## **1. Overview**

### **1.1. Purpose of the Guide**

The Sign-off Hours screen gives you a sign-off facility, which is a final confirmation that all hours are correct for the current period. This means that the hours are correct and approved and that the current WFM period can be completed. It also allows for hours to be transferred to payroll if needed.

This guide covers:

- How to sign off hours
- Description of the tabs on the screen
- Configuring the screens.

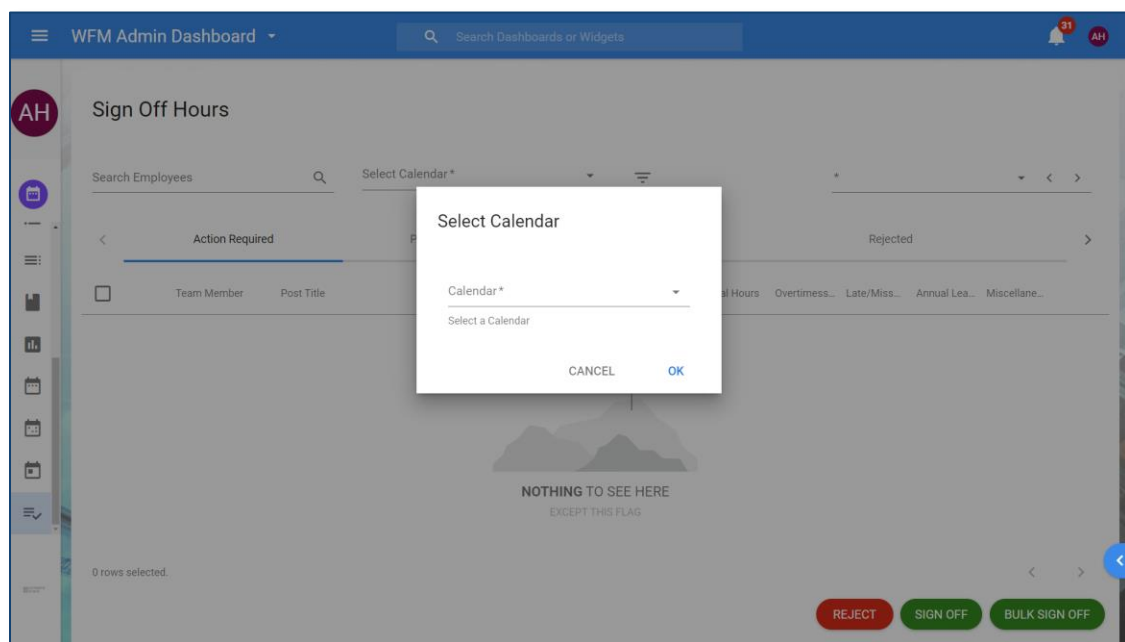

## 2. Manage Sign Off Hours

The Sign Off Hours screen is where managers or administrators can sign-off or reject employee hours as well as view employees' timesheets.

### 2.1. Accessing the Sign Off Hours Screen

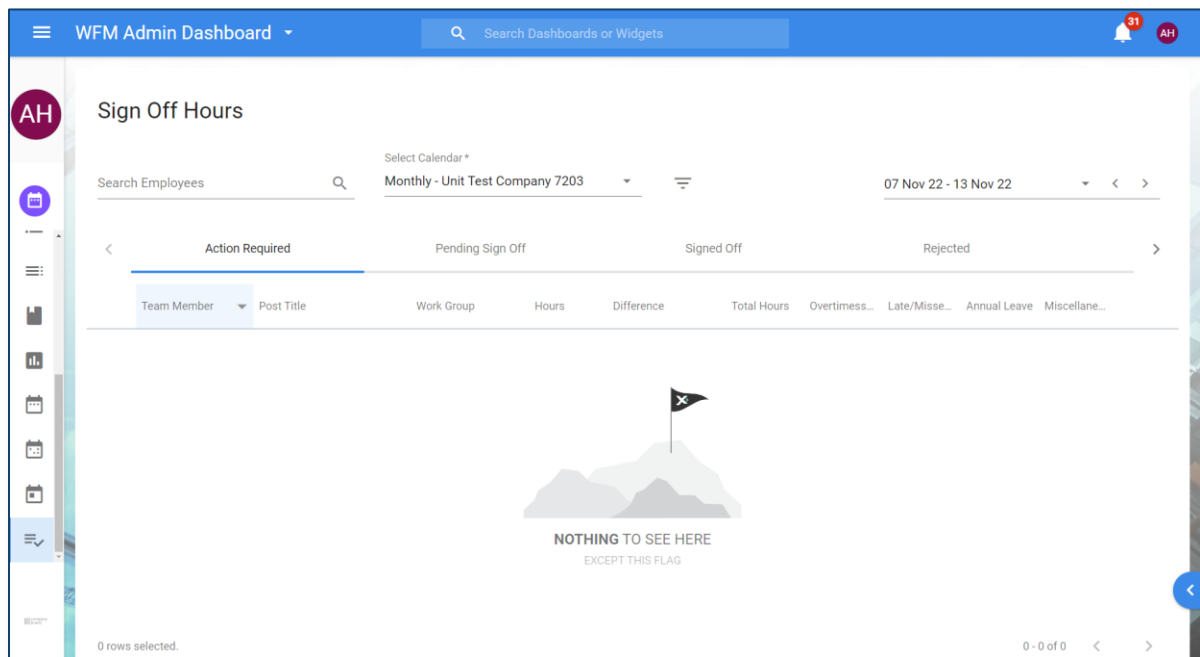

To access the Sign off Hours Screen, complete the following:

1. From **the WFM Admin Dashboard**.
2. Select **Sign Off Hours** from the menu on the left-hand side.
3. Select the relevant calendar from the **drop-down** menu then click **OK**. The Sign off Hours Screen for the selected calendar displays. If you are only using one calendar, it will automatically default to this.

### 2.2. Sign Off Hours Screen

Once you have accessed the Sign off Hours Screen, you will see the following:

The screen can be filtered using the following options:

| Option                  | Details                                                                                                  |
|-------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Search Employees</b> | You can search by employee should you wish to sign off hours on a specific employee.                     |
| <b>Select Calendar</b>  | This button allows you to move between and choose calendars to sign off related hours.                   |
| <b>Filter</b>           | The filter button allows you to refine your search to filter by a specific workgroup.                    |
| <b>Calendar Period</b>  | This displays the period selected. You can use the arrows or drop-down menu to change the period viewed. |

The Sign Off Hours screen has five tabs available:

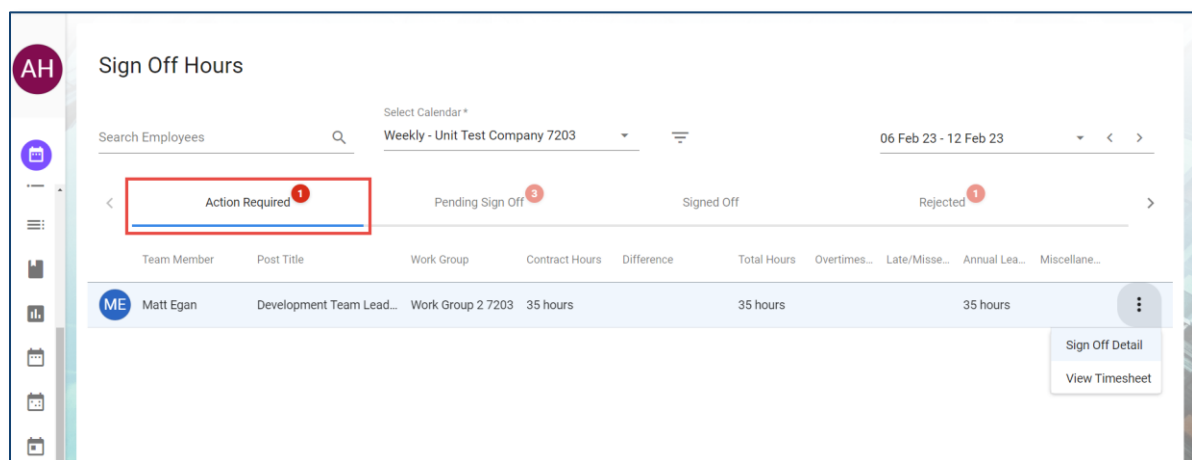

- **Action Required** – where an employee's hours can be approved.
- **Pending Sign Off** – where an employee's hours can be signed off or rejected.
- **Signed Off** – where you can see all employees sign-off hours.
- **Rejected** – where you can see all rejected hours.

- **No Hours** – where you can see all employee where no attendance has been recorded.

Each tab has the same headings; some of which are configurable. See section [3. Configuration](#) for further details.

### 2.2.1. Action Required Tab

The Action required tab shows the manager all employees with any hours which need their attention or approval.

To approve an Employee's Hours:

1. Select the employee and from their 3-dot menu click **Sign Off Detail**.
  - You can review the hours submitted by clicking **View**.
2. Enable the **Approve/Reject** toggle against each item listed. You can also add a Reason & Narrative if required.
3. Once happy, click **Save**.
4. The employee's status will now move to Pending Sign Off.

