# 1. Overview

## 1.1. Purpose of the Guide

The PeopleXD *Roster* function you to successfully plan, schedule, review and publish employee shifts to meet your business needs, therefore, match business demand with resource supply.

The Roster Details screen is where you can access, review and complete Roster tasks for your team. We will walk you through:

- Accessing the Roster Details screen
- Viewing Roster and understanding the screen
- What tasks can be completed via Actions
- What task can be completed via Person Actions

## 1.2. Accessing the Roster Details screen

To access the *Roster Details* screen, complete the following:

1. From the *Workforce Management* dashboard
2. Select the **Roster Details** tab
3. The Roster Details screen displays.

## 2. The Roster Details Screen

### 2.1. View Roster Details

The *Roster Details* screen allows you to view rosters for *Team Areas*, within your remit. This screen can display data for *Team Areas* in a *Week* or *Day* view.

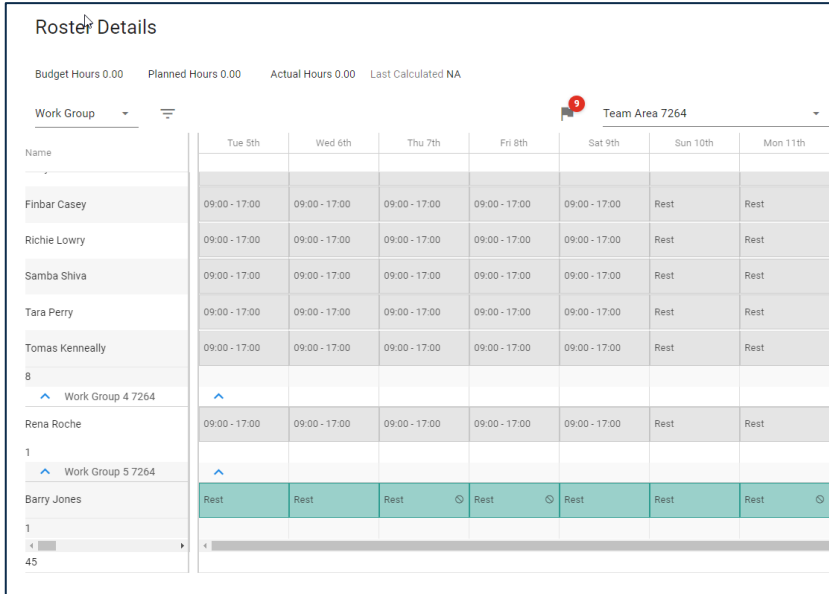

The *Roster Details – Week* view screen displays the *Roster* for the specified *Team Area* and *Roster Period*. Each column represents a day within the week, and each row displays the employee's corresponding *Work Pattern*.

| Roster Details                                                                     |                |                       |               |               |               |          |          | ACTIONS |          |

Options available are:</p> <ul style="list-style-type: none"> <li>Start/End Times – This is set by default and will display the start &amp; end times of the employees work pattern.</li> <li>Breaks Times - This will display the break times schedules for the employees.</li> <li>Hours – This will display the hours the employees are rostered to work.</li> <li>Patterns – This will display the work pattern titles for the employees.</li> <li>Pattern Types – This displays the pattern type the work patterns have been assigned to. For example, Roster, Rest.</li> </ul> |
| <b>Day Start</b>          | Use the dropdown to select a day start time to filter from.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Include Sub Groups</b> | If enabled, it will display all lower team areas on one screen if you have a higher team area access. For example, if a general manager                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Field                         | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                               | had a level 4 access with 3 teams at level 5, they would be able to see all three teams at once on the Roster Details screen. The 'Group By' drop down can then be used to group them into Team Areas.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>View All Shifts</b>        | <p><b>View all Shifts On</b> - will show you which Team Area your team members have been rostered out to. Instead of just showing a white space. People who have been rostered into your team will temporarily disappear.</p> <p><b>View all Shifts Off</b> - will show people from other team areas that have been rostered into your team. People in your team that have been rostered out, will show as a white space.</p>                                                                                                                                                                                                                                                             |
| <b>Roster Roll Up</b>         | <p>If enabled, this allows you to <i>Roll Up</i> an employee's roster rows to a single row per shift, on the <i>Roster Details - Week</i> view screen.</p> <p>During this <i>Roll Up</i>, the rostered <i>Qualifications</i>, <i>Team Areas</i>, and <i>Shift Types</i> are not displayed in the employee details columns to the left of the screen. This is because a single <i>Team Area</i> or <i>Qualification</i> is not applicable to the entire merged row. However, if enabled you can choose to display an <b>Extra Display Item</b> alongside the shift start &amp; end times in the roster box. See our <a href="#">Roster Details Roll Up</a> guide for further guidance.</p> |
| <b>Roster Polling</b>         | If enabled, this will allow you to return large teams that may take some time. It will also prompt you if you want to refresh the roster on entry to the screen rather than doing so automatically. Make sure to turn this off if you plan to view smaller teams.                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Position/Column/Filter</b> | These details show, if enabled, in the employee details in the order selected. You can drag and drop or manually amend the position to suit your requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

Once your desired filter has been selected click **Apply** to return to the updated Roster Details screen. Use the **Clear Filters** button, then **Apply**, to remove all filters and return to default settings.

**Note:** XD will remember the settings applied by a manager unless cleared.

### 2.2. Employee Details

The employee details that display to the left of the *Roster Details* screen are controlled by Admin Settings. The items displayed here can be configured dependant on what employee details you require on the Roster Details screen. See our [Roster General Configuration](#) guide for further details.

