1. Overview

1.1. Purpose of Guide

The purpose of this document is to provide an overview of the *Additional Validation* functionality in *Time and Attendance*, and how this is used. This includes:

- What is *Additional Validation* and when is it used?
- Detailed guidance on how to configure each type of *Additional Validation*.

1.2. Additional Validation Overview

It is possible to configure and use 3 types of *Additional Validation* within the system. These have been added to prevent the cashing out of annual leave for employees. The 3 types of *Additional Validation* are listed below.

Additional Validation Type	Overview
Max Daily Pay Code Limit (Pay Code Setting)	An employee cannot have more than a configurable number of hours annual leave recorded on one <i>Pay Code</i> , per day. View section Max Daily Pay Code Limit for further information and configuration.
Max Overall Daily Pay Code Limit (Validation Rule)	An employee cannot have more than a configurable number of hours recorded on a day, across a list of <i>Pay Codes</i> . View section Max Overall Daily Pay Code Limit for further information and configuration.
Holidays & Contracted Hours Check (Validation Rule)	If annual leave hours are recorded, the total hours for the week cannot exceed the employee's contracted hours. View section Holidays & Contracted Hours check for further information and configuration.

The following table details each screen *Additional Validation* that has been added, per *Additional Validation* type.

Additional Validation Type	Timesheet Input	Time Exceptions	Leave Approval	Absence Details	Approve/Sign off
Max Daily Pay Code Limit	✓	✓	✓	✓	✓
Max Overall Daily Limit (Multiple Pay Codes)	✓	✓			✓
Holidays & Contracted Hours check					✓

2. Max Daily Pay Code Limit (Pay Code Setting)

2.1. Overview

There is a *Max Daily Limit* value that can be applied at *Pay Code* level. This prevents users from entering values greater than the value stored at the *Pay Code* level.

This can be applied for the following examples of use:

- *Value Pay Codes*: Meal allowance, cannot enter more the €10 / £10 per day.
- *Unit Pay Codes*: On Call allowance, cannot enter a value greater than 1 on call.
- *Hours Pay Codes*: Cannot enter more than 8.00 hours annual leave.

For example, an employee cannot have more than a configurable number of hours annual leave recorded on one *Pay Code*, per day, than the *Max Daily Limit* value applied at *Pay Code* level.

- This prevents users from entering values greater than the value stored on the *Pay Code*.
- Validation alerts can be configured to stop entry on all screens except the *Approve/Sign Off* screen, which can display:
 - **Warning** – the user is warned but can continue with *Sign Off*.
 - **Stop** – the user cannot continue with *Sign Off*.

An example of this is highlighted in the *Approve/Sign Off* screen below.

The screenshot displays the 'Workforce Management' interface. At the top, there's a blue header with a back arrow and the text 'Workforce Management'. Below this is a 'View Details' section for 'Ronan Watson', a Support Analyst in Technical Support. The main content area is divided into two sections: 'Warnings Requiring Action' and 'Items Requiring Action'. The 'Warnings Requiring Action' section is highlighted with a red border and contains two identical warning messages: '1. This Overtime @ 2.00 Absence Cannot Be Recorded As It Would Result In The Employee Exceeding The Daily Max Overtime @ 2.00 Hours (5 Hours) On 24-Dec-18. The Employee Roster Will Need To Be Updated First.' and '2. This Overtime @ 2.00 Absence Cannot Be Recorded As It Would Result In The Employee Exceeding The Daily Max Overtime @ 2.00 Hours (5 Hours) On 25-Dec-18. The Employee Roster Will Need To Be Updated First.' The 'Items Requiring Action' section shows a table with columns for Hours, Description, Reason, Narrative, Approve, Reject, and a VIEW button. It lists two overtime entries for 7 Hrs 0 Min, one for Tue 25-Dec-2018 and one for Wed 26-Dec-2018, both requiring recode. At the bottom right, there is a green 'SAVE' button.

Hours	Description	Reason	Narrative	Approve	Reject	
7 Hrs 0 Min	Overtime @ 2.00 Tue 25-Dec-2018 Requires recode			☒	☐	VIEW
7 Hrs 0 Min	Overtime @ 2.00 Wed 26-Dec-2018 Requires recode			☒	☐	VIEW

The *Additional Validation* can be applied 'Per Day', or 'Per Entry' within the day. This is configured via an *Advanced Option*. For further information, view section [2.2.2. Advanced Options Configuration](#).

Additional Validation is applied to the following screens:

- Timesheet Input
- Time Exceptions
- Leave Approval
- Absence Input
- Sign Off/Approve

Example 1: Timesheet Input screen

The table below describes the system configuration for this example scenario.

Configuration Item	Setting
Pay Code	Annual Leave
Max Daily Limit value	8 hours
Sign Off Warning Level	Warning
APPLY MAX PAY CODE HOURS CHECK	On
INCLUDE ALL HOURS IN DAY FOR MAX PAY CODE HOURS	On

In this example, the employee has 7 hours annual leave already input for the 24th of December. This is shown in the *Timesheet Input* screenshot below.

Workforce Management

Timesheet Input

Workforce Management > Timesheet Input

This Annual Leave Absence Cannot Be Recorded As It Would Result In The Employee Exceeding The Daily Max Annual Leave Hours (8 Hours) On 24-Dec-18. The Employee'S Roster Will Need To Be Updated First. **DISMISS**

Example 3: Approve/Sign Off Screen

The table below describes the system configuration for this example scenario.

Configuration Item	Setting
Pay Code	Overtime @2
Max Daily Limit value	5 hours
Sign Off Warning Level	Stop
APPLY MAX PAY CODE HOURS CHECK	On
INCLUDE ALL HOURS IN DAY FOR MAX PAY CODE HOURS	On

In this example, the employee has 7 hours 'Overtime @2' input for each day 24th, 25th, and 26th of December which totals 21 hours. This is shown in the *Timesheet Input* and *Approve/Sign Off* screenshots below.

