1. Overview

1.1. Purpose of the Guide

This guide aims to explain the how to manage and configure WFM Pay Codes on Portal.

It covers the following:

- The Pay Code Screen
- Pay Code Screen Configuration
- Configuring Pay Codes
- Pay Code Groups
- Data Migration

1.2. Payroll v Non-Payroll Sites

The Pay Codes screen offers different functionality dependent on whether your site is a Payroll or Non-Payroll site.

- **Payroll sites** - If you have PeopleXD Payroll site, Pay Codes will need to be set up in Payroll initially then imported into WFM and configured before use. See [Section 2](#) for further details.
- **Non-Payroll sites** – If you have a non-payroll, WFM site, Pay Codes can be created and configured for use on your site. See [Section 3](#) for further details.

2. Pay Codes Screen for Payroll Sites

2.1. What is the Pay Codes Screen?

The Pay Codes Screen is used to maintain and configure WFM Pay Codes. Portal supports an unlimited amount of Pay Codes, such as absence requests, leave, timesheets or exceptions. Pay Codes required for Time & Attendance purposes are determined by operational policies.

If you have PeopleXD Payroll site, Pay Codes will need to be set up in Payroll initially then imported into WFM and configured before use.

2.2. How to access the Pay Codes Screen

To access the *Pay Codes* screen:

1. Go to the **WFM Admin Dashboard** and click the **WFM Configuration** tab.
2. Search for and click the **Pay Codes** tile.
3. The *Pay Codes* screen displays.

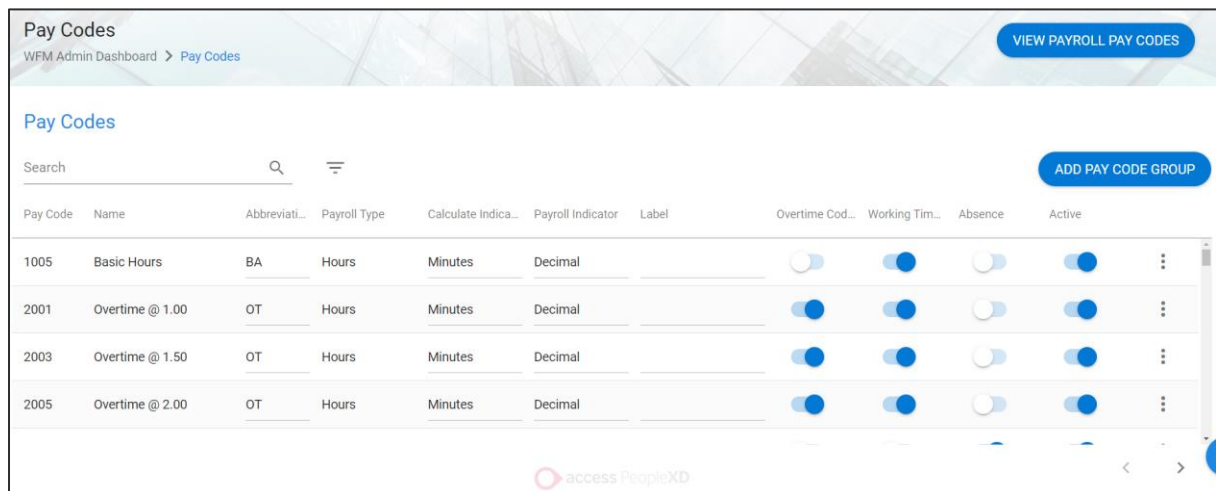

Pay Code	Name	Abbreviation	Payroll Type	Calculate Indicator	Payroll Indicator	Label	Overtime Codes	Working Time	Absence	Active
1005	Basic Hours	BA	Hours	Minutes	Decimals		☐	☒	☐	☒
2001	Overtime @ 1.00	OT	Hours	Minutes	Decimals		☒	☒	☐	☒
2003	Overtime @ 1.50	OT	Hours	Minutes	Decimals		☒	☒	☐	☒
2005	Overtime @ 2.00	OT	Hours	Minutes	Decimals		☒	☒	☐	☒
2244	2244 SOCIAL WELFARE	SK	Value	Minutes	Decimals		☐	☐	☒	☒
3600	Normal Attendance	BA	Hours	Minutes	Non Payroll		☐	☒	☐	☒

2.3. The Pay Codes Screen

When the *Pay Codes* screen displays, you are presented with a list of WFM Pay Codes.

Within the page you can:

- Search for a Pay Code
- Filter the grid for a particular Pay Code
- Add a Pay Code Group
- View Payroll Pay Codes

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific pay code you wish to configure.
Filter	Use the filter button to refine your search. You can filter by the following: • Calculations • Overtime Codes • Working Time Codes • Active • Payroll Indicator • Absences • Labels

The **Pay Codes** screen contains the following fields:

Field	Details
Pay Code	This identifies the code pertaining to the pay code.
Name	It is recommended that a meaningful short name be used to easily identify the Pay Code
Abbreviation	The abbreviation is used for the purposes of calendar displays and enquiries and for analysis purposes.
Payroll Type	This identifies the type of pay role type e.g., Hours, Value, Units, Days etc.
Calculate Indicator	This indicates whether calculations are in minutes or in decimal.
Payroll Indicator	You can choose either Decimal, Minutes or Non-Payroll.
Label	You can label a pay code as belonging to a specific group.
Overtime Codes	When this toggle is enabled, overtime codes will be shown.
Working Time Codes	When this toggle is enabled, working time codes will be shown on the screen.
Absence	When this toggle is enabled, absence codes are shown on the screen.
Active Indicator	This toggle allows you to make a Pay code active or inactive. Once it is inactive it will be hidden from other screens.

2.3.1. Add Pay Code Group

You can access the Pay Codes Groups screen from the Pay Codes screen. To do this click **Add Pay Code Group**. From here you can create and manage Pay Code Groups.

 **Note:** For further guidance on Pay Code Access Groups see the [Pay Code Access Groups - Configuration Guide](#) on the Knowledge Base.

