1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure the Recruitment module for CorePortal users. CorePortal users are broken down into the following groups:

1. Employees (i.e. internal applicants)
2. Managers
3. Recruitment administrators

This guide includes:

- What is configurable on the *Recruitment Dashboard* and how it is managed.
- A breakdown of default / standard security menu profiles that are available to be assigned to CorePortal users.
- Advice on best practice configuration.

Note:

- This guide does not include:
 - Steps on how to create & amend menu profiles in the Security module.
 - Guidance on dashboard configuration, for the purpose of amending the dashboard tabs and widget layout .
 - Staff Request configuration.
- This guide also does not include the creation of Application Forms for applicants when applying for vacancies nor does it include the Recruitment Website configuration and design. For information on configuring these items, refer to the ***Recruitment Website and Application Form Configuration*** user guide.

2. Recruitment Admin Dashboards & Widgets

2.1. Overview

2.1.1. Baseline Configuration Overview

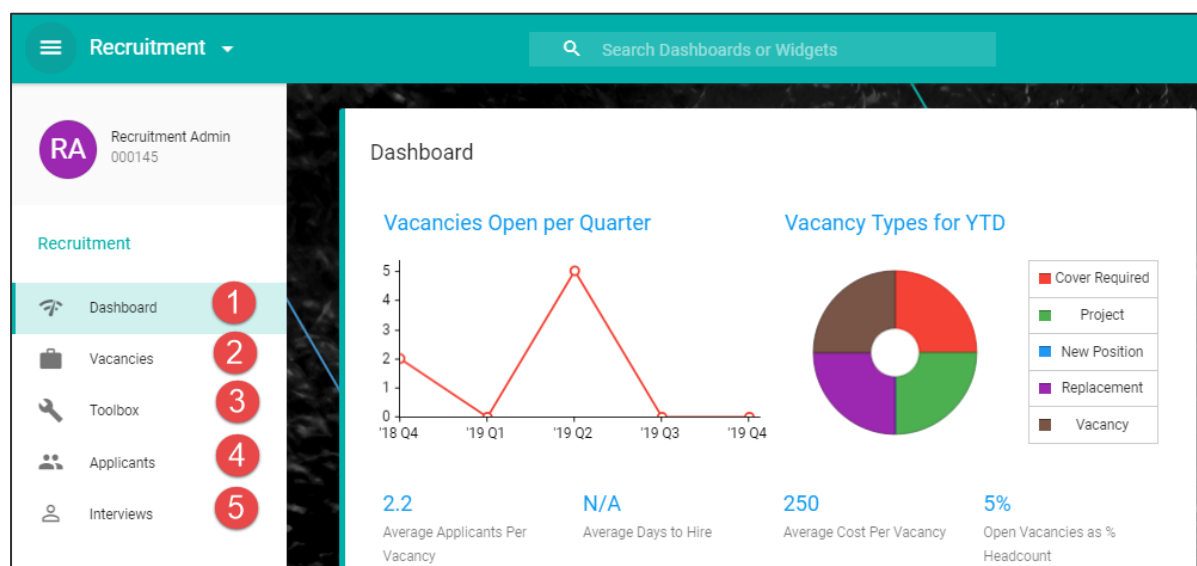

Note:

The following points should be taken into consideration when configuring & viewing the *Recruitment Dashboard* & it's accompanying widgets for the *Employee Dashboard* & *Manager Dashboard*:

- The *Recruitment Dashboard* can be re-configured and amended using the *Dashboard Configuration* screen. However, the items pre-configured as outlined in this guide are set-up as standard and to follow best practice configuration. Therefore, it is recommended that the set-up does not change.
- Access to the *Recruitment Dashboard*, *Manager Dashboard*, *Employee Dashboard*, tabs, screens & further options are controlled by Security Menu Profiles.
- Access to see vacancy records and applicants within these areas is controlled separately, via data access.

The *Recruitment Dashboard* is pre-configured with standard settings. The following table provides a list of the tabs and widgets that are available on install:

Tab	Widget
1. Dashboard	Dashboard
2. Vacancies	Vacancies
	Vacancies Stream
	Vacancies Chart

Tab	Widget
3. Toolbox	Toolbox
4. Applicants	Applicants
5. Interviews	Interviews

2.1.2. Default Menu Profiles

The below pre-configured menu profiles can be used to enable access to the majority of menu options for the *Recruitment* module by default.

Menu Profile	Explanation
CorePortal_Recruit_Admin	This is the standard menu profile used to grant access to employees or managers to the <i>Recruitment Dashboard</i> . You can add further menu options that are required to give access to further widgets to this profile.
CorePortal_Employee	This is the standard menu profile used to grant access to employees to the <i>Employee Dashboard</i> . Although nothing is pre-configured on this profile for Recruitment, you can add further menu options that are required to give access to employee self-service (ESS) widgets to this profile to quickly roll out access to the corresponding widgets.
CorePortal_Manager	This is the standard menu profile used to grant access to managers to the <i>Manager Dashboard</i> . Although nothing is pre-configured on this profile for Recruitment, you can add further menu options that are required to give access to manager self-service (MSS) widgets to this profile to quickly roll out access to the corresponding widgets.

Note: The menu profiles above can be edited to add/remove options as required for your organisation. Alternatively, you can create new menu profiles from scratch or copy and edit the existing menu profiles.

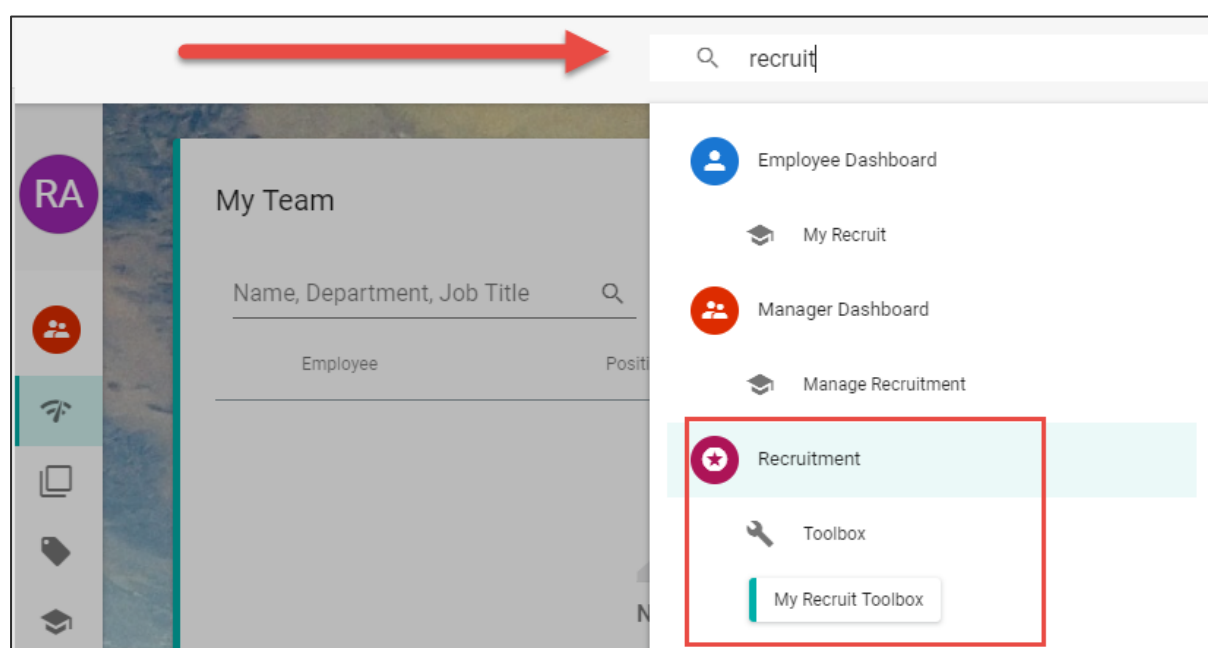

2.2. Accessing the Recruitment Dashboard

The below menu options are the minimum needed to access the *Recruitment Dashboard* from an administrator's perspective.

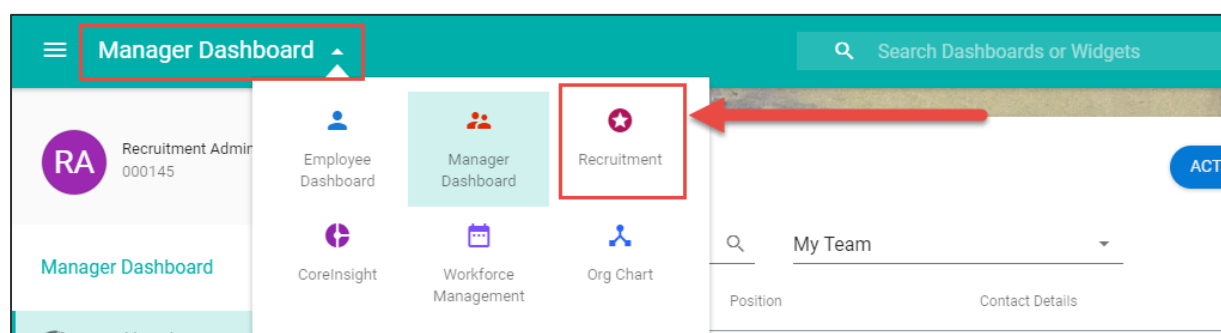

System	Menu Option	Screen Path / Explanation
CorePortal	eRecruitment	This turns on access to <i>Recruitment Dashboard</i> via the <i>Quick Jump</i> menu
CorePortal	CorePortal - Erecruitment - Toolbox - Recruitment Admin	This turns on access to the Recruitment Admin button via the <i>Toolbox</i> tab

These menu options ensure that you can see:

- The **Recruitment** option on the Quick Jump menu.

- The **Recruitment** option on the Dashboard menu.

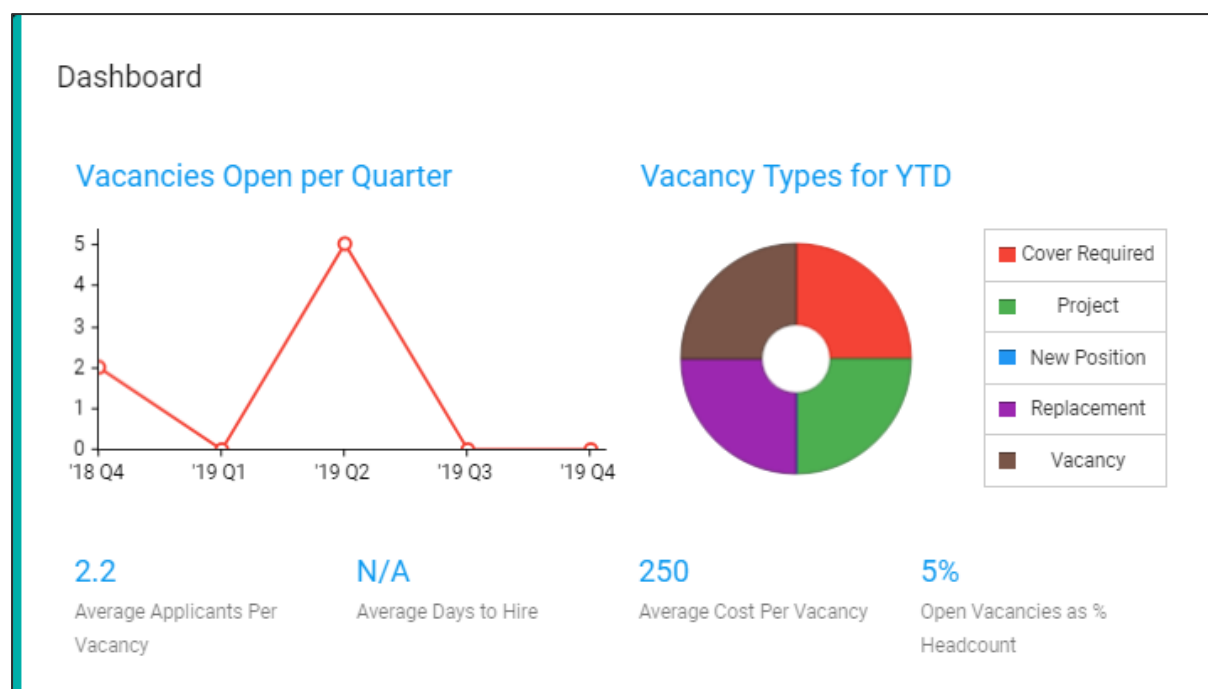

Note: Data access for recruitment is covered later in section [4. Recruitment Data Access](#)

2.3. Dashboard Widget

**Note:**

- The *Dashboard* widget is displayed by default on the *Recruitment Dashboard*. This is not configurable - it cannot be hidden.
- The stats shown represent the full set of recruitment data and are not restricted based on your data access.

