increments.

WFM Balances – Configuration Guide

Service Code	Description	From Months	To Months	Reserved Entitle...	Floating Entitle...	Accrued Entitle...	Carried Forward	Taken	Balance
LOS05	LOS Scheme SFS 40	60	9999						
LSI	Length Of Service Prof Uh 1- 6	2	4	2	3	2	6	44	
LSI	Length Of Service Prof Uh 1- 6	12	24		1				
LSI	Length Of Service Prof Uh 1- 6	24.5	9999		1				
MLOS	Manager 2 LOS	12	24		1				
MLOS	Manager 2 LOS	24	999		1				
PF_0	Police Force Officers	0	12		0				

The screen can be filtered using the following options:

Option	Details
Service Code	Use the dropdown options to refine the display to a specific service code.
Entitlement For	Use the dropdown options to refine your search to a specific Entitlement for: - Days - Hours - Occurrences - Accruals

To Add a Length of Service Increment:

1. Click **Add Length of Service Increment**.
2. Select the **Service Code** the increment will be applied to, from the dropdown options.
3. Enter a value for the **From Months**, the increment will be applied from.
4. Enter a value for the **To Months**, the increment will be applied to.
5. Click **OK**.
6. Your Length of Service Increment will display.
7. Further configuration can be added directly to your LOS increment from the grid. For example, adding Reserved, Floating or Accrual entitlement values.

2.2.5. Balance Bonus

The Balance Bonus screen provides users with the means for setting up bonuses for balances based on the number of hours worked at specific pay codes during specific dates.

WFM Balances – Configuration Guide

Balance Bonus
WFM Admin Dashboard > Balance Configuration > Balance Bonus

Bonus Code

ACTIONS

Calendar Bonus Affecting Codes

ADD CALENDAR

Bonus C..	Description	Start Date	End Date	Weekly «br»	Hours From	Hours To	Balance	Affecting Element	Bonus Ho..	Bonus Days	Completed

ERE	test	01-Jan-2024	30-Nov-2024	☐			Colie Testing	Balance	3	1	☐	DELETE

The screen can be filtered using the following options:

Option	Details
Balance Code	Use the dropdown options to refine the display to a specific balance code. This will return refined results for both the Calendar & Bonus Affecting Codes displays.

The **Calendar** screen displays the following fields:

Options	Details
Bonus Code	This is the Bonus Code.
Description	This is the description given to the Bonus Code. This can be edited from Actions.
Start Date	Enter the start date that the bonus becomes effective from e.g., 01-Nov-2023
End Date	Enter the end date, after which this bonus is no longer applied e.g. 01-Dec-2023.
Weekly Default	If enabled, the bonus is applied weekly.  Note: If an end date is associated a weekly bonus cannot be applied.
Hours From & To	Enter the minimum & maximum, in hours, that a person must work against the specified pay code before the bonus is applied e.g. 08.00 & 16.00

Options	Details
Balance	Enter the balance code that the bonus should affect e.g. A Holiday
Affecting Code	This is the Affecting Element which determines what the bonus code will affect. Options available are: - Reserved Entitlement - Accrual Entitlement - Taken - Floating Entitlement - Carried Forward - Balance
Bonus Hours	This is the amount, in hours, that should be added to the balance element, in decimal format e.g. 1.5
Bonus Days	This is the amount, in days, that should be added to the balance element, in decimal format e.g. 1.5
Complete	This indicates whether this date range has been completed.
Delete	This gives you the ability to delete the entry.

The **Bonus Affecting Codes** screen displays the following fields:

Options	Details
Bonus Code	This is the Bonus Code.
Description	This is the description associated to the Bonus Code.
Pay Code	This is the Pay Code the Bonus Code will affect.
Delete	This gives you the ability to delete the entry.

To Add a Bonus Code:

1. Expand *Actions* and select, **Add Bonus Code**.
2. Enter a **Bonus Code & Description**.
3. Click **OK**.
4. You will now need to Add a Calendar to your Bonus Code.
5. From the Calendar screen, click **Add Calendar**.
6. Select your **Balance Code**.
7. Enable the **Weekly Default** toggle, if required.
8. Enter the **Start & End dates** of your calendar.
9. Select the **Balance** your code is to be applied to, from the dropdown options.
10. Select the **Affecting Element** to be applied to your code, from the dropdown options.
11. Enter a value for **Bonus Hours & Days**

12. Click **OK**.
13. You can now Add a Pay Code to your Bonus Code, if required.
14. From the Bonus affecting screen, click **Add Pay Code**.
15. Select your **Bonus Code**.
16. Select the **Pay Code** your bonus code will affect, from the dropdown options.
17. Click **OK**.

2.2.6. Balance Rules

This screen will display a list of all Balance Rules, from here you can manage your Balance Rules.

Balance Rule	Rule Type			ACTIONS
Rule1	Company	Company	Balance Type	Segment
		1004 IR Company B0	Days	Full
				DELETE
				SAVE

The screen can be filtered using the following options:

Option	Details
Balance Rule	Use the dropdown options to refine the display to a specific balance rule. The associated <i>rule type</i> will automatically display once selected.

Depending on the Rule Type the screen fields displayed will differ.

To Create a Balance Rule:

1. Expand *Actions* and select, **Create Balance Rule**.
2. Enter a **Code & Description**, for your balance Rule.
3. Select the relevant **Rule Type**, from the dropdown options, for your Rule.
4. Click **OK**.
5. You will now need to Add a Rule Code to your Balance Rule.
6. From *Balance Rule*, select your Rule from the dropdown options.
7. Expand *Actions*, select **Add Rule Code**.
8. Select the **Company** the rule is to be associated to.
9. Select the **Balance Type**, for the rule.

10. Select the **Balance Segment**, for the rule.
11. Click **OK**.
12. Your Balance Rule will display.
13. Click **Save**.

2.2.7. Standard Hours

This screen will display a list of all Standard Hours, from here you can manage your Standard Hours.

Balance Code	Date Effective	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday	
Collie Testing - Copy	28-Nov-2023	2.55	3.33	1000	1000.99	2.2	1.11		DELETE
0712	01-Nov-2023	9999.99	4.5	5.55	1	2	3		DELETE

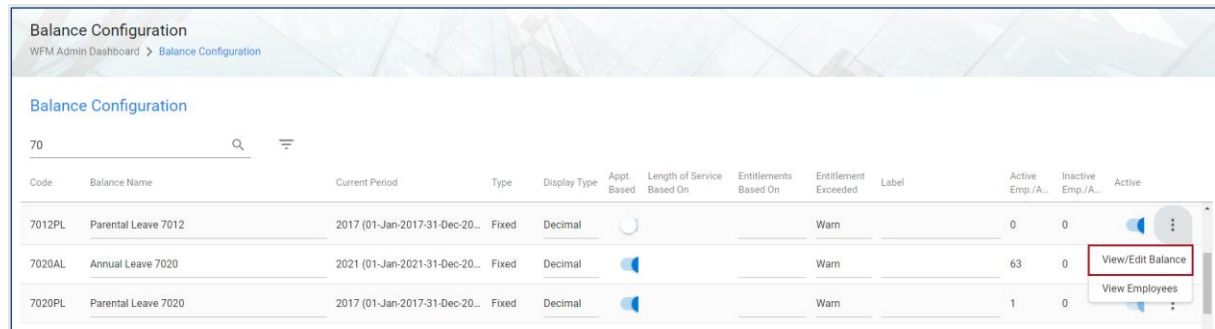

To Add Standard Hours:

1. Click **Add Standard Hours**.
2. Select the **Balance Code**, from the dropdown options, you wish to apply the standard hours to.
3. Enter an **Effective Date**.
4. Then add the standard hours to each day of the week, as required.
5. Click **OK**.
6. Your Standard Hours will display.

3. Configuration

The configuration screens allow you to customise and configure balances and can be accessed through the Balance Configuration Summary screen.

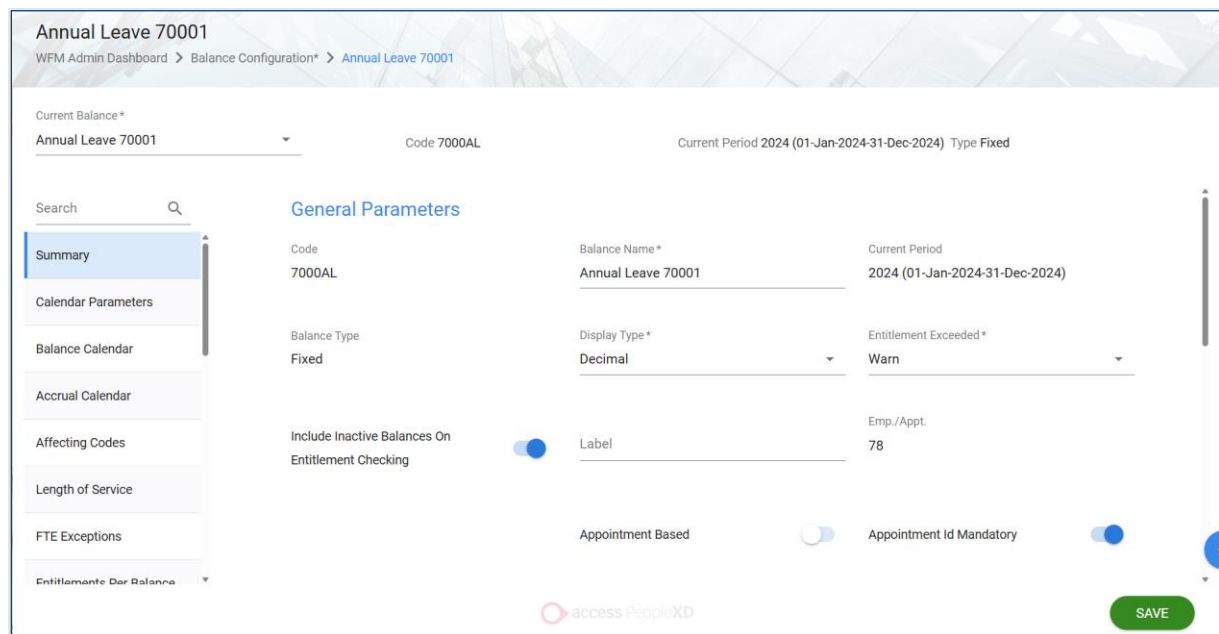

Simply select the balance you wish to configure and select **View/Edit Balance** from the 3-dot menu to access the configuration screens.

