1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use of and configure the *Cost of Roster* feature in *CoreHR*. This includes:

- What is *Cost of Roster*?
- How to use *Cost of Roster*
- How to configure *Cost of Roster*

1.2. Cost of Roster

1.2.1. Overview

The *Cost of Roster* functionality provides organisations with the ability to cost their *Roster* and compare it to *Budget*. This means that you can view real-time data regarding:

- Budget versus;
- Planned Costs versus;
- Actual Costs

This enables you to make better informed business decisions by keeping in line with team budgets. The budget information is presented on screen with the option to update on demand, as required.

In order to aid management, it provides:

- Roster managers with *Budget*, *Planned Costs*, and *Actual Costs* information, to help manage costs effectively.
- Administrators with the ability to cost other events, such as overtime.

The *Cost of Roster* functionality provides the ability to:

- Display and report on *Budget vs Planned vs Actual*
- Manage costs in values or hours
- Control what is visible to certain users
- Control what is visible per screen

1.2.2. Where is Cost of Roster displayed?

The *Cost of Roster* feature elements can be configured to display on multiple screens throughout *Roster*. These elements are listed below:

- Budget
- Planned Costs
- Actual Costs

Each screen and element are detailed on the below table. Note that it is not possible for *Budget* to be displayed on all screens. i.e. the *Approve Sign Off Hours* screen.

Cost Summary

2. How to Use Cost of Roster

2.1. Budget Summary

2.1.1. Budgets Explained

Budgets are used as a comparison for the *Planned* and *Actual Costs* i.e. The *Budget* highlights where the *Planned* and *Actual Costs* or hourly values are over, or under, the specified *Budget*.

Budgets can be managed and displayed in hours and/or values.

- Value and Hourly budgets support scheduled data loads
- Value and Hourly Budgets can be manually entered

For further information on entering Budgets into your system, view [3. How to Configure Budget Values](#).

Note: From V28, the system supports monetary and hourly values.

2.2. Where to Calculate Costs

It is possible to manually calculate costs from the following screens, via the **Actions** button:

- Roster Details (Week View)
- Roster Details (Day View)
- Uncovered Shifts
- Time Exceptions
- Approve Sign Off Hours

There is also a calculate costs job run nightly. This calculates both *Planned* and *Actual Costs*.

2.2.1. Planned Costs

Planned Costs for *Roster* calculates an accurate cost for a 'before the event' period based on the planned rosters. The feature allows organisations to accurately see what the planned costs are for a *Team Area* or sub teams.

The *Planned Costs* for *Roster* operates with the expectation that employees will clock exactly to their planned schedules, for example:

- Employees clock at the correct start time and correct end time of the day.
- Employees take the correct number of breaks.
- The system applies the premiums to payments.

The system then costs this data as if they have been passed through the *Generate Timesheet* step to payroll.

Note:

This functionality is available on all other screens.

To *Calculate Planned* from the *Roster Details* screen:

1. *Quick jump* to *Roster Details*.
 2. Navigate to the applicable week.
 3. Click the **Actions** button.
 4. Select **Calculate Planned**.
- **Calculate Planned**, availability is linked to system date. The Planned is only available where the Roster Week being viewed "end date" is greater than the system date.
 - **Calculate Actual**, availability is linked to system date. The Actual is only available where the Roster Week being viewed end date is less than or equal to the system date.

Roster V28: Cost of Roster - User Guide

Sys Date	Current Week	Planned Available	Actual Available
18/10/2019	14/10/19 to 20/10/19	Yes (20 th > 18 th)	Yes (14 th <= 18 th)

Costing Complete.

ACTIONS: WEEK, DAY

The *Last Calculated* time and date now display for the *Cost of Roster*. This time and date relate to:

- The nightly job last completed, OR
- The manual run last completed for the *Team Area*.

2.2.2. Actual Costs

Actual Costs for *Roster* calculates the cost for a 'after the event' period based on the actual roster worked by employees. The feature allows organisations to accurately see what the actual costs were for a *Team Area* or sub teams. This helps you see what the Team Area actually costed for the period and compare the data against the *Budget* and *Planned Costs*.

The *Actual Costs* for *Roster* operates by calculating the employees exact clockings, for the period past, for example:

- Employee's clocked start time and end time of the day.
- Employee's number of breaks.
- Premiums to payments.

Note:

This functionality is available on all other screens.

To *Calculate Actual* from the *Roster Details* screen:

- Quick jump to *Roster Details*.
- Navigate to the applicable week.
- Click the **Actions** button.
- Select **Calculate Actual**.

2.3. Cost Summary

2.3.1. Overview

The *Cost Summary* screen gives you an overview of your *Budget* versus *Planned* versus *Actuals* Costs. Here you can view the overall *Budget*, *Planned*, and *Actual* Costs for a *Team Area*, and its sub *Team Areas*.

Note:

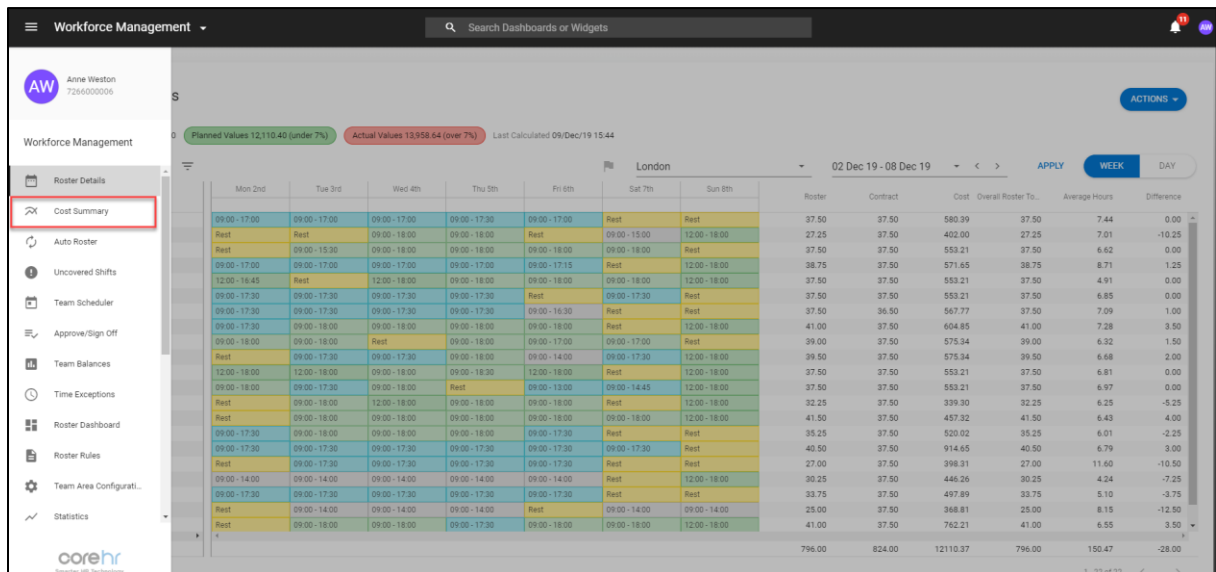

The system automatically rolls out view to the highest level. Budget values should be held at the relevant level to be decided by the company

2.3.2. Accessing the Screen

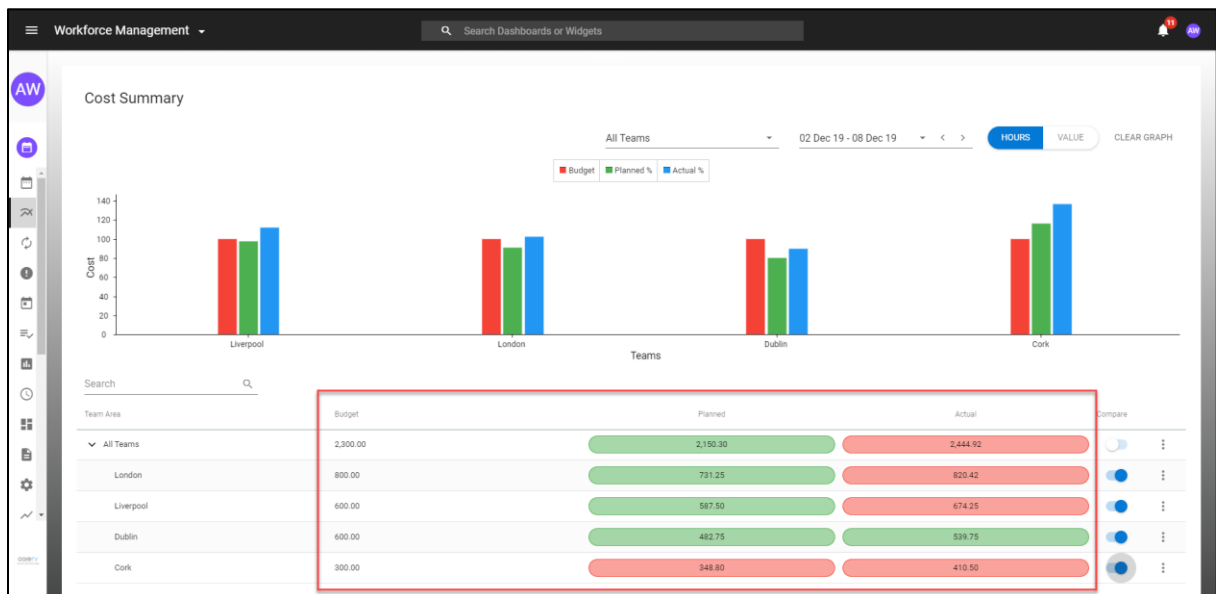

To access the *Cost Summary* screen:

1. Quick jump to the *Workforce Management* dashboard.
2. Select **Cost Summary**.

Roster V28: Cost of Roster - User Guide

The *Cost Summary* screen displays. An example of this screen is shown in the below screenshot.