Timesheet Input screen

Pay Code	Entry Type	Location	Cost Centre	Mon 24th	Tue 25th	Wed 26th	Thu 27th	Fri 28th	Sat 29th	Sun 30th	Total
Annual Leave	M	Head Office	Default	7.30							7.30
Overtime @ 1.50	M	Head Office	Default	7.00							7.00
Overtime @ 2.00	M	Head Office	Default	7.00	7.00	7.00					21.00
Basic Hours	M	Head Office	Default				8.00	7.50			15.50
				21.30	7.00	7.00	8.00	18.50	7.50	8.00	78.10

1 - 8 of 8

The *Stop Error* displays on screen.

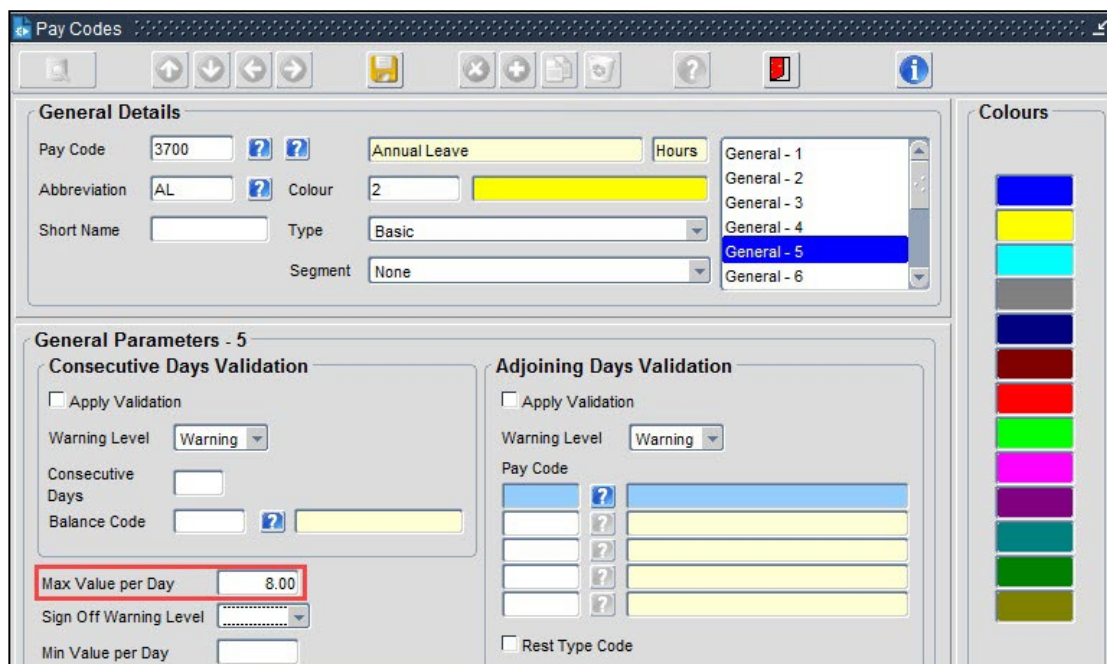

2.2. Configuration

2.2.1. Pay Code Configuration

To apply a *Max Daily Limit* value applied at *Pay Code* level:

1. Go to *Backoffice > CoreTime/CoreRoster > System Parameters > Pay Codes*.
2. Enter the applicable *Pay Code*.
3. Select **General Param – 5**.
4. Enter the *Max Value per Day*, as required.

In this example, the maximum hours per day for the 'Annual Leave' *Pay Code* is 8. Therefore, 8.00 is entered.