2.3.2. Viewing and Editing a Pay Code

On the Pay Codes screen, you can view and edit specific Pay Codes. To do this:

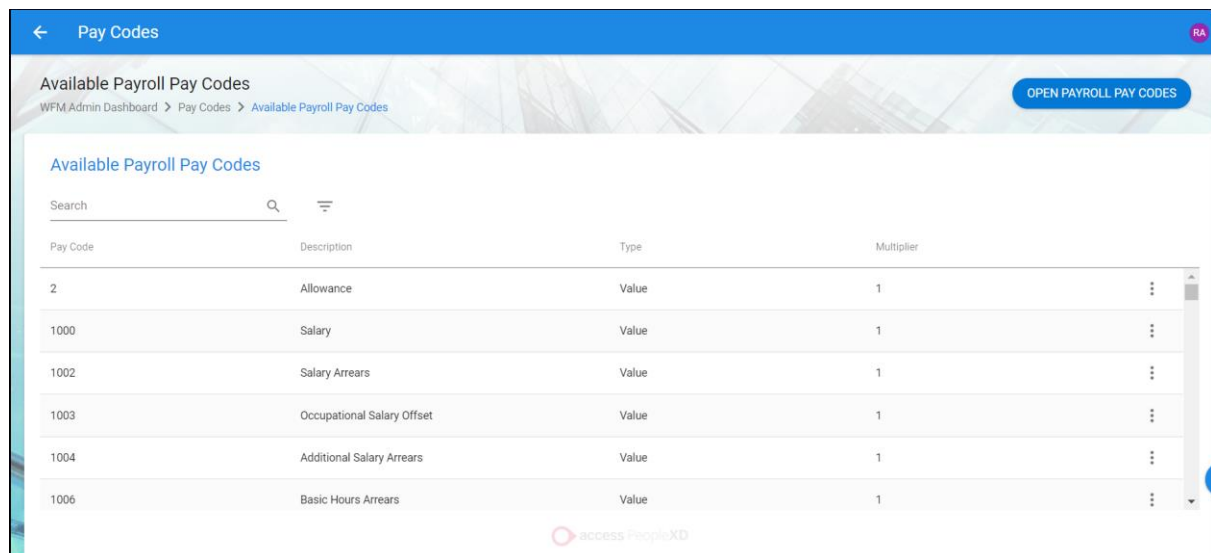

1. Expand the relevant 3-dot menu and click **View/Edit Pay Code**.

See [Section 4: Pay Code Configuration](#) for further information.

2.4. Available Payroll Pay Codes Screen

To access the Available Payroll Pay Codes screen:

1. Click **View Payroll Pay Codes**.
2. The *Available Pay Codes* screen displays a list of pay codes that are not in WFM.

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific pay code you wish to import.
Filter	Use the filter button to refine your search. You can filter by the following pay code types: • Days • Hours • Units • Values

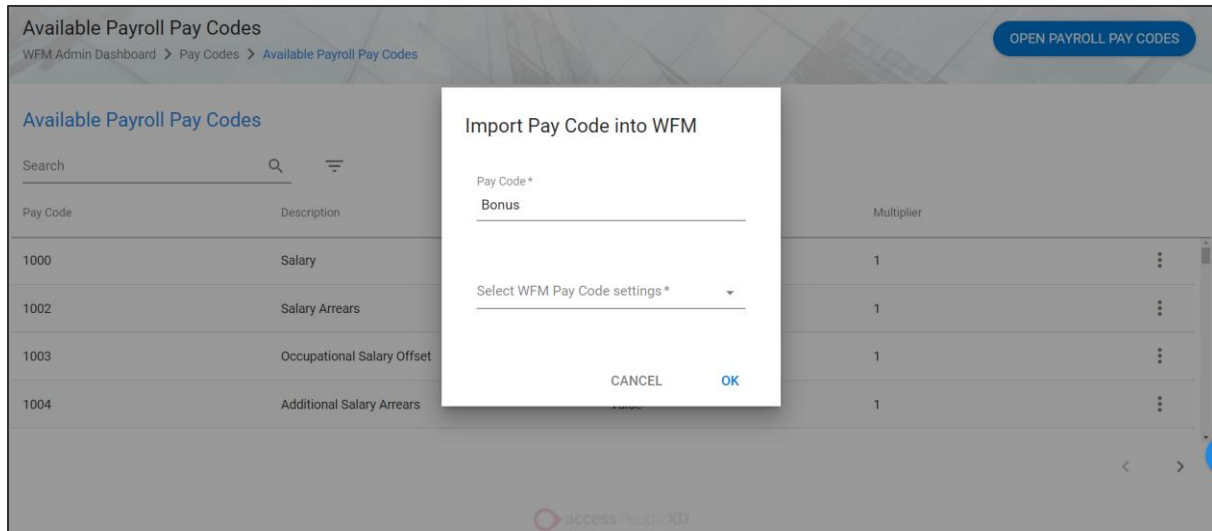

The **Available Payroll Pay Codes** screen contains the following fields:

Field	Details
Pay Code	This identifies the code pertaining to the pay code.
Description	This is the description of the pay code.
Type	This identifies the type of pay role type e.g., Hours, Value, Units, Days etc.
Multiplier	Enter a value which will be multiplied by the rate.

2.4.1. Import to Copy

This allows you to import the Payroll Pay Code and give it the settings of a WFM Pay Code. To do this:

1. Expand the relevant 3 dot menu and click **Import to Copy**.

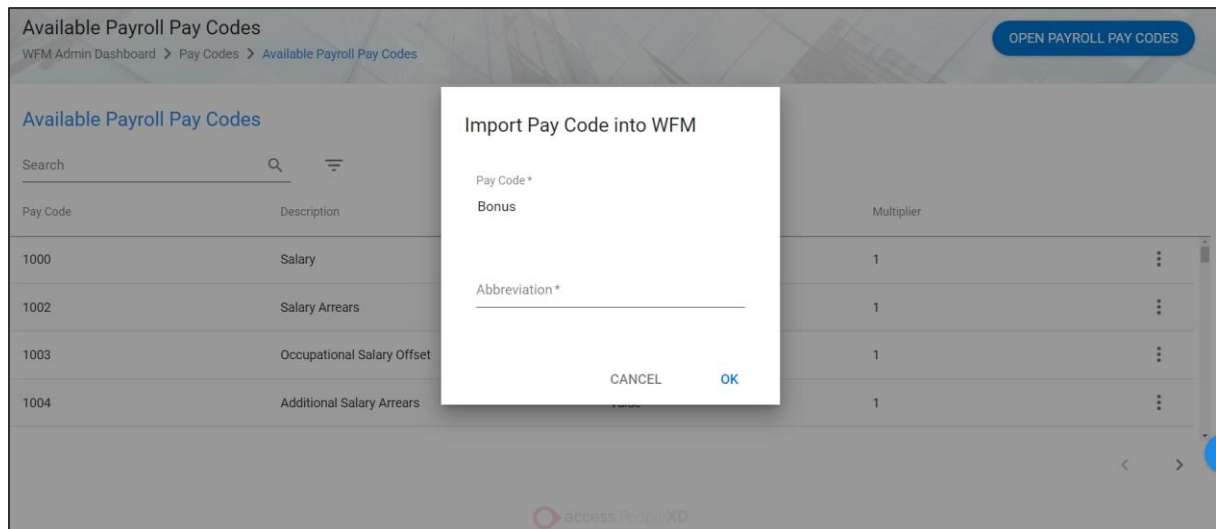

2. If required update the description.
3. Select a **WFM Pay Code setting** from the drop-down list.
4. Click **OK**.

Note: Import to Copy, automatically assigns the Sign-Off Category of the WFM Pay Code Setting. If required, this can be changed in the MSS Sign-Off Summary Display screen located in System Parameters > Reference K-P menu.