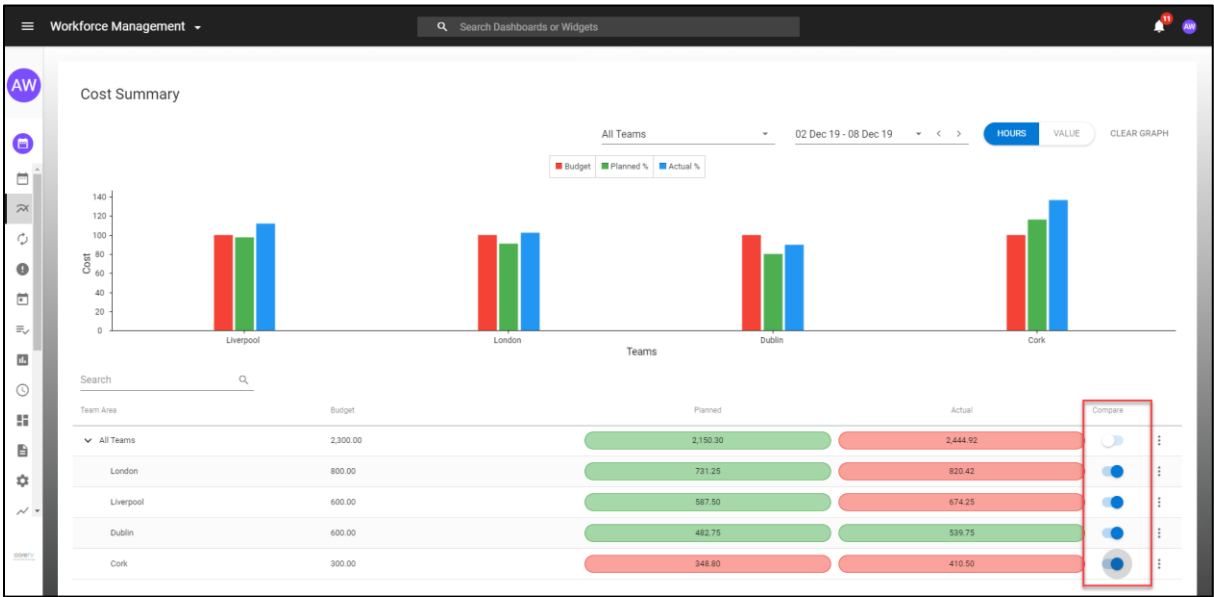

2.3.3. Compare

If required (possibly for area managers), it is possible to review a graphical representation of the *Budget*, *Planned*, and *Actual* Costs for each *Team Area*, and/or sub *Team Area*. This graph helps to compare how each *Team Area* and/or sub *Team Area* is performing.

Roster V28: Cost of Roster - User Guide

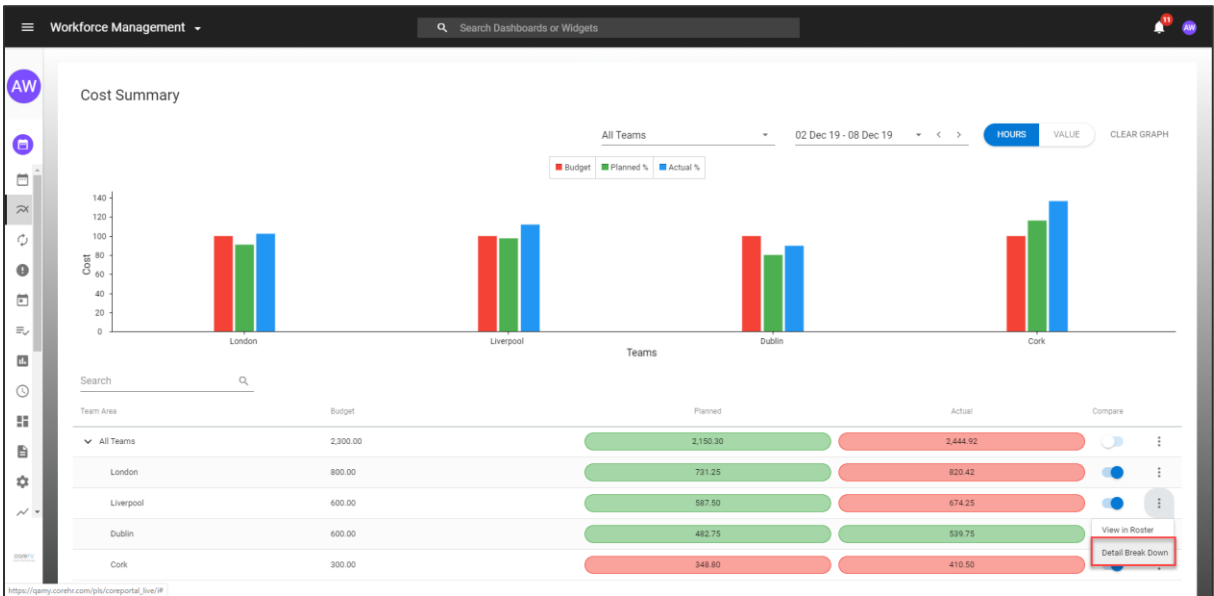

The graph is enabled on screen by switching on the Compare toggle for each applicable Team Area. Each team that the Compare toggle is enabled for, displays on the graph.

2.3.4. Detail Break Down

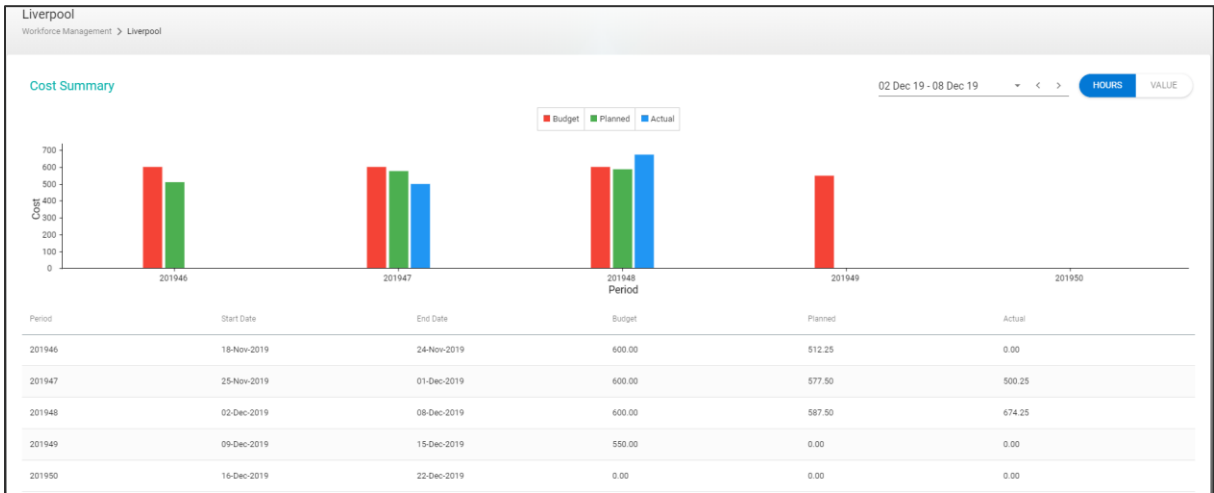

To view a breakdown of detail for each *Team Area* and/or sub-Team Area:

- 1. Click the  button, on the applicable *Team Area*.
- 2. Select **Detail Break Down**.

Note: It is also possible to view the Roster Details screen by selecting **View in Roster**.

On this screen, you can see the *Budget, Planned* and *Actual Hours/Values* per period, for the *Team Area*.

3. How to Configure Budget Values

3.1. Budget

3.1.1. Budget Uploads – Hours & Values

Once the *Budget* type is specified, the values identified, feed to both the *Roster Transaction* table and the *Budget* Table for the *Team Area* and the applicable dates.

- Multiple *Team Areas* can be loaded in the same file, for the same date, where there is no start time and end times specified against the transactions/records.
- Budget Values are monetary.
- Start times and end times are not required on the interface as the *Budget* is held at a daily level. This is controlled by the *Disregard Start times / end times* indicator on the *Interface Types* screen.
- Budgets held at a daily level. However, it is also possible to load a weekly level file by using the last day of week.

Budget entries can be completed, as follows:

- [Entered manually via the *Interface Values* screen.](#)
- [Uploaded manually via *People Hub*, **or** automatically \(loaded through scheduled jobs\).](#)

Budget supports the upload and management of Hours & Values. This means there are two *Interface Types* that must be created:

- Hours Budget
- Value Budget

Interface Types
Administrator Dashboard > [Interface Types](#)

[ADD](#)

Code	Description	Predict Future Values	Check Last Years Data	Disregard Start/End Time	Operational Times	
BUD	Budget	☒	☒	☒	☐	DELETE

3.1.2. Budget Entry – Interface Type Configuration

Budgets that are displayed on the *Roster* screens must be configured as an *Interface Type*. To configure Budgets for Hours/Values:

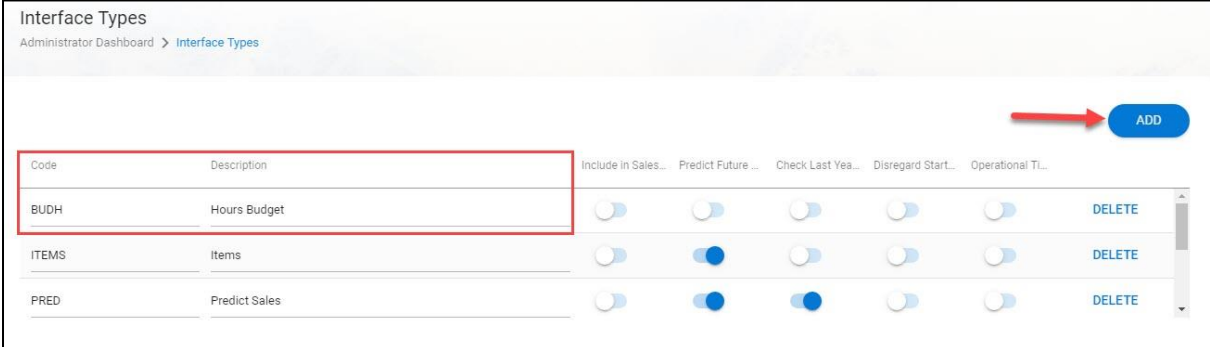

1. *Quick jump to Roster Links.*
2. Click **Open** *Interface Types*.