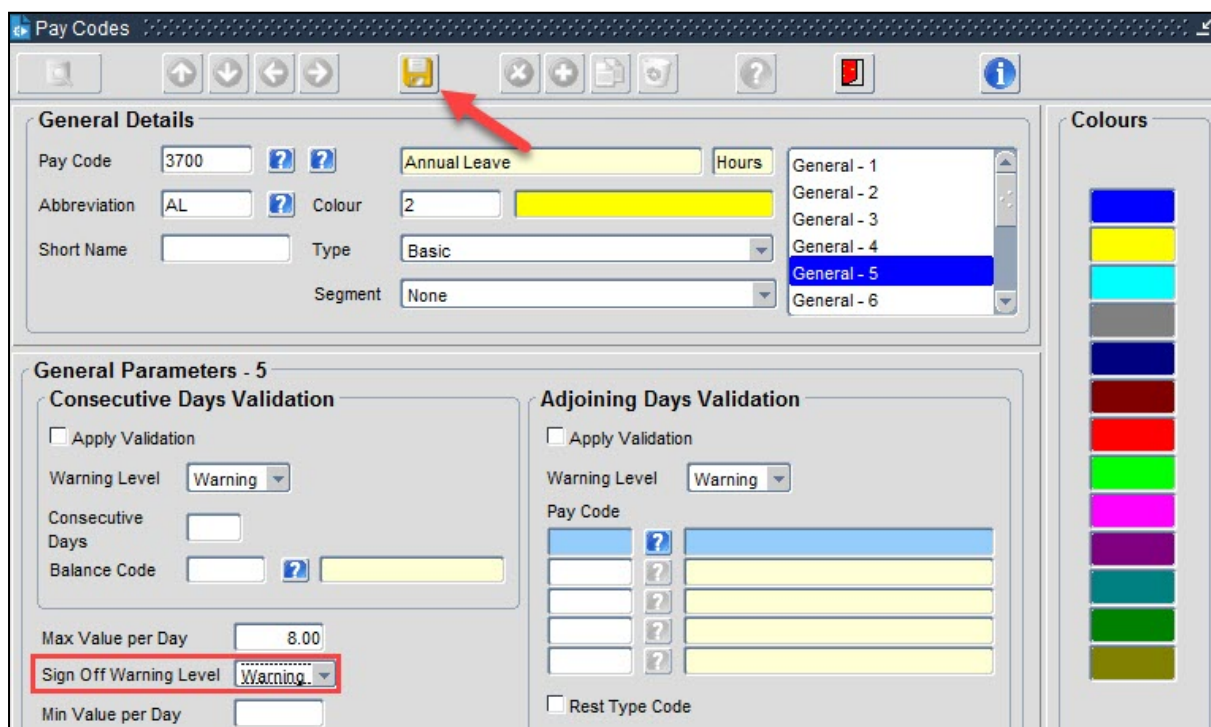

5. Next, select the applicable *Sign Off Warning Level*.

The following 2 options are available:

- **Warning:** At *Sign off*, you are prompted that the max value is exceeded, but allowed to continue if required.
- **Stop:** At *Sign off*, you are prompted that the max value is exceeded, and must stop until the value corrections are actioned.

6. Click the  button to save.

The screenshot shows the 'Pay Codes' configuration window. A red arrow points to the save icon in the toolbar. The 'General Details' section includes fields for Pay Code (3700), Abbreviation (AL), Colour (2), Short Name, Type (Basic), and Segment (None). The 'General Parameters - 5' section shows 'Consecutive Days Validation' with 'Apply Validation' unchecked, 'Warning Level' set to 'Warning', 'Consecutive Days' set to 1, 'Balance Code' set to 1, 'Max Value per Day' set to 8.00, and 'Sign Off Warning Level' set to 'Warning'. The 'Adjoining Days Validation' section also has 'Apply Validation' unchecked and 'Warning Level' set to 'Warning'. A 'Colours' panel on the right shows a list of color swatches.

2.2.2. Advance Options Configuration

The *Advanced Options* listed in the below table require configuration for the *Max Daily Limit - Additional Validation*.

Advanced Option	Explanation
'APPLY MAX PAY CODE HOURS CHECK TO ABSENCE ENTRY ALSO'	• If this <i>Advanced Option</i> is switched ON, this indicates that the validation applies to <i>Absence Entry</i>. For example, managers recording absences on-behalf of employees. • If this <i>Advanced Option</i> is switched OFF, this indicates that the validation does not apply to <i>Absence Entry</i>. For example, managers recording absences on-behalf of employees.

'INCLUDE ALL HOURS IN DAY FOR MAX PAY CODE HOURS CHECK FOR CT_CALC_HOURS TAF336'

- If this *Advanced Option* is switched ON, then the validation per day includes all entries in a day. For example, if 1 instance of annual leave is input for 8 hours, a second instance of annual leave for 8 hours cannot be input, if it exceeds the *Max Daily Pay Code* limit.
- If this *Advanced Option* is switched OFF, then the validation per day does not include all entries in a day. For example, if 1 instance of annual leave is input for 8 hours, a second instance of annual leave for 8 hours can be input, even if it exceeds the *Max Daily Pay Code* limit.

To enable the applicable *Advanced Options*:

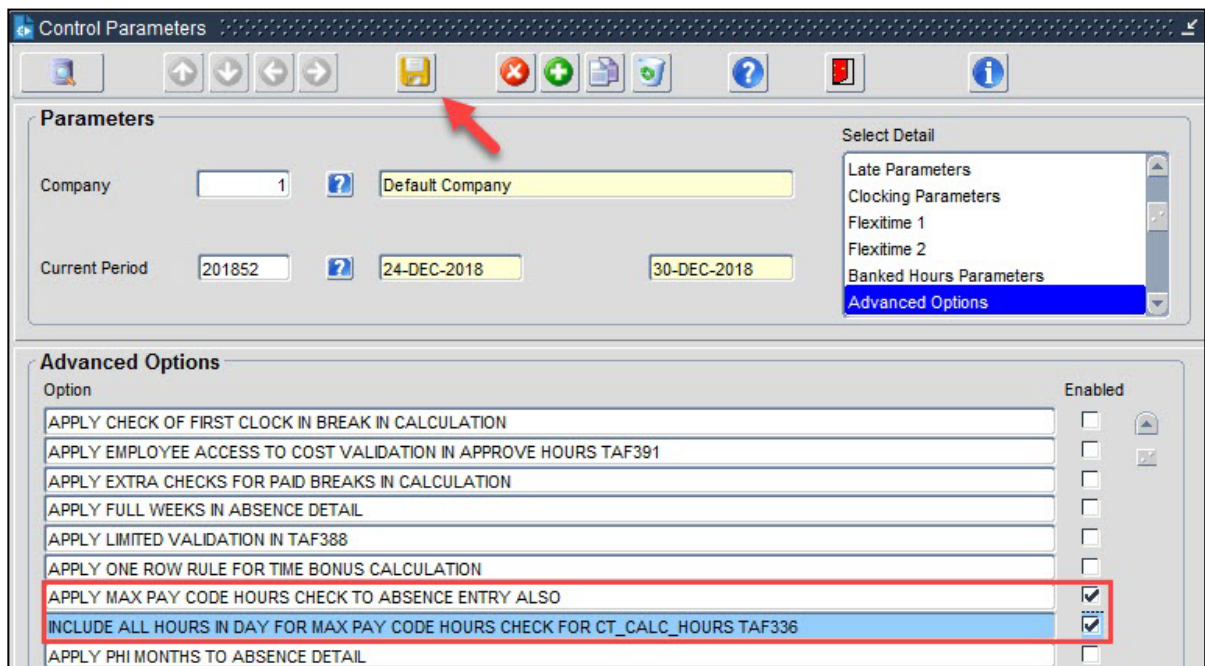

1. Go to *Backoffice > CoreTime/CoreRoster > System Parameters > Reference A-C > Control Parameters*.
2. Enter the *Company*, then tab.
3. Select **Advanced Options** from *Select Detail*.
4. Locate the below options in the *Advanced Options* section of the screen.

