Version	Date	Author	Details
1.0	25 th Sep 2020	Brian O'Keeffe	Published.
1.1	14 th October 2020	Brian O'Keeffe	Update to title and section 3. User Access .

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure the data migration functionality on CoreHR. This includes configuration to support:

- The upload process via the *Data Migration Options* and *Data Migration Templates* widgets.
- The *Data Migration Update Facility*.

2. Configuring the Data Migration Tool

2.1. Dashboard Configuration

Note:

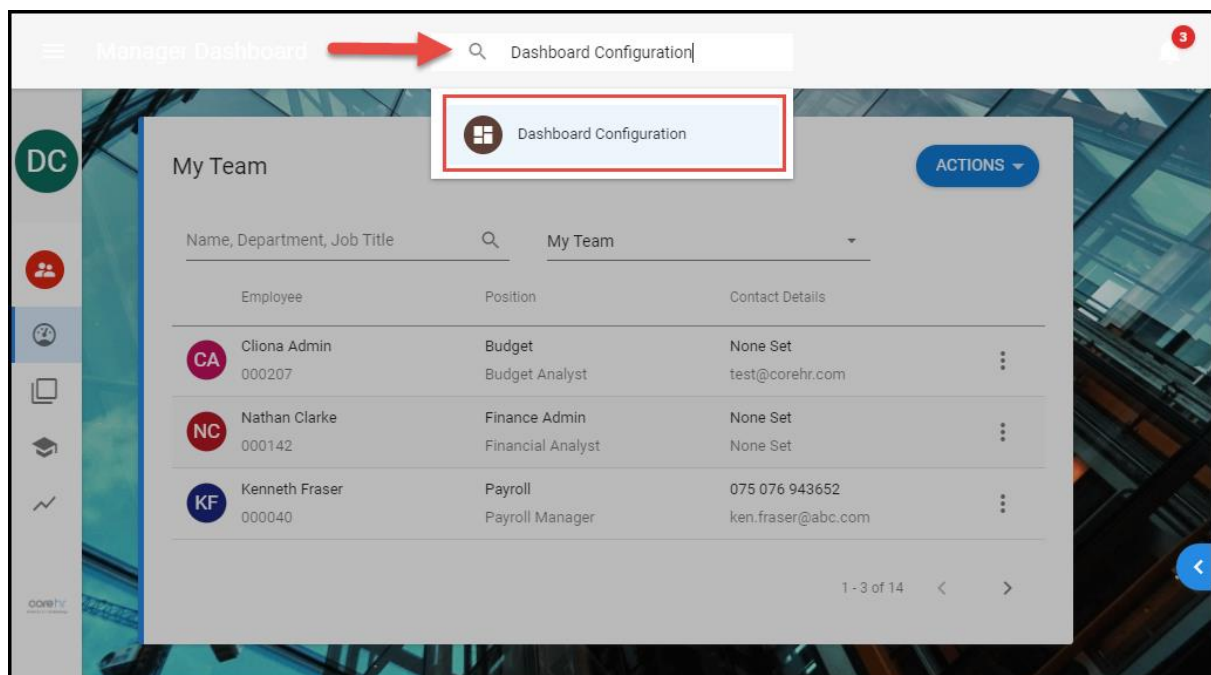

It is recommended that all widgets required to support the data migration functionality are configured on a *Data Migration* tab on the *Administrator Dashboard*. This configuration is defaulted on install of CoreHR.

This section provides an overview of the following:

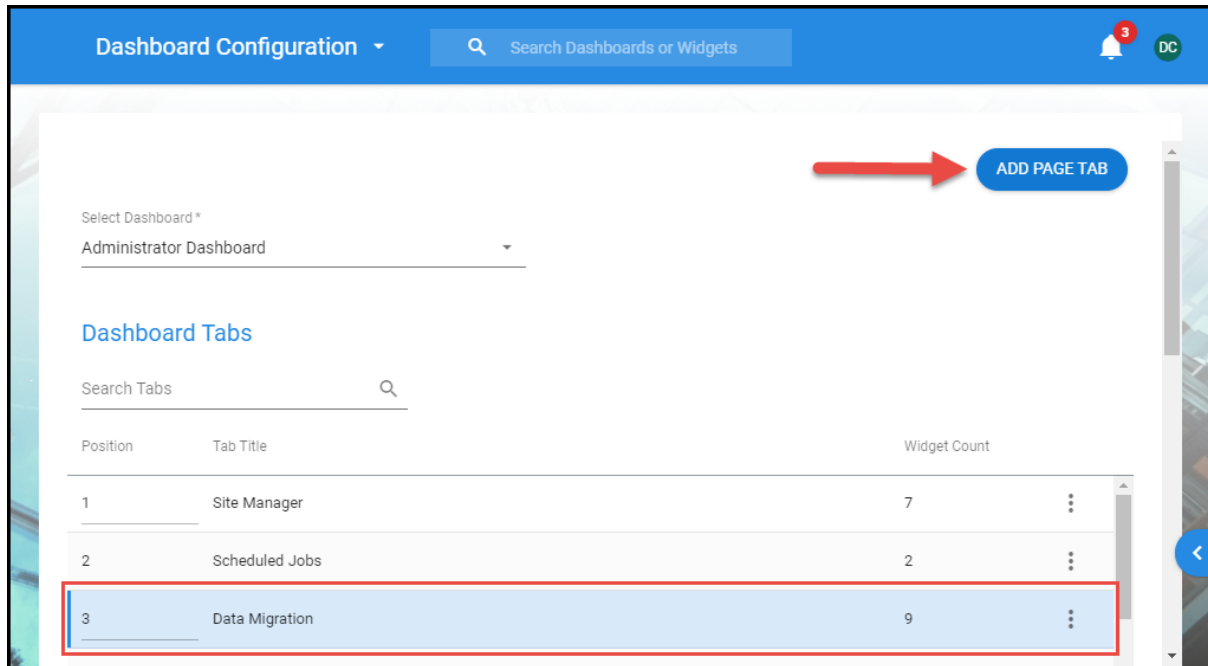

- How the *Data Migration* tab is made available on the *Administrator Dashboard*.
- How the widgets are pre-configured for that tab.

To add a tab:

1. Quick jump to *Dashboard Configuration*

2. Select Dashboard = *Administrator Dashboard*.
3. Click **Add Page Tab**.

4. On the *Edit Tab* pop up, enter the following details:

- *Title* = "Data Migration"
- *Name* = "Data Migration"
- *Phrase Code* = "Data Migration"
- *Icon* = Database
- *Height* = n/a
- *Position* = the preferred order number, e.g. 3 indicates this will be the 3rd tab
- *Display on CoreMobile* = Off

Data Migration v28: Configuring the Data Migration Tool

The followings widgets should be added to the *Data Migration* tab.

- Data Migration Options
- Data Migration Templates
- Data Migration Update Facility

To add these widgets to the tab:

1. Select the *Data Migration* tab on the list of tabs.
2. Search for the widget name.
3. Enable the **Selected** checkbox.
4. Changes are saved automatically.

The screenshot shows the 'Dashboard Configuration' interface. At the top, there's a 'Select Dashboard *' dropdown set to 'Administrator Dashboard'. Below this is the 'Dashboard Tabs' section with a search bar. A table lists five tabs: 'Logo Upload' (4 widgets), 'Scheduled Jobs' (1 widget), 'Data Migration' (3 widgets, highlighted with a blue background and a red arrow pointing to its position '3'), 'Workforce Management' (2 widgets), and 'Timesheet Rules' (1 widget). Below the tabs is the 'Tab Widgets' section with another search bar (indicated by a red arrow). It lists three widgets for the 'Data Migration' tab: 'Data Migration Options', 'Data Migration Templates', and 'Data Migration Update Facility'. Each widget has a 'Selected' toggle switch (all are turned on) and a 'CONFIGURE' link.

