1. Overview

1.1. Purpose of the Guide

This document is intended for use by administrators. The purpose of this guide is to show how to set up and manage Bank Holiday Schemes and explain the various configuration screens.

1.2. Bank Holiday Rule Considerations

An hour for hour premium payment or time off in lieu can be generated for hours worked on bank holidays by employees. This is configured to be in line with the organisations Bank Holiday working rules. This feature is compatible with the retail calculation only.

1.2.1. Check Midnight

For shifts that span two calendar days, for example night shifts, only actual hours worked on the bank holiday date itself are taken into consideration. For example:

- Hours worked on the eve of the bank holiday (before midnight) are not included by the bank holiday rule.
- Hours worked on the day of the bank holiday are included by the bank holiday rule (midnight to midnight).
- Hours worked after midnight on a bank holiday are not included by the bank holiday rule.

 **Note:** Approving or rejecting additional hours, and/or rejecting late or early out deductions has no impact on the hour for hour premium payments, and/or the time off in lieu calculated.

1.2.2. Hour for Hour Premium Rules

Hours worked on a bank holiday generate as normal as per the rostered pattern, these hours generate as if it is not a bank holiday. If an additional bank holiday premium rule is applicable, this generates an hour for hour premium payment in addition to the standard hours. The table below details an overview of possible bank holiday calculations, dependant on:

- The fact that the organisation's bank holiday working rules specify an hour for hour premium payment.
- The employee's work pattern during the bank holiday.

Employee	Employee works	Employee does not work
Rostered to work	Standard hours generate for the employee's rostered shift. Plus, an additional Bank Holiday premium per actual hour worked. The actual hours worked will generate against a premium pay code. The actual hours can reflect late, early out, break penalties, and extra hours worked. Grace and thresholds can also apply to the premium.	N/A
Not Rostered to work	N/A	N/A

1.2.3. Time Off in Lieu (TOIL) Rules

Hours worked on a bank holiday generate as normal as per the rostered pattern, these hours generate as if it is not a bank holiday. If an additional bank holiday TOIL rule is applicable, this generates TOIL hours in addition to the standard hours. The table below details an overview of possible TOIL bank holiday calculations, dependant on:

- The fact that the organisation's bank holiday working rules specify a TOIL reimbursement.
- The employee's work pattern during the bank holiday.

Employee	Employee works	Employee does not work
Rostered to work	Standard hours generate for the employee's rostered shift. Plus, additional hours of Bank Holiday TOIL earned. The amount TOIL hours that generate is specified during configuration. This can be pro-rated by FTE.	N/A
Not Rostered to work	N/A	N/A

1.2.4. Work Pattern – Bank Holiday Pay Code

The pay code for which the standard rostered hours generate against on bank holidays can be specified on the applicable work pattern, to replace the standard pay code.

The rules listed below can also be added, if additional payment of an hour for hour premium or TOIL is applicable, along with the change to the standard rostered hours pay code.

- If an additional bank holiday TOIL rule is applicable, this generates TOIL hours in addition to the standard hours.
- If an additional bank holiday premium rule is applicable, this generates an hour for hour premium payment in addition to the standard hours.

Employee	Employee works	Employee does not work
Rostered to work	Standard hours worked can generate as TOIL earned, or any other pay code specified on the work pattern. This overrides the regular pay code set up on the work pattern, for Bank Holidays only. Additional payments or TOIL can also be earned if applicable, as shown below: • Plus, an additional Bank Holiday premium per actual hour worked. OR • Plus, additional hours of Bank Holiday TOIL earned.	N/A
Not Rostered to work	N/A	N/A

