1. Overview

1.1. Purpose of Guide

The purpose of this guide is to provide an overview of and the configuration associated with *Absences* in use with the *WFM Roster* functionality.

Items covered include:

- Overview of roster absences
- Unrostered absences processes
- Unrostered absences configuration

1.2. Roster Absences Overview

In *Roster* any absence that has at least one work day between the start date of the absence and end date of the absence is seen as a *Rostered* absence and is treated like a standard *Absence* in *CoreTime*.

The absence calculates as per the duration of the day based on the *Pattern* times

In *Roster* all balances should be tracked in hours. The nature of *Roster* means the day duration constantly changes so an hour balance is seen as the most accurate.

The following options are available within *Roster* when booking absences:

- Absence on work days
- Absence on rest days (Unrostered Bookings)
- Absence using start and end time
- Part day absence (standard calculation)
- Part day absence (retail calculation)

2. Unrostered Bookings

2.1. Overview

Unrostered Bookings can be used within *Roster* to allow users to book leave and absences, in advance of their schedules being created. *Unrostered Bookings* are required within *Roster* environments as employee's schedules may not be created at the time a *Leave Request* is submitted, or an absence has been recorded.

Important Considerations:

- You must have a *Roster* environment before using this functionality.
- For an absence to be picked up as an *Unrostered Booking*, all days between the start date and end date of the absence must be rest days.
- An employee is not made aware that a booking is *Unrostered* when submitting a *Leave Request*.
- The employee *Absence Roster Contract* is not date effective and is applied for all days going forward once changed via the *Unrostered Bookings* screen. If an employee changes their contract hours or days, you must update the employee's preferences to reflect the change in contract.
- An employee cannot submit a *Leave Request* for a part day absence, if the day is not yet rostered. If required, you can submit the absence directly for the employee on the selected date.
- *Unrostered Bookings* do not work in conjunction with entering times on absences.
- If *Contract Hours* change midway through an absence, the absence is not automatically recalculated to pick up the changes to the contract. If this occurs, you should put in an end date for the absence on the last day of the contract and enter in a new absence for the start date of the next contract. For the new contract, the daily absence roster contract hours need to be amended to reflect the hours of the new contract.

2.2. Unrostered Bookings - Leave Request Process

In this example you can see that the employee is on a *Rest Pattern* for the week 29th Apr – 05th May.

