1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to lead the user through the Portal screens for Shift Types. Previously these screens were in the back office and have now been converted to Core Portal.

On entry to the Shift Type screen all active Shift Types will be displayed on the landing page with the key pieces of information relating to the shift type.

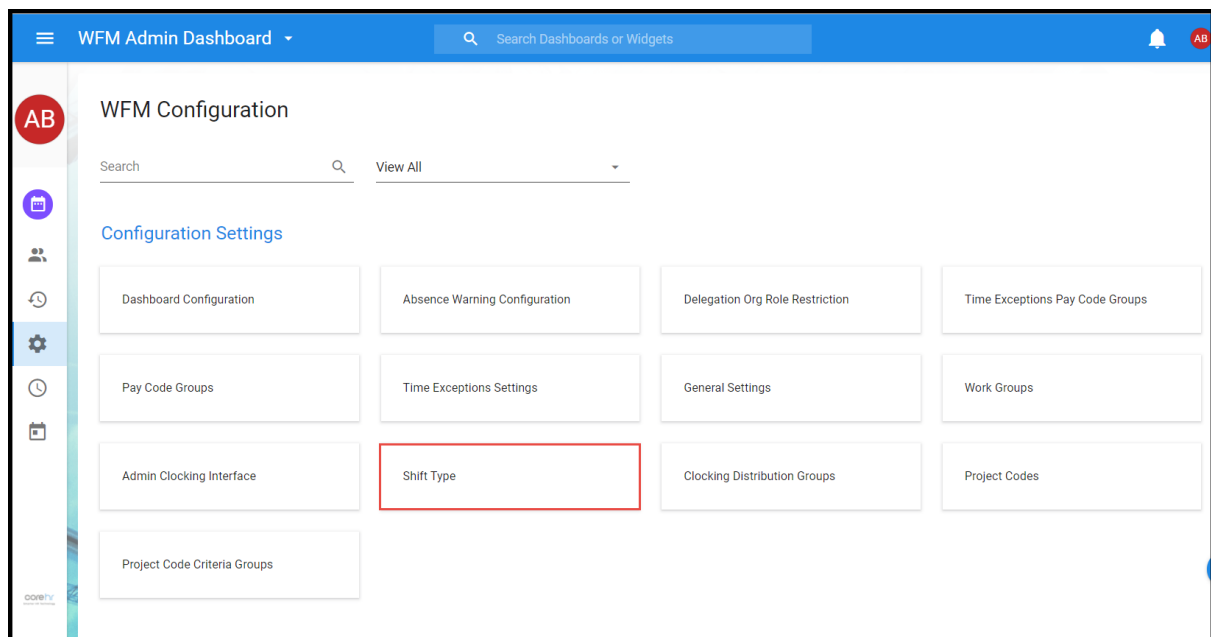

2. Accessing the Shift Types Screen

This section will go through how to access the *Shift Types Screen* as well as the various features to be found on the landing page.

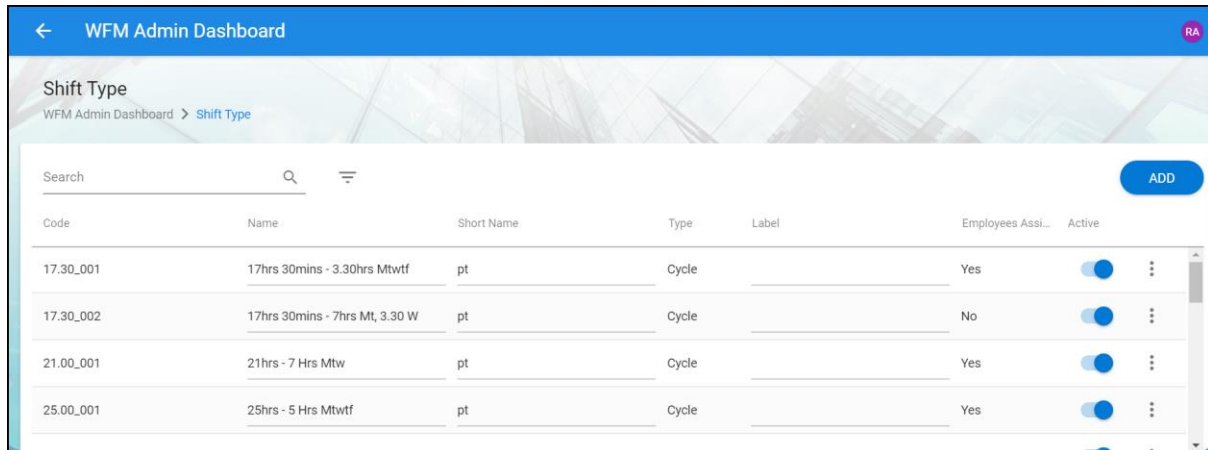

2.1. Accessing Shift Types

To Access the *Shift Types* screen:

1. Go to the *WFM Dashboard*.
2. Select **WFM Configuration** from the list on the left hand side of the page.
3. Select the **Shift Type** tab.