The screenshot shows the 'Balance Configuration' summary screen. It features a table with columns: Code, Balance Name, Current Period, Type, Display Type, Appt. Based, Length of Service Based On, Entitlements Based On, Entitlement Exceeded, Label, Active Emp./A..., Inactive Emp./A..., and Active. Three balances are listed: 7012PL (Parental Leave 7012), 7020AL (Annual Leave 7020), and 7020PL (Parental Leave 7020). A 3-dot menu is visible next to the 7020AL row, with a red box highlighting the 'View/Edit Balance' option.

Code	Balance Name	Current Period	Type	Display Type	Appt. Based	Length of Service Based On	Entitlements Based On	Entitlement Exceeded	Label	Active Emp./A...	Inactive Emp./A...	Active
7012PL	Parental Leave 7012	2017 (01-Jan-2017-31-Dec-20...	Fixed	Decimal	☐			Warn		0	0	☐
7020AL	Annual Leave 7020	2021 (01-Jan-2021-31-Dec-20...	Fixed	Decimal	☒			Warn		63	0	☒
7020PL	Parental Leave 7020	2017 (01-Jan-2017-31-Dec-20...	Fixed	Decimal	☒			Warn		1	0	☒

This brings you directly to the *Balance Configuration* screens.

The screenshot shows the 'Annual Leave 70001' configuration screen. It has a left sidebar with a 'Summary' tab selected. The main area is titled 'General Parameters' and contains the following fields:

- Current Balance*:** Annual Leave 70001
- Code:** 7000AL
- Current Period:** 2024 (01-Jan-2024-31-Dec-2024)
- Type:** Fixed
- Balance Name*:** Annual Leave 70001
- Balance Type:** Fixed
- Display Type*:** Decimal
- Entitlement Exceeded*:** Warn
- Include Inactive Balances On Entitlement Checking:** ☒
- Label:** 78
- Emp./Appt.:** 78
- Appointment Based:** ☐
- Appointment Id Mandatory:** ☒

At the bottom right, there is a green 'SAVE' button.

3.1. Summary

The *Summary* screen features the default parameters which control the Balance.

The **General Parameters** section contains the following fields:

Field	Notes
Code	This is the unique code associated with balance. Balances are displayed in Numerical & Alphabetical order. It's recommended to leave a predefined gaps between codes to facility extra balances configured post implementations e.g. AL01 - Annual Leave FL01 - Flexi Leave
Balance Name	This displays the name describing the balance, this name is display to all users of the system e.g. Annual Leave.
Current Period	This displays the current period of the Balance.
Balance Type	This displays the type of Balance. It will be one of the following options: • Fixed • Personal • Rolling
Display Type	This displays the format for the balance used on forms and reports. This can be edited directly from the grid and can be either: • Minutes • Decimal  Note: If the Balance Type is to be held in <i>Days</i> at the person level, <i>Person Maintenance</i>, the indicator should be set to DECIMAL to facilitate part days e.g. 5.50 represents 5 ½ days.
Entitlement Exceeded	This indicator provides 3 levels of warning when the entitlement has been exceeded. This can be edited directly from the grid, the options are: • Stop - the entitlement from being exceeded. • Warn - the user that the entitlement has been exceeded. • Allow - the entitlement to be exceeded.
Include Inactive Balances On Entitlement Checking	Allows for balance entitlement validation on the timesheet input screen. • Where enabled, validation includes active and inactive balances assigned to the employee.

Field	Notes
	Where not enabled, validation only includes active balances assigned to the employee.  Note: Balances become inactive where an employee's appointment are ended.
Label	A free text field (max 150 characters) that allows you to label the Work Group to facilitate searches.
Emp./Appt.	This is the total number of employees associated with the balance. Note: This count contains active & inactive users
Appointment Based	Should only be enabled where sites are appointment driven (e.g. multi-appointment). The Balances factor in appointment Id's when assigning balances to staff. e.g. a staff member has 2 appt., and balances are linked to positions where position A1 is 20 days and A2 is 22 days. - A1 (20) - 10 days ($20 * 0.50$) - A2 (22) - 5.5 days ($22 * 0.25$) It's assumed the person is on the same FTE's/position for the calendar duration. Post assignment the employee would have two separate balances, 10 days annual leave for appointment A1 and 5.50 days for appointment A2.
Appointment Id Mandatory	Check to enforce the entry of Appointment ID 's where entering pay code that effect the balance.
Maintain Balance Only	Enable to indicate non-floating type balances, or balance only type balances, where the positive hour pay codes are matched to negative hours pay codes and pay codes update the balance element. Examples may include Time in Lieu, Time for Time or Flexitime where the balance is comprised of the hours worked (positive) versus the hours taken (negative).

Field	Notes
	Where Enable the program will validate that affecting pay codes can only be matched to the <i>Balance</i> element only. Where Disabled the program will validate that Affecting pay codes cannot be matched to the 'Balance' element only.
Flexitime Balance	If the balance is a flexitime balance, this toggle can be enabled. This is required for use with the CoreESS Flexitime Enquiry to identify flexi type balances and is linked to the 'flexitime' indicator on Balance Setup in Person Maintenance.
Instance Balance	This indicator is enabled when then instance details will only be recorded against this balance. For example, in the case of five days continuous absence only 1 instance will be recorded against the balance details.
Hide Balance	Enable on to hide this balance within the CoreTime system. The balance will then ONLY be visible to users with explicit access to hidden balances.
Use Hire/Leave Dates	Enable to restrict this balance to the employees hire and leave dates.
Comments Mandatory on Adjustments	If enabled, users must enter a comment when making a balance adjustment. If users do not enter a reason for adjustment, when enabled, they will receive an error 'Please review this form for errors' and the Reason for Adjustment field is highlighted.
Maintain Next Period Balance	If enabled, employees will be able to submit and validate leave requests for the next leave year.  Note: Company year, Balance year and Bank Holidays must be created for the new leave year. See our guide New Year Leave Entitlement for further details.
Calculate Rehire Entitlement	Should only be enabled where the balance is at a person level.

Field	Notes
	If enabled, an automatic adjustment occurs when an employee is rehired, in the same calendar year, to effectively ignore the previous employment period. The following adjustments are made: • Excludes Leave Taken values prior to the re-join date (e.g. Annual Leave taken) • Excludes Entitlements gained for the previous employment (e.g. Entitlement are pro-rata assigned based on Time in the org) • Excludes any Manual Adjustments completed prior to the re-join date (e.g. Annual Leave taken) • Entitlements are based on re-join date to end of that balances leave period.

The ***Rounding Rules*** section contains the following fields:

Field	Notes
Round	Rounding can be applied on either days or hours, select your preferred rounding option from the drop-down options available. • Up to the nearest - This will round the number up to the number of decimal places. For example, 1.3 is rounded to 2, 1.5 is rounded to 2 and 1.7 is also rounded to 2. • Down to the nearest - This will round the number down to the number of decimal places allowed. For example, 1.3 is rounded to 1, 1.5 is rounded to 1 and 1.7 is also rounded to 1. • To the nearest - This will round the number to the nearest value based on the number of decimal places. For example, 1.3 is rounded to 1, 1.5 is also rounded to 1 and 1.7 is rounded to 2. • To the nearest (favourable) - This will round the number to the nearest value based on the number of decimal places with a mid-point number being rounded up. For example, 1.3 is rounded to 1, 1.5 or 1.7 are rounded to 2.
Days	Dependent on Round criteria selected, enter as required.
Hours	Dependent on Round criteria selected, enter as required.

Field	Notes
Apply Rounding To	Rounding is performed on a balance, select where you want rounding to be performed from the drop-down options available: • All – This will apply rounding to Taken & Entitlement (default option) • Entitlement – This will apply rounding to Reserved, Floating, Accrued & Carried entitlements. • Taken – This will apply rounding to taken and booked leave.

The **Joiner/Leaver Overrides** section contains the following fields:

Field	Description
Pro-Rata Method	This is a check to automatically pro-rata starting entitlements. Select from the drop-down options a method for deducting joiners/leavers other than default method of dates e.g. weeks or months.
Override Join Date	Override the person join date by selecting from the drop-down options: • Start of the Month • Start of TNA Week • Start of Balance Week • Start of Next Month • Start of Next TNA Week • Start of Next Balance Week
Override Leave Date	Override the person leave date by selecting from the drop-down options: • End of the Month • End of TNA Week • End of Balance Week • End of Next Month • End of Next TNA Week • End of Next Balance Week

Click **SAVE** to capture any changes made.

3.2. Calendar Parameters

The *Calendar Parameters* screen allows you to configure the Rolling, Personal and Advanced Personal Calendars

WFM Balances – Configuration Guide

Annual Leave 7001

WFM Admin Dashboard > Balance Configuration > Annual Leave 7001

Rolling Calendar

Rolling Weeks Rolling Timeout Roll to Today

Personal Calendar

Use Personal Calendars

access PeopleX

SAVE

The **Rolling Calendar** section contains the following fields:

Field	Notes
Rollin Weeks	If the balance is a rolling balance, the number of rolling weeks can be entered here e.g. 52
Rolling Timeout	If a balance is a rolling balance, reset if no occurrences are recorded within this number of weeks.
Roll to Today	Enable this toggle if the rolling balance should include today in the calculation.

