Version	Date	Author	Details
1.0	12/12/2021	Rory Coakley	Published to Access LMS
1.1	26/10/2023	Georga Edwards	QOL update and added information relating to Timesheet Claims
1.2	09/01/2026	Georga Edwards	Tables added to section 2.1.4 View Timesheet to explain Colour key & Three-dot menu options.

1. Overview

This document will provide guidance, from a Managers perspective, regarding Timesheet Claims and how they can view & manage Timesheet Claims using the Manager Self Service dashboard.

It will also outline the additional functionality a manager has within the Timesheet Inputs screen to view and managed reports, timesheets.

The guide will include how to:

- View the timesheets claims summed by employees within their remit.
- View the status of the claim e.g. Approved, Submitted
- Action a Timesheet e.g. approve or reject.
- Input & Submit Timesheets on behalf of employees.
- Access and use the Manager functionality within Timesheet Input screen.

1.1. Timesheet Claims Summary

The following describes a high-level working of Timesheets claims & the approval process.

- Where employees enter timesheets and return to the timesheet claims summary screen the system automatically sums the hours by the grouping identified and the timesheets have a **saved for later** status.
- Where a claim is not submitted for approval e.g. Saved for later, the employee can continue to enter/maintain timesheet details whereby the summary screen continues to sum the timesheet entries by the defined grouping.
- Once an employee **submits** a timesheet claim, the claim is formed and then enters the workflow approval process.
- Where claims are in the workflow approval process, the claim and its transactions cannot be edited.
- Workflow is used to notify the relevant roles in the process where an action was taken e.g. Submitted, Approved, Rejected, Recalled.
- Employees have the option to recall timesheet claims that have not been actioned e.g. approved.
- Timesheet claims can only be actioned from the **Timesheet Claims Summary** screens.

- Employee timesheets that have a status of **Saved for Later** or **Not Submitted**, indicates the claims have not been submitted into workflow for approval.
- Managers can reject claims once a claim is rejected its returned back to the employee.
- Where a claim has been returned to the employee e.g. rejected or recalled, they can edit the claim, and the system returns to automatically summing the hours by the grouping identified.

1.2. Add the Timesheet Claims Manager Widget

The Timesheet Claims Summary screen is accessed via the Timesheet Claims Manager widget. If This is usually available on the Time tab on the Manager Dashboard or can be added to an existing dashboard.

To do this:

1. Navigate to the **Dashboard Configuration** dashboard.
2. Select a Dashboard from the drop-down menu e.g. Manager Dashboard.
3. Search for and click on the tab you want to add the widget to e.g. Time.
4. Search for **Timesheet Claims Manager** in the Tab Widgets section.
5. Enable the **Selected** toggle.

Timesheet Claims Manager		
Reports To Manager 		
My Actions		
Action Required	6	VIEW
Claims in the Past 30 Days		
Approved	0	
Rejected	0	
Cancelled	0	

Managers are notified of timesheets claims submitted by employees, these are visible from the Timesheets Claims Manager widget.

- **My Actions** - displays the number of claims that required action.
- **Claims in the Past 30 days** - displays all claims, by category, that have been actioned in the past 30 days. This is based on today's date.

Clicking on **View** opens the Timesheets Claims summary screen where the individual claims can be viewed and actioned.

1.2.1. Manager with Multiple Roles/Calendars

A manager may have multiple roles/calendars. Where this occurs, the manager can select the appropriate roles/calendars using the drop-down option and filter within the Timesheet Claims Manager widget to return the claim summary for that role/calendar.

- *Multiple Calendars* can occur where a manager has staff reporting to them that are paid by different calendars e.g. Weekly or Fortnightly, or have different calendar start dates e.g. weekly's operating from Mon - Sun and Thu - Wed.
- *Multiple Roles* can exist where a manager has different functions within the timesheet workflow e.g. A Manager is *Level 1 Timesheet Approver* for their team and is also *Level 2 Timesheet approver* for the Department/Section.

