1. Overview

1.1. Purpose of the Guide

The purpose of this document is to identify the different Validation rules that can be set up within Roster and to provide an explanation of the use of the different validation options available.

The Roster Rules Validation are broken down into a number of sections

- Roster Rules
- Auto Rostering
- Uncovered Shifts
- Recommended Rules
- Shift Swaps

This document will focus on the Roster Rules, Auto Roster and Uncovered Shifts validation rules.

2. Validation Rules

2.1. Roster Rules

The Roster Rules section comprises of the below rules that are applied when the roster is open and when any changes are applied to the roster.

Code	Rule Name	Description
1	Contract Hours	Highlights any employees who are in breach of their contract hours. The contract hours are held on the Contract History tab in an employee's record in People Management.
2	Working Time – Breach	Highlights any employees who are in breach of the EU Working Time Directive Average Hours per Week (i.e. 48 hours average over 17 week). The Working Time Directive rules are picked up from the Working Time Directive Scheme that is set up against the employee.
3	Working Time - Close to Breach	Highlights any employees who are close to breaching the EU Working Time Directive Average Hours per Week. Note: The threshold is set at 46.5 hours
4	Working Time - Daily Rest Breach	Highlights any employees who are in breach of the EU Working Time Directive Daily Rest Hours (i.e. 11 rest hours per day). The Daily Rest Rules are picked up from the Working Time Directive Scheme that is set up against the employee.
5	Days short staffed	Highlights any days/shifts that the roster is understaffed. This rules compare the staffing demand (roster rules) as applied to the Team Area against the employees rostered to work for the shift.

Roster Validation Rules - User Guide

Code	Rule Name	Description
6	Planned Absences	Will list all employees on the roster who have absences falling for the period in view.
7	Days Over Staffed	Highlights any days/shifts that the roster is overstaffed for. This rules compare the staffing demand (roster rules) as applied to the Team Area against the employees rostered to work for the shift.
8	Contract Start/End Times	Highlights any employees who are in breach of their contract start and end times (i.e. as per their Roster Contract Details, Availability Profile, Start times and End Times).
9	Working Preferred Pattern	Highlights employees who are working their preferred pattern as indicated on ESS with self rostering. Employees must be using the ESS Employee Self Rostering functionality to use this rule.
10	No Working Preferred Pattern	Highlights employees who are not working their preferred pattern as indicated on ESS with self rostering. Employees must be using the ESS Employee Self Rostering functionality to use this rule.
11	Working Undesired Pattern	Highlights employees who are working any pattern indicated as an undesired pattern on ESS with self rostering. Employees must be using the ESS Employee Self Rostering functionality to use this rule.
12	Not Working Desired Pattern	Highlights employees who are working any pattern indicated as an undesired pattern on ESS with self rostering. Employees must be using the ESS Employee Self Rostering functionality to use this rule.
13	Staff Requests	N/A – redundant functionality.
14	Received Offers	N/A – redundant functionality.
15	Other Requests	N/A – redundant functionality.
16	Accepted Offers	N/A – redundant functionality.
17	Maximum Basic Hours	Ensures employees do not get rostered onto a shift that will exceed their maximum daily hours. The Maximum Basic Hours field is checked from the employee Contract Details

Roster Validation Rules - User Guide

Code	Rule Name	Description
18	Cost vs. Budget	Compare the weekly budget to the employee costs and highlights if the actual costs are greater than the budget costs. The budget costs is held at a Team Area level, the actual costs are calculated from the employees hourly rate plus PRSI /NI contributions if a Payroll client OR from the Hourly Rate on the Roster Profile Details if not using Payroll.
19	Working Time – Max Daily Hours	Highlights all employees who have worked more hours than their Maximum daily hours as per the Working Time Directive permits. The system checks the Maximum Daily Hours as set on the Working Time Directive scheme attached to the employees when validating the rule.
20	Valid Work Permit	Highlights any employees who are rostered for dates beyond the expiry date of their working visa. The Personnel work permit details/dates are checked when validating if the work permit is valid.
21	Not Rostered	Highlights any employees who are not rostered for the period in view.
22	Minimum Contract Hours	Highlights all employees who are working less than their minimum contract hours (as specified on the contract details screen in the Minimum Hours field)
23	Maximum Contract Hours	Highlights any employees who are rostered for in excess of their Work Group's maximum basic hours (e.g. employee might be entitled to overtime if you go over threshold).
24	Deviation from Contract Hours	Highlights any employees who have gone either over or under their contracted hours (as per the contract hours on the Employee Profile in People Management)
25	Working Time Weekly Rest Break	Highlights any employees who have not been allocated sufficient daily rest breaks for the period in view. The system checks the weekly rest breaks as set on the Working Time Directive scheme attached to the employees when validating the rule.

