1. Overview

1.1. Purpose of the Guide

Work Groups are groupings of personnel that are used, amongst other purposes, to control access for supervisors. They also can determine whether a group is to feed timesheets to Payroll (some groups of workers may clock in and out, but this is for tracking rather than payment purposes).

Work Groups provide the ability to treat workers who have, otherwise, the same working roster (Shift Type) in slightly different ways.

For example, one group of workers, might be Computer Data Input personnel who normally work from home and who, unlike other Day Workers, do not Clock In. These Data Input personnel could all be put into a new Work Group separate from the normal Day Workers, who Clock In and Out. This new Work Group could be set up to generate a default number of hours irrespective of whether clockings were received.

The purpose of this guide is to show how to manage Work Groups and explain the various configuration screens.

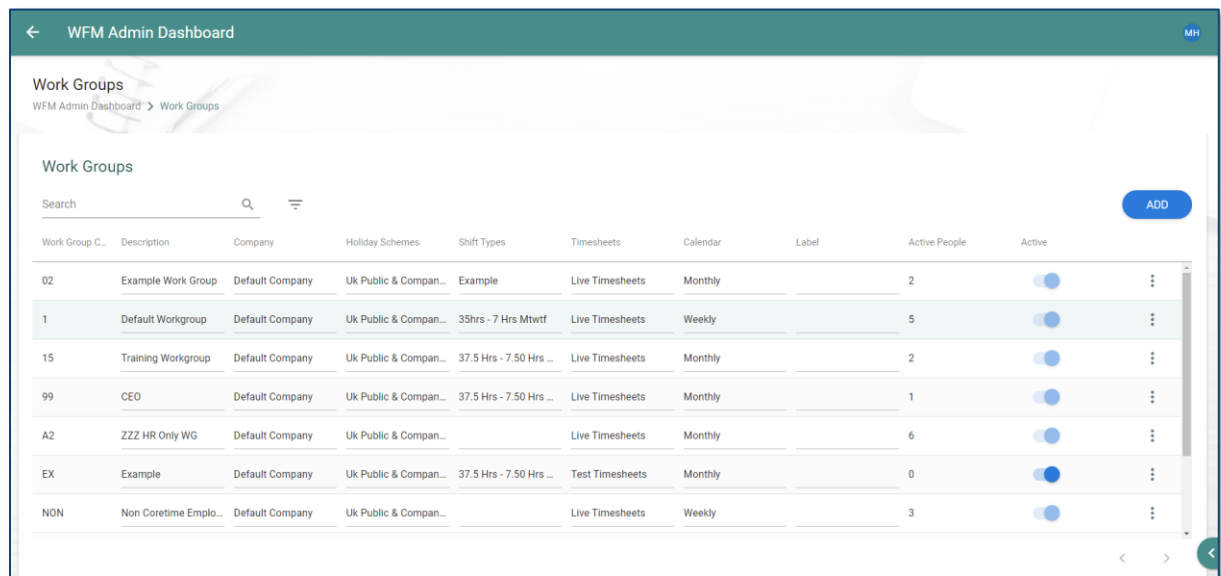

2. Work Group Screen

The Work Group screen is where administrators can manage work groups for their organisation. The screen lists all Work Groups created and shows if they are active or not. This screen can be used to create new work groups, copy existing work groups and further configure groups to organisational requirements.

2.1. Accessing the Work Group Screen

To access the *Work Group* screen, complete the following:

1. Quick jump to the *WFM Admin Dashboard*
2. Select **WFM Configuration**
3. Select **Work Groups**.
4. The screen displays.

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific work pattern you wish to configure.
Filter	Use the filter button to refine your search. You can filter by, the following, and click Apply to filter the results. - Companies - Shift Type - Label - Active - Holiday Scheme - Calendar - Timesheets - No Active People

The **Work Group** screen displays the following fields:

Options	Details
Work Group Code	The code linked to specific Work Group. This field is non editable. It is recommended that a meaningful code be used to easily identify the work group e.g. A600.

Options	Details
Work Group Name	The name of the Work Group. This can be edited directly from the grid. It is recommended that a meaningful description be used to easily identify the work group e.g. Shift A 06:00 Start.
Company	The specific company associated with the Work Group. This can be directly edited from the grid. Each work group must be attached to a WFM company for employee access purposes.
Holiday Scheme	A Holiday Scheme can be attached to the work group, specifying the Company or Public Holidays, which affect that Work Group. This can be directly edited from the grid.
Shift Type	A default Shift Type can be attached to the Work Group. When an employee is assigned this Work Group through the Person Maintenance it will automatically pick up the Shift Type on the Work Group as default if a shift type is not assigned to the employee through the Maintain Person Shift Type form. This can be directly edited from the grid.
Timesheets	Timesheets associated with the Work Group. This can be directly edited from the grid.
Calendar	This can be directly edited from the grid.
Label	This is a free text label which gathers work groups together to facilitate searches. Labels are updated on the summary grid of the <i>Work Group Details Screen</i> under General Parameters .
Active People	Number of active employees in the Work Group.
Active Indicator	By default, any new or existing Work Groups with no status will be marked as Active.