If a manager does not have multiple roles or access to different calendars the default role/calendar are displayed.

1.3. Access the Timesheet Claims Summary Screen

You can access the Timesheet Claims summary screen via the Timesheet Claims Manager widget. This is usually available on the Time tab on the Manager Dashboard but may have been added to an existing dashboard.

1. Go to the *Manager Dashboard* and select **Time**.
2. Navigate to the Timesheet Claims Manager widget.
3. Under My Actions, Action Required, click **View**.
4. The Timesheet Claims Summary screen will display.

2. The Timesheet Claims Summary Screen

Once you have clicked View against Required Actions, you will see the following display. The Timesheet Claims summary displays summary and detailed views of the claims. The Summary is the total value of the claim, and the details are the individual entries that make up the claim.

Row Type	Person	Appointment	Pay Code	Total Claims Value	Submitted Period	Processed Period	Calendar Code	Submitted/Transaction	Claim Status
Summary	Brian StJohn	Development Team L...	8005 UNITS CLAIM (7... 4 8005		31-Oct-2022 - 06-Nov-2022	07-Nov-2022 - 13-Nov-2022	Weekly 202244	24-Jan-2023	Submitted
Summary	Stephen Walsh	QA Team Lead 7203	8005 UNITS CLAIM (7... 6 8005		31-Oct-2022 - 06-Nov-2022	07-Nov-2022 - 13-Nov-2022	Weekly 202244	24-Jan-2023	Submitted
Summary	Matthew Egan	Development Team L...	8005 UNITS CLAIM (7... 6 8005		07-Nov-2022 - 13-Nov-2022	07-Nov-2022 - 13-Nov-2022	Weekly 202245	26-Jan-2023	Submitted
Summary	Stephen Walsh	QA Team Lead 7203	8005 UNITS CLAIM (7... 3 8005		07-Nov-2022 - 13-Nov-2022	07-Nov-2022 - 13-Nov-2022	Weekly 202245	24-Jan-2023	Submitted
Summary	Brian StJohn	Development Team L...	8005 UNITS CLAIM (7... 9 8005		07-Nov-2022 - 13-Nov-2022	07-Nov-2022 - 13-Nov-2022	Weekly 202245	24-Jan-2023	Submitted
Summary	Stephen Walsh	QA Team Lead 7203	8005 UNITS CLAIM (7... 5 8005		14-Nov-2022 - 20-Nov-2022	14-Nov-2022 - 20-Nov-2022	Weekly 202246	24-Jan-2023	Submitted

The *Timesheet Claims* summary screen can be filtered using the following options:

Option	Details
Search	You can search by employee, using their <i>Known As</i> name, should you wish to manage claims for a specific employee.
Drop-Down	The drop-down filter is default to Action Required. This can be used to refine the list by specific claim type. For example, Approved, Recalled or Submitted
Filter	The filter can be used to further refine your search filtering by claim status, calendar, claim code and dates. Note: Where filtering on Not Submitted there's a requirement to filter by calendar/period.

The *Timesheet Claims Summary* screen contains the following fields:

Column	Details
Row Type	Summary displays the total value of claim. Select > to access the Detail view. The Detail view displays the individual transaction that make up the claim.
Person	The person that made the claim.
Appointment	The appointment id if multi-appointments are enabled.
Pay Code	The Claim Type can be hours, values or units.
Total Claims Value	On the summary row this is the total claim value and on the detailed row it's the individual values that make up the claim.
Submitted Period	The period the claim was submitted.
Processed Period	The period the claim was actioned e.g. approved.
Calendar Code	The Calendar associated with the claim e.g. Weekly, Monthly
Submitted/Transaction Date	On the summary row it's the claim submitted date and in the detailed row it's the individual date of each entry that makes up the claim.
Claim Status	The current status of the claim.

The columns on this screen can be tailored to your organisational requirement, use the dropdown options from any column header ensuring columns required to display are ticked.

