1. Overview

1.1. Purpose of Document

This document is intended for Team Managers who maintain and publish employee rosters via Roster. Here, we outline the functionality and configuration required for *Roster Attribute*, used to assign an attribute against an employee for a selected pattern.

Items covered, include:

- Roster attribute functionality
- Assigning roster attributes
- Filtering views by attribute
- Reporting on attributes
- Attribute configuration

1.2. What is an Attribute?

An attribute is effectively a means of applying a label to an employee's pattern. This will be the task/job that the employee is scheduled to complete. The attributes are user specified, examples may include 'Cashier', 'Floor', 'Security' or 'Training'. The 'Attribute' can then be displayed on the 'Roster Details' screen, and can also be overridden on a day level. From a CoreHR point of view, the attribute is a job/task that is available within Roster to be assigned to an employee, for each pattern they are working within the week.

This function provides the:

- Ability to assign attributes to employees.
- Ability to view each employee assigned attribute in *Roster Details*.
- Ability to identify what job/task an employee is scheduled to complete by their attribute.

The *Roster Attribute* functionality provides users with the ability to assign an attribute to an employee on a pattern. The attribute is available to view and filter by, on the *Roster Details* screen and can be used to identify what job/task an employee is scheduled to complete on a pattern.

- Employees can have one default attribute assigned, which can then be overridden daily to reflect the job/task for which the employee is working on.
- Employees can also view the attribute that is assigned to them daily via the 'Calendar', on their *CorePortal ESS* instance.

WEEK

DAY

Name	Appointment	Tue 25th	Wed 26th	Thu 27th	Fri 28th	Sat 29th	Sun 30th
Brian Clifford		09:00 - 17:30 Manager	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest	Rest
Claire Burton		09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest	Rest
Fiona Robinson		08:00 - 19:00	08:00 - 19:00	08:00 - 19:00	08:00 - 19:00	Rest	Rest
James Clancy		09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	09:00 - 17:00	Rest	Rest
Naomi Briggs		09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest	Rest

There are some current functionality restrictions, which are beneficial to be aware of.

- In Phase 1, it is not possible to set up a Demand Rule based on an Attribute, to enable you to view the number of employees rostered versus the number of employees required for a job/task. For example, you may need 20 employees completing a Stock Take task.
- Each employee can only have 1 Attribute assigned per pattern, therefore one per roster. Employees cannot have their pattern split out into multiple Attributes.
- The *Roster Attribute* functionality relates to the Roster only, therefore, Attributes are not displayed or maintained in HR Admin.
- It is not possible to AutoRoster or use Uncovered Shifts against the Attribute in Phase 1.

Note:

This functionality is being delivered in two phases. Phase 1 will deliver the fundamental requirements to support the assignment of jobs/tasks to employees and will be covered in this document. Phase 2 will further enhance this functionality and will allow for the Attribute to be used within the AutoRoster, Rules, Statistics, Uncovered Shifts screens.

2. Assign Roster Attribute

2.1.1. Assign Attribute – Employee Level

An employee can be assigned one default Attribute, this Attribute will be assigned per pattern. An employee can only have one open ended Attribute at any one time. You can see in the below screenshot that the employee, does not currently have a default Attribute on their patterns for the week.

2.2. View Attributes

2.2.1. Filter Views

There is a facility to filter the *Roster Details* screen by one or multiple *Attributes*. When searching for the *Attributes* in the filter, you can search by the *Attribute* description for the first selected *Attribute*. For additional *Attributes*, you need to manually scroll and find them from the drop-down list.

To filter the Day view by *Attribute*:

1. Quick jump to *Roster Details*.
2. Click the **Day** view.
3. Select the  button.

The screenshot shows the 'Roster Details' interface. At the top right is an 'ACTIONS' button. Below it, there are several status fields: 'Cost V Budget', 'Cost 0', 'Budget 0', 'Difference 0.00', and 'Cost Last Calculated NA'. The 'Group By' dropdown is set to 'Day', and the 'Filter' icon (a square with three horizontal lines) is highlighted with a red box. Below the 'Group By' dropdown are two buttons: 'WEEK' and 'DAY', with 'DAY' being the active view. A red arrow points to the 'DAY' button. To the right of the 'Group By' dropdown is a location dropdown set to 'London', and a date range dropdown set to '24 Dec 18 - 30 Dec 18'. An 'APPLY' button is located to the right of the date range. At the bottom left, the day 'Monday' is displayed.