2.1.1. How to Add a Work Group

To add a new work group, complete the following steps:

1. Click **Add** at the top of the screen.
2. Fill in the mandatory fields such as **Work Group Code, Description, Company & Timesheet**.
3. Click **OK**.

4. Your new Work Group will open for you to further configure, using the tabs on the left-hand side. For example, add Payment Rules and Trigger Points.
5. Once your Work Group is fully configured, click **Save**.
6. Your Work Group will now display as Active on the Work Group screen.

2.1.2. How to Copy a Work Group

Copying an existing Work Group can be beneficial as the work group you copy will retain the same configuration, therefore saving you time.

To copy a work group, complete the following steps:

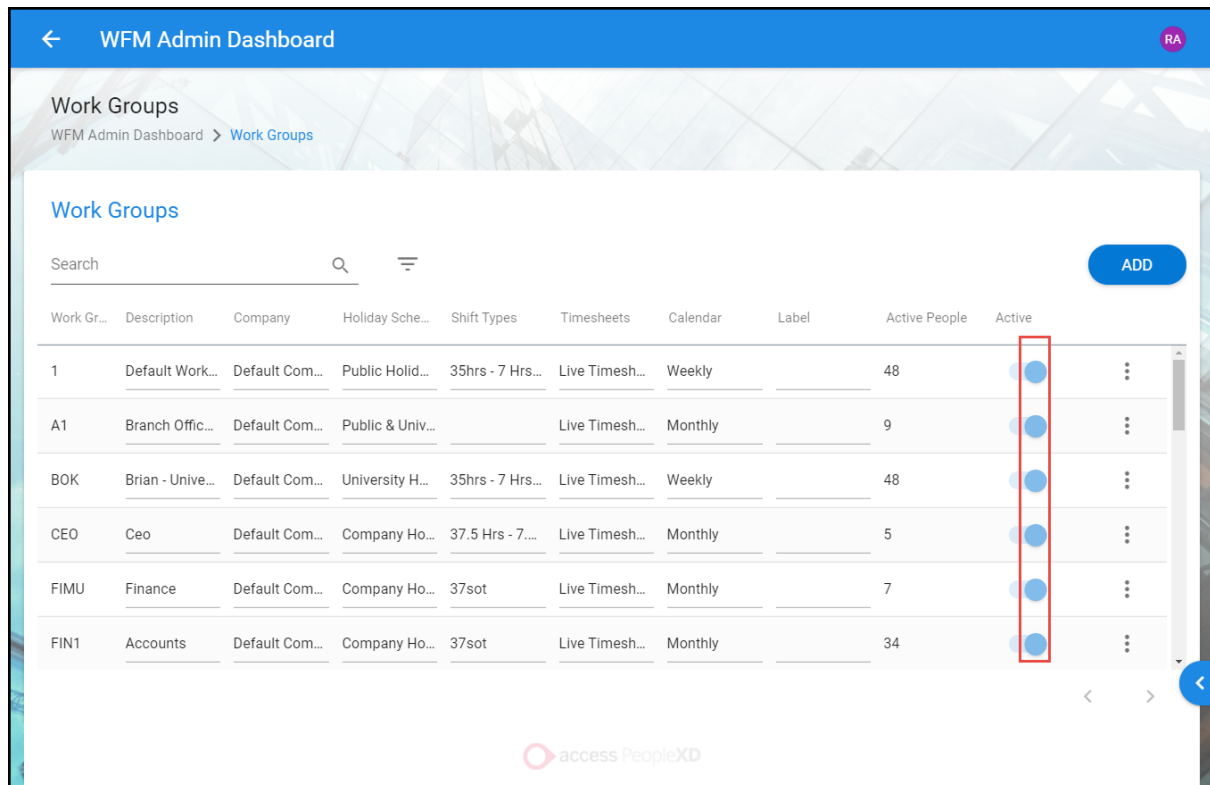

1. Select **Copy Work Group** from the 3-dot menu of the work group you wish to copy.
2. Fill in the **New Work Group Code**.
3. Fill in the **New Work Group Name**.
4. Click **OK**.
5. Your copied Work Group will open for you to further configure.

2.1.3. How to Mark a Workgroup Inactive

You can mark a Work Group as Inactive when it is no longer in use. This can only be done when there are no active employees assigned.

The Work Group screen is filtered only to display active Work Groups so once you make a group Inactive it will no longer display. Users can toggle the Active Indicator to No, on the Filter, to show all Inactive Work Groups.

Use the Active Toggle to make your Work Group Inactive.

2.1.4. How to Delete a Work Group

Work groups can be deleted on this screen. It is important to check that the Work Group you are deleting has no employees or underlying tables assigned to it.

