1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the processes and configuration required for *Employee Self Service* widgets, that are used to support *Roster*, on the *Employee Dashboard*. *Employee Self-Service* widgets include:

- Work Week
- Calendar
- Shift Swaps
- Unscheduled Shift Widget

1.2. What is included in Roster Employee Self Service?

The *Roster* functionality allows for employees to complete actions via *Employee Self Service*. These actions are listed below:

- Submit Roster Availability
- Accept/Reject Uncovered Shifts
- Submit/Accept Shift Swap Requests
- View Co-Workers Roster & Leave

2. Roster Availability

2.1. Overview

Roster Availability feeds into the employee's *Roster* contract and can be used when reviewing what times an employee is available to work within a day. This functionality provides employees with the ability to submit their *Roster* availability. This can be used where the employee's availability may vary between weeks. For example, an employee may not be available to work every second Monday.

The submission of availability to work can then be routed through an approval process, or it can directly update the employees' contract, dependant on configuration.

Note:

- If the *Roster Availability* approval process is not configured, then no approval process is followed, and the employee's availability submission is saved immediately once submitted.
- It is recommended that all availability submissions are configured to go through an approval process.

2.2. Accessing the Roster Availability Screen

The Roster Availability screen can be accessed via the Roster Availability option on either:

- **Calendar Widget** – expand the 3-dot menu and select Roster Availability
- **Work Week Widget** - expand Actions and select Roster Availability

2.3. The Roster Availability Screen

Once accessed the Roster Availability screen displays.

Roster Availability
Employee Dashboard > Roster Availability

Week Starting*
06-Jan-2025

Week Ending

Availability Details

Max Hours Number of Sundays Late Nights

Day	Start Time	End Time	Split Start Time	Split End Time

The **Roster Availability** screen contains the following fields:

Option	Details
Week Starting	This is the start date of the week you wish to submit availability for. Availability must always be submitted in weekly blocks, if not open ended.
Week Ending	This is the end date of the week you wish to submit availability for. If submitting open ended availability, leave the End Date blank.
Max Hours	This is the max number of hours you are able to work per day/period.
Number of Sundays	This is the maximum number of Sundays you are available to work.
Late Nights	If the toggle is turned on, you are available to work late nights.
Number of Late Nights	This allows you to enter the number of late nights you are available to work. This field will only display when the Late Nights toggle is turned on.
Day	This displays the day of the week. Note: If enabled, Public Holiday will display at the bottom of the Day list for you to add your roster availability for public holidays.

Option	Details
Start and End Time	Enter the Start and End Times for each day you are available to work.
Split Start and End Time	Split Shifts allows employees to submit two timeslots for the one day. For example, the employee may be available to work from 09:00 to 13:00 and 15:00 to 17:30. Enter the Split Start Time and Split End Time for each day you are able to work.  Note: Split times cannot overlap start & end times.
Clear	This will clear the availability selected for the day.
Save	Once you have completed your Roster Availability, click Save to submit your request.

The **History** button allows you to view pending Roster Availability requests. The *Availability History* screen displays a list of all availability requests, and their status. **View** can be used to show details of the Roster Availability submitted.

Availability History			
Employee Dashboard > Roster Availability > Availability History			
Start Date	End Date	Status	
11-Jul-2016	17-Jul-2016	Approved	VIEW
08-May-2017		Approved	VIEW
04-Feb-2019	10-Feb-2019	Approved	VIEW
15-Apr-2019	28-Apr-2019	Pending	VIEW

Access to the *Availability History* screen can be controlled by the menu options listed in the table below:

Menu Option	Menu ID	Explanation
Hide Employee Availability History	WRKMGMT_MENU.EMPAVAILABILITYHIST	If enabled, the <i>Availability History</i> is not displayed for employees.

Menu Option	Menu ID	Explanation
Hide Manager Availability History	WRKMGMT_MENU.MGRAVAILABILITYHIST	If enabled, the <i>Availability History</i> is not displayed for managers.