2.1. Actioning Claims

Manager options to action the claims. The actions available are configurable through Workflow and Timesheet Template configuration which typically cover approval, rejection, rework, recommend approval or rejection.

The timesheets claims can be filtered by the various claim statuses that are available such as Approved, Submitted or Action Required which includes statuses of submitted, recommend approval and recommend rejection where two levels of approval are implemented.

The main actions **Approve Selected** or **Reject Selected** are available as buttons on screen, claims can be selected by ticking the relevant checkboxes.

Note: If the user's timesheet template is configured to require comments, then you will be unable to bulk approve or reject claims as they require an individual comment.

Additional actions can be found using the 3-dot menu per timesheet claim, these include:

- Recall
- Cancel
- Return to Employee
- Timesheet
- View History

2.1.1. To Approve a Claim

Approval can be completed individually or using the multi-select function, using the Approve Selected button.

To approve a claim individually:

1. Expand the 3-dot menu of the relevant timesheet claim and select **Approve** to approve the timesheet claim.
2. Once a claim has been approved, the screen is refreshed and the on-screen status changes to Approved.
3. The system validation process will stop claims that have already been approved from being approved again e.g. clicking on a timesheet that has been approved and then selecting the approve button.

Note: Managers maybe prompted to enter a free text comment on approval (setting within the timesheet configuration). The comment section is always optional, and the comments entered are visible to all users that can view the employees claim.

2.1.2. To Reject a Claim

Rejection can be completed individually or using the multi-select function, using the Reject Selected button.

To reject an individual claim:

1. Expand the 3-dot menu of the relevant timesheet claim and select **Reject** to reject the claim.
2. You may be prompted to enter a free text comment on rejection (depending on how the system was configured). The comment section is always optional to support the entry of additional comments as required.
3. Where a timesheet is rejected, it is automatically returned to the employee to be updated, this is regardless of how many levels of approval or what level of approval this occurred at.

2.1.3. To Cancel a Claim

A manager can cancel a claim process to enable closing of incorrect claims. Once cancelled this ends the process and the timesheet claim cannot be uncanceled.

To cancel a claim:

1. Expand the 3-dot menu of the relevant timesheet claim and select **Cancel**.
2. You may be prompted to enter a free text comment on cancellation (depending on how the system was configured). The comment section is always optional to support the entry of additional comments as required.
3. Once cancelled the timesheet is sent back to the employee for their reference or for updates to be applied.
4. Once a claim has been approved, the screen is refreshed and the on-screen status changes to Cancelled.

2.1.4. View Timesheet

By selecting *Timesheet* the actual timesheet input entries for the claim display.

If selecting from:

- *Summary* this will open at the start of the period.
- *Details* this will open in the week that the data was input.

Annual Leave 7264

Buttons: [ADD] [CALCULATE ATTENDANCE] [SAVE]

The colour key along the top of the Timesheet Input screen shows the status of timesheet claims and provides additional information about entries.

Colour Key	Meaning
Rejected	If a claim has been returned to the employee or outright rejected, it displays with this colour.
Recode Required	This colour is not applicable to Timesheet Claims. It is only relevant for standard Workforce Management when an employee has not clocked in for a scheduled day, and the unapproved absence pay code has been generated automatically. In that scenario, a manager would need to replace (recode) the pay code with an appropriate one such as sick, training, or annual leave.
Approval Required	This is when hours require approval. If timesheet claims are in use, this colour will display when the hours have been submitted, and when the claim has passed the first level of approval (in a two-level approval setup).
Reason Code Required	This colour is not applicable to Timesheet Claims, as the system does not allow users to save a newly input record without a reason code when a pay code requires one.

