1. Overview

1.1. Purpose of the Guide

Timesheet templates populate a predefined template into the Timesheet Input screen for the user.

This guide will walk you through:

- Creating a Template
- Configuring a Template
- Assigning a Template

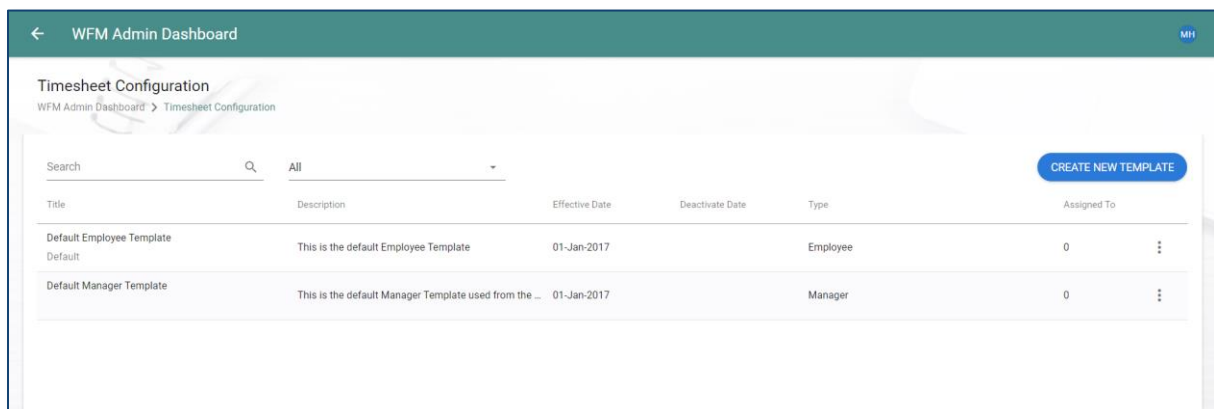

2. Timesheet Configuration Screen

The configuration screen allows Administrators to create and configure timesheet templates and can be accessed through the Timesheet Configuration screen.

2.1. Accessing the Timesheet Configuration Screen

To access the *Timesheet Configuration* screen, complete the following:

1. Quick jump to the *WFM Admin Dashboard*
2. Select **WFM Configuration**
3. Select **Timesheet Configuration**.
4. The screen displays.

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific work pattern you wish to configure.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. • All • Employee • Manager • Administrator

The **Timesheet Configurations** screen displays the following fields:

Options	Details
Title	This displays the title of the template. It is recommended that a meaningful title be used to easily identify the timesheet template e.g. Employee Standard Template.
Description	This displays a description for the timesheet template. It is recommended that a meaningful description be used to easily identify the timesheet e.g. Default Employee Template.
Effective Date	This is the date the timesheet is effective from.
Deactivated Date	This is the date the timesheet was deactivated from use.
Type	This displays the group of users the template has been created for.
Assigned To	Displays the number of users the Timesheet is assigned to.

2.2. Create a Timesheet Template

To create a new timesheet template, navigate to the *Timesheet Configuration* screen and click the **Create New Template** button, to open the template wizard.

2.2.1. Details

This is where you will setup the details of your template. All fields marked with an asterisk are mandatory, once completed click **Next** to move to Timesheet Setting

The screenshot shows the 'Create Timesheet Template' wizard in the WFM Admin Dashboard. The current step is '1 Details'. The form contains the following fields:

- Choose Template Type ***: A dropdown menu with 'Employee' selected.
- Template Title ***: A text input field containing 'Example - Employee Template'.
- Template Description ***: A text input field containing 'Example - Employee Template'.
- Effective From ***: A date input field containing '05-Jun-2023'.
- Deactivate On**: A date input field with a calendar icon.

A sidebar on the left lists the steps of the wizard: 1 Details, 2 Timesheet Settings, 3 Clock Settings, 4 Column Selection, 5 eTimesheet Actions, and 6 eTimesheet Grouping. At the bottom right, there is a 'NEXT' button.

The **Details** screen contains the following fields:

Field	Details
Choose Template Type	Use the drop-down menu to determine the Type of user group the template is being created for.
Template Title	Enter the title of your template. It is recommended that a meaningful title be used to easily identify the template.
Template Description	Enter a description for your template (2,000 characters max). It is recommended that a meaningful description be used to easily identify the template.
Effective From	Using the calendar, enter the <i>Effective From</i> date for your template.
Deactivated On	Using the calendar, enter the <i>Deactivated On</i> date for your template. Not required for creation.

2.2.2. Timesheet Settings

This is where you can setup the general Timesheet setting.

The **Employee Information** section contains the following fields:

Field	Details
Order of next/previous person	Use the drop-down menu to determine the order of next/previous person. This can be:

Field	Details
	• Forename, Surname • Surname, Forename • Personnel Number
Display Employee Photo	If enabled and the user has added a profile picture this will display.