2.4.2. Import New

This allows you to import the Payroll Pay Code and its configuration into WFM. To do this:

1. Expand the relevant 3 dot menu and click **Import New**.

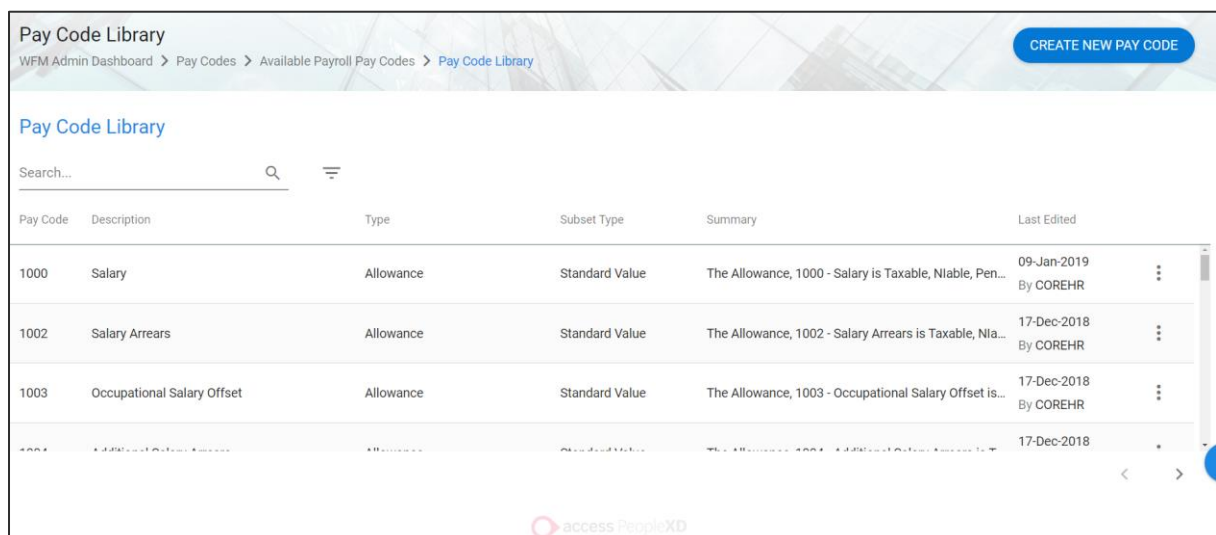

2. Enter an **Abbreviation** to denote the Pay Code.
3. Click **OK**.

2.4.3. Open Payroll Pay Codes

To view and manage Payroll Pay Codes:

1. Click **Open Payroll Pay Codes**.
2. The *Pay Codes Library* screen in Payroll displays.

3. Pay Codes Screen for Non-Payroll Sites

3.1. What is the Pay Codes Screen?

The Pay Codes Screen is used to create, maintain and configure WFM Pay Codes. Portal supports an unlimited amount of Pay Codes, such as absence requests, leave, timesheets or exceptions. Pay Codes required for Time & Attendance purposes are determined by operational policies.

3.2. How to access the Pay Codes Screen

To access the Pay Codes screen:

1. Go to the **WFM Admin Dashboard** and click the **WFM Configuration** tab.
2. Search for and click the **Pay Codes** tile.
3. The *Pay Codes* screen displays.

Pay Code	Name	Abbreviation	Payroll Type	Calculate Indicator	Payroll Indicator	Label	Overtime Codes	Working Time Co.	Absence	Active
1009	ANNUAL LEAVE HOURS (1)	BA		Minutes	Decimal	casuals	☐	☒	☒	☒

1108	1108 BASIC HOURS 2	UP		Minutes	Decimal		☐	☐	☐	☒

3.3. The Pay Codes Screen

When the Pay Codes screen displays, you are presented with a list of WFM Pay Codes.

Within the screen you can:

- Search for a Pay Code
- Filter the grid for a particular Pay Code
- Add a Pay Code
- Add a Pay Code Group

Pay Code	Name	Abbreviation	Payroll Type	Calculate Indicator	Payroll Indicator	Label	Overtime Codes	Working Time Co.	Absence	Active	ACTIONS
1009	ANNUAL LEAVE HOURS (1)	BA		Minutes	Decimal	casuals	☐	☒	☒	☒	Add

1050	BASIC HOURS - Decimal	BA		Decimal	Decimal	casuals	☐	☒	☐	☒	...
1051	Extra Hours Worked - Decimal	BA		Decimal	Decimal		☐	☐	☐	☒	...
1101	Test Scale Ded 1	AD		Minutes	Decimal		☐	☐	☐	☒	...
1108	1108 BASIC HOURS 2	UP		Minutes	Decimal		☐	☐	☐	☒	...

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific pay code you wish to configure.
Filter	Use the filter button to refine your search. You can filter by the following: • Calculations • Overtime Codes • Working Time Codes • Active • Payroll Indicator • Absences • Labels

The **Pay Codes** screen contains the following fields:

Field	Details
Pay Code	This identifies the code pertaining to the pay code.
Name	It is recommended that a meaningful short name be used to easily identify the Pay Code
Abbreviation	The abbreviation is used for the purposes of calendar displays and enquiries and for analysis purposes.
Payroll Type	This field identifies the Payroll type of Pay Code e.g., Hours, Values etc.
Calculate Indicator	This indicates whether calculations are in minutes or in decimal.
Payroll Indicator	You can choose either Decimal, Minutes or Non-Payroll.
Label	You can label a pay code as belonging to a specific group.
Overtime Codes	When this toggle is enabled, overtime codes will be shown.
Working Time Codes	When this toggle is enabled, working time codes will be shown on the screen.
Absence	When this toggle is enabled, absence codes are shown on the screen.
Active Indicator	This toggle allows you to make a Pay Code active or inactive. Once it is inactive it will be hidden from other screens.

3.3.1. Add a Pay Code

To add a pay code:

1. Expand the **Actions** menu and click **Add**.
2. Enter the New Pay Code details.

The screenshot shows a modal window titled "Add New Pay Code". It contains the following fields and controls:

- Pay Code***: A text input field.
- Pay Code Name***: A text input field.
- Abbreviation***: A text input field.
- Calculate Indicator***: A dropdown menu.
- Pay Indicator***: A dropdown menu.
- Label**: A text input field.
- Active**: A toggle switch, currently turned on (blue).
- CANCEL** and **OK**: Buttons at the bottom right.

3. Click **OK**.
4. Your new Pay Code will open for you to configure.

See [Section 4: Pay Code Configuration](#) for further information.

