1.2	11/12/2025	Georga Edwards	Updated section 2.1.3 Section 3: Colour Codes

1. Overview

This user guide provides employees with an overview of how to create and edit timesheets from the employee dashboard. It gives a detailed explanation of how to use the Timesheet Input screen which supports the recording of timesheet and attendance data.

This document is intended for use by employees who are submitting timesheets from the Employee Dashboard in PeopleXD and looks at the following:

- Accessing the Timesheet Input Screen
- Entering and Managing Timesheets
- Employee Timesheet Clockings
- Employee Timesheet Claims

1.1. Access the Timesheet Input screen

Employees can access the Timesheet Input screen from the Employee Dashboard by selecting the Time tab. The following widgets have the Timesheet Input menu option:

- **Calendar Widget** – using the 3-dot menu select *View Timesheets*
- **Work Week Widget** – using the Actions button select *Timesheet Input*
- **Timesheet Claims Widget** – using the *Input Time* button

2. The Timesheet Input Screen

Employees can use timesheets to record their hours over a weekly period. This includes the hours they have worked, annual leave, overtime etc. Timesheets allow employees to review, edit and update the hours that have been submitted.

Depending on how the Timesheet Input screen is configured, some or all the details below may appear on the timesheet.

The screenshot displays the 'Timesheet Input' interface for Employee Maria Hill. It includes a navigation bar with 'Employee Dashboard' and 'Timesheet Input'. The main area is divided into several sections:

- Section 1:** Employee Information (Employee Maria Hill, Work Group Default Workgroup, Organisation Customer Company (UK)).
- Section 2:** Calendar and Navigation (20-Aug-23 to 26-Aug-23).
- Section 3:** Status Legend (Rejected, Recode Required, Approval Required, Reason Code Required, Narrative Attached, Acting Up).
- Section 4:** Timesheet Entries table with columns for Day, Type, Cost Centre, and Hours.
- Section 5:** Summary of the Employee Balances (Annual Leave, Entitlement, Carried, Taken, Blocked, Balance).
- Section 6:** Summary of the Timesheet Entries (Basic, Overtime, Absences, Other).
- Section 7:** Clocking's (Start and End times for each day).

The **Timesheet Input** screen contains the following fields, depending on your organisational configuration not all may be available:

Section	Details
1	Person Information
2	Calendar and Navigation
3	Colour Codes
4	Timesheet Entries
5	Summary of the Employee Balances
6	Summary of the Timesheet Entries
7	Clocking's

2.1.1. Section 1: Person Information

The person information section will include your 'Known As' name or personnel number, depending on configuration and employee photo, if enabled. An additional 3 person information fields can be displayed, including:

- Category
- Department
- Job Title
- Organisation
- Cost Centre
- Division
- Location
- Work Group

If your organisation is multi-appointment, there will be an option to navigate between appointments. This is a dropdown that allows you to select which appointment you wish to view/manage.

The screenshot shows the 'Timesheet Input' screen. At the top, there's a header with 'Employee Dashboard > Timesheet Input' and an 'ACTIONS' button. Below the header, there's a dropdown menu for appointment selection, currently showing '720306 Development Manager 7203'. A red box highlights this dropdown. Below the dropdown, there's a table with columns for 'Pay Code', 'Type', 'Cost Centre', and a grid of days (Sun 20th, Mon 21st, Tue 22nd, Wed 23rd, Thu 24th, Fri 25th, Sat 26th) and a 'Total' column. The table shows two rows: '1000 Basic Hour' and '2000 Overtime @ 1.50'. The 'Total' column shows '35.00' and '2.50' respectively. At the bottom, there's a section for 'Annual Leave' with a pie chart and a button labeled 'Entitlement: 0'.

If it is a multi-appointment site, but you only have one appointment, it will display the appointment with no dropdown.

2.1.2. Section 2: Calendar and Navigation

In the top right-hand corner, the calendar shows the current week you are in and the date which the week starts on. Use the dropdown or forward/backward arrows to select a different week.

By clicking on the **Actions** button, additional functions are available to open from within the Timesheet Input screen. The options available will depend on how the system is configured and can include the following:

- Return to Current Open Period – returns you to the current open period

- Weekly Work Schedule – opens the Weekly Work Schedule screen, this is read only
- Co Workers Leave/Absence – opens the Team Calendar in absence only view
- Leave Request – opens the Leave Request screen
- My Balances - opens the My Balances screen
- Copy Previous Weeks – allows you, if access granted, the facility to copy the previous weeks timesheets to the current period
- Stand By Hours – Hours given to employee for being on Stand By

2.1.3. Section 3: Colour Codes

Colours codes are defined in the timesheet template. They display against pay codes with certain criteria to highlighted action required.