The **Additional Information** section contains the following fields:

Field	Details
Display Additional Information	If enabled the Additional Information headings are active to add additional information to be displayed. Up to 3 lines can be added.
Additional Info Line 1 to Line 3	Using the drop-down menus, select up to 3 lines of additional information to be displayed in Person Information.
Crew Plan Template	Determines if the Template will use the Crew Plan functionality. This is only available on Manager or Administrator Template types.

The **Additional Information Daily Input** section contains the following fields:

Field	Details
Daily Input Line 1 to Line 2	If using the Additional Information fields, 2 lines can be pulled into the Daily input screen. Use the drop-down menu to select which additional information lines to include.

The **Totals** section contains the following fields:

Field	Details
Exclude Rejected Status	If enabled, then Rejected Hours are not included in the Timesheet Totals.

Field	Details
Exclude Group	If selected, the hours for the pay codes that are in the selected Pay Code Group are not included in the Timesheet Totals.
Subtract Group	If selected, the hours for the pay codes that are in the selected Pay Code Group will be subtracted from the other pay codes in the timesheet in the Timesheet Totals.
Display Format	Determines if the daily totals are displayed in Decimal, Minutes or Default.

The **General Configuration** section contains the following fields:

Field	Details
Hide Balances Graph	If enabled, this will hide the Balances graph from the timesheet input screen.
Hide Summary Graph	If enabled, this will hide the Summary graph from the timesheet input screen.
Display Locked Day Indicator	If enabled, this will display the Locked Day Indicator within the Timesheet for each day,
Copy Timesheets	If enabled, this will grant the user access to Copy Previous Week from the Actions drop down menu where they can copy a previous week's timesheet inputs.
Include Comment on Copy	If enabled, this will allow comments to be added to a copied timesheet.

The **Grid Legend** section contains the following fields:

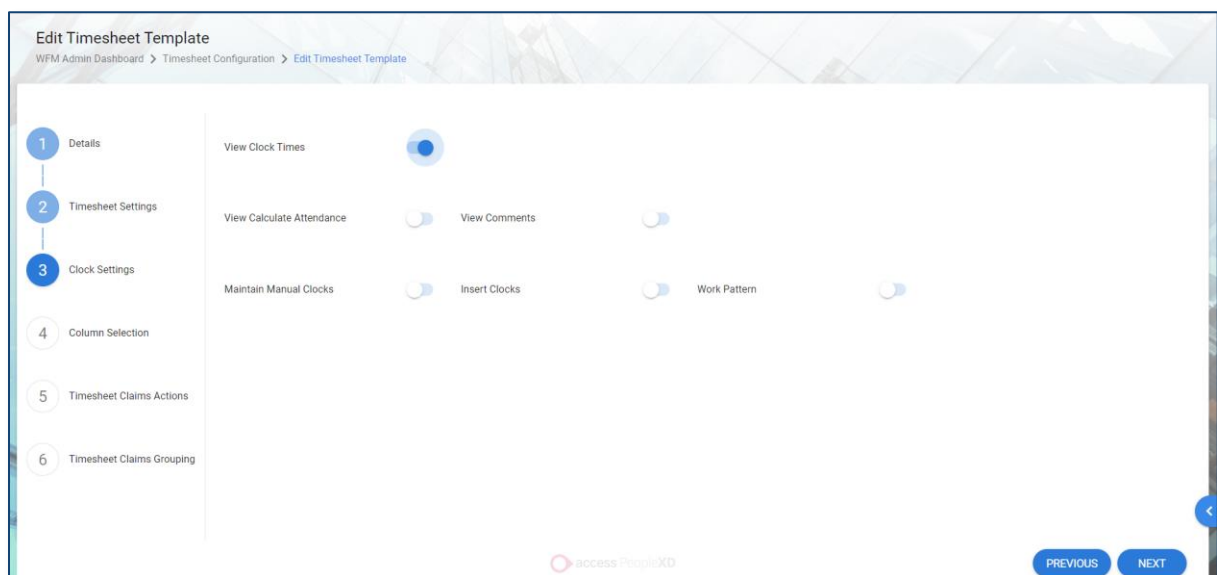

Field	Details
Requires Approval Requires Reason Code Rejected Narrative Attached Recode Acting Up	Using the drop-down options, select a colour to associate with the action when viewing on the timesheet input screen.

The **Navigation** section contains the following fields:

Field	Details
Person Grouping	Only applicable to Managers and Admins. If enabled, this will further filter the employees displayed in the dropdown by a selective group such as work group. The available options are Department, Work Group, Location, User Code 1 and the 'cp_sch_filter_options' setting is stored within the portal parameter.
View Balances	If enabled, then the Balance details section is displayed on the Timesheet
View Work Schedule	If enabled, the option to call the Co-workers leave/absence screen from the Timesheet Input screen is available from the Actions button.
View Change Schedule	If enabled, the option to call to the Roster Change screen from the Timesheet Input screen is available from the Actions button.

2.2.3. Clock Settings

This is where you can setup clock setting to display on the Timesheet Input screen.