The **Personal Calendar** section contains the following fields:

Field	Notes
Use Personal Calendars	Enable the toggle to use a personal calendar for this balance. This will also pull through Advanced Personal Calendar fields to be configured (see below). Personal calendars can be automatically generated based on first pay code occurrence, employee's latest or original join date or they can be user specified.

The **Advanced Personal Calendar** section contains the following fields. This section is **only** available if *Use Personal Calendars* is enabled:

Field	Notes
Start On	Select from the drop-down options the required Start On preference. Options are: • Pay Code First Occurrence • Latest Join Date • Original Join Date • User Specified Dates
Personal Calendar Earliest Start Date	Enter a date on which personal calendars for this balance may generate.
Personal Calendar Last Start Date	Enter a date after which personal calendars for this balance no longer generate.
Personal Calendar Exemption Balance Code	Select the code from the drop-down options to be used where the personal calendar will not generate while the start date is within the personal calendar start/end date of the attached balance.

Click **SAVE** to capture any changes made.

3.3. Balance Calendar

The *Balance Calendar* screen allows you to manage your Balance Calendars. All balances require their own calendars. The calendar specifies the start and end dates of each balance period. In addition, when creating the calendar, you can impose any required restrictions that are required, for example you might want to restrict the number of hours that are *Carried Forward* into the next flexitime accounting period.

From this screen you can also Add a Period and Generate Period.

End Period Min/Max Hours	Displays the End Period min/max entitlement value in Hours.
Use By	Displays the date the Period must be used by.
Weeks Per Period	Displays the number of weeks in the period for the selected entitlement.
Delete	This gives you the ability to delete the entry.

3.3.1. To Add a Period

To add a new period to your Balance Calendar, follow the steps below:

1. Click the **Add Period** button.
2. Enter the Period name e.g., Year.
3. Enter the Start Date of the period.
4. Enter the End date of the period.
5. Click **OK**
6. Your period will populate on the Balance Calendar screen for you to further configure, if required.

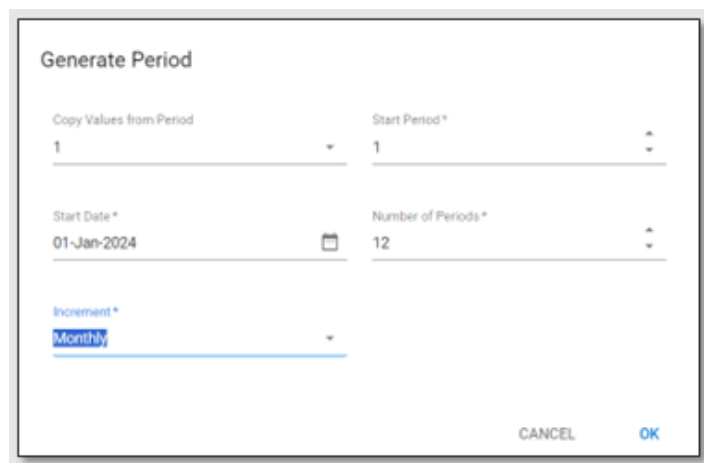

3.3.2. To Extend a Balance Calendar

Balances (e.g., Annual Leave, Study Leave) have accompanying calendars that exist independently of the System Calendar.

These must be extended each year to cover the next calendar year. For example, if Annual Leave is managed in yearly blocks the Annual Leave balance calendar defines the start date and end date of each leave year (period) and specifies any carry forward rules.

It is not possible to close a balance period (complete a period end) until the next period has been configured on the balance calendar. To do this follow the steps below:

1. Click **Generate Period**.
2. Populate the Generate Period popout:
 - Use the drop-down option to select Copy Value from Period.
 - Enter the Start Period, Start Date, Number of Periods and Increment.

Generate Period

Copy Values from Period: 1

Start Period*: 1

Start Date*: 01-Jan-2024

Number of Periods*: 12

Increment*: Monthly

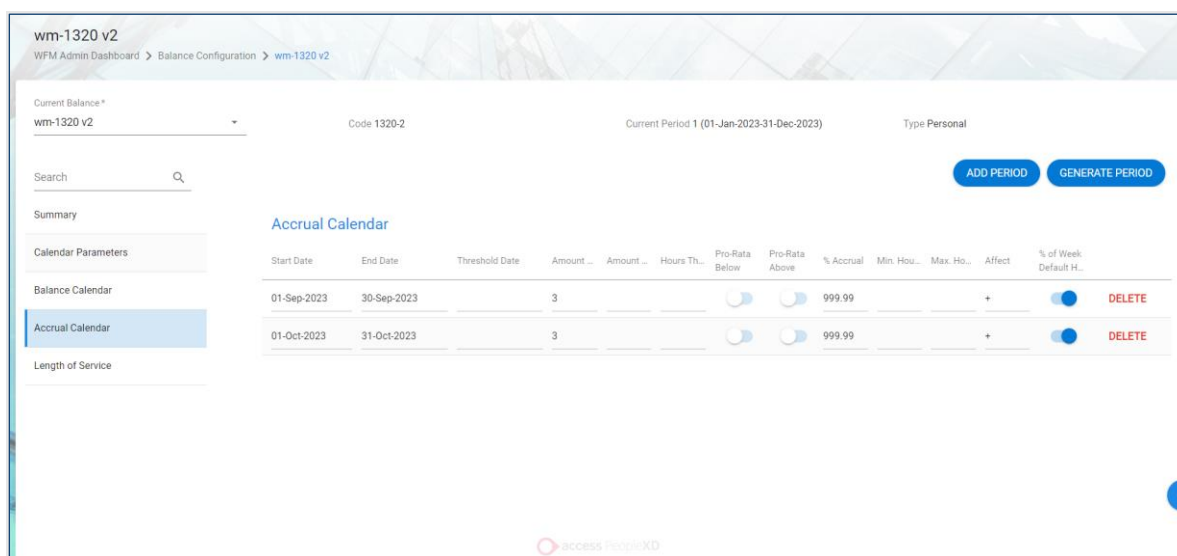

CANCEL OK

3. Click **OK**.
4. Your Balance Calendar is extended.

3.4. Accrual Calendar

The *Accrual Calendar* screen allows you define the calendar for accruals and what should be accrued per accrual period e.g., should an employee get a fixed amount of entitlement per period assuming they've worked over a certain threshold or should an employee's entitlement be accrued based on a percentage of hours worked.

You can either set-up the accruals so that the entitlement is accrued on a fixed amount or pro-rata of basis or on a percentage basis.

access PeopleKD

The **Accrual Calendar** screen contains the following fields:

Field	Details
Start/End Date	This is the Start and End Dates of the period range e.g., 01-Jan-2023, 31-Jan-2023.
Threshold Date	This is a threshold date for the date range.
Amount Days/Hours	This is the amount to be added or subtracted from the persons' accrual balance.
Hours Threshold	This is the threshold, which is applied to the accrual balance e.g. 160 hours
Pro-Rata Below/Above	If the Pro-Rata Below indicator is selected, and the above indicator is blank, and the hours worked are less than the specified threshold then a percentage or unit of the accrual amount will be added to or subtracted from the accrual balance up to the threshold. If the Pro-Rata Above indicator is selected, and the below indicator is blank, hours worked above the threshold are calculated as a percentage or unit of the accrual amount e.g., hours worked divided by the threshold multiplied by the accrual amount. If both indicators are selected, then the hours worked are divided by the threshold hours, and then multiplied by the accrual amount. In instances where no indicators are selected, the threshold hours must be worked before the accrual amount is either added to or subtracted from the persons' accrual balance.
% Accrual	This is the percentage accrual that should be added to or subtracted from the persons' accrual balance.
Min/Max Hours	If the Max Hours and Min Hours are set to zero or null, then the percentage accrual is a straight percentage against the hours worked e.g., made up of the accrual pay codes specified on the Balance Parameters form.

Field	Details
	If the Min Hours are greater than zero, the Max Hours are null or zero, and the hours worked are greater than or equal to the Min Hours, then the percentage accrual is a straight percentage against the hours worked e.g., made up of the accrual pay codes specified on the Balance Parameters form. If the Max Hours are greater than zero, and the Min Hours are null or zero, all hours worked up to the maximum threshold are calculated as a percentage of hours worked. If the maximum hours are exceeded, the Max Hours threshold is used when calculating the percentage accrual. If both the Max Hours and Min Hours are greater than zero, hours worked must be between the Min Hours and Max Hours if the percentage accrual is to be applied. If the maximum hours are exceeded, the Max Hours threshold is used when calculating the percentage accrual.
Affect	This indicates whether the percentage accrual has a positive or negative effect on the persons' accrual balance.
% of Week Default Hours	Check if the % should be off the weekly default hours
Delete	This gives you the ability to delete the entry.

3.4.1. To Add an Accrual Period

To add a new period to your Accrual Calendar, follow the steps below:

1. Expand the *Actions* button.
2. Select **Add Period**
3. Enter the Start Date of the period.
4. Enter the End date of the period.
5. Enter the Threshold Date, if required
6. Click **OK**

7. Your period will populate on the Accrual Calendar screen for you to further configure, if required.

3.4.2. To Extend an Accrual Calendar

To do this follow the steps below:

1. Expand the *Actions* button.
2. Select **Generate Period**.
3. Enter details for Generate Period:
 - **Start Date** – select the start date of the accrual period.
 - **Number of Periods** – select the number of periods.
 - **Increments** – from the drop-down options select if the increment is to be Weekly, Fortnightly, Four-Weekly or Monthly
 - **Affect** – select whether the percentage accrual has a positive or negative effect on the persons' accrual balance, if required.
 - **Amount Days** – enter the days amount to accrued to the person's balance.
 - **% of Week Default Hours** – if enable, this will check if the percentage should be of the weekly default hours
 - **Accrual Type** – from the drop-down options select if the accrual type is to be Amount or Percentage, if required.

