1. Overview

1.1. Purpose of the Guide

Operational Demand is an enhancement to People XD's Workforce Management Rostering feature. It allows an administrator to configure grids displaying various imported and calculated data and assign these grids to teams. A manager can then see these grids on the roster details screen to assist in completing staffing requirements for the following week(s).

The screenshot displays the 'Roster Details' interface for '7279 Benton Housekeepers' for the week of '11 Sep 23 - 17 Sep 23'. It includes a table of employee rosters and an 'Operational Demand Grid'.

Name	Mon 11th	Tue 12th	Wed 13th	Thu 14th	Fri 15th	Sat 16th	Sun 17th	Roster	Contract	Difference	Allowed	Overall Roster Total	Cost
Angus Young	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	56.00	10.00	46.00	0.00	56.00	0.00
Carol Decker	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	56.00	10.00	46.00	0.00	56.00	0.00
John Wesley	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	09:00-17:00	56.00	10.00	46.00	0.00	56.00	0.00

Total								336.00	60.00	276.00	0.00	336.00	0.00

	Mon 11th	Tue 12th	Wed 13th	Thu 14th	Fri 15th	Sat 16th	Sun 17th	Weekly Total
Sales	5057.61	4442.29	4901.19	4863.32	4149.04	4841.02	4751.73	33006.20
Employees Working	6	6	6	6	6	6	6	42
Costs	0	0	0	0	0	0	0	0
Occupancy	50.40	120	91.20	105.60	57.60	94.08	110.40	629.28

This guide will explain how to import data, configure the grids, assign the grids, and then view the data.

1.2. How to access the Operational Demand Configuration Screen

The Operational Demand Configuration screen is menu security driven, see section [4.1 Importing Menu Options](#) for further guidance, and once enabled the screen can be found in the WFM Admin Dashboard.

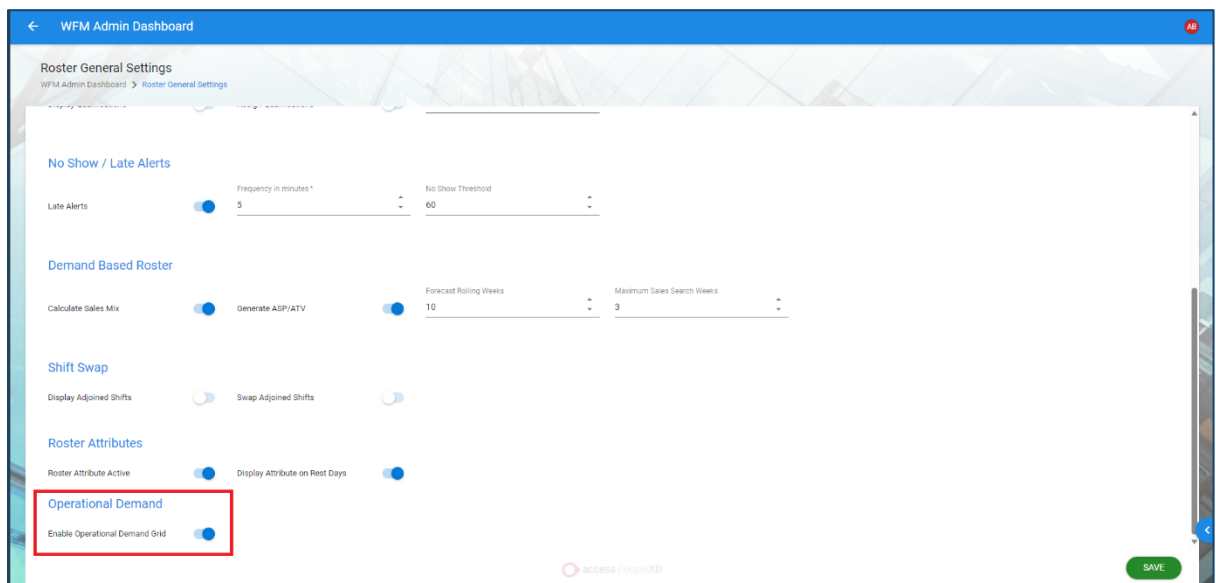

1. Go to the **WFM Admin Dashboard**.
2. Select **WFM Configuration** and click on the **Operational Demand Configuration** tile.
3. The screen will display.