Colour Key	Meaning
	This scenario is only relevant in standard Workforce Management where hours may calculate automatically without a reason code, and a manager can enter a reason at a later time.
Narrative Attached	When a user enters a narrative (or a reason code) when inputting hours, the colour indicates there is a note attached to the hours. However, this colour can be superseded. • If hours have a narrative but have not yet been submitted, they display with this colour. • Once hours are submitted and in the approval process, they display with the 'Approval Required' colour. • Once hours are fully approved, the 'Narrative Attached' colour displays again. • If a claim with a narrative is returned to the employee or outright rejected, the hours display with the 'Rejected' colour.
Acting Up	Acting up is generally used by the public sector. This colour will display when an employee temporarily takes on the duties and responsibilities of a higher-level position, such as: • The position is vacant (due to leave, resignation, or an unfilled role). • There's a temporary absence of the person normally in that role. • The organisation needs someone to fill the gap on an interim basis.

Additional actions can be found using the 3-dot menu:

Option	Action
Approve Hours	Do not use this option for timesheet claims. If you select this option for a timesheet claim and click Save , the message 'No changes have been applied' appears.

Option	Action
	This option is for Standard WFM where hours have been automatically calculated based on clock times and have generated pay codes that require approval, such as overtime.
Reject Hours	Do not use this option for timesheet claims. If you select this option for a timesheet claim and click Save, the message 'No changes have been applied' appears. This option is for Standard WFM where hours have been automatically calculated based on clock times and have generated pay codes that require rejection, such as overtime.
Add Reason	Use this option if a pay code requires a reason code to be attached. This screen is for input only. To view existing reasons or narratives and comments, use the Add/View Comments option.
Add/View Comments	Use this option to add and view comments for days and hours used for Timesheet Claims as well as for Standard WFM.
Delete	Approvers and system administrators should not use this option for Timesheet Claims. If selected the following error messages will display: • Approver/Administrator - No changes have been applied. • Employee - Error: Pay Code [Pay Code Name] On [Date] is part of a claim and cannot be altered. Employees can delete hours that have a status of 'Not Submitted' (hours not yet included in any claim). Employees can also delete hours from claims with a 'Returned to Employee' status. When deleting these hours, a warning message will appear: <i>"Warning: Pay Code [Pay code name] is connected to a timesheet claim. If you delete all hours/entries for the claim, the claim will be deleted. Do you wish to continue?"</i>

Option	Action
	If the employee confirms, both the claim and its associated hours will be deleted.

2.1.5. View History

By selecting *View History* the claim details are displayed including, actions taken by date and time who actioned and additional comments, if added.

Comments can be viewed by clicking *View Comment* or added using the *Add Comment* button, once added the screen will update.

2.2. Claims Entry & Submission – Input Time Button

Managers can enter and submit timesheets claims on behalf of employees. To do this:

1. Select the **Input Time** button for the claim they want to view.
2. The Timesheet Input screen displays
3. **Add** claim details.
4. If a claim already exists and you enter a new row and saves the additional details, this will form the basis of a new claim which will display within the Timesheet Claim Summary for both Employees and Managers where the status will be *Saved for Later*.
5. On the Timesheet Claims Summary screen, this appears now as an additional claim.

2.3. Multiple Levels within Workflow

Where multiple levels of workflow approval are required, the on-screen timesheet status is reflective of this. For example, where the timesheet claim process has two levels of approval and the manager at level 1 approves the timesheet, the status is updated to *Recommend Approval* so that the manager at level 2 and the employee are aware that the first level approval has been completed.

See our [Timesheet Claims](#) guide, for further guidance on workflow.

2.4. Timesheet Entry Notes for the Claims Process

The timesheet status e.g. Submitted, Approved has an impact where timesheets have been entered into the submission/approval process.

Where a timesheet claim has been 'Submitted' or 'Approved', users are stopped from adjusting the claim. Why?

- The claim has been submitted for approval, adjusting the details of the claim will invalidate the claim (e.g. this is not what was submitted or approved)
- The claim has been submitted into the workflow with header and details records, adjusting any of these will invalidate the claim. If an employee tries to modify a claim, the following message is displayed.

This record can not be edited as it has been actioned on in the timesheet summary area.

- If a manager needs to make a change to a timesheet, then the manager needs to reject it.

2.5. Unprocessed Claims and Period End

Where a period end occurs, the generate timesheet program will only transfer timesheet claims where final approval has been completed.

