1. Overview

The 'Document and Email Generation' feature on CoreHR allows a user to automatically generate documents / letters / emails based on employee data e.g. employee contracts, letters of offer, hr forms etc.

This feature is primarily available to users in HR Admin and Recruitment Admin.

Pre-configured templates are created and stored centrally on the system. A user can generate a version of this document (MS Word or PDF) which may be populated automatically using data held for employees in HR Admin and applicants & interview panel members in Recruitment. It is possible to generate an individual document per record, or multiple versions of the same document for multiple records. Once a document has been generated, there is an option for this to be automatically stored on the system against an employee's record, for future reference.

The main users of this feature will be:

- **HR Administrator**
 - Create and manage document and email templates
 - Generate documents and emails in HR Admin
 - Upload documents to employee records
- **Recruitment Administrator**
 - Create and manage document and email templates
 - Generate documents and emails in Recruitment Admin
 - Upload documents to applicant records
- **Manager**
 - Generate documents for an employee (if designated access to)
 - Review documents for employees on their team
- **Employee**
 - Review documents stored against their record

The purpose of this guide is to provide guidance on:

- Key concepts & terminology associated with this feature
- How to create and manage templates on CoreHR
- How to generate and review a document or email for one or many records
- How to configure CoreHR to enable the feature for the various users who will require access

1.1. Key Concepts

1.1.1. Document

A 'document' refers to a file (MS Word or PDF) that can be generated from CoreHR by merging employee data into templates that have been stored on the system. These may be used to create employee contracts, pre-populated HR forms, applicant correspondence etc.

Documents that have been generated on CoreHR may be downloaded by the user to further amend and print, as required.

Documents may also be automatically stored against an employee's record on their Employee Profile screen, as part of the document generation.

A user may also upload a document to the Employee Profile, independent of generation process e.g. uploading a copy of a passport.

1.1.2. Email

System generated emails can be produced and sent automatically from CoreHR to an employee or an applicant. Emails are typically used to support the recruitment process e.g. to send an invitation for interview to a candidate. However, these may also be generated to employees within HR Admin.

1.1.3. Template

Templates can be stored on the system to support the production of both documents and emails.

- *Document Templates:* These are created using MS Word mail merge functionality and uploaded to CoreHR
- *Email Templates:* These are created and maintained directly on CoreHR

1.1.4. Template Group

Templates (document or email) may be grouped into various categories e.g. Contracts, Recruitment, Salary etc. This is an optional grouping and does not need to be used for all or any templates.

1.1.5. Document Type

This is used to group documents that have been generated on the system or uploaded independently to an employee's or applicant's record. This is an important setting for controlling the visibility of and access to documents for HR and Recruitment Admins as well as Employees and Managers

1.1.6. Data Source

Standard mail merge functionality employs the use of 'Data Sources' which are essentially temporary files pre-populated with the record data that will become merged into a document or email template.

In this feature, each screen in HR Admin or Recruitment Admin from which a document / email can be generated from, is linked to a specified data source (or data sources). This data source is a set of employee / applicant / contract / record fields which will be mapped to a template.

Templates are configured, mapped to these fields. When a document or email is generated, a temporary file (not available to the user) will become populated with data for corresponding record(s). This will then update the mappings in the generated document / email.

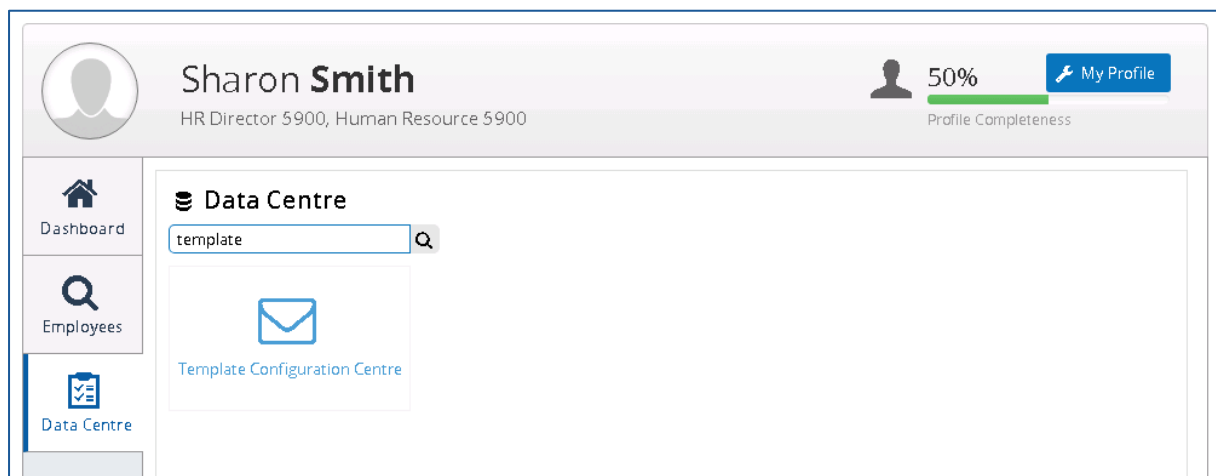

2. How to Use

2.1. Template Configuration Centre

The 'Template Configuration Centre' provides the facility to create and manage all document and email templates that will be used as part of the document and email generation process, throughout CoreHR.

To access the 'Template Configuration Centre':

- Go to the **HR Admin Dashboard**
- Select the **Data Centre** tab
- Search using the keyword "template"

- Click to open the 'Template Configuration Centre'

The Template Configuration Centre includes four main sections:

- Templates
- Template Groups
- CoreHR Documents
- Email From Configuration

Access to some of these sections is controlled by user security. Therefore a user will only see the options to which they have been granted access to. Please see Section [3.7 Menu Options](#) for further details.

2.1.1. Templates

This screen lists all of the existing document and email templates that are currently set up on the system. It also provides the ability to add new and update existing templates.

Template Configuration Centre				
Templates	Data Source Config	Template Groups	CoreHr Documents	Email From Configuration
Enter search text...			+ Document Template	+ Email
Template Name	Template Type	Available on Screen	Modified By	
Interview Schedule Int Not Restricted	Email	Interview Panel	07/Jun/17 Sharon Looney	...
Interview Schedule Int Not Restricted	Document Workflow Templates	Interview Panel Scheduling	07-oct-2013	...
Interviewer Schedule Not Restricted	Document Workflow Templates	Applicant Interview Scheduling	16-aug-2013	...
Maternity - 1 - Retail - Informed Not Restricted	Document Letter Documents	Employee Dashboard	30-jan-2017	...
Maternity - 2 - Entitled - Nol - Jers Not Restricted	Document Letter Documents	Employee Dashboard	30-jan-2017	...
Maternity - 2 - Entitled - Nol - Uk Not Restricted	Document Letter Documents	Employee Dashboard	30-jan-2017	...
Maternity - 2 - Nol - Iom Guer Not Restricted	Document Letter Documents	Employee Dashboard	30-jan-2017	...

Summary level details for each template are displayed including:

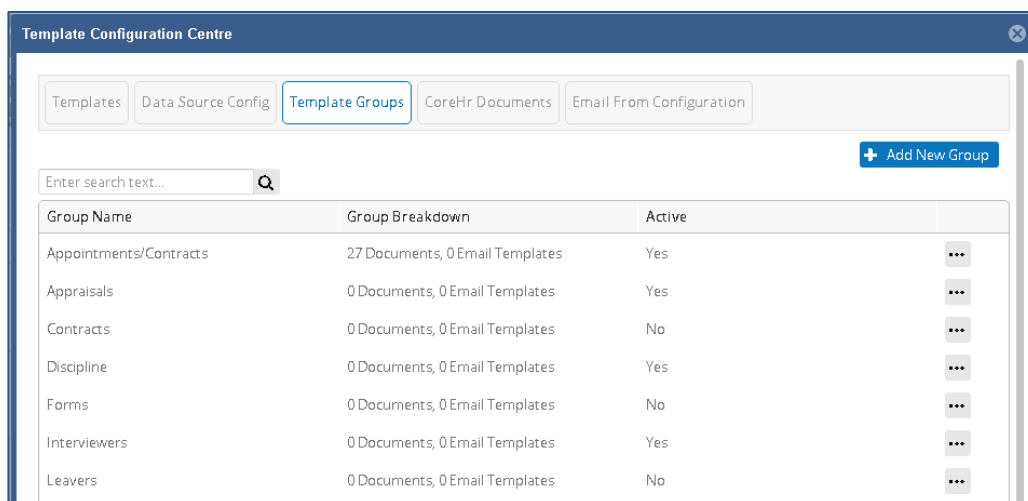

Column	Description
Template Name	The description given to the template and whether access to the template has been restricted
Template Type	Indicates if this is an 'Email' or a 'Document' template and displays the 'Template Group' that it has been linked to (may be blank as Template Group is an optional setting)
Available on Screen	The CoreHR screen that the template will be generated from
Modified By	The date that the template was created or last edited and name of the user that completed that action

The search option can be used to search for a template using keywords from any of the columns displayed on screen i.e. name, template type, screen, modified by.

The  button provides the ability to review and manage the configuration of each individual template e.g. to edit, delete or restrict access.

2.1.2. Template Groups

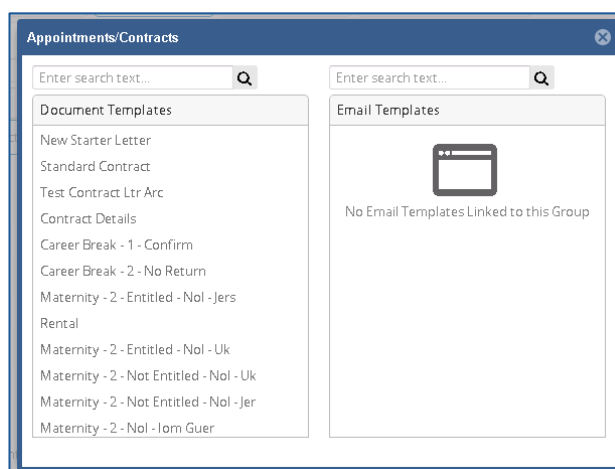

This screen lists all of the Template Groups that are currently setup on CoreHR. From here it is possible to add new or edit existing Template Groups.

Summary details displayed for each Template Group include:

Column	Description
Group Name	The description given to the Template Group
Group Breakdown	The number of document and email templates that have been linked to the Template Group
Active	Whether the Template Group is currently available for selection when creating/editing a Template

The  button provides an option to view a breakdown of the Document and Email Templates that have been linked to the Template Group.

Please Note: Template Group is an optional field when creating a Template so use of this screen is also optional.

2.1.3. CoreHR Documents

This screen allows the user to create new and manage all existing Document Types on CoreHR. In order for a generated document to be automatically saved to an employee's or applicant's record, the Document Template must be linked to a Document Type. That Document Type is then configured to link to the employee's record at either a person or contract level. Documents may also be independently uploaded to an employee's record on the Employee Profile screen and will always be linked to a Document Type as part of that process.

Document Name	Document Type	Available To Employee	Available To Manager	Active	
Appraisal Details	Person	Yes	Yes	Yes	...
Company Policy Document	Person	Yes	Yes	Yes	...
Competition Applicant Document	Contract	No	No	Yes	...
Contract Details 🔗 Linked to Templates (3)	Contract	Yes	Yes	Yes	...
Disciplinary Details	Person	Yes	Yes	Yes	...
General Documents 🔗 Linked to Templates (5)	Person	Yes	Yes	No	...
Health & Safety Documents	Person	Yes	Yes	Yes	...
Health & Safety Documents - Copy	Person	Yes	Yes	Yes	...
Health And Safety	Person	No	No	Yes	...
Health And Safety Documents	Person	No	No	Yes	...
Letter Documents 🔗 Linked to Templates (46)	Person	Yes	Yes	Yes	...

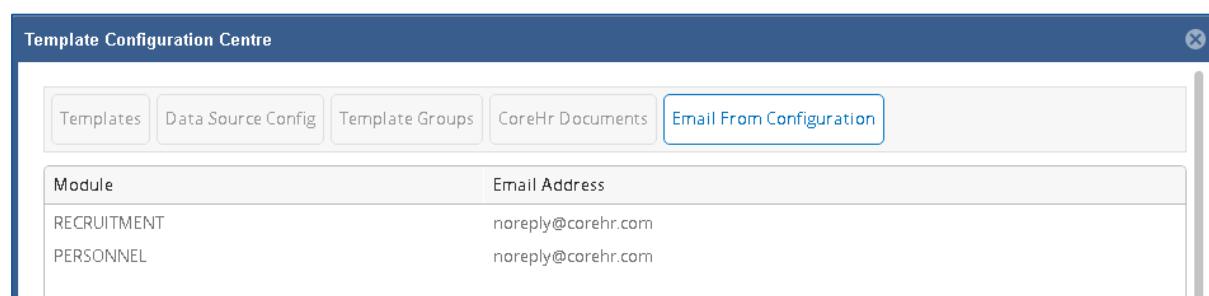

Summary details for all Document Types are displayed included:

Column	Description
Document Name	This includes a reference to how many templates are currently linked to the Document Type
Document Type	Whether documents of this type will be associated against the employee at a 'Person' or individual 'Contract' level
Available to Employee	Documents of this type will be available to the employee to view on their 'Employee Profile' screen

Available to Manager	Documents of this type will be available to the employee's manager to view on their employees' 'Employee Profile' screen (via the My Team widget)
Active	Indicates if the Document Type is currently active and available for selection on the 'Document Template' or 'Employee Profile' screens.

2.1.4. Email From Configuration

This screen is used to record the email addresses that will be used as the default 'sent from' email address, used for all system generated emails i.e. any emails generated using this feature in HR Admin will be sent from 'noreply@corehr.com'.

The screenshot shows the 'Template Configuration Centre' window. It has a navigation bar with tabs: 'Templates', 'Data Source Config', 'Template Groups', 'CoreHr Documents', and 'Email From Configuration' (which is selected). Below the tabs is a table with two columns: 'Module' and 'Email Address'.

Module	Email Address
RECRUITMENT	noreply@corehr.com
PERSONNEL	noreply@corehr.com

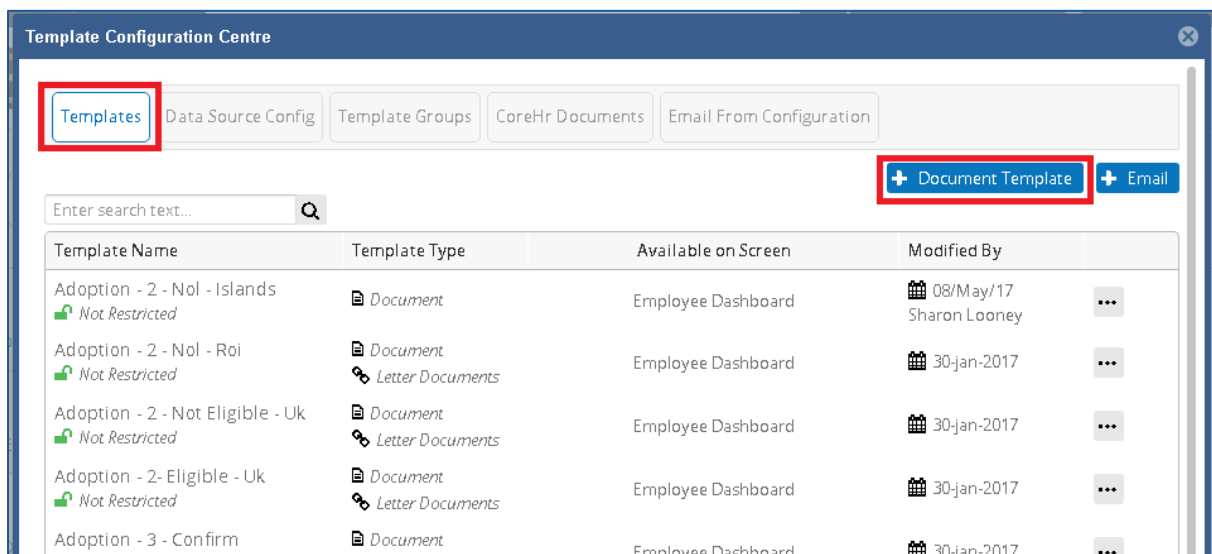

It is possible to configure different addresses for emails generated from HR Admin and Recruitment Admin. Please see [3.4 Email From Address](#) for details on how to configure these addresses.

2.2. Managing Document Templates

2.2.1. Create Template

To create a new Document Template

- Go to **CorePortal > HR Admin Dashboard**.
- Select the **Data Centre** tab.
- Search for 'Template Configuration Centre' and click the icon that appears. The 'Template Configuration Centre' will open in a new window.
- On the Template screen, click on the **+ Document Template** button

- The 'Create Document Template' screen will appear in a new window

What do you want to call this Template *

What screen will this email be called from *

Download document merge fields

Upload your document template *

Do you want to attach this template to a group?

Document Generation Options

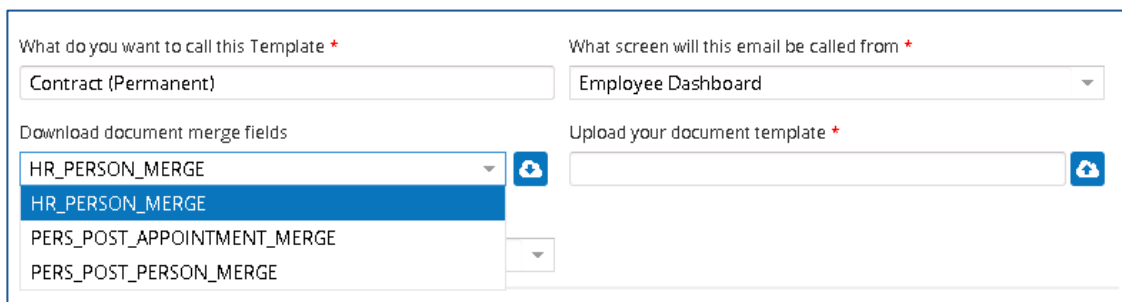

Enable upload to CoreHr document management

Change default document type generated

Save

Update all of the fields as required to create a new template:

- **What do you want to call this template?**
 - This is the title for the template that will appear to a user when they wish to generate a version of the document from HR Admin or Recruitment Admin e.g. "Contract (Permanent)".
- **What screen will this email be called from?**
 - This drop down list provides a selection of all screens on CoreHR from which a document can be generated.
- **Download document merge fields.**
 - This drop down list will display a selection of data sources, dependant on the screen selected in the previous step e.g. if 'Employee Dashboard' is selected, only HR_PERSON_MERGE, PERS_POST_APPOINTMENT_MERGE and PERS_POST_PERSON_MERGE may be selected.
 - Please see [4.1 Screens & Data Sources](#) for a full list of all data sources available per CoreHR screen.

The screenshot shows a web form for creating a new template. It has four main sections: 1. 'What do you want to call this Template *' with a text input field containing 'Contract (Permanent)'. 2. 'What screen will this email be called from *' with a dropdown menu showing 'Employee Dashboard'. 3. 'Download document merge fields' with a dropdown menu showing 'HR_PERSON_MERGE', 'PERS_POST_APPOINTMENT_MERGE', and 'PERS_POST_PERSON_MERGE'. The 'HR_PERSON_MERGE' option is highlighted. To the right of this dropdown is a blue cloud icon with a download arrow. 4. 'Upload your document template *' with a text input field and a blue cloud icon with an upload arrow.

- **Create document merge file**
 - At this point it is required to create the actual MS Word mail merge template that will be uploaded to the system.
 - To do this, click on the  button to download a version of the data source and use this to create the mail merge template in MS Word. This will download in your browser as a file called "persdata.txt" which can be imported into MS Word as a data set to be used when configuring the document template.
 - See details here in [4.2 MS Word Mail Merge](#) for steps on how to create a mail merge template in MS Word using this file.

- **Upload your document template**

- Click on the  button to browse for the MS Word template file and upload this to CoreHR.

- **Do you want to attach this template to a group?**

- This is an optional setting.
- This drop down list displays a selection of all Template Groups that are currently set up and active on CoreHR. Select an item from the list available if you wish to group Document Templates into overall categories e.g. linking the “Contract (Permanent)” document to a “Contracts” template group. This is a useful setting to help manage large volumes on document templates on the system.

- **Enable upload to CoreHR Document Management?**

- This is an optional setting.
- In order for a document to automatically save to the employee’s or applicant’s record once it has generated, this option must be enabled. If this is not enabled, the generated document will only be available in the [Download Centre](#) and will not automatically save to the employee’s record.
- If this option is enabled:
 - A new drop down list will appear with a selection of all ‘Document Types’ that are currently set up and active on the system.
 - Select the ‘Document Type’ that is most appropriate for the template e.g. “Contract Details”.

Document Generation Options

Enable upload to CoreHr document management 

Link this document template to CoreHr Document Management, by selecting a document type. *

- **Change default document type generated.**

- This is an optional setting.
- All documents will generate as MS Word files by default.
- It is possible to edit this default setting to PDF or MS Word as preferred.

Change default document type generated

Choose the default output format when generating this document *

Word Document

Word Document

PDF

- **Please Note:** It is useful to remember that generated documents may be further edited if generated as an MS Word file. Keep this in mind if this is required for the specific template.