Hoover and drag to expand the employee details.

### 2.3. Additional Information

The additional Information columns provide managers with useful summarised roster calculations. For example being able to compare an employees Rostered Hours against Overall Rostered Hours if work in different team areas.

The additional information fields display to the right of the *Roster Details* screen are controlled by Admin Settings. The items displayed here can be configured dependant on what additional information you require on the Roster Details screen. See our [Roster General Configuration](#) guide for further details.

Use the scroll bar at the bottom of the screen to view the additional information fields.

1 - 22 of 22

My Daily Statistics

### 2.4. Cost V Budget

The *Costs vs Budget* feature makes it possible to compare the budget for the day or week, against the costs that occur. This information is accessible on both week or day views and can be displayed as Hours or Values.

**Roster Details**

Budget Hours 10000.00   Planned Hours 341.22   Actual Hours 108.90   Last Calculated NA

Group By   7275 Benton Hotel

- The **Planned Hours/Values** figure is calculated from the work patterns assigned to employees for the roster period.
- The **Actual Hours/Values** figure is calculated from employee clockings/timesheet input for the roster period.

 **Note:** Actual Hours/Values includes all employee clocked hours/values so may vary from planned. For example, if an employee is scheduled to work 7 hours but actually works 8.5 hours, the 8.5 hours are included in the Actual calculated value.

The **Budget** is assigned per *Team Area* where it is possible to assign a set budget to a group of dates. These dates can be set on a daily, or a weekly level. To do this:

1. Select the **Team Area Configuration** Tab.
2. Select the applicable *Team Area* from the drop-down list.
3. **Open** Budget.
4. The Budget screen displays all existing budgets.
5. Click **Add**.
6. Enter the **Start & End Dates**.
  - To set on a daily level, you must enter the same required date for the budget into the *Start Date* and *End Date* fields.
  - To set the required budget for a weekly level, you must enter the *Start Date* of the week in the *Start Date* field, generally the Monday, and the end date in the *End Date* field, generally the following Sunday.
7. Enter the **Budget** value.
8. Click **Save**.

 **Note:** It is also possible to upload daily and weekly Budget values for Team Areas via the WFM Interface File.

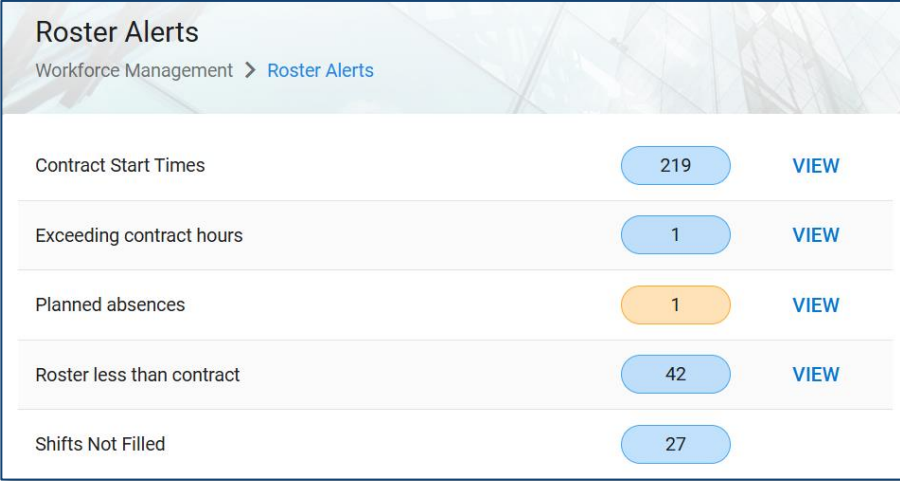

## 2.5. Roster Alerts

A manager can view Roster Alerts that are being breached on a particular week and drill down for further details on these breaches. Which alerts are displayed against a team is determined by the Validation Rule Template assigned to the team area.

You can see the number of Roster Alerts being breached from the Roster Details screen, indicated by a flag and number highlighted in red. The number indicates how many alerts are being breached, not the number of employees breaching each Roster Alert.

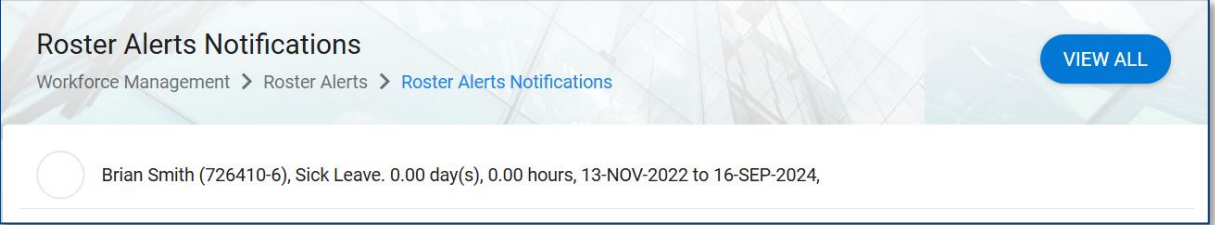

To view the list of Roster Alerts:

1. Click on the **flag**.
2. The Roster Alerts screen displays the number of breaches against each Roster Alert in the week.
3. Click **View**, opposite each alert, to display employees breaching that particular rule, along with further detail on the breach.

