1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to explain the WFM Year End Tasks screen which removes the year end guesswork by providing system administrators with a centralised view of the year end tasks and actions required.

The WFM Year End Tasks screen displays 7 predefined year end tasks which are required to keep the WFM system up to date. Administrators can also tailor this list, to their organisation requirements, by adding checklist items to include additional year end tasks.

The administration of year end tasks is an WFM Administrator task.

This document covers how to access the WFM Year End task screen, outlines the predefined year end tasks and guides you through adding your own year-end tasks to the list.

1.2. Granting access to the WFM Year End Tasks

Before you can access the WFM Year End tasks screen and complete your year-end tasks you will need to ensure:

- The **WFM_Year_End** menu profile is enabled for the relevant users or imported to an existing menu profile. This will enable all menu options & webservices to the user to access the WFM Year End Tasks functionality. (see [Section 6.1](#) for further guidance)
- Other menu profiles, which may already be enabled but if not are, required to complete Year End Tasks are:
 - **WFM_COMPANY_SETTING_ADMIN**
 - **WFM_BANK_HOLIDAY_CONFIG**
 - **WFM_BALANCE_CONFIGURATION**
 - **WFM_BALANCE ADMIN**
 - **WFM_SHIFTS_TYPES**
- Email Parameters for year-end task notifications need to be configured. (see [Section 5.2](#) for further guidance)

The **WFM Year End Tasks** screen contains the following fields:

Field	Description
Checklist Item	Name of the year end task
Description	Description of the year end task
Status	Displays the status of the task: Action Required – year end task needs updating. Complete – year end task has been completed
Comments	Indicates if a comment has been associated with the task. Y – a comment has been associated N – a comment has not been associated
Enable Email	Notifications are triggered once the threshold is met; this is set to 30 days but can be amended. Notification will be sent, to the Admin, Daily until the task is completed. By default these are enabled, for each task, meaning notifications will be sent alerting the administrator to due tasks.

Field	Description
	If disabled, a warning message requires action. The message states: <i>'You will no longer receive emails when action is required for this item, are you sure you want to disable'.</i>

You can also use the **Add Checklist Item** button to create your own year-end task to be added to the list.

3. Predefined Year End Tasks

Seven predefined year end tasks have been included in the WFM Year End Tasks screen; email notifications can be enabled/disabled and comments added to each task. The tasks are:

- Extend Company Calendar Year
- Extend Company Period
- Extend User Defined Calendar Periods
- Update Bank Holiday Scheme details
- Extend a Balance Calendar
- Complete the Balance Period End
- Extend Non-Cycle Shift (where applicable)

From the associated 3-dot menu of each task, you can:

- **View** – This will display a drill down screen listing the active companies that require updating for next year.
- **View/Edit Comments** – Add/Manage comments on a task. This could be beneficial as instructions, key points, can be added for reference.

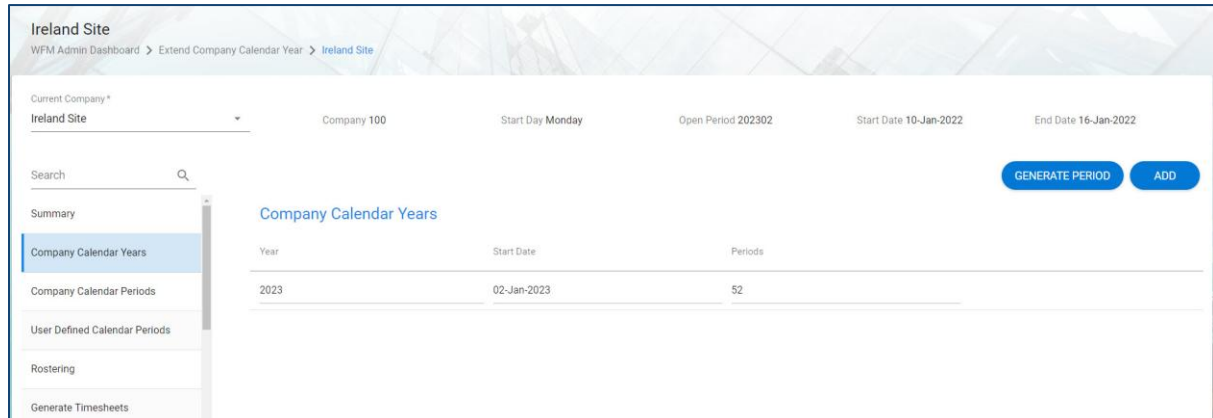

Note: The predefined Year End Task **cannot** be Deleted.