Ronan Watson		Rest	Rest	Rest	Rest	Rest	Rest	Rest

2.2.1. Step 1 – Employee Submits Leave Request

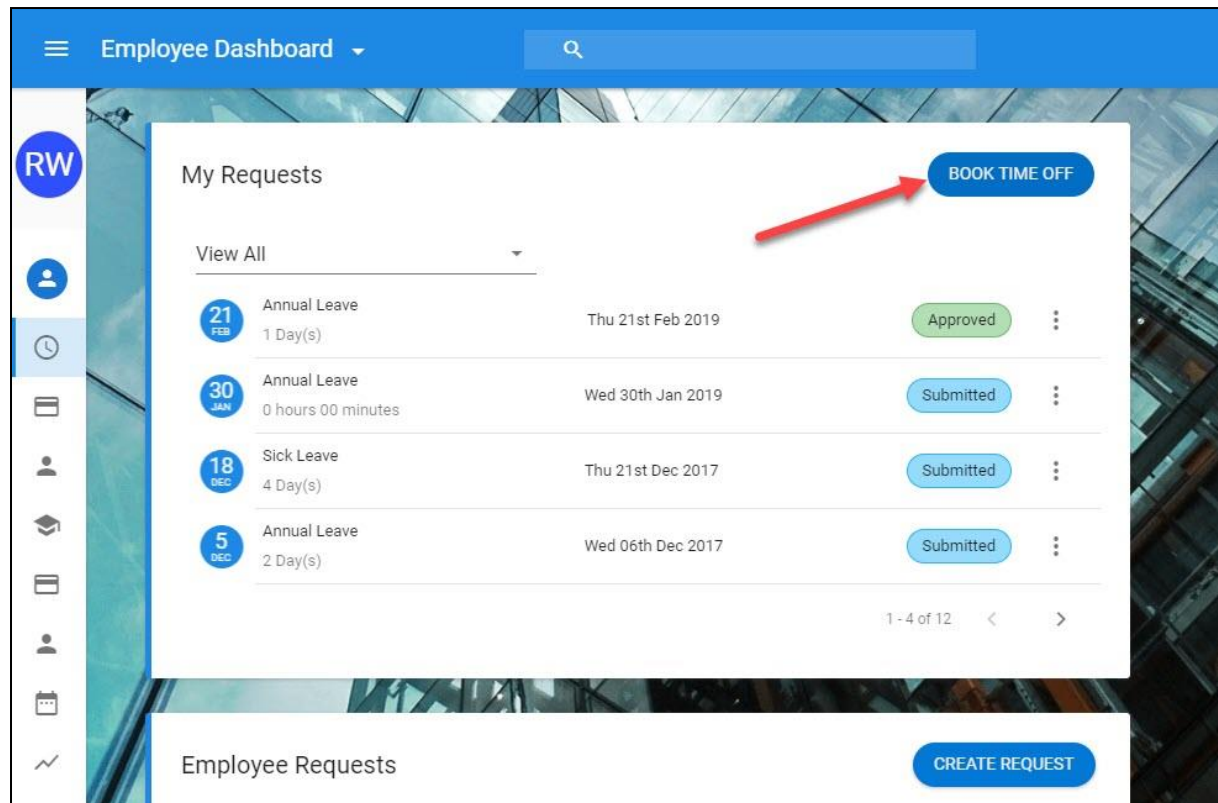

If a day is unrostered (*Rest Day*), and you are booking a full day, or multiple days off, then you are not notified that the request is for an *Unrostered Booking* day. If the day is a *Part-Day Absence* then you are stopped from submitting the *Leave Request*, if the day is unrostered (*Rest Day*), as you do not know what times you are due to work at the time of booking the absence.

To submit a *Leave Requests* from the *My Requests* widget:

1. *Quick Jump to My Requests.*

2. Click the **Book Time Off** button.

3. Select the applicable *Leave Type* from the drop-down list.
4. Enter the *Start Date*.
5. Enter the *End Date*.
6. Select a *Reason* from the drop-down list, if applicable.
7. Add *Comments*.
8. Click **Submit**.

BOOK TIME OFF

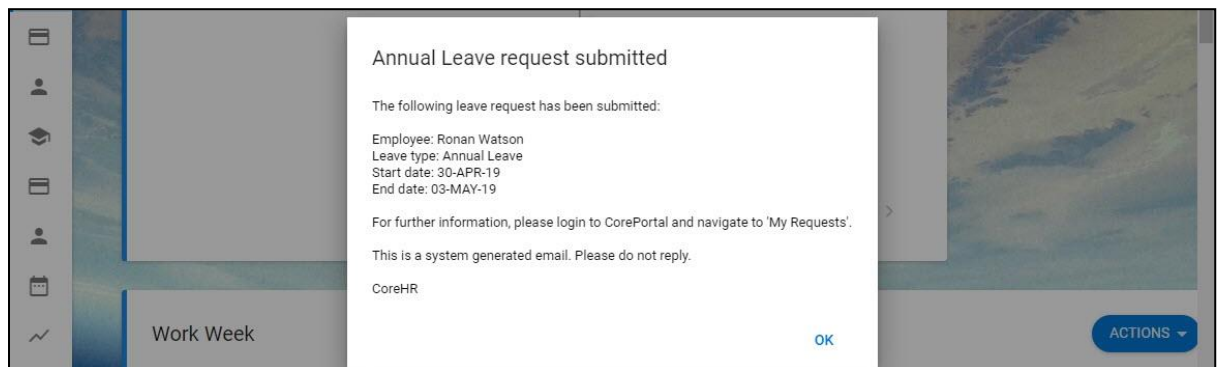

Your Request has been successfully submitted.

The system also generates a *Notification* to confirm that your *Leave Request* have been successfully submitted.

9. Click the  button.
10. Select the **Notification**.

The *Notification* displays on screen.

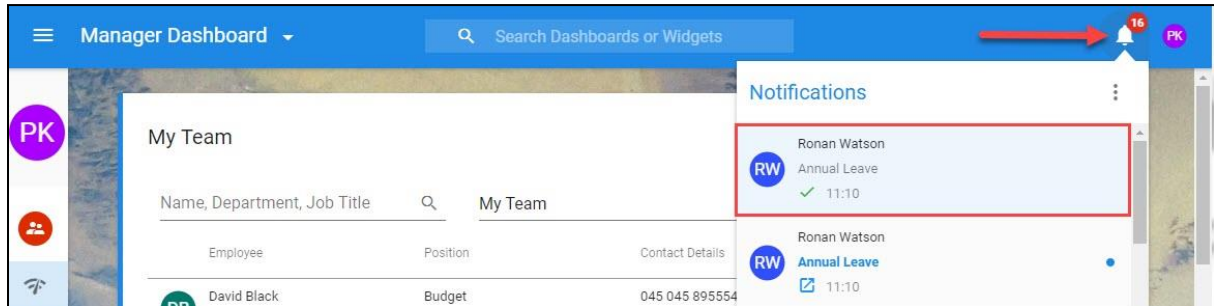

2.2.2. Step 2 – Manager Receives Request

When you approve an *Unrostered Booking - Leave Request* or add in an absence that creates an *Unrostered Booking*, the *Unrostered Booking* button displays on the *My Approvals* and *Absence Details* screens, to highlight that the absence is unrostered.