To Delete a Work Group:

1. Select **Delete** from the 3-dot menu of the work group you wish to delete.
2. Confirm **YES**, to the warning message.
3. The Work Group is now deleted and no longer displays.

Note: On deletion the system validates to ensure that no personnel are assigned to the work group being deleted.

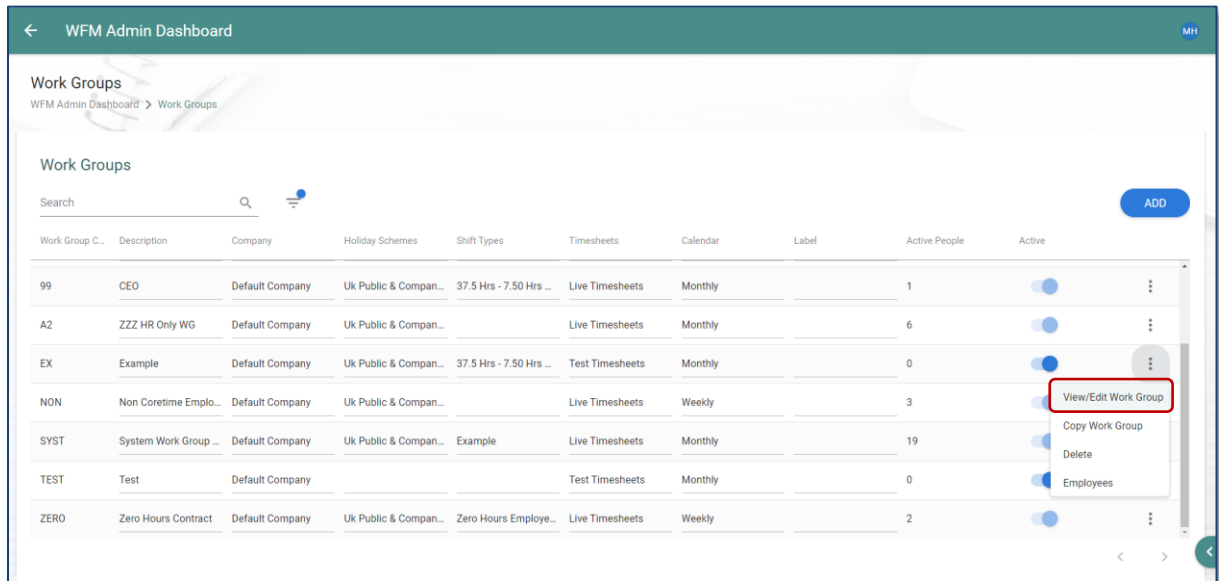

2.1.5. View Active User Assigned to a Work Group

The total number of active people assigned to the work group can be seen from the Work Group summary screen. To view a list of these employees, select **Employees** from the 3-dot menu of the relevant work group.

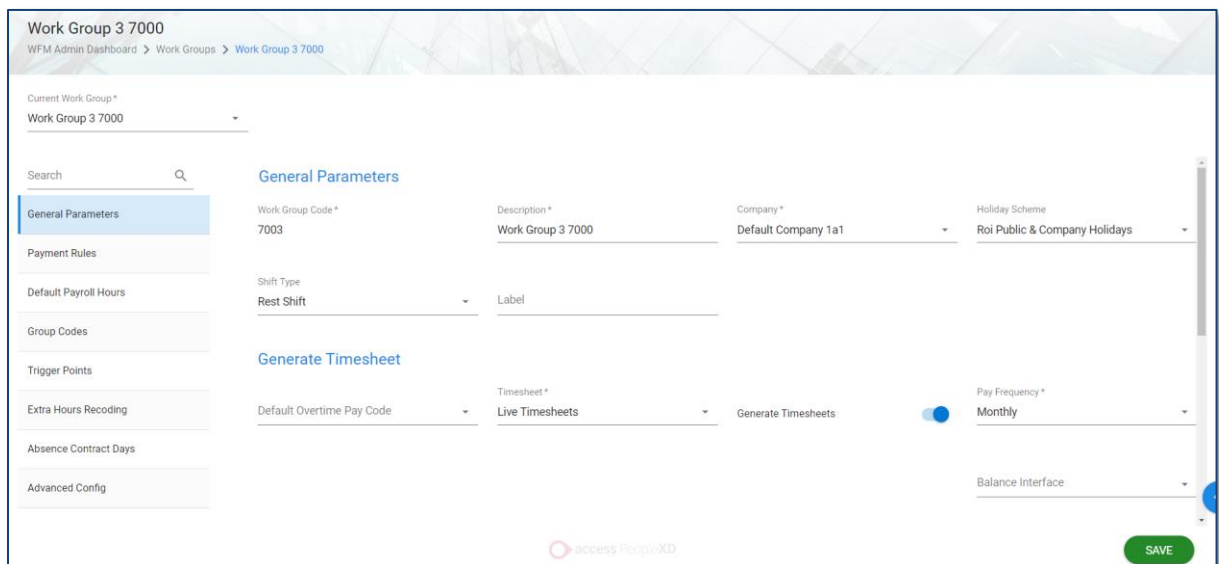

3. Configuration

The configuration screens allow you to customise and configure work groups and can be accessed through the Work Groups screen.