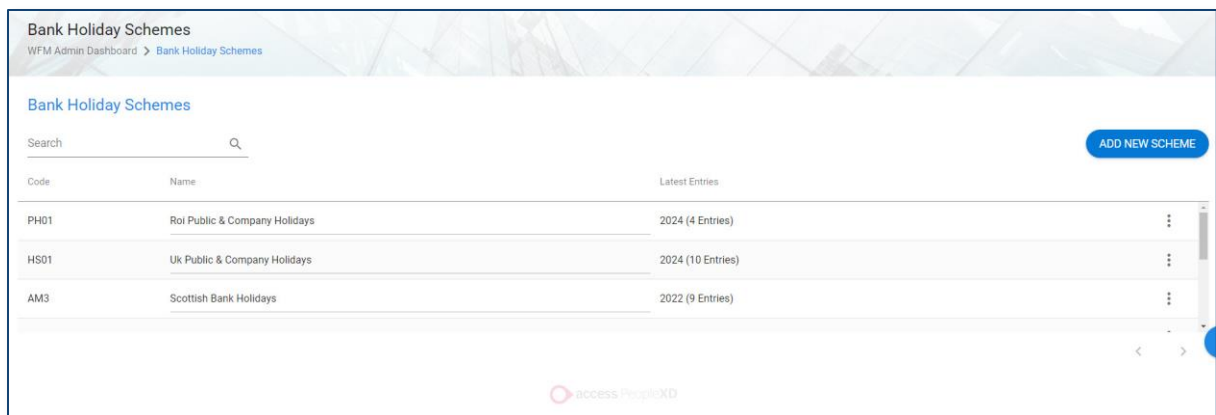

2. Bank Holiday Schemes Summary Screen

The *Bank Holiday Schemes* Summary screen is where administrators can manage bank holiday schemes for their organisation. The screen lists all Bank Holiday Schemes created and displays the latest year and number of bank holiday entries. This screen can be used to further configure bank holidays to organisational requirements.

2.1. Accessing the Bank Holiday Schemes Summary Screen

To access the Bank Holiday Schemes screen:

1. Navigate to the *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Bank Holiday Schemes** tile.
3. The screen displays.

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find the specific bank holiday scheme you wish to configure.

The ***Bank Holiday Schemes Summary*** screen displays the following fields:

Options	Details
Code	This is the unique code associated with the bank holiday scheme.
Name	This displays the name describing the bank holiday scheme.
Latest Entries	This displays the latest year added and number of entries.

From the 3-dot menu of any Scheme, you can:

- **View** – gives you access to the configuration screens for the bank holiday scheme, where you can add/edit the scheme.
- **Copy** – allows you to copy an existing bank holiday. This may be beneficial as it maintains a number of parameter configurations of the scheme being copied thus saving you time.
- **Delete** – allows you to delete a scheme. A warning message will display, which you will have to confirm to delete the scheme.

2.1.1. To Copy a Bank Holiday Scheme

1. From the 3-dot menu of the scheme you would like to copy, select **Copy**.
2. Enter a **Code**, for the new scheme.
3. Enter a **Description**, for the new scheme.
4. Click **OK**.
5. Your copied scheme will display for you to use and further configure, if required.

2.1.2. To Add a Bank Holiday Scheme

1. From the bank holiday scheme summary screen, click **Add New Scheme**.
2. Enter a **Code**, for the new scheme.
3. Enter a **Description**, for the new scheme.
4. Click **OK**.
5. Your scheme will display for you to use and further configure, if required.

3. Assign Bank Holiday Schemes

3.1. Assign to a Work Group

A default holiday scheme can be set for each work group. To do this:

1. Navigate to the *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Work Groups** tile.
3. Search for and select the relevant Work Group.
4. Expand its 3-dot menu, select **View/Edit Work Group**.
5. Select *General Parameters* and within the General Parameters section,
6. Use the dropdown options to select the required **Holiday Scheme**.
7. Click **Save**.

The screenshot displays the 'Work Group 3 7001' configuration page. On the left, there is a sidebar with a search bar and a list of tabs: 'General Parameters' (selected), 'Payment Rules', 'Default Payroll Hours', and 'Group Codes'. The main content area is titled 'General Parameters' and contains several fields: 'Work Group Code*' (7103), 'Description*' (Work Group 3 7001), 'Company*' (Ireland Site), 'Shift Type' (Rest Shift), and 'Label'. A red rectangular box highlights the 'Holiday Scheme' dropdown menu, which currently shows 'Roi Public & Company Holidays'. At the bottom right of the form, there is a green 'SAVE' button. The 'access PeopleX' logo is visible at the bottom center.

