1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to explain Timesheet Claims and provide a step-by-step guide through Timesheet Claims configuration set-up & maintenance.

This guide will cover:

- Setup & Configuration for Timesheet Claims
- Entering & Submitting Timesheet Claims into Workflow for Approval (Employee)
- Actioning the Claims e.g. Approve, Reject
- Viewing, maintaining and releasing timesheet to payroll for payment (Administrator)
- Release to Payroll (Generate Timesheet)

The screenshot shows the 'Manager Dashboard' with a 'Timesheet Summary' section. It features a search bar, a 'View All' link, and a date range filter set to '01-Apr-2023 - 30-Apr-2023'. Below is a table with columns: Employee, Appointment, Paycode, Type, Claim Total, Period, Appointment ID, Department, and Status. The table lists six claims for Kenneth Madden, with statuses ranging from 'Approved' to 'Awaiting Approval'.

Employee	Appointment	Paycode	Type	Claim Total	Period	Appointment ID	Department	Status
Kenneth Madden 7266000047	Developer 7266 726613-32	Hours Claim (7266-8001)	Hours Test	17.30	Start 01-Apr-2023 End 30-Apr-2023	726613-32	Development 7266	Approved

0 rows selected. 1 - 6 of 6

1.2. What are Timesheet Claims?

Workflow enabled timesheet entry and approval process, supporting employees to enter and submit timesheets into workflow for managers notification and approval. On final approval, the timesheets are released to payroll for payment.

Timesheet claims:

- Honour based system for employees to enter and submit timesheet claims into workflow for approval.

- Workflows direct the notifications & levels of approval required.
- Managers/Admins can action the Timesheet Claims e.g. Approve, Reject, Return to the Employee.
- On Approval, claims are released to payroll for payments via Generate Timesheets.
- Claims can have multiple levels of approval e.g. Line Manager and Budget Holder.
- Claims can be in Hours; Units or Values e.g. Pay Code.

1.3. How are Timesheet Claims Formed

Claims are formed where employees enter timesheets and returns to the timesheet summary screen which sums the hours by the timesheet claims grouping. Once the employee submits the timesheet into workflow for approval the claim is formed.

The claim is a sum of the hours for the grouping identified as part of the timesheet template configuration.

By default, a timesheet claim group is comprised of a unique combination of:

Claim ID	Employee No	Appointment*	Claim Period	Pay Code	Sum of the Pay Code Values
2023041702590582	0007121	10012201-14	01-Mar-23 to 31-Mar-23	8001 Extra Hours	40.00

Two optional **COLUMNS** from the below can be included, which then form part of the claim:

- Cost Centre
- Expense
- External Rate of Pay
- Job
- Location
- Position/Point
- Project
- User Codes 1 to 5

Only on submission, the Timesheet Claim Group is formed the claim and it's the claim header that is actioned by Managers, so on **Approval** the claims and its associated transactions are approved.

For example: For March (01-Mar to 31-Mar) an employee enters timesheets via the Timesheet Input screen.

- The Employee records 3 separate entries of 8 hours at **extra hours**
- In the Timesheet Claims Summary Screen, the entries are summed by the Timesheet Grouping (e.g. Employee, Period, Pay Code), totalling 24.00 hours.
- The Employee submits 24.00 hours at **Extra hours** pay code for approval.
- This forms the claim, and the claim is submitted into workflow for approval.

Claim Submitted header is comprised of:

Claim ID	Employee No	Appointment	Claim Period	Pay Code	Value	Status
2023041702590582	0007121		01-Mar-23 to 31-Mar-23	8001 Extra Hours	24.00	Submitted

The Claim's submitted transactions is comprised of the following transactions:

Claim ID	Employee No	Appointment	Claim Period	Pay Code	Values	Status
2023041702590582	0007121		01-Mar	8001	8.00	
			02-Mar	8001	8.00	
			03-Mar	8001	8.00	

1.4. Timesheet Claims – Need to Know

The following describes the high-level working of Timesheets claims & the approval process.

- Employees enter timesheets and returns to the timesheet claims summary screen the system automatically sums the hours by the grouping identified and the claim has a **saved for later** status.
- Where a claim is not submitted for approval e.g. Saved for later or Not Submitted, the employee can continue to enter/maintain timesheet details whereby the summary screen continues to sum the timesheet entries by the defined grouping.

- Once an employee **submits** a timesheet claim, the claim is formed and then enters the workflow approval process.
- Claims that are in the workflow approval process cannot be edited, this includes comment at the individual transaction level.
- Workflow is used to notify the relevant roles in the process where an action was taken e.g. Submitted, Approved, Rejected, Recalled, Returned to the Employee.

Employees have the option to recall timesheet claims that have not been actioned e.g. approved.

- Timesheet claims can only be actioned from the **Timesheet Claims Summary** screens.
- Employee timesheets that have a status of **Saved for Later** or **Not Submitted**, indicates the claims have not been submitted into workflow for approval.
- Managers can send back claims to employee for re-work.
- Managers can enter and submit claims on behalf of employees.
- Claims are made up of a Header and Transaction Records e.g. 30-hour claim, could be made up of 10 hours for 3 days
- Claim Pay Codes support entry in Hours, Values and Units
- Only claims that are approved are sent to payroll for payment.
- Claims that are rejected are closed and not paid.
- Claims that are returned to the employee can be updated and re-submitted by the employee
- Claims still in workflow (e.g. Submitted, Recommend Approval) are automatically carried to the next period.

1.5. The Timesheet Claims Summary Screen

The Timesheet Claims summary displays summary and detailed views of the claims. The Summary is the total value of the claim, and the details are the individual entries that make up the claim.

The *Timesheet Claims summary* screen can be filtered using the following options:

Option	Details
Search	You can search by employee, using their <i>Known As</i> name, should you wish to manage claims for a specific employee.
Drop-Down	The drop-down filter is default to Action Required. This can be used to refine the list by specific claim type. For example, Approved, Recalled or Submitted
Filter	The filter can be used to further refine your search filtering by claim status, calendar, claim code and dates.  Note: Where filtering on Not Submitted there's a requirement to filter by calendar/period.

The *Timesheet Claims Summary* screen contains the following fields:

Column	Details
Row Type	Summary displays the total value of claim. Select > to access the Detail view. The Detail view displays the individual transaction that make up the claim.
Person	The person that made the claim.
Appointment	The appointment id if multi-appointments are enabled.

Column	Details
Pay Code	The Claim Type can be hours, values or units.
Total Claims Value	On the summary row this is the total claim value and on the detailed row it's the individual values that make up the claim.
Submitted Period	The period the claim was submitted.
Processed Period	The period the claim was actioned e.g. approved.
Calendar Code	The Calendar associated with the claim e.g. Weekly, Monthly
Submitted/Transaction Date	On the summary row it's the claim submitted date and in the detailed row it's the individual date of each entry that makes up the claim.
Claim Status	The current status of the claim.

The columns on this screen can be tailored to your organisational requirement, use the dropdown options from any column header ensuring columns required to display are ticked.

Additional actions can be found using the 3-dot menu per timesheet claim, these include:

- Approve
- Return to Employee
- View History
- Reject
- Timesheet

By selecting **Timesheet** the actual timesheet input entries for the claim display.

ADD
 CALCULATE ATTENDANCE
 SAVE

The colour key along the top of the Timesheet Input screen shows the status of timesheet claims and provides additional information about entries.

Colour Key	Meaning
Rejected	If a claim has been returned to the employee or outright rejected, it displays with this colour.
Recode Required	This colour is not applicable to Timesheet Claims. It is only relevant for standard Workforce Management when an employee has not clocked in for a scheduled day, and the unapproved absence pay code has been generated automatically. In that scenario, a manager would need to replace (recode) the pay code with an appropriate one such as sick, training, or annual leave.
Approval Required	This is when hours require approval. If timesheet claims are in use, this colour will display when the hours have been submitted, and when the claim has passed the first level of approval (in a two-level approval setup).
Reason Code Required	This colour is not applicable to Timesheet Claims, as the system does not allow users to save a newly input record without a reason code when a pay code requires one. This scenario is only relevant in standard Workforce Management where hours may calculate automatically without a reason code, and a manager can enter a reason at a later time.
Narrative Attached	When a user enters a narrative (or a reason code) when inputting hours, the colour indicates there is a note attached to the hours. However, this colour can be superseded. • If hours have a narrative but have not yet been submitted, they display with this colour. • Once hours are submitted and in the approval process, they display with the 'Approval Required' colour. • Once hours are fully approved, the 'Narrative Attached' colour displays again.

Colour Key	Meaning
	If a claim with a narrative is returned to the employee or outright rejected, the hours display with the 'Rejected' colour.
Acting Up	Acting up is generally used by the public sector. This colour will display when an employee temporarily takes on the duties and responsibilities of a higher-level position, such as: - The position is vacant (due to leave, resignation, or an unfilled role). - There's a temporary absence of the person normally in that role. - The organisation needs someone to fill the gap on an interim basis.

Additional actions can be found using the 3-dot menu:

Option	Action
Approve Hours	Do not use this option for timesheet claims. If you select this option for a timesheet claim and click Save, the message 'No changes have been applied' appears. This option is for Standard WFM where hours have been automatically calculated based on clock times and have generated pay codes that require approval, such as overtime.
Reject Hours	Do not use this option for timesheet claims. If you select this option for a timesheet claim and click Save, the message 'No changes have been applied' appears. This option is for Standard WFM where hours have been automatically calculated based on clock times and have generated pay codes that require rejection, such as overtime.

Option	Action
Add Reason	Use this option if a pay code requires a reason code to be attached. This screen is for input only. To view existing reasons or narratives and comments, use the Add/View Comments option.
Add/View Comments	Use this option to add and view comments for days and hours used for Timesheet Claims as well as for Standard WFM.
Delete	Approvers and system administrators should not use this option for Timesheet Claims. If selected the following error messages will display: • Approver/Administrator - No changes have been applied. • Employee - Error: Pay Code [Pay Code Name] On [Date] is part of a claim and cannot be altered. Employees can delete hours that have a status of 'Not Submitted' (hours not yet included in any claim). Employees can also delete hours from claims with a 'Returned to Employee' status. When deleting these hours, a warning message will appear: <i>"Warning: Pay Code [Pay code name] is connected to a timesheet claim. If you delete all hours/entries for the claim, the claim will be deleted. Do you wish to continue?"</i> If the employee confirms, both the claim and its associated hours will be deleted.

1.6. Configuration Checklist

We've created a configuration checklist to support Timesheets Claims implementation. This guide uses work groups as the 'Report to' structure and assumes that work groups have already been assigned to employees. Admins have access to the follow options in WFM Configuration:

Timesheet Configuration & Timesheet Claims Status

Step	Action Required
1	Create & assign Org Roles for Managers & Administrators, via Personnel.
2	Timesheet Configuration: Create and Assign Timesheet Templates: • Create Templates for Employees, Managers and Administrators • Assign Templates to Employees • Assign the relevant Org Roles to Manager and Administrators Templates
3	Dashboard Configuration: • Assign Employee, Manager and Administrator widgets to respective dashboards.
4	Security: Menu Profiles • Assign the Timesheet Claims summary screens to the respective Employee, Manager and Administrator menu profiles.
5	Pay Code configuration: • Identify the Timesheet Claims Pay Codes • Optional, Input validation to stop future dated entry • Review/Assign Workflow processes
6	Review Optional Configuration: • See section 2.6 Optional Configuration
7	Generate Timesheets: • Review Work Groups configuration for payroll integration.

2. Set up & Configuration for Timesheet Claims

In this section we will work through the Configuration Checklist.

2.1. Step 1 – Create & Assign Org Roles

The creation and assignment of organisation roles (Org Roles) can only be completed by System Administrators, or HR Admins on your site. This section will provide administrators with guidance on how to:

- Create organisational role types.
- Assign organisational roles.

2.1.1. What are Org Roles used for?

Organisational roles are used to identify manager & admin access to view/action employee timesheet claims and receive workflow alerts and notifications.

Two Org Roles are required.

- Managers Org role, which is assigned to the required Org Groups such as work group so that managers can see staff that report to them.
- Admins Org role, which is assigned to the required Org Group such as company or management unit so that admins can see all employees.

2.1.2. Access to Organisational Role Type Configuration

To access the Organisation Role Type configuration, on the People Management dashboard:

1. Select the **Data Centre** tab on the *People Management dashboard*.
2. Click **Reference Data**.
3. Search for **Organisational Role Types** and click on the corresponding option.
4. The *Maintain Organisational Role Types* screen will appear.