2.3.1. Submit Roster Availability

To submit your Roster Availability, from the Work Week widget:

1. Expand **Actions** and select **Roster Availability**.
2. Select the **Start** and **End Date** for the week you wish to submit availability for.
 - Availability must always be submitted in weekly blocks. However, it is possible to leave the *End Date* blank for open ended availability.
3. Select the **Max Hours**, you can work.
4. Select the **No of Sundays**, if applicable.
5. Turn On the **Late Nights toggle**, if applicable. If enabled, select the number of late nights you are available to work.
6. Enter the **Start** and **End Time** for each day you are available to work, including Public Holidays, if applicable.
7. Enter the **Split Start Time** and **Split End Time** for each day you are able to work, if applicable.
 - *Split Shifts* allows employees to submit two timeslots for the one day. For example, the employee may be available to work from 09:00 to 13:00 and 15:00 to 17:30.
8. Once complete, click **Save**.
9. If an approval process is in place, this will submit your request for approval. The availability request will display, in History, as Pending until Approved. See section [2.4. Approval Process](#)

The considerations below should be taken into account regarding *Roster Availability*:

- The *Roster Availability* function can override availability for one week or multiple weeks at a time, dependant on whether an *End Date* has been entered.
- If open-ended availability is approved, any currently open availability has an *End Date* assigned to them. This is the *Start Date* of the new contract, minus one day.
- If no contracted availability exists for an employee, it is possible to submit open-ended availability for multiple cycles, this creates a new row on the employees *Roster Contract*, once approved.
- If an employee is overriding their availability, or submitting a new request, it is not possible to override availability where the *Start Date* is the same as an existing contract *Start Date*.

Split Shifts, No of Sundays & Public Holidays are controlled by parameters on *Site Manager* >

Admin Settings:

Admin Setting	Explanation
cp_allow_split_avail	Displays the <i>Split Shifts</i> option on the <i>Roster Availability</i> screen. This must be set to Y for the option to be available.
cp_roster_avail	Displays the <i>Number of Sundays</i> and <i>Late Nights</i> options on the <i>Roster Availability</i> screen. This must be set to Y for these options to be available.

Admin Setting	Explanation
cp_roster_pubholiday	Displays the <i>Public Holiday</i> option on the <i>Roster Availability</i> screen. This must be set to Y for the option to be available.

2.3.2. Cycle Availability

It is possible for you to update *Cycle Availability* within the system. This feature is used where an employee's availability may vary between weeks. For example, an employee may not be available to work every second Monday. Therefore, it is possible to add a *Week Starting* date within the system, this date is the start date for *Cycle 1*. By adding a *Cycle 2*, you are then adding your availability times to work for the following week.

The *Cycle Availability* option is controlled by the following parameter on *Site Manager > Admin Settings*:

Admin Setting	Explanation
cp_rost_avail_cyc_ctrct	Displays the <i>Cycle Availability</i> option on the <i>Roster Availability</i> screen. This must be set to Y for the option to be visible.

2.4. Approval Process

When an employee submits a *Roster Availability Request* for approval, their applicable manager receives a *Notification*, indicating that there is an alert to be actioned. This is displayed in the *Notification Centre* and also on the *My Approvals Notification Widget*.

Once approved, the *Roster Availability* is then updated on the employee's contract and is picked up by rostering while looking at the *Availability - Validation Rules*.

To **Approve** or **Reject** a *Roster Availability Request*, from the *My Approvals* screen:

1. Click **Approvals** and select the applicable **Availability Request**.
 - or Click View against the relevant Availability Request
2. Details for the *Availability* request is displayed for review.
3. Click **View Details** to review the Availability Request details.
4. Once reviewed, use the breadcrumb to return to **My Approvals**.
5. Confirm the Availability Request details are correct by selecting the **I confirm that the above details are correct** checkbox.
6. Click **Approve** or **Reject**.

The Approval is now successfully updated, and the employee's Roster Contract is updated. If a request is rejected, the employee's Roster Contract is not updated, and the employee is notified that their request has been rejected.

