1. Release Notes Overview

Purpose of this Document

This document provides a list of the new, enhanced and optional features that have been delivered for each module in the v28 release of CoreHR.

For each individual feature release note, the following is provided:

- Summary / high-level description of the change
- Guidance on how to use this
- Any configuration / setup associated with it (if any)
- Any items to consider when using this feature, if upgrading from an earlier version to v28

Understanding Continuous Releasing

New to v28 is the introduction of new and enhanced functionality being brought into XD continuously.

Head to XD Hub to see what is Available and Coming Soon!

All of these changes are either New, Enhanced or Optional you will get updates on the XD Hub on how to set up this functionality **see Self Service**

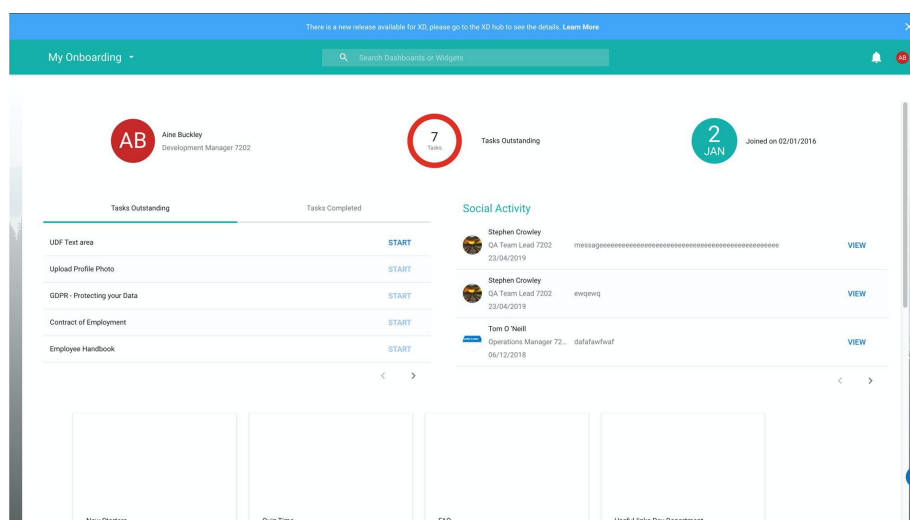

In v28 New features are seamlessly released to customer environments so customers will not go through further major upgrades. So robust functionality is continuously being added for customers to self-serve. Unlocking more value from the system by self-serving features via the XD Hub and no BAU disruptions while upgrading.

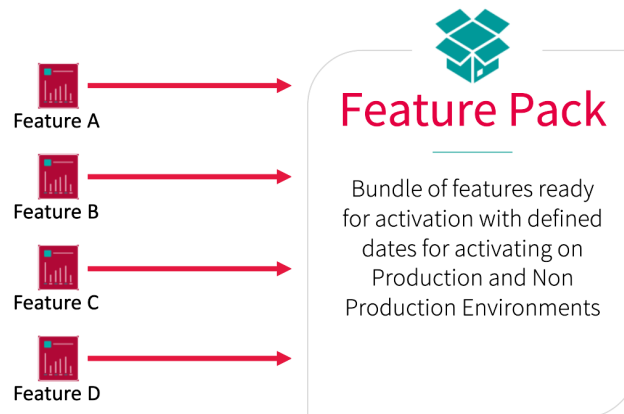

Feature Pack

Feature Packs are bundles of features ready for activation within defined dates for activating on Production and Non Production Environments. Each piece of functionality that is included under the new continuous releasing will be highlighted with a Feature Pack Logo and noted as Coming Soon!

In the background we will be creating new and enhanced functionality in stages, before introducing into **all** customer profiles:

1. Feature packs are created
2. Features are added to Feature packs
3. Feature pack updated with UAT and Live dates and published on XD Hub
4. User gets banner on screen to highlight new feature pack is launched

Self Service

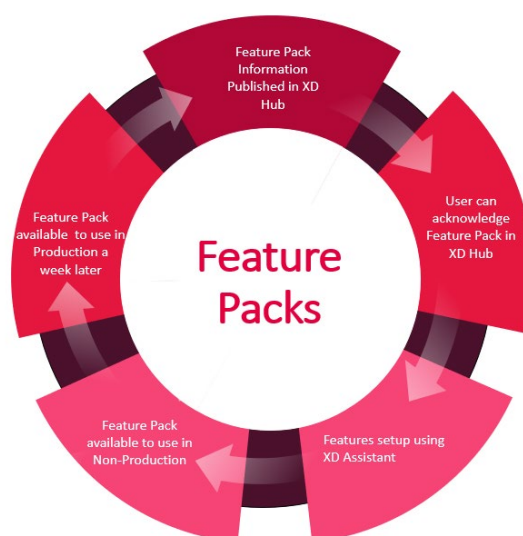

Once the Feature Pack information is published in XD Hub, the user can acknowledge the upcoming changes and complete the set up steps with the support of the XD Assistant. The feature will be then available to use in Non Production Environments and a week later on Production Environments.

Note:

The Feature Packs will be enabled on the environment whether acknowledgement is made or not.

Compulsory New & Enhanced Functionality will be enabled at General Release for all customers with the exception of Optional Functionality

XD Hub - Support

- **Feature Guides:** Description of all features since v28.
- **Minor Release Notes:** List of all since v28, published when available. Flags to identify when going to UAT/Live
- **Feature Packs:** List of features that are being made available in the latest feature pack and dates for activation on UAT and live
- **XD Assistant Guides:** Guides to download to the XD Assistant from the feature guide page. Self Service for administrators

Important Inclusions

Some new features will include a ★ next to the title in the contents page. This is to indicate that this is a particularly important addition in this release for that product.

All New Features are marked in each section with

New Feature

All Enhanced Features are marked in each section with

Enhancement

New or Enhanced Feature that is an Optional Feature

Optional Feature

Feature Pack Logo

New to v28 feature are marked with the Feature Pack Logo

Supporting Documentation

In addition to the release notes supplied in this document, additional user and configuration guides have been created for the more substantial changes in this version.

All these documents can be found [here](#) on the CoreHR University.

Where a document has been produced to support a new feature, this will be referred to in the release note for that feature and will include:

- Document name
- Link to the document on the CoreHR University

Each section will have the following box with description on any Supporting Documentation, Configuration Requirements, Upgrade Considerations and JIRA references

A white document icon with a pencil, on a teal background.	Supporting Documentation or eLearning Programs with interactive hyperlinks
Two interlocking white gears, on a teal background.	Is Configuration Required?
A white circular arrow, on a teal background.	Upgrade Considerations
A white lowercase 'i' inside a circle, on a teal background.	JIRA Reference

2. People Management

Employee Records

Enhanced Security Management for Joiners/Movers/Leavers

New Feature

From v28 it is possible to centrally manage CoreHR user security for employees as part of the joiner/mover/leaver processes on People Management.

New *Assign User Access* and *Assign Leaver Access* tasks can be added to the HR Task Lists, to automate the assignment/update of user access including:

- Menu Profiles
- Org Role Assignment
- System User (Data) Access

This greatly reduces the time taken to manage security and permissions, reducing the opportunity for errors or data breaches.

The following are key features of the new functionality.

- Copy access from an existing user to a new user
- Assign a user to a 'profile', which includes the menu profile(s) required for their role
- Access to the *Assign User Access* screen directly from the employee record, to manage the user's access outside of the JML processes
- Assign menu profile(s) to a group of users in bulk
- Assign 'leaver profiles' to employees that are leaving the organisation, to provide restricted access to the system for a set number of days after their Leave Date

	*Coming Soon* Full training on this feature is coming soon to CoreHR University.
	Is Configuration Required? Yes. Full guidance is provided in the associated user guide.
	Upgrade Considerations None.
	RR-1445

Employee Offboarding ★

New Feature

The Social Hub dashboard now caters for Offboarding as well as Onboarding and Cross-Boarding.

This is initiated when an employee is made a leaver on People Management and allows HR to create tailored offboarding journeys for different staff groupings.

The key elements of the Offboarding feature are:

1. Checklists

Assign checklists/tasks to employees to be completed as part of the leaver process.

Checklist tasks can be assigned X days before the employee's Date Left.

Checklist tasks can be assigned by criteria group, allowing HR to define different tasks for employees in different parts of the organisation, for permanent/temporary staff etc.

2. Pages

Pages can be assigned to employees to consume additional content created for them as part of their leaver journey.

3. Surveys

Surveys are new to Onboarding/Offboarding in v28 and allow HR to provide a questionnaire to the leaver to complete. The survey can be added as a checklist item for the leaver.

4. Reviewing Employee Documents

In v28, you can share documents that have been stored on the employee's CoreHR record with them to review as part of a checklist task, during the offboarding process.

5. Notifications

The *Notifications* have been extended in v28 to ensure that reminders/updates are triggered for Offboarding checklist tasks, as well as Onboarding.

6. Offboarding Progress

New *Offboarding Progress* options are available for HR on the *Command Centre* widget and Managers on the *My Team* widget.

	Training on this feature is available on CoreHR University below here .
	Is Configuration Required? Yes. Full guidance is provided in the corresponding user guide.
	Upgrade Considerations • Offboarding is not enabled by default. It requires its own configuration and setup, as per the user guide. The two options are mutually exclusive. • There is a distinct option to enable Offboarding on the <i>Activate</i> screen, allowing you to roll this out at a time that suits.
	RR-585

Employee Onboarding Enhancements**Enhancement**

The Onboarding/Offboarding functionality has been enhanced in v28 to include the following changes:

- **Surveys**

Bespoke surveys can be created to be added as a checklist item for Onboarding and Offboarding, allowing you to gain greater insight into your staff and help drive internal change. Customised surveys can be created for different employee groups, business lines, leavers etc using the checklist criteria group assignment.

- **Employee Documents**

Documents that are attached to the employee's HR record can be shared

- **Activate**

The *Enable* option has been relabelled to *Activate*, on the *Social Hub Configuration* wizard,

	Full training on this feature is available on CoreHR University below: Document names: <u>Employee Onboarding v28: How to Use - User Guide</u> <u>Employee Onboarding v28: How to Configure - User Guide</u>
	Is Configuration Required? Yes. In order to use the new <i>Surveys</i> and <i>Employee Documents</i> features, you will need to set these up via the Social Hub Configuration widget and update.
	Upgrade Considerations • Your existing Onboarding configuration can be updated to include the new features. • <i>Enable</i> has been relabelled to <i>Activate</i>.
	RR-585

HR Process Task Lists Enhancements

Enhancement

The HR Process Task List functionality has been enhanced in v28 to include a variety of new features.

1. Leaver Task Lists

A new *Leaver* tab is available on the *HR Task List* screen, which allows you to define a checklist of tasks to be completed when an employee is made a leaver on CoreHR e.g. to *Assign Leaver Access*.

2. Task Owners

Task list items can now be assigned to a specified owner to complete.

- The task ownership is identified using a specified org role/org group assignment
- For example, access to *Assign User Access* may be restricted to security administrators only.
- If a user is not the owner and doesn't have access to complete a task item, they will see the item on the Task List screen, which will flag the Org Role responsible for completing the task and they will be prevented from access the task itself.

3. Task List Restrictions

- Task list items can be restricted, allowing you to create tailored task lists for different employee categories and functions e.g. different task list items to be assigned to permanent v agency staff.
- This is achieved using criteria groups i.e. only assign this task if the employee is in one of the defined Criteria Groups.
- If no restrictions are set, the task is applicable to all employees.

4. New Specific UDF Task

A new task called *Specific UDF* is available to be added to all task lists. This allows you to select a specific UDF that you have set up on People Management for completion as part of the task.