3.3.2. Add Pay Code Group

To add a Pay Code Group:

1. Expand the **Actions** menu and click **Add Pay Code Group**.
2. From here you can create and manage Pay Code Groups.

Note: For further guidance on Pay Code Access Groups see the [Pay Code Access Groups - Configuration Guide](#) on the Knowledge Base.

3.3.3. Viewing and Editing a Pay Code

On the Pay Codes screen, you can view and edit specific Pay Codes. To do this:

1. Click the 3-dot menu.
2. Click **View/Edit Pay Code**.

See [Section 4: Pay Code Configuration](#) for further information.

3.3.4. Copy a Pay Code

Copying an existing pay code can be beneficial as it saves time. Copying a pay code maintains the configuration and settings of the pay code. On the Pay Codes screen, you can copy a specific Pay Code. To do this:

1. Click the 3-dot menu.
2. Click **Copy Pay Code**.
3. Enter the New Pay Code and Pay Code Name.
4. Click **OK**.
5. The copied pay code will open for you to further configure, if required.

See [Section 4: Pay Code Configuration](#) for further information.

3.3.5. Delete a Pay Code

On the Pay Codes screen, you can delete a specific Pay Code. To do this:

1. Click the 3-dot menu.
2. Click **Delete**.
3. A warning message will display, click **Yes**.

4. Pay Code Configuration

Note: The pay code configuration screens are the same for both Payroll and Non-Payroll sites.

The configuration screens allow you to customise and configure pay codes, depending on your organisational requirements, and can be accessed through the Pay Codes screen.

Simply search for the pay code you wish to configure and click **View/Edit Pay Code** from the 3-dot menu to access the configuration screens.

4.1. Summary

The Summary tab has all the essential information and is where you configure the Pay Codes General Parameters.

The screenshot shows the 'Annual Leave' configuration screen. The left sidebar has a search bar and a list of tabs: Summary, Leave Request Settings, Leave Request Documents, Absence Settings, Input Validation, Payroll Integration, Calculate Settings, and Costing. The 'Summary' tab is active. The main content area is titled 'General Parameters' and contains the following fields:

- Name:** Annual Leave
- Abbreviation:** AL
- Calculate Indicator:** Minutes
- Payroll Indicator:** Decimal
- Label:** Annual Leave
- Pay Code Order:** (dropdown)
- Balance Affect:** Positive
- Working Time Code:** (toggle)
- Exception Code:** (toggle)
- Absence:** (toggle)
- Overtime Codes:** (toggle)
- Requires Approval:** (toggle)
- Requires Reason:** (toggle)
- Reason Group:** No Reason Codes Applicable
- Requires Narrative:** (toggle)
- HR Only:** (toggle)
- Display Only:** (toggle)

A 'SAVE' button is located at the bottom right of the screen.

The **Summary** screen contains the following fields:

Field	Details
Name	Name of the Pay Code, this is default.
Abbreviation	It is mandatory to enter an abbreviation when creating a Pay Code. The abbreviation is used for the purposes of calendar displays,

Field	Details
	enquiries and analysis purposes. More than one time code can use the same the abbreviation code.
Calculate Indicator	Choose whether to calculate in Decimal or Minutes.
Payroll Indicator	Choose Decimal, Minutes or Non-Payroll.
Label	A label can be used to identify a Pay Code as belonging to a specific group. For example, you can give a label of AL if you are referring to Annual Leave.
Pay Code Order	This allows you to decide in which order the Pay Codes should be displayed on screen in Leave Request and Absence Entry
Balance Affect	This indicates whether the Pay Code will have a positive or negative effect on the balances.
Working Time Code	When enabled the working time code is shown on the screen.
Exception Code	You can highlight Pay Codes as exceptional events on the system. These require further processing by a manager.
Absence	If enabled, Pay Codes are marked as Absence codes, such as Holiday or Sick.
Overtime Codes	If enabled, this marks a Pay Code as an Overtime Code.
Requires Recode	This highlights Pay Codes for recoding when they are being approved. This means that the hours generated against this pay code must be recoded to another Pay Code, so the hours can be signed off.
Requires Approval	This highlights Pay Codes which need to be approved. Any hours associated with such a Pay Code need to be approved prior to payment. Pay Codes submitted as a Leave Request do not require the Requires Approval indicator.
Requires Reason	If enabled, a reason must be provided when this code is inputted. The reason must be selected from a pre-defined list of reason codes.
Reason Group	This field allows you to attach a reason code group to a Pay Code. If a Reason group is attached to a Pay Code, only those codes in the group can be selected via the <i>Maintain Hours</i> or <i>Record Absence Details</i> screen.

Field	Details
Requires Narrative	Enable this toggle if you wish the Pay Code to have further information.
HR Only	If the enabled, this Pay Code is only available to WFM system users with HR Access.
Display Only	If enabled, this Pay Code is display only on the <i>Maintain Hours</i> screen.

4.2. Leave Request Settings

The Leave Request Settings tab allows you to configure the Pay Codes specific to leave requests and manage workflow enabled leave request cancellations.

The **Leave Request Settings** section contains the following fields:

Field	Details
Allow Leave Requests	If the Allow Leave Requests indicator is enabled, employees can request this leave type via the <i>Leave Request</i> screen.
Leave Request Process Code	This field specifies the leave request and approval process that apply for this timecode. i.e., either line manager or HR.
Leave Request Cancel Process Code	Select the cancel leave request process for this Pay Code. I.e., whether this cancelled request should go to the line manager

Field	Details
	for notification or whether the notification should go to the line manager and to HR.
Display on Co-Worker Roster	The pay code is displayed when viewing a co-worker's roster/schedule.
Disable AM/PM on Leave Request	This disables the selection of AM/PM for this Pay Code.
Leave Request Narrative Required	If the Leave Request narrative required indicator is turned on, the comments field on the <i>Leave Request</i> screen must be completed when this leave type is requested. For this leave type, the comment field is mandatory on the <i>Leave Request</i> screen.
Attach Holiday Periods	This allows you to attach holiday periods when you enter the pay code in Record Future Absence and Maintain hours.
Allow Advance Payments	If selected, this pay code may be used when employees are paid in advance
Display on Employee My Leave Detail Workspace App	If selected, this Pay Code will be available in the Workspace app.

The ***Leave Request Cancellations*** section contains the following fields:

Workflow enabled options for cancelling previously **approved leave requests** available to employees & managers. Where Leave Requests are submitted (awaiting manager approval) these can be cancelled by employees directly.