| Roster Alerts                        |     |                      |
|--------------------------------------|-----|----------------------|
| Workforce Management > Roster Alerts |     |                      |
| Contract Start Times                 | 219 | <a href="#">VIEW</a> |
| Exceeding contract hours             | 1   | <a href="#">VIEW</a> |
| Planned absences                     | 1   | <a href="#">VIEW</a> |
| Roster less than contract            | 42  | <a href="#">VIEW</a> |
| Shifts Not Filled                    | 27  |                      |

4. Click **View All**, to show the employee(s) breaching the selected Roster Alert on the Roster Details weekly view.
  - Applicable actions can be completed for these employees.
  - Employees not breaching the particular Roster Alert will be hidden from the view.

| Roster Alerts Notifications                                                         |                                                                                          | <a href="#">VIEW ALL</a> |

## 2.6. Actions

A number of options are available to managers to complete from the *Actions* button. These can be broken down in to:

- Actions that can be completed at a Team level.
- Information displayed on the Roster Details screen.
- Access to reports/charts.

### 2.6.1. Change Roster & Global Update

An employee's Roster can be updated one of three ways, once a Roster has been published for a week, the employee can see any amendments made to their week.

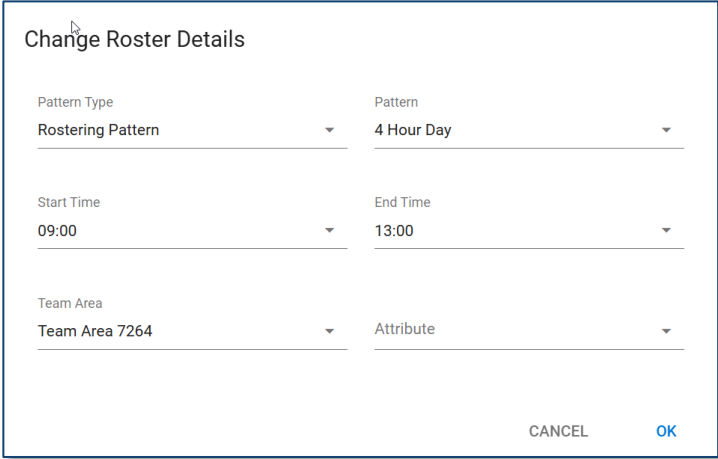

- **Single Roster change:** update an employee's Roster for one day/period.
- **Group Roster change:** update multiple employees for a day/period.
- **Global Update:** update by team area for all employees.

For details on a single roster change see section [2.6.1 Change Roster](#).

### **Group Roster change**

To update the roster for **multiple employees**, follow the steps below:

1. Expand *Actions* and select **Change Roster**.
  - The Change Roster Details window opens.
2. Enter the details of the roster you wish to assign e.g., Pattern Type, Pattern, Team Area

|                   |            |
|-------------------|------------|
| Pattern Type      | Pattern    |
| Rostering Pattern | 4 Hour Day |
| Start Time        | End Time   |
| 09:00             | 13:00      |
| Team Area         | Attribute  |
| Team Area 7264    |            |

CANCEL OK

3. Click **OK**.
4. You will be taken back to the *Roster Details* screen.
5. Click on **each day** for **each specific employee** that you want this pattern to apply to.
  - For each day selected the hours will change from their previous pattern to the new pattern.
6. Once all employees are selected, click **Save**.

It is also possible to return to the *Roster Details* screen by selecting **Workforce Management** from the breadcrumb. You can then amend the selected shifts and:

- Click **Cancel**, to cancel the full *Roster Change*.
  - Click **Save**, to be brought back to the *Change Roster* validation screen again.
8. Click **Save** to confirm.
  9. A warning message displays, that any manual break changes will be removed on the affected shifts.
  10. Click **Yes**, if applicable.
  11. The *Roster Details* displays, and the roster has updated successfully.

### Global Update

To update the roster for a **team area**, follow the steps below:

1. Expand *Actions* and select **Global Update**.
  - The Change Roster screen opens.
2. Select the **Work Type**, **Pattern Type** & **Pattern**, you wish to assign.
3. Select the **Team Area**, you wish to assign the pattern to.
4. Enter the **Dates & Times**, the new pattern is to be applied.
5. *Attributes* and *Breaks* can also be changed at this point.

6. Click **Save**.

### 2.6.2. Calculate Planned / Calculate Actual

The **Calculate Planned** option is available for current and future periods. Selecting this option will calculate the planned hours/values for the period, based on the work patterns assigned to employees for the roster period. The calculated figure will display against Planned Hours/Values once selected.

 **Note:** Calculate Planned will only include pay codes that are set as pay effecting (Decimal).

Selecting the **Calculate Actual** option will calculate the actual hours worked based on employee clockings/timesheet input for the roster period, at that point in time.

**Note:** Actual Hours/Values include all employee clocked hours/values so may vary from planned. For example, if an employee is scheduled to work 7 hours but actually works 8.5 hours, the 8.5 hours are included in the Actual calculated value.

### Roster Details

Budget Hours 10000.00   Planned Hours 341.22   Actual Hours 108.90   Last Calculated NA

Group By    7275 Benton Hotel 

### 2.6.3. Refresh This Week

The system regenerates the Roster to refresh every night. Should you wish to see individual updates made, you can use the *Refresh The Week* option. This will update the Roster Details screen for the individual you have applied changes to for the period.