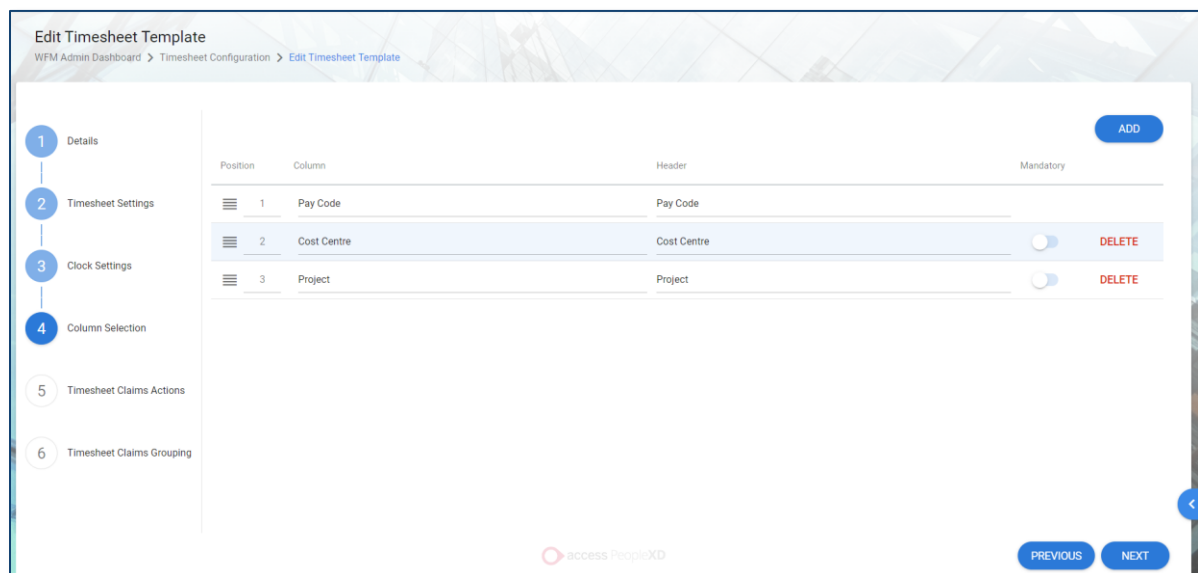

The **Clock Setting** screen contains the following fields:

Field	Details
View Clock Times	If enabled, this will display the Clocking section within the timesheet input screen.
View Calculate Attendance	If enabled the Calculate Attendance button will display for users to be able to calculate their attendance when manually adding clocking within the clockings section.
View Comments	If enabled, this will allow the user to be able to add comments to their clockings.
Maintain Manual Clocks	If enabled, this will allow the user to be able to
Insert Clocks	If enabled, this will allow user to insert clockings
Work Pattern	If enabled, this will provide the option to enter Work Patterns against a clocking

2.2.4. Column Selection

The Column selection controls what additional columns are available when entering timesheets via the Timesheet Input screen e.g. cost centre, project code. By default, Pay Code is always displayed and cannot be unselected. However, you can amend the position, order, of the pay code column. The pay code type column always displays next to the Pay Code which indicates if the pay codes inputs is expected in Minutes (M), Decimal (D), Units (U) or Value (V).

The **Column Selection** screen contains the following fields:

Field	Details								
Position	Changes the order of the columns presented to the end users within the Timesheet Input Screen.								
Column	Select the column required from the available dropdown list: <table border="1"> <tr> <td>Cost Centre*</td><td>Project*</td></tr> <tr> <td>Position/Point*</td><td>Location</td></tr> <tr> <td>Expense</td><td>User Fields 1 to 5</td></tr> <tr> <td>Job</td><td>External Rate of Pay*</td></tr> </table> Where the field is marked with an *, Timesheets support additional configuration to include these columns when transferring timesheet to payroll for payments. For example, using cost centre, timesheets transferred from WFM can be configured to also transfer the cost centre recorded when populating the Timesheet table in Payroll.	Cost Centre*	Project*	Position/Point*	Location	Expense	User Fields 1 to 5	Job	External Rate of Pay*
Cost Centre*	Project*								
Position/Point*	Location								
Expense	User Fields 1 to 5								
Job	External Rate of Pay*								
Header	This is a free text field which can be used to add an alternative column description. For example, Project could be called Task or Pay Code amended to Time Code on the timesheet. Maximum limit of 40 characters.								
Mandatory	If the toggle is enabled, this makes the column mandatory to populate when completing timesheet input.								
Delete	To delete/remove a column from the template.								

To Add a Column Section:

1. Click **Add**.
2. **Select** the position of the column.
3. Using the drop-down menu, **select** the column value.
4. The Header will automatically populate with the same information as the Column field, this can be edited on screen if required.
5. **Enable** the toggle to make the select Mandatory.
6. To delete a Column selection, click **delete**.

Note: Pay Code are always a mandatory and cannot be removed from the template.

2.2.5. Timesheet Claims Actions

Depending on the template type chosen e.g. Employee/Manage the fields available on this screen will vary. All fields available have been included in the table below.

Timesheets Claim Actions – Employee Mode

When configuring an Employee's timesheet Template, selective options can be made available to Employees when using Timesheet Input or Employee Timesheets Claims Summary screens.