1.3. How to enable Operational Demand for Roster

Once your operational demand grid templates are created, they can be enabled for user to view in the Roster Details screen. To do this:

1. Go to the *WFM Admin Dashboard*.
2. Select **WFM Configuration** and click on the **Roster General Settings** tile.
3. Scroll to the Operational Demand section.
4. **Enable** the Operational Demand Grid toggle.

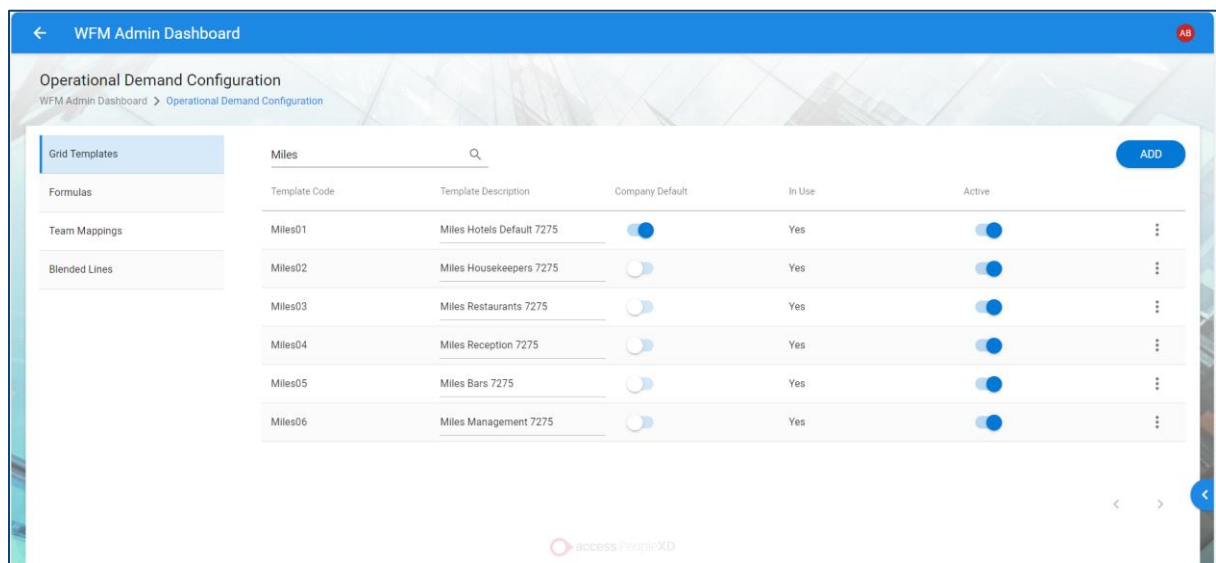

2. The Operational Demand Configuration Screen

Once you have accessed the Operational Demand Configuration Screen, you will see it comprises of 4 configuration screens:

- Grid Templates
- Formulas
- Team Mapping
- Blended Lines

Note: Formulas, blended lines and team mapping must be created before you can create your Operation Demand Grid Templates.

2.1. The Grid Templates Screen

The **Grid Templates** screen contains the following fields:

Field	Details
Template Code	Unique code for the template.
Template Description	User friendly description.
Company Default	Enable this template as the Company Default.

Field	Details
	 Note: There can only be ONE Company Default template. Setting a new template as default will disable the existing company default template.
In Use	Indicates that this template is assigned to a grid.
Active	Allows the grid to be selected for a team.

2.1.1. To Create a New Grid Template

To add a new Grid Template, follow the steps below:

1. Click **Add**.
2. Enter the **Template Code**.
3. Enter the **Template Description**.
4. **Enable** the Active toggle, this will make this template immediately available.
5. If this template is to be used as the Company Default, then enable the Site Default toggle.