5. Optional Information

The new *Optional Information* text field is available when configuring every task item. The information provided here is displayed to the user when completing the task, to give them further guidance on what they may need to do.

6. All Tasks are Mandatory

In earlier versions, tasks could be flagged as mandatory or optional.

From v28, all tasks are mandatory by default.

7. Tasks Can be Completed in Any Order

In earlier versions, tasks could only be completed in the order they were presented on screen i.e. you couldn't complete task 2 before task 1.

From v28, tasks can be completed in any order.

8. Task List Completes Automatically

In earlier versions, when all tasks were completed a user was required to complete the task list as a separate action,

From v28, when all items on a task list are complete, the task list automatically completes, and the additional step is no longer required.

See *Upgrade Considerations* below for further details on how customers can continue to use the manual completion if desired.

9. Notifications

There is an option to enable/disable notifications on the *Data Centre > HR Task List* configuration screen. This setting is applied to all tasks lists for all users.

If on, daily notifications are triggered to send to users via the *Notification Centre*, with task list items to complete. Here they can click on the task and jump straight to the *Onboarding Progress* screen to complete it.

The text in the notification is controlled via the *Site Admin > Language Pack*.

10. Outstanding Processes Screen

A new screen called *Outstanding Processes* can be added to the *Command Centre*. This gives a user a view of all the task lists that are currently outstanding for joiners, movers, leavers that they have created.

They also have visibility of task lists for other employees that they have access to on People Management, so that they can complete tasks for them if required.

	Updated User Guide on this feature is available here on the CoreHR University.
	Is Configuration Required? Yes. Full guidance on how to use and configure the new features is available in the corresponding user guide.
	Upgrade Considerations Task List Autocompletion: For customers already using task lists pre-v28, a new task list item called 'Mark as Completed' is automatically added to all task lists currently in use. This replaces the previous option to manually mark the task as completed. You can choose to remove this from the task list if you wish.
	RR-1530

New Payroll Instruction Forms★**New Feature**

Payroll Instruction Forms can now be completed in People Management by HR, in order to capture and automatically share pay-affecting information with Payroll, as part of the joiner/mover/leaver processes e.g. holidays to be paid to a leaver, student loans for a new hire etc.

- The *Data Centre > Configure Custom Forms* screen allows you to create as many bespoke forms as required, to capture different information for each process, each business group/set of employees e.g. the leaver information form may differ for permanent v agency staff.
- A new task called *Payroll Instruction Form* can be added to all task lists. Using the new *Restricted To* indicator, you can associate the form with the required group of employees. The *Task Owner* also allows you to designate who should complete this in HR if required.
- Once the task list is completed as part of one of the joiner/mover/leaver processes, it is shared with Payroll via the *Pay Portal > Pay Group > Approvals* screen.

	User Guide: Full training on this feature can be found in the following User Guide on the CoreHR University: <u>People Management v28: Payroll Instructional Forms - User Guide</u>
	Is Configuration Required? Yes. Full guidance on how to use and configure the new feature is available in the corresponding user guide.
	Upgrade Considerations None
	RR-1530

Copy New Starter Process ★

New Feature

The new Copy New Starter process allows the hr administrator to create a new employee on People Management, as a copy of an existing employee.

- An option called **New Starter Copy** is now available on the **Actions** button on the employee record.

- Clicking this will copy the current employee's record and open the *Create New Employee* wizard.
- Only step 2 of the wizard is copied i.e. the Post and Organisational Structure.
- The *Contract Details* on Step 3 will default to include the details from the Post, as per the standard process.
- Steps 1, 3 and 4 are not copied directly from the original employee record.
- If the original employee is a member of a Roster Team Area, this is also assigned to the new employee. This is effective from the new contract start date and does not assign future team area assignments.

	The following user guide has been updated here to include the above changes. People Management v28: New Hire Contracts - User Guide
	Is Configuration Required? Yes. The following menu option is required to see the Actions > New Starter Copy option on the employee record. System: People Management Menu Option: Copy New Starter
	Upgrade Considerations None.
	RR-1554

Incoming tab on Transfer Requests

Enhancement

By default, the *Incoming* tab on the Transfer Request screen shows the user all incoming requests for employees based on their People Management hr data access.

New parameters have been introduced to override this to allow you to only show incoming requests for employees in a particular org structure level. For example; Department.

When this is enabled:

- The request will be stamped with the Department that the user requesting the transfer resides in.
- A user will only see requests for employees in their own Department.

	Updated User Guide for v28 can be found here on the CoreHR University
	Is Configuration Required? Yes. 2 new parameters are available on the <i>Site Manager > Admin Settings</i> screen. Update these to use the new feature. • Hr_restrict_transfers Set to 'Y' to enable this feature. • Hr_org_transfer_display Set to the code for the required org level e.g. 'DEPT'.
	Upgrade Considerations None.
	RR-1515

Post Management Coming Soon!

Enhancement

Post Profile Creation & Maintenance Process

Post Management screens have been updated to be aligned with the modern UI, which features across CorePortal as standard. As part of the Post Management area in People Management, enhancements have been made to the UI and UX design, each screen has become more reliable and more efficient when creating and maintaining the post profile items.

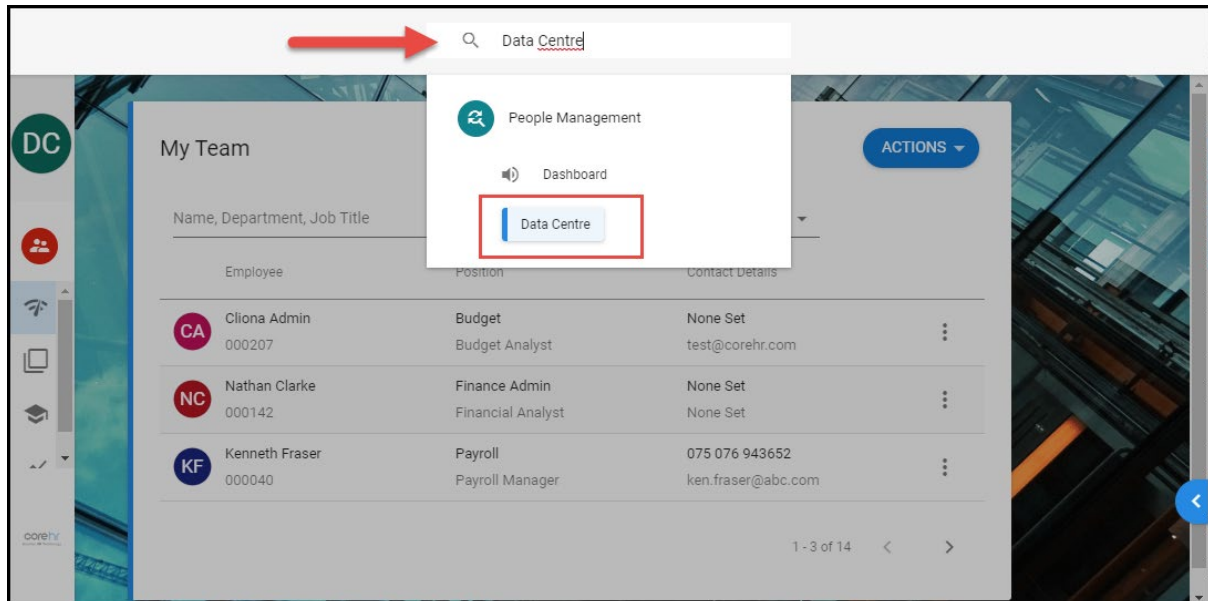

Old Screen	New Screen
Terms and Conditions Setup	Yes
Post Profile Maintenance	Yes
View Post Appointments	Yes
Post Appointment Maintenance	Yes (via View Post Appointments)
Appointment History	No
Post Management Parameters	Yes

Key Takeaway Points:

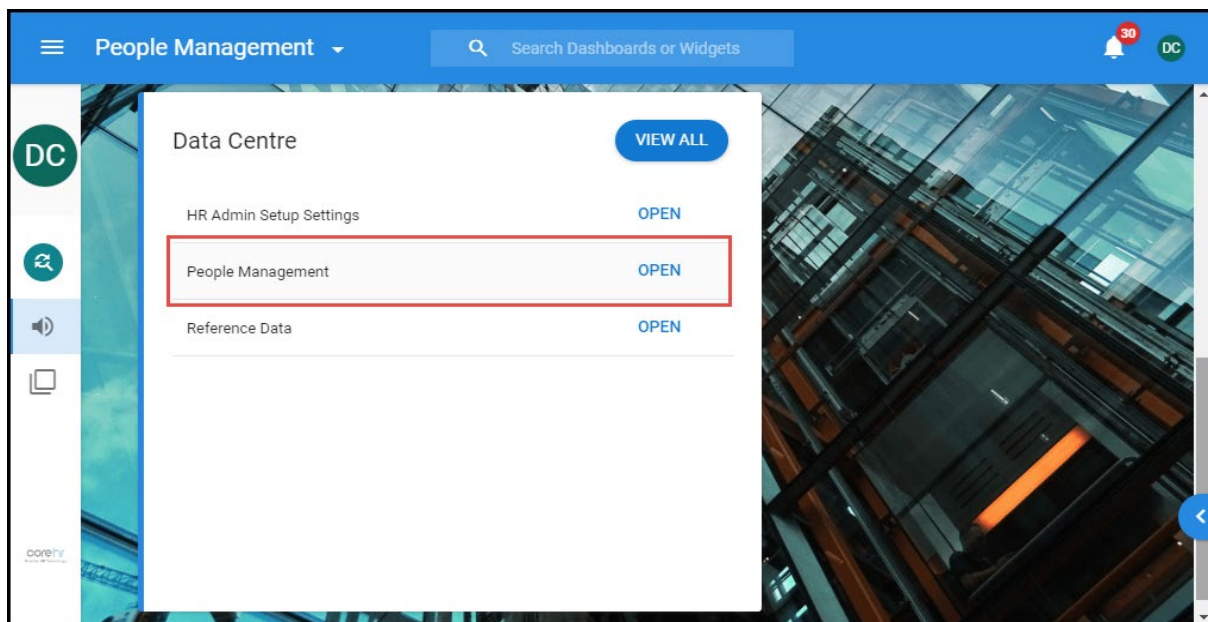

- Existing users will notice a change in available options via the Data Centre i.e. less options.
- Existing users that may have used the post appointment maintenance will now use the view appointments option.
- Existing users that may have used the appointment history screen will not have the screen available i.e. they will need to use already available/coming soon functionality or revert to back office for specific use cases e.g. create historic sequences.
- Same existing menu options apply to new screens.
- New screens are not an exact replica of back office screens e.g. no job title entitlement, competencies on post profile screen.

