1. Overview

1.1. Purpose of the Guide

The guide aims to explain how to manage and configure Companies and Calendars on Portal, to aid Administrators complete their day-to-day tasks.

This guide covers:

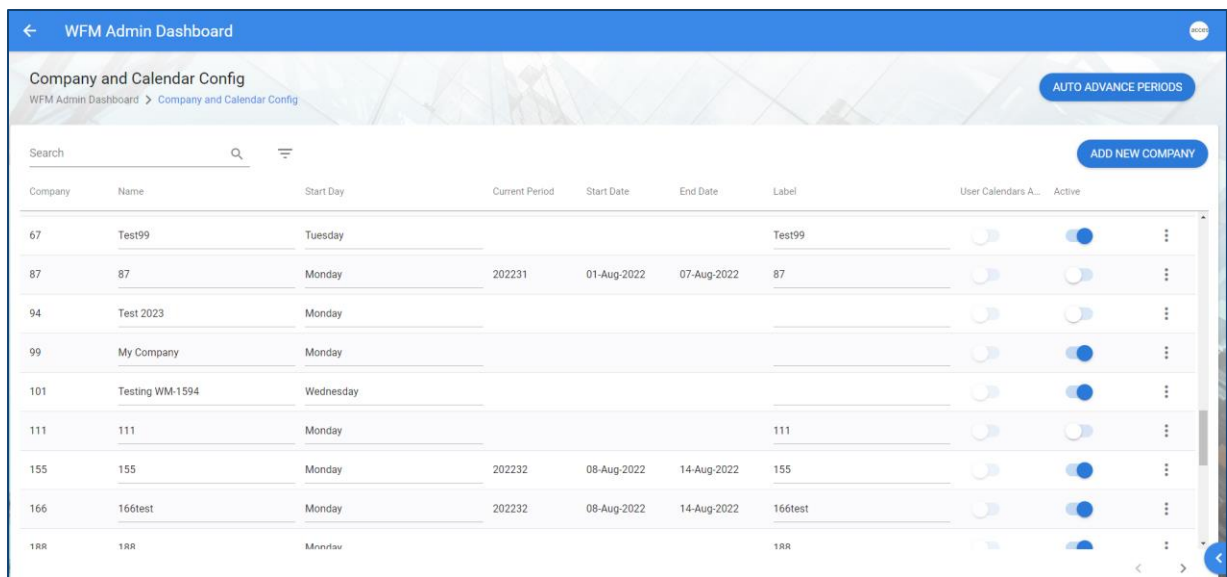

- How to access the Company and Calendar Config screen
- How to add a new Company
- How to Auto Advance Periods
- How to Configure a Company

2. The Company and Calendar Configuration Screen

The Company configuration screen shows any existing companies which have been configured on the system.

2.1. How to access the Company and Calendar Configuration Screen

1. Go to the *WFM Admin Dashboard*.
2. Click on **WFM Configuration**.
3. Search for and select **Company and Calendar Config**.

Company	Name	Start Day	Current Period	Start Date	End Date	Label	User Calendars A...	Active
67	Test99	Tuesday				Test99	☐	☒
87	87	Monday	202231	01-Aug-2022	07-Aug-2022	87	☐	☐
94	Test 2023	Monday					☐	☐
99	My Company	Monday					☐	☒
101	Testing WM-1594	Wednesday					☐	☒
111	111	Monday				111	☐	☐
155	155	Monday	202232	08-Aug-2022	14-Aug-2022	155	☐	☒
166	166test	Monday	202232	08-Aug-2022	14-Aug-2022	166test	☐	☒
188	188	Monday				188	☐	☒

Note: The company setting tab which contains Generate Timesheets and Clock Rounding's will now be part of the Company Configuration screen.

From here you can:

- Search for a specific company, using the search bar or filter.
- Access the configuration screens via the relevant 3-dot menu.
- Add a new company.
- Auto Advance Periods.

2.2. How to Add a New Company

To add a new company, complete the following steps:

1. Click **Add New Company**.
2. Fill in the **Mandatory fields** and enable the **Active** toggle, then click **OK**.
3. The 3 Step **System Calendar Wizard** will open, where you can configure your company.
4. In Step 1, **Calendar Year**, select the System Calendar Year, Start Date of the Company, and the number of weeks in the year. This may vary in a leap year.
5. Click **Next**.
6. A message regarding auto generating periods will appear:
 - Click **Yes** if you wish the weeks to autogenerate for you.
 - Click **No** if you wish to do so manually.
7. In Step 2, **Calendar Period**, you can configure the auto rostered weeks for your company. Use the dropdown menu to select the current period, this is the year and week, for example 202320.
8. On complete, click **Next**.
9. In Step 3, **Company Parameters** use the dropdown menus to populate the Mandatory fields. For example, Late Pay Code, Unapproved Absence Pay Code.
10. Once you have completed, click **Save**.
11. Your company will now be listed on the Company and Calendar Config screen.

2.3. How to Auto Advance Periods

To setup an auto advance for system calendars, complete the following steps:

1. Click **Auto Advance Periods**.
2. On the *Auto Advance Periods* screen, click **Add**.
3. **Select** the **Day of Week** and **Time** for the System Calendars to move forward one period.
4. Click **OK**.
5. A routine will run that checks if any of your system calendars are in the past. If they are then they will automatically advance one period. This will ensure that your calendars do not fall too far behind the actual date.

Auto Advance Periods
WFM Admin Dashboard > Company and Calendar Config > Auto Advance Periods

Schedule Auto Advance

Scheduled Day	Scheduled Time	Last Run Date	Next Run Date

Auto Historical Balance Recalc: ☐

Company Calendars

Company	Current Period	Start Date	End Date
Default Company 1a1	202233	09-Nov-2022	15-Nov-2022

User Defined Calendar Periods

Search:

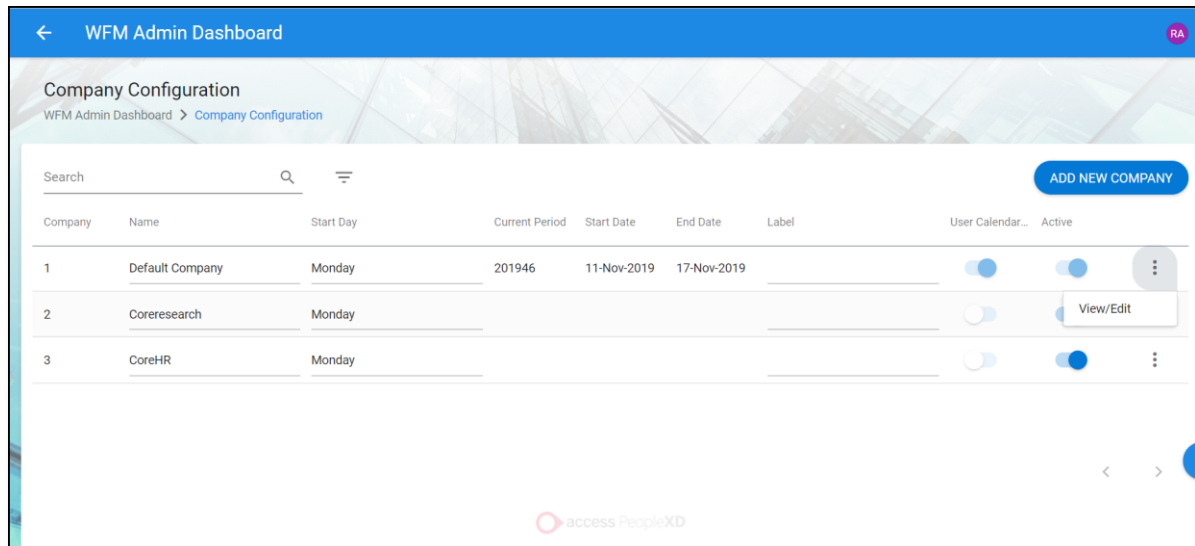

Calendar	Company	Current Period	Start Date	End Date	Auto Advance

The *Auto Advance Periods* screen contains the following fields:

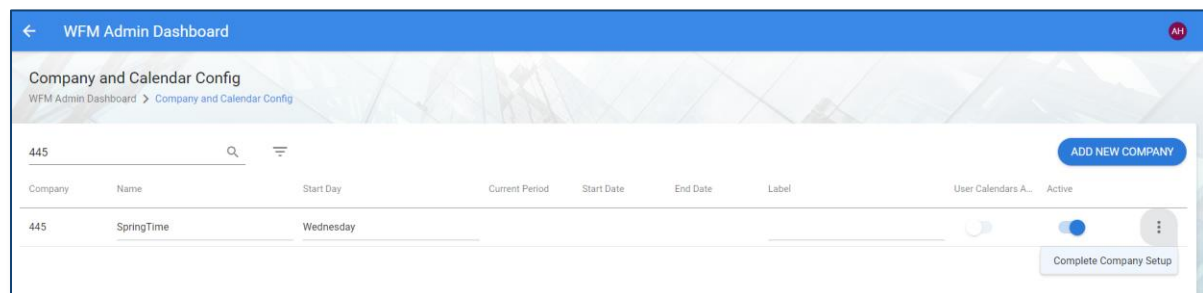

Field	Details
Schedule Auto Advance	This displays the Auto Advance schedule setup and when the next run date will take place. Use the <i>Delete</i> button to remove a schedule.
Auto Historical Balance Recalc	By default the toggle is off, enabling this toggle will recalculate all historical balances at period end. This can add a substantial time overhead to the process and is only advised if there is a specific reason to enable this.
Company Calendars	This lists all Company Calendar(s)
User Defined Calendar Periods	This displays the User Defined Calendars. Active the Auto Advance toggle for the User Defined Calendar to advance when the Company Calendar, it is attached to, advances.

3. Configuration

Once the company has been set up, you can access it via the Company and Calendar Config screen. Click the 3-dot menu to **View/Edit** your selected company.

If for any reason you haven't completed the company setup, on the 3-dot menu it will state **Complete Company Setup**. You will need to follow and complete the steps outlined in section 2, How to add a new company, before it can be used.

3.1. Summary

The Summary Screen holds all the main information of the company which you have just created.

The screenshot shows the 'Company and Calendar Config' interface. The top navigation bar is blue with a back arrow and the title 'Company and Calendar Config'. Below the navigation bar, the breadcrumb trail reads 'WFM Admin Dashboard > Company and Calendar Config > Default Company 1a'. The main content area is titled 'Default Company 1a' and contains a search bar and a list of configuration items. The 'Summary' item is selected and highlighted in blue. The 'Summary' screen displays the following fields:

- Name:** Default Company 1a
- Start Day:** Monday
- Start Date:** 13-Jul-2022
- End Date:** 19-Jul-2022
- Label:** Testeef
- User Calendars Assigned:** ☐ Active
- Approved Status:** AP
- Confirmed Status:** CF
- Use Hire & Leave Dates for Calculation:** ☐ Use Personal Alternates: ☐
- Leaver Code:** Leaver (Coretime-Do Not Remove)
- When Processed:** ☐
- Team Sched. Timesheet Template:** Default Manager Template
- Calculate To:** Yesterday
- MGR Rollback Weeks for Data Entry:** 104
- EMP Rollback Weeks for Data Entry:** 104
- Admin Timesheet Template:** ☐

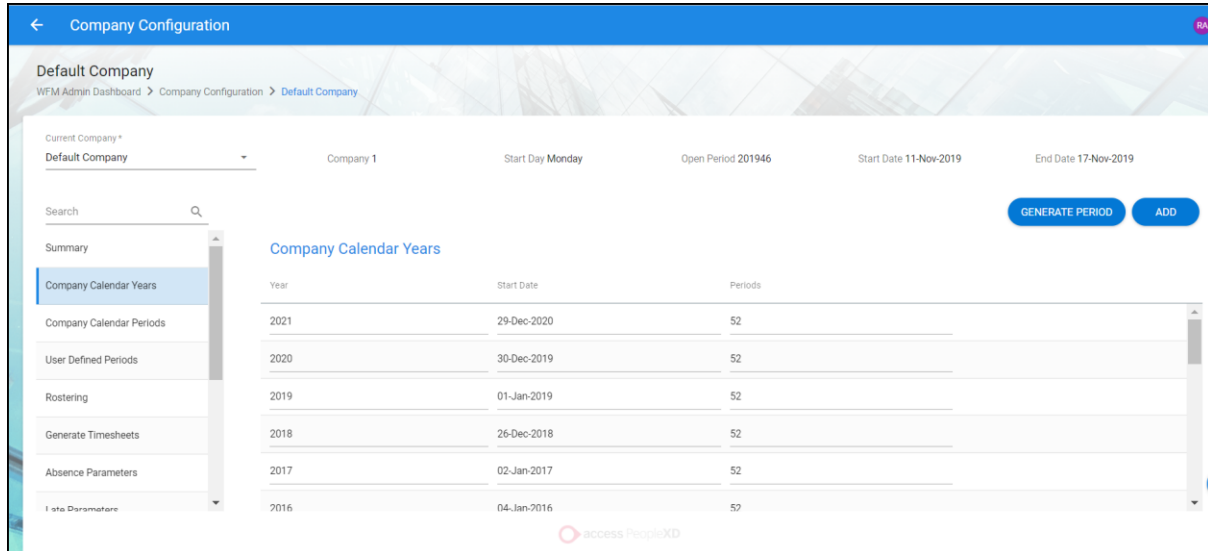

The *Summary* screen contains the following fields:

Field	Details
Name	Name of the company being set up
Start Day	Choose a day of the week for the work pattern to start on.
Start Date	Start date of the period.
End Date	End date of the period.
Label	You can add a label for the company to be more easily searchable.
User Calendars Assigned	When enabled employees are assigned to a calendar.
Active	When the active indicator is enabled, the company will appear.
Approved Status	This indicator is display only and will automatically insert 'AP' into the database as the Approved Status code when hours have been approved through the Maintain Exceptions forms.
Confirmed Status	This indicator is display only and will automatically insert 'CF' into the database as the Confirmed Status code when hours have been signed off through the Sign Off Hours form.

Field	Details
Use Hire & Leave Dates for Calculation	This indicator, when selected, will use Hire & Leave Dates when calculating hours to prevent any unnecessary unapproved absence from being generated for employees.
Use Personal Alternates	This indicator, when selected, will allow employees to change from one work pattern to another for a specific day in the View Work Schedule in the Time Record form, without having to modify the employees shift type.
Leaver Code	This specifies what Employee Status Code, or Personnel Type should be used to indicate an individual who has left the company e.g., LE, L.
When Processed	Choose between Weekly or Monthly.
Team Schedule Timesheet Template	Input which timesheet template you wish to use.
Calculate to	Choose between Today, Yesterday and End of Input Period.
MGR Rollback weeks for Data Entry	Controls the number of weeks back from current period that a manager is permitted to enter data.
EMP Rollback Weeks for Data Entry	Controls the number of weeks back from current period that an employee is permitted to enter data.
Admin Timesheet Template	By default, administrators inherit the same timesheet templates as managers. Where required an administrator template can be assigned at the WFM Company level or Username Level which override the default setting when viewing the 'Timesheet Input'. • Entry of the Admin Timesheet Template at the username level overrides the WFM Company Level supporting admin staff to have bespoke templates if required. • If the user also has Managers access assigned, on connection to the Managers Dashboards the manager screens continue to use the managers' template.

3.2. Company Calendar Years

The *Company Calendar Years Screen* shows the current and previous years of the company and details the start date of the year as well as the number of periods.