 **Note:** There can only be **ONE** Company Default template. Setting a new template as default will disable the existing company default template.

6. Click **OK**.
7. Your new Grid Template is ready to be configured.

2.1.2. Configuring a Grid Template

To configure a Grid Template, from the Grid Template Summary screen search for the template you want to configure, then follow the steps below:

1. Using it's 3-dot menu select **View**.
2. Click **Add** to enter an item to appear on the grid. The cursor will appear in the Position column, use Tab to populate the fields:
 - **Position** - The order of the items on the grid can be changed by either clicking in the position field and changing the number, or, by click and holding on the 4-line button and dragging it up or down to the required position.
 - **Ref Code** - use the drop-down list to select an item. These can be data items, the results of formulas created (see [Section 2.2 Formula Screen](#)), or blended lines (see [Section 2.4 Blended Lines](#)).

- **Type Origin** -this will automatically populate with the source for the Ref Code selected.
This will be *ROSFOR* = Roster Information, *OPDEML* = Operational Demand List or *FORMULA* = The results of a formula created.
- **Display Name** – enter a user-friendly name for this information that will be displayed on the grid.
- **Rounding** – use the drop-down list to select the required option. Options available are:

Option	Description
Up to the nearest	This will round the number up to the number of decimal places. For example, 1.3 is rounded to 2, 1.5 is rounded to 2 and 1.7 is also rounded to 2.
Down to the nearest	This will round the number down to the number of decimal places allowed. For example, 1.3 is rounded to 1, 1.5 is rounded to 1 and 1.7 is also rounded to 1.
To the nearest	This will round the number to the nearest value based on the number of decimal places. For example, 1.3 is rounded to 1, 1.5 is also rounded to 1 and 1.7 is rounded to 2.
To the nearest (favourable)	This will round the number to the nearest value based on the number of decimal places with a mid-point number being rounded up. For example, 1.3 is rounded to 1, 1.5 is rounded to 2 and 1.7 is also rounded to 2.

Examples:

Option (to no decimal places)	Original Value	Rounded Value	Original Value	Rounded Value	Original Value	Rounded Value
Up to the nearest	1.3	2	1.5	2	1.7	2
Down to the nearest	1.3	1	1.5	1	1.7	1
To the nearest	1.3	1	1.5	1	1.7	2
To the nearest (favourable)	1.3	1	1.5	2	1.7	2

- **Value** - enter the figure that data should be rounded to between 0 to 1. For example, if the figure should be rounded to the nearest 0.5 then choose *To the nearest* in step 6 and then enter 0.5 in *Value*.
 - **Rounding Places** - enter how many decimal places should be displayed. For example, if 2 is entered in this field then 0.3333333 will be displayed as 0.33.
3. Once happy, click **Save**.
 4. Your Grid Template is now configured and ready to be assigned to a Team.

2.1.3. Conditional Formatting

To add Conditional Formatting to a grid expand it's 3-dot menu and select **Conditional Formatting**. The Conditional Formatting screen will display:

Conditional Formatting for Room Sales Actual (Number)

If result is under And/Or

If result is under Then display in

If result is over And/Or

If result is over Then display in

CANCEL OK

The **Conditional Formatting** screen contains the following fields:

Field	Details
If the result is under	Enter a specified value.
And/Or	Optional field.
If the result is under	Enter the value of another piece of data.
Then display in	Select your chosen colour.
If the result is over	Enter a specified value.
And/Or	Optional field.

Field	Details
If the result is over	Enter the value of another piece of data.
Then display in	Select your chosen colour.

Examples:

Conditional Formatting for Room Sales Actual (Number)

If result is under And/Or

If result is under Then display in

If result is over And/Or

If result is over Then display in

CANCEL OK

1: Actual Number

If the actual number of rooms sold is under the budgeted rooms sold, then it will be highlighted in red.

If the actual number of rooms sold is over the budgeted rooms sold, then it will be highlighted green.