Roster Validation Rules - User Guide

Code	Rule Name	Description
26	Consecutive Work Days	Highlights any employee who have breached the consecutive working days in a period. This looks back to last week when looking at the first day of the week.
27	Max Night Shifts in 1 Week	Looks at the number of late nights an employee has been rostered for on the Team Area. A late night is identified on the team area on the Auto Roster Section under 'Late Night Time'. If a shift is scheduled to end after this time the shift is deemed a late night and will increase the count by one.
28	Max Overnight Shifts 1 Week	Looks at the number of overnights an employee has been rostered for on the Team Area. An Overnight is identified on the team area on the Auto Roster Section under 'Overnight Start Time' and 'Overnight End Time'. If a shift is scheduled to start before the Overnight Start Time and end after the 'Overnight End Time' the shift is deemed an overnight and will increase the count by one. The number of employee is identified on the Team Area under the 'Max Overnights Allowed'.
29	On in four Saturdays off for managers	Notifies where an employee is not rostered at least one in 4 rolling Saturdays, looks back on the last 4 rolling Saturdays to include in the count. A manager is identified by the qualification marked as a manager.
30	Minimum Once working Sunday for managers	Notifies where an employee is not rostered at least one in 4 rolling Sundays, looks back on the last 4 rolling Saturdays to include in the count. A manager is identified by the qualification marked as a manager.
31	Split Shifts	Ensures employees are not rostered out on Split Shift in a day.

Roster Validation Rules - User Guide

2.2. Auto Rostering Rules

Code	Rule Name	Description
1000	Auto Rostering: Valid Work Permit	Employees for whom the end date of their Work Permit falls prior to the shift vacancy do not get the relevant rule score.
1001	Auto Rostering: Available Days	Checks to ensure employees have availability to work the shift as per their availability preferences. Only employees with availability on the day of the shift will get the relevant rule score. (This is set in the 'Availability' section on the employees Roster Profile Details)
1002	Auto Rostering: Contract Hours	When auto-rostering, ensures that employees do not get rostered over the course of a week for hours in excess of the weekly contracted hours that is stipulated in their contract. (The employees contract hours are set in the Contract History tab on an employee's record in People Management.
1003	Auto Rostering: Contract Daily Hours	Checks to ensure employees would not exceed their contract daily hours by being placed on this shift. Only employees who would not exceed their contract daily hours by being placed on this shift will get the relevant rule score. Employees who fail the rule get a status of C. The Contract Daily Hours are held in the Roster Profile Details, Daily Contract Hours field)
1004	Auto Rostering: Contract Rostered Days	Checks to ensure employees have not exceeded their max shifts per week. Only employees who have not exceeded their max shifts per week will get the relevant rule score. Note: absence shifts do not count towards an employee's weekly shift count.
1005	Auto Rostering: Late Nights	When auto-rostering, ensures that only employees who are contracted to have availability to work late night shifts get considered on late night shifts. This option checks the employee has 'Available for Late Nights' selected on in the Roster Profile Details screen.

Roster Validation Rules - User Guide

Code	Rule Name	Description
1006	Auto Rostering: Number of Sundays	Checks the scan weeks on your team area. It then counts the number of Sundays that you have worked in the relevant number of weeks. It then checks to ensure you can work the Sunday shift this week. If you can you get the score. If no Max number of Sundays is specified you are skipped (i.e. no status marked or no score given).
1007	Auto Rostering: Check Same Day Last Week	When auto-rostering, ensures that employees do not work the same shift as they did last week. This rule will ensure the same employee is not rostered to work the same day for a number of weeks in a row. If they did it deducts the rule weight from their score.
1008	Auto Rostering: Available Time	When auto-rostering, ensures that employees only get rostered for times that they are available to work stipulated in their contract. (This is set in the 'Availability' section on the employees Roster Profile Details)
1009	Auto Rostering: Cycle Patterns	When auto-rostering, ensures that specified employees cycle on specific Work Patterns each week. Get rule weight if you are due to be place on the next shift cycle this week (e.g. A = 1000). Get A - 0 if rule does not apply to you Get C - 0 if you fail rule (i.e. if you are not due to go on the shift this week)
1010	Auto Rostering: Maximum Basic Hours	When auto-rostering, ensures that employees do not get rostered over the course of a week for hours in excess of their maximum basic hours (which could differ from their contracted hours).
1011	Auto Rostering: Number of Late Nights	When auto-rostering, ensures that employees do not get rostered to work more late night shifts than the number that is stipulated in their contract. The 'Number of Late Nights' field on the employees Roster Profile Details is checked when validating the rule.
1012	Auto Rostering: Match Job Titles	When Auto Rostering the system ensures employees are only considered for shifts where their job title matches the required job title. The job title is attached to the employee in People Management.