Create the Budgets Hours & Value Interface Types

1. Select the **Add** button to create a new row on screen.
2. Enter the *Code* and *Description* to represent the *Budget Hours* Interface Type.

In this example, you can see 'BUDH' Code and 'Hours Budget' description is entered, to create the 'Hours Budget' *Interface Type*.

Code	Description	Include in Sales...	Predict Future ...	Check Last Yea...	Disregard Start...	Operational TL...	
BUDH	Hours Budget	☐	☐	☐	☐	☐	DELETE
ITEMS	Items	☐	☒	☐	☐	☐	DELETE
PRED	Predict Sales	☐	☒	☒	☐	☐	DELETE

3. For Budget *Interface Types*, the following on screen indicator should be switched on:
 - Disregard Start/End Times
4. Within the *Assign Types* section, select the *Interface Type* from the *Budget Hours* drop-down list.

In this example, you can see the 'Hours Budget' *Interface Type*, that has just been created, is selected.
5. Click **Save**.

Interface Types
Administrator Dashboard > [Interface Types](#)

[ADD](#)

Code	Description	Include in Sales...	Predict Future ...	Check Last Yea...	Disregard Start...	Operational TI...	
BUDH	Hours Budget	☒	☒	☒	☒	☒	DELETE
ITEMS	Items	☐	☒	☐	☐	☐	DELETE
PRED	Predict Sales	☐	☒	☒	☐	☐	DELETE

Assign Types

BUDV	Value Budget	☒	☒	☒	☒	☒	DELETE

Assign Types

Predict Type: [Transactions](#) Unit Type: [Items](#) Transaction Type: [Transactions](#) Sales Type: [Sales](#)

Budget Value: [Value Budget](#) [Hours Budget](#) Sales Mix Type: [Sales](#)

Interface Rounding: [2](#) ASP/ATV Rounding: [2](#) Restrict Edit: ☐

[SAVE](#)

Once the *Budget Interface Types* are identified, the *Budget Values/Hours* can then be manually, or automatically, interfaced to both the *Roster Transaction* and *Budget* tables. These budgets are loaded at *Team Area* level.

Once interfaced the budget values then display when reviewing the *Budget* versus *Planned* versus *Actual* elements on the screens listed below, per *Team Area*:

- Roster Details Day View
- Roster Details Week View
- Time Exceptions
- Uncovered Shifts

Each of the above screens is detailed in the [1.2.2. Where is Cost of Roster](#) displayed section.

3.1.3. Manually Load Budget Values/Hours via People Hub

Budget Hours/Values Interface File Layout

If you are loading *Budget* as one of the *Interface Type* files into the system, this loads the data straight through to the both the *Roster Transaction* table and the *Budget* table. The *Budget* type you are loading is defined by the *Trans Type* specified on the interface file.

The following table lists the file layout required to upload *Budget* data to *Roster*.

Position	Field	Size	Format	Required Optional	Comment
1	Team area	6	Alphanumeric	Required	Must be a valid <i>Team Area</i> code.
2	Type	8	Alphanumeric	Required	This identifies the <i>Budget</i> type being transferred, for example the <i>Code</i> from <i>Interface Type</i> that represents the Budget Hours or Values: • BUDH: For Hours Budget • BUDV: For Value Budget
3	Date	8	YYYYMMDD	Required	Date Format YYYYMMDD, for example: '20190714'

Position	Field	Size	Format	Required Optional	Comment
4	Start Time	5	HH:MM	Optional*	Should be blank for Budgets
5	End Time	5	HH:MM	Optional*	Should be blank for Budgets
6	Value	9	Numeric	Required	Numeric e.g. 999999.99

The below *Table Format* and *Comma Separated Format* example shows a file to be loaded for:

- London Team Area
- Value Budget type

Table Format

Team Code	Trans Type	Date	Start Time	End Time	Value
LON	BUDV	20190711			10000
LON	BUDV	20190712			12000
LON	BUDV	20190713			13000
LON	BUDV	20190714			11000
LON	BUDV	20190715			14000

Comma Separated Format

```
LON,BUDV,20190711,,,10000,
LON,BUDV,20190712,,,12000,
LON,BUDV,20190713,,,13000,
LON,BUDV,20190714,,,11000,
LON,BUDV,20190715,,,14000,
```

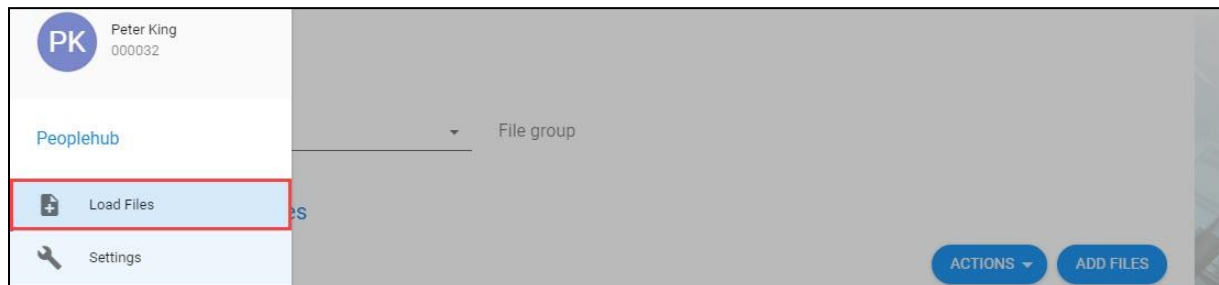

Note:

- The final list of *Interface Types* for data upload are to be agreed with your CoreHR project team, as part of the implementation phase.
- It is mandatory that the reference data, such as *Team Area* and *Interface Type Code*, match existing *CoreHR* code structures.
- For **manual** interfacing, the filename must contain a set **prefix** followed by an underscore and the *Pay Group Code*. There must be an underscore after the *Pay Group Code*. For example, *Pay Group* = *Monthly Pay* and it's *Pay Group Code* = 1280.
 - ROST_1280_.DAT
- For full information on *Roster Interface Files* configuration, view the training material on *CoreHR University*.

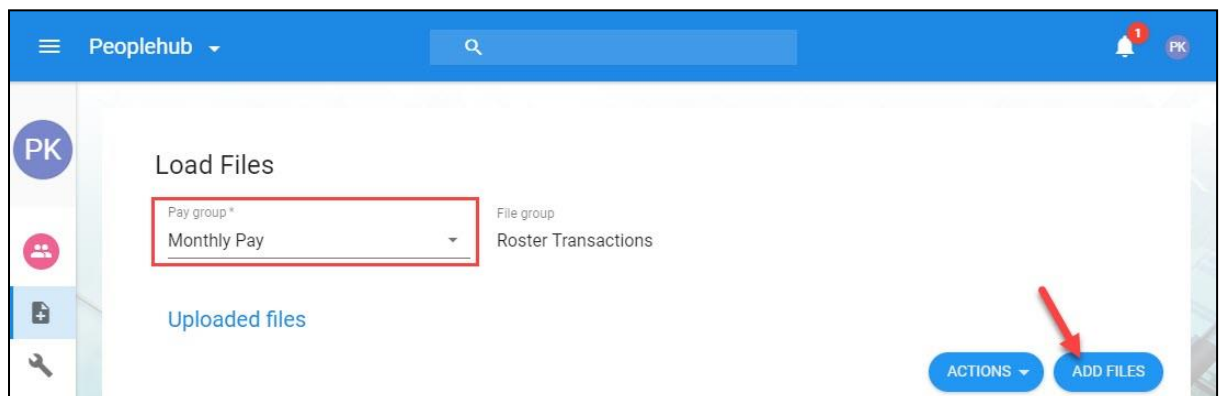

Budget Hours/Values Interface File Load via People Hub

To load a budget via the *Roster Interface* file:

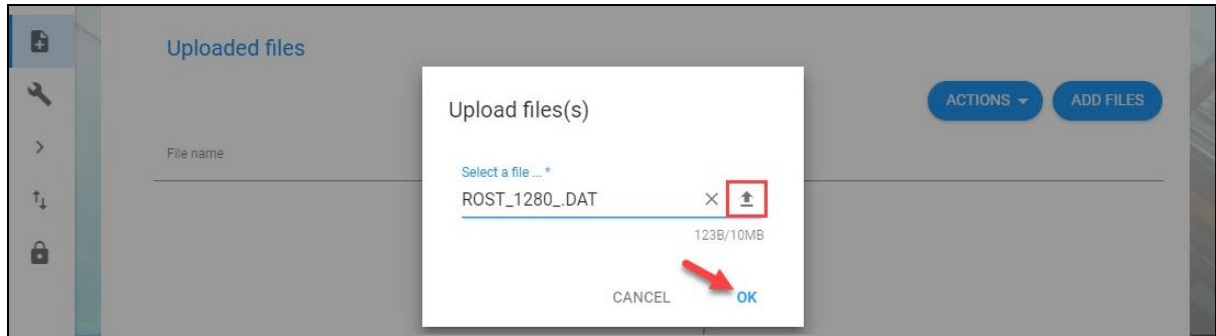

1. *Quick Jump to People Hub.*
2. Select **Load Files**.