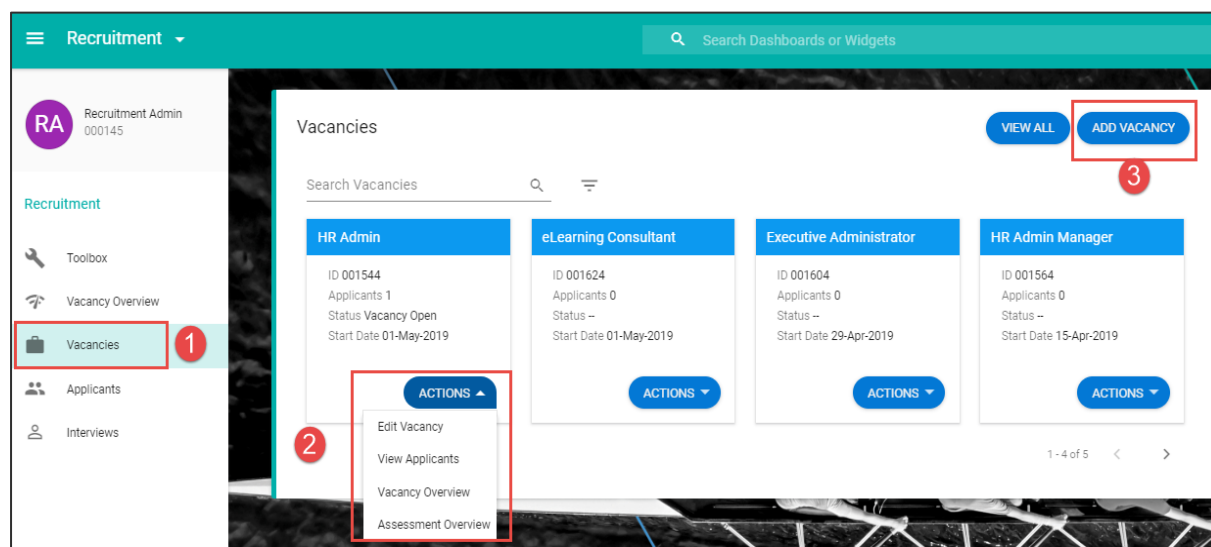

2.4. Vacancies Widget

2.4.1. Overview

In this section, all configurable elements within the *Vacancies* widget are covered including:

1. The widget itself.
2. All options available via the **Actions** button.
3. The **Add Vacancy** button.

2.4.2. Access to the Vacancies Widget

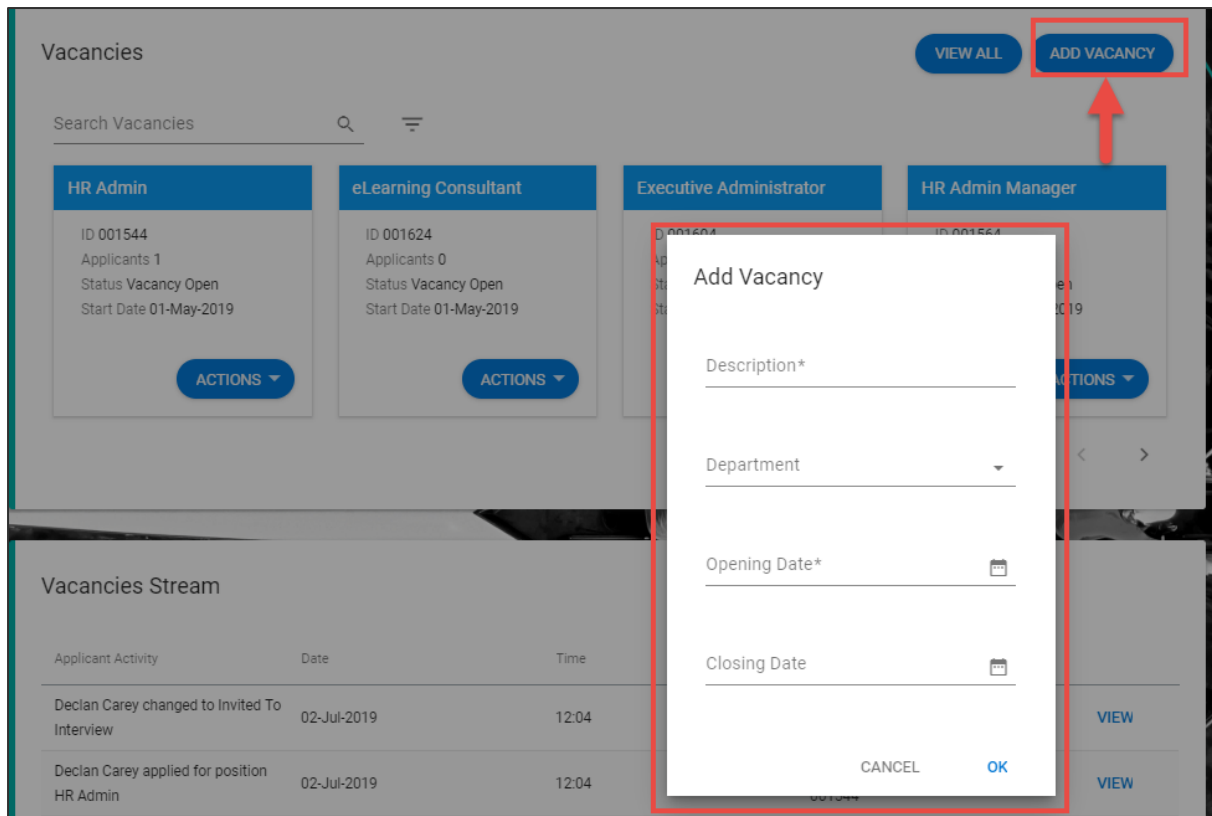

Note:

- This widget is pre-configured on the *Recruitment Dashboard*. This is available by default once you have access to the *Recruitment Dashboard* and cannot be hidden.
- The access to the data within this widget is managed via data access. See [4. Recruitment Data Access](#).

2.4.3. Access to the Add Vacancy Button

This menu option controls the display of the **Add Vacancy** button.

System	Menu Option	Explanation
CorePortal	Create Vacancy	This turns on the Add Vacancy button on the <i>Vacancies</i> widget

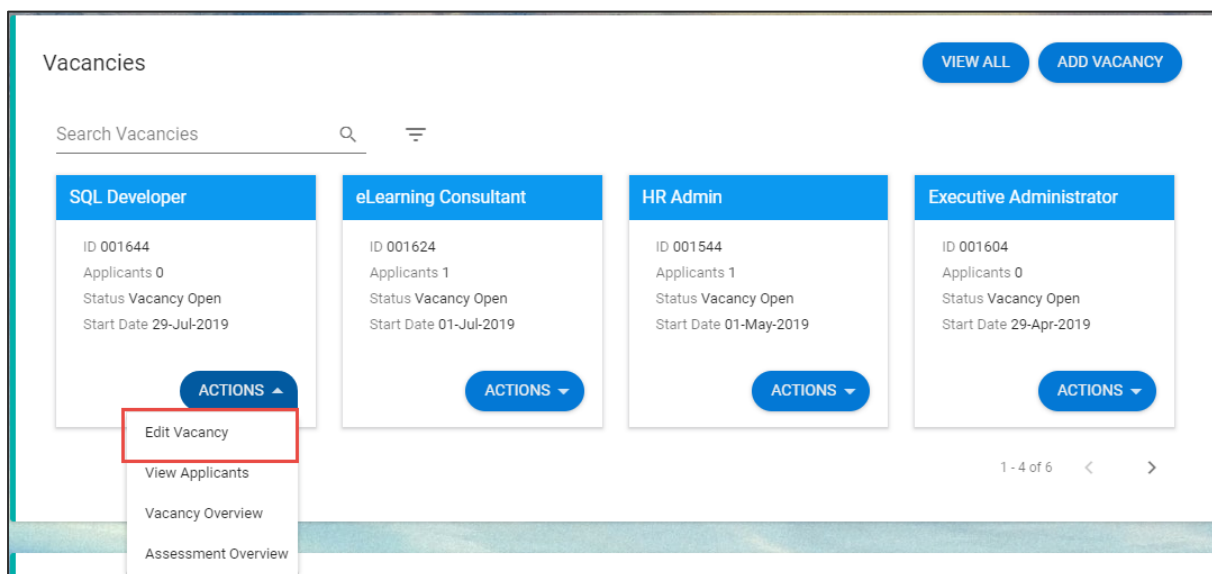

2.4.4. Access to the Edit Vacancy Option

Note:

- This button will appear once you have data access to Departments (see [4. Recruitment Data Access](#))
- Options within the *Vacancy* screen once you click the **Edit Vacancy** button will only become available once further Menu Options are enabled.

2.4.5. Vacancy Details 1 & 2

The standard options which control the setup of a vacancy are held in the *Vacancy Details* screens. These are the menu options required to see/edit data on the *Vacancy Details - 1* screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Details Screen	This turns on access to the <i>Vacancy Details</i> screen.
CorePortal	eRecruitment - Vacancy Details One	This turns on access to view the <i>Vacancy Details - 1</i> tab.
CorePortal	eRecruitment - Vacancy Details One – Update	This turns on access to edit information on the <i>Vacancy Details - 1</i> tab.
CorePortal	eRecruitment - Toolbox - Recruitment Admin	This turns on access to view the Application Form button.

- Application Form

SAVE

**Note:**

There is no menu option that controls the **Linked Appointment** button. A list of posts available to the user will appear based on the *People Management* data that they have been granted access to. To carry this out:

1. Go to *CorePortal* > *Security* > *Set Up* > *System Users* > **Open**.
2. Select *Username* from drop-down list.
3. Select *Security Type of Personnel Access* from drop-down list.
4. Select *Structure* code in question from drop-down list.
5. Select *Access Level* required from drop-down list
6. Enable / disable data access.

The screen saves automatically.

These are the menu options required to see/edit data on the *Vacancy Details - 2* screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Details Two	This turns on access to view the <i>Vacancy Details - 2</i> tab.
CorePortal	eRecruitment - Vacancy Details Two - Update	This turns on access to edit information on the <i>Vacancy Details - 2</i> tab.

Configuring the Reports To field

To ensure that the *Reports To* field on *Vacancy Details - 2* is populated with the correct value(s), the manager's name must be validated against an org role.

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference > Recruitment Parameters*.
2. Under the *Requisition Parameters* section, review the values for *Reporting to Org Group* and *Reporting to Role*. Update these values if necessary.

Requisition Parameters

Requisition Active ☐

Reporting To Org Group

Reporting To Role

- Go to *CorePortal > People Management dashboard > Data Centre > People Management*.
- Select **Maintain Organisation Roles** and query the *Organisational Group* from step 2.

Organisational Roles Maintenance

Structure
ABC Solutions

Organisation Group
Work Group

Search Group Item

Find

Group Item	Description
FIN1	Accounts
A1	Branch Office 2
FIN2	Budget
CEO	Ceo
HR2	Compensation & Benefits
1	Default Workgroup

☒ Person Notification ☐ Email Notification

Role	Date From	Date To	Personnel Number	Forename	Surname	Interfaced	
Reports To Manager	15-Mar-2016		000039	Susan	Jennings	☐	...
Reports To Manager	07-Jun-2019		000146	Brian	O'Keeffe	☐	...

- Select the *Group Item* which relates to the Organisation Group e.g. the *Work Group* code in this example above.
- Add or remove an employee as a *Reports to Manager* to ensure they show up correctly on the vacancy.

**Note:**

- If using a Staff Request to create a vacancy, the reports to manager automatically populates based on how the staff request was created. For example, if a certain work group was added on the staff request, the field won't populate with the org role, it populates with the name of the manager with that assigned org role.
- If the vacancy is setup manually, the *Reports To* list contains all available reporting to managers.

2.4.6. Current Questions

These menu options control the display of the *Current Questions* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Questions	This turns on access to view <i>Current Questions</i> against a Vacancy
CorePortal	eRecruitment - Vacancy Detail Questions - Update	This turns on access to edit and create questions against a Vacancy

Note: Further guidance on setting up Questionnaires can be found in the **Recruitment User Guide**.

2.4.7. Vacancy Profile

Access to the *Vacancy Profile* tab is managed via the individual items listed below. Once at least 1 option is enabled, the *Vacancy Profile* section becomes available.

The screenshot shows the 'Vacancy Details: 001544 - HR Admin' page. The breadcrumb trail is 'Recruitment > Applicant Details: 001544 - HR Admin > Vacancy Details: 001544 - HR Admin'. The left sidebar has a 'VACANCY PROFILE' section highlighted with a red box and numbered 1 to 5. The main content area shows the 'Job Description' tab with the text: 'The role of a HR Admin will require working with our clients to manage the Human Resources department. This role will be based in CoreHR's London Chiswick office.' There is an 'ACTIONS' button in the top right corner of the main content area.

Job Description

These menu options control the display of the *Job Description* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Job	This turns on access to view the <i>Job Description</i> for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Job - Update	This turns on access to edit the <i>Job Description</i> for a Vacancy

Language

These menu options control the display of the *Languages* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Language	This turns on access to view the <i>Language</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Language - Update	This turns on access to edit the <i>Language</i> section for a Vacancy

Further Particulars

These menu options control the display of the *Further Particulars* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Further Particulars	This turns on access to view the <i>Further Particulars</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Further Particulars - Update	This turns on access to edit the <i>Further Particulars</i> section for a Vacancy

Comments

These menu options control the display of the *Comments* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Detail Comments	This turns on access to view the <i>Comments</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Detail Comments - Update	This turns on access to edit the <i>Comments</i> section for a Vacancy

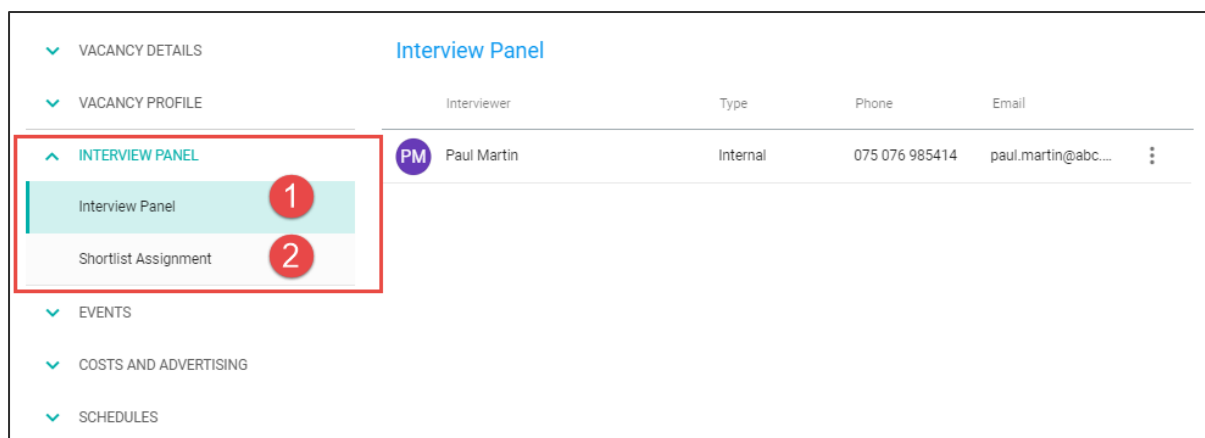

Documents

These menu options control the display of the *Documents* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Documents View	This turns on access to view the <i>Documents</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Documents Update	This turns on access to edit & upload a document to the <i>Documents</i> section for a Vacancy

2.4.8. Interview Panel

Access to the *Interview Panel* section is managed via the individual items listed below. When at least 1 option is enabled, the *Interview Panel* section becomes available

Interview Panel

These menu options control the display of the *Interview Panel* tab.