Position	Tab Title	Widget Count
1	Logo Upload	4
2	Scheduled Jobs	1
3	Data Migration	3
4	Workforce Management	2
5	Timesheet Rules	1

Position	Widget Title	Selected
1	Data Migration Options	☒
2	Data Migration Templates	☒
3	Data Migration Update Facility	☒

Note:

There are other widgets prefixed with “Data Migration” that will appear in the widget search. These are used as part of a legacy data migration solution and are not relevant to this functionality. Only the 3 widgets listed above should be enabled.

3. User Access

3.1. Default Data Migration Menu Profile

A pre-configured menu profile is available. This includes all of the necessary V1 (previous data migration tool) and V2 (enhanced V28 data migration tool) menu options required for a user to:

- Complete data migration uploads
- Process Updates

Menu Profile
CorePortal_DataMigration_User

3.2. Access to the Data Migration Widgets

Each of the 3 data migration widgets are controlled using a single menu option:

Menu Option	Description
CoreHR - Data Migration	CoreHR - Data Migration

Once the user has this option, they will have full access for each of the following widgets:

- *Data Migration Templates.*
- *Data Migration Options.*
- *Data Migration Update Facility.*

**Note:**

This is pre-configured on the default menu profile: COREPORTAL_DATAMIGRATION_USER

3.3. Access to Upload Data Migration Files and Complete Updates

There is a complete set of Data Migration menu options that are used to control the following:

- Data migration template download.
- Data migration template upload.
- Data migration template processing.
- Update data retrieval.
- Update data processing.

All of these items are available to configure for a Menu Profile under.

Menu Option	Description	What Does it Control?
Datamigration	Datamigration	All of these items are available to configure for a Menu Profile under:

The "Datamigration" menu option includes a number of sub-menu options:

- On selecting the Datamigration menu option, all sub-menu options for this are automatically selected and saved.
- The following table includes a list of all of the V1 and V2 menu options required to control for data migration / update purposes.

Note:

All of the menu options listed in this section are preconfigured on the default menu profile: *COREPORTAL_DATAMIGRATION_USER*

3.3.1. Previous Data Migration Tool Menu Options

The following webservice menu options are required to use the previous data migration tool:

Menu Option		What Does it Control?
Create additionalcontract	Datamigration > Create additionalcontract	Processing records that were uploaded using the Additional Contract Complete & Additional Contract Simple template.
Create allowances	Datamigration > Create allowances	Processing records that were uploaded using the Allowance File template.
Create autoenrolhist	Datamigration > Create autoenrolhist	Processing records that were uploaded using the Auto Enrolment History File template.
Create balanceassignments	Datamigration > Create balanceassignments	Processing records that were uploaded using the Balance Assignments File template.
Create bik	Datamigration > Create bik	Processing records that were uploaded using the Benefit in Kind File template.
Create contacts	Datamigration > Create contacts	Processing records that were uploaded using the Contacts File template.
Create costallocations	Datamigration > Create costallocations	Processing records that were uploaded using the Cost Allocation File template.

Menu Option		What Does it Control?
Create cumulative irl	Datamigration > Create cumulative irl	Processing records that were uploaded using the Cumulative IRL File template.
Create cumulative uk	Datamigration > Create cumulative uk	Processing records that were uploaded using the Cumulative UK File template.
Create deductions	Datamigration > Create deductions	Processing records that were uploaded using the Deductions File template.
Create dependents	Datamigration > Create dependents	Processing records that were uploaded using the Dependents File template.
Create deq	Datamigration > Create deq	Processing records that were uploaded using the Diversity Equality File template.
Create ewss	Datamigration > Create ewss	Processing records that were uploaded using the EWSS File template.
Create file	Datamigration > Create file	Controls the upload of a file to process through data migration.
Create nextofkin	Datamigration > Create nextofkin	Processing records that were uploaded using the Next of Kin File template.
Create occupational	Datamigration > Create occupational	Processing records that were uploaded using the Occupational Load File template.
Create payscalepoint	Datamigration > Create payscalepoint	Processing records that were uploaded using the Pay Scale Point File template.
Create pensions	Datamigration > Create pensions	Processing records that were uploaded using the Pensions File template.
Create person	Datamigration > Create person	Processing records that were uploaded using the Person File Simple and Person File Complete templates.
Create posratedetails	Datamigration > Create posratedetails	Processing records that were uploaded using the Position Rate Details File template.
Create qualification	Datamigration > Create qualification	Processing records that were uploaded using the Qualification File template.
Create rti	Datamigration > Create rti	Processing records that were uploaded using the RTI File template.
Create shifttypes	Datamigration > Create shifttypes	Processing records that were uploaded using the Shift Types File template.
Create statutorypay	Datamigration > Create statutorypay	Processing records that were uploaded using the Statutory Pay Profile File template.