The *Company Calendar Years* screen contains the following fields:

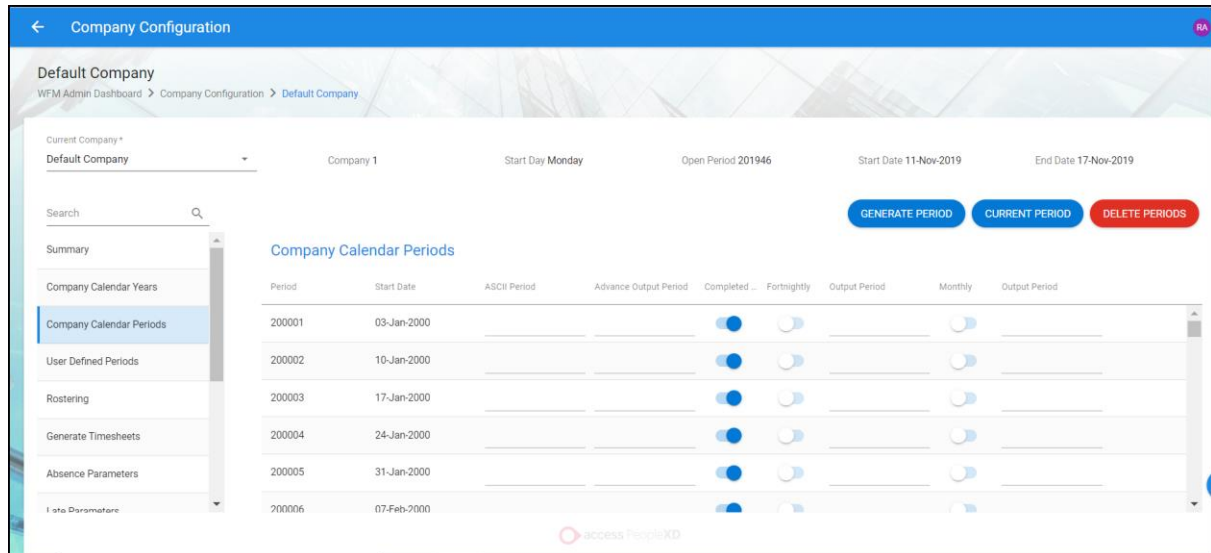

Field	Details
Year	Company calendar year.
Start Date	Start date of the calendar.
Periods	The number of weeks within the calendar year. This may vary depending on whether leap year.

You also have access to the **Generate Period** & **Add** buttons. These can be used to:

- **Generate Period:** The Generate Period button allows you to set up a period by selecting the specific year and setting the fortnightly and monthly starting period.
- **Add:** This allows you to add a new calendar year to your company.

3.3. Company Calendar Periods

The *Company Calendar Periods Screen* shows all periods that have been generated, historic, future and current.

You also have access to the **Generate Period**, **Current Period** & **Delete Periods** buttons. These can be used to:

- **Generate Period:** The Generate Period button allows you to set up a period by selecting the specific year and setting the fortnightly and monthly starting period.
- **Current Period:** This allows you to select the current period and closes off historic periods.
- **Delete Periods:** If you wish to delete certain periods you can do so with this button.

The *Company Calendar Periods* screen contains the following fields:

Field	Details
Period	This is the 6-digit number which corresponds to the week number on the calendar e.g., 22201 is the first period of the Year 2022.
Start Date	This is the Start Date of the Calendar Period
ASCII Period	Enter in the ASCII number that is sent to payroll e.g., 202201
Advance Output Period	Enter the period which the calendar is to be advance with. The Transaction date of this period entered is then passed to payroll.
Completed Indicator	Completed indicator to allow you to close off a period and designate the current period by enabling the toggle.

Field	Details
	If enabled, before the end of the period, the user will receive a warn message which they will need to confirm to complete. For example, the current period is 09/07 to 15/07 but I've enabled the completed toggle on the 10/07. I'm warned this is not the end of the period and I'm closing the period before its end date. Complete Period Marking this period (09-Jul-2025 - 15-Jul-2025) as completed, will close this period before its end date. Are you sure you want to proceed? NO YES
Fortnightly	This is selected to indicate the pay week of a Fortnightly pay group. It is only necessary if ASCII payroll is completed on a fortnightly basis. For more information, see the section on the Payroll Interface Set-up
Output Period	This is mandatory if payroll is completed on a Fortnightly basis to specify the output period i.e., the period that the payroll file should be created.
Monthly	This is selected to indicate the pay week of a Monthly pay group. It is only necessary if payroll is completed on a Monthly basis. For more information, see the section on the Payroll Interface Set-up.
Output Period	This is mandatory if payroll is completed on a Monthly basis to specify the output period i.e., the period that the payroll file should be created.

3.4. User Defined Calendar Periods

The *User Defined Periods Screen* shows all periods generated for User Defined Calendars.

Note: The UDC calendar name can be edited.

- Where no calendar code is selected the Actions button will display an Add option
- Where a calendar code is selected the Actions button will display an Add and Edit option.

You have access to the **Actions** button, where you can:

- **Add:** This allows you to add a new User Defined Calendar Code, available if no UDC is selected.
- **Edit:** This allows you to edit the name of the UDC Calendar, available if a UDC is selected.

You also have access to the **Generate Period** & **Current Period** buttons. These can be used to:

- **Generate Period:** The Generate Period button allows you to generate a user defined period by selecting the start date, duration and number of periods.
- **Current Period:** This allows you to select the current period and closes off historic periods.

The *User Defined Periods* screen contains the following fields:

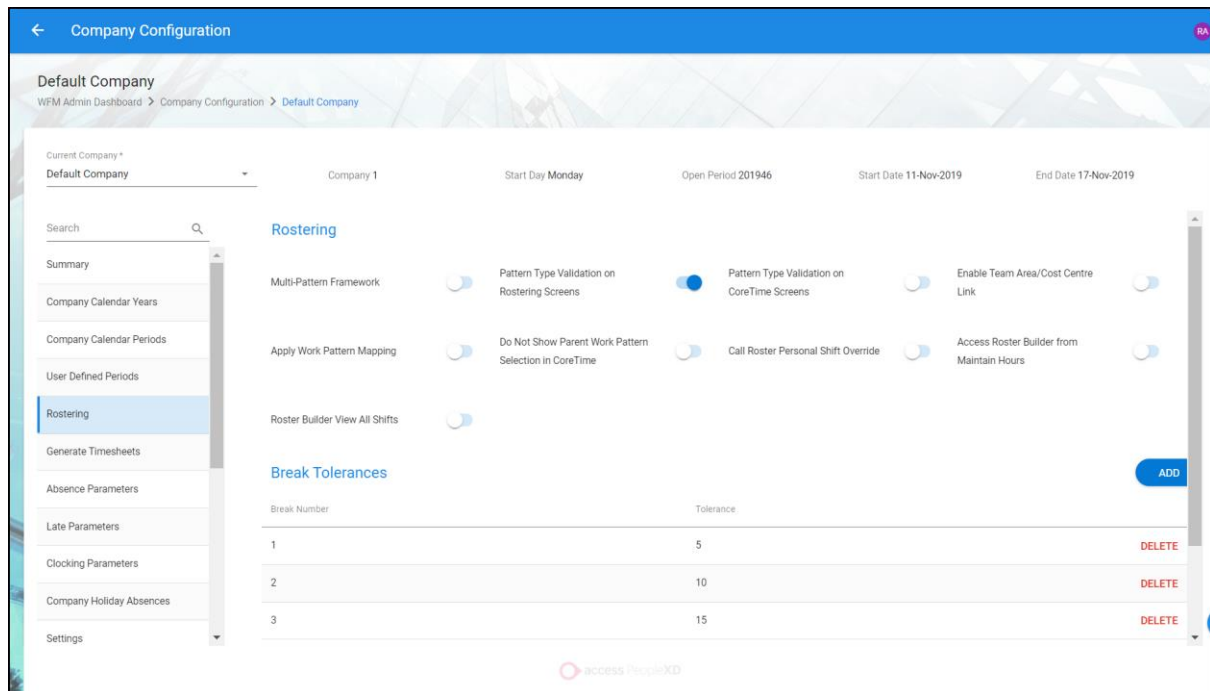

Field	Details
Select Calendar Code	You are prompted to select a company calendar. Once selected the periods display and the fields can be edited.