Within the **Timesheet Claims Actions** screen the following fields can be made available to Employees:

Field	Details
Submit Timesheets for Approval	Submit button available to employees on the Employee Timesheet Claim Summary Screen. Once submitted, a claim is created and sent into workflow for manager approval.
Recall Timesheets	Provide Employees with the option recall a Timesheet claim that has been submitted. 'Recalling' enables employees call back or 'un-submit'

Field	Details
	a claim previously submitted in error where they can make update and re-submit.  Note: Only Claims with a status of 'Submitted' can be recalled, if the claim has been approved it cannot be recalled. In addition, Workflow supports configuration to alert managers where a timesheet claim was recalled.
Employee Leave Request Entry	Enables employees call the Leave Request screen from actions button in the Timesheet Input screen.
Transactional Based Workflow	Timesheets Claims supports two claims method: Direct Approval - Who I Work For e.g. An employee's claim is approved by the Employees 'Report to' Manager (similar to Leave Approval). Indirect Approval - Where Worked, employee timesheet claims workflow is directed to the organisational level of 'Where Worked' for approval (which sits outside of their direct reporting line).
Acknowledge Submission of Timesheets	User are prompted to acknowledge before a timesheet can be submitted for approval.
Acknowledge Text to Display	Text Displayed to enter user as part of the acknowledge submission.
Acknowledge Checkbox	Checkbox for Employee's to acknowledge they've read the message.
Default Template	Where multiple templates are in existing, where set employees are automatically be assigned the default template.

Timesheets Claim Actions - Admin/Manager Mode

When configuring a Manager/Admin's Timesheet Template, there are selective options available specifically aim at Managers using the Timesheet input or Timesheet Claims Summary screens when approving timesheets.

Within the **Timesheet Claims Actions** screen the following fields can be made available to Managers:

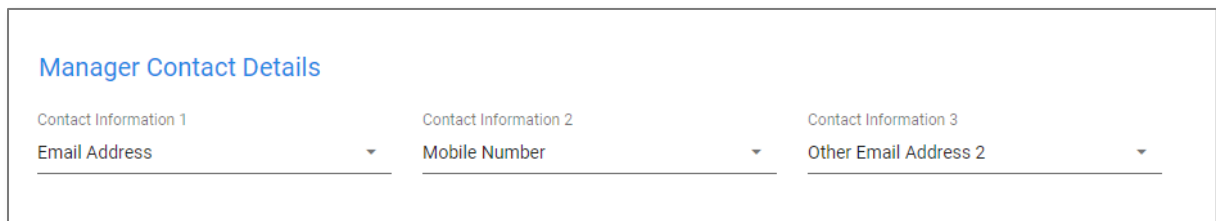

Field	Details
Manager Absence Entry	Option to enable a call to the Absence Entry screen from the timesheet Input navigation option.
Approve Timesheets	Timesheet claim Approval button available within the Timesheet Summary Screen. Once approved, workflow moves the claim to the next level or final approval the claim. Actions taken by the managers are supported through workflow.
Comment Required of Approval	Where on Managers are forced to enter a comment as part of the approval process.
Reject Timesheets	Timesheet claim rejection button available to managers within the Timesheet Summary Screen. Once rejected the claim is sent back to the employee for re-work, whereby on update they can re-submit the claim. Actions taken by the managers are supported through workflow
Comment Required on Rejection	Where on Managers are forced to enter a comment as part of the rejection process.
Cancel Timesheets	Timesheet claims cancel button available to managers on the Timesheet Summary Screen. Once cancelled the claim process is ended. Actions taken by the managers can be configured through workflow to notify the various roles of the cancellation. Notes, ○ Once cancelled this ends the workflow and the timesheet claim cannot be uncanceled. ○ Managers can only cancel within the workflow e.g. a manager has completed final approval and the workflow end. The managers can no longer cancel the claim whereas Administrators can complete this process (see Administrator Mode)

Field	Details
Comment Required on Cancellation	Where on Managers are forced to enter a comment as part of the cancellation process.
Submit Timesheets for Approval	Managers can enter timesheet details and submit the claims for approval on behalf of employees. Once submitted the Manager is notified of the claims submission where they must approve as required.
Return Unsubmitted Claims	Not submitted claims are where employees have timesheets recorded but have not submitted them for approval. The option return Not-Submitted Claims is available in the Timesheet Claims Details screen. This should be turned off where large teams are in operation as it will help with performance issues.

All actions e.g. approve, reject etc... taken by managers are logged to the timesheet history table storing the username, date, time and action taken.

Timesheets Claim Actions - Manager Contact Details

For Admin templates only, up to 3 lines of Managers Contact details such as email, mobile can be made available for admins to view from the Admin Claims summary screen.