To approve/reject the *Leave Request*:

1. Click the  button.
2. Select the **Approval**.

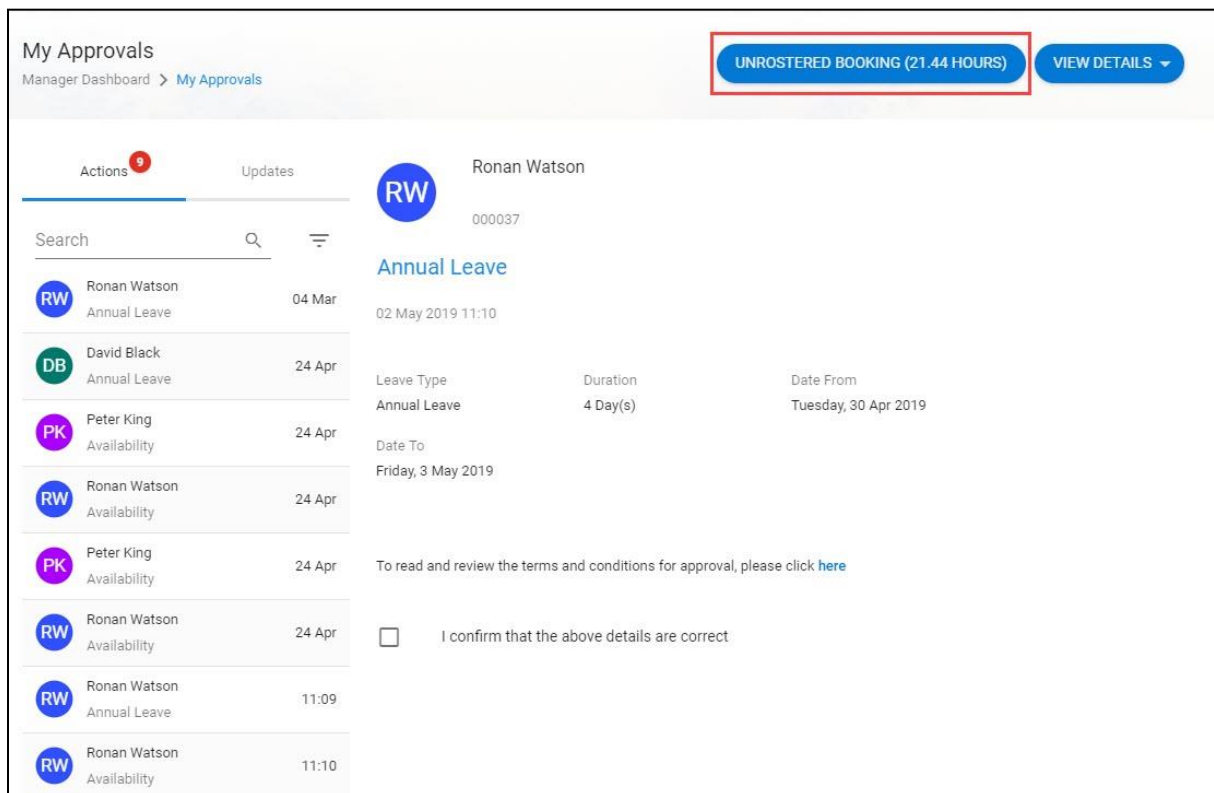

The *My Approvals* screen displays.

Here the **Unrostered Booking** button displays, along with the absence hours. If you are happy with the values displayed, you can approve the absence.

If you need to change the hours or amend the employee's *Roster Contract*, you can drill into the *Unrostered Booking* screen to change the hours as required.

3. If applicable, click the **Unrostered Booking** button.

The *Unrostered Booking* screen displays the days that the employee is rostered to work and what hours relate to each of the days. This information is taken from the employee's *Roster Contract*.

From here, it is possible for you to amend these days as required, once the hours match the total contract hours for the week.

Note:

- If the hours changed do not match the employees contract hours, a warning is displayed to highlight that the weekly hours do not match the employee's *Contract Hours*, however, you are still provided with the ability to save.
- Once the hours are changed, these are then saved against the employee's record and

4. Once you have finished any amendments, click **Save**.

Once the *Unrostered Booking* absence is saved (and the *Leave Request* then is approved), the employee's Roster is then updated with the *Absence Pattern* for every day the employee has absence *Roster* hours.