3.2. Assign to an Employee

If a work group's default holiday scheme is not applicable to certain employees, the appropriate holiday scheme can be assigned to the employee, at employee level. To do this:

1. Navigate to the *WFM Admin Dashboard* and select **Person Maintenance**.
2. Expand the 3-dot menu of the employee you wish to edit, select **View**.
3. Select the *Work Group Override* screen.
4. Search for Holiday Scheme.
5. Expand its 3-dot menu, select **Edit Override**.
6. Select the required Holiday Scheme, from the dropdown options.
7. Click **OK**.
8. The Holiday Scheme will now display in the *Person Override Value* column.

4. Configuration

The configuration screens allow you to customise and configure schemes and can be accessed through the Bank Holiday Schemes summary screen.

Simply select the bank holiday scheme you wish to configure and select **View** from its 3-dot menu to access the configuration screens.

This brings you directly to the Bank Holiday Scheme Configuration screens.

4.1. General Settings

The *General Settings* screen allows the configuration of the options available for a bank or public holiday day.

The **General Settings** screen contains the following fields:

Field	Details
Holiday Date	This displays the date of the bank holiday. Select from the calendar the required date.
Paycode	This displays the pay code associated with the bank holiday. Select from the dropdown options the required pay code.
Hours	Select how the hours are to be calculated. The options available are: Default – generate the employees default hours for the day. Calculate – calculates the employees company holiday hours. This uses the Bank Holiday Entitlements screen to calculate the number of hours to be put against the holiday code. Global – uses the hours entered in the Global field.
Global	Global Hours are the number of hours that will be paid to all employees attached to this Holiday Scheme regardless of the default hours on the roster for that date e.g. a person may be rostered to work 12 hours but will only be paid 8 hours if the Global hours is set to 8.
Apply Hours	This displays how the hours are to be applied. The options available are: All – records a public holiday absence, on this date, for all employees. Work - only apply an absence for employees scheduled to work on the date. Rest - only apply an absence for employees scheduled to rest on the date.
Work Pattern	The Work Pattern can be assigned to the holiday for employees who come in and work on the holiday. The employees will be paid for the holiday, as well as the hours they work on that day.
Withhold Rest	If enabled, this will withhold hours during a rest day.
Allow RFA	If enabled, this will allow users to request leave on this date.
Partial AM/PM	If the bank/public holiday is a partial day this indicates whether its AM or PM.
Partial Day Value	If the bank/public holiday is a partial day this indicates the value, in fraction of a day, for booking purposes.

Field	Details
Generate Default Pay Code	If enabled, this will generate the holiday hours at the employee's default pay code.
Check Midnight	If enabled, this will ensure only hours worked on the date are used in the calculation. For shifts that span two calendar days, for example night shifts, only actual hours worked on the date itself are taken into consideration. For example: - Hours worked on the eve of the Bank Holiday (before midnight) are not included by the Bank Holiday rule. - Hours worked on the day of the Bank Holiday are included by the Bank Holiday rule (midnight to midnight). - Hours worked after midnight on a Bank Holiday are not included by the Bank Holiday rule.
Company Closure	If enabled, this will indicate that this is a company closure day.
Paycode Rule	If required, enter a pay code rule to determine which Pay Code should be created for the bank/public holiday.

4.1.1. To configure a Standard Public Holiday

To configure a Standard Public Holiday, follow the steps below:

1. Click **Add**.
2. **Holiday Date** - select the relevant date.
3. **Paycode** - select the relevant pay code.
4. **Apply Hours** - select the relevant criteria:
 - **All** - records a public holiday absence, on this date, for all employees.
 - **Work** - only apply an absence for employees scheduled to work on the date.
 - **Rest** - only apply an absence for employees scheduled to rest on the date.
5. Repeat for all public holiday dates.
 - To save time you can copy an existing date. Using it's 3-dot menu select Copy, then adding the relevant date.
6. Click **Save**.