● Rejected ● Recode Required ● Approval Required ● Reason Code Required ● Narrative Attached ● Acting Up ADD							
Sun 20th	Mon 21st	Tue 22nd	Wed 23rd	Thu 24th	Fri 25th	Sat 26th	Total
	7.00	7.00	7.00	7.00	7.00		35.00
	● 1.50			● 1.00			2.50

The colour code options available are :

Codes	Description
Rejected	If a claim has been returned to the employee or outright rejected, it displays with this colour.
Recode Required	This colour is not applicable to Timesheet Claims. It is only relevant for standard Workforce Management when an employee has not clocked in for a scheduled day, and the unapproved absence pay code has been generated automatically. In that scenario, a manager would need to replace (recode) the pay code with an appropriate one such as sick, training, or annual leave.

Codes	Description
Approval Required	The entry requires approval before being signed off by a manager.
Reason Code Required	The entry requires a reason code to be attached. For example, where hours may calculate automatically without a reason code, a manager can enter a reason at a later time.
Narrative Attached	When a user enters a narrative (or a reason code) when inputting hours, the colour indicates there is a note attached to the hours. However, this colour can be superseded. • If hours have a narrative but have not yet been submitted, they display 'Narrative Attached' colour. • Once hours are submitted and in the approval process, they display with the 'Approval Required' colour. • Once hours are fully approved, the 'Narrative Attached' colour displays again. • If a claim with a narrative is returned to the employee or outright rejected, the hours display with the 'Rejected' colour.
Acting Up	Acting up is generally used by the public sector. This colour will display when an employee temporarily takes on the duties and responsibilities of a higher-level position, such as: • The position is vacant (due to leave, resignation, or an unfilled role). • There's a temporary absence of the person normally in that role. • The organisation needs someone to fill the gap on an interim basis.

2.1.4. Section 4: Pay Code Section

Each timesheet entry will be displayed as a line in this section, to submit a new timesheet, select **Add**, you can add as many lines as required. For example Basic and Overtime hours. See [Section 3 – Entering Timesheets](#) for further guidance.

2.1.5. Section 5: Balances Section

The section displays the balances and a summary of the hours that you have entered in the timesheet. The list of balances displayed is configured per organisation e.g. annual leave, certified sick leave etc.

2.1.6. Section 6: Summary Section

This graph shows the total hours for this timesheet, broken down by pay code. It is possible to configure the pay codes that will be displayed here, per organisation.

2.1.7. Section 7: Clocking Section

The clocking section can be configured to allow employees to manually enter the times they clock in and out from the system or it can be automatically entered by the system. Depending on how this screen is configured and the requirements of this client this section can be turned on or off.

3. Entering Timesheets

This section will provide guidance, from an Employees perspective, regarding timesheet entries and how they can add, amend & manage timesheet entries within the timesheet input screen.

3.1. Add a new Timesheet

To Add a new Timesheet, from the Timesheet Input screen follow the steps below:

1. Ensure you have selected the week you wish to add a timesheet for
2. Click **Add**.
 - Using the dropdown options **select the details** for each heading within the Pay Codes section, option here are defined in the Timesheet template. Depending on how your timesheets are configured the column Type will autofill with one of the following M, D, V or U. This determines how you need to add your hours. For example, 7 hours and 30 minutes is displayed as:

Type	Value	Displayed as:
M	Minutes	7.30
D	Decimal	7.50
U	Units	7.50
V	Value	7.50

3. For each day of the week **add the hours worked**.
4. Repeat the process to add additional line entries and once happy, click **Save**.

The screenshot displays the 'Timesheet Input' interface. At the top, there's a header with 'Employee Dashboard' and 'Timesheet Input'. Below this, a navigation bar shows 'Employee Maria Hill', 'Work Group Default Workgroup', and 'Organisation Customer Company (UK)'. A status bar indicates '20-Aug-23 - 26-Aug-23'. The main area features a table with columns for days of the week (Sun 20th, Mon 21st, Tue 22nd, Wed 23rd, Thu 24th, Fri 25th, Sat 26th) and a 'Total' column. Two rows of data are visible: '1005 Basic Hours' with a value of 7.00 for each day and a total of 35.00; and '2003 Overtime @ 1.50' with a value of 1.50 for each day and a total of 2.50. The bottom of the screen shows a 'Calculate Attendance' button and a 'Save' button.