The Post Profile Maintenance screens have been updated to align with CoreHR's modern UI. To view these refreshed screens:

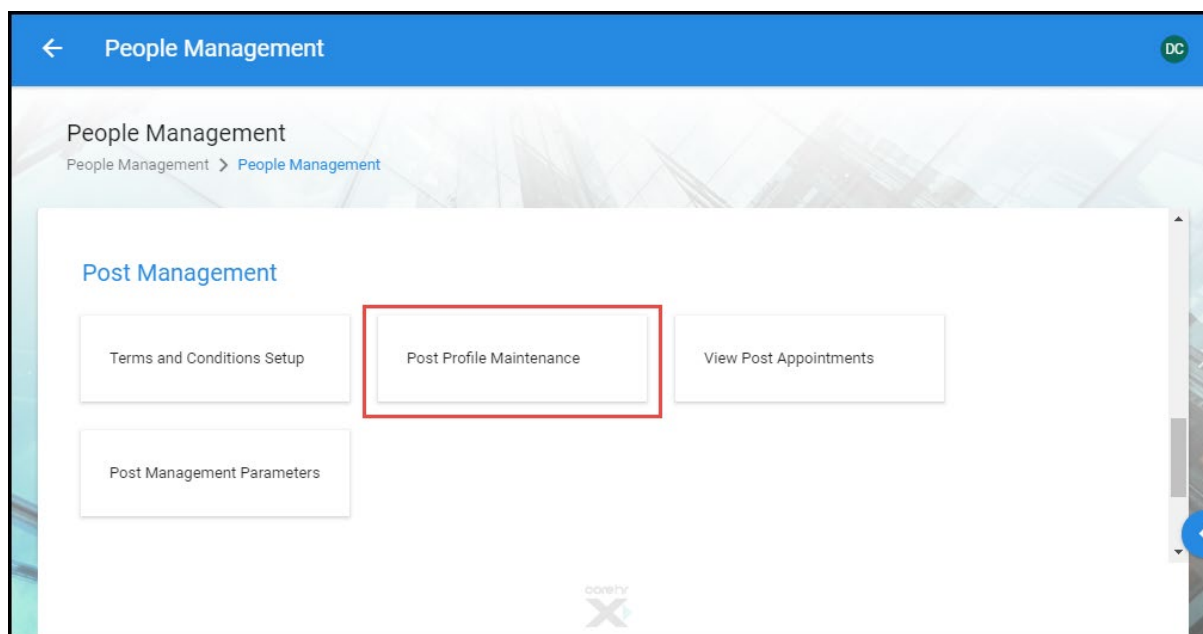

1. Quick Jump to the *Data Centre*.

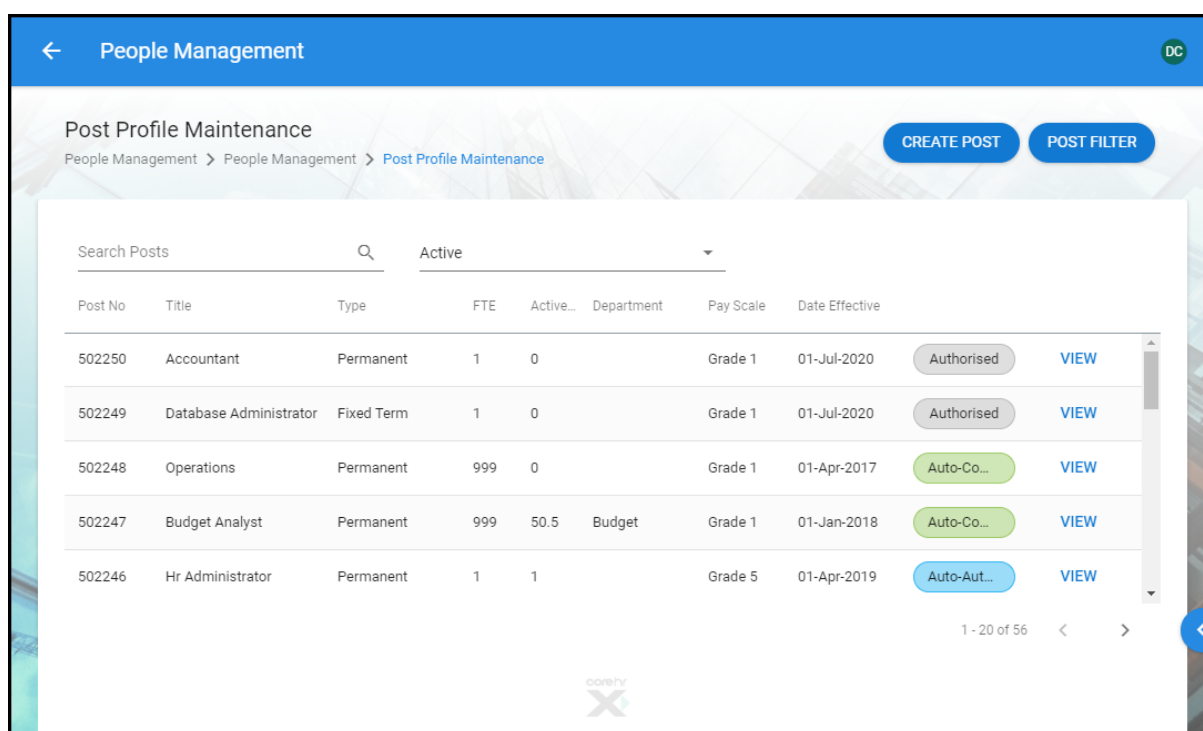

2. Click on the Open button which corresponds to People Management.

3. Go to the *Post Management* section.
4. Click on the *Post Profile Maintenance* card.

5. This opens the new *Post Profile Maintenance* screen.

The following table shows what is available on this screen:

Item	Description
Search Posts	This allow you to search on a post number or a post title.
Create Post	This allows you to create a new post using the post creation wizard.
Post Status Filter	This allows you to filter on Active or Dormant post profiles
Post Filter	This allows you to filter on additional post profile items such as auto-authorised, auto-commenced, category or hierarchy attributes.
Post No	This shows the post number of the post profile.
Post Title	This shows the name of the post profile
Post Type	This shows the type of the post profile, if it is Permanent, Fixed Term etc
FTE	This shows the total Full Time Equivalent (FTE) posts available on a post profile
Active FTE	This shows the current active FTE within a post profile.
Department	This shows the post profiles set department on creation of the post.
Pay Scale	This shows the post profiles Pay Scale.
Date Effective	This shows the date which employees can only be created on or after this date on the post profile.
Authorised Status	This shows the one of the following statuses against a post profile: • Authorised • Auto-Authorised • Auto-Commenced

Post Profile Creation Wizard

Enhancement

The Post Profile creation wizard has been updated to the modern UI. This follows the same hierarchy process as the new starter wizard.

The screenshot shows the 'Post Profile Wizard' interface in the 'Post Profile Maintenance' section. The wizard is at step 1, 'Organisational Structure'. The breadcrumb trail is: People Management > People Management > Post Profile Maintenance > Post Profile Wizard. The form contains four dropdown menus: 'Structure *', 'Company *', 'Management Unit', and 'Department'. To the right of these is a 'Customer Group Name' dropdown. A 'NEXT' button is at the bottom right. The sidebar on the left shows step 1 as the active step, with step 2, 'Post Details', listed below it.

The Post Details steps borrow from the standard wizard functionality, seen across other areas of the modern UI in CoreHR, and is broken down into three sections.

1. Overview

- a. This includes the Effective Date, Post Title, Post Type and if it requires manual authorisation or commencement.

The screenshot shows the 'Post Profile Wizard' interface in the 'Post Profile Maintenance' section, now at step 2, 'Post Details', specifically the 'Overview' section. The breadcrumb trail is: People Management > People Management > Post Profile Maintenance > Post Profile Wizard. The form contains three fields: 'Effective Date *' with the value '01-Apr-2021' and a calendar icon, 'Post Title *' with the value 'CUST - Customer Support Analyst' and a dropdown arrow, and 'Post Type *' with the value 'P - Permanent' and a dropdown arrow. At the bottom right are 'PREVIOUS' and 'SAVE' buttons. The sidebar on the left shows step 2 as the active step, with step 1, 'Organisational Structure', listed above it.

2. Details

- a. This section includes information such as the post profile's FTE, Pay Scale, Category and Hours.

The screenshot shows the 'Post Profile Maintenance' interface. At the top, there is a blue header with a back arrow, the title 'Post Profile Maintenance', and a 'DC' indicator. Below the header, the 'Post Profile Wizard' is displayed with a breadcrumb trail: 'People Management > People Management > Post Profile Maintenance > Post Profile Wizard'. On the left, a vertical sidebar shows two steps: '1 Organisational Structure' and '2 Post Details', with '2 Post Details' being the active step. The main content area is titled 'Details' and contains three input fields: 'Pay Scale*' (a dropdown menu), 'FTE*' (a numeric input field with up/down arrows), and 'Comments' (a text area). At the bottom right, there are two buttons: 'PREVIOUS' (blue) and 'SAVE' (green). A 'corehr' logo is visible in the bottom center.

3. Additional Details

- a. This section includes additional optional information such as Funding Expiry Date or a Staff Request (Requisition) Number.

The screenshot shows the 'Post Profile Maintenance' interface, specifically the 'Additional Details' section. The header and breadcrumb trail are identical to the previous screenshot. The sidebar shows '1 Organisational Structure' and '2 Post Details', with '2 Post Details' being the active step. The main content area is titled 'Additional Details' and contains three input fields: 'Funding Expiry Date' (a date picker), 'Requisition No' (a text input field), and 'Estimated Annual Cost' (a numeric input field with up/down arrows). At the bottom right, there are two buttons: 'PREVIOUS' (blue) and 'SAVE' (green). A 'corehr' logo is visible in the bottom center.

Edit Post Screen

Enhancement

The Post Profile edit screen has also been modernised and updated to CoreHR's updated UI and UX design. The image and table below highlight the details that can now be viewed and edited on this screen.

The following table shows what is available on this screen:

Item	Description
Effective Date	This shows the earliest date that an employee can be created against this post.
Post Number	This shows the post number of the post profile.
Post Title	This shows the name of the post profile
Organisational Structure	This shows all the hierarchy attributes that have been defined against this post. These will link back to the organisational hierarchy data tree.
Post Details	This shows the following three sections of a post: 1. Overview 2. Details 3. Additional Details
Cost Allocations	This allows you to view and add any cost allocations to the post profile.

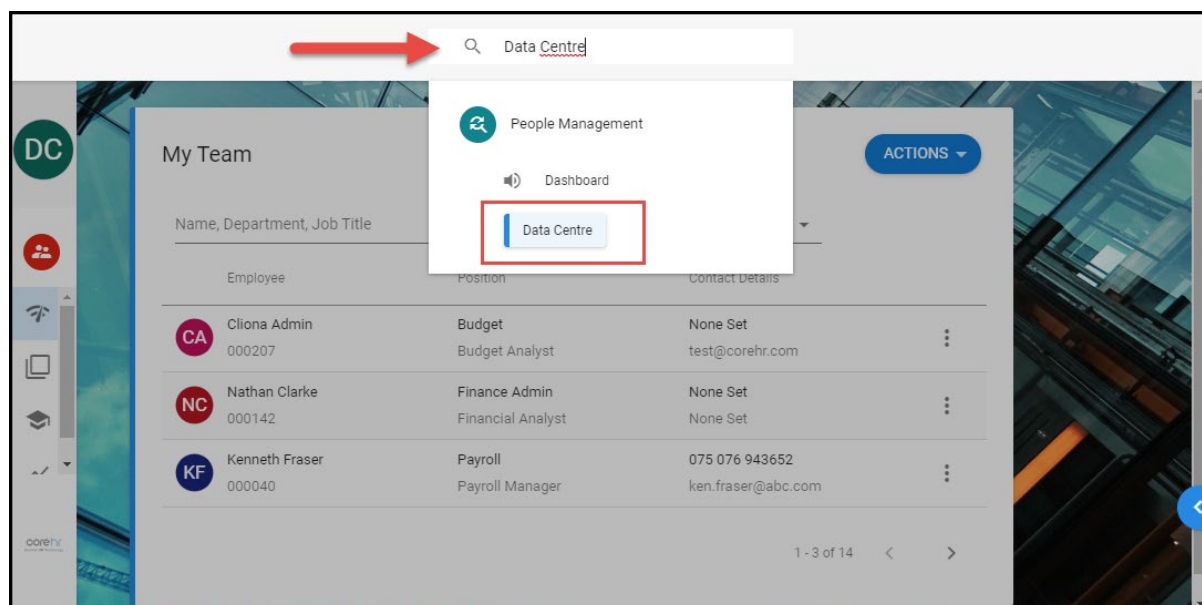

Pension Schemes	This allows you to view and add any post pension schemes.
FTE Maintenance	This gives an overview of the changes and updates made to the post profiles FTE over its lifespan.
View Appointments	This allows you to view all post appointments (contracts) that have been built using this post profile.
Terms and Conditions	This allows you to initially select a terms and conditions type for a post and then edit and review the details of the T&C profile
Actions	The following actions are available on the Edit Post screen: • Make Post Dormant • Update FTE • Transfer FTE • Delete Post Profile