Simply select the work group you wish to configure and select **View/Edit Work Group** from the 3-dot menu to access the configuration screens.

This brings you directly to the *Work Group Configuration* screens.

3.1. General Parameters

The *General Parameters* screen features the default parameters which control the Workgroups. Here you can decide the shifts which the employee works and whether hours need to be signed off.

The **General Parameters** section contains the following fields:

Field	Notes
Work Group Code	The code to identify the Work Group. It is recommended that a meaningful code be used to easily identify the work group e.g. A600.
Description	The name of the Work Group. It is recommended that a meaningful description be used to easily identify the work group e.g Shift A 06:00 Start.
Company	The specific company associated with the Work Group. Each work group must be attached to a WFM company for employee access purposes.
Holiday Scheme	A Holiday Scheme can be attached to the work group, specifying the Company or Public Holidays, which affect that Work Group.
Shift Type	A default Shift Type can be attached to the Work Group. When an employee is assigned this Work Group through Person Maintenance it will automatically pick up the Shift Type on the Work Group as default if a shift type is not assigned to the employee through the Maintain Person Shift Type form.
Label	A free text field (max 150 characters) that allows you to label the Work Group to facilitate searches.

The **Generate Timesheet** section contains the following fields:

Field	Notes
Default Overtime Pay Code	A default overtime pay code can be specified at the Work Group level e.g. 3 Time and a Half @ 10%.
Timesheets	Select from the drop-down menu the appropriate option:

Field	Notes
	• Live - If the site is a PeopleXD site, and the payroll is Live i.e. the timesheets are linked to the Live Payroll user then this indicator should be selected. The Payroll Interface is mutually exclusive - a Work Group can only be set to LIVE, BASIC or ASCII at any one time. • Test - If the site is a PeopleXD site, and the timesheets are not being linked to the Live Payroll then Test Timesheets should be selected. The Payroll Interface is mutually exclusive - a Work Group can only be set to LIVE, TEST or ASCII at any one time. • ASCII - If the site is not linked to PeopleXD then ASCII Timesheets should be selected, and the Interface should be selected from the list of values (for ASCII sites the Payroll Interface Setup form maintains all information relating to the generation of ASCII files e.g. File Output Path).
Generate Timesheets	If this indicator is selected, then the Timesheets will be generated for this work group if the Generate Timesheets form is used to create timesheets. Otherwise, the hours generated by employees in this work group will not be transferred to payroll.
Pay Frequency	This indicates the pay frequency of workers on this work group e.g. weekly, monthly.
Balance Interface	Allows you to choose the Balance Interface.
Sign Off not required for Payroll	If enabled, sign off is not required for payroll.

The **Calculation** section contains the following fields:

Field	Description
Calculation Default Hours	This indicates whether the default hours on the work group should be calculated. If set to: • No - then the day is calculated according to the hours worked.

Field	Description
	• Using minimum in hours - • Regardless of clocking - then the calculation is based on the default hours on the work pattern regardless of any clockings. • Must clock once - then the hours as calculated based on the default hours on the work pattern as long as the employee clocks at least once in the day.
Calculate Attendance	This calculates attendance for the employee and is enabled by default on all new Work Groups.  Note: If turned off, attendance will not be calculated for the employee.
Minimum for Hours	Minimum number of hours calculated.
Working Time Group	A Work Group can be set-up to be a Working Time Directive Group, by selecting the Working Time Directive code from the list of values.
Allow Generation of Default Clocks	Enable the toggle to allow generation of default clocks.
User Defined Calendar Group	Enable the toggle to allow user defined calendar group.
MGR: Rollback Weeks for Data Entry	The number of weeks previous to the current open period which a manager can update employee hours.
EMP: Rollback Weeks for Data Entry	The number of weeks previous to the current open period which an employee can update their own hours.
Time Template	Select which template is to be used.
Team Scheduler Timesheet Template	Select which template is to be used e.g. Manager or Employee.
Roster Calculation Method	Select the Rostering calculation method. The options available are: • Retail • Crew Plan

Field	Description
Deduct Absence Retail Calculation	Enable the toggle to Deduct Absence Retail Calculation.
Run Nightly Planned Costs	Enable toggle to Run Nightly Planned Costs.

3.2. Payment Rules

The *Payment Rules* screen allows you to assign default rules to the Work Group. This screen is broken out into four separate tabs.

3.2.1. Default Payments

The *Default Payment* screen provides configuration to assign default payment rules to a Work Group.