Menu Option		What Does it Control?
Create udf	Datamigration Create udf	> Processing records that were uploaded using the User Defined Fields File template.
Create workgroup	Datamigration Create workgroup	> Processing records that were uploaded using the Work Groups File template.
Delete allowances	Datamigration Delete allowances	> Used as part of the clear down process to remove the Allowances File and delete any processed records for that file.
Delete autoenrolhist	Datamigration Delete autoenrolhist	> Used as part of the clear down process to remove the Auto Enrolment History File and delete any processed records for that file.
Delete bik	Datamigration Delete bik	> Used as part of the clear down process to remove the Benefit in Kind File and delete any processed records for that file.
Delete contacts	Datamigration Delete contacts	> Used as part of the clear down process to remove the Contacts File and delete any processed records for that file.
Delete costallocations	Datamigration Delete costallocations	> Used as part of the clear down process to remove the Cost Allocations File and delete any processed records for that file.
Delete cumulative	Datamigration Delete cumulative	> Used as part of the clear down process to remove the cumulative (ROI and UK) files and delete any processed records for that file.
Delete deductions	Datamigration Delete deductions	> Used as part of the clear down process to remove the Deductions File and delete any processed records for that file.
Delete dependents	Datamigration Delete dependents	> Used as part of the clear down process to remove the Dependents File and delete any processed records for that file.
Delete deq	Datamigration Delete deq	> Used as part of the clear down process to remove the Diversity and Equality File and delete any processed records for that file.
Delete nextofkin	Datamigration Delete nextofkin	> Used as part of the clear down process to remove the Next of Kin File and delete any processed records for that file.
Delete occupational	Datamigration Delete occupational	> Used as part of the clear down process to remove the Occupational History File and delete any processed records for that file.

Menu Option		What Does it Control?
Delete payscalepoint	Datamigration > Delete payscalepoint	Used as part of the clear down process to remove the Reference Pay Scale Point file and delete any processed records for that file.
Delete pensions	Datamigration > Delete pensions	Used as part of the clear down process to remove the Pensions File and delete any processed records for that file.
Delete person	Datamigration > Delete pensions	Used as part of the clear down process to remove the Person Simple File or Person Complete File and delete any processed records for that file.
Delete person	Datamigration > Delete person	Used as part of the clear down process to remove the Person Simple File or Person Complete File and delete any processed records for that file.
Delete posratedetails	Datamigration > Delete posratedetails	Used as part of the clear down process to remove the Reference - Position Rate Details file and delete any processed records for that file.
Delete qualification	Datamigration > Delete qualification	Used as part of the clear down process to remove the Qualification File and delete any processed records for that file.
Delete shifttypes	Datamigration > Delete shifttypes	Used as part of the clear down process to remove the Reference - Shift Types file and delete any processed records for that file.
Delete statutorypay	Datamigration > Delete statutorypay	Used as part of the clear down process to remove the Statutory Pay Profile File and delete any processed records for that file.
Delete udf	Datamigration > Delete udf	Used as part of the clear down process to remove the User Defined Fields File and delete any processed records for that file.
Delete workgroup	Datamigration > Delete workgroup	Used as part of the clear down process to remove the Reference - Work Groups file and delete any processed records for that file.
Get file	Datamigration > Get file	Gets the previously loaded data for a specific file.
Get history	Datamigration > Get history	Returns all the files previously loaded on the Data Migration Options widget.
Get Template Config	Datamigration > Get template config	This is needed to get the configuration of the file.