3.1. Extend Company Calendar Year

The WFM System Calendar must be extended each year to cover the next calendar year.

If you have not already extended the system calendar the task will be marked as **Action Required**, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display a list of all active companies that require updating. All Companies will need updated before the task is marked as Complete.
2. Click **View**. This opens the Company Calendar screen for the Company selected.

3. Click the **Add** button. This allows you to add a new calendar year to your company.
4. Click **OK**.
5. A warning message will display stating *'We are now going to auto Generate Periods, do you wish to proceed?'*
6. Click **Yes**. This will auto generate the periods for the company for the year.
7. Your System Calendar is updated.
8. Repeat for all Companies.
9. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance see our guide: [Company and Calendar Configuration](#).

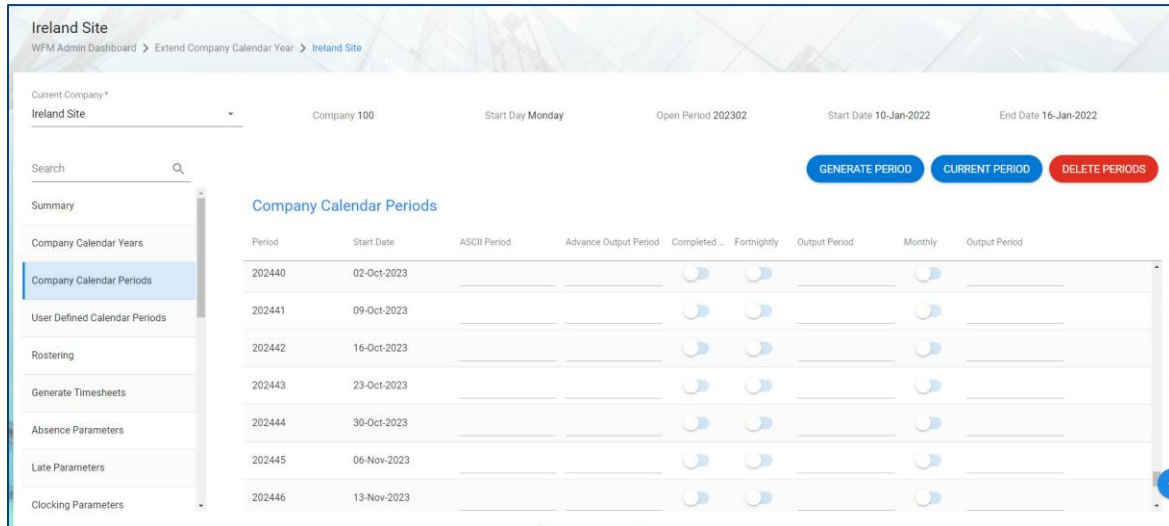

3.2. Extend Company Period

Company periods must be extended for all active companies to cover the next calendar year.

If you have not already extended the company periods the task will be marked as **Action**

Required, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display active companies and their associated period which need to be updated for next year. All Company Periods will need updated before the task is marked as Complete.
2. Click **View**. This opens the Company Calendar Periods screen for the selected company.

3. Click **Generate Period**. This allows you to set up a period by selecting the specific year and setting the fortnightly and monthly starting period, if required.
4. Click **OK**.
5. Your Calendar Periods are extended.
6. Repeat for all Company Calendars.
7. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance see our guide: [Company and Calendar Configuration](#).

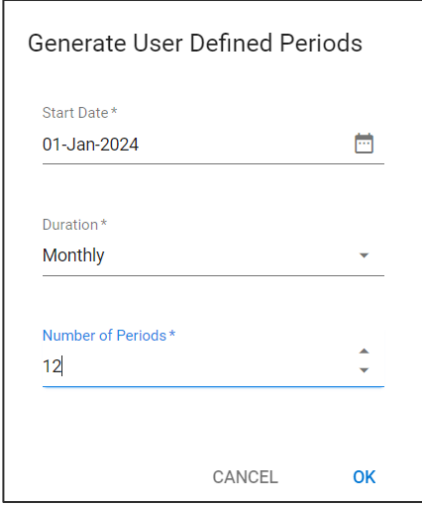

3.3. Extend User Defined Calendar Periods

You need to ensure that your weekly and yearly calendars are extended to cover the periods in your user defined calendar (UDC) otherwise the period will not generate.

