1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to explain the *System Users Screen* which assist Admin users complete their day-to-day tasks on Portal. The System User screen allows you to configure and change the access which users have to employee information and duties such as recording sick leave, transferring timesheets, and approving/signing off hours.

2. Manage System Users

This section details how to navigate the System Users Configuration screen as well as processes such as:

- Creating a new user.
- Searching and filtering employee data.

2.1. Accessing the System Users Screen

To access the *System Users screen*, you need to complete the following steps:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Under the **Configuration Settings** heading, select **WFM System User Configuration**.
4. The System Users screen displays.

2.2. The System Users Screen

Once the page displays, you are on the *System Users screen* where you see the list of users displayed.

Username	Person	Company	Access Type	Generate Timesheets	Label	Manager	Admin	Active
VL 000000444	Velma Lesch 0000000444	Unit Test Company 72...	Portal Access	Home Company	declansystem	☐	☐	☒
JW 000000448	Jedidiah Weissnat 0000000448	Unit Test Company 72...	Portal Access	Home Company	testasd	☐	☐	☒
JR 000004	John Ryan 000004	Unit Test Company 72...	Portal Access	No		☒	☒	☒
AS 000005	Ann Simpson 000005	Unit Test Company 72...	Portal Access	No	test	☒	☒	☒
TJ 000006	Tom Jones 000006	Unit Test Company 72...	Portal Access	All Companies	Portalsdf	☒	☒	☒
JT 000007	Joseph Tyndall 000007	Declan Company	Backoffice Access	Home Company		☒	☒	☒
JS 000008	Jessica Stone 000008	Unit Test Company 72...	Portal Access	No		☒	☒	☒

The screen can be filtered using the following options:

Option	Details
Company	You can filter by a specific company.
Access Type	This field allows you to choose the specific access needed. You can choose between Back Office, Portal, or Organisational Roles.
Generate Timesheets	This dropdown allows a choice of access to generate timesheets for Home, All or Company.
Active	When enabled, this toggle returns all active users in the grid.
Admin	This field specifies whether to filter by admin by selecting yes or no.
Manager	This field specifies whether to filter by manager by selecting yes or no.

The **System Users Configuration** screen contains the following fields:

Field	Details
Username	Description of the user, using the employee number.
Person	Name of the employee
Company	Choose the company the user needs access to
Access Type	Type of Access – either Portal, Organisational Role, or Back Office Access.
Generate Timesheets	This fields shows if the user has access to generate timesheets for specific companies.
Label	A label can be used to group users together making them more searchable.
Manager	This is enabled if the user has manager access.
Admin	This is enabled if the user has admin access.

 **Note:** The **Manager and Admin toggles** on the *System Users* screen are non-editable toggles. If the user is set up as a manager or Administrator, they will be toggled on.

- The Manager toggle is on if they have access to Workforce Management
- The Admin toggle will be on if they have access to WFM Admin

2.2.1. Create a New User

In certain circumstances, you may also need to create a new user, if you are given specific access to a new employee.

 **Note:** New users must be initial created by HR before they can be created in WFM

To create a new user, you need to complete the following steps:

1. Click the **Create New User**, the *Add New User* pop-up window appears.
2. Populate the fields, these will differ depending on the Access Type you choose:
 - **Portal Access**

Field	Details
Access Type	This field defaults to Portal Access.
Person	Select the Employee name.
Username	This field auto populates once the person is selected.
Company	This is a mandatory field which allows you to choose which company you wish to access.
Label	A label helps you to group a user with other similar users.
Generate Timesheets	This toggle defaults to no and when enabled means the user has access to generating timesheets and sending them to payroll.
Active Toggle	This is toggled on by default and shows the account as active and visible.

- **Organisation Role Access**

Field	Details
Org Role	This is a mandatory field to give the access type as organisational.
Company	This is a mandatory field which allows you to choose which company you wish to access.
Label	A label helps you to group a user with other similar users.
Generate Timesheets	This toggle defaults to no and when enabled means the user has access to generating timesheets and sending them to payroll.
Active toggle	This is toggled on by default and shows the account as active and visible.

3. Once completed, click **OK**.

4. Once complete the user configuration screen opens; where you can further configure the user.

2.2.2. Copy a User

You may wish to give the user the same access as another existing user, for instance if you are delegating a duty to a subsequent employee. To do this you can copy a user.