4. The screen displays.

Code	Name	Short Name	Type	Label	Employees Assi...	Active
17.30_001	17hrs 30mins - 3.30hrs Mtwtf	pt	Cycle		Yes	☒
17.30_002	17hrs 30mins - 7hrs Mt, 3.30 W	pt	Cycle		No	☒
21.00_001	21hrs - 7 Hrs Mtw	pt	Cycle		Yes	☒
25.00_001	25hrs - 5 Hrs Mtwtf	pt	Cycle		Yes	☒

The table below details each of the fields on the screen:

Field	Description
Code	The code specific to the shift type.
Name	A specific name can be given to a shift type.
Short Name	Shortened version used of the shift name.
Types	Type of Shift e.g. Cycle. See Shift Details
Label	The specific label given to a shift. This helps group shifts together when they are similar.
Employee Assigned	Yes/No options to tell whether employees are assigned to a shift.
Active Indicator	Toggle which allows you to make a shift active or inactive.

The *Summary Screen* is available to update directly once you have been given the required access.

Users can search the following fields on the summary screen

- *Code*
- *Name*
- *Short Name*
- *Label*

Filter

It is now possible to filter shift types at the top of the screen.

Filter Shift Types

Type

Active

Employees Assigned

RESET

APPLY

You need to fill out the following fields:

- **Type:** This allows you filter by the type of Shift, whether it is Cycle or Period.
- **Active:** This allows you to make the shift active by selecting Yes or No.
- **Employees Assigned:** This field allows you to select whether there are employees assigned or not.

Once the fields have been filled out, select **Apply**.

← WFM Admin Dashboard

25.00_001	25hrs - 5 Hrs Mtwtf	pt	Cycle		Yes	☒

3. Navigating the Shift Types Screens

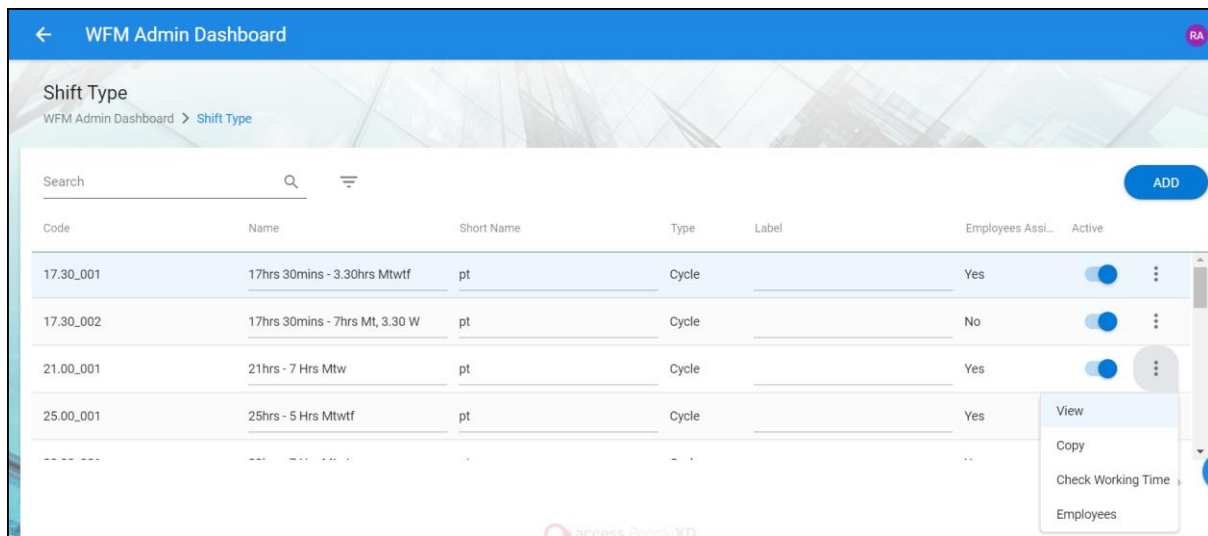

In this section we will look at how to use and navigate the following options:

- *View Shift Types*
- *Copy Shifts*
- *Check Working Time*
- *Employee Screen*

3.1. View Screen

To access the *View Screen*:

1. Click on the  next to the specific shift you wish to view.
2. Select **View** from the list.

3. The screen displays to show the *Shift Pattern Screen*.

3.1.1. Shift Patterns

At the top of the screen you can see the following information:

Fields	Details
Code	The code which identifies the individual shift
Short Name	The shortened version of the shift name
Cycle Shift	Whether the shift is a cycle or period shift
Status Button	Status of the shift

The shift displays the work pattern and rest days with the total hours calculated.

Deleting a Shift

To delete the shift:

1. Select Delete from the  menu.
2. You can only delete a shift where it has never been used. If a shift has ever been assigned to an employee or a Work Group the system stops you from deleting it.

**Note:**

If a shift had additional patterns or Team Areas assigned on a day these will be deleted also.

Adding a Shift Pattern

To add a shift pattern:

1. Click **Add**

← Shift Type RA

37.5 Hrs - 7.50 Hrs Mtwtf
WFM Admin Dashboard > Shift Type > 37.5 Hrs - 7.50 Hrs Mtwtf

Shift*

3. Click **Save**

3.1.2. General Parameters

The screenshot shows the 'Shift Type' configuration page. The header bar is blue with a back arrow and 'Shift Type' text. Below the header, the shift details are: '17hrs 30mins - 3.30hrs Mtwtf', 'WFM Admin Dashboard > Shift Type > 17hrs 30mins - 3.30hrs Mtwtf'. The main content area has a left sidebar with 'Shift Patterns' and 'General Params' (selected). The 'General Parameters' section includes fields for 'Days in Cycle' (7), 'Work Days in Cycle' (5), 'Previous Day Threshold' (dropdown), 'Next Day Threshold' (dropdown), 'Maximum Person Absence' (up/down arrows), 'Shift Premium Percentage' (up/down arrows), 'Length of Service' (dropdown), 'Holiday Adjustment' (dropdown), and 'Rostered Retail' (dropdown). A 'SAVE' button is at the bottom right. The 'Active' status is shown as a green pill.

The General Parameters Screen contains the fields detailed in the table below:

- Days in Cycle
- Work Days in Cycle
- Previous Day Threshold
- Next Day Threshold
- Maximum Person Absence
- Shift Premium Percentage
- Length of Service
- Holiday Adjustment
- Rostered Retail
- Generate Default Work Pattern on a Absence Day

3.2. How to Copy a Shift

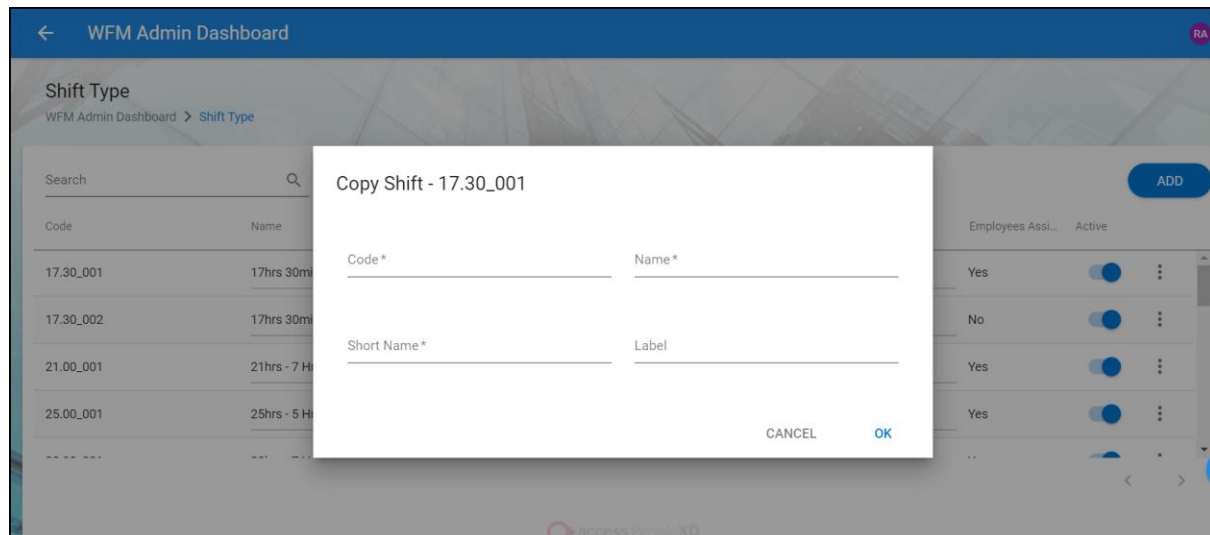

If you wish to Copy a shift, complete the following :