System	Menu Option	Explanation
CorePortal	eRecruitment - Interview Panel View	This turns on access to view the interviewers list who have been assigned to an interview schedule on a vacancy. This does not enable access to view the information behind the Interviewer Details button.
CorePortal	eRecruitment - Interview Panel Update	This turns on access to view and update the information behind the Interview Details button.

Shortlist Assignment

The 'Shortlist Group' feature is an extension of the 'Interview Panel' functionality, which allows for the creation of groups of applicants who are then assigned out to individual panel members to review.

This menu option controls the display of the *Shortlist* tab.

System	Menu Option	Explanation
CorePortal	Recruitment - Shortlisting Assessment Access	This turns on access to the <i>Shortlist Assignment</i> tab on <i>Interview Panel</i> .

To enable the 'Shortlist Group' feature, this is a global setting. This implies that for all vacancies, Shortlist Groups must be created for an interview panel member to access the vacancy and applicants on the *Interview Panel* widget.

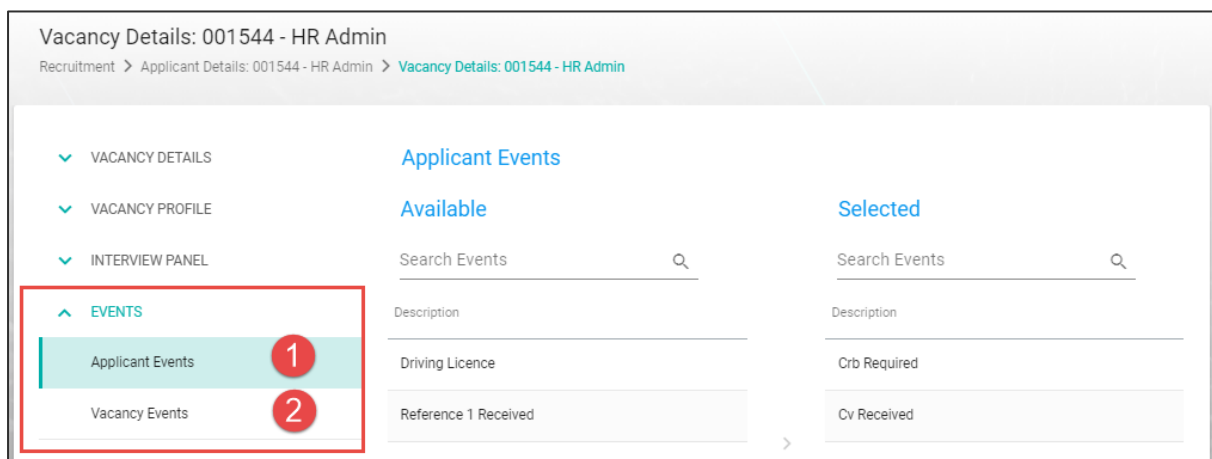

1. Go to *CorePortal > Administrator Dashboard > Site Manager > Admin Settings*.

2. Search for parameter *cp_rec_sl_restrict*.
 - a. When set to 'Y': The Shortlist Group feature is active. Shortlist Groups must be created for the vacancy for an interview panel member to access the vacancy & applicants on the *Interview Panel* widget.
 - b. When set to 'N': The Shortlist Group feature is not active, which means there is no need to create a Shortlist Group. Once a panel member has been added to the vacancy, they have access to the vacancy & applicants on the *Interview Panel* widget without the need to be added to a Shortlist Group

Note: Further guidance on how to use and configure shortlist groups can be found in the **Recruitment Interview Panels** user guide.

2.4.9. Events

These menu options control the display of the *Events* tab. When at least 1 option is enabled, the *Events* section becomes available.

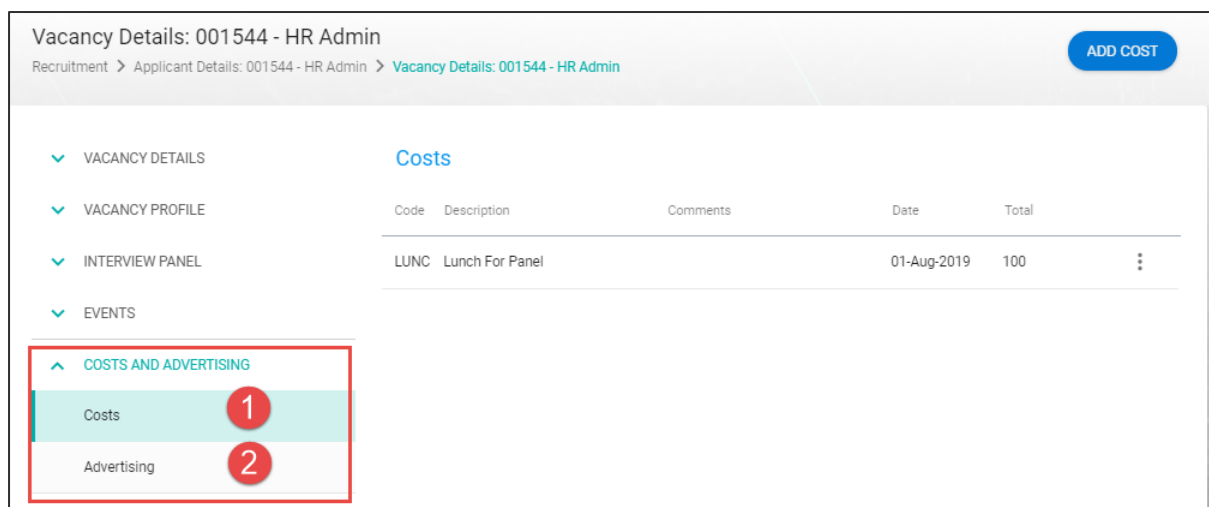

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Events View	This turns on access to view Applicant and Vacancy Events on the Vacancy Details screen
CorePortal	eRecruitment - Vacancy Events Update	This turns on access to update Applicant and Vacancy Events on the Vacancy Details screen

Note: Both Menu Options above control the *Applicant Event* screen and the *Vacancy Event* Screen. There is no split in access.

2.4.10. Costs and Advertising

These menu options control the display of the *Costs and Advertising* tab. When at least 1 option is enabled, the *Costs and Advertising* section becomes available.

Costs

Once access is provided via the menu options below, the user will have access to the *Costs* screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Costs View	This turns on access to view the <i>Costs</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Costs Update	This turns on access to add to and edit the <i>Costs</i> section for a Vacancy

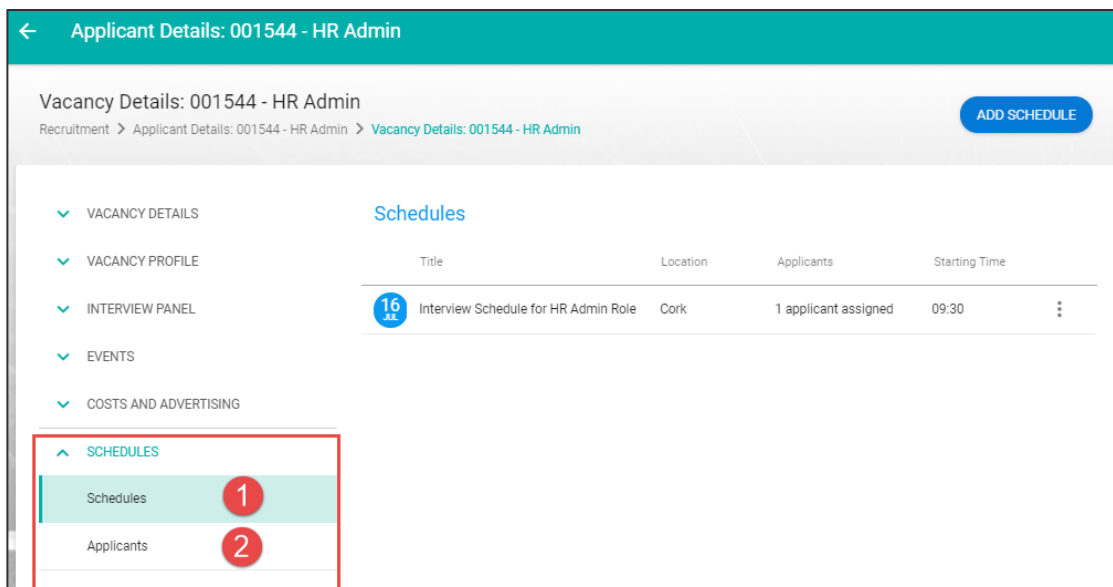

Advertising

Once access is provided via the menu options below, the user will have access to the *Advertising* screen.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Advertising View	This turns on access to view the <i>Advertising</i> section for a Vacancy
CorePortal	eRecruitment - Vacancy Advertising Update	This turns on access to add to and edit the <i>Advertising</i> section for a Vacancy

2.4.11. Schedules

This menu option controls the display of the *Schedules* tab.

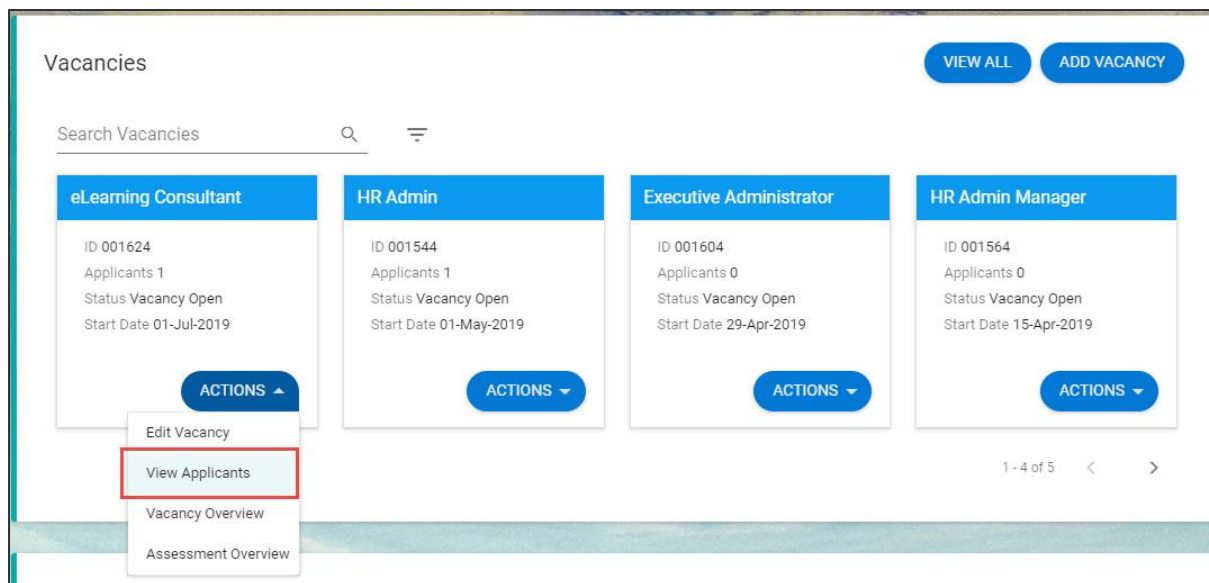

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Schedules	This turns on access to view the <i>Schedules</i> and the <i>Applicants</i> tab within this section. There is no split in access.

Note: Further guidance on how to create schedules and assign applicants can be found in the *Recruitment User Guide*.

2.4.12. Access to the View Applicants Button

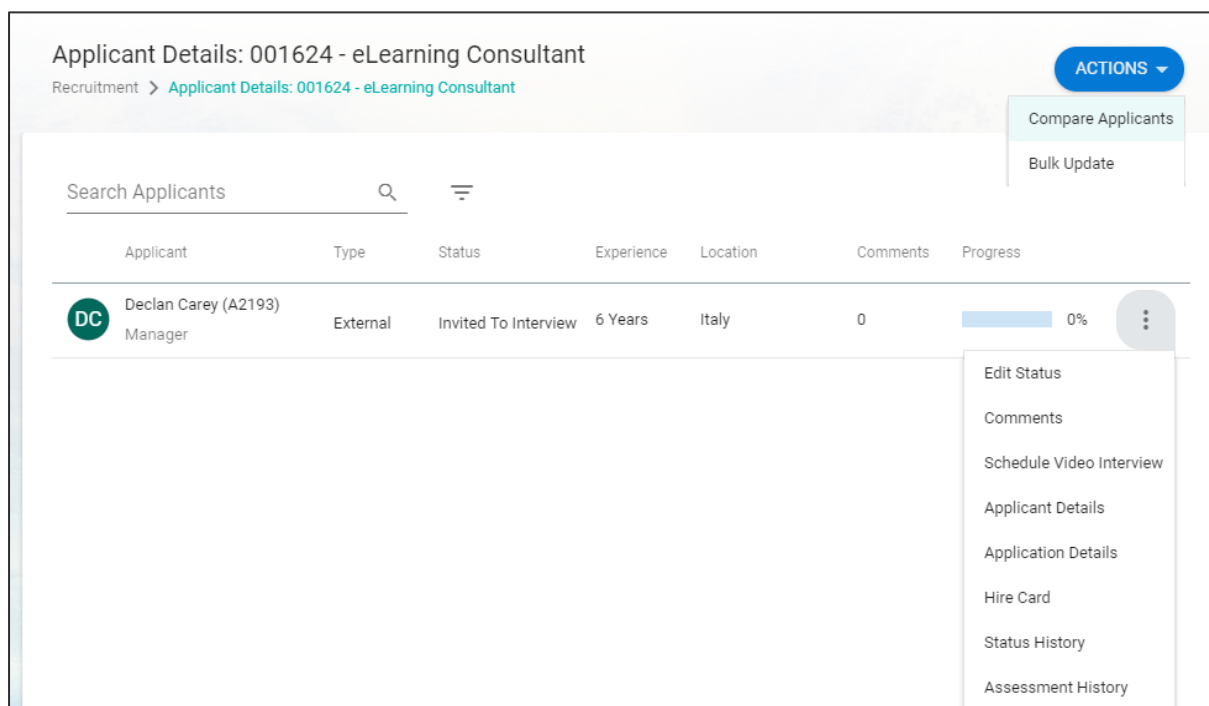

This menu option controls the display of the **View Applicants** button.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Status View	This turns on access to the View Applicants button on the drop-down list and in turn also controls access to view the Status History button.

