1. Overview

1.1. Purpose of Guide

The purpose of this document is to provide an overview of the *Pro Rata Length of Service Increments* functionality in *Time and Attendance*, and how this is used. This includes:

- What is *Pro Rata Length of Service Increments* and when is it used?
- Detailed guidance on the configuration options within *Pro Rata Length of Service Increments*.

1.2. What is Pro Rata Length of Service Increments?

The *Pro Rata Length of Service Increments* functionality makes it possible to pro rata anniversary-based length of service increments.

The service increment calculation, to determine the number of additional days awarded, can be based on:

- Dates (days)
- Weeks
- Months

Therefore, the increment calculation takes the dates, weeks, or months, between the employee's anniversary date and the end of the annual leave year into consideration.

For example, where the increment calculation is configured as 'days' based, this instructs the system to calculate the service increment from the start of the year, to the date immediately before the service date. To do this, the system:

- Adds the full-service increment entitlement, then deducts the part of the year (days) to be excluded from the additional days awarded.
- Applies the employee's FTE to the remainder.
- Adds to the employee's opening entitlement.
- Rounds the result, based on the *Rounding Rule* specified at the balance level.

Note:

If an employee is leaving an organisation, this also impacts their service increment.

1.3. Length of Service – Calculate On

Pro Rata Length of Service Increments are an extension of the *Length of Service* function. This extension is only applicable if calculated by *Anniversary* or *Post Appointment Anniversary*. This is configured via the *Balance Parameters* screen:

1. Go to *Backoffice > CoreTime/CoreRoster > System Params > Balances > Parameters*.
2. Enter the applicable balance Code.
3. Select **Length of Service**.

The *Length of Service* section displays, on the *Balance Parameters* screen. This is highlighted in the below screenshot.

The screenshot shows the 'Balance Parameters' window. At the top, the 'Balance Selection' section has a 'Code' field with 'A' and a 'Name' field with 'Annual Leave'. A note below states: 'Note : The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.' To the right, a dropdown menu is open, showing 'Length of Service' selected. Below this, the 'Length of Service' section is highlighted with a red box. It contains three sub-sections: 'Calculate On' with checkboxes for 'Anniversary', 'Period Start', 'Post Appointment Period Start', 'Post Appointment Anniversary' (checked), and 'Shift Type Anniversary'; 'Employee Start Date' with a dropdown set to 'Original Start Date' and checkboxes for 'Use Service In Company', 'Exclude Leave', 'Use Hire Date for FTE Length of Service', and 'Use Absence FTE value for Post Appointment based Increments'; and 'Anniversary Pro Rata (Override)' with three dropdown menus for 'Apply FTE to Service Increment', 'Pro Rata prior to Anniversary Date', and 'Override Anniversary Date'. At the bottom, the 'Worked Periods (Advanced)' section has fields for 'No. of Worked Periods for Increments', 'Worked Pay', and 'Code Group'.

Note:

The *Pro Rata Length of Service Increments* feature is only functional where *Length of Service - Calculate On* parameter is set to either:

- *Anniversary*; OR
- *Post Appointment Anniversary*

In other words, the system can only *Pro Rata* anniversary service increments where the *Length of Service – Calculate On* parameter is based on an anniversary.

1.3.1. Length of Service – Calculate on: Anniversary

If the *Length of Service* is calculated by *Anniversary*, the system does not look to contract history to determine service history. This parameter:

- Uses the start date recorded on the personnel master record to determine the anniversary date.
- It does not factor in any personnel contract history, such as gaps in service.

The screenshot shows the 'Balance Parameters' window. In the 'Balance Selection' section, the 'Code' is 'A' and the 'Name' is 'Annual Leave'. A note states: 'Note : The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.' In the 'Length of Service' section, the 'Calculate On' dropdown is set to 'Anniversary' (highlighted with a red box). Other options include 'Period Start', 'Post Appointment Period Start', 'Post Appointment Anniversary', and 'Shift Type Anniversary'. The 'Anniversary Pro Rata (Override)' section includes fields for 'Apply FTE to Service Increment', 'Pro Rata prior to Anniversary Date', and 'Override Anniversary Date'.

1.3.2. Length of Service – Calculate on: Post Appointment Anniversary

If the *Length of Service* is calculated by *Post Appointment Anniversary*; the system looks to the contract history to determine when the anniversary is due.

This parameter enables the *Use Service in Company* and *Exclude Leave* parameters:

Parameter	Explanation
Use Service in Company	When ticked On , all the employee's service within the organisation is considered by the system. i.e. all the employee's contracts.
Exclude Leave	When ticked On, service breaks (such as career breaks) are excluded when determining the total service for the employee. For example, if an employee joined the organisation on 11-June-2013 and took a 1-year career break: • Exclude Leave On - 5 years' service is completed 11-June-2019 i.e. the career break is excluded from the service history calculation, adding an extra year to the 5-year service required. • Exclude Leave Off – The 5 years' service is completed 11-June-2018 i.e. the career break is included in the service history calculation.