Field	Details
Data Offset	Enter in the number which the Data entry start, and end dates is offset by.
Auto Advance Period	Once enabled, the period is advanced automatically.
Hold Unconfirmed Employees	Turn on to ignore all hours for the period for the person, if any hours are unconfirmed. The hours are paid in a later period when confirmed (Subject to parameter Countback period)
Available Countback Period	Enter in the number of periods back where newly confirmed hours will be processed by generate timesheets. Unconfirmed hours outside of this countback will timeout.
Start Date	Start of the period.
End Date	End of the period.
Period	Specific number assigned to the period by the system.
Advance Output Period	Enter the period which this calendar period is to be advanced with. The transaction date of the period entered is passed to payroll
Completed	This toggle once enabled marks the period as completed. If enabled, before the end of the period, the user will receive a warn message which they will need to confirm to complete. For example, the current period is 09/07 to 15/07 but I've enabled the completed toggle on the 10/07. I'm warned this is not the end of the period and I'm closing the period before its end date. Complete Period Marking this period (09-Jul-2025 - 15-Jul-2025) as completed, will close this period before its end date. Are you sure you want to proceed? NO YES

3.5. Rostering

This Rostering screen allows you to configure the controls for the company's rostering.

WFM: Company and Calendar - Configuration Guide

You also have access to the **Add** button, where you can:

- **Add:** This allows you to add a break tolerance. Break tolerance is like a grace period given to the employee if they are late to clock back in for work or a break.

The *Rostering* screen contains the following fields:

Field	Details
Multi Pattern Framework	Click on to indicate Multi Pattern framework is active
Pattern Type Validation on CoreTime screens	Provides Pattern Type Validation on Core Time screens
Pattern Type Validation on Rostering Screen	Provides Pattern Type Validation on Rostering Screens
Enable Team Area/Cost Centre Link	When enabled, the cost centre is linked to the team area
Apply Work Pattern Mapping	Work Pattern is applied once this toggle has been enabled
Do Not Show Parent Work Pattern Selection in CoreTime	When enabled the work patterns at parent level are not visible
Call Roster Personal Shift Override	When this toggle is enabled, you override the default settings of a personal shift.

Field	Details
Access Roster Builder from Maintain Hours	Select on to access Roster builder from Maintain hours
Roster Builder View All Shifts	Once enabled, you will be able to view all shifts.
Break Number	This allows you to specify the number of breaks allowed.
Tolerance	The tolerance gives a leeway on breaks for employees to clock in.

3.6. Generate Timesheets

The Generate Timesheets screen allows you to control how timesheets are sent to Payroll for the company. (Previously found under Company Settings)

The screenshot displays the 'Generate Timesheets' configuration interface. At the top, it shows the breadcrumb 'WFM Admin Dashboard > Company Configuration > Default Company'. Below this, there's a header for 'Default Company' with a dropdown menu. The main content area is divided into several sections:

- Generate Timesheets:** Contains toggle switches for 'Parallel Run' (disabled), 'Allocate Basic Only' (disabled), 'Use Transfer Pay Codes For Basic Rule' (enabled), and 'Day Order Basic Rule' (disabled). There is also a dropdown for 'Timesheet Error Log Periods'.
- Rounding:** Includes dropdown menus for 'Basic Rounding Code', 'Overtime1 Rounding Code', 'Overtime2 Rounding Code', and 'Overtime3 Rounding Code'.
- Hold Unconfirmed Timesheets:** Features a toggle for 'Hold Unconfirmed Employee' (disabled) and a numeric input for 'Available Countback Periods' set to 2.

A sidebar on the left lists various configuration categories, with 'Generate Timesheets' currently selected. The bottom right corner of the interface shows the 'access PeopleKD' logo.

The *Generate Timesheets* screen contains the following fields:

Field	Details
Parallel Run	When enabled, this gives access to the Parallel Run facility.
Allocate Basic Only	This is to be selected if only the basic hours are to be allocated for basic rule calculation

Field	Details
Use Transfer Pay Codes for Basic Rule	This indicator can be used to specify that only pay codes transferred to payroll can be used in the basic rule calculation.
Day Order Basic Rule	For Basic rule work groups only, the day order functionality can be activated or deactivated
Timesheet Error Log Periods	Indicate how many periods the generate timesheet error log table is kept (defaults to 5 periods if left blank)
Use Shift Holiday Adjustment	When enabled, holiday adjustments can be applied to shifts.
Adjustment Value	If the Use Shift Holiday Adjustment indicator is selected, the value for the adjustment must be entered here.
Basic Rounding Code	When populated the basic rounding code is applied
Overtime1 Rounding Code	When populated the Overtime 1 rounding code is applied
Overtime2 Rounding Code	When populated the Overtime 2 rounding code is applied
Overtime3 Rounding Code	When populated the Overtime 3 rounding code is applied
Hold Unconfirmed Employee	Click On to ignore all hours for the period for the person if any hours are unconfirmed. The hours are paid in a later period when confirmed (subject to parameter countback periods)
Available Countback Periods	Enter the number of periods back when newly confirmed hours will be processed by generate timesheets, unconfirmed hours outside of this countback will timeout

3.7. Absence Parameters

The Absence Parameters Screen controls how absences are managed and allows you to assign pay codes and thresholds.

WFM: Company and Calendar - Configuration Guide

The screenshot shows the 'Absence Parameters' configuration screen for 'Default Company'. The interface includes a sidebar with navigation options like Summary, Company Calendar Years, and Absence Parameters (which is currently selected). The main content area displays various parameters for configuring absence management, including dropdown menus for codes (e.g., Unapproved Absence Code, Missed Clocking Pay Code) and input fields for thresholds (e.g., Generate Absence Threshold, Started Too Early Threshold). There are also toggle switches for options like 'Always Show Absence' and 'Calculate Hours to Clock Out Time'.

The *Absence Parameters* screen contains the following fields:

Field	Details
Unapproved Absence Code	This is the pay code selected for an absence which has not been approved by a manager.
Missed Clocking Pay Code	This is the pay code selected for a missed clocking.
Early Out Rounding Code	This pay code is selected when employee leaves work early
Down Time Pay Code	This pay code refers to employee down time.
Started Too Early Pay Code	This pay code refers to employees who have started early.
Clocked on Rest Day Pay Code	This refers to an employee who clocks in on a designated rest day.
Absence Rounding Code	This code rounds up the absence detail.
Early Out Pay Code	This pay code can be selected for employee who leave early.
Unworked Pay Code	This pay code can be assigned for hours unworked.
Did Not Take Break Pay Code	Assign a pay code for when an employee doesn't take their break.
Absence	Choose between Actual and Rounded.
Generate Absence Threshold	This field allows you to set a threshold to be reached for an absence to be generated.

Field	Details
Started Too Early Threshold	This allows you to designate a threshold before an employee is considered to have clocked in too early.
Early Out Threshold	This allows you to set a threshold for the employee to reach to be considered early out.
Early Out to Absence	Enter the amount of time after which an early out will become an absence
Always Show Absence	Once enabled, all absences will be shown for the company.
Calculate Hours to Clock out Time	Select on to calculate the last clock of the day within the early to tolerance
Deduct Unpaid Breaks from Early Out	Once enabled, unpaid breaks are deducted from Early out.

3.8. Late Parameters

The *Late Parameters Screen* controls how lateness is recorded. Here you can apply grace periods and rounding codes for employees.

The screenshot displays the 'Late Parameters' configuration screen within the WFM Admin Dashboard. The top navigation bar shows the path: WFM Admin Dashboard > Company Configuration > Default Company. The main content area is titled 'Late Parameters' and includes a search bar. Below the search bar, there are several configuration sections:

- Summary:** Includes fields for 'Late Pay Code' (3604 - Late), 'Late Break Code', 'Late Rounding Code', and 'Late Minutes Lost Paycode'.
- Weekly Late Rounding Code:** A dropdown menu.
- Default Late Grace:** A dropdown menu.
- Lates:** A dropdown menu set to 'Actual'.
- Always Show Lates:** A dropdown menu set to 'Always'.
- Hold Lates Till payroll:** A toggle switch.
- Weekly late Tolerance:** A dropdown menu.
- Deduct Unpaid Breaks from Lates:** A toggle switch.
- Late to Absence:** A dropdown menu.
- Calculate Hours from Clock in Time:** A toggle switch.
- Keep Late for PM Absence:** A toggle switch.