Advanced Options Text

APPLY MAX PAY CODE HOURS CHECK TO ABSENCE ENTRY ALSO

INCLUDE ALL HOURS IN DAY FOR MAX PAY CODE HOURS CHECK FOR CT_CALC_HOURS TAF336

5. Tick each option to *Enable*, as required.
6. Click the  button to save.

The screenshot shows the 'Control Parameters' window. The 'Parameters' section includes fields for 'Company' (1), 'Current Period' (201852), and dates (24-DEC-2018 to 30-DEC-2018). The 'Select Detail' dropdown is set to 'Advanced Options'. The 'Advanced Options' section contains a list of options with checkboxes. The last two options are checked:

Option	Enabled
APPLY CHECK OF FIRST CLOCK IN BREAK IN CALCULATION	☐
APPLY EMPLOYEE ACCESS TO COST VALIDATION IN APPROVE HOURS TAF391	☐
APPLY EXTRA CHECKS FOR PAID BREAKS IN CALCULATION	☐
APPLY FULL WEEKS IN ABSENCE DETAIL	☐
APPLY LIMITED VALIDATION IN TAF388	☐
APPLY ONE ROW RULE FOR TIME BONUS CALCULATION	☐
APPLY MAX PAY CODE HOURS CHECK TO ABSENCE ENTRY ALSO	☒
INCLUDE ALL HOURS IN DAY FOR MAX PAY CODE HOURS CHECK FOR CT_CALC_HOURS TAF336	☒
APPLY PHI MONTHS TO ABSENCE DETAIL	☐

3. Max Overall Daily Pay Code Limit (Validation Rule)

3.1. Overview

There is a *Max Overall Daily Pay Code Limit* value that can be applied at *Pay Code Group* level. This prevents users from entering values across multiple *Pay Codes*, greater than the *Max Overall Daily Pay Code Limit*, for the *Pay Code Group*.

For example, an employee cannot have more than a configurable number of hours recorded on a day, across a list of *Pay Codes*.

- The *Max Overall Daily Pay Code Limit* value can be applied for a defined group of *Pay Codes*, and a daily value specified within the *Control Parameters*.
- This prevents users from entering *Pay Codes* and hours greater than the daily value allowed. This can be applied for the following scenario:
 - If a configured max value of 7 hours is allowed per day, and values are recorded greater than this limit, across *Pay Codes* within the *Pay Code Group*:
 - The manager is stopped at *Timesheet Input* stage; **OR**
 - The manager is alerted at *Approve/Sign Off* stage.

Example - Timesheet Input screen:

The screenshot shows the 'Timesheet Input' screen for Employee Ronan Watson. A validation error message is displayed at the top right: 'The Total Hours (8) For 10-Dec-18 Exceeds The Max Value Of 7. Please Update The Timesheet.' with a 'DISMISS' button. The error message is highlighted with a red box and an arrow. Below the error message, the screen shows the employee's details and a table of timesheet entries for 10-Dec-2018. The table has columns for Cost Centre, Pay Code, Entry Type, and hours for each day of the week (Mon 10th to Sun 16th), plus a Total column. The entries are: 'Annual Leave Carried Forward' with 2.00 hours and 'Annual Leave' with 6.00 hours. The total hours for the day are 8.00, which exceeds the configured maximum of 7.00 hours.

Cost Centre	Pay Code	Entry Type	Mon 10th	Tue 11th	Wed 12th	Thu 13th	Fri 14th	Sat 15th	Sun 16th	Total
	Annual Leave Carried Forward	M	2.00							2.00
	Annual Leave	M	6.00							6.00

- Validation alerts at *Approve/Sign Off* stage can be configured as:
 - **Warning** – the user is warned but can continue with *Sign Off*.
 - **Stop** – the user cannot continue with *Sign Off*.

Additional Validation is applied to the following screens:

- Timesheet Input
- Time Exceptions
- Approve/Sign Off

Example 1: Approve/Sign Off screen

The table below describes the system configuration for this example scenario.

Configuration Item	Setting
Pay Code Group	'Annual Leave' & 'Annual Leave Carried Forward'
Max Overall Daily Limit value	7 hours
Sign Off Warning Level	Stop

In this example, the employee has 6 hours 'Annual Leave' and 2 hours 'Annual Leave Carried Forward' input for Monday 10th of December, which totals 8 hours. This is shown in the *Timesheet Input* screenshot below.

Timesheet Input
Workforce Management > Timesheet Input

Employee Ronan Watson Location Head Office
Project Cost centre Default

10-Dec-2018

3.2. Configuration

3.2.1. Maximum Daily Hours Configuration

To configure the *Maximum Daily Hours*:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A-C > Control Parameters*.
2. Enter the *Company*.
3. Select **General Parameters – 4**.

The screenshot shows the 'Control Parameters' window. The 'Company' field is set to '1' and 'Default Company'. The 'Current Period' is set to '201852' with dates '24-DEC-2018' and '30-DEC-2018'. The 'Select Detail' dropdown is open, and 'General Parameters - 4' is selected and highlighted with a red box. A red arrow points to the 'Company' field.

The *General Parameter – 4* section displays on screen.

4. Enter the applicable *Maximum Daily Hours* per day.

In this example, the *Maximum Daily Hours* is set to 7 hours each day.

Note: The *Stop*, *Warn*, and *Allow* parameters on screen are not applicable, as this is controlled via *Validation Rules*, covered in section [3.2.3. Rule Configuration](#).