What happens where claims have not reached final payment?

- Employees have timesheet claims that are 'Saved for Later' and never submitted them.
- Manager fails to approve timesheet claims before the period end.
- Manager has rejected claims and the employee failed to action the claim.

As part of the period end process any claims that have not reached final approval are automatically carried forward to the next period so that the claims are not lost, and the relevant roles can action them as required e.g. so that employee can submit that "saved for later" claim for the manager to approve.

While the claims are brought forward to the next period the actual dates of the claim are reflective of the period, they were recorded in. The dates are displayed below the person's name

on the claim summary screen and if the user selects **Input Time** from the 3-dot menu, the timesheet input uses the claim dates to open the correct period automatically, removing the need to scroll back to previous periods.

3. Managing Timesheets

As a manager you have additional functionality within the Timesheet Input screen to be able to view and manage reports, timesheets. Guidance on entering timesheets can be found in our [guide](#), additional functionality will be covered within this section.

3.1. Weekly Work Schedule

For Managers & Administrators the Weekly Work Schedule Screen shows Shift Types and Patterns for seven days of the week. This can be accessed via the Actions button within the Timesheet Inputs screen.

Weekly Work Schedule										
Manager Dashboard > Timesheet Claims > Timesheet Input > Weekly Work Schedule										
From 07-Dec-2020 To 13-Dec-2020 < > RESET PATTERNS										
Date	Day	Shift Name	Shift Type	Pattern Name	Pattern	Pattern D...	Type	Start Time	End Time	Hours
7 DEC	Monday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	7 Hour 30 Min Day 09...	7 Hour 30 Min Day 09...		Primary	09:00	17:30	7.5
8 DEC	Tuesday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	7 Hour 30 Min Day 09...	7 Hour 30 Min Day 09...		Primary	09:00	17:30	7.5
9 DEC	Wednesday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	7 Hour 30 Min Day 09...	7 Hour 30 Min Day 09...		Primary	09:00	17:30	7.5
10 DEC	Thursday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	7 Hour 30 Min Day 09...	7 Hour 30 Min Day 09...		Primary	09:00	17:30	7.5
11 DEC	Friday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	7 Hour 30 Min Day 09...	7 Hour 30 Min Day 09...		Primary	09:00	17:30	7.5
12 DEC	Saturday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	Rest Pattern	Rest Pattern		Primary			
13 DEC	Sunday	37.5 Hrs - 7.50 Hrs Mt...	37.50_001	Rest Pattern	Rest Pattern		Primary			

Note: This has been rebranded as the *Weekly Work Schedule Screen* and was previously known as the *Work Pattern Schedule* in the Back Office.

The *Weekly Work Schedule* screen contains the following fields:

Field	Details
Date	Date of the shift.
Day	Day of the shift.
Shift Name	Name of the specific shift.

Field	Details
Shift Type	Specific reference for the shift type itself.
Pattern Name	Description of the pattern.
Pattern	Code which identifies the specific pattern.
Pattern Default	This shows the colour associated to the pattern.
Start Time	Start time of the shift.
End Time	End time of the shift.
Hours	This shows the hours for the shift.

3.1.1. Reset Patterns

A Manager or Administrator can update the Pattern field, using the drop-down menu, within the Week Work Schedule screen. This will automatically update the Pattern Default column which will change colour and gives the status of Overridden.

The screenshot shows the 'Weekly Work Schedule' interface. At the top, there's a breadcrumb trail: 'Manager Dashboard > Timesheet Claims > Timesheet Input > Weekly Work Schedule'. A 'RESET PATTERNS' button is in the top right. Below the breadcrumb, there are date pickers for 'From' (07-Dec-2020) and 'To' (13-Dec-2020). The main table has columns: Date, Day, Shift Name, Shift Type, Pattern Name, Pattern, Pattern Default, Type, Start Time, End Time, and Hours. The table shows shifts for Monday through Sunday. On Tuesday (8 DEC), the 'Pattern' column has a dropdown menu open, showing options like 'Standard 7.5 Hour Day', '7 Hour 30 Min Day 09...', '7 Hour 30 Min D...', 'Code 7.5 HOURS', '7 Hour 36 Min D...', 'Code 7.60HRS', '7 Hour 48 Min D...', 'Code 7.80HRS', '8 Hour Day 09:0...', and 'Code 8.00HRS'. The 'Pattern Default' column shows a yellow circle with 'Overridden' for Monday and green circles for the other days.