In order to assign the rules to the Work Group, you need to add a record in the default payment section. To do this:

1. Click **Add**.
2. Enter the Pay Code, Payment Hours.
3. Click **OK**.
4. In the example above 2 hours FlexiLeave have been successfully added.

Under the **Advanced Options** section you have toggles to enable the following:

- Check Holidays for Default Payments
- Default Timesheets for Non-Payment Groups
- Apply Hold Period to Default Payments.

3.2.2. Basic/Salary Rule

The *Basic/Salary Rule* tab lets you assign default payment rules to a Work Group. These allow you to customise according to specific workgroups.

The **Basic/Salary Rule** section contains the following fields:

Field	Notes
Basic Rule Group	This indicates if this work group is a basic rule group.
Salary Rule Group	This indicates if this work group is a salary rule group.
Exclude Rest Days from Basic Rule	This excludes the rest days from the basic rule calculation.
Basic/Salary Threshold Hours	Use the dropdown options to select whether: • Rostered Hours • Contracted Hours
Basic Overflow Pattern	Use the dropdown option to select the basic overflow pattern.
Basic Underflow Pattern	Use the dropdown option to select the basic underflow pattern.

The **Day Order Parameters** section contains the following fields:

Field	Notes
Day Order Basic Rule	Select the day order basic rule. Options available are: • Default to Company • Yes • No
Day Order Threshold Override	Enter a value for the day order threshold override, if required.

The **Advance Salary Rule** section contains the following fields:

Field	Notes
Basic Pay Code Group	Select the required Basic Pay Code Group.
On Call Pay Pattern	Select the required On Call Pay Pattern.
Apply Quota Payments	Enable the toggle to apply outa payments.
Apply Underflow/Equality Rules	Enable the toggle to apply underflow/equality rules.
Run Default Rule	Enable the toggle to run default rule.
Quota Deduction Pay Code Group	Select the required quota deduction pay code group.
Quota Deduction Daily Divisor 1	Enter a value for quota deduction daily divisor 1, if required.
Quota Deduction Minimum Days	Enter a value for quota deduction minimum days, if required.

3.2.3. Time Threshold Balance

The *Timesheet Threshold Balance* tab allows you to configure the Timesheet Threshold values against the Work Group.

The ***Timesheet Threshold Balance*** screen contains the following fields:

Field	Details
Enable Timesheet Threshold Balance Functionality	Select the timesheet threshold balance functionality. Options available are: • Default to Company • Yes • No
Use employee contract/FTE hours for Threshold Value	Select the employee contract/FTE hours for threshold value. Options available are: • Use Contract Hours • Use FTE Hours • No • Default to Company
Threshold Hours Value	Enter a value for threshold hours, if required.
Threshold Impacting Pay Code Group	Select the threshold impacting pay code group.
Threshold Balance Code	Select the threshold balance code.
Threshold Excess Payroll Contract Pay Code	Select the threshold excess payroll contract pay code.

3.2.4. Medical Salary Rule

The *Medical Salary Rule* screen controls rules relating to the Medical Salary Rules such as On Call rules and In House Pay Codes.

Note: Please check with your consultant before configuring Medical Salary Rule for your work group.

The screenshot shows the 'Medical Salary Rule' configuration interface. The breadcrumb trail is 'WFM Admin Dashboard > Work Groups > Work Group 3 7000'. The 'Current Work Group' is 'Work Group 3 7000'. The 'Medical Salary Rule' toggle is turned on. The dropdown menus are set to 'In House Rostered Monday to Saturday Pattern', 'In House Unrostered Monday to Saturday Pattern', 'Negative In House Hours Pay Code', 'On Call Monday to Saturday Pattern', 'On Call Sunday Pattern', 'In House Sunday Pattern', and 'Public Holiday Pattern'. A 'SAVE' button is located at the bottom right.

The **Medical Salary Rule** screen contains the following fields:

Field	Details
Medical Salary Rule	Enables medical salary rule.
In House Roster Monday to Saturday Pattern	Select the required In House Roster Monday to Saturday pattern.
In House Unrostered Monday to Saturday Pattern	Select the required In House Unrostered Monday to Saturday pattern.
Negative In House Hours Pay Code	Select the required Negative In House Hours Pay Code.
On Call Monday to Saturday Pattern	Select the required On Call Monday to Saturday pattern.
On Call Sunday Pattern	Select the required On Call Sunday pattern.
In House Sunday Pattern	Select the required In House Sunday pattern.
Public Holiday Pattern	Select the required Public Holiday pattern.

3.3. Default Payroll Hours

The *Default Payroll Hours* screen allows you to define the default hours that should be sent to payroll, if applicable.