Field	Details
Manager Approval Required	This allows you to select the required leave request cancellation options. Options are: • Always - Manager approval is always required for cancellations. • Number of Days before Start - Manager approval is required if the Leave Request start date is within the <i>Manager Action Required Days</i>. Cancellations outside this

Field	Details
	period can be configured to send a notification (recommended) • Never - Manager approval is not required. Employees can cancel requests at any time. (Leave Cancellation Notifications are recommended) • Always Block Cancel Requests - Employees cannot cancel Leave Requests.
Cancel Workflow (Notification Only)	This is an Optional field. It allows you to send a Notification 'only' to managers informing them that an Employee has cancelled a leave request. No action is required by the manager. This option is applicable where <i>Manager Approval Required</i> has the following settings: • Number of Days before Start (& the leave request is outside the days threshold) • Never
Cancel Workflow (Manager Action)	This option is applicable where <i>Manager Approval Required</i> has the following settings: • Always • Number of Days before An employee submits a cancel leave request that requires manager action. Once a cancellation has been submitted the leave status is updated to 'Cancel Requested'. The Cancel Workflow process informs the Managers of the cancellation and within the Notification centre the manager approves or rejects the employee request. • If Approved, the leave is cancelled, and the status is set to cancelled. • If Rejected, the leave remains approved.

Field	Details
Manager Action Required Days	This option is applicable where <i>Manager Approval Required</i> has the following setting: Number of Days before Enter the number of days before Manager action is required. Any Leave cancellations requests that start within the number of days become subject to manager approval, for example if 15 days was entered any leave cancellation requests that fall within the next 15 days require manager approval before it can be cancelled.
Employee Comment Required	Where enabled Employees must enter a free text comment supporting the request to cancel leave.

 **Note:** The Notification Centre Management Cleardown (located in the Site Manager Widget) also supports the option to filter and clear down 'cancel leave request' notifications.

The ***Leave Request Input Restriction*** section contains the following fields:

Field	Details
Restrict Input of this code to todays date	The <i>ESS input restriction</i> functionality allows you to define the latest date that leave can be requested for (via the ESS Leave Request screen) per Leave Type. Leave requests for dates after this date are not allowed.
Plus/Minus Days	If you wish to stop future booking you can specify that yesterday is the latest date that can be requested. This is done by specifying '-1' in the <i>ESS Input Restriction - days</i> field.

The ***Carried Forward Request*** section contains the following fields:

Field	Details
Carried Forward Request	Any annual leave days which have been carried forward.

**Available from Balance
Period End Date, Minus
Days**

Any days which have been specifically deducted.

4.3. Leave Request Documentation

An admin or a manager may wish to upload any supporting documentation specific to a Pay Code. The Leave Request Documentation tab allows users to upload documentation against the Pay Code.

The screenshot displays the 'Leave Request Documents' configuration page. The top navigation bar includes 'Current Pay Code*' (set to 'Annual Leave'), 'Pay Code 3700', 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimal'. The left sidebar lists various settings, with 'Leave Request Documents' highlighted. The main content area features a 'Supporting Documents Required' toggle switch, which is currently enabled. Below the toggle is a large text box for document uploads. At the bottom, there are three dropdown menus: 'Document Type', 'Warning Level', and 'Document Lead Time'. A note states 'Document is required if absence is > than X days'. A 'SAVE' button is located in the bottom right corner.

The **Leave Request Documents** screen contains the following fields:

Field	Details
Supporting Documents Required	When this toggle is enabled, the system makes it mandatory to upload supporting documents.
Document Type	This field records the type of documentation uploaded against the Pay Code.
Warning Level	Select Warning, Stop or Allow.
Document Lead Time	This field allows you to decide in the case of an absence, for example to decide on the number of days before documentation is required.

4.4. Absence Settings

The Absence Settings tab is used to configure absence and leave Pay Codes.

The **Absence Settings** screen contains the following fields:

Field	Details
Holiday	If this indicator is selected, the Pay Code is marked as a holiday pay code.
Sick	If this indicator is selected, the Pay Code is marked as a sick pay code.
Maternity Code	If this toggle is enabled, it marks the Pay Code as a Maternity code.
Work Related Absence	If this toggle is enabled, it marks the Pay Code as a Work Related Absence.
Allow Absence Detail	If enabled, this leave type will be available for selection through the <i>Absence Entry</i> Screen (Manager & Admin).

Field	Details
Maintain via Absence Details Only	Pay codes enabled may only be entered as an absence via Team Scheduler or Record Absence Details. They may not be entered as Attendance-only via Timesheet Input or Maintain Hours.
Return to Work Interview	This should be enabled if a Return to Work Interview is associated with this leave type. You can then record interview details when leave is recorded against this pay code.
Return to Work Narrative Required	If Return to Work Narrative is turned on, you are obliged to enter a return to work narrative when the absent staff member returns to work.
Unauthorized Absence	If this indicator is selected, it marks the Pay Code as an Unauthorised Absence code.
Authorized Absence	If this indicator is selected, it marks the Pay Code as an Authorized Absence code.
Disable Recurring Absence	When this toggle is enabled, it allows you to disable recurring absences.
Historical Occupational Absence	This marks the Pay Code as a historical absence.
Occupational Absence Type	Choose from the dropdown what kind of leave it is, e.g. Sick Leave or Maternity leave etc.
Absence Entry Process Code	This field is used to link this timecode to an Absence Process. Absence Processes kick off when new absences are booked. They are used to define who gets notified when absences are booked. This process is only kicked off when new absences are booked as opposed to when they are updated or deleted.
Ignore Company Holiday	If Ignore Company Holidays is enabled, any company holidays falling during an instance of this leave type will count as a leave day.

Field	Details
Ignore Include Rest Days on Company Holidays	If this is enabled rest days are not included on company holidays
Skip Company Holidays with Overlapping Leave on Rest Day	If this toggle is enabled, company holidays which overlap on rest days are not included.
Process Code	Use this field to link this timecode to an Absence HR Process. Absence Processes are processes which are kicked off when new absences are booked (either manually via the Record Absence Details or automatically when a leave request is approved).
Pay Code Group	The pay code group which corresponds to the specific absence.
Mandatory Field Change	This shows any mandatory field changes which can be added such as reason codes.

The **Input Validation** screen contains the following fields:

Field	Details
Future Calculations	This toggle when enabled allows future dates to be part of the calculation.
Future Calc Not Delete	Enable this toggle to allow future calculation of hours for Payroll for this Pay Code.
Do not Lock Day	Enable this toggle so the day does not lock on insert, update or delete. The exception is delete in maintain hours.
Stop Overtime Booking	Enable this toggle to stop a user from booking overtime if a full day absence has been recorded.
Max Value Per Day	This field denotes the maximum value added to a Pay Code per day.
Sign Off Warning Level	You can choose whether the unauthorised action is given a warning or is stopped.
Min Value Per Day	Minimum value added to a Pay Code per day.
Restrict Entry to Valid Balance Period	You can choose between Stop, Warn and No Restriction in this field. Stop: To ensure that hours recorded against this pay code are entered against a valid balance period. Warn: To alert the user when this is not the case but to allow the entry No Restriction: To apply no restriction to the entry of this pay code in relation to a balance period.
Enforce Position and Point	Click on this to enforce entry of a position and scale point when entering hours for an employee against a pay code
Medical Salary Type	This allows you to choose from the dropdown for pay codes specific to medical salaries.
Segment	Choose the segment of the day e.g. Full Day, Half Day etc.
Apply Validation	The Consecutive Days Validation enables configuration of the system to warn/stop the user when inputting in excess of the pre-defined Consecutive Days value for this pay code.

