1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to walk you through the Staffing Demand options and how to configure them.

These include:

- A narrative field to allow an explanation of the requirements to be added
- An explanation of a staffing demand calculation is available on the Generate Demand screen
- Functionality to import a value with a start time and a duration, with this applied in one of two ways
 - Value applied to every 15-minute slot within the duration
 - Value divided into each 15-minute slot covering the duration
- Ability to stipulate a maximum of staff to be roster in a time slot
- Configuring a requirement to have different values for a piece of data, e.g. between 1 and 5 covers in a restaurant 1 server is required, 6-20 covers require 3, 21-50 require 4. This is an alternative the 1 to 1 relationship in the initial release.

2. Features

2.1. Add or View a Narrative

The 'Narrative' addition to the *Staff Requirements* screen allows you to add a free text narrative to a rule. To do this:

1. Navigate to *Workforce Management Dashboard*.
2. Select **Staff Requirements**.
3. Search for and select the **Group** you wish to add the narrative to.
4. Expand its 3-dot menu and select **View Staff Requirements**.
 - A list of rules will display.
5. Expand the 3-dot menu of the relevant rule and select **View / Add Narrative**.
6. Enter your narrative.
 - Maximum character length 200.

1. Click **OK**.
2. On the *Staff Requirements* screen click **Save**.

2.2. Staffing Demand Calculation Explanation

Once *Generate Demand* has been run the details of this calculation is available in the 3-dot menu.

To view this:

1. Having run 'Generate Demand' go to Workforce Management Dashboard
2. Select **Generate Demand**
3. Use the dropdown options to select the relevant Team and date range.

Team Area	Date	Start Time	End Time	Type	Description	Metric	Total	Total Seconds	Total People	Staffing Demand
7275 Benton Hous...	09-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	113	25200	101700	4
7275 Benton Hous...	10-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	134	25200	120600	5
7275 Benton Hous...	11-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	147	25200	132300	5
7275 Benton Hous...	12-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	86	25200	77400	3
7275 Benton Hous...	13-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	120	25200	108000	4
7275 Benton Hous...	14-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	173	25200	155700	6
7275 Benton Hous...	15-Jan-2024	08:00	15:00	Job Title	Work Group 1 7264	7275 Room Sales B...	135	25200	121500	5

4. Expand the 3-dot menu for the day you wish to view and select **View Explanation**.

Explanation

TRANSACTION PROCESSING...
Transaction value: 134
Base value: 900
Requirement value: 1
Transaction value: 134
Calculated seconds (base/requirement*transaction value): 120600
Calc hours: 7
Calc minutes: 0
Calculated duration (calc hours * 60 * 60) + (calc mins * 60): 25200
Staffing demand (seconds/duration rounded up): 5

OK

5. Click **OK** to close the explanation.

2.3. Importing data with a Start Time and Duration

Configuring a data import to use the start time and duration is done in the WFM Admin Dashboard > Interface Types screen.

1. From the *WFM Admin Dashboard* select **WFM Configuration**.
2. Select the **Interface Types** tile.
3. Scroll to the Code you wish use the duration functionality on, then enable the **Use Duration** toggle.
 - You can also click Add to create a new code.
4. If you want the imported value to be used for each 15-minute time segment of the duration, then the *Spread Across Duration* toggle must be turned off. If you want the imported value to be spread over the duration, then the *Spread Across Duration* toggle must be enabled. This will divide the value you have imported into the number of 15-minute segments that are in the duration period and use the resulting value for each of those segments.

For example, Import a value of 80 with a start time of 09:00 and a duration of 1 hour.

Time Segment	Value with 'Use Duration' off	Value with 'Use Duration' on
09:00 – 09:15	80	20
09:15 – 09:30	80	20
09:30 – 09:45	80	20
09:45 – 10:00	80	20

2.4. Maximum Number of Staff to Roster

Staffing Demand in Workforce Management has previously had the ability to set a minimum number of staff to be rostered. It is now possible to add a maximum number of staff to be rostered. This will stop you having more staff than you require either for cost purposes or because you do not have enough facilities to cater for more than the maximum number of staff. Using a maximum number will restrict the number of staff rostered to this value even if the other staffing demand calculations result in a higher number.