 **SAVE**

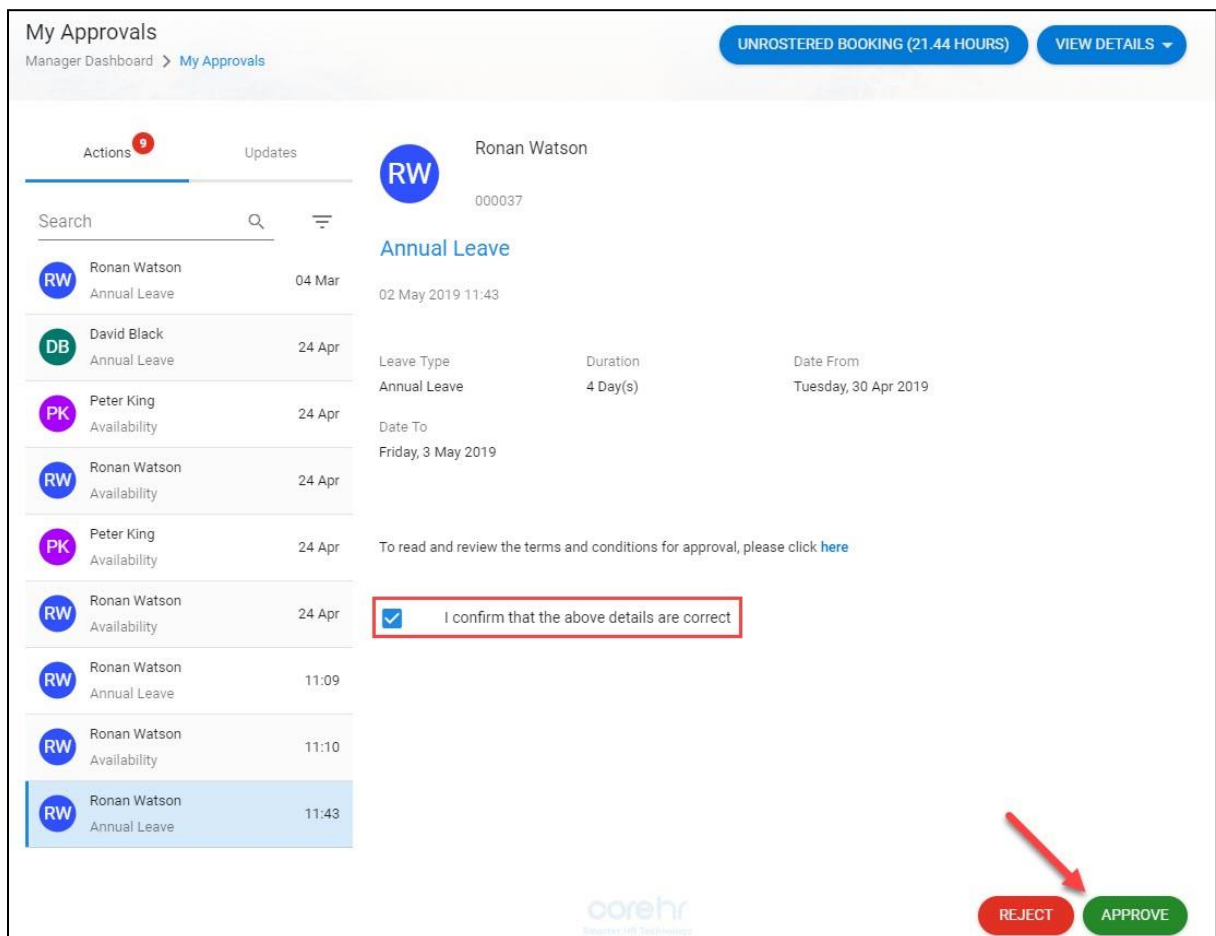

An on-screen message displays, indicating that the preferences have saved successfully.

5. Click the **My Approvals** breadcrumb to return to the *My Approvals* screen.

The *My Approvals* screen displays.

6. Tick the confirmation indicator.
7. Click **Approve**, if applicable.

The employee is now notified of the *Leave Request* approval.

The employee's *Roster* is also updated with the absence, on the *Roster Details* screen.

2.3. Unrostered Bookings – Absence Detail Screen Process

IT is possible for you to input an *Unrostered Booking Absence* for an employee. This is done via the *Absence Details* screen, on *Roster Details*.

To access *Absences* from the *Roster Details* screen:

1. *Quick Jump to Roster Details*.

The *Roster Details* screen displays.

2. Click on the applicable employee.
3. Select **Absences**.

2.4. Company Default Roster Contract Hours

When an *Unrostered Booking* is submitted/entered, the employee's *Contract Hours*, that relate to the absence days, are checked by the system:

- If the employee *Contract Hours* are null, the *Contract Hours* are then checked at the *Work Group* level.
- If the *Work Group Contract Hours* are null, the *Company Contract Hours* settings are then checked.

The days that are marked as *Contract Days* are based on the *Contract Days* that are ticked *On* at the applicable level above.

- Contract Work Day**

Contract Work Day

Enable Functionality: Yes

- ☒ Monday
- ☒ Tuesday
- ☒ Wednesday
- ☒ Thursday
- ☒ Friday
- ☐ Saturday
- ☐ Sunday

For example:

If the below days are selected as *Contract Days*, when an employee books a full week off, the *Unrostered Bookings Absence* calculates each *Contract Day* against the *Contract Hours*, divided by 5 days.

- Monday
- Tuesday
- Wednesday
- Thursday
- Friday

Note: If changes are made to the employees' hours via the *Unrostered Bookings* screen, once saved, this saves the preferences against the employee *Roster Contract*, and is held by the system going forward. This saves both the days and the hours value.