Roster Validation Rules - User Guide

Code	Rule Name	Description
1013	Auto Rostering: Work/Rest/Absent	Ensures that an absent employee is not considered for vacant shifts (i.e. if an employee is absent, then they will not pass this rule). If an employee is scheduled to work on the day in question, they will pass the rule and will get the corresponding 'Working' value specified in the Availability Preference section of System Parameters. If an employee is scheduled to rest on the day in question, they will pass the rule and will get the corresponding 'Resting' value specified in the Availability Preference section of System Parameters. E.g. resting employees would get a higher score than working employees. For absent employees, you can assign a value to the Rostering>Roster Availability section of the Pay Codes screen. When you do this, and an employee has an absence for this Pay Code, then they will fail the roster rule on that day, but get a score equal to the value specified on the Roster Rule.
1014	Auto Rostering: Hourly Rate	Employees with a lower hourly rate would get precedence over an employee with a higher hourly rate with all else being equal. Adds the inverse of each employee's hourly rate to their overall score.
1015	Auto Rostering: Working Time Average	Ensures employees do not breach the working time directive average hours rule when being Auto Rostered onto a shift. The system checks the WTD as set on the Working Time Directive scheme attached to the employees when validating the rule.
1016	Auto Rostering: Working Time Daily Rest	Ensures employees do not breach the working time directive Daily Rest Rule when being Auto Rostered onto a shift. The system checks the WTD as set on the Working Time Directive scheme attached to the employees when validating the rule.

Roster Validation Rules - User Guide

Code	Rule Name	Description
1017	Auto Rostering: Working Time Weekly Rest	Ensures employees do not breach the working time directive Weekly Rest Rule when being Auto Rostered onto a shift. The system checks the WTD as set on the Working Time Directive scheme attached to the employees when validating the rule
1018	Auto Rostering: Least Rostered Hours	When Auto Rostering, the employee with the least rostered hours for the current week gets priority over an employee with greater rostered hours.
1019	Auto Rostering: Seniority	Employees to be allocated shifts by seniority. Adds each employee's number of years service to their overall score (e.g. an employee with 10 years service gets a value of 10 added to their overall score). Mandatory indicator or rule weighting has no impact on this rule.
1020	Auto Rostering: Home Team Area Preferred	Auto-rosters an employee onto a shift on their home team area before rostering them on a different team area
1021	Auto Rostering: Longest Wait	When auto-rostering, the employees who have the longest wait between shifts get rostered before employees with a shorter wait.
1022	Auto Rostering: Absences	When auto-rostering, this rule looks at the indicators on the rostering section of the pay codes screen. It checks each pay code for a number of weeks to search. If there is a number there then it loops through each employee looking for that absence code. If it exists it deducts the relevant absence code value from your score.
1023	Auto Rostering: Max Daily Hours	Ensures employees do not get rostered onto a shift that will exceed their maximum daily hours. The maximum daily hours are specified on the roster contract details screen in the 'Max Daily Hours' field.
1024	Auto Rostering: Overlapping Shifts	Ensures employees don't get rostered if this will result in them having overlapping shifts.

Roster Validation Rules - User Guide

Code	Rule Name	Description
1025	Auto Rostering: Employee Rating	Ensure employees are rostered based on their rating as per the employees roster contract details.
1026	Auto Rostering: Maximum Contract Hours	Ensure the employee does no breach their maximum contract hours as per their contract details.
1027	Auto Rostering: Qualification Priority	Ensure the Auto Roster puts the employees on a rule where they have the highest priority first. If there are no requirements for the employee to fill a gap against their priority one qualification the employees' other qualification will be checked.
1028	Auto Rostering: Exclude Day Off Request	Ensures that an employee who have a 'day off' requests booked for a day will not be rostered to work on the day. Day off is picked up from the parameter on the pay code under the rostering section.
1029	Auto Rostering: Consecutive Working days	Ensures employee will not be rostered to work more than 5 working days in a row if selected. This looks back to last week when looking at the first day of the week.
1030	Auto Rostering: Max late nights in a week	Ensures employee will not be rostered more than the maximum number of late nights in a week. The time a late night is defined at is set at a team level, the number of late nights is set at a team level.
1031	Auto Rostering: Max Overnights in Week	Ensures employee will not be rostered more than X overnight shifts in a week. The time to define what an overnight is will be set at the team area based on overnight start time and overnight end time.
1032	Auto Rostering: 1 / 4 Sat off for managers	Ensures employees with the qualification marked as manager has at least 1 in 4 Saturdays off.
1036	Auto Rostering Min 1 Sun Month Managers	Ensures employees with the qualification marked as manager is rostered at least one Sunday a month
1037	Auto Rostering: Split Shifts	Do not roster employees to work on a split shift.