Once all of the required fields have been populated on this screen, click on the ✓ Save button to create the template.

A pop up screen will appear to prompt you to add 'Additional Configuration' to the template if required.

Additional Configuration

Do you wish to add user defined & allowance data to your document template?

Yes

No

This refers to data held in 'User Defined Fields' (UDFs) or 'T&C Allowances' for the employee's contract.

- Click **Yes** to configure this now.
- Click **No** to close the window and return to the Templates screen.

Please refer to section [2.2.2 Additional Configuration](#) for details on how to complete this.

The template will now appear on the 'Templates' screen.

Template Name	Template Type	Available on Screen	Modified By
Contract (Permanent) Not Restricted	Document Contract Details	Employee Search	07/Jun/17 Sharon Smith

2.2.2. Additional Configuration

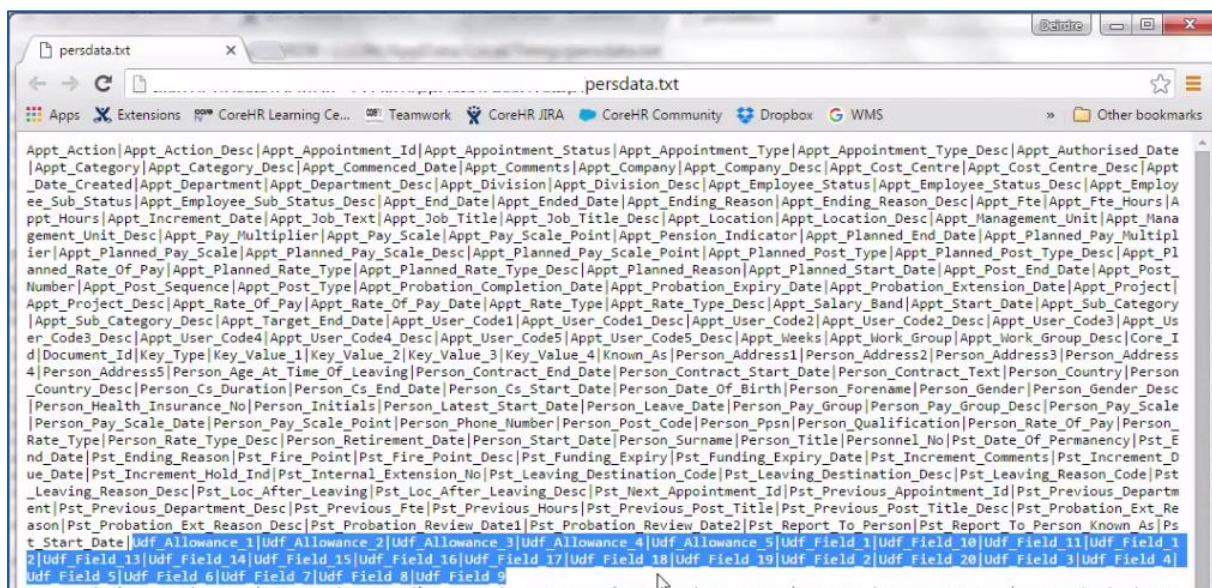

The 'Additional Configuration' feature provides the ability to include 'UDF' and 'T&C Allowance' data related to an employee or their contract in a document that is generated from CoreHR. This is useful to allow for the inclusion of data held for employees in customised 'UDFs' i.e. the items listed under the 'Other Information' section of the Employee Profile. These are specific to each implementation of CoreHR, therefore these need to be configured and mapped individually per template, as they are not picked up by default in the data source.

Please note: This is an optional configuration feature and does not need to be configured for all templates.

This feature is only available to templates that are configured using the following 4 data sources:

- HR_PERSON_MERGE
- PERS_POST_PERSON_MERGE
- PERS_POST_APPOINTMENT_MERGE
- PERS_RECRUIT_APPLICANT_MERGE

When the data source file ('persdata.txt') is downloaded as part of the template creation, note that the file contains fields specifically for UDFs and Allowances

These will appear at the very end of the data source in the following format:

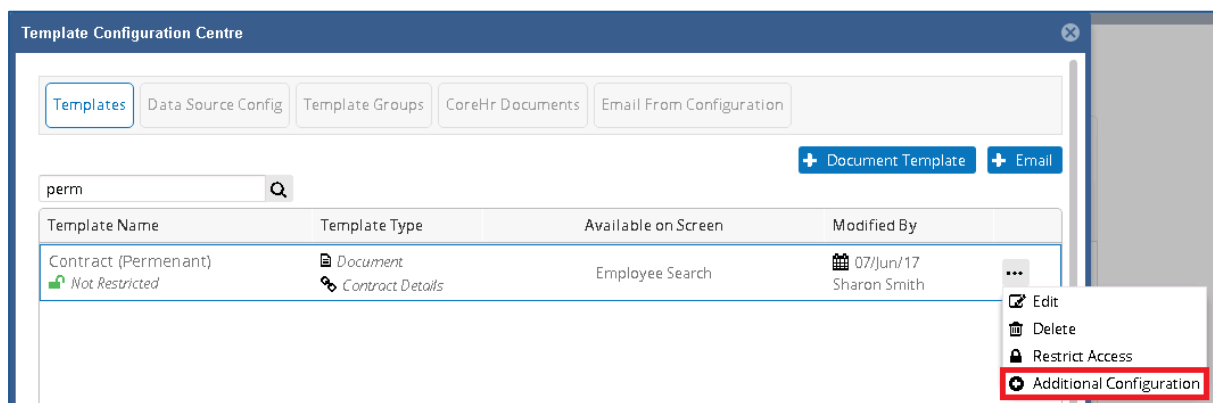

- Udf_Allowance_1..... Udf_Allowance_5
- Udf_Field_1..... Udf_Field_20

As such, there is capacity to include 20 UDF items and 5 allowances, per template.

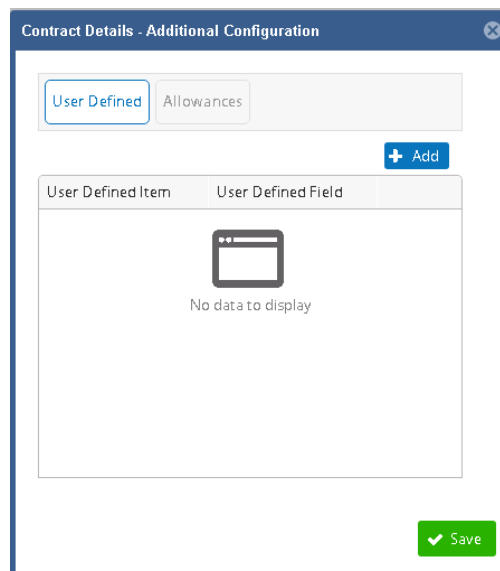

To add UDF items to the document template, it is required to create a mapping of the UDF item to be included to the actual merge field in the data source. To do this:

- Go to **CorePortal > HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Search for the template required e.g. by template name.
- Click the **...** button and select the **Additional Configuration** option

Please Note: This may also be initiated as the very last step when saving a new document template, as referenced earlier in this manual.

- The 'Additional Configuration' screen will open in a new window:

- To map to a UDF:
 - Ensure the **User Defined** option is selected at the top of the screen.
 - Click on the **+ Add** button.
 - A new row will appear on screen.
 - Select the 'User Defined Item' to be used from the drop down list.

Contract Details - Additional Configuration

User Defined Allowances

+ Add

User Defined Item	User Defined Field
Certificate of Sponsorship	
Clinical Registration	
Company Equipment	
Contract-Salary	
History	
DBS Checks	
Guernsey Payroll	
Data	
IPOS Security	
Isle of Man Payroll	
Data	

Save

- Once selected, the 'User Defined Field' list will be available and will include a selection of only the configured fields for the chosen UDF i.e. if the 'Company Equipment' option is selected, only the items configured for that UDF will appear e.g. Date From, Date To, Text 1, Text 2, Text 3 and Text 4.

Contract Details - Additional Configuration

User Defined Allowances

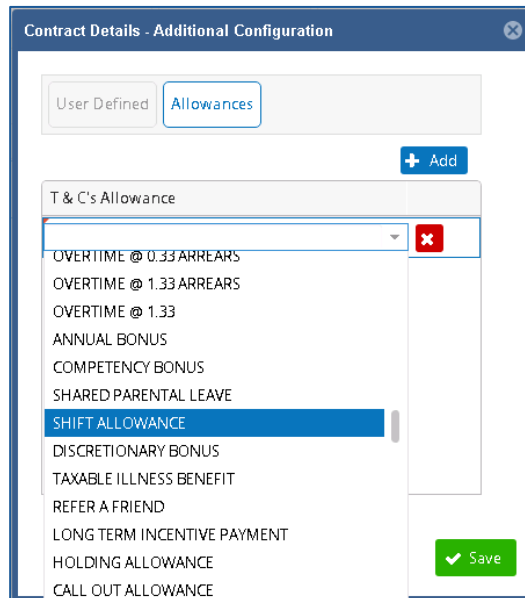

+ Add

User Defined Item	User Defined Field
Company Equipment	Date From Date To Text 1 Text 2 Text 3 Text 4

Save

- Select the required field e.g. Text 1. In this example, the data held in the first field for the 'Company Equipment' UDF will now be included in the document generation data source.
- Repeat the steps above for up to 20 items. The template can include a variety of User Defined items, as required.

- To map to T&C Allowance:
 - Ensure the **Allowances** option is selected at the top of the screen.
 - Click on the **+ Add** button.
 - A new row will appear on screen.
 - The T&C's Allowance list will be available and will include a list of all available Allowance Codes on the system.

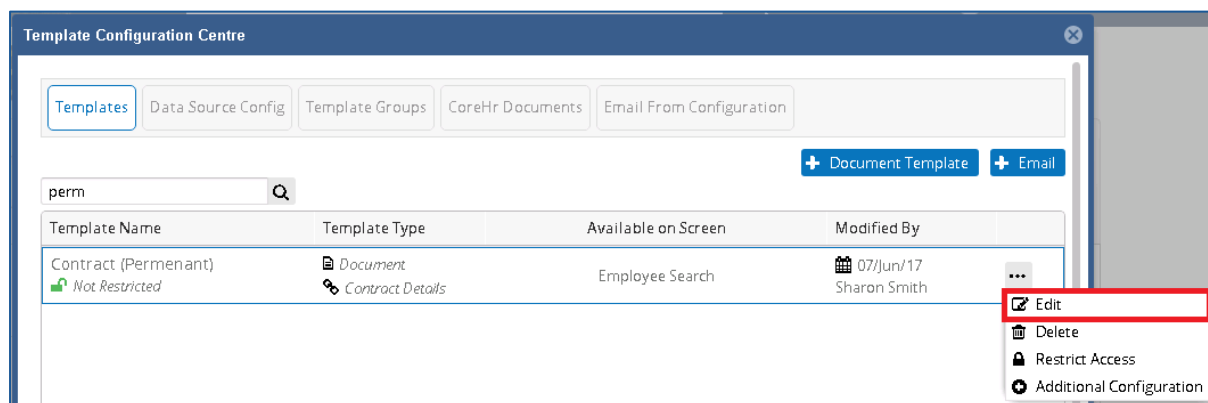

- Select the required allowance e.g. Shift Allowance.
 - Repeat the above steps for up to 5 Allowance Codes.
 - Please note: When generating the document for an employee, the Allowance description will only be included on the document for the employee if that allowance is currently included on the T&Cs linked to the employee's contract. If that Allowance is not active and listed on their HR Salary record, it will not appear when generating a document for them.
- Click the  button to complete the mapping.

Now every time the data source is generated for that letter template, the UDF and allowance merge fields will be populated as per the mapping specified.

2.2.3. Edit Template

To edit an existing Document Template:

- Go to **CorePortal > HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Search for the template required e.g. by template name.
- Click the **...** button and select the **Edit** option.

- The 'Edit Document Template' screen will appear in a new window.

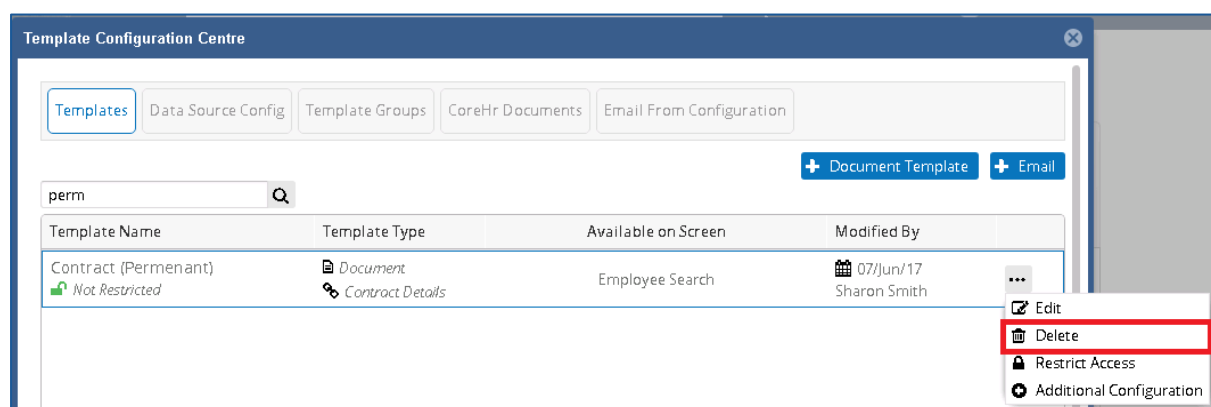

- Edit any of the document template fields as required. All fields on screen are editable.
- **Please Note:** If changing the screen or data source, it will be required to download the new data source file and update the MS Word mail merge template file to use this new data set.

Click on the  button to save changes to the template.

2.2.4. Delete Template

To edit an existing 'Document Template':

- Go to **CorePortal > HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Search for the template required e.g. by template name.
- Click the  button and select the **Delete** option.

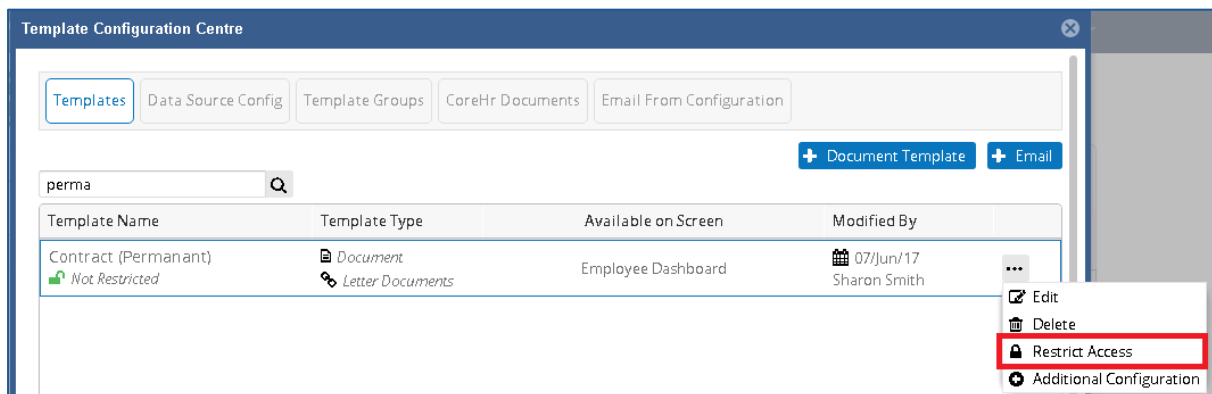

- Please Note: The template will be deleted immediately without a further validation checkpoint so please exercise caution when using this option.

2.2.5. Restrict Access

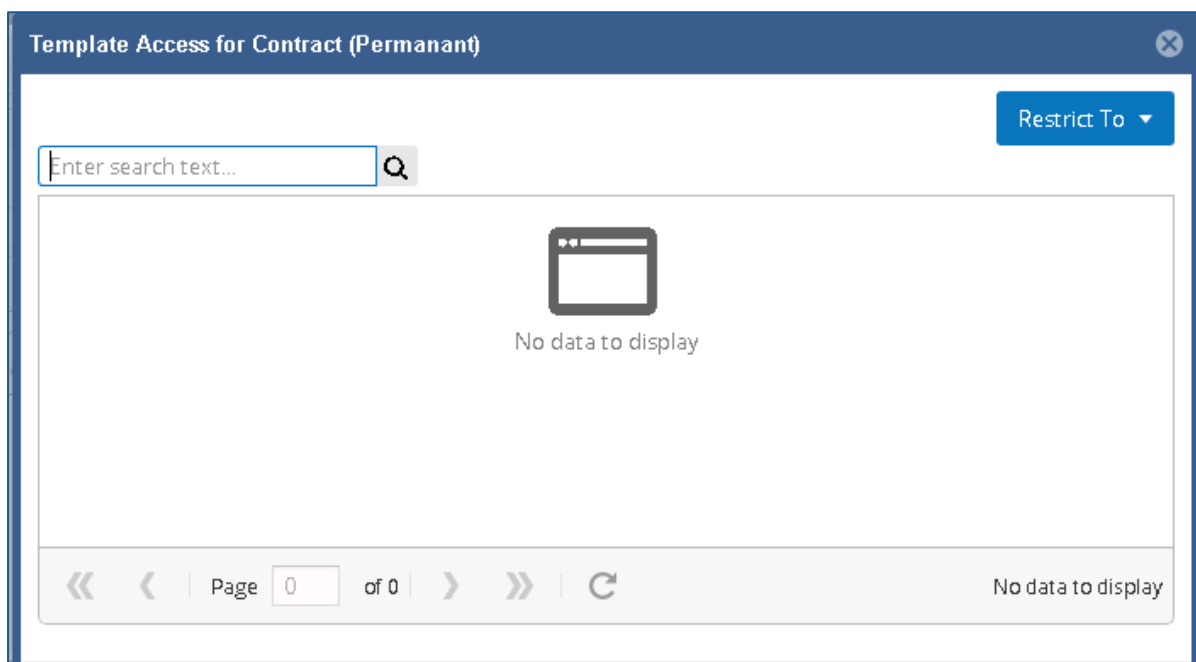

This feature allows for access to a document template to be restricted to a group of specified users, based on an organisational unit or other logical grouping. If access is restricted, the template will only appear for selection to the nominated users, when generating a document in HR Admin or Recruit Admin. If a user has not been given access, they will not see that template listed when selecting a template to generate. The template will be available to view in the Template Configuration Centre and will be flagged as restricted.

To restrict access to a template:

- Go to **CorePortal > HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Search for the template required e.g. by template name.
- Click the **...** button and select the **Restrict Access** option.

- The 'Template Access' screen will open in a new window:

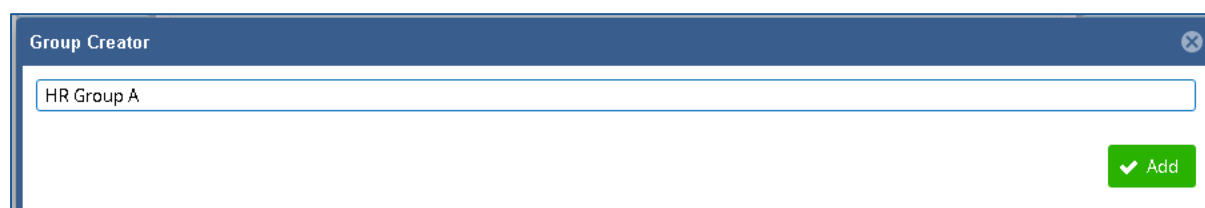

To restrict access to a group of users:

- Click on the **Restrict To** button.
- Click on the **Criteria Group** option to open the 'Criteria Group' screen.

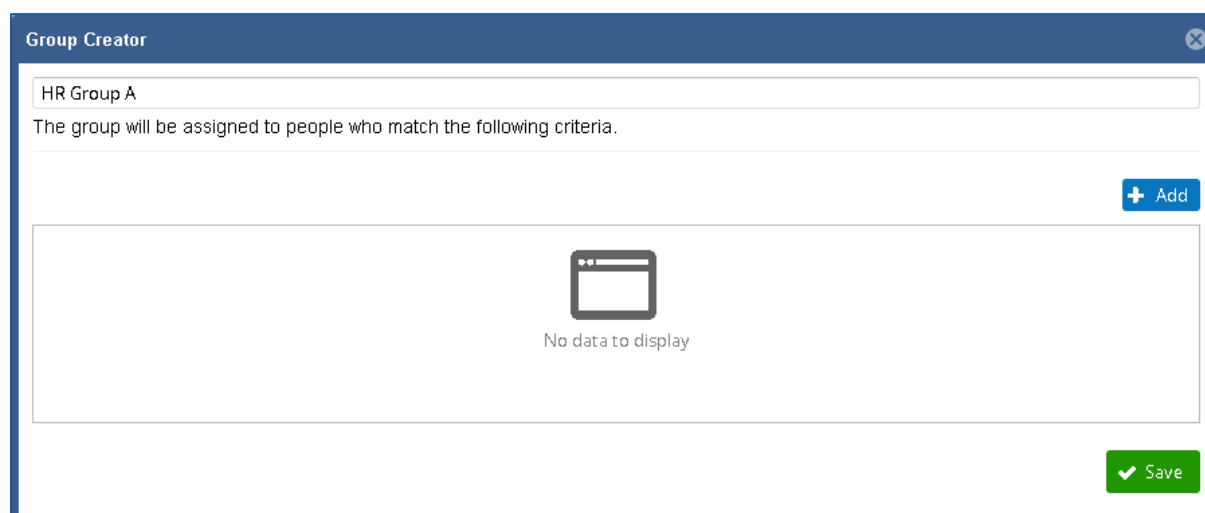

The 'Criteria Group' window has a dark blue header with a close button. Below the header, it says 'Select a group to assign'. On the right is a blue '+ Add Group' button. Below this is a search bar with the placeholder 'Enter search text...' and a magnifying glass icon. Underneath is a table with two columns: 'Description' and 'Activate'. The table is currently empty. At the bottom right is a green 'Save' button with a checkmark icon.