CANCEL OK

4. Click **OK**.
5. Your Accrual Calendar is extended.

3.5. Affecting Codes

The Affecting Codes screen allows you associate pay codes that will affect this balance calendar.

The **Affecting Codes** screen contains the following fields:

Field	Details
Pay Code	This option will allow users to decide what pay code contributes towards the balance e.g., select the Annual Leave pay code for an Annual Leave balance.
Pay Code Type	This identifies the type of pay role type e.g., Hours, Value, Units, Days etc.
Pay Code Affect	Depending on the pay code selected this field will display either the +/- effect of the pay code on the balance.
Affecting Element	This is the Affecting Element which determines what the pay code will affect. Options available are: - Reserved Entitlement - Accrual Entitlement - Taken - Floating Entitlement - Carried Forward - Balance
Multiplier	The Multiplier should be used if it is to be applied on the hours associated with the pay code. Typically most pay code will have a multiplier of 1.00 e.g. hour for hour i.e. if a pay code has a multiplier of 2, and the pay code entered in PeopleXD attendance tables (ct_calc_hours) has 4 hours associated with it, then the

Field	Details
	balance element will increase or decrease by 8 (depending on the +/- effect of the pay code on the balance).
Delete	This gives you the ability to delete the entry.

3.5.1. To Add an Affecting Code

To add an affecting code, follow the steps below:

1. Click **Add Pay Code**
2. Select the *Pay Code*, from the drop-down options.
3. Select the *Affecting Element*, from the drop-down options.
4. Enter a Multiplier value.
5. Click **OK**
6. Your affecting pay code will be displayed.

3.6. Length of Service

The *Length of Service* screen allows you to calculate the employee's entitlement belonging to any particular Annual Leave Balance.

The screenshot shows the 'Annual Leave 7001' configuration page. The left sidebar contains a menu with options: Summary, Calendar Parameters, Balance Calendar, Accrual Calendar, Length of Service (highlighted), Bank Holiday Entitlement, Advanced Parameters, Days of the Week, and Linked Balances. The main content area is titled 'Length of Service Based On' and contains several toggle switches and a dropdown menu. The toggles are: Anniversary, Period Start, Post Appointment Period Start, Post Appointment Anniversary, Shift Type Anniversary, Exclude Leave, Use Hire Date for FTE Length of Service, and Use Absence FTE Value for Post Appt. Based Increments. The dropdown menu is labeled 'Employee Service Start Date' and has 'Original Start Date' selected. At the bottom, there is a 'SAVE' button and a 'access PeopleHD' logo.

The ***Length of Service Based On*** section contains the following fields:

Field	Details
Anniversary	If enabled, this will calculate the LOS based on the Anniversary, date the employee joined to Company.
Period Start	If enabled, this will calculate the LOS based on the Period Start, start of calendar year.
Post Appointment Period Start	If enabled, this will calculate the LOS based on the start date of the of year the appointment started.
Post Appointment Anniversary	If enabled, this will calculate the LOS based on the Appointment Anniversary date.
Shift Type Anniversary	If enabled, this will calculate the LOS based on the effective date of the shift assigned to users.
Employee Service Start Date	Select from the drop-down options, which employee start date is to be used. Note: continuance date will default to the latest /original date joined if null.

Field	Details
Use Service In Company	Check to calculate the service based on time in the company.
Exclude Leave	Check to exclude leave of absence from Service. Note: if <i>Calculate entitlement Based on Position History</i> is turned on then Service In Company is controlled in <i>Entitlements Per Balance</i> screen.
Use Hire Date for FTE Length of Service	Use Hire date for FTE Length of Service calculations where Hire Date is greater than Balance Start Date.
Use Absence FTE Value for Post Appt. Based Increments	For Length of Service based on Post Appointment, use Absence FTE before FTE for determining service.

The **Anniversary Pro-Rata (Override)** section contains the following fields:

Field	Details
Apply FTE to Service Increments	Apply the FTE at the Original or Current period anniversary date. Note: this overrides any FTE/Start date/End date adjustments.
Pro-Rata Prior to Anniversary Date	Select a method for service to be deducted for 100% of the time prior to the anniversary. Note: if Weeks /Months is selected then an override anniversary date must be selected.
Override Anniversary Date	If the service increments are to be prorated the anniversary date can be overridden.
Pro-Rata Leave Date	Select a method for service to be deducted at 100% for the time after a leave date. Note: if Weeks /Months is selected then an override leave date must be selected.
Override Leave Date	If the Service Increments is to be prorated the leave date cannot be overridden.

The **Work Periods** section contains the following fields:

Field	Details
No of Worked Periods for Increments	Enter the number of rostered periods a person has to work since service anniversary date to receive the increment.
Worked Pay Code Group	Enter a pay code group to be used by increments or Personal calendar periods.

Click **SAVE** to capture any changes made.

Length of Service (LOS) Notes:

- The Anniversary & Period Start toggles are used if you want to use LOS codes at an Employee level.
- Post Appointment Period Start and Post Appointment Anniversary toggles are used if you want to use LOS directly linked to the balance.
- Period Start & Post Appointment Period Start means the employees get their LOS at the start of the balance period:
 - If the balance runs from 01-JAN-22 to 31-DEC-22 and an employee reaches 2 years LOS on 01-JUN-22, the employee will get it on 01-JAN-22. This assumes the 01-JAN-22 to 31-DEC-22 is the current open balance period.
 - If you use Anniversary & Post Appointment Anniversary, it will look at the date in which the employee meets their LOS anniversary, in this case they get it on 01-JUN-22.

3.7. FTE Exceptions

The FTE Exceptions screen allows administrators to set up FTE exceptions against a balance.

The **FTE Exceptions** screen contains the following fields:

Field	Details
Entitlements Based On	Use the drop-down options to select the entitlement the exception is to be based on.
Use Employee History	Check if the position details for this balance should be populated from post history.
Calculate on Employee History	Check if the entitlement for this balance should be based on the employee's position.
Pro-Rata Status/FTE Details	Check if the status/fte details for this balance should be populated from post history.
Pro-Rata Starting Entitlements	Check to pro-rata starting entitlements when activating the balance.
Apply Target End Date	Check on to apply the Target End Date to the last appointment row. For person-based balances this will apply to the last row per appointment ID.
Apply FTE or Percentage to Calendar Period Limits	Check if calendar period limits should be reduced by the FTE.

Field	Details
Always Use Default FTE	Click ON to always use default FTE even if Absence FTE filled, for the balance.
Use FTE Exceptions	Click this option to use an alternative method for populating FTE/Status details, from the FTE Exceptions created, see to Add an FTE Exception below.
Adjustment Type	Select, from the drop-down options, the Adjustment type for the balance, if applicable.

3.7.1. To Add an FTE Exception

To add an FTE exception, follow the steps below:

1. Click **Add FTE Exception**
2. Select the *Reference Code*, from the drop-down options.
3. Enter a Value
4. Select the *Pay Code Group*, from the drop-down options.
5. Enter the value for Countback Weeks, if required
6. Click **OK**
7. Your FTE exception will be displayed.

Click **SAVE** to capture any changes made.

3.8. Entitlements Per Balance

The *Entitlements per Balance* screen allows you to configure the entitlement per balance driven by the *Entitlement Based On* parameters within general settings.

The screen is broken down into 4 tabs, Balance Entitlements, Accrual Entitlements, General Parameters and Carried Forward Entitlement.

Annual Leave 70001

WFM Admin Dashboard > Balance Configuration > Annual Leave 70001

The **Balance Entitlements** screen contains the following fields:

Field	Details
Parameter Entitlement	This displays whatever the parameter entitlement is based on within FTE Exceptions e.g. Work Group, Category.
Period	This displays the current period of the Balance.
Affecting Element	This is the Affecting Element which determines what the balance will affect. Options available are: - Reserved - Accrual - Floating - Balance
Days	Enter the days to be applied to this balance entitlement, as appropriate.
Hours	Enter the hours to be applied to this balance entitlement, as appropriate.
Occurrence	Enter the occurrence to be applied to this balance entitlement, as appropriate.
Length of Service	This links the entitlement to a length of service code, if required. To apply length of service increments to this entitlement as appropriate.
Delete	This gives you the ability to delete the entry.

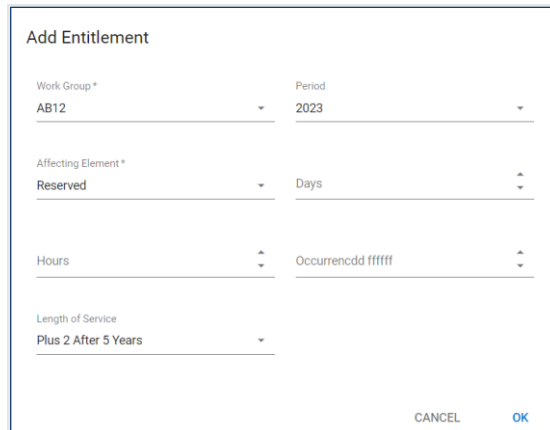

3.8.1. To Add a Balance Entitlement

To add a balance entitlement, follow the steps below:

1. Click **Add Entitlement**
2. Select, from the drop-down options, the relevant **Entitlement Level, Period** and **Affecting Element**.

WFM Balances – Configuration Guide

3. Enter a Value for the Days, Hours and Occurrence, if required
4. Select the *Length of Service*, from the drop-down options.