Conditional Formatting for Rooms Sold Variance

If result is under And/Or

If result is under Then display in

If result is over And/Or

If result is over Then display in

CANCEL OK

2: Variance

If the rooms sold variance (actual rooms sold minus budgeted rooms sold) is less than 0 then this is highlighted red.

If it is more than 0 then it is highlighted in green.

Room Sales Actual (Number)	205	272	203	188	379	281	381	1,909
Room Sales Budget (Number)	494	325	482	451	352	234	387	2,725
Rooms Sold Variance	-289	-53	-279	-263	27	47	-6	-816

2.1.4. To Show an Event on a Grid

1. From the *Operational Demand Configuration* screen, select your grid.
2. Expand its 3-dot menu, select **View/Edit**.
3. Click **Add**.
4. In **Ref Code**, use the dropdown to select **Event Description**.
5. In **Display Name** enter the name you want to appear on the grid.
6. Click **Save**.
7. Then, navigate to the *Administrator Dashboard* and select **WFM Settings**.
8. From *Roster Links* **Open** Event Diary.
9. Enter the details of an event and save. This will now be shown on your grid.

Room Revenue Variance	-43,350	-7,950	-41,850	-39,450	4,050	7,050	-900	-122,400
Event: Wedding	12:00-01:00							
Budget Housekeeping PRS	0.58	0.88	0.59	0.63	0.81	1.22	0.74	5.45

2.1.5. Assigning a Grid Template to a Team

There are 3 ways a Grid Template can be assigned to a team.

1. Set as Company Default.

There must always be 1 grid template flagged as **Company Default**. This grid template will be used on all team's roster details screen unless a different template is assigned to a team or one of its parents.

2. From the Operational Demand Configuration Screen

To assign a new template to a team and all its child teams from the Operational Demand Configuration screen, follow the steps below:

1. Click on the 3-dot menu of the relevant template and select **Assign Team**.
2. Click **Add**.
3. Use the drop-down to select the team to be assigned. If more than one team needs the template assigned, repeat the process.

3. From the Team Area Configuration Screen

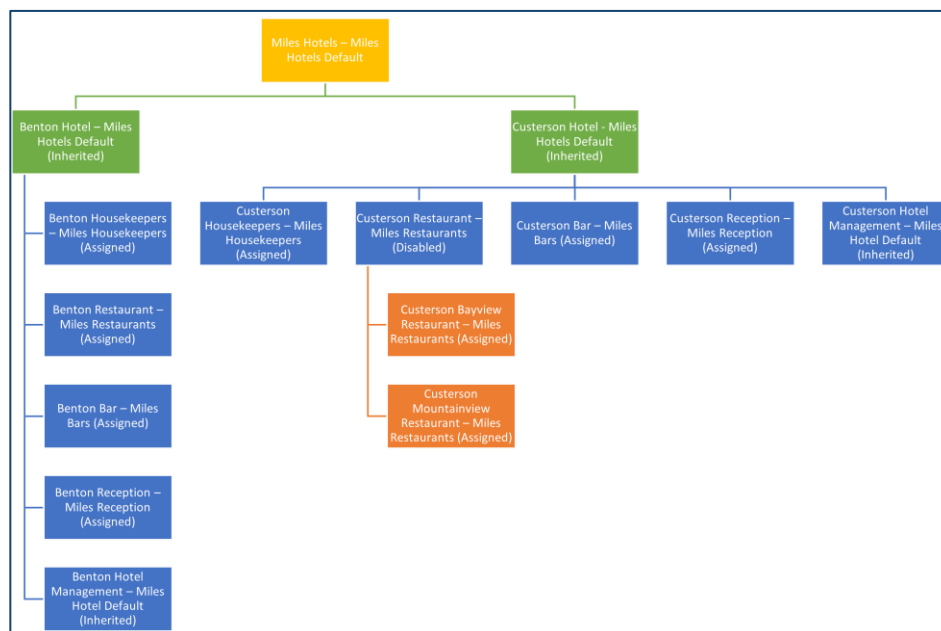

To assign a grid template to a team from the Team Area Configuration screen, follow the steps below:

1. Navigate to the *WFM Admin Dashboard*.
2. Select **WFM Configuration** and click on the **Team Area Structure** tile.
3. Search for the required team and from its 3-dot menu select **Configure**.
4. **Open** the General Parameters.
5. In the Operational Demand section, select the options as required:
 - **Inherited Template** – This pulls through the Company Default or Parent template assigned if a child team. This is a non-editable field.
 - **Template Override** – Use the drop-down options to override the Inherited Template for this team. This will only override for this team.
 - **Disable Grid** – If this toggle is enabled, no grid template will be assigned to this team. This will disable the grid on this team only, this is not inherited by child teams.
6. Once you have made your select, Click **Save**.

2.1.6. Example Structure

By using a combination of the assigned, inherited, and disabled grid templates a structure can be setup to match the requirements of the organisation.

For example, a simplified two hotel group may look like:

- Both hotels inherit the default grid.

- Under the **Benton Hotel** the Housekeepers, Restaurant, Bars and Reception all have their own grids assigned and Management inherits the Default from Benton Hotel.
- Under **Custerson Hotel** the Housekeepers, Bar and Reception have their own grids assigned and Management is inheriting the grid from the above structure. Restaurant has the grid disabled and the two individual restaurants have their own grids assigned.
- As all of the restaurants have the same grid assigned each will display the same data but will use their specific values.

2.1.7. View an Operational Demand Grid

To view an Operational Demand Grid, follow the steps below:

1. Navigate to the *Workforce Management* Dashboard.
2. Select **Roster Details**.
3. Use the dropdowns to select the **Team** and **Date range**, you wish to view.
4. Click **Apply**.

The screenshot displays the 'Roster Details' page in the Workforce Management system. At the top, there's a header with 'Workforce Management' and a search bar. Below this, the 'Roster Details' section shows filters for 'Group By', 'Team' (7275 Benton Housekeepers), and 'Date range' (11 Sep 23 - 17 Sep 23). An 'APPLY' button is next to the date range. The main table lists roster members with their names and various metrics. The 'Operational Demand Grid' is visible at the bottom of the screen, currently minimised.

Name	Mon 11th	Tue 12th	Wed 13th	Thu 14th	Fri 15th	Sat 16th	Sun 17th	Roster	Contract	Difference	Allowed	Overall Roster Total	Cost
Angus Young	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	56.00	10.00	46.00	0.00	56.00	0.00

7. To minimise the grid either click on the **=** and **drag down** or click on the drop-down arrow (▼) against the Operational Demand Grid header.

2.1.8. Export an Operational Demand Grid

To export an Operational Demand Grid to Microsoft Excel, follow the steps below:

1. From the Operational Demand Grid displayed, click **Export to Excel**.
2. Save or open the export file in your browser.
3. Click **Yes** on the message regarding the file format.
4. The Grid will now open or be saved in Microsoft Excel, including the conditional formatting colours.
 - The colours may be slightly different to the ones in PeopleXD.
 - The colours are exported, **not** the conditional formatting formulas.

SAVE

The **Formulas** screen contains the following fields:

Field	Details
Formula Code	Unique code for the formula. This is a Mandatory field.
Formula Name	Full formula name. This is a Mandatory field.
Interface Type/Value	First data item for the formula. This is a Mandatory field.
Value	Value if <i>Entered Value</i> is chosen as Interface Type/Value.
Action	Operation performed in the formula. This is a Mandatory field.
Interface Type/Value	Second data item for the formula. This is a Mandatory field.
Value	Value if <i>Entered Value</i> is chosen as Interface Type/Value.
Display Type	Display result as a value or percentage. If left blank, Value will be used as type.
Delete	Delete this formula.

2.2.1. To Create a New Formula

To add a new formula, follow the steps below:

1. Click **Add** and populate the fields:
 - **Formula Code** – the code you want to assign to the formula.
 - **Formula Name** – the description for the formula.