When you select **View Applicants**, on the corresponding *Applicant Details* screen, there are further options available for each applicant listed:

- On the **Actions** button.
- On the  button.

The below table provides a list of the menu options that control access to options on the screen:

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Status Update	This turns on access to the Edit Status button.
CorePortal	eRecruitment - Applicant Comments View	This turns on access to view Comments against an applicant.
CorePortal	eRecruitment - Applicant Comments Update	This turns on access to update / create Comments against an applicant.

**Note:**

- **Applicant Details** access is explained in section [2.8.1 Applicants Tab](#).
- **Application Details** access is explained in section [2.8.1 Applications Tab](#)
- **Assessment History** access is explained in section [2.4.14 Access to Assessment Overview](#)
- The **Offer Details** button only appears if the *Applicant Status* has been set to *Applicant Offer Made* with the setting of *Applicant Offered Position*. See section [5.3 Applicant Status](#) for more information.

Note: The following options are available by default and are not configurable:

- Compare Applicants
- Bulk Update
- Hire Card

2.4.13. Vacancy Overview

Access to Vacancy Overview

This menu option controls the display of the **Vacancy Overview** button.

System	Menu Option	Explanation
CorePortal	eRecruitment - Vacancy Summary Screen	This turns on access to view the <i>Vacancy Overview</i> screen on the <i>Vacancy</i> widget.

Note: Additional menu options are required to view and edit items within this screen. These items are below:

- **View Applicants** button.
- **Incomplete Applications** button.
- **Edit Vacancy Owner** button.
- **Edit Interview Panel** button.
- **Generate Document** button.
- **Generate Email** button.
- *Recent Applicant Activity* section.
- *Comments* section.

CD Charles Daly Interview Panel	PM Paul Martin Interview Panel
---------------------------------------	--------------------------------------

Recent Applicant Activity

ACTIONS

- View Applicants
- Incomplete Applications
- Edit Vacancy Owner
- Edit Interview Panel
- Generate Document
- Generate Email

Access to View Applicants

This opens the applicant's record. However, all options on that screen are controlled via the menu options that are provided in section [2.8.1 Applicants Tab](#).

Access to Incomplete Applications

This menu option controls the display of the **Incomplete Applications** button.

System	Menu Option	Explanation
CorePortal	Recruitment - Unsubmitted Applications	This turns on access to view <i>Incomplete Applications</i> against a Vacancy

Access to Edit Vacancy Owner

This menu option controls the display of the **Edit Vacancy Owner** button.

System	Menu Option	Explanation
CorePortal	Recruitment - Edit Vacancy Owner	This turns on access to edit the <i>Vacancy Owner</i> for a Vacancy.

The *Vacancy Owner* list is configured via the *Recruitment User Profile* screen in CoreHR Back Office:

1. Go to *CoreHR back office > CoreHR > Security* > enter password “university”.
2. Query the *Personnel No* of the employee in question
3. Enable the *CorePersonnel Access* indicator.
4. Save.
5. Go to *CoreHR back office > CorePersonnel > Recruitment > Reference > Recruitment User Profile*.
6. Enable the **Recruitment Authoriser** indicator against the personnel number in question.
7. Save.

The *Vacancy Owner* field then pulls any users that are marked as a *Recruitment Authoriser*.

Access to Edit Interview Panel

This opens the *Interview Panel* screen and list out any interviewers that have been assigned to a Vacancy. However, all further options on that screen are controlled via the menu options that are provided in section [2.9 Interview Widget](#).

System	Menu Option	Explanation
CorePortal	eRecruitment - Interview Panel View	This turns on access to view the interviewers who have been assigned to an interview schedule on a vacancy.

Access to Generate Document

This menu option controls the access to the *Generate Document (Letter)* screen via *Vacancy Overview*.

System	Menu Option	Explanation
CorePortal	Generate Documents	This turns on access to generate documents and letters.

Note: Document Templates and Template Groups need to be configured separately to having access to this screen. This is covered in separate User guide: **Documents and Emails Configuration Guide**.

Access to Generate Email

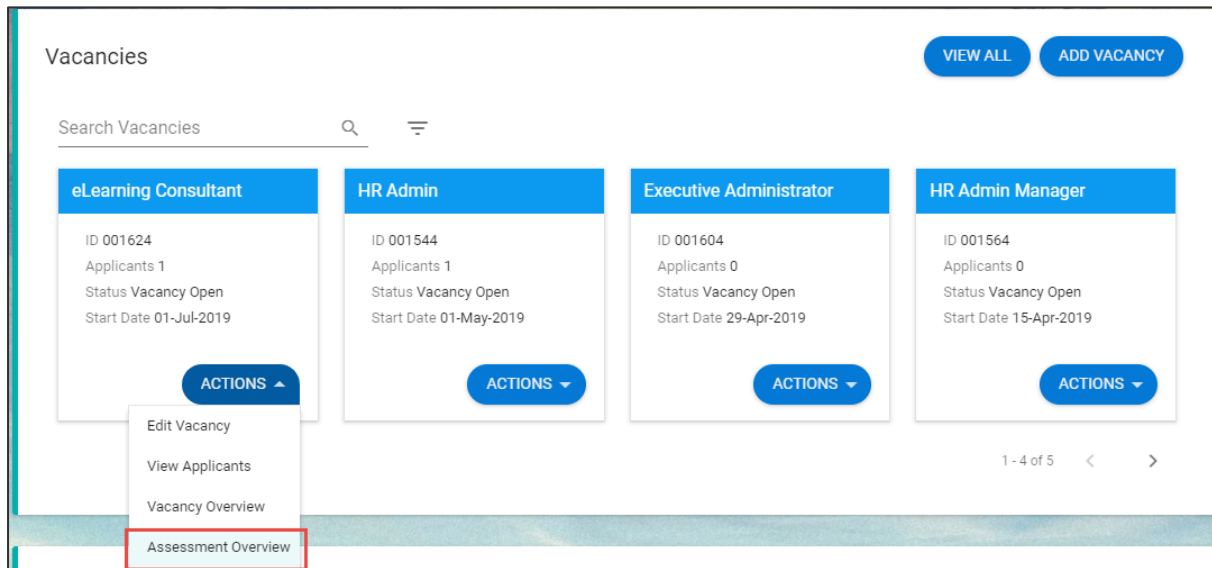

This menu option controls the access to the *Generate Email* screen via *Vacancy Overview*.

System	Menu Option	Explanation
CorePortal	Generate Email	This turns on access to generate emails.

Note: Email Templates and Template Groups need to be configured separately to having access to this screen. This is covered in separate User guide: **Documents and Emails Configuration Guide**.

2.4.14. Access to Assessment Overview

These menu options control the information within *Assessment Details* screen when the **Assessment Overview** button is clicked. The button always appears on screen, regardless of access.

- Note:**
- An assessment only appears on screen if an assessment has been setup on the vacancy for that applicant's status. The *Assessment Overview* option always appears regardless of access.
 - The assessment feature is used in conjunction with the other standard recruitment features including the *Interviews* widget, the *Interview Panel* and *Shortlist Groups*.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Assessment View	This turns on access to view assessment data for an applicant, the Assessment Overview button and corresponding screen is not controlled by a menu option.
CorePortal	eRecruitment - Applicant Assessment Update	This turns on access to update assessment details for an applicant.

2.5. Vacancies Stream Widget

This widget is on the recruit dashboard by default. Access to this widget is not controlled by a menu option. However, access to the data that appears on this is controlled by a menu option.

Vacancies Stream				
Applicant Activity	Date	Time	Vacancy	
Declan Carey changed to Invited To Interview	02-Jul-2019	12:04	HR Admin 001544	VIEW
Declan Carey applied for position HR Admin	02-Jul-2019	12:04	HR Admin 001544	VIEW
Declan Carey changed to Invited To Interview	02-Jul-2019	12:03	HR Admin 001544	VIEW
Declan Carey applied for position HR Admin	02-Jul-2019	12:00	HR Admin 001544	VIEW
1 - 4 of 4 < >				

This menu option controls the display of the data within *Vacancies Stream* widget.

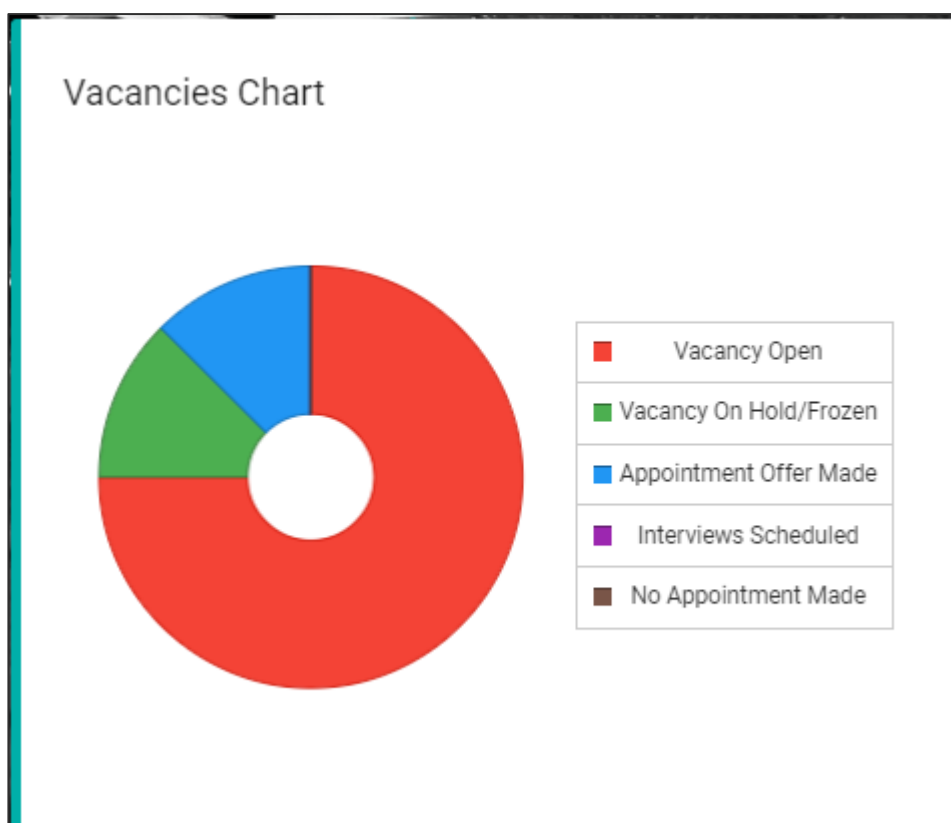

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Activity Widget	This turns on access to view the data within the <i>Vacancies Stream</i> widget.

2.6. Vacancies Chart Widget

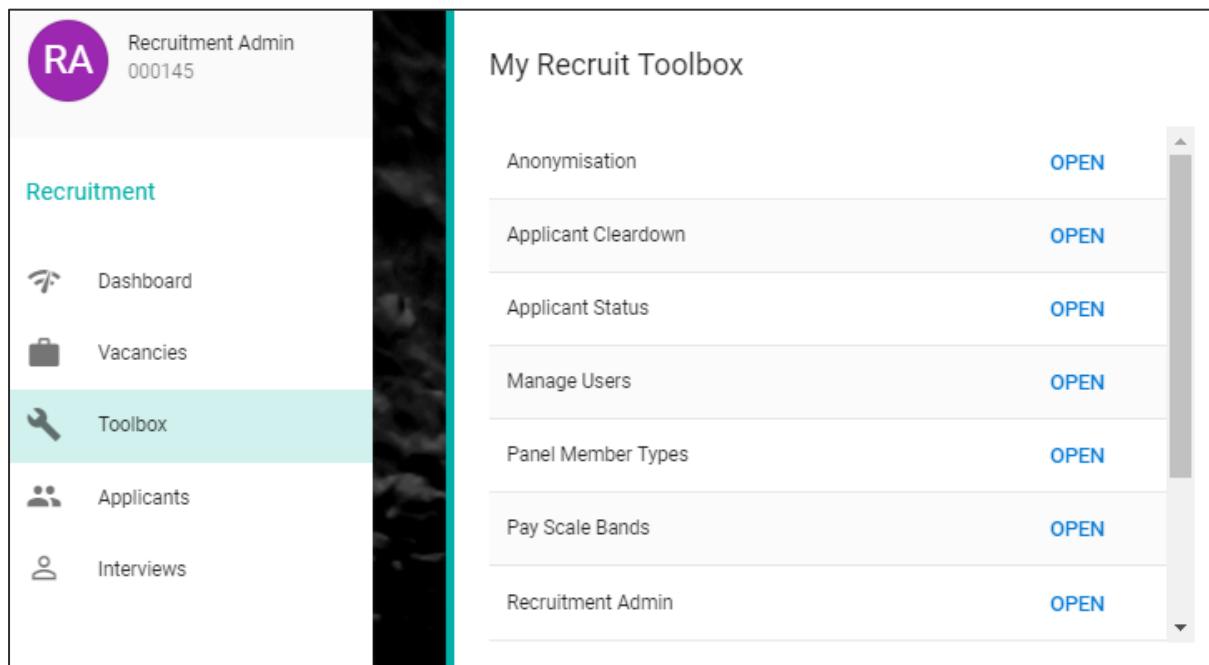

Note:

- The *Vacancies Chart* widget is displayed by default on the *Recruitment Dashboard*. This is not configurable - it cannot be hidden.
- The stats shown represent the full set of recruitment data and are not restricted based on your data access.

