1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to explain the Irish Annual Leave Carryover legislation introduced in January 2024 and provide a step-by-step guide to configuring this in PeopleXD.

The guide will cover:

- An overview of the legislation
- Setting a balance code to use this legislation
- An example of the legislation in use

1.2. Legislation Overview

The Irish Civil Service Annual Leave Carryover was introduced in part of the circular **Annual Leave in the Civil Service** and is part of **the Organisation of Working Time Act 1997 (as amended)** and **Section 86(1) of the Workplace Relations Act 2015**.

In PeopleXD Workforce Management it is **Part 3: Carryover of Annual Leave** that is relevant and that this feature covers.

For the purposes of this legislation and feature annual leave is divided into two categories, statutory and non-statutory. Unused statutory annual leave is not normally carried over, and if a specific exception is made for an individual then this needs to be handled by a manual adjustment. The new legislation covers the carryover of unused non-statutory leave. Unused non-statutory leave should be carried over into the following year and must be used within that year. This process can repeat each year, allowing for unused non-statutory leave for that year to be carried over to the following year.

When an individual takes annual leave, the order this is taken is:

1. Statutory annual leave which has been carried over due to exceptional circumstances.
This will need to be managed manually.
2. Any non-statutory annual leave which has been carried over from the previous year.

3. Statutory annual leave entitlement accrued during the current year.
4. Any non-statutory annual leave which has been accrued during the current leave year.

Later in this document there is an example showing how this works.

2. Configuration