1. From the 3-dot menu of the User you wish to copy, select **Copy**.
2. Select the user you wish to give the same system access to from the drop down menu.
3. Click **OK**.
4. Once complete the user configuration screen opens; where you can further configure the user.

3. Configuration

Once the user has been created or the system access has been copied, you can then configure their access. To configure a system user, from the *System User* screen, select **View/Edit** from their 3-dot menu.

3.1. Summary Screen

The *Summary Screen* has all the current information on the user including their current access type, their username, and the companies they have access to. A fixed header shows the username, company and type of access granted to the specific employee. If you wish to search for another screen, use the search screen below.

The **Summary** screen contains the following fields:

Field	Details
Access Type	This field is not editable and signifies the type of access which has already been chosen.
Person	This shows the Employee Number.
Person Name	This shows the Employee Name.
Username	This shows the Employee Username.

Field	Details
Company	You can choose a specific company from the dropdown.
Label	Use a Label to make the User more searchable along with other grouped employees.
Generate Timesheets	This menu gives the user access to be able to generate timesheets and send them to Payroll.
Active Indicator	This toggle can be adjusted to activate or deactivate the user.
Manager	This toggle will be enabled if the user has been given manager access.
Admin	This toggle will be enabled if the user has been given admin access.
Admin Timesheet Template	By default, administrators inherit the same timesheet templates as managers. Where required an administrator template can be assigned at the WFM Company level or Username Level which override the default setting when viewing the 'Timesheet Input'. • Entry of the Admin Timesheet Template at the username level overrides the WFM Company Level, supporting admin staff to have bespoke templates assigned if required. • See our Company Calendar & Control Parameters guide for guidance on how to assign at the WFM Company level. • If the user also has Managers access assigned, on connection to the Managers Dashboards the manager screens continue to use the managers' template.  Note: Username assignment of Admin Timesheet Templates • Assign at the Company Level, If the same template is to be assigned for all Admin staff. • Assignment at the username is only required if an admin requires a specific template assignment.

3.2. Access Details screen

The Access Details Screen gives more information on the Work Group and the department associated with the user. It also allows you to delete *selected* or *all* department access.

The **Access Details** screen contains the following fields.

Field	Details
Work Group Code	Code associated with the specific work code.
Work Group	Description of the Work Group.
Department Code	Code associated with the specific department
Department	Department name

3.2.1. To Delete access to Work Groups

By selecting specific Work Groups and clicking the **Delete Selected** button this will delete access to these groups. Alternatively, you can use the **Delete All** button to remove access to all.

3.2.2. To Add further access to Work Groups

To **Add** further work group and department associated with the user follow the below steps:

- From the Access details screen, click **Add**.
- You are then taken to the Add Access Details screen.
- **Select** a Work Group to bring back the associated departments for the Workgroup.
- From here you can **drag and drop**, or select and use the arrows, the department into the assigned department section.
- Actions are automatically saved, use the breadcrumb trail to return to the user configuration screen.

3.2.3. Actions Button

When you click on Actions, the drop down allows you choose from the following:

- Access All Groups/ Departments

WFM: System Users - User Guide

- View Employee Access
- Bulk Assign Access

Employee Access

By clicking on **Employee Access**, you are brought to a screen which shows all employees the user has access to. You can use the search bar or filter the results returned at the top of the screen.

The screenshot shows the 'Employee Access' page in the WFM Admin Dashboard. It features a search bar and a table with columns for 'Person', 'Name', and 'Active'. The table lists six employees, all of whom are active. The 'Active' column contains blue toggle switches.

Person	Name	Active
000004	John Ryan	☒
000005	Ann Simpson	☒
000012	Rose Smithson	☒
000013	Alice Jones	☒
000014	Jason Smith	☒
000015	Mary Murphy	☒

Bulk Assign Access:

By clicking on **Bulk Assign Access**, you are brought to a screen which shows you all the Work Groups and Departments available to bulk assign in a single instance. You can select any relationship required, then click **Bulk Assign** to apply. **Note:** depending on the volume of assignments this process could take time.

Note: If the menu option **Access Details Bulk Show Assigned Departments** is enabled this will filter the departments based off the work groups. However, if the menu option is disabled this will bring back all departments for work groups.

The screenshot shows the 'Bulk Assign Access' page. It is divided into two main sections: 'Select Work Groups' and 'Select Departments'. Both sections have a search bar and a table of options. In the 'Select Work Groups' table, four rows are selected (FIN2, FIN3, FIN4, HR). In the 'Select Departments' table, two rows are selected (A1, FIN2). A 'BULK ASSIGN' button is located at the bottom right.