- Click the **+ Add Group** button to open the 'Group Creator' window.

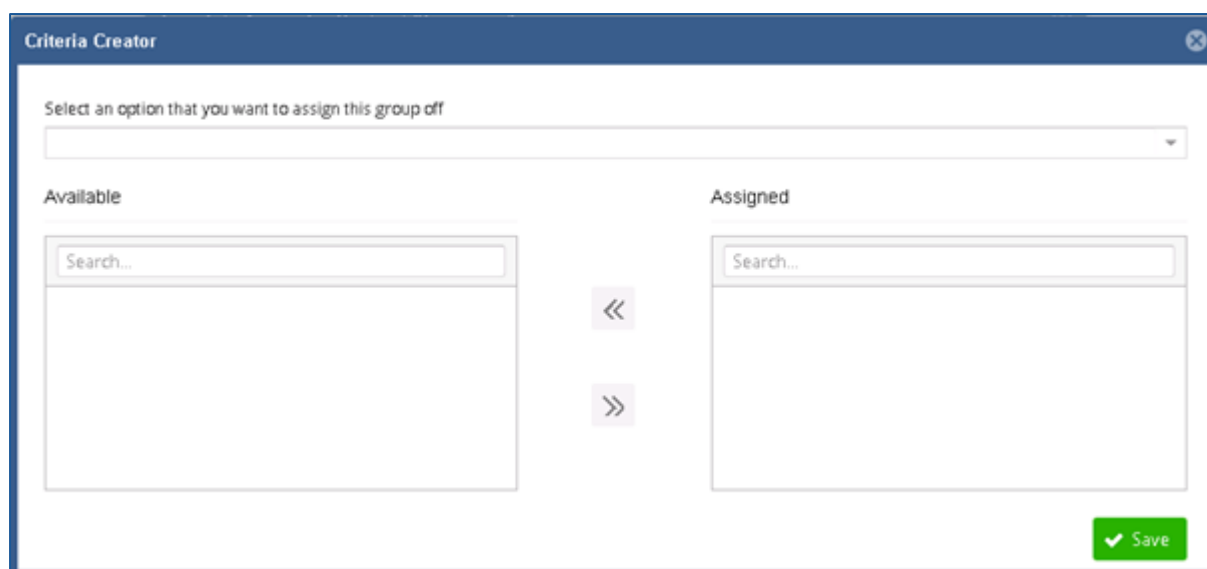

The 'Group Creator' window has a dark blue header with a close button. Below the header is a text input field containing 'HR Group A'. At the bottom right is a green 'Add' button with a checkmark icon.

- Enter a description for the group and click on the **Add** button.
- The 'Group Creator' screen will expand to include an option to add a group.

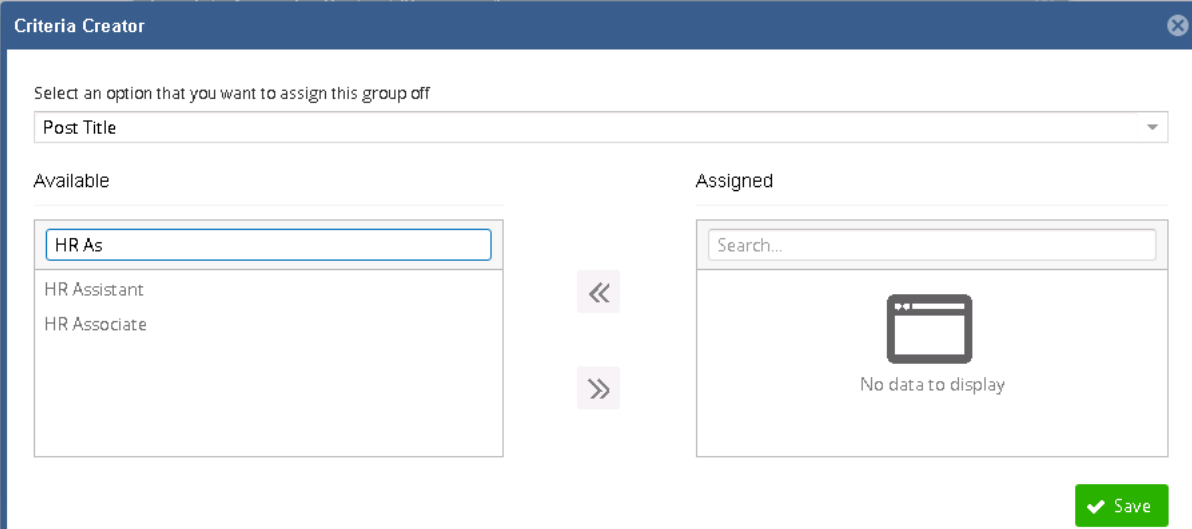

The expanded 'Group Creator' window has a dark blue header with a close button. Below the header is a text input field containing 'HR Group A'. Below this is the text 'The group will be assigned to people who match the following criteria.' To the right is a blue '+ Add' button. Below this is a large empty box with a placeholder icon of a document and the text 'No data to display'. At the bottom right is a green 'Save' button with a checkmark icon.

- Click on the **+ Add** button to open the 'Criteria Creator' screen in a new window

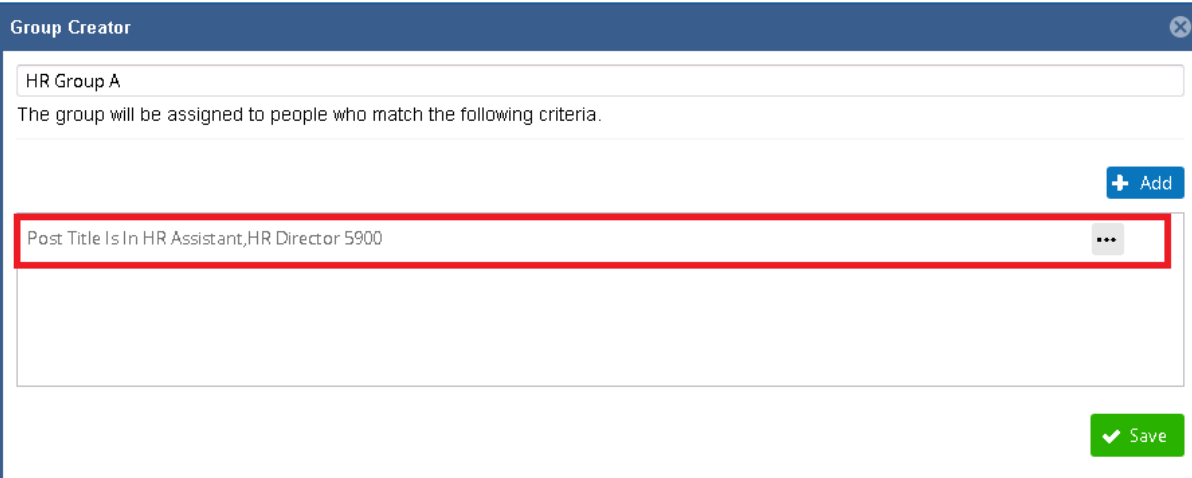

- Use the drop down list to select the group that you wish to restrict access based on. The options available on this list include
 - Company
 - Division
 - Management Unit
 - Department
 - Cost Centre
 - Location
 - Work Group
 - User Field 1, User Field 2, User Field 3, User Field 4, User Field 5
 - Post Title
 - Category
 - Sub Category
 - Post Title
 - Status
 - Sub Status
 - Job Category
 - Grade
 - Country
 - Reason Code
- Once selected, the 'Available' panel will be updated to include the system data associated with that option e.g. if 'Post Title' is selected, the panel will display a list of all 'Post Titles' on the system.
- Use the search box if required to search the desired item e.g. "HR Assistant".

The 'Criteria Creator' window has a title bar with a close button. Below the title bar, it says 'Select an option that you want to assign this group off'. There is a dropdown menu currently showing 'Post Title'. Below this, there are two panels: 'Available' and 'Assigned'. The 'Available' panel contains a list with 'HR As' selected, and below it, 'HR Assistant' and 'HR Associate'. The 'Assigned' panel has a search bar and a message 'No data to display' with a computer icon. Between the panels are two arrow buttons: a double left arrow and a double right arrow. At the bottom right of the window is a green 'Save' button with a checkmark icon.

- Click on the item to highlight it and use the  button to add this to the 'Assigned' panel.
- Add as many items from the available list as required.
- Click on the  button to create the group. The group will now appear in summary on the 'Group Creator' screen. It is possible to add further sets of users to the same group by selecting the **+ Add** button and repeating the steps outline above.

The 'Group Creator' window has a title bar with a close button. Below the title bar, there is a text input field containing 'HR Group A'. Below this, it says 'The group will be assigned to people who match the following criteria.' There is a '+ Add' button on the right. Below this, there is a list of criteria. The first criterion is 'Post Title Is In HR Assistant,HR Director 5900', which is highlighted with a red border. To the right of this criterion is a three-dot menu button. At the bottom right of the window is a green 'Save' button with a checkmark icon.

- The  button provides the ability to edit the group criteria (returning to the 'Group Creator' screen) or delete the group criteria.
- Click on the  button to complete the creation of that group and return to the 'Criteria Group' screen.

- On the 'Criteria Group' screen, ensure the **Activate** indicator is enabled for each group as required.

SS Sharon Smith 59009 46 Hr Director 5900 59000 4-1 Human Resource 5900

Page 2 of 2 Displaying 10 - 10 of 10

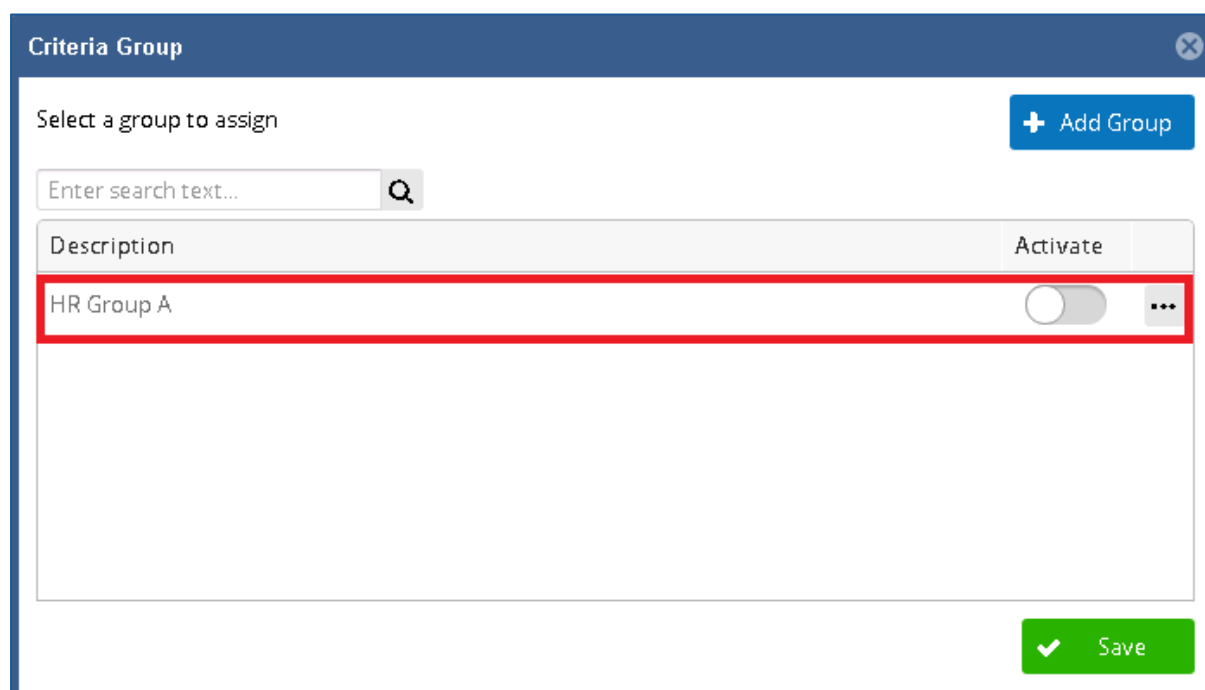

The screen will display a list of all users that have been identified by the system as a member of the groupings created. This may include 1 or many users.

When the template is searched for in the 'Template Configuration Centre', the template will now include the 'Restricted' indicator beneath the template name.

In order to review and manage and further access requirements for that grouping, click on the  button and select the **Restrict Access** option.

To remove all restrictions, deactivate or delete the groups on the Criteria Group screen:

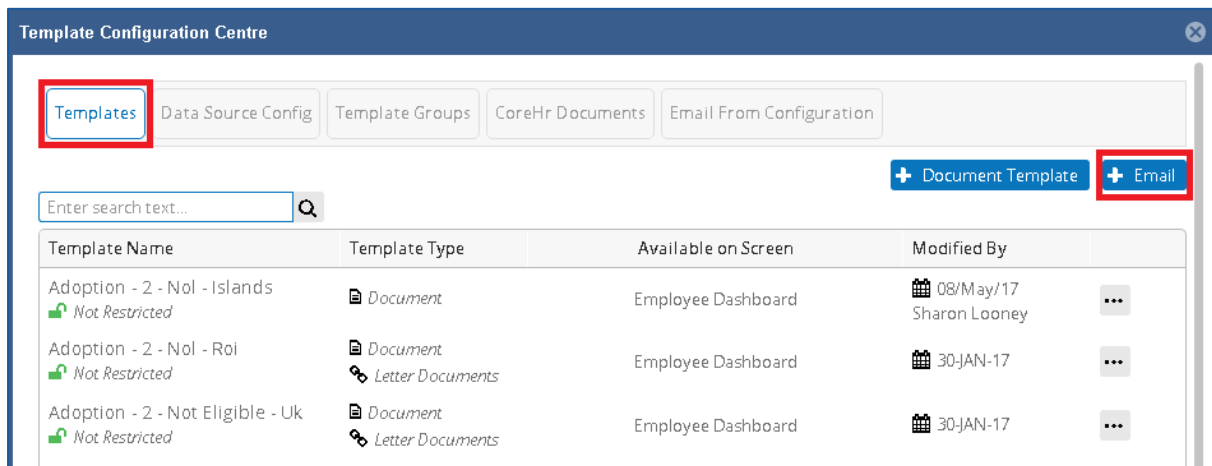

2.3. Managing Email Template

2.3.1. Create Template

To create a new 'Email Template':

- Go to **CorePortal > HR Admin Dashboard**.
- Select the **Data Centre** tab.
- Search for 'Template Configuration Centre' and click the icon that appears. The 'Template Configuration Centre' will open in a new window.
- On the Template screen, click on the **+ Email** button.

- The 'Create Email Template' screen will open in a new window.

What do you want to call this Email *

Update all of the fields as required to create a new template:

- **What do you want to call this email?**
 - This is the title for the template that will appear to a user when they wish to generate a version of the email from HR Admin or Recruitment Admin e.g. "Applicant Invite to Interview".
- **What screen will this email be called from?**
 - This drop down list provides a selection of all screens on CoreHR from which an email can be generated.
- **Do you want to attach this template to a group?**
 - This is an optional setting.
 - This drop down list displays a selection of all Template Groups that are currently set up and active on CoreHR. Select an item from the list available if you wish to group .Email Templates. into overall categories e.g. linking the "Applicant Invite to Interview" template to a "Recruitment" template group. This is a useful setting to help manage large volumes on document templates on the system.
- **Data View Source**
 - This will be automatically populated based on the screen selected. For most screens there is only 1 applicable data source. The exception to this is the "Employee Dashboard" screen which if selected will provide a drop down list of 3 choices: HR_PERSON_MERGE; PERS_POST_APPOINTMENT_MERGE; PERS_POST_PERSON_MERGE.
 - Once this field is populated, the 'Selected Field' panel to the right of the screen will now display a list of all of the merge fields available to use for that data source.

- RECRUITMENT ID

1999 Characters Remaining

Do you want to attach a calendar invitation when email is sent? ☐

- **Subject**

- This is the subject text that will appear for the generated email.
- Enter the required text.
- To add a merge field to the subject:
 - Ensure the cursor is in the subject text box.
 - Search for a field in the 'Selected Field' panel and double click on the field name. This will automatically appear in the subject text box, wrapped in << >>.
 - When the email is generated, that merge field will be updated to include record specific data e.g. the Vacancy ID

The screenshot shows the 'Subject' field editor. On the left, a text box contains 'Invitation to Interview (<<RECRUITMENT_ID>>)'. Below it is a large empty text area. On the right, a panel titled 'Selected Field : Subject' contains a search bar with 'Enter search text...' and a magnifying glass icon. Below the search bar is a list of fields: APPLICANT NAME, APPLICANT NUMBER, APPLICANT STATUS, CORE ID, CURRENT STATUS, EMAIL ADDRESS, FURTHER INFORMATION, RATING SCORE, and RECRUITMENT ID. The 'RECRUITMENT ID' field is highlighted with a blue border. At the bottom right of the interface, it says '1999 Characters Remaining'.

- **Description**

- This is the body of the email.
- Enter the required text
- To add a merge field to the body:
 - Ensure the cursor is in the large text area.
 - Search for a field in the 'Selected Field' panel and double click on the field name. This will automatically appear in the text area, wrapped in << >>.
 - When the email is generated, all merge fields will be updated to include record specific data e.g. applicant's forename, schedule date etc.

The screenshot shows the 'Description' field editor. On the left, a text box contains 'Invitation to Interview (<<RECRUITMENT_ID>>)'. Below it is a large text area containing the following text: 'Dear <<APPLICANT_NAME>>', 'I am delighted to invite you to attend an interview for <<RECRUITMENT_ID>>.', 'Date: <<SCHEDULE_DATE1>>', 'Time: <<SCHEDULE_TIME_24H>>', '<<FURTHER_INFORMATION>>', 'Best regards', and 'Recruitment Admin'. On the right, a panel titled 'Selected Field : Body' contains a search bar with 'Enter search text...' and a magnifying glass icon. Below the search bar is a list of fields: CORE ID, CURRENT STATUS, EMAIL ADDRESS, FURTHER INFORMATION, RATING SCORE, RECRUITMENT ID, ROUND, SCHEDULE DATE1, and SCHEDULE DATE2. The 'FURTHER INFORMATION' field is highlighted with a blue border. At the bottom right of the interface, it says '1783 Characters Remaining'.

- A maximum of 2000 characters may be included. Please bear in mind that merge fields will be updated to reflect actual system data and this may require >2000 characters. This should be taken into consideration to ensure enough characters remain for the generated email.
- **Do you want to attach a calendar invitation when email is sent?**
 - An option to include a calendar invite will appear on the email template configuration only for templates created using the following screens:
 - Applicant Interview Scheduling
 - Interview Panel Scheduling
 - View Applicants
 - To include an invite:
 - Enable the indicator.
 - Update all 5 fields to map to a merge field from the selected data source.

Do you want to attach a calendar invitation when email is sent? ☐

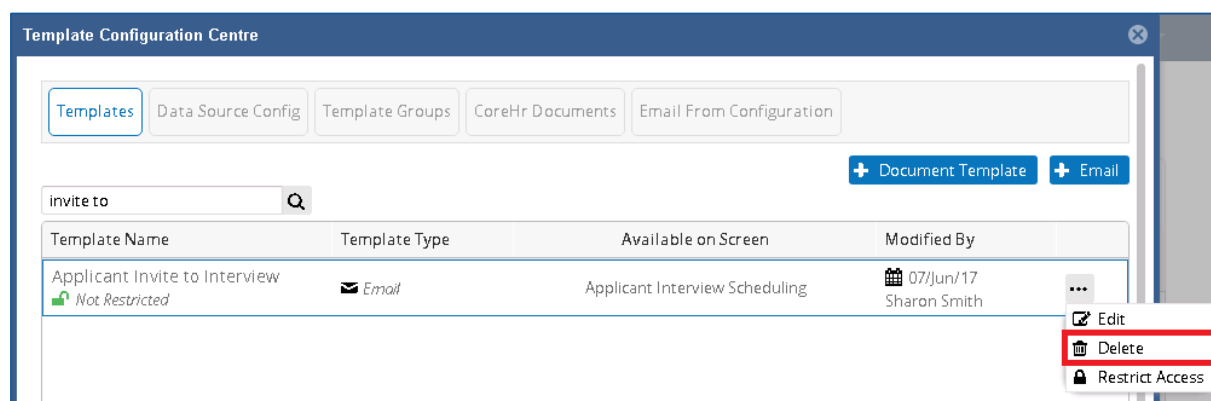

- Edit any of the document template fields as required. All fields on screen are editable.