Menu Option		What Does it Control?
Get template list	Datamigration > Get template list	This returns the template list on the Data Migration Templates widget.
Get updatefacility configs	Datamigration > Get updatefacility configs	This is the same as Template config but for the update widget
Get updatefacility contacts	Datamigration > Get updatefacility contacts	Retrieve employee details for 'Person - Contacts'.
Get updatefacility contracts fteprofile	Datamigration > Get updatefacility contracts fteprofile	Retrieve employee contract details for Contract – FTE.
Get updatefacility contracts profile	Datamigration > Get updatefacility contracts profile	Retrieve employee contract details for Contract – Category, Contract – Cost Centre, Contract – Employee Status, Contract – Employee Sub Status, Contract – Job Category, Contract – Job Title, Contract – Location, Contract – Project, Contract – Sub Category, and Contract – Work Group.
Get updatefacility contracts reportsto	Datamigration > Get updatefacility contracts reportsto	Retrieve employee contract details for Contract – Reports To.
Get updatefacility employee address	Datamigration > Get updatefacility employee address	Retrieve employee details for Person - Address Details.
Get updatefacility employee bank	Datamigration > Get updatefacility employee bank	Retrieve employee details for Person - Address Details.
Get updatefacility employee expensecode	Datamigration > Get updatefacility employee expensecode	Retrieve employee details for Person - Expense Codes.
Get updatefacility employee homephone	Datamigration > Get updatefacility employee homephone	Retrieve employee details for Person - Home Phone.
Get updatefacility employee inputlocation	Datamigration > Get updatefacility	Retrieve employee details for Person - Input Location.

Menu Option		What Does it Control?
	employee inputlocation	
Get updatefacility employee paycodegroup	Datamigration > Get updatefacility employee paycodegroup	Retrieve employee details for Person - Pay Code Group.
Get updatefacility employee probation	Datamigration > Get updatefacility employee probation	Retrieve employee details for Person - Probation Details.
Get updatefacility employee shift	Datamigration > Get updatefacility employee shift	Retrieve employee details for Person - Shift Details.
Get updatefacility employee sicknesscategory	Datamigration > Get updatefacility employee sicknesscategory	Retrieve employee details for Person - Sickness Category.
Get updatefacility reference costcentre	Datamigration > Get updatefacility reference costcentre	Retrieve reference data contact details for Reference - Cost Centre Description.
Get updatefacility reference paycode	Datamigration > Get updatefacility reference paycode	Retrieve reference data details for Reference - Pay Code Description.
Get updatefacility reference shifttype	Datamigration > Get updatefacility reference shifttype	Retrieve reference data details for Reference - Shift Type.
Get updatefacility reference workgroup	Datamigration > Get updatefacility reference workgroup	Retrieve reference data details for Reference - Work Group.
Get updatefacility reports	Datamigration > Get updatefacility reports	As per Get Template Config but for the Data Migration Update Facility widget.
Update updatefacility contacts	Datamigration > Update updatefacility contacts	Update employee details for Person - Contacts.
Update updatefacility contracts fteprofile	Datamigration > Update updatefacility contracts fteprofile	Update employee contract details for Contract – FTE.