2.4.1. View Employee Level Contract Days

To review the *Contract Days* set at employee level:

1. Go to *Back Office > CoreTime/CoreRoster > Pers Data > Person Maintenance*.
2. Enter the *Person*.
3. Select **Contract Work Day**.

The screenshot shows the 'Person Maintenance' window. The 'Person' field is '000037', 'Ronan', 'Watson'. The 'Work Group' is 'IT1', 'Technical Support'. The 'Shift Type' is '37.50_001', '37.5 Hrs - 7.50 Hrs Mtwtf'. The 'Dept.' is 'IT1', 'Technical Support'. The 'Select Detail' list on the right includes 'Timesheet Threshold Balance', 'Extra Hours Recoding', 'Bradford Factor Enquiry', 'NCHD Parameters', 'Trigger Point Groups', and 'Contract Work Day' (highlighted). The 'Contract Work Day' section is highlighted with a red box, showing 'Enable Functionality' set to 'Yes' and checkboxes for Monday through Friday, all of which are checked.

2.4.2. View Work Group Level Contract Days

To review the *Contract Days* set at *Work Group* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Work Groups*.
2. Enter the *Work Group*.
3. Select **Contract Work Day**.

The screenshot shows the 'Work Groups' window. The 'General Details' section shows 'Work Group' as 'IT1', 'Technical Support'. The 'Company' is '1', 'Default Company'. The 'Holiday Scheme' is 'CC', 'Company Holiday Scheme'. The 'Shift Type' is '37.50_001', '37.5 Hrs - 7.50 Hrs Mtwtf'. The 'Default OT Pay Code' is '2005', 'Overtime @ 2.00'. The 'Select Details' list on the right includes 'Medical Salary Rule', 'Extra Hours Recoding', 'Trigger Points', 'Group Codes', and 'Contract Work Day' (highlighted). The 'Contract Work Day' section is highlighted with a red box, showing 'Enable Functionality' set to 'Yes' and checkboxes for Monday through Sunday, all of which are checked.

2.4.3. View Company Level Contract Days

To review the *Contract Days* set at *Company* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A – C > Control Parameters*.
2. Enter the *Company*.
3. Select **Contract Hours**.

The screenshot shows the 'Control Parameters' window. The 'Parameters' section at the top includes fields for 'Company' (set to 1), 'Current Period' (201852), and dates (24-DEC-2018 to 30-DEC-2018). A 'Select Detail' dropdown menu is open, with 'Contract Hours' highlighted. The 'Contract Hours' section below shows 'Base/Contract Hours' set to 39.00. To the right, the 'Contracted Work Days' section is highlighted with a red box, showing a list of days from Monday to Sunday, all of which are checked with 'Allow Functionality' and 'Enable Functionality' options.

2.5. Part Day Absence

The following points should be taken into consideration regarding *Part Day Absence*, in relation to the *Standard* and *Retail Calculation* methods.

2.5.1. Standard Calculation

Note:

It is possible for an employee to submit a *Part Day Absence* when the *Standard Calculation* is in use. However, the employee is displayed as working on the day and continues to count towards *Staffing Requirements*, regardless of the absence on the day, as the system cannot

2.5.2. Retail Calculation

**Note:**

It is possible for an employee to submit a *Part Day Absence* when the *Retail Calculation* is in use. If a *Part Day Absence* is booked, the Roster is updated to reflect the hours that the employee is working.

For example:

If an employee was rostered to work from 09:00 - 17:00 and books 3 hours annual leave:

You must update the roster for the employee to start at 12:00 to 17:00. The system then calculates

- 3 hours Annual leave
- 5 hours Basic

If you do not update the roster to reflect the hours the employee is working, this may have implications on Payroll, as the system may calculate:

3. Configure Unrostered Bookings

3.1. Switch on Unrostered Bookings

There are two *Advanced Options* required to be switched on for *Unrostered Bookings*. Both options are required for *Unrostered Bookings* to operate on the *Record Absence Details* screen.

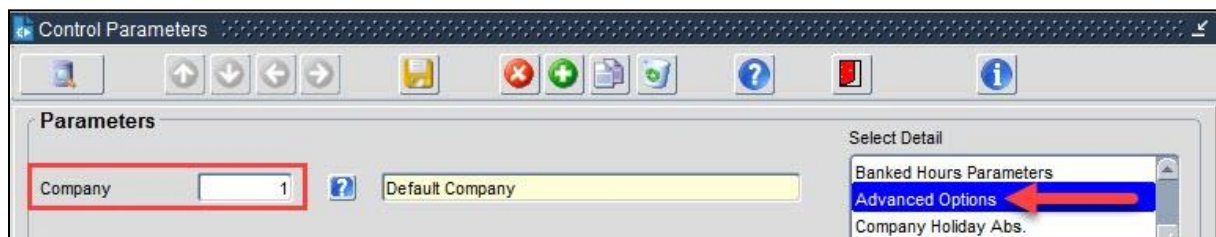

Advanced Option:

ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS

ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS TAF338

To switch on the above *Advanced Options*:

4. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A – C > Control Parameters*.
5. Enter the *Company*.
6. Select **Advanced Options**.