Please Note: If changing the screen or data source, the subject and description sections will be cleared and will need to be completely rewritten. If these are cleared in error, click on the  at the top of the window to close without saving changes.

2.3.3. Delete Template

To delete an existing Document Template:

- Go to **CorePortal > HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Search for the template required e.g. by template name.
- Click the **...** button and select the **Delete** option.

- Please Note: The template will be deleted immediately without a further validation checkpoint so please exercise caution when using this option.

2.4. Where are Documents & Emails Generated?

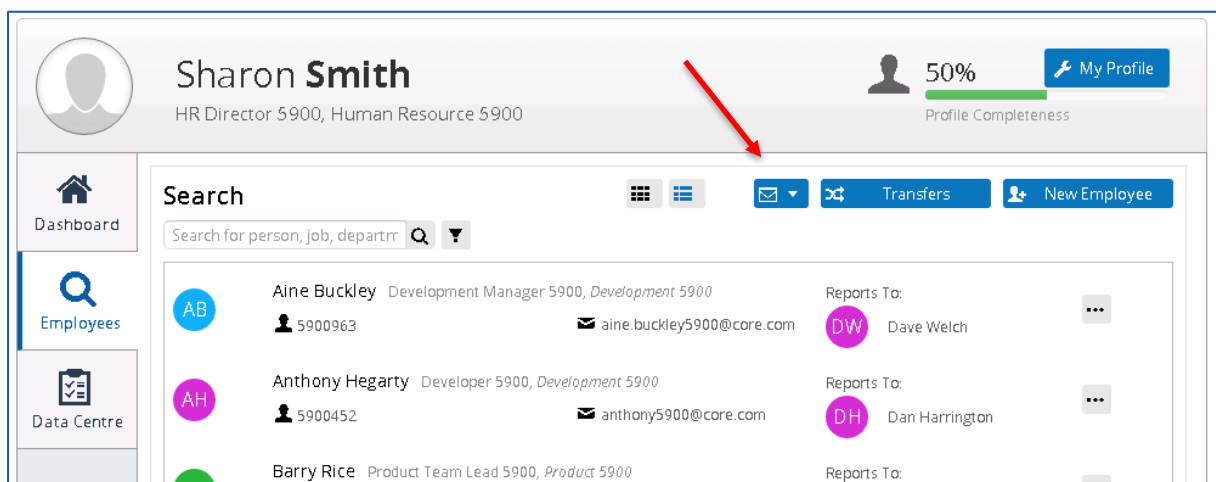

Documents and Emails can be generated from within the HR Admin and Recruitment Admin dashboards only.

Please note: Access to this functionality is based on user security and the options will not appear to a user if they have not been granted Menu Profile access to see these.

Look for the  button on the following screens, to access the functionality:

- **Employee Search**

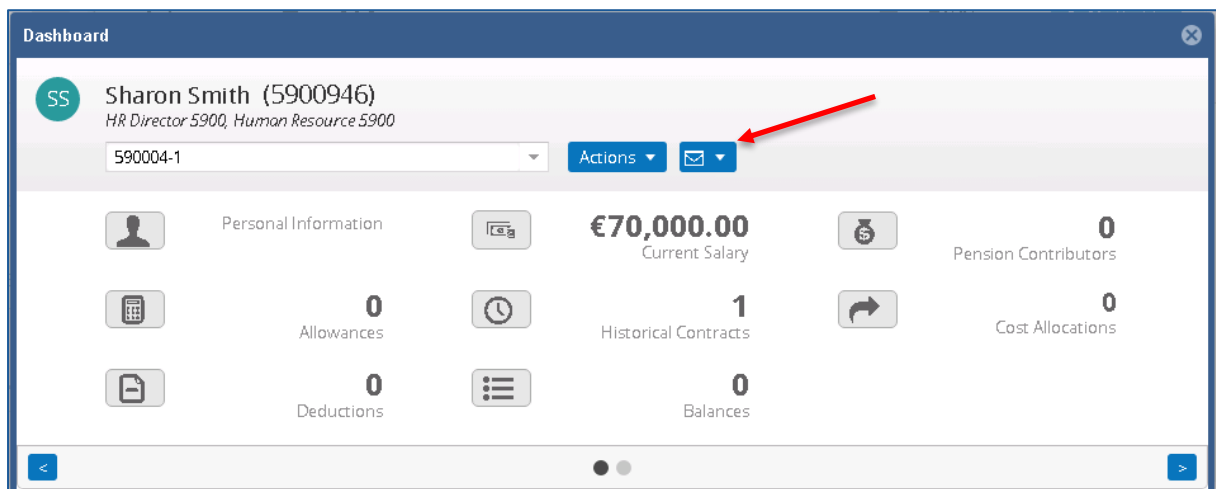

HR Admin Dashboard > Employees tab

- **Employee Dashboard**

HR Admin Dashboard > Employees > Employee Dashboard

Manager Dashboard > My Team widget > HR Dashboard

- **View Applicants**

Recruitment Admin Dashboard > Vacancies tab > View Applicants

Recruitment Admin Dashboard > Interview Panel Widget > View Applicants

2.5. Generate Document

2.5.1. Generate a Document

To generate a document

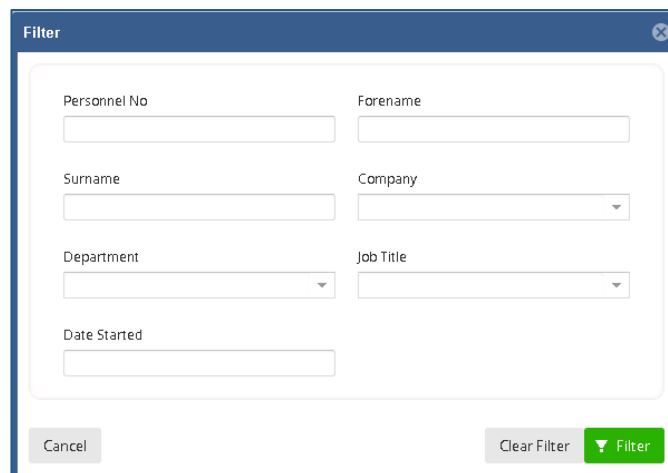

- Navigate to the required screen.
- Click on the  button and select **Generate Document**. The Generate Document screen will open in a new window.

- **Step 1: Document Template**
 - This will provide a list of all 'Document Templates' that have been linked to the chosen screen.
 - A template that has a restricted access setting will only appear on the list if the user is a member of the restricted access groups.

Please Note: Depending on the screen that the document is being generated from, the next step in the process will vary slightly. As such, **Step 2** has been split into 8 separate sections (**2a – 2h**) in this guide, to illustrate how this will appear for the 8 different screens that documents may be generated from.

- **Step 2 (a): Employee Search screen**
 - Once a 'Document Template' has been selected, the 'Filter' window will appear to prompt the user to select the employee(s) for whom the document will be generated.

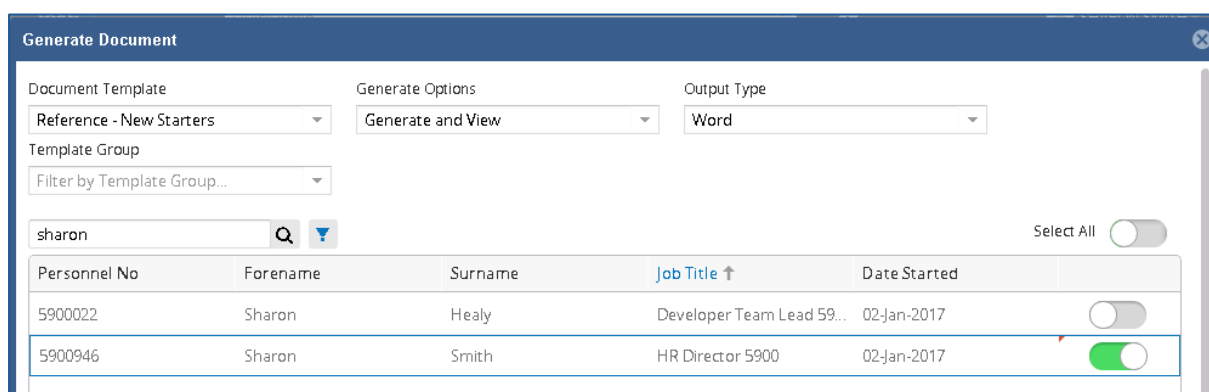

A dialog box titled 'Filter' with a close button (X) in the top right corner. It contains several input fields for filtering data:

- Personnel No: Text input field
- Forename: Text input field
- Surname: Text input field
- Company: Dropdown menu
- Department: Dropdown menu
- Job Title: Dropdown menu
- Date Started: Text input field

At the bottom, there are three buttons: 'Cancel', 'Clear Filter', and a green 'Filter' button with a downward arrow icon.

- Use the search criteria provided and click on the **Filter** button to display employees on the Generate Document screen:

The 'Generate Document' screen shows the following configuration:

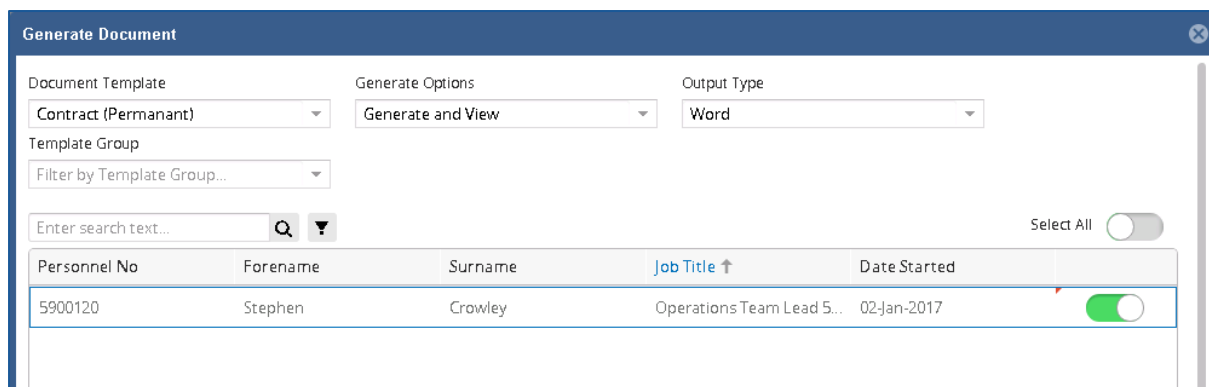

- Document Template: Reference - New Starters
- Generate Options: Generate and View
- Output Type: Word
- Template Group: Filter by Template Group...
- Search: sharon
- Select All: Toggle switch (off)

Personnel No	Forename	Surname	Job Title ↑	Date Started	
5900022	Sharon	Healy	Developer Team Lead 59...	02-Jan-2017	☐
5900946	Sharon	Smith	HR Director 5900	02-Jan-2017	☒

- Select the active indicator for the record(s) to be included in the document generation. It is possible to select one, many or all records from the list of employees. An individual version of the document will be generated for the employee(s) selected.

▪ Step 2 (b): Employee Dashboard

- Once a 'Document Template' has been selected, the screen will be populated with the records that are available to include in the document generation

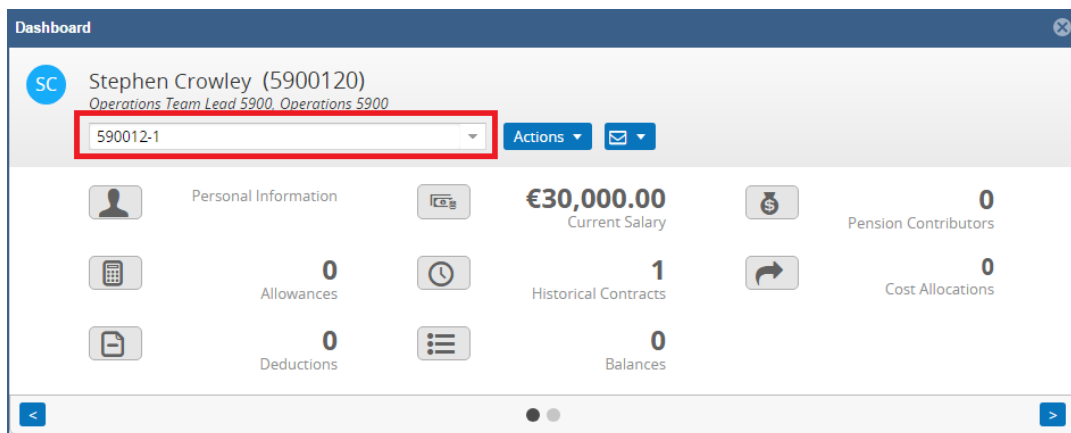

The 'Generate Document' screen shows the following configuration:

- Document Template: Contract (Permanant)
- Generate Options: Generate and View
- Output Type: Word
- Template Group: Filter by Template Group...
- Search: Enter search text...
- Select All: Toggle switch (off)

Personnel No	Forename	Surname	Job Title ↑	Date Started	
5900120	Stephen	Crowley	Operations Team Lead 5...	02-Jan-2017	☒

- The records displayed here will reflect the record select in the contract list of the Employee Dashboard, before the  button was selected

- Select the referee(s) for whom the document will be generated using the active indicator per row or the **Select All** option

- **Step 2 (h): Interview Panel**

- Once a Document Template has been selected, the interview panel member records will appear.
- Select the panel member(s) for whom the document will be generated using the active indicator per row or the **Select All** option

- **Step 3: Generate Options**

Option	Description
Generate and View	This is the default setting. The document will generate and be available to retrieve in the 'Download Centre'. The user will get a notification in the 'Notification Centre' to alert them when this is ready to review. 1 single document pack will be generated containing a copy of the document for each employee / applicant / record selected i.e. if generated for multiple employees, 1 file will contain a copy of each document per record. Documents generated in this way will not be automatically uploaded to the employee's record.
Generate and Upload	This option is only available on the drop down list if a 'Document Type' has been configured for the template. This will generate an individual document file per employee / applicant / record selected and these files will be automatically uploaded to their record. Documents generated in this way will not appear in the Download Centre.

- **Step 4: Output Type**

- This indicates the file type that the generated document will be.
- This will default to 'Word' and may be updated to PDF.
- However, this may already be defaulted to 'PDF' if that has been configured on the

- **Step 5: Generate**

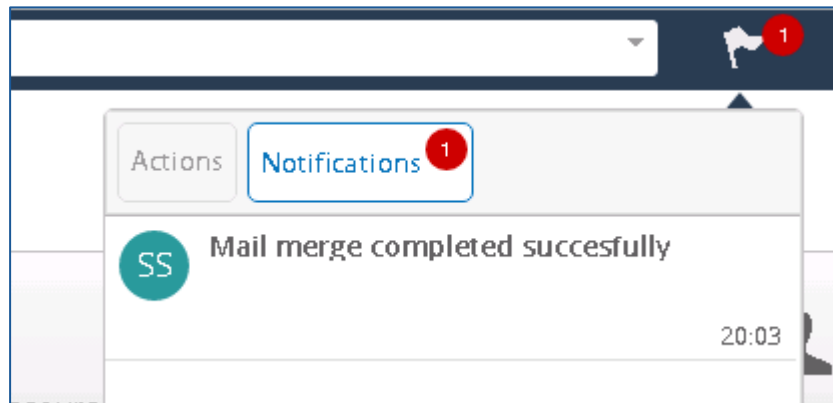

- Click on the Generate button to generate the document creation

2.5.2. Retrieving a Document

Where a document may be retrieved is dependent on whether the option to 'Generate and View' or 'Generate and Upload' was selected.

- **Generate and View**

- Documents will be available in the 'Download Centre' widget. This may be configured on the Manager Dashboard / HR Admin Dashboard / Recruitment Dashboard as required.
- The user will be notified via the 'Notification Centre' when a document has been generated and is available to review.

- The document will be listed in the Download Centre / Reports Centre:

Reports Centre 1			
Files			
File Name	Date Created	Created by	
Reference - New Starters	07-JUN-2017	sharon.looney5900	Download

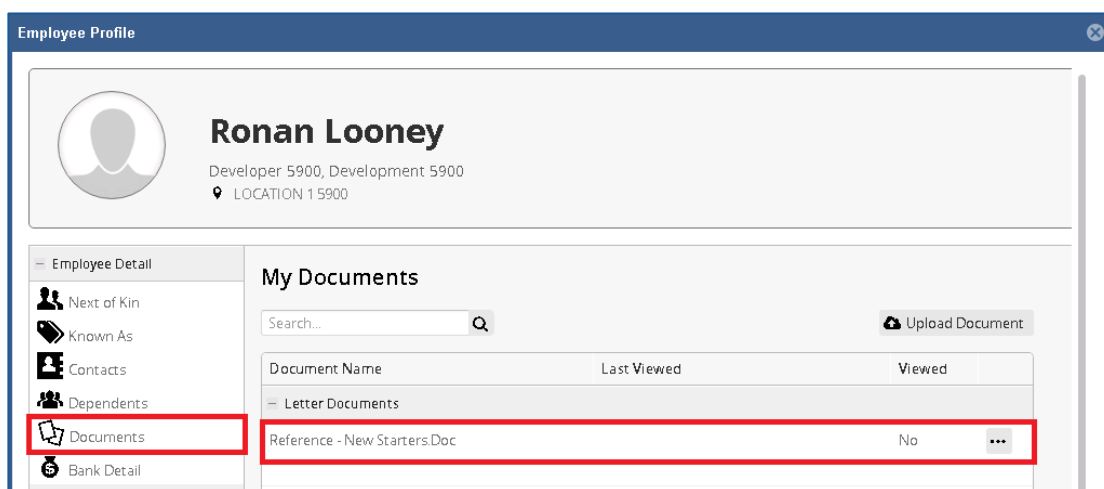

- Click on the **Download** button to download a copy of the document
- Please note: If this document was created for more than 1 record, this single file will include an individual copy of the document template for each record selected.
- Records here are user specific i.e. user only sees documents they have generated.
- By default documents, will be cleared down after 5 days.
 - Please note: this is a configurable setting. Please see [3.5 Report Centre Document Cleardown](#) for further details on how to manage this.

■ Generate and Upload

- The individual document will be available to view against the individual Employee or Applicant record.
- The user will be notified via the Notification Centre when a document has been generated and is available to review.

○ **Employee Record**

Documents generated from the Employee Dashboard or Employee Search screens will be available to view on the **Employee Profile > Employee Details > Documents** screen.

The screenshot shows the 'Employee Profile' window for Ronan Looney, a Developer 5900. The left sidebar contains navigation links: Employee Detail, Next of Kin, Known As, Contacts, Dependents, **Documents** (highlighted with a red box), and Bank Detail. The main content area is titled 'My Documents' and includes a search bar and an 'Upload Document' button. Below this is a table of documents:

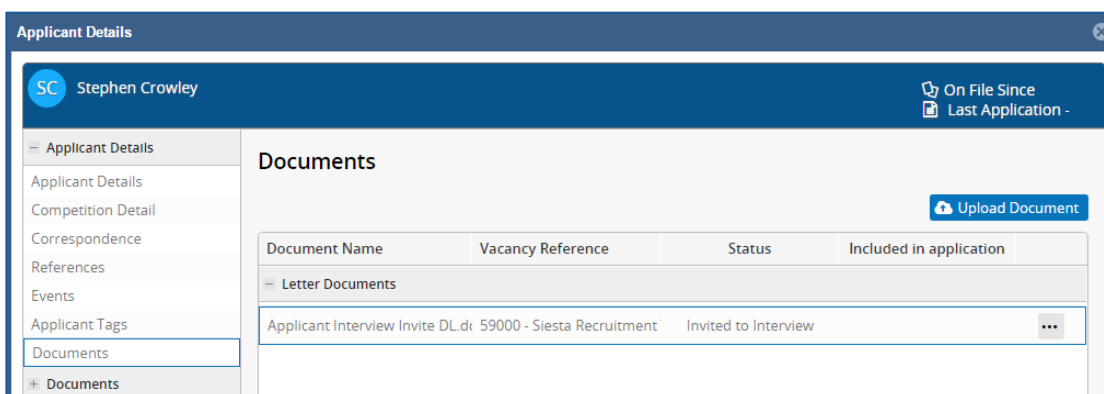

Document Name	Last Viewed	Viewed
Letter Documents		
Reference - New Starters.Doc		No

The row for 'Reference - New Starters.Doc' is highlighted with a red box.

Please Note: Documents that appear here will appear to all users who have access to the Employee Profile screen, including Managers and Employees. It is important to ensure that user access is managed per 'Document Type' if further restrictions are required. Please see [3.2 Document Groups](#) for further details.

○ **Applicant Record**

Documents generated from the View Applicants or Assign Applicants screens will be available to view on the **Applicant Details > Documents** screen.