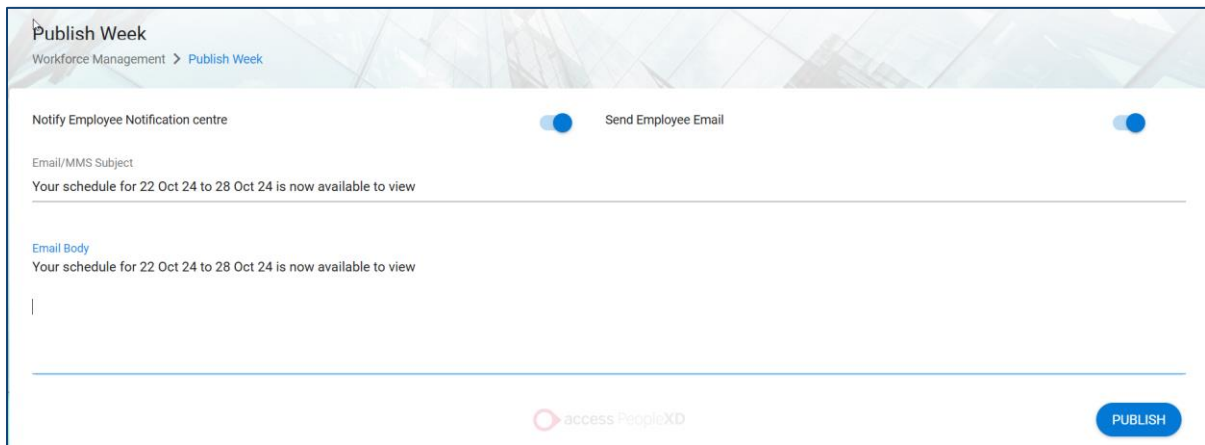

### 2.6.4. Publish Week

A manager can publish a weekly roster for a team area(s) when ready for employees to view. Once the roster has been published by the manager, employees will receive a notification that

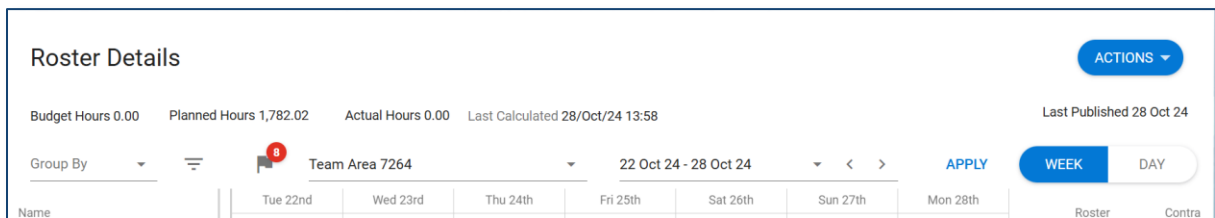

the shifts can be viewed on the ESS dashboard for that week. Prior to publishing the roster, employees will see a 'Not Published' label for each shift.

To publish a weekly roster, from the Roster Details screen:

1. Ensure the *Team Area* and *period* are correct.
2. Expand Actions and click **Publish Week**.
3. The Publish Week screen displays:
  - By default, a notification will be sent to the notification centre of employees on the Roster, as well as an email.
  - Both the notification and/or email can be disabled when publishing a week's roster by de-selecting the relevant option.
  - A generic subject and body will be generated for both the notification and email, both can be updated to include more specific details, if required.
4. Click **Publish**.

5. Once published, the date when the roster was last published will be displayed on the Roster Details - Weekly view.

### 2.6.5. Send Update

Once a roster has been published for the week an option to *Send Update* is available from Actions. If changes have been made to a weekly roster a subsequent notification can be sent by managers to alert employees that their rosters have changed.

To trigger a notification to employee's whose roster has changed since the roster was previously published, from the Roster Details screen:

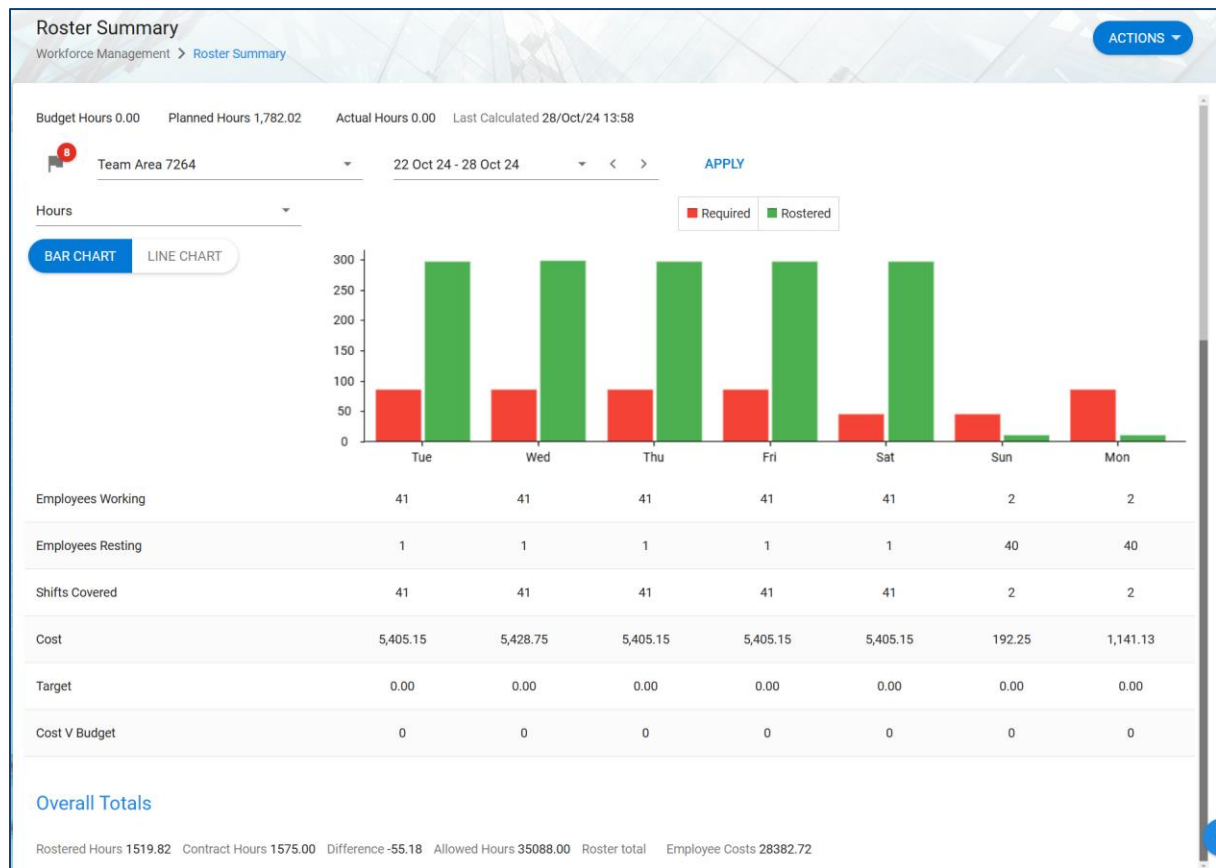

1. Open the week where the Roster has already been published.
2. Expand Actions and click **Send Update**.
3. The Publish Week screen displays.
  - By default, only employees whose roster has been updated since the week was last published will receive a notification/email.
  - You can update the notification text that employees will receive and, if required, disable the notification and/or email.
4. Click **Publish**.

### 2.6.6. Details Summary

The *Detail Summary* option allows you to display the roster summary for the period. This displays a graphical breakdown of the *Required Vs Rostered* employees for each day per week. Required staffing is defined by the Roster Rules, and the criteria against each rule, assigned to a team area. The count of rostered employees is determined by the number of rostered employees meeting the rule criteria. The graph can be displayed as a bar chart or line chart.

Once the details summary is selected the *Actions* button can be used to change the display to *Hours* or *Values*. Depending on the period selected you also have the option to *Calculate Actuals* (current/historical) or *Calculate Planned* (future).

To return to the *Roster Details* screen click **Workforce Management** from the breadcrumb.

### 2.6.7. Roster Reports

The *Roster Reports* option gives you access to 6 default reports. Once created the report can be printed or exported to excel. Reports available are:

| Report                  | Description                                                                                                                                                                                                |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Roster Report</b>    | A grouped weekly roster report. Select the group you would like to run the report on and deselect options that you would like to remove from the report e.g., statistics or notifications (roster alerts). |
| <b>Daily Roster</b>     | A daily roster report. Select the day(s) you wish to include in the report along with start and end times. Select options that you would like to remove from the report e.g., availability or breaks.      |
| <b>Uncovered Shifts</b> | The <i>Uncovered Shifts Report</i> displays a list of all the uncovered shifts for the selected team for the period the manager is viewing.                                                                |

| Report                         | Description                                                                                                                                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Absence Listing</b>         | The <i>Absence Report</i> displays a report for all absences booked for the team selected and the period selected.                                                                               |
| <b>Condensed Roster Report</b> | The <i>Condensed Roster Report</i> displays a more condensed version of the roster details report.                                                                                               |
| <b>Time Reports</b>            | A selection of Time Reports are available:<br>Daily Clocking Hours                      Pay Code Hours<br>Pay Code Instance                          Pay Code Occurrence<br>Balance Details<br>• |

To print or download a report from the Roster Details screen:

1. Click *Actions* and select **Roster Reports**.
2. Select the **Report Type** you wish to run.
  - Depending on the option selected the options available will differ.
3. Select the criteria you wish to include in the report.
4. Click **Create Report**.
5. The Roster Report screen displays where you can:

| Rostered by Team                   |                          |                          |                          |                          |                          |                          |                          |
| Rostered by Pattern                |                          |                          |                          |                          |                          |                          |                          |

6. To amend the report criteria or change reports, click **Roster Reports** in the breadcrumb. Alternatively to return to the Roster Details screen, click **Workforce Management**.