Work Group Code	Work Group Name
☒ FIN2	Budget
☒ FIN3	Tax
☒ FIN4	Finance Admin
☒ HR	Human Resources
☐ HR1	Recruitment
☐ HR2	Compensation & Benefits

Department Code	Department Name
☐ FIN1	Accounts
☒ A1	Admin Security
☒ FIN2	Budget
☐ M2	Campaigns & Events
☐ CEO	Ceo
☐ HR2	Compensation & Benefits

3.3. Access Privileges

The Access Privileges Screen allows you to enable toggles to decide what the user can see when they have access to certain tasks on the system.

Note: On the *Access Privileges Screen*, the **Access all Work Groups/Department** toggle will only display when CT_USER_FULL_ACCESS_JOB parameter is set to N. When this parameter is set to Y the *Access all Work Groups/Departments* toggle option will not display.

The **Access Privileges** section contains the following fields:

Field	Details
HR User	This toggle when enabled will allow the access as a HR User
Always Access all Workgroup departments	This toggle when enabled allows the system user to all work group and departments in the company. This is a back-office feature only and available to system users who's access type is of back-office access.
Lock User after Sign Off	When enabled, as soon as the last person is signed off by the user, the access is locked by setting them to query

Field	Details
	only and approve hours = N. This is a back-office feature only.
Maintain Display Only Pay Codes	When enabled, the user has access to edit the Display Only Pay Codes.
Manager User	This gives the user manager access.

The **Clockings** section contains the following fields:

Field	Details
Move Automated Clockings	This is used where the clocks appear on the wrong day, and it enables the user to correct them without support input.
Maintain Historical Clockings	This gives an earliest date that clocks can be maintained.
Reset Clock Type	This allows the user to reset or edit clockings.
Modify Automated Clocking	This allows the user to edit or make necessary changes to automated clockings.

The **Attendance** section contains the following fields:

Field	Details
Approve Hours	Allows the user to approve hours when the toggle is enabled.
Sign Off Hours	Allows the user to sign off hours when the toggle is enabled.
Approve/Sign Off Include Manager Hours	By Default, managers do not have access to sign-off their own hours, where this option is enabled, the managers can sign-off their own hours.
Maintain Historical Hours	When enabled, this determines the earliest date of inputted historical hours using roll back.
Automatically Approve Hours	If hours require approval, they are approved on entry.

The **Absence Privileges** section contains the following fields:

Field	Details
Leave Request Admin User	This toggle when enabled allows the user to approve leave requests as a designated admin.
Allow Medical Cert Entry	This allows the user to enter a medical cert as documentation towards prolonged absence or when a medical cert is required after a certain period.
Override Leave Requests	When enabled a user can override recorded leave requests.
Pre-Approve Future Absence	Allows the user to approve a future absence before it is recorded.
Ignore Data Entry Restriction	Data entry restrictions on the user can be ignored when this toggle is enabled.
See Hidden Balances	This allows the user access to any hidden balance an employee may have.
Balance Admin User	This allows the user to main balances as an Admin.
Hide Reason Code	This toggle takes the reason code away from the user's view.
Hide Narrative	This toggle hides access to a narrative on an employee's absence record.
Limit Details Start Date	This limits the absence add/update/delete to the current System calendar or Flexitime calendar.
Allow Historical Calculation	This allows access to Historical calculations

The **Calculations Privileges** section contains the following fields:

Field	Details
Allow Future Calculation	This allows the user to calculate future hours.
Main Rate of Pay	If this is enabled, the user can update the rate of pay per hour for a user.
Pay Code Access Groups	This allows the user access to specific pay code groups such as Sickness or Overtime.

The **Pay Code Access Groups** section contains the following fields:

Field	Details
Pay Code Access Group	This allows the user to select a Pay Code Access Group, also known as Personalised Pay Code Groups, which can be used to tailor the list of pay codes returned to employee & manager when inputting and viewing data. For example, Timesheets & Absence Entry.
Admin Pay Code Access Group	When an administrator connects to the WFM Dashboard the list of pay codes available is based on the Admin Pay Code Access Groups assigned to their username in System Users > Access Privileges section. • Where blank (no value entered), all pay codes are returned. • Where populated, the pay codes returned as based on the Pay Code Grouping assigned. • Where an Admin Pay Code Group is assigned, it's applicable the following screens called from the WFM Admin Dashboard (i.e. running in Admin mode) ○ Absence Input ○ Timesheet Input ○ Approve Hours ○ Sign-Off hours • If the same user has access to the Managers Dashboard, standard Managers Pay Codes access rules apply.

