1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use the screens on XD Hub.

This includes:

- What is XD Hub?
- Using the Home Page.
- A guide to the features available on the Hub.
- Setting up a user.

1.2. What is XD Hub?

XD hub is the enablement tool for our platform to add new capability and embrace innovation with low/zero touch and share practice across the ecosystem to constantly improve in the face of changing economic and competitive environments.

With XD Hub you can:

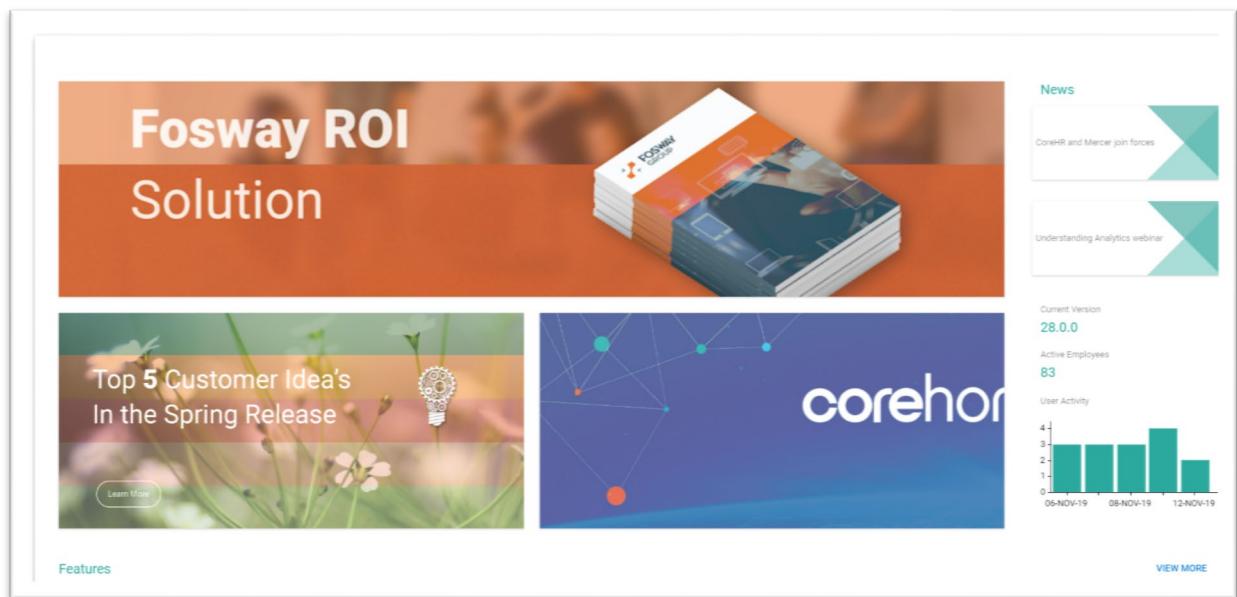

- Gain insights from thought leaders and share your own insights.
- Get information on the latest features and functionality in CoreHR. This reduces the cost of change and decreases the time to value.

2. How to use XD Hub

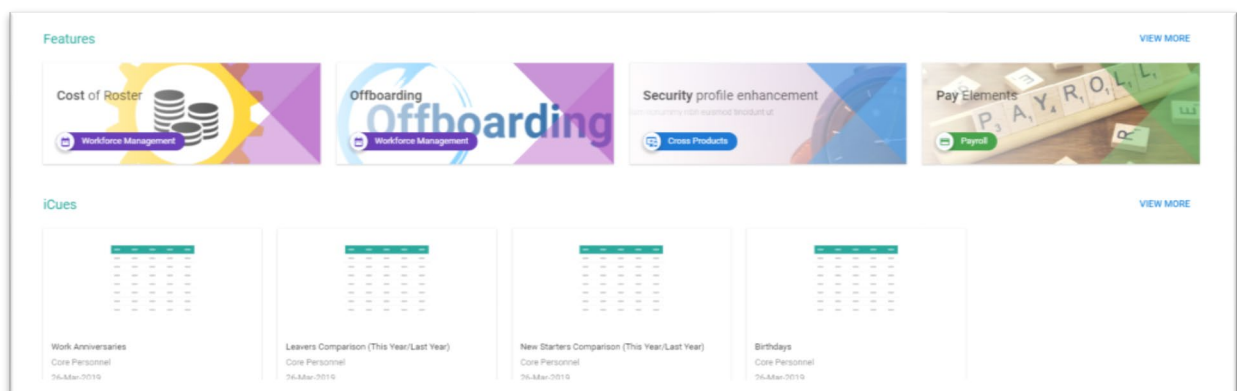

2.1. Accessing XD Hub

To Access XD Hub:

- **Select XD Hub** from the menu. This brings you to the main menu page
- On the main page you see 3 billboards which are configurable from Hubble.

- The page will usually have news stories which are configurable from the home page.
- You will see information about the current client version, number of active employees per quarter and user login activity over past number of days.

2.2. Features

On the features you will find the following:

- **Search Engine:** You can search for features by product or by flagged features. You can also search by title of features.
- **Minor release notes:** Minor Release notes are available to download.

Minor Releases can have three statuses:

- **Coming soon:** This status will have information on upcoming releases.
- **Available:** This status will have information on releases which are currently available to you.
- **Released:** This status will have information on what has already been released.

2.3. Feature Description

On XD Hub:

- Each feature can have 3 paragraphs written for it.
- It can also have headline information defined in Hubble.
- It will allow you to take screenshots of related features as well as descriptions of current features.
- It will also allow you to flag a feature that is important.

3. How to Give Access to a User

3.1. Setting up a User

- To access the XD Hub, a user will have to be given the following menu items available under the web services system.
