1. Overview

1.1. Purpose of the Guide

Work Patterns define a daily work schedule. They identify the different work durations that exist in your organisation and capture the expected working hours for an employee. Selected work patterns are then used to configure an employee's shift type. Work patterns are an integral part of the system linking to multiple areas and can be highly configurable depending on your organisational requirements.

The purpose of this guide is to show how to manage Work Patterns and explain the various configurations screens.

Features to Work Patterns include:

- Filters and searches to allow easy access to a specific Work Pattern
- An Active / Non-Active switch
- Copying a Work Pattern
- Reducing menu items to improve user access
- Allowing administrators to show or hide menu items.

2. Work Pattern Screen

The Work Pattern screen is where administrators can manage work patterns for their organisation. The screen lists all Work Patterns created and shows if they are active or not. This screen can be used to create new work patterns, copy existing work patterns and further configure patterns to organisational requirements.

2.1. Accessing the Work Patterns screen

To access the *Work Pattern Screen*, complete the following:

1. Go to the *WFM Admin Dashboard*.
2. Click on **WFM Configuration**.
3. Select **Work Patterns**.
4. The screen displays.

Pattern Code	Descriptions	Default Pay Code	Extra Hours Worked	Default Hours	Default Start Time	Default End Time	Label	Calculation Method	Active
2.TEST2 COPY	2.Test2 copy wo...	1120 - DECLAN ...	3601 - Extra Hou...	14	09:00	20:30	test	Standard Calcul...	☒

The screen can be filtered using the following options:

Option	Details
Search	Use the search feature to find a specific work pattern you wish to configure.
Filter	Use the filter button to refine your search. You can filter by: • Default Pay Code • Extra Hours Worked • Active • Label

The screen contains the following fields:

Option	Details
Pattern Code	The Code given to the Work Pattern.
Description	The Work Pattern description.
Default Pay Code	The pay code assigned to the work pattern.
Extra Hours Worked	The pay code assigned to extra hours worked on the work pattern.
Default Hours	Number of hours of the work pattern.
Default Start Time	The start time of the work pattern.
Default End Time	The end time of the work pattern.
Label	The label added to the work pattern to make it easily searchable.
Calculation Method	The calculation method of the work pattern. For example, Standard, Roster or Rest Pattern.
Active Indicator	When the active indicator is enabled the work pattern is available to be added to a Shift Type.

2.1.1. How to Add a new Work Pattern

To add a new work pattern, complete the following steps:

1. Click **Add** at the top of the screen.
2. Fill in the mandatory fields such as **Pattern Code** and **Description**.
3. Click **OK**.
4. The *Standard Hours* configuration screen will open.
5. Enter the **Standard Hours** for the work pattern.
 - These need to reflect the default times and pay codes configured in the general parameters tab. For example, add early overtime, standard hours and late overtime details to reflect this.
 - A message displays advising the user to populate the standard hours for the work pattern. *'This work pattern requires stand hours to be associated with it'*.
 - Should the user navigate away from this screen without adding standard hours the message is displayed again.
 - This applies to both new and existing work patterns.

- This does not apply to work patterns where the Rest toggle has been enabled.
6. You can now further configure your work pattern, using the tabs on the left-hand side.
For example, add Breaks.
 7. Once your Work Pattern is fully configured, click **Save**.
 8. Your Work Pattern is now ready to be added to a Shift Type.

2.1.2. How to Copy a Work Pattern

Copying an existing Work Pattern can be beneficial as the work pattern you copy will retain the same configuration, therefore saving you time.

To copy a work pattern, complete the following steps:

1. Select **Copy** from the 3-dot menu of the work pattern you wish to copy.
2. Fill in the **Pattern Code**.
3. Fill in the **Description**.
4. Click **OK**.
5. Your copied Work Pattern will open for you to further configure.

3. Configuration

The configuration screens allow you to customise and configure work patterns and can be accessed through the Work Patterns screen.

Simply select the work pattern you wish to configure and select **View/Edit Work Pattern** from the 3-dot menu to access the configuration screens.

3.1. General Parameters

The *General Parameters Screen* contains the main information pertaining to the Work Pattern and allows to configure for example, default hours as well as start and end time. As with all of the other screens, the **Start Time**, **End Time** and **Default Hours** displayed at the top of the screen.

