1. Overview

1.1. Purpose of the Guide

This document provides guidance on how to configure *Employee onboarding* on CorePortal. This includes:

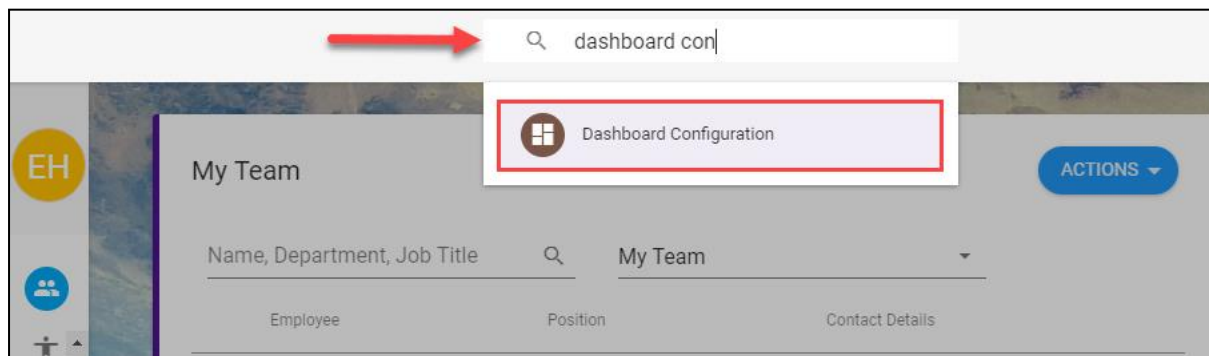

- The *Social Hub Configuration* widget.
- How to configure each element of the *Social Hub* including Checklists, Pages etc.
- Configuring the *Social Hub* dashboard / landing page.
- My Team configuration.
- Setting up Notifications.
- Setting up Events.
- Reporting on *Employee onboarding* via CoreInsight.
- User Access to *Employee onboarding* for employees, managers and administrators.

The corresponding document *Employee Onboarding v28: How to Use - User Guide* provides end user training for how to use *Employee onboarding* via the *Social Hub* dashboard.

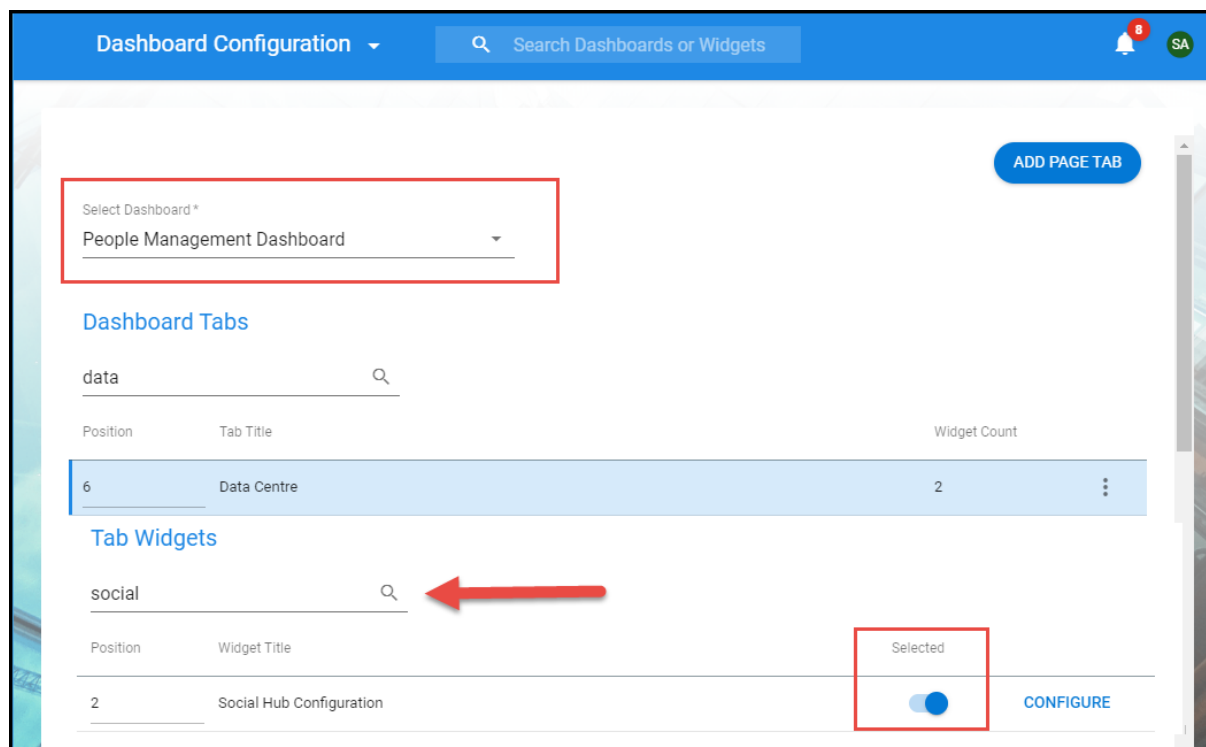

2. Employee Onboarding Configuration Widget

To enable to *Employee Onboarding Configuration* widget:

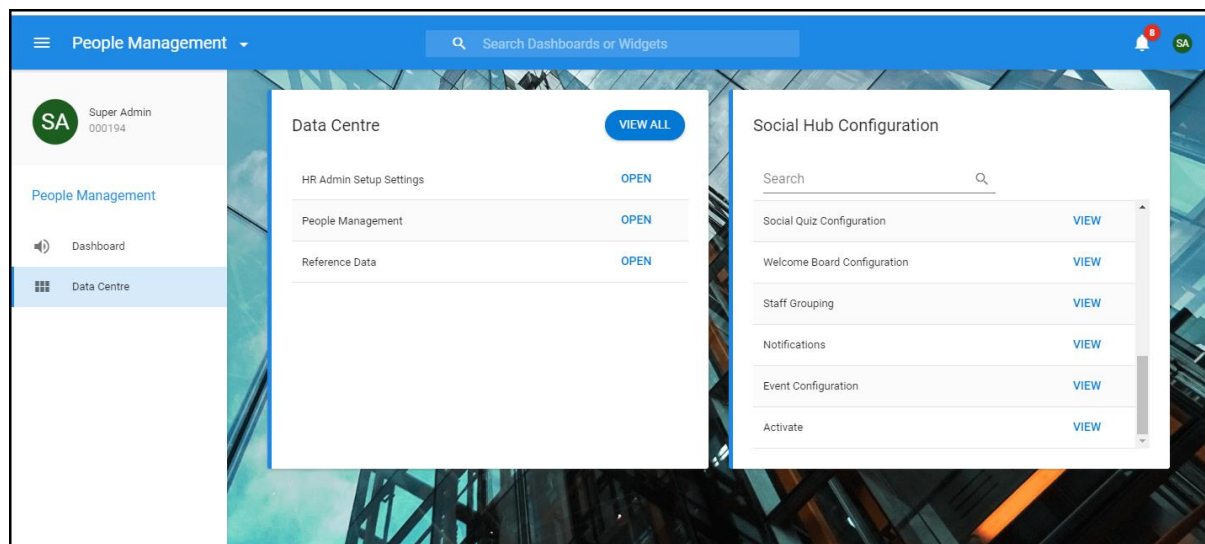

1. Quick jump to **Dashboard Configuration**.

2. Select "People Management Dashboard" from the *Select Dashboard* drop-down list.
3. Select the applicable tab you require the widget to appear on.
In this example, the widget is required to appear on the *Data Centre* tab.
4. Search the available *Tab Widgets* section for "social".
5. Ensure the *Social Hub Configuration* widget is **Selected**.

The *Social Hub Configuration* widget now displays on your applicable dashboard.

3. Switch On Employee Onboarding

There are two options available when enabling *Employee onboarding*:

- **Enable**

Suitable if you are setting up onboarding for the first time on CoreHR OR you do not intend to import checklists created for pre-v27 *Onboarding Checklists* on CoreHR.

- **Import Before Enabling**

Suitable if you are already using an earlier version (pre-v27) of *Onboarding Checklists* in CoreHR. Jump straight to [3.2 Import Before Enabling](#) if you wish to use this option, as it must be completed before *Employee onboarding* is enabled.

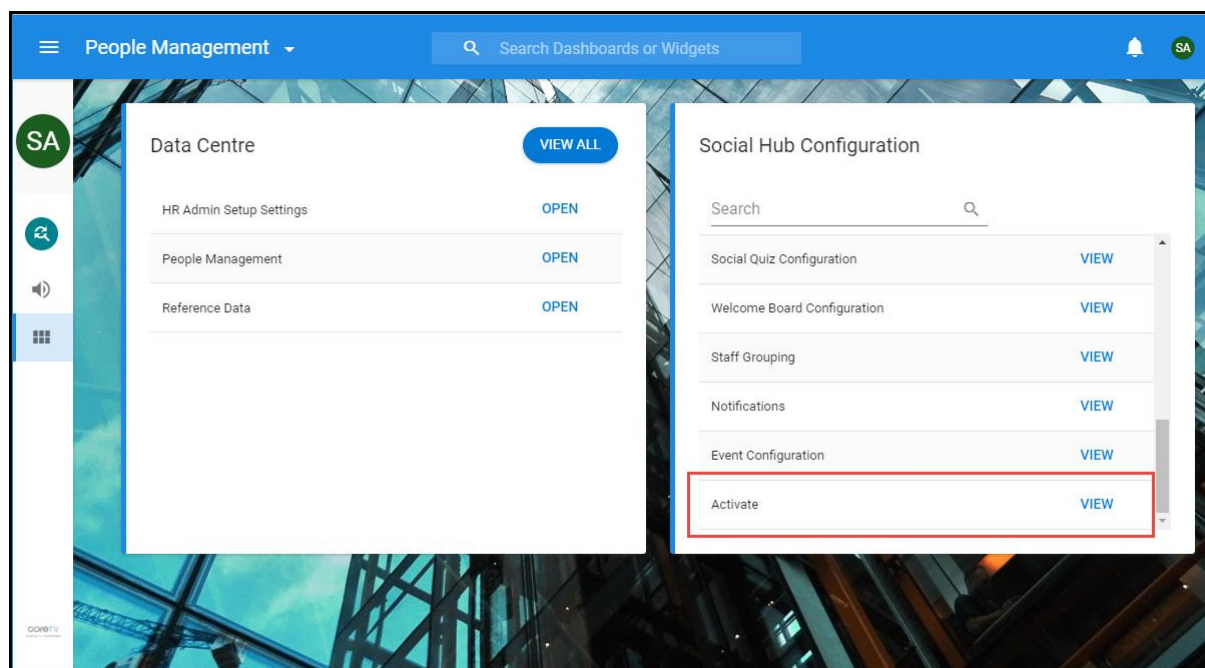

Note:

- If *Employee Onboarding* is not enabled, then the existing *Onboarding Checklists* module (pre-v27) will be available to users within the Classic UI.
- If *Employee Onboarding* is enabled, then this means the pre-v27 onboarding dashboard available to new starters will not be there anymore and instead *Employee Onboarding* will be made available for employees to complete their tasks i.e. the *Social Hub*.
- *Employee Onboarding* is not available in the Classic UI.

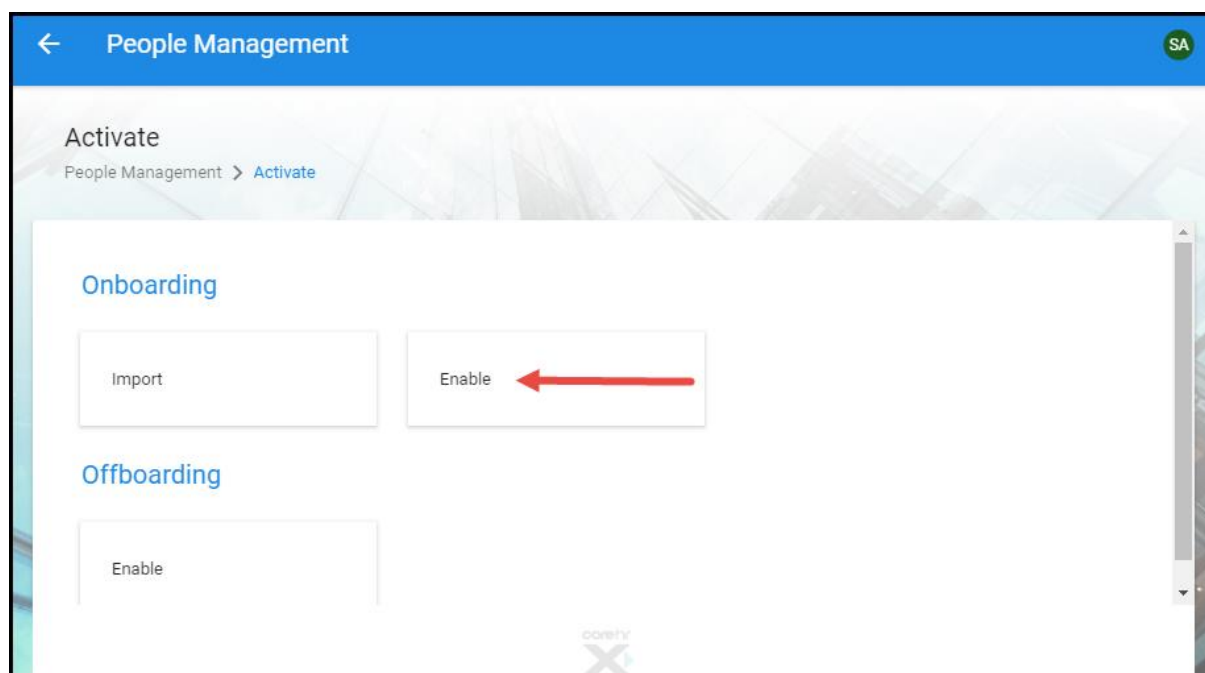

3.1. Enable

To enable *Employee onboarding*:

1. Quick jump to the *Social Hub Configuration* widget.
2. Click the **View** button on the Activate option.

3. Click the **Enable** button under the Onboarding section.

The *Enable Employee onboarding* screen displays.

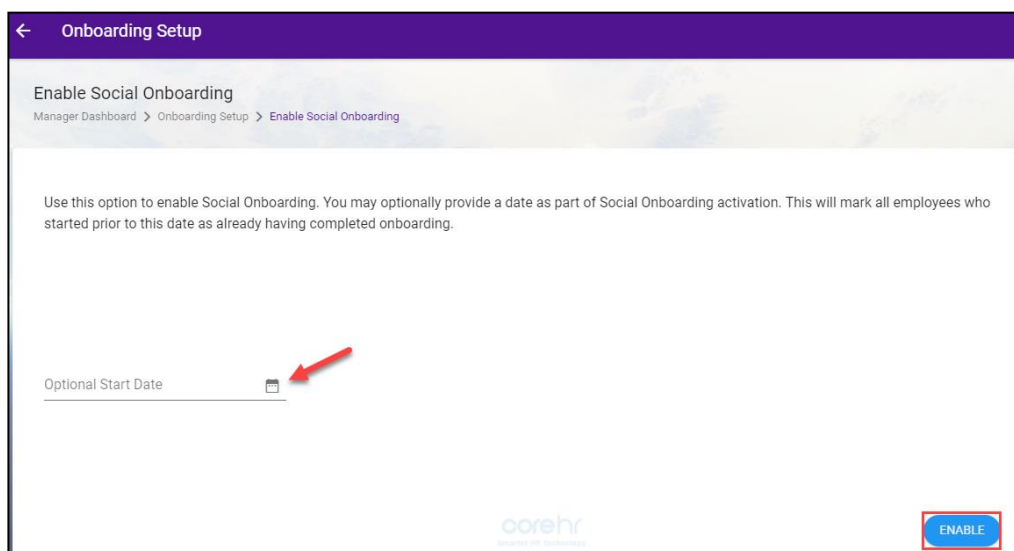

4. Enter the *Start Date*.

Note: Start Date

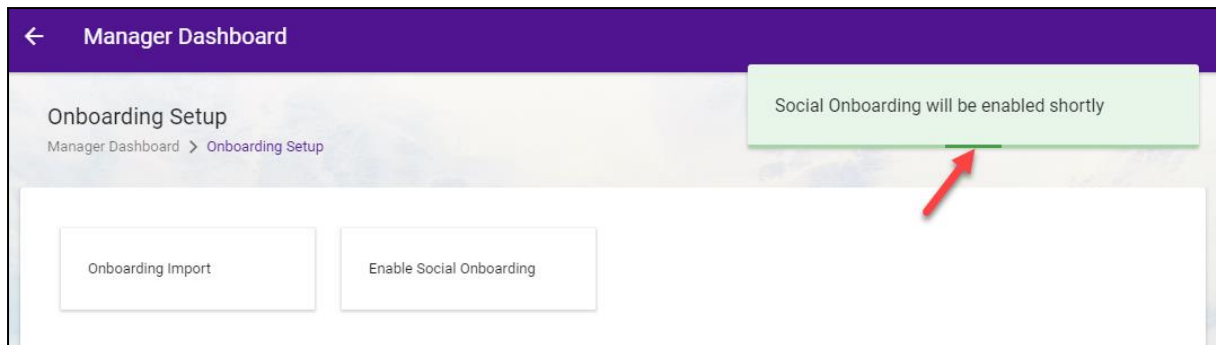

As part of the *Employee Onboarding* activation, it is mandatory to provide a *Start Date*.

- Employees who joined before this date will be marked as having completed onboarding irrespective of whether they still have uncompleted items on the old onboarding solution.
 - It is possible to utilise a *CoreInsight* report, or the *Onboarding Progress* screen to determine a date, if employees are required to complete tasks via *Social Onboarding*. This is applicable to upgrades only, and organisations using the *Social Onboarding* feature.
- Employees who have a join date after this date will be assigned active checklist items, if applicable. These items may be global or match their restriction criteria.
- Exceptions to the above:
 - In the scenario where an organisation has upgraded from the old onboarding solution to *Social Onboarding*, and who have imported their checklist, employees in the process of onboarding will see the same tasks they have outstanding & completed as they did in old onboarding (see [3.2 Import Before Enabling](#)).
 - It is important to note that if an organisation has multiple checklist profiles in the old onboarding solution, then default checklist items will be created as global items. If these items are left as 'global', the items display for all employees even though they may have completed onboarding already, via another non-default checklist profile, or as part of their own profile.

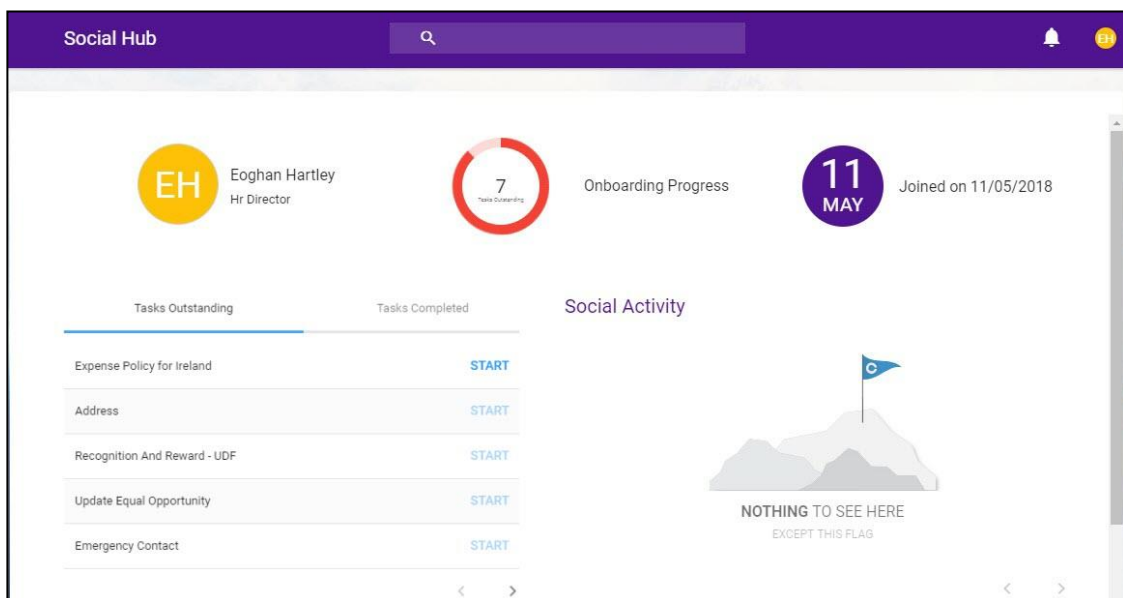

5. Click **Enable**.

An on-screen progress bar displays notifying you that employee onboarding will be enabled shortly.

On completion, employee onboarding is now enabled for users.

Note:

Tasks assigned to employees will be driven from the rules defined at the checklist item level.

3.2. Import Before Enabling

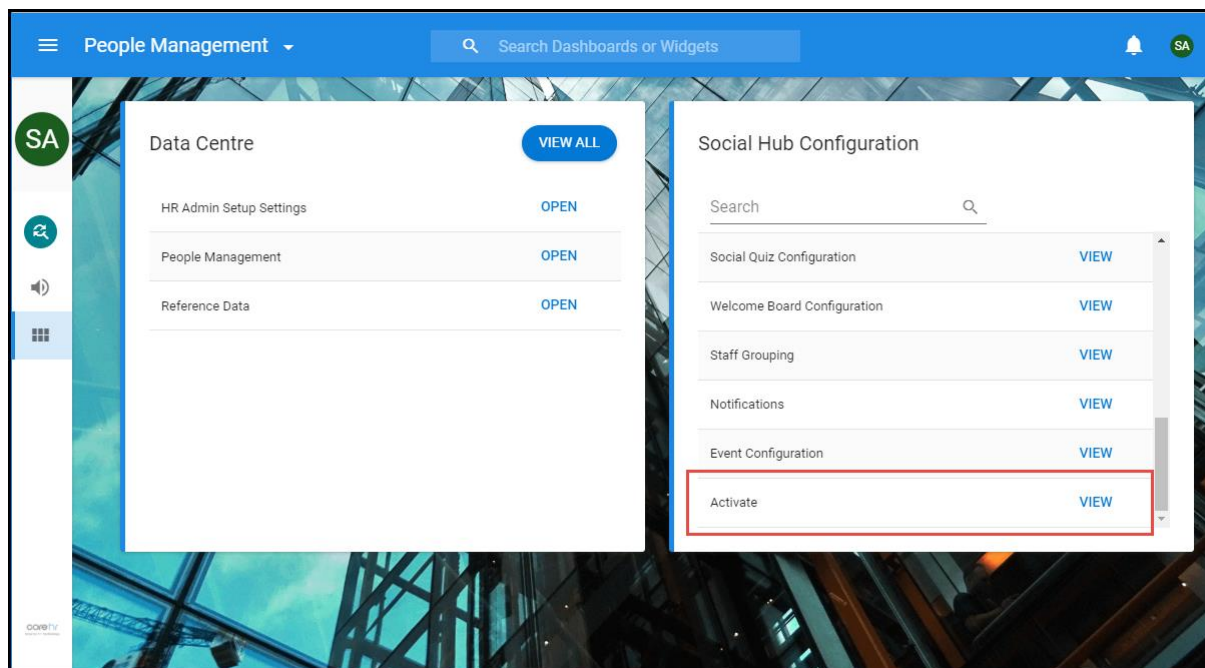

This allows you to import existing onboarding checklist items from the old pre-v27 onboarding feature. It is recommended that if an organisation wishes to use this function (which is optional) then this should be done before enabling *Employee onboarding*.

Note:

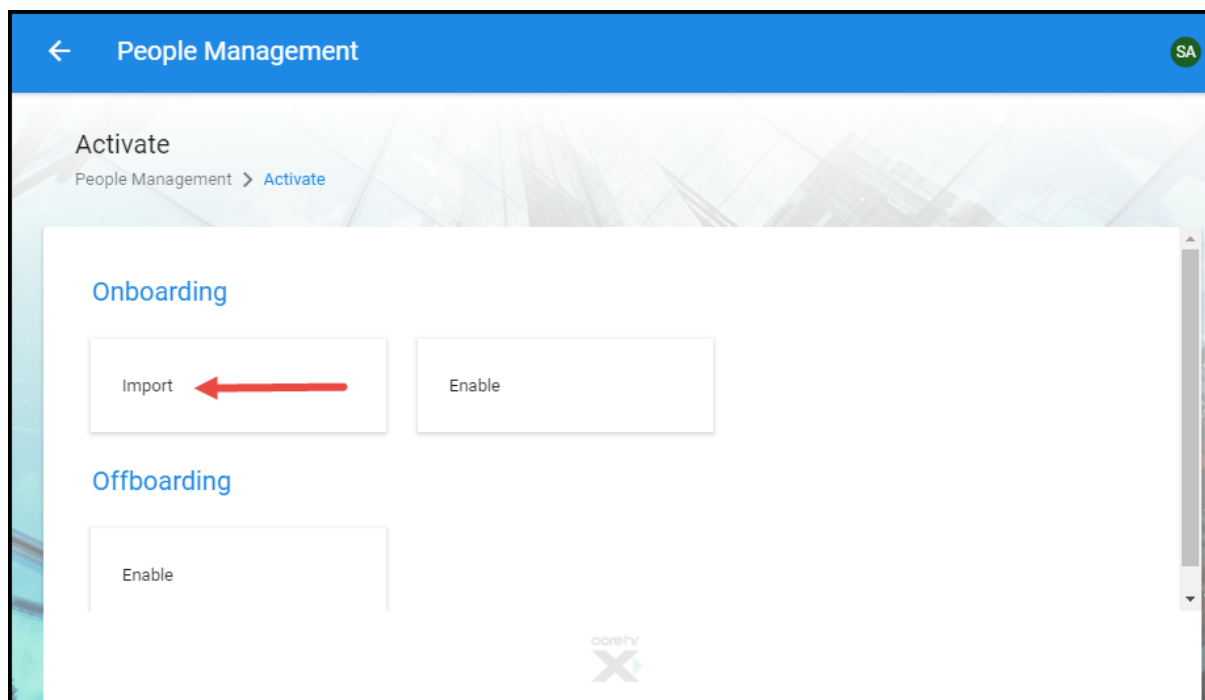

It is recommended that new checklists are created from scratch for *Employee Onboarding* rather than importing old checklists.

To import existing onboarding checklists:

1. Quick jump to the *Social Hub Configuration* widget.
2. Click the **View** button corresponding to the Activate label.

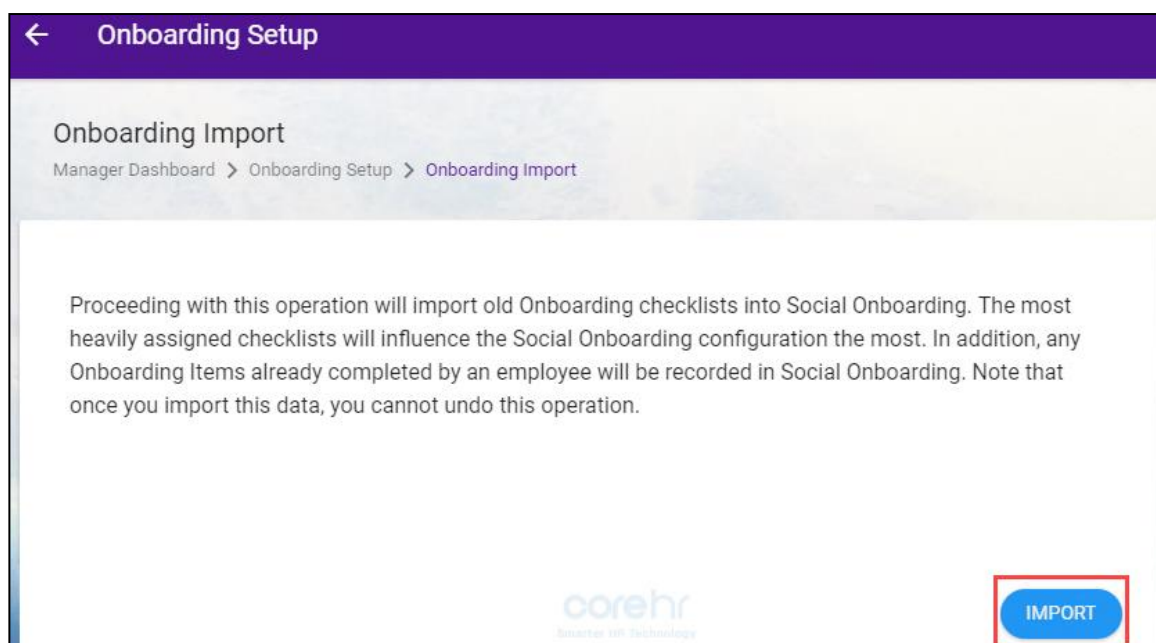

3. Click the **Import** button within the Onboarding section.

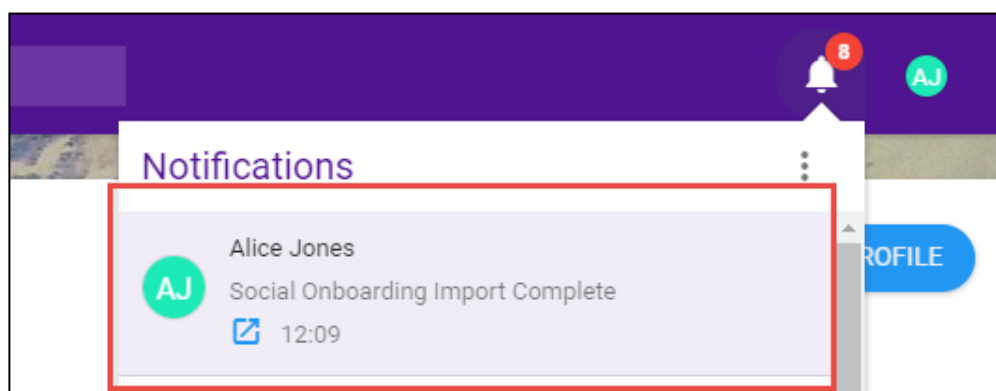

An on-screen message displays that outlines considerations if proceeding with the import.

4. Select **Import**.

The import process begins. A notification will appear via the notifications centre as soon as the import is complete. This notification is shown in the example below.

5. Once the import has completed, follow the steps outlined in [3.1 Enable](#) to enable Employee onboarding.

3.2.1. Import example:

In this example, the below screenshot shows the onboarding checklist that was configured in the pre-v27 onboarding checklist (Classic UI).

4. Onboarding Checklists

4.1. Add Onboarding Item - Screen Overview

The below screenshot and table provide an overview of the *Add Onboarding Item* screen.