The *Late Parameters* screen contains the following fields:

Field	Details
Late Pay Code	Choose the Late pay code from the dropdown.
Late Break Code	Assign the Late Break Code from the dropdown.
Late Rounding Code	Assign the Late Rounding Code from the dropdown.
Late Minutes Lost Pay code	If Late Rounding is used, the late can be seen as the original value, and the balance of the rounded late can be coded out to the Late Minutes Lost Pay Code specified here.
Weekly Late Rounding Code	Weekly Lates can be rounded according to a specific rounding code. If the Weekly Late Round Code is entered on the Control Parameters, then a rounding code should not be entered on the default or 'basic' sequence on the Work Pattern. Rounding codes may still be used for any overtime sequences.
Default Late Grace	Set up a default grace period for late clockings. See Always Show Lates.
Lates	Choose between Rounded or Actual
Always Show Lates	This indicator, when selected, will also show lates even if the basic hours have been filled for the day e.g., if the Fill Basic indicator is selected, and the person fills basic by working overtime but is late for their basic sequence, the system will always show the late.
Hold Lates till Payroll	This indicator, when selected, will not deduct Lates from Basic until payroll is being processed.
Weekly Late Tolerance	You can set a weekly late tolerance for employees for late clockings.
Deduct Unpaid Breaks from Lates	Lates can be calculated on a weekly basis. A Weekly Late Tolerance can be entered so that an individual is not 'Late' until the Lates generated are above the threshold for the entire week.
Late to Absence	This is the amount of time that can be entered, after which a late pay code is to be converted to an absence pay code.
Calculate Hours from Clock in Time	When enabled, hours are calculated from the clock in time.
Keep Late for PM Absence	Click on to leave display lates when a PM absence is booked, and person is late

3.9. Clocking Parameters

The Clocking Parameters Screen allows you to control employee clocking's. You can apply thresholds as well as clock rounding's using the dropdowns and toggles.

The screenshot displays the 'Company and Calendar Config' interface for 'Decian Company'. The left sidebar contains a search bar and a list of navigation items: User Defined Periods, Rostering, Generate Timesheets, Absence Parameters, Late Parameters, Clocking Parameters (highlighted), Company Holiday Absences, Settings, and Flexitime. The main content area is titled 'Clocking Parameters' and includes the following fields and controls:

- Clocking Hours Difference:** A numeric input field set to 18.
- Previous Day Threshold:** A time input field set to 03:00.
- Next Day Threshold:** An empty time input field.
- Length of Clock Day:** An empty input field.
- Show Prev/Next Day Threshold:** A toggle switch.
- Apply Clocking Movement:** A toggle switch.
- Use Standard Calculation:** A toggle switch.
- Allow Generation of Default Clocks:** A toggle switch.
- Generate Missed Clockings on Rest Days:** A toggle switch.
- Clock Rounding:** A section with four dropdown menus: In Clocking*, Out Clocking*, Break Clocking*, and Rounding Type*.

The *Clocking Parameters* screen contains the following fields:

Field	Details
Clocking Hours Difference	The Clocking Hours Difference is the number of hours difference between the last clock on one day and the first clock on the next day e.g., 18.
Previous Day Threshold	This sets the Previous Day threshold on the clocking's so that all first clocking's before this time are put into the previous day e.g., for anyone clocking before 03:00 on a Sunday night the system will display the clocking's on Sunday.
Next Day Threshold	This sets the Next Day Threshold on the clocking's so that all first clocking's after this time are put into the next day e.g., for anyone clocking after 22:00 on a Sunday night the system will display the clocking's in Monday.
Length of Clock Day	This allows you to decide the length of the day when employees can clock in or out.

Field	Details
Show Prev/Next Day Threshold	This indicator will show the Previous and Next Day Thresholds on the Shift Types screen. If the thresholds are set on the Shift Types form, it will override the Prev/Next Day Thresholds on the Control Parameters form but only for a specific Shift Type.
Apply Clocking Movement	Click on if you want to indicate In or Out when clocking
Use Standard Calculation	When enabled, standard calculation is used.
Allow Generation of Default Clocks	Enable to allow generation of default clocking's
Generate Missed Clocking's on Rest Days	Allows Generate Missed Clocking's on Rest Days
In Clocking	Clocking in time.
Out Clocking	Clocking out time.
Break Clocking	This is relevant if employees clock in for breaks.
Rounding Type	Choose between First and Last Only or Round All Clocks.
In Clocking Tolerance Minutes	Assign an amount of minutes tolerance for an employee to clock in.
Apply Only Before Start Time	Applies the tolerance only before the start time.
Do Not Round on Rest Day	When this toggle is enabled, rounding's are not done on rest days.

3.10. Company Holidays Absences

The Company Holidays Absences screen controls pay codes which can be assigned to company holiday absences.

WFM: Company and Calendar - Configuration Guide

The screenshot shows the 'Company and Calendar Config' interface for 'Declan Company'. The top navigation bar includes a back arrow and the title 'Company and Calendar Config'. Below the header, the current company is 'Declan Company', and the configuration is for 'Company 7'. The start day is 'Thursday', the open period is '202305', the start date is '06-Oct-2022', and the end date is '12-Oct-2022'. The main section is titled 'Company Holiday Absence'. It contains a 'Check For Sick' toggle switch, which is currently turned off. Below this are six dropdown menus for assigning codes: 'Late Pay Code', 'Early Out Pay Code', 'Unapproved Absence Code', 'RDA Absence Code', and 'Full Day Absence Code'. A sidebar on the left lists various configuration options: 'User Defined Periods', 'Rostering', 'Generate Timesheets', 'Absence Parameters', 'Late Parameters', 'Clocking Parameters', 'Company Holiday Absences' (which is highlighted), and 'Settings'.

The *Company Holiday Absences* screen contains the following fields:

Field	Details
Check for Sick	When enabled, this toggle allows the system to record sick hours.
Late Pay Code	Assign a code for lateness.
Early Out Pay Code	Assign a code for leaving early.
Unapproved Absence Code	Choose a code for unapproved absences.
RDA Absence Code	Enter the company holiday RDA unapproved Absence pay code
Full Day Absence Code	Assign a code for full day absences.

3.11. Settings

The Settings screen displays additional calendar setting parameters.

The *Settings* screen contains the following fields:

Field	Details
Use Reports to For Cortime Mail	Click on to use Reports To rather than supervisor for CoreTime Mail
Use Package Calculation	This indicates that the package calculation routine is switched on. This should be set as default.
Use Package Flexitime	This indicates that the flexitime package calculation routine is used to calculate flexitime in real-time. This should be set as default.
Countback/Count Forward Days	Enter a number of days for checking backwards / forwards when carrying out consecutive / adjoining days validation
Allow Acting Up	Click on to allow hours to be marked as acting up
Rate of Pay Mandatory for Hourly Pay Codes	When enabled the mandatory rate of pay for hourly pay codes is shown.
Rate of Pay Calculation	When enabled the rate of pay is calculated.
Holiday Exception Pay Code	Choose a holiday exception pay code from the drop-down menu.

Field	Details
Check for Maximum Daily Hours	This section allows you to set a check for the maximum amount of hours which can be worked per day for each day of the week.
Maximum Daily Hours	You can specify how the system should respond when maximum daily hours are exceeded. Choose between Raise an error, issue a Warning and Allow to Proceed.

3.12. Flexitime

The Flexitime screen displays all the flexitime parameters that can be configured.

The screenshot shows the 'Flexitime' configuration screen within the 'Company Configuration' section. The interface includes a sidebar with navigation options such as 'Timesheet Threshold Balance', 'Request Future Absences', 'Trigger Point Groups', 'Sign Off Rules', 'File Locations', 'Banked Hours Parameters', 'Occasional Night Premiums', 'NCHD/Agency Parameters', and 'Contract Hours'. The main content area displays various configuration fields for Flexitime, including 'Core Time Infringement Code' (set to 3610 - Coretime Infringement), 'Positive Pay Code' (3611 - Flexi Credit), 'Negative Pay Code' (3612 - Flexi Debit), 'Day Absence Pay Code' (3602 - Unexplained Absence), 'Core Time Clocking Infringement Pen...', 'Show Infringement on Days Absence' (toggle), 'Deduct Breaks/Penalties From' (Business First), 'Penalty Hours for Core Time Clocking...', 'Business Pay Code' (3613 - Business Absence), 'Business Tx Type' (TNA IN/OUT), 'Business Round Code', 'Break Untaken Code' (3608 - Break Untaken), 'Break Penalty Code' (3607 - Break Penalty), 'Unscheduled Break Pay Code', 'Overtime Tx Type', and 'Flexi Overtime Allowed'. The screen also shows 'Overtime Start Times' and a 'Success' message at the bottom.