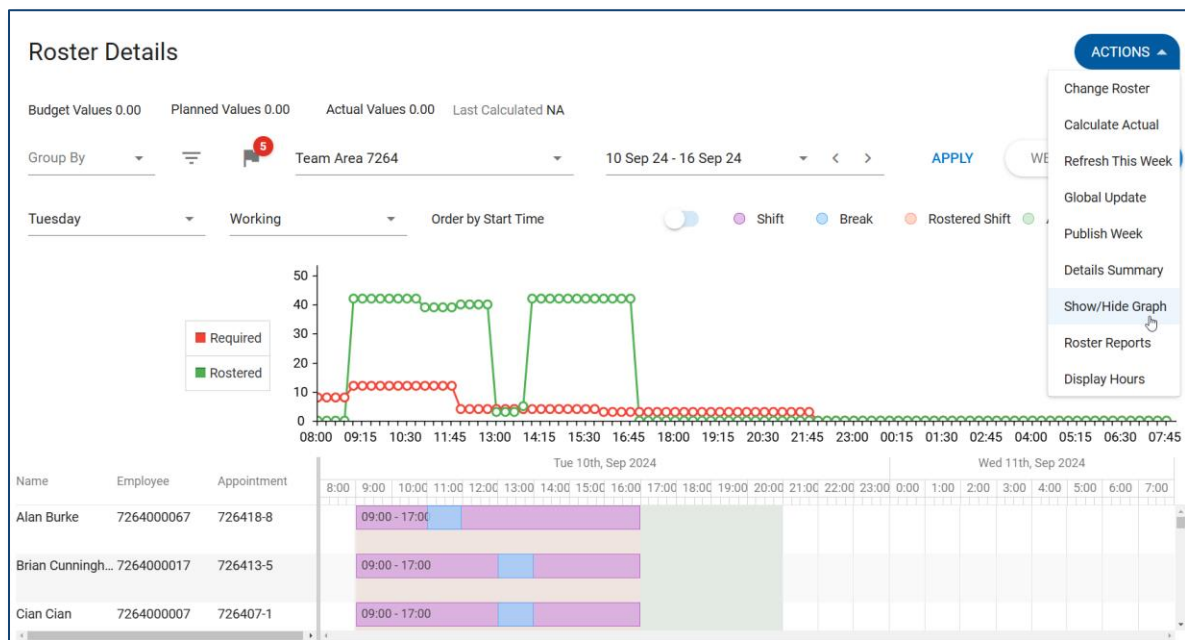

### 2.6.8. Display Values/Display Hours

The *Display Hours* or *Display Values* options allows you to change the Cost v Budget information to the required display option.

### 2.6.9. Show/Hide Graph

The *Show/Hide Graph* option is only available from the Roster Details – Day view. This option allows you to display, or not, a graphical breakdown of the *Required Vs Rostered* employees at a day level and provides you with the ability to view times in the day that are over or understaffed.

## 2.7. Person Actions

The list of *Person Actions* can be accessed by clicking on the employee's name within the *Roster Details – Week View* screen. This displays the list of actions that can be completed per employee record.

The screenshot shows the 'Roster Details' page. At the top, there are summary statistics: Budget Hours 0.00, Planned Hours 1,782.02, Actual Hours 0.00, and Last Calculated NA. Below this, there are filters for 'Group By', 'Team Area 7264', and a date range '22 Oct 24 - 28 Oct 24'. There are buttons for 'APPLY', 'WEEK', and 'DAY'. A list of employees is shown on the left, with a dropdown menu open for 'Alan Burke'. The dropdown menu includes options: Change Roster, Absences, Roster Availability, Assign Qualifications, View Qualifications, Assign Attributes, Person Attributes, Team Areas, Shift Change, Clockings, and Timesheet Input. The main table displays the roster for the week, with columns for each day and a summary row at the bottom.

### 2.7.1. Change Roster

An employee's Roster can be updated one of three ways, once a Roster has been published for a week, the employee can see any amendments made to their week.

- **Single Roster change:** update an employee's Roster for one day/period.
- **Group Roster change:** update multiple employees for a day/period.
- **Global Update:** update by team area for all employees.

The *Change Roster* option accessed via Person Actions is a single roster change, outlined below, to see details on group & global roster changes see section [2.5.1 Change Roster & Global Update](#).

#### Single Roster change

From the employee you wish to update:

1. Click on their name and select **Change Roster** or click on the day of the week you wish to change.
  - The Change Roster screen opens.
2. Select the **Pattern Type**.
3. Select the **Pattern**.
4. Ensure **Dates & Times** are correct. If you have clicked the day of the week to access the *Change Roster* screen, the details are automatically populated but can be updated.
5. Check the *Team Area* is correct, amend if required.

6. *Attributes* and *Breaks* can also be changed at this point.
7. Click **Save**.
8. The employee's schedule has been updated for the given day/period.
9. If changes do not display, expand *Actions* and click **Refresh This Week**.

### 2.7.2. Shift Swap

It is also possible for managers to action a shift swap from the *Change Roster* screen.

To action a shift swap from the employee you wish to update:

1. Click on their name and select **Change Roster** or click on the day of the week you wish to change.
  - The Change Roster screen opens.
2. Turn on the **Swap Shift** toggle.
3. Select the applicable employee from the **Shift Swap Person** drop-down list.
4. Select the applicable **Shift Swap Appointment** from the drop-down list.
5. Click **Save**.

### 2.7.4. Roster Availability

An employee's roster availability profile is broken into an availability section and a profile section. The availability section defines the days and times each day that a person is available to work. The profile section captures details such as:

- The minimum hours an employee should work on a week or day.
- The maximum hours a person should work in a week or a day.
- The maximum number of shifts a person should work in a week.

Roster alerts can be enabled to alert a manager if an employee's schedule is breaching certain availability and profile details. Validation rules can also be enabled to prevent certain availability and profile details from being breached when running processes including the autoroster, uncovered shifts, publishing shifts, and shift swaps.

The Roster Availability is assigned to an employee with a start date and, if required, an end date. If the employee's roster availability is being permanently changed the current one can be amended or a New Contract can be assigned with a new start date, if a record of the old one is required. If the employee's Roster Availability is changing for a defined number of weeks, an Roster Availability can be created to override the existing one between the specified start and end date.

### To access Roster Availability for an employee:

1. From the *Roster Details* screen, click on the relevant employee and select **Roster Availability**.
2. The Roster Availability screen displays, from here you can:
  - Create a new contract.
  - Amend the existing contract.
  - Delete the existing contract.