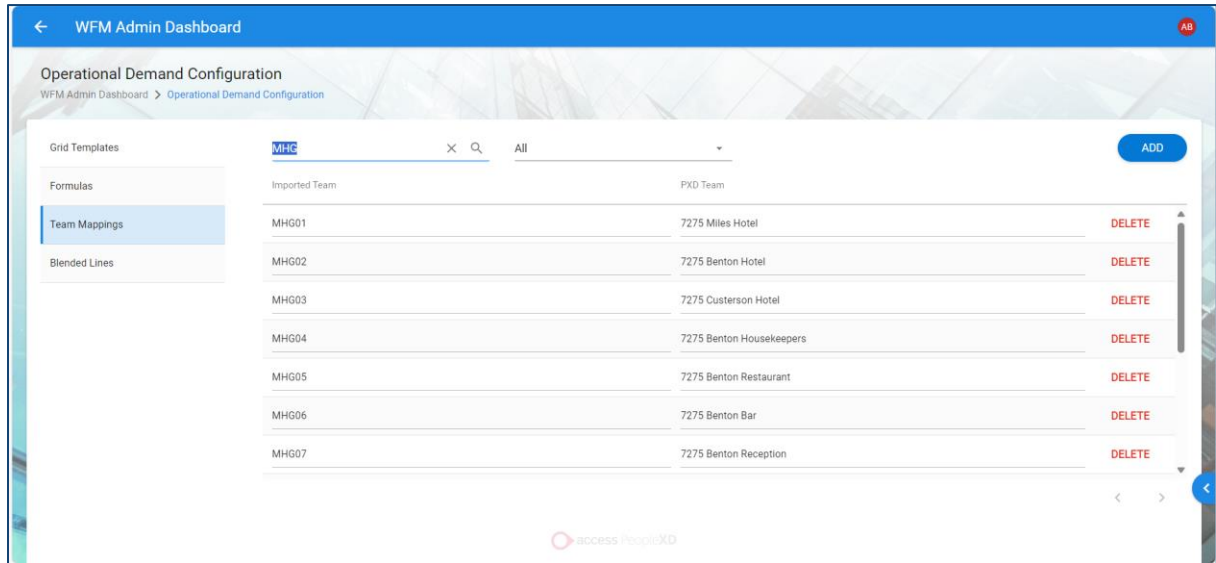

- **Interface Type/Value** - select the option that will be the first part of the formula. If this will be a fixed value, then choose *Entered Value*. You can also choose the imported data, system data or the results of a formula.
 - **Value** - if Entered Value was selected at step 4, then enter the required value.
 - **Action** - select what you want the formula to do. Option available are: Add, Minus, Divide, Multiply or Multiple Add.
 - Multiply Add means that the first entered value is multiplied by the second entered value and added to the first entered value (Result = Value 1 + (Value 1 x Value 2)).
 - **Interface Type/Value** - select the option that will be the second part of the formula. If this will be a fixed value, then choose *Entered Value*.
 - **Value** - if Entered Value was chosen at step 8, then enter the required value.
 - **Type** - use the drop-down option to select the result value type. Options available are: value or percentage.
2. Once happy with your selection, click on **Save**.

2.2.2. To Delete a Formula

1. From the Formula that is no longer required, click **DELETE**.
2. Confirm **Yes**, to the warning message.
3. The formula will be deleted and removed the formula from grids.

2.3. The Team Mappings Screen

In Operational Demand Grids you can use data that you have exported from another system and imported into People XD through People Hub Roster Transactions. As it is possible that the team names in the other system are not the same as the team names in People XD there is a mapping screen. This will allow you to map a team name from the other system to a team name in People XD rather than having to edit your input spreadsheet and change the team names.

The **Team Mappings** screen contains the following fields:

Field	Details
Imported Team	Team name or code from the PeopleHub import file.
PXD Team	Team name in People XD.
Delete	Delete this mapping.

2.3.1. To Create a New Team Mapping

To add a new team mapping, follow the steps below:

1. Click **Add**.
2. Enter the **External Team Code/Name**.
3. Select the PeopleXD Team, from the drop-down options, for this to be mapped to.
4. Click **OK**.