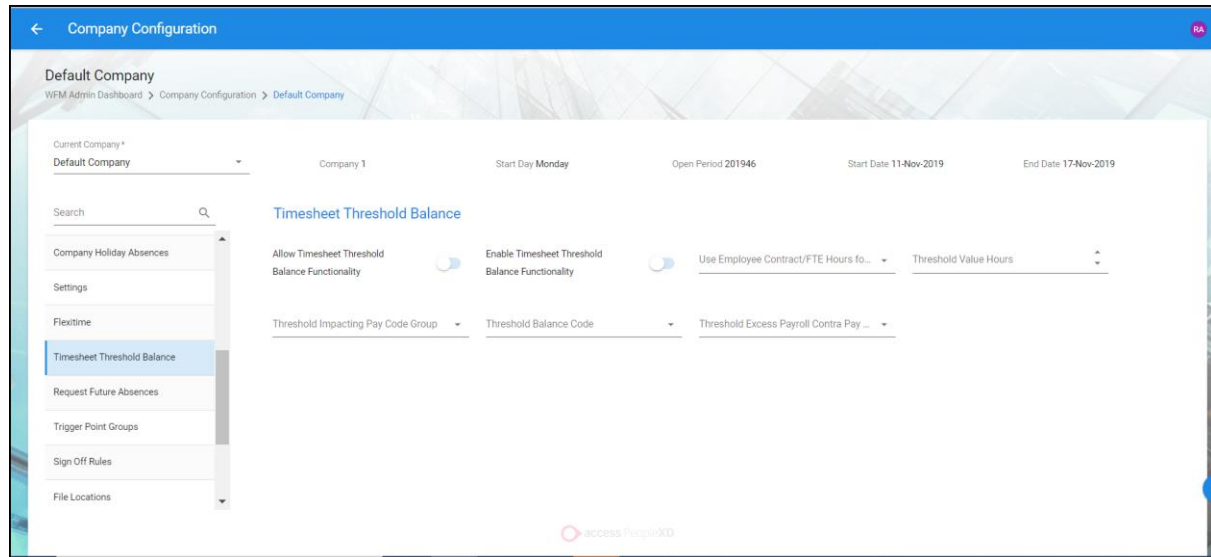

The *Flexitime* screen contains the following fields:

Field	Details
Core Time Infringement Code	Choose from the list of each coded infringement such as break untaken or break penalty.
Positive Pay Code	Choose from the dropdown to assign a positive pay code.
Negative Pay Code	Choose from the from down menu to assign a negative pay code.
Day Absence Pay Code	Assign a pay code from the dropdown menu for day absences.

Field	Details
Core Time Clocking Infringement	If a person is missing during his or her 'Core' hours, then a CoreTime Infringement Code can be automatically generated by the system to highlight this.
Show Infringement on Days Absence	The system will automatically generate CoreTime Infringements on a Days Absence if this indicator is selected
Deduct Breaks/Penalties From	Choose from Business First, Basic first or Greater of.
Penalty Hours for Core Time Clocking	Choose the amount of penalty hours.
Business Pay Code	Choose the pay code for business. i.e., Business Pay Code.
Business TX Type	This is the transaction type that is entered at the terminal when an individual is going off-site on business e.g., B3.
Business Round Code	this is the rounding code that will be applied to the Business Absence.
Break Untaken Code	Assign a code for a break which has not been taken by an employee.
Break Penalty Code	This is the pay code that can be entered so if a break is not taken against a flexitime pattern, the amount of the break is calculated at this particular pay code.
Unscheduled Break Code	Assign a code for unscheduled breaks.
Overtime TX Type	Choose the flexi overtime transaction type
Flexi Overtime Allowed	Choose between No Update allowed or In and Out Clocks
Overtime Start Times	In this section you can fill in the overtime start time day by day.

3.13. Timesheet Threshold Balance

To set up thresholds to be reached on timesheets, you can use the Timesheet Threshold Balance Screen.

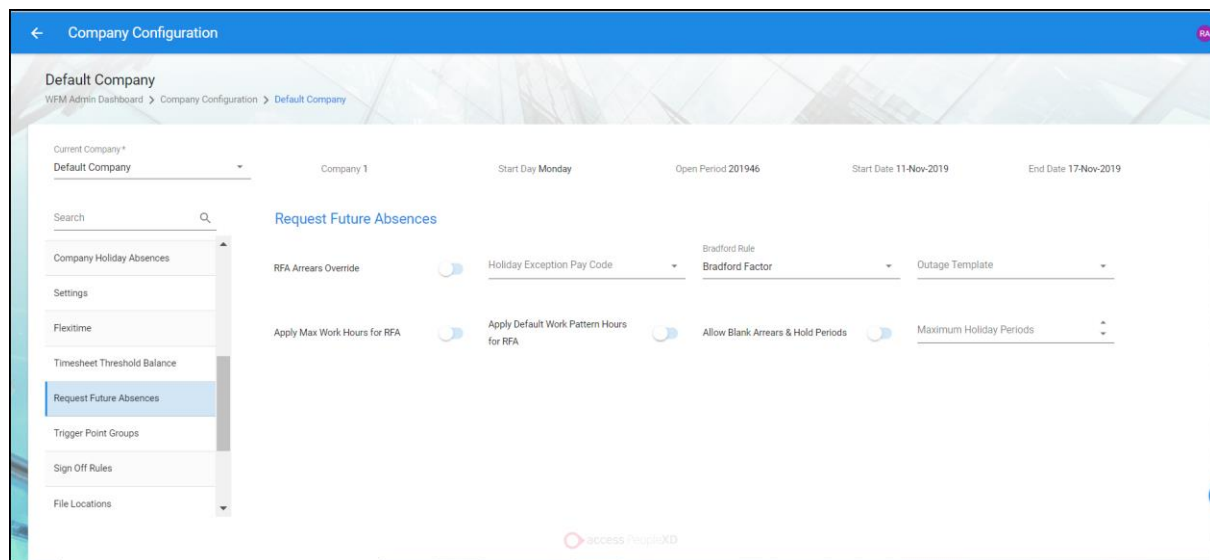

The *Timesheet Threshold Balances* screen contains the following fields:

Fields	Detail
Allow Timesheet Thresholds Balance Functionality	When enabled this allows timesheet thresholds to be set up.
Enable Timesheet Threshold Balance Functionality	This allows the Balance Functionality to be enabled.
Use Employee Contract/FTE hours	Will not be checked by default. If this gets enabled, it will clear out and disable the "Threshold Value" field. This takes the employees contract hours as their threshold hours.
Threshold Value Hours	The Threshold Values can be entered when generating periods and will be displayed in the Period End Controls.
Threshold Impacting Pay Code Group	Select a pay code to sum against threshold hours
Threshold Balance Code	This is a List of Values that will reference pre-configured Balances. This is the balance that will be affected if an employee works more than their threshold hours

Fields	Detail
Threshold Excess Payroll Contra Pay	This writes a contra entry for the Threshold Excess Value to the Timesheet table in Core Pay (i.e., so that employees will not get paid for the hours that are being banked against the relevant "Timesheet Balance code")

3.14. Request Future Absences

The Request Future Absences screen displays all the Future Absence parameters that can be configured.