The 'Add Entitlement' dialog box contains the following fields:

- Work Group *: AB12
- Period: 2023
- Affecting Element *: Reserved
- Days: (empty)
- Hours: (empty)
- Occurrence: fffffff
- Length of Service: Plus 2 After 5 Years

Buttons: CANCEL, OK

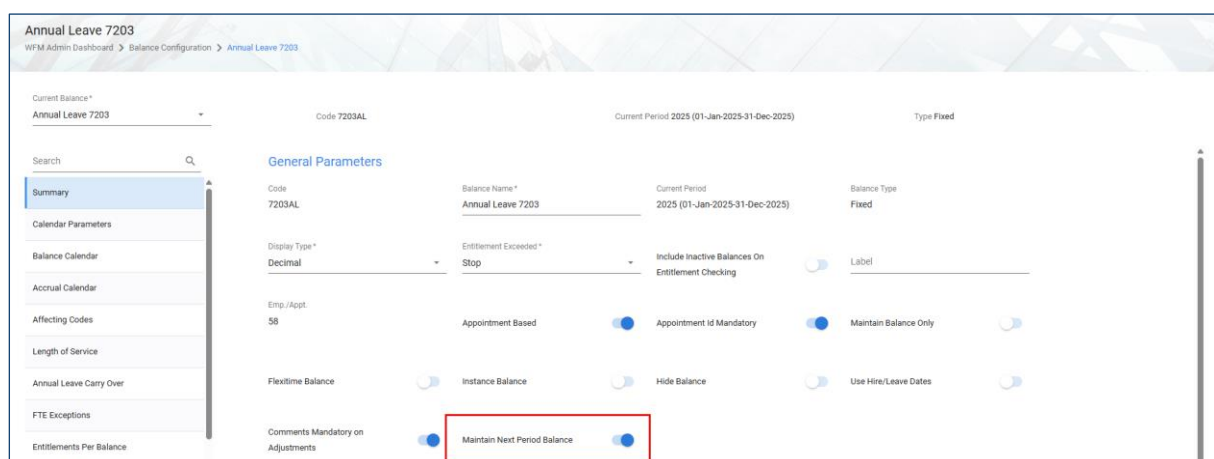

5. Once complete, click **OK**.
6. Your balance entitlement will be displayed.

3.8.2. New Year Leave Entitlement

The new year entitlement feature support employees to submit and validate leave requests for the next leave year. See our [New Year Leave Entitlement](#) guide for further details.

A new year leave entitlement balance can be added as per the steps outlined above. Once set up to enable the New Year Entitlement on a Balance:

1. From the *Summary* tab, turn on the **Maintain Next Period Balance** toggle.
2. Click **Save**.

The 'Annual Leave 7203' configuration page shows the following details:

- Current Balance*: Annual Leave 7203
- Code: 7203AL
- Current Period: 2025 (01-Jan-2025-31-Dec-2025)
- Type: Fixed

Carried Forward Entitlement

ADD ENTITLEMENT

Department	Start Date	Amount D...	Amount H...	Hours Thr...	Pro-Rata Below	Pro-Rata Above	% Accrual	Min. Hours	Max. Hours	% of Week Default Ho...	
2127	29-Jan-2024	2	2		☒	☒				☒	DELETE

The **Accrual Entitlements** screen contains the following fields:

Field	Details
Parameter Entitlement	This displays whatever the parameter entitlement is based on within FTE Exceptions e.g. Work Group, Category.
Start Date	This is the Start and End Dates of the period range e.g. 01-Jan-2023, 31-Jan-2023.
Amount Days/Hours	This is the amount to be added or subtracted from the persons' accrual balance.
Hours Threshold	This is the threshold, which is applied to the accrual balance e.g. 160 hours.
Pro-Rata Below/Above	If the Pro-Rata Below indicator is selected, and the above indicator is blank, and the hours worked are less than the specified threshold then a percentage or unit of the accrual amount will be added to or subtracted from the accrual balance up to the threshold. If the Pro-Rata Above indicator is selected, and the below indicator is blank, hours worked above the threshold are calculated as a percentage or unit of the accrual amount e.g., hours worked divided by the threshold multiplied by the accrual amount. If both indicators are selected, then the hours worked are divided by the threshold hours, and then multiplied by the accrual amount. In instances where no indicators are selected, the threshold hours must

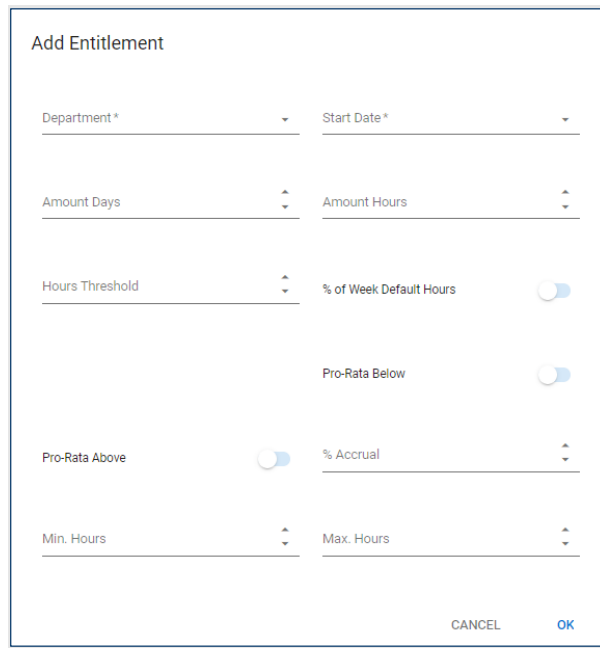

Field	Details
	be worked before the accrual amount is either added to or subtracted from the persons' accrual balance.
% Accrual	This is the percentage accrual that should be added to or subtracted from the persons' accrual balance.
Min/Max Hours	If the Max Hours and Min Hours are set to zero or null, then the percentage accrual is a straight percentage against the hours worked e.g., made up of the accrual pay codes specified on the Balance Parameters form. If the Min Hours are greater than zero, the Max Hours are null or zero, and the hours worked are greater than or equal to the Min Hours, then the percentage accrual is a straight percentage against the hours worked e.g., made up of the accrual pay codes specified on the Balance Parameters form. If the Max Hours are greater than zero, and the Min Hours are null or zero, all hours worked up to the maximum threshold are calculated as a percentage of hours worked. If the maximum hours are exceeded, the Max Hours threshold is used when calculating the percentage accrual. If both the Max Hours and Min Hours are greater than zero, hours worked must be between the Min Hours and Max Hours if the percentage accrual is to be applied. If the maximum hours are exceeded, the Max Hours threshold is used when calculating the percentage accrual.
% of Week Default Hours	Check if the % should be off the weekly default hours
Delete	This gives you the ability to delete the entry.

3.8.3. To Add an Accrual Entitlement

To add an accrual entitlement, follow the steps below:

WFM Balances – Configuration Guide

1. Click **Add Entitlement**.
2. Select, from the drop-down options, the relevant **Entitlement Level** and **Start Date**.
3. Enter a value for the **Amount of Days, Hours** and **Hours Threshold**, if required.
4. Enable the *% of week Default Hours, Pro-Rata Below* or *Above* toggles, as required.
5. Then, enter a value for % Accrual and Min/Max Hours, if needed.

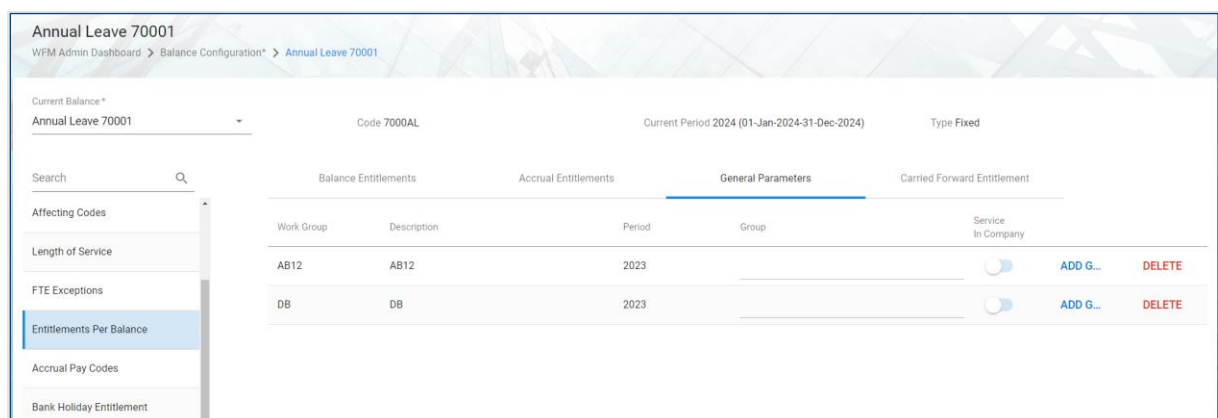

The 'Add Entitlement' dialog box contains the following fields and controls:

- Department * (dropdown)
- Start Date * (dropdown)
- Amount Days (spinner)
- Amount Hours (spinner)
- Hours Threshold (spinner)
- % of Week Default Hours (toggle, currently on)
- Pro-Rata Below (toggle, currently on)
- Pro-Rata Above (toggle, currently off)
- % Accrual (spinner)
- Min. Hours (spinner)
- Max. Hours (spinner)
- CANCEL and OK buttons at the bottom right.

6. Once complete, click **OK**.
7. Your accrual entitlement will be displayed.

The **General Parameters** screen pulls through the entitlements added on the Balance Entitlements screens for you to group, if required.

The 'Annual Leave 70001' screen displays the following information:

- Current Balance*: Annual Leave 70001
- Code: 7000AL
- Current Period: 2024 (01-Jan-2024-31-Dec-2024)
- Type: Fixed

The main table shows entitlements with columns: Work Group, Description, Period, Group, and Service In Company. The 'General Parameters' tab is active.