Menu Option		What Does it Control?
Update updatefacility contracts profile	Datamigration > Update updatefacility contracts profile	Update employee contract details for Contract – Category, Contract – Cost Centre, Contract – Employee Status. Contract – Employee Sub Status, Contract – Job Category, Contract – Job Title, Contract – Location, Contract – Project, Contract – Sub Category, and Contract – Work Group.
Update updatefacility contracts reportsto	Datamigration > Update updatefacility contracts reportsto	Update employee contract details for Contract – Reports To.
Update updatefacility employee address	Datamigration > Update updatefacility employee address	Update employee details for Person - Address Details.
Update updatefacility employee bank	Datamigration > Update updatefacility employee bank	Update employee details for Person - Address Details.
Update updatefacility employee expensecode	Datamigration > Update updatefacility employee expensecode	Update employee details for Person - Expense Codes.
Update updatefacility employee homephone	Datamigration > Update updatefacility employee homephone	Update employee details for Person - Home Phone.
Update updatefacility employee inputlocation	Datamigration > Update updatefacility employee inputlocation	Update employee details for Person - Input Location.
Update updatefacility employee paycodegroup	Datamigration > Update updatefacility employee paycodegroup	Update employee details for Person - Pay Code Group.
Update updatefacility employee probation	Datamigration > Update updatefacility employee probation	Update employee details for Person - Probation Details.
Update updatefacility employee shift	Datamigration > Update updatefacility employee shift	Update employee details for Person - Shift Details.

Menu Option		What Does it Control?
Update updatefacility employee sicknesscategory	Datamigration > Update updatefacility employee sicknesscategory	Update employee details for Person - Sickness Category.
Update updatefacility reference costcentre	Datamigration > Update updatefacility reference costcentre	Update reference data contact details for Reference - Cost Centre Description.
Update updatefacility reference paycode	Datamigration > Update updatefacility reference paycode	Update reference data details for Reference - Pay Code Description.
Update updatefacility reference shifttype	Datamigration > Update updatefacility reference shifttype	Update reference data details for Reference - Shift Type.
Update updatefacility reference workgroup	Datamigration > Update updatefacility reference workgroup	Update reference data details for Reference - Work Group.

3.3.2. New Data Migration Tool (V2) Menu Options

The following CorePortal menu option is required to allow users to download from the new data migration tool.

Menu Option	Description	What Does it Control?
Data Migration - Download	Data Migration - Download	This allows a user to download a file. If it is not active - you won't be able to see the download button on the ellipsis.

The following V2 webservice menu options are required to use the new data migration tool:

Menu Option	Description	What Does it Control?
Create v2 additionalcontract	Datamigration > Create v2 additionalcontract	Processing records that were uploaded using the V2 Additional Contract Complete & Additional Contract Simple template.
Create v2 allowances	Datamigration > Create v2 allowances	Processing records that were uploaded using the V2 Allowance File template.
Create v2 alternateteams	Datamigration > Create v2 alternateteams	Processing records that were uploaded using the V2 Recommended Teams File template.

Menu Option	Description	What Does it Control?
Create areaassignments v2	Datamigration > Create v2 areaassignments	Processing records that were uploaded using the V2 Employee Team Area Assignments File template.
Create autoenrolhist v2	Datamigration > Create v2 autoenrolhist	Processing records that were uploaded using the V2 Auto Enrolment History File template.
Create balanceadjustment v2	Datamigration > Create v2 balanceadjustment	Processing records that were uploaded using the V2 Balance Adjustments File template.
Create badgeassignments v2	Datamigration > Create v2 badgeassignments	Processing records that were uploaded using the V2 Badge Assignments File template. Equivalent to the old DM Tool Badge Assignments file.
Create bankreference v2	Datamigration > Create v2 bankreference	Processing records that were uploaded using the V2 Bank Reference File template. Equivalent to the old Bank Reference file (Bank).
Create bicreference v2	Datamigration > Create v2 bicreference	Processing records that were uploaded using the V2 BIC Reference File template. Equivalent to the old BIC Reference file (BIC).
Create v2 bik	Datamigration > Create v2 bik	Processing records that were uploaded using the V2 Benefit in Kind File template.
Create v2 contacts	Datamigration > Create v2 contacts	Processing records that were uploaded using the V2 Contacts File template.
Create costallocations v2	Datamigration > Create v2 costallocations	Processing records that were uploaded using the V2 Cost Allocations File template.
Create courseprofile v2	Datamigration > Create v2 courseprofile	Processing records that were uploaded using the V2 Course Profile File template.
Create courseprovider v2	Datamigration > Create v2 courseprovider	Processing records that were uploaded using the V2 Course Provide File template.
Create v2 cumulative irl	Datamigration > Create v2 cumulative irl	Processing records that were uploaded using the V2 Cumulatives IRE File template.