4. Select the *Attribute* filter.
5. Enter the required Attribute in the field.
6. Select the attribute from the results.

CLEAR FILTERS **APPLY**

This filter now only displays employees who have the assigned *Attribute* on the day. If an employee is assigned an *Attribute* that is not selected in the filter, the employee is hidden from your view. Also, you can see in the below example, a count of the filters applied to the view displays when the screen is filtered by any items.

WEEK **DAY**

Monday

Name	Appointment	Mon 24th, Dec 2018	Tue 25th, Dec 2018
		6:00 7:00 8:00 9:00 10:00 11:00 12:00 13:00 14:00 15:00 16:00 17:00 18:00 19:00 20:00 21:00 22:00 23:00 0:00 1:00 2:00 3:00 4:00 5:00	

The *Attribute Filter* option is not available to re-order the screen by, therefore, the *Attribute* option cannot be pulled up higher in the section of the screen. The arrows do not allow you to move the *Attribute* from the last available option.

2.3. Attribute Reporting

For *Attribute* reporting purposes, the following views have been added to *CoreInsight*, under the *Core Time* area. When creating a report in *CoreInsight* you can join the *Person Day* on *Roster Attribute* views.

View	Reportable Items
Person Day	Attribute Code
Roster Attribute	Code
	Description
	Roster Attribute
Person Roster Attribute	Appointment ID
	Assigned By
	Date Assigned
	Start Date
	End Date
	Person Reference
	Roster Attribute

For guidance on creating a report via *CoreInsight*, view the *CoreInsight* training material on CoreHR University.

3. Configuration

3.1. Roster Attribute Active Parameter

There is one indicator available that controls access to all *Roster Attributes*, across all screens.

This includes:

- Reference to *Roster Attribute* on *Change Roster - One* and *Change Roster - Many*.
- Screens needed to assign an Attribute to an employee.
- Screens needed to allow the quick assignment of an Attribute at Day Level.
- The display of Attributes on the *Work Week* and the *Calendar* widgets.

To enable this *Roster Attribute* function:

1. Quick jump to *Roster Links*.
2. Click **Open** *General Settings*.
3. Tick on the *Roster Attribute Active* indicator.
4. If applicable, tick on the *Display Attribute on Rest Days* indicator.
This option decides if the *Attribute* should be displayed on a *Rest Days*.
5. Click **Save**.

3.2. Create New Attributes & Attribute Groups

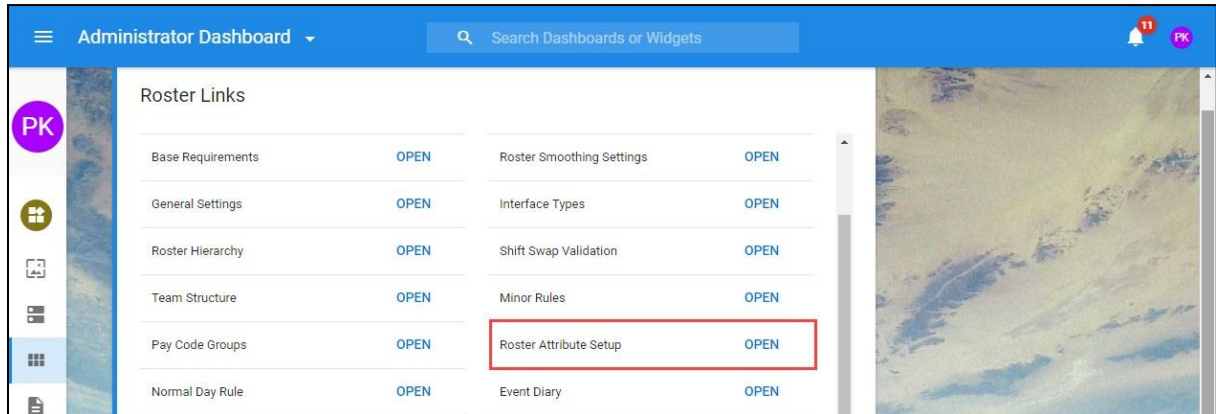

You can create a new Attribute via the *Roster Attribute Setup* screen. This wizard will bring you through 3 steps. Note that on this wizard, existing *Attributes* and *Groups* are also available to be *Assigned*. You do not need to create a new *Attribute* or *Group* each time; each step can be followed individually.