Field	Details
	Used to apply consecutive days validation i.e., to restrict a user booking an employee on more than 2 consecutive days.
Warning Level	Stop, Warn or No Restriction.
Consecutive Days	<i>The Consecutive Days Validation</i> enables configuration of the system to warn/stop the user when inputting in excess of the pre-defined Consecutive Days value for this Pay Code.
Balance Code	This allows you to choose a code against the
Apply Validation	The Adjoining Days Validation enables configuration of the system to warn/stop the user inputting this pay code when identified pay codes are in adjoining days.
Warning Level	You can choose to either give a warning or stop the process completely depending on which of these you choose from the drop down.
Rest Type Code	If this is enabled, the code forces a rest day in adjoining days.
Adjoining Pay Code	The Adjoining pay codes enables configuration of the system to warn/stop the user inputting this pay code when identified pay codes are in adjoining days. Where the current Time Code adjoins the time codes specified in the Adjoin Time Code list, users receive an on-screen message warning them that the number of days have been exceeded. The alert level can be stop (cannot continue) or warning (can continue).

4.5.1. Add an Adjoining Pay Code

To add an adjoining pay code on the *Input Validation* Screen, complete the following steps:

1. Click **Add** above the field.
2. Select a Pay Code.
3. Click **Save**.

4.6. Payroll Integration

The screenshot displays the 'Payroll Integration' settings for a specific pay code (3700). The interface includes a sidebar with navigation options like Summary, Leave Request Settings, and Payroll Integration. The main area is divided into two sections: 'Calculation Indicators' and 'Payroll Indicators'. The 'Calculation Indicators' section contains fields for Shift Premium, Premium Pay Code, Acting Up Pay Code, and Pay Allocate Only, along with toggle switches for No Banked Hours, Pay in Days, and Include in Overtime Rules. The 'Payroll Indicators' section includes fields for Rounding Code, ASCII File Element, Code Type, and Pay Value at Negative, with a toggle for Do Not Apply Shift Premium. A 'SAVE' button is located at the bottom right.

The **Payroll Integration** screen contains the following fields:

Field	Details
Shift Premium	This field stores the shift premium, which can be applied to this pay code.
Premium Pay Code	This indicates whether the Pay Code is a premium Pay Code for shift premiums.
Acting Up Pay Code	This is used in conjunction with “acting up” where hours identified as acting up types are transferred to payroll at the acting up time code.
Pay Allocate Only	This is indicative of allocated pay only.
No Banked Hours	This indicates that the Pay Code is not used in the calculation of banked hours.
Pay in Days	Click on to pay time recorded against this Pay Code in days.
Include in Overtime Rules	Click on this to include the Pay Code in the overtime rule at the generate timesheets stage.
Rounding Code	On sites using an ASCII Payroll Interface, when a multiplier has been applied to a calculated Pay Code, a rounding code can be applied to the resultant values.
ASCII File Element	The ASCII File Element field is used to specify which timecodes should contribute to the Basic Hours total on the BI Timesheet

Field	Details
	Reconciliation report and which timecodes should be treated as allowances on the Timesheet Reconciliation report.
Code Type	This allows you choose the specific type of leave.
Pay Value at Negative	When this is enables the pay value shows as negative where a pay code has been allocated This applies to regular timesheet method only.
Do Not Apply Shift Premium	When this toggle is enabled, a shift premium is not applied.

4.7. Calculate Settings

The Calculate Settings tab is used to configure what is added or deducted to calculations.

The **Calculate Settings** screen contains the following fields:

Field	Details
Premium Code	This indicates whether the Pay Code is a premium Pay Code for shift premiums.
Must Work	This indicates that hours at this Pay Code must be worked.
Deduct from Shift Hours	If this indicator is selected, the hours generated at the pay code will be deducted from shift hours.
Effect Basic	This Pay Code will affect basic if this indicator is selected.

Field	Details
Fill Basic Type	This field allows you to choose between Basic and Overtime.
Shift Bonus	If selected, this Pay Code can be used when setting up bonuses on shifts in the Shift Types form.
Do Not Amalgamate in Calc	Enable to stop hours against this code being amalgamated in the calculation.
Do Not Delete in Calc	Enable to stop hours against this Pay Code being deleted in the calculation.
Attendance Type	This indicates what attendance type should be attached to the Pay Code.
Adjust Flexitime	If the <i>adjust flexitime</i> indicator is turned on, this identifies the codes as been part of the flexitime rules, thus hours recorded at these codes are added to basic hours (part of the calculation routine) to generated flexi positive if a person has exceeded their normal hours or flexi negative if a person has not exceeded their normal hours
Keep Manually Entered	This toggle enables you to enter manually.

4.8. Costing

The Costing tab allows you to apply a cost centre for the Pay Code.

The screenshot shows the 'Annual Leave' configuration page with the 'Costing' tab selected. The page includes a search bar, a sidebar with navigation options (Calculate Settings, Costing, Time Sheet Claims, Rostering, Additional Absence Items, Rest Day Absences), and a main content area for 'Cost Centre Allocation'. The 'Current Pay Code*' is set to 'Annual Leave' and 'Pay Code' is '3700'. The 'Payroll Type' is 'Hours', 'Calculate Indicator' is 'Minutes', and 'Payroll Indicator' is 'Decimal'. The 'Cost Centre' is set to a dropdown menu. The 'Cost of Roster' section includes a 'Cost Multiplier' dropdown, an 'Exclude from Costing' toggle (checked), and an 'Exclude from Cost Display' toggle (unchecked). A 'SAVE' button is located at the bottom right.

The **Costing** screen contains the following fields:

Field	Details
Cost Centre	Denotes which the department the Pay Code is aligned to.
Cost Multiplier	Enter a cost multiplier for this code. If Pay Code exists on payroll, then it's multiplier must be 0 or less.
Exclude from Costing	When this is enabled, it should exclude from costing against normal cost centres for planned costs.
Exclude from Cost Display	Enable this to exclude from the cost being displayed on screens.

4.9. Timesheet Claims Screen

This screen allows you to configure settings for when timesheets claims have been submitted.