4.1.2. To configure an Hour for Hour Premium

To configure an Hour for Hour Premium for the actual hours worked by an employee on a Public Holiday, follow the steps below:

1. Click **Add**.
2. **Holiday Date** - select the relevant date.
3. **Paycode** - select the relevant pay code.
4. **Hours** - select Global from the drop-down menu.
5. **Global** - enter 0.
6. **Apply Hours** - select Work from the drop-down menu.
7. To allow employees to request leave on this date enable the **Allow RFA** toggle.
8. Enable the **Check Midnight** toggle to ensure only hours worked on the Public Holiday are used in the calculation.
9. Click the **Bonus Hours** screen.
10. For the date you have just created enable the **Generate Bonus Hours** toggle.
11. **Paycode** - use the drop-down menu to select the hour for hour premium pay code.
12. **Calculate Bonus Hours** - select Actual.
13. Click **Save**.
14. Employees that work on the Bank Holiday will now have their standard hours generated plus a premium per actual hour worked.

4.2. Scheduled to Rest

The *Scheduled to Rest* screen allows administrators to configure what happens if the employee is scheduled on a rest day for the bank/public holiday.

The dates created in the General Settings screen automatically display here, if you click Add on this screen you will be taken back to the General Settings screen to add the entry. Deleting a date on this screen will delete it from the Scheme completely.

The **Pay Code Rule** screen contains the following fields:

Field	Details
Rule Code	This displays the Rule code. Search for the required rule to display the Work Groups associated to it.
Description	This displays the description given to the Pay Code Rule. This automatically populates once the pay code rule is selected.
Based On	This displays what the Pay Code Rule has been based on. If you change the Based On field, all of the Pay Code Rule details will be removed. A warning message will display asking you to confirm before proceeding.
Work Group	This displays the Work Group. Selected from the dropdown options the required Work Group(s).
Pay Code	This displays the Pay Codes associated to the Work Group. Select, using the dropdown options the required Pay Code(s).
Delete	This will delete the Work Group from the Pay Code Rule.

4.5.1. To Add a Pay Code Rule

1. Click **Add Pay Code Rule**.

2. Enter a **Code** for your rule, maximum field length 13 characters.
3. Enter a **Description** for your rule, maximum field length 40 characters.
4. Select from the dropdown options what the rule is to be **Based on** e.g., Cost Centre, Department, FTE.
5. Click **OK**.
6. Your new rule will now be available to select and further configure.

4.5.2. To Add Work Groups to a Pay Code Rule

1. Search for and select the **Rule Code**.
2. Click **Add**.
3. Select the required **Work Group**.
4. Select the associated **Pay Code**.
5. Repeat for as many Work Groups as required.
6. To delete a Work Group, select Delete and confirm the warning message.
7. Click **Save**, to capture any changes.

5. Bank Holiday Examples

This section details examples where an organisation's BANK HOLIDAY rules have been configured for the following possible scenarios:

- Standard Hours plus an Hour for Hour Premium
- Midnight Check On - Overnight Shifts
- Standard Hours plus TOIL
- Change to standard rostered hours pay code, plus additional TOIL

The points listed below should be taken into consideration when viewing the examples outlined in the following sections.

- The BANK HOLIDAY is Monday the 1st April.
- All examples are based on the following roster:
 - **Hour for Hour Premium:** 9:00 to 15:45 with a 45 mins break (6-hour day).
 - **TOIL:** 9:00 to 17:30 with a 1-hour break (7.5-hour day).
- All examples are based on the following rules:
 - Late in grace of 5 minutes.
 - Early out grace of 3 minutes.
 - Early in hours only generate if the employee starts earlier than 14 minutes.
 - Late out hours only generate if the employee stays later than 10 minutes.
 - Break Thresholds:
 - 5-minute break threshold - if one break.
 - 10-minute break threshold - if two breaks.
 - 15-minute break threshold - if three breaks.
- If required, the BANK HOLIDAY hour for hour premium code can be configured to require approval. Therefore, the manager can then change the value by drilling into the *Timesheet Input* screen.