1. Click on the  beside the shift you wish to copy.
2. Select **Copy**

3. Fill in the following details:

- Shift Code
- Shift Name
- Short name
- Label

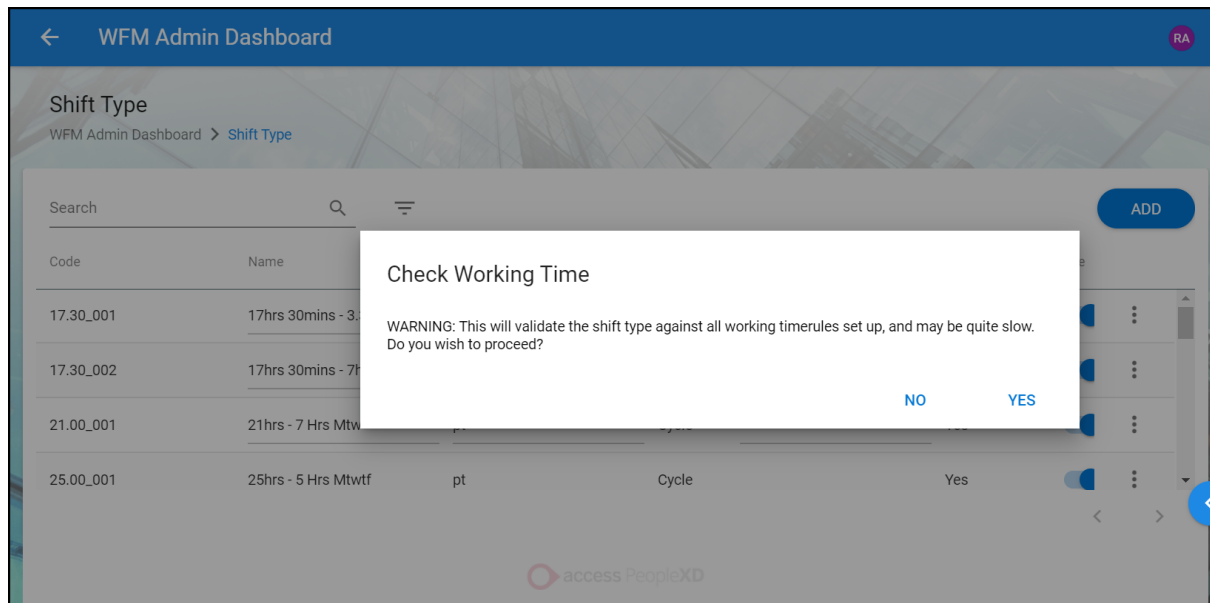

4. Click **OK**.

3.3. Check Working Time

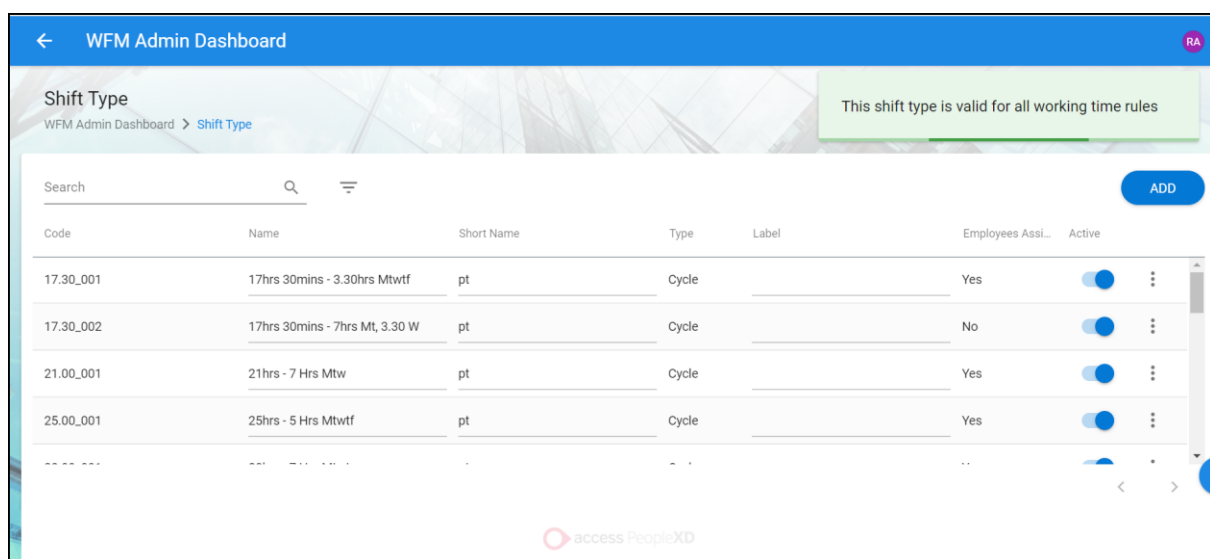

The Check Working Time makes sure that you are not in violation of any Working Time Rules.