5. Click the  button to save.

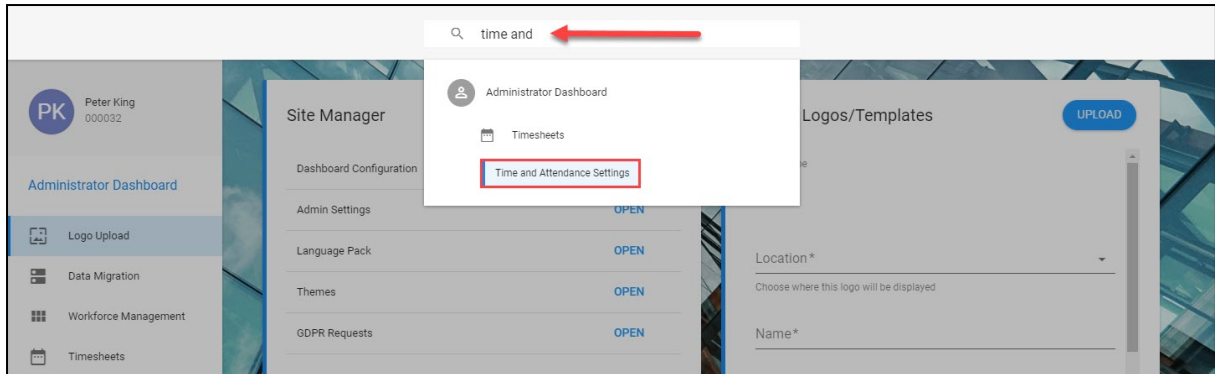

The screenshot shows the 'Control Parameters' window with the 'General Parameters - 4' section expanded. The 'Check for Maximum Daily Hours' section is highlighted with a red box. It contains a table with days of the week and their corresponding maximum daily hours, all set to 7.00. To the right of the table are radio buttons for 'Stop', 'Warning', and 'Allow', with 'Allow' selected. A red arrow points to the 'Check for Maximum Daily Hours' section.

Day	Maximum Daily Hours
Monday	7.00
Tuesday	7.00
Wednesday	7.00
Thursday	7.00
Friday	7.00
Saturday	7.00
Sunday	7.00

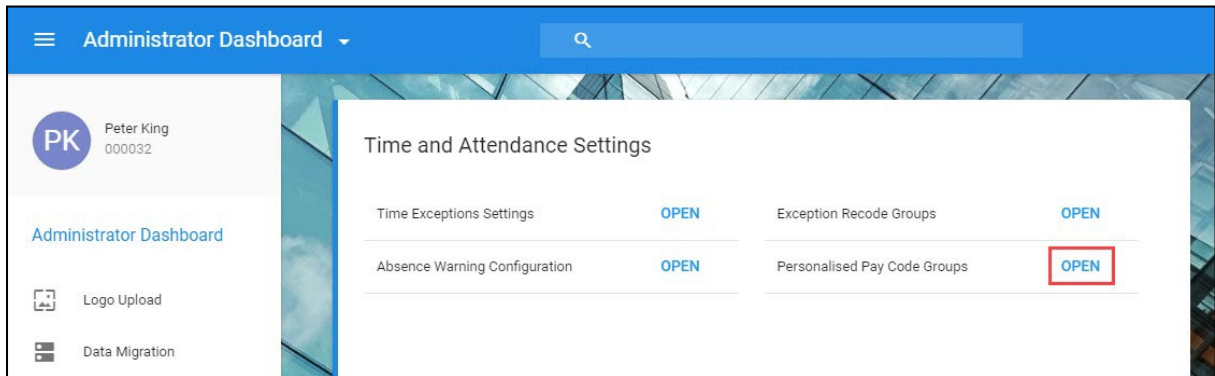

3.2.2. Create Personalised Pay Code Group

To create a *Personalised Pay Code Group*:

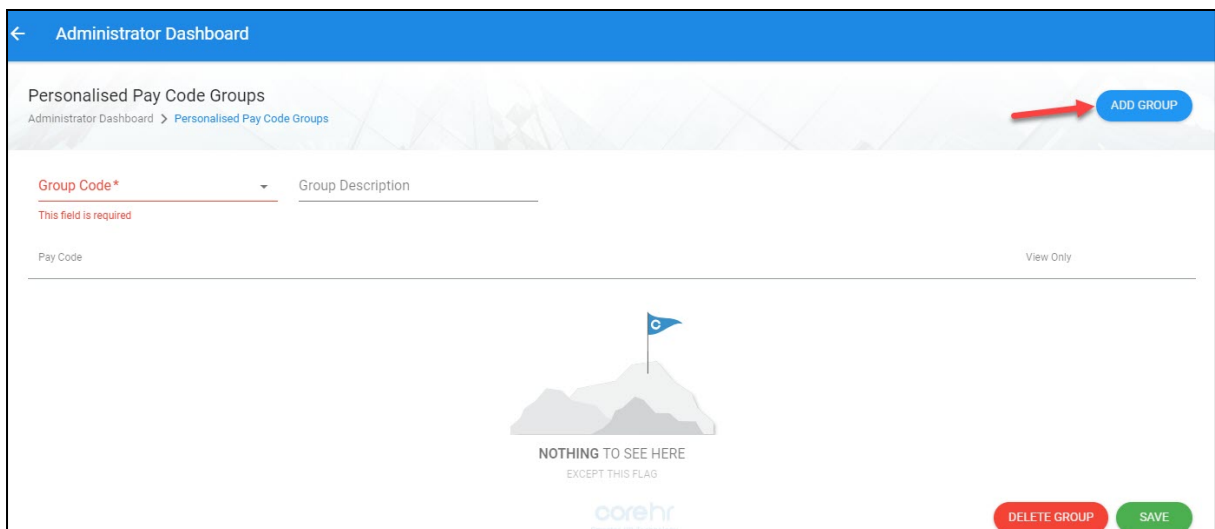

1. Go to *CorePortal* and quick jump to the *Time and Attendance Settings* widget.

2. Select **Personalised Pay Code Groups**.

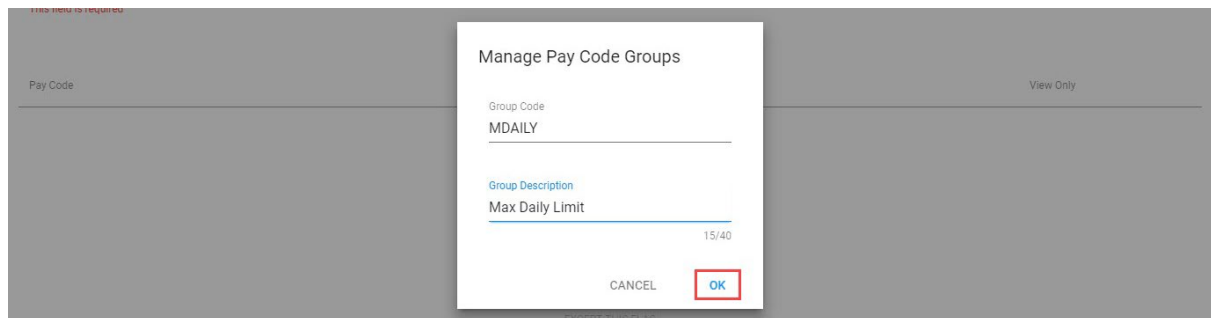

3. Select **Add Group**.

The *Manage Pay Code Groups* pop-up displays.

4. Enter the *Group Code*.
5. Enter the *Group Description*.
6. Click **OK**.

Manage Pay Code Groups

3.2.3. Rule Configuration

There are two entities introduced into *Workforce Management* to manage the *Max Overall Daily Pay Code configuration*:

1. Validation Groups:

- *Validation Groups* are groups of 'Validation Rules' that are linked at *Company* or *Work Group* level. If populated at *Work Group* level this overrides the *Company* level.
- The default *Validation Group* created during install is called 'Sign Off Hours'.

2. Validation Rules:

- *Validation Rules* are the individual rules that are available within the system.
- Default *Validation Rules* created during install are:
 - 'Max Daily Limit'
 - 'Holidays & Contract Hours (Weekly)'

Note: Default rules are populated as part of the install. If changes are required, contact your CoreHR Project team. The default *Validation Rule* is shown in the table below.

The *Max Overall Daily Pay Code Limit - Validation Rule* is configured by default on install as follows:

Configuration Item	Setting
Personalised Pay Code Group	336
Timesheet Input screen validation	Stop
Time Exceptions screen validation	Stop
Approve/Sign Off screen validation	Stop
Validation Group	Sign Off Hours

3.2.4. Assign Validation Rules to Company/Work Groups

To assign *Validation Rules* at *Company* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A-C > Control Parameters*.
2. Enter the *Company*.
3. Select **Sign Off Rules** from *Select Detail*.

4. Select the applicable **Sign Off Rule** from the list of values, by clicking the  button.
The *Sign Off Rule* specified in the below screenshot, is the default 'Sign Off Rule' configured on install.
5. Click **OK**.
6. Click the  button to save.

To assign *Validation Rules* at *Work Group* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Work Groups*.

2. Enter the *Work Group*.
3. Select **Sign Off Rules**.

The screenshot shows the 'Work Groups' dialog box with the 'General Details' tab selected. The 'Work Group' field is set to 'ITOPS'. The 'Select Details' list on the right includes 'Trigger Points', 'Group Codes', 'Contract Work Day', 'CATS Rules', and 'Sign Off Rules'. A red arrow points to 'Sign Off Rules'.

4. Select the applicable **Sign Off Rule** from the list of values, by clicking the  button.
The *Sign Off Rule* specified in the below screenshot, is the default 'Sign Off Rule' configured on install.
5. Select **OK**.
6. Click the  button to save.

The screenshot shows the 'Work Groups' dialog box with the 'Sign Off Rules' tab selected. A sub-dialog box titled 'List of Sign Off Rules' is open, showing a search field with 'Sign Off Hours%' and a list of rule groups with 'Sign Off Hours' selected. A red arrow points to the 'OK' button in the sub-dialog.

4. Holidays & Contracted Hours Check (Validation Rule)

4.1. Overview

There is a *Holiday & Contracted Hours Check* to prevent the cashing out of employee annual leave, where excessive annual leave hours are entered during *Timesheet Input* or during the *Approve/Sign Off* process, to be sent to payroll for payment. These scenarios could result in an employee getting paid for annual leave, but they may not actually be taking the time off.

For example, if annual leave hours are recorded, the total hours for the week cannot exceed the employee's contracted hours.

- Therefore, the total hours recorded (inclusive of annual leave) cannot exceed the employee contracted hours.
- Validation alerts can be configured as:
 - **Warning** – the user is warned but can continue with *Sign Off*.
 - **Stop** – the user cannot continue with *Sign Off*.

Additional validation is applied to the following screen:

- *Approve/Sign Off* screen only

Example:

The table below describes the system configuration for this example scenario.

Configuration Item	Setting
Pay Code	The 'Annual Leave' <i>Pay Code</i> has the <i>Holiday</i> indicator switched On .
Holidays & Contracted Hours Limit	Employee's contracted hours
Sign Off Warning Level	Stop

The employee has a contract of 37.5 hours for the week. However, 40 hours annual leave have been recorded, this is shown on the *Timesheet Input* screen below.