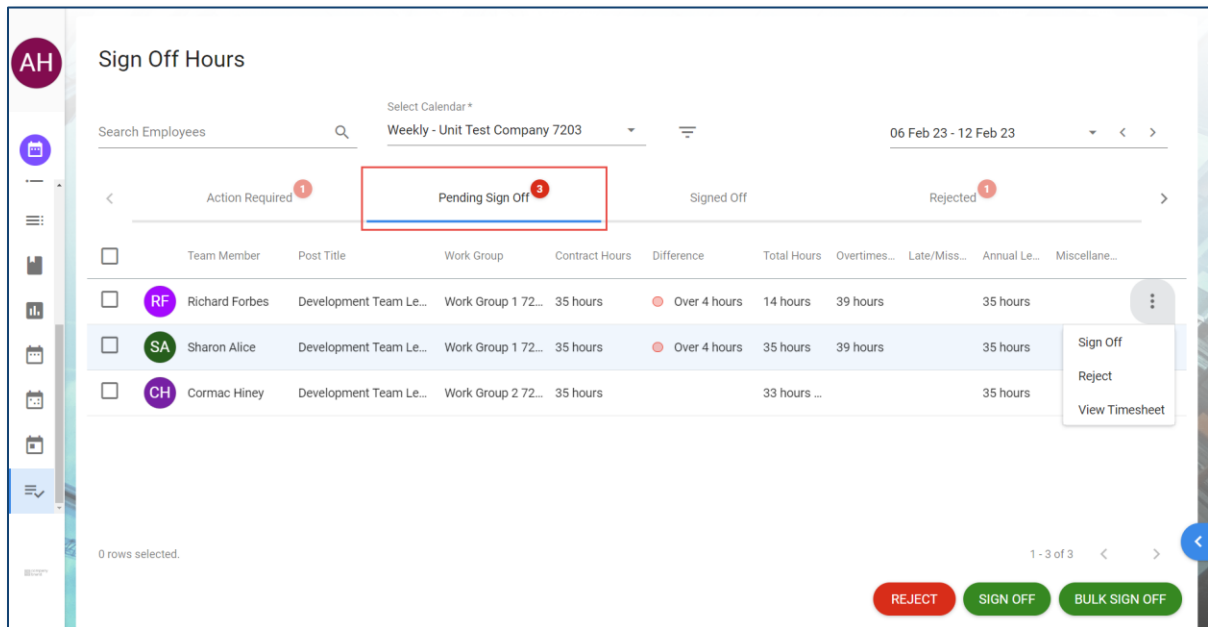

### 2.2.2. Pending Sign Off Tab

The Pending Sign off tab shows the hours which are approved and awaiting manager or admin sign off. Hours can be signed off or reject individually or in bulk.

There are three options available to sign-off hours within the Pending Sign Off tab:

- The **3-dot menu** – where you can sign off a user's hours.
- The **Sign Off button** – where you can select and sign off up to 100 users' hours at a time.
- The **Bulk Sign Off button** – where you can sign off up to 600 users' hours at a time.

**To sign off a user's hours from the 3-dot menu:**

1. Select the employee and from their 3-dot menu click **Sign Off**.
  - You can review the approved hours by clicking **View Timesheet**.
2. The employee's status will now move to Signed Off.

**Note:** Assignment of sign-off categories must be added to the Sign Off Hours configuration screen, see section [3 Configuration](#). If the pay code has not been assigned the user will receive a message when selecting **Sign Off** stating they do not have access to the required Pay Codes, please contact your System Administrator.

The **Sign Off** button, at the bottom of the page, allows you use the tick boxes to select and sign-off up to 100 employee records at a time.

### To reject an employee's hours the 3-dot menu:

1. Select the employee and from their 3-dot menu click **Reject**.
  - You can review the approved hours by clicking **View Timesheet**.
2. A warning message will appear requesting you to Confirm Reject Hours.
3. Click **Yes**
4. The employee's status will now move to Rejected.

The **Reject** button, at the bottom of the page, allows you use the tick boxes to select and sign-off up to 100 employee records at a time.

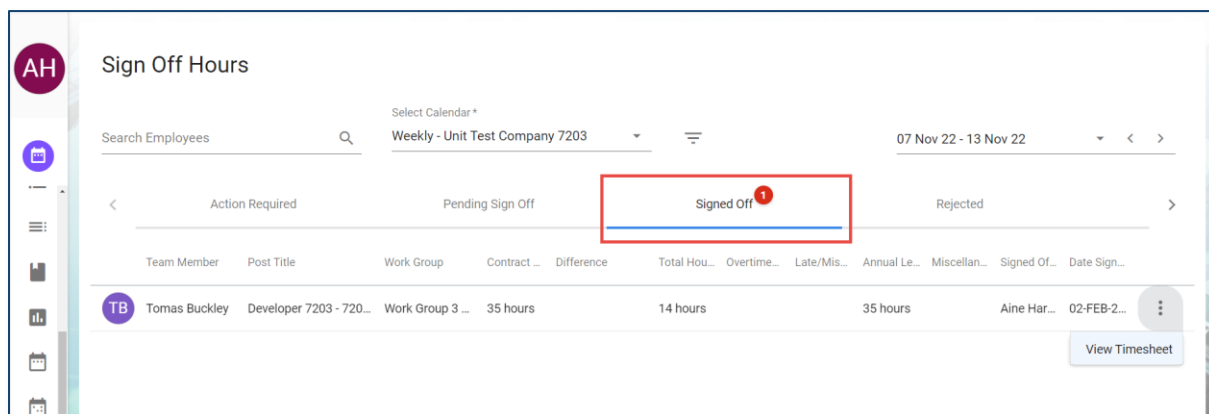

### To Bulk Sign Off employees' hours using the Bulk Sign Off button:

1. Click the **Bulk Sign Off** button.
2. This will sign off the first 600 records. If more than 600 record exist, the screen will refresh and display the next 600 for you to repeat the process until all records have been signed off.
3. The employees' statuses will now move to Signed Off.