3. Select the applicable *Pay Group* from the drop-down list.
4. Click **Add Files**.

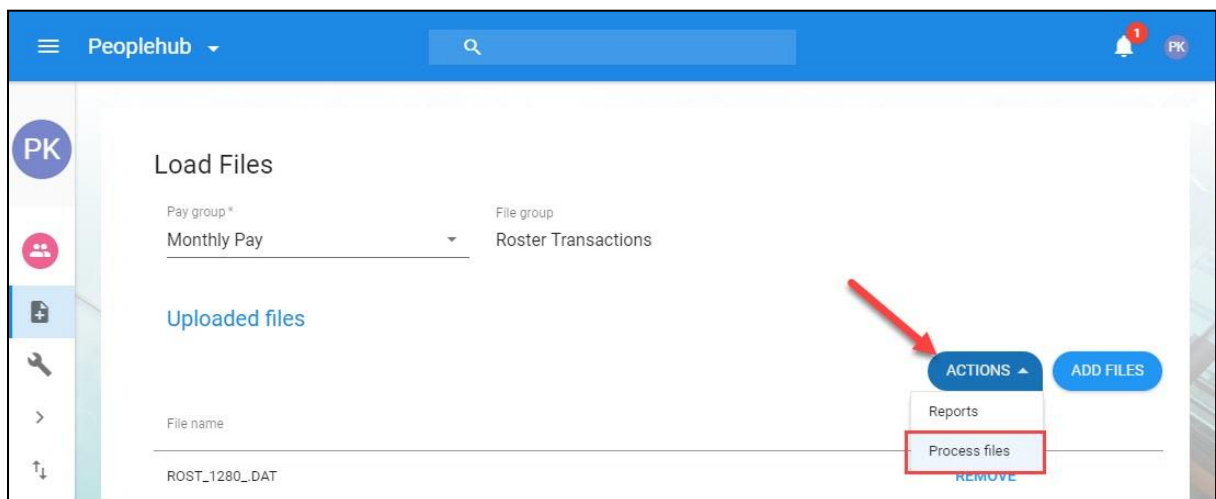

5. Upload the applicable file.
6. Click **OK**.

The file is now uploaded to the system.

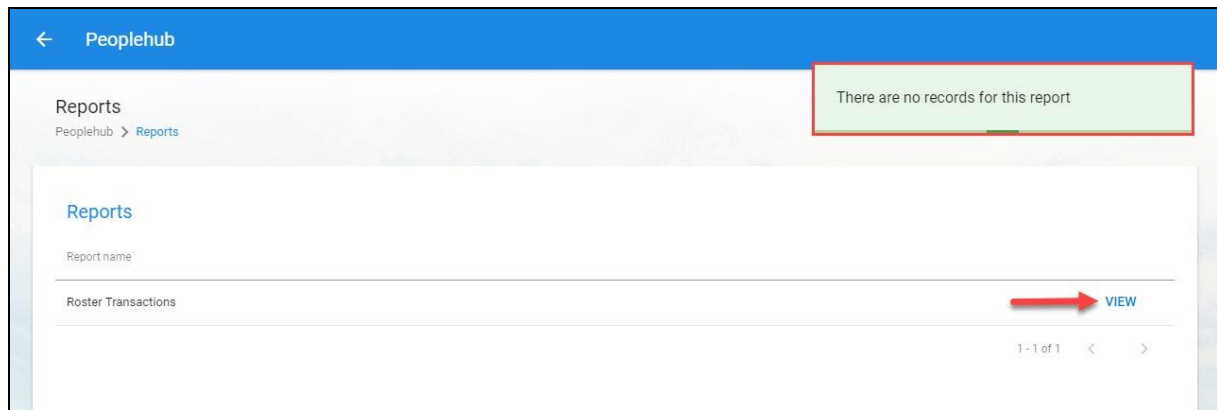

7. Next, click **Actions**.
8. Select **Process Files**.

The *Reports* screen displays.

9. Click **View**.

The below screenshot shows a message showing the report has no errors.

The *Budget* values are now present on the system and *Interface Values* screen.

Interface Values								
Daily Interface Types								
Type	Mon 15-Jul	Tue 16-Jul	Wed 17-Jul	Thu 18-Jul	Fri 19-Jul	Sat 20-Jul	Sun 21-Jul	Total
Daily Interface Breakdown								
Team Area	Date	Start Time	End Time	Pattern	Type	Value		
London	17-Jul-2019				Value Budget	13000		DELETE
London	16-Jul-2019				Value Budget	12000		DELETE
London	15-Jul-2019				Value Budget	10000		DELETE

! Note:

- For scheduled interfacing (automatic uploading), the filename must contain a set prefix followed by an underscore and description. For example:
 - WFM_BUDGET20190404
 - ROS_BUDGET20170702
- For further details for loading Budgets via the *Roster Interface Files* automatically, view the training material on *CoreHR University*.

3.1.4. Enter Budget Hours/Values

Manually Enter Budget Hours/Values

Roster Budgets are assigned per *Team Area*. To manually enter *Budget Hours/Values*:

1. *Quick jump* to *Interface Values*.
2. Click **Add**, in the *Daily Interface Breakdown* section.

This creates a new row on screen.

3. Enter the required:
 - Team Area
 - Date
 - Type i.e. *Hours Budget* or *Value Budget*
 - Value
4. Click **Save**.

Daily Interface Breakdown

Team Area	Date	Start Time	End Time	Pattern	Type	Value
London	11-Jul-2019				Value Budget	10000

ADD

DELETE

SAVE

Repeat this process for each day of the period required. An example of this is shown in the below screenshot.

Note:

- The *Budget* values can be loaded into any date within the period. However, if representing a weekly *Budget* value, it is recommended to use the *Start Date of the period*
 - The other dates within the period should be left blank.
- The maximum value allowed for budget is 14 digits per *Team Area* i.e. 999999999999.99

- If viewing *Rolled-Up Team* views, the system hashes the output, if the rolled-up figures exceed the above figure.
- When the system holds the values at day level the recommendation is that there should be one value per week.

4. How to Configure Cost of Roster

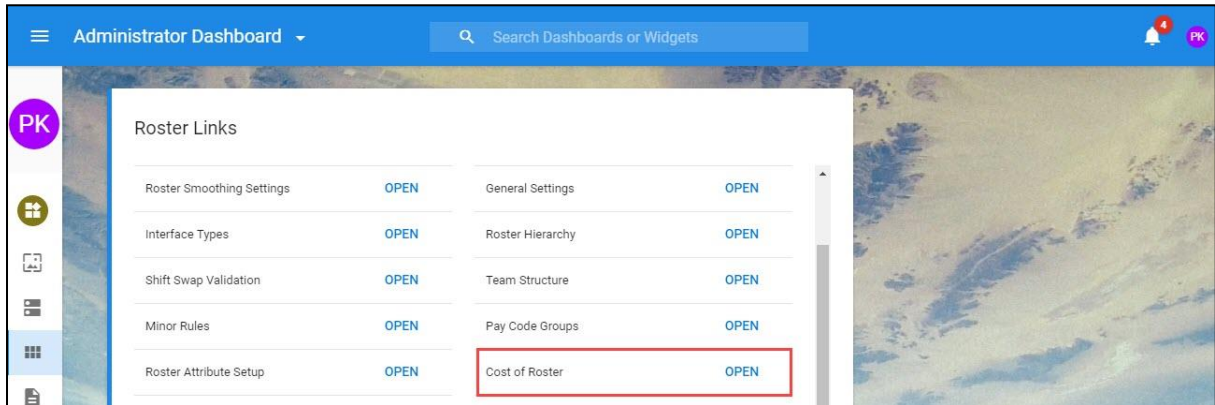

4.1. Roster Links – Accessing Cost of Roster Settings

This section covers the configuration to switch on/off the *Cost of Roster* feature. It details what values are displayed on screen, and what is available for you to see. To access the Cost of Roster configuration screens:

1. *Quick jump to Roster Links.*

2. Click **Open** *Cost of Roster*.

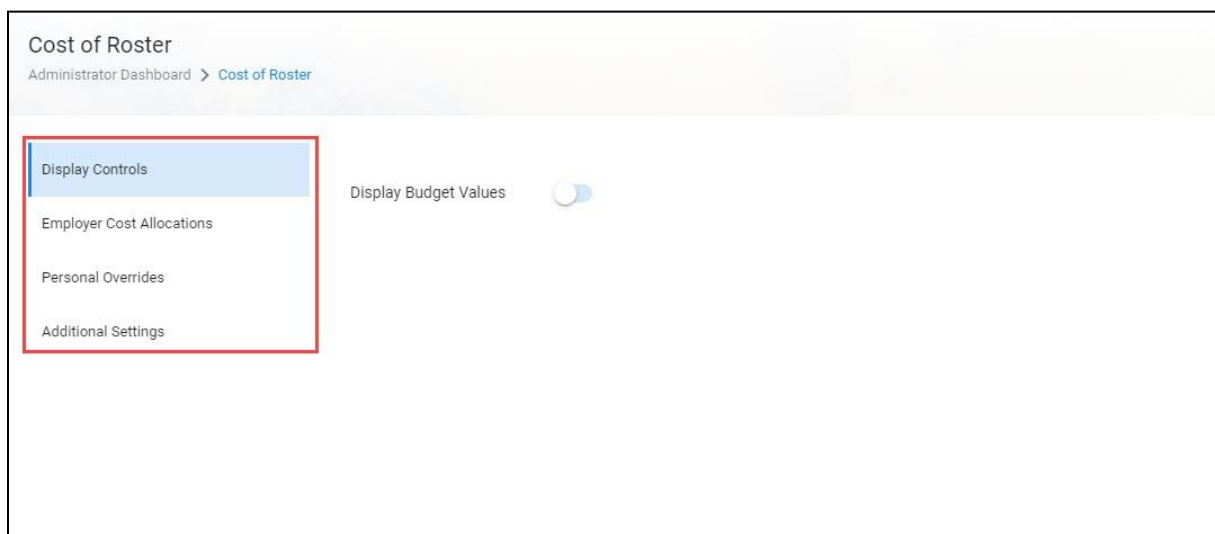

4.2. Turn on Cost of Roster Configuration

To make the most of roster configuration, the following menu needs to be added.

costing summary conf		SEARCH	SELECTED SYSTEMS
Menu Option		System	Enabled
Costing Summary Configuration		CorePortal	☒
Costing Summary Configuration		149486202	

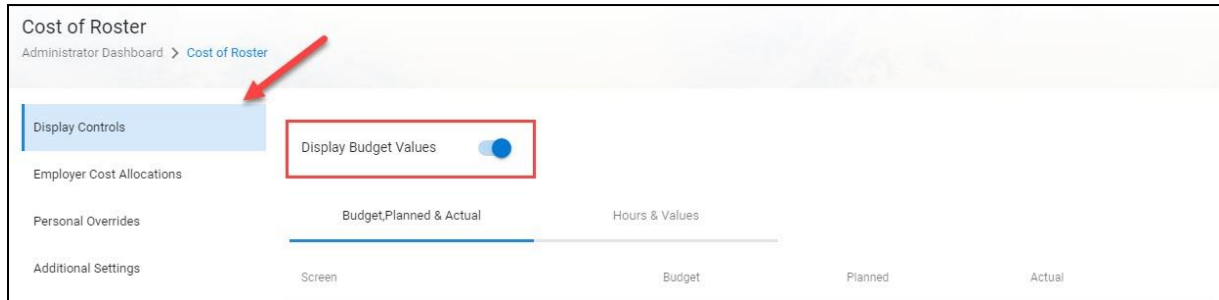

The *Cost of Roster* screen displays. Here there are 4 steps of configuration. These are covered in the following sections of this document.