Organisational Role Types
People Management > Reference Data > Organisational Role Types

Role ID	Role Name	Description	Active	Visible	Other Indicators
ESSN...	ESS Approval Next Of Kin		☐	☒	☐ ☐ V
ESSPRO	Ess Approval Personnel Pr...		☐	☒	☐ ☐ V
EXPTR	Expense Proxy Trip Record...		☐	☒	☐ ☐ V
L2	Level 2 Approver	H	☐	☒	☐ ☒ N
L3	Level 3 Approver	H	☐	☒	☐ ☒ N
PAYROL	Payroll Salary Approver	P	☒	☒	☐ ☐ N
MGRE...	Reports To Manager	H	☐	☒	☐ ☒ N
ESSPAY	ESS Approval Pay Details		☐	☒	☐ ☐ V
ULADM	Administrator Hourly Time...		☐	☒	☐ ☐ V
MGRA...	Manager Attendance Input		☐	☒	☐ ☐ V
MGRA...	Manager Attendance Submit		☐	☒	☐ ☐ V

Cancel Add Save

2.1.3. Create an Org Role

To create a new Org Role:

1. From the *Maintain Organisational Role Types* screen.
2. Click **Add** to make a new blank row available.
3. Enter the following details (at a minimum).
 - **Role Type:** Max of 6 alphanumeric characters.
 - **Description:** Max of 40 alphanumeric characters.
 - **Active:** Should be enabled to ensure Org Role is available to link to employees.
4. Update other indicators as required.

2.1.4. Assigning Org Roles

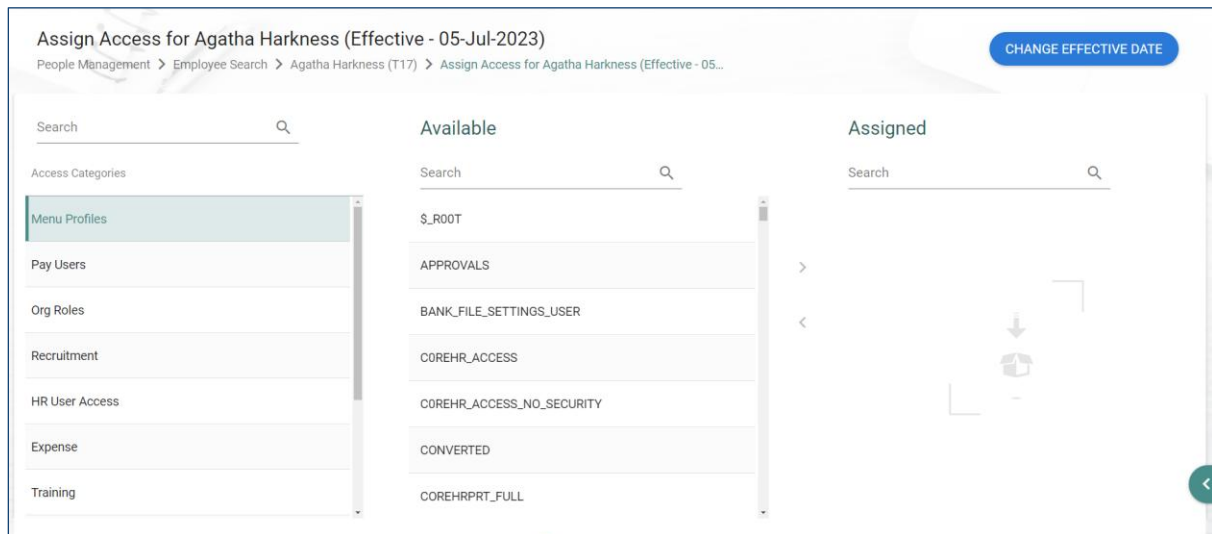

Organisational roles need to be linked to the employee record of the user that will be fulfilling the role on PeopleXD.

How to access the Assign Access Screen

The Assign Access screen allows you to assign org roles, once created. To access the Assign Access Screen:

1. From the *People Management* dashboard.
2. Navigate to the *Command Centre* widget.
3. Click the **View** button for *Employees*.
4. Search for the employee that you want to assign access for.

5. Select **View** to open the employee's record.
6. Click **Actions**, then click **Assign Access**.
7. The *Assign Access* screen opens.

Assign Org Roles to a User

From the *Assign Access screen* of the employee, you want to assign an org role to:

1. Navigate to the **Org Roles** tab.
2. Click **Add**
3. Select the required fields from the drop-down menus within the **Add Org Role** window:
 - **Structure** - This will be defaulted if there is only 1 structure set up on PeopleXD.
 - **Role** - Select the org role from the *Role* drop down list.
 - **Org Group** - Select the *Organisational Group* that the role will be defined against. E.g. *Department* for the Head of Department; *Pay Group* for *Payroll Salary Approver*; *Work Group* for *Reports to Manager* etc.
 - **Org Item** - This list is directly related to the *Org Group* already selected e.g. a list of departments If the 'Org Group' is set to "Department".
 - **Date From** - This is the date the employee will be recognised on PeopleXD as having that role.
4. Click **OK**.

That employee is now identified as having the Org Role for the selected element of the organisation.

For further guidance see our guide [Organisational Role Configuration](#) or [Assign Access](#).

2.2. Step 2 – Create and Assign Timesheet Templates

Administrator required access to the Timesheet Configuration screen to create the various templates. This section will provide you with guidance on how to:

- Create Templates for Employees, Managers and Administrators
- Assign Templates to Employees
- Assign Org Roles to Manager and Administrators Templates

2.2.1. Overview

Timesheet templates enable you to tailor elements of the timesheet Input screen & claims process to suit the business needs. Employee, Manager and Administrators need separate templates. Multiple templates can be created for different categories of staff. For example, there may be a need to enter Cost Centre for one category of staff and not for another.

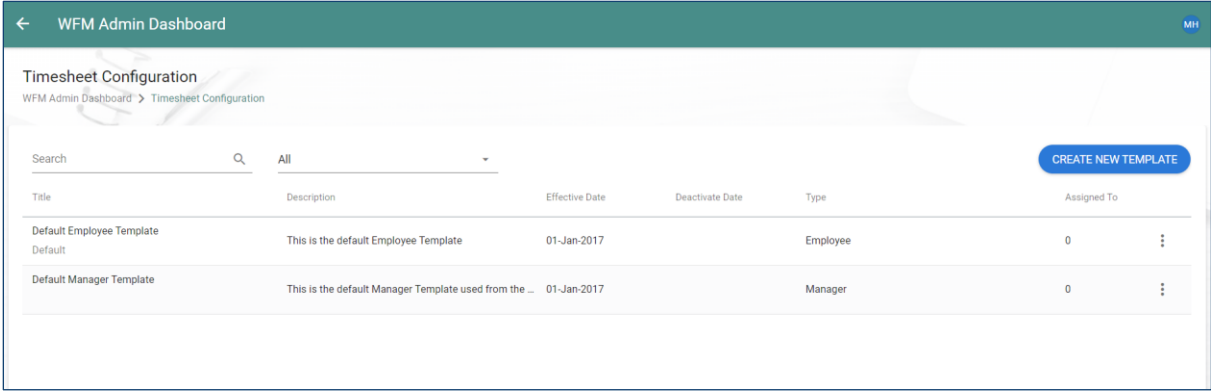

At a minimum the following Timesheet Templates are required:

- **Employees:** To support entry & submission of claims into the workflow for approval.
- **Managers:** To Review and Action Claims e.g. Approve, Reject
- **Administrators:** To Review and Action Claims e.g. Approve, Reject

2.2.2. How to access the Timesheet Configuration Screen

To access the *Timesheet Configuration* screen, complete the following steps:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Timesheet Configuration**

Title	Description	Effective Date	Deactivate Date	Type	Assigned To
Default Employee Template	This is the default Employee Template	01-Jan-2017		Employee	0
Default Manager Template	This is the default Manager Template used from the ...	01-Jan-2017		Manager	0

From here you can view, add and update Timesheet Templates. See our guide [Timesheet Template Configuration](#), for further guidance.

Note: An employee can only be assigned to one timesheet template at a time regardless of the number of appointments assigned to an employee.

2.2.3. Timesheet Template Configuration

From the Timesheet Configuration screen locate the relevant template and from its 3-dot menu select Edit, to open the template wizard.

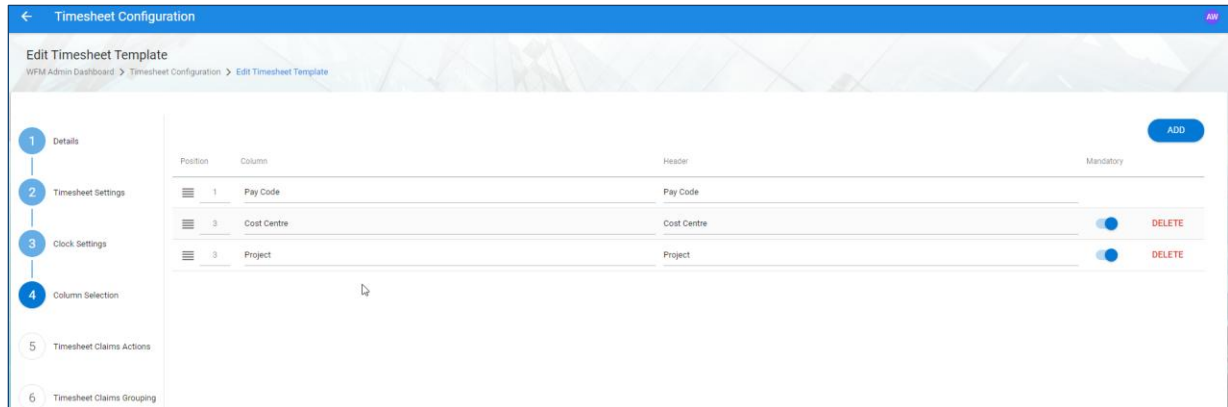

For the purpose of this guide to support Employee, Manager and Admin Timesheet Claims configuration the following areas of the Template Wizard will be covered:

- Column Selection
- Timesheet Claims Actions for Employee & Manager Settings
- Timesheet Claims Group

Column Selection

The Column selection controls what additional columns are available when entering timesheets via the Timesheet Input screen e.g. cost centre, project code.

By default, Pay Code is always displayed and cannot be unselected. However, you can amend the position, order, of the pay code column. The pay code type column always displays next to the Pay Code which indicates if the pay codes inputs is expected in Minutes (M), Decimal (D), Units (U) or Value (V).

The **Column Selection** screen contains the following fields:

Field	Details								
Position	Changes the order of the columns presented to the end users within the Timesheet Input Screen.								
Column	Select the column required from the available dropdown list: <table border="1"> <tbody> <tr> <td>Cost Centre*</td><td>Project*</td></tr> <tr> <td>Position/Point*</td><td>Location</td></tr> <tr> <td>Expense</td><td>User Fields 1 to 5</td></tr> <tr> <td>Job</td><td>External Rate of Pay*</td></tr> </tbody> </table> Where the field is marked with an *, Timesheets support additional configuration to include these columns when transferring timesheet to payroll for payments. For example, WFM can be configured to also transfer the cost centre recorded when Generating Timesheets.	Cost Centre*	Project*	Position/Point*	Location	Expense	User Fields 1 to 5	Job	External Rate of Pay*
Cost Centre*	Project*								
Position/Point*	Location								
Expense	User Fields 1 to 5								
Job	External Rate of Pay*								
Header Column	This is a free text field which can be used to add an alternative column description. For example, Project could be called Task. A maximum limit of 40 characters applies								
Mandatory	Toggle enabled makes the column mandatory when recording timesheets								
Delete	To delete/remove a column from the template.								

To Add a Column Section:

1. Click **Add**.
2. **Select** the position of the column.
3. Using the drop-down menu, **select** the column value.

4. The Header will automatically populate with the same information as the Column field, this can be edited on screen if required.
5. **Enable** the toggle to make the select Mandatory.
6. To delete a Column selection, click **delete**.

 **Note:** Pay Code are always mandatory and cannot be removed from a template.

Timesheets Claim Actions – Employee Mode

When configuring an Employee's timesheet Template, selective options can be made available to Employees when using Timesheet Input or Employee Timesheets Claims Summary screens.