 **Note:** Assignment of sign-off categories must be added to the Sign Off Hours configuration screen, see section [3 Configuration](#). If the pay code has not been assigned the user will receive a message when selecting **Sign Off** stating they do not have access to the required Pay Codes, please contact your System Administrator.

### 2.2.3. Signed Off Tab

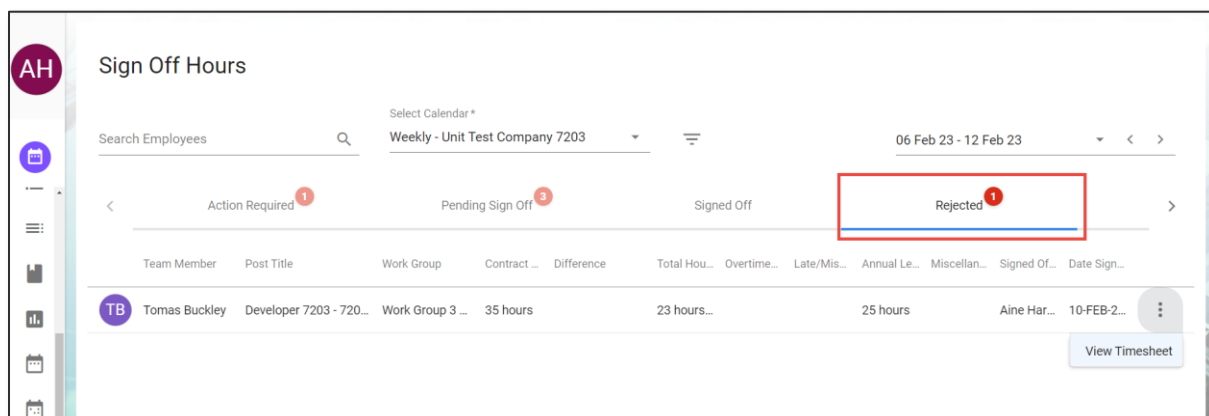

The Signed Off tab shows you the hours which have been approved and signed off. This can be useful to consult as it gives an overview of all signed off hours for the period.

Using the 3-dot menu you can click **View** to further drill down and review the employee timesheet, should there be anything which you need to query.

### 2.2.4. Rejected Tab

The Rejected tab shows any hours which have been rejected and subsequently will not be released to payroll.

Using the 3-dot menu you can click **View** to further drill down and review the employee timesheet, should there be anything which you need to query.

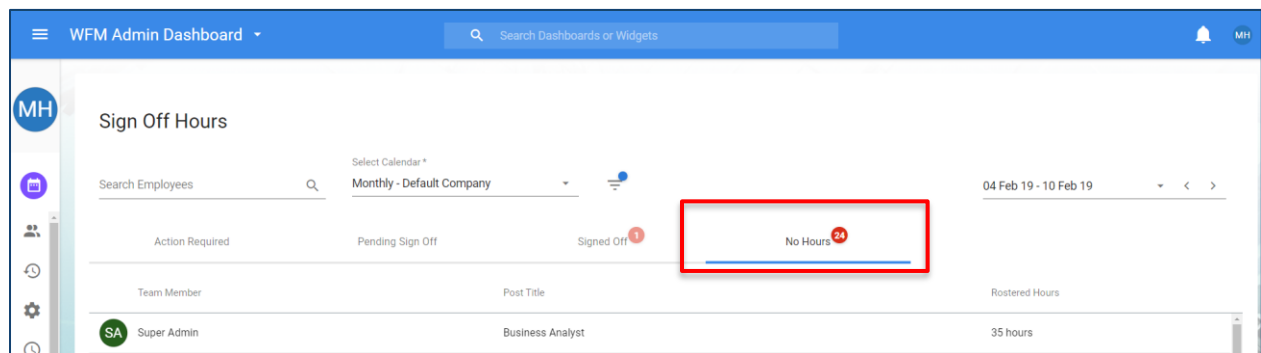

The reject tab and button can be hidden from the Sign off hours screen, to avoid the possibility of hours being rejected in error. To do this **enable** the following menu options.

| Menu Option                                   | Menu ID                                | System     |
|-----------------------------------------------|----------------------------------------|------------|
| Approve/Sign Off hours<br>- Reject Option Off | MAIN_MENU.APPROVE_SIGN_OFF_HIDE_REJECT | CorePortal |

| Menu Option                                | Menu ID                                    | System     |
|--------------------------------------------|--------------------------------------------|------------|
| Approve/Sign Off hours<br>- Reject Tab Off | MAIN_MENU.APPROVE_SIGN_OFF_HIDE_REJECT_TAB | CorePortal |

### 2.2.5. No Hours

The No Hours tab does not stop the sign-off process but is for information purposes it enables managers to view staff where no timesheets have been recorded for the period selected.

The No Hours tab can be hidden from the Sign off hours screen if not required. To do this disable the following menu options.

| Menu Option                                   | Menu ID                                 | System     |
|-----------------------------------------------|-----------------------------------------|------------|
| Approve/Sign Off hours<br>- Show No Hours Tab | MAIN_MENU.APPROVE_SIGN_OFF_NO_HOURS_TAB | CorePortal |

## 3. Configuration

### 3.1. How to access the Sign-Off Hours Configuration Screen

You can access the Sign Off Hours Configuration Screen via the WFM Admin Dashboard. To do this:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Sign-off Hours Configuration**.