Screen Field	Overview
Item Type	When creating a new checklist item, you must select the <i>Item Type</i>. The list below outlines the item types available to choose from: • Input items • Custom pages • User defined items • Policies • Documents requested • Employee Documents • Surveys See section 4.1.1 Item Types for further detail on each option.
Onboarding Item	Items available in the Onboarding Item drop-down list are dependent on the item that has been selected in the Item Type drop-down list. See section 4.1.1 Item Types for further detail.
Title	You must give each checklist item a specific title. This title appears for the employee when they view the item in their Tasks Outstanding list on the <i>Social Hub</i>.

Available on Day	You can indicate whether each checklist item should be made available at a specific time after the employee's start date. For example, confidential information that should not be made available to a new employee before their join date. • By default, this is set to '0'. This means there is no rule in place, and the checklist item can be made accessible before the employee join date. • If you set this to '1', the checklist item is accessible to the employee on day one of employment. This is their join date within the organisation. • The purpose of this feature is to make confidential information only accessible after the employee's join date, but also to provide a more tailored onboarding experience where certain checks can be made available in week 1, week 2, etc.  Note: If a start date restriction is in place, then the checklist item will be available for the user to see, but it's not accessible: • You can enter any number up to 999. • It is important to consider when using this feature that checklist items should be ordered correctly and must be placed before any checklist items that do not have this restriction. • This feature is only applicable for to new hires and re-joiners. Therefore, the join or re-join date, and not for employees completing cross boarding tasks.
Optional Information	This field allows you to add more detail to explain the nature of the task to the employee. This can aid completion or inform the employee why certain information is being requested.

4.1.1. Item Types

The below screenshot and table provide an overview of items types on the *Add Onboarding Item* screen.

Item Type	Overview
Input Items	If the <i>Item Type</i> is <i>Input Items</i>, then the below options are available from the Onboarding Item drop-down list. • Upload profile photo • Update next of kin • Update address • Update equal opportunity • Update bank details • Update bio Note: If data already exists that has been populated by an employee previously, in the scenario of a re-joining employee or if already populated by HR, the employee can review and update this information accordingly.
Custom Pages	If the <i>Item Type</i> is Custom Pages, any custom pages created are available for the user to select to be part of the checklist.
User Defined Forms	If the <i>Item Type</i> is (UDF) User Defined Items, the employee can complete the form to add a new UDF against their HR record. If this UDF type already exists against the employee record, the last created UDF record of this type is

	loaded. This information is displayed to the employee to update. This uses 'employee' type UDFs only.
Policies	If the <i>Item Type</i> is Policies , any policy documents or employee handbooks that have been uploaded into the system are available to add to the checklist. For further information, see section 4.2.4 Policies Item .
Documents Requested	If the <i>Item Type</i> is Documents Requested , employees can upload relevant documents to add to their employee record. If a document already existed in their employee file, it will display to the employee, to select from. If required employees can upload a newer version of the document requested, or if the existing document is up to date, then they can simply mark the task as complete. This process does not create a new user defined form record. For further information, see section 4.2.5 Documents Requested Item .
Employee Documents	Documents that are attached to the employee's HR record can be shared For further information, see section 4.2.6 Employee Documents .
Surveys	Bespoke surveys can be created to be added as a checklist item for Onboarding and Offboarding, allowing you to gain greater insight to your staff and help drive internal change. Customised surveys can be created for different employee groups, business lines, leavers etc through use of the checklist criteria group assignment. For further information, see section 4.2.7 Surveys

**Note:**

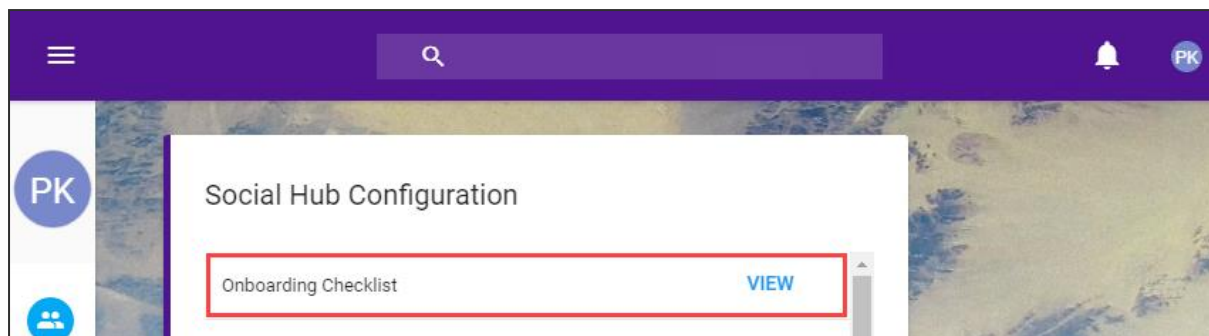

Checklists should be configured with global items present first, which every employee completes. This minimises the creation of duplicate checklist items assigned to diverse groups.

4.2. Create a Checklist Item

4.2.1. Input Item

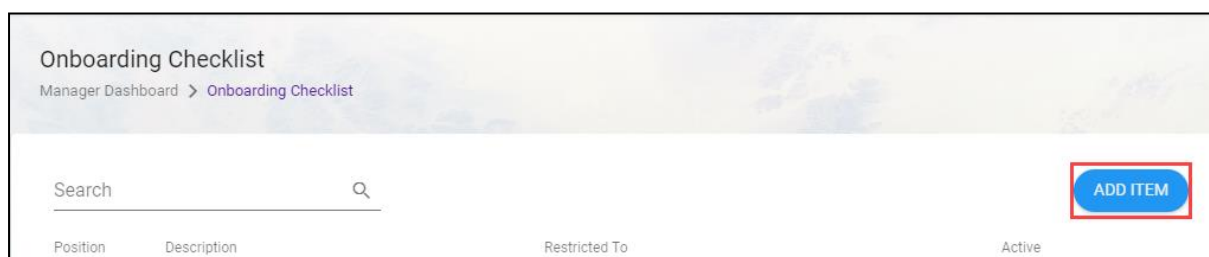

To create an input checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.

The *Onboarding Checklist* screen displays.

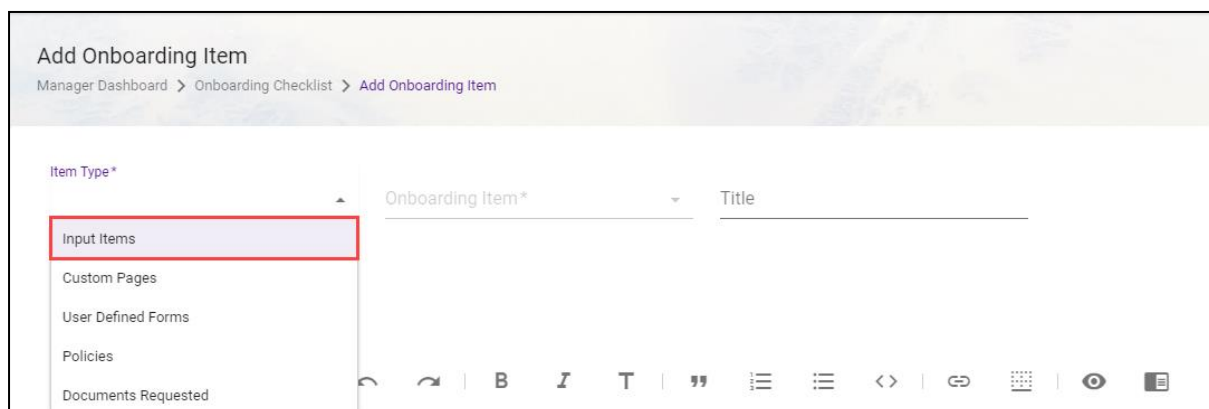

3. Select **Add Item**.

The *Add Onboarding Item* screen displays.

4. Select the applicable *Item Type* from the drop-down list.

In this example the checklist item is an input item. Therefore, the **Input Items** *Item Type* is selected.

5. Select the applicable *Onboarding Item* from the drop-down list.

In this example the checklist item requests the employee to complete their bio information. Therefore, the **Update Bio** *Onboarding Item* is selected.

An on-screen progress bar displays notifying you that the system has added the onboarding item. The onboarding item then displays on the *Onboarding Checklist* screen.

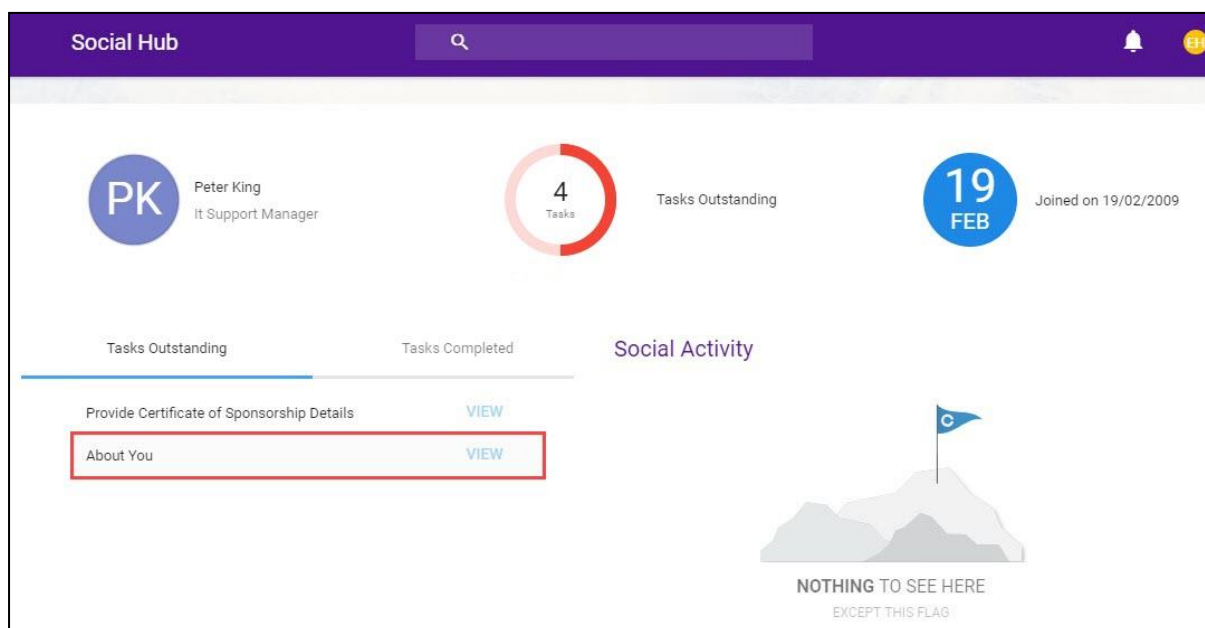

New onboarding items default as inactive. Ensure the item is marked as **Active** for it to appear on the employees *Social Hub - Tasks Outstanding* list.

10. Mark the new onboarding item as **Active** on the *Onboarding Checklist* screen.

Once activated, the onboarding item appears on the *Social Hub - Tasks Outstanding* list.

4.2.2. Custom Page Item

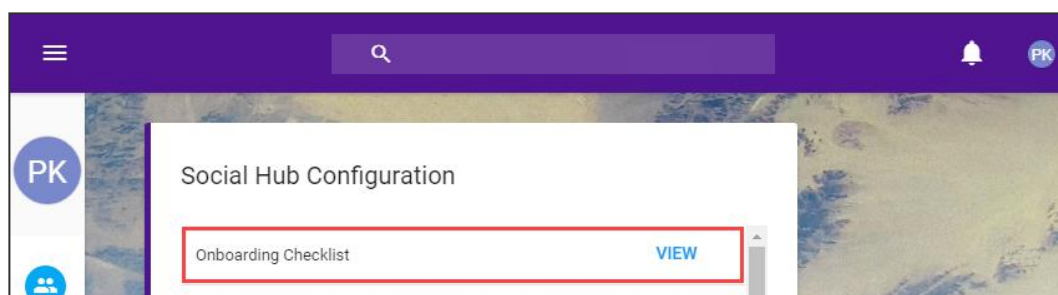

Note:

See [5. Custom Pages](#) for guidance on how to create a custom page. You must first configure a custom page in order to be able to add one as a checklist item here.

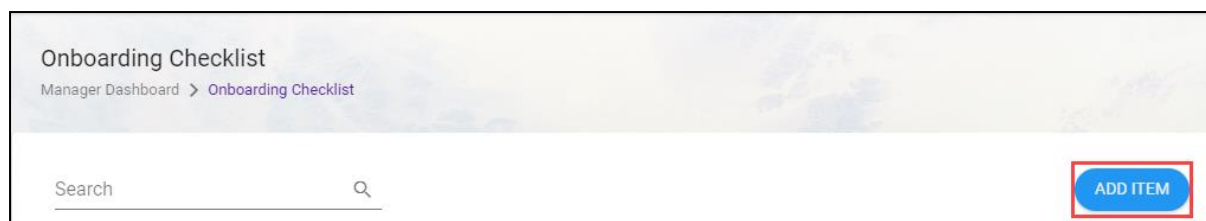

To create a custom page checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.

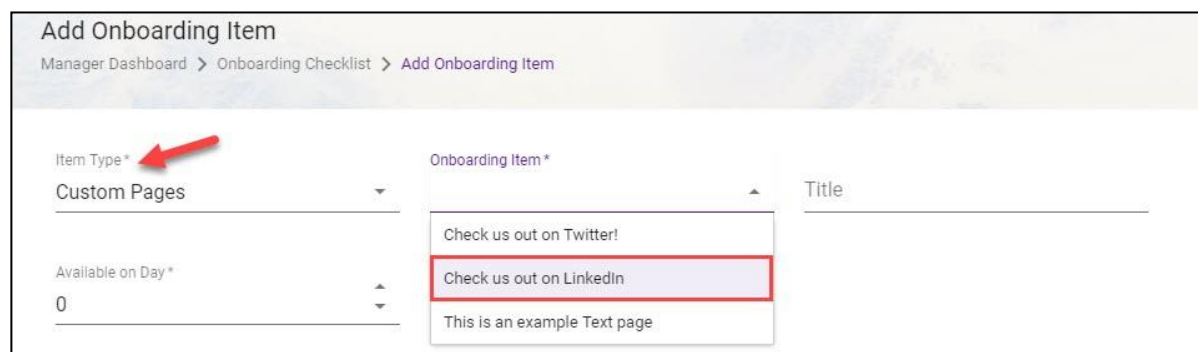

The *Onboarding Checklist* screen displays.

3. Select **Add Item**.

The *Add Onboarding Item* screen displays.

4. Select **Custom Page** from the drop-down list.
5. Select the applicable *Custom Page* from the drop-down list e.g. “**Check us out on LinkedIn**”.

6. Enter a *Title* for the onboarding item.
7. If applicable, set the *Available on Day* field.
In this example, the onboarding item does not hold or require any of the organisation's confidential information. Therefore, a restriction is not required.
8. If applicable, enter guidance or more information in the *Optional Information* field.
In this example, some text has been added.
9. Click **SAVE**.

The screenshot shows the 'Add Onboarding Item' form. At the top, the breadcrumb trail is 'Manager Dashboard > Onboarding Checklist > Add Onboarding Item'. The form has three dropdown menus: 'Item Type *' set to 'Custom Pages', 'Onboarding Item *' set to 'Check us out on LinkedIn', and 'Title' set to 'Connect with us'. Below these is the 'Available on Day *' field set to '0'. The 'Optional Information' field contains the text 'Hello!' and 'Lets get connected on LinkedIn'. A red arrow points to the 'Title' field, another to the 'Available on Day' field, and a third to the 'Optional Information' text. A red box highlights the 'SAVE' button at the bottom right.

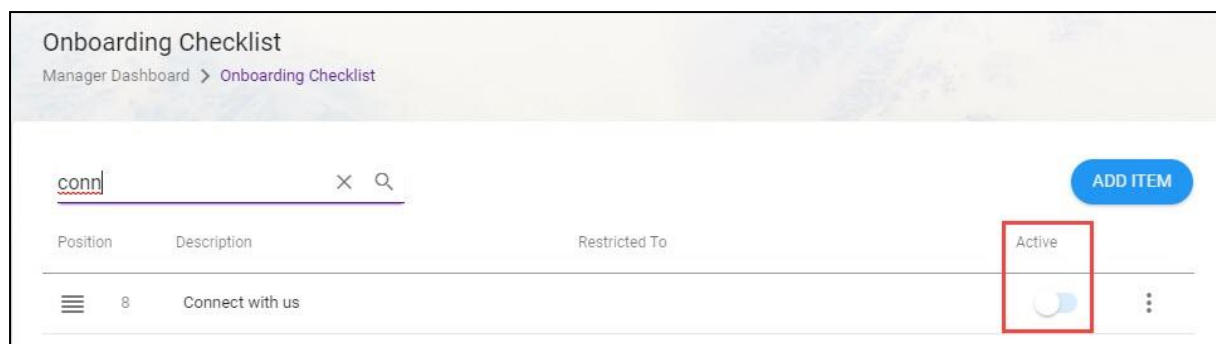

An on-screen progress bar displays notifying you that the system has added the onboarding item. The onboarding item then displays on the *Onboarding Checklist* screen.

The screenshot shows the 'Onboarding Checklist' screen. A green notification bar at the top right says 'Added Onboarding Item'. Below it is a search bar and a table with columns: 'Position', 'Description', 'Restricted To', and 'Active'. A red arrow points to the notification bar. An 'ADD ITEM' button is visible on the right.

New onboarding items default as inactive. Ensure the item is marked as **Active** for it to appear on the employees *Social Hub - Tasks Outstanding* list.

10. Mark the new onboarding item as **Active** on the *Onboarding Checklist* screen.

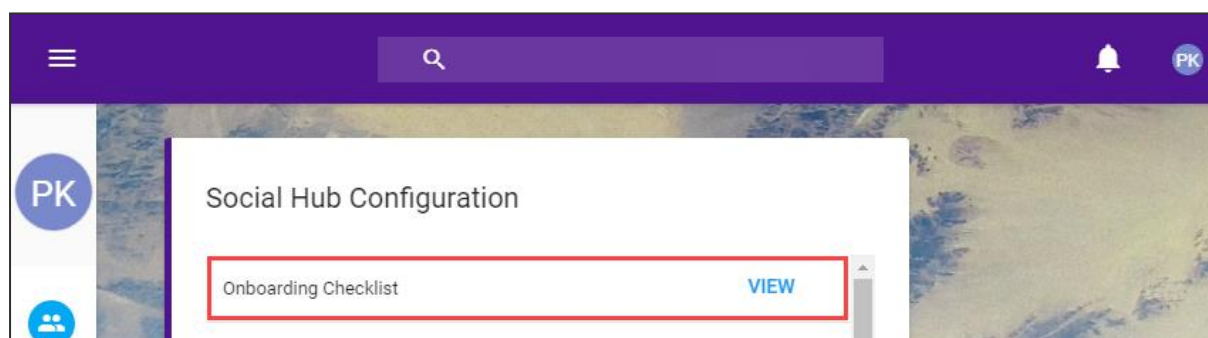

Once activated, the onboarding item appears on the *Social Hub - Tasks Outstanding* list.

4.2.3. UDF Item

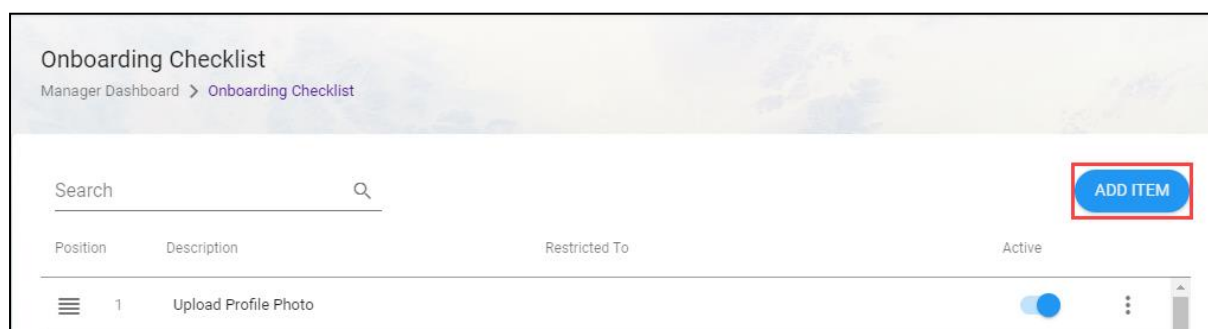

To create a UDF checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.

The *Onboarding Checklist* screen displays.

3. Select **Add Item**.

The *Add Onboarding Item* screen displays.

4. Select the applicable *Item Type* from the drop-down list

In this example the checklist item is a UDF. Therefore, the **User Defined Forms Item Type** is selected.

5. Select the applicable *UDF* from the drop-down list. This list provides employee type UDFs only. The **Passport Details** *UDF* is selected here.

Add Onboarding Item

10. Mark the new onboarding item as **Active** on the *Onboarding Checklist* screen.

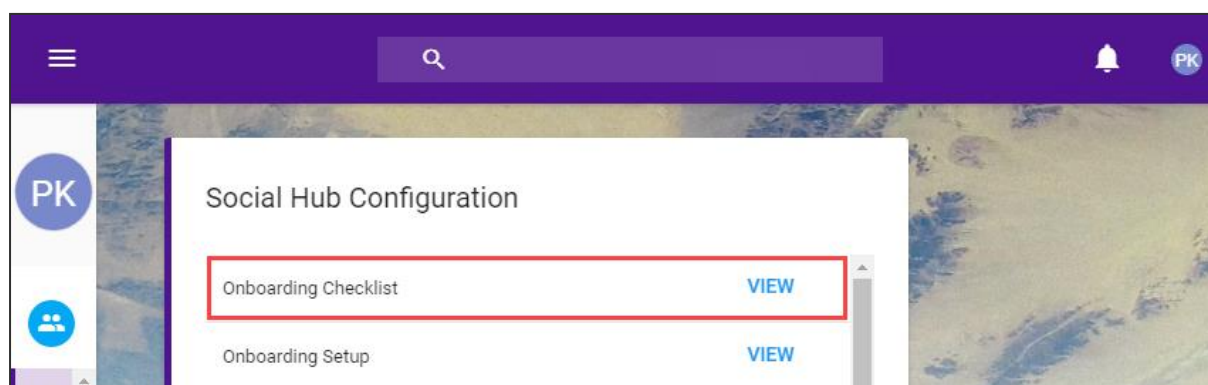

Once activated, the onboarding item appears on the *Social Hub - Tasks Outstanding* list.

4.2.4. Policies Item

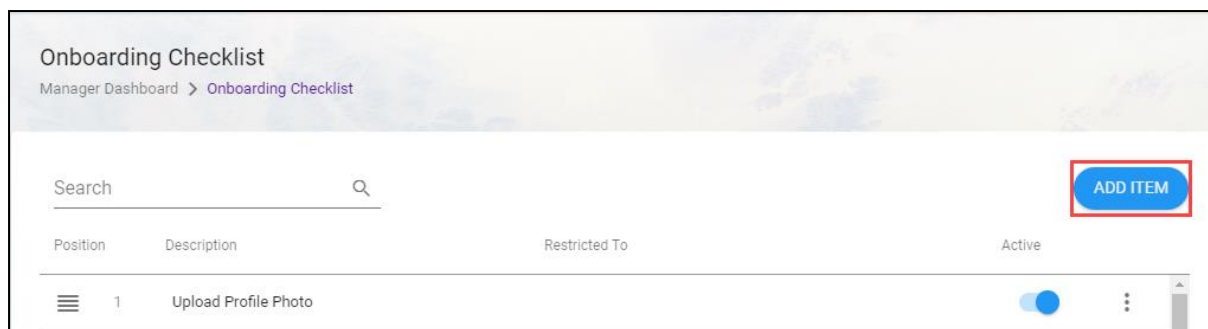

To create a policies checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.

The *Onboarding Checklist* screen displays.

3. Select **Add Item**.

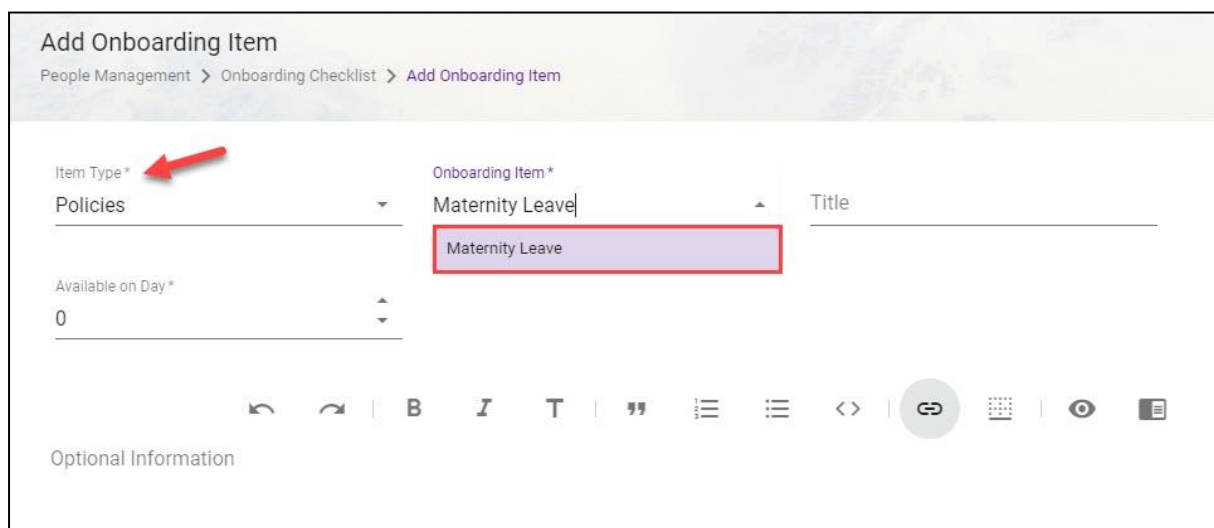

The *Add Onboarding Item* screen displays.

4. Select the applicable *Item Type* from the drop-down list

In this example the checklist item is a *Policies*. Therefore, the **Policies** *Item Type* is selected.

5. Select the applicable policy from the drop-down list.

The **Maternity Leave** policy is selected here.

6. Enter a *Title* for the Onboarding Item.

7. If applicable, set the *Available on Day* field.

In this example, the onboarding item does hold the organisation's confidential information. Therefore, a restriction is required. The field is set to '1', therefore the employee will not be able to access this checklist item until their join date.

8. If applicable, enter guidance or more information in the *Optional Information* field.

In this example, some instructional text is added.

9. Click **Save**.

4.2.5. Documents Requested Item

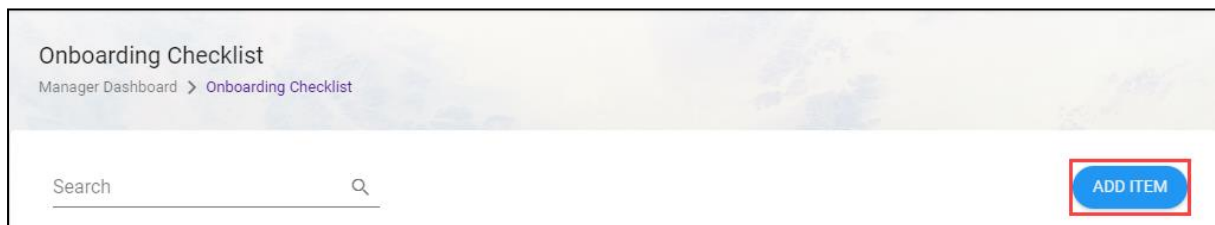

To create a document requested checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**

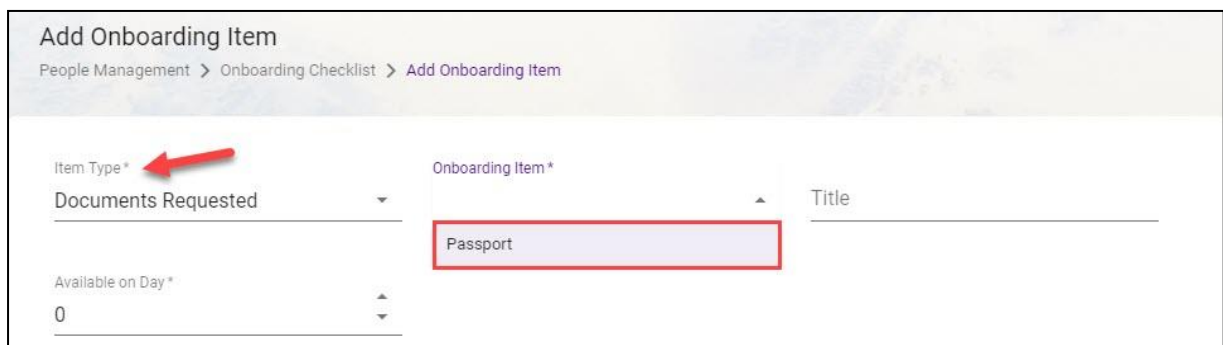

The *Onboarding Checklist* screen displays.

3. Select **Add Item**.

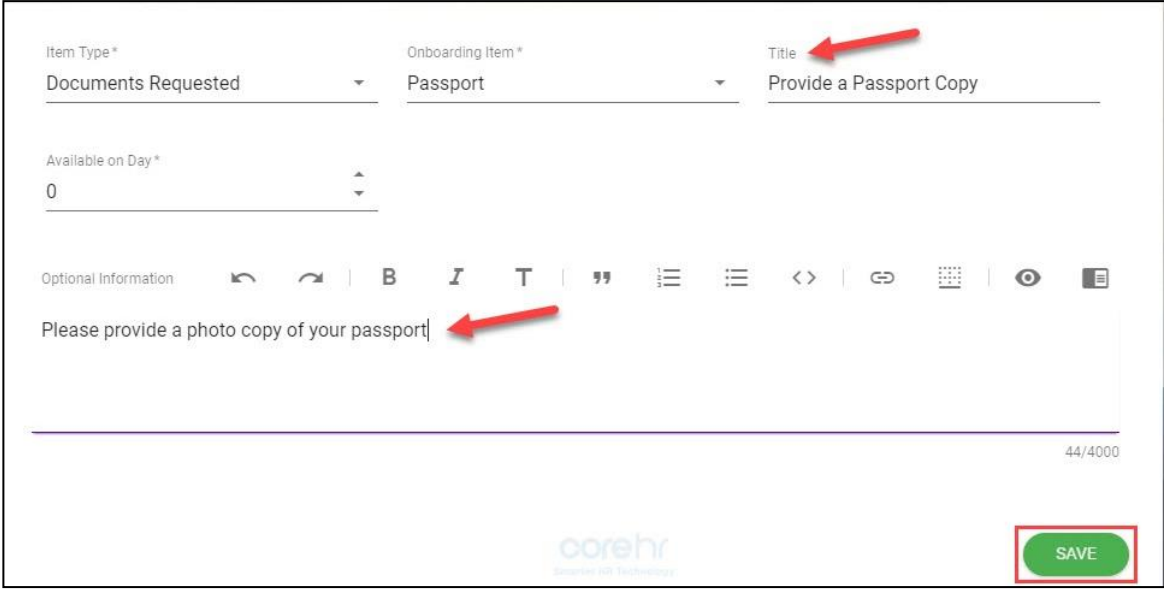

The *Add Onboarding Item* screen displays.