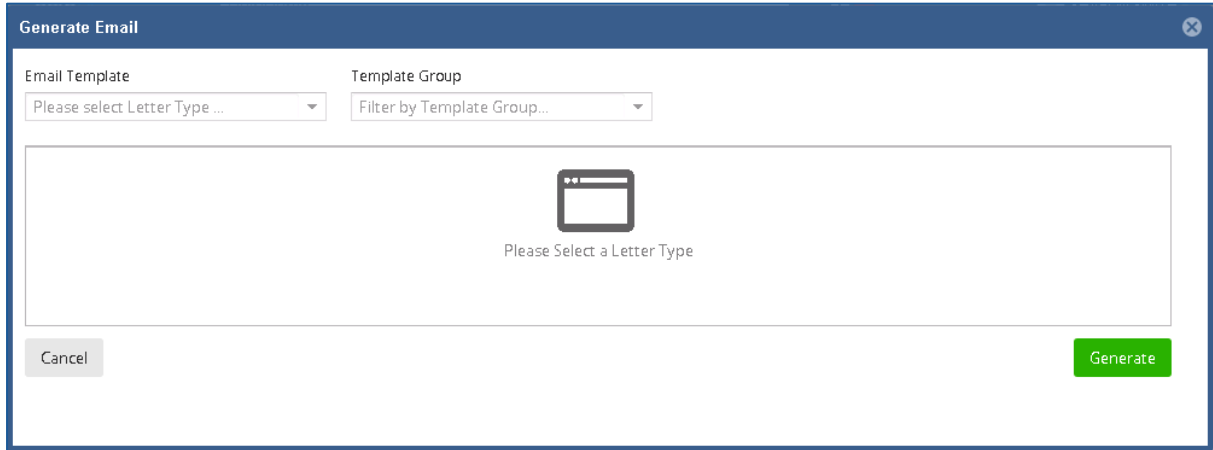

The screenshot shows the 'Applicant Details' window for Stephen Crowley. The left sidebar contains navigation links: Applicant Details, Competition Detail, Correspondence, References, Events, Applicant Tags, **Documents** (highlighted with a blue box), and Documents. The main content area is titled 'Documents' and includes an 'Upload Document' button. Below this is a table of documents:

Document Name	Vacancy Reference	Status	Included in application
Letter Documents			
Applicant Interview Invite DL.d	59000 - Siesta Recruitment	Invited to Interview	

2.6. Generate Email

To generate an email:

- Navigate to the required screen.
- Click on the  button, select **Generate Email** and the 'Generate Email' screen will open in a new window.

- **Step 1: Select an Email Template**
 - This will provide a list of all 'Email Templates' that have been linked to the chosen screen.
 - A template that has a restricted access setting will only appear on the list if the user is a member of the restricted access groups.
 - The 'Template Group' drop down list may be used to help filter the list of 'Email Templates' available.
- **Step 2: Select the records**

Please Note: Depending on the screen that the email is being generated from, Step 2 will vary slightly. These screens will behave as per the descriptions covered in [2.5.1 Generate a Document](#) in this guide. Please refer to that section for further guidance on the record filter options that are reviewed in **Step 2(a) – Step 2(h)** in that section, for each of the 8 screens from which it is possible to generate an email.
- **Step 3: Generate Email Merge**
 - Click on the **Generate** button to generate the email merge for the chosen record(s) and open the email preview.

- **Step 4: Review and Update Email(s)**

- All of the emails generated in the merge will be previewed to the user.

The screenshot shows a web interface for previewing an email. At the top, a header bar contains the title 'Applicant Invite to Interview' and a close button. Below this, a summary bar displays applicant details: 'Applicant No - A2347', 'Name - Conor Roche', 'Applicant Status - INTV', 'Date - 05-JUN-17', 'Time - 09:00', and 'Recruitment ID - 59000'. Navigation arrows are on either side of this bar. To the right of the summary bar are two buttons: 'Attach To All' (blue) and 'Send All Emails' (green). The main area shows the email content: 'To: Conorroche5900@Core.Com', 'Subject: Invitation to Interview (59000)', and the body text: 'Dear Conor Roche', 'I am delighted to invite you to attend an interview for 59000.', 'Date: 05-JUN-2017', 'Time: 09:00', and 'Best regards', 'Recruitment Admin'. At the bottom right of the email body, it says '1,849 Characters Remaining'. Below the email body are two buttons: 'Add Attachment' (blue) and 'Send Now' (green).

- If more than one email is included, the arrows at the top of the screen may be used to tab between the individual emails.

This is a close-up of the summary bar from the previous screenshot. It shows the navigation arrows (left and right) and the applicant details: 'Applicant No - A2347', 'Name - Conor Roche', 'Applicant Status - INTV', 'Date - 05-JUN-17', 'Time - 09:00', and 'Recruitment ID - 59000'.

- It is possible to update the subject and body of each individual email in this preview before sending, if required. Once an edit had been made to the email, the 'Save Now' button will update to **Save Changes**.
 - Clicking on this will save changes made to the preview of the email before sending. The button will revert back to **Send Now**.
 - Changes made will only be saved for the current email in the current preview mode. If the preview is exited before sending the emails, changes made will be lost and will need to be captured again in the next preview.

Re-send

- The **Send All Emails** button will send all emails in the merge in one action.
 - If any other emails have been sent individually before this button is clicked, they will not be resent as part of this action.

2.7. Manage Documents

2.7.1. What is CoreHR Document Management

Document Management is a facility that allows for documents to be stored on CoreHR against an Employee or an Applicant record.

- Documents for Employees are available to review on the **Employee Profile > Documents** screen.
- Documents for Applicants are available to review on the **Applicant Details > Documents** screen.

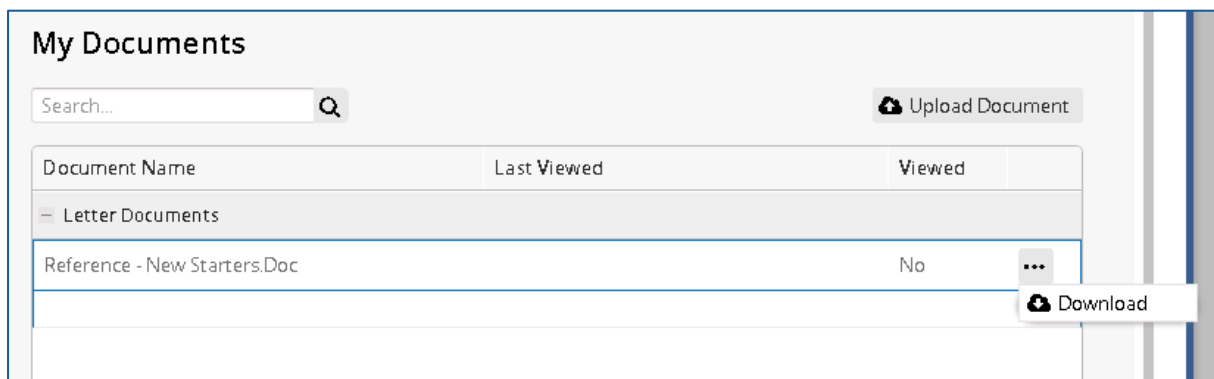

These screens may be accessed by HR Admins, Recruitment Admins, Managers or Employees. Therefore, an additional level of access is required to view specific 'Document Types' that are stored e.g. a user may have access to the 'Documents' screen but may only be able to view documents linked to the 'Contracts' document type but not the 'Disciplinary' document types.

Documents that have been generated on the system for an employee or applicant may be automatically stored against their record (as reviewed earlier in this guide). A user may also have the option to directly upload a file against the employee's record i.e. independent of the document generation functionality.

2.7.2. View Document

To view a document for an employee on either the 'Employee Profile' or 'Applicant Details' screen:

- Click on the  button.
- Select the **Download** option and the file will download in the browser.

- The 'Last Viewed' and 'Viewed' columns will update for the file to reflect the user that viewed the document last and the date and time that it was downloaded.

My Documents			
Search...		Upload Document	
Document Name	Last Viewed	Viewed	
Letter Documents			
Reference - New Starters.Doc	Wednesday 07th Jun 2017 @ 20:49	Yes	...

2.7.3. Edit Document

Not available in v24.

2.7.4. Upload Document

To upload a document for an employee/applicant on either the Employee Profile or Applicant Details screen:

- Click on the **Upload Document** button

Upload Document

Document Type

Description

Comments

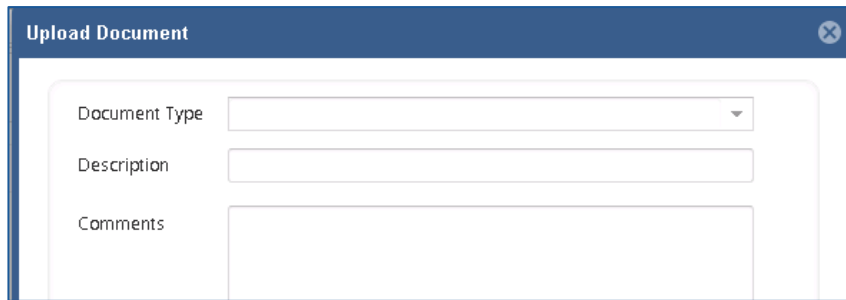

File to Upload

Browse

Upload

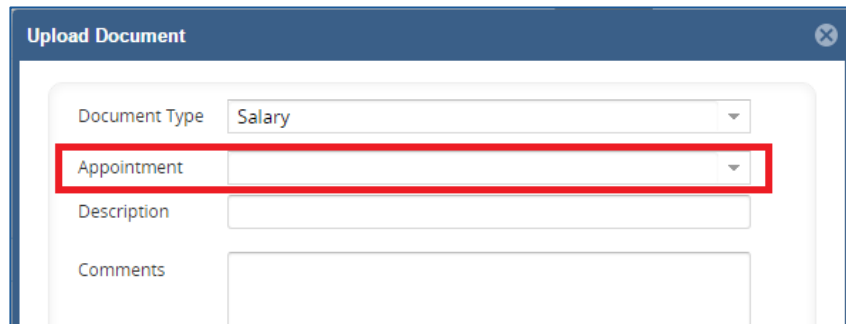

- Select a Document Type.
 - For Managers and Employees, the selection available to the user will be updated based on the 'Available to Manager' and 'Available to Employee' setting on the Document Type.
- Depending on the Document Type selected, the Upload Document screen will vary slightly e.g. if Person or Contract (Employee Profile) or Applicant.

- Employee – '**Person**' level Document Type

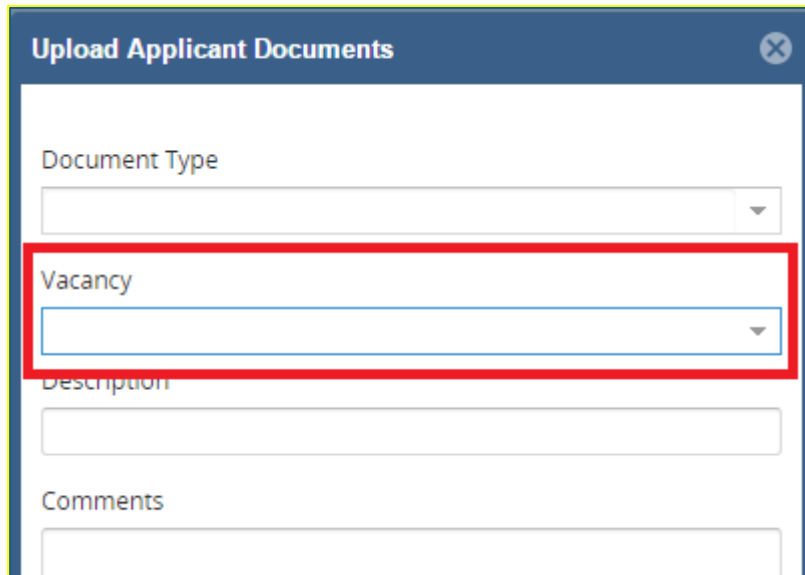

The screenshot shows a modal window titled "Upload Document" with a close button in the top right corner. Inside the modal, there are three input fields: "Document Type" (a dropdown menu), "Description" (a text input field), and "Comments" (a larger text input field).

- Employee – '**Contract**' level Document Type

The screenshot shows a modal window titled "Upload Document" with a close button in the top right corner. Inside the modal, there are four input fields: "Document Type" (a dropdown menu with "Salary" selected), "Appointment" (a dropdown menu highlighted with a red border), "Description" (a text input field), and "Comments" (a larger text input field).

- Applicant Document Type
A 'Vacancy' must be selected

The screenshot shows a modal window titled "Upload Applicant Documents" with a close button in the top right corner. Inside the modal, there are four input fields: "Document Type" (a dropdown menu), "Vacancy" (a dropdown menu highlighted with a red border), "Description" (a text input field), and "Comments" (a larger text input field).

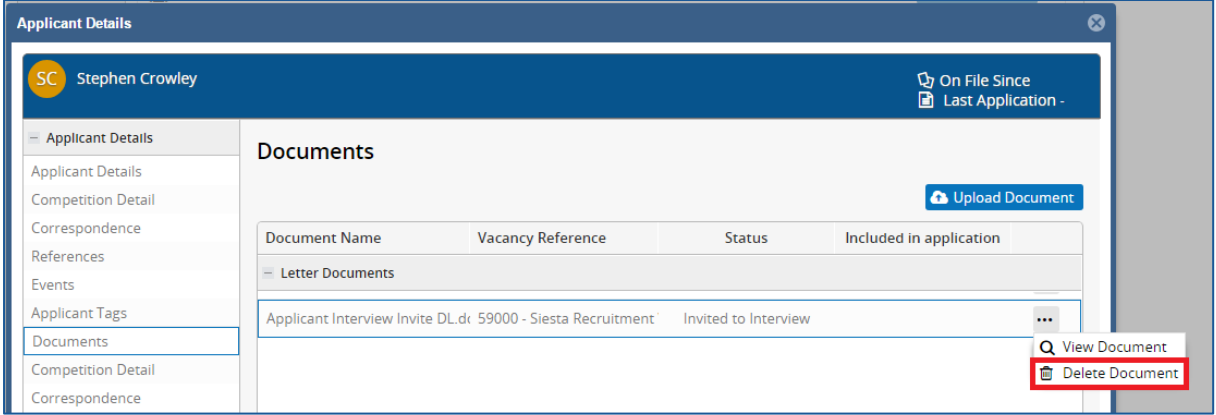

- Provide a 'Description'.
- Additional details can be captured in the comments if required.
- Click **Browse** to find the file.
- Click **Upload** to upload the document.

2.7.5. Delete Document

Available only on 'Applicant Details' screen. Not available on Employee Profile screen in v24.

To delete a document:

- Select the  button for the required document
- Select the option **Delete Document**

The screenshot shows the 'Applicant Details' screen for Stephen Crowley. The 'Documents' section is active, displaying a table of documents. A context menu is open for the document 'Applicant Interview Invite DL.doc', showing the 'Delete Document' option highlighted with a red box.

3. How to Configure

3.1. Template Groups

To create and manage 'Template Groups':

- Go to **HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Select the **Template Groups** option.

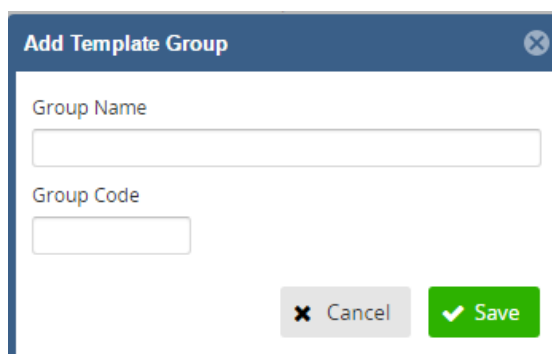

The screenshot shows the 'Template Configuration Centre' window. The 'Template Groups' tab is selected and highlighted with a red box. The interface includes a search bar and a table of template groups.

Group Name	Group Breakdown	Active	
Appointments/Contracts	27 Documents, 0 Email Templates	Yes	...
Appraisals	0 Documents, 0 Email Templates	Yes	...
Contracts	0 Documents, 0 Email Templates	No	...
Discipline	0 Documents, 0 Email Templates	Yes	...

To add a new 'Template Group':

- Click the **+ Add New Group** button to open the 'Add Template Group' screen

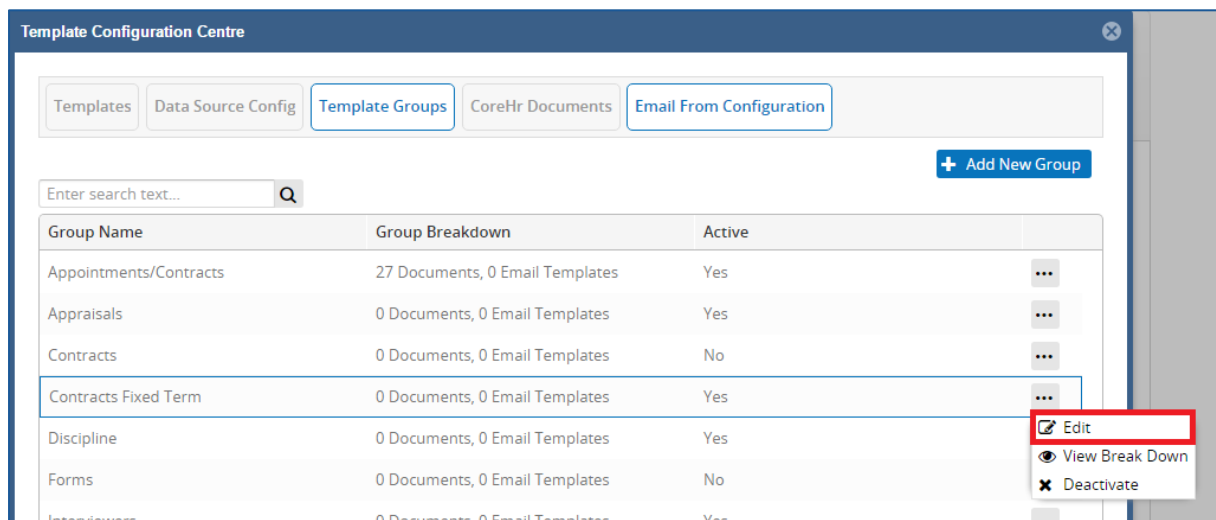

The 'Add Template Group' form is shown, featuring two input fields: 'Group Name' and 'Group Code'. At the bottom, there are 'Cancel' and 'Save' buttons.

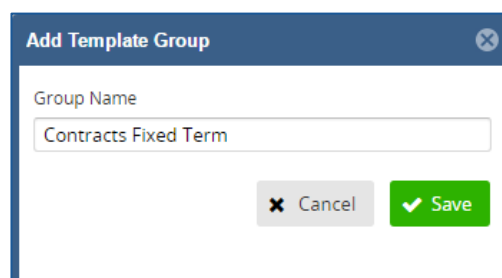

- Enter a value for 'Group Name'
 - This is the description that will display when selecting a 'Template Group' on all associated screens.
 - This can be up to a max of 40 alphanumeric characters.
- Enter a 'Group Code'
 - This can be up to a max of 6 alphanumeric characters
- Click **Save** to create the group.

To edit an existing Template Group:

- Click the  button for the required 'Template Group'.
- Select the **Edit** option.

- Update the 'Group Name' value.

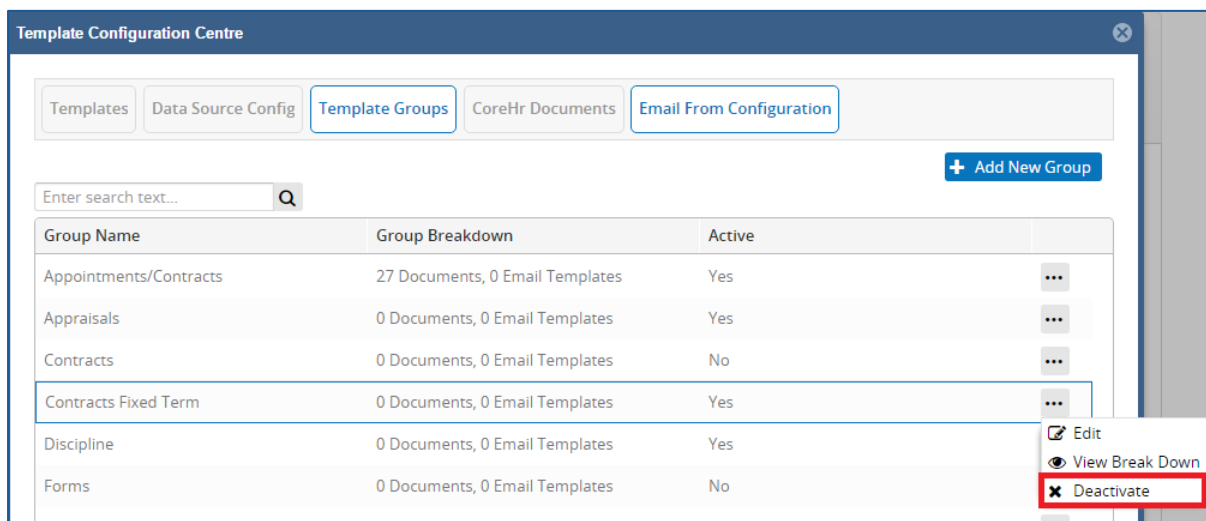

The screenshot shows a dialog box titled 'Add Template Group'. It has a close button (X) in the top right corner. Inside the dialog, there is a text input field labeled 'Group Name' which contains the text 'Contracts Fixed Term'. Below the input field are two buttons: 'Cancel' (with a red X icon) and 'Save' (with a green checkmark icon).