Balance Parameters

Balance Selection

Code: A Name: Annual Leave

Note: The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.

- ☐ Period Start
- ☐ Post Appointment Period Start
- ☐ Post Appointment Anniversary
- ☐ Shift Type Anniversary

Employee Start Date: Original Start Date

- ☐ Use Service In Company
- ☐ Exclude Leave
- ☐ Use Hire Date for FTE Length of Service
- ☐ Use Absence FTE value for Post Appointment based Increments

Anniversary Pro Rata (Override)

Apply FTE to Service Increment:

Pro Rate prior to Anniversary Date:

Override Anniversary Date:

The below table outlines each field available in the *Anniversary Pro-Rata (Override)* section, on the *Balance Parameters* screen.

Parameter	Explanation
Apply FTE to Service Increment	Setting to Current Appointment instructs the system to get the employee's FTE at their anniversary date. For example, if the employee's anniversary date is June 11 th , the system uses the FTE value as of June 11 th .
Pro-Rata prior to Anniversary date	It is possible to specify the calculation basis for pro rata. Where left blank, the system defaults the calculation to dates. Each option is listed below. • Use Dates: The calculation is based on dates. • Use Weeks: The calculation is based on weeks. • Use Months: The calculation is based on months.
Override Anniversary Date	It is possible to specify an override of weeks or months for which the service increment applies from. Each option is listed below. • Start of Month or Start of Next Month, is based on months. • Start of TNA Week or Start of Next TNA Week, is based on weeks. • Start of Balance Week or Start of Next Balance Week, is based on weeks.

For example:

If **Start of Month** is selected as the **Override Anniversary Date** option, and the employee's anniversary date is June 11th, the service increment applies from June 1st. Therefore, the nett service increment gained would be from June 1st to December 31st. The employee gets the benefit of the full June month included.

**Note:**

Start of TNA Week and **Start of Next TNA Week** links to the *CoreTime - System Calendar* only. It does not link to *User Defined Calendars*.

2. Pro Rata Service Increments Examples

2.1. Example 1: Full Time Employee

After 5 years' service, employees are due 2 days *Pro Rata Length of Service Increment*. This is based on their anniversary date.

Example Variable	
Full Time Entitlement	22 Days
5 years' service completed on	11 th June 2018
Employee on FTE	1.00 therefore, leave for the year is 22 days (full entitlement).
Pro Rata prior to Anniversary Date	Use Dates

Balance Parameters

Balance Selection

Code: A Name: Annual Leave

Note: The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.

Length of Service

Calculate On

☐ Anniversary

☐ Period Start

☐ Post Appointment Period Start

☒ Post Appointment Anniversary

Employee Start Date

☒ Use Service In Company

☒ Exclude Leave

☐ Use Hire Date for FTE Length of Service

☐ Use Absence FTE value for Post Appointment based Increments

Anniversary Pro Rata (Override)

Apply FTE to Service Increment:

Pro Rata prior to Anniversary Date:

Override Anniversary Date:

System Calculation:

- Full year Increment is 2 days, Anniversary date is June 11th
- Part year excluded, is 161 days (from January 1st to June 10th)
- Excluded value = 0.8822 days (2 days / 365 * 161)
- 2 days – 0.8822 days = 1.1178
- Impact remaining by the FTE (1.1178 * 1.00)
- Actual service increase is 1.1178 days

Opening Entitlement: 22.00 days
+1.1178
 23.1178 days (rounded, if req.)

New Entitlement: 23.50* days (or nett 1.50 days)

2.2. Example 2: Part Time Employee

After 5 years' service, employees are due 2 days *Pro Rata Length Of Service Increment*. This is based on their anniversary date:

Example Variable	
Full Time Entitlement	22 Days
5 years' service completed on	11 th June 2018
Employee on FTE	0.50 therefore, leave for the year is 11 days (half entitlement).
Pro Rata prior to Anniversary Date	Use Dates

The screenshot shows the 'Balance Parameters' window. The 'Balance Selection' section has 'Code' set to 'A' and 'Name' set to 'Annual Leave'. A note states: 'Note: The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.' The 'Length of Service' section has 'Calculate On' set to 'Post Appointment Anniversary' (checked). Other options include 'Anniversary', 'Period Start', 'Post Appointment Period Start', 'Use Service In Company' (checked), 'Exclude Leave' (checked), 'Use Hire Date for FTE Length of Service', and 'Use Absence FTE value for Post Appointment based Increments'. The 'Anniversary Pro Rata (Override)' section is highlighted with a red box and contains 'Apply FTE to Service Increment' set to 'Current Appointment', 'Pro Rata prior to Anniversary Date' set to 'Use Dates', and 'Override Anniversary Date' set to a blank field.