2.7. Toolbox Widget

The following table includes a list of all possible options on the *Toolbox* widget and the menu options that control access to these.

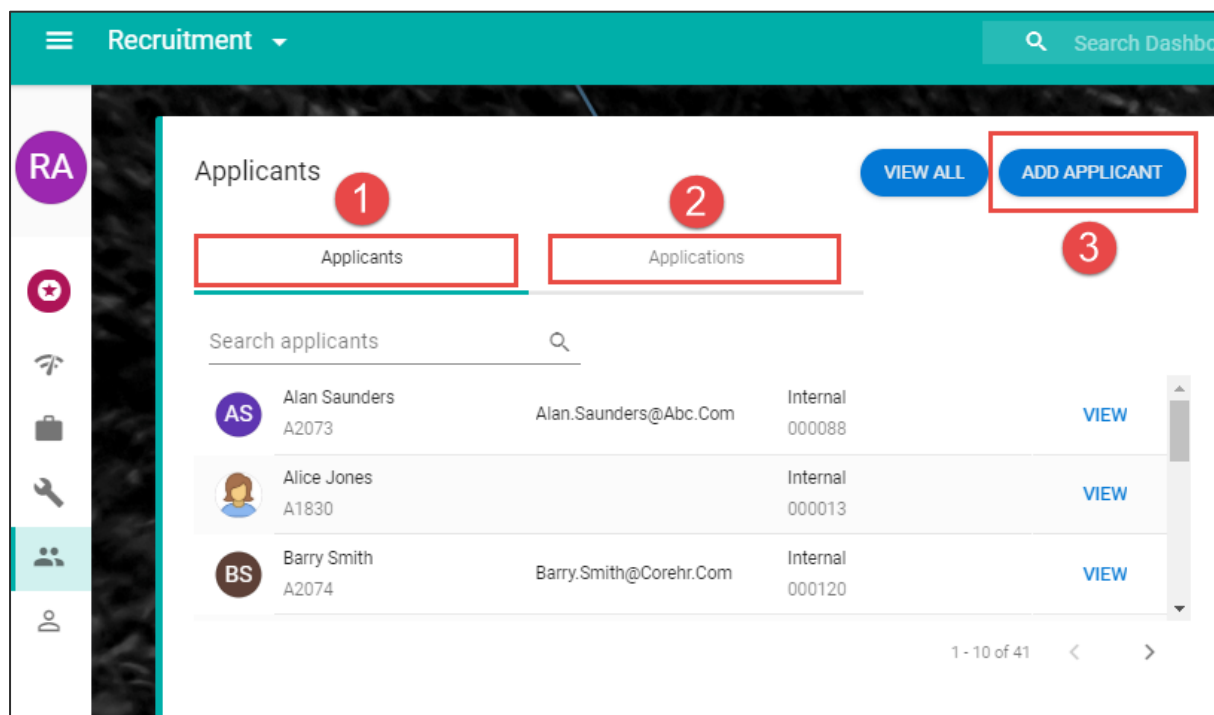

Toolbox Option	System	Menu Option
Anonymisation	CorePortal	Recruitment - Shortlist Anonymisation
Applicant Cleardown	CorePortal	Erecruitment - Applicant Cleardown
Manage Users	CorePortal	eRecruitment - System Users eRecruitment - System Users Update
Panel Member Types	CorePortal	Recruitment Toolbox - Panel Member Types
Pay Scale Bands	CorePortal	Coreportal Recruitment - Pay Scale Bands View Coreportal Recruitment - Pay Scale Bands Edit
Recruitment Admin	CorePortal	Erecruitment - Toolbox - Recruitment Admin
Template Document	CorePortal	Erecruitment - Upload template document

Note: **Applicant Status** does not have a menu option. Once Toolbox access has been given, **Applicant Status** becomes available.

2.8. Applicants Widget

The configurable elements of this widget are:

1. The **Applicants** tab, and further options on the corresponding screens.
2. The **Applications** tab.
3. The **Add Applicant** button.

2.8.1. Applicants Tab

These menu options control the display of the *Applicants* tab on this widget and the **Add Applicant** button.

System	Menu Option	Explanation
CorePortal	Erecruitment - Applicant Level Tab View	This turns on access to view the Applicants tab.
CorePortal	Erecruitment - Add Applicant	This turns on access to the Add Applicant button.

Applicant Details Screen

Within this section, there are 6 distinct options to give a user access to:

1. Applicant Details
2. Vacancy & Application Detail
3. Correspondence

4. References
5. Events
6. Documents

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Diversity View	This turns on access to view the Background & Disability sections .
CorePortal	eRecruitment - Applicant Diversity Update	This turns on access to edit the Background & Disability sections.

Other Information

The *Other Information* section is linked to User Defined Fields setup in People Management.

System	Menu Option	Explanation
CorePortal	Erecruitment - Applicant User Defined View	This turns on access to view UDFs against an applicant. All employee level UDFs appear here regardless of type.
CorePortal	Erecruitment - Applicant User Defined Update	This turns on access to update UDF information against an applicant.

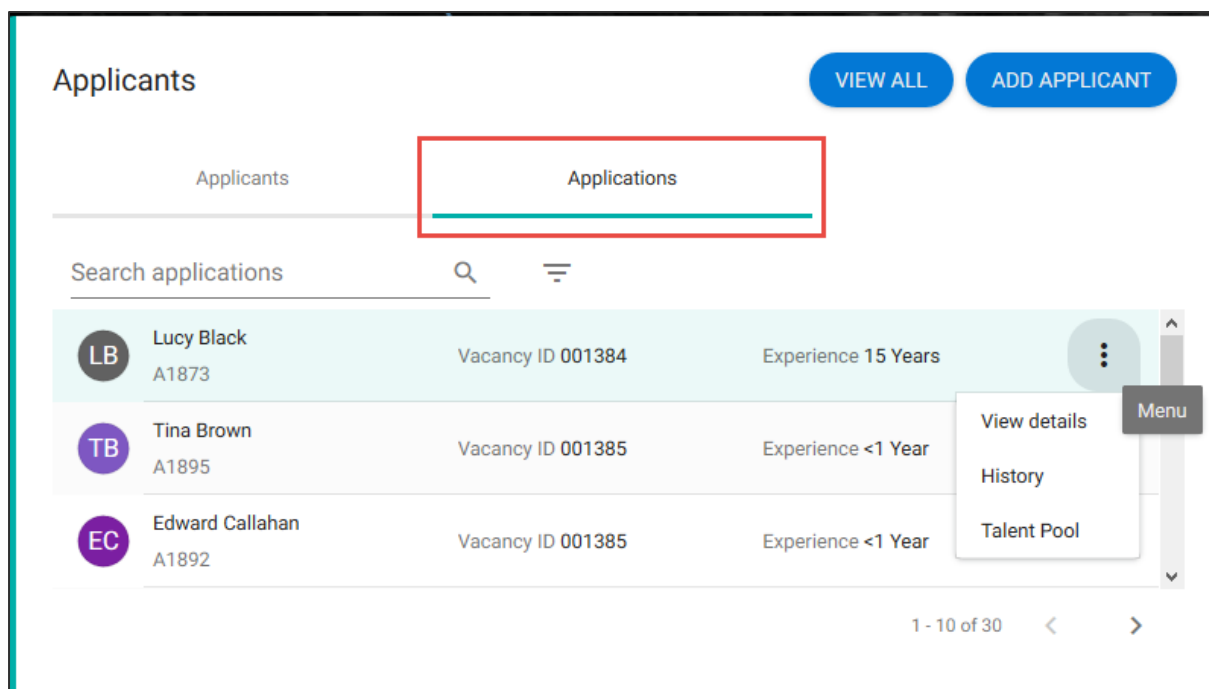

Note:

On the User Defined Field configuration screen, once a UDF is marked as an Employee UDF, it appears against an applicant's profile in CorePortal, even if the e-Recruitment indicator is not enabled.

- The e-Recruitment indicator only relates to UDFs that need to be included on an application form section.
- Use the UDF *Security Required* option, which restricts which UDF's show on CorePortal to recruitment administrators if necessary.

2.8.2. Applications Widget

The *Applications* tab is used to review the online application that an applicant has submitted to your organisation to be considered for the role.

These menu options control access to the information held within the *Applications* section of the *Applicants* widget.

System	Menu Option	Explanation
CorePortal	eRecruitment - Applicant Status View	This turns on the access for a user to see the data within the <i>Applications</i> section on the <i>Applicants</i> widget. This also gives access to the <i>Status History</i> screen once the History button is clicked.
CorePortal	eRecruitment - Applicant Status Update	This turns on access to update an applicant's details when the View Details button is pressed.
CorePortal	eRecruitment - Applicant Talent Pool	This turns on the access to the underlying screen when the Talent Pool button is pressed.

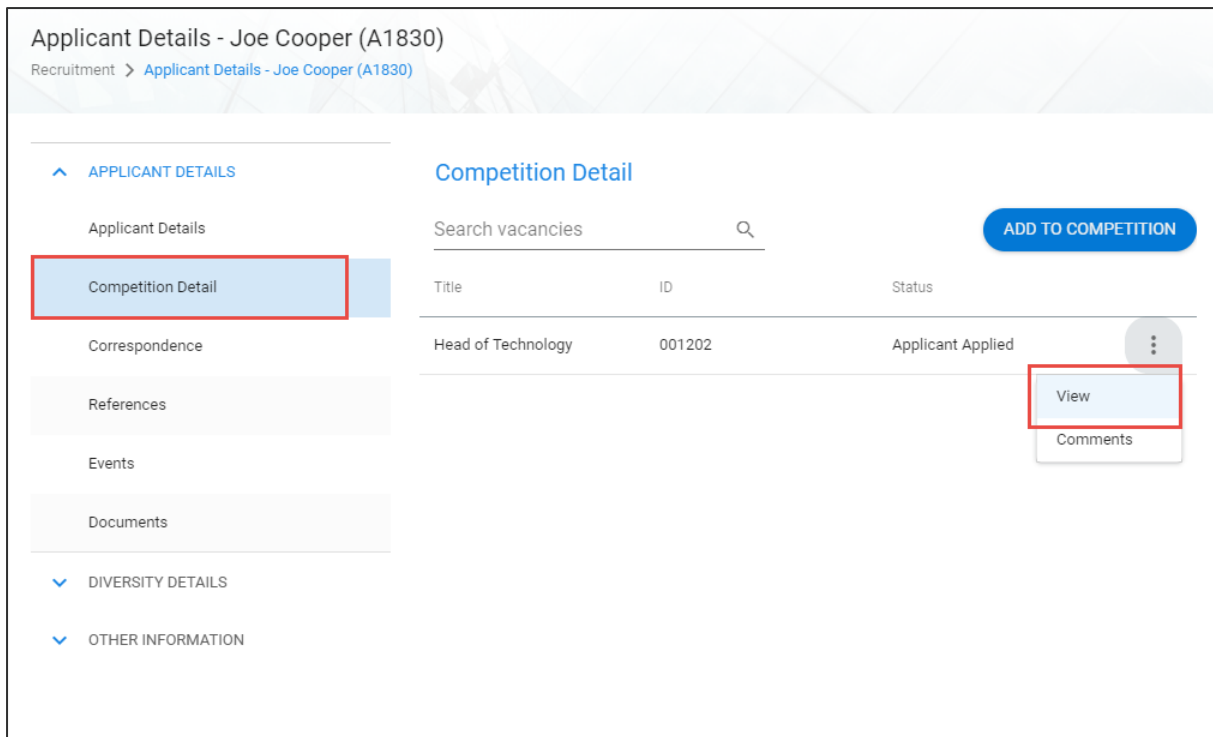

2.8.3. Viewing an Application Form

To allow a user to access a print-friendly version of the application form that an applicant has submitted:

1. Go to *CorePortal Recruitment Dashboard > Applicants tab > Applicants widget*.
2. If accessing via the *Applicants* section:
 - a. Click on the **View** button for the applicant.
 - b. Go to *Competition Detail*. For the selected vacancy click the  button and select **View**.

OR If accessing via the *Applications* section:

- a. Click the  button for the application and select **View Details**.
- b. Select *Competition Detail*. For the selected vacancy click the  button and select **View**.

OTHER INFORMATION

The following menu option controls access to the application form details of an applicant.

System	Menu Option	Explanation
CorePortal	eRecruitment - Application Details	This turns on the access for a user to view the application form in print friendly version that an applicant has applied with via the Application Details button.

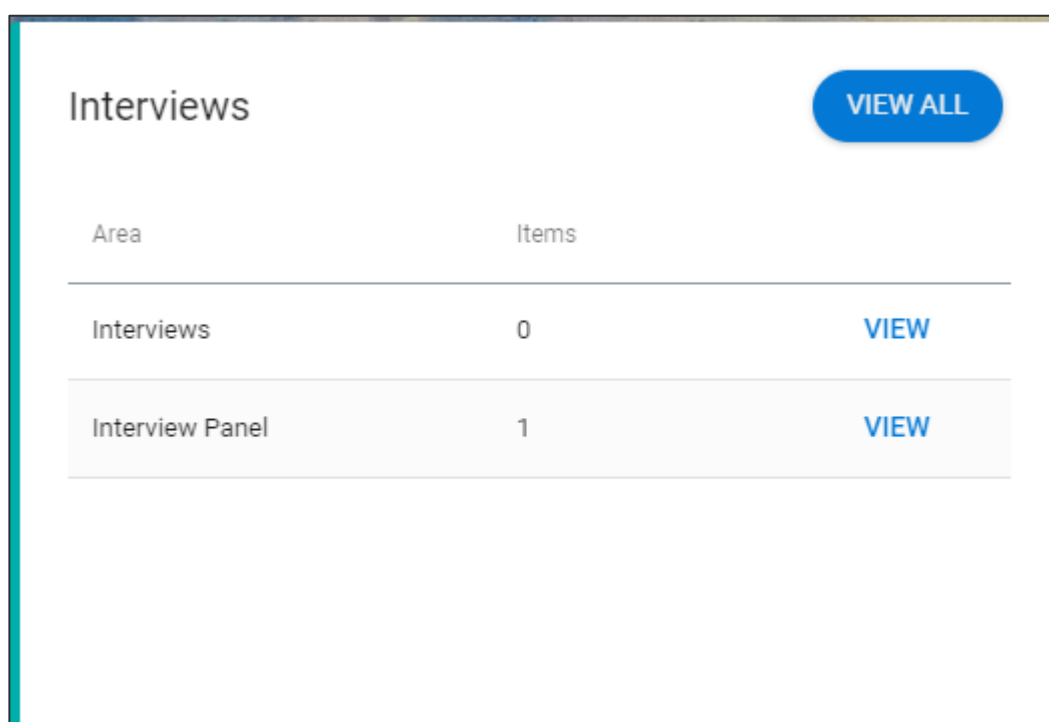

2.9. Interview Widget

2.9.1. Menu Options

These menu options control access to the information held within the *Interview* widget.