### To create a new availability profile:

1. From the *Roster Availability* screen, click **Add New Contract**.
  - The contract will be auto populated with start and end dates of the roster that was open on the Roster Details screen.
2. Change the Contract Start Date if required and remove the Contract End Date if the contract is to be open ended.
3. Enter the **Number of Sundays** field, if applicable.
4. Turn on the **Late Nights** toggle, if the employee is available to work late nights. And select the **Number of Late Nights** the employee is available to work.

5. Select the times between which the employee is available to work on each day.
  - Leave the Start and End Times blank to indicate that an employee is not available to work on that day.
  - Enter Split Start and End Times, if required.
6. Click **Next**.
7. In the *Shift Details* section populate the required fields. Do not populate Standard Hours per Day, Contract Text, or Roster Grade.
8. In the *Additional Details* section enter the **Minimum** and **Maximum Hours per Week**, if required.
9. Click **Save**.
10. You will be returned to the Roster Availability screen where the Employee's Roster Availability is displayed identifiable by the Start Date.

### To replace an employee's existing availability profile:

1. From the *Roster Availability* screen, expand the 3-dot menu of the existing contract and select **Edit Contract**.
2. On the *Availability* tab enter an **End Date** for the existing contract.
3. Click **Next** or select Profile Details.
4. Click **Save**.
5. Confirm **Yes** to the warn message displayed.
6. You will be returned to the Roster Availability screen where the Employee's Roster Availability is displayed with the end date applied.
7. Click **Add New Contract**.
  - The contract will be auto populated with start and end dates of the roster that was open on the Roster Details screen.
8. Change the **Contract Start Date**, if required.
  - The Contract Start Date should be the date following the Contract End Date against the Availability Profile being replaced.
9. Remove the Contract End Date, if the contract is to be open ended.
10. Enter the **Number of Sundays** field, if applicable.
11. Turn on the **Late Nights** toggle, if the employee is available to work late nights. And select the **Number of Late Nights** the employee is available to work.
12. Select the times between which the employee is available to work on each day.

- Leave the Start and End Times blank to indicate that an employee is not available to work on that day.
- Enter Split Start and End Times, if required.

13. Click **Next**.

14. In the *Shift Details* section populate the required fields.

15. Click **Save**.

16. You will be returned to the Roster Availability screen where the Employee's New Roster Availability is displayed identifiable by the Start Date.

### To edit an employee's availability profile:

1. From the *Roster Availability* screen, expand the 3-dot menu of the current contract and select **Edit Contract**.
2. Update the fields, as required.
3. From the *Profile Details* tab, click **Save**.
4. Confirm **Yes** to the warn message displayed.
5. You will be returned to the Roster Availability screen.

### To override an employee's open-ended availability profile for a period:

A manager can override an employee's current open ended availability profile for a number of week(s). The override availability profile is only active for rosters between the Contract Start Date and Contract End Date. The open-ended availability profile is active for rosters outside of these dates.

To do this:

1. From the *Roster Availability* screen, click **Add New Contract**.
  - The contract will be auto populated with start and end dates of the roster that was open on the Roster Details screen.
2. Change the Contract Start & End Dates, if required.
  - The override availability profile details will be applied to rosters between these dates. If an employee also has an open-ended availability profile, the open-ended profile will once again become active for rosters after the end date against the override availability profile has passed.
3. Populate the remaining Availability & Profile Details fields, as required.

- View employee availability on Roster Details screen:**

| <div>09:00 - 17:00</div> |    |      |    |       |    |       |    |       |    |       |    |       |    |       |    |       |    |       |    |       |    |

 **Note:** Availability should be used as a guide and does not prevent a manager rostering the employee for a shift on a day that is marked as unavailable.

This gives you access to Qualifications where you can assign or view qualifications for an employee. Qualifications are taken into account by the *Validation Rules* that are specified for *Rostering* processes, to determine employee's suitability, for filling staffing requirements. For the *Roster* to determine if a qualification is active or not, the *Start* and *End Dates* on the employee's qualification must be defined. Therefore, only *Active* qualifications are considered by the *Validation Rules*.

### To add a new qualification to an employee record:

1. From the *Roster Details* screen, click on the relevant employee and select **View Qualifications**.
2. Click **Add**.
3. Select the applicable **Qualification**.
4. Select the applicable **Roster Priority**, this can be marked as Primary or Secondary.
  - This provides the ability to *Auto Roster* based on the priority attached to the *Qualification*. This, *Rosters* employees based on their **Primary Qualification** first and only *Rosters* them on their **Secondary Qualification** if the **Primary Qualification** is not available. This functionality corresponds with the following *Validation Rules*:
    - 1027 Autorostering: Qualification Priority
    - 2027 Uncovered: Qualification Priority
5. Enter the **Date From**.
  - The *Qualification* is *Active* within the system from this date forward, allowing you to assign it to an employee's shifts.
6. Enter the **Date To**, if applicable.
  - The *Qualification* is *Inactive* within the system after this date, stopping you from assigning it to an employee's shifts.
7. Click **Save**.
8. The *Qualification* is now active on the employee's record and can be assigned to their shifts.

### To assign qualifications to an Employee's Shifts:

1. From the *Roster Details* screen, click on the relevant employee and select **Assign Qualifications**.
2. Click **Assign**.
3. Select the Qualification and click **OK**.
4. The Qualification is now assigned to the employees shift.
5. Click **Save**.