This can be reset to the original state using the **Reset Patterns** button.

3.2. **Standby Hours**

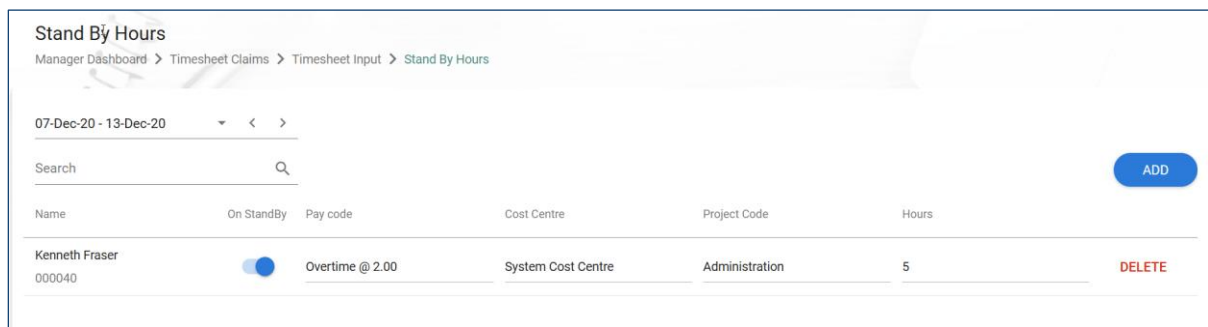

Managers can enter Standby Hours within the Timesheet Input screen. Standby hours is specifically tailored to employees on call in the event of a possible absence or a gap in employee cover.

 **Note:** This is a manager feature only.

Standby Hours can be reached from the **Actions** button on the Timesheet Input screen.

To add standby hours:

1. Click **Add**
2. Choose **Person, Pay Code, Cost Centre, Project Code** and enter **Hours**.
3. Enable toggle **On Standby**.
4. Click **Ok**.
5. To delete hours simply click **Delete** button beside the specific entry.

The screenshot shows the 'Stand By Hours' form. At the top, there is a breadcrumb trail: 'Manager Dashboard > Timesheet Claims > Timesheet Input > Stand By Hours'. Below this is a date range selector showing '07-Dec-20 - 13-Dec-20' with navigation arrows. A search bar is present with a magnifying glass icon. On the right side, there is a blue 'ADD' button. The main area contains a table with the following columns: Name, On StandBy, Pay code, Cost Centre, Project Code, and Hours. A single entry is visible for 'Kenneth Fraser' with ID '000040'. The 'On StandBy' toggle is turned on (blue). The 'Pay code' is 'Overtime @ 2.00', 'Cost Centre' is 'System Cost Centre', 'Project Code' is 'Administration', and 'Hours' is '5'. A red 'DELETE' button is located to the right of the entry.

Name	On StandBy	Pay code	Cost Centre	Project Code	Hours	
Kenneth Fraser 000040	☒	Overtime @ 2.00	System Cost Centre	Administration	5	DELETE

4. Menu Option

4.1. Manager Menu Access

Manager Menu options supporting timesheet claims. The Manager Widget displays a count of timesheet claims that require action and a summary of claims actioned in the last 30 days. The Manager Claims summary lists the summary and details of the claim which is from the Manager Claims widget or directly from the Managers Workforce Management dashboard.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Manager menu profile e.g., Coreportal_Manager
3. From its 3-dot menu, select **Manage Menu Options**.
4. Search for and enable the menu options below.