To check the Working Time:

1. Select Check Working Time from the  menu.
2. A warning flashes up on screen explaining the process and that it may take some time depending on the amount of rules.

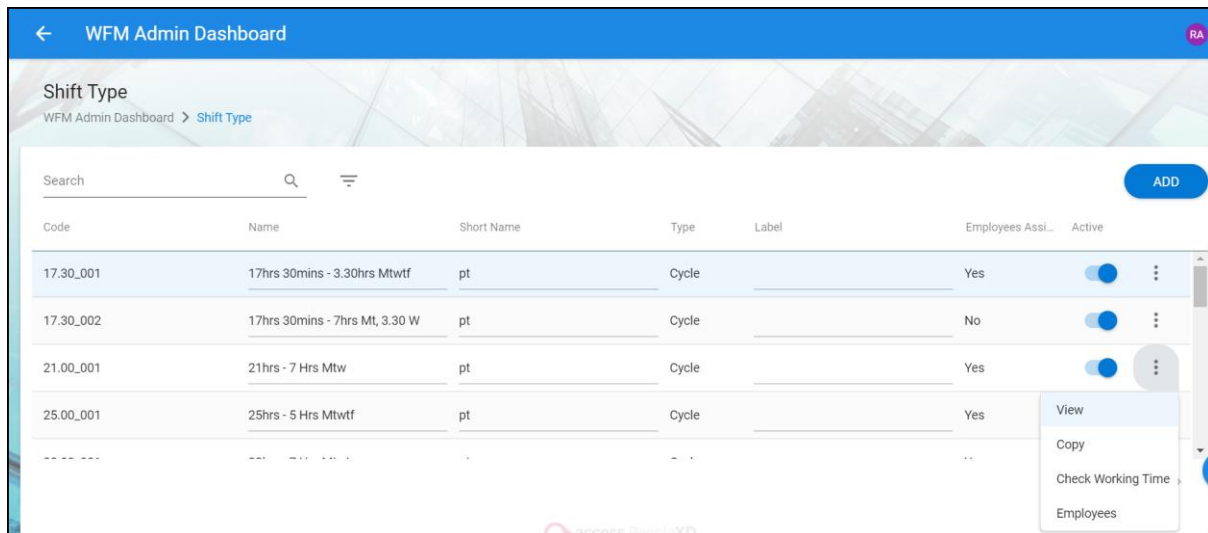

Once the system has deemed the shift to be valid for all working time rules, a messages flashes up in the top right hand corner of the screen.