4. Select the applicable *Item Type* from the drop-down list
In this example the checklist item is document requested. Therefore, the **Document Requested** *Item Type* is selected.
5. Select the applicable document from the drop-down list.
The **Passport** document is selected here.

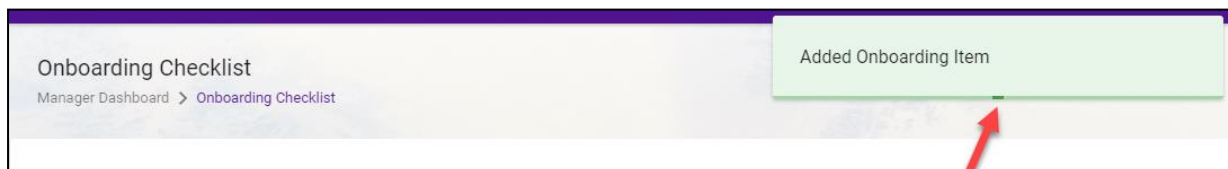

6. Enter a *Title* for the Onboarding Item.

7. If applicable, set the *Available on Day* field
In this example, the onboarding item does not hold or require any of the organisation's confidential information. Therefore, a restriction is not required.
8. If applicable, enter guidance or more information in the *Optional Information* field.
In this example, some instructional text is added.
9. Click **SAVE**.

The screenshot shows the configuration form for an onboarding item. At the top, there are three fields: 'Item Type *' with a dropdown menu showing 'Documents Requested', 'Onboarding Item *' with a dropdown menu showing 'Passport', and 'Title' with the text 'Provide a Passport Copy'. Below these is the 'Available on Day *' field with a value of '0'. The 'Optional Information' field contains the text 'Please provide a photo copy of your passport'. A red arrow points to the 'Title' field, and another red arrow points to the text in the 'Optional Information' field. At the bottom right, there is a green 'SAVE' button highlighted with a red box. The CoreHR logo is visible at the bottom center.

An on-screen progress bar displays notifying you that the system has added the onboarding item. The onboarding item then displays on the *Onboarding Checklist* screen.

New onboarding items default as inactive. Ensure the item is marked as **Active** for it to appear on the employees *Social Hub - Tasks Outstanding* list.

10. Mark the new onboarding item as **Active** on the *Onboarding Checklist* screen.
Once activated, the onboarding item appears on the *Social Hub - Tasks Outstanding* list.

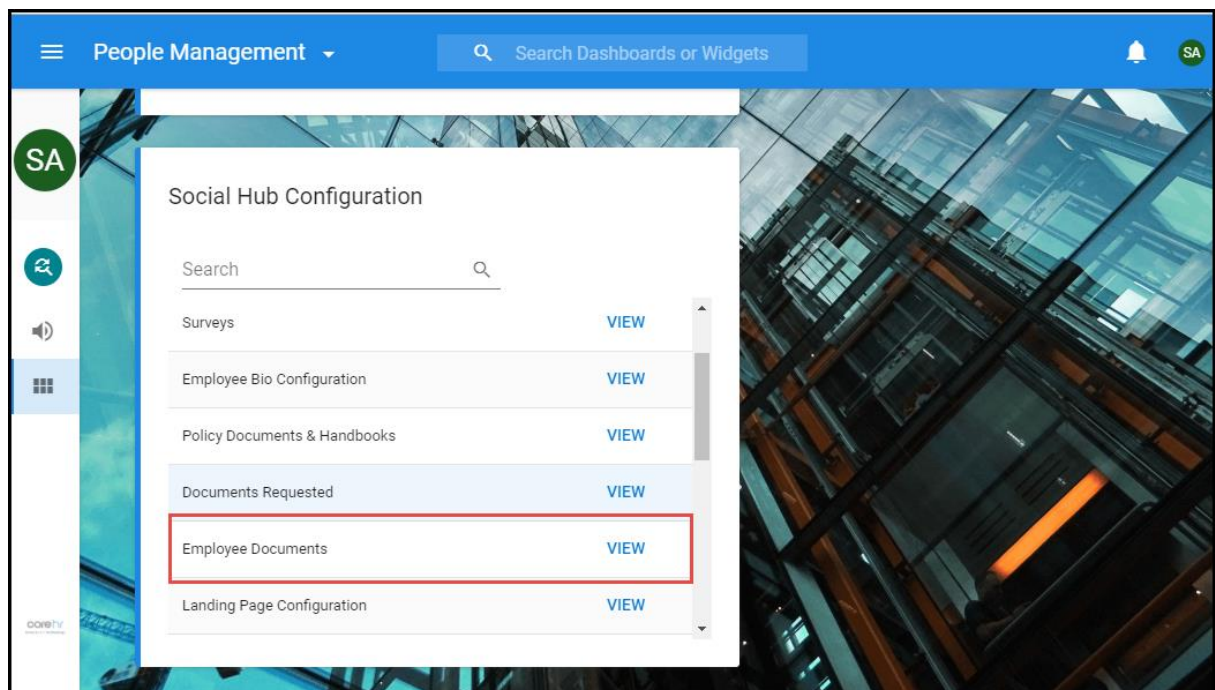

4.2.6. Employee Documents

Creating Document Types for Selection

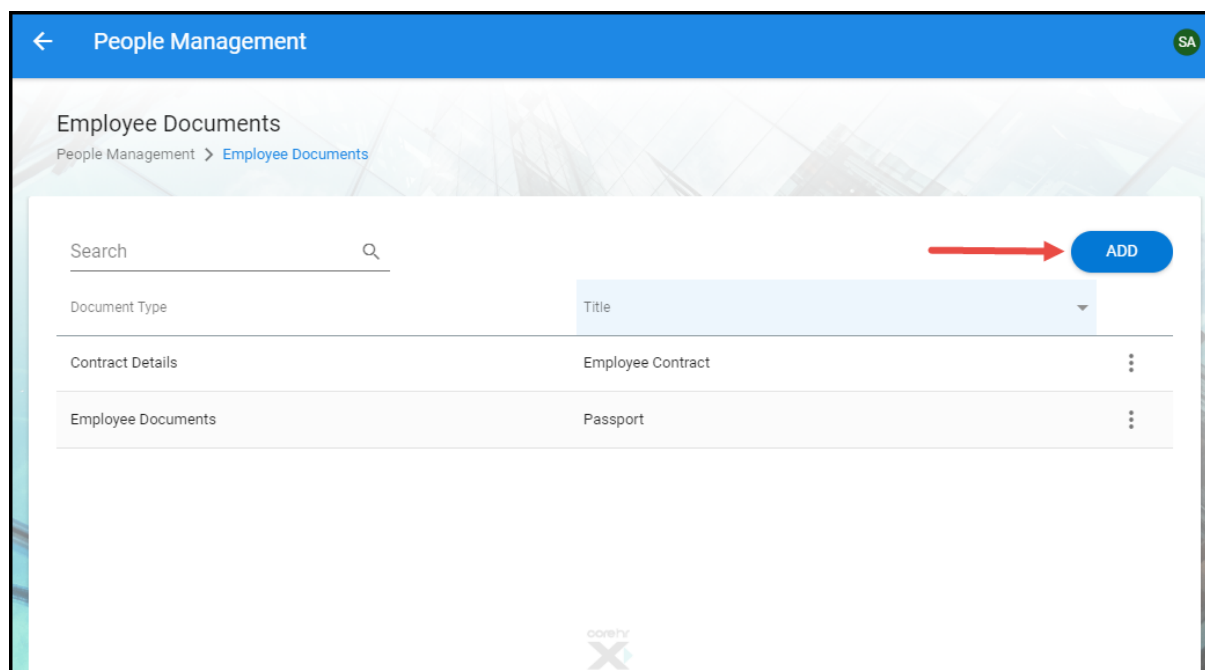

Any documents that already exist on the Employee record can be shared here, if created prior to the Onboarding process by HR. For Example an employee's contract.

To add a Document Type to be featured follow the below steps:

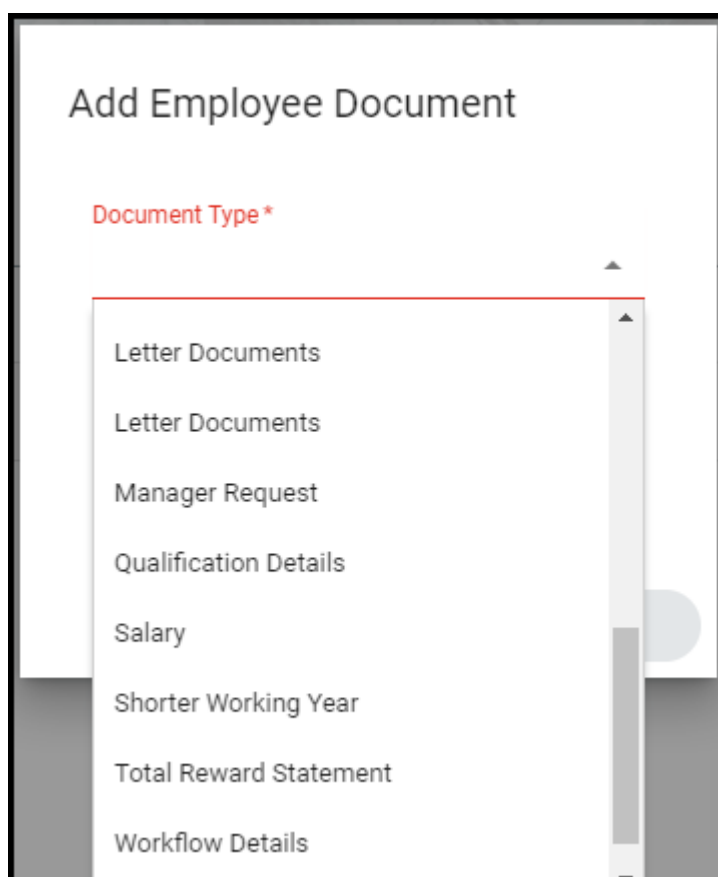

1. Quick jump to the *Social Hub Configuration* widget.
2. Click the **View** button alongside the *Employee Documents* label.

3. Click the Add button to add a new / additional Document Type that can be seen on the Employee Onboarding checklist.

4. Within this pop-up box, enter in the document type to be included along with its name.

4.2.7. Surveys

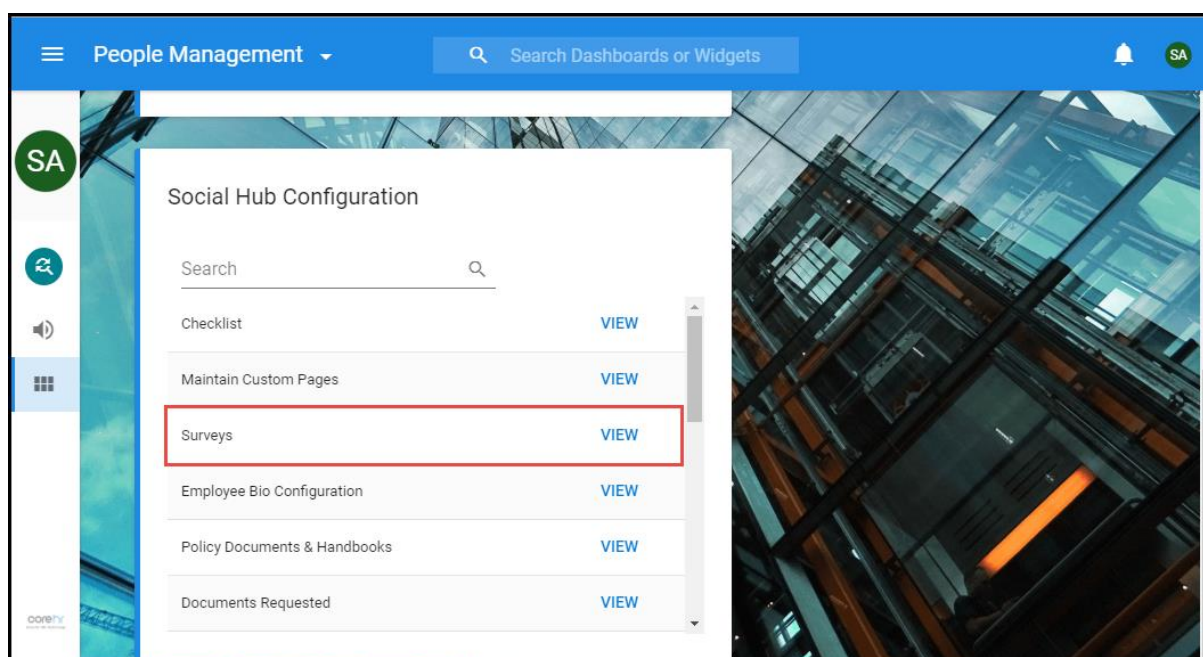

Creating a Survey

Bespoke surveys can be created to be added as a checklist item for Onboarding and Offboarding, allowing you to gain greater insight to your staff and help drive internal change.

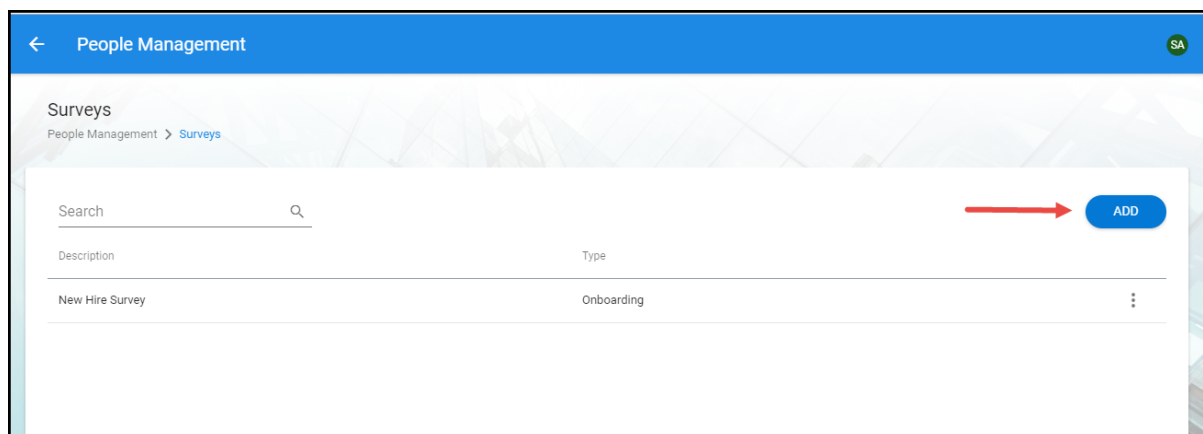

Customised surveys can be created for different employee groups, business lines, leavers etc through use of the checklist criteria group assignment.

Before adding a survey to a checklist, you must first create it and it's contents. To do this:

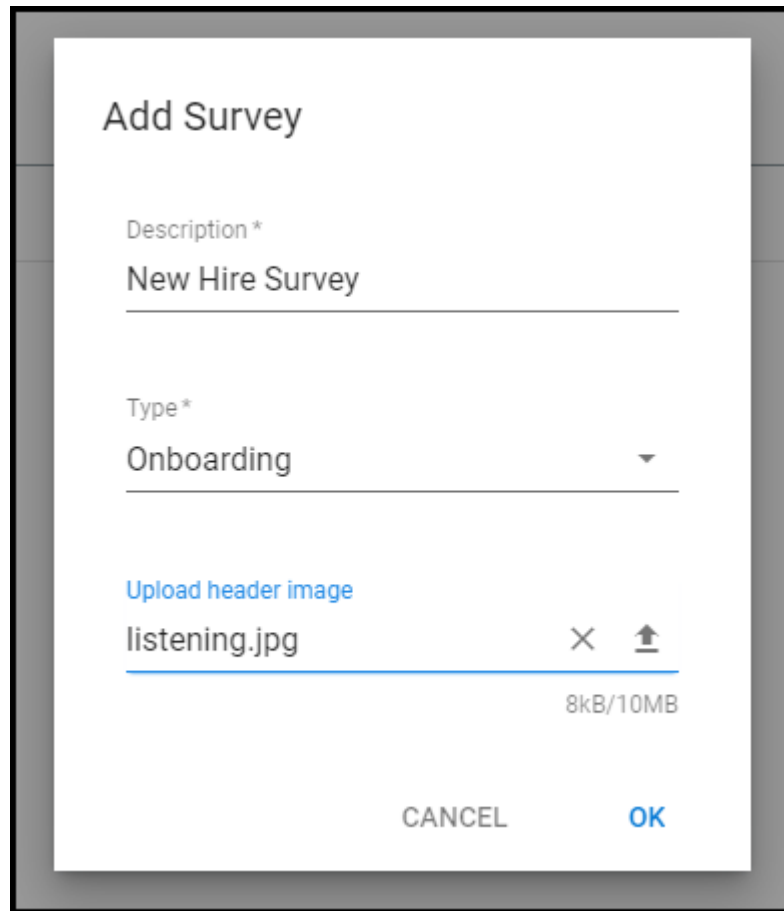

1. Quick jump to the *Social Hub Configuration* widget.
2. Click the **View** button adjacent to the *Survey* label.

3. The Survey screen appears
4. Click on the **Add** button to create a new Survey.

5. Add in a description, a type and an optional header image. For the purposes of these steps, you are creating an Onboarding survey.

Add Survey

Description *

SAVE

- The following items are what is needed to be configured before saving your Field

Item	Explanation / Options
Name of Field	This is the name of the question / statement to be used. Maximum 500 alphanumeric characters.
Required Field	This option specifies if the item is mandatory or not.
Type of Field	Text Field Text Area Date Field Number Field Checkbox Field Combo Field Combo Field (Reference Data) Radio Group Slider Field
Values / Maximum Value / Reference Data	This option will only show if any of the below types are selected: - Combo Field - Radio Group - Slider Field (Maximum Value) - Combo Field (Reference Data)

The screenshot displays the 'Configure Survey Fields' interface. It includes a breadcrumb trail: 'People Management > Surveys > Edit Survey > Configure Survey Fields'. The main section is titled 'Please Take A Few Minutes To Tell Us...' and contains a 'Section Details' tab. Below this, there are three fields being configured:

- Field 1:** Name of Field: 'I have all the resources I need to do ...', Type of Field: 'Text Field', Required Field: ☒.
- Field 2:** Name of Field: 'My goals are clearly defined.', Type of Field: 'Radio Group', Required Field: ☒, Values: '1' (+4 More).
- Field 3:** Name of Field: 'Overall, I am satisfied with the onboa...', Type of Field: 'Slider Field', Required Field: ☒, Maximum Value: '100'.

At the bottom of the interface, there are buttons for 'ADD FIELD', 'REMOVE FIELD', and 'SAVE'.

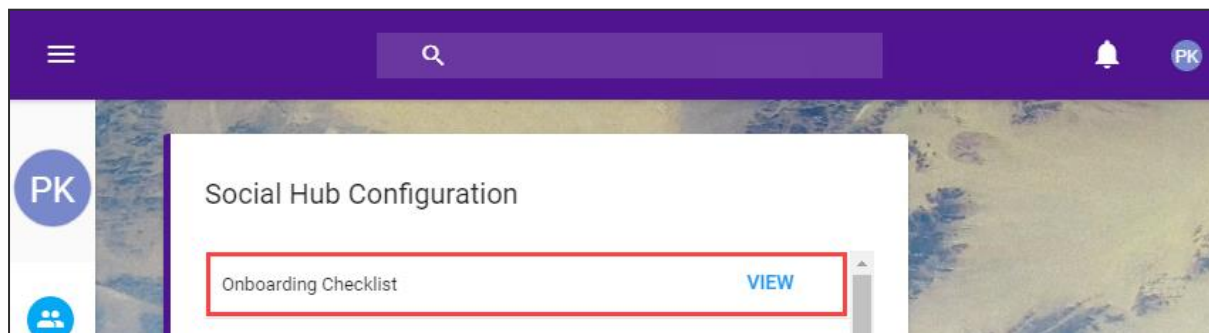

- Once the survey fields have been added to the survey section, click the **Save** button.

4. This Survey is now available to be added as a checklist item.

4.3. Maintain Checklist items

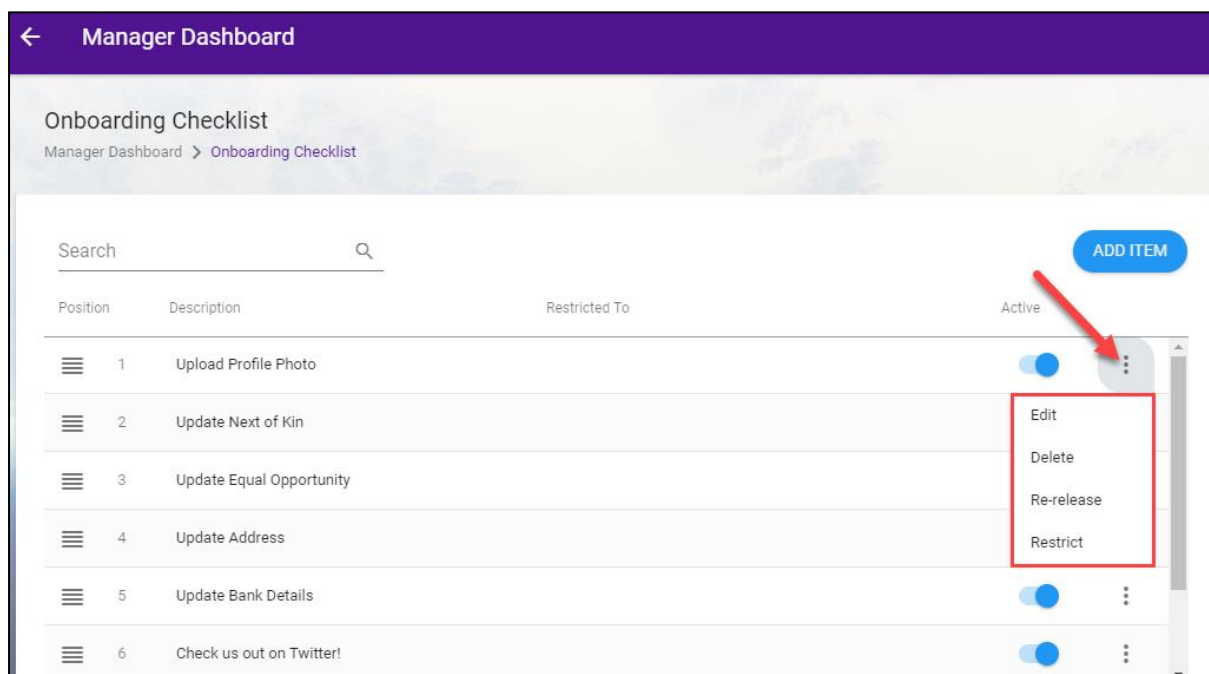

To maintain a checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.

The *Onboarding Checklist* screen displays. This screen lists all checklist items on the system. From here, you can action the following tasks for existing checklist items:

- Edit
- Delete
- Re-release
- Restrict

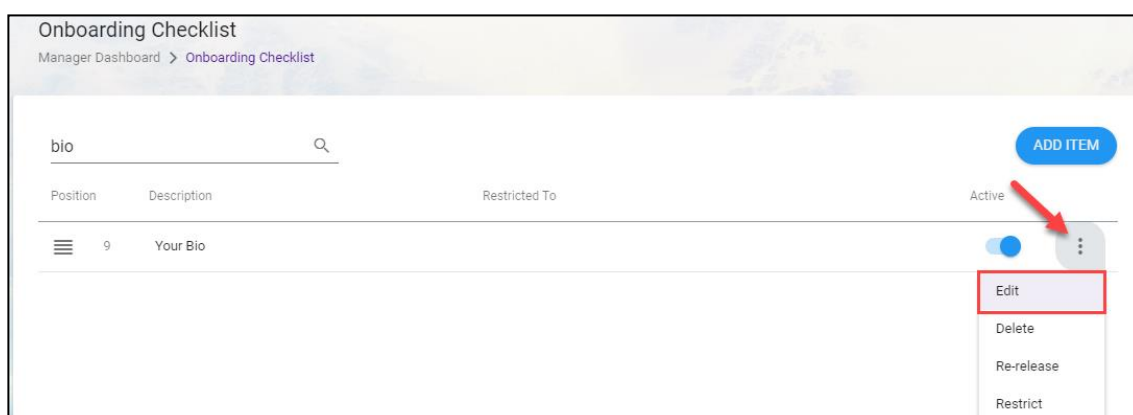

Note:

Any changes made will affect existing tasks being completed by employees, or past completed items. For example, if you delete a checklist item that otherwise was completed or is being completed by staff it will be removed from their *Tasks Outstanding* list.

4.3.1. Edit Checklist Items

To edit a checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.
3. Click the  button on the applicable onboarding item.
4. Select **Edit**.

The *Add Onboarding Item* screen displays.

5. Edit the *Title*, if applicable.
6. Edit the *Available on Day*, if applicable.
7. Edit the *Optional Information*, if applicable.
8. Click **SAVE**.

Add Onboarding Item
Manager Dashboard > Onboarding Checklist > Add Onboarding Item

Title: Your Bio

Available on Day *: 0

Optional Information: Hello! Welcome to our organisation, we are delighted to have you on board. Tell us a bit about yourself by completing this Bio. Kind regards, HR

SAVE

4.3.2. Delete Checklist Items

To delete a checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.
3. Click the  button on the applicable onboarding item.
4. Select **Delete**.

Onboarding Checklist
Manager Dashboard > Onboarding Checklist

Search: about

Position	Description	Restricted To	Active
9	About You		

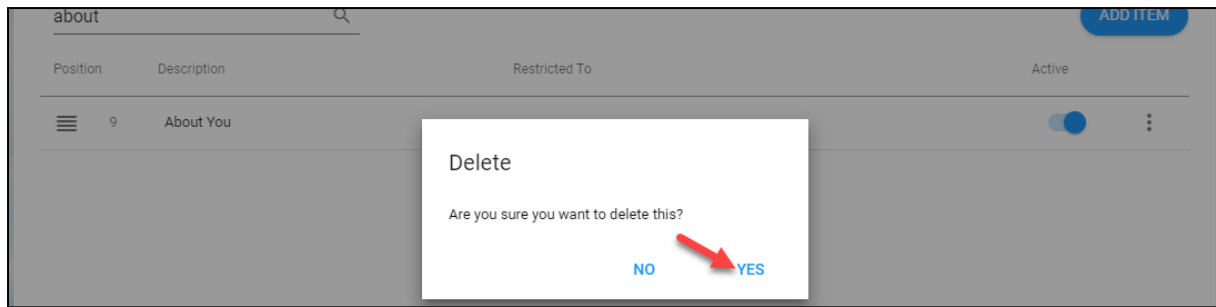

ADD ITEM

More options menu: Edit, **Delete**, Re-release, Restrict

An on-screen message displays.

5. Click **Yes**.

The checklist item is permanently deleted. This cannot be undone.

4.3.3. Re-release Checklist Items

You can re-release existing checklist items that need to be completed by employees again. The checklist item is re-released to employees who have already completed the task previously. It is not re-released to staff who still have the checklist item as an outstanding item in their *Tasks Outstanding* list.

If a checklist item is one of the types listed below, it requires the user to review their existing information/documentation and update as necessary.

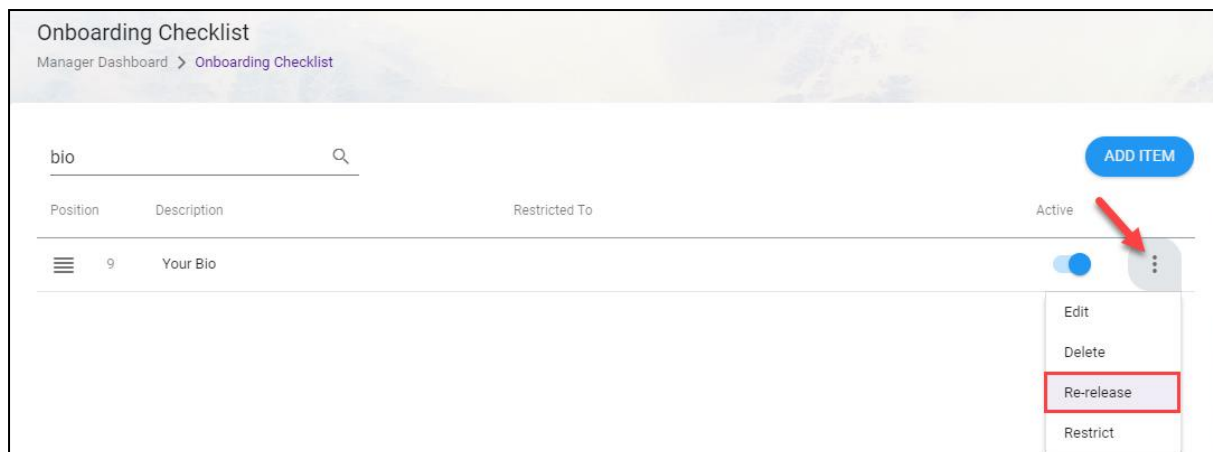

- Input items
- User defined fields
- Documents requested

If a checklist item is one of the types listed below, it requires the user to review the information contained within the task and mark the task as complete.

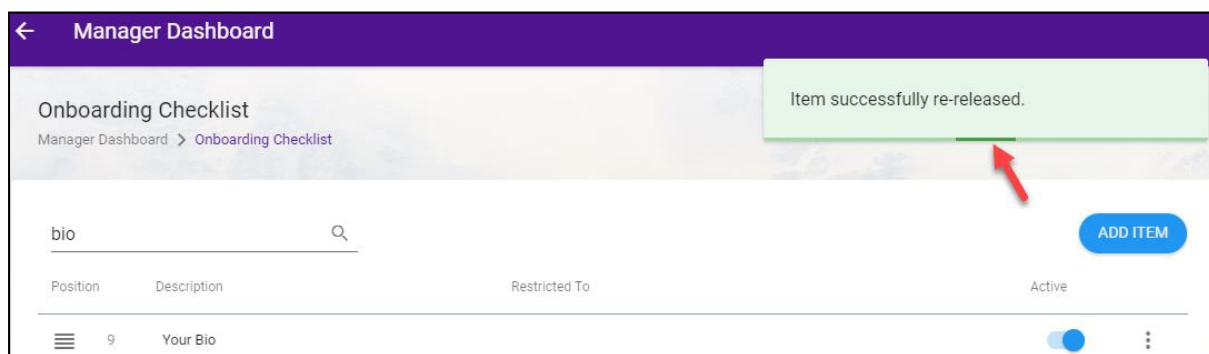

- Custom pages
- Policies

To re-release a checklist item:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.
3. Click the  button on the applicable onboarding item.
4. Select **Re-release**.