Within the **Timesheet Claims Actions** screen the following fields can be made available to Employees:

Field	Details
Submit Timesheet for Approval	Submit button available to employees on the Employee Timesheet Claim Summary Screen. Once submitted, a claim is created and sent into workflow for manager approval.
Recall Timesheets	Provide Employees with the option recall a Timesheet claim that has been submitted. 'Recalling' enables employees call back or 'un-submit' a claim previously submitted in error where they can update and re-submit.  Note: Only claims with a status of Submitted can be recalled, but if the claim has been approved it cannot be recalled. In addition, Workflow supports configuration to alert managers where a timesheet claim was recalled.
Employee Leave Request Entry	Enables employees call the Leave Request screen from actions button in the Timesheet Input screen.
Transactional Based Workflow	Timesheets Claims supports two claims method:

Field	Details
	Direct Approval – Who/Work For e.g. An employee's claims are approved by the Employees 'Report to' Manager (similar to Leave Approval). Indirect Approval - Where Worked, employee timesheet claims workflow is directed to the organisational level of 'Where Worked' for approval (which sits outside of their direct reporting line).
Acknowledge Submission of Timesheet	User are prompted to acknowledge before a timesheet can be submitted for approval.
Acknowledge Text to Display	Text Displayed to enter user as part of the acknowledge submission.
Acknowledge Checkbox	Checkbox for Employee's to acknowledge they've read the message.
Default Template	Where 'set' employees are automatically be assigned the default template, if not explicitly assigned to another template.

Timesheet Claim Actions – Admin/Manager Mode

When configuring a Manager/Admin's Timesheet Template, there are selective options available specifically aim at Managers using the Timesheet input or Timesheet Claims Summary screens when approving timesheets.

Edit Timesheet Template
WFM Admin Dashboard > Timesheet Configuration > [Edit Timesheet Template](#)

Override default template role
Employee Entry Org Group
Override default template group

[Manager Contact Details](#)

[PREVIOUS](#) [NEXT](#)

Within the **Timesheet Claims Actions** screen the following fields can be made available to Managers:

Field	Details
Manager Absence Entry	Option to enable a call to the Absence Entry screen from the timesheet Input navigation option.
Approve Timesheets	Approval button available within the Timesheet Claims Summary Screen. Once approved, workflow moves the claim to the next level or final approval the claim. Actions taken by the managers are supported through workflow.
Comment Required of Approval	Where on Managers are forced to enter a comment as part of the approval process.
Return to Employees	Return to Employees button available within the Timesheet Claims Summary Screen. This sends the claim back to the employee for re-work. Actions taken by the managers are supported through workflow.
Comment Required on Return to Employees	Where on Managers are required to enter a comment as part of the rejection process. Where off managers are prompted to acknowledge the claims being returned to the employee.
Reject Timesheets (Recommended)	Reject button available to managers on the Timesheet Summary Screen. Once rejected the claim process is ended. Workflow supports notifying the various roles of the rejection. Note: - Once Rejected this ends the workflow and the timesheet claim cannot be rejected. - Managers can only reject within the workflow e.g. If a manager completes final approval the workflow ends, thus managers can no longer reject the claim whereas Administrators can complete this process (see Administrator Mode)
Comment Required on Rejection (Recommended)	Where on Managers are forced to enter a comment as part of the rejection process. Where off managers are prompted to acknowledge the claims being rejected.

Field	Details
Submit Timesheets for Approval	Managers can enter timesheet details and submit the claims for approval on behalf of employees. Once submitted the Manager is notified of the claims submission where they must approve as required.
Return Not Submitted Claims	Not submitted claims are where employees have timesheets recorded but have not submitted them for approval. The option return Not-Submitted Claims is available in the Timesheet Claims Details screen filter. This should be turned off where large teams are in operation as it will help with performance issues.
Employee Entry Org Role/Group	By default, the employee list is generated based on the organisational roles/groups assigned to the timesheet template. The Employee Entry Org Role allows customisation of the employee list to different organisational roles/groups. For instance, a manager can approve timesheets for individuals in their cost centre but can enter timesheets for anyone in the organisation. For further details see section 2.6.2 Inputting Timesheets on behalf of Employees.

All actions e.g. approve, reject etc... taken by managers are logged to the timesheet history table storing the username, date, time and action taken.

Timesheets Claim Actions - Manager Contact Details

For Admin templates only, up to 3 lines of Managers Contact details such as email, mobile can be made available for admins to view the managers contact details from the Admin Claims summary screen.

Manager Contact Details

Contact Information 1
Email Address

Contact Information 2
Mobile Number

Contact Information 3
Other Email Address 2

To enable, from the Admin timesheet template:

- Select which contact details are to be displayed.

Timesheet Claims Grouping – Additional Claim Columns

Two Addition fields can be made available Employee, Manager and Administrator Claims summary screen. These can be configured to present Employees, Manager and Administrators with more information about the claim such as the Employees work group, reason code entered at the details level, the available columns are:

2.2.4. Summary Screen

The Employee, Manager and Admins claims summary screen displays a summary and detailed view of the claims. The Summary is the total value of the claim, and the detail is the individual entries (or transactions) that make up the claim.

Two Addition columns can be displayed as part the detailed (or transaction) view so that Employees, Managers and Administrators can view more information about the claim, examples may include the work group, department, reason code. Available columns are:

Summary: Display Additional Columns at transaction level view

Field	Details
Cost Centre	Cost Centre entered on the employee's timesheet
Department	Employees home department
Expense	Expenses entered on the employee's timesheet
Ext Rate of Pay	External Rate of pay entered on the employee's timesheets
Job	Job Code entered on the employee's timesheets
Location	Location entered on the employee's timesheets
Point	Point entered on the employee's timesheets
Position	Position entered on the employee's timesheets
Reason	Reason Code entered on the employee's timesheets
User Fields 1 – 5	User Columns 1 to 5 entered on the employees' timesheets
Work Group	Work Group entered on the employee's timesheets

Timesheet Claims Grouping - Additional Claim Groupings

The final step of creating a template involves selecting how this timesheet template is to 'group' its claims. By Default, all claims include the Pay Code, but if required two additional columns (or groupings) can be included which form part of the claim.

By default, employee claims are comprised of a unique combination of the following.

- Header Id, Employee Number, Appointment Id*, Pay Code, Period

Where Additional columns are included, these also form part of the claim to make the claim a unique combination. Using **cost centre** as an example, the Cost Centre forms part of the claim Summary (or header)

- Header Id, Employee Number, Appointment Id*, **Cost Centre**, Pay Code, Period

So, where an employee submits a timesheet claim, it's the unique combination of Header Id, Person, Appointment, **Cost Centre**, Pay Code & Period that 'groups' each individual claim.

 **Note:** If **Timesheet Claims Grouping** are required, the additional columns selected must also be included in Step 4: Column Selections to make the column(s) available for employee inputting and viewing.

Please Note: Columns included in the **Claims Grouping** section are not available in the **Claims Columns** section (or vice versa), because a column entered in the Grouping section make the claim unique, thus all the details will have the same data e.g. Cost Centre

2.2.5. Assigning Managers and Administrators to Templates

For Timesheets Claim Templates there's a requirement to assign Managers and Administrators to their respective templates. To do this:

1. From the *Timesheet Configuration Summary* screen
2. Search for the relevant Manager/Admin Template
3. From its 3-dot menu, click **Assign**.
4. In the *Select Roles and Groups* section, click **Add**.

5. Select the **Role** from the drop-down list e.g. Reports To Manager
6. Select a **Group** to which that role applies e.g. Work Group
7. Once selected the relevant managers or administrators will be displayed under the **List of Managers or Administrators Assigned** (Note, assumption that Step 1 has been completed)
8. Click **Save** to assign the managers to the template.
9. Within the Timesheet Configuration Summary screen a count of the Managers will be displayed against the template

The screenshot displays the 'Assign Template' interface. At the top, it shows the breadcrumb 'WFM Admin Dashboard > Timesheet Configuration > Assign Template'. The main area is titled 'Select Roles and Groups' and shows a table with two columns: 'Role' and 'Group'. A single row is listed: 'Claims Mgr - Reports To (CLMT)' for the 'Work Group (WRKGRP)'. To the right of this row is a 'DELETE' button. Below the table is a section titled 'List of Managers Assigned' with a search bar. A table below this lists two managers: 'Ann Weston' (ID: 7286000006) and 'Ben Clarke' (ID: 7286000055), both with a status of 'Assigned'. At the bottom right, there is a 'SAVE' button and a '1-2 of 2' pagination indicator. A watermark 'Access Provided' is visible at the bottom center.

As any number of User defined calendars and managers /administrator combination can be created, a **scheduled job** runs every night to rebuild the manger/administrator access so that they can only see calendars that are applicable to employees within their remit. If the job has not ran the error 'You do not have access to the calendar given' is displayed in the timesheet claims widgets.

2.2.6. Timesheet Claim Statuses

Control the Timesheet Claims Statues option available for selection to users. Where a claim status is set to inactive, the status is removed from user lists which improves the user experience by hiding statuses that not in use.

To access the *Timesheet Configuration* screen, complete the following steps:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Timesheet Claims Statuses**

Timesheet Claims Statuses		
WFM Admin Dashboard > Timesheet Claims Statuses		
Status	Description	Active
AP	Approved	☒
RJ	Cancelled	☒
DE	Deleted	☐
UN	Not Submitted	☒

Menu Profile	Menu ID	System
Timesheet Claims Statuses	CONFIG_SET_MENU.TIMESHEET_CLAIMS_STATUS	Core Portal
Get claims filter status	WS_TIMESHEETS_MENU.GET_CLAIMS_FILTER_STATUS	Web Services
Update claims filter status	WS_TIMESHEETS_MENU.PATCH_CLAIMS_FILTER_STATUS	Web Services

2.3. Step 3 – Dashboard Configuration to include Claims Summary

Widgets

Through Dashboard configuration, display the Timesheet Summary Widget on the respective Employee, Manager and Admin dashboards, the Widget is a summary view of the claims and from the widget users will be able to Input, View and manage (action) claims.

2.3.1. Enable Timesheet Claims Widgets on Dashboards

To enable the Employee, Manager and Administrator widget on their respective dashboards.

Follow the steps below:

- Select **Dashboard Configuration** from the quick jump menu.
- Select the **Dashboard Type** e.g. Employee, Manager or Administrator.
- Under *Dashboard Tabs* section, **select** the require Tab you want to add the widget to e.g. Time.
- Now under the *Tab Widgets* section, **search** for relevant widget:

Widget Type	Dashboard	Widget Title
Employees	Employee Dashboard	Timesheet Claims Employee
Managers	Manager Dashboard	Timesheet Claims Manager
Admins	Administrator Dashboard	Timesheet Claims Admin

- Assign the widget its position within the Dashboard, this is numerical, 1 being first to display on the dashboard.
- And **Activate** the Selected toggle.

The top screenshot shows the 'Dashboard Tabs' configuration. It includes a 'Select Dashboard*' dropdown set to 'Administrator Dashboard', a search bar, and a table with columns 'Position', 'Tab Title', and 'Widget Count'. The table lists two tabs: 'Admin Home Tab' at position 1 with a widget count of 1, and 'General' at position 2 with a widget count of 5. An 'ADD PAGE TAB' button is in the top right.

The bottom screenshot shows the 'Tab Widgets' configuration. It includes a 'Select Dashboard*' dropdown set to 'Administrator Dashboard', a search bar, and a table with columns 'Position', 'Widget Title', and 'Selected'. The table lists one widget: 'Timesheet Claims Admin Summary' at position 1, which is selected (indicated by a blue toggle switch). A 'CONFIGURE' button is in the bottom right.

2.4. Step 4 – Security Menu Access to Timesheet Claims Screens

The Timesheets claims summary screen (called from the respective widgets) allows the Employees, Manager and Admins to view and action timesheets claims. To enable users to view and action timesheet claims the following menu options need to be assigned to the relevant Menu Profiles (e.g. Coreportal_Manager).

To do this for

- Employees see section [6.1 Employee Menu Access](#)
- Managers see section [6.2 Manager Menu Access](#)
- Admins see section [6.3 Admin Menu Access](#)

2.5. Step 5 - Pay Codes Configuration

The following sections cover the Pay Code configuration required to support Timesheet Claims.

2.5.1. How to access the Pay Codes Screen

To access the Pay Codes screen, complete the following steps:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Pay Codes**
4. The Pay Codes summary screen will display.

Pay Code	Name	Abbreviation	Payroll Type	Calculate Indicator	Payroll Indicator	Label	Overtime Codes	Working Time Co.	Absence	Active
1005	Basic Hours	BA	Hours	Minutes	Decimal		☐	☒	☐	☒
2001	Overtime @ 1.00	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
2003	Overtime @ 1.50	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
2005	Overtime @ 2.00	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
3600	Normal Attendance	BA	Hours	Minutes	Non Payroll		☐	☒	☐	☒
3601	Extra Hours Worked	EX	Hours	Minutes	Non Payroll		☒	☒	☐	☒
3602	Unexplained Absence	UA	Hours	Minutes	Non Payroll		☐	☐	☐	☒

From here you can view, add and update Pay Codes. See our guide [Pay Codes](#) for further guidance.