### 3.2. Sign Off Hours Configuration Screen

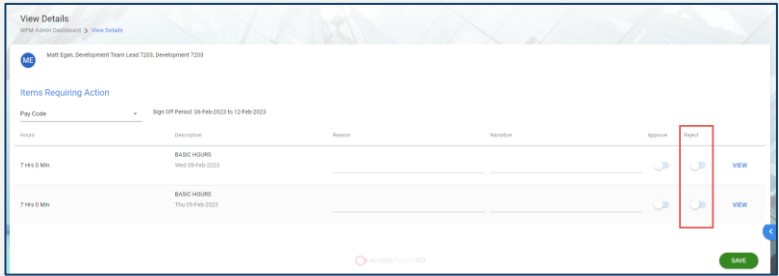

The *Sign-Off Hours Configuration* screen determines information displayed to managers and administrators as part of the sign-off process completed at the end of each period, examples include the display of employees' hours worked, scheduled hours and contract hours.

**Note:** All Pay Codes must be included in at least one sign-off category.

- Assignment of sign-off categories is also available in Pay Code configuration (see summary section).
- Pay Codes can be assigned to multiple categories.
- Copied Pay Codes are automatically assigned the same pay code categories as the pay code it was copied from.

The **Sign Off Parameters** section of the screen contains the following fields:

| Field                                       | Details                                                                                                                                                                                                         |
|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Approve/Sign Off Include the Managers Hours | By Default, managers do not have access to sign-off their own hours, where this option is enabled, the managers can sign-off their own hours                                                                    |
| Summary Sign-Off and Approval Allowed       | Enable Pending Sign-Off section to completed Pay Code approval for pay codes that are explicitly set to <b>requires approval</b>                                                                                |
| Display Employees Work Group                | Choose whether to include employees' work groups in the sign off hours screen headings.                                                                                                                         |
| Sign-Off Detail – Hide Reject               | Option to hide Reject option in the Sign-Off Section that is available from 3-dots menu within the Action Required tab.<br> |
| Managers Org Role & Group                   | The organisational role and group that drives Manager 'who they see" security.                                                                                                                                  |

The **Sign Off Pay Code Config** section of the screen contains the following fields:

| Field                                       | Details                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Display Difference Column                   | One of the 5 categories configured can be compared to <i>Total Column Versus</i> to highlight differences between the respective totals.                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Total Colum Versus                          | Selected value is included as part of the employee details returned:<br><b>Roster:</b> The Employees Roster hours<br><b>Payroll:</b> The Payroll hours value stored at the Employee Work Group<br><b>Contract:</b> The Employees Contract Hours                                                                                                                                                                                                                                                                                                                                         |
| Column Description Sign-off Category 1 to 5 | Text displayed on screen to identify the category e.g. Hours Worked                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Based Hours On Sign-off Category 1 to 5     | Up to 5 different categories can be displayed, each category can be based on 1 of the following: <ul style="list-style-type: none"> <li>• The Employees total hours for the pay codes assigned to the category.</li> <li>• The Employees Rostered hours.</li> <li>• The Employees Contract Hours.</li> <li>• The Employees payroll hours from the employees work group</li> </ul>                                                                                                                                                                                                       |
| Pay Codes Sign-off Category 1 to 5          | Where a category is based on a Pay Code Listing. Enter the pay codes that contribute toward the category total e.g. If category 2 was 'Absences' then list the absence pay codes that count towards the total to be displayed, such as Sickness, Late, Annual Leave, etc.<br><br>If a pay code is not listed but is assigned to hours for sign off the user will receive a message following message when they attempt to sign off the employee's hours: <div> Access Denied, you do not have access to the required Pay Codes, please contact your System Administrator DISMISS </div> |

### 3.2.1. Displaying difference between two columns

The *Totals Column Versus* and the *Base Hours On* column. One of the 5 available Sign-Off categories, can be compared to Total Column Versus selection, the highlight difference (+/-) is outputted to the *Difference* column, examples of the configuration include:

- Difference between the Employees Hours Worked (pay code listing) and their Contract Hours
- Difference between the Employees Hours Worked and their Schedule (Roster)
- Difference between the Employees Schedule and their Contract Hours
- Difference between the Employees Hours Worked and their Payroll Hours

Thus, if an employee's contract hours were 39.00 hours per week and their basic hours worked was 42.00, a 3.00 hour difference is displayed to the manager prior to sign-off.

### 3.2.2. Pay Code Configuration & Sign-Off Categories

 **Note:** Within Pay Code Configuration the summary screen supports the assignment of Sign-Off categories.

- Pay Codes can be assigned to multiple categories
- Copied Pay Codes are automatically assigned the same pay code categories as the pay code it was copied from.

### 3.3. **How to Configure Sign-Off for historical entries**

The Sign-Off Hours Screen allows hours that have been entered into previous periods to be included in the current period being signed off.