5.1. Hour for Hour Premium

5.1.1. Employee is rostered to work - Employee Works

Employee	Employee works	Employee does not work
Rostered to work	Standard hours generate for the employee's rostered shift. Plus, an additional BANK HOLIDAY premium per actual hour worked. The actual hours worked will generate against a premium pay code. The actual hours can reflect late, early out, break penalties, and extra hours worked. Grace and thresholds can apply to the premium.	The BANK HOLIDAY is irrelevant. An unexplained absence exception generates for the employee. This exception is managed by a manager.
Not Rostered to work	The BANK HOLIDAY is irrelevant. A not rostered exception generates for the employee. This exception is managed by a manager.	The BANK HOLIDAY is irrelevant. As hours do not generate.

Main considerations for the below *Employee is rostered to work – Employee works* scenario's:

Considerations	Description
Bank Holiday	Monday the 1 st April
Employee Roster	9:00 to 15:45, with a 45-minute break
Shift Hours	6-hour day

Scenario 1: Works as rostered on Bank Holiday

The system has generated an additional hour for hour premium against the 'Public Holiday' pay code, for the 6 actual hours worked as displayed on the *Timesheet Input* screen below.

Timesheet Input

CALCULATE ATTENDANCE SAVE

The below table details scenario's where under the same consideration the system will generate an additional hour for hour premium against the 'Public Holiday' pay code, for the 6 actual hours worked, so the *Timesheet Input* screen will display as per Scenario 1 above:

Scenario	Scenario Variance
Early in, within threshold	Clocked in early for their shift, within the early in threshold.
Late out, within threshold	Clocked out late for their shift, within the late out threshold.
Late in, within grace	Clocked in late for their shift. This is within the late in grace.
Early out, within threshold	Clocked out early from their shift, within the early out threshold.
Doesn't clock for break	The employee does not clock for their break.
Undertakes break	The employee undertakes their allocated break time.
Overtakes break, within threshold	Overtakes their allocated break time, within the threshold.

Scenario 2: Early in, outside of threshold

Considerations	Description
Scenario Variable	Clocked in early for their shift, outside of the early in threshold.

The system has generated an additional hour for hour premium against the 'Public Holiday' pay code, for the 6.21 actual hours worked, as displayed on the *Timesheet Input* screen below.

The screenshot shows the 'Timesheet Input' interface for employee Aline Elia. It displays a table of hours worked for the week of 01-Apr-24 to 07-Apr-24. The table includes columns for days of the week and a total column. The '3701 Public Holiday' row is highlighted with a red border, showing 6.21 hours worked. The total hours worked for the week is 36.56.

Pay Code	Type	Mon 1st	Tue 2nd	Wed 3rd	Thu 4th	Fri 5th	Sat 6th	Sun 7th	Total
1005 - BASIC HOURS	M	6.00	6.00	6.00	6.00	6.00			30.00
3609 Early In	D	0.21							0.21
3701 Public Holiday	M	6.21							6.21
		12.56	6.00	6.00	6.00	6.00	0.00	0.00	36.56

Scenario 3: Late out, outside threshold

Considerations	Description
Scenario Variable	Clocked out late for their shift. This is outside the late out threshold.

The system has generated an additional hour for hour premium against the 'Public Holiday' pay code, for the 6.25 actual hours worked, as displayed on the *Timesheet Input* screen below.

5.1.2. Employee is rostered to work, Employee does not work

Employee	Employee works	Employee does not work
Rostered to work	Standard hours generate for the employee's rostered shift. Plus, an additional BANK HOLIDAY premium per actual hour worked. The actual hours worked will generate against a premium pay code. The actual hours can reflect late, early out, break penalties, and extra hours worked. Grace and thresholds can apply to the premium.	The BANK HOLIDAY is irrelevant. An unexplained absence exception generates for the employee. This exception is managed by a manager.
Not rostered to work	The BANK HOLIDAY is irrelevant. A not rostered exception generates for the employee. This exception is managed by a manager.	The BANK HOLIDAY is irrelevant. As hours do not generate.

Scenario 1: No show

Considerations	Description
Bank Holiday	Monday the 1 st April
Employee Roster	9:00 to 15:45, with a 45-minute break
Shift Hours	6-hour day
Scenario Variable	The employee does not attend their shift.