System	Menu Option	Explanation
CorePortal	Erecruitment - View Interviews	This gives access to the <i>Interviews</i> widget, including both the <i>Interviews</i> and <i>Interview Panel</i> screen.

 **Note:** This is available by default on the *Recruitment Dashboard*. It is recommended to make this available on the *Employee Dashboard* or *Manager Dashboard*. This ensures that any employee on the 'Interview Panel' for vacancy, who does not have access to the *Recruitment Dashboard*, can access the details of the vacancy & applicants on CorePortal.

The screenshot shows the 'Interviews' widget interface. At the top left is the title 'Interviews'. At the top right is a blue button labeled 'VIEW ALL'. Below the title is a table with two columns: 'Area' and 'Items'. The table has two rows: 'Interviews' with 0 items and a 'VIEW' link, and 'Interview Panel' with 1 item and a 'VIEW' link.

Interviews		VIEW ALL
Area	Items	
Interviews	0	VIEW
Interview Panel	1	VIEW

2.9.2. Updating Applicant Status Codes

For the interview panel member to update the *Applicant Status* value for applicants on the *Interview Panel* screen, it is required to flag the specific set statuses that should be available to them.

To flag the *Applicant Status* values:

1. Go to *Recruitment Dashboard > Toolbox > Applicant Status*.
2. Identify the *Applicant Status* values to be updated or create new codes if required.
3. Click the  button and select **Status Detail**.
4. Enable the **Available for interview panel update** option.
5. Ok.

2.9.3. Updating Vacancy Status Codes

For the interview panel member to update the *Vacancy Status* value for their vacancy on the *Interview Panel* screen, it is required to flag the specific set statuses that should be available to them.

To flag the *Vacancy Status* values:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Recruitment Reference > Status Codes*.
2. Identify the *Status Code* values to be updated or create new codes if required.
3. Enable the **Online Update** option for the required codes.
4. Save your changes.

2.9.4. Anonymising Applicant Data

The following applicant attributes can be anonymised on the *Interview Panel* screen:

1. Location
2. Years' Experience
3. Position
4. Photo

Applicant Details: 001544 - HR Admin

Recruitment > Recruitment Actions > Applicant Details: 001544 - HR Admin

Search Applicants

Applicant	Status	Experience	Location	Comments	Progress
 Declan Carey (A2193) Manager Position	Invited To Interview	6 Years	Italy	0	0%

If all options are hidden, the applicant's record will appear as below:

Applicant Details: 001544 - HR Admin

Recruitment > Recruitment Actions > Applicant Details: 001544 - HR Admin

Search Applicants

Applicant	Status	Comments	Progress
 Declan Carey (A2193)	Invited To Interview	0	0%

To update these settings:

1. Go to *CorePortal > Administrator Dashboard > Site Manager* widget.
2. Open **Admin Settings**.
3. Search for parameters listed below and update the parameter value to 'Y' or 'N' based on the below table.

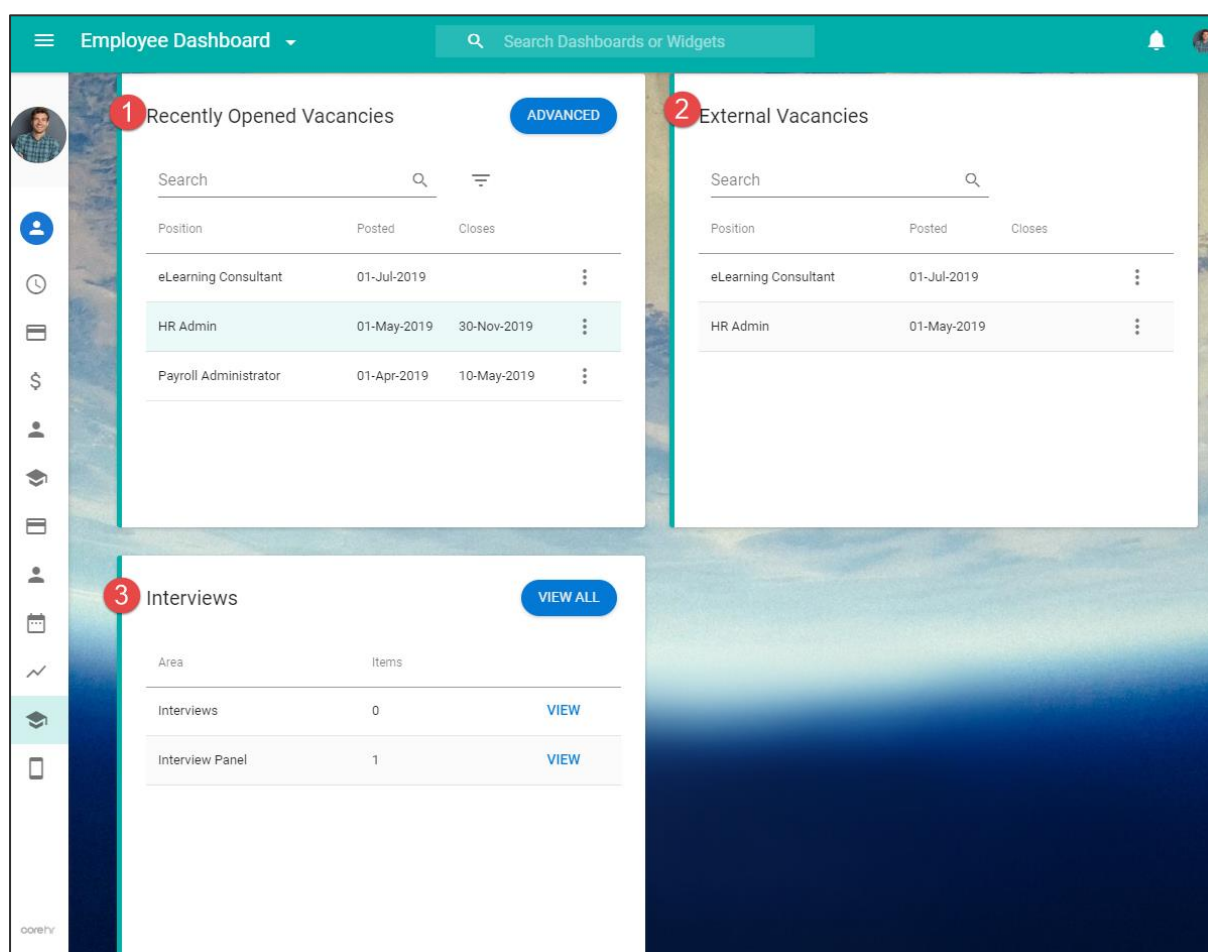

Applicant Feature	Parameter	If Set to 'Y'	If Set to 'N'
Location	erq_anon_panel_location	Hidden	Not Hidden
Experience	erq_anon_panel_exp	Hidden	Not Hidden
Position	erq_anon_panel_position	Hidden	Not Hidden
Photo	erq_anon_panel_photo	Initials Display	Photo Displays

3. Employee Self Service & Manager Self Service

3.1. Employee Dashboard Widgets

There can be 3 widgets enabled here, to give employees options on how and where to apply for new roles:

1. Recently Opened Vacancies
2. External Vacancies
3. Interviews

3.1.1. Recently Opened Vacancies Widget

The following Menu Options are used to control access for employees to the *Recently Opened Vacancies* widget.

System	Menu Option	Explanation
CorePortal	Recruitment - Employee View Vacancy	This turns on the <i>Recently Open Vacancies</i> widget on the <i>Employee Dashboard</i> .

System	Menu Option	Explanation
Core Web ESS Menu	Online Recruitment	This turns on the following items on the <i>Recently Open Vacancies</i> widget: - The View Details and the Apply for Position options on the  menu for each Vacancy. - The Advanced button

3.1.2. External Vacancies Widget

The following Menu Options are used to control access for employees to the *External Vacancies* widget.

System	Menu Option	Explanation
CorePortal	Erecruitment - Employee View Vacancy	This turns on the <i>External Vacancies</i> widget on the <i>Employee Dashboard</i> .
Core Web ESS Menu	Online Recruitment	This turns on the View Details and the Apply for Position options on the  menu for each Vacancy.

Note: These are the same menu options that control the *Recently Opened Vacancies* widget.

3.1.3. Interviews

Note: The same configuration options apply here, as covered already in [2.9 Interview Widget](#), when adding this to the *Recruitment Dashboard*. Ensure that the employee's menu profiles are updated to include the required menu options.

3.2. Manager Dashboard Widgets

A manager can be given access via 2 widgets on the *Manager Dashboard* to view and update applicant information, which are listed below. Ensure that the manager's menu profiles are updated to include the required menu options.

Widget	Explanation
<i>Interviews</i>	The same configuration options apply here, as covered already in 2.9 Interview Widget .
<i>Vacancies Stream</i>	This functionality replicates what can be actioned on the <i>Vacancies Stream</i> widget as per section 2.5 Vacancies Stream Widget .

The screenshot displays the Manager Dashboard interface. At the top, there is a teal header bar with a hamburger menu icon, the text 'Manager Dashboard', a search bar labeled 'Search Dashboards or Widgets', and a notification bell icon. On the left side, there is a vertical sidebar with several icons, including a purple circle with 'RA' and a red circle with a person icon. The main content area features two widgets. The first widget, titled 'Interviews' with a red circle containing the number '1', has a 'VIEW ALL' button and a table with columns 'Area' and 'Items'. The table contains three rows: 'Interviews' with 0 items and a 'VIEW' link, 'Interview Panel' with 0 items and a 'VIEW' link, and 'Job Gradings' with a 'VIEW' link. The second widget, titled 'Vacancies Stream' with a red circle containing the number '2', has a table with columns 'Applicant Activity', 'Date', 'Time', and 'Vacancy'. The table contains one row: 'Declan Carey changed to Successful At Interview' on '05-Jul-2019' at '16:16' for 'Vacancy' 'HR Admin 001544'. The bottom right corner of the dashboard shows '1 - 1 of 1'.

4. Recruitment Data Access

4.1. Data Access

4.1.1. Overview

The purpose of this section is to provide guidance on how to grant access for users to see the vacancy and applicant records on the *Recruitment Dashboard*.

This is driven by Department levels and needs to be granted for administration of the system. Once you have access to data, you are able to see all vacancies setup in that department and applicant information for those vacancies.

4.1.2. How to Grant Access to Recruitment Data

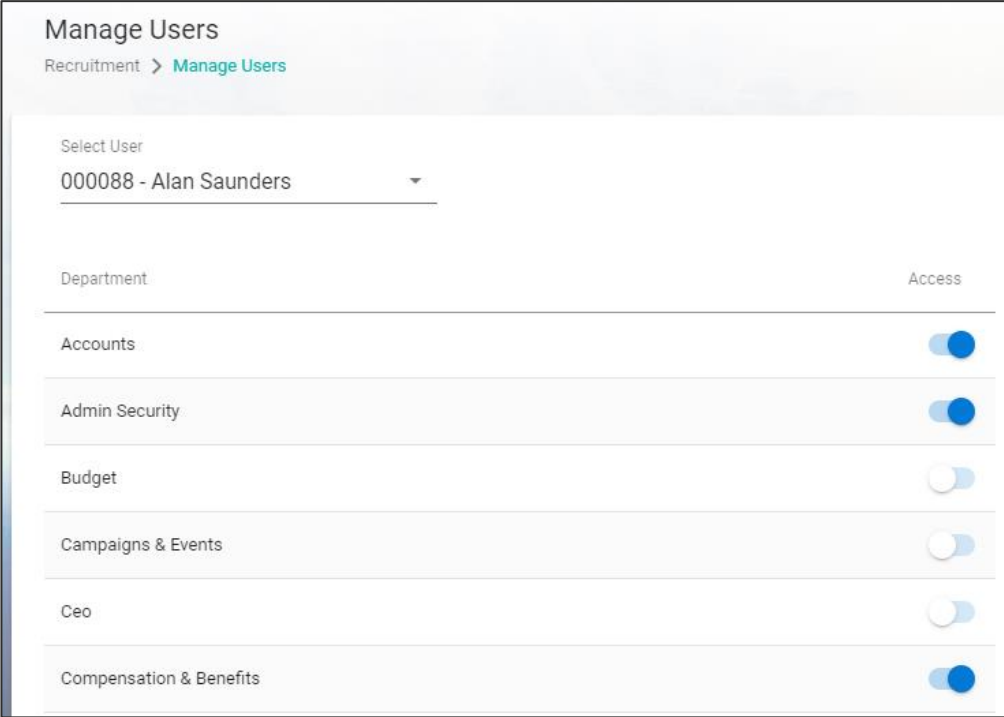

Follow these steps:

1. Select the **Toolbox** tab.
2. Open **Manage Users**.
3. Search for a user.

You can search for the user based on name or employee number.

4. Select *Department* that user should have access to.
 - a. Search for the *Departments* required.
 - b. Toggle  on.

Setting saves automatically.

The screenshot shows the 'Manage Users' interface. At the top, there's a breadcrumb 'Recruitment > Manage Users'. Below that, a 'Select User' dropdown is set to '000088 - Alan Saunders'. A table lists various departments with their corresponding access status (toggle switch).