Manager Contact Details

Contact Information 1
Email Address ▼

Contact Information 2
Mobile Number ▼

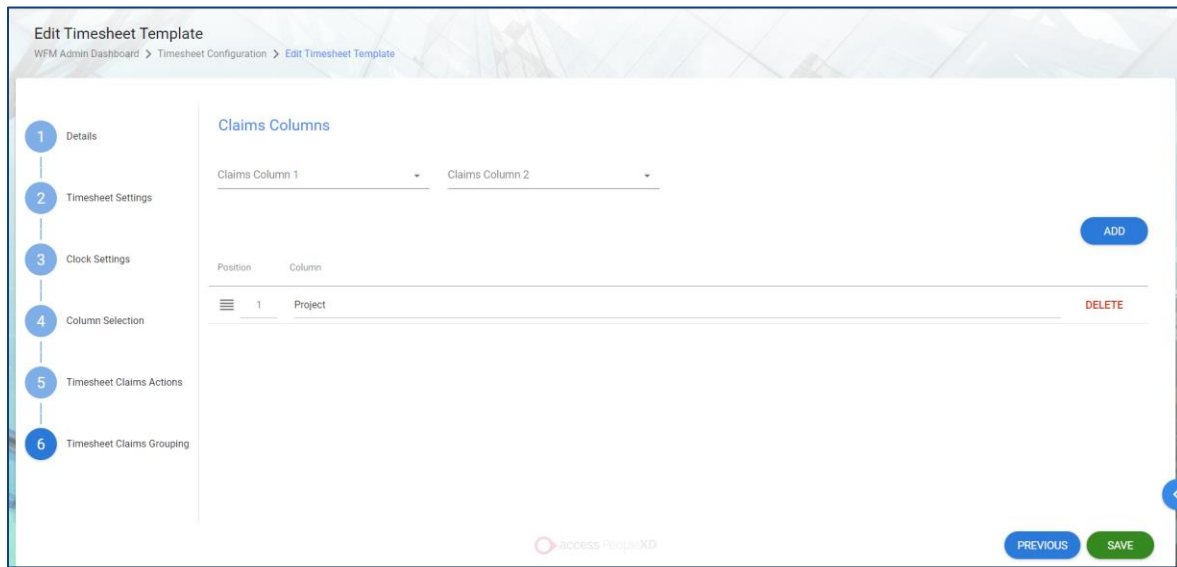

Contact Information 3
Other Email Address 2 ▼

To enable, from the Admin timesheet template:

- Select which contact details are to be displayed.

See section [3.5 Display Manager Contact Information](#) for the supporting menu options.

2.2.6. Timesheet Claims Grouping

Two addition fields can be made available to the Manager and Administrator Claims summary screen. These can be configured to present Manager and Administrators with more information about the claim such as the Employees work group, reason code entered at the details level.

Use the drop-down options under Claim Columns to select the additional fields required, the available columns are:

Field	Details
Cost Centre	Cost Centre entered on the employee's timesheet
Department	Employees home department
Expense	Expenses entered on the employee's timesheet
Ext Rate of Pay	External Rate of pay entered on the employee's timesheets
Job	Job Code entered on the employee's timesheets
Location	Location entered on the employee's timesheets
Point	Point entered on the employee's timesheets
Position	Position entered on the employee's timesheets
Reason	Reason Code entered on the employee's timesheets
User Fields 1 – 5	User Columns 1 to 5 entered on the employees' timesheets
Work Group	Work Group entered on the employee's timesheets

Timesheet Claims Grouping - Additional Claim Groupings

The final step of creating a template involves selecting how this timesheet template is to group its claims. By Default, all Claims include the Pay Code, but if required two additional columns (or groupings) can be included which form part of the claim.

Note: The additional column groupings must be included in Column Selections in Step 4 to make them available for employee input.

By default, employee claims are comprised of a unique combination of the following.

- Header Id, Employee Number, Appointment Id*, Period, Pay Code

Where Additional columns are included, these also form part of the claim. Using cost centre as an example

- Header Id, Employee Number, Appointment Id*, Period, Pay Code & Cost Centre

So, where an employee submits a timesheet claim, it's the unique combination of Header Id, Person, Appointment, Period, Pay Code & Cost Centre that 'groups' each individual claim.

To Add a Claim Column:

1. Click **Add**.
2. **Select** the position of the column.
3. Enter the column value, this must have been included in Column Selection to be available to use.
4. To delete a Column selection, click **delete**.

When you are happy with the criteria selected for your Timesheet Template, click **Save**. The Template will display in the Timesheet Configuration summary screen.