2.5.2. Pay Code Configuration

From the Pay Codes summary screen locate the relevant pay code and from its 3-dot menu select **View/Edit Pay Code**, to open the pay code configuration screens.

For the purpose of this guide to support Employee, Manager and Admin Timesheet Claims configuration of the following tab will be covered:

- Time Sheet Claims

The **Time Sheet Claims** screen displays the following fields:

Field	Details
Claim Process Code	The workflow process assigned to the pay code. The Workflow process drive the notifications to Employee, Managers of action taken e.g. Submitted, Approved, Rejected, Recalled, Returned to The Employee. Etc.
Completed Process Code (Admins only)	Allows Administrators to action Timesheet Claims where the initial workflow was completed e.g. reject a timesheet claim that was previously approved by a manager (and approved was the final step)
Manager Input on behalf of Process Code	Workflow notifications to Employees where claims have been entered on behalf of an employee. Where configured employee will receive alerts where claims are submitted on their behalf
Timesheet Claim Pay Code Toggle	The Timesheet Claim Pay Codes toggle needs to be explicitly set for claims pay codes. These separate pay codes into ones that form part of the claims (e.g. Extra Hours Worked) and those that do not (e.g. Annual Leave). Pay Codes that are summed and displayed in the Timesheets Claims summary screens are limited to pay codes that have the indicator 'Timesheet Summary' enabled. - Set the Timesheet Claim Pay indicator to 'On' for the relevant pay codes. - If there's a requirement to limit the pay code lists returned, this can be completed through use of personalised pay code. See our guide Pay Code Access Groups for further guidance. Note: Timesheet Claims support pay codes in Hours, Values or Units, to set daily limits. - Daily & Entry limits can be applied to the pay code entries. See our guide Pay Codes - Input Validation for further guidance.

The timesheet Input screen can be configured to restrict pay code entry to stop entries being recorded in the future e.g. cannot input timesheets for next week.

The **Timesheet Input Restriction** section displays the following fields:

Field	Details
Restrict Input of this code to today's date	If enable the pay code cannot be entered after today's date.
Plus/Minus Days	The today's date values can be adjusted, as required. For example if +1 was entered, timesheet entry will be today's date + 1 day (e.g. tomorrow).

2.5.3. Workflow Process

This section outlines the standard configuration for 1 Level and 2 Level Approval / Rejection of timesheet claims. The workflows are assigned at pay code level and the workflow documented are available as standard with new build of PXD

Note: Workflow is set in the Global Parameters in the Back Office. If a specific Pay Code requires a different workflow, it can be overridden by setting it on the Pay Code in Back Office.

To review or do this for

- Employees see section [6.1 Employee Menu Access](#)

2.6. Step 6 - Optional Configuration

This section will walk you through various optional configuration, including:

- Allow Entry of Retrospective Claims
- Generate Timesheets & Multi-Appointment Configuration
- Generate Timesheets, update the Claims history on release to payroll
- Generate Timesheets & Carry over Claims
- Generate Timesheets & Claims amended during a run
- Control the Timesheets Claims Statuses Displayed
- Display Managers Contact Information
- Timesheet Summary: Display additional Column.

2.6.1. Allow Entry of Historical Claims

Allows employees to enter and submit timesheet claims for historical periods. As part of the Timesheet solution employees can be granted the ability to enter retrospective claims which supports employees to enter timesheet claims for historical periods, For example:

- The current open period is Mon 9th Jan to Sun 15th January.
- The employee fails to enter or misses a timesheet claim for a previous week.
- The employee can scroll back to the week, enter a timesheet for the history week.
- On return, the historical entry is displayed part of the current open period, but the dates on the claim are reflective of the actual period start/end date.
- The Employee can then submit the claim into workflow for manager approval.

This is done by allowing employees to enter hours up to a certain number of weeks before the Current Open System Period. Note internally this works by updating Input period on the transaction records. The Timesheet Summary displays claims in the current period and any records that have been input historically during that period i.e. where the Input period matches the current period.

To allow historical entry, enabling the following Advanced Option:

Advanced Option	Description
Historical Timesheet Entry	The Timesheet Input screen attaches the current open input to records are entered historically,

- Enable the countback weeks to allow number of an employee can go back.
- Setting the number of 'Employee Rollback weeks' which is the allowed number of weeks the user can go back into the history to enter timesheets. To do this:
 1. Navigate to *WFM Dashboard, WFM Configuration* and select the **Company & Calendar Configuration** tile.
 2. Search for the relevant company and from its 3-dot menu select **View/Edit**.
 3. Under EMP Rollback Weeks for Data Entry, within the Summary tab, **enter the allowed number of weeks**.

The ABC Company
WFM Admin Dashboard > Company and Calendar Config > The ABC Company

EMP Rollback Weeks for Data Entry
99

Enabling the options in **CoreTime > Global Parameters > CoreTime MSS:**

- Historical Payments** – when set to either Allow Payment with or without User Message it will transfer certain pay codes to the current open period for approval. The only difference is where User Message is turned on, the user will be given a message before the hours are saved to inform them that they are historical hours. Where this is set to No Payment, this functionality is turned off.

2.6.2. Inputting Timesheets on behalf of Employees

Managers and Admins, if enabled, can enter and submit timesheet claims on behalf of employees within their remit. The option enables a 'View Employees' button on the Manager/Administrator summary widgets whereby they can easily search for employees and drill directly into the timesheet Input screen to enter Timesheet on behalf of the employees.

Timesheet Claims Manager

Menu items required to enable **Managers** to enter and submit timesheet claims on behalf of employees within their remit:

Menu	Menu ID
Timesheet Claims Manager	
View Employees	MAIN_MENU.TIMESHEET_CLAIMS_VIEW_EMPS_MGR
Get claims people	WS_TIMESHEETS_MENU.GET_CLAIMS_PEOPLE
Get workgroup	WS_ROSTER_MENU.GET_WORKGROUP

Menu items required to enable **Admins** to enter and submit timesheet claims on behalf of employees within their remit.

Menu	Menu ID
Timesheet Claims Admin View	
Employees	MAIN_MENU.TIMESHEET_CLAIMS_VIEW_EMPS_ADM
Get claims people	WS_TIMESHEETS_MENU.GET_CLAIMS_PEOPLE
Get workgroup	WS_ROSTER_MENU.GET_WORKGROUP

Note: By Default, the list of Employees returned is based on the org role & group assigned to managers. or admins timesheet template level e.g. Reports_To_Manager. If required, the default role/group can be overridden in Section 5 of the Template configuration (more detail available in the Timesheet Template Configuration user guide)

2.7. Step 7 – Generate Timesheets

Transferring approved claims to payroll for payment is completed via standard Generate Timesheet functionality. Generate Timesheets and Claims, closing the period and sending the timesheet claims to payroll for processing should be completed in line with pay runs in payroll.

- Only Claims that are at final approval are transferred to payroll for payroll
- Claims that are not at final approval are carried from period to period, until they are approved by the manager (Admins must select "Ignore Unconfirmed hours")
- Employees claims that are 'not submitted' are also carried forwards until they decide to submit them (On submission, the period the submitted is attached to the claim)
- Future Entries are not paid e.g. Claims for June are not paid in May payroll run.

Note: Generate Timesheets: before Retrieve Hours is ran select the **Ignore Unconfirmed Hours** checkbox.

2.7.1. Generate Timesheets & Multi-Appointment Configuration

The work groups of the employee's appointment need to be marked as transfer to payroll for payments.

The screenshot shows the 'General Settings' page in the WFM Admin Dashboard. Under the 'Site Parameters' section, there are several configuration options. The 'Multi Appointment Timesheets' toggle switch is located at the bottom right of the settings grid and is highlighted with a red rectangular box. Other visible settings include 'Transfer Future Leave', 'Restrict Project Codes', 'Admin Security Type', 'Manager Security Type', 'Org Role Access', 'Calculate Hours Access', 'System User Access', 'Work Group Summary View Only', 'Bulk Leave Approval Start Date Offset', 'Live Absence Calculation', and 'System User Access'.

- Generate timesheets process looks the work group of the employee's appointment when transferring timesheets for payment.

Note:

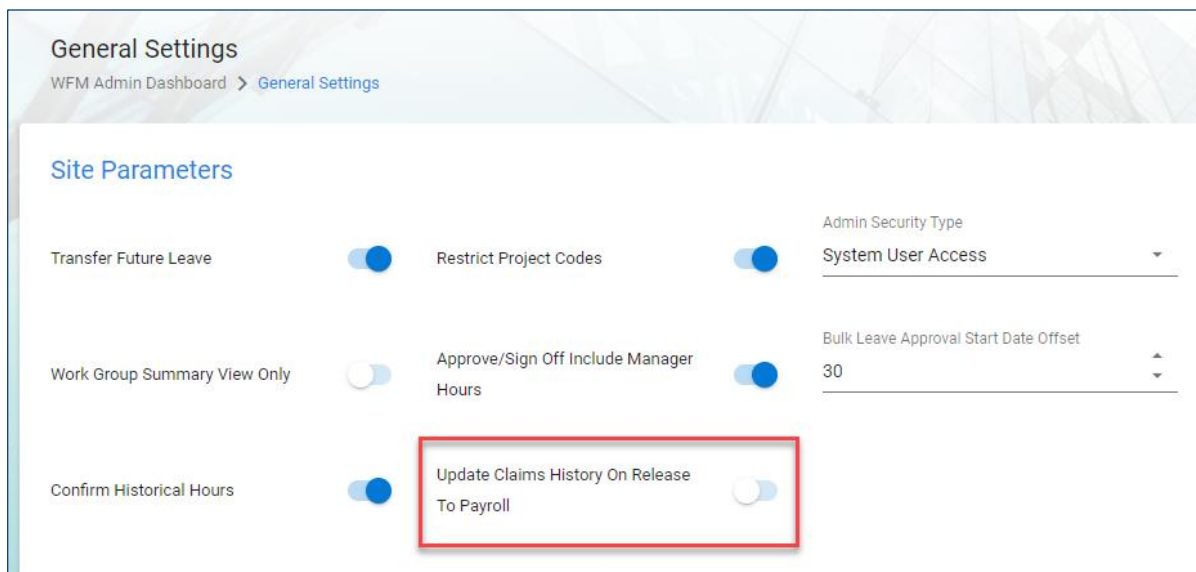

- Previous versions looked to the work group of the employee substantive appointment to determine if timesheets claims should transfer to payroll.
- Going forward, where '**Multi-Appointment Timesheets**' is enabled, transfers look to the work group of the employee's appointment (not the substantive), removing the need to set the substantive as transfer to payroll and use group non-payroll pay groups to stop transferring pay codes for appointments that are not paying claims.

Setting	Description
Multi-Appointment timesheets	The setting is located in WFM Configuration > General Settings and where enabled, it's the 'generate timesheets' setting on work group

Setting	Description
	assigned to the employees' appointment that drives payroll integration

2.7.2. Generate Timesheets, update the Claims history on release to payroll

Option to update the timesheet claim history where timesheet claims have been released to payroll for payments

Setting	Description
Update Claims History on release to payroll	The setting is located in WFM Configuration > General Settings and where enabled, a row is written to the claim's history as part of the Generate Timesheets process. Note: History only updates when a final run is completed

2.7.3. Generate Timesheets & Carry over Claims

Highly Recommend this is enabled, Generate Timesheets can be configured to carry over timesheets claims to the next period where actions remain e.g. Submitted, Recalled, Reworked, Not Submitted. This enables employees, managers and administrators to easily see details in a single view. To enable:

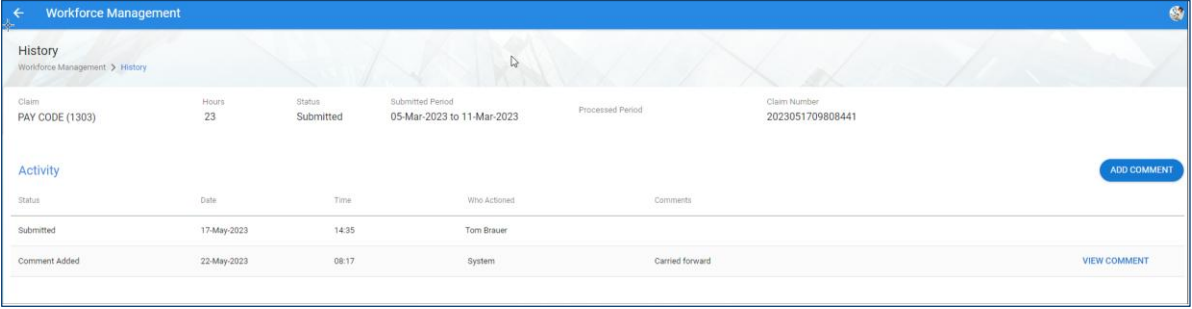

- The option **Generate Timesheets** must be turned **on** for the Work Groups transferring.