View Post Appointments

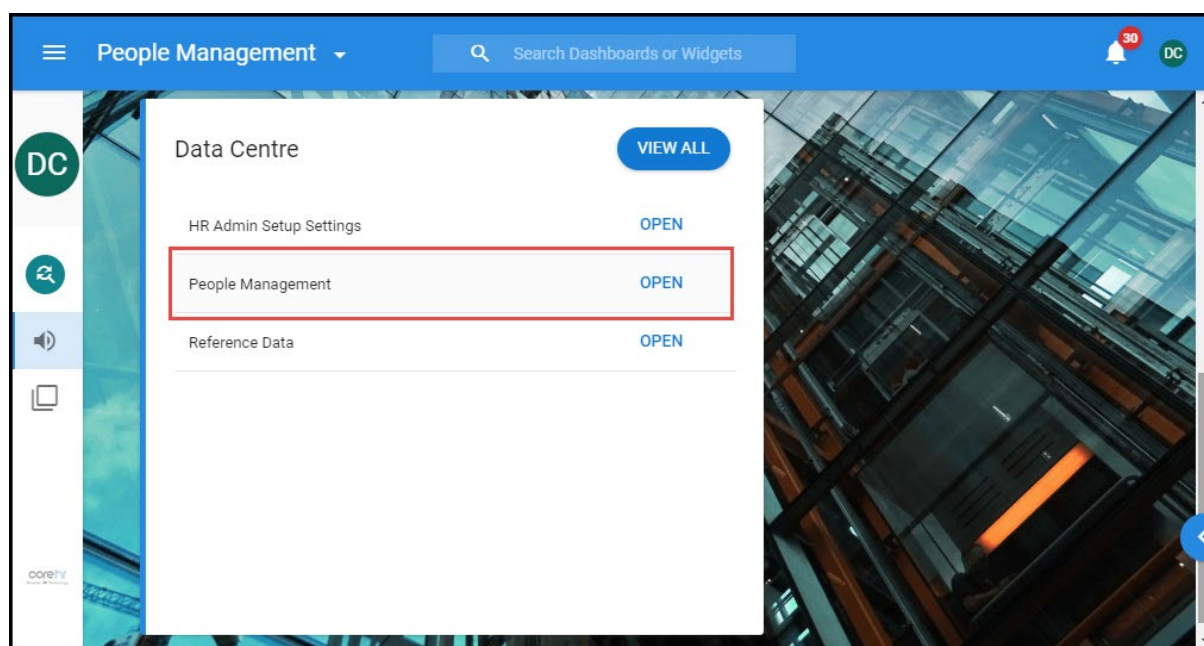

Enhancement

The View Post Appointment screens have been updated to align with CoreHR's modern UI. To view these refreshed screens:

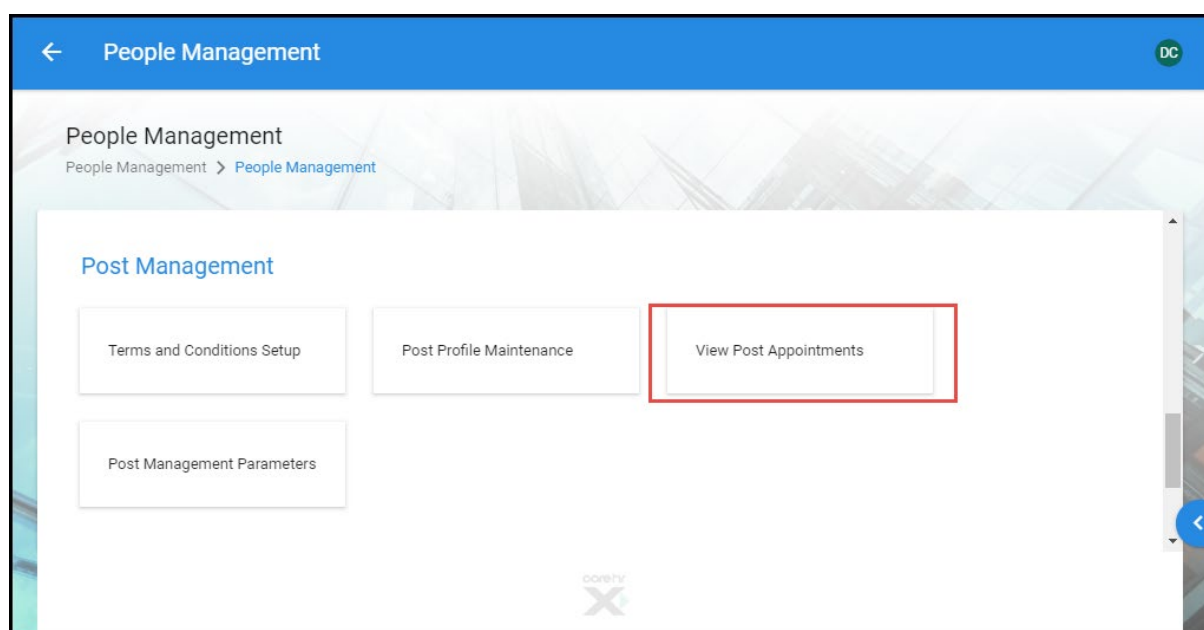

1. Quick Jump to the *Data Centre*.

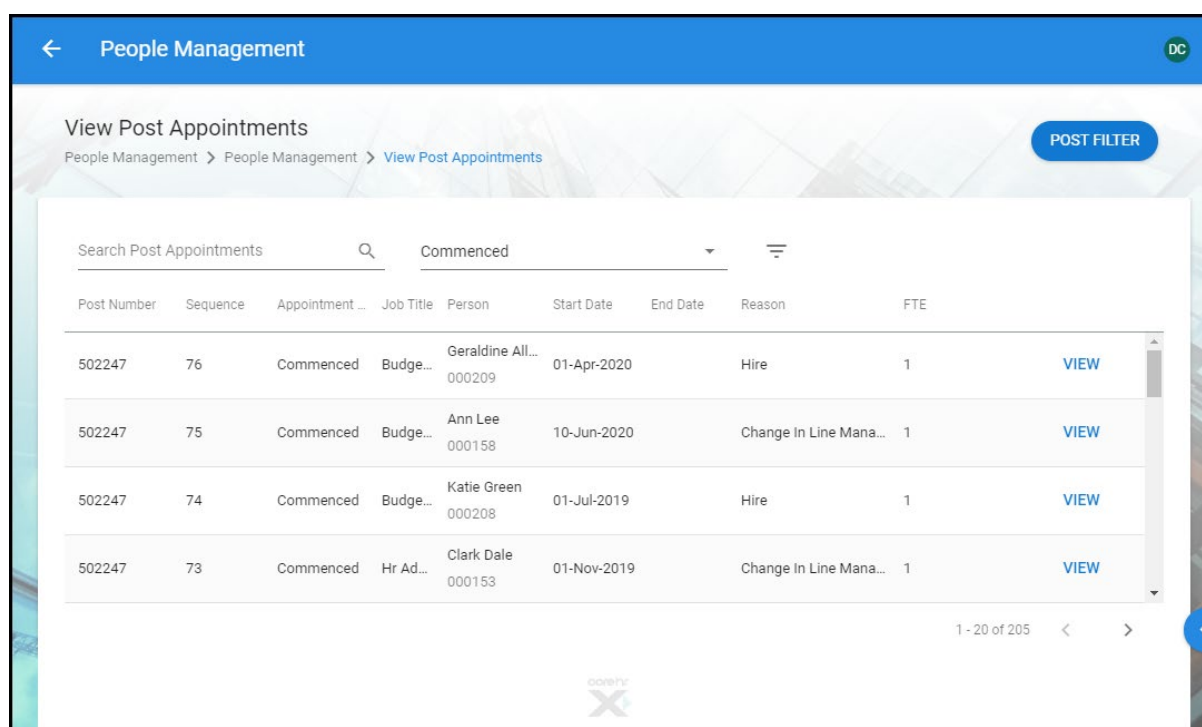

2. Click on the Open button which corresponds to People Management

3. Go to the *Post Management* section.
4. Click on the *View Post Appointments* card

5. This opens the new *View Post Appointments* screen.

The following table shows what is available on this screen:

Item	Description
Search Post Appointments	This allows you to search by Post Number or Job Title
Post Filters	This allows you to search using other filters search as Appointment Status, Hierarchy Details and non-Hierarchy Details.
Post Number	This shows the post number
Sequence	This shows the unique post sequence
Appointment Status	This shows the appointment status of each Post Appointment
Job Title	This show the specific Job Title of the appointment. This can differ than the Post Title.
Person	This shows the employee's name and personnel no
Start Date	This shows the employee's start date in this post appointment
End Date	If the appointment status is ended, this shows the employees end date of this post appointment.
Reason	This shows the reason the employee was appointment into the post appointment, or the reason it has been ended
FTE	This shows the value of post appointment's FTE

Post Management Parameters

Enhancement

- Post Management Parameters screens updated to modern UI

The screenshot shows the 'Post Management Parameters' screen within the 'People Management' section. The header bar is blue with a back arrow and 'People Management' text, and a 'DC' icon in the top right. Below the header, the title 'Post Management Parameters' is displayed, followed by a breadcrumb trail: 'People Management > People Management > Post Management Parameters'. The main content area contains three toggle switches: 'Restrict Job Title' (off), 'Restrict Hierarchy' (off), and 'Restrict Workgroup' (off). Below these, there is a text input field for 'Post Analysis Label' and a numeric input field for 'FTE Decimal Places *' with the value '6'. A green 'SAVE' button is located in the bottom right corner. The background features a faint geometric pattern.

Terms and Conditions

Enhancement

- Terms and Conditions Setup screens have been updated to the modern UI.

The screenshot shows the 'Terms and Conditions Setup' screen within the 'People Management' section. The header bar is blue with a back arrow and 'People Management' text, and a 'DC' icon in the top right. Below the header, the title 'Terms and Conditions Setup' is displayed, followed by a breadcrumb trail: 'People Management > People Management > Terms and Conditions Setup'. The main content area features a search bar labeled 'Search Terms and Conditions' with a magnifying glass icon and an 'ADD' button. Below the search bar is a table with the following columns: Template, Description, Reference 1, Reference 2, and Active. The table contains six rows of data. A vertical scrollbar is visible on the right side of the table. A green 'SAVE' button is located in the bottom right corner. The background features a faint geometric pattern.