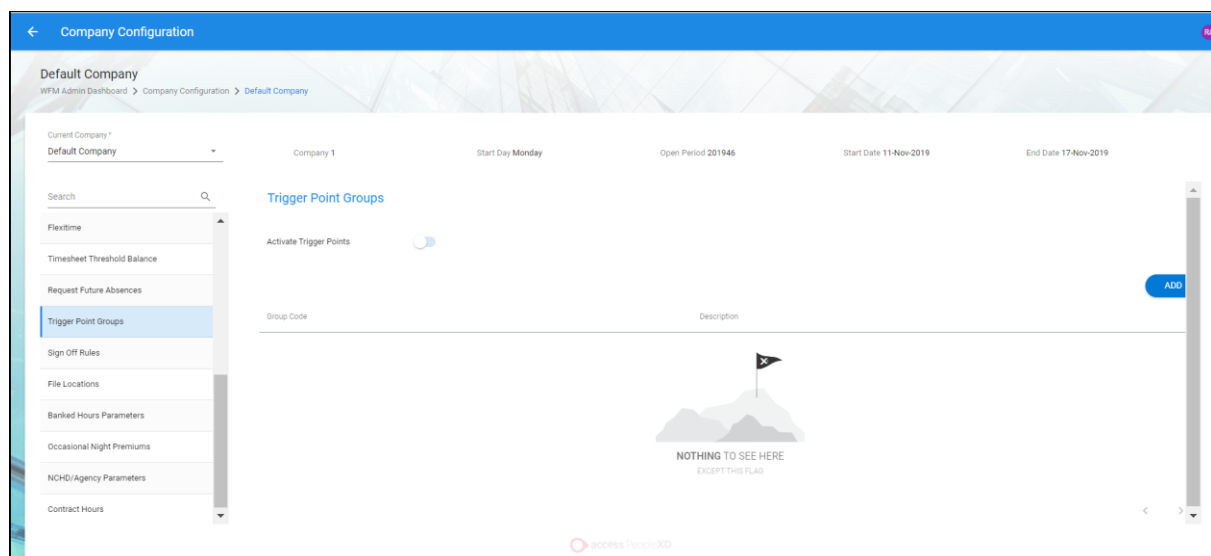

The *Request Future Absences* screen contains the following fields:

Field	Details
RFA Arrears Override	This allows the company pay in advance without holding pay & hours for other pay periods
Holiday Exception Pay Code	Assign a pay code for holiday exception.
Bradford Rule	Select the Bradford rule to be applied from the dropdown menu
Outage Template	Select an Outage Template from list
Apply Max Work Hours for RFA	When the toggle is enabled, maximum work hours are applied for Requesting Future Absences

Field	Details
Apply Default Work Pattern Hours for RFA	Select to allow maximum absence of default hours on the person work pattern when booking absence in RFA
Allow Blank Arrears and Hold Periods	Select to allow blank arrears and hold periods when booking absence in RFA
Maximum Holiday Periods	Enter the maximum number of holiday periods that can be paid in advance

3.15. Trigger Point Groups

Trigger Points can be controlled using the Trigger Points Groups Screen.

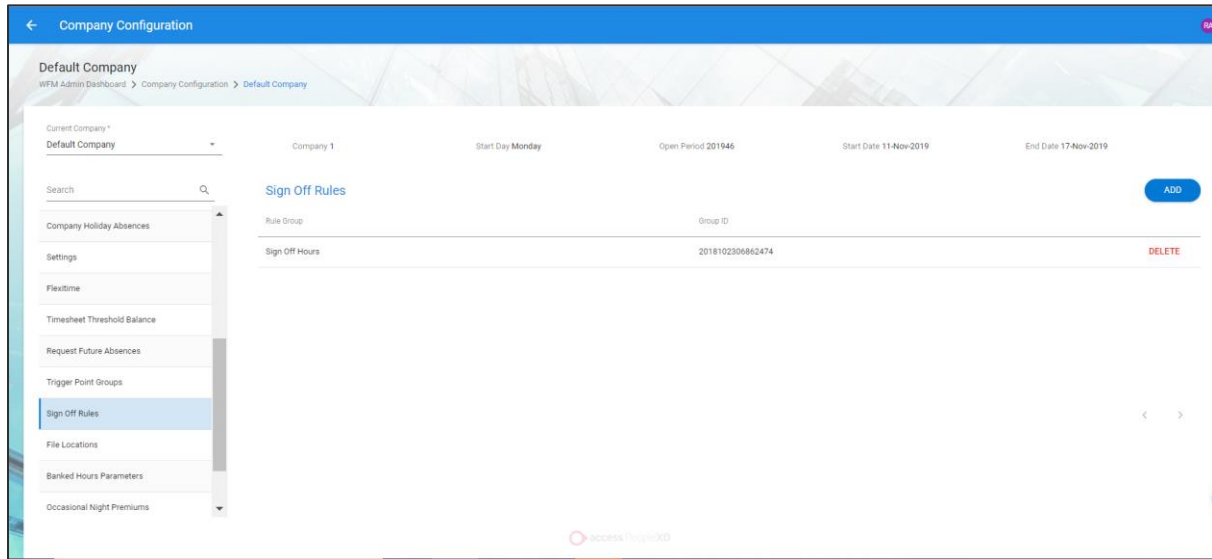

To **Add** a Trigger Point group:

1. Click **Add**.
2. Select the company you wish to use.
3. Click **Ok**
4. The Trigger Point Group displays on the screen.
5. To delete a Trigger Point Group, click the **Delete** button.

3.16. Sign Off Rules

On the Sign Off Hours screen, you can control how hours are signed off as well as add any rules for the system to follow.

To **Add** a Sign Off Rule:

1. Click **Add**
2. Select the rule from the dropdown menu.
3. Click **OK**.
4. The Sign Off Rule displays on the screen.
5. To delete a Sign Off Rule, click the **Delete** button.

3.17. File Locations

The File Locations screen

The screenshot shows the 'Company and Calendar Config' screen for 'Declan Company'. The left sidebar contains a search bar and a list of configuration items: Timesheet Threshold Balance, Request Future Absences, Trigger Point Groups, Sign Off Rules, File Locations (highlighted), and Banked Hours Parameters. The main content area is titled 'File Locations' and contains four input fields: 'Timesheet Control File Path', 'Reports Export to .CSV File Path', 'Reports Export to .CSV Virtual Path', and 'Absence File Load Hours Format *' (a dropdown menu currently set to 'Minutes'). At the top of the main area, there are several configuration options: 'Current Company *' (Declan Company), 'Company 7', 'Start Day Thursday', 'Open Period 202305', 'Start Date 06-Oct-2022', and 'End Date 12-Oct-2022'.

The *File Locations* screen contains the following fields:

Field	Details
Timesheet Control File Path	Enter the path where the timesheet control files will reside
Reports Export to CSV file path	Enter the path where .CSV file should be created when run
Reports Export to CSV Virtual Path	Enter the virtual path for creating .CSV files over the web
Absence File Load Hours Format	Choose format between Minutes or Decimal.

3.18. Banked Hours Parameters

The Banked Hours Parameters screen controls the thresholds and pay codes which can be assigned to hour banked by employees in the company.

The screenshot shows the 'Banked Hours Parameters' configuration screen. The top navigation bar includes a back arrow, 'Company and Calendar Config', and a user profile icon 'AH'. The breadcrumb trail is 'WFM Admin Dashboard > Company and Calendar Config > Declan Company'. The main header area displays 'Declan Company' and 'Current Company *'. Below this, a summary row shows 'Company 7', 'Start Day Thursday', 'Open Period 202305', 'Start Date 06-Oct-2022', and 'End Date 12-Oct-2022'. A search bar is present. On the left, a sidebar menu lists various configuration options, with 'Banked Hours Parameters' highlighted. The main content area is titled 'Banked Hours Parameters' and contains a toggle for 'Use Banked Adjustment' (currently off). Below the toggle are six input fields: 'Upper Threshold' and 'Lower Threshold' (both with up/down arrows), 'Payment Period' (a dropdown menu), 'Payment Pay Code' (a dropdown menu), 'Statutory Hours to Payroll Pay Code' (a dropdown menu), and 'Banked Overtime to Payroll Pay Code' (a dropdown menu).

The *Banked Hours Parameters* screen contains the following fields:

Field	Details
Use Banked Adjustment	Once the toggle is enabled, the banked adjustment can be used.
Upper Threshold	Set the upper threshold of the banked hours parameters.
Lower Threshold	Set the lower threshold of the banked hours parameters.
Payment Period	Select the relevant payment period from the drop down.
Payment Pay Code	Choose a pay code from the dropdown to be assigned to the payment.
Statutory Hours to Pay Code	Assign a pay code to statutory hours.
Banked Overtime to Payroll Pay Code	Assign a pay code to Banked Overtime.

3.19. Occasional Night Premiums

The Occasional Night Premiums screen displays all the Occasional Night Premiums created.