Work Patterns

The **General Params** screen contains the following fields:

Field	Details
Description	This allows you to choose the specific work pattern.
Default Start Time	This is the start time which the system defaults to.
Default End Time	This is the end time which the system defaults to.
Default Hours	These are the hours which will be filled in automatically.
Earliest Start Time	You can choose the earliest time that the work pattern can start.
Overtime Override	If you wish to override the default hours in the case of over time you can do so here.
Short Name	You can give the pattern a short two letter abbreviation.
Fill Basic Hours	When this toggle is enabled, basic hours can be filled.
Fill Basic Before Threshold	When the toggle is enabled, basic hours can be filled up to the specific threshold.
Rest Pattern	When the toggle is enabled, the hours are put on a rest pattern.
Split Default Hours	When enabled this will split the default hours.
Roster Calculation	When the toggle is enabled the menu and options are only the ones for a roster (previously known as retail) calculation.
Standard Calculation	When enabled the hours are calculated as standard hours.

Field	Details
Default Pay Code	You can set a pay code for the system to default to. This is a mandatory field.
Extra Hours Worked	You can choose the pay code for any extra hours worked.
Label	It is advisable to label the pattern with a short name to increase searchability.

3.2. Standard Hours

The Standard Hours screen shows you the standard hours in a work pattern and allows you to add and sequence the hours as well as adding extra information using the 3-dot menu.

Note: Standard Hours must be populated with at least a single band/row for a standard Work Pattern in order for hours to be calculated.

The screenshot displays the 'Standard Hours' configuration screen. At the top, the breadcrumb trail is 'WFM Admin Dashboard > Work Patterns > 3 Hour Day 09:00-12:00'. Below this, the 'Work Patterns*' dropdown is set to '3 Hour Day 09:00-12:00', with 'Start Time 09:00', 'End Time 12:00', and 'Default Hours 3' displayed. The left sidebar menu includes 'General Params', 'Standard Hours' (highlighted), 'Breaks', 'Absence', 'Overtime', 'Flexitime Settings', 'Alternate Patterns', and 'Premiums'. The main area is titled 'Standard Hours' and contains a table with the following data:

Seq	Pay Code	Start TI	End TI	Late Gr	Early Out	No. of H	Rounding Code	Min. Thres	OT S	Override F	Recode to
1	3601 - Extra Hours Wo...	03:00	09:00							☐	☐
2	3600 - Normal Attend...	09:00	12:00							☐	☐
3	3601 - Extra Hours Wo...	12:00	03:00							☐	☐

An 'ADD' button is located at the top right of the table, and a 'SAVE' button is at the bottom right. The 'access PeopleXD' logo is visible at the bottom center.

The **Standard Hours** screen contains the following fields:

Field	Details
Sequence	The Sequence Number is used for creating Work Pattern sequences, e.g. 1 denotes the first sequence.
Pay Code	Pay Code for that section of the pattern
Start Time	Start time for that section of the pattern
End Time	End time for that section of the pattern
Late Grace	Number of minutes after the start time before someone is counted as late
Early Out Grace	Number of minutes before the end time that someone can clock out without being counted as an early clock out
No. of Hours	Enter the number of hours for this sequence, 99.99 denotes all hours. Start and End times cannot be used in conjunction with number of hours. However, both a start time and number of hours, or end time and number of hours combination can be used.
Rounding Code	Rounding code to be applied to the sequence or select from the list of rounding codes available. Rounding Codes are used to facilitate rounding to user requirements on Work Pattern time bands.
Min Threshold	The minimum time which must be worked before the hours on that sequence are to be generated.
OT Sequence	The Overtime Sequence to indicate in what order overtime should be used to fill basic. Any value entered here will have priority over any values entered in the 'Default overtime Code' field.
Override Fill Basic	To override the Fill Basic Indicator for any of the overtime sequences, set this option to 'on'. This will exclude the sequence from the Fill Basic Requirement.
Recode to Default	