Template	Description	Reference 1	Reference 2	Active
FT	Fixed Term	Fixed Term		☒
FIXT01	Fixed Term Full Time	Fixed Term	Abc Solutions	☐
FIXT02	Fixed Term Part Time	Fixed Term	Abc Solutions	☐
GR6	Grade 6			☒
PERM01	Permanent 01	Permanent	Abc Solutions	☒
GEN	Standard Terms And Conditions	Abc Solutions		☒

	Full training is available in the following User Guides on the CoreHR University: Managing Post Profiles - User Guide Terms and Conditions - User Guide
	Is Configuration Required? No. All existing configuration and post profile data remain as is. The changes here refer to UI / UX design updates.
	Upgrade Considerations Please be aware that the functionality for creating and maintaining post profiles has been improved by enabling this change. The key concepts of post management remain the same, however the processes behind this feature has been updated to reflect CoreHR's modern UI.

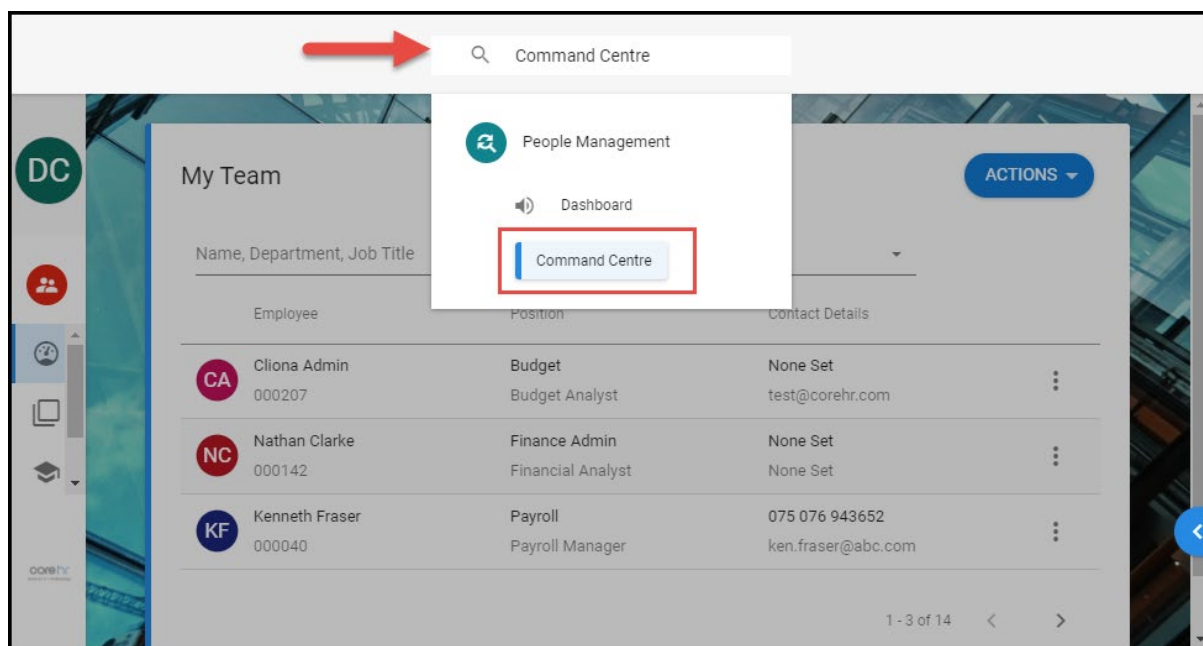

Probation / Allowances 🎁 Coming Soon!

Copying Probation & Allowance Details

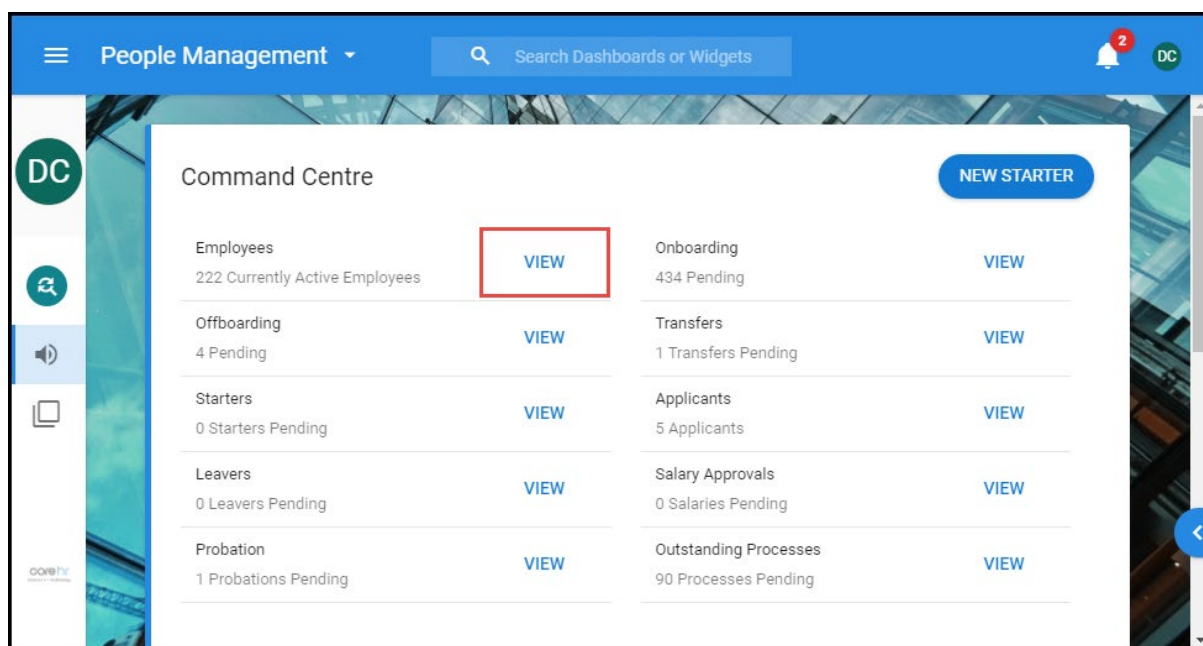

New Feature

There has been a change in how a person's probation and allowance details can be managed when replacing an employee's contract or transferring an employee.

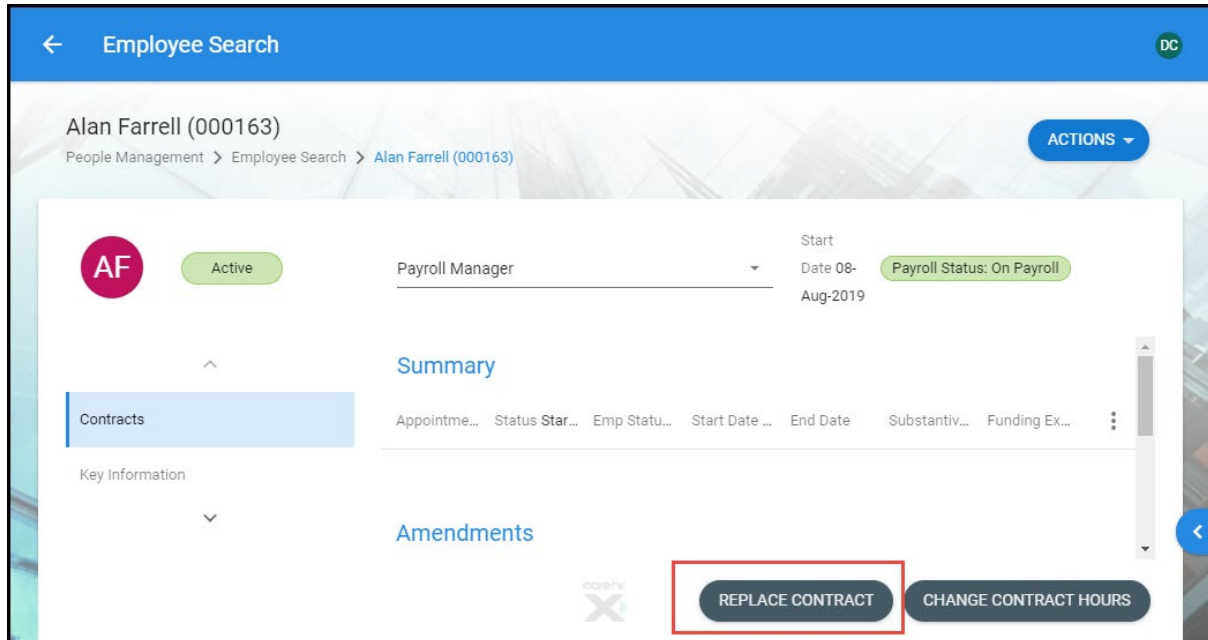

1. Quick Jump to *Command Centre* on the *People Management* dashboard.

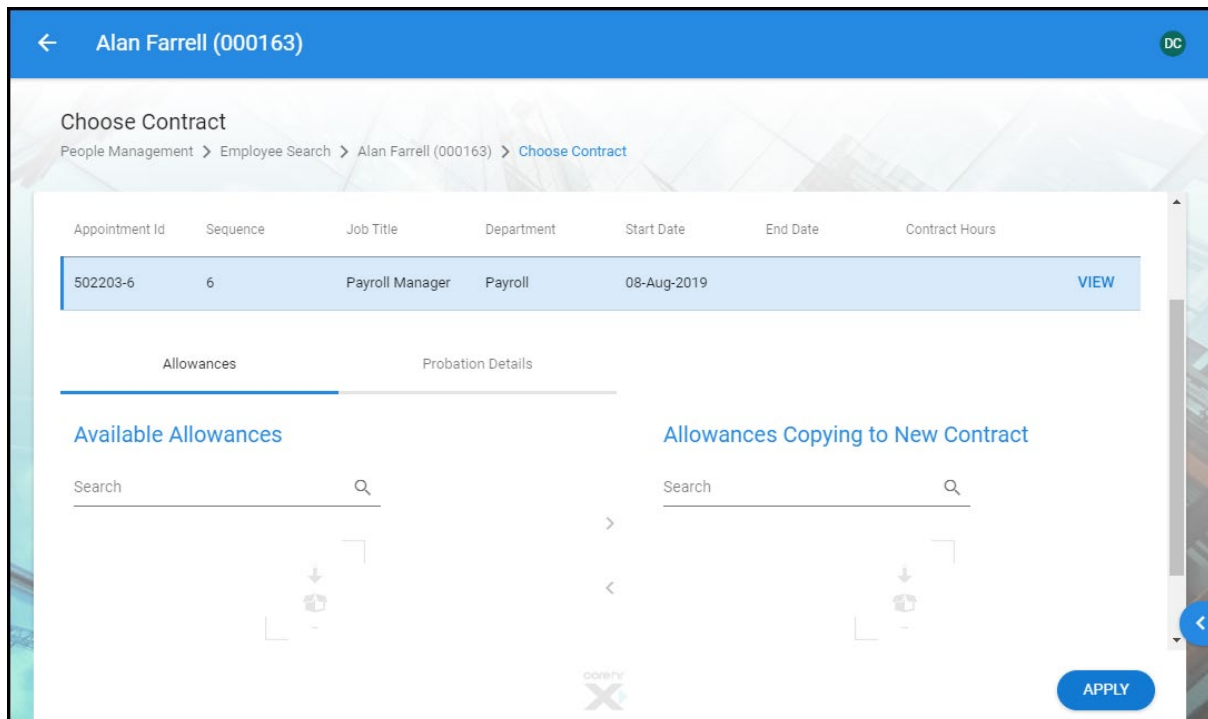

2. Click on the **View** button which corresponds to the Employee section.

3. Search for an employee to replace an employee's current contract
4. Drill down into their contract record.
5. Click on the *Replace Contract* button.

