Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to grant Pay Group Access.

Items covered include:

- How to grant user access to a pay group.
- How to remove pay group access from a user.

1.2. How is User Access Managed on Payroll?

User access to the CoreHR system can be broadly split into 2 categories:

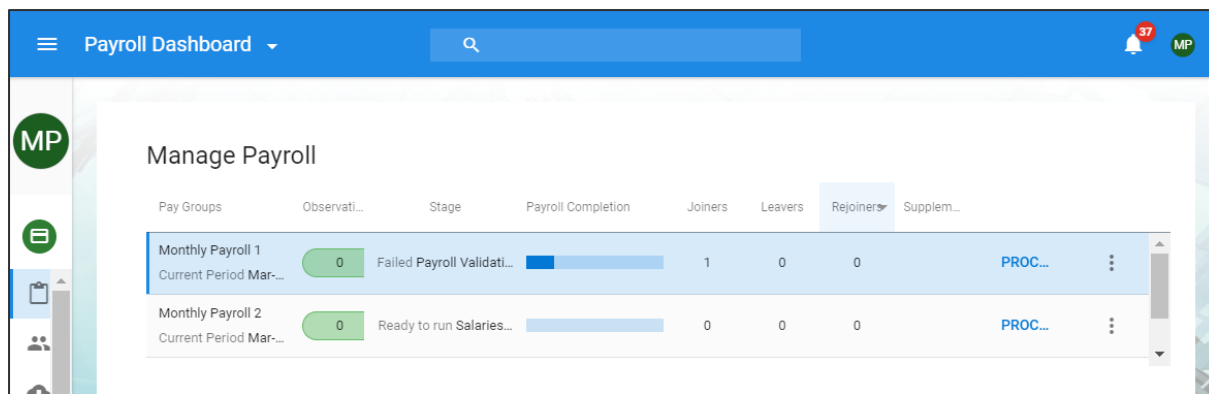

1. Menu Profiles	2. Data Access
• Provides access to system functionality. • Menu options are linked to system elements, including: ○ Dashboards ○ Screens ○ Buttons ○ Menu options ○ Widgets • Typically aligned to a user's role in the organisation, e.g. a profile for 'HR Administrators', another for 'Payroll Administrators' etc.	• Provides access to the actual data / records stored on the system. • For Payroll, this includes access to the following records: ○ Employees ○ Pay Groups ○ Salaries • Different employees can have access to different sets of records on CoreHR, e.g. access to all records, access to only a subset of records.

Therefore, users of the Payroll Dashboard will need to be granted access for both categories, i.e. a user will need:

1. A Menu Profile, e.g. PAYROLL_ADMIN, in order to see the *Payroll Dashboard* and all functionality within that.
2. Data access to see employee records, lookup salaries and run payroll.

1.3. What is Pay Group Access?

Access to data on the *Payroll Dashboard* is grouped at Pay Group level, i.e. payroll administrators can only see employees and process payrolls for pay groups to which they have access.

If an organisation has multiple pay groups on CoreHR, users must be granted access to the pay groups that they are required to support.

For example, if an organisation may have 3 pay groups:

- Monthly Payroll 1
- Monthly Payroll 2
- Monthly Payroll 3

The following user access set up is possible:

- A user may have access to all 3.
- They may only have access to Monthly Payroll 1.
- They may be granted access to Monthly Payroll 2 for a temporary period to cover a colleague's absence.

Note:

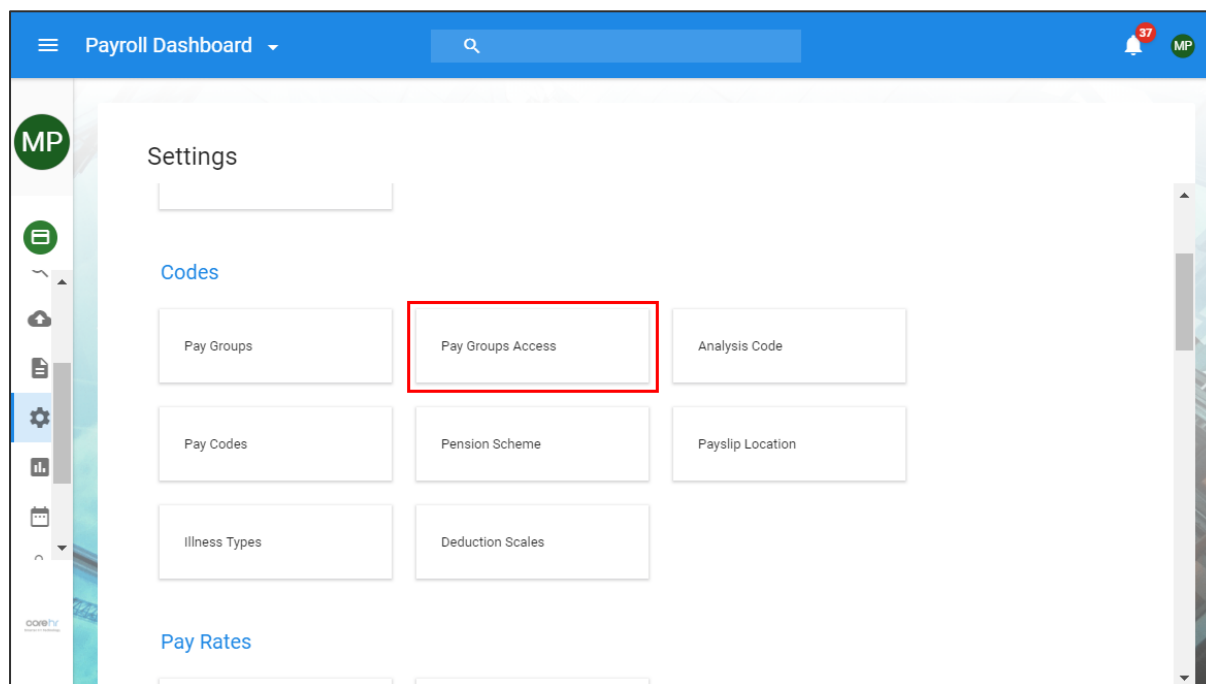

Pay Group access is also applicable for HR Administrators on the *People Management Dashboard*, to control their access to employee salary and allowance records. Further training on this is provided in the *User Data Access* configuration guide for People Management.

2. Provide Access to Pay Groups Access

2.1. Access to Pay Group Access on the Settings Tab

The following *Menu Option* is required for an employee to access the *Pay Groups Access* screen from the Settings tab.

System	Menu Option
CorePortal Pay	Settings - Pay Groups Access

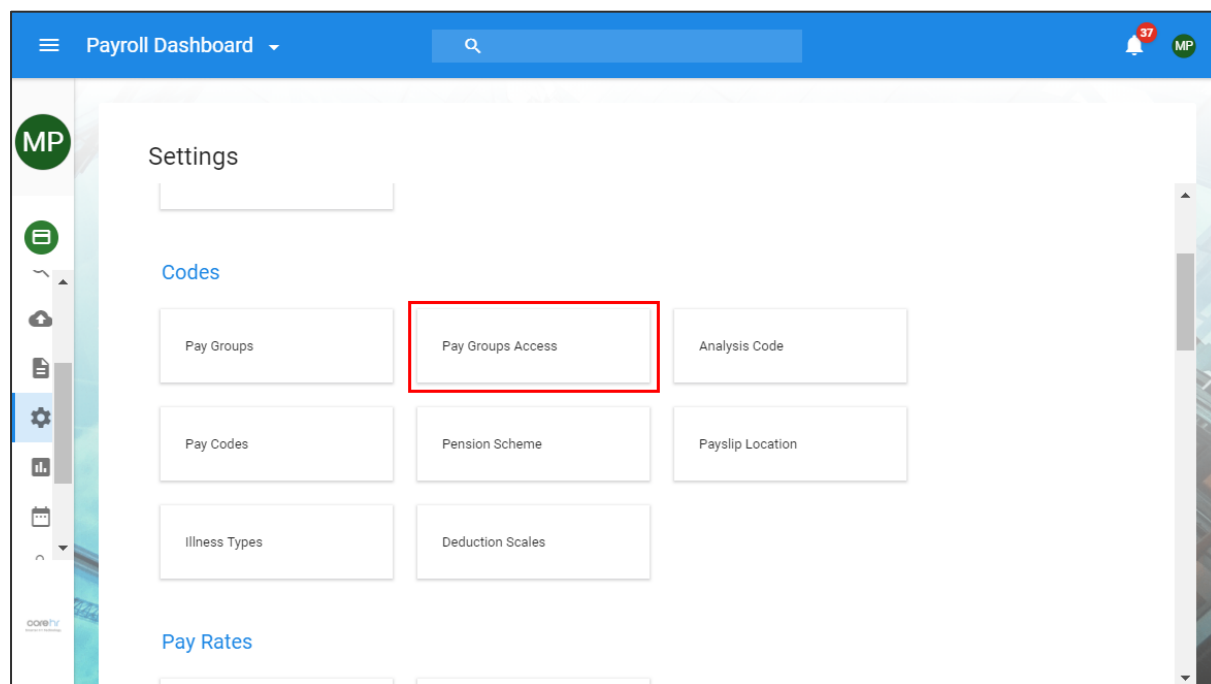

Status	Impact
Enabled	The user will have full view and edit access to the <i>Pay Groups Access</i> screen.
Disabled	The user can still access the screen, but a 'You do not have access to this screen' message will be displayed.