The screenshot shows the 'Timesheet Input' screen for Employee Ronan Watson. The interface includes a header with the employee's name, location, and project. Below this, there are tabs for 'Rejected', 'Recode Required', 'Approval Required', 'Reason Code Required', and 'Narrative Attache'. A table displays the timesheet data for the week of 10-Dec-2018. The table has columns for 'Pay Code', 'Entry Type', 'Location', 'Cost Centre', and days of the week (Mon 10th to Sun 16th), followed by a 'Total' column. A red box highlights the 'Annual Leave' entry for Monday 10th, which shows 10.00 hours. The total for the week is 40.00 hours, which exceeds the contracted hours of 37.5 hours.

Pay Code	Entry Type	Location	Cost Centre	Mon 10th	Tue 11th	Wed 12th	Thu 13th	Fri 14th	Sat 15th	Sun 16th	Total
Annual Leave	M	Head Office	Default	10.00	10.00	10.00	10.00				40.00
				10.00	10.00	10.00	10.00	0.00	0.00	0.00	40.00

At *Approve/Sign Off* stage, managers are alerted if the total number of hours of annual leave recorded for the week, exceeds the employee's contracted hours. This is shown in the screenshot below, highlighted by the *Warnings Requiring Actions*.

The screenshot shows the 'View Details' page for an employee named Ronan Watson, Support Analyst, Technical Support. A red box highlights a 'Warnings Requiring Action' section with the following text: '1. The Total Hours (40) For The Week 10-Dec-18 To 16-Dec-18 Exceeds The Contract Hours (37.5). When Holiday Hours Are Recorded, Total Hours Cannot Exceed Contract Hours. Please Update The Timesheet.' Below this, there is a section for 'Items Requiring Action' with a table header including 'Hours', 'Description', 'Reason', 'Narrative', 'Approve', and 'Reject'.

4.2. Configuration

4.2.1. Pay Codes

The *Annual Leave Pay Code* (or *Pay Codes*) need to be flagged as a *Holiday Pay Code*. The *Holidays & Contracted Hours* check only operates if the *Holiday* indicator is switched **On** for the *Pay Code*.

To configure the *Pay Code*:

1. Go to *Backoffice > CoreTime/CoreRoster > System Params > Pay Codes*.
2. Enter the 'Annual Leave', or other applicable *Pay Code*.
3. Switch **On** the *Holiday* indicator.
4. Click the  button to save.

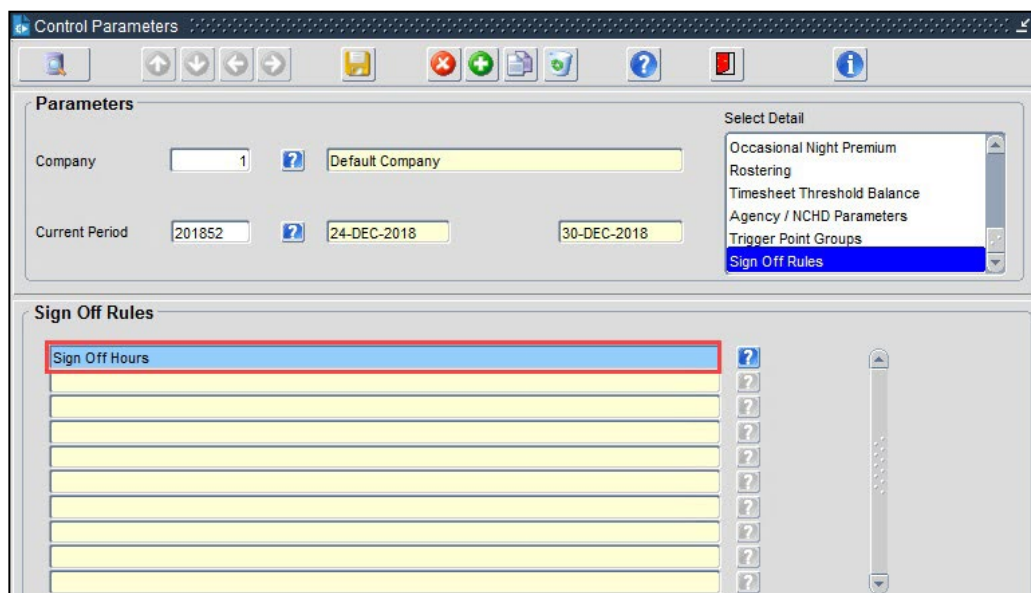

The screenshot shows the 'Pay Codes' configuration window. In the 'General Details' section, the 'Pay Code' is set to '3700' and the 'Name' is 'Annual Leave'. The 'Type' is set to 'Basic' and the 'Segment' is 'None'. In the 'General Parameters - 1' section, the 'Holiday' checkbox is checked, indicated by a red arrow. Other parameters include 'Requires Approval', 'Requires Recode', 'Requires Reason', 'Requires Narrative', 'Absence', 'Bank Holiday', 'Maternity Code', 'Allow Future Absences', 'Allow Advance Payments', 'Allow Leave Requests', and 'Allow Absence Details'. A 'Colours' section on the right shows a list of color options.

4.2.2. Rule Configuration

There are two entities introduced into *Workforce Management* to manage the *Holidays & Contracted Hours Check* configuration:

1. Validation Groups:

- *Validation Groups* are groups of 'Validation Rules' that are linked at Company or *Work Group* level. If populated at *Work Group* level this overrides the *Company* level.
- The default *Validation Group* created during install is called 'Sign Off Hours'.

2. Validation Rules:

- *Validation Rules* are the individual rules that are available within the system.
- Default *Validation Rules* created during install are:
 - 'Max Daily Limit'
 - 'Holidays & Contract Hours (Weekly)'

Note: Default rules are populated as part of the install. If changes are required, contact your CoreHR Project team. The default *Validation Rule* is shown in the table below.