7. Scroll to locate, and tick to enable both Advanced options below:
 - *ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS*
 - *ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS TAF338*
8. Click the  button to save.

Option	Enabled
ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS	☒
ALLOW RFA BOOKING WITHOUT ROSTER ON ABSENCE DETAILS TAF338	☒
ALLOW SHIFT RULE GROUPS	☐
AMEND WORK GROUP ONLY ON TAF079	☐
APPLY ADDITIONAL CHECKS FOR PAID BREAKS IN TIME BASED BONUS CALCULATION	☐

Note:

The following *Advanced Option* must also be enabled as part of the *Roster* system configuration. For further information, view the *Roster General Configuration* training material on CoreHR University.

3.2. Allow Unrostered Bookings Functionality

In order to allow the *Unrostered Bookings* functionality to work, the Allow Functionality indicator must be ticked on.

To switch on the *Allow Functionality* indicator:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A – C > Control Parameters*.
2. Enter the *Company*.
3. Select **Contract Hours**.
4. Tick the *Allow Functionality* indicator.
5. Click the  button to save.

3.3. Additional Unrostered Bookings Settings

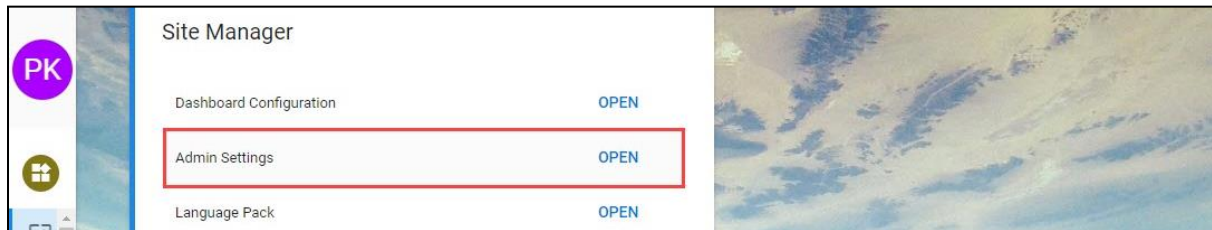

The following table details *CorePortal Parameters* that are required in order for the *Unrostered Bookings* functionality to operate.

CorePortal Parameters	Explanation
cp_display_rest_absence	This allows for the display of absences booked on a Rest Day. It is required to display the absence on Rest Days, between Start Date and End Date of the absence. Should be set to 'Y' to switch on the functionality.
p_alw_unrost_on_rest_day	Allows for <i>Unrostered Bookings</i> on <i>Rest Days</i> . Should be set to 'Y' to switch on the functionality.
cp_unrost_use_max_pref	This should be set to 'Y' if the most recent <i>Unrostered Booking Absence Contract</i> or preferences should be used when booking new <i>Unrostered Absences</i> . If this

is set to 'N', the company default is used for any new absences.

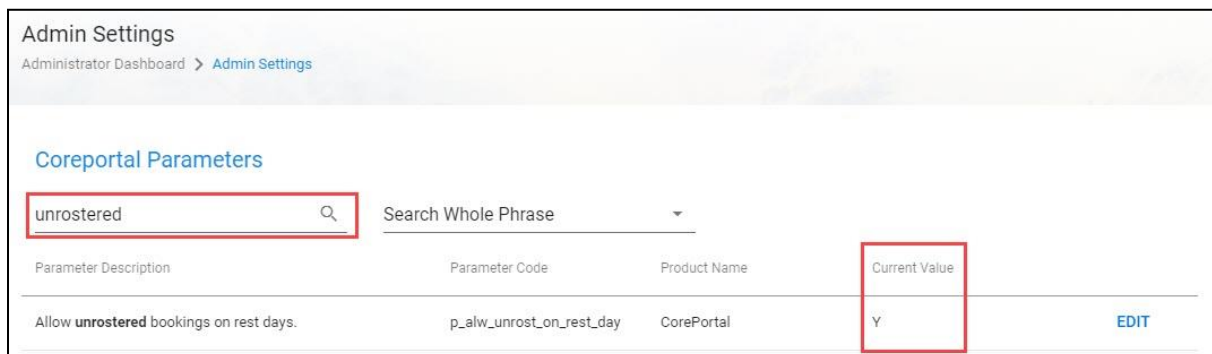

To set the above *CorePortal Parameters*:

1. Quick jump to *Site Manager*.
2. Click **Open Admin Settings**.

The *Admin Settings* screen displays.