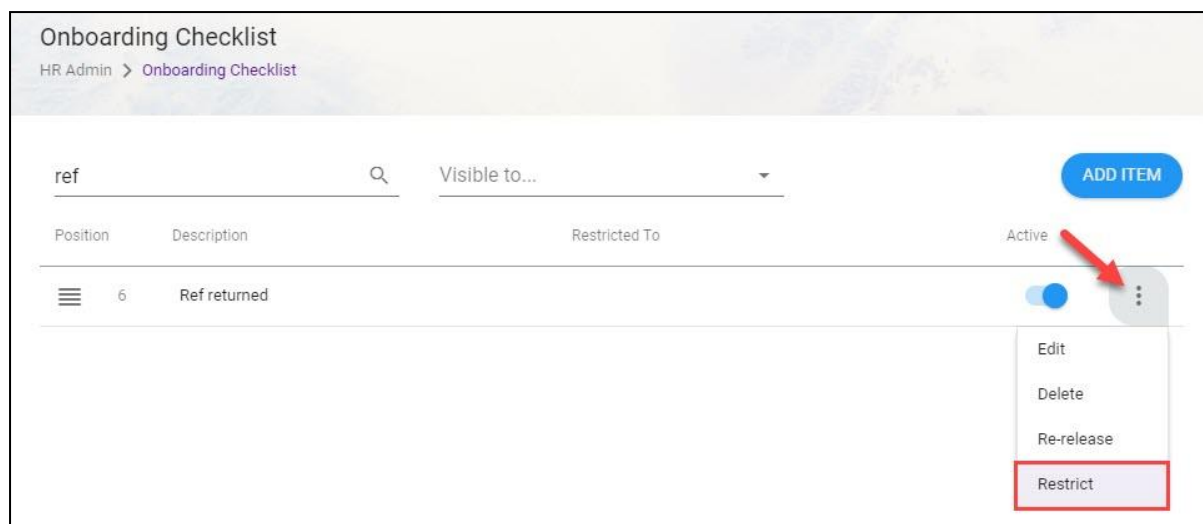

An on-screen progress bar displays notifying you that the system has re-released the checklist item. This checklist item now appears on the employee's *Tasks Outstanding* list.

4.4. Restrict Checklist Items

To restrict a checklist item:

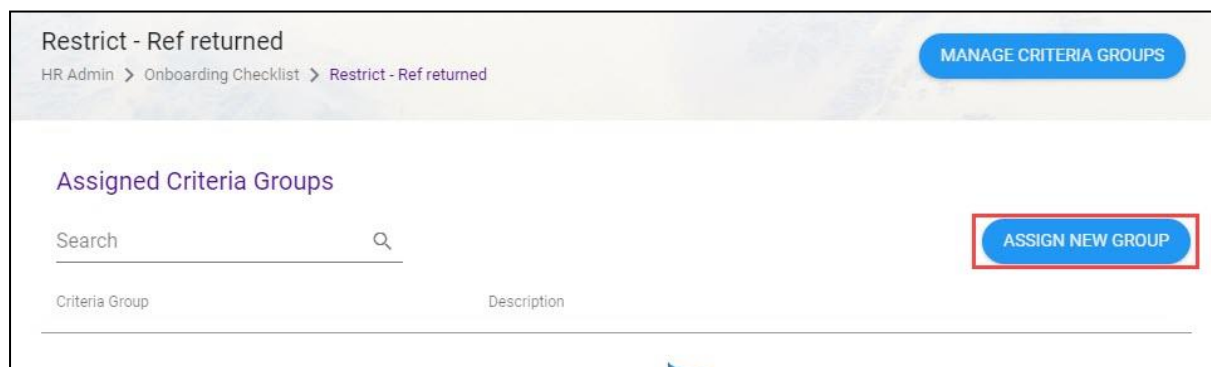

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Onboarding Checklist**.
3. Click the  button on the applicable onboarding item.
4. Select **Restrict**.

The *Restrict* screen displays, for the checklist item.

Currently there are no *Criteria Groups* assigned to the Checklist Item, therefore, no restrictions.

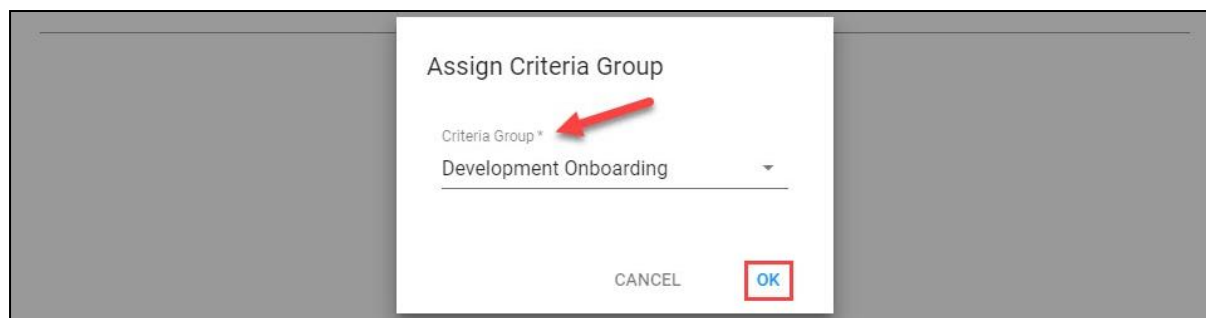

5. Select **Assign New Group**.

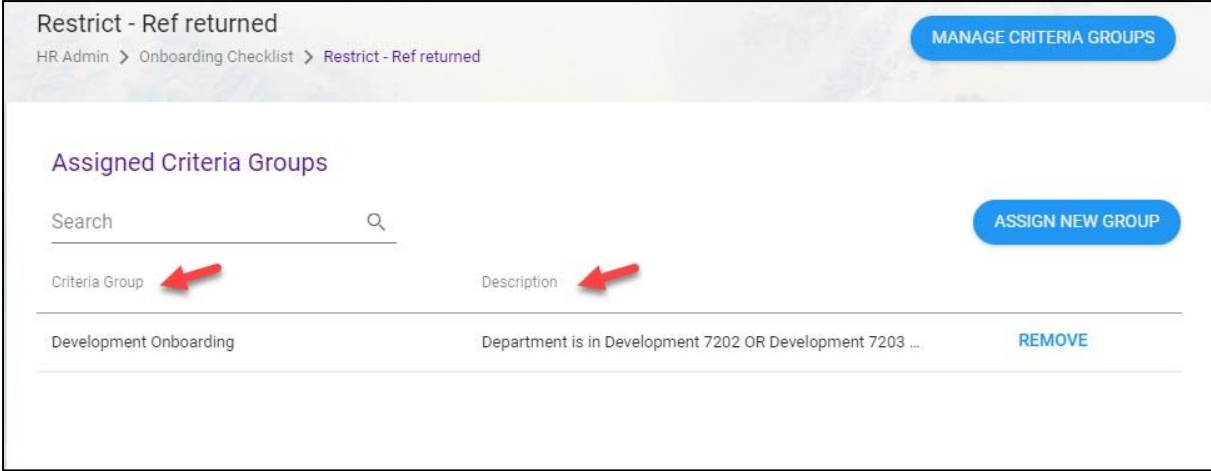

The *Assign Criteria Group* pop-up displays.

6. Select the applicable *Criteria Group* from the drop-down list.

7. Click **OK**.

The *Checklist Item* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

The screenshot displays the 'Restrict - Ref returned' configuration page. At the top, there is a breadcrumb trail: 'HR Admin > Onboarding Checklist > Restrict - Ref returned'. A blue button labeled 'MANAGE CRITERIA GROUPS' is in the top right corner. Below the breadcrumb, the section 'Assigned Criteria Groups' is visible. It includes a search bar with a magnifying glass icon and a blue button labeled 'ASSIGN NEW GROUP'. A table lists the assigned criteria groups. The first row has a 'Criteria Group' column with the value 'Development Onboarding' and a 'Description' column with the value 'Department is in Development 7202 OR Development 7203 ...'. A red arrow points to the 'Criteria Group' header, and another red arrow points to the 'Description' header. A blue 'REMOVE' button is located to the right of the first row.

Criteria Group	Description	
Development Onboarding	Department is in Development 7202 OR Development 7203 ...	REMOVE

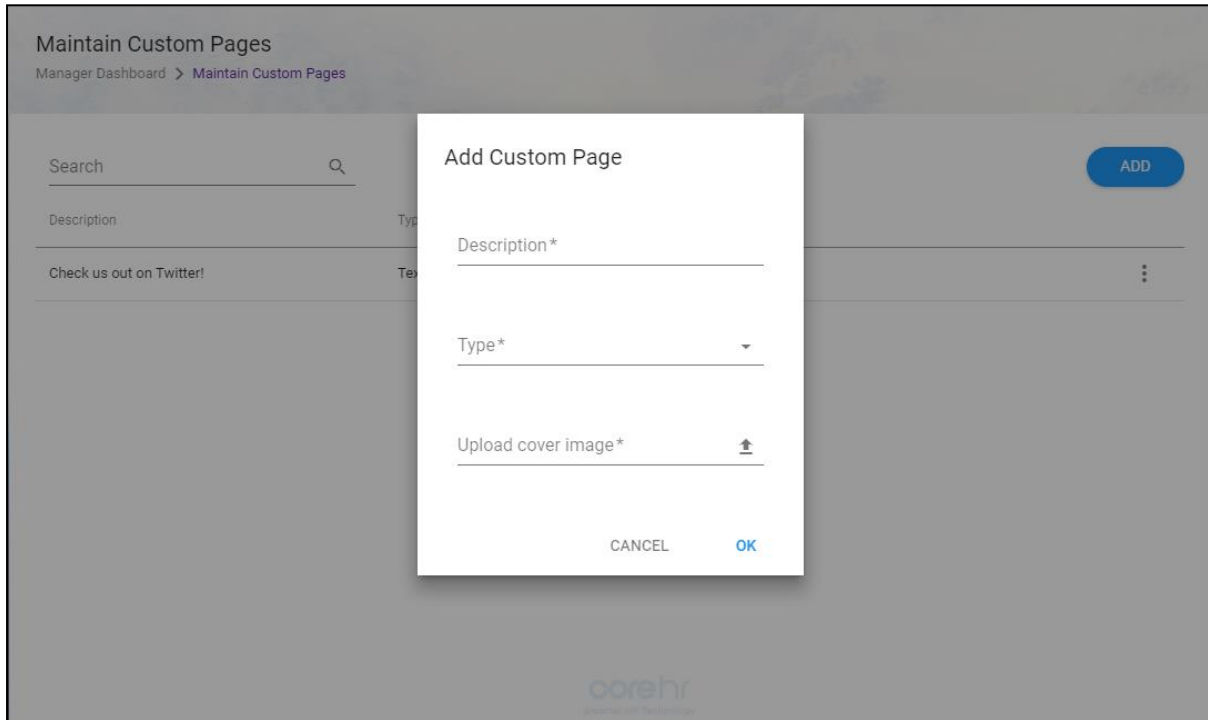

See [13. Staff Grouping](#) for guidance on how to create criteria groups.

5. Custom Pages

5.1. Add Custom Page - Screen Overview

Employee onboarding provides the ability to create custom content pages which can then be added to the main *Social Hub* dashboard or can be added as a checklist item for an employee to review and complete.

The below screenshot and table provide an overview of the *Add Custom Page* screen.

Fields available on the *Add Custom Page* screen are listed below. These are all mandatory fields.

Screen Field	Explanation
Description	You must enter a description for the page. This description is visible on the employee <i>Tasks Outstanding</i> list, and the <i>Social Hub</i> dashboard, if applicable.
Type	You must select a page type. See the 5.1.1 Custom Page Types table for further information on the types of custom pages that can be added.
Upload cover image	You must upload a cover image for the page. This cover image displays on the <i>Social Hub</i> landing page, if applicable.

5.1.1. Custom Page Types

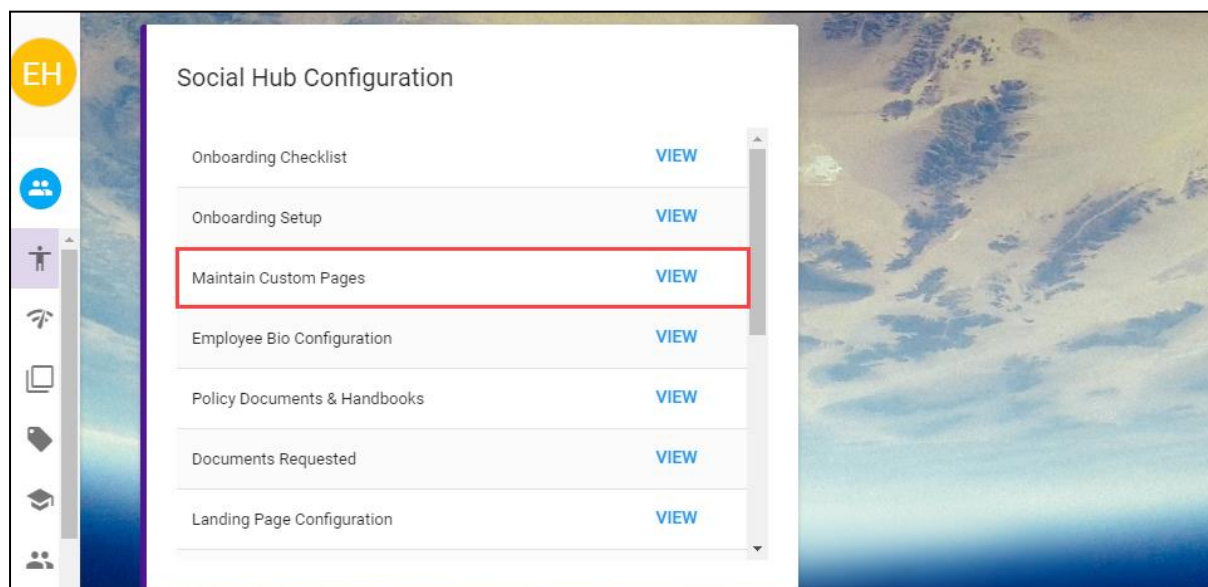

Page Type	Explanation
Text	General text can be added to this page.
Video	Embedded video links can be displayed on this page, along with general text. Note 1: You must specify the specific embedded link, for example: Incorrect Link: 'https://www.youtube.com/watch?v=ABC' Correct Link: 'https://www.youtube.com/embed/ABC' The embedded link may differ depending on where the content is being referenced from, the above links are used for providing an example only. Note 2: - This requires configuration to work, you must consult with your organisations own Security/IT team before configuring. For example, sites that do not violate internal policies. This will determine the external video content that can be displayed inside the CoreHR application. - A link may navigate to a whitelisted site, however, the site itself may have its own security restrictions blocking content from being displayed in other applications. CoreHR does not have control over this. The <i>Content Security Policy</i> widget is available in CorePortal Security.
Map	This provides a google map address lookup, to display on an embedded map page. Drop pins can be added to the map, along with adding general text to the page.
Link	This provides external links on a page. The employee can navigate to external resources. General text can be added to this page.
Image	Numerous images can be added to this page, along with general text. Employees can then view these images upon selection. A title must be added to each image uploaded.

5.2. Create a Custom Page

5.2.1. Link Page

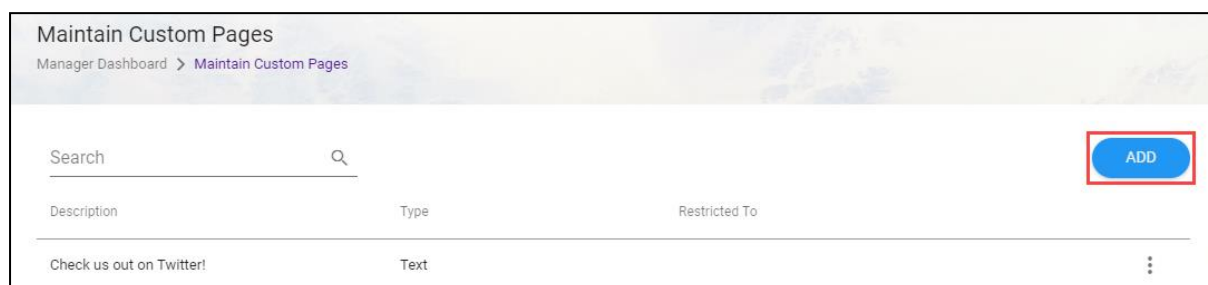

To create a link custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Maintain Custom Pages*.

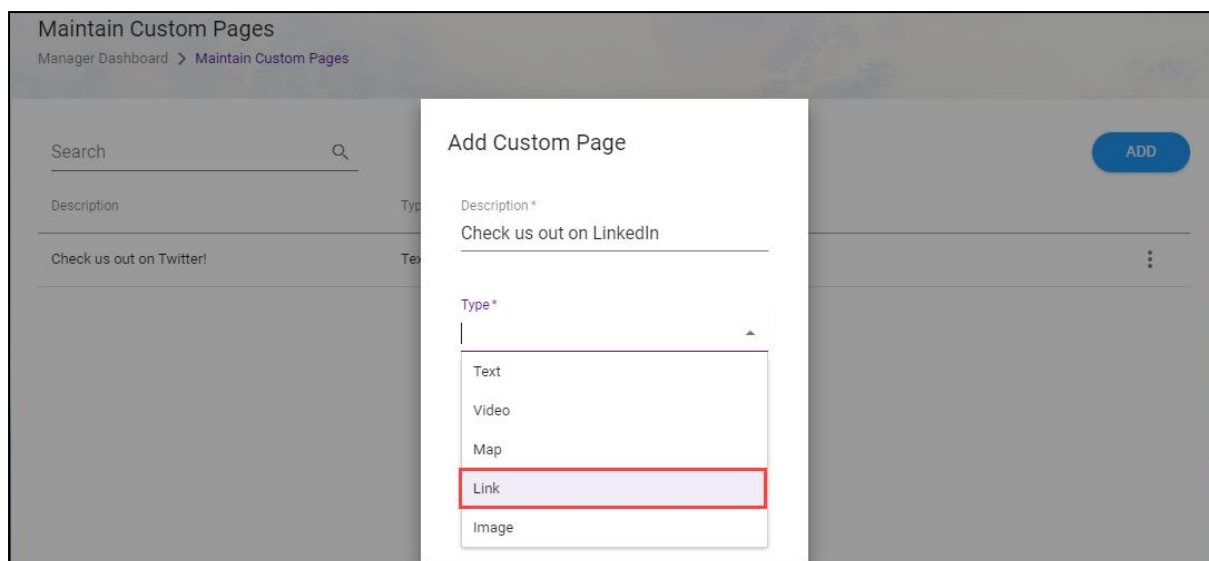

The *Maintain Custom Pages* screen displays.

3. Click **Add**.

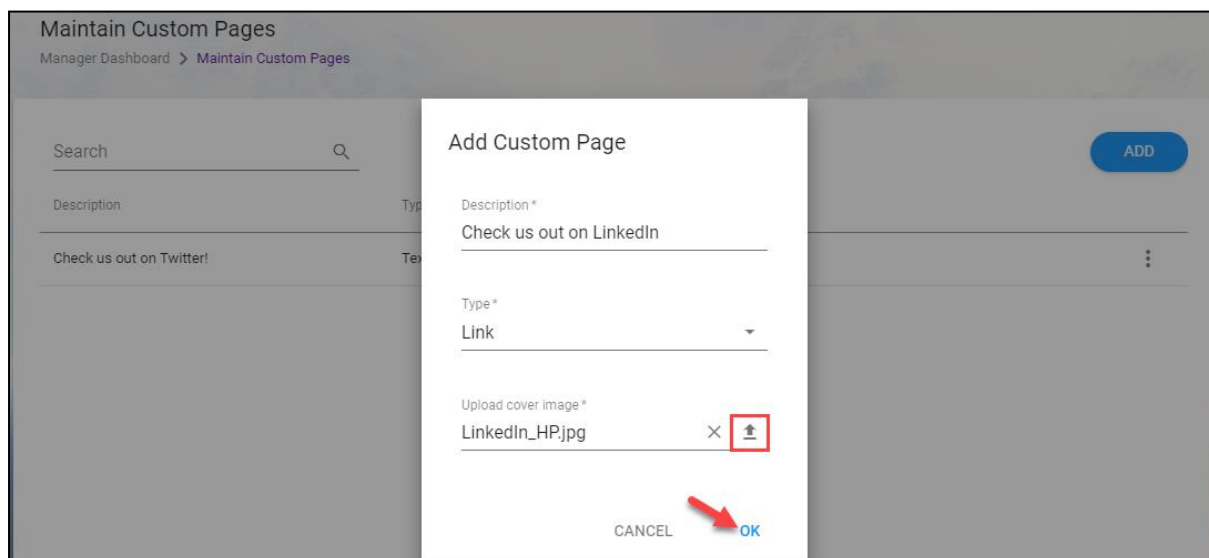

The *Add Custom Page* pop-up displays.

4. Enter a page *Description*.
5. Select the page *Type* from the drop-down list.
In this example, a link page is being created.

6. Upload a cover image by clicking the  button.
Browse to, or search for to image on your device.

7. Click **OK**.

The *Edit Custom Page* screen displays.

8. Click **Add**, to add a link.

Manager Dashboard > Maintain Custom Pages* > Edit Custom Page

5.2.2. Text Page

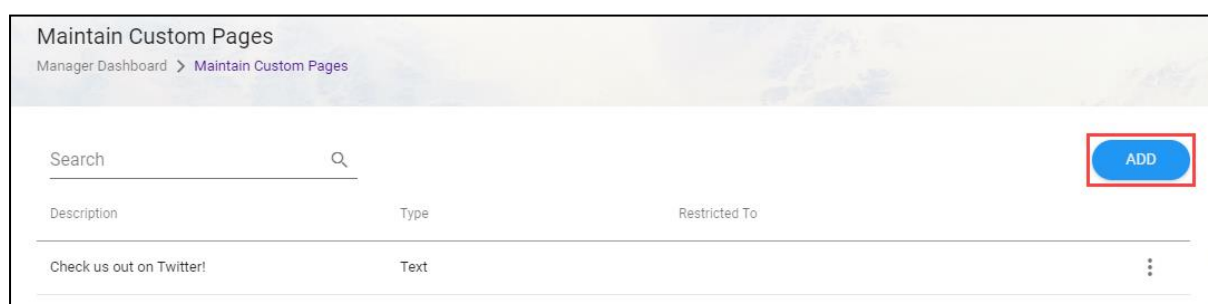

To create a text custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Maintain Custom Pages**.

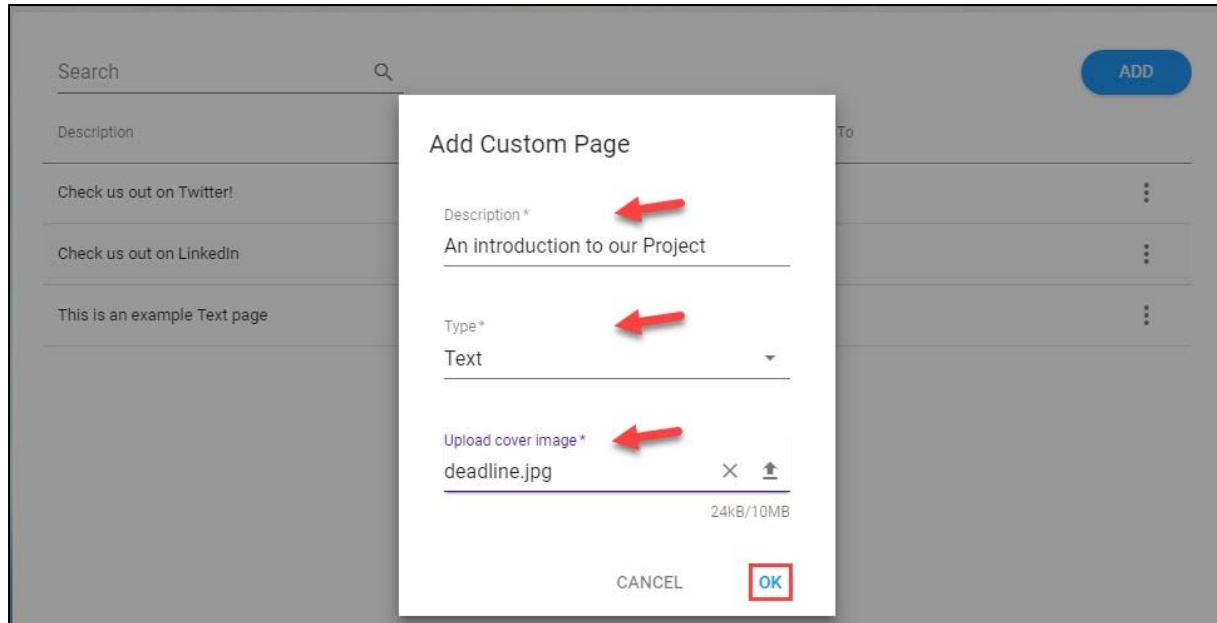

The *Maintain Custom Pages* screen displays.

3. Select **Add**.

The *Add Custom Page* pop-up displays.

4. Enter a page *Description*.
5. Select the page *Type* from the drop-down list.
In this example, a text page is being created.
6. Upload a cover image by clicking the  button.
Browse to, or search for to image on your device.
7. Select **OK**.

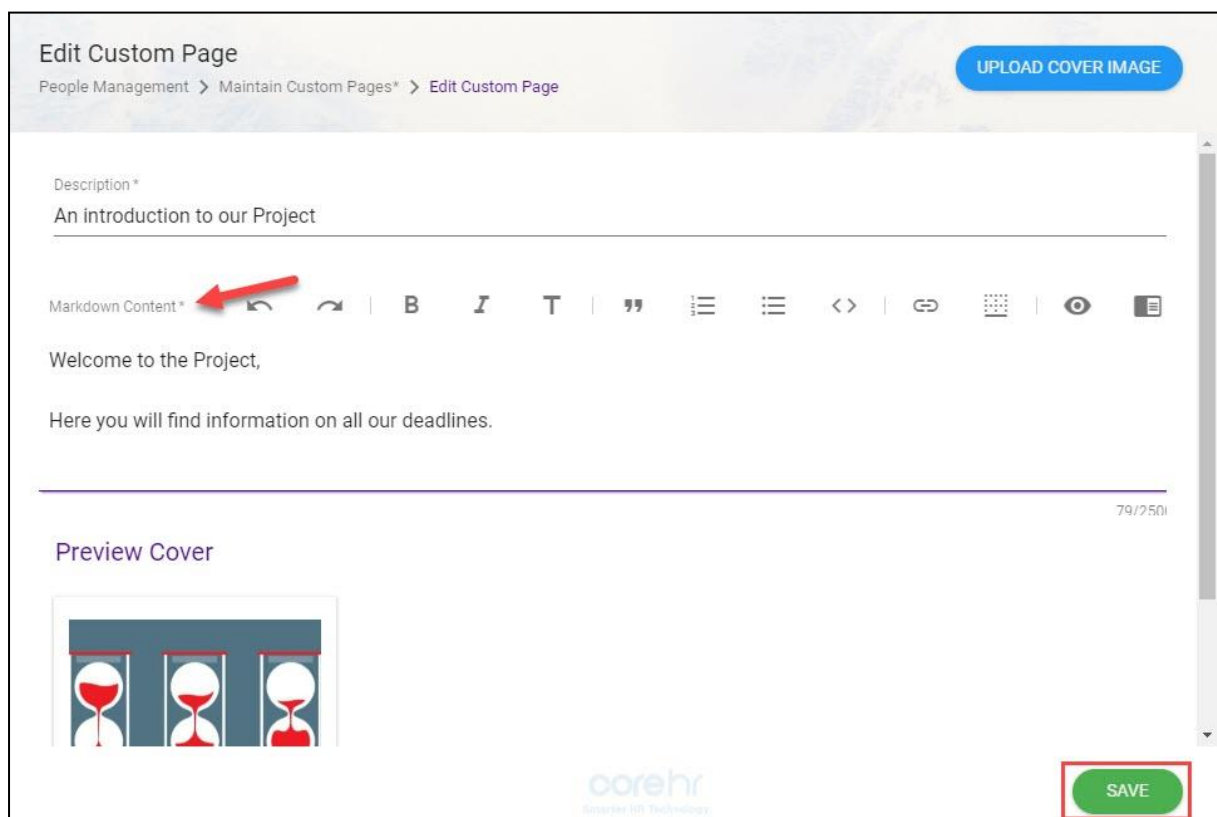

The screenshot shows a modal window titled "Add Custom Page" overlaid on a blurred background of a page list. The modal contains three required fields, each indicated by a red arrow:

- Description ***: A text input field containing "An introduction to our Project".
- Type ***: A dropdown menu with "Text" selected.
- Upload cover image ***: A file upload area showing "deadline.jpg" with a file size of "24kB/10MB".

At the bottom of the modal are "CANCEL" and "OK" buttons. The "OK" button is highlighted with a red rectangle.

The *Edit Custom Page* screen displays.