Pay Code	Type	Cost Centre	Sun 20th	Mon 21st	Tue 22nd	Wed 23rd	Thu 24th	Fri 25th	Sat 26th	Total
1005 Basic Hours	M	Default Cost Centre 1	7.00	7.00	7.00	7.00	7.00	7.00		35.00
2003 Overtime @ 1.50	M	Default Cost Centre 1	1.50				1.00			2.50
			0.00	8.83	7.00	7.00	8.00	7.00	0.00	37.83

3.2. Update a Timesheet Entry

To edit a timesheet, click into the hours for the day you need to edit and type in the changes.

Click **Save** to capture the changes.

3.3. Delete a Timesheet Entry

To delete a line entry on a timesheet

- Expand the 3-dot menu and select **Delete** against the line entry you wish to remove.
- A confirmation message will appear.
- Click **Yes** to confirm the action.
- The timesheet line entry will be removed from the timesheet.
- Click **Save** to confirm the changes.

Note: Once a timesheet has been approved you will only be able to open and view the timesheet, not make any changes.

3.4. Add a Reason Code to a Timesheet Entry

Depending on how the system is configured, a reason code can be mandatory when entering certain pay codes, e.g. if submitting overtime, managers may require a reason code.

To add a reason code to a timesheet entry:

1. Expand the 3-dot menu and select **Add Reason** against the line entry you wish to edit.
2. The Reason window will open to allow you to enter a Reason Code & Comment.
 - You can enter a reason code & comment for **All Days** or select an **Individual Day**, and repeat, to allow the same Pay Code to have different reason codes in the same row on the Timesheet.
3. Click **OK** to save changes.

The screenshot shows a dialog box titled "Add Reason". It contains the following fields:

- Day ***: A dropdown menu with "All Days" selected. Below it, a list shows "All Days", "Monday 21st Aug", and "Thursday 24th Aug".
- Hours**: A text field containing "2.5".
- Reason Code**: A dropdown menu.
- Comment**: A text field containing "Example 2".

3.5. Add a Comment to a Timesheet Entry

You can add a comment to a pay code, e.g., if submitting overtime or completing project work you can refer to this by adding a comment. Your manager can then see the comment and add a comment, which you will be able to see.

To add or view a comment:

1. Expand the 3-dot menu and select **Add/View Comments** against the line entry you wish to edit.
2. The Comments window will open to allow you to enter, or view, comments.
3. Click **Add**
4. You can enter a comment for **All Days** or select an **Individual Day**, and repeat, to allow the same Pay Code to have different comments in the same row on the Timesheet.
5. Enter your comment. The max number of characters that can be entered into the comment box is 4000.
6. Click **OK** to save changes.
7. The comment(s) will be applied to the entry.

-----	----------	-------------

NOTHING TO SEE HERE

Note: From the Comments window you can also use the same process to add a Reason Code to your timesheet entries.

4. Employee Timesheet Clockings

The clocking section can be turned on or off depending on the organisational requirements. If applicable, you can enter in your clockings for the week and save the changes. If your organisation is using clockings where they are automatically recorded and not manually entered, then you will be able to view this screen but not edit it.

The clocking section is found in the bottom right-hand section of the Timesheet Input screen.

CALCULATE ATTENDANCE SAVE

4.1. Add a clocking

To enter in clockings:

1. Click **Add**
2. Enter the time of your clockings, depending on your site configuration this could be Manual, Automatic or Movement:
 - An **M** will appear on the screen to indicate that this is a manually entered clocking.
 - An **A** will appear on screen to indicate that the clocking was system generated.
 - The movement refers to when you clock in or out of the system. An **I** will display for clocking in and an **O** for clocking out.
3. Press the **Calculate Attendance** button to save the entries.
4. A validation messages will appear asking the user to confirm the changes.
5. The entries will be saved, and the hours calculated.

4.2. Edit a clocking

If a clocking has not been approved or sent to pay it can be edited. To do this:

1. Select the week you want to edit from the calendar.
2. The clocking details will appear.
3. Click into the entry of the time you want to edit and update.
4. Select **Calculate Attendance** to recalculate the hours.
5. A validation messages will appear asking the user to confirm the changes.
6. Select **Yes** and the changes will be updated.