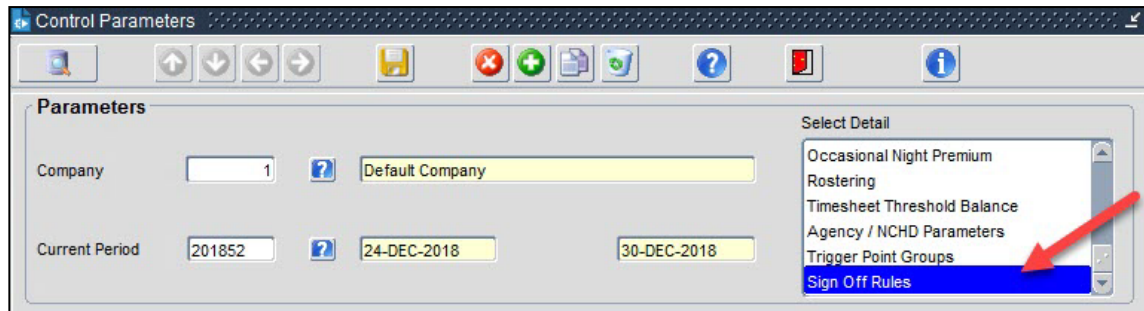

The *Holidays & Contract Hours Check - Validation Rule* is configured by default on install as follows:

Configuration Item	Setting
Personalised Pay Code Group	336
Approve/Sign Off screen validation	Stop
Validation Group	Sign Off Hours

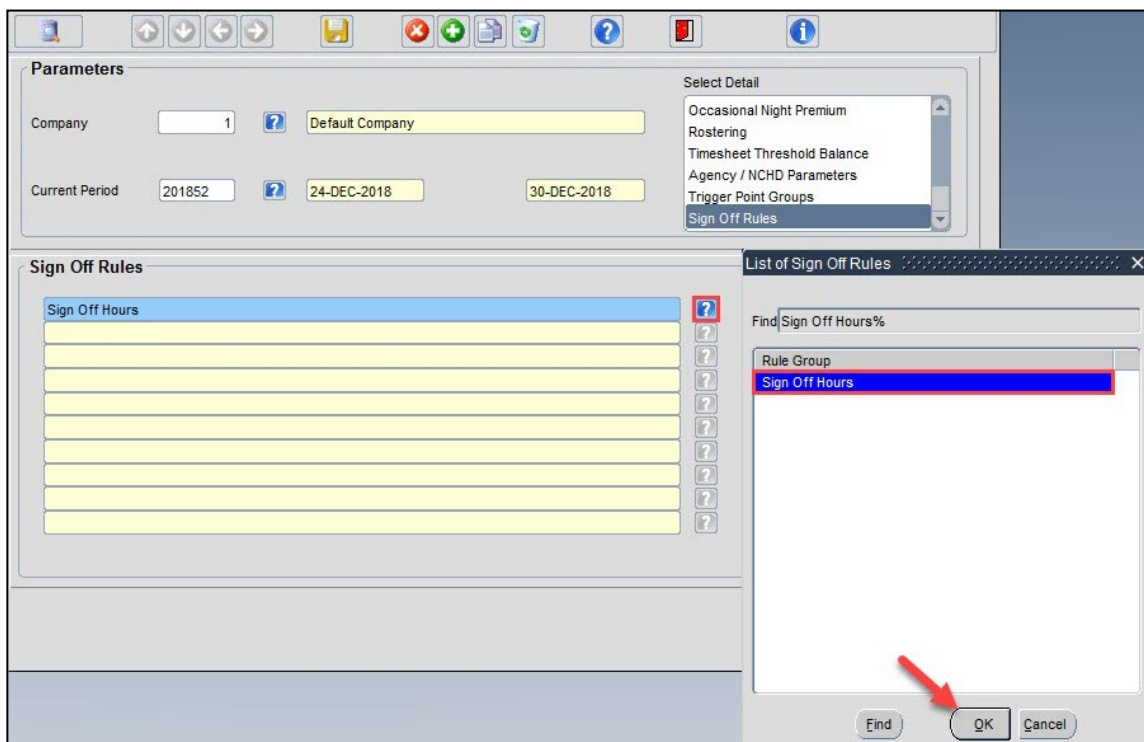

4.2.3. Assign Validation Rules to Company/Work Groups

To assign *Validation Rules* at *Company* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference A-C > Control Parameters*.
2. Enter the *Company*.
3. Select **Sign Off Rules** from *Select Detail*.

4. Select the applicable **Sign Off Rule** from the list of values, by clicking the  button.
The *Sign Off Rule* specified in the below screenshot, is the default 'Sign Off Rule' configured on install.
5. Select **OK**.
6. Click the  button to save.

To assign *Validation Rules* at *Work Group* level:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Work Groups*.

2. Enter the *Work Group*.
3. Select **Sign Off Rules**.

The screenshot shows the 'Work Groups' dialog box. Under the 'General Details' tab, the 'Work Group' is set to 'ITOPS'. The 'Select Details' list on the right contains several options: Trigger Points, Group Codes, Contract Work Day, CATS Rules, and Sign Off Rules. A red arrow points to 'Sign Off Rules'.

4. Select the applicable **Sign Off Rule** from the list of values, by clicking the  button.
The *Sign Off Rule* specified in the below screenshot, is the default 'Sign Off Rule' configured on install.
5. Select **OK**.
6. Click the  button to save.

The screenshot shows the 'Work Groups' dialog box with the 'Sign Off Rules' tab selected. A sub-dialog titled 'List of Sign Off Rules' is open, displaying a list with 'Sign Off Hours' selected. A red arrow points to the 'OK' button in the sub-dialog.
