Document Control

Version	Date	Author	Details
1.0	26/06/2025	Georga Edwards	Published to Customer Success Portal

1. Overview

This document goes through the configuration required to setup the upload documentation functionality within PeopleXD for use with Leave Request/Absence Entry. This can be used by employees when they have been out on sick leave and need to submit the necessary documentation when they return to work.

We will cover:

- Document Type setup & administration
- Pay Code configuration to support document uploads
- Menu Access setup

See our [Document & Email Generation](#) guide for guidance on allowing users to automatically generate documents, letters and emails based on employee data e.g., employee contracts, letters of offer, HR Forms etc.

2. Document Type Setup

Documentation management and access is controlled by the Document Type. Once created the document type can be configured to determine whether it is driven by Person or Contract and who can View/Upload.

The document type option enables you to setup, maintain, activate and manage the options available to ESS and MSS users. For example:

- An employee can see documents that are stored about them if the document type is marked as 'ESS' in the 'My Profile' section of PeopleXD.
- A manager can see documents for employees that report to them if they have access over a person (i.e. can see their profile) and the document type is marked as 'MSS'.

To Add a Document Type:

1. Navigate to the *People Management Dashboard* and select the **Data Centre**.
2. **Open** Reference Data.
3. Select the **Document Type** tile.
 - The *Document Type* screen displays, where all existing document types are displayed.
 - Use the *Filter* to refine your view by Type, Description or Active.
4. Click **Add**.
5. Enter the **Document Type Code** (max length 6 characters) and **Description**.
6. Turn on the **Active** toggle.
7. Expand its 3-dot menu and select **Options**.
8. The Advanced Options window is displayed. Here you can set:
 - The **Document Type Indicator** to determine whether the document is held at person or contract (i.e. person driven, or appointment driven)
 - The **CorePortal** user access, see table below for available options:

MSS/ESS	Add	Comment
MSS = Y	N	Manager can View, but cannot add documents
MSS = Y	Y	Manager can View & can add documents
MSS = N	N/A	Cannot View or Add documents
ESS = Y	N	Employee can View, but cannot add documents

MSS/ESS	Add	Comment
ESS = Y	Y	Employee can View & can add documents
ESS = N	N/A	Cannot View or Add documents

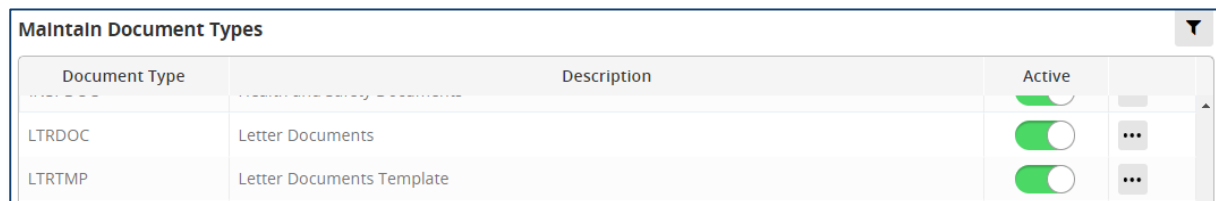

9. Click **OK** and click the X to close the window down.

Its recommend that at least one document type is set-up for the leave/absences, but further consideration should be taken as to whether more than one is required. For example, you may want to grant Manager access to view/add document for Sickness but stop Employees from adding or even viewing. Whereas in the case of Exam leave you may wish to allow both Managers and Employee add and view documents.

To Copy a Document Type:

Copying a document type can be beneficial as it maintains the existing configuration. To do this:

1. Navigate to the *Maintain Document Type* screen.
2. Expand the 3-dot menu of the document type to be copied and select **Duplicate**.
3. The duplicate document type will display.
4. **Edit** the Document Type Code and description, if required.
5. Click **Save**.

Document Type	Description	Active	
LTRDOC	Letter Documents	☒	...
LTRTMP	Letter Documents Template	☒	...

To Delete a Document Type:

1. Navigate to the *Maintain Document Type* screen.
2. Expand the 3-dot menu of the document type to be deleted and select **Delete**.
3. Click **Save**.

3. Pay Code Configuration

Once your Document Types have been setup you will next need to configure what pay codes are required to support document uploads as part of the Leave Request/Absence Entry process. This is a one-to-one relationship.

To Configure a Pay Code:

1. Navigate to the *WFM Admin Dashboard* and select **WFM Configuration**.
2. Select the **Pay Codes** tile.
3. Expand the 3-dot menu of the relevant pay code and select **View/Edit Pay Code**.
4. Select the *Leave Request Documents* screen.
5. Turn on the **Supporting Documents Required** toggle.
6. Enter guidance notes or information for the user, if required.
7. Select the **Document Type** from the dropdown list.
8. Select a **Warning Level** from the dropdown options.

Option	Description
Allow	Documents are available to be uploaded but the system will not issue alerts if documents are not attached.
Warning	Part of the leave request submit and absence entry, warning message will be issued where no document has been attached, but the user can proceed.
Stop	Part of the leave request submit and absence entry, stop message will be issued where no document has been attached and the user cannot continue.

9. Enter the **Document Lead Time**. This is the number of days allowed before documentation is required.
10. Click **Save**.

4. Menu Access

Certain menu options will need to be turned on to allow managers and employees to access the upload feature within PeopleXD.

4.1. Employee Menu Access

To grant the employee the ability to upload & view documents, enable the menu option below. This gives the administrators the ability to control, per menu profile, which users have access to upload documents.

1. Go to **Security**
2. Select **Menu Profiles**
3. Search for the relevant menu profile e.g. Coreportal_Employee
4. Expand it's 3-dot menu and select **Manage Menu Options**
5. Search for **CorePortal - Employee Document Upload**
6. Turn on the **Active** toggle
7. Your menu profile is now updated.

4.2. Manager Menu Access

To grant managers the ability to upload & view documents, enable the below menu option.

1. Go to **Security**
2. Select **Menu Profiles**
3. Search for the relevant menu profile e.g. Coreportal_Manager
4. Expand it's 3-dot menu and select **Manage Menu Options**
5. Search for **CorePortal - Manager Document Upload**
6. Turn on the **Active** toggle
7. Your menu profile is now updated.

4.3. Person Absences Menu Access

The Person Absence screen allows a manager to list absences on screen in date ascending order and to enter in absences from Team Scheduler.

1. Go to **Security**
2. Select **Menu Profiles**
3. Search for the relevant menu profile e.g. Coreportal_Manager
4. Expand it's 3-dot menu and select **Manage Menu Options**
5. Search for **Core Portal - Manager Person Absence Screen**
6. Turn on the **Active** toggle
7. Your menu profile is now updated.

For the Absence button to be visible on the Team Scheduler the parameter `cp_sch_show_addabs` needs to be set to Y. To do this:

1. Navigate to the *Administrator Dashboard* and select **Site Manager**.
2. Open **Admin Settings**.
3. Search for **cp_sch_show_addabs**.
4. Edit the Current Value to **Y**.