To enable the screen the following details, need to be configured:

- The **maintain historical hours** should be set to '**ON**' at the username level.
- At the company level, set the manager count back week to the desired value.

 **Note:** When you enable historical sign-off, it also allows you to maintain/enter timesheets historically for the allowed reference period.

### 3.4. Manager and Admin Dashboard Configuration

On the Manager and Admin dashboards, you can configure the Sign off Hours menu position.

To complete this, do the following:

1. Quick jump to WFM Configuration Centre.
2. Select *Dashboard Configuration*
3. From Dashboard Configuration, select **WFM Manager Dashboard** or **WFM Admin Dashboard**.
4. Enter the menu option position e.g., #3 will place the Sign-off hours in position 3 for the relevant dashboard.

### 3.5. How to access the Sign-Off Hours Configuration Screen (Back Office)

If you have not yet migrated to Portal and still using BackOffice the Sign-Off Hours feature can be configured in the same way; showing the difference between the Total Hours column and the following:

- Employee Rostered Hours
- Employee Default Payroll Hours (Work Group)
- Employee Contract hours (New feature)

If required to configure, complete the following:

1. Connect to the Back Office.
2. Navigate to **System Params**
3. Select **Reference Data K-P**  
Select **MSS Sign Off Summary Display**

 **Note:** The difference can only be compared to one of the five columns which are allowed on the form.

4. Select the **Display Difference indicator** for the desired column.
5. Select either **Rostered**, **Payroll** or **Contract** from the *Total Column Versus* drop down menu.
  - **Rostered**: This displays a total of the hours employees scheduled for the selected Sign-Off Period.
  - **Contract**: This displays the employees total contracted hours for the for the Sign-Off Period selected.
  - **Payroll** : This displays the default hours values recorded at the employees work group.

 **Note:** Remember to assign the pay codes to the column because the difference is formed by the totals hours associated with the pay code.

### 3.6. Username Configuration for Managers and Admin (Back Office)

To configure Admin Access for the Sign Off Hours Screen from Back Office.

1. Connect to the Back Office.
2. Select **Core Time > System Params > System Users**.
3. Select the Administrator username.
4. Assign the company number to the username. This means the Admin User then has access to all calendars assigned to that company by default.

 **Note:** By default, the company has a system calendar. If required additional user defined calendars can be created to support where multiple calendars are in operation such as Weekly, Fortnightly, Monthly etc.

5. Select the option for Generate Timesheets.

| Selection     | Details                                                                            |
|---------------|------------------------------------------------------------------------------------|
| None          | Admin User does not have access to Sign Off Hours. An onscreen error is generated. |
| All Companies | Admin user has access to everything.                                               |

| Selection    | Details                                                                                    |
|--------------|--------------------------------------------------------------------------------------------|
| Home Company | Admin User does not have access to Sign Off Hours. Selection should be either None or All. |

Admin user security is based on WFM Company Level and Calendar Access so there is no requirement to assign Work Group/Department combinations within the Access Details section in the system users screen.

## 4. Menu Options

The following menu options are needed to configure the Sign Off Hours screens.

**Note:** Admin user security is based on WFM Company Level and Calendar Access

In the table below, where a menu option has an \*, this highlights that the menu can be applied to both Manager and Admin menu profiles.

### Admin Screen Access:

| Menu Option                                  | Menu ID                                    | System       |
|----------------------------------------------|--------------------------------------------|--------------|
| Sign Off Hours                               | WFM_ADMIN_MENU.SIGN_OFF_HOURS              | CorePortal   |
| Sign Off Hours - Timesheet Input *           | MAIN_MENU.SIGN_OFF_HOURS_TS_INPUT          | CorePortal   |
| Approve/Sign Off hours - Reject Option Off * | MAIN_MENU.APPROVE_SIGN_OFF_HIDE_REJECT     | CorePortal   |
| Approve/Sign Off hours - Reject Tab Off *    | MAIN_MENU.APPROVE_SIGN_OFF_HIDE_REJECT_TAB | CorePortal   |
| Bulk Sign Off Hours                          | WFM_ADMIN_MENU.BULK_SIGN_OFF_HOURS         | CorePortal   |
| Approve/Sign Off hours - Show No Hours Tab   | MAIN_MENU.APPROVE_SIGN_OFF_NO_HOURS_TAB    | CorePortal   |
| Update signoff                               | WS_TIMESHEETS_MENU.PATCH_SIGNOFF           | Webservices  |
| Get calendars                                | WS_TIMESHEETS_MENU.GET_CALENDARS           | Web Services |
| Get signoff                                  | WS_TIMESHEETS_MENU.GET_SIGNOFF             | Web Services |
| Get settings global                          | WS_ROSTER_MENU.GET_SETTINGS_GLOBAL         | Web Services |

### Manager Screen Access:

| Menu Option         | Menu ID                              | System     |
|---------------------|--------------------------------------|------------|
| Sign Off Hours      | WFM_MANAGER_MENU.SIGN_OFF_HOURS      | CorePortal |
| Bulk Sign Off Hours | WFM_MANAGER_MENU.BULK_SIGN_OFF_HOURS | CorePortal |

## 5. Frequently Asked Questions

This section covers a number of the common questions or configuration queries. Please see below for a list of frequently asked question regarding Sign-Off Hours.