Work Group	Description	Period	Group	Service In Company
AB12	AB12	2023		☐
DB	DB	2023		☐

Buttons: ADD G... (blue), DELETE (red) are present for each row.

Groups can be added directly from the grid; existing groups will be available to select from the dropdown options under Group to assign or a new Group can be created by clicking **Add Group**.

The **Carried Forward Entitlement** screen allows you to apply annual leave carry over at entitlement level. Balance period end picks up the annual leave carry over at entitlement level, if configured.

Entitlement Per Balance level will take priority over the *Balance Calendar* level. So, if 'Balance Calendar' is populated for carried forward end of period limits and a *Carried Forward Entitlement* is added to 'Entitlements per Balance', then the system will look at the 'Entitlements Per Balance' for the carried forward entitlement.

EOC8	2024	1	10			DELETE

The **Carried Forward Entitlement** screen contains the following fields:

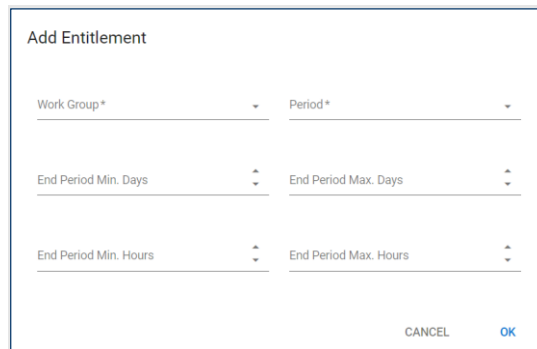

Field	Details
Parameter Entitlement	This displays whatever the parameter entitlement is based on within FTE Exceptions e.g. Work Group, Category.
Period	This displays the current period of the Balance
End Period Min/Max Days	Displays the End Period min/max entitlement value in Days.
End Period Min/Max Hours	Displays the End Period min/max entitlement value in Hours.

3.8.4. To Add a Carried Forward Entitlement

To add a Carried Forward Entitlement, follow the steps below:

1. Click **Add Entitlement**.
2. Select, from the drop-down options, the relevant **Entitlement Level** and **Period**.

- Enter a value for the **End Period Min/Max Days** and **Hours**, if required.

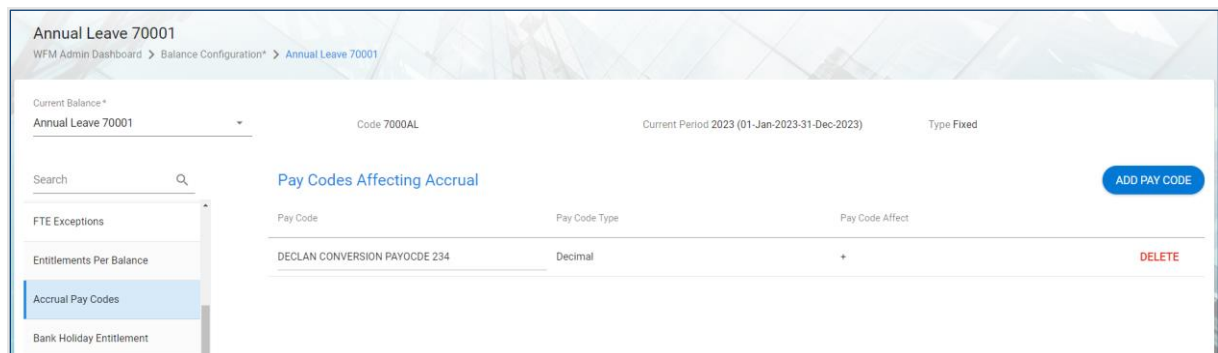

The 'Add Entitlement' dialog box contains the following fields:

- Work Group* (dropdown)
- Period* (dropdown)
- End Period Min. Days (spinner)
- End Period Max. Days (spinner)
- End Period Min. Hours (spinner)
- End Period Max. Hours (spinner)
- CANCEL button
- OK button

- Once complete, click **OK**.
- Your carried forward entitlement will be displayed.

3.9. Accrual Pay Codes

The *Accrual Pay Codes* screen allows you to assign Pay Codes that will affect the accrual value of a balance.

The 'Annual Leave 70001' screen shows the following details:

- Current Balance*: Annual Leave 70001
- Code: 7000AL
- Current Period: 2023 (01-Jan-2023-31-Dec-2023)
- Type: Fixed
- Search bar
- Pay Codes Affecting Accrual table:

Pay Code	Pay Code Type	Pay Code Affect	
DECLAN CONVERSION PAYCODE 234	Decimal	+	DELETE
- ADD PAY CODE button
- Left sidebar: FTE Exceptions, Entitlements Per Balance, Accrual Pay Codes (selected), Bank Holiday Entitlement

The **Pay Code Affecting Accrual** screen contains the following fields:

Field	Details
Pay Code	This identifies the code pertaining to the pay code.
Pay Code Type	This displays the format for the balance used on forms and reports. This can be either: Minutes Decimal
Pay Code Affect	Depending on the pay code selected this field will display either the +/- effect of the pay code on the balance.

3.9.1. To Add a Pay Code

To add a Pay Code Affecting Accrual, follow the steps below:

1. Click **Add Pay Code**
2. Select the *Pay Code*, from the drop-down options.
3. Click **OK**
4. Your pay code affecting accrual will be displayed.

3.10. Bank Holiday Entitlement

The *Bank Holiday Entitlement* screen allows you to assign a Bank Holiday Scheme against a balance based on Company, Department etc.

Note: The *Add Bank Holiday Entitlements* button will be available if FTE is selected from the Entitlement Based On options, you will need to *Save*, then the button will be available for you to Add Bank Holiday Entitlements.

The screenshot displays the 'Bank Holiday Entitlement' configuration interface. The sidebar on the left lists various configuration options, with 'Bank Holiday Entitlement' currently selected. The main content area shows the following fields and settings:

- Current Balance***: Annual Leave 70001
- Code**: 7000AL
- Current Period**: 2023 (01-Jan-2023-31-Dec-2023)
- Type**: Fixed
- Entitlement Based On**: FTE
- Balance Holiday Scheme**: Roi Public & Company Holidays
- Personal Holiday Scheme**: (empty)
- Default Hours**: 1
- Link Default Hours to Personnel**: (empty)
- Personnel Default Hours Divisor**: (empty)
- FTE**: 1.25
- Apply Entitlement**: (toggle switch)
- Buttons**: ADD BANK HOLIDAY ENTITLEMENT, DELETE, SAVE

The **Bank Holiday Entitlement** screen contains the following fields:

Field	Details
Entitlement Based On	Use the drop-down options to select the entitlement the bank holiday is to be based on.

Field	Details
Bank Holiday Scheme	Use the drop-down options to select the required bank holiday scheme.
Personal Holiday Scheme	Select the Personal Holiday Scheme to be attached to the person or appointment ID, rather than attaching to the balance itself.  Note: If using <i>Ent.Based on</i> and you switch between balance/personal based, re-enter details via View Entitlements.
Default Hours	Enter the default hours value to be applied to company holidays.
Link Default Hours to Personnel	Enter an alternative method of calculating the daily default hours by linking to personnel. The calculation will be FTE Hours/ divisor *FTE for that day.
Personnel Default Hours Divisor	If linking default hours to personnel, enter a division value e.g. 5 to divide the FTE Hours by to give a daily value.

3.10.1. To Add a Bank Holiday Entitlement

To add a Bank Holiday Entitlement, follow the steps below:

1. Click **Add Bank Holiday Entitlement**
2. Enter the FTE value.
3. Enable the Apply Entitlement toggle.
4. Click **OK**
5. Your bank holiday entitlement will be displayed.

Click **SAVE** to capture any changes made.

3.11. Advanced Parameters

The *Advanced Parameters* screen includes rounding parameters, bonus adjustments and occupational Absence parameters.

The **General** section contains the following fields:

Field	Details
Number of Closed Periods to Recalculate	Enter the number of closed periods to be recalculated by the nightly scheduled job.
Category	Select a balance category for this balance from the drop-down options. Options available: - Annual Leave - Sick
Payslip Category	Enter a payslip category, e.g. AL, or leave null.
No. of Worked Periods for Personal Calendars	Enter the number of roster periods a person has to work before a new Personal Calendar period is created.
Pre-Book Company Closure Days	Pre-book company closure days by selecting an element of the balance for the booking to apply to. Options available are: - Reserved Entitlement - Floating Entitlement - Accrual Entitlement - Carried Forward - Taken - Balance

The **Occupational Absence** section contains the following fields:

Field	Details
Occupational Absence Balance	If enabled, this will allow the balance calendar to be attached to an Occupational Absence rule. For example, an Occupational absence rule is defined over a fixed calendar period 01-Jan to 31-Dec annually. Occupational Absence rules do not have the facility to configured fixed calendar, thus a balance parameter and calendar can be configured and assigned to assign a fixed calendar duration.
Use Pattern Non-Standard Hours	If enabled, this will use the work pattern hours instead of the default hours.

The **Limiting Balance** section contains the following fields:

Field	Details
Extra Hours Limiting Balance	If enabled, this will check if this balance is used to limit the recording of extra hours.
Limiting Balance Timesheet Bonus Hours	For the limiting balance set the bonus to be received from Generate Timesheets.
Cap Accrual Hours	Check if this balance is used to limit the recording of extra hours.
Max Accrual Hours Weeks	For the limiting balance set the bonus to be received from Generate Timesheets.

The **When Limits Exceeded** section contains the following fields:

Field	Details
Limit Exceeded	Select the Limit Exceeded option to apply. There are 3 levels of warning available: • Stop - the entitlement from being exceeded. • Warn - the user that the entitlement has been exceeded. • Allow - the entitlement to be exceeded.