The screenshot shows the 'Time Sheet Claims' configuration screen. At the top, there are tabs for 'Current Pay Code*' (Annual Leave), 'Pay Code 3700', 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimal'. Below this is a search bar and a list of categories: Costing, Time Sheet Claims (selected), Rostering, Additional Absence Items, and Rest Day Absences. The main configuration area includes three dropdown menus for 'Claim Process Code', 'Completed Process Code', and 'Unsubmitted Process Code'. There is also a toggle switch for 'Timesheet Claim Pay Code'. At the bottom right, there is a 'SAVE' button and the 'access PeopleXD' logo.

The **Time Sheet Claims** screen contains the following fields:

Field	Details
Claim Process Code	This is the HR Process that starts when a claim is saved, similar to the process when a Leave Request is made.
Completed Process Code	This is an optional code to notify participants when the administrator actions the completed claim, such as when an admin rejects a completed claim.
Unsubmitted Process Code	This is an optional code to notify the employee when the administrator actions the unsubmitted claim.

Field	Details
Timesheet Claim Pay Code	Enable this toggle for the pay code to appear in the portal timesheet summary claims screen.

4.10. Rostering

The Rostering tab allows you configure Pay Code rostering settings.

The **Rostering** screen contains the following fields:

Field	Details
Do not fill uncovered	Switch this toggle on if you do not wish to fill uncovered shifts.
Exclude Day from Roster availability	This toggle allows you to exclude days from showing available on the roster.
Roster availability	This shows how available the absence is for rostering.
Uncovered weeks	This influences the number of uncovered weeks.
Short name	You can identify a pay code by adding a short name to it which in turn appears on screens displaying the Pay Code.
Portal Absence Colour Code	The Colour Code identifies the Pay Code for Absences.
WTD Multiplier	This is used in working time package calculations.
Stop Enhanced Payment RFA	When enabled, enhanced payment RFA is stopped.

4.11. Additional Absence Items

The Additional Absence Items tab allows you to add further configuration to absence Pay Codes in addition to those on the Absences tab.

The **Additional Absence Items** screen contains the following fields:

Field	Details
Country	If you are a multi country site, this allows you to choose the specific country you are based in.
Absence Type	With this option you can configure whether the leave should be Parental, Maternity, Paternity etc.
Additional Item Name	This column shows the additional items which are displayed depending on the Absence type.
Hide Field	This toggle when enabled allows you to hide specific fields on the screen.
Manager Only	Enable this toggle if you wish the access to be given to a manager only.

4.12. Rest Day Absences

The Rest Day Absences tab allows for the automatic generation of social welfare Pay Codes on employee rest days to facilitate correct social welfare calculations.

Specific Pay Codes generated on employee rest days are configured based on different employee indicators. These can be used to control whether or not rest day absence Pay Codes impact sick leave balance.

The **Rest Day Absences screen** contains the following fields:

Field	Details
Rest Day Absence Rule Type	Here you can enter an absence rule type to determine how rest days are populated.
Global Rest Day Absence Pay Code	Here you can enter a global pay code for rest day absence. This will be user in the event of a specific rest day absence rule not being available
Apply Work Pattern Default Hours	When this toggle is enabled, it applies the default hours on the work pattern.

4.12.1. Add a Rest Day Absence

1. Click **Add**
2. Enter the Pay Code.
3. Fill in the times for the days of the week.

4. Click **Save**.
5. If you wish to delete, click **Delete** on the right-hand side.

4.13. Mutually Exclusive

The screenshot shows the 'Mutually Exclusive' configuration screen. At the top, there are tabs for 'Current Pay Code*' (Annual Leave), 'Pay Code' (3700), 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimal'. On the left is a sidebar menu with options: Costing, Time Sheet Claims, Rostering, Additional Absence Items, Rest Day Absences, Mutually Exclusive (highlighted), Annual Hours, and Advance Settings. The main area has a 'Warning Level' dropdown set to 'Warning' and a 'Validate Per Appointment' toggle switch. Below these is a 'Pay Code' input field. A blue 'ADD' button is on the right. At the bottom, there is a 'NOTHING TO SEE HERE' message, the 'access PeopleXD' logo, and a green 'SAVE' button.

The ***Mutually Exclusive*** screen contains the following fields:

Field	Details
Warning Level	This allows you to choose between Warning or Stop.
Validate Per Appointment	This generates an error for person/appointment level rather than just for person level.

4.13.1. Add a Mutually Exclusive Pay Code

1. Click **Add**
2. Enter the Pay Code.
3. Click **Save**.
4. If you wish to delete, click **Delete** on the right-hand side.

The **Advance Settings** screen contains the following fields:

Field	Details
Fill Contract Hours	When enabled, this toggle generates contract timesheets.
Fill Base Hours	When enabled, this toggle generates base timesheets.
Months to PHI	This toggle relates to the start and end date of absence documentation.
Negate Whole Time Equivalency	This toggle affects the roster planner.
Affect Default Hours	If this toggle is enabled, hours such as default holiday hours, generate a difference at the default pay code for the day.
Client Special	This is used in Generate Timesheets for Shift Rule.
Expense	This indicates that the pay code is an expense code.
Display on Back Office Calendar	This references the main procedure used by 'My Calendar' i.e. 12-month calendar.

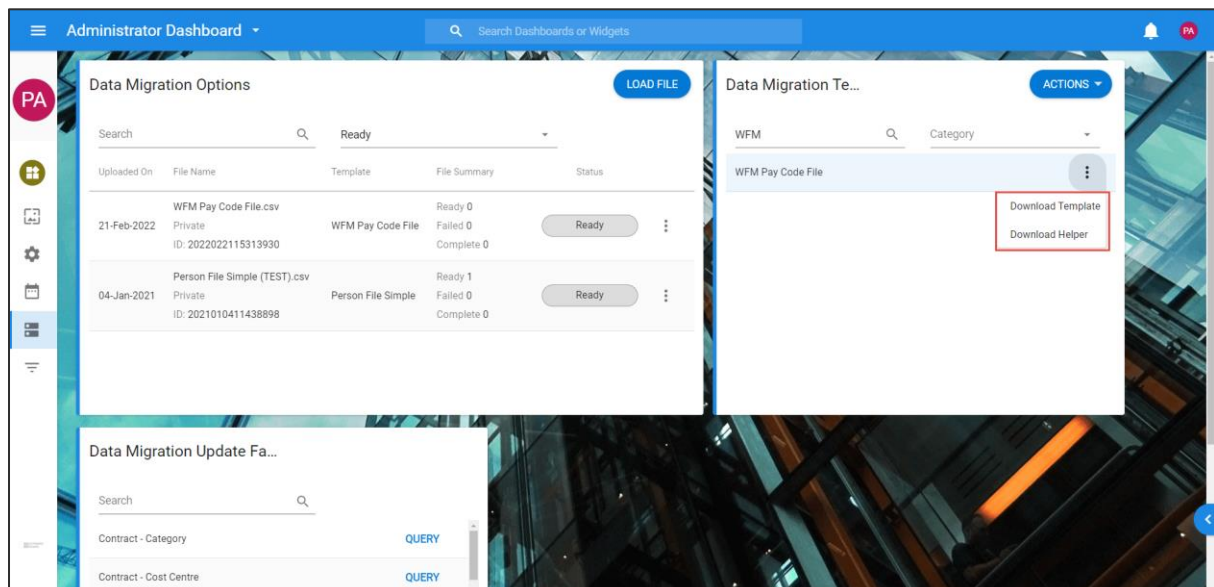

5. Data Migration

WFM Pay Codes support Data migration once the Pay Codes exist in Payroll. This section guides you through the process of migrating data using the Data Migration Template and the Data Migration Helper File.