Menu Option	Description	What Does it Control?
Create v2 cumulative uk	Datamigration > Create v2 cumulative uk	Processing records that were uploaded using the V2 Cumulatives UK File template.
Create v2 deductions	Datamigration > Create v2 deductions	Processing records that were uploaded using the V2 Deductions File template.
Create v2 dependents	Datamigration > Create v2 dependents	Processing records that were uploaded using the V2 Dependents File template.
Create v2 diversityequality	Datamigration > Create v2 diversityequality	Processing records that were uploaded using the V2 Diversity Equality File template.
Create v2 employeeprofile	Datamigration > Create v2 employeeprofile	Processing records that were uploaded using the V2 Employee Roster Profile File template.
Create v2 ewss	Datamigration > Create v2 ewss	Processing records that were uploaded using the V2 EWSS File template.
Create v2 file	Datamigration > Create v2 file	Controls the upload of a V2 file to process through data migration.
Create v2 hrreference	Datamigration > Create v2 hrreference	Processing records that were uploaded using the V2 HR Reference File template. Merge of the old HR Reference 1 (HR1) and HR Reference 2 files (HR2).
Create v2 nextofkin	Datamigration > Create v2 nextofkin	Processing records that were uploaded using the V2 Next of Kin File template.
Create v2 niletter	Datamigration > Create v2 niletter	Processing records that were uploaded using the V2 NI Letter History (New) File template. New file to supplement the UK Cumulatives file.
Create v2 occupational	Datamigration > Create v2 occupational	Processing records that were uploaded using the V2 Occupational Load File template
Create v2 orgrole	Datamigration > Create v2 orgrole	Processing records that were uploaded using the V2 Org Role Assignments (New) File template. Equivalent to the old Organisation Roles file (ORGROL).
Create v2 payhistory	Datamigration > Create v2 payhistory	Processing records that were uploaded using the Paycode YTDs File template.

Menu Option	Description	What Does it Control?
Create payscalepoint v2	Datamigration > Create v2 payscalepoint	Processing records that were uploaded using the V2 Pay Scale Point File template.
Create v2 pensions	Datamigration > Create v2 pensions	Processing records that were uploaded using the V2 Pensions File template.
Create v2 person	Datamigration > Create v2 person	Processing records that were uploaded using the V2 Person File Simple and V2 Person File Complete templates. Enhancement to the Person Simple/Complete file.
Create personpayroll v2	Datamigration > Create v2 personpayroll	Processing records that were uploaded using the V2 Person Payroll File template.
Create positionratedetails v2	Datamigration > Create v2 positionratedetails	Processing records that were uploaded using the V2 Position Rate Details File template.
Create postpensiondetails v2	Datamigration > Create v2 postpensiondetails	Processing records that were uploaded using the V2 Post Pension Details File template.
Create v2 postprofile	Datamigration > Create v2 postprofile	Processing records that were uploaded using the V2 Post Profile File template.
Create providercourselinkage v2	Datamigration > Create v2 providercourselinkage	Processing records that were uploaded using the V2 Provider Course Linkage File template.
Create qualification v2	Datamigration > Create v2 qualification	Processing records that were uploaded using the V2 Qualification File template.
Create rosterareaaccess v2	Datamigration > Create v2 rosterareaaccess	Processing records that were uploaded using the V2 Scheduled Training File template.
Create rosterareastructure v2	Datamigration > Create v2 rosterareastructure	Processing records that were uploaded using the V2 Roster Area Structure File template.
Create v2 rti	Datamigration > Create v2 rti	Processing records that were uploaded using the V2 RTI File template.