The system does not generate an additional hour for hour premium against the 'Public Holiday' pay code as the employee has no actual hours worked, as displayed on the *Timesheet Input* screen below:

Timesheet Input
WFM Admin Dashboard > Timesheet Input

Aline Elia Show Unconfirmed 01-Apr-24 - 07-Apr-24

5.1.3. Employee not rostered to work - Employee Works

Employee	Employee works	Employee does not work
Rostered to work	Standard hours generate for the employee's rostered shift. Plus, an additional BANK HOLIDAY premium per actual hour worked. The actual hours worked will generate against a premium pay code. The actual hours can reflect late, early out, break penalties, and extra hours worked. Grace and thresholds can apply to the premium.	The BANK HOLIDAY is irrelevant. An unexplained absence exception generates for the employee. This exception is managed by a manager.
Not rostered to work	The BANK HOLIDAY is irrelevant. A not rostered exception generates for the employee. This exception is managed by a manager.	The BANK HOLIDAY is irrelevant. As hours do not generate.

Scenario 1: Clocked when not rostered

Considerations	Description
Bank Holiday	Monday the 1 st April
Employee Roster	The employee is not rostered to work.
Shift Hours	N/A
Scenario Variable	The employee clocks in.

The system does not generate an additional hour for hour premium against the 'Public Holiday' pay code as the employee is not rostered to work, as displayed on the *Timesheet Input* screen below:

Timesheet Input
WFM Admin Dashboard > Timesheet Input

5.1.4. Midnight Check - Overnight Shift Examples

Scenario 1: Starting on eve of bank holiday

Considerations	Description
Bank Holiday	Monday 1 st April
Employee Roster	20:00 to 04:00 with a 1-hour break
Shift Hours	7-hour day, starting on the 31 st

The employee is rostered on the eve of a BANK HOLIDAY from 20:00 to 04:00, with a 1-hour break (therefore the BANK HOLIDAY is from midnight onwards).

- The employee does not take a break on the eve (31st).
- The employee does not take a break on the BANK HOLIDAY (1st).
- Overall, the employee does not take their break.

The system generates 7 basic hours, reduced to take the untaken break into consideration, and 4 hours PUBLIC HOLIDAY Premium from midnight to 4:00 am, there is no deduction because the break was not taken during the BANK HOLIDAY, as displayed on the *Timesheet Input* screen below:

Timesheet Input

Scenario 6: Starting on day of bank holiday

Considerations	Description
Bank Holiday	Monday 1 st April
Employee Roster	20:00 to 04:00 with a 1-hour break
Shift Hours	7-hour day, starting on the 29 th

The employee is rostered on the BANK HOLIDAY from 20:00 to 04:00, with a 1-hour break, therefore the BANK HOLIDAY is from the start of the shift until midnight.

- The employee takes a 1-hour and 15-minute break.
- The employee's break spans both days.
- Overall, the employee has overtaken their break.

This is an overtaken break scenario. If the employee has taken their full break, the system only deducts the actual break taken during the BANK HOLIDAY from the PUBLIC HOLIDAY premium. The system has generated a 15-minute, long break deduction during the BANK HOLIDAY from the PUBLIC HOLIDAY premium, as displayed on the *Timesheet Input* screen below:

Pay Code	Type	Mon 1st	Tue 2nd	Wed 3rd	Thu 4th	Fri 5th	Sat 6th	Sun 7th	Total
1005 BASIC HOURS	M	7.00							7.00
3618 - Long Break Deduction	M	0.15							0.15
3701 Public Holiday	M	3.15							3.15

5.2. Time off in Lieu (TOIL) – Example 1

5.2.1. Employee is rostered to work - Employee Works

Employee	Employee works	Employee does not work
Rostered to work	Example 1: Standard hours generate for the employee's rostered shift. Plus, additional hours of Bank Holiday TOIL earned , this can be pro-rated by FTE.	The BANK HOLIDAY is irrelevant. An unexplained absence exception generates as normal for the employee. This exception is managed by a manager.
Not rostered to work	The BANK HOLIDAY is irrelevant. A not rostered exception generates as normal for the employee. This exception is managed by a manager.	The BANK HOLIDAY is irrelevant. As hours do not generate.