8. Enter the text. Use the markdown editor to apply simple formatting.
9. Click **SAVE**.

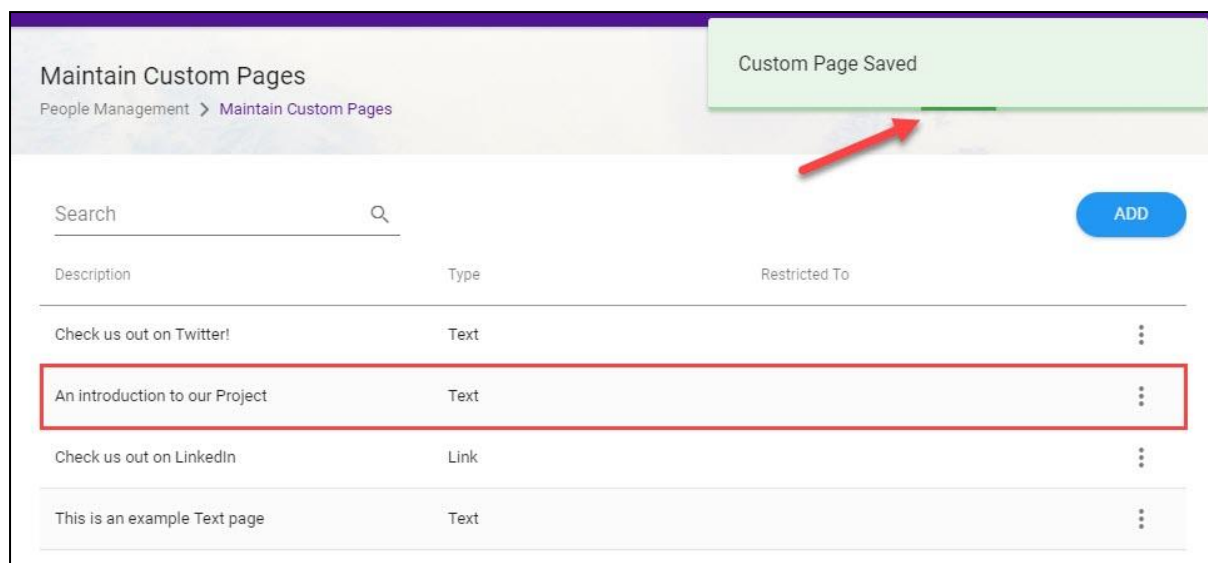

The screenshot shows the "Edit Custom Page" screen. At the top right is a blue "UPLOAD COVER IMAGE" button. The main content area includes:

- Description ***: A text input field with "An introduction to our Project".
- Markdown Content ***: A rich text editor with a toolbar (indicated by a red arrow) containing icons for undo, redo, bold, italic, text color, quote, list, link, unlink, table, and preview. The editor contains the text: "Welcome to the Project," and "Here you will find information on all our deadlines." A character count "79/250" is visible at the bottom right of the editor.
- Preview Cover**: A section showing a preview of the cover image, which is a graphic with three hourglass icons.

At the bottom right, there is a green "SAVE" button highlighted with a red rectangle. The CoreHR logo is visible at the bottom center.

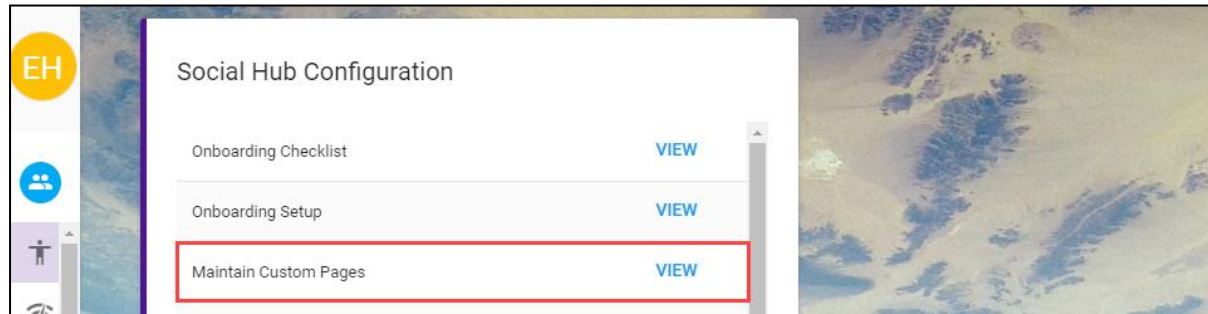

An on-screen progress bar displays notifying you that the system has added the *Custom Page*. The page then displays on the *Maintain Custom Pages* screen.

5.2.3. Video Page

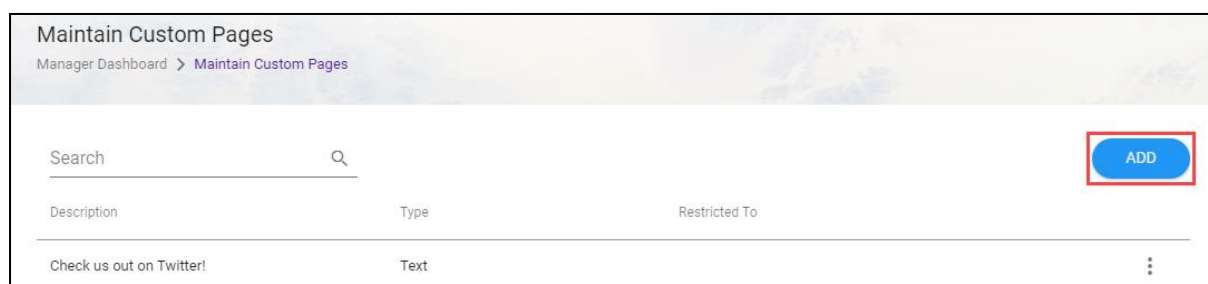

To create a video custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Maintain Custom Pages*.

The *Maintain Custom Pages* screen displays.

3. Click **Add**.

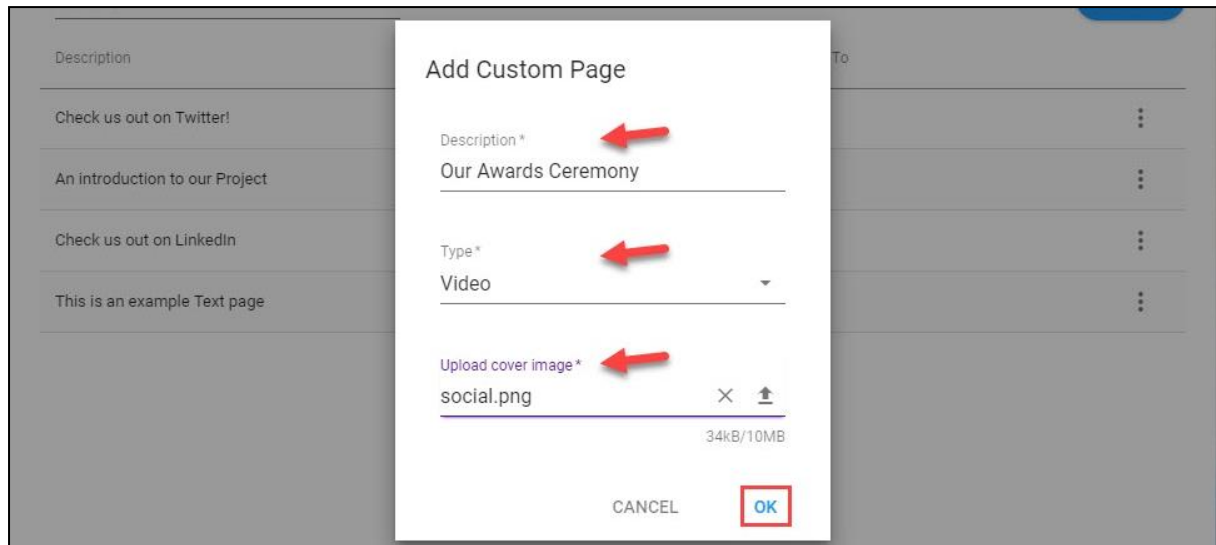

The *Add Custom Page* pop-up displays.

4. Enter a page *Description*.
5. Select the page *Type* from the drop-down list.
In this example, a video page is being created.

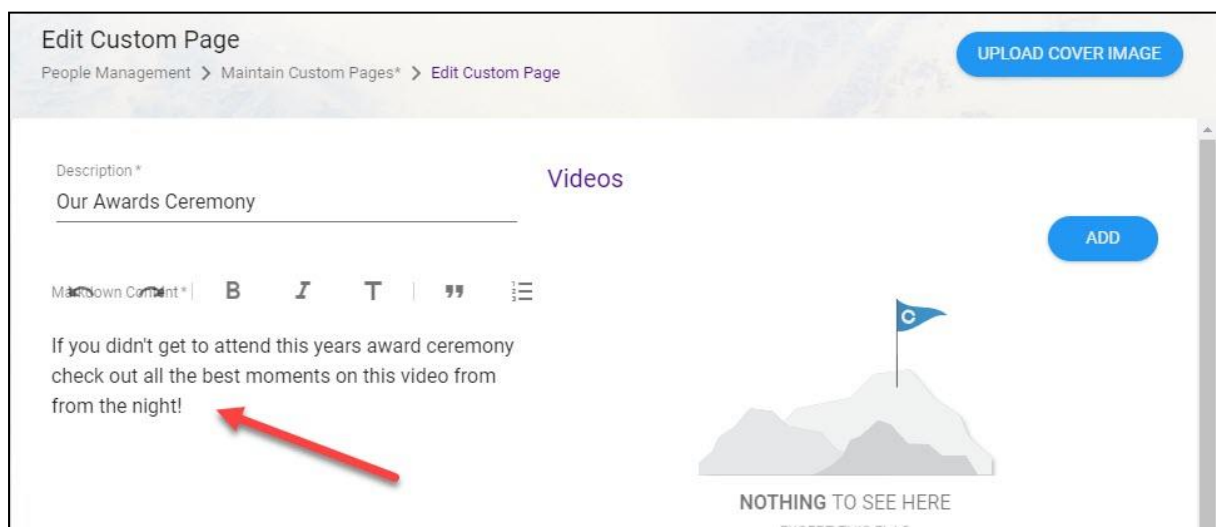

6. Upload a cover image by clicking the  button.
Browse to, or search for to image on your device.

7. Click **OK**.

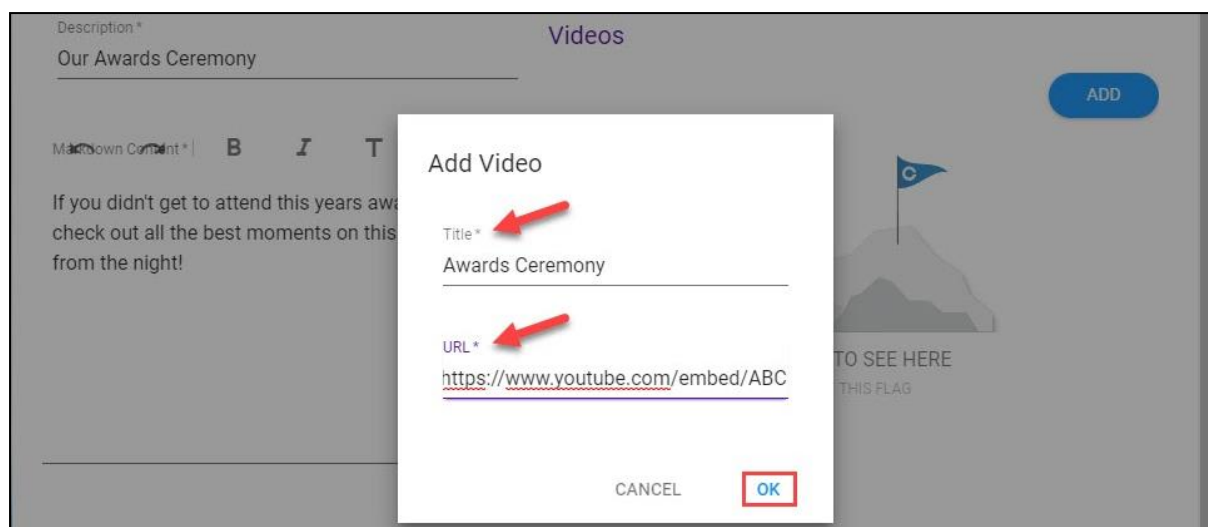

The *Edit Custom Page* screen displays.

8. Enter the text. Use the markdown editor to apply simple formatting.
9. Click **Add**.

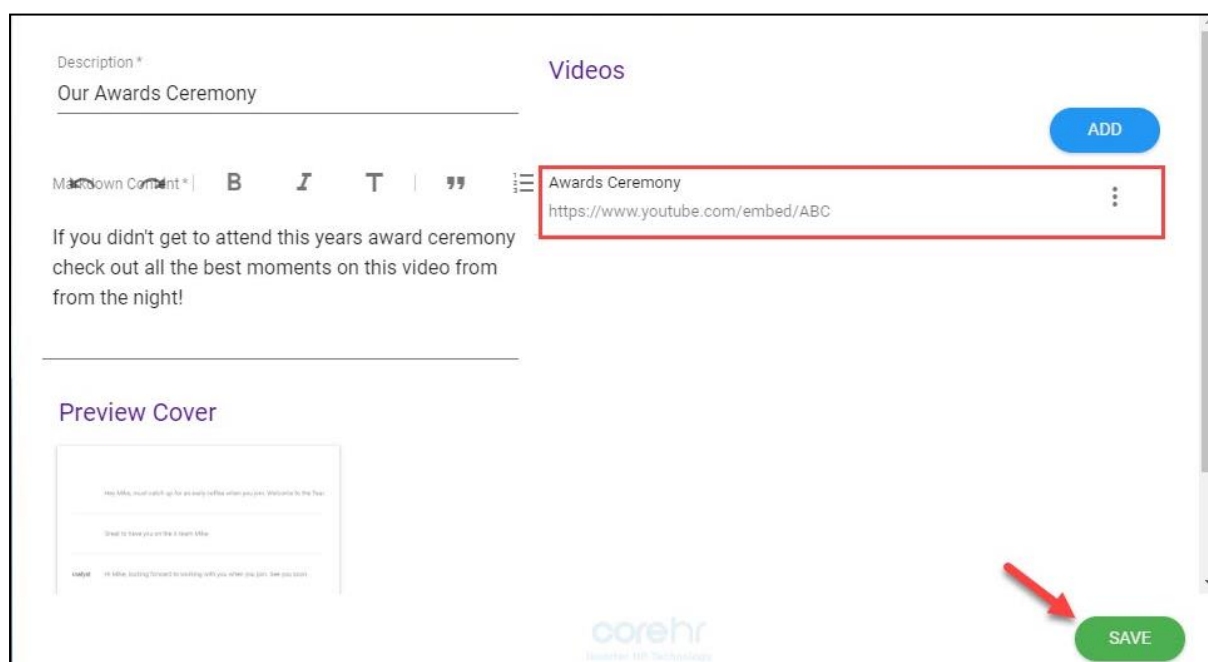

The *Add Video* pop-up displays.

10. Enter the video *Title*.
11. Enter the embedded video *URL*.
12. Select **OK**.

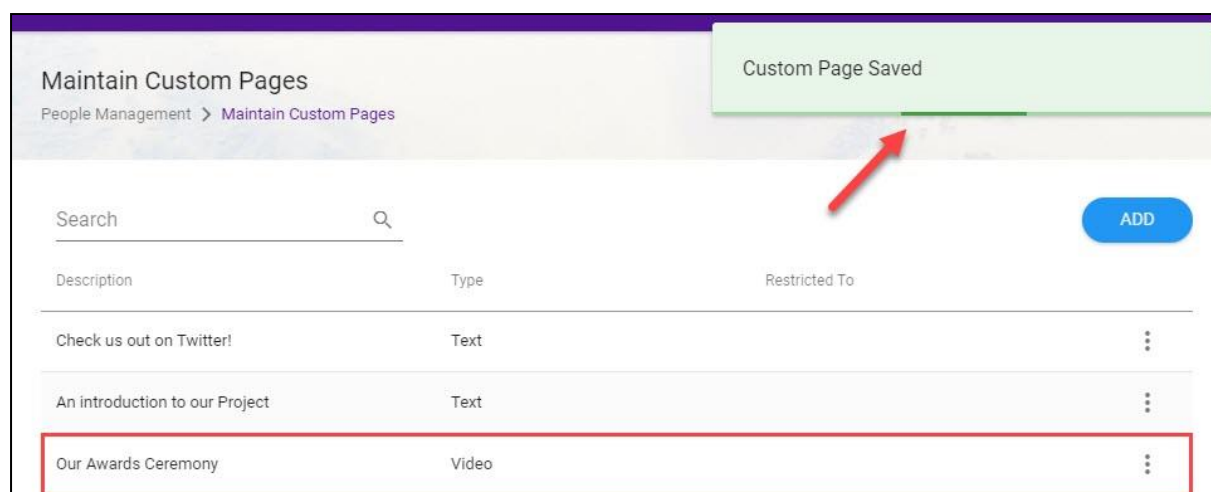

You are returned to the *Edit Custom Page* screen.
The video is now added to the Videos section of the screen.

13. Select **SAVE**.

An on-screen progress bar displays notifying you that the system has added the *Custom Page*. The page then displays on the *Maintain Custom Pages* screen.

Note:

It is possible to create and configure a *Video Page*, however, by default, videos hosted outside of the CoreHR Application cannot be viewed / embedded, this includes custom video pages created through *Social Onboarding*. This provides a level of control, protection and security.

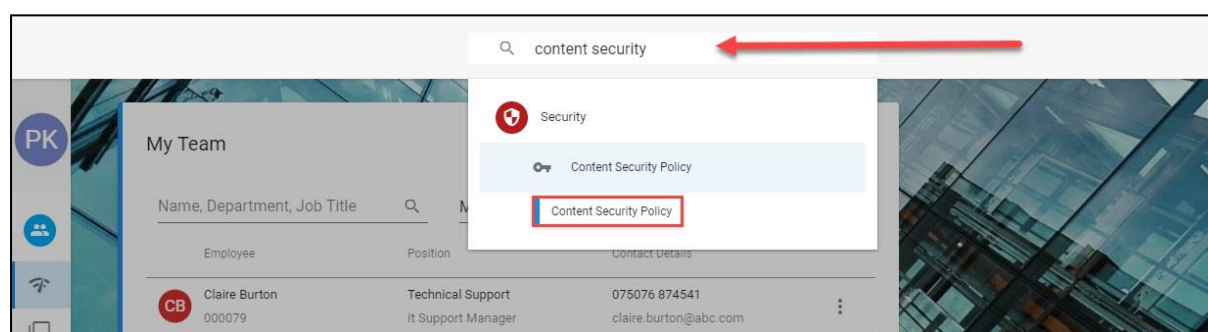

If your organisation wishes to include embedded *Video Pages* on the main onboarding dashboard, or within the *Team Pages*, these sources must be added to the 'frame-src' on the *Content Security Policy* widget in *Security*. If an external *Custom Video Page* is added but does not have an entry on the [Content Security Policy](#) widget, the video will be blocked, and users will not be able to view it.

This must conform to the standard syntax for *Content Security Policy* and you should consult with your Security/Technical team to include these.

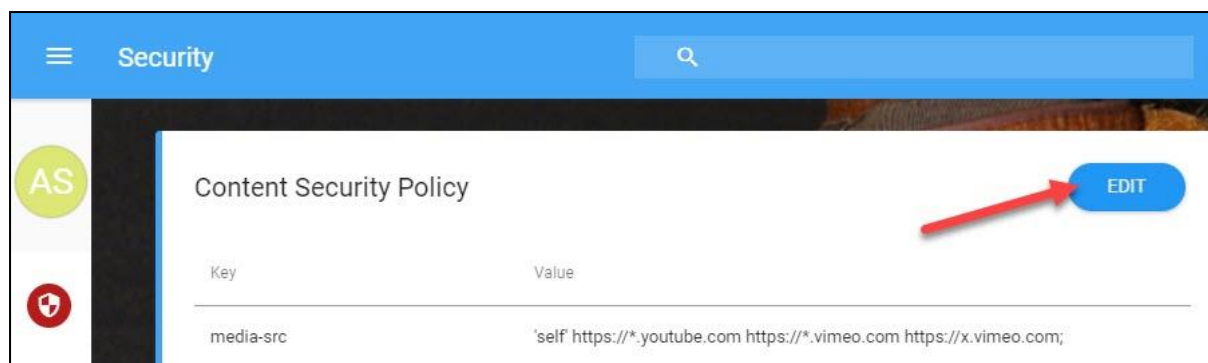

Content Security Policy Widget

To add a source to the *Content Security Policy* widget:

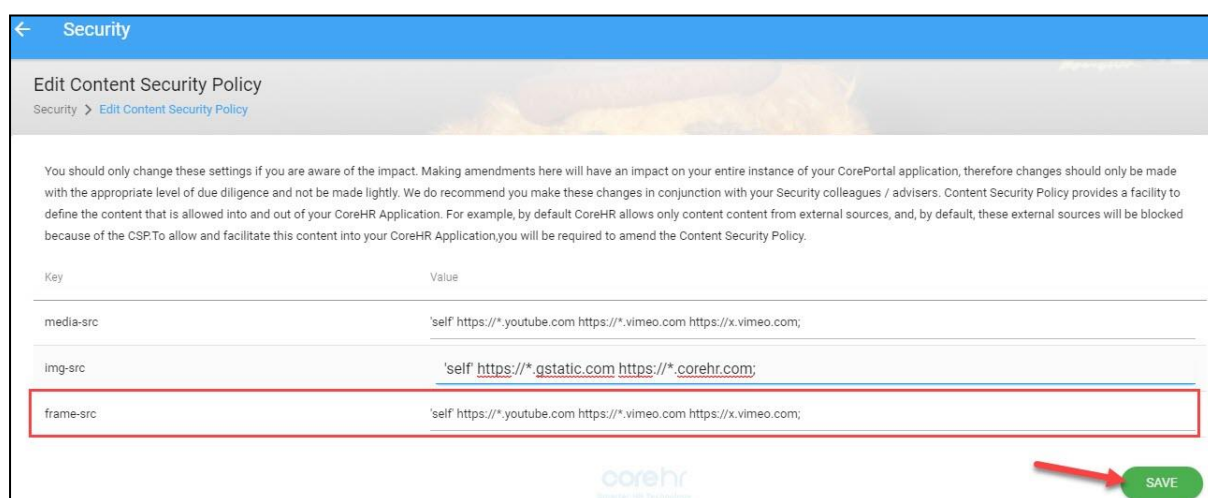

1. *Quick Jump to the Content Security Policy widget (on the Security dashboard).*

2. Click **Edit**.

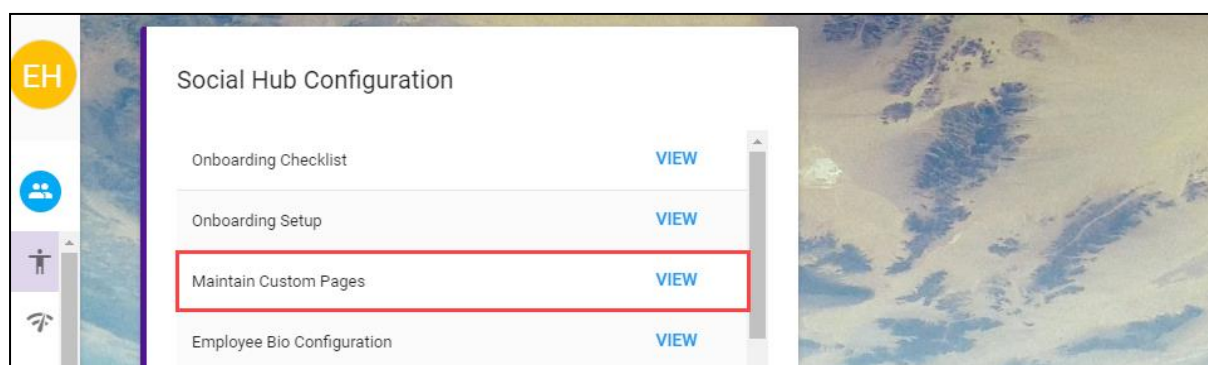

3. Add the source to the 'frame-src' field.
4. Click **Save**.

5.2.4. Map Page

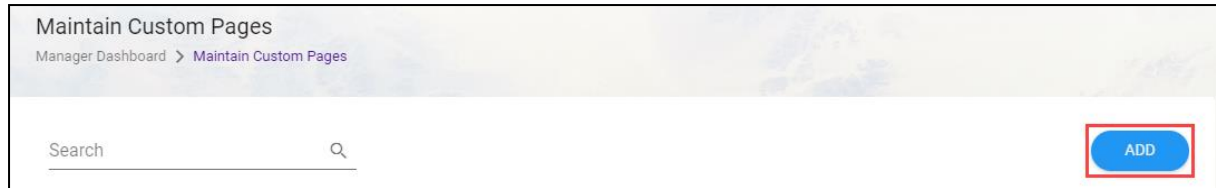

To create a map custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Maintain Custom Pages**.

The *Maintain Custom Pages* screen displays.

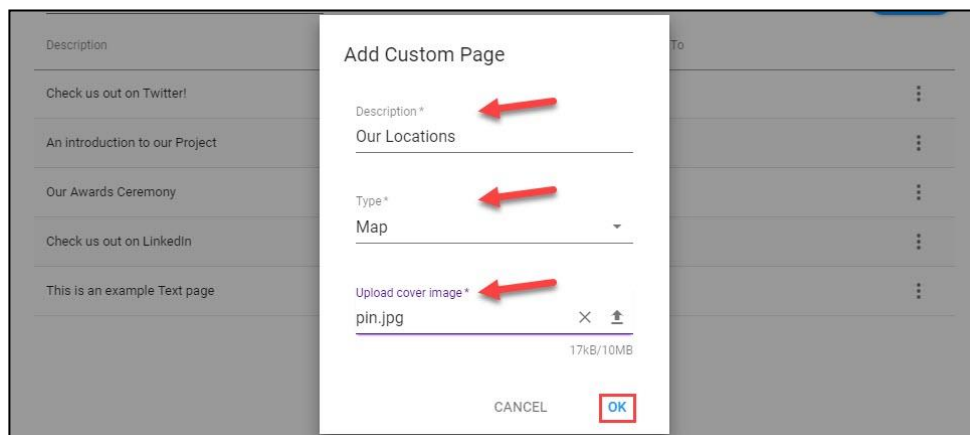

3. Click **Add**.

The *Add Custom Page* pop-up displays.

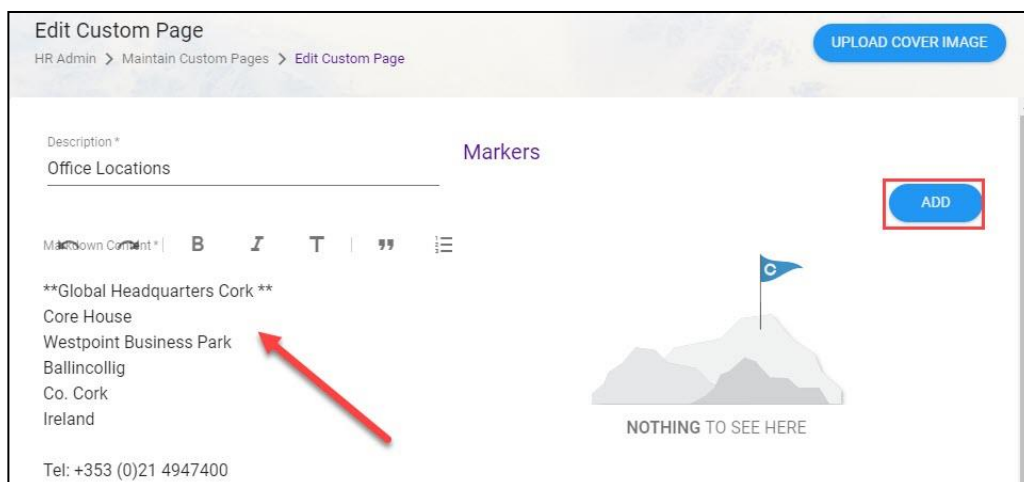

4. Enter a page *Description*.
5. Select the page *Type* from the drop-down list.
In this example, a map page is being created.

6. Select the  button to upload a cover image.
7. Select **OK**.

You are returned to the *Edit Custom Pages* screen.

8. Enter the *Markdown Content*.
9. Select **ADD**.

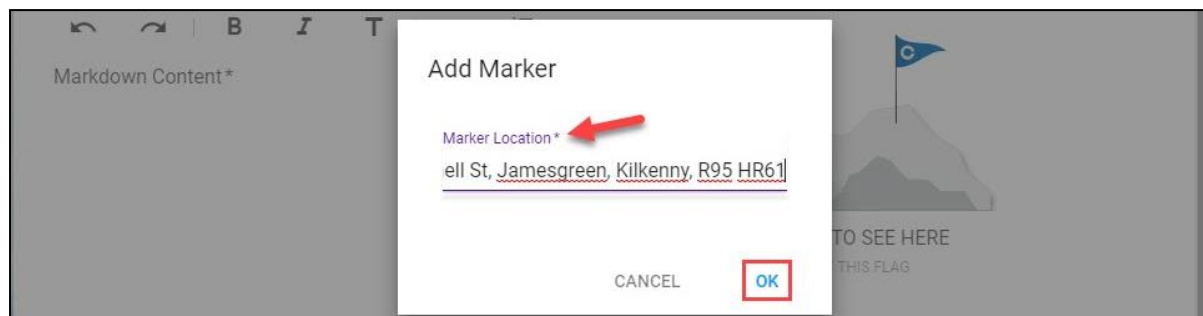

The *Add Marker* pop-up displays.

10. Enter the *Marker Location*.

This is the full address of the location.

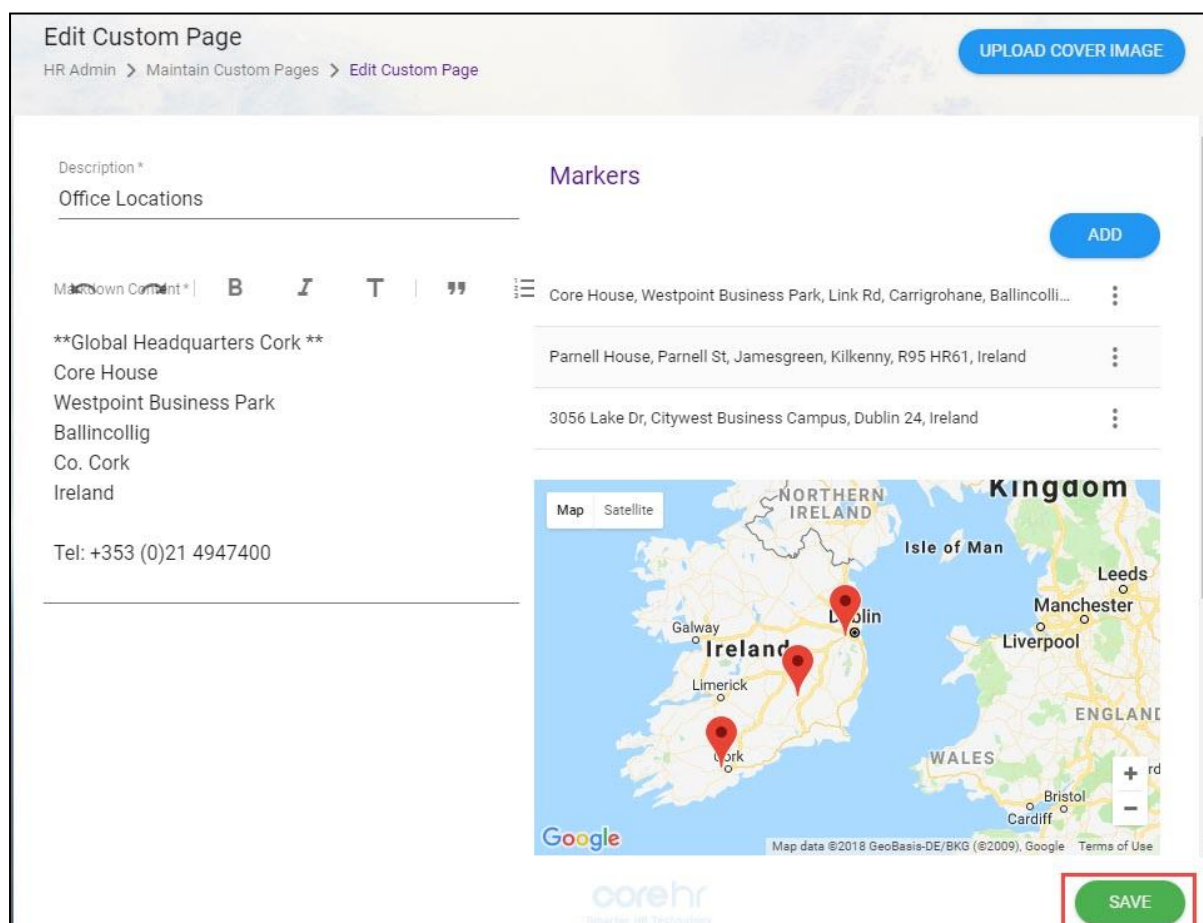

In this example, this process is completed multiple times for 3 office locations.