Note: In Generate Timesheets, before starting the Retrieve Hours, toggle on the **Ignore Unconfirmed Hours** checkbox.

- This functionality can be turned on with the following settings. **The advanced option below must be turned on in the Control Parameters** to support the carrying over claims

Menu Profile	Menu ID
TIMESHEETS – IGNORE UNCONFIRMED HOURS	Generate Timesheets can now continue to process claims hours that are confirmed (i.e. approved), claims not approved (final approval) are set as 'historical' and in turn picked up in the next period.
TIMESHEETS – HISTORICAL HOURS MUST BE CONFIRMED FOR PAYMENT	Generate Timesheets continues to process hours that are confirmed, leaving behind the unconfirmed (not approved claims).

When a claim is brought into the next period, the claims history is updated to indicate it's been 'Carried Forward'.

History					
Claim	Hours	Status	Submitted Period	Processed Period	Claim Number
PAY CODE (1303)	23	Submitted	05-Mar-2023 to 11-Mar-2023		2023051709808441
Activity					
Status	Date	Time	Who Actioned	Comments	
Submitted	17-May-2023	14:35	Tom Brauer		
Comment Added	22-May-2023	08:17	System	Carried forward	

2.7.4. Generate Timesheets & Claims amended during a run

Generate Timesheets is a two-step process where:

- Step 1: Retrieve Hours: Timesheets claims are extracted, rules applied and processed to get ready for transfer to payroll.
- Step 2: Validate/Transfer: The hours are transferred to payroll for payment.

In selective cases, claims may be updated between Step 1 and Step 2, if this occurs the Warning '**Hours Amended**' section identifies any claims that have been updated.

Administrators can re-run retrieve hours to include the latest updates before completing the payroll run or elect to continue. The table below list the impacts where 'continue' is selected and claims were amended between the completion of Stage 1 and Stage 2.

Action taken between Stage 1 and Stage 2 for timesheet claims.

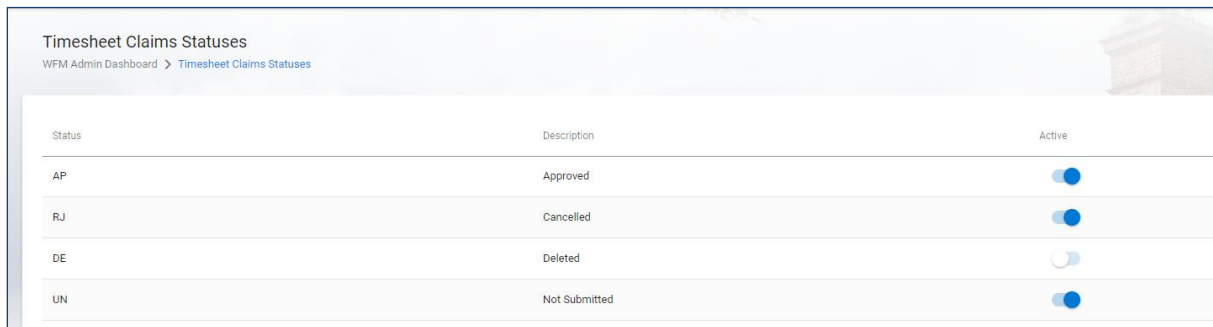

Stage 1: Retrieve Claim Status	Stage 2: Transfer Claim Status	Impact
-	New Claim Submitted	Employee submitted a claim between the steps, the claim is carried to the next period as the claim was not approved
Submitted	Approved* ¹	Claim is not paid, it's carried to the next period for payment, as the approval was completed post the retrieval stage.
Submitted	Recalled	Employee recalls a claim, the claim is carried to the next period as the claim was not approved

Stage 1: Retrieve Claim Status	Stage 2: Transfer Claim Status	Impact
Approved*¹	Re-Worked	The Claim is paid and not moved to the next period, as the claim had a status of approved at the Retrieval stage

*1 Admins can re-run the retrieval process

2.7.5. Control the Timesheets Claims Statuses Displayed

Timesheet Claims Statuses option controls the various timesheet claim statuses that are presented to users. Where a claims status is set to inactive, the status is removed from user lists which improves the user experience by hiding statuses that not in use.

Status	Description	Active
AP	Approved	☒
RJ	Cancelled	☒
DE	Deleted	☐
UN	Not Submitted	☒

3. Employees & Timesheet Claims

This section will provide guidance, from an Employees perspective, regarding Timesheet Claims and how they can view & submit Timesheet Claims using the Employee Self Service dashboard.

This will allow them to:

- View a count of the timesheets claims by status for a selected period e.g. Saved for Later, Approved, Submitted.
- Drill down to the Timesheet Summary Screen to lists the details of the timesheet claims including options to:
 - Drill down to the Timesheet Input screen to enter/view the timesheet entries.
 - Submit a Timesheet claim into workflow for approval.
 - Recall timesheets claim that have not been actioned.
 - Filter the view to specific status or pay code.

3.1. How to Submit a Claim

Firstly, the employee needs to enter timesheets by selecting the **Input Time** button. After the timesheets has been entered the employee returns to the summary screen where the timesheets are summed by the identified grouping (e.g. Person, Period Pay Code and totals values entered).

The on-screen timesheet status is set as 'Not submitted', employee can continue to enter timesheets and when ready to submit the claim into workflow for approval by selecting the submit option.

3.1.1. Reviewing Claims

The Employee Claims summary displays a summary and detailed view of the claims. The Summary is the total value of the claim, and the details are the individual entries (or transactions) that make up the claim.

3.1.2. Timesheet Entry for Claims

By selecting the 'Input Time' button employees are brought to the Timesheet Input screen to where they can enter timesheets.

- The Timesheet Input opens in the current period (displayed on right of the screen)
- The Timesheet Input screen displays any existing entries and where timesheets have a status other than 'Saved for Later' such as 'approved' or 'submitted', employees are stopped from adjusting the claims because the claims have already been submitted into the workflow approval process.

3.1.3. Adding Comments to a Claim

Comments cannot be entered until a claim has been submitted. A comment can be added to a claim from the View History option and selecting 'add comment'. Previous comments are listed in date/time descending order.

Note: Once a comment is entered it cannot be deleted and comments are visible to all.

3.2. Recalling a Claim

Enables employees to recall a claim that was previously submitted e.g. a claim that was submitted in error. Once recalled, employees can make changes and then re-submit into workflow for approval.

Notes:

- The recall option must be enabled on the employee timesheets template.
- Only Claims that have a status of submitted can be recalled, if a claim was actioned (e.g. approved) the claim **cannot** be recalled.

3.3. Entering Retrospective Claims

As part of the claims process, employees can be granted the ability to enter retrospective claims. This supports employees entering and submitting timesheet claims for closed periods. See our guide [Entering Timesheets](#) for further guidance.

Retrospective claims by example,

- The current open period is monthly, and an employee failed to enter or misses a timesheet claim for a previous month.
- The employee can scroll back to the week(s) within the previous month and enter a timesheet.
- On return, the historical entry is displayed part of the current open period, but the dates on the claim are reflective of the actual period start/end dates of the entry.
- On submission the claim is displayed to managers in the 'action required' section.

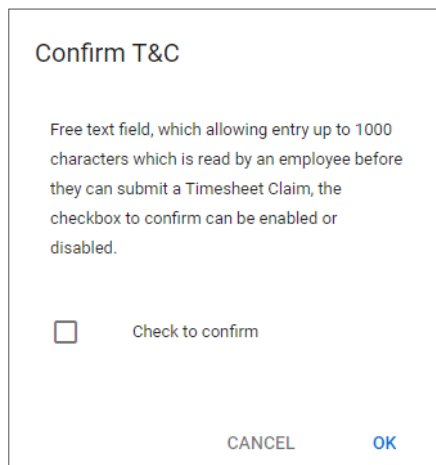

3.4. Employee Timesheet Submission

As part of the submission process, the system completes the following actions internally.

- Calls the workflow process to determine the employee's manager using org roles/groups assign to the template and the org roles assign to the manager in personnel whereby an email notification sent to the manager that a timesheet has been submitted for approval.
- The screen is refreshed and the status changes from 'Saved for Later' to 'Submitted'.
- The date/times and employee who submitted the claim are stored on the history table.
- A Claim id is assigned to the claim & claim history.
- If required, employee can add comments to a claim or recall claims that have not been actioned.

3.5. Acknowledgement before submission

Optional configuration supports presenting a message of Acknowledgement before a claim can be submitted. The acknowledgement message can be a message with an Ok button or an additional checkbox e.g. I acknowledge to the Timesheet Term and Conditions.

Confirm T&C

Free text field, which allowing entry up to 1000 characters which is read by an employee before they can submit a Timesheet Claim, the checkbox to confirm can be enabled or disabled.

☐ Check to confirm

CANCEL OK

3.6. Returned Claims

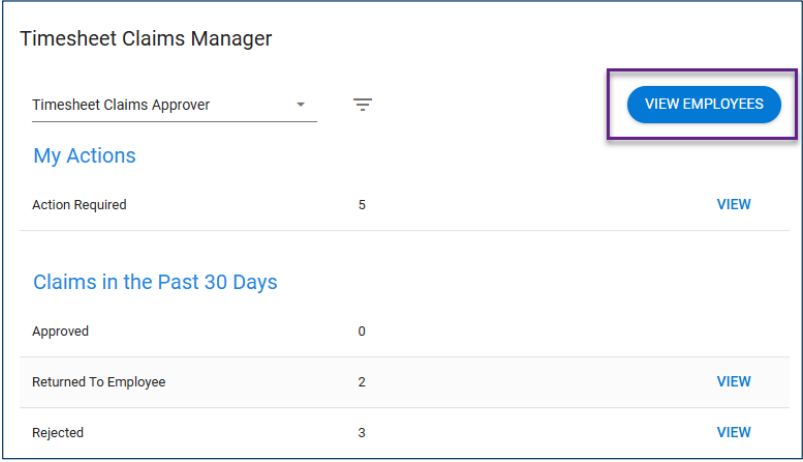

Claims that have been returned to the Employee by their manager are listed under the 'Return to Employee' section in the employee's widget. Once updated, Employees can re-submit the claims into workflow for managers approval.

4. Managers & Timesheet Claims

This section will provide guidance, from a Managers perspective, regarding Timesheet Claims and how they can view & manage Timesheet Claims using the Manager Self Service dashboard.

This will allow them to:

- View the timesheets claims summed by employees within their remit.
- View the status of the claim e.g. Approved, Submitted
- Action a Timesheet e.g. approve or reject.
- Input & Submit Timesheets on behalf of employees.

4.1. Manage Claims Submitted by Employees

Managers are notified of timesheets claims submitted by employees. From the Timesheets Claims Manager Summary screen, My Actions displays the number of claims that required action, clicking on view opens the Timesheets Claims screen where the individual claims can be viewed and actioned.

Note: Claims actioned in the past 30 days is based on today's date.

Row Type	Person	Appointment	Pay Code	Total Claims Value	Submitted Period	Calendar Code	Date Input	Claim Status
Summary	Tom Thompson	Product Manager 7266	Value Claim (7266-8002) 8002	4	01-May-2021 - 31-May-2021	7266 Timesheet Claims 7266CL	07-Jul-2021	Submitted
Summary	Kevin Carden	Developer 7266	Hours Claim (7266-8001) 8001	5.5	01-Jul-2022 - 31-Jul-2022	7266 Timesheet Claims 7266CL	12-Jan-2023	Submitted
Summary	Kenneth Madden	Developer 7266	Value Claim (7266-8002) 8002	155.55	01-Feb-2023 - 28-Feb-2023	7266 Timesheet Claims 7266CL	17-Apr-2023	Recommended Approval
Summary	Kenneth Madden	Developer 7266	Units Claim (7266-8003) 8003	100	01-Feb-2023 - 28-Feb-2023	7266 Timesheet Claims 7266CL	28-Apr-2023	Submitted
Summary	Kenneth Madden	Developer 7266	Hours Claim (7266-8001) 8001	3	01-Mar-2023 - 31-Mar-2023	7266 Timesheet Claims 7266CL	11-May-2023	Submitted

- On screen search can be used to search for specific employees
- On Screen filters enables filtering by claim status, calendar, claim code and dates.
- Where date/period filtering is not used the screen displays are all claims regardless of the input period.

Note: Where filtering on **Not Submitted** there's a requirement to filter by calendar/period.

4.1.1. Reviewing Claims

The Manager Claims summary displays a summary and detailed view of the claims. The Summary is the total value of the claim, and the details are the individual entries that make up the claim.