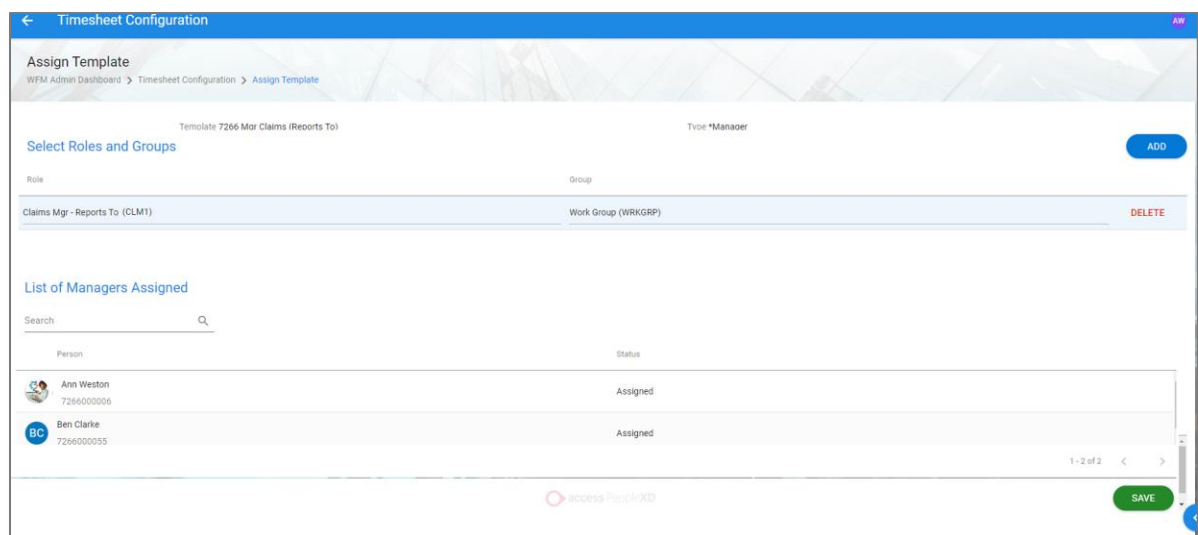

2.3. Assign a Timesheet Template

There is a requirement to assign timesheet templates to users, the way in which this is done for Managers & Administrators is different to Employees. This section will walk you through both assignments.

2.3.1. Assign Manager & Administrators to Templates

For Timesheets Claim Templates there's a requirement to assign Managers or Administrators to their respective templates. To do this:

1. From the *Timesheet Configuration Summary* screen
2. Search for the relevant Manager/Admin Template
3. From its 3-dot menu, click **Assign**
4. In the *Select Roles and Groups* section, click **Add**
5. Select the **Role** from the drop-down list e.g. Reports To Manager
6. Select a **Group** to which that role applies e.g. Work Group
7. Once selected the relevant managers or administrators will be displayed under the **List of Administrators Assigned**
8. Click **Save** to assign the managers to the template
9. Within the Timesheet Configuration Summary screen a count of the Managers will be displayed against the template.

As any number of User defined calendars and managers /administrator combination can be created, a **scheduled job** run every night to rebuild the manger/administrator access so that

they can only see calendars that are applicable to employees within their remit. If the job has not run the error, *you do not have access to the calendar given* is displayed in the timesheet claims widgets.

2.3.2. Assign Templates to Managers to be used in Team Scheduler

Timesheet Templates can be assigned at a Person, Work Group or Company level. The system will look at this setup instead of the assign org role level.

The system will look first to see if a template is assigned at the person level, then look at work group level and finally at company level and use the first assigned template it finds.

 **Note:** Company Level templates are assigned through Back Office. Control parameters - team scheduler timesheet.

Person Level

To assign, edit or delete a Timesheet Template at a Person level, follow the steps below:

1. From the **WFM Admin Dashboard**, select **WFM Person Maintenance**.
2. Search for the user and from their 3-dot menu select **View**.
3. Navigate to the **Work Group Override** screen.
4. Search for **Team Scheduler Timesheet Template** and using the 3-dot menu, click **Edit Override**.
5. **Select** the template from the drop-down menu and click **OK**.
6. The Template will display under the **Person Override Value** heading.
7. To delete a template from a Person Level select **Delete Override**.

Work Group Level

To assign, edit or delete a Timesheet Template at a Work Group level, follow the steps below:

1. From the **WFM Admin Dashboard**, select **WFM Configuration**.
2. Under Configuration Settings select **Work Groups**.
3. Search for the work group you wish to edit and using the 3-dot menu select **View/Edit Work Group**.
4. Within the General Parameters screen, scroll down to Calculation.
5. From the **Team Scheduler Timesheet Template** field:

6. To assign or edit a template to the Work Group Level use the drop-down menu to select the template you wish to assign and click **Save**.
7. To remove a template from the Work Group level, select the Team Scheduler Timesheet field and click the **X** to the right of the assigned template, then click **Save**.

Company Level

To assign, edit or delete a Timesheet Template at a Work Group level, follow the steps below:

1. Connect to **Back Office**.
2. Select **Control parameters**.
3. Select **team scheduler timesheet**.
4. This overrides the Assign option.

2.3.3. Assign Employees to Templates

Criteria groups are used in the process of assigning employees to timesheet templates. Criteria groups allow you to group employees based on reference data in their employee record. For example, you could group all employees in a particular department or location.

Criteria groups will need to be created and activated before they can be used to assign users to a template.