Note: Before you download the Data Migration Template, you will need to download the Helper file. This is a csv file which gives a breakdown of the fields on an excel sheet and gives you guidance on filling out the template. See below for further guidance.

To download the Helper file:

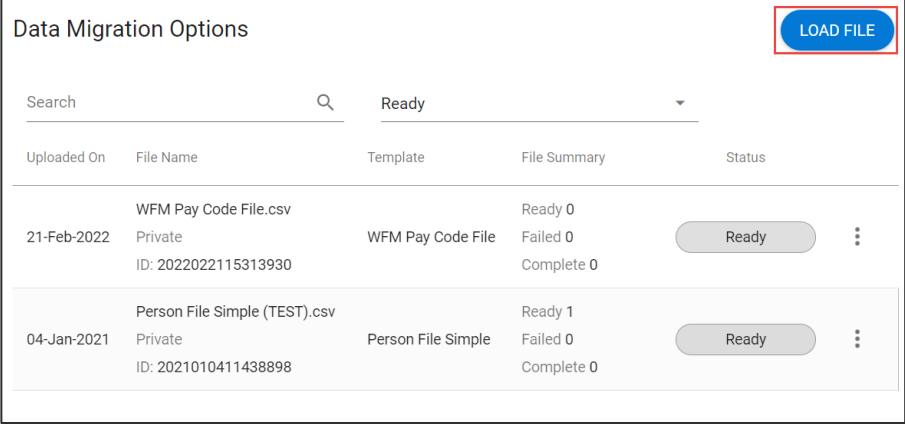

1. Navigate to the *Administrator Dashboard*
2. Click the **Data Migration** tab.
3. On the **Data Migration Template** widget, search for the WFM Pay Code file.
4. From the 3-dot menu, click **Download Helper**.

5. Once the file downloads, open the folder.
6. Open the *WFM Pay Code File_HELP.xlsx* file. Here you can get specific information on how to populate the data migration fields.

To upload a WFM Pay Code data migration file:

1. On the Data Migration Template widget, search for the WFM Pay Code file.
2. From the 3-dot menu, click **Download Template**.
3. Once the file downloads, open the *WFM Pay Code.csv* file.
4. Populate the template.
5. Save the .csv file.
6. Return to the **Data Migration** tab.
7. On the **Data Migration Options** widget, click **Load File**.

The screenshot shows the 'Data Migration Options' widget. It features a search bar at the top with a magnifying glass icon and a dropdown menu currently set to 'Ready'. Below the search bar is a table with the following columns: 'Uploaded On', 'File Name', 'Template', 'File Summary', and 'Status'. There are two rows of data in the table. The first row shows a file uploaded on '21-Feb-2022' with the name 'WFM Pay Code File.csv', template 'WFM Pay Code File', and a status of 'Ready'. The second row shows a file uploaded on '04-Jan-2021' with the name 'Person File Simple (TEST).csv', template 'Person File Simple', and a status of 'Ready'. Each row has a 'Ready' button and a 3-dot menu icon in the status column. A blue button labeled 'LOAD FILE' is located in the top right corner of the widget, highlighted with a red box.

Uploaded On	File Name	Template	File Summary	Status
21-Feb-2022	WFM Pay Code File.csv Private ID: 2022022115313930	WFM Pay Code File	Ready 0 Failed 0 Complete 0	Ready
04-Jan-2021	Person File Simple (TEST).csv Private ID: 2021010411438898	Person File Simple	Ready 1 Failed 0 Complete 0	Ready

8. Select or drag and drop the .csv file.
9. Click **OK**.
10. When the file successfully uploads you will see it in the widget with the status *Ready*.
11. From the 3-dot menu click **Edit**. When the screen opens, you see the information which you have entered on the csv file.
12. Click **Process All Records** to process the import.
13. If successful, the file status will update to *Complete*.

For further information see the [Data Migration Tool - User Guide](#) on the Knowledge Base.

6. Menu Options

6.1. Menu Options

7. Frequently Asked Questions

Q. Can I access the PeopleXD Payroll pay codes?

A. See section [3.4.3. Open Payroll Pay Codes](#)

Q. How can a user bring in a Pay Code from XD Payroll to WFM?

A. See section [3.4. Available Payroll Pay Codes Screen.](#)

Q. Is there a way to deactivate or delete a pay code?

A. Yes, disabling the Active toggle on the *Pay Codes* screen deactivates a Pay Code. Inactive Pay Codes will not be available for selection in any of Portal's input screens.

WFM Pay Codes can be deleted on Non-Payroll sites but NOT on Payroll sites.

Q. Is it possible to order the Pay Code leave types when submitting a Leave Request?

A. Yes, to configure Pay Code order:

1. Navigate to the *Pay Codes* screen.
2. Search for the Pay Code.
3. From the 3-dot menu click **View/Edit Pay Code**.
4. Click the **Summary** tab.
5. In the **Pay Code Order** field:
 - If you wish a pay code to appear first, set the pay code order to 1.
 - If you wish a pay code to appear 2nd, set the pay code to 2 etc.
 - If the pay code order field is null, then the pay codes are listed in alphabetical order.

Q. What is the leave Status when a cancellation is requested?

A. The Status is changed to Cancel Requested while waiting manager's action. If the Request is approved, the leave status is *Cancelled* and if rejected, the status reverts back to *Approved*.

Q. How can PeopleXD support or Admins know that a leave request cancellation was either approved or rejected?

A. The Last Action Date/User is stored which is visible in the *Person Maintenance* screen or through *Insight Reporting*.

Q. Can an employee cancel a leave request that they have just been submitted?

A. Yes, as it was just requested and not manager action was taken an employee can cancel the just submitted leave request.

Q. Can an employee request to cancel leave where the cancellation request was previously rejected?

A. Yes, the process remains open to support last minutes changes.

Q. Where do Manager review/action the Leave Cancellation request.

A. Via the Notification Centre, Managers are notified, where they can review the request and either approve or reject.