- Click **Save** to update the group.

To deactivate a 'Template Group':

- Click the  button for the required 'Template Group'.

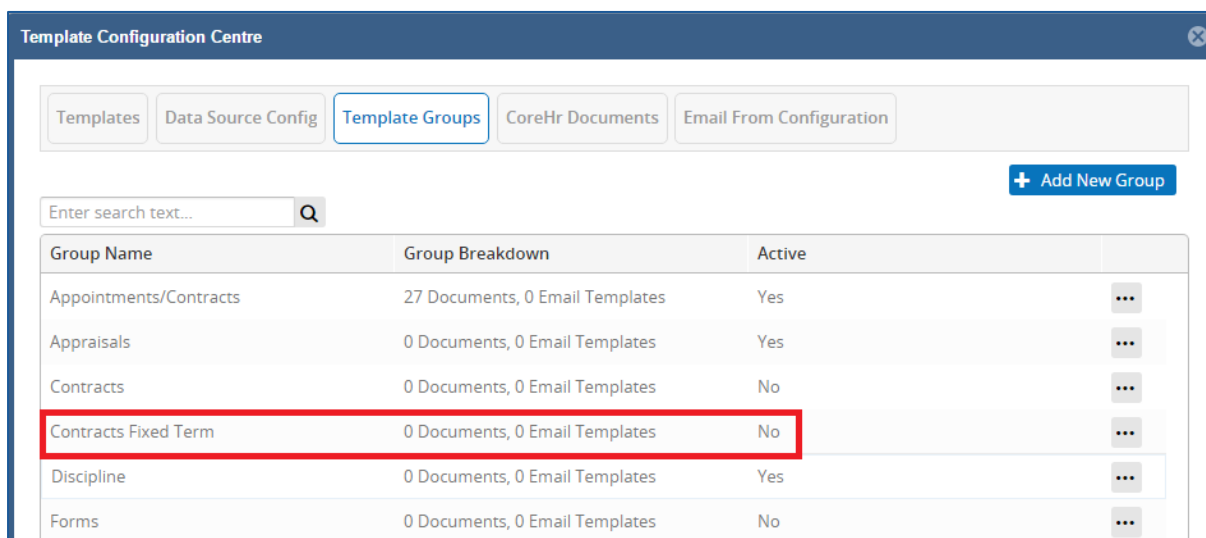

- Select the **Deactivate** option.

The screenshot shows the 'Template Configuration Centre' interface. The 'Template Groups' tab is active. A table lists various template groups. The 'Contracts Fixed Term' group is highlighted. A context menu is open over this group, showing options: 'Edit', 'View Break Down', and 'Deactivate'. The 'Deactivate' option is highlighted with a red box.

Group Name	Group Breakdown	Active	
Appointments/Contracts	27 Documents, 0 Email Templates	Yes	...
Appraisals	0 Documents, 0 Email Templates	Yes	...
Contracts	0 Documents, 0 Email Templates	No	...
Contracts Fixed Term	0 Documents, 0 Email Templates	Yes	...
Discipline	0 Documents, 0 Email Templates	Yes	...
Forms	0 Documents, 0 Email Templates	No	...

- The 'Template Group' is automatically deactivated.
- On the 'Template Group' screen, the 'Active' column will now show "No" for that record

The screenshot shows the 'Template Configuration Centre' interface after the 'Contracts Fixed Term' group has been deactivated. The 'Active' column now shows 'No' for this group. The 'Contracts Fixed Term' row is highlighted with a red box.

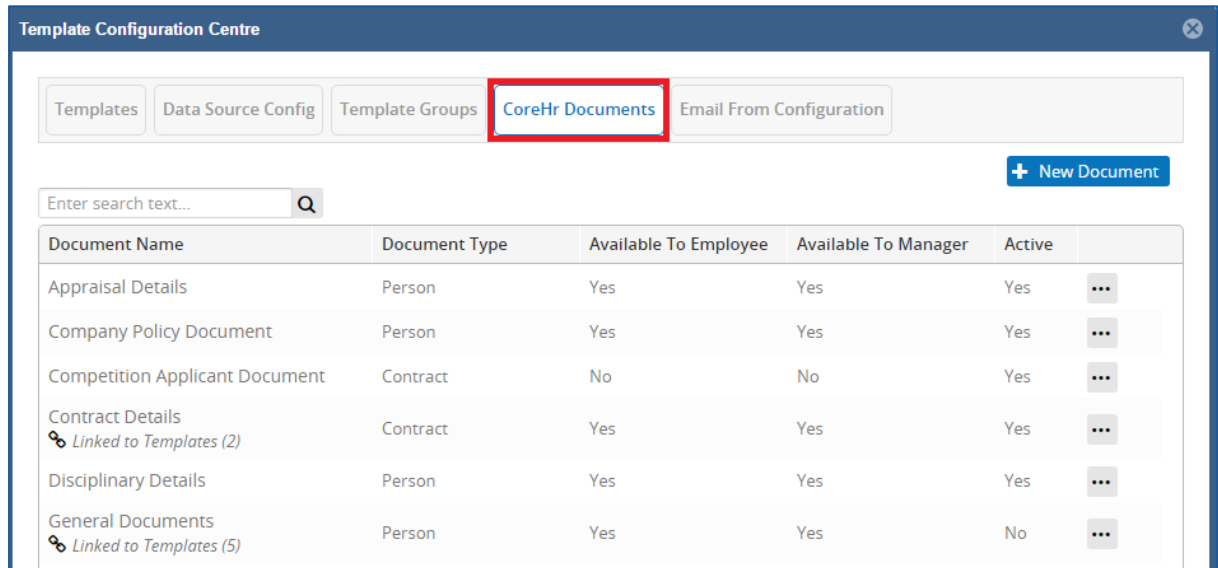

Group Name	Group Breakdown	Active	
Appointments/Contracts	27 Documents, 0 Email Templates	Yes	...
Appraisals	0 Documents, 0 Email Templates	Yes	...
Contracts	0 Documents, 0 Email Templates	No	...
Contracts Fixed Term	0 Documents, 0 Email Templates	No	...
Discipline	0 Documents, 0 Email Templates	Yes	...
Forms	0 Documents, 0 Email Templates	No	...

Once deactivated, the group will no longer appear for selection when configuring a new document or email template.

3.2. Document Types

To create and manage 'Document Types':

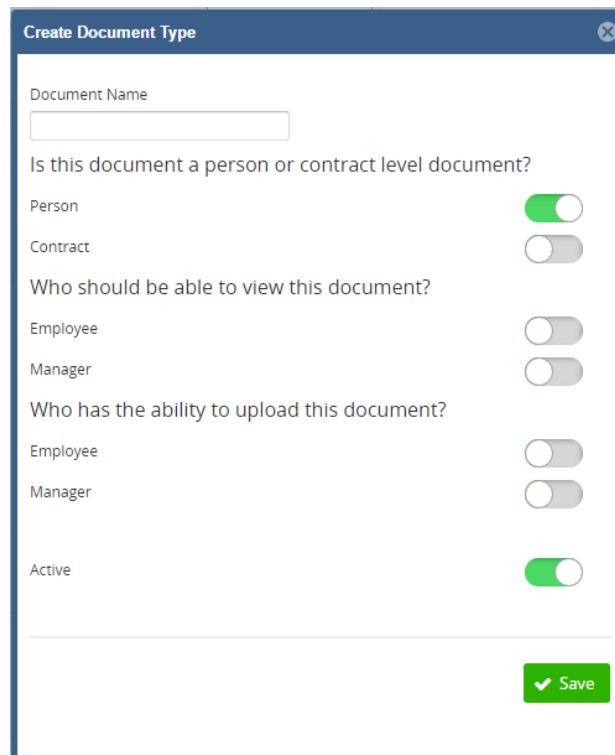

- Go to **HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Select the **CoreHR Documents** option.

Document Name	Document Type	Available To Employee	Available To Manager	Active	
Appraisal Details	Person	Yes	Yes	Yes	...
Company Policy Document	Person	Yes	Yes	Yes	...
Competition Applicant Document	Contract	No	No	Yes	...
Contract Details 🔗 Linked to Templates (2)	Contract	Yes	Yes	Yes	...
Disciplinary Details	Person	Yes	Yes	Yes	...
General Documents 🔗 Linked to Templates (5)	Person	Yes	Yes	No	...

To add a new Document Type:

- Click the **+ New Document** button to open the 'Create Document Type' screen

Create Document Type

Document Name

Is this document a person or contract level document?

☒ Person
 ☐ Contract

Who should be able to view this document?

☐ Employee
 ☐ Manager

Who has the ability to upload this document?

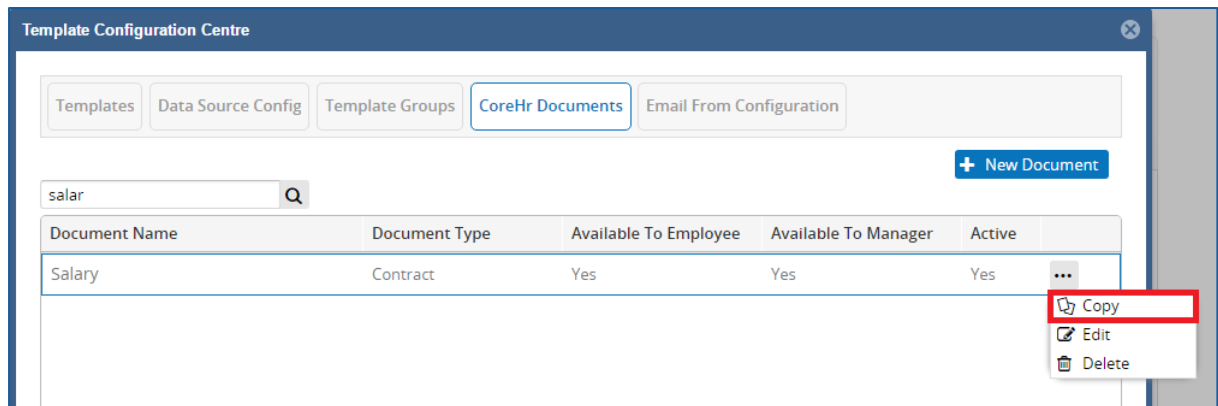

☐ Employee
 ☐ Manager

Active
☒

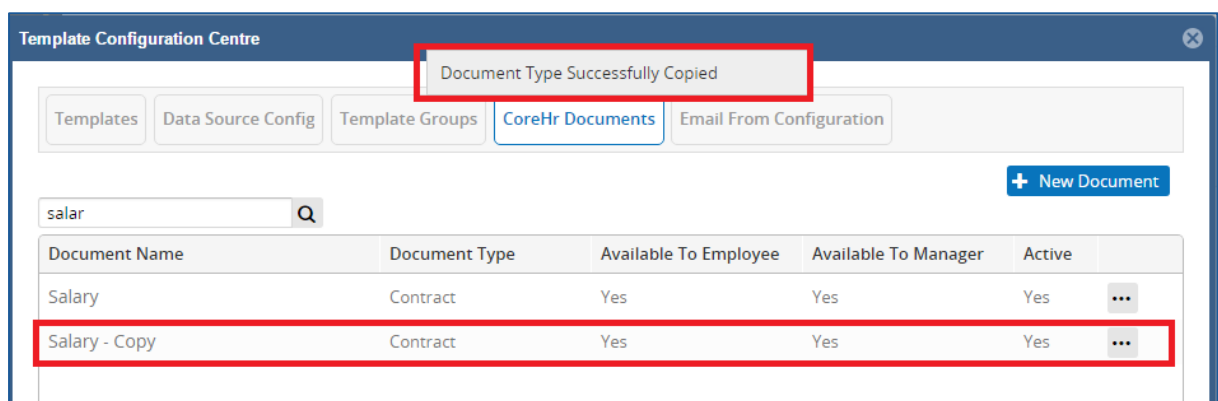

- Update all fields as required
 - **Document Name**
 - This will be the value that appears for the 'Document Type' throughout the system.
 - **Is this document a person or contract level document?**
 - *Person*: The document will be associated at a person level to the employee / applicant.
 - *Contract*: the document will be associated with an employee's specific contract.
 - **Who should be able to view this document?**
 - *Employee*: If this option is enabled, documents that are linked to this document type will be available to an employee to view via the Employee Profile screen.
 - *Manager*: If this option is enabled, documents that are linked to this document type will be available to a manager to view via the Employee Profile screen.
 - **Who has the ability to upload this document?**
 - **Employee**: If this option is enabled, the Document Type will appear in the 'Document Type' drop down list displayed to the employee on the 'Upload Document' screen.
 - **Manager**: If this option is enabled, the Document Type will appear in the 'Document Type' drop down list displayed to the manager on the 'Upload Document' screen, for employees in their team.
 - **Active**
 - *Enabled*
 - The Document Type will be active for selection on all associated drop down lists throughout the system i.e. when creating a new Document Template or uploading a document.
 - *Disabled*
 - The Document Type will not appear on drop down lists throughout the system.
 - Documents linked to that Document Type will no longer display on the Employee Profile or Applicant Details screen.
- Click **Save** to create the Document Group

To create a new 'Document Type' as a copy of an existing record:

- Click the  button for the required 'Document Type'.
- Select the **Copy** option.

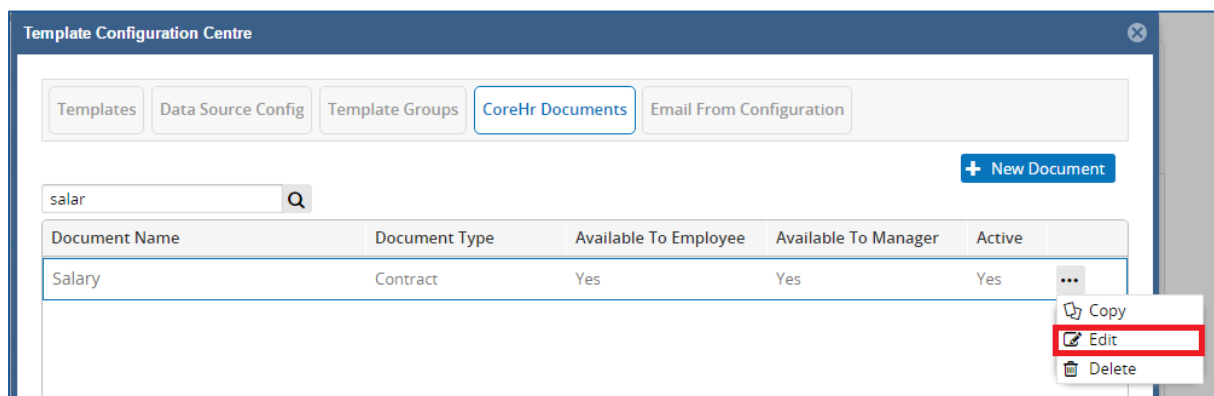

- A new 'Document Type' will be created and appear on screen automatically. The title will be set to '<original document name> - Copy'.

To edit a 'Document Type':.

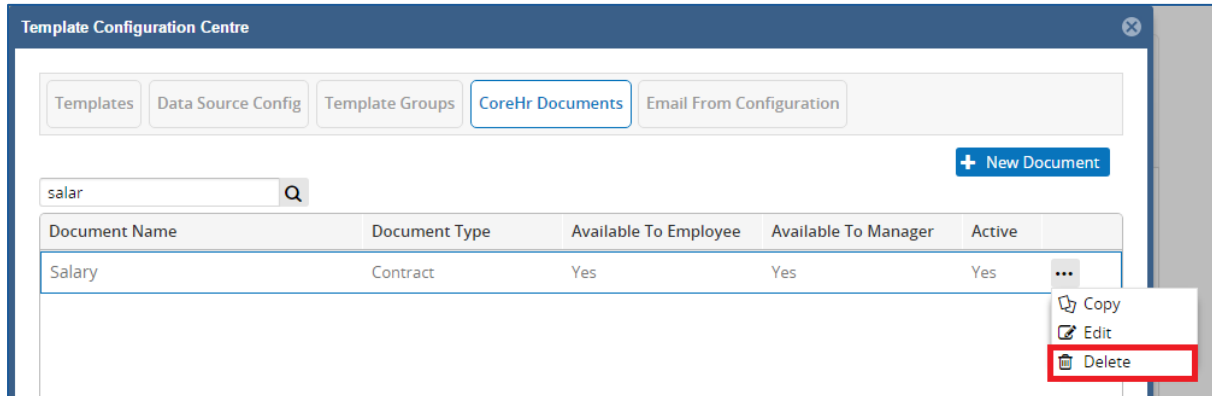

- Click the **...** button for the required Document Group.
- Select the **Edit** option.

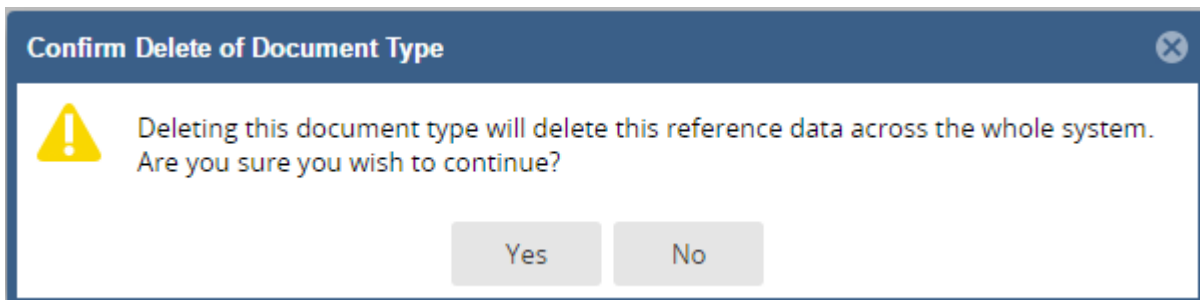

- Update all fields as required.
- Click on the **Save** button to save changes.

To delete a 'Document Type':

- Click the  button for the required 'Document Type'.
- Select the **Delete** option.

- A prompt will appear to confirm that the Document Group should be deleted.

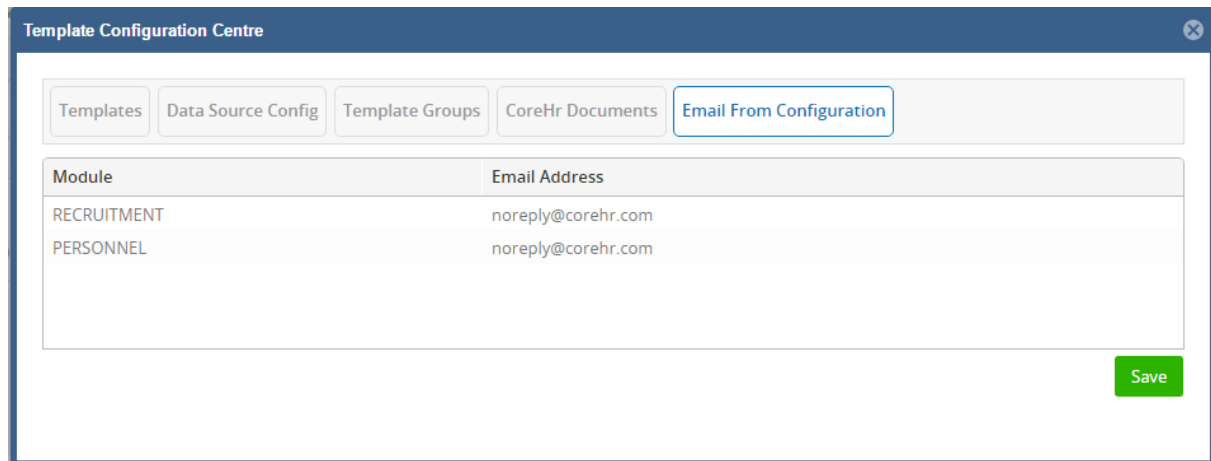

- Click **Yes** to delete
 - Alternatively, click **No** to cancel
- 'Document Type' will be deleted

Please Note: It is not recommended to delete document types that have been linked to Document Templates. This may cause instability with records already generated and linked to that Document Type on the system. It is therefore recommended to edit the Document Type and set the record to inactive, rather than delete.

3.3. Email From Address

To update the Email From address:

- Go to **HR Admin Dashboard > Data Centre > Template Configuration Centre**.
- Select the option **Email From Configuration**.

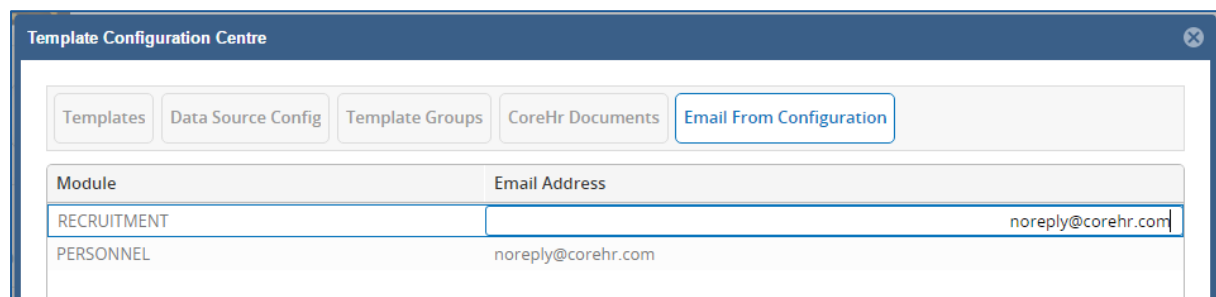

The screenshot shows the 'Template Configuration Centre' window with the 'Email From Configuration' tab selected. The table below shows the current email addresses for the RECRUITMENT and PERSONNEL modules.