Row Type	Person	Appointment	Pay Code	Total Claims Value	Processed Period	Calendar Code	Date Input	Claim Status
Summary	Kenneth Madden	Developer 7266	Hours Claim (7266-8001) 8001	15	01-Mar-2023 - 31-Mar-2023	7266 Timesheet Claims 7266CL	17-Apr-2023	Approved
Detail			Hours Claim (7266-8001) 8001	8			09-Jan-2023	
Detail			Hours Claim (7266-8001) 8001	7			09-Jan-2023	

The *Timesheet Claim Summary* screen contains the following fields:

Column	Description
Row Type	This display as either: • Summary - the total value of claim.

Column	Description
	Detail - the individual transaction that make up the claim.
Person	The person that made the claim.
Appointment*	The appointment id if multi-appointments are enabled.
Pay Code	The Claim Type, can be hours, values or units.
Totals Claims Value	On the summary row this is the total claim value and on the detailed row it's the individual values that make up the claim.
Processed Period	The period the claims was actioned e.g. approved.
Calendar Code	The Calendar associated with the claim e.g. Weekly, Monthly.
Date Input	On the summary row it's the claim submitted date and in the detailed row it's the individual date of each entry that makes up the claim.
Claim Status	The current status of the claim.

- To view/hide the details of a claim, select the > button to the left of the summary column.

4.1.2. Action Claims

Manager options to action the claims. The actions available are configurable through Workflow and Timesheet Template configuration which typically cover approval, rejection, rework, recommend approval or rejection (See [Workflow Process](#)).

The timesheets claims can be filtered by the various claim statuses that are available such as Approved, Submitted or Action Required which includes statuses of submitted, recommend approval and recommend rejection where two levels of approval are implemented.

Notes:

- The main actions of 'Approval or Rejection' are available on screen, but additional action item such as recall, recommend approval/rejection can be made available from the 3-dot menu per timesheet claim.
- Action Request status includes statuses of submitted, recommend approval and recommend rejection where two levels of approval are implemented.

- Approval can be completed individually or through use of the multi-select function where many claims can be approved or rejected at once.
- Once actioned the screen refreshes and the status is updated.

Note: Managers may be prompted to enter a free text comment on approval (setting within the timesheet configuration). The comment section is always optional, and the comments entered are visible to all users that can view the employee's claim.

4.1.3. View Timesheet

View Timesheets display the details of the claim, and the option is available from both the summary & detailed views. Selection from the summary level the screen opens at the start of the open period, whereas selection at the detail level, opens the screen in the week that contains the detail date displayed on screen.

4.1.4. View History

The View History screen displays the claim summary information and the actions taken by date and time including who actioned and additional comments, if added.

History					
Manager Dashboard > Timesheet Claims > History					
Claim	Hours	Status	Submitted Period	Processed Period	Claim Number
Hours Claim (7266-8001) (8001)	17.3	Approved	01-Feb-2023 to 28-Feb-2023	01-Apr-2023 to 30-Apr-2023	2023041702589496
Activity

Comment Added	28-Apr-2023	10:57	CoreHR	Carried forward	VIEW COMMENT
Approved	25-May-2023	12:28	Ben Clarke		

4.2. Manager Claims Entry & Submission

Managers can enter and submit timesheets claims on behalf of employees. To complete entry, select 'Input Time' which goes to the timesheet Input screen. Enter the timesheet details for the employee and save. On exist the claim details are displayed under the 'not submitted' selection. In this view, managers can submit the claims into workflow for approval. This kicks off the workflow and where configured email alerts are sent to the employee/manager when submitted.

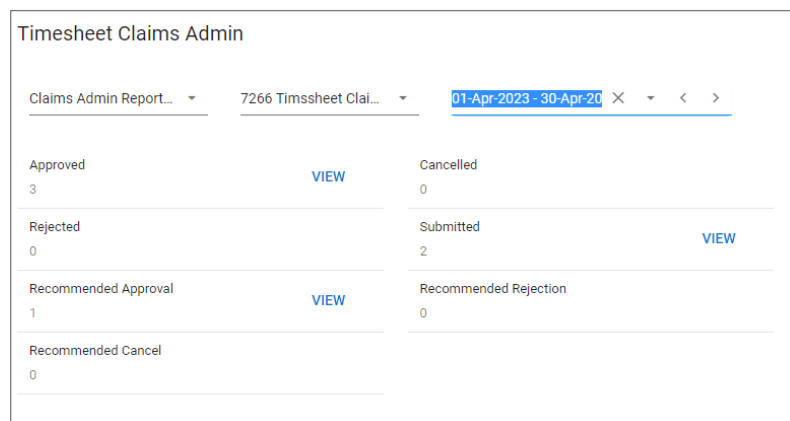

5. Admins & Timesheet Claims

This section will provide guidance, from an Administrators perspective, regarding Timesheet Claims and how they can view & manage Timesheet Claims using the Timesheet Claims Admin widget. This will allow them to:

- View the timesheets claims summed by employees within their remit.
- View the status of the claim e.g. Approved, Submitted
- Action a Timesheet e.g. approve or reject.
- Input & Submit Timesheets on behalf of employees.

5.1. Manage Claims Submitted

The Timesheet Admin Claims widget displays the numbers of claims by status to give a quick overview of claims by the various statues. Clicking the **View** button lists the employees claims summary and details.

The screenshot shows the 'Timesheet Claims Admin' interface. At the top, there are three filters: 'Claims Admin Report...' (a dropdown), '7266 Timssheet Clai...' (a dropdown), and a date range '01-Apr-2023 - 30-Apr-20' with a close button and navigation arrows. Below these filters, the claims are categorized into six status groups, each with a count and a 'VIEW' button:

Status	Count	Action
Approved	3	VIEW
Rejected	0	
Recommended Approval	1	VIEW
Recommended Cancel	0	
Cancelled	0	
Submitted	2	VIEW
Recommended Rejection	0	

- Select the Admin role, where more than one exists, this gives an overall count of timesheets by status.
- Enter the Calendar, where more than one exists, the period defaults to the current open period for the calendar selected.
- Selecting the periods drop-down filter enables viewing any historical periods.
- To view the claims, select the view button which displays the employees claims.

Row Type	Person	Appointment	Pay Code	Cost Centre	Reason	Total Claims Value	Submitted Period	Calendar Code	Date Input	Claim Status
Summary	Matthew Arden	Team Lead 7266	Overtime @ 2.00 2005			6	21-Sep-2020 - 27-Sep-2020 202038	Weekly W	09-Dec-2020	Approved

0 rows selected						4.5	01-Mar-2023 - 31-Mar-2023 7266 Timesheet Claims			

5.1.1. Reviewing Claims

The Admin Claims summary displays a summary and detailed view of the claims. The Summary is total value of the claim, and the details are the individual entries that make up the claim.

Row Type	Person	Appointment	Pay Code	Total Claims Value	Processed Period	Calendar Code	Date Input	Claim Status
Summary	Kenneth Madden	Developer 7266	Hours Claim (7266-8001) 8001	15	01-Mar-2023 - 31-Mar-2023 202313	7266 Timesheet Claims 7266CL	17-Apr-2023	Approved
Detail			Hours Claim (7266-8001) 8001	8			02-Jan-2023	
Detail			Hours Claim (7266-8001) 8001	7			03-Jan-2023	

The *Timesheet Claim Summary* screen contains the following fields:

Column	Description
Row Type	This display as either: Summary - the total value of claim. Detail - the individual transaction that make up the claim.
Person	The person that made the claim.
Appointment*	The appointment id if multi-appointments are enabled.
Pay Code	The Claim Type, can be hours, values or units.
Totals Clams Value	On the summary row this is the total claim value and on the detailed row it's the individual values that make up the claim.
Processed Period	The period the claims was actioned e.g. approved.
Calendar Code	The Calendar associated with the claim e.g. Weekly, Monthly.

Column	Description
Date Input	On the summary row it's the claim submitted date and in the detailed row it's the individual date of each entry that makes up the claim.
Claim Status	The current status of the claim.

5.1.2. Action Claims

Admin options to action the claims. The actions available are configurable through workflow and timesheet template configuration which typically covers approval, rejection, rework, recommend approval or rejection (See [Workflow Process](#)).

Note for Administrator Configuration:

- To support Admins to action Claims where workflow was previously completed, A 'Completed' workflow process is available that enable admins to override the existing status to rejected, return to employee or approved, by example an Admin could reject a Claim that was approved in error.
- See [Section 2.5.3 Workflow Process](#) for further guidance.

The timesheets claims can be filtered on status by the various status available:

- **Not Submitted**, admins can submit timesheet on behalf of employees.
- **Submitted** or **Action Required**, which includes statuses of submitted, recommend approval and recommend rejection where two levels of approval are implemented, admins can action e.g. approve/reject on behalf of Managers.
- **Approval** can be completed individually or through use of the multi-select function where multiple claims can be approved/rejected at once.
- Once actioned the screen refreshes and the status is updated.

Note: Users maybe prompted to enter a free text comment on approval (setting within the timesheet configuration). The comment section is always optional, and the comments entered are visible to all users that can view the employees claim.

5.1.3. View History

The View History screen displays the claim summary information and the actions taken by date and time including who actioned and additional comments, if added.

5.1.4. View Managers Contact Information

View manager contact details enables admins to view contact details of the Approval Managers. The managers listed are those responsible for approving Timesheets and the contact information displayed (e.g. Email, Phone) is configurable under Section 5 Timesheets Claims actions in Manager Contact Details within the Timesheet Configuration.

Note: This feature is only available to Admins, thus the configuration is only available on Admins Timesheet Templates.

6. Menu Access

This section details the menu options and webservices required to support the configuration of the various timesheet claims screens.

6.1. Employee Menu Access

Employee Menu options supporting timesheet claims. The Employee Widget displays a count of timesheet claims. The Employee Claims summary lists a summary and detailed view of the claims where employees can review, submit and recall claims.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Employee menu profile e.g., **Coreportal_Employee**
3. From its 3-dot menu, select **Import Menu Options & From Existing Menu Profile**
4. Search for and select **WFM_Employee_Claims**

6.2. Manager Menu Access

Manager Menu options supporting timesheet claims. The Manager Widget displays a count of timesheet claims that require action and a summary of claims actioned in the last 30 days. The Manager Claims summary lists the summary and details of the claim which is from the Manager Claims widget or directly from the Managers Workforce Management dashboard.

To Group Assign:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Manager menu profile e.g., **Coreportal_Manager**
3. From its 3-dot menu, select **Import Menu Options & From Existing Menu Profile**
4. Search for and select **WFM_Manager_Claims**

6.3. Admin Menu Access

Administrator Menu options supporting viewing and maintaining timesheet claims.

Admin Menu options supporting timesheet claims. The Admin Widget displays a count of timesheet claims by status for a selected period.

To Group Assign:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Manager menu profile e.g., **Coreportal_Admin**
3. From its 3-dot menu, select **Import Menu Options & From Existing Menu Profile**
4. Search for and select **WFM_Admin_Claims**

6.4. Maintain Timesheet Claims Statuses Menu Access

Menu Options for Admins to maintain timesheet claims statuses that are visible to end-users. By default, this option is included in the WFM_ADMIN_CLAIMS group menu assignment.

Menu Profile	Menu ID	System
Timesheet Claims Statuses	CONFIG_SET_MENU.TIMESHEET_CLAIMS_STATUS	CorePortal
Get claims filter status	WS_TIMESHEETS_MENU.GET_CLAIMS_FILTER_STATUS	Web Services
Update claims filter status	WS_TIMESHEETS_MENU.PATCH_CLAIMS_FILTER_STATUS	Web Services

7. Workflow Process

This section outlines the standard configuration for 1 Level and 2 Level Approval deployed as part of the PXD new build release.

Note: Workflow is set in the Global Parameters in the Back Office. If a specific Pay Code requires a different workflow, it can be overridden by setting it on the Pay Code in Back Office.

The screenshot shows the 'Global Parameters' window with the 'CoreTime MSS' tab selected. The 'Timesheet Claims' section is highlighted with a red box. It contains the following fields:

- Claim Process Code:** A text input field with a yellow background.
- Confirm Historical Hours:** A checkbox that is checked.

Other sections visible include:

- Employee Access Based on:** Radio buttons for 'Work Group/Department' and 'Organisational Role' (selected).
- Missed Clocking Approval:** Fields for 'Request Process Code' (MSCLK) and 'Request Cancel Code' (CA001).
- Portal Timesheet Defaults:** Fields for 'Pattern', 'Hours Pay Code', 'Day Pay Code', 'Value Pay Code', and 'Unit Pay Code'.

To assign workflow for Managers (Claims Process Code) and Admins (Completed Process code) see the Time Sheet Claims section within the Pay Code Configuration screen.