Note: Username assignment of Admin Timesheet Templates

- Only enter a pay codes access group if the admin access is to be restricted to selective pay codes in the screens listed above, otherwise leave blank.

3.4. Team Area Access

The *Team Area Access Screen* shows the team areas which the user has been given access to.

Parameter Description	Parameter Code	Product Name	Current Value	
Parameter to indicate if this is a Roster client. Set to Y if Roster is installed.	cp_roster_installed	CoreTime	Y	EDIT

3.4.1. Copy Team Area Access

To copy a Team access to another user:

1. Click **Copy Team Area Access**
2. **Select** the employee you wish to copy it to.
3. Click **OK**
4. A message will appear asking you to confirm whether to **Replace** or **Append** the Users Team Access, select the required option.
5. Click **OK**

3.4.2. Adding to Team Area

To add to a Team Area:

1. Click **Add**.
2. Select the Team Area.
3. Click **OK**.
4. The **Team Area** displays on the screen.
5. To delete a Team Area, click the **Delete** button.

3.5. Pattern Type Access

The *Pattern Type Access* screen shows the roster patterns which the user has access to. You can add or delete access to the patterns.

The screenshot shows the 'Pattern Type Access' screen for user Sarah Taylor. The interface includes a sidebar with navigation links: Summary, Access Details, Access Privileges, Team Area Access, and Pattern Type Access (which is highlighted). The main content area has a search bar and a toggle for 'No Pattern Type Restriction'. Below this is a table with columns for Pattern Type and Name. The table lists two patterns: 'RO' (Rostering Pattern) and 'ROM' (Rostering Pattern Monthly). Each row has a three-dot menu icon for actions. An 'ADD' button is located in the top right corner of the table area. The bottom of the screen shows a footer with the text 'Access Limited Distribution'.

Pattern Type	Name	
RO	Rostering Pattern	⋮
ROM	Rostering Pattern Monthly	⋮

The **No Restriction** toggle can be enabled lifting any restrictions for the user's access to the pattern types.

3.5.1. Adding a Pattern

To add a pattern:

1. Click **Add**
2. Select the Pattern from the drop down.
3. Click **OK**
4. The Pattern Type displays on the screen.
5. To delete a Pattern Type, click the **Delete** button.

3.6. Advanced Settings

The Advanced Settings screen is where special and advance parameters can be found.

The **Run Reports All Companies** toggle can be enabled to allow the user access to run reports for all Companies.

The **Allow Sick Scheme Update** toggle can be enabled to allow the user access to update sick scheme.

3.6.1. Adding a Work Pattern

To add a work pattern:

1. Click **Add**
2. Select the Work Pattern from the drop down
3. Click **OK**
4. The **Work Pattern** displays on screen
5. To delete a Pattern Type, click the **Delete** button

The Advance Settings tab can be hidden from the WFM System Users Configuration screen if not required. To do this disable the following menu options.

Menu Option	Menu ID	System
System User Configuration	CONFIG_SET_MENU.SYSTEM_USERS_ADVANCED_	CorePortal
Advanced Settings	CONFIG	

4. Menu Options

4.1. Importing Menu Options in Portal

All menu options are included in the menu profile **WFM_SYSTEM_USER_CONFIG**

You can now import the default Menu profiles in Portal to avoid turning on all of the menu profiles individually. To import menu options, complete the following steps:

1. Go to *Security*.
2. Search for the relevant menu profile e.g. Coreportal_Admin.
3. Select **Import Menu Options** from the drop-down menu.
4. Select **From existing menu profile**.
5. Click **OK**
6. Search for **WFM_SYSTEM_USERS_CONFIG**
7. Click **OK** and you receive a confirmation message.
8. Once imported, the menu options and webservices are assigned to the existing menu profile.

4.2. Grant a User Menu Access

To grant a specific user access to a menu profile, complete the following steps:

1. Go to *Security* then select **User Management**.
2. Search for the relevant user.
3. Expand their 3-dot menu and select **Manage Account**.
4. Click **Menu Profile** and search for the relevant profile.
5. **Enable** the Active toggle.
6. Changes save automatically.

4.3. Menu Options

The following menu options can be used to customise access to the System Users screen as required.