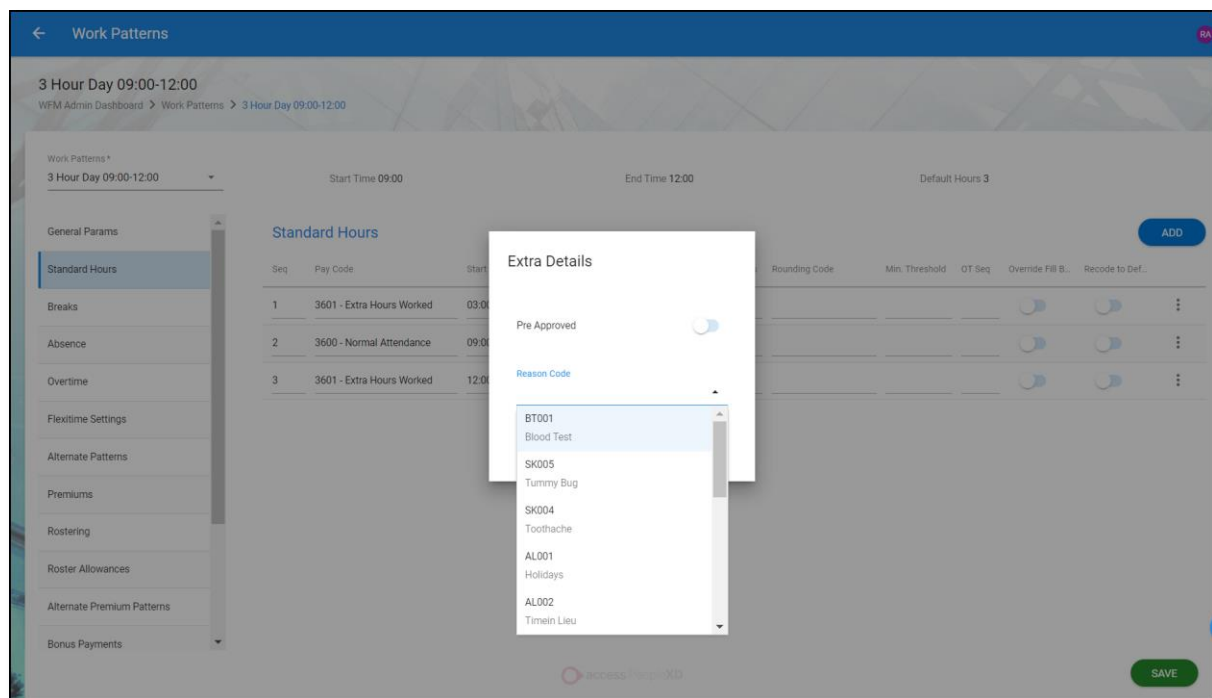

3.2.1. How to Add Standard Hours

To add standard hours to a Work Pattern, complete the following steps:

1. Click **Add** at the top of the screen.

2. Fill in Sequence, Paycode, Start time, End time etc.
3. Click **Save**.
4. Your hours will be displayed.
5. To delete standard hours, click on the 3-dot menu and select **Delete**.

If you choose **Extra** from the 3-dot menu you can add extra information pertaining to the standard hours from the dropdown menu as well as enable or disable the **Pre Approve** toggle.

3.3. Breaks

The *Breaks Screen* lets you view and add break patterns in a sequence. You can also configure clockings or penalties for employees and teams.

The **Breaks** screen contains the following fields:

Field	Details
Sequence	The Sequence Number is used for creating break sequences, e.g., 1 denotes the first sequence.
Type	Select the Type of break, i.e., Fixed or Variable. Fixed breaks start and end exactly on the times specified whereas variable breaks can start and end at wider time spans whilst still only lasting for a specific time e.g., start at 12:00, end at 14:00 - duration 1:00 hour.
Start Time	Enter the start time for the break in the format FXHH24: M1 e.g., 13:00.
End Time	Enter the end time for the break in the format FXHH24: M1 e.g., 13:00.
Duration	Enter the duration or length of the break in the format FXHH24: M1 e.g., 00:30.
Tolerance	Enter the full tolerance on the break, if applicable e.g., 03.

Field	Details
Must Clock Before	Enter the time that the person must clock before and clock out after to have the break deducted e.g., on a break sequence going from 12:30 to 14:30 if a time of 13:00 is entered here in the 'Must Clock Before' and 14:00 is entered in the 'Must Clock after' then the person must clock out before 13:00 and back in after 14:00 for the break. Otherwise, the break will not be deducted
Must Clock After	
Penalty	Enter a time as a penalty, which can be deducted from the person's hours if that person does not clock out for lunch.

3.3.1. How to Add breaks on a work pattern

To configure breaks on a work pattern, complete the following:

1. Click **Add** on the top of the grid.
2. Fill in sequence and type (This defaults to fixed but you can also choose variable).
3. Fill in the other fields as well as any penalty you wish to add.
4. Once complete, click **Save**.