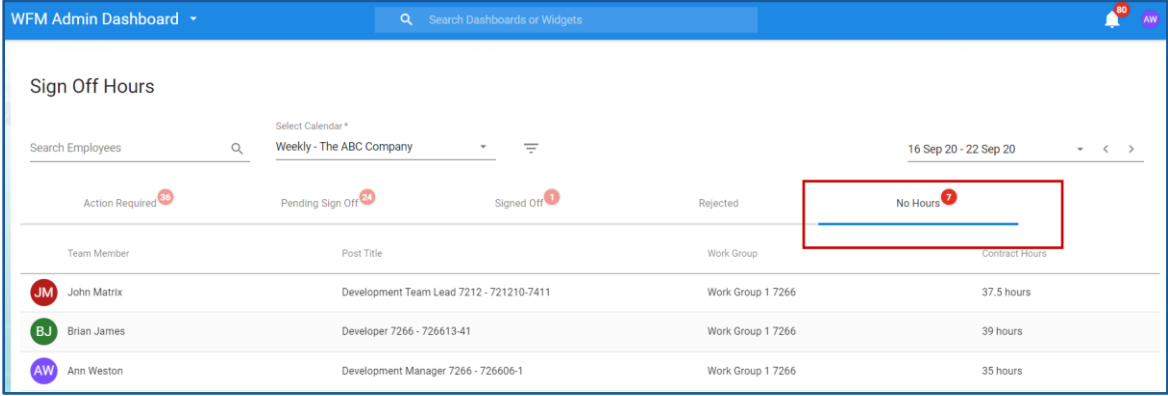

### 5.1. Hide the Reject toggle within Sign-Off Detail, part of Action Required

To hide the reject toggle within Sign off Details, complete the following steps,

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Sign-off Hours Configuration**.
4. Select **Yes** under **Sign Off Detail – Hide Reject**.
5. The reject toggle will now be hidden from Sign Off Detail.

### 5.2. Sign Off Hours Screen to display Employees with no Timesheets Entries

Sign off hours can be configured to include the display of employees that do not have timesheet entries recorded. The 'No Hours' tab does not stop the sign-off process, but for information purposes it enables managers to view staff where no timesheets have been recorded.

| WFM Admin Dashboard                                                                                                                      |                                          |                          |                       |  |
|------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--------------------------|-----------------------|--|
| Sign Off Hours                                                                                                                           |                                          |                          |                       |  |
| Search Employees                                                                                                                         |                                          | Select Calendar *        | 16 Sep 20 - 22 Sep 20 |  |
|                                                                                                                                          |                                          | Weekly - The ABC Company |                       |  |
| <span>Action Required 52</span> <span>Pending Sign Off 54</span> <span>Signed Off 1</span> <span>Rejected</span> <span>No Hours 2</span> |                                          |                          |                       |  |
| Team Member                                                                                                                              | Post Title                               | Work Group               | Contract Hours        |  |
| John Matrix                                                                                                                              | Development Team Lead 7212 - 721210-7411 | Work Group 1 7266        | 37.5 hours            |  |
| Brian James                                                                                                                              | Developer 7266 - 726613-41               | Work Group 1 7266        | 39 hours              |  |
| Ann Weston                                                                                                                               | Development Manager 7266 - 726606-1      | Work Group 1 7266        | 35 hours              |  |

To enable the NO Hours Tab:

1. Navigate to Security
2. Select the relevant menu profile for the user type
3. Select Manage Menu Options, from the 3-dot menu
4. Enable the following menu options:

| Menu Option                                   | Menu ID                                 | System       |
|-----------------------------------------------|-----------------------------------------|--------------|
| Approve/Sign Off hours<br>- Show No Hours Tab | MAIN_MENU.APPROVE_SIGN_OFF_NO_HOURS_TAB | CorePortal   |
| Get signoff nohours                           | WS_TIMESHEETS_MENU.GET_SIGNOFF_NOHOURS  | Web Services |

### 5.3. Display Employee's Work Groups on the Sign Off Hours Screen

To display the employee work group on the Sign off screens, complete the following steps.

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Sign-off Hours Configuration**.
4. Select **Yes** under **Display Employees Work Group**.
5. Work Group will now be a heading in the Sign Off Hours screen.

### 5.4. Sign off Button Does Not Appear

In certain circumstances the Sign off button does not appear. This is because the user needs to be granted the Sign off Hour's privilege. To assign the Sign off Hours to a user, you need to complete the following steps:

#### **In Portal:**

1. Go to *WFM Admin Dashboard*
2. Navigate to **WFM Configuration**
3. Select **WFM System Users Configuration**
4. Search for and select the user and from their 3-dot menu click **View/Edit**
5. Under **Access Privileges**, select the **Sign Off Hours**

**WFM System Users Configuration**

### 5.5. Enable Managers & Admin to Sign-off their Own Hours?

By default, the Sign off Hours option does not support the ability for managers or admins to sign off their own hours. To grant manager/admin the ability to sign-off their own hours, complete the following steps.