If you have not already extended your UDC periods the task will be marked as **Action Required**, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display a list of the active UDC Calendar(s) and the associated key information that is needed to be updated for next year. All UDC Periods will need updated before the task is marked as Complete.
2. Click **View**. This opens the Company UDC Calendar Period screen for the selected UDC Calendar.

3. Click **Generate Period**.
4. Fill in the Start Date, Duration and Number of Periods.

6. Your User Defined Period is extended.
7. Repeat for all User Defined Calendar Periods.
8. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance see our guide: [Company and Calendar Configuration](#).

3.4. Update Bank Holiday Scheme

Bank holidays, for the next calendar year, are required to be added to the system.

Note: The Update Bank Holiday task acts slightly differently to other predefined tasks in that as soon as 1 Bank Holiday is added, for the new year, the task will mark as Complete even though there may be 20 in the year.

If you have not already extended your bank holidays the task will be marked as **Action Required**, you will need to:

1. Expand its 3-dot menu, click **View**. This will display a list of the active Bank holiday schemes and the associated key information that is needed to be updated for next year.
2. Click **View**. This opens the Bank holiday scheme summary screen for the selected Bank Holiday scheme.

3. To configure a Standard Public Holiday, using the General Settings tab:
4. Click **Add**.
5. Fill in your Bank Holidays:
 - **Holiday Date** - select the relevant date.
 - **Paycode** - select the relevant pay code.
 - **Apply Hours** - see options below for more detail:
 - **All** - records a public holiday absence, on this date, for all employees.
 - **Work** - only apply an absence for employees scheduled to work on the date.
 - **Rest** - only apply an absence for employees scheduled to rest on the date.
6. Repeat for all public holiday dates.
7. Click **Save**.
8. Your Bank Holiday scheme has been updated.
9. Repeat for all Bank Holiday Schemes.
10. **Once a Bank holiday is added** the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance on see our article: [Configuring Bank Holiday Schemes](#).

3.5. Extend Balance Calendar

Balances (e.g., Annual Leave, Study Leave) have accompanying calendars that exist independently of the System Calendar. These must be extended each year to cover the next calendar year. For example, if Annual Leave is managed in yearly blocks the Annual Leave balance calendar defines the start date and end date of each leave year (period) and specifies any carry forward rules. It is not possible to close a balance period (complete a period end) until the next period has been configured on the balance calendar.

If you have not already extended your balance calendars the task will be marked as **Action Required**, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display a list of the active Extend Balance Calendars and the associated key information that is needed to be updated for next year.
2. Click **View**. This opens the Extend Balance Calendars screen opens displaying the active Balance Calendars that needs to be updated.

10. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance see our guide: [Balances](#).

3.6. Complete Balance Period End

At the end of the entitlement/balance year, Balance Calendars must be closed to:

- Calculate new entitlements.
- Apply Length of Service adjustments.
- Process carried forward values.

If you have not already completed balance period end your balance period end task will be marked as **Action Required**, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display a list of the active Balance Calendars and the associated key information that is needed to be updated for next year.
2. Click **View**. This opens the Balance Period End screen displaying the active Balance Period End that needs to be updated.

The screenshot shows the 'Annual Leave' section of the WFM Admin Dashboard. The breadcrumb trail is 'WFM Admin Dashboard > Complete Balance Period End > Annual Leave'. On the left sidebar, 'Balance Period End' is selected under the 'Balance Activation' section. The main area displays a table of employee balances for the period '2019 (01-Jan-2019 to 31-Dec-2019)'. The table has columns for Person, Name, Balance, Reserved, Floating, Accrued, Carrying, Taken, Balance, Threshold L, Threshold Status, and Override Threshold. Three employees are listed: John Ryan, Ann Simpson, and William Gordon. At the bottom right, there is a 'RUN PERIOD END' button and a checkbox for 'Include Inactive Balances'.

Person	Name	Balance	Reserved	Floating	Accrued	Carrying	Taken	Balance	Threshold L	Threshold Status	Override Threshold
000004	John Ryan	Days	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	0		
000005	Ann Simpson	Days	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	0		
000047	William Gordon	Days	Open 0 Close 0	Open 28 Close 28	Open 0 Close 0	Open 0 Close 0	Open 0 Close 0	Open 0 Close 28	28		

3. If required, click **View Thresholds** to view current carried forward limits.
4. Click **RUN PERIOD END**.
5. Click **Yes**.
6. The Run Period End button at the end of the screen changes to Running Period End.
Once the process is finished, you will see Complete at the top of the screen.
7. Your Balance Period End is now completed. New balance entitlements have been assigned to employees and the carried forward values updated for employee balances.
8. Repeat for all Companies.
9. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

For further guidance see our guide: [Balance Maintenance](#).