The screenshot displays the 'Work Patterns' configuration page for a '3 Hour Day 09:00-12:00' pattern. The left sidebar contains a menu with options: General Params, Standard Hours, Breaks (selected), Absence, Overtime, Flexitime Settings, Alternate Patterns, and Premiums. The main area is titled 'Breaks' and features a table with columns: Seq, Type, Start Time, End Time, Duration, Tolerance, Must Clock Bef..., Must Clock After, and Penalty. An 'ADD' button is located at the top right of the table. The table contains one entry with Seq '1', Type 'Fixed', Start Time '10:45', End Time '11:00', and Duration '15:00'. A 'SAVE' button is at the bottom right. The top navigation bar shows 'Work Patterns' and a user profile icon 'RA'.

3.4. Absence

The *Absence Screen* is a new screen which amalgamates all the previous absence screens and bringing them all together in one place. It allows you to configure full and part day values as well as configure manager approval.

The **Absence** screen contains the following fields:

Field	Details
Full Days Value	You can choose to put in a value to denote a full day.
Three Quarter Days Value	You can put in a value to denote three quarters of a day.
Half Days Value	You can put in a value to denote a half day.
Quarter Days Value	You can put in a value for a quarter day.
Half Days Value AM	Choose the value for AM.
Half Days Value PM	Choose the value for PM.
Remove Full Day Absence	Enable this toggle to remove a full day's absence from the work pattern.
Always Remove Unapproved Absence	Enable the toggle for the Unapproved Absence to be removed in all cases.
Absence Category	Choose an absence category from the dropdown menu.
Short Time Code	The short time code is an optional setting. It enables the system generated Unapproved Absence code to be replaced with this code, once the unapproved absence was greater than the threshold values entered.

Field	Details
Short Time Code Requires Approval	You can choose which code needs approval from a manager.
Short Time Threshold	The unapproved absence generated must be greater than the short time threshold value entered in order for it to be replaced with the short time code.
Non-Standard Daily Hours	A value in hours for non-standard patterns to decide the day segment for occupational absence.
Round Type	Round the non-standard daily hours up, down or to the nearest.
To the nearest	The rounding amount in days.

3.5. Overtime

The Overtime screen centralises all of the previous overtime options from the Back Office together on one screen.

The screenshot shows the 'Work Patterns' interface. The top bar indicates '7 hour days'. The sidebar on the left lists 'General Params', 'Standard Hours', 'Breaks', 'Absence', 'Overtime' (selected), and 'Rostering'. The main content area is titled 'Overtime' and contains two dropdown menus: 'Overtime Override' (set to '7.00HRS - 7 Hour Day') and 'Overtime Carried/Taken' (set to 'Rounded'). A 'SAVE' button is located at the bottom right.

The **Overtime** screen contains the following fields:

Field	Details
Overtime Override	Select the amount of hours you wish to override the default hours with.
Overtime Carried/Taken	Choose between Carried, Rounded or Taken

3.6. Flexitime Settings

The Flexitime screen amalgamates all the previous flexitime settings from the Back Office on to one screen and includes adding new sequence items.

The ***Flexitime Settings*** screen contains the following fields:

Field	Details
Flexible Pattern	Enable the toggle to show a flexible pattern.
Core Time Violation	Enable the toggle to show Core Time violation.
Flexi Positive Pattern Code	The dropdown allows you to choose a specific pattern.
Flexi Negative Pattern Code	The dropdown allows you to choose a specific pattern.
Flexi Overtime Rule	If you wish to add a flexi overtime rule to monitor extra hours, you can add it here.
Apply Infringement Penalty	You can choose to apply a penalty to employee by enabling the toggle.
Penalty Pay Code	You can choose a pay code to be aligned to any penalties or infringements an employee may incur.
Hours	Fill in the amount of hours to penalise.
All Time Allocated to One Time Band Only	When the toggle is enabled, times are amalgamated in to one time band.

3.6.1. How to Add Flexitime Settings

- Click **Add**.
- Fill in the fields such as sequence, start time, end time etc.
- Click **Save**.

3.7. Alternate Patterns

The Alternate Patterns screen has amalgamated Alternate pattern information and creation in to one screen

Work Patterns

3 Hour Day 09:00-12:00

3.7.1. How to Add an Alternate Pattern

To Add an Alternate Pattern, complete the following steps:

- Click **Add**.
- Choose the Alternate Pattern you wish to use.