4.3. Display Controls

To configure the *Budget Values*:

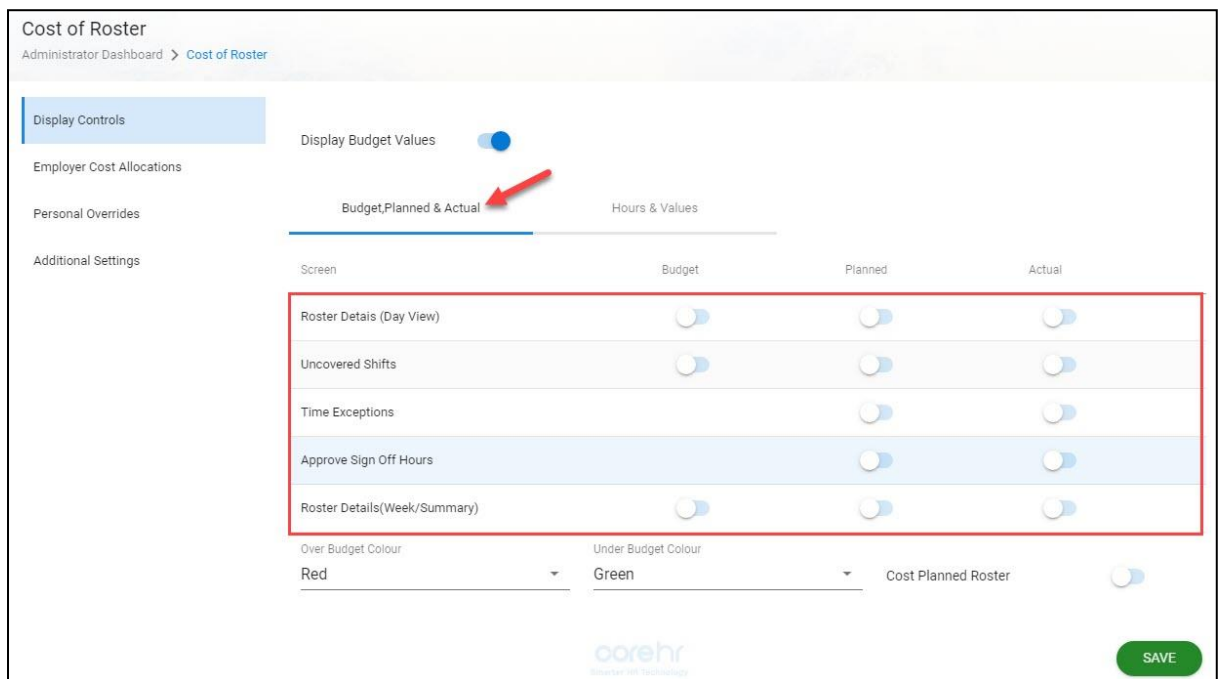

1. Click the **Display Controls** tab.
2. Switch **On** the *Display Budget Values* indicator.
 - If this indicator is **Off**: *Cost of Roster* is disabled i.e. The system does not display or calculate any costing details within Roster.
 - If this indicator is **On**: *Cost of Roster* is enabled and you can complete configuration to support:
 - What screens values displayed on.
 - What values or hours you can see on screens.

3. Click the **Budget, Planned & Actual** tab.

This controls the screens where the *Cost of Roster* values are displayed. Here you can see a list of all screens where *Budget*, *Planned*, and *Actuals* values can be displayed.

Each individual *Cost of Roster Value* can be controlled per screen.

4. Switch **On** each *Cost of Roster Value* that you required to display on the applicable screen.

In this example, you can see that all possible *Cost of Roster Values* are switched on for each screen below:

- Roster Details (Week View)
- Roster Details (Days View)
- Uncovered Shifts
- Time Exceptions

- Approve Sign Off Hours

Screen	Budget	Planned	Actual
Roster Details (Day View)	☒	☒	☒
Uncovered Shifts	☒	☒	☒
Time Exceptions	☒	☒	☒
Approve Sign Off Hours	☒	☒	☒
Roster Details(Week/Summary)	☒	☒	☒

5. Select the *Over Budget Colour* from the drop-down list.

This is the colour to highlight where the budget values are over the allowed values.

6. Select the *Under Budget Colour* from the drop-down list.

This is the colour to highlight where the budget values are under the allowed values.

7. Switch **On** the *Cost Planned Roster* indicator.

This allows you to calculate *Planned* and *Actual Costs* on demand, from the **Actions** button.

- When viewing a future period *Rosters*, the **Calculate Planned** button is available.
- When viewing the current or previous period *Rosters*, the **Calculate Actual** button is available.

Screen	Budget	Planned	Actual
Roster Details (Day View)	☒	☒	☒
Uncovered Shifts	☒	☒	☒
Time Exceptions	☒	☒	☒
Approve Sign Off Hours	☒	☒	☒
Roster Details(Week/Summary)	☒	☒	☒

Over Budget Colour: Red Under Budget Colour: Green Cost Planned Roster: ☒

8. Next, click the **Hours & Values** tab

This screen allows you to control what *Cost of Roster Values* are displayed, on screen, to team managers.

9. Click **Add**.

The *Add New Users* pop-up displays.

10. Select a *Manager* from the drop-down list.

The individual manager usernames and **Add All Managers** list is a combined list of all users that meet the following criteria.

- *Team Area* access assigned.
- *Approve/Sign Off Org* Role and Group assigned.
- *Time Exceptions Org* Role and Group assigned

The reason for the above criteria, is that the *Cost of Roster* values can be displayed on both *WFM Time* and *Roster* screens, that currently have different user security criteria.

11. Select the *Cost to Display* from the drop-down list.

The cost display formats available to select from are:

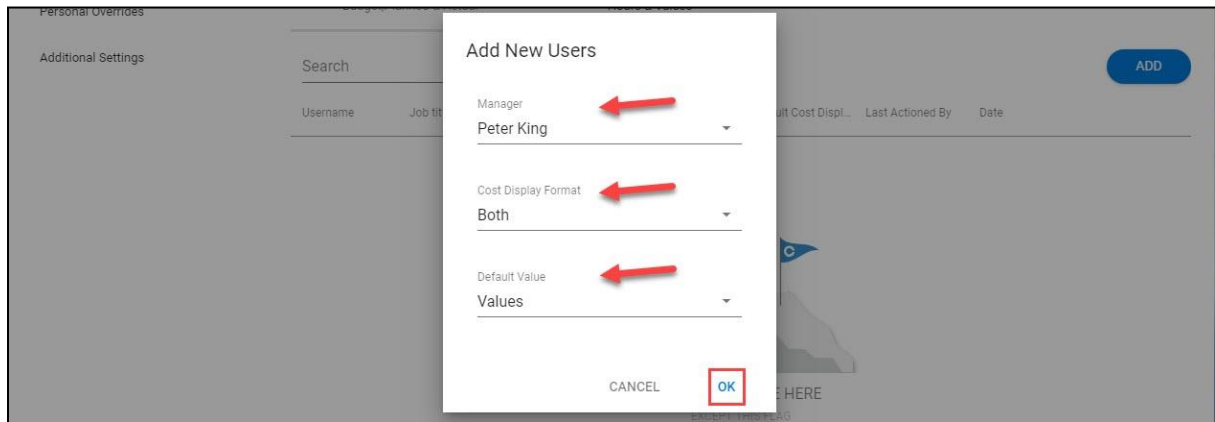

- None: No costs are displayed for the user.
- Hours: Hourly costs are only available to the user.
- Values: Value costs are only available to the user.
- Both: The user can toggle between hour and value costs.

12. Select the *Default Value* from the drop-down list.

This drop-down list is only available when the **Both** *Cost Display Format* option is selected. On first entry to *Roster* screens, displaying *Cost of Roster Values*, this selection is defaulted. You can then adjust this default from the *Actions* button on screen.

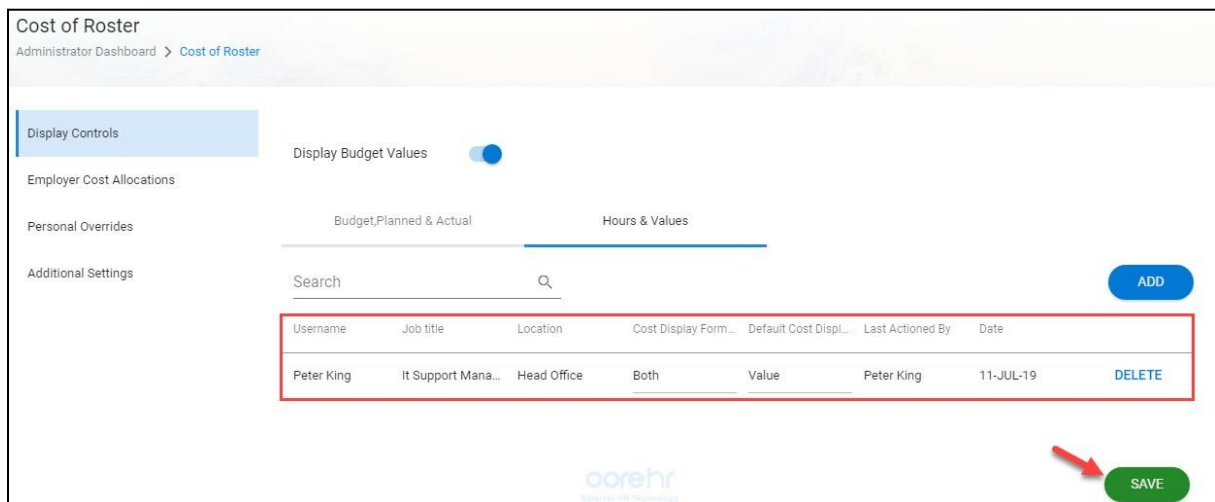

- When you change your selection from any of the *Roster* screens, your last selection becomes the default.