The screenshot shows the 'Default Payroll Hours' configuration screen for 'Work Group 3 7000'. The interface includes a sidebar with navigation links: 'General Parameters', 'Payment Rules', 'Default Payroll Hours' (highlighted), 'Group Codes', 'Trigger Points', and 'Extra Hours Recoding'. The main content area has a search bar and a title 'Default Payroll Hours'. Below this, there are several input fields: 'Payroll Pay Code' (dropdown), 'Description' (text), 'Payroll Default Hours' (numeric), 'Payroll Default Units' (numeric), 'Default Daily Hours' (numeric), 'Holidays Only' (toggle switch), and 'Holiday Pay Method' (dropdown). At the bottom right, there is a green 'SAVE' button. The footer of the screen displays the 'access PeopleHD' logo.

The *Default Payroll Hours* screen contains the following fields:

Field	Details
Payroll Pay Code	This pay code when specified will be taken as the default payroll pay code e.g. 203 Basic - 0%.
Description	Auto-populates based on your Payroll Pay Code selection.
Payroll Default Hours	These are the default hours for passing to payroll e.g. 39.
Payroll Default Units	These are the default units for passing to payroll e.g. 39.
Default Daily Hours	Enter a value for Default Daily Hours, if required.
Holidays Only	This indicates if the default payroll hours should be used for holidays only (Record Future Absence).
Holiday Pay Method	Select from the dropdown options the required method. • Rostered Hours • Default Hours

3.4. Group Codes

The *Group Codes* screen allows you to attach a group code to the Work Group.

The **Group Code** screen contains the following fields:

Field	Details
Group Non-Payroll Code	Select the applicable group non-payroll code. The pay codes set up in this group are non-transferable to payroll for employees on this work group.
Personalised Pay Code Group	Select the applicable personalised time code group. The hours worked by the employees in this work group can only be recorded against the time codes specified in this group.
Cost Centre Pattern	Select the applicable cost centre pattern, if required.
Work Pattern Group	Select the applicable work pattern group, if required.

3.5. Trigger Points

The *Trigger Points* screen allows you to assign Trigger Points at a Work Group and Company level. The company tab shows you which of the overriding triggers are applied at a company level. There is a further facility to see the individual rules attached to a Trigger Point Group. Trigger Point rules and groups are created using the *Trigger Points* widget in the *Administrator Dashboard*.

The **Work Group Tab** screen contains the following fields:

Field	Details
Filter Trigger Points	This allows you to filter by Trigger Point Rule Grouping and view the associated rules.
Rule	This is the Rule Id associated to the trigger point rule.
Rule Description	This is the Rule description.
Group Id	This is the Trigger Point Rule Group Id.
Description	This is the Trigger Point Rule Group description.

In order to assign the rules to the Work Group, you need to add a record in the Work Group tab.

To do this:

1. Click **Add**.
2. Using the drop-down menu, select the required group.
3. **Tab** to Add.
4. Click **Save**.
5. The associated Rules will populate under the Rules section.

- To remove a Trigger Point, select **Delete**.

For further guidance see our [Trigger Points](#) user guide.

3.6. Extra Hours Recoding

Extra Hours Recoding allows you to assign rules relating to extra hours recoding to the Work Group.

The screenshot shows the 'Test desc WW' page in the WFM Admin Dashboard. The breadcrumb trail is 'WFM Admin Dashboard > Work Groups > Test desc WW'. The 'Current Work Group' is 'Test desc WW'. There is a search bar and an 'ADD' button. The left sidebar has a menu with 'Extra Hours Recoding' selected. The main table has the following data:

General Parameters	Date Effective	Paycode	Balance Code	Recode
Payment Rules	09-Mar-2022	DEPENDANTS LEAVE1	7266 Rolling Balance (Sick)	☐
Default Payroll Hours	31-Jan-2022	Flexi Leave	7204 CL	☐

The *Extra Hours Recording* screen contains the following fields:

Field	Details
Date Effective	The date the rule is effective from.
Pay Code	The Pay Code the rule is associated to.
Balance Code	The Balance Code the rule is associated to.
Recode	

To add a record to the screen, complete the following steps:

- Click the **Add** button on the right-hand side of the screen.
- Fill in **Date Effective**, **Pay Code** and **Balance Code**.
- Click **OK**.
- The record displays.

To edit a record, complete the following steps:

- From the record you would like to edit.
- Using the 3-dot menu, click **Edit**.
- Make your changes.

4. Click **OK**.
5. The updated record is displayed.

To delete a record, complete the following steps:

1. From the record you would like to remove.
2. Using the 3-dot menu, click **Delete**.
3. Confirm **YES**, to the warning message.

3.7. Absence Contract Days

Absence Contract Days allows you to override the default Roster Contract Work Day at a Work Group Level. These days can then be picked up as part of the Unrostered Bookings and override the company settings.

The *Absence Contract Days* screen contains the following fields:

Field	Details
Enable Functionality	Select from the dropdown options. Yes – enables the functionality and allows you to select the contracted days to override. No – disable the functionality Default to Company – uses company as default.

Field	Details
Contract Toggle per day of week	Once enabled, select the contracted days you want to override e.g., Contracted Monday, Contracted Wednesday etc.