The screenshot shows the 'Company and Calendar Config' page for 'Declan Company'. The left sidebar contains a menu with 'Occasional Night Premiums' selected. The main area displays a table of Occasional Night Premiums. The table has columns for 'Pay Code' and 'Description'. One premium is listed with Pay Code '1005' and Description 'BASIC HOURS'. A 'DELETE' button is visible next to the premium. An 'ADD' button is in the top right corner.

Pay Code	Description	Action
1005	BASIC HOURS	DELETE

To **Add** an **Occasional Night Premium**:

1. Click **Add**.
2. Select the pay code.
3. Click **OK**.
4. The Premium displays on the screen.
5. To delete the premium, click the **Delete** button beside the premium.

3.20. NCHD/Agency Parameters

The screenshot shows the 'Company Configuration' page for 'Default Company'. The left sidebar contains a menu with 'NCHD/Agency Parameters' selected. The main area displays a form for configuring NCHD Parameters. The form includes fields for 'Apply Clock Movement Not Oncall', 'Clocking Movement Threshold', 'Onsite at 1.5', 'Onsite at 2', 'Oncall Offsite', 'Absent Oncall', 'Sunday Premium', 'Public Holiday Onsite at 1', and 'Public Holiday Onsite at 2'. A 'Save' button is in the bottom right corner.

Parameter	Value
Apply Clock Movement Not Oncall	☐
Clocking Movement Threshold	1.5
Onsite at 1.5	1.5
Onsite at 2	2
Oncall Offsite	Offsite
Absent Oncall	Absent
Sunday Premium	Premium
Public Holiday Onsite at 1	Onsite
Public Holiday Onsite at 2	Onsite

The *NCHD Parameters* screen contains the following fields:

Field	Details
Apply Clock Movement Not on call	Select to apply clock movement calculation to people not on call
Clocking Movement	This indicates whether the clock movement, in or out, will be displayed on screens such as Time Record, Maintain Exceptions, etc.
Onsite at 1.5	Hours worked/On-call will be generated against the pay code for Onsite at 1.5
Onsite at 2	Hours worked/On-call will be generated against the pay code for Onsite at 2
Oncall Offsite	Hours worked/On-call will be generated against the pay code for Oncall Offsite
Absent Oncall	Hours worked/On-call will be generated against the pay code for Absence Oncall
Sunday Premium	Hours worked/On-call will be generated against the pay code for Sunday Premium
Public Onsite at 1	Hours worked/On-call will be generated against the pay code for Public Onsite at 1
Public Onsite at 2	Hours worked/On-call will be generated against the pay code for Public Onsite at 2

The *Agency Parameters* screen contains the following fields:

Field	Details
Previous Day Threshold	Enter previous day threshold
Agency Day Pay Code	Select from the dropdown menu an Agency Day Pay Code
Agency Night Pay Code	Select from the dropdown menu an Agency Night Pay Code
Agency Excess Pay Code	Select from the dropdown menu an Agency Excess Pay Code
Agency Difference Pay Code	Select from the dropdown menu an Agency Difference Pay Code

Field	Details
Agency Exception Pay Code	Select from the dropdown menu an Agency Exception Pay Code
Agency Rounding Code	Select from the dropdown menu an Agency Rounding Code
Agency Break Pay Code	Select from the dropdown menu an Agency Break Pay Code

3.21. Contract Hours

The Contract Hours screen is used for unrostered hours, to set the days of the week an employee is to work.

The screenshot displays the 'Contract Hours' configuration page within the WFM Admin Dashboard. The top navigation bar indicates the current company is 'Default Company'. The main content area is divided into two sections: 'Contract Hours' and 'Contracted Work Days'. The 'Contract Hours' section contains several dropdown menus for selecting values: 'Base/Contract Hours' (set to 39), 'Supplement Day', 'Payment Pay Code', 'Supplement(50%) Pay Code', 'Day Supplement Pay Code', and 'Advanced Payment Balance Code'. The 'Contracted Work Days' section features a grid of toggle switches for each day of the week (Monday through Sunday), with 'Monday' through 'Friday' currently enabled. An 'Allow Functionality' toggle switch is also present and enabled. The sidebar on the left provides quick access to various configuration options, with 'Contract Hours' highlighted.

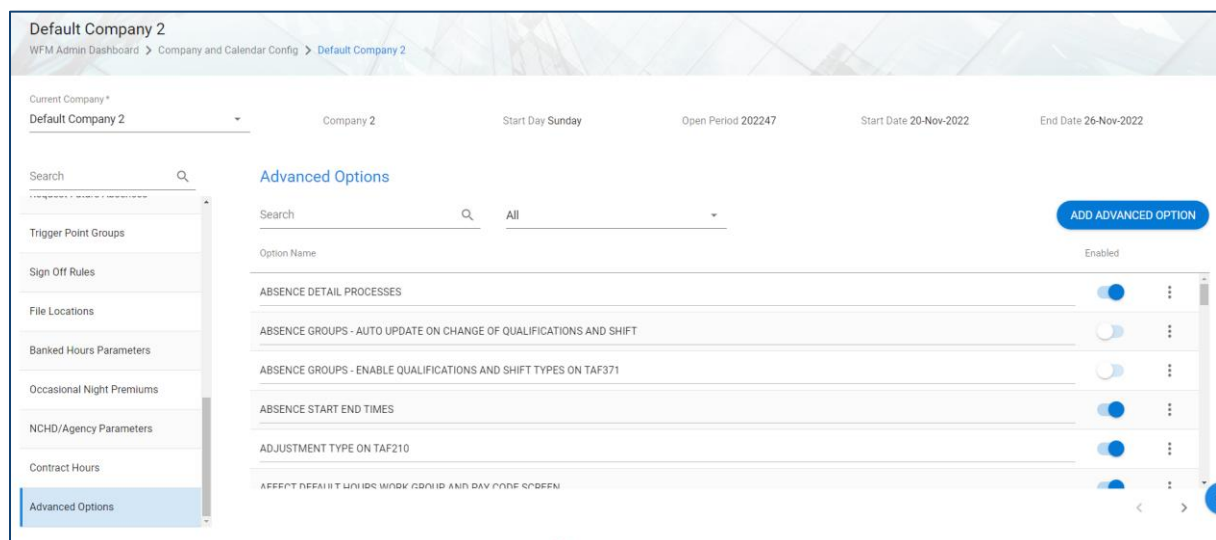

The *Contract Hours* screen contains the following fields:

Field	Details
Base/Contract Hours	This allows you to set the base hours for employees.
Supplement Day	Select the day on which the Supplement Day applied to
Payment Pay Code	Assign a payment pay code.
Supplement 50% Pay Code	Enter the supplement (50%) code
Day Supplement Pay Code	Enter the day supplement code
Advanced Payment Balance Code	Enter the advanced payment balance code

Field	Details
Allow Functionality	Once this toggle is enabled, you will be able to enable the functionality.
Enable Functionality	Once the toggle is enabled, you can edit and enable or disable each day.

3.22. Advanced Options

The Advanced Options screen holds a number of advanced configuration options that can be assigned.

From here you can:

- **Search** for a specific advanced option, using the search bar or filter.
- **Filter** the options to refine your view. Options available are: All, Enabled & Disabled.
- **Enable**, or turn off, an Advanced Option, using the Enabled toggle.
- **Delete** an Advanced Option, from the list.
- **Add** a new Advanced Option, to the list.

4. Menu Options

4.1. Importing Menu Options in Portal

A menu profile **WFM_COMPANY_SETTINGS_ADMIN** has been created to provide users full access to the Balance Configuration screens. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security*.
2. Select **Menu Profiles**.
3. Search for the relevant menu profile e.g., Coreportal_Admin.
4. Select **Import Menu Options** from the drop-down menu.
5. Select **From existing menu profile**.
6. Click **OK**
7. Search for **WFM_COMPANY_SETTINGS_ADMIN**
8. Click **OK** and you receive a confirmation message.

4.2. Menu Options

The following Menu Options can be used to customise access to the Company and Calendar Config screens as per your preference.

Menu Option	Menu ID	System
CorePortal - Administrator Dashboard Configuration	MAIN_MENU.DASHBOARDCONFIG	CorePortal