2.5. User Access

The below menu options need to be enabled on the relevant menu profiles for **Roster Availability** to be available on the Calendar and Work Week widgets for employees.

Menu Option	Menu ID	Explanation
CorePortal - Employee Availability Request	MAIN_MENU.ROSTERAVAILABILITY	If enabled, employees have access to submit <i>Roster Availability</i> .

Menu Option	Menu ID	Explanation
CorePortal Employee Availability Approval	MAIN_MENU.COREPORTAL_EMPLOYEE_AVAILABILITY_APPROVAL	If enabled, managers have access to submit <i>Roster Availability</i> .

3. Shift Swap

3.1. Overview

Employees can submit a request to swap a shift with another team member and accept or reject a request for a Shift Swap with another employee, within the same roster week. For the Shift Swap to be successful, managers must approve a request for a Shift Swap.

The Shift Swap approval workflow is as follows:

1. Employee A submits a *Shift Swap* with employee B.
2. Employee B is notified of the swap and then accepts or rejects the *Shift Swap*.
3. If employee B accepts the *Shift Swap*, then the swap notifies the manager of employee B.
4. If the manager approves the *Shift Swap*, the *Roster* is then updated for employee A and B, to reflect the *Shift Swap*.
5. When the status of the swap changes to approved or rejected, both employees are updated of the approval/rejection.

Note:

- Shift Swaps can only be requested within the same Roster week.
- The Shift Swap workflow process category is called 'SSWAP' and is configured the same as any other workflow process.
- The Shift Swap functionality is only available in Roster and is not available in a standalone Time and Attendance site.
- Manager approval only kicks in if the workflow is attached in Roster System Parameters.
- If Validation Rules are applied, only employees with a valid rule are available for selection in the drop-down list.
- It is possible for an employee to cancel a Shift Swap, if they have initiated the swap. However, it is not possible to cancel the swap once the request has been accepted by the receiving employee.

3.2. Shift Swap Process

3.2.1. Submit a Shift Swap

Shift Swaps can be submitted from the following widgets:

- Calendar - **Request Shift Swap**
- Work Week - **Shift Swap**
- Shift Swaps – **Shift Swap**

To do this, from the Shift Swap widget:

1. Click **Shift Swap**
2. The *Request Shift Swap* screen displays, where you can:
 - View all Current Swaps
 - Create a New Request
3. Select the **Swap Day** and **Pattern**, you wish to swap.
4. Select the **Work Day**, if required.
5. Select the applicable team colleague from the **Swap with*** drop down list, you wish to swap the shift with.
6. Click **Save** to submit the Shift Swap.

The screenshot shows the 'Request Shift Swap' interface. At the top, there's a breadcrumb trail: 'Employee Dashboard > Request Shift Swap'. Below this, the 'New Request' section contains four fields: 'Swap Day' (13-Mar-2025), 'Swap pattern' (8.00HRSAB), 'Work Day' (13-Mar-2025), and 'Swap with*' (Stuart Parker). Below the 'New Request' section is a 'Current Swaps' table. The table has four columns: 'Team', 'Shift', 'Duration', and 'Submitted by'. There is one row of data: '23 Operations Assistant' (with a calendar icon), 'Shift', 'Duration', and 'James Smith Specialist Consultant'. A 'VIEW' link is next to the 'Submitted by' field. At the bottom right, there is a green 'SAVE' button. The footer of the form area says 'access PeopleXD'.

Team	Shift	Duration	Submitted by
23 Operations Assistant	Shift	Duration	James Smith Specialist Consultant

3.2.2. Accept a Shift Swap

The employee selected, in the *Swap with* field, will receive a notification to accept, or reject, the Shift Swap Request.

To accept a Shift Swap Request, from the Shift Swap widget:

1. From the applicable Shift Swap, click **View** to review the shift swap details.
2. Confirm you are available to swap by selecting the **I confirm that I am available to swap for the above shift** checkbox.
3. Click **Approve**.
4. You are returned to the *Request Shift Swap* screen.