Scenario 1: FTE 1

Considerations	Description
Bank Holiday	Monday 1 st April
Employee Roster	9:00 to 17:30, with a 1-hour break
Shift Hours	7.5-hour day
FTE	1

The system has generated an additional 8 hours of bank holiday time off in lieu earned, pro-rated by FTE, against the code 'Toilbh Day', as displayed on the *Timesheet Input* screen below:

Timesheet Input

WFM Admin Dashboard > Timesheet Input

6. Bank Holiday Entitlements

If when configuring your Bank Holiday scheme, you have selected the *Calculate* option against Hours in General Settings the system will look at the Bank Holiday Entitlements set up to calculate the hours to be put against the Holiday for the related users.

6.1. Accessing the Bank Holiday Entitlements screen

To access the Bank Holiday Entitlements screen:

1. Navigate to the *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Bank Holiday Entitlements** tile.
3. The screen displays.

The screen contains the following fields:

Option	Details
Person Type	Select the person type you want the hours to be calculated for against a bank holiday, from the dropdown options e.g., Part Time Workers.
Pay Code Group	Select the pay code group to be associated
Qualifications	Select how the calculation is to be qualified. Options available are: • Always Qualify – the hours will be calculated against any bank/public holiday regardless of if the related users worked or not.

Option	Details
	• Must Work – the hours will only be calculated if the related users worked.
For Average Hours Use	Choose how the average hours are to be calculated. • Rostered Days – This option will use the hours users are scheduled to work. • Actual Days Worked – This option will use the hours users actually worked.
Rostered to Work	Select how the Rostered to Work hours are to be calculated. Options available are: • Default – This option will generate the number of hours as the default hours for that day's work pattern. • Average daily hours over – This option will generate the number of hours as an average of the daily hours over a specified number of weeks. • % of hours worked over – This option will generate the number of hours as a selected percent of total hours worked over the selected number of weeks. • % of – This option will generate number of hours as a selected percent of one of the below selected options: ○ Weekly default Hours ○ Contract Hours (Substantive Appointments) ○ Contract Hours (Non-Substantive Appointments) ○ Contract Hours (All Appointments) • % of average week over – This option will generate number of hours as a selected percentage of average weeks over a selected number of weeks. • Global Hours – This option allows to select the value of global hours and a limit to be calculated.
Pay Code	Select the pay code to associate to the Rostered to Work hours.
Rostered to Rest	Select how the Rostered to Rest hours are to be calculated. Options available are:

Option	Details
	• Default – This option will generate the number of hours as the default hours for that day's work pattern. • Average daily hours over – This option will generate the number of hours as an average of the daily hours over a specified number of weeks. • % of hours worked over – This option will generate the number of hours as a selected percent of total hours worked over the selected number of weeks. • % of – This option will generate number of hours as a selected percent of one of the below selected options: ○ Weekly default Hours ○ Contract Hours (Substantive Appointments) ○ Contract Hours (Non-Substantive Appointments) ○ Contract Hours (All Appointments) • % of average week over – This option will generate number of hours as a selected percentage of average weeks over a selected number of weeks. Global Hours – This option allows to select the value of global hours and a limit to be calculated.
Pay Code	Select the pay code to associate to the Rostered to Rest hours.

Once you have made your selections, click **Save**.

7. Menu Options

7.1. Importing Menu Options

A menu profile has been created to provide users full access to the Bank Holiday Schemes configuration screens: **WFM_BANK_HOLIDAY_CONFIG**. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Admin
3. Select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile, for example, **WFM_BANK_HOLIDAY_CONFIG**
6. Review the Confirmation message and click **Yes**.
7. Once imported, the menu options and webservices are assigned to the existing menu profile.

7.2. Menu Options

The following menu options can be used to customise the Balance Configuration screens. All menu options are included in the menu profile **WFM_BANK_HOLIDAY_CONFIG**

Menu Option	Menu ID	System

8. FAQs

To support you with the bank holiday entitlement feature, we have collated the most common questions you've asked us:

Question	Answer
Why is the Bank Holiday entitlement not pulling through for an employee?	One of the most common reasons for this issue is that the status of an employee in WFM does not match their HR record. These must match for the entitlement to work.