3.7. Extend Non-Cycle Shift

A Non-Cycle shift consists of work patterns which will determine what days and what hours an employee works from one week to the next. Each week is called a sequence, and the sequences will change from week to week (normally used by shift workers in Factories etc)

Non-Cycle shifts are linked to the system calendar which must be extended before you can extend a Non-Cycle shift. If Non-Cycle shifts aren't extended, then the employees will have no way to submit leave requests, managers can't record absences and timesheets won't calculate correctly.

If you have not already extended non-cycle shifts your non-cycle shifts task will be marked as **Action Required**, you will need to:

1. Expand it's 3-dot menu, click **View**. This will display a list of the active Non-Cycle Shifts and the associated key information that is needed to be updated for next year.
2. Click **View**. This opens the Non-Cycle Shifts screen displaying the active non-cycle shift that needs to be updated.

Period	Start Date	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday	Hours

3. Click **Generate Periods**.
4. Fill in the From Period and To Period
5. Select a From and To Period to copy from, from the list.
6. Click **OK**.
7. Click **Save**.
8. Your Non-cycle shift is now extended.
9. Repeat for all Companies.
10. Once completed the Task will be marked as Complete on the WFM Year End Tasks screen and the View option will no longer be available.

4. Add your own Checklist Item

The **Add Checklist Item** button allows administrators to add custom check list item(s) to the Year End Tasks summary screen, so all year end tasks are in one centralised location. Once created custom tasks will become part of your year-end task list. They have a due date associated, ability to add comments and email notifications can be enabled; once marked as complete you will be prompted to add a due date for next year.

4.1. To add a Check List Item:

1. Click the **Add Check List Item** button.
2. Enter the Task Name, Description, Due Date and enable the Send Email toggle, if required.
3. Add a comment and use the Actions drop-down option to manage. Comments can be beneficial as you can add items to be included, steps which might be forgotten etc.
4. Once happy click **OK**.
5. Your Custom task has now been added to the Year End Tasks summary screen you can use its 3-dot menu to:
 - View/Edit Details
 - View/Edit Comments
 - Mark As Completed
 - Delete

4.2. Marking a Custom Item as Complete:

Once you have completed your custom task it can be marked as completed and a due date added for the following year end. To do this:

1. Navigate to the relevant custom task and from its 3-dot menu select **Mark as Complete**.
2. **Enable** the Complete toggle.
3. Use the calendar to **add a new Due Date** to the item. This date sets a reminder for the following year to execute the task. This is mandatory.
4. Click **OK**.
5. The item will now display as Complete.

4.3. To Delete a Custom Item:

1. Navigate to the relevant custom task and from its 3-dot menu select **Delete**.
2. A warning message will display stating 'Are you sure you want to delete this?'
3. Click **Yes**.