Field	Details
Do Not Apply In-Period Limits in Calculation	If enabled, this will turn off the In Period Limit Exceeded warning.

The **Advance Payments Rounding** section contains the following fields:

Field	Details
Round	Rounding can be applied on either days or hours, select your preferred rounding option from the drop-down options available. • Up to the nearest - This will round the number up to the number of decimal places. For example, 1.3 is rounded to 2, 1.5 is rounded to 2 and 1.7 is also rounded to 2. • Down to the nearest - This will round the number down to the number of decimal places allowed. For example, 1.3 is rounded to 1, 1.5 is rounded to 1 and 1.7 is also rounded to 1. • To the nearest - This will round the number to the nearest value based on the number of decimal places. For example, 1.3 is rounded to 1, 1.5 is also rounded to 1 and 1.7 is rounded to 2. • To the nearest (favourable) - This will round the number to the nearest value based on the number of decimal places with a mid-point number being rounded up. For example, 1.3 is rounded to 1, 1.5 is rounded to 2 and 1.7 is also rounded to 2.
Days	Dependent on Round criteria selected, enter as required.
Hours	Dependent on Round criteria selected, enter as required.

The **Bonus Adjust** section contains the following fields:

Field	Details
Adjustment Type	Select how adjustments to the balance should be created. Options available: • Adjustment • Code/Hours

Click **SAVE** to capture any changes made.

Field	Details
Entitlement from the Balance below	Select from the drop-down whether the entitlement is to be Highest or Lowest.
Balance Code	This is the balance code you want to be compared.
Delete	This gives you the ability to delete the entry.

3.14.1. To Add a Balance

To add a Balance, follow the steps below:

1. Select Highest or Lowest from the drop-down
2. Click Save
3. Click **Add Balance**
4. Select the Balance Code, from the drop-down options.
5. Click **OK**

6. Your balance will be displayed.

Click **SAVE** to capture any changes made.

3.15. Transfers

The *Transfers* screen allows you to transfer elements from one balance to another.

The ***Transfers*** to Other Balances section contains the following fields:

Field	Details
From Element	This is the affecting element applied to the <i>Transfer From</i> balance. Options available are: - Reserved Entitlement - Accrual Entitlement - Taken - Floating Entitlement - Carried Forward - Balance
To Balance	This displays the Balance selected to Transfer To.
To Element	This is the affecting element applied to the <i>Transfer To</i> balance. Options available are: - Reserved Entitlement - Accrual Entitlement - Taken - Floating Entitlement - Carried Forward - Balance
To Period	This is the period the transfer will happen.

The ***Period End Transfers to Payroll*** section contains the following fields:

Field	Details
Days Code	Select the code to pay days balances.
Hours Code	Select the code to pay hours balances.
Occurrences Code	Select the code to pay occurrence balances.

3.15.1. To Add a New Transfer

To add a new transfer, follow the steps below:

1. Expand the *Actions* button.
2. Select **New Transfer**
3. The New Transfer screen will display.

4. The Balance Code displays that you are transferring from.
5. Select the **Affecting Element** to be applied, from the drop-down options.
6. Select the **Balance** to be transferred to and the **Affecting Element** to be applied, from the drop-down options.
7. Select the **Amount Type**, from the options available.
8. Enable the **Reduce "From" Balance**.
 - This will reduce the 'from balance' by the amount being transferred.
9. Select **When** you want this transfer to take place, options are:
 - If **Now** is selected, once Saved, a warning notification displays detailing the transfer and requiring confirmation to *Run the Transfer*.

Run Transfer

This will transfer values between 7000AL and Annual Leave 7012 for all people active on both.

Are you sure you want to continue?

NO YES

- If **Period End** is selected, an additional field displays where you can select the Threshold. Once Saved, the transfer will display on the summary screen to be processed at period end. This will automatically run at period end. The transfer can be managed from the summary screen using its 3-dot menu to either View/Edit or Delete.
10. Select the **Write To Balance**, from the drop-down options.
 11. Click **Save**.

3.15.2. To View Historical Transfers

To view historical transfers, follow the steps below:

1. Expand the *Actions* button.
2. Select **View Historical Transfers**
3. The screen displays showing all historical transfers, details displayed are:
 - *To Balance*, this is the balance transferred to
 - *To Element*, this is the affecting element applied to the balance.
 - *Transfer Period*, this is the period that the transfer took place.
4. The **Remove Transfer** button can be used to remove a transfer, select the transfer to remove and click the Remove Transfer button. A warning message will display requiring confirmation to complete.

3.16. Carried Forward Rules

The *Carried Forward Rules* screen allows you to set up carry forward rules based on number of periods.

The **Employee Self Service** section contains the following fields:

Field	Details
Hide on ESS	If enabled the system will check if this balance should be hidden on Employee Self-Service screens.
Disable Drill Down on ESS	If enabled, this will prevent the employee being able to drill down into the balance to see how it is made up.
Template	Enter an ESS template code or select from the list of template codes.

The **Manager Self Service** section contains the following fields:

Field	Details
Balance Group	Enter a balance group to decide grouping and order of balances
Timesheet Display Order	Enter a numeric value to indicate the display order of balance on the Timesheet screen.

Click **SAVE** to capture any changes made.

3.20. Holiday Entitlement Accrual

Note: This feature is **ONLY** for UK customers and the [Balance Calendar](#), [Accrual Calendar](#), [Affecting Codes](#) and [Accrual Pay Codes](#) must be set up.

The *Holiday Entitlement Accrual* screen allows you to create the holiday entitlement rule to calculate statutory holiday accrued for irregular and part year works. This supports the [Holiday pay & entitlement reforms 1 January 2024](#), for UK Irregular hours.

Holiday Entitlement rules are configured on a specific Balance. The *Parameters* tab is used to configure the entitlement parameters, you can then use the *Calc Pay Code* screen to add pay code(s) to be included in the rule and the *Skip Pay Codes* screen to select pay code(s) where if that pay codes exist for a week then the hours worked for that week will not be counted and the calculation will move back a week e.g., the rule will look back 53 weeks instead of 52.

The screen is broken down into 3 tabs, Parameters, Calc Pay Codes and Skip Pay Codes.

The screenshot shows the 'Holiday Entitlement Accrual' screen in the WFM Admin Dashboard. The 'Parameters' tab is active, displaying a table of parameters. The table has columns for Date Effective, Calendar Start, Countback, Max Count, Percent, Max Days, Max Hours, Countback Calend, Include Previous E, Divis, Apply rounding to, Rounding, and a DELETE button. The first row shows a rule for '01-Jan-2024' with a 'Calendar Start' of '01-Mar-2024', a 'Countback' of '52', a 'Max Count' of '104', a 'Percent' of '12.07', a 'Max Days' of '28', and a 'Max Hours' of '50'. The rule is set to 'Week Before Ab...' and 'Yes/Skip Gaps'.

The **Parameters** screen contains the following fields:

Field	Details
Date Effective	This displays the date the rule is to be effective from. The options available to select here will be determined by <i>Accruals Calendars</i> set up.
Calendar Start Date Override	For new organisation enter the date to start the calculation from. This will override the Date Effective field.

Field	Details
Countback Weeks	By default this is set to 52 in line with the legislation but can be amended. This is used to determine how many weeks that the calculation will countback to get worked hours.
Max Countback Weeks	By default this is set to 104 in line with the legislation but can be amended. This is the maximum number of weeks that the calculation will countback.
Percentage	By default this is set to 12.07 in line with the legislation but can be amended.
Max Days Accrued	By default this is set to 28 in line with the legislation but can be amended.
Max Hours Accrued	Enter the number of maximum hours to be accrued.
Countback Calendar Start from	Select the method of creating the countback calendar. Options available: • System Default – this will start in the week before the absence date. • Week Before Absence Start Date – this will start the day before the actual absence date.
Include Previous Employment for Re-Joiners	This allows you to select how re-joiners are treated. The options available are: • Yes/Skip Gaps – If selected this will omit gaps in the employee's history in the count of divisor weeks e.g., Employee leaves the organisation 31 Mar but re-joined 01 Jun, therefore April & May are not included as the person did not work these days. • Yes/Do Not Skip Gaps – If selected, this will include gaps in the employee's history in the count of divisor weeks. • No – This will not look back at an employee's previous history.  Note: Partial weeks are not included.
Divisor	This is the Divisor to give the average hours per week e.g., 46.4

Field	Details
Apply rounding to the Instance of Absence	Rounding can be applied on either days or hours, select your preferred rounding option from the drop-down options available. • Up to the nearest - This will round the number up to the number of decimal places. For example, 1.3 is rounded to 2, 1.5 is rounded to 2 and 1.7 is also rounded to 2. • Down to the nearest - This will round the number down to the number of decimal places allowed. For example, 1.3 is rounded to 1, 1.5 is rounded to 1 and 1.7 is also rounded to 1. • To the nearest - This will round the number to the nearest value based on the number of decimal places. For example, 1.3 is rounded to 1, 1.5 is also rounded to 1 and 1.7 is rounded to 2. • To the nearest (favourable) - This will round the number to the nearest value based on the number of decimal places with a mid-point number being rounded up. For example, 1.3 is rounded to 1, 1.5 or 1.7 are rounded to 2.
Rounding on Hours	Hours can be rounded down (to zero if it is less than 30 minutes) but will be rounded up to one hour if it is 30 minutes or more than 30 minutes.