2.3.2. To Delete a Team Mapping

1. From the Team Mapping that is no longer required, click **DELETE**.
2. Confirm **Yes**, to the warning message.

2.4. Blended Lines

A *Blended Line* is a line of data that shows one reference code up until the current day and then a different reference code after the current day. An example of this would be to show the number of hotel rooms sold. For example, this grid is for Monday and shows the actual number of rooms sold in a week blended with the budgeted number of rooms sold in the week.

	Mon 25th	Tue 26th	Wed 27th	Thu 28th	Fri 29th	Sat 30th	Sun 31st	Weekly Total
Room Sales Blended	205	325	482	451	352	234	387	2,436
Room Sales Actual (Number)	205	272	203	188	379	281	381	1,909
Room Sales Budget (Number)	494	325	482	451	352	234	387	2,725
Rooms Sold Variance	-289	-53	-279	-263	27	47	-6	-816

2.4.1. To Create a Blended Line

1. From the *Operational Demand Configuration* screen, select **Blended Lines**.
2. Click **Add**.
3. Enter a **Blended Code** for the new Blended Line.
4. In *Reference Code 1*, use the dropdown to select the **Reference Code** to be displayed up to and including the current day.
5. In *Reference Code 2*, use the dropdown to select the **Reference Code** to be displayed from the day after the current day until the end of the week.
6. Enter the **Display Name** to appear on the Operational Demand Grid.
7. In *Display Type* select **Value** or **Percent**, as appropriate.
8. Click **Save**.

2.4.2. To Delete a Blended Line

1. From the Blended Line that is no longer required, click **DELETE**.
2. Confirm **Yes**, to the warning message.
3. Click **Save**.

3. Insight Reporting

3.1. View Name

The view **Data Trending (Time)** will return the follow data for you to use when designing your reports:

- | | |
|--------------------|-------------------|
| • Date Predicted | • Date Updated |
| • Start Time | • End Time |
| • Name | • Pattern |
| • Pattern Type | • Predicted By |
| • Predicted Name | • Predicted Value |
| • Team Area | • Team Area Name |
| • Trans Date | • Type |
| • Type Description | • Updated By |
| • Updated Name | • Updated Value |
| • Username | • Value |

To report on events, from the Insight Dashboard:

1. Select **Home**, then expand the Actions button and click **Create Report**.
2. Select the **Format** of your report and give it a **Name**, then click **OK**.
3. From *Select a Setting*, select **Columns**.
4. From *ADD*, select **Column**.
5. From *Filter Columns By View*, select **Data Trending (Time)**.
6. Select the required items to include in your report.
7. Once happy, click **OK**.
8. To display the report, click **Refresh Data** or enable the **Auto refresh on all changes** toggle.

For further guidance on how to use Insight, check [PeopleXD Insight User Guide Library](#)

4. Menu Options

The Menu profiles **WFM_OP_DEMAND_ADMIN** and **WFM_OP_DEMAND_MANAGER** have been created to provide users full access to Operational Demand. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

4.1. Importing Menu Options

1. Navigate to the **Security Dashboard** and select the **Menu Profiles** tab.
2. Search for the existing menu profile e.g.: Coreportal_Admin.
3. Expand the 3-dot menu and select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile **WFM_OP_DEMAND_ADMIN**.
6. Review the confirmation message.

Once imported, the menu options and webservices are assigned to the existing menu profile.

4.2. Access for Administrators

The table below details the menu option required for Administrator access to the **Operational Demand** functionality.

All menu options are included in the menu profile **WFM_OP_DEMAND_ADMIN**.

Menu Option	Menu ID	System
CorePortal - Workforce Management Admin	MAIN_MENU.WRKMGMTADMIN	CorePortal
CorePortal - Workforce Management Manager	MAIN_MENU.WRKMGMT	CorePortal
Add Team Area Access	WRKMGMT_MENU.ADDTEAMAREA	CorePortal
Team Area Assignment	PERSON_MAINT_ADM_MENU.TEAM_AREA_ASSIGN_ADM	CorePortal