- Click **Save**.

3.8. Premiums

The *Premiums Screen* is in two parts. The main information displayed on the fixed left-hand side of the screen such as the Worked Pay code and Thresholds. Additional settings are shown on the scrolling right-hand side of the screen allow you to view more detailed information.

Seq Num...	Worked P...	Worked A...	Premium ...	Threshold	Multiplier	Value	Pay on Day	Overflow Pay Code	Overflow Threshold	Generate Regards...	Calculate on
1	7 - 7		3 - Three ...	2	2	1	Monday			☐	
5	2 - 2 BO ...		3 - Three ...							☐	
8	2 - 2 BO ...		2 - 2 BO ...					2 - 2 BO DEDUCTION ...	2	☒	Always

The **Premiums** screen contains the following fields:

Field	Details
Sequence Number	This allows you sequence (number) multiple premiums so they can be viewed in sequence.
Worked Pay Code	Describe the type of hours worked.
Worked Abbreviation Code	Choose an Abbreviation for the hours.
Premium Pay Code	The Premium Pay Code must be set up as a 'Premium Code' on the Pay Codes screen. Enter the Premium Pay Code or select from the list of values. This is the pay code that is used to apply the premium to the pattern.
Threshold	Enter the hours threshold in decimals before the premium payment will be applied.
Multiplier	Enter the Multiplier to be used, if applicable e.g. 1.5. Note that the Multiplier and Value are mutually exclusive.
Value	Enter the fixed value of the premium payment if it applies.
Pay on Day	You can choose which day for the extra hours to be paid on.
Overflow Pay code	Choose the Pay code for overflow from the drop-down menu.
Overflow Threshold	Choose a threshold which must be reached before considered overflow.
Generate Regardless of Threshold	This allows you to override the threshold set.
Calculate on Company Holidays	Option to choose Always, Only or Never calculate on a company holiday

3.8.1. How to add a Premium

To add a premium, complete the following steps:

- Click **Add**.
- Fill in the information for both sides of the screen. On the right-hand side, you can configure more specific information.
- Click **Save**.

3.9. Rostering

All rostering configuration is now amalgamated on the *Rostering Screen*, having been migrated from the Back Office.

The **Roster** screen contains the following fields:

Field	Details
Pattern Type	This allows you to select the type of work pattern.
Pattern Abbreviation	An abbreviation is given to identify the patterns.
Rostering Priority	You can give priority over specific work patterns.
Autoroster Sequence	The sequence that is to be used for this pattern for auto rostering.
Statistics	The sequence that is to be used for this pattern for statistics
Highlight Colour	Colour selection.
Allow Future Absence	When enabled future absence can be recorded.
Long Shift	Enable this toggle if this pattern is deemed to be one of long duration.
Self-Rostering	Enable this toggle if the pattern is available for Self Rostering.
Allow Shift Swapping	When enabled this allows shifts to be swapped between team members.

Field	Details
Auto Approve Shift Swaps	When enabled the shift swaps are automatically approved and do not have to go to a manager.
Apply Availability	Enable this if the pattern is to be referenced for rostering availability.

3.10. Roster Allowances

On this screen, you can create and configure a roster allowance all on the one screen, since the previous screens have now been amalgamated on Portal.

- Click **Add**

- Fill in the Allowance Code, Allowance and Allowance Type.
- Click **Save**.

3.11. Alternate Premium Patterns

The screenshot displays the 'Alternate Premium Patterns' configuration screen. At the top, the breadcrumb trail is 'WFM Admin Dashboard > Work Patterns > 3 Hour Day 09:00-12:00'. The main content area features a table with the following structure:

Alternate Pattern	Start Time	End Time
3.00HRS - 3 Hour Day 09:00-12:00	09:00	12:00

The interface also includes a sidebar on the left with a list of settings, where 'Alternate Premium Patterns' is currently selected. A blue 'ADD' button is located at the top right, and a green 'SAVE' button is at the bottom right.

The Alternate Pattern Screen has the following columns:

- Alternate Pattern
- Start & End Time

3.11.1. How to add an Alternate Premium Pattern

To add an Alternate Premium Pattern:

- Click **Add**
- Select the Alternate Pattern from the dropdown.
- Select **Start Time** and **End Time**.
- Click **Save**.