The screenshot shows the 'Pay Code Configuration' screen for 'HOURS CLAIM (7266-8021 TR CC)'. The 'Time Sheet Claims' section is highlighted in the left sidebar. The main area shows the following configuration:

- Claim Process Code:** 1 Step Timesheets Summary (Trans b...)
- Completed Process Code:** Manager Input Process Code
- Timesheet Claim Pay Code:** A toggle switch that is currently turned on.

A 'SAVE' button is located at the bottom right of the screen.

7.1. 1 Level of Workflow Approval

Workflow processes are configured within **Event Management > HR Process Configuration**.

The 1 Step Workflow for Timesheets contains the following steps:

1. Email Manager
2. Manager or Employee Actions
 - Managers have 3 potential statuses - **Approved, Rejected, Action Required** (rework - sent back to the employee)
 - Employees can **Claim Recalled** (only if the claims have not been previously actioned)
3. Email Employee on the actions taken.
4. Email Manager on a claim is recall.

The screenshot shows the 'HR Process Configuration' window. The 'Process' section at the top has 'Process Code' TSC001, 'Process Category' SUMTS, and 'Due Days' 0. The 'Task Details' table below lists tasks for the 'Timesheet Claims - 1 Level Approval' process.

Task Seq	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Email the Manager	0	After Process Start Date	5	Initial	Email the Manager	2	
2	Manager/ Employee Options	0	After Previous Task Completion Date	5	Initial	Actions Available		
					Approved	Approved	3	
					Rejected	Rejected (Closed)	3	
					Action Required	Rework (Returned to Employee)	3	
					Claim Recalled	Employee Recalls	4	
3	Email Employee of Action	0	After Previous Task Completion Date	5	Initial	Email to Employee		
4	Email Manager of Recall	0	After Previous Task Completion Date	5	Initial	Email to Manager		

7.1.1. Task Seq 1: Email the Manager

Notify the manager on a claim submission.

The screenshot shows the 'Task Detail' window for 'Task Seq 1: Email the Manager'. It includes fields for 'Process Code' (TSC001), 'Task Sequence' (1), 'Start Days' (0), 'Start Days Type' (After Process Start Date), 'Due Days' (5), and 'User Data Code'. The 'Task Status' table at the bottom shows the current status of the task.

Status	Action	Initial	Complete	Assign	Display In Task List	Comments Mandatory	Next Task	Process
Initial	Email the Manager	☒	☒	☐	☐	☐	2	Notification Details
		☐	☐	☐	☐	☐		Notification Details
		☐	☐	☐	☐	☐		Notification Details
		☐	☐	☐	☐	☐		Notification Details

Task Details & Status:

Task Details	Required Details	Task Status	Required Details
Task Sequence	1 Email the manager	Status	Initial
Start Days	0	Action	Email the manager
Start Days Type	After Process Start Date	Initial	Y
Due Days	5	Completed	Y
Workflow Indicator	Y	Next Task	2
		Notification Details	Yes

Notification Details	Required Details
Notification Type	Organisation Role
Organisation Group	The org group that drives managers access e.g. Work Group
Organisation Role	The org role assigned to the managers
Send Email	Y
Configure Subject & Message	Use a combination of text and data available on ct_summary_TS_process_view to create a subject & message for the email

7.1.2. Task Seq 2: Manager / Employee Options

Option available for managers to action the claim (e.g. Approved, Reject, Rework) or Employee option to recall a Claim.

The screenshot shows the 'HR Process Configuration' window. Under 'Task Details', task sequence 2 'Manager/Employee Options' is highlighted with a red box. The task details table is as follows:

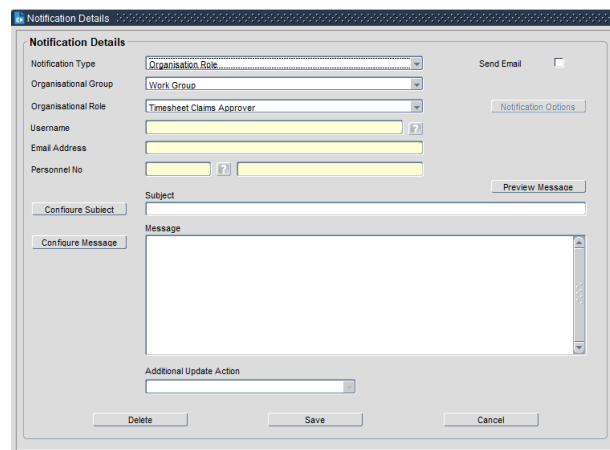

Task Seq.	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Email the Manager	0	After Process Start Date	5	Initial	Email the Manager	2	
2	Manager/Employee Options	0	After Previous Task Completion Date	5	Initial	Actions Available		
					Approved	Approved	3	
					Rejected	Rejected (Closed)	3	
					Action Required	Rework (Returned to Employee)	3	
3	Email Employee of Action	0	After Previous Task Completion Date	5	Initial	Employee Recalls	4	
4	Email Manager of Recall	0	After Previous Task Completion Date	5	Initial	Email to Manager		

The screenshot shows the 'Task Detail' window for 'Manager/Employee Options'. The 'Task Status' section is expanded, showing the following details:

Status	Action	Initial	Complete	Assign	Display in Task List	Comments Mandatory	Next Task	Process
Initial	Actions Available	☒	☐	☐	☐	☐	?	?

7.1.3. Task Seq 3: Email Employee of Action

The following outlines the steps to email employees of the action taken by the manager

The screenshot shows the 'HR Process Configuration' window. The 'Process' section is at the top, followed by 'Task Details'. In the 'Task Details' table, task sequence 3, 'Email Employee of Action', is highlighted with a red box. Below this, the 'Task Detail' window is open, also with a red box around its fields. The 'Task Status' section at the bottom shows the status 'Initial' and action 'Email to Employee'.

Task Seq	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Email the Manager	0	After Process Start Date	5	Initial	Email the Manager	2	
2	Manager/ Employee Options	0	After Previous Task Completion Date	5	Initial	Actions Available	3	
3	Email Employee of Action	0	After Previous Task Completion Date	5	Initial	Email to Employee	4	
4	Email manager of Recall	0	After Previous Task Completion Date	5	Initial	Email to manager

7.1.4. Task Seq 4: Email the Manager

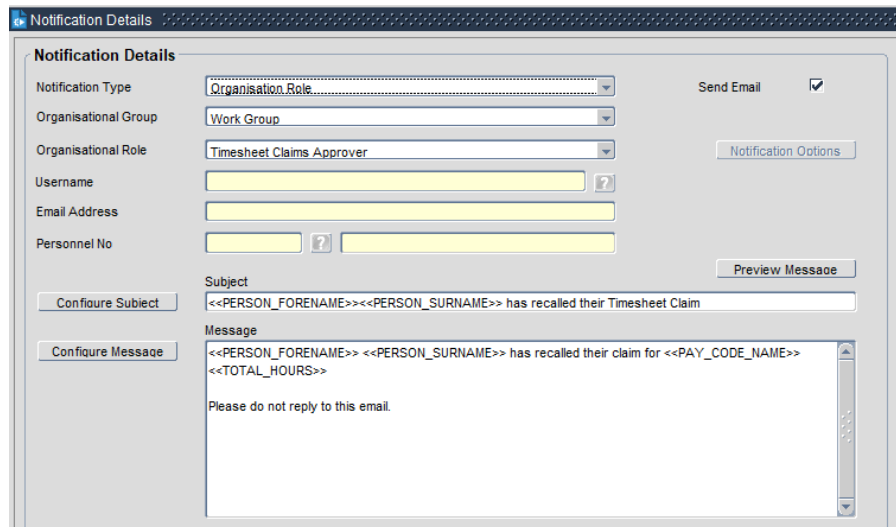

The following outlines the steps to email a manager where employees recall claims.

The screenshot shows the 'HR Process Configuration' window. Under the 'Task Details' tab, a table lists tasks. Task 4, 'Email Manager of Recall', is highlighted with a red box. The task details are as follows:

Task Seq	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Email the Manager	0	After Process Start Date	5	Initial	Email the Manager	2	
2	Manager/ Employee Options	0	After Previous Task Completion Date	5	Initial	Actions Available		
					Approved	Approved	3	
					Rejected	Rejected (Closed)	3	
					Action Required	Rework (Returned to Employee)	3	
					Claim Recalled	Employee Recalls	4	
3	Email Employee of Action	0	After Previous Task Completion Date	5	Initial	Email to Employee		
4	Email Manager of Recall	0	After Previous Task Completion Date	5	Initial	Email to Manager		

Task Detail	Required Details	Task Status	Required Details

7.2. 2 Levels of Workflow Approval

Workflow processes are configured within **Event Management > HR Process Configuration**.

The 2 Level Workflow for Timesheets contains 6 steps:

1. Manager Notified of Claim.
2. Manager Level 1 Actions (or Employee recalls)
 - Makes Recommendation, contains 3 potential statuses **Approval Recommended**, **Rejected**, **Rework** (Return to Employee)
 - Employees can **Recall Claims** (only if the claims have not been previously actioned)
 - On **Approval Recommended** Manager Level 2 is notified otherwise Employee is notified
3. Notify Manager Level 2
 - Level 1 **Approval Recommended**, Manager Level 2 is notified.
4. Manager Level 2 Actions
 - Final Approval, contains 3 potential statuses **Approved**, **Rejected**, **Rework** (Return to Employee)
5. Email Employee on the actions taken.
6. Email Manager on claim recalled by the employee (from step 2)

7.2.1. Task Seq 1: Email the Manager on claim submission.

Manager notification where an employee submits a claim for approval.

The image shows two screenshots of a software interface. The top screenshot is the 'Task Detail' form. It has fields for Process Code (TSC002), Task Sequence (1), Start Days (0), Start Days Type (After Process Start Date), Due Days (5), and User Data Code. A red box highlights the Task Sequence field. Below these are sections for Documents and Task Status. The Task Status section shows a table with columns for Status, Action, Initial, Complete, Assign, Display In Task List, Comments, Mandatory, Next Task, and Process. The bottom screenshot is the 'Notification Details' form. It has fields for Notification Type (Organisation Role), Organisational Group (Work Group), Organisational Role (Timesheet Claims Approver), Username, Email Address, and Personnel No. There are buttons for 'Configure Subject', 'Configure Message', 'Preview Message', and 'Send Email'. The Subject field contains the text: '<<PERSON_FORENAME>> <<PERSON_SURNAME>> has submitted a timesheet claim'. The Message field contains the text: '<<PERSON_FORENAME>> <<PERSON_SURNAME>> has submitted a claim for your approval. The claim is for <<PAY_CODE_NAME>> <<TOTAL_HOURS>>'. Below the message is the text: 'To action, please go to the Timesheets Claims Manager Widget located on the Manager Dashboard' and 'Workflow Process TSC002'.

Task Details:

Task Details	Required Details
Task Sequence	1 Email the Level 1 Manager
Start Days	0
Start Days Type	After Process Start Date
Due Days	5
Workflow Indicator	Y

7.2.2. Task Seq 2: Level 1 Manager / Employee Options

Option available for managers to action the claim (e.g. Approved, Reject, Rework) and Employee option to Recall a Claim.

The first screenshot shows the 'HR Process Configuration' window. The 'Process' section has 'Process Code' TSC002 and 'Process Category' SUMTS. The 'Task Details' table lists tasks for 'Timesheet Claims - 2 Levels Approval'. Task 2, 'Manager L1 Actions or Employee Recalls', is highlighted with a red box. Its 'Start Days' is 0, 'Start When' is 'After Previous Task Completion Date', 'Due Days' is 5, and 'Status' is 'Initial'. The 'Action' dropdown is set to 'Actions Available (L1)'. The 'Next Task' is 3.

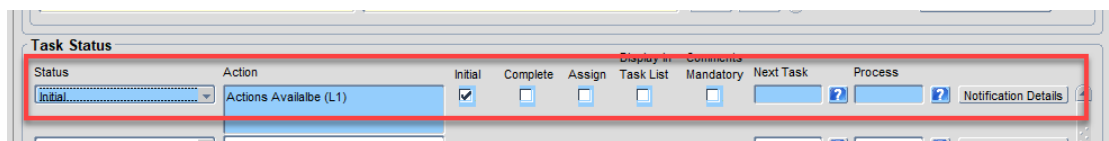

The second screenshot shows the 'Task Detail' window for Task 2. The 'Task Sequence' is 2 and the 'Task' is 'Manager L1 Actions or Employee Recalls'. The 'Status' is 'Initial' and the 'Action' is 'Actions Available (L1)'. The 'Task Status' section shows a table with columns for Status, Action, Initial, Complete, Assign, Display In Task List, Comments, Mandatory, Next Task, and Process. The 'Initial' status is checked. The 'Next Task' is 3.