1. Create Attribute – you can also use existing attributes.
2. Create Group – you can also use existing groups.
3. Assign Attribute – you can assign existing attributes and groups.

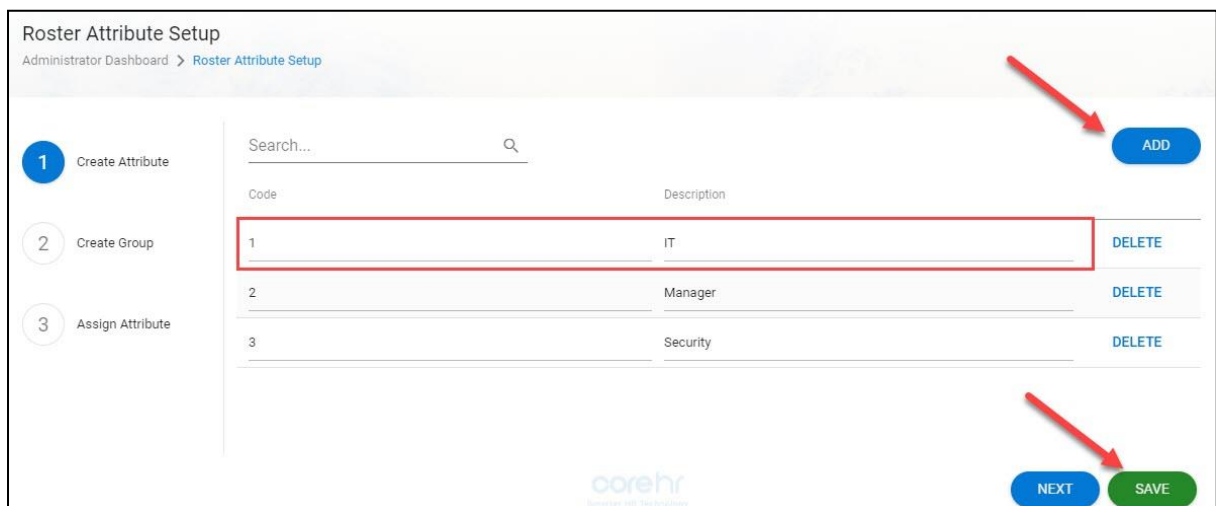

3.2.1. Create Attribute

From *Step 1*, you can *Create Attribute*:

1. Quick jump to *Roster Links*.
2. Click **Open** *Roster Attribute Setup*.

3. Select the **Add** button, to create a new row.
4. Enter the *Attribute Code*.
5. Enter the *Attribute Description*.
6. **Save** the new attribute.

7. Select **Next**, to move onto *Step 2 - Create Group*.

3.2.3. Assign Attributes to Attribute Group

From Step 3, you can now assign any of the attributes, to the required *Attribute Group*:

1. Select the required *Attribute Group* from the drop-down list.
2. Select the **Add** button, to create a new row.
3. Select the required *Attribute* from the drop-down list.

4. Click **Save**.

The screenshot shows the 'Roster Attribute Setup' page. On the left, a sidebar contains three steps: 1. Create Attribute, 2. Create Group, and 3. Assign Attribute. The main area has a dropdown menu labeled 'London Group' with a red box around it. To its right is a blue 'ADD' button with a red arrow pointing to it. Below the dropdown, there is a table with two rows: 'Security' and 'Manager'. Each row has a 'DELETE' button to its right. At the bottom right, there are two buttons: 'PREVIOUS' and 'SAVE'. A red arrow points to the 'SAVE' button. The 'corehr' logo is visible at the bottom center.