4.3. Delete a Clocking

To delete a clocking:

1. Select the cell that you want to delete and select *Delete* on your keyboard, or *Backspace* to remove.
2. The entry will be removed and the red triangle in the top left-hand corner will be visible to indicate that the changes need to be saved.
3. Select the **Calculate Attendance** button to recalculate the hours.
4. Select the **Yes** button to confirm your changes.

4.4. Add a Comment

To add or view a comment:

1. Expand the 3-dot menu and select **Add/View Comments** against the line entry you wish to edit.
2. The Comments window will open to allow you to enter, or view, comments.
3. Click **Add**, then use the dropdown options to, select the **Day** and **Time** you wish to add a comment to.
4. Enter your comment. The max number of characters that can be entered into the comment box is 2000.
5. Click **OK** to save changes. The comment(s) will be applied to the entry.
6. Repeat as required.

Note: All comments added are visible to the manager and employee.

4.5. Copy Previous Week

This feature allows an employee to copy the previous weeks timesheets to the current period. To do this:

1. Select the week you want to copy data into from the calendar.
2. Using the Actions button select **Copy Previous Week**
3. The Copy Timesheets window will open.
4. Under **Copy from*** use the calendar to select the week you wish to copy
 - The copy functionality only copies items that are **displayed** on the screen to the end user, for example if 'pay codes' and 'cost centre' are displayed within the timesheet input screen, then only these values will be copied, and it will exclude other items such as project code that the user does not have access to on their template.
5. Select how you want the Timesheet entry to be copied, selecting one of the options. The options available are:

Options	Description
Copy All Entries	Copy all items i.e. all transactions and clockings from the period selected to the current period. i.e. from entries on ct_calc_hours and ct_clocking from the period selected to the current period.
Copy Tasks and Daily Entries	Only transactions (clocking data is not copied) from the period selected to the current period.
Copy Tasks Only	Only the task level of the transactions is copied from the period selected to the current period i.e. the hours/minutes are not copied.
Copy Clockings Only	Copy the clock times recorded from the period selected to the current period. This option is only available if clocking grid enabled.

6. The information will be copied across.
7. Click **Save** to capture changes to the timesheet.

5. Employee Timesheet Claims

This section will provide guidance, from an Employees perspective, regarding Timesheet Claims and how they can view & submit Timesheet Claims using the Employee Self Service dashboard.

This will allow them to:

- View a count of the timesheets claims by status for a selected period e.g. Saved for Later, Approved, Submitted.
- Drill down to the Timesheet Summary Screen to lists the details of the timesheet claims including options to:
 - Drill down to the Timesheet Input screen to enter/view the timesheet entries.
 - Submit a Timesheet claim into workflow for approval.
 - Recall timesheets claim that have not been actioned.
 - Filter the view to specific status or pay code.
 - Navigate to previous periods to view historical claims.

View All: Summary Screen

Paycode	Type	Claim Total	Period	Cost centre	Status
☐ Hours Claim (7264-7001) - Amy	Hours Test	2.00	Start 06-Jun-2023 End 12-Jun-2023	Cost Centre 1 7264	Awaiting Approval ⋮
☐ Hours Claim (7264-8001)	Hours Test	5.00	Start 06-Jun-2023 End 12-Jun-2023	Cost Centre 1 7264	Awaiting Approval ⋮

5.1. How to Submit a Claim

Firstly, the employee needs to enter their timesheets.

To do this:

1. From the Time Sheet Claims widget, select the **Input Time** button.
2. **Enter** your timesheets.
3. Once entered you will return to the summary screen where the timesheets are summed by the identified grouping (e.g. Person, Period Pay Code and totals values entered).
4. The on-screen timesheet status is set as ***Saved for Later***.
 - You can continue to enter timesheets while the status is *Saved for Later*.
5. When ready to submit the claim into workflow for approval, select the **Submit** option from the 3 dots menu.

To submit multiple claims at once, from the Timesheet Claims Summary Screen:

1. Set the filter view to *Saved for Later*
2. Using the checkboxes, select all claims to be submitted
3. Click the **Submit** button
4. Once Claims are actioned (e.g. Approved) the status will be updated.

5.1.1. Timesheet Entry for Claims

By selecting the *Input Time* button employees are brought to the Timesheet Input screen to where they can enter timesheets.

- The Timesheet Input opens in the current period, displayed on right of the screen.
- The Timesheet Input screen display any existing entries and where timesheets have a status other than Saved for Later such as approved or submitted, employees are stopped from adjusting the claims because the claims have already been submitted into the workflow approval process.