3.2.3. Manager Approval

When an employee accepts a Shift Swap Request, their applicable manager receives a *Notification*, indicating that there is an alert to be actioned. This is displayed in the *Notification Centre* and also on the *My Approvals Notification Widget*.

Once approved both employees are notified that the *Shift Swap* has been approved, and their *Rosters* are updated to reflect the *Shift Swap*.

To **Approve** or **Reject** a *Shift Swap*, from the *My Approvals* screen:

1. Click **Approvals** and select the applicable **Shift Swap**.
 - or Click View against the relevant Shift Swap.
2. Details of the *Shift Swap* are displayed for review.
3. Click **View History** to review the shift swap history e.g., employee acceptance.
 - Once reviewed, use the breadcrumb to return to **My Approvals**.
4. Confirm the *Shift Swap* details are correct by selecting the **I confirm that the above details are correct** checkbox.
5. Click **Approve**.

3.3. User Access

3.3.1. Employee User Access

For employees to submit and accept Shift Swaps they will need either the *Calendar* and or *Work Week* widget configured on the Employee Dashboard.

Additionally they will need the below *Menu Options* enabled on their *Menu Profile*:

Menu Option	Menu ID	Explanation
Coreportal - Calendar - Time	MAIN_MENU.CALENDAR.TIME	Allows access to the <i>Calendar</i> widget.
Widget - Time - My Work Week	MAIN_MENU.EMPLOYEEWORKWEEKACCESS	Allows access to the <i>Work Week</i> widget.
Shift Swaps	MAIN_MENU.SHIFTSWAPS	Allows access to the <i>Shift Swap</i> button.

3.3.2. Manager User Access

For managers to view and approve *Shift Swap* requests, they must have access to the *Notification Centre*, or the *My Approvals Notifications* widget must be configured to appear on the *Manager Dashboard*.

Additionally they will need the below *Menu Options* enabled on their *Menu Profile*:

System	Menu Option	Explanation
CorePortal Shift Swap Approval	MAIN_MENU.COREPORTAL_SHIFT_SWAP_APPROVAL	Allows access to <i>Approve Shift Swaps</i> .
CorePortal Workforce Management - Manager Shift Swap History	MAIN_MENU.MGR_SHIFT_SWAP_HIST	Allows access to the <i>Shift Swaps History</i> screen.
CoreTime ESS - Shift Swap History	MAIN_MENU.SCH_SWAP_HIST	Allows access to the <i>Shift Swaps History</i> screen.
Widget - Manager - My Approvals	MAIN_MENU.APPROVALS_WIDGET_ACCESS	Allows access to the <i>My Approvals Notifications</i> widget.

4. Uncovered Shifts

4.1. Overview

Uncovered Shifts give a breakdown of all the staffing gaps for the week, based on the rules assigned to the Team Area versus the employees that have been rostered. These Uncovered Shifts can then be published out to employees, who can accept shifts on a first accept first rostered basis.

Note:

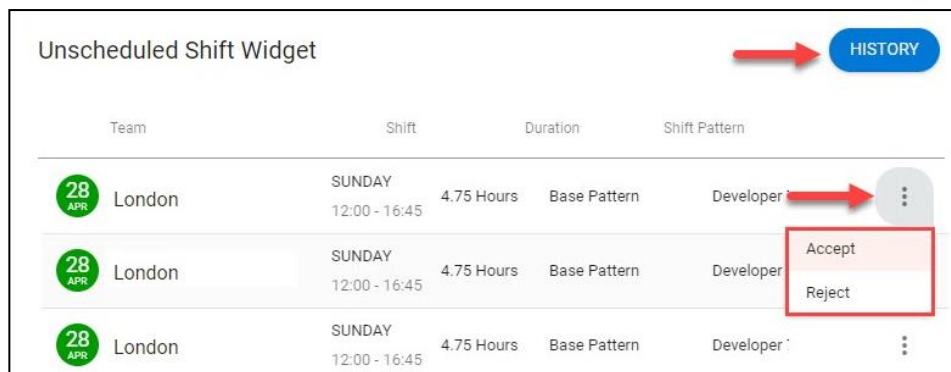

- There is no approval process for *Uncovered Shifts*, once a shift is accepted by an employee, the employee is rostered onto that shift.
- It is possible to first select who you want to *Publish Uncovered Shifts* to by selecting the employees by name. You can then later publish the *Uncovered Shifts* to the full *Team Area* if the shift has not been accepted by one of the initial employees.