3.12. Bonus Payments

The Bonus Payments Screen allows you to configure payments for bonus hours which have been worked by your team.

The screenshot shows the 'Bonus Payments' configuration screen. On the left is a sidebar menu with options: Work Patterns*, 3 Hour Day 09:00-12:00, Alternate Patterns, Premiums, Rostering, Roster Allowances, Alternate Premium Patterns, Bonus Payments (selected), Time Based Bonus, Work Pattern Mapping, Miscellaneous Settings, and NCHD Settings. The main content area has a header '3 Hour Day 09:00-12:00' and 'Bonus Payments'. Below this is a table with columns: Seq, Pay Code, Bonus Hours, Threshold Hours, Threshold Time, Deduct From, Auto App, and Contiguous. The 'Deduct From' column shows 'Neither'. There are 'ADD' and 'SAVE' buttons. The bottom of the screen shows 'access People XD' and a 'SAVE' button.

The **Bonus Payments** screen contains the following fields:

Field	Details
Sequence	The Sequence Number is used for creating break sequences, e.g., 1 denotes the first sequence.
Pay Code	Enter the Pay Code to be used for the bonus payment or select from the list of values.
Bonus Hours	Enter the number of hours to be generated as a bonus e.g., 2.
Threshold Hours	Enter the Threshold Hours. The Bonus Payment will be applied once an individual has worked over the threshold number of hours e.g., 8. Note that only the Threshold Hours or Threshold Time can be used, as they are mutually exclusive.
Threshold Time	Enter the Threshold Time. The Bonus Payment will be applied once an individual has worked past the threshold time e.g., 17:00.
Deduct From	Select from the pop-up list of values if the value of the bonus payment should be deducted from the individuals' basic, absence, or from neither.

Field	Details
Auto App	Click on the Auto Approve indicator if the bonus payment is to be automatically approved.
Contiguous Hours	If the Contiguous Hours option is selected, then the hours on the threshold must be worked continuously before the bonus payment is applied.

3.12.1. How to add a Bonus Payment

To add a Bonus Payment, complete the following steps:

- Click **Add**
- Fill in the sequence, choose the pay code and bonus hours.
- Set the Threshold Hours and Time.
- In the **Deduct from**, choose from Basic, Absence or Neither.

The screenshot shows the 'Work Patterns' interface. On the left is a sidebar with a menu including 'Overtime', 'Flexitime Settings', 'Alternate Patterns', 'Premiums', 'Rostering', 'Roster Allowances', 'Alternate Premium Patterns', 'Bonus Payments' (highlighted), 'Time Based Bonus', and 'Work Pattern Mapping'. The main content area is titled '3 Hour Day 09:00-12:00' and shows 'Start Time 09:00', 'End Time 12:00', and 'Default Hours 3'. Below this is the 'Bonus Payments' section with an 'ADD' button. A table is displayed with the following columns: Seq, Pay Code, Bonus Hours, Threshold Hours, Threshold Time, Deduct From, Auto App, and Contiguous. The 'Deduct From' column is currently set to 'Neither'. A dropdown menu is open for the 'Pay Code' column, listing several options: 1005 Basic Hours, 2001 Overtime @ 1..., 2003 Overtime @ 1..., 2005 Overtime @ 2..., 2244, and 2244 SOCIAL. At the bottom right, there is a 'SAVE' button.

3.13. Time Based Bonus

The screenshot shows the 'Time Based Bonus' configuration screen. On the left is a sidebar with a menu including 'Alternate Patterns', 'Premiums', 'Rostering', 'Roster Allowances', 'Alternate Premium Patterns', 'Bonus Payments', 'Time Based Bonus' (highlighted), 'Work Pattern Mapping', 'Miscellaneous Settings', and 'NCHD Settings'. The main content area has a header '3 Hour Day 09:00-12:00' and a breadcrumb 'WFM Admin Dashboard > Work Patterns > 3 Hour Day 09:00-12:00'. Below this, there are fields for 'Work Patterns*' (set to '3 Hour Day 09:00-12:00'), 'Start Time 09:00', 'End Time 12:00', and 'Default Hours 3'. The 'Time Based Bonus' section features a table with the following columns: Seq, Start Time, End Time, Rounding Code, Min. Threshold, Pay Code, Multiplier, and Min/Max Value. A single row is shown with Seq '1', Start Time '09:00', and End Time '17:00'. There are 'ADD' and 'SAVE' buttons at the bottom right.