Module	Email Address
RECRUITMENT	noreply@corehr.com
PERSONNEL	noreply@corehr.com

A green 'Save' button is located at the bottom right of the table.

- It is possible to update 2 separate email addresses, depending on the module that the email is generated from.
 - **Personnel:**
 - Emails generated from within HR Admin will appear to have sent from this address
 - **Recruitment:**
 - Emails generated from within Recruitment will appear to have sent from this address
- To update the address, double click on the email address field for the required module to make the field editable.

The screenshot shows the 'Template Configuration Centre' window with the 'Email From Configuration' tab selected. The table below shows the current email addresses for the RECRUITMENT and PERSONNEL modules. The 'RECRUITMENT' email address field is highlighted with a blue border, indicating it is selected for editing.

Module	Email Address
RECRUITMENT	noreply@corehr.com
PERSONNEL	noreply@corehr.com

- Update the address as required.
- Click the **Save** button to save changes.

3.4. Download Centre

The 'Download Centre' widget is required to access documents that have been generated using the 'Generate and View' option only.

This widget may be used by HR, Recruitment or Managers, depending on how the Document & Email Generation feature is shared in the organisation. As such, based on an organisation's requirements, this widget may be added to the following dashboards, to support this feature:

- HR Admin Dashboard
- Manager Dashboard
- Recruitment Dashboard

To add the 'Download Centre' widget to a dashboard:

- Go to **Dashboard Configuration**.
- Select Dashboard e.g. 'HR Admin Dashboard'.
- Select Tab e.g. 'Dashboard'.
- Search for the widget i.e. 'Download Centre'.

Dashboard Configuration

Select Dashboard

HR Admin Dashboard

Widget Catalogue

Add Page Tab

Enter search text...

Position	Tab Title	Tab Icon	Widget Count	
1	Dashboard		3	...
2	Employees		2	...
3	Data Centre		1	...

download

Position	Widget Title	Widget Width	Configure	Selected
	Download Centre	← 100% →		☐

- Flag this as the **Selected**.
- Changes will save automatically.

Repeat the above steps to add the widget to all required dashboards.

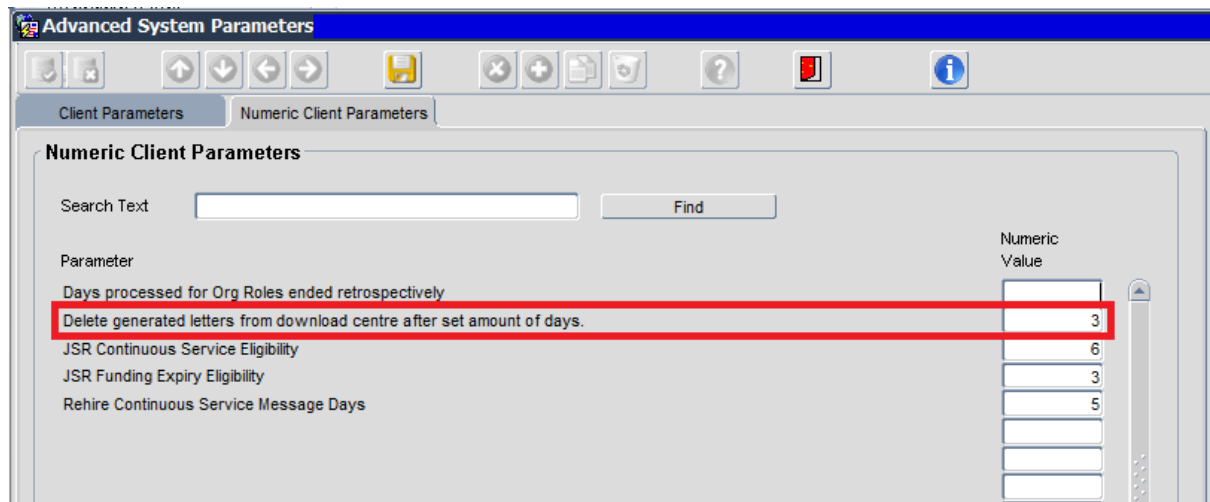

3.5. Report Centre Document Cleardown

This parameter controls the number of days after which documents generated by the user will be automatically cleared down from the system.

This is defaulted in the system to 5 days.

To update the number of days:

- Go to back office **CoreHR > CorePersonnel**
- Select **Reference > Reference Q-Z > System Parameters Advance > Client Parameters > Numeric Client Parameters**
- **Parameter Name:** 'Delete generated letters from download centre after set amount of days'
- Update value as required.
- Click  to save changes.

The screenshot shows the 'Advanced System Parameters' window with the 'Numeric Client Parameters' tab selected. A search bar is at the top. The parameter list includes 'Days processed for Org Roles ended retrospectively', 'Delete generated letters from download centre after set amount of days.' (highlighted with a red box), 'JSR Continuous Service Eligibility', 'JSR Funding Expiry Eligibility', and 'Rehire Continuous Service Message Days'. The 'Numeric Value' column shows values of 3, 6, 3, and 5 respectively for these parameters.

Parameter	Numeric Value
Days processed for Org Roles ended retrospectively	3
Delete generated letters from download centre after set amount of days.	6
JSR Continuous Service Eligibility	3
JSR Funding Expiry Eligibility	5
Rehire Continuous Service Message Days	

This clear down will not happen automatically once the number of days has elapsed i.e. this will not happen immediately once a document is 5 days old.

The clear down is actually triggered based on any user generating a new document. When any user generates a document, the system will:

- check the number of days set in the parameter e.g. 5 days
- check if any documents created by any user, were generated > 5 ago
- those documents will be cleared down

e.g. User A created a document but if User B generates a document 6 days later, documents created by User A will be cleared down.

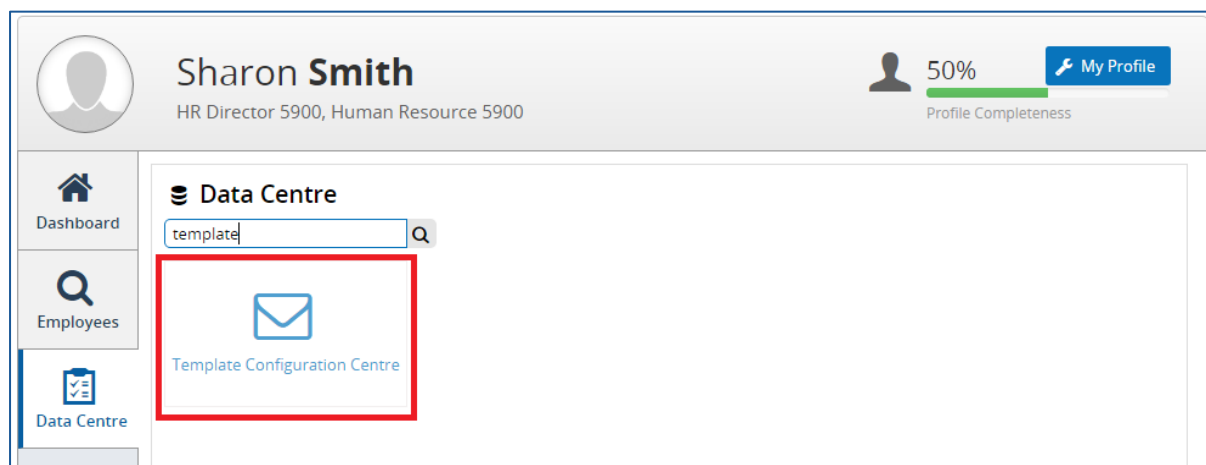

3.6. Menu Options

This section outlines the elements of this feature that are controlled by Menu Options. User Menu Profiles should be updated as required to share access to these items.

3.6.1. Template Configuration Centre

Installed System: CorePortal

Menu Option: CorePortal – Portal Letters

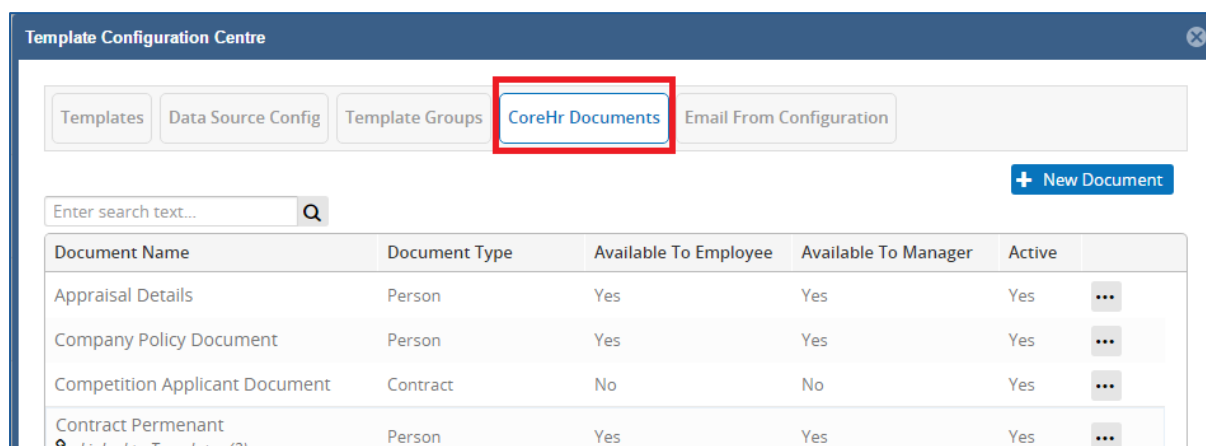

Please Note: This menu option will control access to the 'Template Configuration Centre' screen. The options 'Templates', 'Template Groups' and 'Email From Configuration' will be available by default with this menu option.

3.6.2. CoreHR Documents

Installed System: CorePortal

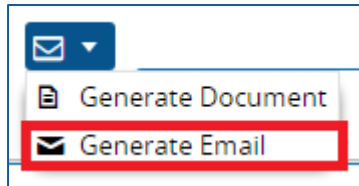

Menu Option: CorePortal – Portal Letters

3.6.3. Generate Email

Installed System: CorePortal

Menu Option: Coreportal – Generate Emails

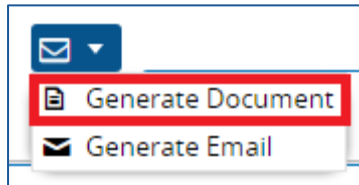

Please Note: This menu option controls access to this option on all screens that the button is available on.

3.6.4. Generate Document

Installed System: CorePortal

Menu Option: CorePortal – Generate Documents

Please Note: This menu option controls access to this option on all screens that the button is available on.

4. Appendix

4.1. Screens & Data Sources

This table provides a view of the Data Sources that are available for selection per screen on CoreHR.

Document & Email Template Data Sources

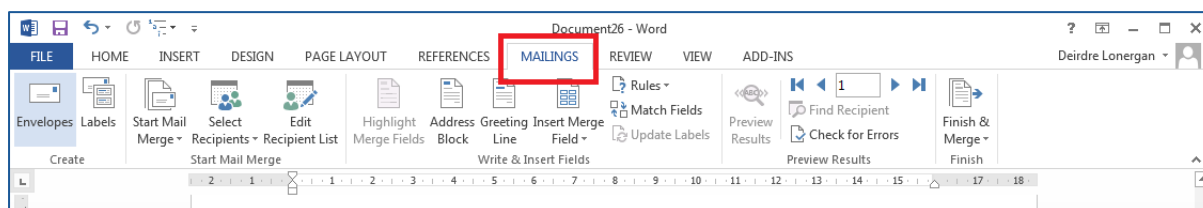

Screen	Data Source
Applicant Interview Scheduling	Schedules - Assign Applicants
Applicant References	Applicant Details > References
Employee Dashboard	HR Admin > Employee Dashbord My Team widget > HR Dashboard
Employee Search	HR Admin > Employees tab
Interview Panel	Edit Vacancy > Interview Panel
Interview Panel Scheduling	Schedules - Assign Interviewer
Vacancy Overview	Edit Vacancy > Vacancy Overview
View Applicants	Vacancies > Edit Vacancy > View Applicants Interview Panel > View Applicants

4.2. MS Word Mail Merge

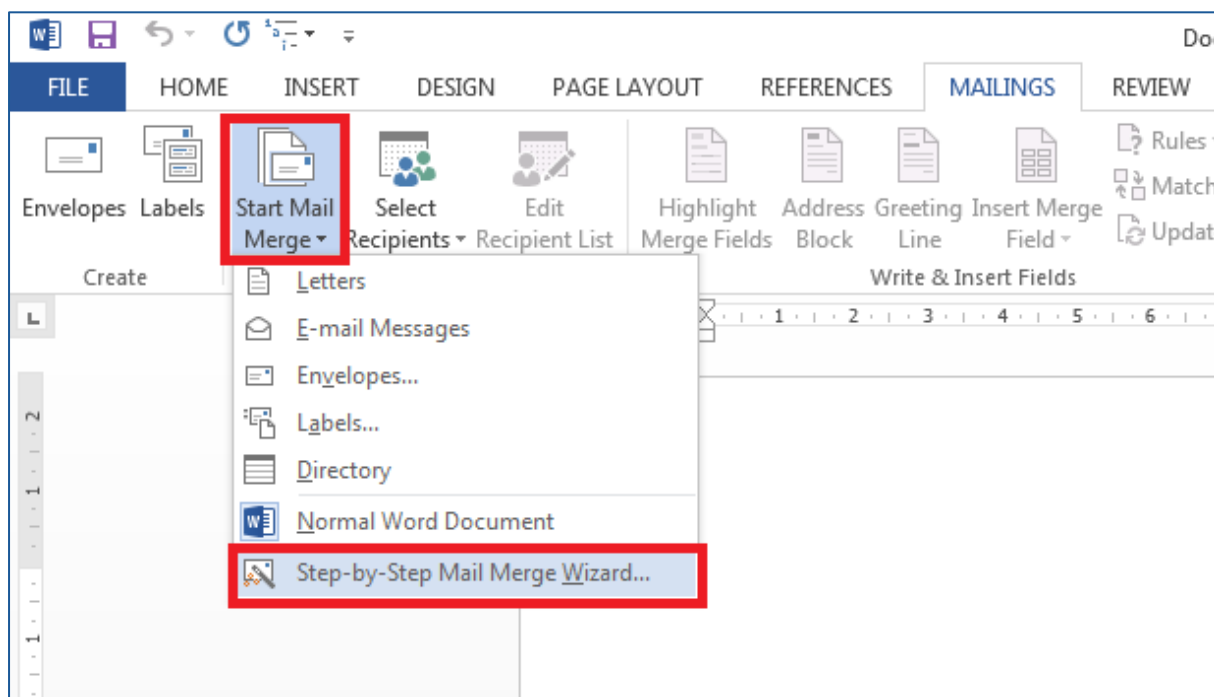

The section provides details on how to create an MS Word mail merge template using a CoreHR data source file. See [2.3.1 Create Template](#) to understand where in the document template creation process this step is required.

To create the mail merge file:

- Save the 'persdata.txt' file to a location on your computer
- Open MS Word
- Select the **Mailings** tab

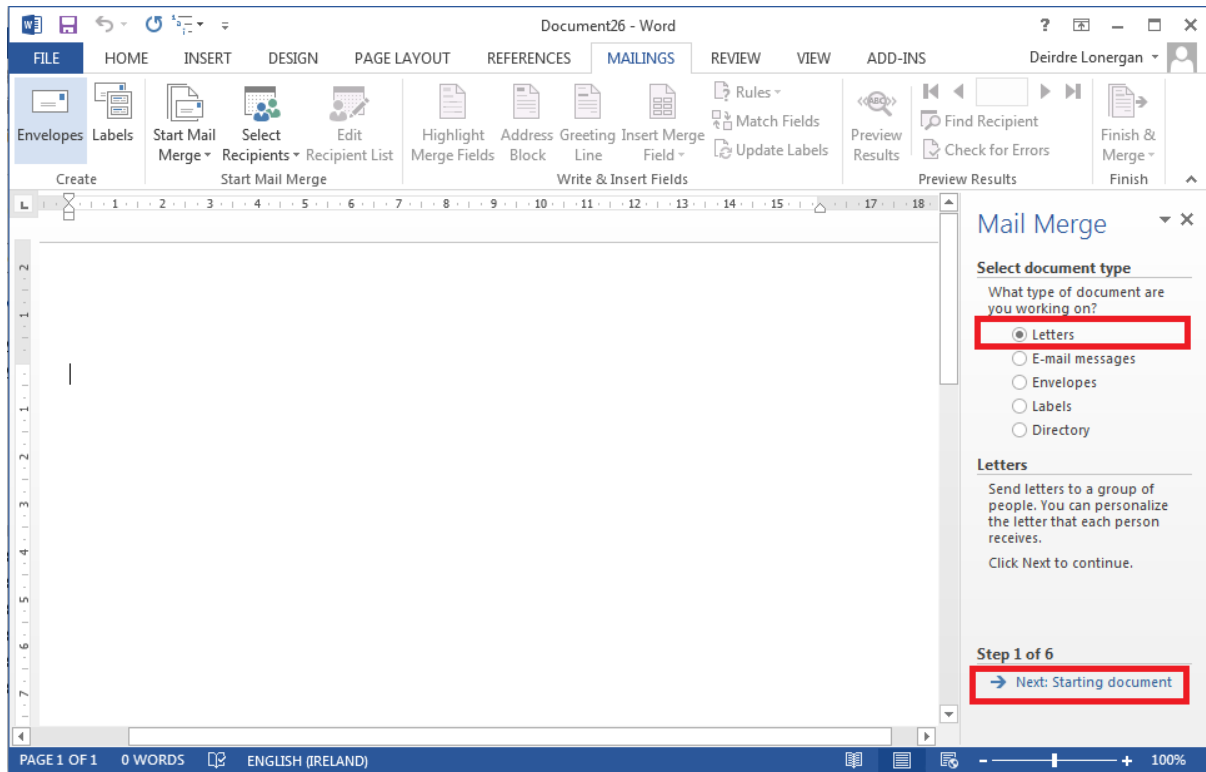

- Select the option **Start Mail Merge**

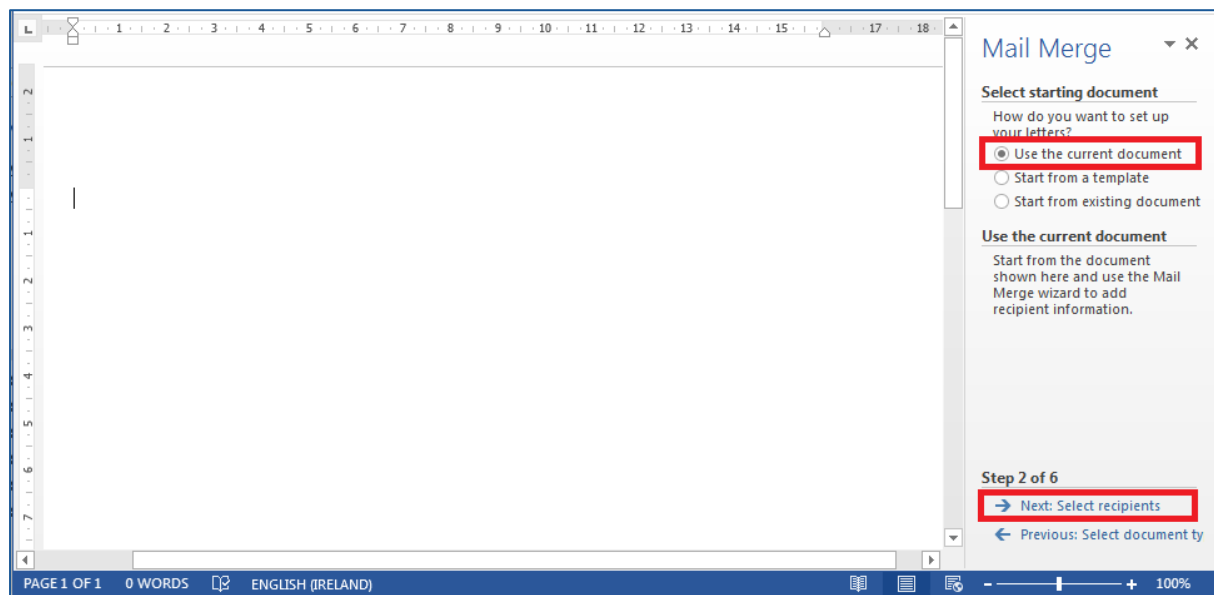

- The 'Mail Merge' panel will appear at the right of the screen. This is a 6-step wizard that will guide the user through the creation of the mail merge template.