2.4.1. To Configure a Maximum Number of Staff

1. Navigate to the *Workforce Management Dashboard*.
2. Select **Staff Requirements**.
3. Expand the 3-dot menu of the Team you wish to set the maximum number of staff on and select **View Staff Requirements**.
4. Enter the maximum number of staff value required to the **Maximum Value** column.
5. Click **Save**.

ID	Type	Description	Metric	Range Code	Value	Base Seconds	Minimum Value	Maximum Value	Lag time start	Lag time end	Pattern
1	Job Title	Work Group 1 7264	7275 Room Sales Bud...		1	900	1	6			Base 7275 WP

2.5. Staffing Demand Ranges

Range Values remove the 1 – 1 relationship between a value and the number of staff this would roster.

Currently we have a one-to-one relationship with roster calculations. For example:

- For every 5 people I need 1 member staff.
- If you have a footfall of 100 people you would need 20 members of staff

We need this to be more flexible and support intervals or ranges of values. For example:

- Between 1 and 5 people I need 1 member of staff

- Between 6 and 20 people I need 3 additional members of staff
- Between 21 and 50 people I need 5 additional members of staff
- Between 51 and 100 people I need 8 additional members of staff
- For a footfall of 100 people this would not create a demand for 8 members of staff

2.5.1. To Add a Staffing Demand Range

1. From the *WFM Admin Dashboard* select **WFM Configuration**.
2. Select the **Staffing Demand Ranges** tile.
3. To create a new range, click **Add**.
4. Enter a **Range Code** and **Range Description** and click OK.
 - This new range is now available on the listing.
 - The display Range Code, Range Description and if the range is In Use.

2.5.2. To Edit a Staffing Demand Range

5. From the *Staffing Demand Ranges* screen.
6. Expand the 3-dot menu of the relevant range and select **View / Edit**.
7. Click **Add** to create a new range entry.
8. Select from the dropdown options what you are basing the **Value Type** range on e.g., Footfall.
9. Enter the required range in the **From Value** and **To Value** fields.
10. Enter the number of staff required in the **Staff** field.
11. Click **Save**.
12. Repeat for all ranges required.

Range Code	Value Type	From Value	To Value	Staff	
SR1	Footfall	1	5	1	DELETE
SR1	Footfall	6	20	3	DELETE
SR1	Footfall	21	50	5	DELETE
SR1	Footfall	51	100	8	DELETE

2.5.3. Apply a Range to a Team's Requirements

To apply a range to a Teams requirements:

1. From the *Workforce Management Dashboard* select **Staffing Requirements**.
2. Expand the 3-dot menu of the group you wish to edit and select **View Staff Requirement**.
3. Click **Add**.
4. Select the **Type** and **Description**, from the dropdown options e.g., Job Title and Waiting Staff.
5. Under **Metric** select the data you are basing your calculation on e.g., FOOTFALL
6. Under **Range Code** select the range you want to use or have just created.
7. Under **Pattern** select the relevant Working Pattern.
8. Click **Save**.

access PeopleKD

If you need to create a new group to add a range to:

1. From the *Workforce Management Dashboard* select **Staffing Requirements**.
2. Click **Add**.
3. Give your Group a **Code** and **Description** and click OK.
4. Your Team will now display in the *Staff Requirements* screen.
5. You can further edit your Team following steps 2 – 8 above.

3. Menu Options

To allow access to all the Staffing Demand options on *Portal*, the following *Menu Options* must be enabled on the relevant *Menu Profile*.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Manager
3. From its 3-dot menu, select **Manage Menu Options**.
4. Search for and enable the menu options below.