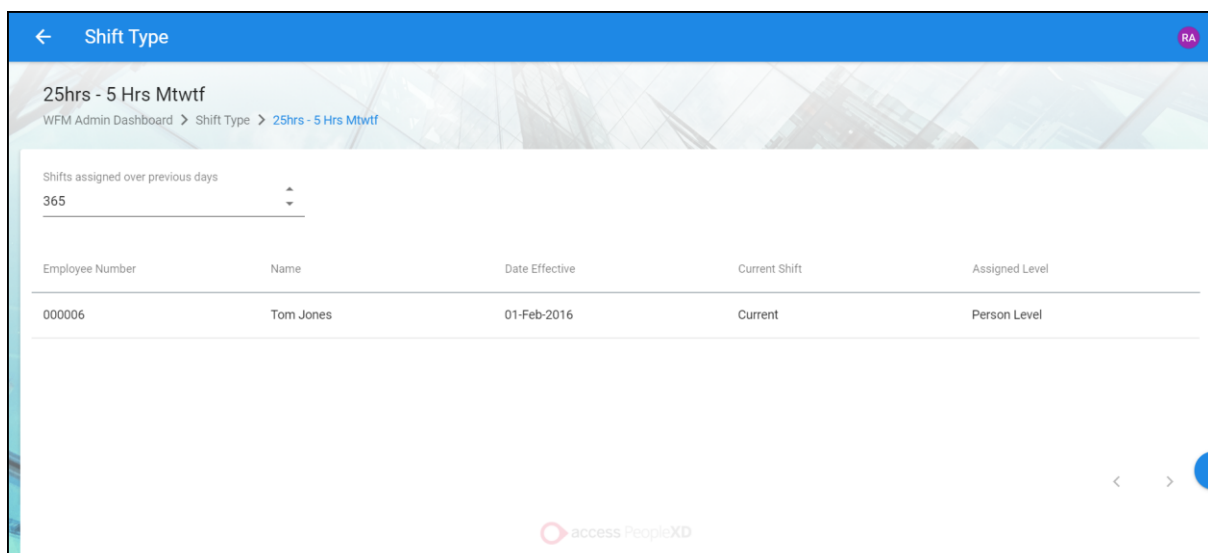

3.4. Employees Screen

The Employees Screen shows current and historic shifts. It defaults to 365 days but it can be edited to show other numbers of days.

To get to the Employees screen:

1. Select **Employees** from the  menu.
2. The Screen displays.

Here you can see the following

- *Employee Number*

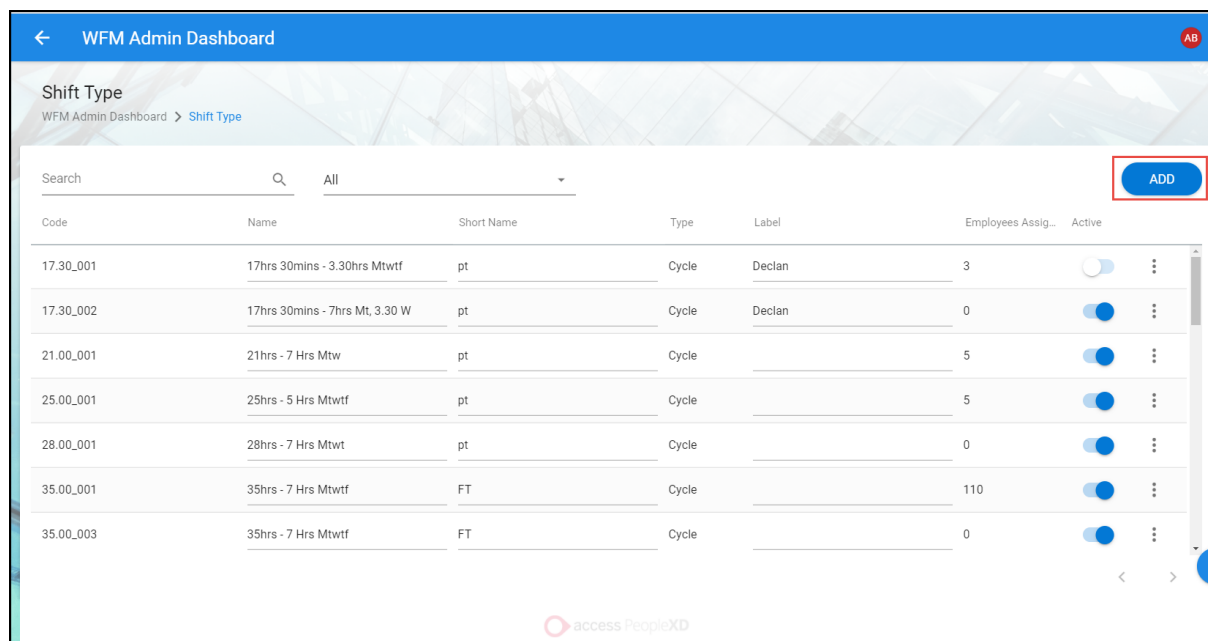

- *Name*
- *Date Effective*
- *Current Shift*
- *Assigned Level*

4. Other Functions

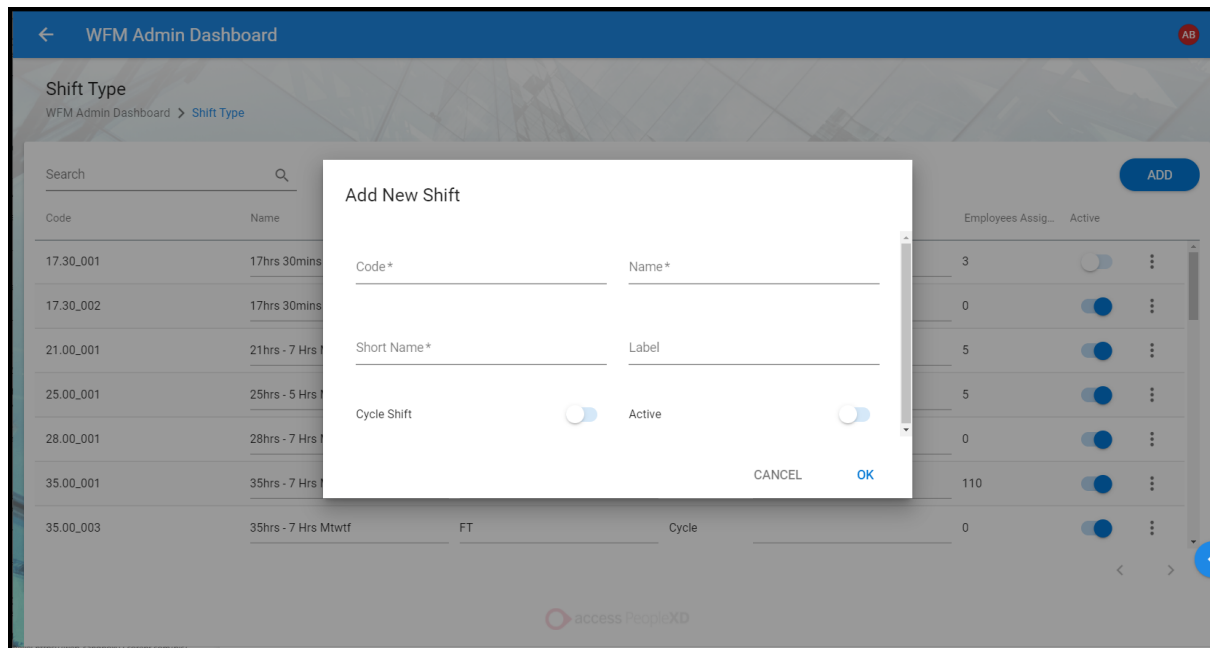

4.1.1. Adding a new Shift

To Add a new shift:

1. Select **Add** on the top right of the screen.

2. A pop up displays.
3. Fill in the following fields:
 - **Code**
 - **Description**
 - **Short Name**
 - **Label**
 - **Shift Type**
4. Click **OK**

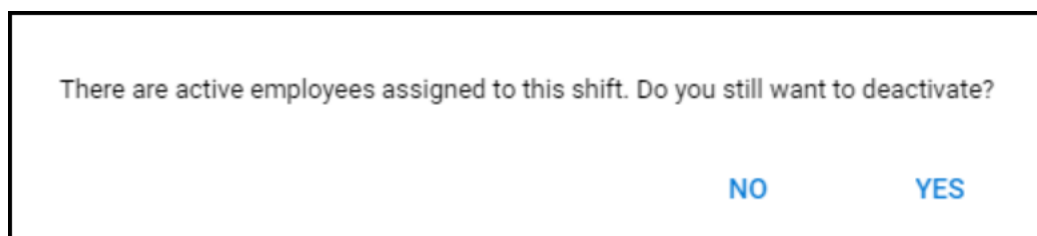

5. Once saved you can enter the details of the shift and the working arrangements.

4.1.2. De-Activating a Shift

In certain circumstances, you may wish to de-activate a shift, if it is one which you are no longer using. This means the shift will no longer display on the dropdown lists across the system as an available shift.

When you try to de-activate a shift, you receive the following message:

Once the shift is deactivated, it will no longer display on the following screens:

Screen
Team Scheduler > Shift Change
Roster Details > Work Schedule
People Mgt > Employee> Work Schedule
WFM Admin > Work group > Outer screen
WFM Admin > Work group > Inner screen (General Parameters)
Person Maintenance > Work Schedule
Person Maintenance > Work Group Override

**Note:**

You can mark a shift as inactive where there are employees assigned to it but you will not have be able to delete it.