Department	Access
Accounts	☒
Admin Security	☒
Budget	☐
Campaigns & Events	☐
Ceo	☐
Compensation & Benefits	☒

5. Reference Data

5.1. Overview

Reference data refers to the data that is available to select by end users of the system on the various pick lists/drop-down lists throughout CoreHR. Reference data in Recruitment looks at items to be used on a vacancy, an application form and on an applicant's personal information record.

Reference data plays an important role in Recruitment, as it can trigger different processes to begin, it can flag applicants with different statuses or allows the creation of emails or documents to be created.

These sections of the document provide guidance on what reference data is available to configure and how/where to manage it.

5.2. General Reference Data

5.2.1. Advertising Codes

This is used to describe different advertising methods such as Newspaper or Radio etc.

1. Select *People Management > Data Centre* tab > *Data Centre* widget.
2. Click **Open** on *Reference Data*.
3. Search for *Advertising Codes* and select the corresponding option.

The *Advertising Codes* screen opens, and all existing reference data items are listed.

Note:

Reference data items created here are subject to the following rules:

- Code: Max of 4 alphanumeric characters
- Description: Max of 40 alphanumeric characters

This reference data item does not include an *Active Indicator*. Therefore, all items are active by default and are available for you to select.

5.2.2. Advertiser Profile

This is used to record Advertiser Profiles such as Recruitment Websites & their associated information.

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference*.
2. Click **Advertiser Profile** to get to the corresponding screen.

The Advertiser Profile screen opens, and all existing reference data items are listed.

- To add a new advertiser, click on the **New Advertiser** button.
This opens the *Add Advertiser* screen.
- Click OK to exit and save.

5.2.3. Applicant and Vacancy Events

Used to track specific events and items to be completed outside of the system during the recruitment process.

To add/manage Applicant or Vacancy Events:

- Go to *People Management > Data Centre > Reference Data > Event Type*.
- To add a new type:
 - Click **Add**.
 - Provide a *Code* and *Description*.
- To flag an event as a Vacancy or Applicant event, update the corresponding indicator. If enabled, they appear on the corresponding list for all vacancies on Recruitment.
Click **Save**.

Note: The Personnel Appointment option is a legacy item which does not need to be configured.

Event Code	Description	Applicant Set-Up	Vacancy Set-Up	Personnel Appointment

References Requested	References Chased
Reference 2 Received	References Confirmed Satisfactory

5.2.4. Assessment Codes

These are used for tracking an applicant's skills and competencies and appear to administrators and interview panel members on the *Assessment* screen.

To add/manage these assessments codes:

- Go to *CoreHR Back Office > Personnel > Reference > A - C > Assessment Codes*.
- To add a new code:
 - Click **Add**
 - Provide a *Code* and *Description*.
 - Add in the possible maximum score an applicant can get, along with its weighting.
- Click **Save**.

5.2.5. Recruitment Cost Types

These are specific costs that can be tracked against a vacancy or a recruitment process to ensure the assigned budget is spent accordingly. For example:

- Room booking fees
- Travel expenses
- Lunch costs
- Accommodation costs

These are checklists to monitor and update vacancy costs during the timeline of the recruitment process for a vacancy.

To add/manage these cost types:

1. Go to *People Management > Data Centre tab > Data Centre widget > Reference > Recruitment Cost Types*.
2. To add a new type:
 - a. Click **Add**.
 - b. Provide a *Code* and *Description*.
3. Save.

5.2.6. Interviewer / Panel Member Type

This is used to track the type of interview member or panel member, for example:

- Internal
- External

To add/manage these types:

1. Select *Recruitment Dashboard > Toolbox > Panel Member Types*.
2. Click **Open**.
3. To add a new panel member:
 - a. Click the **Add** button.
 - b. Provide an *Interview Type* and *Description*.
 - c. Choose the specific *Panel Member Type* available.
 - d. Ensure the *Active* indicator is enabled for use.
4. Panel Member Types templates can be setup here to allow you to create a default email notifications and subjects that are sent to panel member types.

Note: The Internal & External Applicant types are pre-configured and should not be altered.

5.2.7. Position Type

Used to group vacancies into different categories, depending on what your company needs e.g. Replacement / New Position or Contractor Required. In CorePortal, this is shown on the *Vacancy Details - 2* screen.

For example:

- Backfill Required
- New Position
- Replacement
- Project Vacancy

To add/maintain position types:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > References > Position Types*.
2. To add a new status, provide a *Code* and *Description*.
3. Click **Save**.

5.3. Applicant Status

5.3.1. Overview

The recruitment process can vary depending on an organisation's set-up. As part of the Recruitment process, applicants are flagged with different statuses such as Applicant Acknowledged, Applicant Rejected etc.

To view/update these Applicant Status codes:

1. Go to *Recruitment Dashboard > Toolbox*.
2. Open **Applicant Status**.

Note: In this reference data screen, the statuses that are supplied can be edited or added to. However, the code **AP** must remain as-is with the **Applicant Applied** indicator against it. The description can be altered against this.

Applicant Status			
Recruitment > Applicant Status			
ADD			
Code	Description	Display Sequence	Active
AP	Applicant Applied	1	☒
APS	Applicant Shortlisted	2	☒
ASH	Applicant Successfully Hired	11	☒
APSO	Application Pack Sent Out		☒

Successful at Aptitude	SUCA
Successful at Interview	SUIN
Unsuccessful at Aptitude	UNSA
Unsuccessful at Interview	UNSU
Vacancy Withdrawn	VWDR
Verbal Offer	VM
Withdrawn Application	WTDR

5.3.3. Updating the Applicant Status Settings

Attached to each status, there can be an indicator flagged against it which prompts the system to carry out a different function depending on what indicator has been selected. To reach this screen and update each status follow the steps below:

1. Go to *Recruitment Dashboard > Toolbox*.
2. Open **Applicant Status**.
3. For the required status, click the  button.
4. Select **Status Detail**.
5. Enable the required setting as needed – see the table below for an explanation of each

Status Detail	Explanation
Applicant has Applied	This must be set against the Applicant Status (code) of AP. Every applicant that applies has this as an initial status.
Applicant Offered Position	This status drives the Appointment Offer functionality and should be set against a status of 'Applicant Offer' etc.
Applicant has accepted position	This is the final status that is set against a successful applicant. When this is flagged against an applicant, they are then available to be onboarded as an employee.
Available for interview panel update	This allows interview panel members to view this status and use it as part of updating an applicant's profile and status.
Applicant can accept position online	The applicant is to accept or reject the offer using the recruitment website.
Applicant to be place on panel	This status can be set against applicants that should be placed on an applicant panel for selection.
Reference Required	The applicant has been asked to provide a reference before continuing applicant journey.
Email Template after Status Change	This triggers an email to be sent the applicant when the applicant has been changed to this status.

5.3.5. Applicant Status Emails

The *Applicant Status Email* feature allows for an email to be generated, based on the update of the applicant's *Applicant Status* value.

This only occurs when the Applicant Status value is changed on the *Vacancy > View Applicants* screen for a single applicant.

Note: Emails will not trigger when an Applicant Status is updated on any other screen in Recruitment.

Email templates can be configured for individual Applicant Status values. Once an applicant's Applicant Status value is updated to one of the chosen values, a new pop-up screen provides the email template, which can be pre-populated with the applicant's specific details. The recruitment administrator can review and update the email text before sending the email.

Emails are generated individually per applicant i.e. these cannot be generated in bulk based on a bulk Applicant Status update.

Example uses of this feature include having pre-configured templates to notifying a candidate that:

- their application has been withdrawn / unsubmitted.
- they have been added to a reserve panel of candidates.

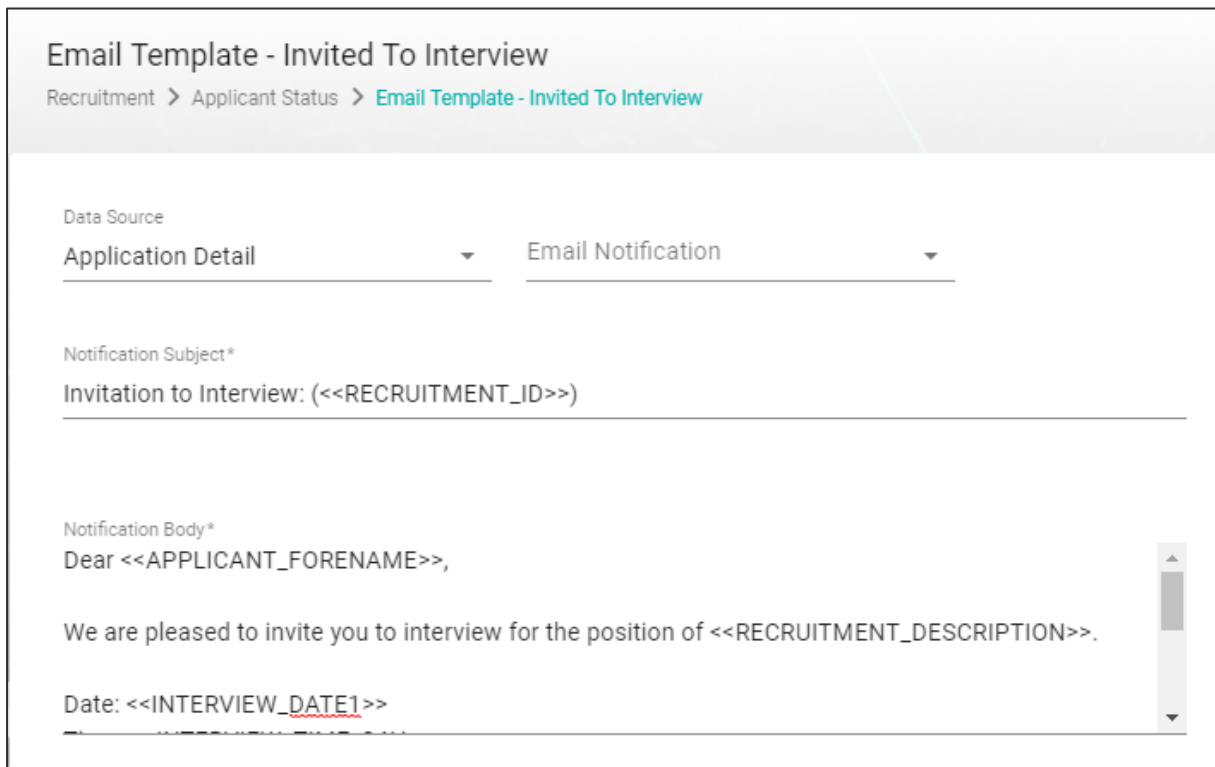

**Note:**

- This functionality is not related to the Event Management System or Document/Email Generation features.
- These other options can still be used to send bulk email communications to applicants for other stages in the recruitment process e.g. 'Invite to Interview', 'Application Received', 'Not Shortlisted', 'Unsuccessful at Interview' etc.

Creating an Email Template

To generate an email for an applicant status value, it is first required to configure an email template. This template can include merge fields, which can be updated to reflect actual applicant data, when the email is generated for a specific applicant.

1. Go to *Recruitment Dashboard > Toolbox tab*.
2. Select the **Applicant Status** option.
3. Click the  button and select **Email Template**.

4. Select a data source from the *Data Source* drop-down list.

The data sources contain lists of merge fields that can be added to a template and are updated to reflect the corresponding data for the chosen applicant when generating the email. It is only possible to use one data source per template.

There are 2 possible data sources to choose from:

- a. *Application Detail* - includes applicant, vacancy, application and schedule field.
- b. *Application Schedule Detail* - includes applicant and schedule fields.

The merge fields available for the *Email Notification* drop-down list is updated to reflect the chosen data source.

5. Configure the *Notification Subject*:
 - a. Type the text required for the email subject & use the *Email Notification* drop-down list, to identify merge fields to be used in the subject.
 - b. Merge fields appear wrapped in << >> and this denotes a field that is be replaced with actual applicant or vacancy related data.
6. Configure the *Notification Body*.
7. Click on the **Save** button to save the template.

Update Applicant Status Setting

An indicator of **Email Template after status change** must be updated for the Applicant Status, in addition to configuring the template.

1. Go to *CorePortal > Recruitment Dashboard > Toolbox tab*.
2. Select the **Applicant Status** option.
3. Select the  button for the required Status and select **Status Detail**.
4. Enable the **Email Template after status change** indicator.

Status Detail

Applicant has applied	☒	Applicant offered position	☐
Applicant has accepted position	☐	Available for interview panel up...	☐
Applicant can accept position ...	☐	Applicant to be placed on panel	☐
Reference required	☐	Email Template after status ch...	☒

CANCELOK

5. Click **OK** to close the window.
6. Click **Save** on the *Applicant Status* screen to ensure that the update is saved.

Editing an Existing Template

To edit the content of any existing Applicant Status email templates:

1. Go to *CorePortal > Recruitment Dashboard > Toolbox tab*.
2. Select the **Applicant Status** option.
3. Select the  button for the chosen *Applicant Status* value and select **Email Template**.
4. Update the notification subject and / or body as required.
5. Click the **Save** button.

Removing a Template

To prevent an existing email template from generating with and Applicant status is changed:

1. Go to *CorePortal > Recruitment Dashboard > Toolbox tab*.
2. Select the **Applicant Status** option.

3. Select the  button for the chosen *Applicant Status* value and select **Email Template**.
4. Disable the **Email Template after status** change indicator.
5. Click **OK** to close the window.
6. Click **Save** on the **Applicant Status** screen to ensure that the update is saved.

The email will no longer be generated when that Applicant Status value is chosen for an applicant.

Email Sender Name & Address

The sender name and email address must be configured, to send emails. To configure these options:

1. Go to *CorePortal > Administrator Dashboard > Site Manager > Admin Settings*.
2. Search for the parameters below and update as required:
 - a. `cp_recruit_email_fromn` - the name of the sender
 - b. `cp_recruit_email_frome` - the email address of the sender

6. CorePortal Parameters

6.1. Overview

These are additional parameters that relate specifically to the *Recruitment* dashboard and the widgets and tabs that are configured on portal for recruitment.

6.2. Updating CorePortal Admin Settings

To update these:

1. Go to *CorePortal > Administrator Dashboard > Site Manager widget > Admin Settings*.
2. Search for the parameter and update as required.