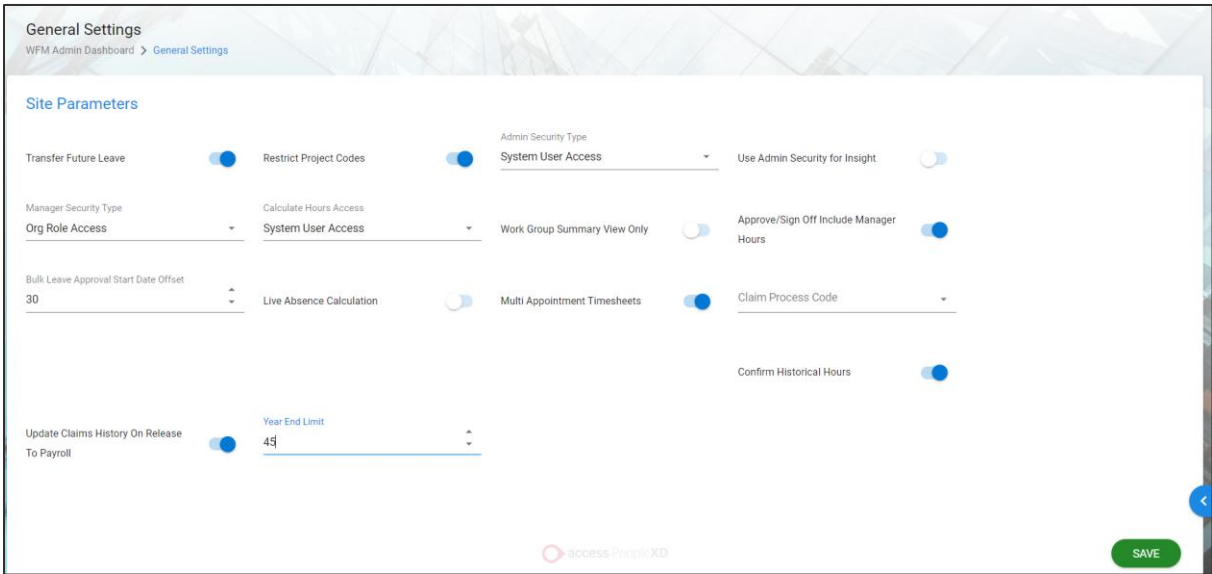

5. Threshold, Notifications and Logic

5.1. Threshold

A parameter has been created for each of the year end tasks, this has been set to 30 days. This means that once the threshold parameter is met it will send a notification to the admin advising the task requires action.

The parameter is an editable field, so can be amended to your organisational requirement if required. To do this:

1. Navigate to **WFM Admin Dashboard**.
2. Select the **General Setting** tile.
3. Update **Year End Limit** to required limit.
4. Click **Save**.
5. This will set all predefined Year End Tasks, with emails enabled, to this limit.

The screenshot shows the 'General Settings' page in the WFM Admin Dashboard. The 'Site Parameters' section is visible, containing various settings. The 'Year End Limit' field, located at the bottom left of the settings grid, is highlighted with a blue box and contains the value '45'. The 'Save' button is located in the bottom right corner of the page.

5.2. Notifications

For the email notifications to be sent 3 email parameters need to be configured. To do this:

1. Navigate to the *Admin Dashboard*
2. Select **Site Manager**
3. Then within the Site Manager widget click **Open** against Admin Settings
4. Search for **ct_year_end_email**, this will return the 3 required email parameters:

Admin Settings				
Administrator Dashboard > Admin Settings				
Coreportal Parameters				
ct_year_end_email Search Whole Phrase				
Parameter Description	Parameter Code	Product Name	Current Value	
The name attached to the from email	ct_year_end_email_fromn	CoreTime	Year End Task Notification	EDIT
The email address attached to the from email	ct_year_end_email_from	CoreTime	dontnotreply@theaccessgroup.com	EDIT
The email address attached to the to email	ct_year_end_email_to	CoreTime	Admininbox.accessgroup.com	EDIT

5. Click **Edit** against each parameter and fill in the Value:
 - *The name attached to the from email* – this should be the subject of the email notification.
 - *The email address attached to the from email* – this should be the email address the notification will be sent from. If this is left blank the system will default to donotreply@theaccessgroup.com
 - *The email address attached to the to email* – this should be the admin inbox email address, or the individual admin email address.
6. Click **Ok**.
7. The email parameters are now configured to send to the Year End Admin if notifications are enabled on the Year End Tasks.

Notifications are sent when the threshold parameters are met, and action is required:

- Notifications are trigger by due date. This means that for the predefined tasks they are triggered by the end of the calendar, period, scheme etc and for custom task by the due date added.
- Notifications for task that are marked as Require Action will be sent daily until the task is complete.
- Notifications are sent to the defined email address in will appear in the Notification Centre.
- Notifications will be sent for each task within the Year End Task summary screen, where the Enable Email toggle is Enabled.
- The Notification job runs nightly so once a task is marked as complete the notifications will cease.

5.3. Logic

Extend Company Calendar Year

API - Extend Company Calendar Year LOGIC:

1. Check the End date of Most recent Company calendar year for all active company(s)
2. Threshold check - if within the threshold
3. Then return that company to be configured for New Year

If the Company Calendar Year is already set up for the New Year - we ignore

Extend Company Period

API – Extend Company Period LOGIC:

- Check the number of companies that have the company calendar year e.g. 2024 and that are active:
 - where no period has been generated where the start period is 202401
 - This will give the list of Calendars Periods that are outstanding and require to be configure for next year.