11. Select **OK**.

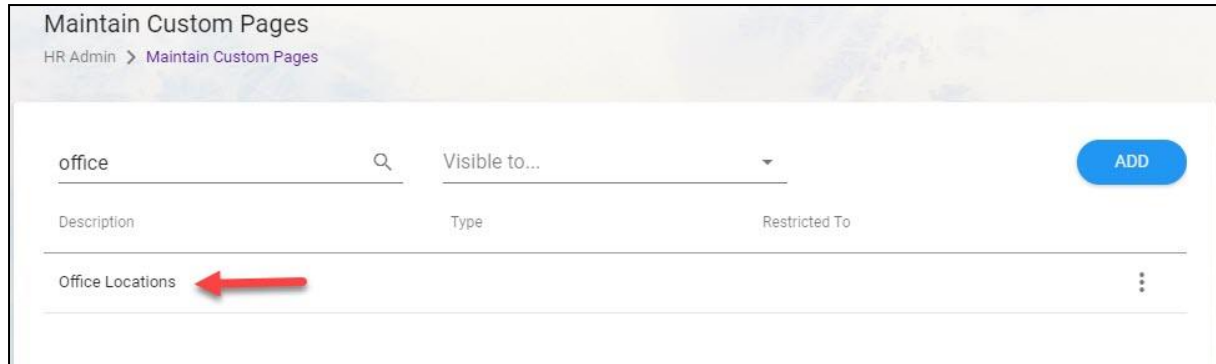

You are returned to the *Edit Custom Page* screen.

12. Click **Save**.

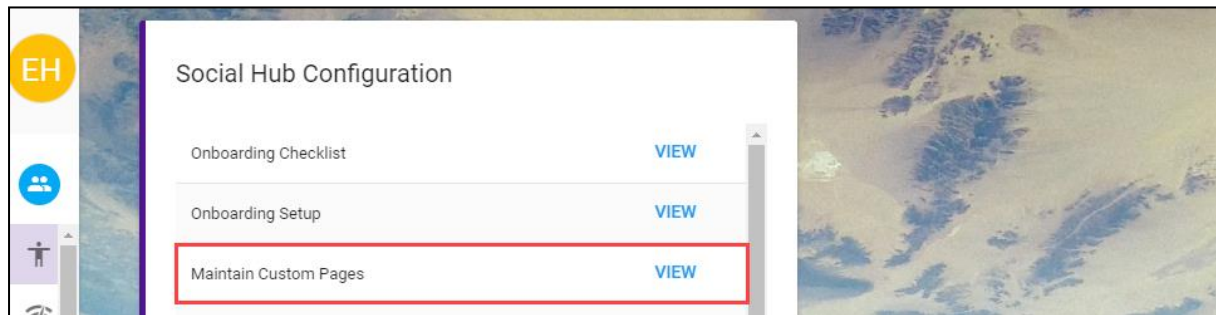

The page then displays on the *Maintain Custom Pages* screen.

5.2.5. Image Page

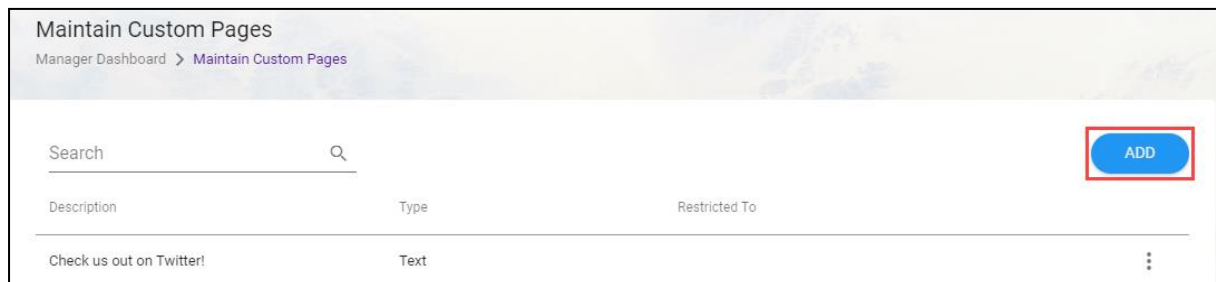

To create an image custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Maintain Custom Pages*.

The *Maintain Custom Pages* screen displays.

3. Click **Add**.

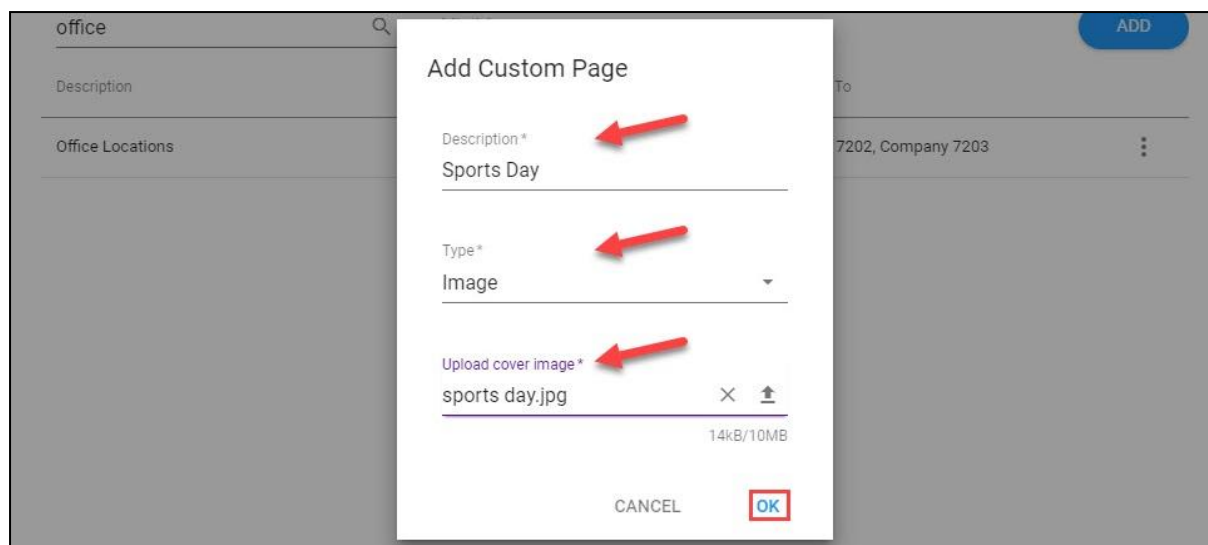

The *Add Custom Page* pop-up displays.

4. Enter a page *Description*.
5. Select the page *Type* from the drop-down list.
In this example, an image page is being created.

6. Select the  button to upload a cover image.

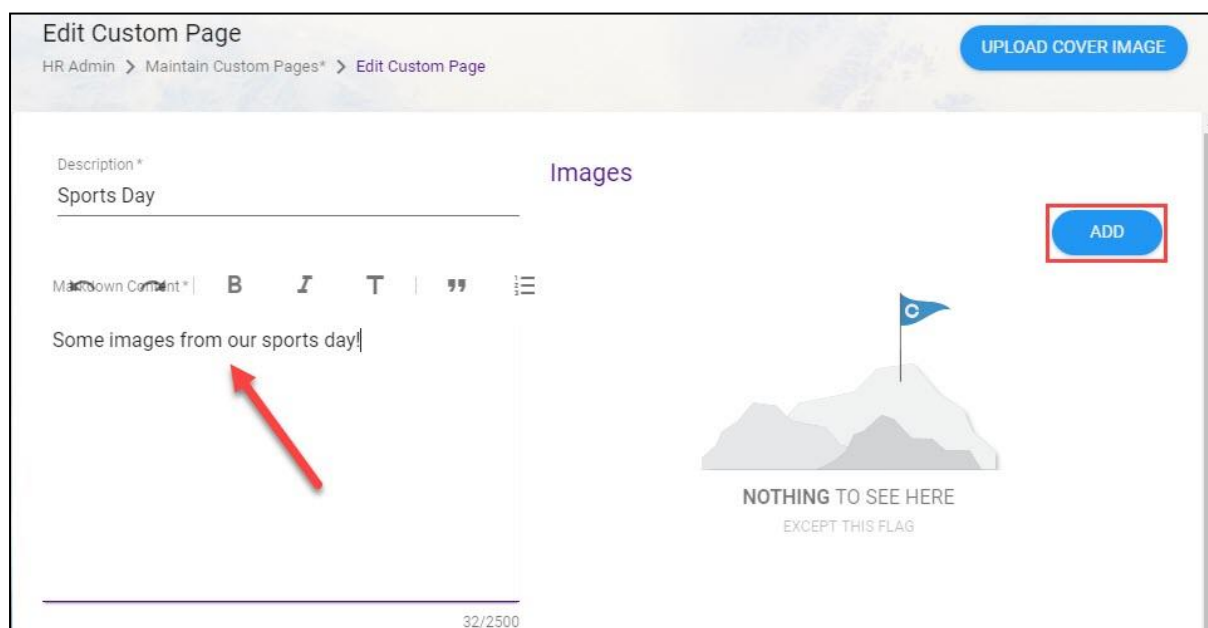

7. Select **OK**.

You are returned to the *Edit Custom Page* screen.

8. Enter the text. Use the markdown editor to apply simple formatting.

9. Click **Add**.

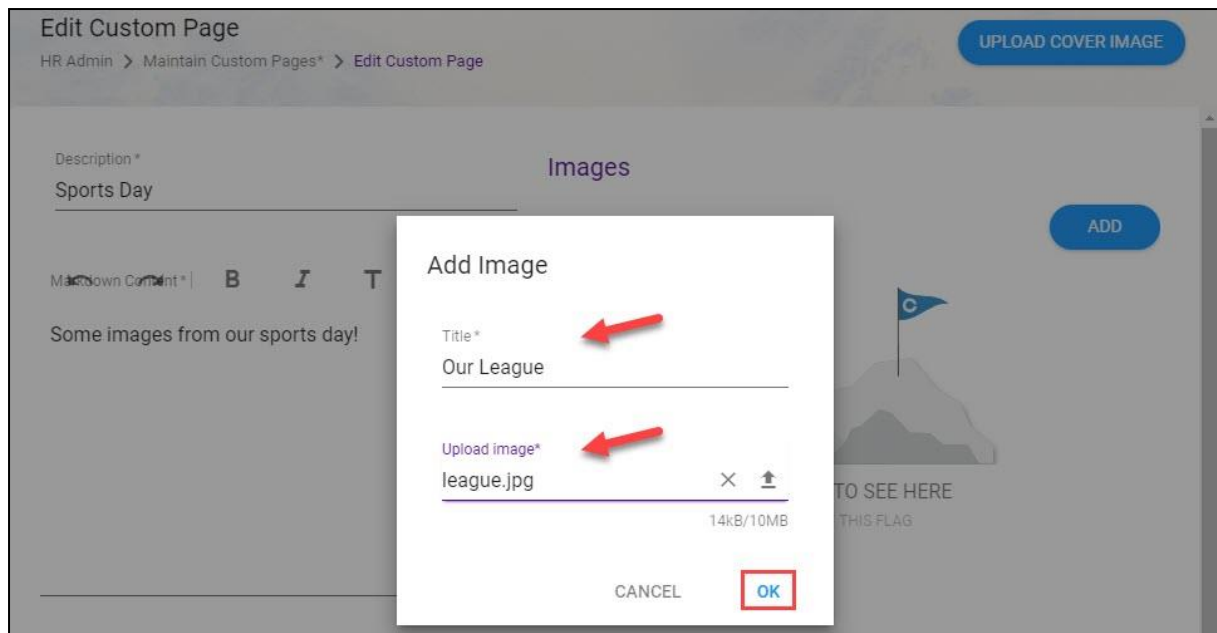

The *Add Image* pop-up displays.

10. Enter an image *Title*.

11. Select the  button to upload the image.

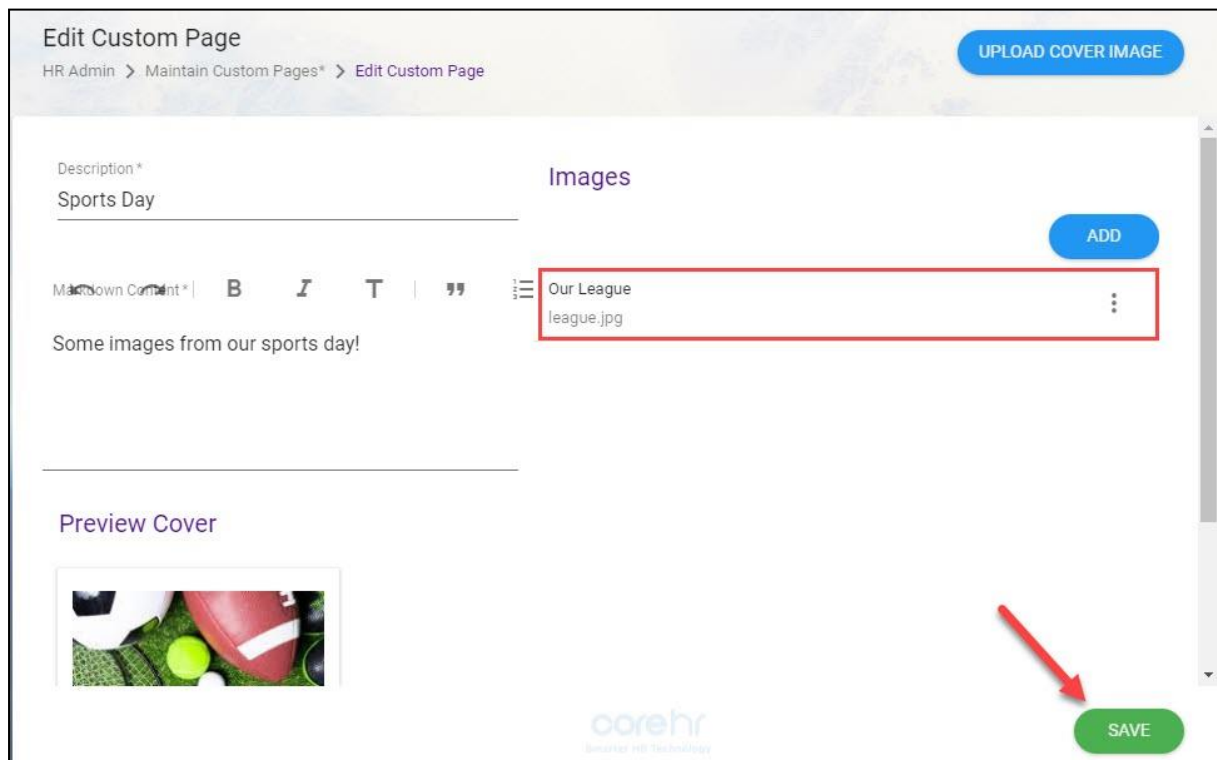

12. Select **OK**.

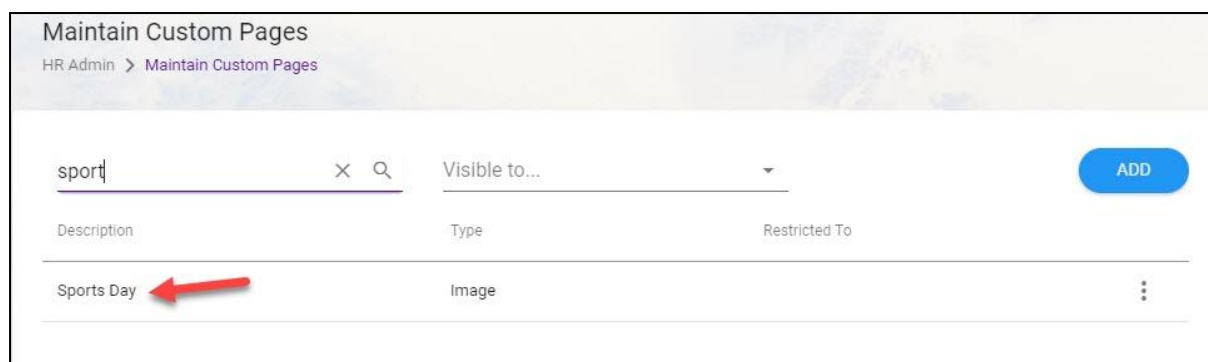

You are returned to the *Edit Custom Page* screen.

Repeat the *Add Image* process for each image on this screen.

13. Once complete, click **Save**.

The page then displays on the *Maintain Custom Pages* screen.

5.3. Maintain Custom Page

To maintain a custom page:

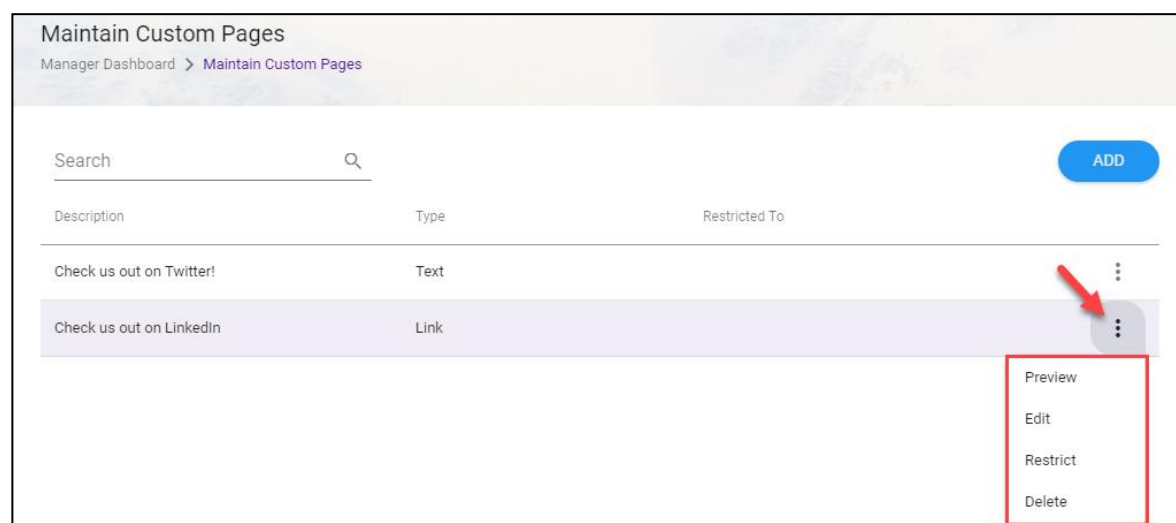

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Maintain Custom Pages*.

The *Maintain Custom Pages* screen displays. This screen lists all custom pages on the system.

From here, you can action the following tasks for existing custom pages:

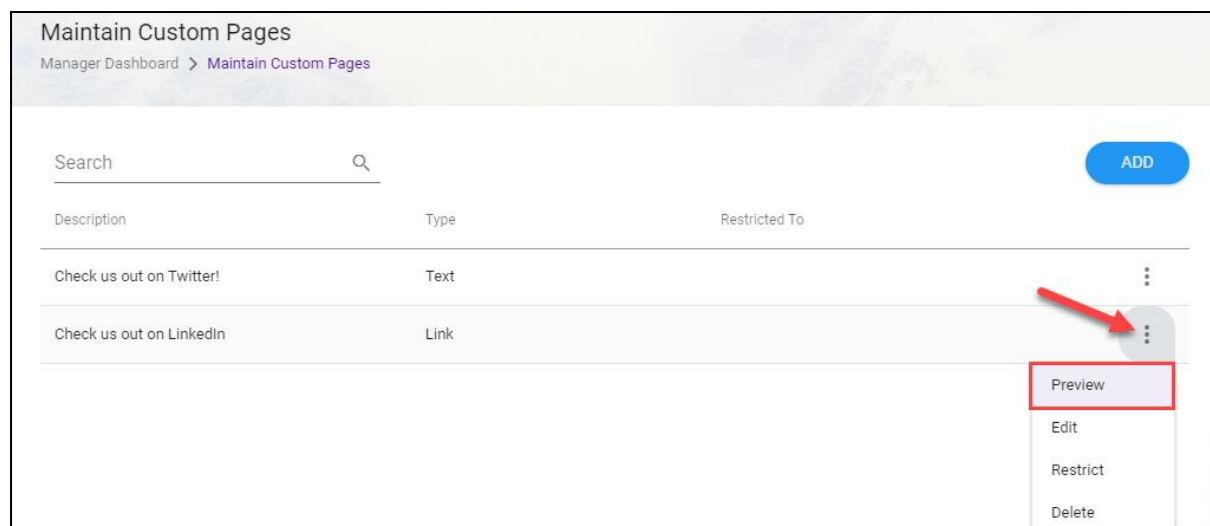

- Preview
- Restrict
- Edit
- Delete

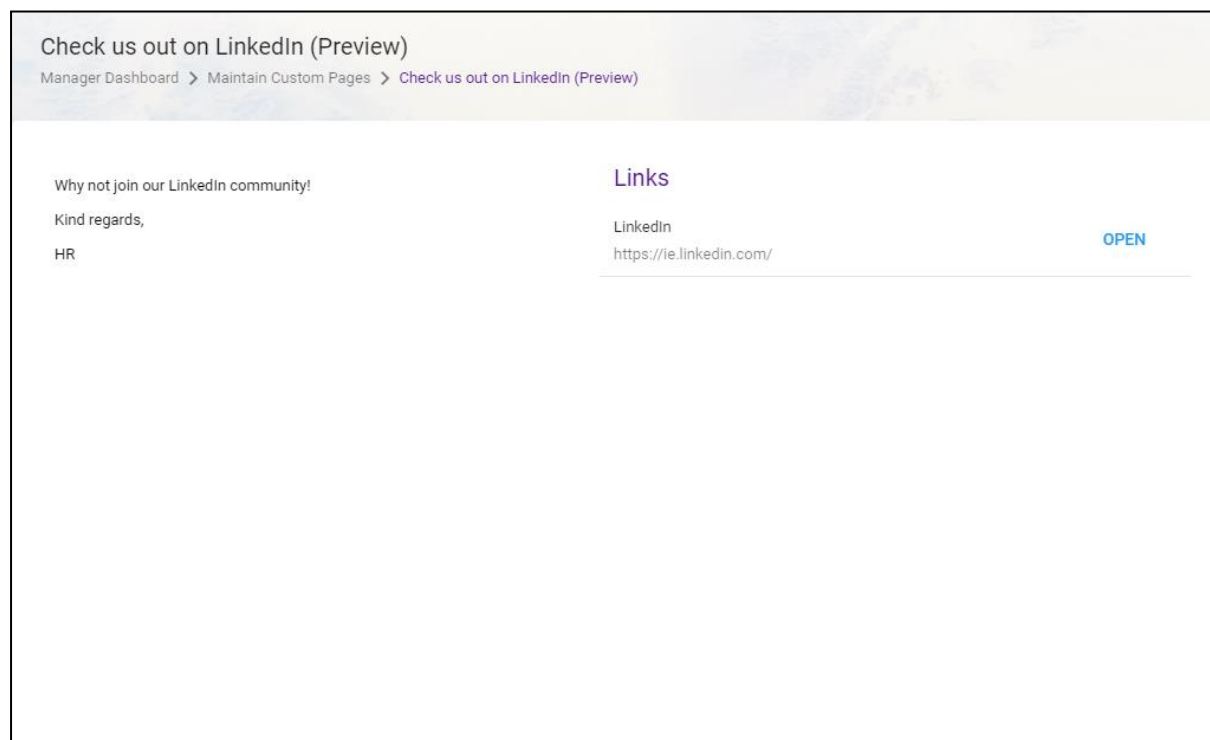

5.3.1. Preview Custom Pages

To preview a custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Maintain Custom Pages*.
3. Click the  button on the applicable page.
4. Select **Preview**.

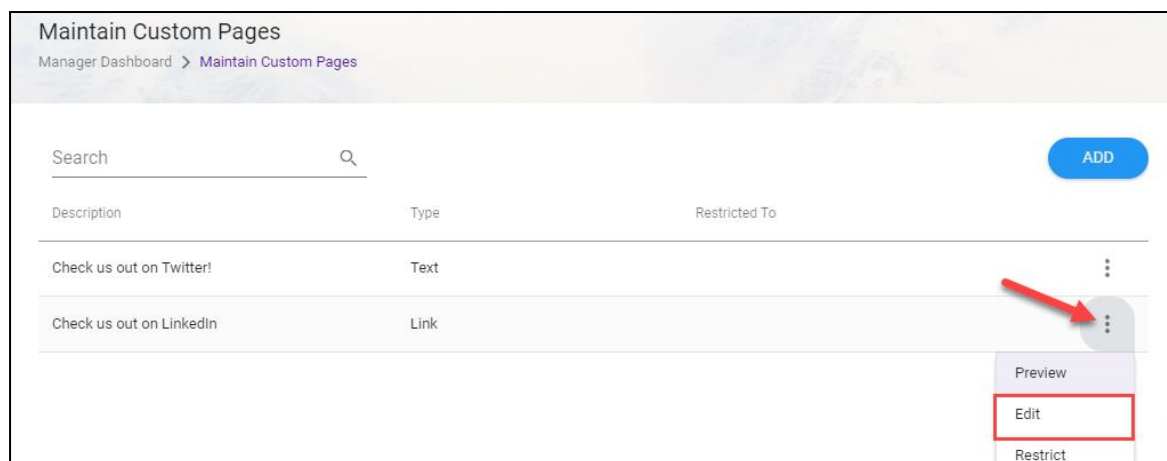

In this example, the *Check us out on LinkedIn (Preview)* page displays.

5.3.2. Edit Custom Pages

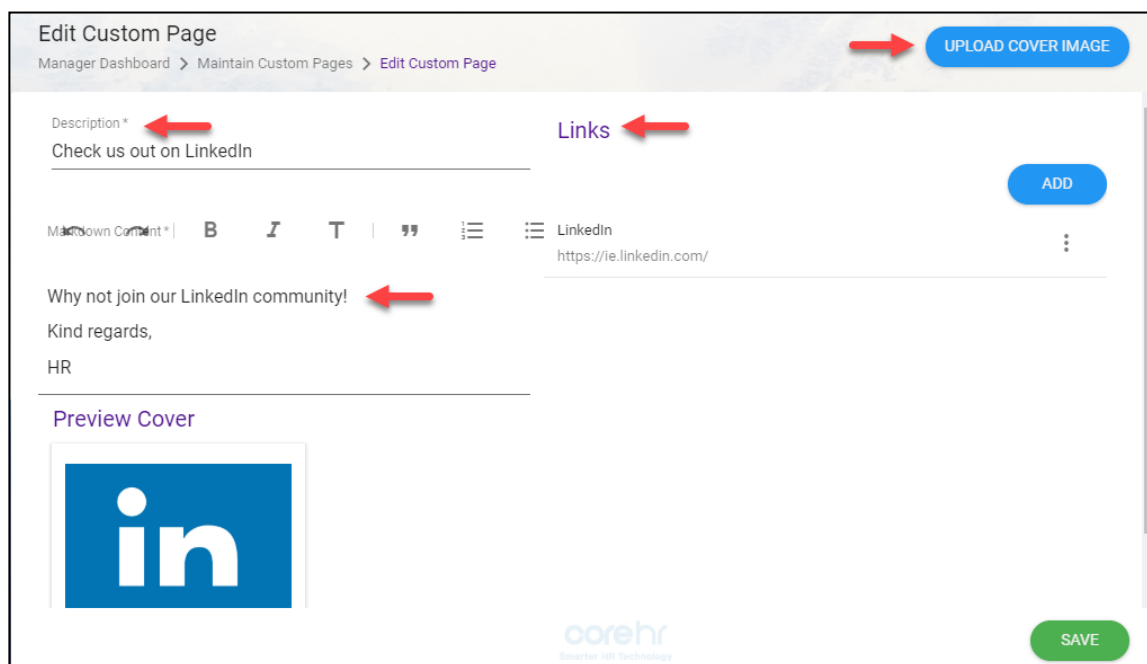

To edit a custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Maintain Custom Pages**.
3. Click the  button on the applicable page.
4. Select **Edit**.

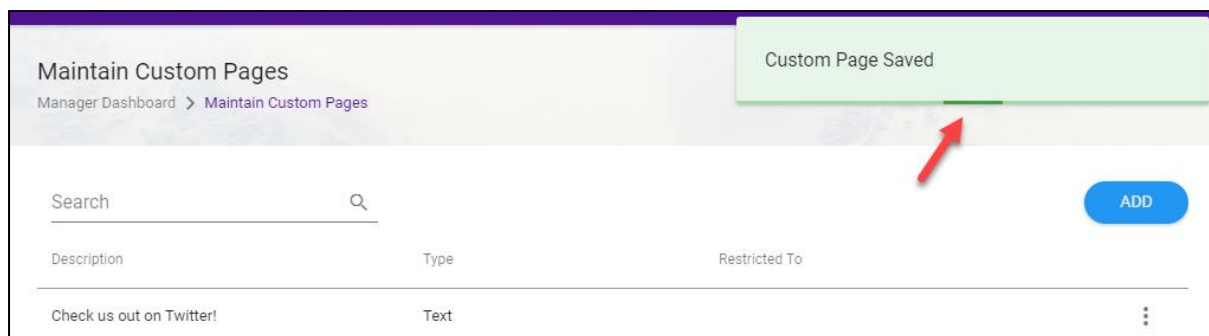

The *Edit Custom Page* screen displays.

5. Edit the *Description*, if applicable.
6. Edit the *Links*, if applicable.
7. Edit the *Markdown Content*, if applicable.
8. Upload a new cover image, if applicable.
9. Select **Save**, once complete.