13. Click **OK**.

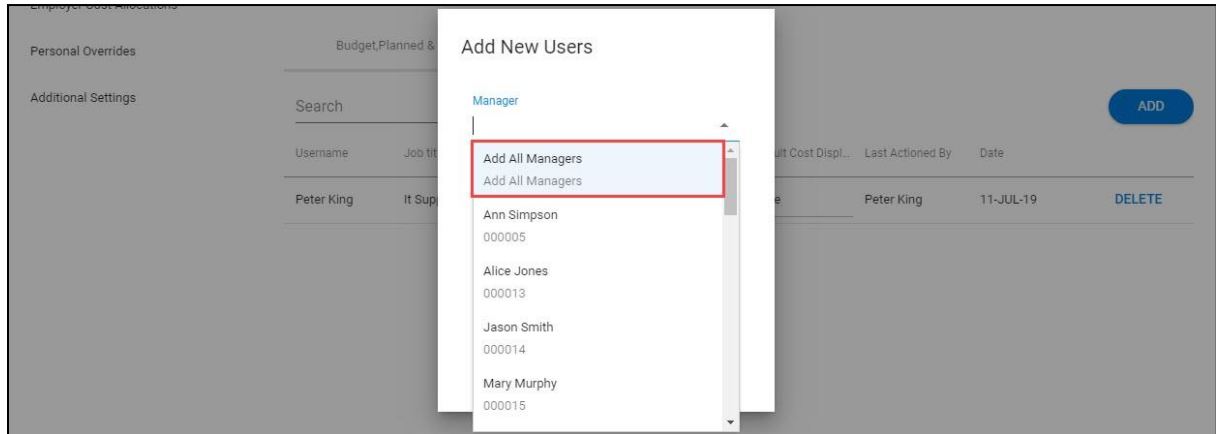

In this example, the manager can now view *Cost of Roster Values* on the *Roster* screens.

14. Click **Save**.

Username	Job title	Location	Cost Display Form...	Default Cost Displ...	Last Actioned By	Date	
Peter King	It Support Mana...	Head Office	Both	Value	Peter King	11-JUL-19	DELETE

Repeat this process for all individual managers who require access to view *Cost of Roster Values* on *Roster* screens. Or select the **Add All Managers** option to provide access to all managers who meet the criteria detailed in step 10 above.

4.4. Employer Cost Allocations

This section provides steps to create an *Employer Cost Grouping* for Roster. *Employer Cost Groupings* are created to represent the additional employer costs that contribute towards planned and actual costs, that are displayed in addition of the employee costs. For example:

- PRSI 10.75% IRL Staff
- NI 13.80% & for UK Staff

Example in Value (Monetary) values

If an employee's hourly rate is 10 €/£ per hour, and they worked 8.00 hours, this = 80.00 €/£.

- The employer costing is 10.75%. Therefore, the employer costs are an additional 8.60.
- The total employee cost to the organisation (employee + employer) is then 86.60.

Example in Hourly values

If an employee's hours worked is 8.00 hours.

- The employer costing is 10.75%. Therefore, the employer costs in addition would be 0.86 hours.
- The total employee hours cost to the organisation (employer + employee) is then 8.86.

Note:

As part of configuration, the *Pay Code* multiplier can impact the hourly value if required. For example:

- 8.00 hours at double time, can be calculated as 8.00 or 16.00 hours.

4.4.1. Costing Types

Costing Types are codes and descriptions used to represent a breakdown of the Employer Costings types, for example:

- Pension
- NI
- PRSI, etc.

These individual *Costing Types* are then assigned a *Cost Percentage*, that are rolled up, to give the overall *Costing Percentage*.

- Each individual *Costing Type* is stored separately on the *Planned* and *Cost* underlying tables. Therefore, through reporting, the overall cost on Employer Pension contributions can be listed separately from NI charges.
- Each individual *Costing Type* supports *Date Effective* changes, for example, a *Cost Type* may be increasing from 4% to 6% on the 10-Dec-2019.

It is recommended to create an individual *Costing Type* per employer costing. This means that each individual employer costing can then be changed by a date effective, as required, going forward.

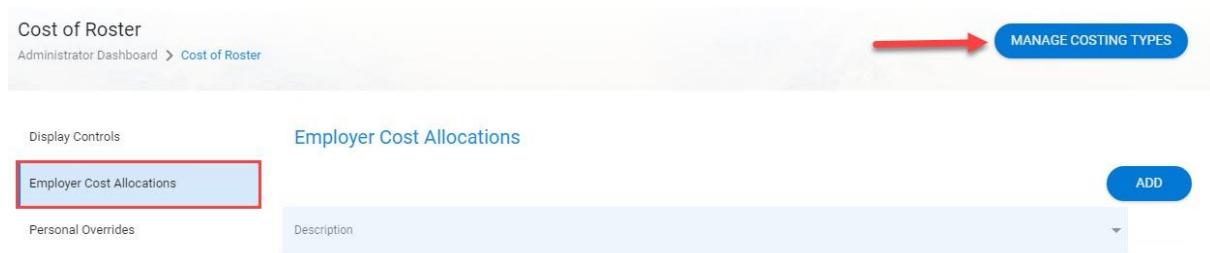

For example, if employer costs are NI and Pensions, you should create two *Costing Types*:

- One for NI
- One for Pensions

This is recommended, as the *Percentage Costing* assignment is date effective, to support individual changes and NI contributions may increase or decrease, without impacting the Pension contributions.

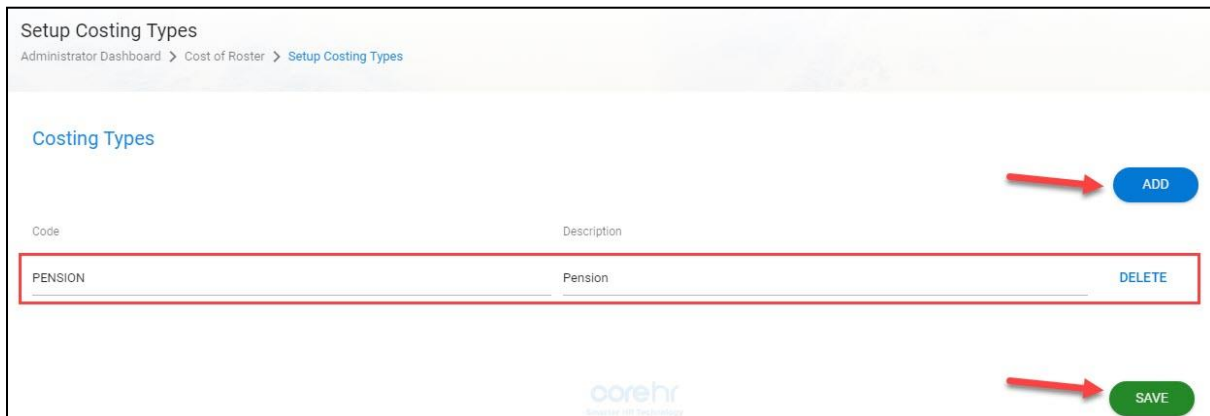

To create/maintain Employer Costing Types:

1. Click the **Employer Cost Allocations** tab, on the *Cost of Roster* screen. Click the Manage Costing Types button.

The *Setup Costing Types* screen displays any existing allocation types that have been previously configured To Create a new employer costing type

1. Click **Add**.
2. Enter the *Code*.
3. Enter the *Description*.
4. Click **Save**.

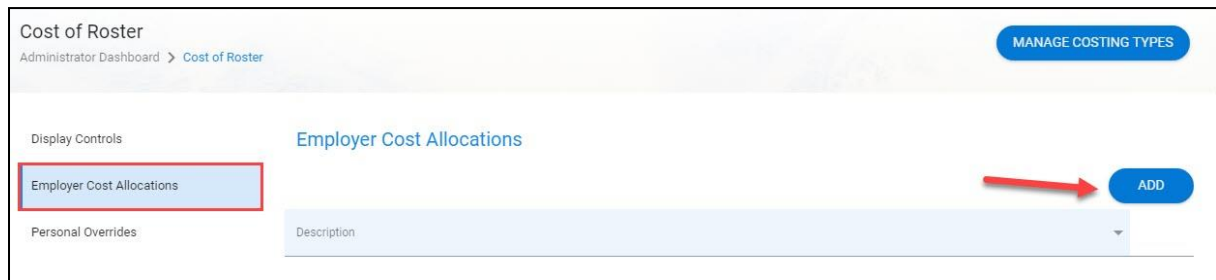

The 'Pension' *Costing Type* is now added to the system.

4.4.2. **Create a New Employer Cost Allocation Grouping**

To create a new *Employer Cost Allocation grouping*:

1. Click the **Employee Employer Cost Allocations** tab, on the *Cost of Roster* screen.
2. Click **Add**.

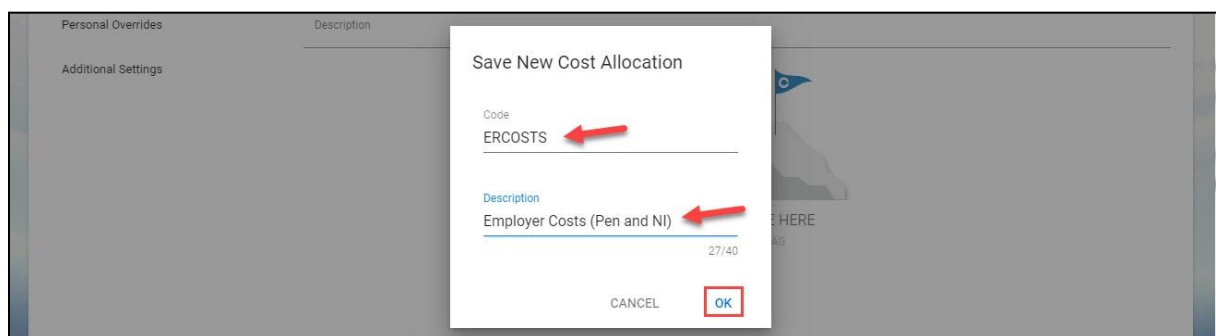

3. Enter the *Code*.

4. Enter the *Description*.

The *Code* and *Description* should be as meaningful as possible, to represent the *Employer Cost grouping* that is being create. For example, 'UK Staff (NI and Pension)'. The Grouping is the collective name to represent employer cost for a category of staff e.g. All Staff, UK or Ireland, Permanent or Temporary

5. Click **OK**.

The new *Employer Cost Allocations* group is now created.