If the year 202452 is already set up - we ignore

Extend User Defined Calendar Periods

API – Extend User Defined Calendar Periods LOGIC:

1. Check what UDCS are linked to an active work group - this will tell us if the UDC is in use.
2. Then validate if a period start date has been generated for New Year.
 - Monthly = 12 periods
 - Fortnightly = 26 periods
 - Weekly = 52/53 periods
3. Threshold check - if within the threshold 30 days
4. Then return that UDCS to be configured for New Year

If the User Defined Calendar Periods are already set up for New Year - we ignore.

Update Bank Holiday Scheme details

API – Update Bank Holiday Scheme details LOGIC:

1. Identify the year e.g., 2023 and check if there are entries for 2023.

2. Then check if there are entries for 2024 and if not then return (if there is ignore).
3. Threshold check - if within the threshold of 30 days - checking against the end date of the current year.
4. Then return that Bank Holiday to be configured for New Year.
5. We are only validating for they have 1 entry for New Year - we cannot provide validation to confirm the exact number of entries for New Year.

If the Bank Holiday Schemes are already set up for New Year - we ignore.

Extend a Balance Calendar

API – Extend Balance Calendar LOGIC:

1. Check the current period for all active balance calendars, e.g. 2023 (01 Jan 2023 - 31 Dec 2023).
2. Threshold check - if within the threshold of 30 days.
3. Then return that balance calendar to be configured for New Year.

If the Balance Calendar is already set up for the New Year - we ignore.

Complete the Balance Period End

API – Complete Balance Period End LOGIC:

1. Check the current period for all active balance calendars, e.g. 2023(01 Jan 2023 - 31 dec 2023).
2. If completed is set to N.
3. Threshold check - if within the threshold of 30 days.
4. Then return that Balance Period End to be configured for New Year.

If the Balance Period End is already set up for the New Year - we ignore.

Extend Non-Cycle Shift

API – Extend Non-Cycle Shift LOGIC:

1. Check the shift type is period and active.
2. Get the last entry of period from this it will give the end date.
3. Threshold check - if within the threshold of 30 days.
4. Then return that Non-Cycle Shifts to be configured for New Year.

If the Non-Cycle Shifts have already been set up for the New Year - we ignore.

6. Menu Options

6.1. Importing Menu Options

A menu profile **WFM_YEAR_END** has been created to provide users full access to the Balance Configuration screens. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security*.
2. Select **Menu Profiles**.
3. Search for the relevant menu profile e.g., Coreportal_Admin.
4. Select **Import Menu Options** from the drop-down menu.
5. Select **From existing menu profile**.
6. Click **OK**
7. Search for **WFM_Year_End**
8. Click **OK** and you receive a confirmation message.

Other Menu Profiles, you may already have imported, but will require to complete Year End Tasks:

- **WFM_COMPANY_SETTING_ADMIN** – for processing Company Year, Calendar & UDC's
- **WFM_BANK_HOLIDAY_CONFIG** – Update Bank Holidays
- **WFM_BALANCE_CONFIGURATION** – Extend Balance Calendar
- **WFM_BALANCE ADMIN** – Complete Balance Period End
- **WFM_SHIFTS_TYPES** – Extend Non-Cycle Shifts

6.2. Menu Options

These menu options ONLY give access to the WFM Year End Task list, they do not include ALL the other menu options required to view or perform all the tasks within each of the lists.

The following menu options need to be enabled for access to the WFM Year End Tasks screen.

All menu options are included in the menu profile **WFM_Year_End**

7. FAQs

To support you with the WFM year end process, we have collated the most common questions you've asked us:

Question	Answer
When do I run Period Year End?	Period Year End can only be run when the last week of the previous period has been closed in WFM, i.e. the first Monday of January. For example, if the 31st December falls mid-week, then it is going to be the following Monday before the process can be run.
When does Length of Service (LOS) calculate?	LOS will calculate during the overnight calculation after Period Year End has been run. As a result, you won't see LOS addition until the day after Period Year end has been run.
Do I need to adjust the Calendars?	Company calendar (and UDCs if in use) must be extended until the end of the calendar year at minimum, until the end of the balance year if balance year is a mid-year. It can also be extended for future years.
When do I set the Carry forward values?	Carry forward values are set during the previous year's Year End process to affect values carrying into the new balance year. For example, when running period year end for 2024 to open 2025, the carry forward values are set then in the 2025 Balance Calendar to dictate the carry forward values that can be brought from 2025 to 2026.