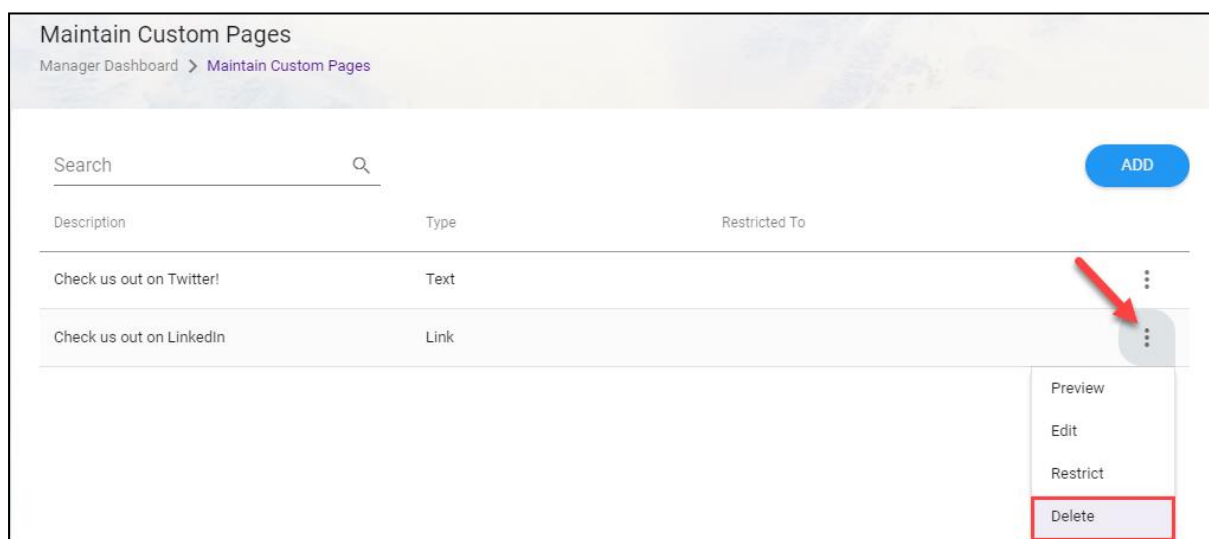

An on-screen progress bar displays notifying you that the system has added the *Custom Page*.

5.3.3. Delete Custom Pages

To delete a custom page:

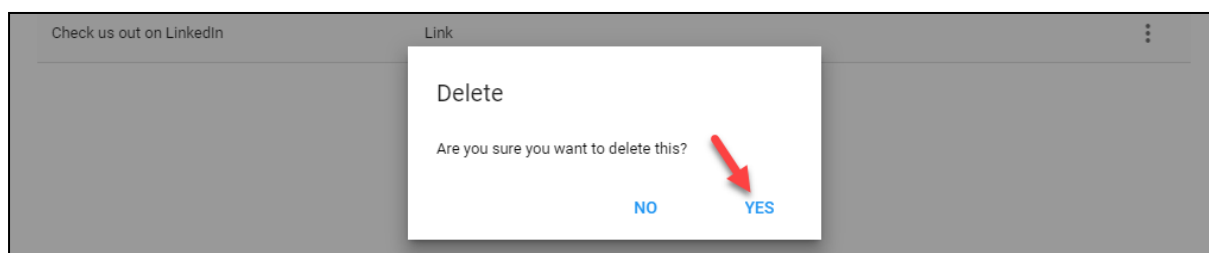

1. Quick jump to the *Social Hub Configuration widget*.
2. Select **View** *Maintain Custom Pages*.
3. Click the  button on the applicable page.
4. Select **Delete**.

An on-screen message displays.

5. Click **YES**.

The page is permanently deleted. This cannot be undone.

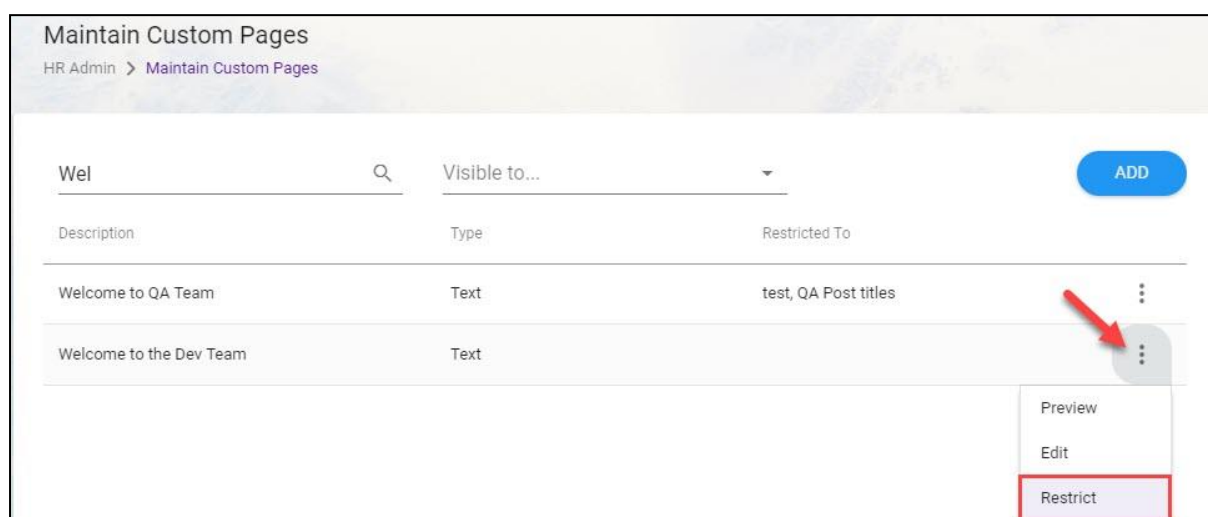

5.4. Restrict Custom Pages

It is possible to define restriction rules to add to *Custom Pages*.

- If added to the *Social Hub* dashboard, the *Custom Page* only displays to users who reside within the *Criteria Groups* it is restricted to.
- If the *Custom Page* does not have restriction rules applied, then it is available to all employees to view, provided it is added to the *Social Hub* dashboard.
- If added as part of a checklist item, then the restriction applied here automatically applies to the checklist.

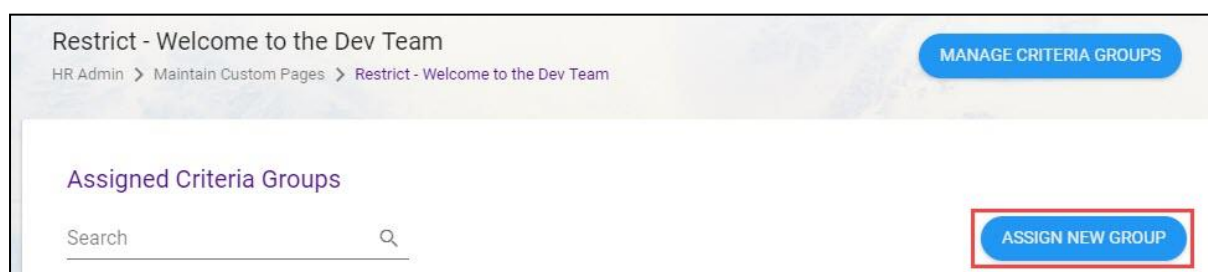

To restrict a custom page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Maintain Custom Pages**.
3. Click the  button on the applicable page.
4. Select **Restrict**.

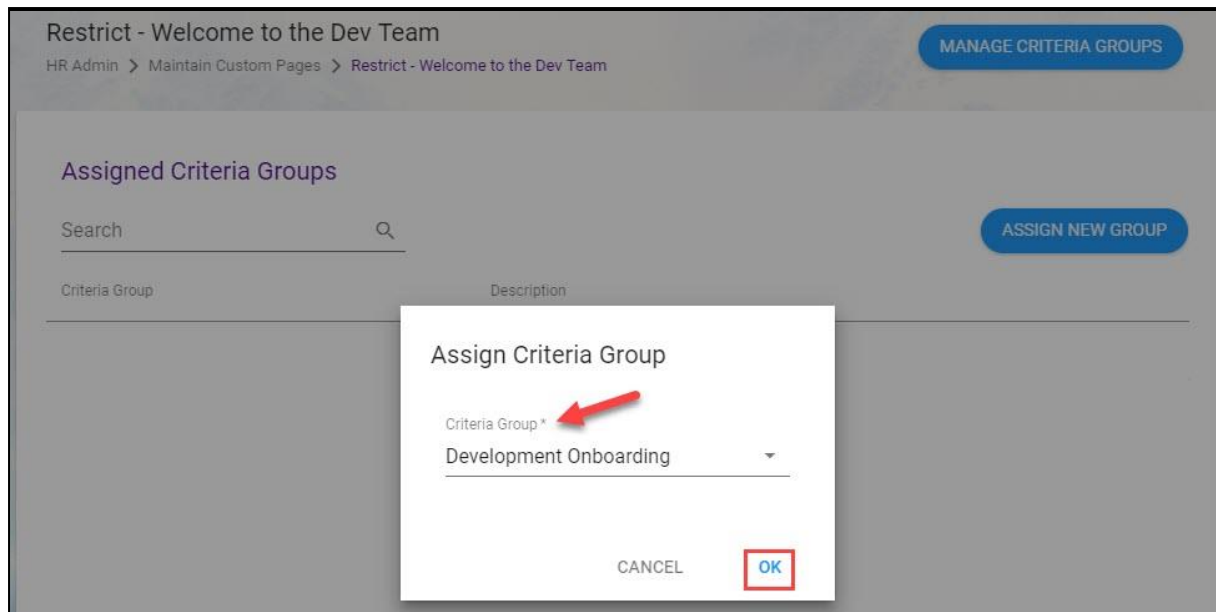

The *Assigned Criteria Groups* screen displays.

5. Select **Assign New Group**.

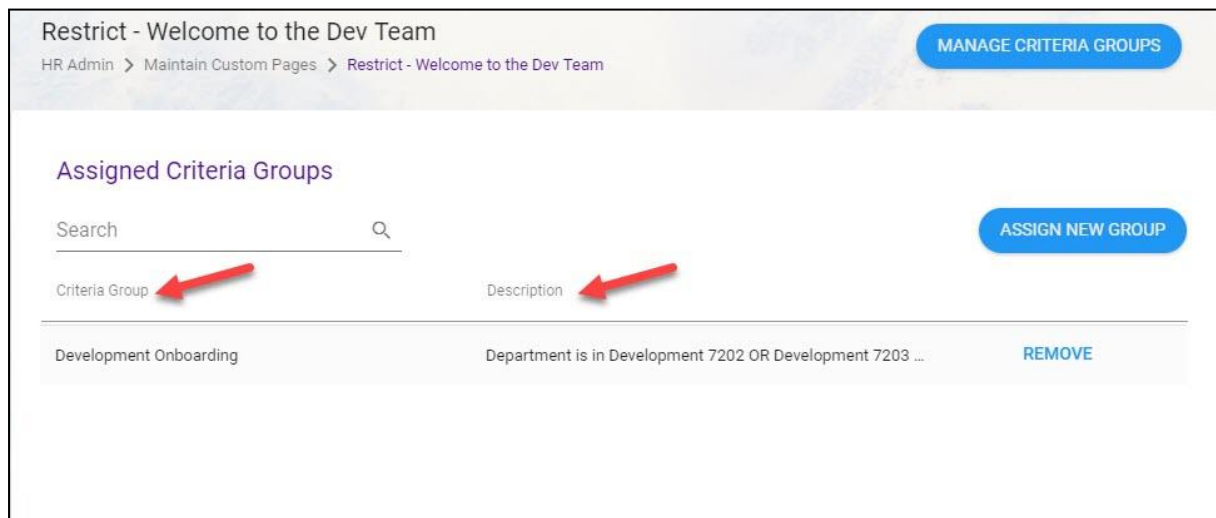

The *Assign New Criteria Group* pop-up displays.

6. Select the applicable *Criteria Group* from the drop-down list.
7. Click **OK**.

The *Custom Page* is now restricted to only be available to employees within the applicable *Criteria Group*. This process can be repeated to add multiple *Criteria Groups*.

See [13. Staff Grouping](#) for guidance on how to create criteria groups.

6. System Pages

6.1. System Pages Overview

System Page	Explanation
New Starters	The <i>New Starters</i> page displays all active employees who reside within same employee directory definition as the user. There are two tabs present on the screen: • <i>Recently Joined</i> tab: Displays employees who joined within the last 30 days. • <i>Coming Soon</i> tab: Display employees who will be joining in the next 30 days.  Note: • The <i>New Starters</i> page displays new starters and re-joiners and does not redisplay existing staff who may be moving through different employee directory definitions. • The <i>New Starters</i> page does not require configuration. Employee directory definition is configured in section 6.2 Employee Directory Configuration.
Team Page	The <i>Team Page</i> displays an employee's team. The employee can: • View members of their team. • View the team overview. • View team specific content. For further information, view section 7. My Team Configuration.
Employee Directory	The <i>Employee Directory</i> page displays all other employees within the directory definition that are visible to the employee. Visibility is based on configuration, for more information, view section 6.2 Employee Directory Configuration.
Quiz	The <i>Social Quiz</i> page displays other employees to the employee, based on the <i>Social Team</i> configuration. This page randomly selects several other employees from the employee's team, one of which is the correct employee for the question being asked. Questions are configured via <i>Social Quiz Configuration</i>. For more information, view section 6.3 Quiz Configuration.
Events	The <i>Events</i> page displays all events that are created and broadcast to all employees within the organisation. Events cannot be restricted to specific

	staff groupings. For further information, view section 6.4 Event Configuration .
FAQ	The <i>FAQ</i> page displays a searchable list of frequently asked questions. Administrators can create questions with corresponding answers. Keyword <i>Tags</i> can be added the question, enabling the employee to search for specific topic. For further information, view section 6.5 FAQ Configuration .

6.2. Employee Directory Configuration

The *Employee Directory Configuration* screen defines how an organisation controls the listings of other employees visible to an employee when viewing their pages listed below:

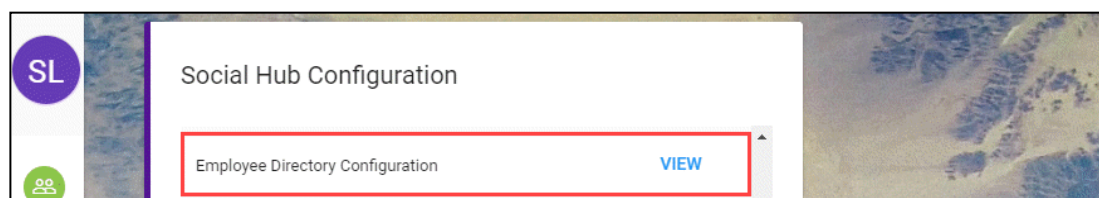

- *Employee Directory* page
- *New Starters* page

When employees view these screens, other employees visible to them are based on the *Directory Level* configuration. For example, if set to:

- **Global:** Employees displayed to the end user are every active employee on the system.
- **Company:** Employees displayed to the end user are employees that reside in their same company only.
- **Division:** Employees displayed to the end user are employees that reside in their same Division only.
- **Contract Attributes:** Employees displayed to the end user are employees with the same contract attribute only.

To configure the *Employee Directory*:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Employee Directory Configuration**.

The *Employee Directory Configuration* screen displays.

3. Select the applicable level from the *Directory Level*, drop-down list.
In this example, the 'Organisation' level is selected from the *Directory Level* drop-down list;

therefore, the *Employee Directory* and *New Starters* screens now only display employees from within the 'Organisation' directory definition.

4. Click **Save**.

6.3. Social Quiz Configuration

There are 2 areas within the *Social Quiz Configuration* screen to be configured.

1. *Quiz Questions*
2. *Quiz Summary Options*

Note: The list of employees from which the *Social Quiz* is based, requires *Functional Team Areas* to be setup via the *My Team Configuration*. For more information, view section [7. My Team Configuration](#).

6.3.1. Quiz Questions

The number of questions created in this area determines the number of questions the employee is asked while taking part in the *Social Quiz*.

There 4 question types, these are detailed in the below table:

Question Type	Explanation
Person Name	Picks a random employee image from the person's team. For example, the question may ask: • Who is James Smith?

Start Date	Picks a random employee from the person's team. For example, the question may ask: Who joined on 21/10/18?
Interests	Picks a random interest from a person within the user's team. For example, the question may ask: Who likes Football?
Department	Picks a random employee from the person's team. For example, the question may ask: Who works in Finance?

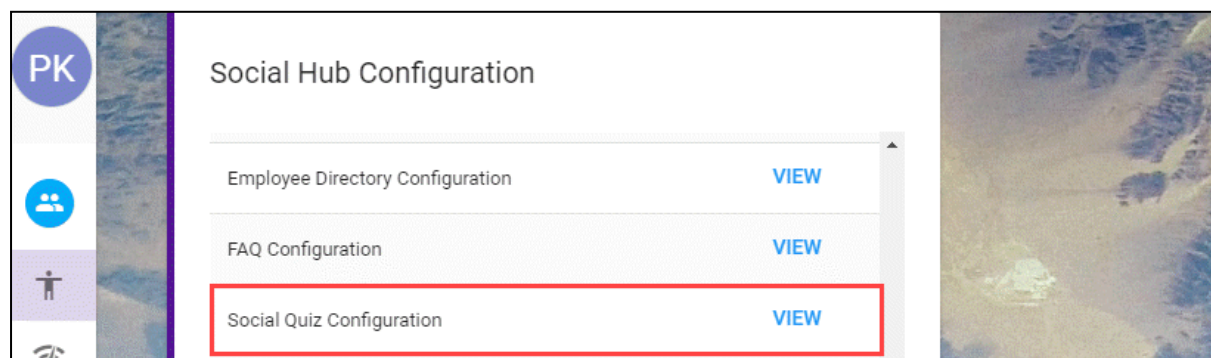

6.3.2. Quiz Summary Options

The *Quiz Summary Options* area allows you to specify the message that an employee sees along with their score summary, upon completion of the quiz.

6.3.3. Configure the Quiz

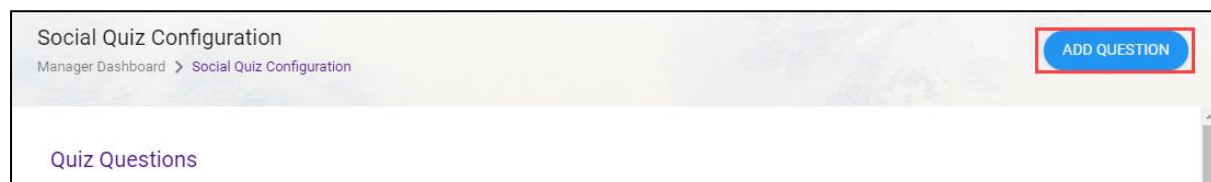

To configure the *Employee Directory*:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Social Quiz Configuration*.

The *Social Quiz Configuration* screen displays.

3. Select **Add Question**.

The *Question Configuration* pop-up displays.

4. Enter a *Question*.

5. Select the applicable question type from the *Person Information* drop-down list.
In this example, the question type is **Person Name**, therefore the question text is entered as 'Who is'. The system will add the person's name and the question mark, to the question.
6. Click **OK**.

The screenshot shows a 'Question Configuration' dialog box. It has two input fields: 'Question *' with the text 'Who is' and 'Person Information *' with a dropdown menu showing 'Person Name'. Red arrows point to both fields. At the bottom, there are 'CANCEL' and 'OK' buttons, with the 'OK' button highlighted by a red box.

The Social Quiz Configuration screen displays. The “Who is” question is now added to the quiz.

The screenshot shows the 'Social Quiz Configuration' screen. A green notification banner at the top right says 'Question Saved Successfully'. Below the header, there's a 'Quiz Questions' section with a table. The table has three columns: 'Position', 'Question', and 'Person Information'. The first row shows '1' in the Position column, 'Who is' in the Question column (highlighted with a red arrow), and 'Person Name' in the Person Information column.

Repeat this process until the desired number of questions are created.

The below screenshot details 5 questions that have been added to the quiz page. Note that it is possible to add multiple questions of the same type. For example, there are 2 **Person Name** question types listed below in the quiz.

The screenshot shows the 'Social Quiz Configuration' screen with a list of 5 questions. The table has three columns: 'Position', 'Question', and 'Person Information'. The questions are:

Position	Question	Person Information
1	Who is	Person Name
2	Who joined on	Start Date
3	Who likes	Interests
4	Who works in	Department
5	This person's name is	Person Name

Red arrows point to the 'Person Name' dropdown in the first and fifth rows.

7. Scroll down, to view the *Quiz Summary Options* area.

8. Enter the score summary message for a 100% score.
9. Enter the score summary message for a 75% score.
10. Enter the score summary message for a 50% score.
11. Enter the score summary message for a 25% score.
12. Enter the score summary message for a 0% score.
13. Select **SAVE SUMMARY**.

Quiz Summary Options

100% *
Full marks! Well done! You really know your team! Maybe you know a bit too much information....

75% *
Oh you were so close! Maybe do some research and get to know your teammates. Or just spy on them.

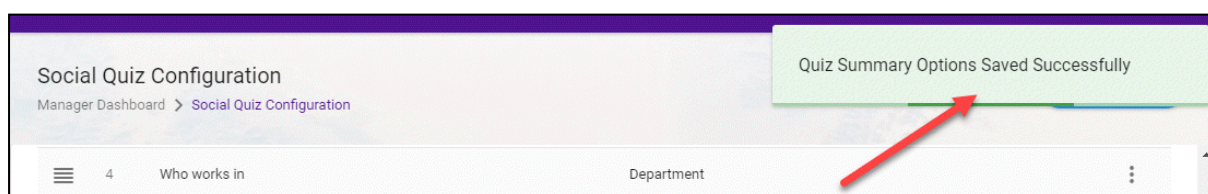

50% *
There are two halves to everything they say. Just dont ask us where the rest of this score went.

25% *
A miss is as good as a mile. But just so we are clear you really missed here....that was terrible.

0% *
Now that is a sad score! Go on click the Try Again button and this time we want you to really try!

SAVE SUMMARY

A progress bar displays confirming that the *Quiz Summary Options* are now saved.
This completes the *Social Quiz Configuration*.

6.4. Event Configuration

It is possible to create events within *Employee onboarding*. Events created here are global events that are visible to everyone, therefore, are not restricted to specific companies or staff groupings.

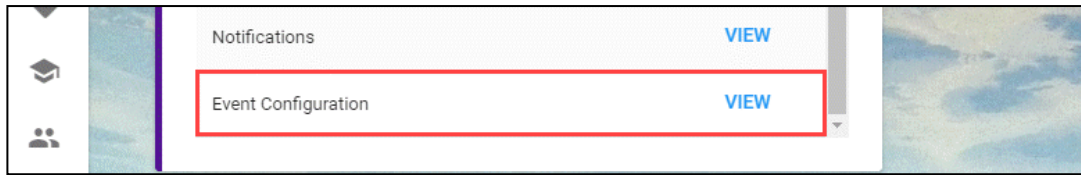

Note:

- Note this feature already exists within *People Management* but is now accessible via the *Social Hub Configuration* widget.
- Once created, the events display on the *Events Page* within *Social Onboarding* as well as on the *CoreHR Native App*.

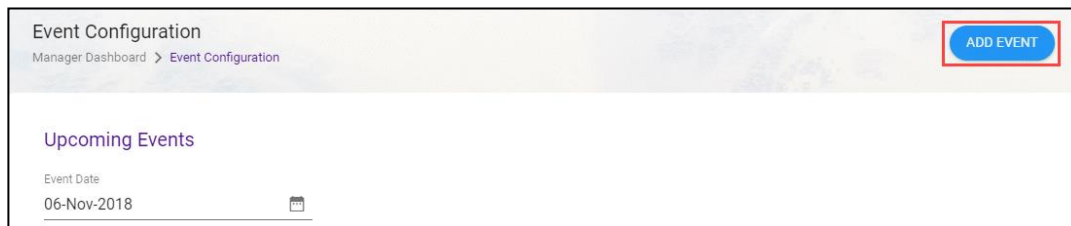

To create an event:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Event Configuration**.

The *Event Configuration* screen displays.

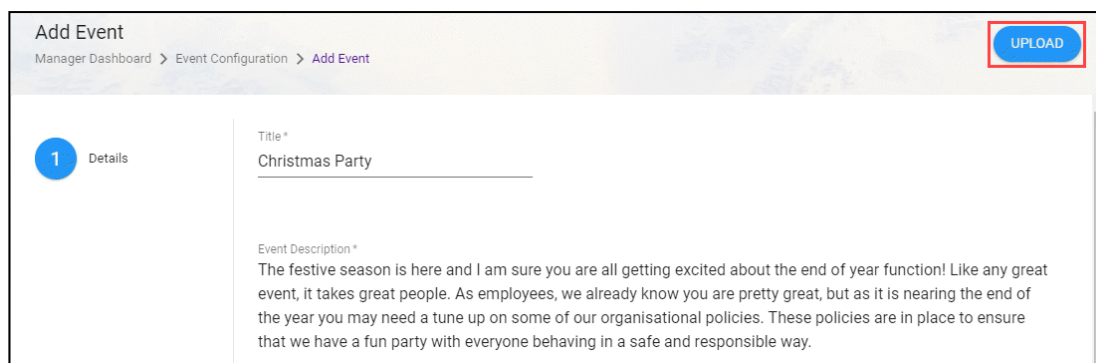

3. Select **ADD EVENT**.

4. Enter a *Title*.
5. Enter an *Event Description*.
6. Enter a *Start Date*.
7. Enter an *End Date*.
8. Switch **On** the *All Day Event* indicator OR enter a *Start Time* and *End Time*.

A screenshot of the 'Add Event' form. The breadcrumb trail is 'Manager Dashboard > Event Configuration > Add Event'. There is a blue '1 Details' tab on the left and a blue 'UPLOAD' button on the right. The form fields are: 'Title *' with the value 'Christmas Party' (indicated by a red arrow); 'Event Description *' with a paragraph of text (indicated by a red arrow); 'Start Date *' with the value '07-Dec-2018' and a calendar icon; 'End Date *' with the value '07-Dec-2018' and a calendar icon; 'All Day Event' with a toggle switch turned on; 'Start Time *' with the value '19:30' and a dropdown arrow; and 'End Time *' with the value '19:30' and a dropdown arrow. A red box encloses the date and time fields. At the bottom right is a green 'SAVE' button. The 'corehr' logo is at the bottom center.

9. Next, select **UPLOAD**, to upload an event cover image.

6.5. FAQ Configuration

It is possible to configure a global *FAQ Page*. This can then be added to the *Social Hub* dashboard. The following actions can be taken from the *FAQ Configuration* screen:

- Configure the HR Email address.
- Add questions.
- Add answers.
- Add a *Tag* to questions.

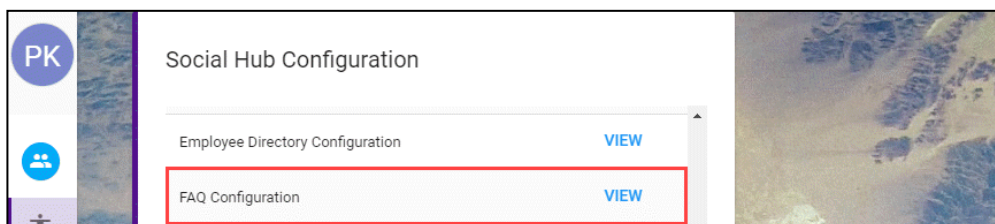

Note:

- Adding tags enables employees to search specific topics, to return associated questions and answers.
- Only one FAQ page can be created and then be added to the *Social Hub* dashboard.

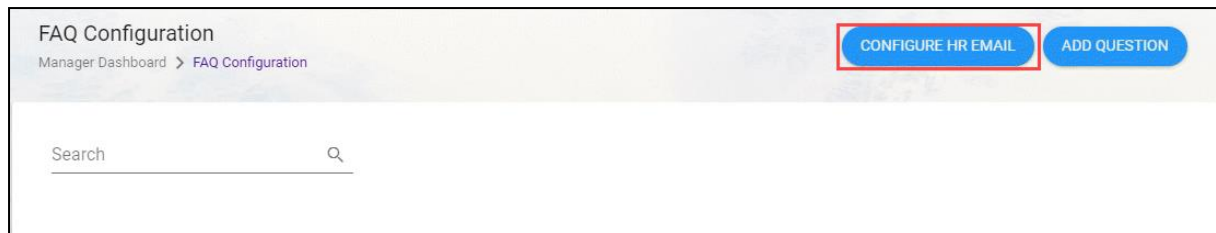

To configure the FAQ page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View FAQ Configuration**.

The *FAQ Configuration* screen displays.

3. Select **Configure HR Email**.

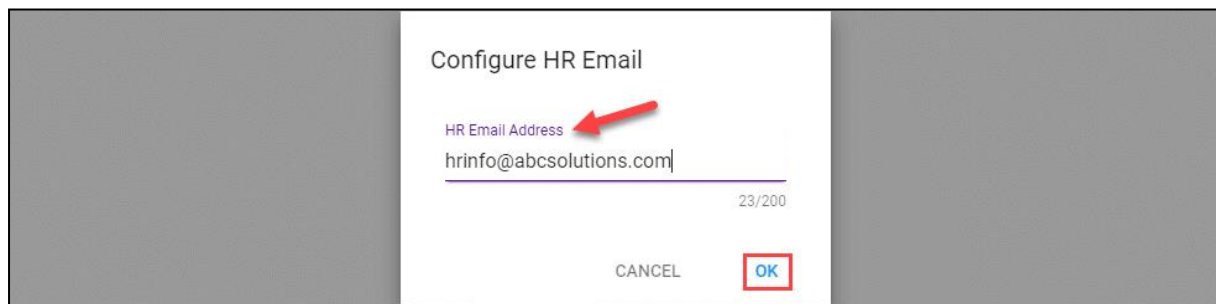

The *Configure HR Email* pop-up displays.

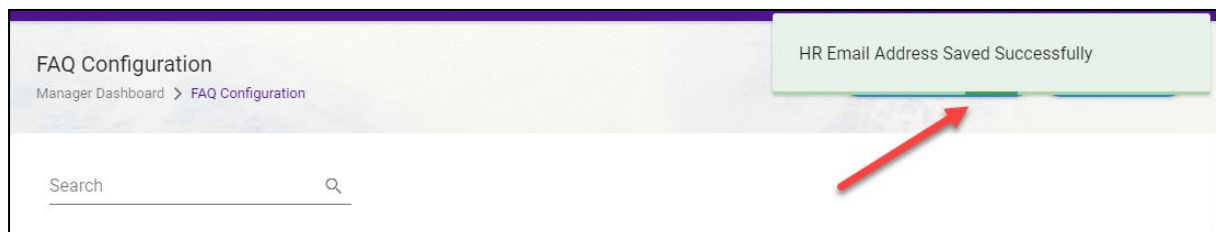

4. Enter the *HR Email Address*.

This may be an email address created by an organisation to specifically monitor employee queries that are submitted.