5. Period and Cycle Based Shifts

5.1. Shift Details

The *Shift Details* screen presents differently depending on whether a shift is marked as a *Period Based Shift* or a *Cycle Based Shift*.

The details of these shifts are outlined in the table below:

Shift	Details
Period Based Shifts	Period Based Shifts are shifts in which each calendar period has been assigned a record with the associated Work Pattern.
Cycle Based Shifts	Cycle Based Shifts are shifts that repeat sequences. These can be set to one or multiple sequences. An example of this could include – An employee working Monday to Friday 09:00 – 17:30 every week. Another example of a cycle based shift would be where an employee job shares and works Monday, Tuesday and Wednesday on week one and Thursday and Friday on week two and alternates between the two shifts.

5.2. Additional Patterns

You may also wish to assign Additional Patterns to Shift Types.

**Note:**

Additional Shifts and team area can be assigned where configured. The company needs to be set as a multi pattern company for this to be enabled. Please consult your XD consultant before switching this on.

Once Multi Pattern Framework is selected, you can add an additional row to each sequence of shifts. Team area is also displayed under the pattern to specify a pattern on a day.

If you delete a row on a shift type, this also deletes any additional shifts associated with it. When you copy one shift to another, all the settings attached to it are also copied over.

5.3. Free Text Label

As part of the enhancement of the screens from Back Office to Portal, there is now a free text label which can be used on a shift type in order to easily identify it.

This can also be used to group all the shifts together if needed. For example, if there was a need to keep together all of the Cork shifts, you can use the free text label to name the shift.

While searching for a shift type the user is able to easily search for the code, description or the label assigned to the Shift Type. There can be multiple shifts assigned to the one label. You can search for the specific label and the search will return all shifts with the specific label attached.

5.4. Features on Period Based Shifts

5.4.1. Delete Range

The Delete Range option is only available when a shift is Period Based and is not be visible for cycle shifts. Delete Range allows you to delete periods in the future.

You can select the option to delete period from the Shift Detail screen where the shifts are presented with the period range that you wish to delete.

DELETE RANGE GENERATE PERIODS SAVE

1. Select the dates you wish to copy the week for.
2. Enter the dates you wish to copy the weeks to.

The screenshot shows the 'Shift Type' configuration page for 'Work Share MT & WFT WEEK 2'. A modal titled 'Generate Periods' is open, allowing users to copy periods from one shift to another. The modal contains the following fields:

- From Period ***: A dropdown menu with a red error message 'This field is required'.
- To Period ***: A dropdown menu with a red error message 'This field is required'.
- Copy periods into**: A dropdown menu.
- To Period ***: A dropdown menu with a red error message 'This field is required'.

At the bottom of the modal are buttons for 'CANCEL', 'OK', and 'SAVE'. The background shows the 'Shift Patterns' tab selected in the left sidebar.

Note:

When creating a Period Based Shifts you can only copy periods to a future period based on the system calendar. Generate Period are not applicable to cycle shifts.

5.4.3. Current Period

The screenshot shows the 'Shift Type' configuration page for 'Work Share MT & WFT WEEK 2'. The 'Current Period' section is highlighted with a red box. It contains a table of periods and their details.

Period	Start Date	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday	Ho...
201901	31-Dec-20...	7 Hour 30...	7 Hour 30 ...	Rest Day f...	Rest Day f...	Rest Day f...	Rest Day f...	Rest Day f...	15
201902	07-Jan-20...	Rest Day f...	Rest Day f...	7 Hour 30...	7 Hour 30 ...	7 Hour 30...	Rest Day f...	Rest Day f...	22.5

Below the table are buttons for 'DELETE RANGE', 'GENERATE PERIODS', and 'SAVE'. The 'CURRENT PERIOD' button is highlighted with a red box. The background shows the 'Shift Patterns' tab selected in the left sidebar.

5.5. Additional Patterns/Advanced Config

When Multi Pattern Framework is selected, you can add an additional row to each sequence of shifts. The team area displays underneath it to specify a pattern on a day.

If you delete a row on a shift type, it also deletes any additional shifts associated with the row.

Note:

Additional shifts and team areas are assigned where configured. The company needs to be set as a multi pattern company for this to be enabled. Please consult your XD Consultant before switching this on.

6. User Security

To easily enable all menu there is a default Menu Option which can be used in the table below.