Note: If these parameters are used and then disabled / enabled without proper functional testing, the recruitment module can be impacted. These are additional parameters that are not mandatory to review.

The following table lists all the relevant portal parameters linked to recruitment, a vacancy, an applicant etc.

Parameter	Explanation
CP_VAC_APP	Set to Y to turn on vacancy grading approval
Hide_VacFil_CostCentre	Hide Cost Centre field in the Vacancy Filter
Hide_VacFil_Division	Hide Division field in the Vacancy Filter
Hide_VacFil_VacancyType	Hide Vacancy Type field in the Vacancy Filter
Hide_Vacancy_Postadmin	Hide Post Admin field in Vacancy Details Two
Hide_Vacancy_Reportingto	Hide Reporting To field in Vacancy Details Two

7. Emails

7.1. Overview

Emails can be sent via several ways from the CoreHR system

1. Applicant Status templates as per section [5.3.5 Applicant Status Emails](#).
2. Email Parameters.
3. Event Management System

7.1.1. Email Parameters

These are notifications that are sent from the system at certain times. These emails are based on standard email subject and bodies that are available as part of baseline configuration. The text on these emails can be edited to include the correct information when sent to applicants.

To edit / maintain these emails:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference*.
2. Select **eRecruitment Web Parameters > Email Parameters** tab.

Template Name	Subject Line	Details
Agency Interview Panel Member Notification	Agency Interview Panel Member Notification	Details
Agency External Panel Member Creation	Agency External Panel Member Creation	Details
Staff Request - Person Request Details	Staff Request - Person Request Details	Details
Internal Applicant Account Activation	Internal Applicant Account Activation	Details
Application Unsubmitted Confirmation		Details
Online Job Application Acknowledgement		Details
Reset Password	Reset password	Details
Applicant Email change	Verify your change of email address for recruitment	Details
Account Activation	Activate your account	Details
Reset Password Account Activation	Reactivate your account with new password	Details
Agency Reset Password	Agency Password Reset	Details
Agency Un-Submit Application	Agency Un-Submit Application	Details

The table below outlines the emails that are most commonly used and should be used:

Email Parameter	Explanation
Application Unsubmitted Confirmation	This email is sent to an applicant when the application has been cancelled due to the vacancy closing date passing before the application has been submitted.
Online Job Application Acknowledgement	This email is sent to an applicant when they have submitted their application.
Reset Password	This email is sent to an applicant when they have reset their password to the recruitment website. It includes their new password.
Applicant Email Change	This email is sent to an applicant when they have changed their email address on the recruitment website. It includes a validation URL to verify their identity.
Account Activation	This email is sent to an applicant if they have locked their account after a number of failed logins. It includes a validation URL to verify their identity.
Reset Password Account Activation	This email is sent to an applicant with a URL to reset their password. It includes a validation URL to verify their identity.
Applicant New Vacancy Notification	This email is sent to an applicant when a new vacancy has been posted on the recruitment website. This is based on the notifications settings that the applicant has amended on the <i>My Account</i> screen.
Applicant Closing Notification	This email is sent to an applicant when a vacancy is about to close. This is based on the notifications settings that the applicant has amended on the <i>My Account</i> screen.

3. Click on **Details** to edit the subject and body of the email template.

The screenshot shows the 'Maintain Email' dialog box with the following fields and components:

- Email Type:** A dropdown menu set to 'APPNOTENEW'.
- Applicant New Vacancy Notification:** A section header.
- Email Subject:** A text field containing 'New Vacancy Notification | CoreHR', marked with a red circle '1'.
- Email Body:** A large text area containing a template with placeholders like <<FORENAME>>, <<SURNAME>>, <<VACANCY_LIST>>, and <<RECRUITMENT_CLOSE_TIME>> <<CLOSE_DATE>>. It also includes a closing line 'Regards CoreHR Recruitment Team'. This area is marked with a red circle '2'.
- Available Fields:** A list of fields that can be inserted into the email body, including 'Applicant No', 'Close Date', 'Email Address', 'Forename', 'Recruitment Close Time', 'Surname', 'Title', and 'Vacancy List'. This list is marked with a red circle '3'.
- Buttons:** 'Save', 'Clear', and 'Cancel' buttons at the bottom.

- *Email Subject* to be sent to Applicants.
- *Email Body* can be configured to fit your organisations templates and language.
- *Available Fields* are automatically populated from the system, based on recruitment data, if you choose to add them to the email body.

Note:

- Email Subject has a max of 250 alphanumeric characters.
- Email Body has a max of 2000 alphanumeric characters.

EMS Events

The CoreHR Event Management System (EMS) module allows for the recruitment module to be configured so that emails and notifications can be generated in CoreHR based on certain data triggers populated on the system

These can be generated for any user of the system via:

- Individual emails
- Group emails
- Organisation Roles

To create / maintain the emails and notifications for recruitment:

1. Go to *CorePortal > People Management > Data Centre* tab.
2. Open *HR Admin Setup Settings*.
3. Search for “HR Event Configuration” and choose the corresponding option.
4. Once in this screen, select the *Event Category* drop-down list, which provides you with the following recruitment events:

Event	Explanation
<i>Recruitment Advertising Events</i>	This relates to where and when this vacancy was published to an advertiser.
<i>Recruitment Applicant Events</i>	This relates to any applicant data that has been created or amended on the system.
<i>Recruitment Events</i>	This relates to any update or amendment to data against a vacancy profile on the system.
<i>Recruitment Referee Events</i>	Legacy event and is not in use here.

5. Choose the *Event Category* to create / amend a notification.

Hr Event Configuration
 People Management > HR Admin Setup Settings > Hr Event Configuration

CoreHR Events

Event Category
 Recruitment Applicant Events

Event Type	Last Run Date	Active Ind.	DB Trigger	Ignore Event Days	
Applicant Date Input	01-Mar-2007 00:00	☐	☒	60	...
Applicant Interview Date	01-Mar-2007 00:00	☐	☒	60	...
Applicant Nationality	01-Mar-2007 00:00	☐	☒	60	...
Applicant No.	01-Mar-2007 00:00	☐	☒	60	...
Applicant Start Date	01-Mar-2007 00:00	☐	☒	60	...
Applicant Status	25-Jul-2019 17:12	☒	☒	60	...
Applicant Status Date	01-Mar-2007 00:00	☐	☒	60	...
Application Committed Status	01-Mar-2007 00:00	☐	☒	60	...
External HR Status	01-Mar-2007 00:00	☐	☒	60	...

6. Select the  button which brings you to the Event Type Maintenance screen to configure the notification. For example, notifications in the Applicant Event category could be setup for:
- Notification of Invite to Interview (based on *Applicant Status*)
 - Notification of Shortlist Addition
 - Notification of Offer

8. Generate and Merge Applications

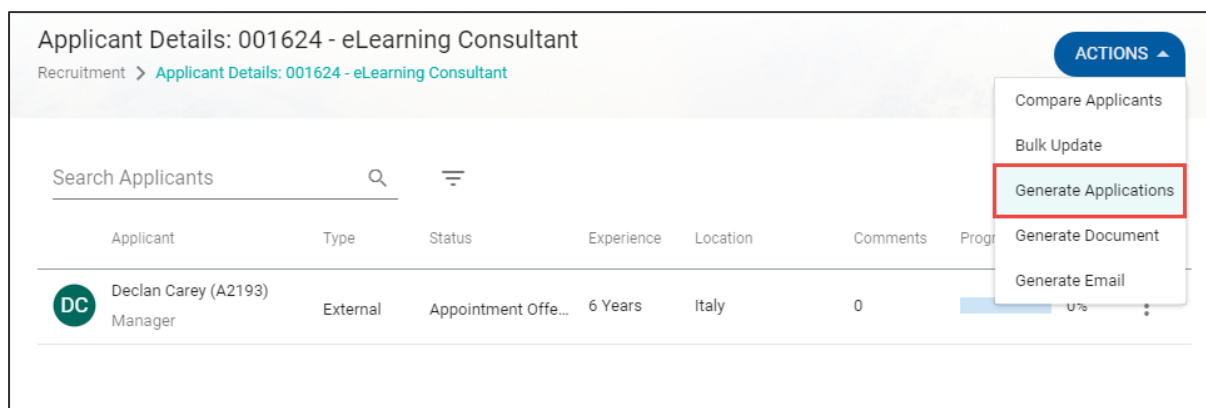

The **Generate Applications** feature is used to make applications available in an interview pack for interviewers as follows:

- For each selected application, all documents attached to the application which are not in PDF format e.g. word documents are converted into PDF format;
- The applicant's online application is then merged with all the pdf documents and the converted pdf documents.

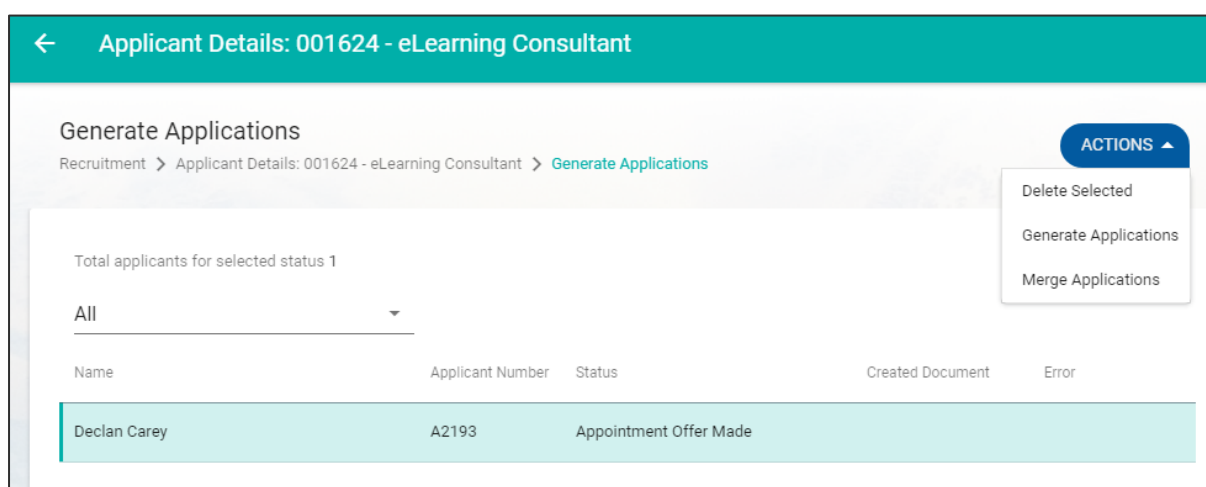

In addition, all applicant details generated in the 'Generate Applications' process can then be merged into one file which can then be printed out or attached to the vacancy, for interviewers as part of the interview pack.

In the first screenshot below, you can see an applicant displaying in the Applicant Status screen.

1. Click on the **Generate Applications** button.

The *Generate Applications* screen appears.

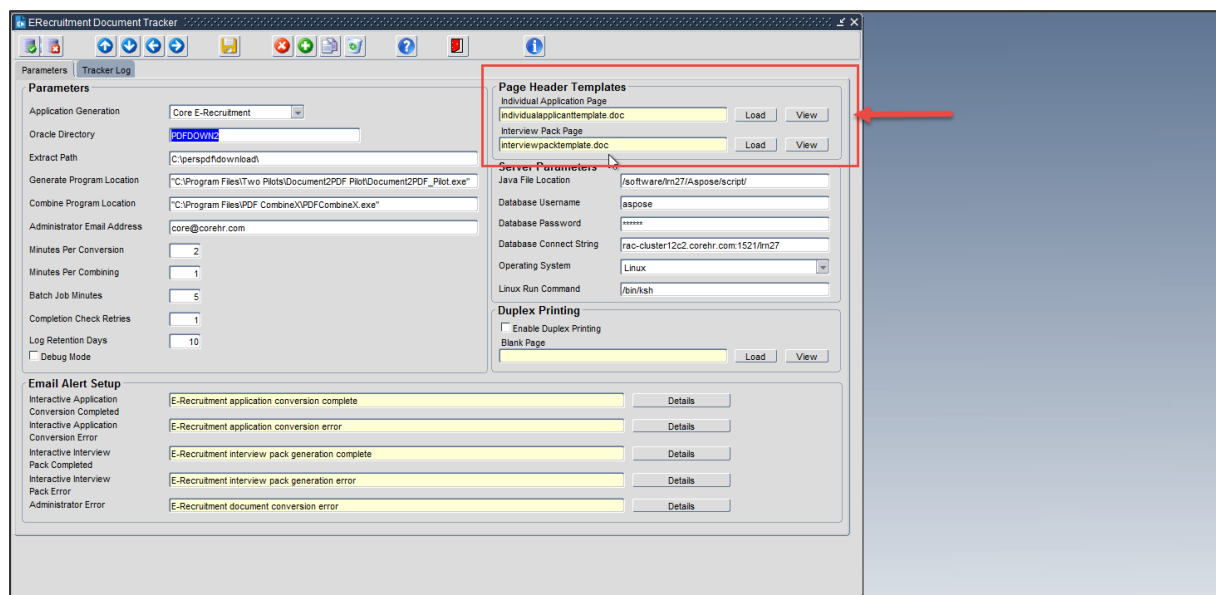

These menu options control the use of the **Generate Applications** and **Merge Applications** functions on the *Applicant Details* screen

System	Menu Option	Explanation
CorePortal	eRecruitment Applications - Generate	This turns on the access to generate and merge applications.
CorePortal	eRecruitment Applications View - Generate	This turns on the access to view applications that have been generated and merged.

There needs to be a header template document for the following loaded into the system before any documents can be generated and merged.

To upload this file:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference > ERecruitment Document Tracker*.
2. On the *Page Header Templates* section, load the template documents.

These templates should look like this:

ABC Solutions Application Template

|
Applicant : «applicant_name» **Applicant ID :** «applicant_no»

Vacancy ID : «recruitment_id»

Vacancy Name : «recruitment_name»

«conversion_errors»

Note:

Check the document is of format .doc

Check that any image / logo is of type .gif.