6. This opens the *Choose Contract* screen.
7. Two tabs are available to select from: **Allowances** and **Probation Details**

← Alan Farrell (000163) DC

Choose Contract

People Management > Employee Search > Alan Farrell (000163) > Choose Contract

[APPLY](#)

- On replacing or transferring, depending on the values manually chosen or the values set by the admin in the rules above, the allowances and probation details will be copied over.

	Full training is available in the following User Guides on the CoreHR University: Probation Dates – User Guide HR Allowances - User Guide
	Is Configuration Required? Yes. 1. New Follow Person Rule available in Pay Code Wizard for creating probation and allowances. 2. New General Parameter HR_COPY_PROBATION_DETS available to be enabled or disabled.
	Upgrade Considerations None
	JIRA ID: HR-564

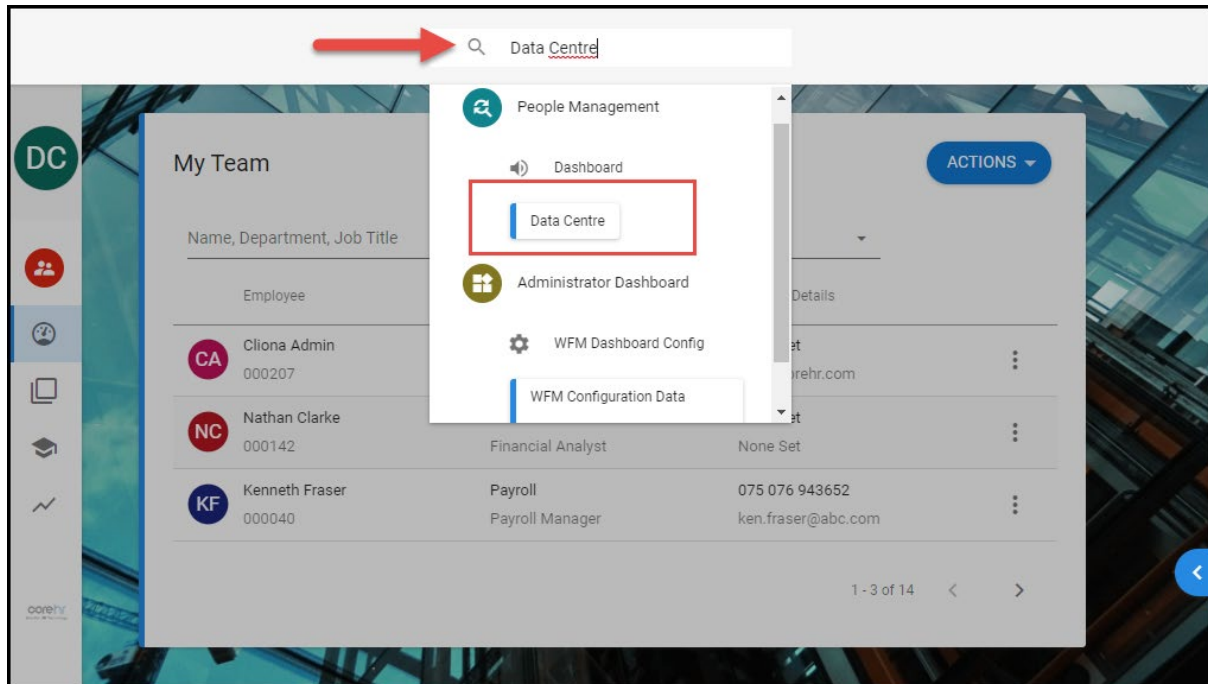

Structure Setup Coming Soon!

Auto-Fill Hierarchy Feature

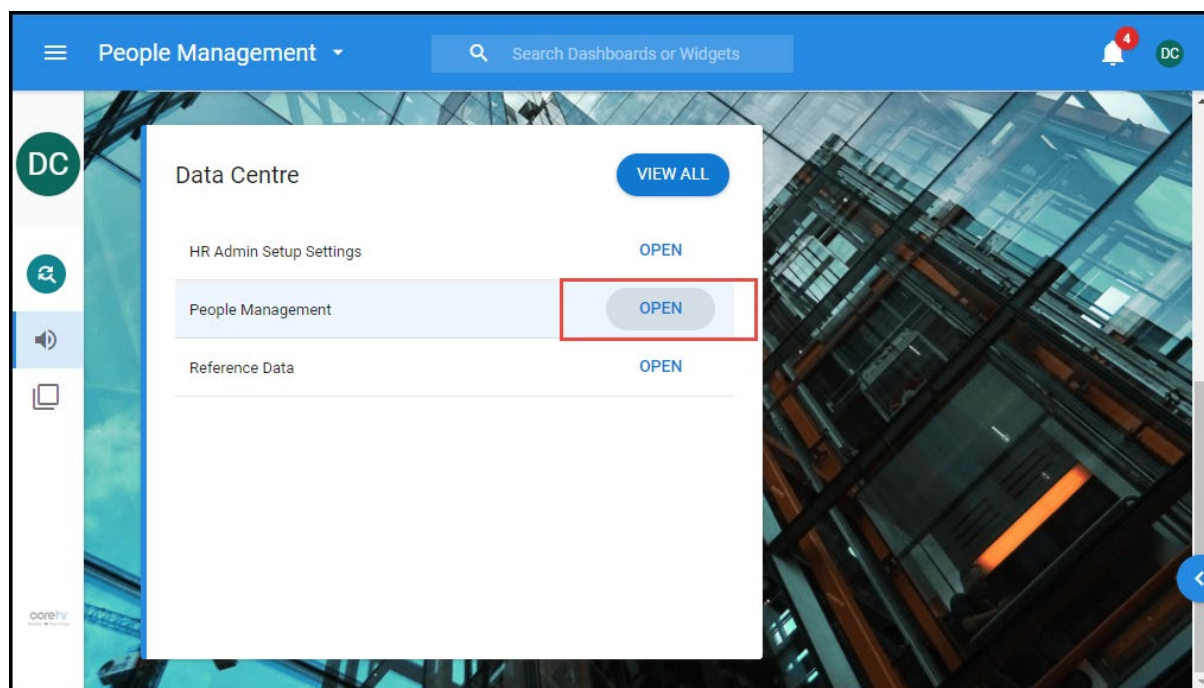

New Feature

This improvement is available through the Contract wizards, Staff Request wizard and Create Post wizard on People XD Portal. This new feature is not available through back office.

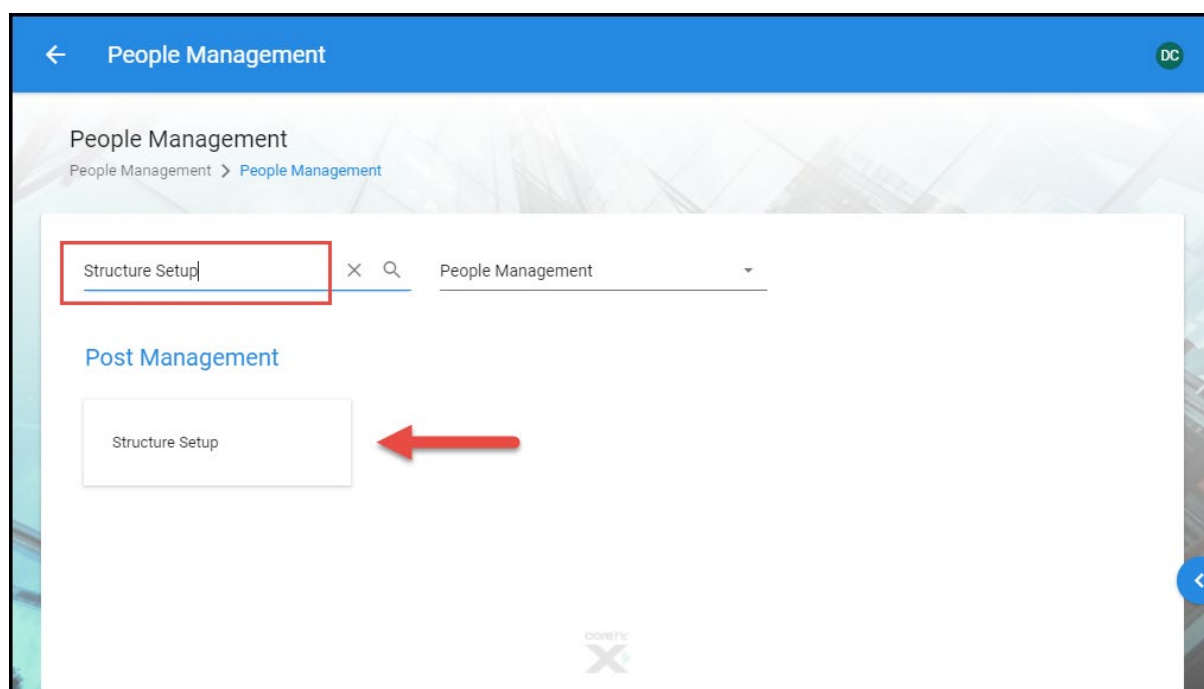

1. Quick Jump to the *Data Centre* on the People Management dashboard.

2. Click on the **Open** button alongside the *People Management* label.

3. Search for *Structure Setup* and click on the corresponding button.

4. The *Structure Setup* screen opens in read-only mode.
5. Open a structure to enable the Autofill Level Type.
 - a. Decide on the level from which the hierarchy is to be auto-filled from i.e.
 - i. Company
 - ii. Division
 - iii. Management Unit

iv. Department

Auto-Filled Post Profile Wizard

New Feature

On the Post Profile creation wizard, select a structure and follow this up with selecting the reference data from the auto-fill configuration. For example, in the image below, the auto-fill configuration is setup at Department level. Therefore, when a chosen Department is selected, the levels above it are automatically completed.

1. Company: ABC Solutions
2. Division: Sales & Marketing
3. Management Unit: Sales
4. Department: Menswear

Terms and Conditions

Auto-Assign Terms and Conditions

Enhancement

General and Balance information specified with the terms & condition's template can now automatically be completed for HR users when a task list is generated. The automation of the general and balance information requires task lists to already be in use with terms and conditions added as steps. Once those steps are in place the automation is enabled by switching on a new parameter:

Admin Setting	Description
HR_AUTO_ASSIGN_TERMS	This automatically completes the terms and conditions general and balances section on an employee's task list.

The screenshot shows the 'Search for Post' interface for John Horatio (000237). The user is active and their role is Budget Analyst. The task list is displayed with the following items:

Title	Completed By	Date Completed	Status
Terms and Conditions Balances	Declan Carey	10/Sep/2020 10:21:30	Complete
Terms and Conditions General	Declan Carey	10/Sep/2020 10:21:29	Complete
Terms and Conditions Pay			Outstanding

When a task list is created, these steps are automatically marked as completed in the Task List:

- Terms and Conditions Balances
 - Balances are activated.
- Terms and Conditions General
 - Probation details are populated.
 - Notice Period details are populated.
 - Increment Due Date is populated.

	Full training on this feature is available here on the CoreHR University. Document name: • People Management v28: Configuring Tasks Lists

Document Management

Improved Document Security

Enhancement

It is now possible to control at a document level the users that have access to delete specific document types.

The **Delete** button is only available in the below 2 scenarios

- The following menu options have been enabled on a user's profile:

System	Menu Option	Description
People Management	File Administrator	This gives a user full administrator access to view and edit all document types.
People Management	File Upload	This allows a user to upload a new file to an employee's record.

- User does not have the above menu options, but they have delete privileges assigned against the particular document type:

The screenshot shows the 'Security' page with a sub-header 'System Users'. Below this, there's a form for configuring user access. The 'Accounts' section has 'Portal' selected. The 'Username' field contains '000194'. The 'Security Type' is 'Document Access'. The 'Structure Code' is empty. The 'Access Level' is 'Document Type'. There are four buttons: 'Delete User Access', 'Copy User Access', 'Clear', and 'Show Access'.