The **Time Based Bonus** screen contains the following fields:

Field	Details
Sequence	The Sequence Number is used for creating break sequences, e.g., 1 denotes the first sequence.
Start Time	Enter the start time for the time based bonus in the format FXHH24: M1 e.g., 05:00.
End Time	Enter the end time for the time based bonus in the format FXHH24: M1 e.g., 07:00.
Rounding Code	Rounding code to be applied to the sequence or select from the list of rounding codes available. Rounding Codes are used to facilitate rounding to user requirements on Work Pattern time bands.
Min Threshold	The minimum time which must be worked before the hours on that sequence are to be generated.
Pay Code	Enter the Pay Code to be used for the time based bonus or select from the list of values.
Multiplier	Enter the Multiplier to be used, if applicable e.g. 1.5. Note that the Multiplier and Value are mutually exclusive.
Min/Max Value	

3.13.1. How to add a Time Based Bonus

To add a Time Based Bonus, complete the following:

- Click **Add**.
- Fill in the field required such start and end time.
- Click **Save**.

3.14. Work Pattern Mapping

The **Work Pattern Mapping** screen contains the following fields:

Field	Details
Apply Work Pattern Mapping	Once enabled, this allows the mapping to be applied.
Mapping Rule Type	Select from the dropdown menu, the type of mapping rule e.g. Cost Centre, Company or Department.
Global Work Pattern	Select the Global Work Pattern from the drop down.
Mapping Patterns	Mapped Work Pattern.
Default Hours	The system defaults to these hours.
Default Start Time	This is the default start time of the hours which can be configured.

Field	Details
Default End Time	This is the default end time of the hours which can be configured.

3.14.1. How to Add Work Pattern Mapping

To Add Work Pattern Mapping, complete the following:

- Click **Add**.
- Choose the **FTE, Mapping Pattern** and **Default Hours**.
- Set the **Default Start Time** and **Default End Time**.

The screenshot shows the 'Work Pattern Mapping' configuration interface. At the top, a blue header bar contains a back arrow and the text 'Work Patterns'. Below this, a breadcrumb trail reads 'WFM Admin Dashboard > Work Patterns > 3 Hour Day 09:00-12:00'. The main content area is titled '3 Hour Day 09:00-12:00' and includes fields for 'Start Time 09:00', 'End Time 12:00', and 'Default Hours 3'. A left sidebar lists various settings: Overtime, Flexitime Settings, Alternate Patterns, Premiums, Rostering, Roster Allowances, Alternate Premium Patterns, Bonus Payments, Time Based Bonus, and Work Pattern Mapping (which is highlighted). The 'Work Pattern Mapping' section is active, showing a toggle for 'Apply Work Pattern Mapping' (turned on), a 'Mapping Rule Type' dropdown set to 'FTE', and a 'Global Work Pattern' dropdown set to '1 Hour Day 09:00-10:00'. Below these are five columns: 'FTE', 'Mapping Pattern', 'Default Hours', 'Default Start Time', and 'Default End Time'. A table with one row is visible, showing '1' in the FTE column, '1.00HRS - 3 Hour Day 09:00-12:00...' in the Mapping Pattern column, '3' in the Default Hours column, '09:00' in the Default Start Time column, and '12:00' in the Default End Time column. An 'ADD' button is on the right, and a 'SAVE' button is at the bottom right. The 'access PeopleXD' logo is at the bottom center.

3.15. Miscellaneous Settings

The **Miscellaneous Settings** screen contains the following fields:

Field	Details
Bank Holiday Pay Code	Here you can choose the specific pay code for bank holiday hours.
Assumed Variable Lunch Clocking	Enable this toggle to generate a variable lunch clocking.
Assumed Lunch Clocking	Enter the assumed lunch clocking time for the Work Pattern e.g. 13:00. This is used to automatically insert a lunchtime clocking out time for individuals who only clock once at lunchtime
Pay Code Access Group	Enter the code access group, or select from the list
Late Sequence Start	Enter the Late Start Sequence e.g. 1. By setting the Late Start Sequence on the Misc. Options section, individuals on this pattern are considered as 'late' from this sequence. This also allows lates to be calculated on an overtime sequence, if the overtime sequence number is entered.
Time in Lieu	When this toggle is enabled, time in lieu can be taken.