- Step 1: Select Document Type
 - Select the **Letters** option.

- Click **Next: Starting Document** at the end of the panel.

- Step 2: Select Starting Document
 - Select **Use the current document**.

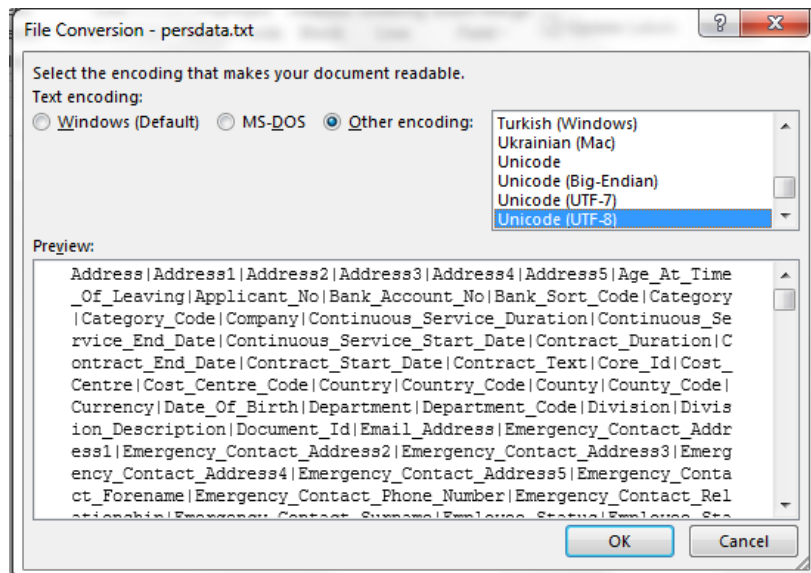

- Click **Next: Select Recipients**.

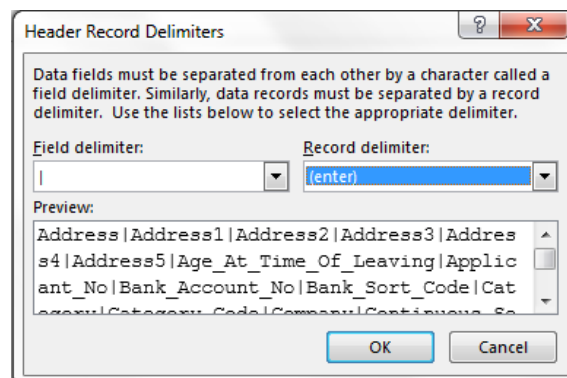

- Step 3: Select Recipients
 - Select the option **Use an existing list**.

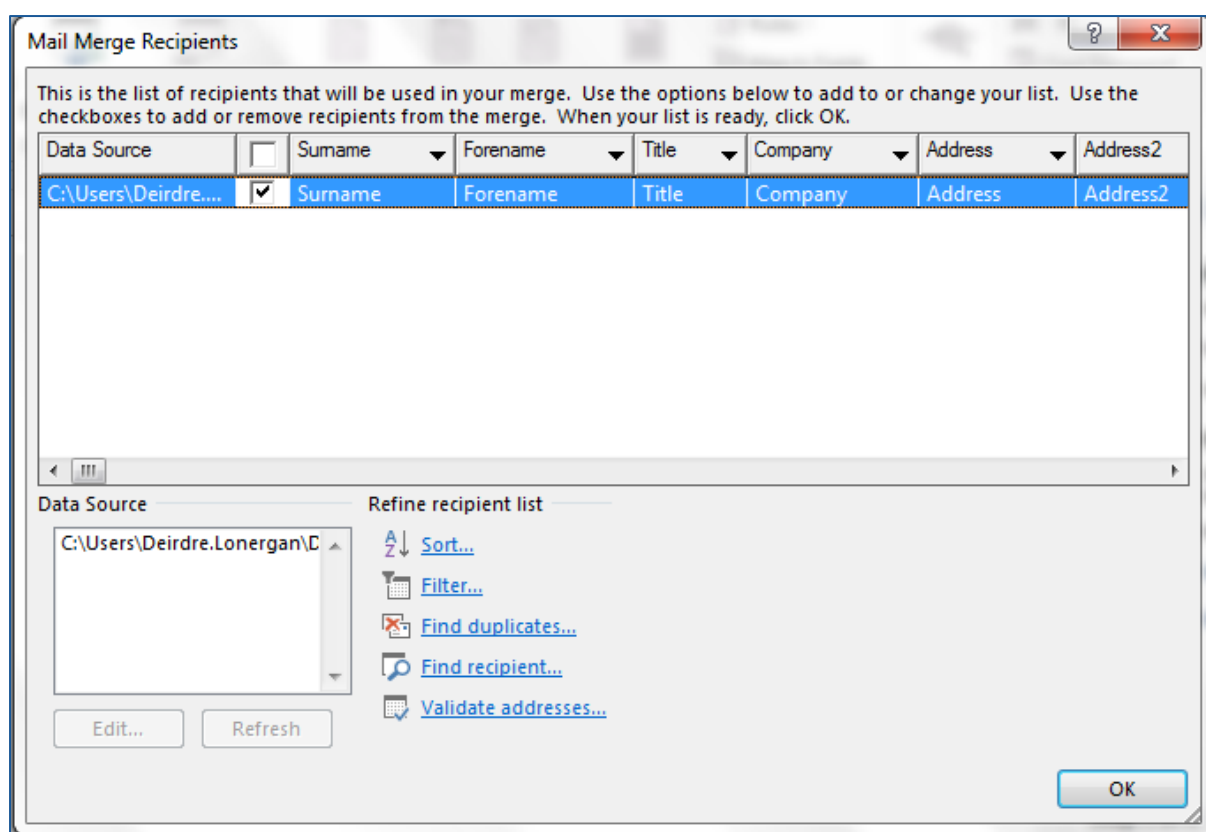

- Click **Browse...** to open the 'File Conversion' window.

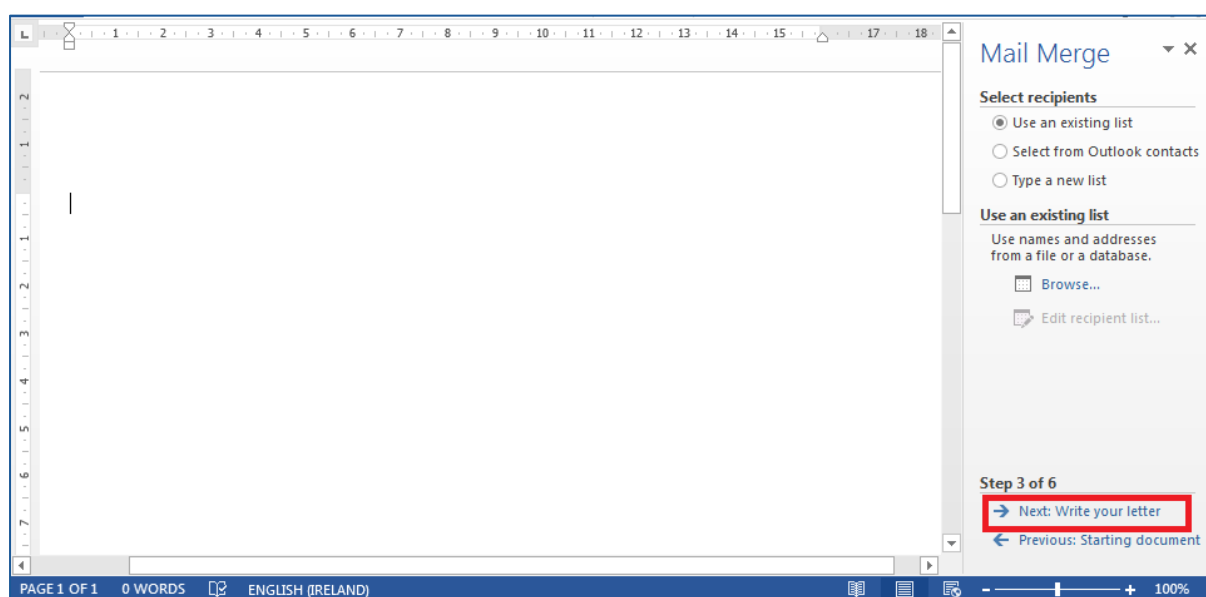

- The 'Preview' window will be populated with the text from the persdata.txt file.
- Click **OK**.
- On the Header Record Delimiters screen update the following options:
 - Field delimiter = |
 - Record delimiter = (enter)

- Click **OK** to open the 'Mail Merge Recipients' window.

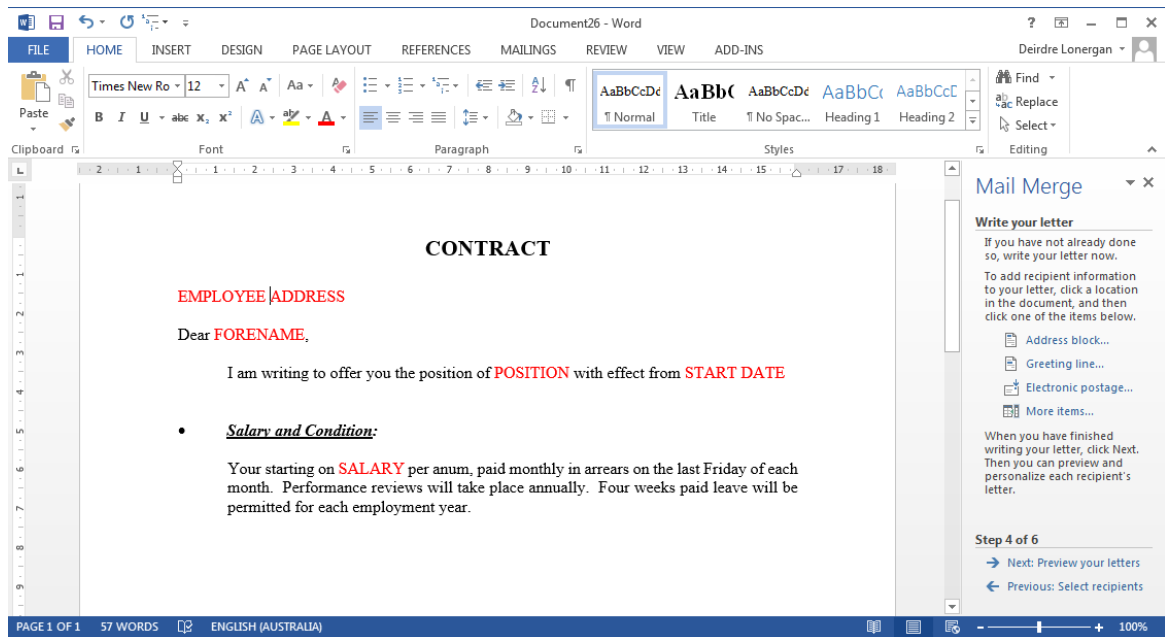

- The column header on this screen should reflect each mail merge field from the data source. There should be 1 row of data, with each field displaying the same data as the column header.
- Click **OK** to close and return to the wizard.

- Select **Next: Write your letter**.

- Step 4: Write your letter

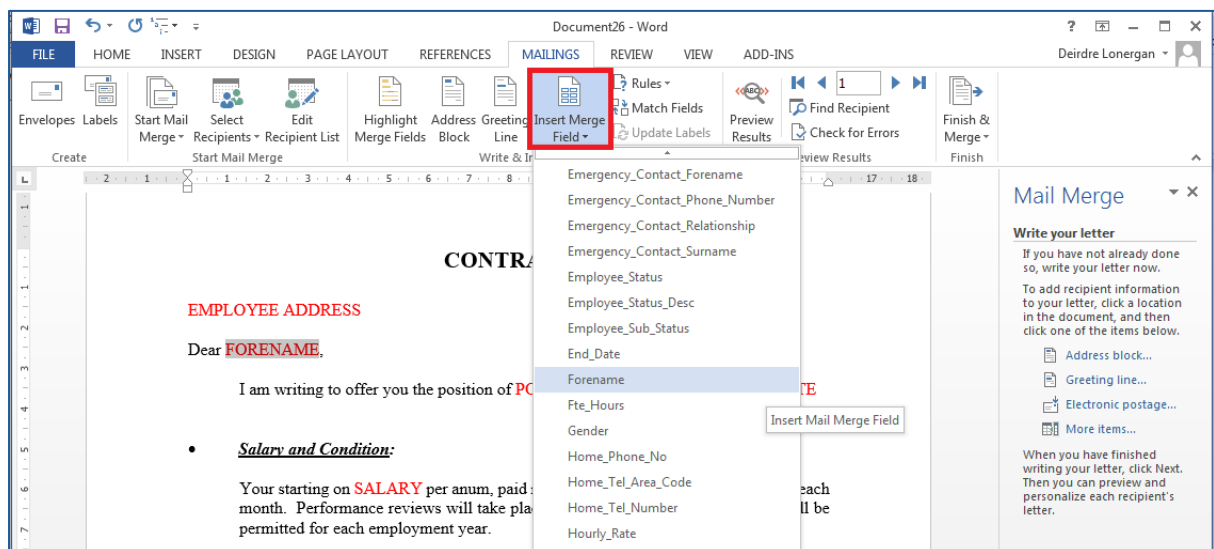

At this point, ensure the word document is populated with the template details as required e.g. the text for this sample employee contract.

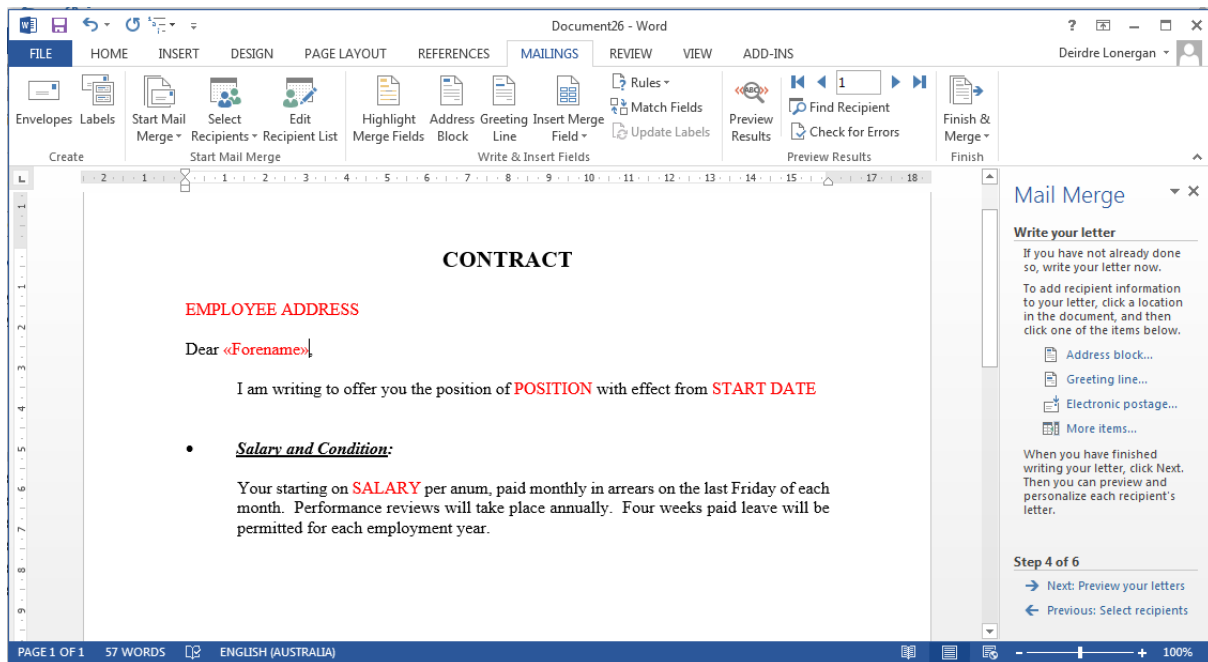

The variable fields in the template should now be mapped to merge fields from the data source i.e. the text highlighted in red in the above example should be linked to the data source to ensure that these items are replaced with employee / applicant data when the document is generated from the system.

To update the text items:

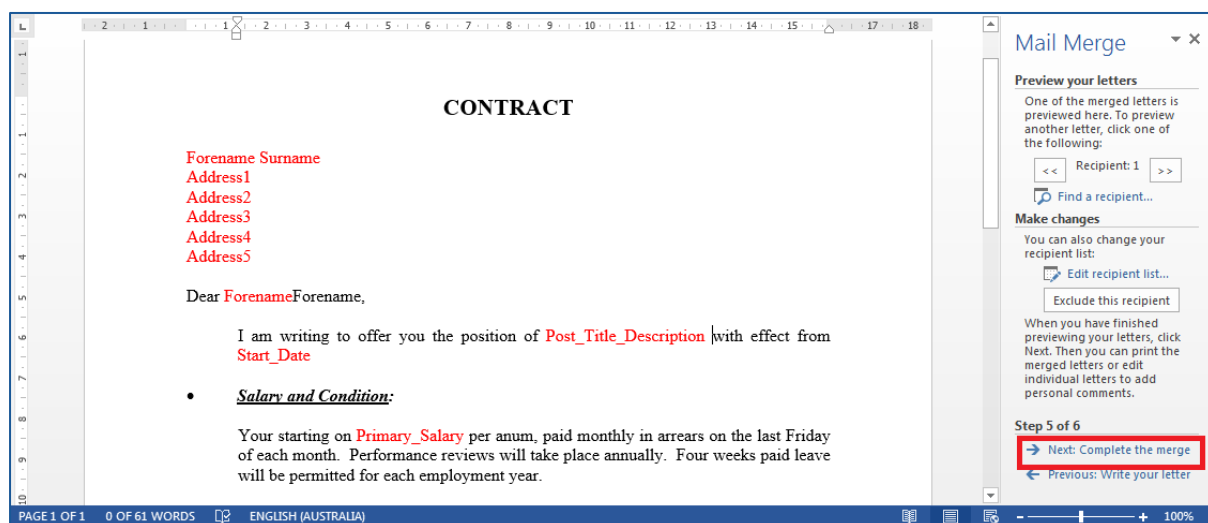

- Select the **Insert Merge Field** from the 'Mailings' ribbon and search for the required field e.g. 'Forename' will be used in this example:

- Click on the merge field and this will appear in the document. Merge fields that are active in a document will appear wrapped in << >> e.g. note how 'Forename' has been updated:

- Do this for all variable fields in the document.
- Once completed, select **Next: Preview your letters.**
- Step 5: Preview Your Letters
 - The document will update to populate the merge fields with the data held in the data source that has been linked. Remember, the data in the only row of the data source matches the field names, therefore the merge fields will simply update to display those field names again.

- Select **Next: Complete the Merge.**

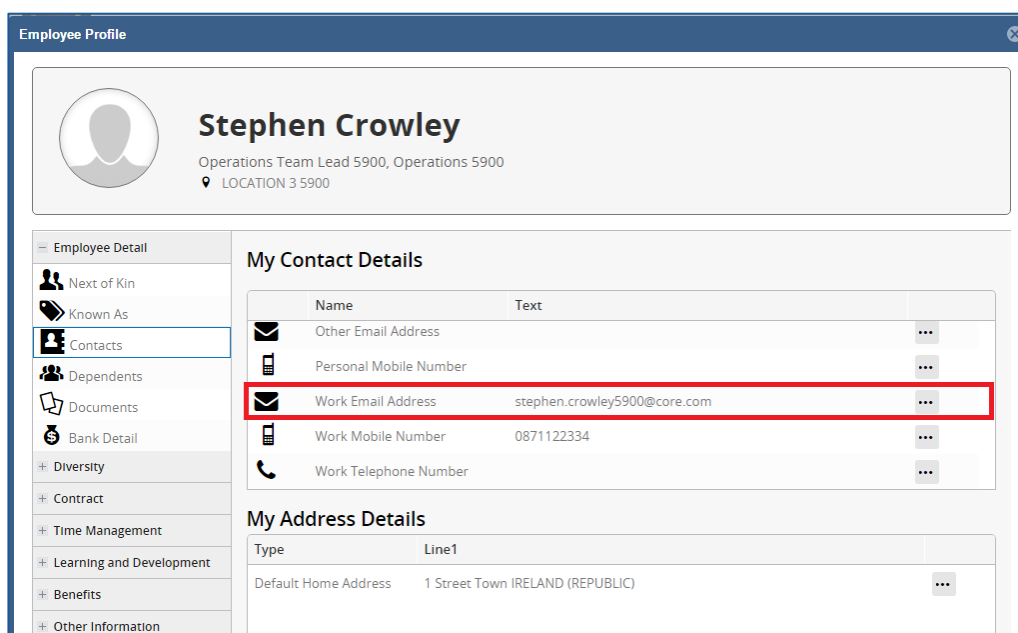

The MS Word document is now configured as a mail merge template using the CoreHR data source. This file should now be saved and is ready for upload to CoreHR as part of the document template setup as covered in [2.3.1 Create Template](#).

4.3. Email Addresses

When an email is generated for an employee / applicant / interview panel member, the 'to' email address is automatically populated based on the values stored for that person on the system.

These are the email address values used per person type:

Employee

Employee Profile

Stephen Crowley
Operations Team Lead 5900, Operations 5900
LOCATION 3 5900