5.1.2. Adding Comments to a Claim

Comments cannot be entered until a claim that has been submitted. A comment can be added to a claim by clicking on the 3-dot menu and selecting **Add Comment**.

Previous comments can be viewed through the same screen which are listed in date/time descending order. Comments are also visible in the View History option from the 3-dot menu for the claim.

 **Note:** Once a comment is entered it cannot be deleted and comments are visible to all.

5.2. Recalling a Claim

Recalling a claim supports employees to *un-submit* the claim that was previous submitted. This allows employees to recall claims that may have been submitted in error. Once recalled, employees can make changes and then re-submit into workflow for approval.

 **Note:**

- The Recall option must be enabled on the employee timesheet template.
- Only claims that have a status of submitted can be recalled, if a claim was actioned e.g. approved, the claim **cannot** be recalled.

5.3. Entering Retrospective Claims

As part of the claims process, employees can be granted the ability to enter retrospective claims. To do this:

1. Navigate to **WFM Admin Dashboard**.
2. Select **WFM Configuration**.
3. Select the **Work Groups** tile.
4. Search for the relevant work group, expand it's 3-dot menu and select **View/Edit Work Group**.
5. From the General Parameters tab scroll to the Calculation section and enter the number of weeks you wish to allow users to enter retrospective claims in the **EMP: Rollback Weeks for Data Entry** field.

This supports employees to enter timesheet claims for a closed period which are to be submitted as a claim for the current period.

Retrospective claims by example,

- The current open period is Mon 9th Jan to Sun 15th January.
- The employee fails to enter or misses a timesheet claim for a previous week.
- The employee can scroll back to the week, enter a timesheet for the history week.
- On return, the historical entry is displayed part of the current open period, but the dates on the claim are reflective of the actual period start/end date.
- The Employee can then submit the claim as normal, and this is displayed to the manager within their list of approvals.

5.4. Employee Timesheet Submission Summary

As part of the submission process, the system completes the following actions internally:

- Calls the workflow process to determine the employee's manager using org roles/groups assign to the template and the org roles assign to the manager in personnel e.g. email notification sent to the manager that a timesheet has been submitted for approval.
- The screen is refreshed and the status changes from *Saved for Later* to *Submitted*.
- The date/times and employee who submitted the claim are stored on the history table.
- A Claim id is assigned to the claim & claim history.
- If required, employee can add comments to a claim or recall claims that have not been actioned.

5.5. Acknowledgement before submission

Optional configuration supports an option to present a message of acknowledgement before a claim can be submit. The acknowledgement message can be a message with an Ok button or an additional checkbox e.g. I acknowledge to the Timesheet Term and Conditions.

Confirm T&C

Free text field, which allowing entry up to 1000 characters which is read by an employee before they can submit a Timesheet Claim, the checkbox to confirm can be enabled or disabled.

☐ Check to confirm

CANCEL OK

6. Menu Options

This section details the menu options and webservices required to support the configuration of the various timesheet claims screens.

6.1. Widget Access Configuration

To support timesheet claims a number of menu items need to be configured.

Widget	Description
Timesheets Claims Widget	Employee Dashboard Widget to view counts of timesheet claims by status for a period selected
Employee Details View	Option for employees to review and submit timesheets into workflow for approval
Manager Claims Widget	Manager Dashboard Widget to view counts of timesheet claims that require action and a summary of claim actioned in the last 30 days
Manager Details View	Option for managers to review/action timesheet claims. This option is available as a drill down from the Manager Claims widget or directly from the Managers Workforce Management dashboard.
Admin Widget	Admin Dashboard Widget to view counts of timesheet claims by status for a selected period.
Admin Details View	This option is available as a drill down from the Manager Claims widget or directly from the Admins Workforce Management dashboard.

6.2. Employee Menu Access

Employee Menu options supporting timesheet claims. Employees can see and summary of the claims or the current period with the option to drill to review the claims.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Manager menu profile e.g., Coreportal_Employee

3. From its 3-dot menu, select **Manage Menu Options**.
4. Search for and enable the menu options below.

Menu Profile	Menu ID	System
Employee Claims Summary Widget	MAIN_MENU.TIMESHEET_CLAIMS_EMP_SUMMARY	CorePortal
CorePortal - Timesheet Employee Summary	MAIN_MENU.TIMESHEET_EMP_SUMMARY	CorePortal