Field	Details
Display Units on Stand Hours Screen	Set to display units on the standard hour screen instead of number of hours.
Garbing	Select to use Garbing on all Clockings or First and Last.
Garbing in	Garbing in time.
Garbing out	Garbing out time.
Night Premium Pay Code	Choose pay code from the drop down for night premiums.
Flexi Start Sequence	Flexi start sequence.
Seasonality	When enabled the work pattern shows seasonal hours.
Seasonality Pattern	Select Seasonality Pattern.
Seasonality Hours	Fill in the amount of seasonal hours as applicable.
Apply Clock Times	When enabled clock times are applied.

3.16. NCHD Settings

The **NCHD Settings** screen contains the following fields:

Field	Details
Offsite Shifts	When the toggle is enabled, the hours are flagged as offsite of the premises.
Additional Non-Contracted Override	This toggle when enabled flags hours as additional and non-contracted.

Field	Details
Public Holiday Adjustment Code	Select the specific adjustment code from the dropdown.
Public Holiday Adjustment	An adjustment is made for public holidays.

4. Menu Options

4.1. Importing Menu Options

A menu profile **WFM_WORK_PATTERNS** has been created to provide users full access to the Balance Configuration screens. You can [assign this menu profile to users](#) or import the menu options to an existing menu profile.

1. Go to *Security* and select **Menu Profiles**.
2. Search for the relevant menu profile e.g., Coreportal_Admin
3. Select **Import Menu Options**.
4. Select **From existing Menu Profile** and click **OK**.
5. Search for the menu profile, for example, **WFM_WORK_PATTERNS**
6. Review the Confirmation message and click Yes.
7. Once imported, the menu options and webservices are assigned to the existing menu profile.

4.2. Menu Options

The following menu options can be used to customise access to the Work Patterns screens as required.

Menu Option	Menu ID	System
Pattern Codes	CONFIG_SET_MENU.PATTERN_CODES	CorePortal
Work Patterns	CONFIG_SET_MENU.WORK_PATTERNS	CorePortal
Get patterntypes	WS_ROSTER_MENU.GET_PATTERNTYPES	Web Services
Update patterntypes	WS_ROSTER_MENU.PATCH_PATTERNTYPES_ID	Web Services
Delete patterntypes	WS_ROSTER_MENU.DELETE_PATTERNTYPES	Web Services
Get patterntypes label	WS_ROSTER_MENU.GET_PATTERNTYPES_LABEL	Web Services
Get workpattern	WS_ROSTER_MENU.GET_WORKPATTERN	Web Services
Update workpattern	WS_ROSTER_MENU.PATCH_WORKPATTERN_ID	Web Services
Delete workpattern	WS_ROSTER_MENU.DELETE_WORKPATTERN_ID	Web Services

Menu Option	Menu ID	System
Create workpattern	WS_ROSTER_MENU.POST_WORKPATTERN	Web Services
Create workpattern copy	WS_ROSTER_MENU.POSTWORKPATTERN_COPY	Web Services
Get workpattern mapping	WS_ROSTER_MENU.GET_WORKPATTERN_MAPPING	Web Services
Update workpattern mapping	WS_ROSTER_MENU.PATCH_WORKPATTERN_MAPPING_ID	Web Services
Delete workpattern mapping	WS_ROSTER_MENU.DELETE_WORKPATTERN_MAPPING	Web Services
Create workpattern mapping	WS_ROSTER_MENU.POST_WORKPATTERN_MAPPING	Web Services
Get workpattern breaks	WS_ROSTER_MENU.GET_WORKPATTERN_BREAKS	Web Services
Update workpattern breaks	WS_ROSTER_MENU.PATCH_WORKPATTERN_BREAKS_ID	Web Services
Create workpattern breaks	WS_ROSTER_MENU.POST_WORKPATTERN_BREAKS	Web Services
Delete workpattern breaks	WS_ROSTER_MENU.DELETE_WORKPATTERN_BREAKS_ID	Web Services
Create workpattern flexitime	WS_ROSTER_MENU.POST_WORKPATTERN_FLEXITIME	Web Services
Update workpattern flexitime	WS_ROSTER_MENU.PATCH_WORKPATTERN_FLEXITIME_ID	Web Services
Create workpattern flexitime	WS_ROSTER_MENU.POST_WORKPATTERN_FLEXITIME	Web Services
Delete workpattern flexitime	WS_ROSTER_MENU.DELETE_WORKPATTERN_FLEXITIME_ID	Web Services