Roster Validation Rules - User Guide

Code	Rule Name	Description
1041	Auto Rostering: Min Daily Hours	Ensures employees do not get rostered onto a shift that is less than their maximum daily hours. The min daily hours are specified on the roster contract details screen in the 'Min Daily Hours' field.
1042	Auto Rostering: Contract Sequence	No longer applicable to return the contract sequence and will be removed from future versions.
1043	Auto Rostering: Rule (Minimum) Cutoff	Ensures employee are not Auto Roster onto a shift where the shift duration is less than the Roster Rule Cut-off as specified in the General Params on the Roster Admin Dashboard.

2.3. Uncovered Shifts

Code	Rule Name	Description
2000	Uncovered: Valid Work Permit	Employees for whom the end date of their Work Permit falls prior to the shift vacancy do not get the relevant rule score.
2001	Uncovered: Available Days	Checks to ensure employees have availability to work the shift as per their availability preferences. Only employees with availability on the day of the shift will get the relevant rule score. This is based on the 'Availability' section on the employees Roster Profile Details.
2002	Uncovered: Contract Hours	Employees who will exceed their contract hours for the uncovered shift will not be considered for filling the shift. (The employees contract hours are set in the Contract History tab on an employee's record in People Management.

Roster Validation Rules - User Guide

Code	Rule Name	Description
2003	Uncovered: Contract Daily Hours	When filling uncovered shifts, this rule ensures that employees do not get rostered on a shift that is in excess of the contracted daily hours that is stipulated in their roster contract details.
2004	Uncovered: Contract Rostered Days	This rule ensures that only employees who are contracted to have availability to work late night shifts get considered on late night shifts as stipulated in their roster contract details.
2005	Uncovered: Late Nights	This rule ensures that only employees who are contracted to have availability to work late night shifts get considered on late night shifts as stipulated in their roster contract details.
2006	Uncovered: Number of Sundays	Checks the scan weeks on your team area. It then counts the number of Sundays that you have worked in the relevant number of weeks. It then checks to ensure you can work the Sunday shift this week. If you can you get the score. If no Max number of Sundays is specified you are skipped (i.e. no status marked or no score given).The 'Number of Sundays' is available on the employees roster contract details
2007	Uncovered: Check Same Day Last Week	Ensures employees do not get considered for shifts they worked last week. If 'Employees who did not work last get priority' indicator is turn on for the Roster Rule then the system checks if the employee worked last week. If they did it deducts the rule weight from their score.
2008	Uncovered: Available Times	Ensures that employees only get rostered for times that they are available to work stipulated in their contract. The times are held in the 'Availability' section of the roster contract details.
2009	Uncovered: Cycle Patterns	When filling uncovered shifts, ensures that specified employees cycle on specific Work Patterns each week
2010	Uncovered: Maximum Basic Hours	Ensures employees do not get rostered onto a shift that will exceed their maximum daily hours as specified on their roster contract details.

Roster Validation Rules - User Guide

Code	Rule Name	Description
2011	Uncovered: Number of Late Nights	Ensures that employees do not get considered to work more late night shifts than the number that is stipulated in their roster contract details.
2012	Uncovered: Match Job Titles	Ensures employees are only considered for shifts where their job title matches the required job title.
2013	Uncovered: Work/Rest/Absent	Ensures that an absent employee is not considered for vacant shifts (i.e. if an employee is absent, then they will not pass this rule). If an employee is scheduled to work on the day in question, they will pass the rule and will get the corresponding 'Working' value specified in the Availability Preference section of System Parameters. If an employee is scheduled to rest on the day in question, they will pass the rule and will get the corresponding 'Resting' value specified in the Availability Preference section of System Parameters. e.g. resting employees would get a higher score than working employees. For absent employees, you can assign a value to the Rostering>Roster Availability section of the Pay codes screen. When you do this, and an employee has an absence for this pay code, then they will fail the roster rule on that day, but get a score equal to the value specified on the Roster Rule.
2014	Uncovered: Hourly Rate	Employees with a lower hourly rate would get precedence over an employee with a higher hourly rate with all other rules being equal. Adds the inverse of each employee's hourly rate to their overall score.
2015	Uncovered: Working Time Average	Ensures employees are not considered for a shift if it will result in them breaching the working time directive. The system checks the WTD as set on the Working Time Directive scheme attached to the employees when validating the rule