Note: The screen will only be displayed if the Unrostered Booking functionality is switched on and the Control Parameters assigned against the Company. See the parameter in the table below.

Screen	Parameter
Unrostered Booking	ct_param.allow_contracted_work_days = 'Y'

3.8. Advanced Configuration

The *Advance Config* screen holds a number of advanced configuration options that can be assigned to a Work Group. This screen is broken out into five separate tabs.

The screenshot displays the 'Example Work Group' configuration interface. The 'Absences' tab is active, showing settings for absence management. The interface includes a search bar, a list of tabs (Absences, Sign Off Hours, Stand-By Hours, Advanced Options), and a sidebar with navigation options like General Parameters, Payment Rules, Default Payroll Hours, Group Codes, Trigger Points, Extra Hours Recoding, and Advanced Config. The main content area contains fields for 'Default Days Holiday', 'Apply Default Hours For Absence' (toggle), 'Outage Scheme', 'Bradford Factor Rule', 'Absence Category Code', 'Pay Holidays at Default Hours Only' (toggle), and 'Generate Occupational Absences' (toggle). A 'SAVE' button is located at the bottom right.

3.8.1. Absences

The **Absences** tab contains the following fields:

Field	Details
Default Days Holiday	Enter a value for Default Days Holiday, as required.
Apply Default Hours For Absence	Enable the toggle to apply Default Hours for Absence.
Outage Scheme	Select the appropriate Outage Scheme from the dropdown options.
Bradford Factor Rule	Select the appropriate Bradford Factor Rule from the dropdown options.
Affect Default Hours	Enable the toggle to Affect Default Hours.
Absence Category Code	Select the appropriate Absence Category Code from the dropdown options.
Pay Holidays at Default Hours Only	Enable the toggle to Pay Holidays at Default Hours Only.
Generate Occupational Absences	Enable the toggle to Generate Occupational Absences.

The **Stand-By Hours** tab contains the following fields:

Field	Details
Paycode	If the employees on this work group are on <i>stand-by</i> , then the pay code associated with this can be entered on the stand-by hours block. This payment will be generated at timesheet stage.
Description	This is the description associated with the Paycode.
Default Hours	If the pay code for the stand-by hours has been entered, then the default hours for the stand-by must also be entered.

To add a record, complete the following:

1. Click **Add**.
2. Using the drop-down menu select the **Pay Code**

3. Enter **Default Hours**.
4. Click **OK**.
5. The record displays.

To edit a record, complete the following steps:

1. From the record you would like to edit.
2. Using the 3-dot menu, click **Edit**.
3. Make your changes.
4. Click **OK**.
5. The updated record is displayed.

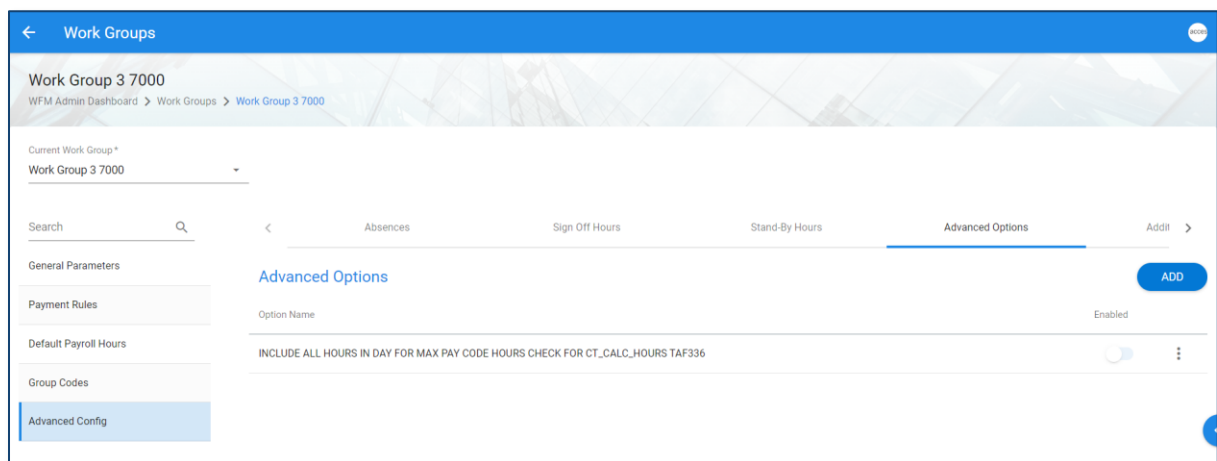

To delete a record, complete the following steps:

1. From the record you would like to remove.
2. Using the 3-dot menu, click **Delete**.
3. Confirm **YES**, to the warning message.

3.8.4. Advanced Options

Provides users with the ability to control Advance Options against a Work Group if configured.

These options are normally held at a company level.