To assign an employee to a template:

1. From the *Timesheet Configuration Summary* screen
2. Search for the relevant *Employee Template*
3. From its 3-dot menu, click **Assign**
4. Click **Activate Criteria Group**
 - From here you can manage all existing criteria groups and create new criteria groups.
5. **Enable** the Active toggle for the required criteria groups
6. Click **Save**
7. Use the breadcrumb to return to the *Assign Template* screen, then select the **Not Assigned** tab
 - Displayed is a list of all users that match the criteria groups activated

8. Employees can be assigned *Individually* or in *Bulk*:
 - To **individually** assign an employee, use their 3-dot menu and click **Assign**
 - To **bulk** assign all employees displayed, click the **Assign button**
9. The employees assigned will now display in the Assigned tab and within the Timesheet Configuration Summary screen a count of employees will be displayed against the template

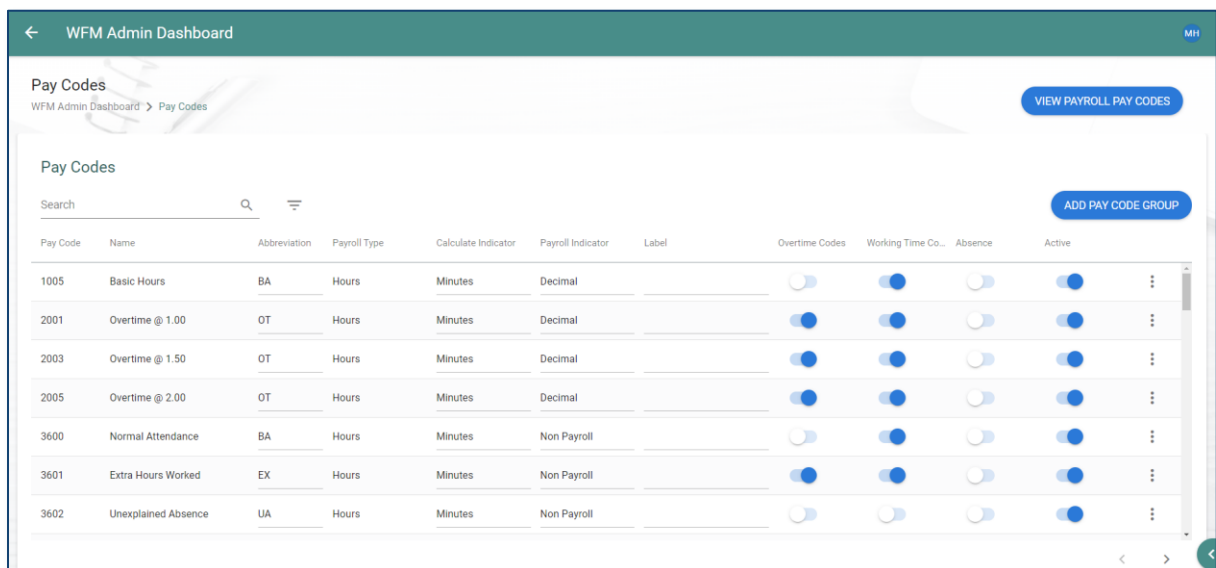

2.4. Pay Codes Configuration for Timesheet Claims

The following sections cover the Pay Code configuration required to support Timesheet Claims.

2.4.1. How to access the Pay Codes Screen

To access the Pay Codes screen, complete the following steps:

1. Go to *WFM Admin Dashboard*.
2. Select **WFM Configuration**.
3. Select **Pay Codes**
4. The Pay Codes summary screen will display.

Pay Code	Name	Abbreviation	Payroll Type	Calculate Indicator	Payroll Indicator	Label	Overtime Codes	Working Time Co.	Absence	Active
1005	Basic Hours	BA	Hours	Minutes	Decimal		☐	☒	☐	☒
2001	Overtime @ 1.00	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
2003	Overtime @ 1.50	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
2005	Overtime @ 2.00	OT	Hours	Minutes	Decimal		☒	☒	☐	☒
3600	Normal Attendance	BA	Hours	Minutes	Non Payroll		☐	☒	☐	☒
3601	Extra Hours Worked	EX	Hours	Minutes	Non Payroll		☒	☒	☐	☒
3602	Unexplained Absence	UA	Hours	Minutes	Non Payroll		☐	☐	☐	☒

From here you can view, add and update Pay Codes. See our guide [Pay Codes – User Guide](#), for further guidance.

2.4.2. Configuration

From the Pay Codes summary screen locate the relevant pay code and from its 3-dot menu select **View/Edit Pay Code**, to open the pay code configuration screens.