3. Search for the above *Parameters*.
4. Click **Edit**.
5. Set the *Current Value* to 'Y'.

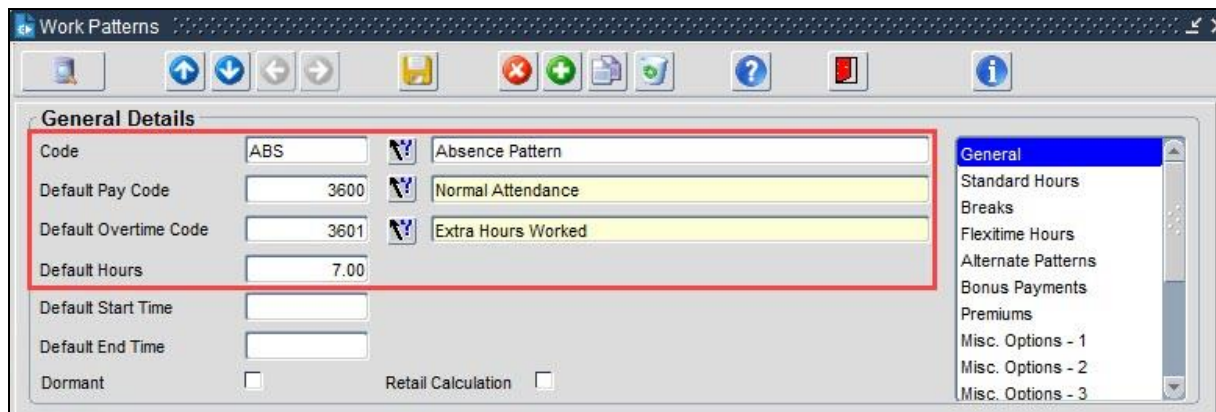

3.4. Create an Absence Work Pattern

The *Unrostered Bookings* functionality requires an *Absence (ABS) Work Pattern* to be configured, which employees are then Rostered to for all days that they are absent.

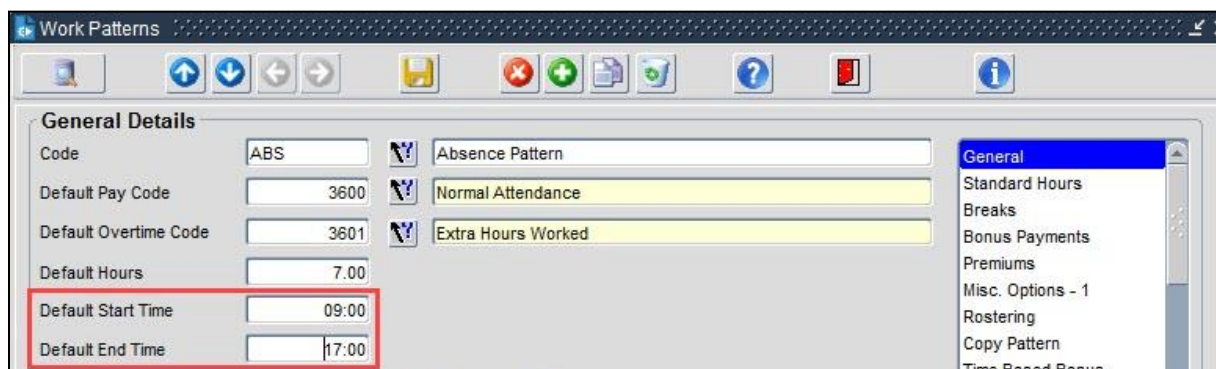

To create the Absence *Work Pattern*:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Work Patterns*.
2. Enter the *Work Pattern Code*.
3. Enter the *Description*.
4. Enter the *Default Pay Code*.