6. Next, click the  button.

7. Select **View**.

The screenshot shows the 'Cost of Roster' page. On the left, there's a sidebar with 'Display Controls' and 'Employer Cost Allocations' selected. The main area is titled 'Employer Cost Allocations' and has an 'ADD' button. Below this, there's a table with one entry: 'Employer Costs (Pen and NI)'. A red arrow points to a menu icon (three dots) next to this entry, which has opened a dropdown menu with 'View' and 'Remove' options.

The Employer Cost Allocations group screen displays, in this example it is called 'Employer Costs (Pen and NI)'. Here you add an *Employer Group Costing*.

8. Click **Add**.

The screenshot shows the 'Employer Costs (Pen and NI)' screen. It has a search bar and a table with columns: 'Date Effective', 'Total Employer Costs', 'Updated By', and 'Date Updated'. The table is empty, showing 'NOTHING TO SEE HERE'. A red arrow points to an 'ADD' button in the top right corner.

The *Add Costs Allocations* screen displays.

9. Enter the Date Effective

This indicates when the Employer Costing Allocation is applied.

10. Select the **Add** button to enter the CoreHR entity(s), used to define staff.

This is the group that the *Employer Costing Allocation* applies, e.g 'Pay Groups, Division etc...!.

The screenshot shows the 'Add Cost Allocations' screen. It has a breadcrumb trail: 'Administrator Dashboard > Cost of Roster > Employer Costs (Pen and NI) > Add Cost Allocations'. There are two tabs: 'Entity Assignment' and 'Percentages'. The 'Date Effective' field is set to '12-Jul-2019'. A red arrow points to an 'ADD' button in the bottom right corner.

11. Select the *Entity* type from the drop-down list, to define the staff that the *Employer Costing Allocation* is allocated to.

For example, UK and IRL staff may have different rates for NI or PRSI, therefore separate entities maybe required to represent the different employer rates. This is the valid list of *Entity* types:

- Organisation
- Pay Group
- Work Group
- Department
- Cost Centre
- Project
- Post Title
- Location
- User Field 1 to User Field 5
- Employee Status
- Sub Status
- Division
- Management Unit
- Category
- Sub Category

12. Enter the *Selection* criteria.

This is the list of valid system values for the entity selected. For example, if the 'Employee Status' *Entity* is selected, the *Selection* criteria is the actual types of 'Employee Status' within the system e.g. Permanent, Temporary.

In this example, 'Employee Status' is selected as the *Entity* type. This *Employer Cost Allocation* is allocated to 'Permanent' employees only.

The screenshot shows a web form titled 'Cost Allocation'. At the top, there are two fields: 'Employer Costs (Pen and NI)' and 'Date Effective' with the value '12-Jul-2019'. Below these are two tabs: 'Entity Assignment' (active) and 'Percentages'. Under the 'Entity Assignment' tab, there is a search bar with a magnifying glass icon. Below the search bar, there are two columns: 'Entity' and 'Selection'. The 'Entity' column contains the text 'Employee Status' and the 'Selection' column contains the text 'Permanent'. To the right of the 'Entity' column, there is a blue 'ADD' button. To the right of the 'Selection' column, there is a blue 'DELETE' button. The entire form is enclosed in a black border.

13. Next, click the **Percentage** tab.

This is where you enter the employer costing breakdowns.

14. Click **Add**.

15. Select the *Costing Type*, from the *Description* drop-down list.

In this example, the 'Pension' *Costing Type* created earlier in this document, is selected.

Note:

Combinations of the entities available can be used to identify the category of Staff. For example, Pay Group & Category or Location, Employee type and Division.

16. Enter the *Percentage* value for the *Cost Allocation Type*.

17. Click Save.

This creates a new *Employer Cost Allocation* for *Roster Budget Costings*.

Employer Cost Allocations

Description

Employer Costs (Pen and NI)

ADD

View

Remove

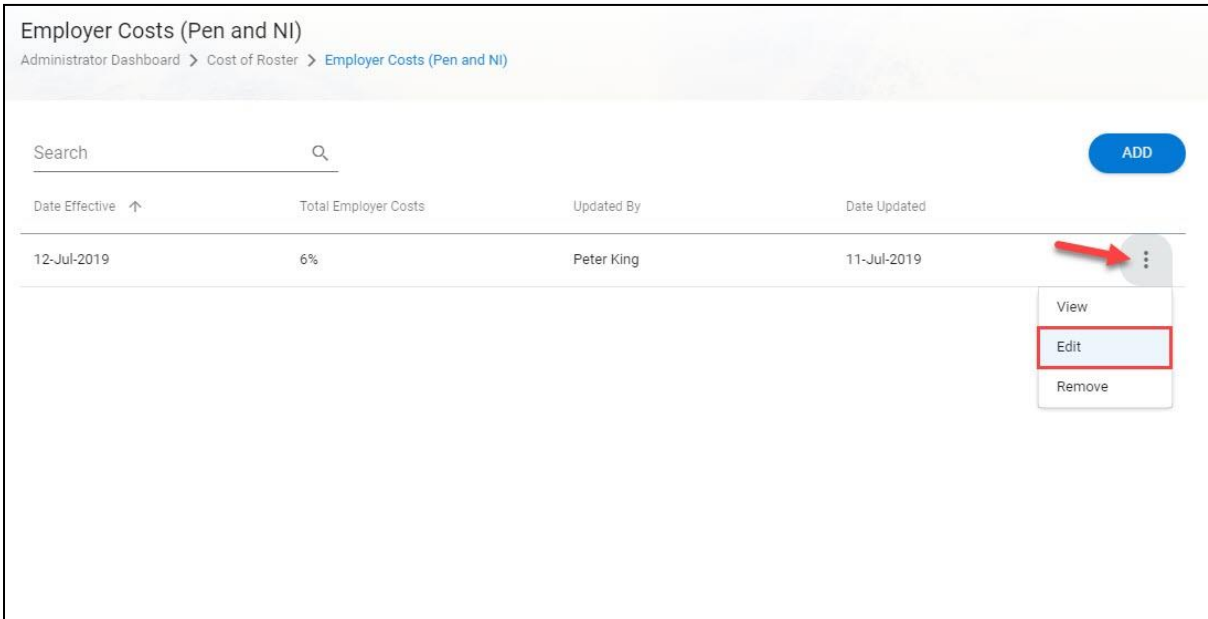

Any previous *Date Effective*, details entered, are displayed in descending order, on screen.

The details listed are as follows:

- Date Effective (most recent first).
- Total of the Employer Costs i.e. the sum of the individual costs (NI, Pension, etc).
- Updated By i.e. the user who last updated the record.
- Date Updated i.e. the date the record was updated.

3. Click the  button.

4. Click **Edit**.

Employer Costs (Pen and NI)

Date Effective: 30-Jul-2019

Entity Assignment Percentages

7. Update the existing *Percentage* value, on existing *Costing Type*.

8. Click **Save**.

Edit Cost Allocations
Administrator Dashboard > Cost of Roster > Employer Costs (Pen and NI) > Edit Cost Allocations

Cost Allocation: Employer Costs (Pen and NI) Date Effective: 30-Jul-2019

Entity Assignment Percentages

Search

Description	Percentage	
Pension	10.00	DELETE

On saving you are returned to the *Date Effective* summary screen. In this example, you can now see that the Percentage is '10.00', *Date Effective* '30-JUL-2019'.

Employer Costs (Pen and NI)
Administrator Dashboard > Cost of Roster > Employer Costs (Pen and NI)

Search

Date Effective ↑	Total Employer Costs	Updated By	Date Updated	
30-Jul-2019	10%	Peter King	11-Jul-2019	⋮

Note: To delete an existing Employer Cost Allocation grouping:

1. Click the button.
2. Select the **Remove**.

Validation exists to stop the deletion of *Employer Cost Allocation* groups, where staff have been previously assigned.

4.5 Personal Overrides

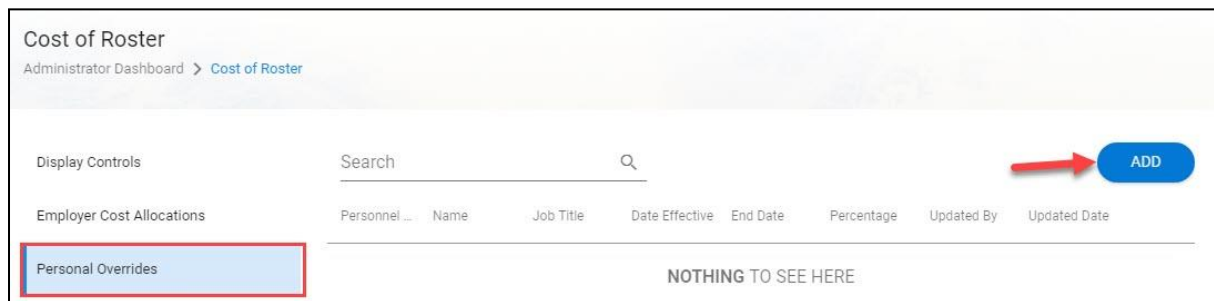

Personal Overrides configuration allows you to override the default costing, for selective employees.

For example:

- For one employee: 50% of their hours/values are allocated to the *Team Area* budget.
- For another employee: They are a new hire, and for the first 3 months of employment, they are not charged to the *Team Area* budget, as they are training on the job.