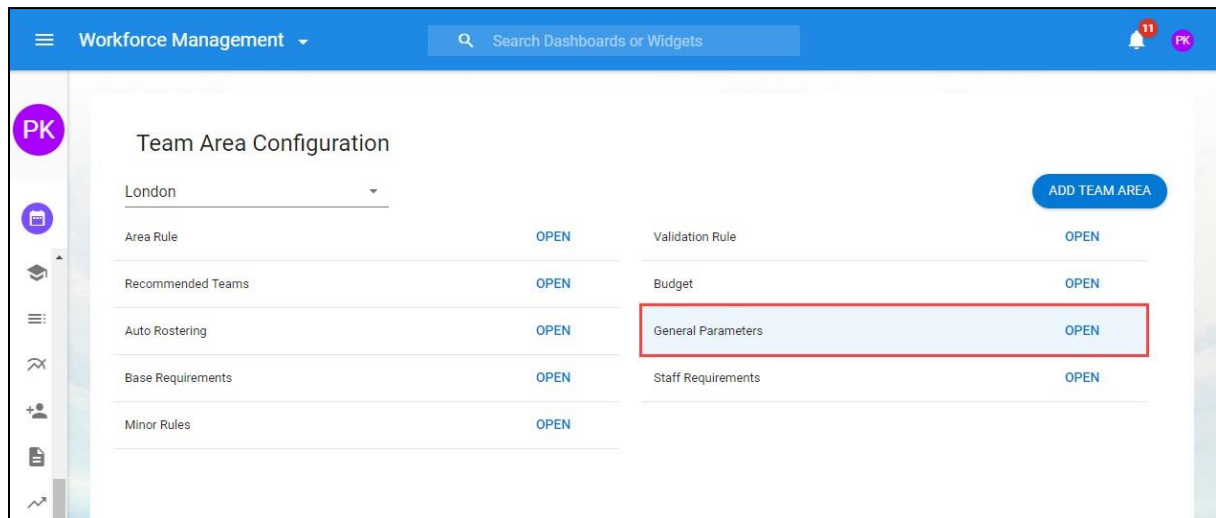

3.3. Assigning Attribute Groups

Attribute groups can be assigned to a *Team Area* via *General Parameters*, or at person level via *Person Maintenance*. If no Attribute Group is assigned, all Attributes will be available to for selection, when assigning to employees and Team Areas.

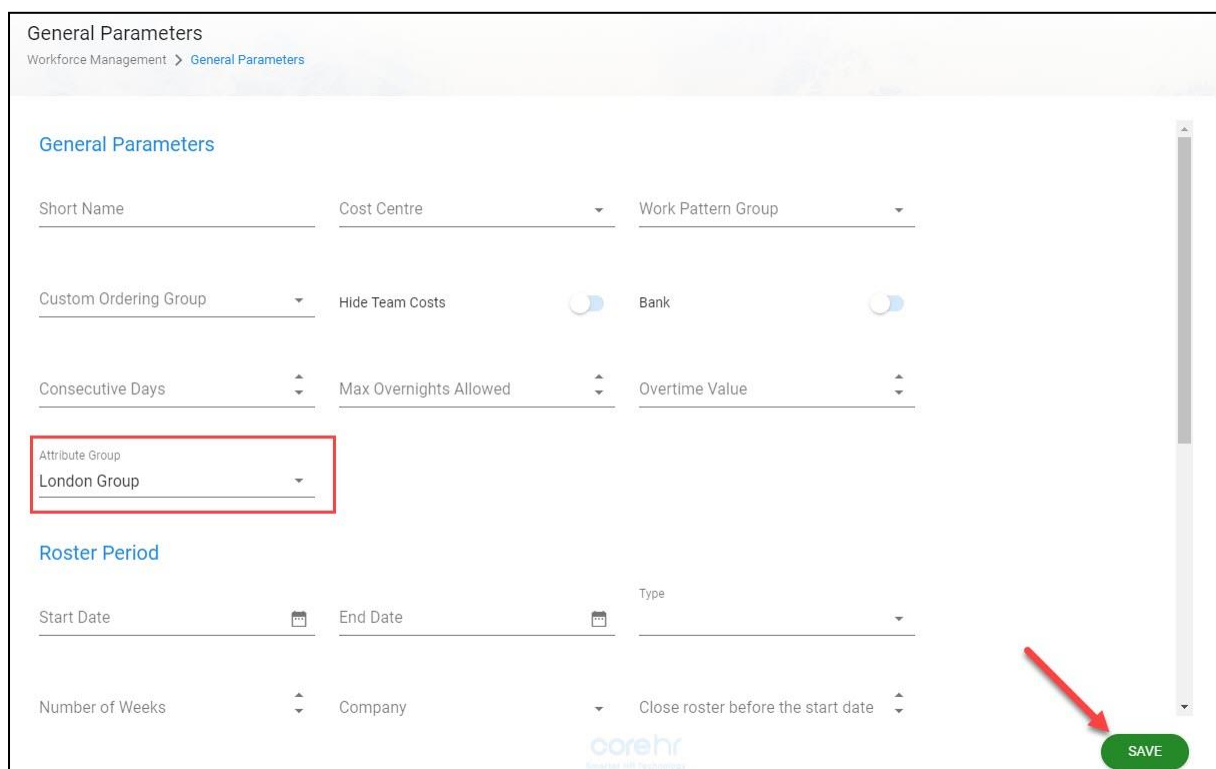

3.3.1. Assign Attribute Group to Team Area

To assign an Attribute Group to a *Team Area*:

1. Quick jump to *Team Area Configuration*.
2. Specify the *Team Area*.
3. Click **Open** *General Parameters*.

4. Select the required Attribute Group from drop-down list.
5. Click **Save**.

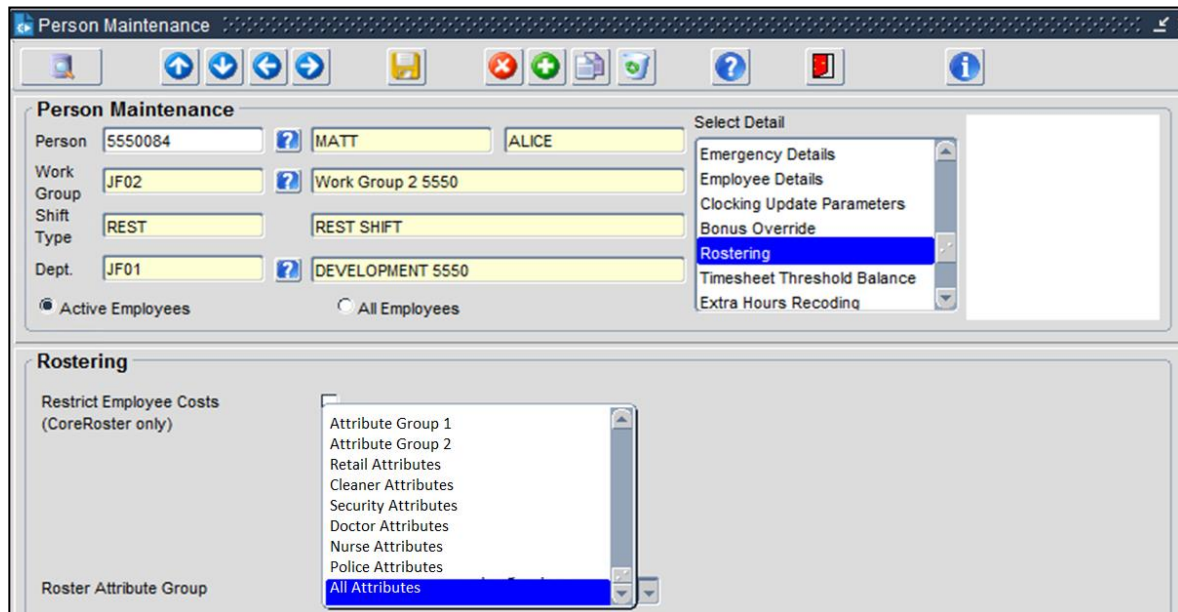

3.3.2. Assign Attribute Group to Employee

To assign an *Attribute Group* directly to an employee, via *Person Maintenance* in the *Back Office*:

1. Go to Back Office > CoreTime/CoreRoster > Pers Data > Person Maintenance.
6. Specify the *Person*.
7. Select the **Rostering** option under *Select Detail* menu.

8. Select the required *Attribute Group* from the drop-down list.
9. Click the  button to save.

The screenshot shows the 'Person Maintenance' window. The 'Person' field contains '5550084'. The 'Work Group' is 'JF02' and 'Work Group 2' is '5550'. The 'Shift' is 'REST' and 'Shift 2' is 'REST SHIFT'. The 'Dept.' is 'JF01' and 'Dept. 2' is 'DEVELOPMENT 5550'. The 'Active Employees' radio button is selected. The 'Rostering' section is active, showing 'Restrict Employee Costs (CoreRoster only)'. A dropdown menu is open for 'Roster Attribute Group', listing various attribute groups: 'Attribute Group 1', 'Attribute Group 2', 'Retail Attributes', 'Cleaner Attributes', 'Security Attributes', 'Doctor Attributes', 'Nurse Attributes', 'Police Attributes', and 'All Attributes'. The 'All Attributes' option is currently selected.