3. Maintain Pay Groups Access

To grant access to or remove access from a Pay Group:

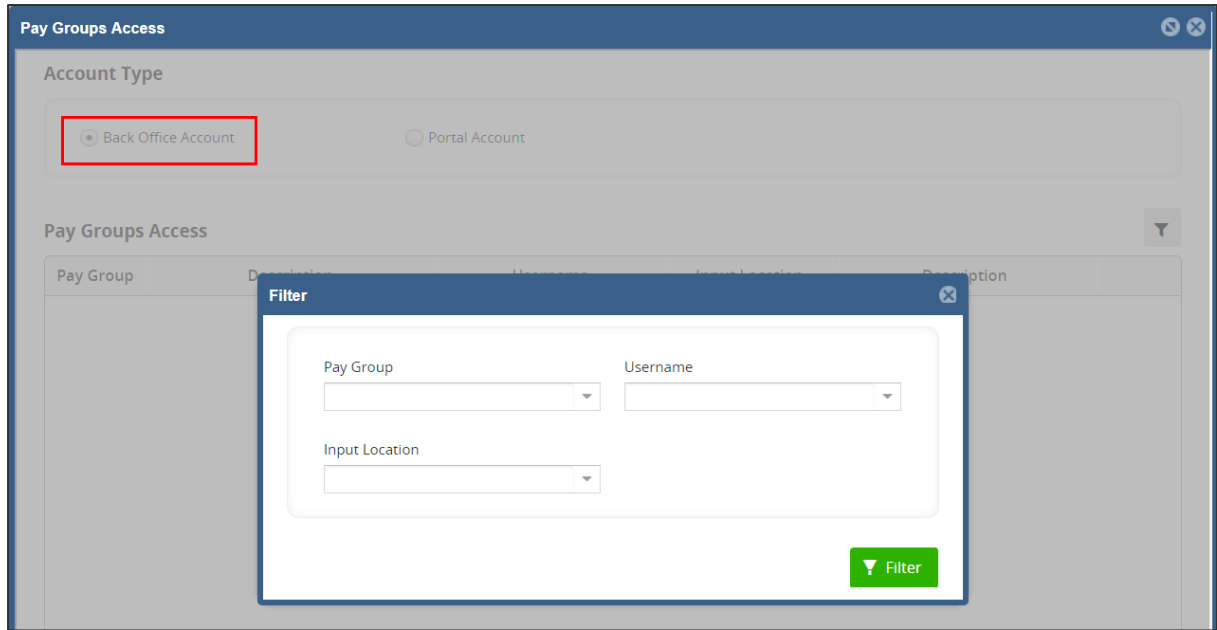

Go to *Settings > Codes > Pay Groups Access*.

3.1. Grant User Access to a Pay Group

To grant user access to a pay group:

1. Go to *Settings > Codes > Pay Groups Access*.
2. Click **Pay Groups Access**. The *Pay Groups Access* screen opens on the filter screen for Back Office.

3. Close the *Filter* screen and click **Portal Account**. This ensures the user access records are applicable to CorePortal accounts.
4. Click the  button to filter your search. You can filter your search by selecting an option from one of the following 3 drop-down menus:
 - a. **Pay Group**: This returns all users by who currently have access to that pay group
 - b. **Username**: This returns only that user and will show which pay groups (if any) they currently have access to.
 - c. **Input Location**: This returns all users from all pay groups and from that input location who currently have access.

For this example, we will grant access to Pay Group 1 for Melanie Prachett (000021).

5. Filter by *Username*.
6. Scroll the drop-down options for Melanie or type the person's name or employee number.

☐ Back Office Account☒ Portal Account

Pay Groups Access

Pay Group	Description	Username	Input Location	Description	
					...
200	WEEKLY PAYROLL	000021	1	STANDARD DEFAULT INPUT LOC...	...

9. Select the required pay group from the drop-down menu and press enter/tab, e.g. 'Monthly Payroll UK.'
10. Add the username. Scroll the drop-down options for Melanie, or search by name / personnel number.
11. Select the appropriate **Input Location** from the drop-down menu. This is mandatory, even in situations where there is only one option available.

AddSave

12. Click the green **Save** button and the pay group will be available on the users *Payroll Dashboard* and will have access to manage all payrolls for that pay group.

3.2. Remove Pay Group Access

Follow these steps to revoke access from a user to a pay group.

1. Go to *Settings > Codes > Pay Groups Access*.
The Pay Groups Access screen opens on the filter screen for Back Office.
2. Close the *Filter* screen and click **Portal Account**.
3. Click the  button to filter your search.
4. Select the user from the **Username** drop-down menu.
5. Click the green **Filter** button.
6. Click the  button on the pay group access to be removed and select **Delete**.