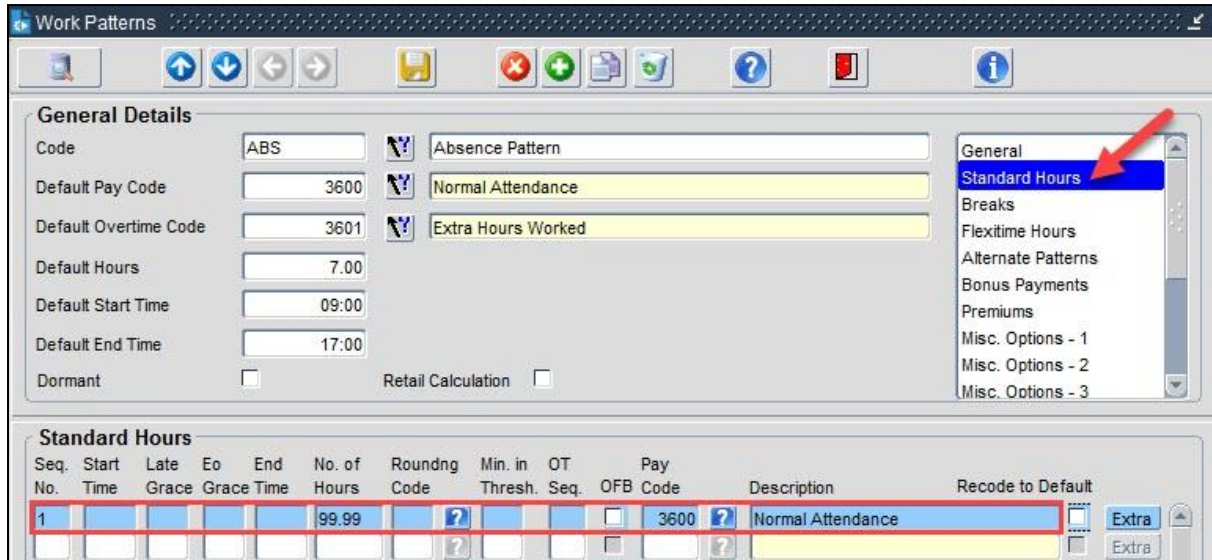

5. Enter the *Default Overtime Code*.
6. Enter the *Default Hours*.

7. Next, Enter the *Default Start Time*.
8. Enter the *Default End Time*.
 - The *Default Start Time* and *End Time* on the *ABS Pattern* is displayed, on *Rest Days*, on the *Calendar* and *Work Week* widgets, therefore, should be updated to hours where the employee can quickly identify the day is an absent day, for example, 09:00 – 17:00.
 - It is also possible set the *Default Start Time* to 12:00 and *Default End Time* to 12:01, to make it clear that the day is not a rostered working day, and relates to an *Unrostered Booking*, as these times are displayed on the employees *Calendar* and *Work Week* widget, as well as on the *Team Scheduler* screen.

9. Next, select **Standard Hours**.
10. Enter the *Seq. No.* '1'.
11. Enter the *No. of Hours* '99.99'.
12. Enter the *Pay Code*.

3.5. Absence Start and End Times

Note: *Absence Start* and *End Times* can only be used in a non-clocking environment.

It is possible to add absence *Start* and *End Times* within the *Absence Details* screen. This is controlled by an *Advanced Option* within *Control Parameters*.

To switch on the *Advanced Option*:

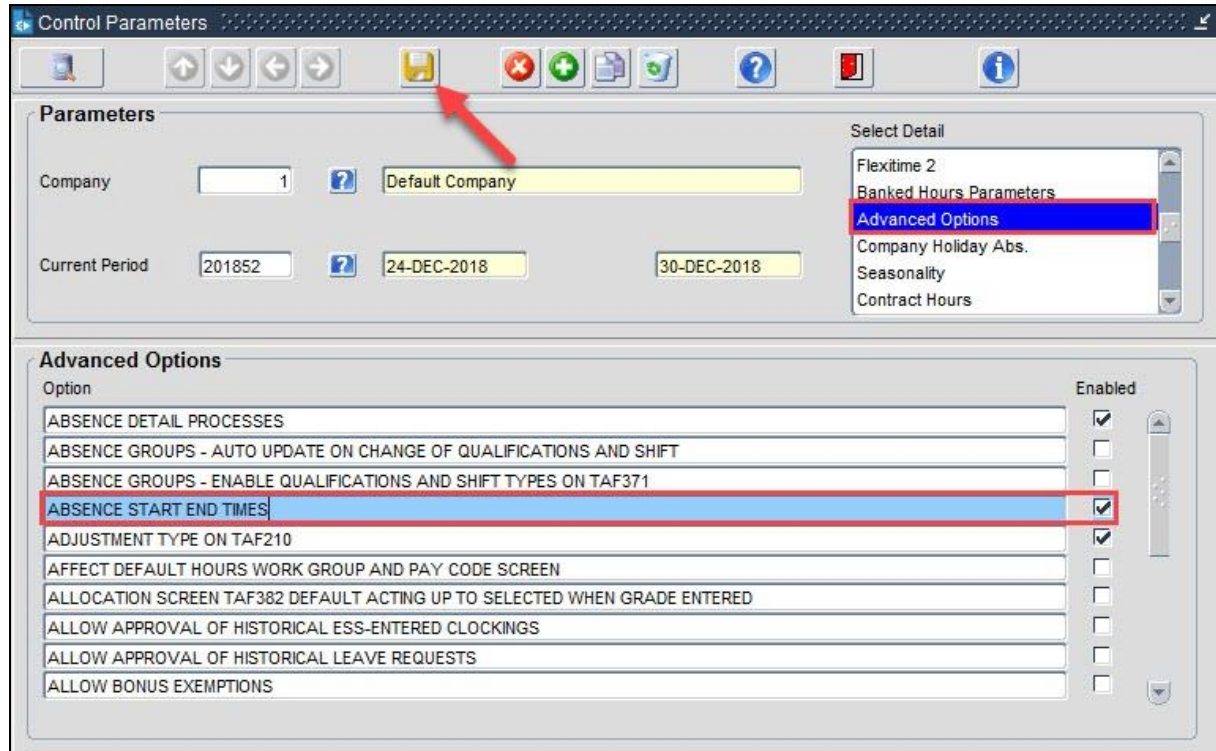

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A – C > Control Parameters*.
2. Enter the *Company*.
3. Select **Advanced Options**.

4. Scroll to locate, and tick to enable the *Advanced Option* below:

- ABSENCE START END TIMES

9. Click the  button to save.