Below the form is a table with columns: Reference Code, Description, Active, View, Add, Delete, and Edit. The table has three rows: CON (Contract Details), DIS (Disciplinary Details), and ESSG (General Documents). The 'Delete' toggle for the 'DIS' row is highlighted with a red box and a red arrow.

Reference Code	Description	Active	View	Add	Delete	Edit
CON	Contract Details	☒	☐	☐	☐	☐
DIS	Disciplinary Details	☒	☒	☒	☒	☒
ESSG	General Documents	☒	☐	☐	☐	☐

Salary & Allowances Management

Appointed / Pending Salary

Enhancement

The salary linked to an appointed or authorised contract / appointment now appears on screen with a status of planned, along with the value of the salary being shown

Cancelling a Future Allowance

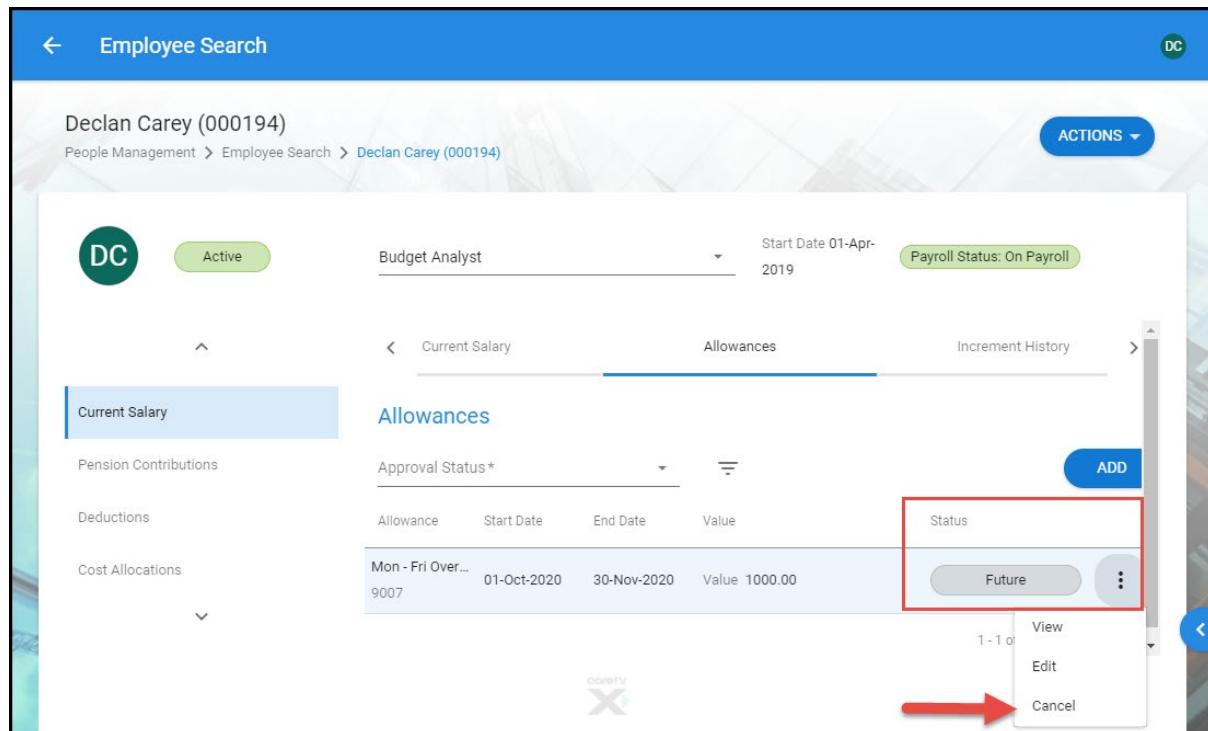

Enhancement

Users will now be able to cancel a future dated allowance, as long as the following conditions are met.

1. The following menu option has been enabled against the users profile

System	Menu Option	Description
People Management	Cancel Allowances	This allows a user to cancel an allowance.

2. The allowance is approved.
3. The person including the allowance is on Payroll.
4. The allowance is not cancelled already.

Salary Comments

Enhancement

When creating a new salary record for an employee via People Management, it is now possible to add a comment against each new salary record. The maximum character length that can be entered is 100 alphanumeric characters.

The screenshot shows the 'Amend Salary' form for employee Declan Carey (000194). The form includes fields for 'Actual Pay' (0 and 57000), 'Current Reason' (Hire), and 'New Reason' (Change Of Pay). A 'Comments' field is present with a red asterisk indicating it is required. Below the field, a message states 'This field is required' and '0/100'. A green 'SAVE' button is at the bottom right.

Comments appear against each employee record on the Current Salary screen on People Management.

The screenshot shows the 'Employee Search' page for Declan Carey (000194). The page displays a table of salary records. A modal window titled 'Salary Comments' is open, showing the comment: 'Updating Salary as discussed with management on 1st July 2020.' The table shows two salary records: one for £57,000.00 with a status of 'Pending' and a reason of 'Change Of Pay', and another for £0.00 with a status of 'Approved' and a reason of 'N/A'. The 'COMMENTS' column is visible for the first record.

Comments also appear during the approval process to ensure the approve has full visibility and clarity of this salary record.

General HRA Improvements

Rehire Person

Enhancement

Edit PPS / NI Number

An employee's PPS / NI number is now available to be edited during the rehire person wizard on People Management. This allows the user to update an employee's NI or PPS number if required and ensures that the field is populated with a unique number.

	Full training on this feature is available here on the CoreHR University. Document name: People Management v28: Rehires
	Is Configuration Required? Not required

	HR-560

Address Lookup

New Feature

A new lookup field has been added to address allowing users to search/auto-complete address information without the need to use or populate additional fields manually on the address setup

The address is mandatory and must be entered for all employees as part of the new starter setup or rehire process. When adding / editing employee addresses, an address lookup is now available. This is integrated with Google Maps technology. For example, it is possible to enter an employee's post code, select an address match and autofill the address record on screen.

Line 1 of the address component is a text field.

	Is Configuration Required? Not required
	Upgrade Considerations None
	HR-567

Personal Data Security**Enhancement**

Users are no longer able to view the employee's date of birth within the *Duplicate Employee Check* screen when creating a new starter or rehiring a dormant employee.

The screenshot shows the 'Duplicate Employee Check' screen. At the top, there is a blue header with a back arrow and the text 'Search for Post'. Below the header, the title 'Duplicate Employee Check' is displayed, followed by a breadcrumb trail: 'People Management > Search for Post > Duplicate Employee Check'. A search bar with the placeholder text 'Search Name or Social Security No.' and a magnifying glass icon is present. Below the search bar is a table with the following columns: Employee No., Name, Known As, Social Security No., Gender, Department, and Action. The table contains four rows of employee data. At the bottom of the screen, there are two blue buttons: 'NEXT' and 'CREATE NEW EMPLOYEE'. A 'corehr' logo is also visible in the bottom center.

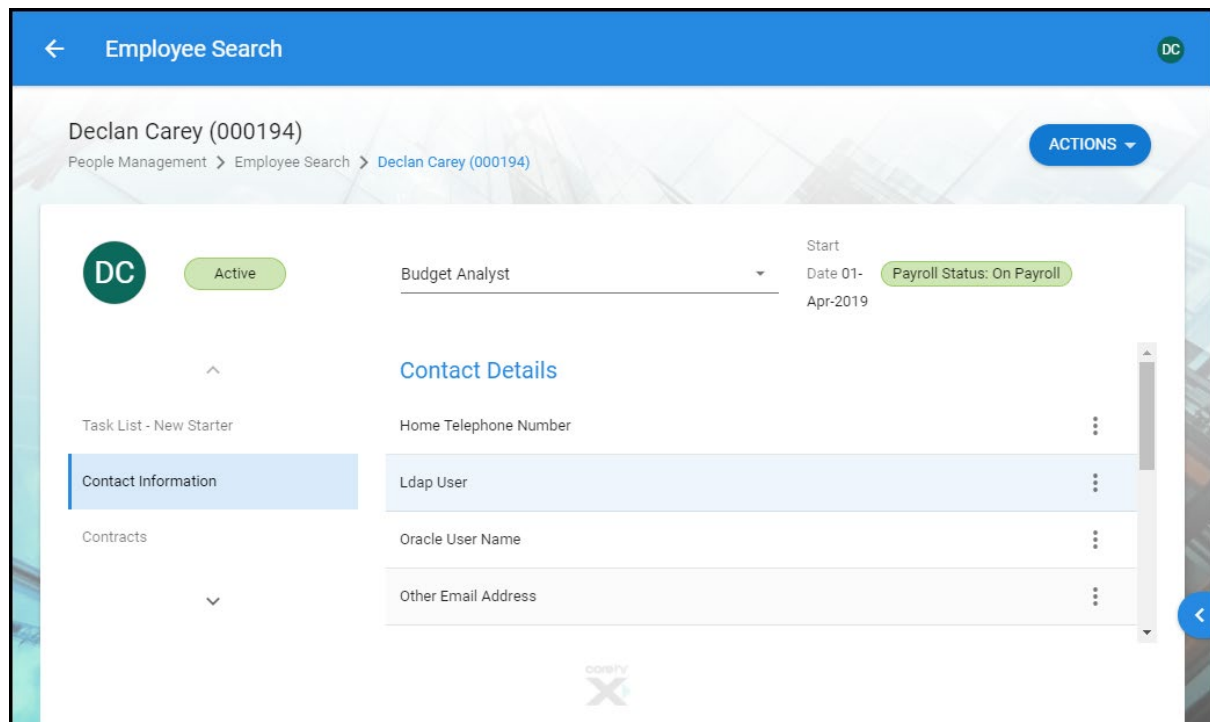

Employee No.	Name	Known As	Social Security No.	Gender	Department	Action
000003	Joe Bloggs	Joe		Unknown	**Do Not Use**	Rehire
000004	John Ryan	John		Male	**Do Not Use**	Rehire
000005	Ann Simpson	Ann		Female	**Do Not Use**	Rehire
000006	Tom Jones	Tom		Male	**Do Not Use**	Rehire

Employee Contacts Screen

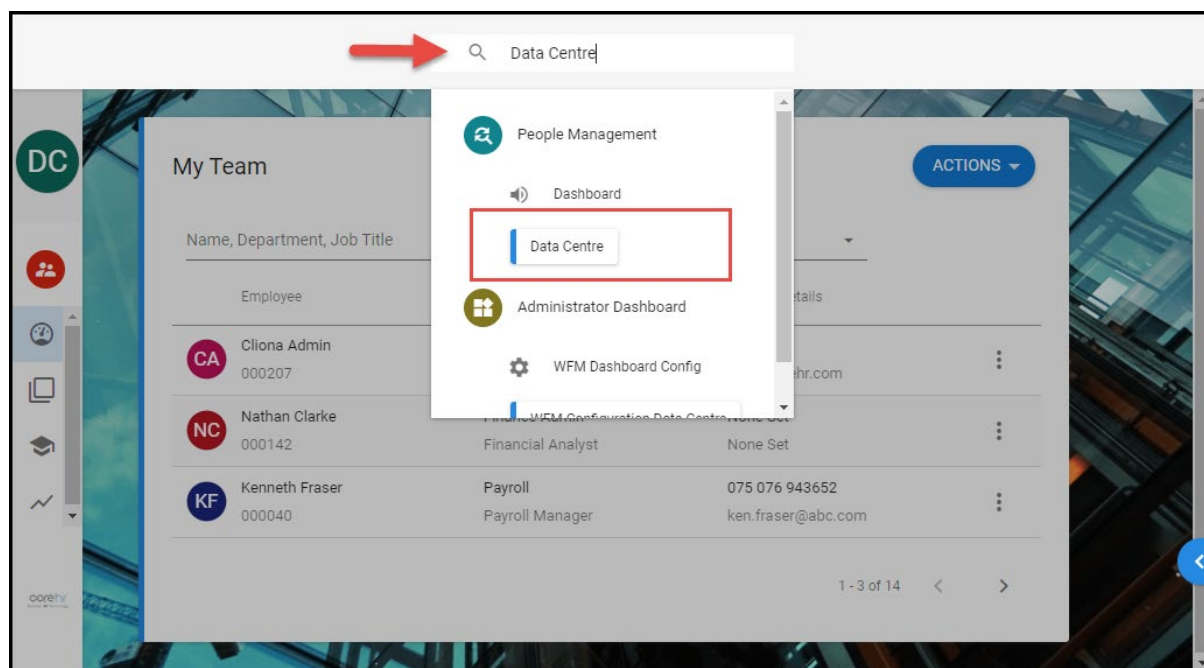

Enhancement

Within HRA, users now have the ability to change, validate and check address and contact information within the Employee Dashboard screen. This screen has the existing data as per an employees personal profile, however it can now be accessed via HRA.