To Add a Record under Advanced Options:

1. Click **Add**.
2. Using the drop-down menu select the **Option Name**
3. Click the **Enabled** toggle.

4. Click **OK**.

To edit a record, complete the following steps:

1. From the record you would like to edit.
2. Using the 3-dot menu, click **Edit**.
3. Make your changes.
4. Click **OK**.
5. The updated record is displayed.

To delete a record, complete the following steps:

1. From the record you would like to remove.
2. Using the 3-dot menu, click **Delete**.
3. Confirm **YES**, to the warning message.

3.8.5. Additional Configuration

Provides users with the ability to control Additional Configuration against a Work Group if configured.

The screenshot displays the 'Work Group 3 7000' configuration page in the WFM Admin Dashboard. The page has a sidebar on the left with a search bar and a list of configuration categories: General Parameters, Payment Rules, Default Payroll Hours, Group Codes, Trigger Points, Extra Hours Recoding, Absence Contract Days, and Advanced Config (which is highlighted). The main content area is titled 'Work Group 3 7000' and shows a breadcrumb trail 'WFM Admin Dashboard > Work Groups > Work Group 3 7000'. Below the breadcrumb, there are tabs for 'Sign Off Hours', 'Stand-By Hours', 'Advanced Options', and 'Additional Config' (which is active). The 'Additional Config' section is divided into two parts: 'Clocking Update Parameters' and 'Additional Config'. The 'Clocking Update Parameters' section includes 'Business Absence' (set to 'Default To Company') and 'Flexi Overtime' (set to 'Default To Company'). The 'Additional Config' section includes 'Benzing Balance Group' (set to 'Category'), 'Display Pay Codes on Pers. Clocking' (a toggle switch), 'Apply Pay Code Adjustment' (a toggle switch), 'Call Out' (set to 'Planned Return To Work'), and 'Use Personal Alternates' (a dropdown menu). A 'SAVE' button is located at the bottom right of the page.

The ***Clocking Update Parameters*** section contains the following fields:

Field	Details
Business Absence	Select the Business Absence value. Options available are: • Default to Company

Field	Details
	- No Update Allowed - Out Clockings Only - In/Out Clockings
Flexi Overtime	Select the Flexi Overtime value. Options available are: - Default to Company - No Update Allowed - In/Out Clockings

The **Additional Config** section contains the following fields:

Field	Details
Benzing Balance Group	The work group can be attached to a Benzing Balance Group, for the purposes of displaying the Benzing Balances on the Terminals (these are displayed according to the set-up of the Benzing Balance Group).
Display Pay Codes on Pers. Clocking	If selected, employees with access to the Personal Clockings form will be able to view the pay codes on their own records.
Apply Pay Code Adjustment	Enable the toggle to Apply Pay Code Adjustment.
Category	Enter a Category. Maximum 50 characters.
Call Out	Select the appropriate Call Out from the dropdown options.
Planned Return To Work	Select the appropriate Planned Return To Work from the dropdown options.
Use Personal Alternates	Select the Use Personal Alternates value. Options available are: - Yes - No
Exclude Approve Hours Mail	Enable the toggle to Exclude Approve Hours Mail.
Exclude Sign Off Hours Mail	Enable the toggle to Exclude Sign Off Hours Mail.
Exclude Exception Mail	Enable the toggle to Exclude Exceptions Mail.

Field	Details
Exclude Employee No Hours Mail	Enable the toggle to Exclude Employee No Hours Mail.
Annualised	Enable the toggle to allow Annualisation.
Overtime Rule	Select the appropriate Overtime Rule from the dropdown options.
Planned Break Template	Select the appropriate Planned Break Template from the dropdown options.

4. Menu Options

4.1. Importing Menu Options

A menu profile has been created to provide users full access to the Work Groups Configuration screens: **WFM_WORKGROUP_CONFIG_ACCESS**. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Admin
3. Select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile, for example, **WFM_WORKGROUP_CONFIG_ACCESS**
6. Review the Confirmation message and click **Yes**.
7. Once imported, the menu options and webservices are assigned to the existing menu profile.

4.2. Menu Options

The following menu options can be used to customise the Work Groups Configuration screens. All menu options are included in the menu profile **WFM_WORKGROUP_CONFIG_ACCESS**

Menu Option	Menu ID	System
CorePortal - Change Work Schedule	MAIN_MENU.HR_ADMIN_CHANGE_SCHEDULE	CorePortal
CorePortal - Workforce Management Admin	MAIN_MENU.WRKMGMTADMIN	CorePortal
WFM Configuration	MAIN_MENU.WFM_CONFIG	CorePortal
Work Group Config	CONFIG_SET_MENU.WORK_GROUP_CONFIG	CorePortal
Work Group Config - Medical Salary Rule	CONFIG_SET_MENU.WORK_GROUP_CONFIG_MEDICAL_SALARY_RULE	CorePortal
Work Schedule Delete	MAIN_MENU.WORK_SCHEDULE_DELETE	CorePortal