System Calculation:

- Full year Increment is 2 days, Anniversary (11th Jun)
- Part year excluded, is 161 days (i.e. 1st Jan to 10th Jun)
- Excluded value = 0.8822 days (2 days / 365 * 161)
- 2 days – 0.8822 days = 1.1178
- Impact remaining by the FTE (1.1178 * 0.50)
- Actual service increase is 0.5589 days

Opening Entitlement: 11.00 days
+0.5589
 11.5589 days (rounded, if req.)

New Entitlement: 12* days (or nett 1 days)

Note: Service Impacts are date based

- **Employee Looses** - The full amount from January 1st to June 10th (inclusive).
- Part-time employees also lose half the remainder due to 0.50 FTE on their anniversary.

2.3. Example 3: Full Time Employee (Based on Weeks)

After 5 years' service, employees are due 2 days *Pro Rata Length Of Service Increment*. This is based on their anniversary date:

Example Variable	
Full Time Entitlement	22 Days
5 years' service completed on	11 th June 2018
Employee on FTE	1.00 therefore, leave for the year is 22 days (full entitlement).
Pro Rata prior to Anniversary Date	Use Weeks
Override Anniversary Date	Start of TNA Week

The screenshot shows the 'Balance Parameters' window. The 'Balance Selection' section has 'Code' set to 'A' and 'Name' set to 'Annual Leave'. A note explains that the balance code determines the display order of balances. The 'Length of Service' section is active, showing 'Calculate On' options: 'Anniversary' (unchecked), 'Period Start' (unchecked), 'Post Appointment Period Start' (unchecked), and 'Post Appointment Anniversary' (checked). The 'Employee Start Date' is set to 'Original Start Date'. The 'Anniversary Pro Rata (Override)' section is highlighted with a red box, showing 'Apply FTE to Service Increment' set to 'Current Appointment', 'Pro Rata prior to Anniversary Date' set to 'Use Weeks', and 'Override Anniversary Date' set to 'Start of TNA Week'.

System Calculation:

- Full year Increment is 2 days, Anniversary date is June 11th
- Part year excluded, is 23 weeks (from January 1st to June 10th)
- Excluded value = 0.8846 days (2 days / 52 * 23)
- 2 days – 0.8846 days = 1.1154
- Impact remaining by the FTE (1.1154 * 1.00)
- Actual service increase is 1.1154 days

Opening Entitlement: 22.00 days
+1.1154
 23.1154 days (rounded, if req.)

New Entitlement: 23.50* days (or nett 1.50 days)

2.4. Example 4: Full Time Employee (Based on Months)

After 5 years' service, employees are due 2 days *Pro Rata Length Of Service Increment*. This is based on their anniversary date:

Example Variable	
Full Time Entitlement	22 Days
5 years' service completed on	11 th June 2018
Employee on FTE	1.00 therefore, leave for the year is 22 days (full entitlement).
Pro Rata prior to Anniversary Date	Use Months
Override Anniversary Date	Start of Month

The screenshot shows the 'Balance Parameters' window. The 'Balance Selection' section has 'Code' set to 'A' and 'Name' set to 'Annual Leave'. A note explains that the balance code determines the display order of balances. The 'Length of Service' section is active, showing 'Calculate On' options: 'Anniversary' (unchecked), 'Period Start' (unchecked), 'Post Appointment Period Start' (unchecked), and 'Post Appointment Anniversary' (checked). The 'Employee Start Date' is set to 'Original Start Date'. The 'Anniversary Pro Rata (Override)' section is highlighted with a red box, showing 'Apply FTE to Service Increment' set to 'Current Appointment', 'Pro Rata prior to Anniversary Date' set to 'Use Months', and 'Override Anniversary Date' set to 'Start of Month'.

System Calculation:

- Full year Increment is 2 days, Anniversary date is June 11th
- Part year excluded, is 5 months (from January 1st to June 1st)
- Excluded value = 0.8333 days (2 days / 12 * 5)
- 2 days – 0.8333 days = 1.1667
- Impact remaining by the FTE (1.1667 * 1.00)
- Actual service increase is 1.1667 days

Opening Entitlement: 22.00 days
+1.1667
 23.1667 days (rounded, if req.)

New Entitlement: 24* days (or nett 2 days)

2.5. Example 5: Full Time Employee (Based on Months)

After 5 years' service, employees are due 2 days *Pro Rata Length Of Service Increment*. This is based on their anniversary date:

Example Variable	
Full Time Entitlement	22 Days
5 years' service completed on	11 th June 2018
Employee on FTE	1.00 therefore, leave for the year is 22 days (full entitlement).
Pro Rata prior to Anniversary Date	Use Months
Override Anniversary Date	Start of Next Month