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Sign-off Hours Configuration**.
4. Enable the toggle **Approve/Sign Off Include Manager Hours**.
5. Manager/admins will now be able to sign off their own hours within the Sign Off Hours Screen.

### 5.6. How do I manually remove legacy screens?

If you need to remove the old *Approve/ Sign Off Hours* screen from the **WFM Manager Dashboard**, you can do so manually by following the steps below:

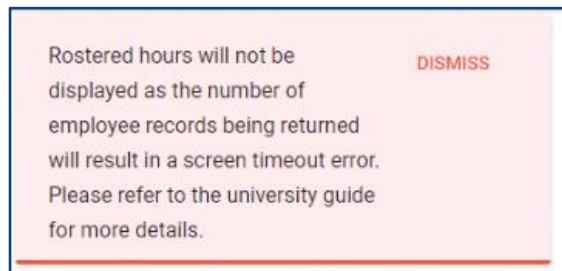

**Note:** An automatic switch over is planned to be completed as part of a future Minor Release.

1. Quick jump to *Security*.
2. Identify the relevant Manager menu profiles.
3. Search for Approve/Sign Off and deactivate the old screen by switching the toggle. Make sure the new screen has been activated before you deactivate the old screen.
4. Go to **WFM Configuration**.
5. Select **Dashboard Configuration**.
6. Select **WFM Manager Dashboard**.
7. Select the desired position for the Sign Off Hours Screen and click **Save**.
8. The old screen is deactivated when a manager next logs in.

### 5.7. Why do I get the Rostered Hours Display Error?

When signing off hours, you may receive the error message detailed below:

Where Sign-Off has been configured to display the Employee's Rostered Hours, there is an upper limit of 400 employees applied. If a user has access to more than 400 employees and rostered hours is enabled, the message displays.

The message indicates the rostered hours will not be displayed, but the screen will continue to work support the hours to be signed-off.

### 5.8. Sign-Off Hours Screen & Sign-Off Button

The Sign-Off button screen supports the sign-off of 100 records (employees) at a time. A user needs to highlight the records (either select all or individually). On completion, if the user has access to more than 100 records, the screen will refresh and display the next 100 until all records have been Signed-off.

### 5.9. Sign-Off Hours Screen & Bulk Sign-Off Button

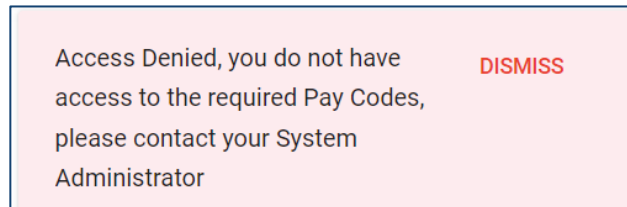

Bulk sign off allows you to sign off 600 employees at a time, without having to select or scroll through pages of records. If more than 600 records exist, the screen will refresh and display the next 600 until all records have been Signed-off.

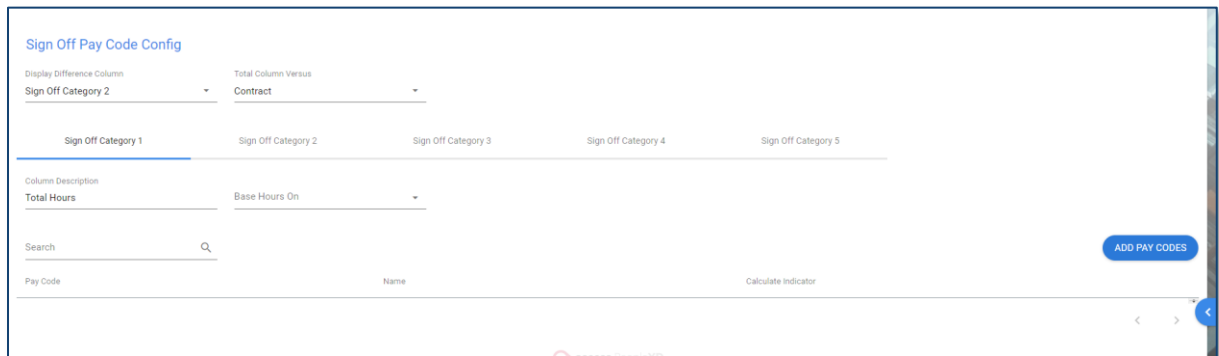

**Note:** Where 'Rostered Hours' are configured to display, this value is reduced to 400 for performance reasons

### 5.10. Pay Codes/Hours not Included on the Sign-off Screen Columns

For the Pay Code & Hours to be Signed-Off they need to be included in the Sign Off Hours Configuration screen under the Sign Off Pay Code Config section.

See section [3.2 Configuration](#) for more details on this.

In the above, the Admin decides the Heading Name for the Columns and then slots the various pay codes under the headings.

**Note:** A pay code must be assigned to a Column otherwise it is excluded from the Sign-Off process.

### 5.11. Claim Type Pay Codes

Pay Codes that are marked as Timesheet Claims are automatically excluded from the Sign-off process.