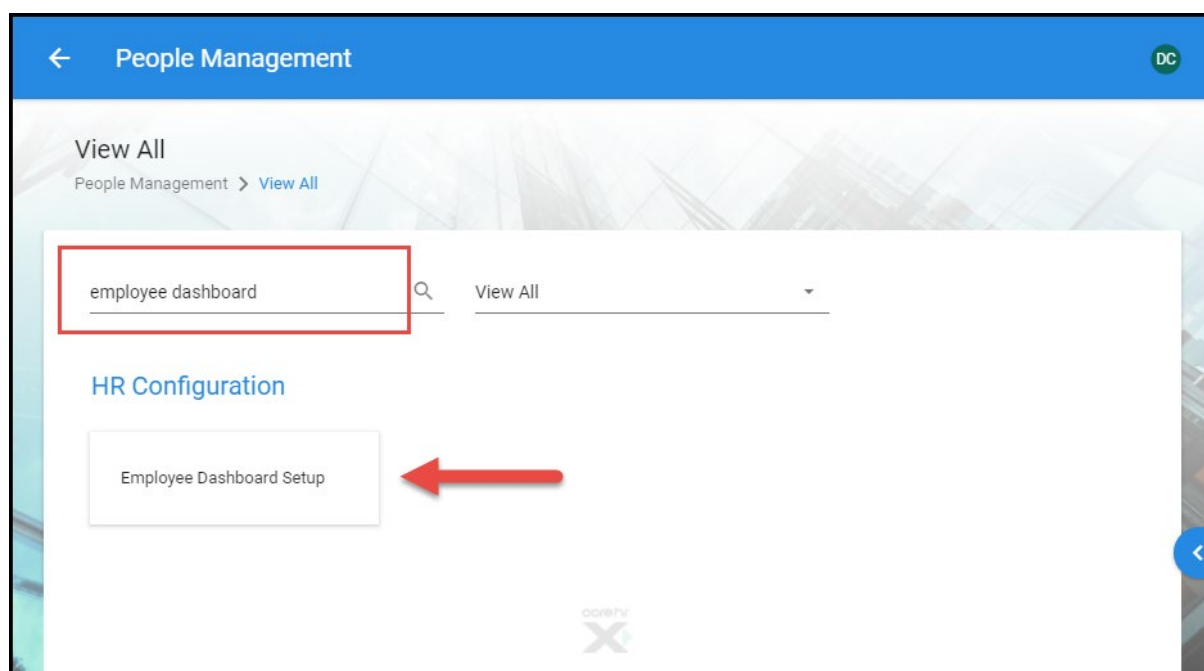

To re-order this section on where it appears on the employee dashboard:

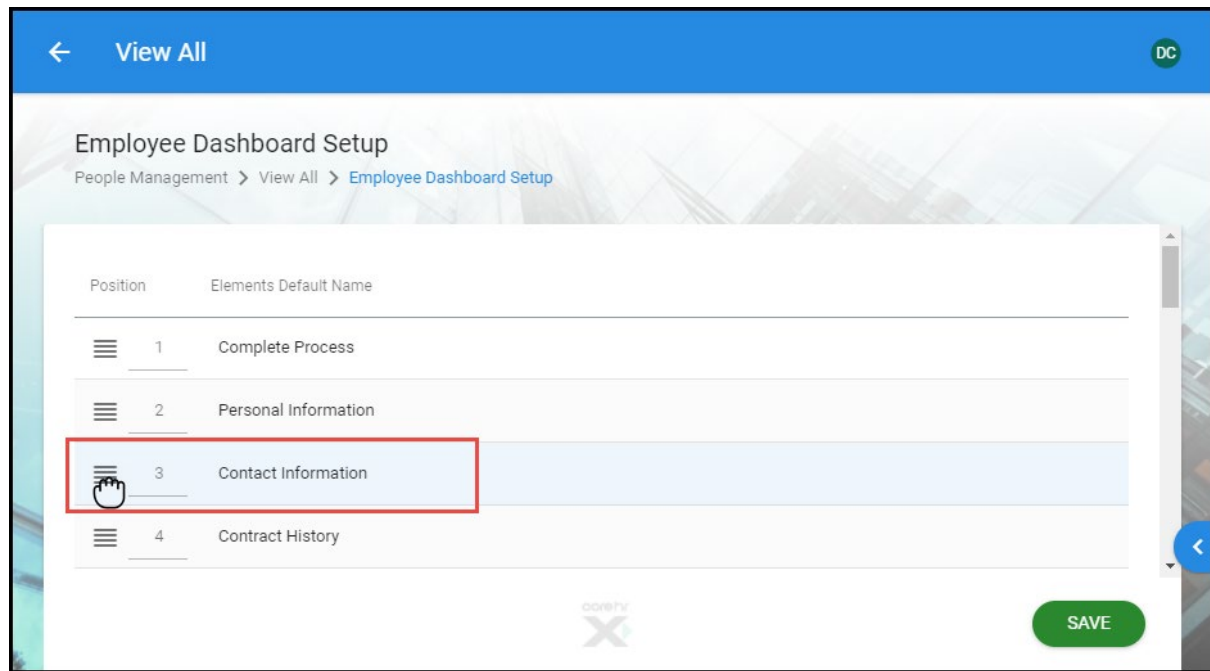

1. Quick jump to Data Centre

2. Go to *HR Admin Setup and Settings*.
3. Search for Employee Dashboard Setup and click the corresponding button.

4. Re-order the Contract Information option by using the drag and drop  option.

The following menu options control the access to this feature:

System	Menu Option	Description
CorePortal	HR Admin - Contact Information View	This controls access to view employee contact details on the HR employee dashboard.
CorePortal	HR Admin - Contact Information Update	This controls access to update employee contact details on the HR employee dashboard.

	Is Configuration Required? Not required
	Upgrade Considerations None
	HR-358 HR-559

Payment Method**Enhancement**

It is now possible to update an employee's Payment method within their personnel profile record on the People Management dashboard. This is the same functionality as per back-office.

The Pay Method defaults to the Pay Method Parameter when the details have not been created for the employee in question yet. This option should be Cheque or Paypath.

When the Bank Details screen is opened via ESS, MSS or Onboarding, the Pay Method option is not shown on screen.

	Upgrade Considerations None
	HR-557

Marital Status / Civil Status

Enhancement

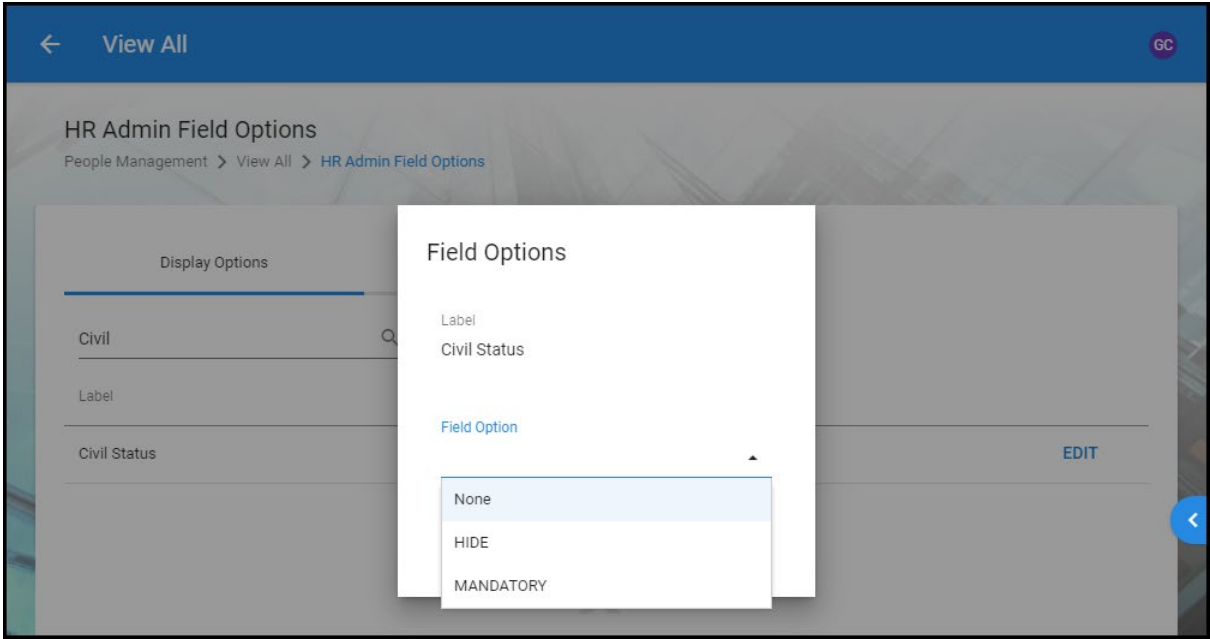

Marital Status (Civil Status) is now available to update on an employee record from the key information section on the Employee Dashboard on People Management.

The screenshot shows the 'Employee Search' interface for Declan Carey (000194). The page has a blue header with a back arrow and the title 'Employee Search'. Below the header, the employee's name and ID are displayed, along with a breadcrumb trail: 'People Management > Employee Search > Declan Carey (000194)'. A blue 'ACTIONS' button is in the top right. The main content area is a card with a left sidebar containing 'Key Information', 'Current Salary', and 'Contact Information'. The 'Key Information' section is highlighted with a blue bar and a red arrow. The card displays various employee details: 'DC' logo, 'Active' status, 'Budget Analyst' role, 'Start Date 01-Apr-2019', 'Payroll Status: On Payroll', 'NI Number (Default)', 'Date of Birth 24-Oct-1990', 'Age 29 Years, 11 Months, 0 Days', and 'Retirement Date 02-May-2055'. At the bottom of the card, there is a 'Civil Status' dropdown menu, which is highlighted with a red rectangle. Below the card, there are three buttons: 'CONTINUOUS SERVICE', 'JOB SEEKERS REGISTER', and 'SAVE'.

It also is available during the following process wizards in the *Personal Details* section on People Management:

1. New Starter
2. Rehire
3. New Starter from Successful Applicants
4. Rehire from Successful Applicant

The following HR Field Option controls the appearance and settings for this field. The field displays by default