4.2. The Unscheduled Shift Widget

Once an *Uncovered Shift* is published, and the selected employee has passed the applicable Uncovered Shift - Validation Rules, that have been assigned to the *Team Area*, it is then possible for the employee to view the shifts on the *Unscheduled Shift Widget*. Employees can then **Accept** or **Reject** the shift. When an *Uncovered Shift* is published to you, a *Notification* is received.

From the Unscheduled Shift Widget you can:

- View All Uncovered Shifts that have been published to you
- View your History of Accepted Uncovered Shifts
- Accept Uncovered Shifts
- Reject Uncovered Shifts

4.2.1. Uncovered Shift History

To view the history of all *Uncovered Shifts* that have been published to and accepted by you. Navigate to the *Unscheduled Shift Widget* and click **History**. The *Uncovered Shift History* screen displays where you can view shifts you have previously accepted.

Employee > Uncovered Shift History				
Team	Shift	Duration	Shift Pattern	Person
28 APR London	SUNDAY 12:00 - 16:45	4.75 Hours	BASE	Ronan Watson
22 APR London	MONDAY 09:00 - 17:00	8 Hours	7.00HRS	Ronan Watson

4.2.2. Accepting Published Shifts

If you accept an *Uncovered Shift*, the shift is then automatically added to your schedule, overriding your current shift on the day. Shifts are accepted on a first accept, first rostered basis. If another employee has accepted a shift also published to you, you can view this detail and the employee who has accepted the shift, via the *Uncovered Shift History* screen.

To accept an *Uncovered Shift*, expand the 3-dot menu of the applicable shift and select **Accept**. The *Uncovered Shift* is now accepted and automatically assigned to your roster for that day.

4.2.3. Rejecting Published Shifts

If you reject an *Uncovered Shift*, the shift is no longer visible on your *Unscheduled Shifts Widget* to accept at a later stage. The shift is still available for other employees to accept or reject.

To reject an *Uncovered Shift*, expand the 3-dot menu of the applicable shift and select **Reject**. The *Uncovered Shift* is now rejected and is no longer visible to you on the *Unscheduled Shift Widget*.

4.2.4. Configuration

For employees to view and accept Uncovered Shifts they will need the *Unscheduled Shifts* widget configured on the Employee Dashboard.

Additionally you can restrict access to stop employees viewing Uncovered Shifts via the Unscheduled Shifts Widget. This is controlled by the below *Menu Option*, that can be enabled on the applicable *Menu Profile*:

Menu Option	Menu ID	Explanation
Show Unscheduled Shifts	MAIN_MENU.EMP_UNCOVERED_SHIFTS_VIEW	Removes access to view <i>Uncovered Shifts</i> via the <i>Unscheduled Shift Widget</i> .
Hide Uncovered Shift	WRKMGMT_MENU.WFMGTUNCOVEREDSHIFTS	Removes access to Uncovered Shifts Tab in the Roster Details screen.

5. Co Workers Roster & Leave

The *Co-Workers Roster & Leave* features allow for employees to view their team members Roster and Leave for a specified week.

- The *Co-Workers Roster* feature can be used for employees to view their team members roster, based on being in the same *Team Area*, on the day.
- The *Co-Workers Leave* feature can be used for employees to view their team members leave, based on being in the *Work Group*, on the day.