The screenshot shows the 'Assign Qualifications' screen for Eddy Murphy (ID: 7264000049). The interface includes a header with the title and breadcrumb 'Workforce Management > Assign Qualifications'. Below the header, there's a table with columns: Team Area, Pattern, Start Time, End Time, and Qualification. The table is grouped by day of the week (TUESDAY, WEDNESDAY, THURSDAY, FRIDAY). Each day has a row for 'Team Area 7264' with a pattern of 'Work 09:00-17:00 1hr break' and a start time of '09:00' and end time of '17:00'. The 'Qualification' column shows 'Cashier' and an 'ASSIGN' button. At the bottom right, there is a green 'SAVE' button. The 'access PeopleXD' logo is visible at the bottom center.

| Team Area      | Pattern                    | Start Time | End Time | Qualification                  |
|----------------|----------------------------|------------|----------|--------------------------------|
| TUESDAY        |                            |            |          |                                |
| Team Area 7264 | Work 09:00-17:00 1hr break | 09:00      | 17:00    | Cashier <a href="#">ASSIGN</a> |
| WEDNESDAY      |                            |            |          |                                |
| Team Area 7264 | Work 09:00-17:00 1hr break | 09:00      | 17:00    | <a href="#">ASSIGN</a>         |
| THURSDAY       |                            |            |          |                                |
| Team Area 7264 | Work 09:00-17:00 1hr break | 09:00      | 17:00    | <a href="#">ASSIGN</a>         |
| FRIDAY         |                            |            |          |                                |

### 2.7.6. Attributes

An *Attribute* is effectively a means of applying a label to an employee's pattern. This will be the task/job that the employee is scheduled to complete. These *Attributes* are user specified, examples may include 'Cashier', 'Floor', 'Security' or 'Training'. The *Attribute* can then be displayed on the *Roster Details* screen and can also be overridden on a Day Level.

The *Attribute* is a job/task that is available within *Roster* to be assigned to an employee, for each pattern they are working within the week. An employee can be assigned one default *Attribute*, this *Attribute* will be assigned per pattern. An employee can only have one open ended *Attribute* at any one time.

This function provides the ability to:

- Assign *Attributes* to employees.
- View each employee assigned *Attribute* in *Roster Details*.
- Identify what job/task an employee is scheduled to complete by their *Attribute*.

### To assign a default Attribute to the employee:

1. From the *Roster Details* screen, click on the relevant employee and select **Person Attributes**.
2. Select the relevant employee *Appointment*.
3. Click **Add**, to create a new row.
4. Select an **Attribute**.
5. Select a **Start Date**.
6. Select an **End Date**, if required/known.
7. Click **Save**.
8. The default attribute will be displayed with the employee's patterns, from the date effective.

It is possible to quickly update the Attributes that have been assigned to an employee for a week. This allows for easier data maintenance of attributes in the week. To do this:

1. From the *Roster Details* screen, click on the relevant employee and select **Assign Attributes**.
2. Click **Assign**.
3. Select the Attribute and click **OK**.
4. Repeat for each day, as required.
5. Click **Save**.
6. The *Roster Details* screen will now display the employee's attributes for the specified days within the week.

See our [Roster Attributes](#) guide for further assistance.

### 2.7.7. Team Areas

A manager can change the home team area an employee is assigned to. The manager must have access to the team area that the employee is being moved between.

To do this:

1. From the *Roster Details* screen, click on the relevant employee and select **Team Area**.

2. On the Team Areas screen, add an **End Date** against the employee's current team area assignment.
3. Click **Add**.
4. From the dropdown options, select the employee's new **Team Area**.
5. Enter the **Start Date**.
  - This must be the date following the end date against the previous team area assignment.
  - Leave the End Date blank, unless the assignment is temporary, and the end date of the assignment is known.
6. Click **Save**.
7. An *Update Future Shifts* message will display asking if you want to update any future planned work patterns to the new work pattern. Click **Yes** or **No** to confirm your choice.

### Update Future Shifts

Future Dated shifts exist that have been manually assigned to the employees previous Home Team Area,would you also like to update the assigned shifts to the new Home Team Area

**NO** **YES**

8. The employee will no longer appear on the roster for the old team after the end date added. The employee will appear on the roster for the new team area from the start date added.

### 2.7.8. Shift Changes

This gives you access to the Shifts screen where you can view and add a *Shift Change* for the employee, with an effective date.

SAVE

It is also possible to add a *Personal Shift Override*. This means that you can assign a different *Shift Type* per each day of the week, for the applicable employee only. The employee then has their own specially defined Shift Type pattern for the week.

To add a Personal Override, from the current Shift Type:

1. Expand the 3-dot menu and select **Add Personal Override**.
2. Click **Add**, to create a new row.
3. Select the applicable **Shift Type** for each day of the week.
4. Click **Save**.
5. Return to the *Roster Details* screen.
6. Click **Actions**.
7. Select **Refresh This Week**.
8. The *Shift Type* for the applicable employee now displays as updated.

### 2.7.9. Clockings

This gives you access to the Clockings screen where you can view *Clocking* records for an employee. If you are the *Reports to Manager* of the work group the employee is in, you can also add a Clocking record for an employee. To do this:

1. From the *Roster Details* screen, click on the relevant employee and select **Clockings**.
2. Select the **Date** you wish to add the clocking for.
3. Click **Add**, to create a new row.
2. Select the **Time**.
3. Select the employee's **Appointment**.

4. Add a **Comment**, if applicable.
6. Click **Save**.
7. It is also possible to use the 3-dot menu to insert additional clocking, before or after the entry or delete the entry.

### 2.7.10. Timesheet Input

This gives you access to the *Timesheet Input* screen where you can review, manage and add a timesheet entry for an employee, in your remit, as per the usual Timesheet Input process. Timesheets are typically added by an employee using the Employee Dashboard.