Menu Option	Description	What Does it Control?
Create v2 scheduledtraining	Datamigration > Create v2 scheduledtraining	Processing records that were uploaded using the V2 Scheduled Training File template.
Create v2 shiftassignment	Datamigration > Create v2 shiftassignment	Processing records that were uploaded using the V2 Shift Assignment File template.
Create v2 shifttypes	Datamigration > Create v2 shifttypes	Processing records that were uploaded using the V2 Shift Types File template.
Create v2 staffingrules	Datamigration > Create v2 staffingrules	Processing records that were uploaded using the V2 Roster Rules File template.
Create v2 statutorypay	Datamigration > Create v2 statutorypay	Processing records that were uploaded using the V2 Statutory Pay Profile File template.
Create v2 supplementaryaddre ss	Datamigration > Create v2 supplementaryaddre ss	Processing records that were uploaded using the Supplementary Addresses (New) File template. This file is used to load additional address information for an employee if required (e.g. interview panel address).
Create v2 trainingextpers	Datamigration > Create v2 trainingextpers	Processing records that were uploaded using the V2 Training External Person File template.
Create v2 traininghistory	Datamigration > Create v2 traininghistory	Processing records that were uploaded using the V2 Training History File template.
Create v2 trainingprovider	Datamigration > Create v2 trainingprovider	Processing records that were uploaded using the V2 Training Provider File template.
Create v2 udf	Datamigration > Create v2 udf	Processing records that were uploaded using the V2 User Defined Fields File template.
Create v2 workgroup	Datamigration > Create v2 workgroup	Processing records that were uploaded using the V2 Reference – Work Group File template.
Create v2 workgroupassignme nt	Datamigration > Create v2 workgroupassignmen t	Processing records that were uploaded using the V2 Workgroup Assignment File template.

Menu Option	Description	What Does it Control?
Delete v2 additionalcontract	Datamigration > Delete v2 additionalcontract	Used as part of the clear down process to remove the V2 Additional Contract Complete & Additional Contract Simple template and delete any processed records for the files.
Delete v2 allowances	Datamigration > Delete v2 allowances	Used as part of the clear down process to remove the V2 Allowances File and delete any processed records for that file.
Delete v2 alternateteams	Datamigration > Delete v2 alternateteams	Used as part of the clear down process to remove the V2 Recommended Teams and delete any processed records for that file.
Delete v2 areaassignments	Datamigration > Delete v2 areaassignments	Used as part of the clear down process to remove the V2 Employee Team Area Assignments File and delete any processed records for that file.

3.4. Authorised User / Super User Access

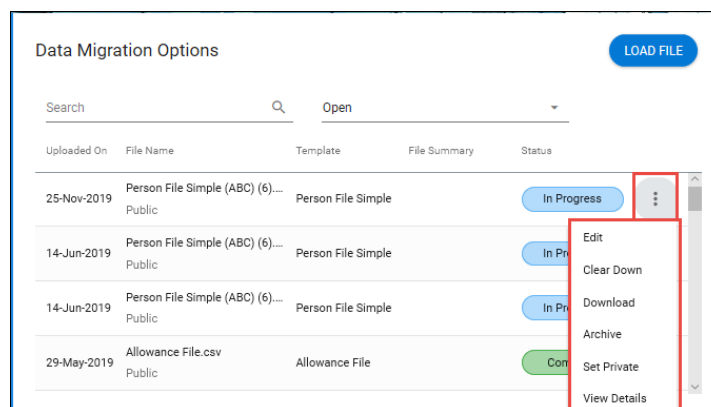

The following CorePortal menu options grant access to options available on the More Options  menu on the Data Migration Options Widget:

Note:

Consider reserving the following access for *System Administrators/Super Users*.

Data Migration v28: Configuring the Data Migration Tool

Menu Option	Description	What Does it Control?
Data Migration - Download Archived	Data Migration - Download Archived	This allows a user to download an archived file. If it is not active - you won't be able to see the download archived button on the ellipsis.
Data Migration - Unarchive	Data Migration - Unarchive	This allows a user to unarchive a file. If it is not active - you won't be able to see the unarchive button on the ellipsis.
Data Migration - View/Manage Private	Data Migration - View/Manage Private	This allows a user to see all private files (i.e. files they have not uploaded themselves or are in a state of public) - it also grants them the ability to mark files they have not uploaded as public/private.