For the purpose of this guide to support Employee, Manager and Admin Timesheet Claims configuration of the following tab will be covered:

- Time Sheet Claims

The **Time Sheet Claims** screen displays the following fields:

Field	Details
Claim Process Code	The workflow process assigned to the pay code. The Workflow process drive the notifications to Employee, Managers of action taken e.g. Submitted, Approved, Rejected, Recalled, Cancelled. Etc.
Completed Process Code (Admins only)	Allows Administrators to action Timesheet Claims where the initial workflow was completed e.g. cancel or reject a timesheet claim that was previously approved by a manager (and approved was the final step)
Unsubmitted Process Code (Admin Only)	Workflow to send reminder notification to Employees where they have claims that have not been submitted.
Timesheet Claim Pay Code Toggle	The Timesheet Claim Pay Codes toggle needs to be explicitly set for claims pay codes. These separates pay codes into ones that form part of the claims (e.g. Extra Hours Worked) and those that do not (e.g. Annual Leave). Pay Codes that are summed and displayed in the Timesheets Claims summary screens are limited to pay codes that have the indicator 'Timesheet Summary' enabled. • Set the Timesheet Claim Pay indicator to 'On' for the relevant pay codes. • If there's a requirement to limits the pay code lists returned, this can be completed through use of personalised pay code. Note: Timesheet Claims support pay codes in Hours, Values or Units, to set daily limits. • Daily & Entry limits can be applied to the pay code entries.

The timesheet Input screen can be configured to restrict pay code entry to stop entries being recorded in the future e.g. cannot input timesheets for next week.

The ***Timesheet Input Restriction*** section displays the following fields:

Field	Details
Restrict Input of this code to todays date	Enabling stops enter of the pay code post today's date.
Plus/Minus Days	The today's date values can be adjusted as required. For example of +1 was entered, timesheet entry will be todays date + 1 day (e.g. tomorrow).

2.5. Managing your Timesheet Templates

From the Timesheet Configuration summary screen you can manage existing templates. From the 3-dot menu of an existing template you have the option to:

- Edit
- Clone
- Assign
- Delete

2.5.1. Editing a Template

Using the Edit option allows you to make updates to an existing template. Navigate to the relevant step within the *edit timesheet template wizard* that needs amending, make your changes and then click on step 6 and **Save** to capture all updates.

2.5.2. Assigning a Template

The Assign option is used to assign Managers & Administrators to a respective template, as outlined in section [2.3.1 Assigning Managers & Administrators to Templates](#).

This option can also be used to view, assign or unassign an employee from a template.

To do this:

- **Navigate** to the relevant Employee Template
- Expand the 3-dot menu and select **Assign**.

- Under the **Assigned** section you will see a list of all employees assigned to the template.
- Under the **Not Assigned** section you will see all employee not assigned to the template.
- You can search for an employee, in either section, and by using their 3-dot menu Assign or Unassign them from the template.

2.5.3. Cloning a Template

The Clone option allows you to copy an existing template. This can be beneficial as it will retain all the existing template parameters set therefore saving you time.

Note: Assignments do not copy over from a cloned template.

To do this:

- **Navigate** to the relevant Employee Template
- Expand the 3-dot menu and select **Clone**
- Enter the Name you want to give your new template
- Click **OK**
- The new template will now display in the Timesheet Configuration summary screen for you to further configure or assign users to.

2.5.4. Deleting a Template

Templates can be deleted if they are no longer required. In order to delete a template it cannot be in use; all users are required to be unassigned. You can then:

- **Navigate** to the relevant Employee Template
- Expand the 3-dot menu and select **Delete**
- A message will appear asking you to confirm you want to delete, click **Yes**

3. Menu Options

3.1. Importing Menu Options

A menu profile **WFM_WORKGROUP_CONFIG_ACCESS** has been created to provide users full access to the Balance Configuration screens. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Admin
3. Select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile, for example, **WFM_WORKGROUP_CONFIG_ACCESS**
6. Review the Confirmation message and click **Yes**.
7. Once imported, the menu options and webservices are assigned to the existing menu profile.

3.2. Employee Menu Access

Employee Menu options supporting timesheet claims. Employees can see and summary of the claims or the current period with the option to drill to review the claims.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Employee menu profile e.g., Coreportal_Employee
3. From its 3-dot menu, select **Manage Menu Options**.
4. Search for and enable the menu options below:

Menu Profile	Menu ID	System
Employee Claims Summary Widget	MAIN_MENU.TIMESHEET_CLAIMS_EMP_SUMMARY	CorePortal
CorePortal - Timesheet Employee Summary	MAIN_MENU.TIMESHEET_EMP_SUMMARY	CorePortal

3.3. Manager Menu Access

Manager Menu options supporting timesheet claims. The Manager Widget displays a count of timesheet claims that require action and a summary of claims actioned in the last 30 days. The

Manager Claims summary lists the summary and details of the claim which is from the Manager Claims widget or directly from the Managers Workforce Management dashboard.

To do this:

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant Manager menu profile e.g., Coreportal_Manager
3. From its 3-dot menu, select **Manage Menu Options**.
4. Search for and enable the menu options below.

Menu Profile	Menu ID	System
Timesheet Claims Manager Summary Widget	MAIN_MENU.TIMESHEET_CLAIMS_MGR_SUMMARY	CorePortal
Timesheet Claims Manager	WFM_MANAGER_MENU.TIMESHEET_CLAIMS_MGR	CorePortal
Timesheet Claims Bulk Approve	MAIN_MENU.TIMESHEET_CLAIMS_BULK_APPROVE	CorePortal
Timesheet Claims Bulk Reject	MAIN_MENU.TIMESHEET_CLAIMS_BULK_REJECT	CorePortal