Roster Validation Rules - User Guide

Code	Rule Name	Description
2016	Uncovered: Working Time Daily Rest	Ensures that employees do not breach their daily rest as per the working time directive. The system checks the Daily Rest as set on the Working Time Directive scheme attached to the employees when validating the rule.
2017	Uncovered: Working Time Weekly Rest	Ensures that employees do not breach their weekly rest as per the working time directive. The system checks the weekly rest details as set on the Working Time Directive scheme attached to the employees when validating the rule.
2018	Uncovered: Least Rostered Hours	The employees with the least rostered hours for the current week gets priority over an employee with greater rostered hours.
2019	Uncovered: Seniority	If employees have passed the same rules then the most senior employee will get priority. Adds each employee's number of years service to their overall score (e.g. an employee with 10 years service gets a value of 10 added to their overall score) Mandatory indicator or rule weighting has no impact on this rule
2020	Uncovered: Home Team Area Preferred	Employees are given priority for their home team area shifts before rostering them on a different team area. Employees must be using the ESS Employee Self Rostering functionality to use this rule.
2021	Uncovered: Longest Wait	The employees who have the longest wait between shifts get a higher priority than employees with a shorter wait.
2022	Uncovered: Absence	Each pay code can have a value attached to it. This rule looks at the indicators on the rostering section of the pay codes screen. It checks each pay code for a number of weeks to search. If there is a number there then it loops through each employee looking for that absence code. If it exists it deducts the relevant absence code value from your score.

Roster Validation Rules - User Guide

Code	Rule Name	Description
2023	Uncovered: Max Daily Hours	Employees do not get considered for shifts that will exceed their maximum daily hours as specified on their roster contract details screen.
2024	Uncovered: Overlapping Shifts	Employees who already have a shift that will overlap the shift being Auto Rostered will not be considered.
2025	Uncovered: Employee Rating	An employee with a higher rating can be rostered ahead of an employee with a lower rating if all other rules are passed. The ratings are held against an employee on the roster contract details screen.
2026	Uncovered: Maximum Contract Hours	Ensures employees are not considered for shifts that do not breach their maximum contract hours.
2027	Uncovered: Qualification Priority	Ensure the Auto Roster puts the employees on a rule where they have the highest priority first. If there are no requirements for the employee to fill a gap against their priority one qualification the employees' other qualification will be checked.
2028	Uncovered: Exclude Day Off Request	Ensures that an employee who have a 'day off' requests booked for a day will not be rostered to work on the day. Day off is picked up from the parameter on the pay code under the rostering section.
2029	Uncovered: Consecutive Working days	Ensures employee will not be rostered to work more than X working days in a row if selected. This looks back to last week when looking at the first day of the week.
2030	Uncovered: Max late nights in a week	Ensures employee will not be rostered more than the maximum number of late nights in a week. The time a late night is defined at is set at a team level, the number of late nights is set at a team level.
2031	Uncovered: Max Overnights in Week	Ensures employee will not be rostered more than X overnight shifts in a week. The time to define what an overnight is will be set at the team area based on overnight start time and overnight end time.

Roster Validation Rules - User Guide

Code	Rule Name	Description
2032	Uncovered: 1 / 4 Sat off for managers	Ensures employees with the qualification marked as manager has at least 1 in 4 Saturdays off.
2036	Uncovered: Min 1 Sun Month Managers	Ensures employees with the qualification marked as manager is rostered at least one Sunday a month.
2037	Uncovered: Split Shifts	Do not roster employees to work on a split shift.
2041	Uncovered: Min Daily Hours	Ensures employees do not get rostered onto a shift that is less than their maximum daily hours. The min daily hours are specified on the roster contract details screen in the 'Min Daily Hours' field.
2042	Uncovered: Contract Sequence	No longer applicable to return the contract sequence and will be removed from future versions.
2043	Uncovered: Rule (Minimum) Cutoff	Ensures employee are not Auto Roster onto a shift where the shift duration is less than the Roster Rule Cutoff as specified in the General Params on the Roster Admin Dashboard.