To Add a Holiday Entitlement Accrual, follow the steps below:

1. Click Add.
2. Select the **Effective Date**, from the drop-down options.
 - Options available here will be determined by the *Accruals Calendars* set up.
3. If a Calendar Start Date Override is required, enter a date.
4. The **Countback Weeks, Max Countback Weeks, Percentage & Max Days Accrued**, have been set by default to, reflect the January 2024 UK Pay & Entitlement reforms e.g., 52, 104, 12.07 & 28. These can be amended if required.
5. Select, from the dropdown options, how **Re-joiners** are to be treated.
6. Enter the **Divisor**.
7. Select, from the dropdown options, how **Rounding** will be applied.
8. Enter the Rounding Hours, if required.

9. Click **OK**.
10. Your Holiday Entitlement Accrual rule will display. You can now configure the associated Pay Codes.

Now configure the associated Pay Codes; use the *Calc Pay Code* screen to add pay code(s) to be included in the rule and the *Skip Pay Codes* screen to select pay code(s) where the hours worked for the week will not be counted and the calculation will move back a week e.g., the rule will look back 53 weeks instead of 52.

Parameters Calc Pay Codes Skip Pay Codes

ADD PAY CODE

Pay Code	Name	
3751	Parental Leave (Unpaid)	DELETE

The **Skip Pay Codes** screen contains the following fields:

Field	Details
Pay Code	This displays the Pay Code e.g., 3710
Name	This displays the Pay Code description e.g., Sick Leave
Delete	This gives you the ability to delete the entry.

To Add a Pay Code to be skipped, follow the steps below:

1. Click **Add Pay Code**.
2. Use the dropdown options to select the required Pay Code.
3. Click **OK**.
4. The Pay Code will display on the *Skip Pay Codes* summary screen.

Note:

- The same Pay Code can exist in both the 'Calc Pay Codes' and 'Skip Pay Codes' list.
- During the Countback Calculation, if a Pay Code that is in the 'Skip Pay Code' list is encountered then the Hours worked for the week are ignored and the Countback Calculation will go back an extra week.

Holiday Entitlement Accrual Notes:

- Holiday Entitlements are calculated each time a Balance is recalculated either for a specific person or the full balance itself.
- The Irregular calculation is done for each Accrual Calendar period.

- This will be determined by how the accrual calendar is set up e.g. weekly, fortnightly monthly etc.
- Balances could be in day or hours.
 - If the balance is in days the hours are converted to days for each accrual period.
- Rounding is applied for an absence instance e.g. 1 day or 4 weeks.
 - If there is a rounding adjustment it is applied to the hours of the last accrual period.
 - If the balance is days, then the hours value is converted to days.

3.20.1. Holiday Entitlement Accrual Narrative

A Narrative of the Holiday Entitlement Accrual calculation can be found on an employee's *Balances* screen. This gives a detailed breakdown of how the allowance was calculated.

From WFM Person Maintenance:

1. Search for the relevant employee.
2. From their 3-dot menu select **Balances**.
3. Select the accrual balance in the *Balances for Employee* section.
 - This will display the transaction history.

The screenshot shows the 'Balances' screen for employee Tomas Buckley. The top section shows the employee's name and appointment details. Below this is a table of balances with columns: balance, open period, type, appointment, status, allowance, carried over, taken, booked, and balance + book... The table lists 'Annual Leave 7203' and 'Balance Accrual Weekly'. Below the table is a section titled 'Transactions for Balance Accrual Weekly' with a table showing transactions with columns: Date, Description, Reserved, Floating, Accrued, Carried, Taken, and Balance. The transactions listed are 'Opening Values' and 'Accrual 21-OCT-2023 2...'.

balance	open period	type	appointment	status	allowance	carried over	taken	booked	balance + book...
Annual Leave 7203	01-Jan-2024 to 31-Dec-2024	Days	Product Mana...		25.00	4.00	0.00	0.00	29.00
Balance Accrual Weekly	10-Jan-2023 to 31-Dec-2023	Days	Product Mana...		0.35	0.00	0.00	0.00	0.35

Date	Description	Reserved	Floating	Accrued	Carried	Taken	Balance
10-Jan-2023	Opening Values	0.00	0.00	0.00	0.00	0.00	0.00
21-Oct-2023	Accrual 21-OCT-2023 2...			0.35			

4. From the *Transactions for* section select the transaction and click **View**.
5. The narrative of the Holiday Entitlement Accrual calculation will display.

Narrative for Accrual 21-OCT-2023 21-OCT-2023 (21/10/2023)							
From 19-OCT-22 to 17-OCT-23, Total Hours Worked:135.17 over 52 (actual divisor 46.4) weeks at 12.07% gave accrual of .35 Hours converted to .35 Days (using Average Daily Hours 1)							
OK							
Transactions							
Date	Description	Reserved	Floating	Accrued	Carried	Taken	Balance
10-Jan-2023	Opening Values	0.00	0.00	0.00	0.00	0.00	0.00
21-Oct-2023	Accrual 21-OCT-202...			0.35			

Examples below breakdown the Holiday Entitlement Accrual calculation to show how the Narrative is created.

Example 1:

- An employee takes 1-day, Sick Absence on 06-Feb-23.
- '*Weeks before absence start date*' has been assigned to the balance parameter '*Count back calendar start*', therefore the 05-Feb-23 is the date after the absence.
- The total hours worked from 07-Feb-22 to 05-Feb-23 is 144 hours.
- As the employees' start date is 01-Jan-22, the calculation went back 52 weeks.
- The Divisor was 46.4 because the period is 52 weeks.
- 12.07% is the legislative percentage on the balance.
- Balance type = Days.

Therefore, the calculation is: $144 / 46.4 * 0.1207 = 0.37$ days.

Narrative for Accrual 11-FEB-2023 11-FEB-2023 (11/02/2023)							
From 07-FEB-22 to 05-FEB-23, Total Hours Worked:144 over 52 (actual divisor 46.4) weeks at 12.07% gave accrual of .37 Hours converted to .37 Days (using Average Daily Hours 1)							
OK							

If '*System Calendar*' is assigned to the balance parameter '*Count back calendar start*', for the same scenario, the countback period changes to 04-Feb-23.

Therefore, the calculation is still: $144 / 46.4 * 0.1207 = 0.37$ days, however the period will differ.

Narrative for Accrual 11-FEB-2023 11-FEB-2023 (11/02/2023)

From 06-FEB-22 to 04-FEB-23, Total Hours Worked:144 over 52 (actual divisor 46.4) weeks at 12.07% gave accrual of .37 Hours converted to .37 Days (using Average Daily Hours 1)

OK

Example 2 – Rounding

- An employee takes 1-day, Sick Absence on 10-Jul-23
- 'Weeks before absence start date' has been assigned to the balance parameter 'Count back calendar start', therefore the 09-Jul-23 is the date after the absence.
- The total hours worked from the 11-Jul-22 to 09-Jul-23 is 144 hours.
- As the employees' start date is 01-Jan-22, the calculation went back 52 weeks.
- Divisor was 46.4 because the period was 52 weeks.
- 12.07% is the legislative percentage on the balance.
- Balance type = Days

The narrative is different, in this scenario, as there are No Worked Hours between 09-Jul-23 and previous absence 06-Feb-23, so the calculation sees this as 1 full absence.

- Total Accrued Hours for the Absence = 0.74 (made up by adding the 2 absences together: 0.37 on 06-Feb-23 & 0.37 on 10-Jul-23)
- 0.74 is the round down to 0.5 which equates to -0.24 days.
- Therefore the 0.37 (Accrual) plus -0.24 (Rounding) = 0.13 days.

Therefore, the calculation is: $(144 / 46.4 * 0.1207) - .24 = 0.13$

Narrative for Accrual 15-JUL-2023 15-JUL-2023 (15/07/2023)

From 11-JUL-22 to 09-JUL-23, Total Hours Worked:144 over 52 (actual divisor 46.4) weeks at 12.07% gave accrual of .13 Hours converted to .13 Days (using Average Daily Hours 1). The Hours value includes Rounding of -.24, Original Entitlement was .37. (Total Accrued Hours for the Absence .74 rounded to .5)

OK

Example 3 – Split Week Reduction:

This is where an employee has an Absence but also worked hours within that week.

WFM Balances – Configuration Guide

The employee is rostered to work 29 hours for that week the absence has occurred.

The Absence totals 10 hours over the 06-Aug-23 to 07-Aug-23.

The Divisor is 31 as the employees' start date is the 01-Jan-23.

Therefore, the calculation is: $(186.98/31 * 0.1207) - 0.25 = 0.5$ days.

Narrative for Accrual 12-AUG-2023 12-AUG-2023 (12/08/2023)

From 01-JAN-23 to 05-AUG-23, Total Hours Worked:186.98 over 31 (actual divisor 31) weeks at 12.07% gave accrual of .5 Hours (Split Week Reduction applied, Original Accrual .73 / Rostered Hours for Week 29 * Absence Hours 10) converted to .5 Days (using Average Daily Hours 1). The Hours value includes Rounding of .25, Original Entitlement was .25. (Total Accrued Hours for the Absence .25 rounded to .5)

OK

3.20.2. How to take your Holiday Entitlement Accrual

Prerequisites for using the Holiday Entitlement Accrual are that the [Balance Calander & Accruals Calendar](#) must be set up and an Accrual Pay Code created, see the [Pay Codes](#) guide on the knowledge base. The accrual pay code can then be associated to the balance in the [Affecting Code](#) configuration screen.

An employee has a **Balance Accrual Weekly** balance from here the user can see the holiday accrued amount e.g., 0.35.

4. Menu Options

4.1. Importing Menu Options

A menu profile has been created to provide users full access to the Balance Configuration screens: **WFM_BALANCE_CONFIGURATION**. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Admin
3. Select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile, for example, **WFM_BALANCE_CONFIGURATION**
6. Review the Confirmation message and click **Yes**.
7. Once imported, the menu options and webservices are assigned to the existing menu profile.

4.2. Menu Options