The below table provides examples of how the *Co-Workers Roster & Leave* feature displays employee team members:

Example	Explanation
Example 1	If the employee is working in the 'Cork' <i>Team Area</i> on Monday, they see all other employees rostered on the 'Cork' <i>Team Area</i> on the Monday. Employees working in other <i>Teams Areas</i> are not visible for the day.
Example 2	If the employee is working in the 'Kilkenny' <i>Team Area</i> on Tuesday and for the rest of the week, they see all other employees rostered on the 'Kilkenny' <i>Team Area</i> for the rest of the week. Employees working in other <i>Teams Areas</i> are not visible for the day.
Example 3	If the employee is working across two <i>Team Areas</i> on the one day, they see all other employees rostered to work in both <i>Team Areas</i> for the day.

5.1. Accessing Co Workers Roster & Leave

Co Workers Roster and Co Workers Leave/Absence screens can be accessed via:

- **Calendar Widget** – expand the 3-dot menu and select the relevant option
- **Work Week Widget** - expand Actions and select the relevant options

Once accessed the screens displays for review where you can specify the Roster week, to view, or select to view team members with Absences only within the week.

5.2. User Access

5.2.1. User Access

The following Menu Options controls what screens are available for employees to view, these must be enabled on the applicable menu profile:

System	Menu Option	Explanation
Coreportal - Calendar - Time	MAIN_MENU.CALENDAR.TIME	Allows access to the <i>Calendar</i> widget.
Widget - Time - My Work Week	MAIN_MENU.EMPLOYEEWORKWEEKACCESS	Allows access to the <i>Work Week</i> widget.
Coreportal - Calendar - CoWorkerRoster	MAIN_MENU.CALENDAR.ROSTER	Allows access to: • Co-Workers Leave / Absence • Co-Workers Roster

The *Co-Workers Roster & Absences* options are controlled by the following CorePortal parameter on *Site Manager > Admin Settings*:

Admin Setting	Explanation
cp_show_new_coworkers	This must be set to Y for the options to be visible in the Calendar & Work Week widgets.

5.2.2. Absence Pay Codes

For an employee to be picked up as absent and displayed on the *Co-Workers Leave* screen, the *Pay Code* must be marked as *Absence*. To do this:

1. Navigate to *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Pay Codes** tile.
3. Expand the relevant Pay Code's 3-dot menu and select **View/Edit Pay Code**.
4. From the Summary tab, turn on the **Absence** toggle.

The Pay Code can also be colour coded, to display on the Co-Workers Leave Screen. To do this:

1. Navigate to *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Pay Codes** tile.
3. Expand the relevant Pay Code's 3-dot menu and select **View/Edit Pay Code**.

4. From the Summary tab, scroll to the **Colour** field and select the required colour.

5.2.3. Back Office Configuration

There is an option available on the *Global Parameters* screen to control if an absence is displayed on a rest day for the *Co-Workers Absence* screen.

- If ticked on the absence does not display for the rest day.
- If ticked off the absence displays on the rest day.

To Hide Absences on Rest Days:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference D - J > Global Parameters*.
2. Select the **CoreTime MSS** tab.
3. Tick on the *View Co-Worker don't display Absence on Rest Days* indicator.
4. Click **Save**.

The screenshot shows the 'Global Parameters' window with the 'CoreTime MSS' tab selected. The 'Labels' tab is highlighted in the top navigation bar with a red arrow. In the 'CoreTime MSS' section, the 'View Co-Worker don't display Absence on Rest Days' checkbox is checked and highlighted with a red box. Other visible fields include 'Core MSS Site' (checked), 'Manager Toolbox Authorise' (set to 'Approve and Sign-Off'), 'Show Balance Allowance' (checked), 'Exclude Reserved from Balance Allowance' (unchecked), 'Default Hours per Day' (empty), 'Bradford Factor Access level' (set to 'Manager'), 'Bradford Factor Balance Group' (set to 'BR'), 'Working Time Directive Access level' (set to 'Manager'), and 'Working Time Directive Balance Group' (set to 'WTD'). The right-hand side of the screen contains sections for 'Employee Access Based on', 'Timesheet Claims', and 'Missed Clocking Approval'.