To create a new *Personal Override*:

1. Click the **Personal Override** tab, on the *Cost of Roster* screen.
2. Click **Add**.

The screenshot shows the 'Cost of Roster' interface. At the top, there's a breadcrumb trail: 'Administrator Dashboard > Cost of Roster'. Below this, there's a 'Display Controls' section with a search bar. A red arrow points to a blue 'ADD' button in the top right corner. Below the search bar, there's a table header with columns: 'Personnel ...', 'Name', 'Job Title', 'Date Effective', 'End Date', 'Percentage', 'Updated By', and 'Updated Date'. The 'Personal Overrides' tab is highlighted with a red box. Below the table header, the text 'NOTHING TO SEE HERE' is displayed.

The *Add a person override* screen displays.

3. Select the *Person* from the drop-down list.
4. Enter the *Date Effective*.
5. Enter the optional *End Date*.
 - Enter an *End Date* for when the override ends.
 - If left blank, indicates open ended.
6. Enter the *Percentage*. For example:
 - 0% implies no costs apply.
 - 20% implies 20% of the employees total Planned/Actual costs apply.
7. Click **OK**.

Employer Cost Allocations

Personnel No. Name

Add a person override

Person: John Tully

Date Effective: 11-Jul-2019

End Date: 25-Jul-2019

Percentage: 0

CANCEL OK

The *Personal Override* is now applied to the employee, this is shown on the screenshot below.

It is possible to **Edit** or **Remove** (Delete) the override for this employee at any time.

Cost of Roster

Administrator Dashboard > Cost of Roster

Display Controls

Search

ADD

Employer Cost Allocations	Personnel No.	Name	Job Title	Date Effective	End Date	Percentage	Updated By	Updated Date
Personal Overrides	000185	John Tully	Hr Administrator	11-Jul-2019	25-Jul-2019	0	Peter King	11-JUL-19

Additional Settings

Edit

Remove

Note:

Multiple rows can be entered for the same employee, where the *Start Date* and *End Date* apply for the duration specified. For example:

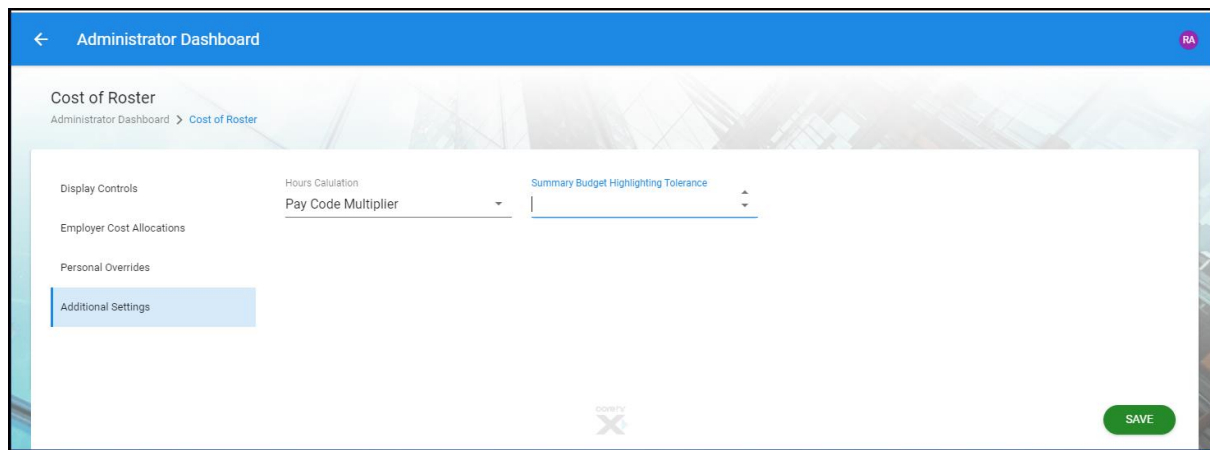

- If an employee is training for a month, the *Personal Override* entered only applies for that month, and normal costing then resumes once the *End Date* has passed.

4.6 Additional Settings

The following Additional Settings are available from Cost of Roster:

- Displays Cost Values
- Hours Calculation
- Summary Budget Highlighting Tolerance

These items are detailed in the following sections of this document.

4.4.4. Hours Calculation

Where *Planned* and *Actual* hours are calculated and matched to the *Budget* values, it is possible to include or exclude the *Pay Code Multiplier*.

To configure the *Hours Calculation* field:

1. Click the **Additional Settings** tab, on the *Cost of Roster* screen.
2. Select **Pay Code Multiplier** OR **Flat Rate**, from the *Hours Calculation* drop-down list.

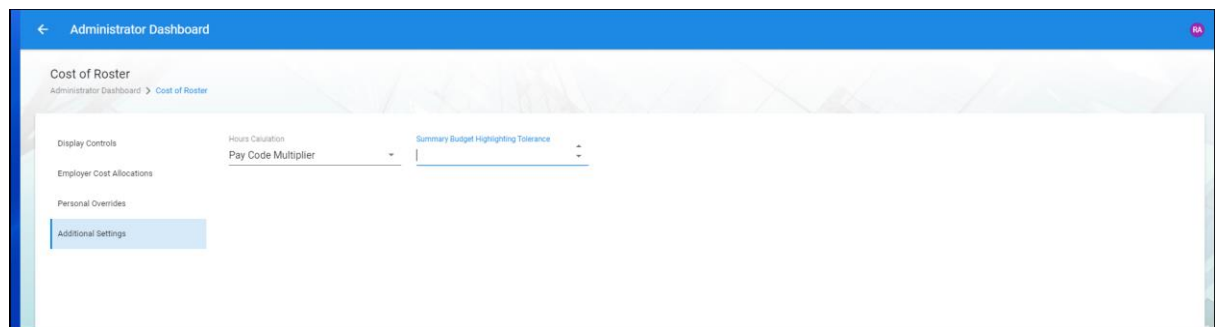

These options are explained in the below table:

Hours Calculation	Explanation
Pay Code Multiplier	For <i>Hourly Budgets</i>, if 8.00 hours are worked with a multiplier of '1.5': • This is then calculated as 12.00 hours (8.00 * 1.50) and added to the <i>Planned</i> or <i>Actual Costs</i>. For <i>Value Budgets</i>, if 8.00 hours (£10 per hour) are worked with a multiplier of '1.5':

Roster V28: Cost of Roster - User Guide

	This is then calculated as £120.00 (£80.00 * 1.50) and added to the <i>Planned</i> or <i>Actual Costs</i>.
Flat Rate	For <i>Hourly Budgets</i>, if 8.00 hours are worked with a multiplier of '1.5': - This is calculated as 8.00 hours and added to the <i>Planned</i> or <i>Actual Costs</i>. For <i>Value Budgets</i>, if 8.00 hours (£10 per hour) are worked with a multiplier of '1.5': - This is calculated as £80.00 and added to the <i>Planned</i> or <i>Actual Costs</i>.

3. Click **Save**.

4.4.5. Summary Budget Highlighting Tolerance

This tolerance determines when *Planned* or *Actual Costs* are flagged as being over *Budget*.

Roster Details

Budget Values 36,000.00

Brian Judd	09:00 - 16:00	09:00 - 16:00	09:00 - 17:30	09:00 - 17:30	Rest	09:00 - 18:00	12:00 - 18:00	38.50	37.50	567.97	38.50	15.15	1.00

For example:

- The *Budget* value for the period is 50,000
- The *Actual Value* for the period is 52,000

If this *Summary Budget Highlighting Tolerance* field is set to 5%:

- This creates an allowance of 5% above the 50,000 *Budget* value.
- Therefore, the *Budget* allowance is 52,500.
- As the *Actual Value* is 52,000 (4% above), this is within the *Budget* tolerance:
 - The *Actual Value* is not shown in Red (*Over Budget Colour*) on the *Roster* screens.

To set this *Summary Budget Highlighting Tolerance* field:

4. Click the **Additional Settings** tab, on the *Cost of Roster* screen.
5. Enter the required *Summary Budget Highlighting Tolerance* figure.
For example, '5' represents 5%.
6. Click **Save**.

The screenshot shows the 'Cost of Roster' configuration interface. The breadcrumb trail is 'Administrator Dashboard > Cost of Roster'. On the left, there are four tabs: 'Display Controls', 'Employer Cost Allocations', 'Personal Overrides', and 'Additional Settings'. The 'Additional Settings' tab is selected and highlighted with a red box. In the main area, there are two toggle switches: 'Display Cost Values' (off) and 'PRSI/Ni in Employee Cost' (on). To the right of these is a 'Pay Code Multiplier' dropdown menu. Below that is the 'Summary Budget Highlighting Tolerance' field, which is set to '5' and is highlighted with a red box. At the bottom right, there is a green 'SAVE' button with a red arrow pointing to it. The 'corehr' logo is visible at the bottom center.

4.7 Pay Code Configuration

Through system administrator configuration, pay codes support additional configuration to control how they impact the planned and actual costing figures. By default, all pay codes and its associated payroll multiplier are used when calculating the planned and actuals costing figures, example include

- Basic, multiplier 1.00
- Overtime 1.50, multiplier of 1.50
- Late, multiplier 0 (does not impact the costs)

The follow table outlines the override setting and how they impact the calculations.

Pay code	Explanation
Exclude from Costing	Where set to 'on' the pay code and its associated hours are excluded from planned and actual costs.
Exclude from Cost Display	Where set to 'on' the pay code and its associated costs are not displayed in the roster details and they're not included in the planned and actual costs. Note: The associated hours contribute towards the person working hours for rules such as fill basic.
Cost Multiplier	The default pay code multiplier configured in payroll can be overridden to influence how the costs are impacted. For example, a pay code with a multiplier of zero in payroll can be adjusted to 1 in WFM to count towards the planned and actual costs. Note: Cost Multipliers can only be updated where the payroll multiplier is 0 or less than 0.
Cost Centre	The pay code and its costing can be directly associated with a cost centre specified at the pay code level. For example, Annual Leave may be charged centrally not to the individual teams.