The third screenshot shows the 'Task Status' section for the 'Initial' status. It shows a table with columns for Status, Action, Initial, Complete, Assign, Display In Task List, Comments, Mandatory, Next Task, and Process. The 'Initial' status is checked. The 'Next Task' is 3.

7.3. Completed Workflow Approval

Workflow processes are configured within **Event Management > HR Process Configuration**.

The Completed Process support admins to step into the workflow after it has been completed e.g. A manager has approved claims and the administrator see an error, they can reject or send the claim back to the employee for rework. The manager and the employee are notified of any actions taken by the admin.

Workflow for Admins contains 3 steps:

1. Admin Action:
 - Contains 3 potential statuses **Approved, Rejected, Action Required**
2. Email Employee on the actions taken.
3. Email Manager on a claim is recall.

The screenshot shows the 'HR Process Configuration' window. The 'Process' section includes:

- Process Code: TSC003
- Process Name: Timesheet Claims - Completed Process (Admin Workflow)
- Process Category: SUMTS (Summary Timesheet Processes)
- Due Days: 0
- Active: ☒
- Test Ind.: ☐

The 'Task Details' section is a table with the following columns: Task Seq., Task, Start Days, Start When, Due Days, Status, Action, Next Task, and Process.

Task Seq.	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Admin Action Taken	0	After Process Start Date	5	Initial	Initial Task		
					Approved	Approved by Admin	2	
					Rejected	Rejected by Admin	2	
					Action Required	Returned to Employee by Admin	2	
2	Email Employee	0	After Previous Task Completion Date	5	Initial	Email Employee	3	
3	Email the Manager	0	After Previous Task Completion Date	5	Initial	Email the Manager		

7.3.1. Task Seq 1 – Admin Action Taken

Requires the following details to be configured.

Task Details:

Task Details	Required Details
Task Sequence	1 Admin Actions
Start Days	0
Start Days Type	After Process Start Date
Due Days	5
Workflow Indicator	Y
Edit Allowed	Y

7.3.2. Task Status: Initial Task

There're no notifications sent, but as workflow requires that the initial task must have a notification at notification to the employee is configured with no subject, body or email.

Task Status:

Task Status	Required Details
Status	Initial
Action	Initial Taks
Initial	Y

The screenshot shows the 'Task Detail' window with the 'Notification Details' tab selected. The 'Notification Type' is set to 'Employee'. The 'Send Email' checkbox is highlighted with a red box. The 'Message' field is also highlighted with a red box.

Notification Details	Required Details
Notification Type	Employee
Send Email	N (Important to have this off)

7.3.3. Task Status: Approved, Action Required, Rejected

Notify employees of the managers action taken (e.g. Approved). Notification details do not need to be populated as the next task in the workflow is set to number 3 (i.e. email the employee).

The screenshot shows the 'Task Status' window with the 'Initial Task' row selected. The 'Status' is set to 'Initial'. The 'Action' is 'Initial Task'. The 'Initial' checkbox is checked. The 'Complete' checkbox is checked. The 'Assign' checkbox is checked. The 'Display In Task List' checkbox is checked. The 'Comments Mandatory' checkbox is checked. The 'Next Task' is set to 2. The 'Process' is set to 2. The 'Notification Details' link is highlighted with a red box.

Field	Required Details
Status	Approved, Action Required, Rejected
Completed	Y (workflow completed)
Next Status	2
Notification Details	n/a

7.3.4. Task Seq 2 – Email the Employee

The following outlines the steps to email employees of the action taken by the manager

The screenshot shows the 'HR Process Configuration' window. Under 'Task Details', a table lists tasks in a sequence. Task 2, 'Email the Employee', is highlighted. Its details are: Start Days: 0, Start When: After Previous Task Completion Date, Due Days: 5, Status: Initial, Action: Email Employee, Next Task: 3, and Process: Email the Manager.

Task Seq	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Admin Action Taken	0	After Process Start Date	5	Initial	Initial Task		
2	Email Employee	0	After Previous Task Completion Date	5	Initial	Email Employee	3	Email the Manager
3	Email the Manager	0	After Previous Task Completion Date	5	Initial	Email the Manager		

Task Detail	Required Details	Task Status	Required Details
Task Sequence	2	Status	Initial
Start Days	0	Action	Email the Employee
Start Days Type	After the Previous Task Completion Date	Initial	Y
Due Days	5	Completed	Y
Workflow	Y	Display in Task List	Y
Edit Allowed	Y		

The screenshot shows the 'Task Detail' window for 'Email Employee'. It includes fields for Process Code (TSC003), Task Sequence (2), Start Days (0), Start Days Type (After Previous Task Completion Date), Due Days (5), and User Data Code. It also has checkboxes for Work Flow, Edit Allowed, and User Data - Back Office Edit Allowed. Below these are sections for Documents and Task Status. The Task Status section shows a table with columns for Status, Action, Initial, Complete, Assign, Display in Task List, Comments Mandatory, Next Task, and Process. The 'Initial' status is selected for the 'Email Employee' action.

Status	Action	Initial	Complete	Assign	Display in Task List	Comments Mandatory	Next Task	Process
Initial	Email Employee	☒	☒	☐	☒	☐	3	Email the Manager

7.3.5. Task Seq 4 – Email the Manager

The following outlines the steps to email a manager where employees recall claims.

Task Seq.	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Admin Action Taken	0	After Process Start Date	5	Initial	Initial Task		
					Approved	Approved by Admin	2	
					Rejected	Rejected by Admin	2	
					Action Required	Returned to Employee by Admin	2	
2	Email Employee	0	After Previous Task Completion Date	5	Initial	Email Employee	3	
3	Email the Manager	0	After Previous Task Completion Date	5	Initial	Email the Manager		

Task Detail	Required Details	Task Status	Required Details
Task Sequence	3 (Email the Manager)	Status	Initial
Start Days	0	Action	Email the Manager
Start Days Type	After the Previous Task Start Date	Initial	Y
Due Days	5	Completed	Y
Workflow	Y	Display in Task List	Y
Edit Allowed	Y

7.4. Manager Input Process Code

Workflow processes are configured within **Event Management > HR Process Configuration**.

The Manager Input Process code generates email notification for employees where a timesheet claim is recorded on their behalf by a manager or administrator.

The screenshot shows the 'HR Process Configuration' window. The 'Process' section includes fields for Process Code (TSC004), Process Name (Timesheet Claims Submitted on Behalf of Employees), Process Category (SUMTS), Due Days (0), and checkboxes for Active (checked) and Test Ind. (unchecked). The 'Task Details' section is a table with columns: Task Seq, Task, Start Days, Start When, Due Days, Status, Action, Next Task, and Process. It contains one task: 'Email the employee' with Start Days 0, Start When 'After Process Start Date', Due Days 5, Status 'Initial', and Action 'Email the employee'.

Process	
Process Code	TSC004 Timesheet Claims Submitted on Behalf of Employees
Process Category	SUMTS Summary Timesheet Processes
Due Days	0
Active	☒
Test Ind.	☐

Task Details								
Task Seq	Task	Start Days	Start When	Due Days	Status	Action	Next Task	Process
1	Email the employee	0	After Process Start Date	5	Initial	Email the employee		

Workflow contains 1 step:

1. Email Employee when a claim is recorded on their behalf

Note: The Manager, Administrator or Employee still needs submit the claims into workflow for approval.

7.4.1. Task Seq 1 – Email the employee.

The following outlines the steps to email employees.

Task Detail	Required Details	Task Status	Required Details
Task Sequence	1	Status	Initial
Start Days	0	Action	Email the Employee
Start Days Type	After process Start Date	Initial	Y
Due Days	5	Completed	Y
Workflow	Y	Display in Task List	Y
Edit Allowed	Y

8. Frequently Asked Questions & Error Messages

The following lists potential error messages and possible answers:

Question	Answer
You do not have access to the calendar given.	The Employee has the claims widget assigned through security, but the Employees/Managers are not assigned to a template. For Managers, the scheduled job to assign managers/admin staff is completed each night.
Timesheet Summary: No Claims displayed.	Enter timesheets via the Timesheet Input screen on returning to the timesheet summary no details are displayed. Check that the pay code(s) is marked as a Timesheet Claim pay code.
Cannot Determine the timesheet template.	The user has not been assigned a template. Please see configuration steps above on template assignment.
The Organisational Role/Group is not valid for this timeframe.	Invalid Organisation Org Roles error is displayed when the manager viewing the Timesheet does not have Access to that employee for that date. This can be fixed by setting the correct organisational roles to the manager. It may be a valid error – as a manager might only get access to work group 1 in 1/Jul so they shouldn't be able to access that user.
Manager unable to input Historical Hours.	If the rollback weeks for employee and Manager are set on the workgroup, but a manager can't enter historical hours – then turn on the Maintain Historical Hours indicator in System Users for that username or org role.
The Option Confirm Historical Hours must be ticked on at Global Parameter Level.	The Confirm Historical Hours option needs to be switched on within General Settings in the WFM Configuration Centre.
You do not have access to the calendar given.	As any number of User defined calendars can be created, a scheduled job exists to restrict/control the calendar lists, so that managers only see calendars that are applicable to

Question	Answer
	employees within their remit. The Schedule job runs each night that determines the managers access levels.
No pay codes displaying in the claims summary screens.	If there are no pay codes displaying in the Timesheet Summary, there are 2 things to check: 1) Personalised Pay Code group – for Employees, check the personalised pay code group attached to the person and ensure the pay codes are there. 2) Check the timesheet Claims pay code toggle is set, see WFM Configuration > Pay Codes > Timesheet Claims
Access Not Allowed to Pay code (For Person, For Period).	1) Personalised Pay Code group assigned to the manager (or Admin) does not contain the pay code that the Employee has submitted. 2) The Manager has two active usernames (one from back-office and one from portal). In invalid username need to have the person number assigned the username removed.
Historical Records Are Not Editable.	Historical Entries need the Current open period assigned to transactions before they can be actioned. 1) Timesheet Claims Pay Codes have been recorded and the Generate Timesheets was completed for a period without “ignore unconfirmed hours”. As a result, claims that are not at final ‘approval’ or ‘rejected’ are not brought forward. 2) Timesheet Claims Pay Codes have been recorded and the system or user defined calendars were manually rolled forward to a future open period. Manually rolling forward can be completed via Calendar Configuration screens or the Advance period option.

Question	Answer
	3) The Calendars are set to auto advance; this should be disabled at the calendar level.
Not Claims Pay Code Transfer to Payroll.	Check the payroll integration setting for the Pay Codes to ensure that pay codes are correctly configured to transfer/not transfer. Check that the Work Group setting Generate Timesheet is set to 'On' for the work groups that are to transfer to payroll.
You do not have access to the current Workflow Level.	This happens where a manager/admin has no access to the current stage in workflow. Workflow runs approximately every 7 mins and Managers/Admin will not have access to action claims until the job runs. Verify the workflow job has completed, if the error continues check that workflow has been configured correctly.
The workflow has not started.	This is the error message that displays when trying to recall a claim that hasn't been submitted (i.e., the job hasn't run).
Record cannot be edited as it has been actioned.	A timesheet claim has been submitted for approval or has reached final approve and a user tries modifying the claim, claims that have been submitted into workflow cannot be edited.
A lock record cannot be unticked for a day.	Similar to trying to edit a claim that has entered workflow. A user has tried to untick the locked day indicator. Once a claim is submitted into workflow for approval the days are locked to stop the calculation from firing which could result in the claims header and details records being out of synchronisation. If re-work is required, it's up to the manager to reject or the employee to recall the claim.

Question	Answer
Claim not updated – The Totals to be submitted have changed.	The Timesheet Claim header record and its associated detail records are out of synchronisation, please contact support for assistance.
You Do not Have Access to the Claim for Person.	The Workflow process has not run, not until the workflow process has been completed will the manager be able to approve the timesheets. Typically the workflow process is scheduled to run every 7 minutes, to view go the Scheduled Jobs widget located on the Administrator dashboard.
Timesheet Input (Screen) > Access Denied.	User Type (E.g. Employee, Manager, Admin) not assigned to a Timesheets Template.
Timesheet Configuration (Screen) > Access Denied.	The menu profile(s) attached to this user does not have the menu option "Coreportal – Timesheet Config" assigned.
Manager Dashboard > Timesheet Claims manager > Approve multiple claims > Access Denied.	The menu profile(s) attached to this user do not have the menu option 'CorePortal - Timesheet Manager Summary' assigned.
Input Time button unavailable on the Timesheet Claims Employee widget.	The menu profile(s) attached to this user do not have the menu option 'CorePortal - Timesheet Input V2 Employee' assigned.