5. Click **OK**.

The email address is now configured and saved.

6. Next, select **Add Question**.

The *Add Question* pop-up displays.

7. Enter the *Question*.

8. Enter the *Answer*.

9. Click in the *Tags* field and input a tag, then click **Enter**.

Once a tag is entered, it is saved in a tags list. Therefore, when creating future questions, it will be available to select from the *Tags* drop-down list. You can add multiple tags to a question.

10. Click **OK**.

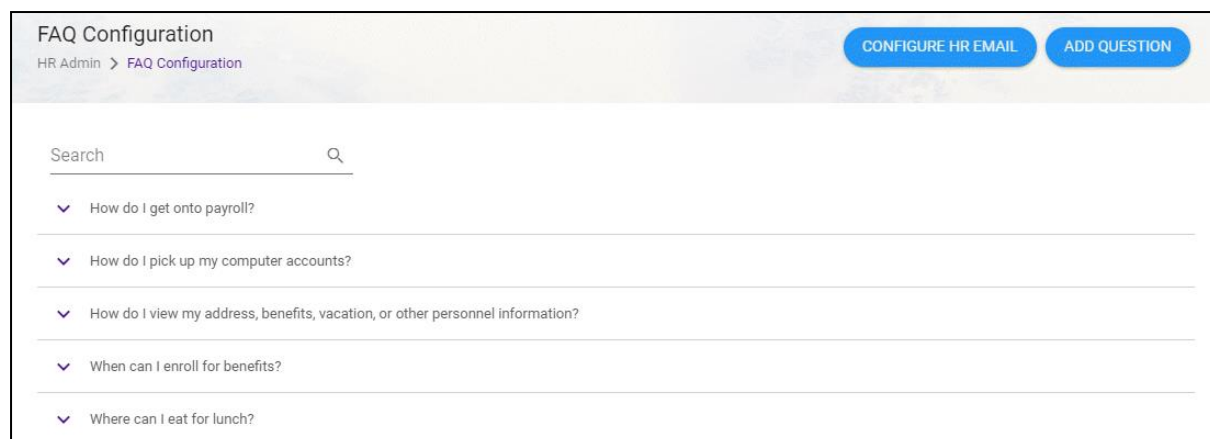

The screenshot shows the 'FAQ Configuration' page with a search bar and two buttons: 'CONFIGURE HR EMAIL' and 'ADD QUESTION'. A modal titled 'Add Question' is open in the center. It contains three fields: 'Question *' with the text 'How do I get onto payroll?', 'Answer *' with the text 'You must complete a New Employee ...', and a 'Tags' dropdown menu with 'Payroll' selected. Below the tags field is a note: 'Press Enter to add 'Payroll' to the list'. At the bottom of the modal are 'CANCEL' and 'OK' buttons. Red arrows point to each of the three input fields, and a red box highlights the 'OK' button.

The question is now added to the *FAQ Page*.

From here, it is also possible to *Edit* or *Delete* questions.

The screenshot shows the 'FAQ Configuration' page with a search bar and two buttons: 'CONFIGURE HR EMAIL' and 'ADD QUESTION'. Below the search bar is a list of questions. The first question is 'How can I check my annual leave balance?' with a blue up arrow icon. The second question is 'How can I check my annual leave balance?' with a red box around it. To the right of the second question is the text 'Jump to the My Balances widget on your Employee Dashboard to see your current annual leave balance.' and 'Tags: Payroll'. To the right of the list is a red box containing a dropdown menu with 'Edit' and 'Delete' options.

Repeat the **Add Question** process as required to add further content to the *FAQ Page*, as shown in the example screenshot below.

The screenshot shows the 'FAQ Configuration' page within the 'HR Admin' section. The page has a light blue header with the title 'FAQ Configuration' and a breadcrumb 'HR Admin > FAQ Configuration'. In the top right corner, there are two blue buttons: 'CONFIGURE HR EMAIL' and 'ADD QUESTION'. Below the header is a search bar with the placeholder text 'Search' and a magnifying glass icon. Under the search bar, there is a list of five FAQ items, each preceded by a downward-pointing chevron icon. The items are: 'How do I get onto payroll?', 'How do I pick up my computer accounts?', 'How do I view my address, benefits, vacation, or other personnel information?', 'When can I enroll for benefits?', and 'Where can I eat for lunch?'.

6.6. Restrict System Pages

If a system page has been added to the *Social Hub* dashboard / landing Page, or has been added as either a *Checklist item*, then it can be restricted to only be available to specified *Criteria Groups*.

- For checklist item restrictions, view section [4.4 Restrict Checklist Items](#).
- For *Landing Page* content restrictions, view section [11.4 Restrict Pages – from Landing Page](#).

7. My Team Configuration

For the *Team Page* to appear for an employee:

- The team must be created first, with a set of restriction rules applied to identify its members.
- The *Team Page* must also be added to the Landing Page i.e. Social Hub dashboard.

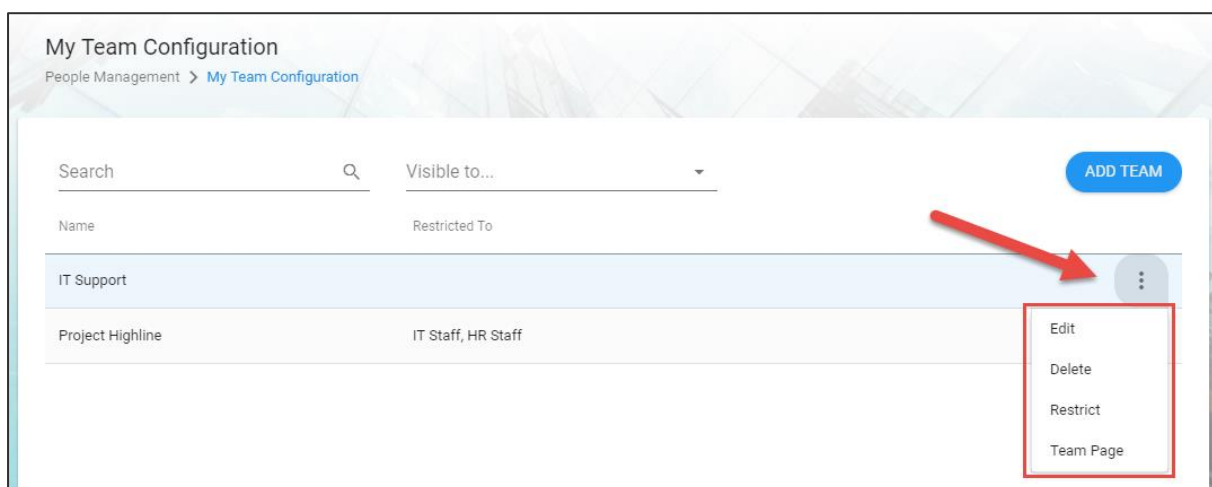

Note:

- Functional team areas are not pre-configured based on existing team setup within the system. Teams must be defined within the *Team Area Configuration* screen.
- If an employee has 2 contracts / appointments that belong to 2 different teams, then both *Team Pages* appear on their *Social Hub* dashboard.
- If an employee is moving appointments (contract replacements) and their future appointment belongs to a new team, then their current *Team Page* and their future *Team Page* appear on the Landing Page.
- If an employee has their appointment updated and the new sequence matches a new team, the future team does not appear on their *Social Hub* dashboard until that date, their current *Team Page* remains visible until that date.

The *My Team Configuration* screen lists teams that have been added to the system. From this screen it is possible to:

- Add a team.
- Edit an existing team.
- Delete an existing team.
- Add a restriction to a team.
- View the *Team Page*.
- Add, view, edit, and delete *Team Page Content*.

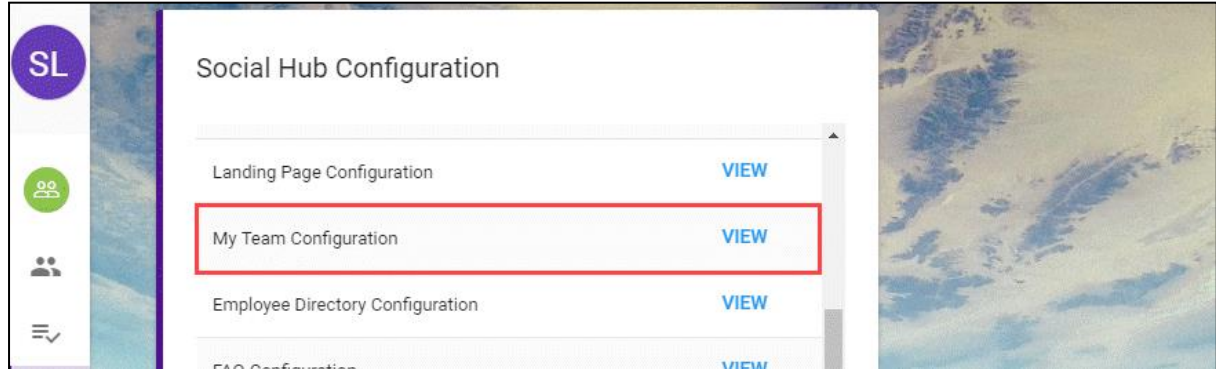

The below screenshot details the *My Team Configuration* screen.

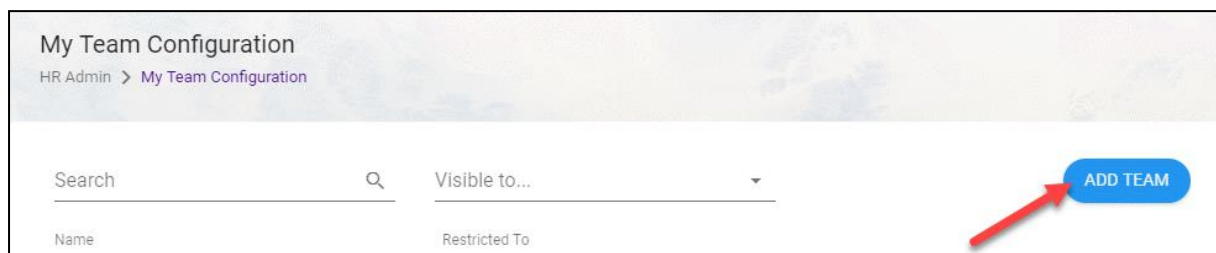

7.1. Add a Team

To create a new team:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View My Team Configuration**.

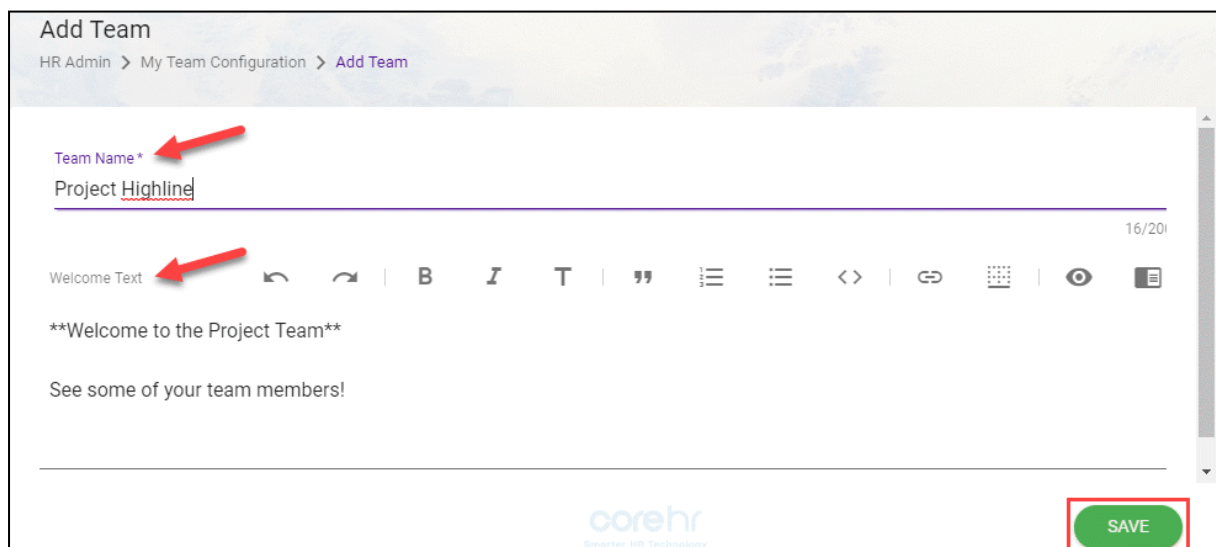

3. Select **Add Team**.

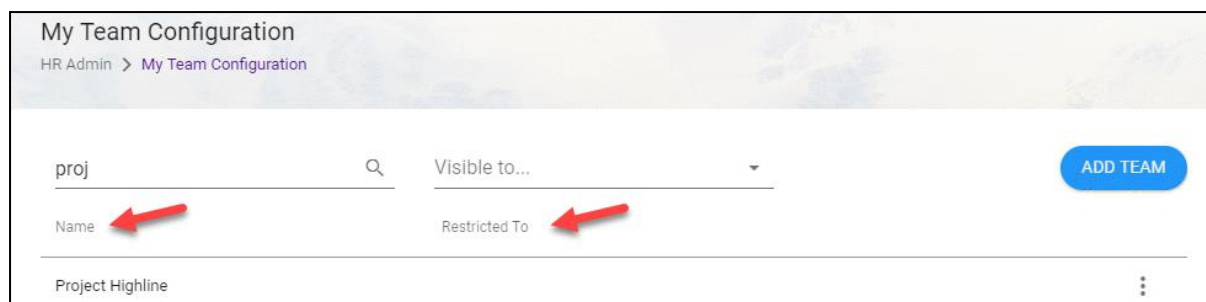

The *Add Team* screen displays.

4. Enter a *Team Name*.
5. Enter *Welcome Text*.
6. Click **Save**.

The new team is now added to the system and is present on the *My Team Configuration* screen.

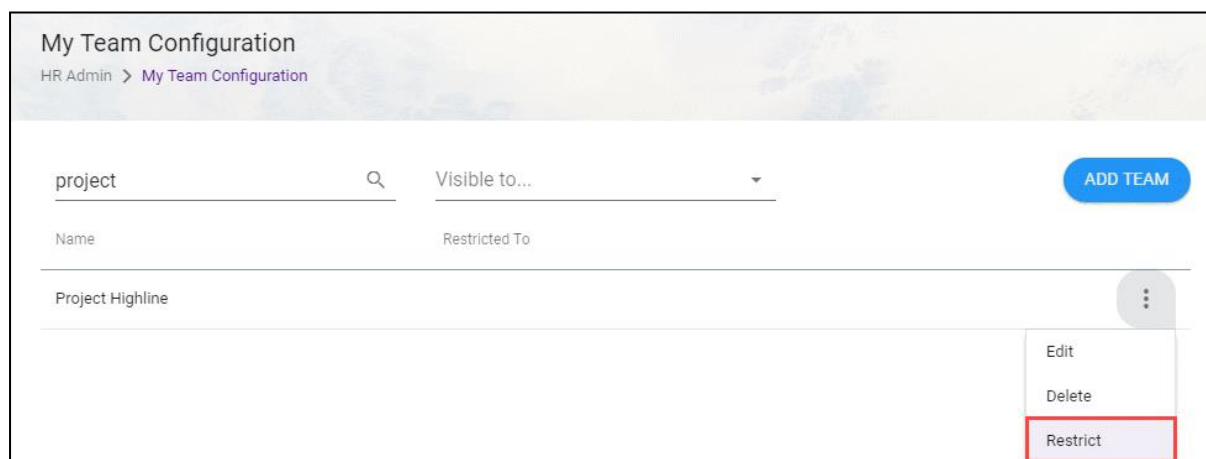

Note: There are currently no restrictions on the team. Once the team is created, it must be restricted (see next section [7.2 Restrict Team Page](#)). If the team is not restricted, employees will not see their team, even if it is added to the *Social Hub* dashboard.

7.2. Restrict Team Page

To add a restriction to the team page:

1. Click the  button on the applicable team.
2. Select **Restrict**.

The *Assigned Criteria Groups* screen displays.
Currently there are no *Criteria Groups* assigned.

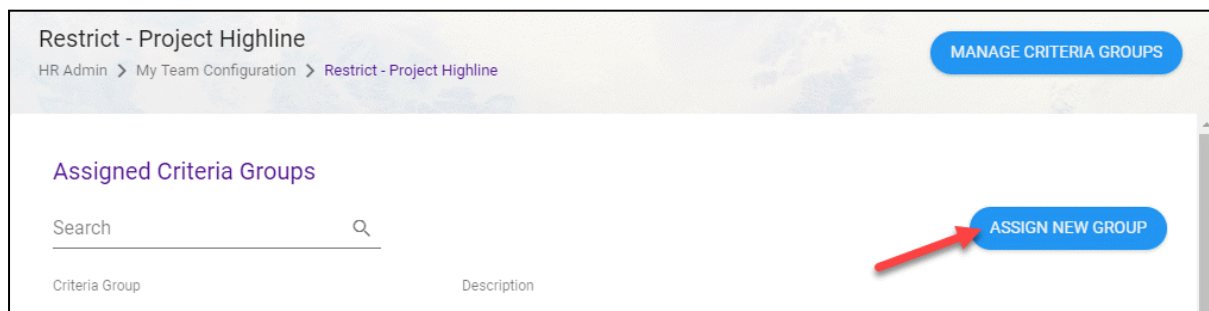

In this example, the following employees are required for the 'Project Highline' team network:

- All permanent employees within the 'HR' department.
- All permanent employees within the 'IT' department.

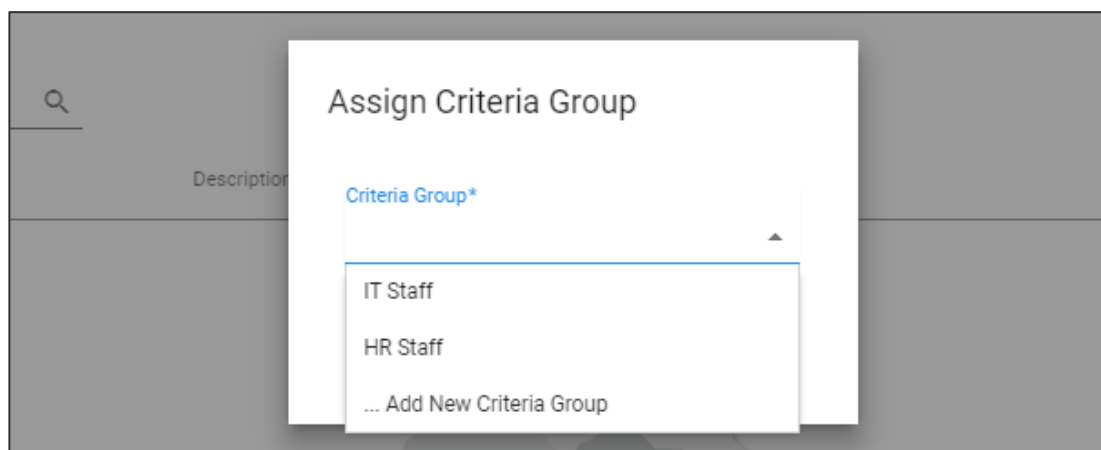

For information on how these *Criteria Groups* are created, see section [13.1 Staff Grouping](#).

3. Select **Assign New Group**

The *Assign New Group* pop-up displays.

4. Select the applicable group e.g. "IT Staff" from the *Criteria Group* drop-down list.
5. Click **OK**.

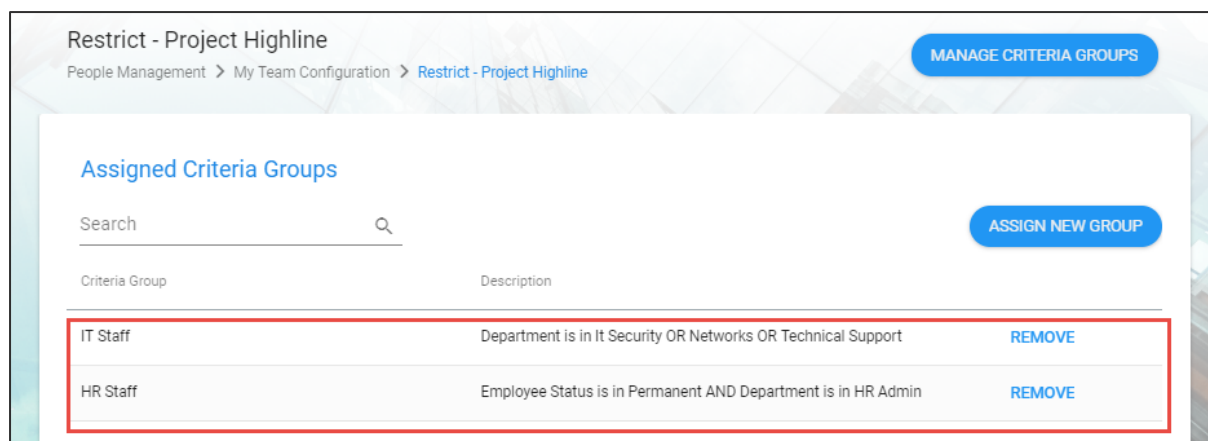

The *Assigned Criteria Groups* screen displays.

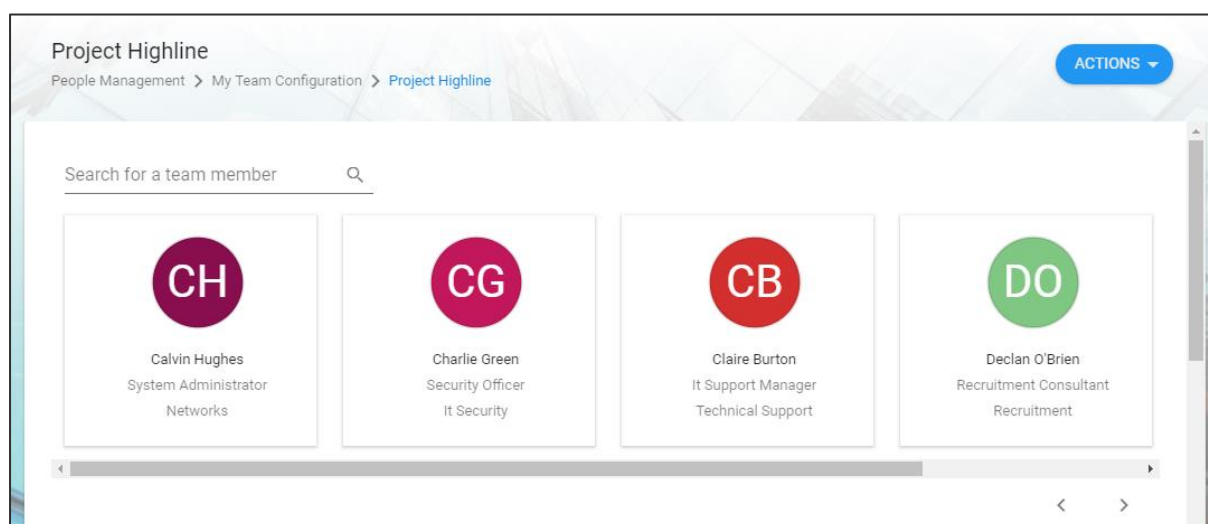

The "IT Staff" *Criteria Group* is now assigned to the 'Project Highline' team.

As the 'Project Highline' team network also requires all permanent employees within the 'HR' department to be present, the **Assign New Group** process is repeated.

6. Assign the 'HR Staff' *Criteria Group* to the 'Project Highline' team network.
The *Assigned Criteria Groups* screen now displays both Criteria Groups on the team network.

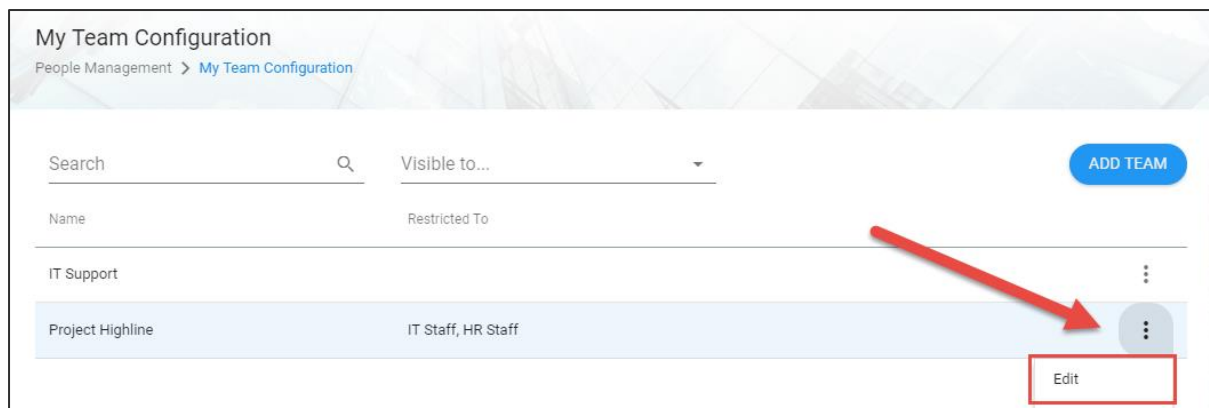

The *Team Page* is now visible to employees within the team. Employees can now view the screen below:

7.3. Edit Team Page

Administrators can edit the team overview details. To edit a team overview:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View My Team Configuration**.
3. Select the  button, on the applicable team name.
4. Select **Edit**.

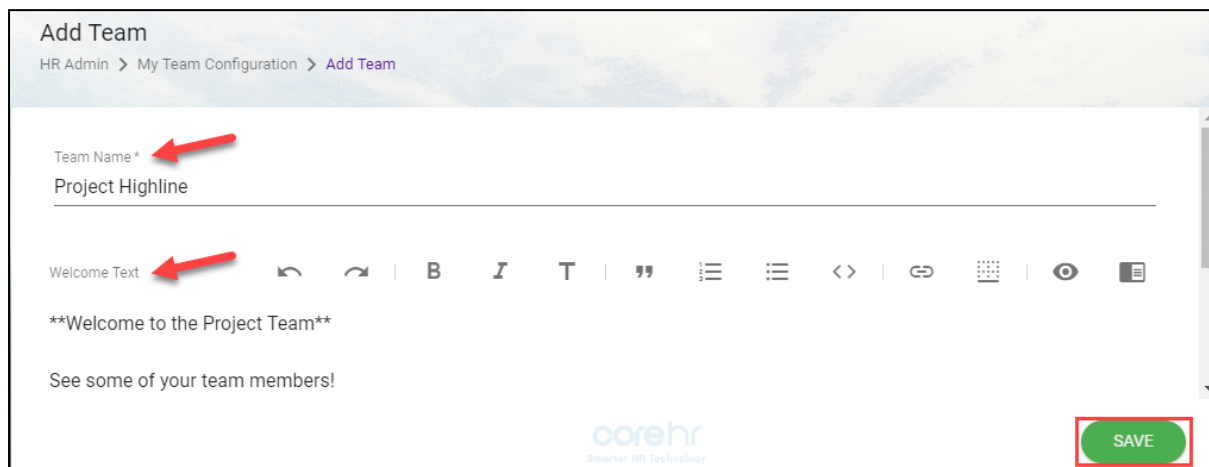

The *Add Team* screen displays.

It is possible to edit the items listed below on this page:

- *Team Name*
- *Welcome Text*

5. Once editing is complete, click **Save**.

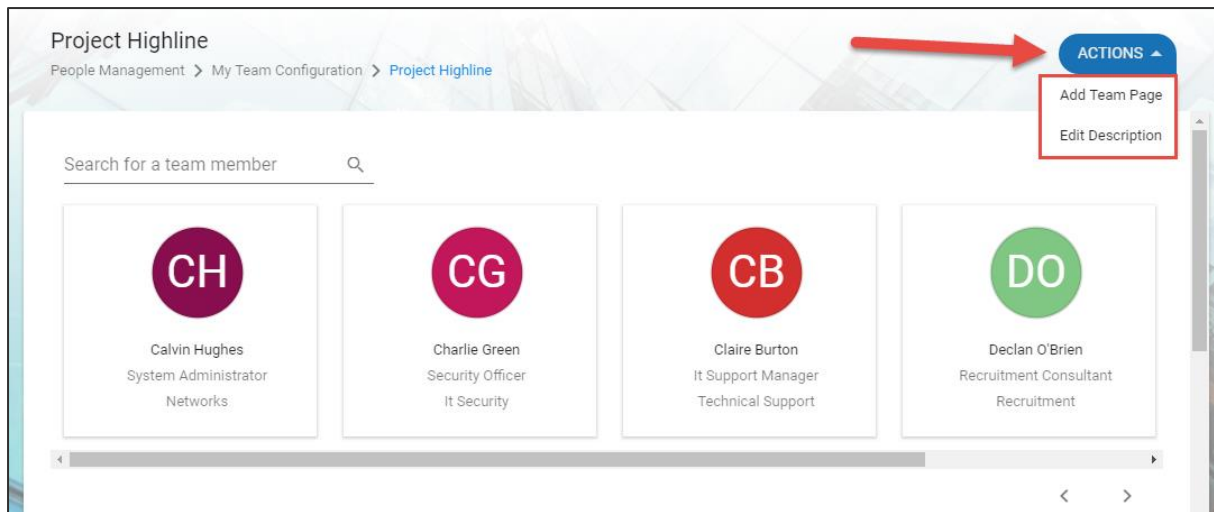

7.4. Team Page - Content

Administrators can view the *Team Page* as it is displayed to the team members. The following actions can also be completed:

- Edit the description / welcome text.
- View content.
- Add content.
- Edit content.
- Delete content.

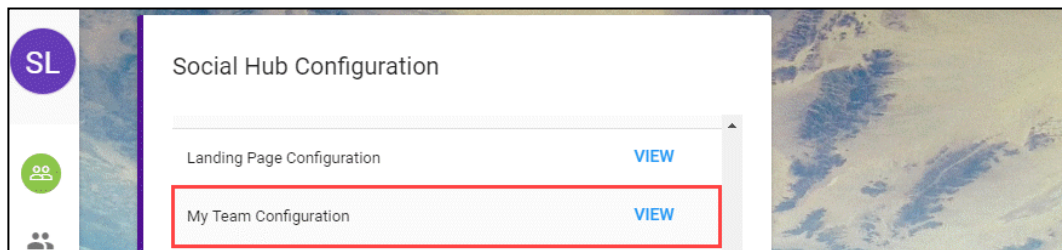

Team members can also maintain the *Team Page* by adding content that is shared with other team members only.

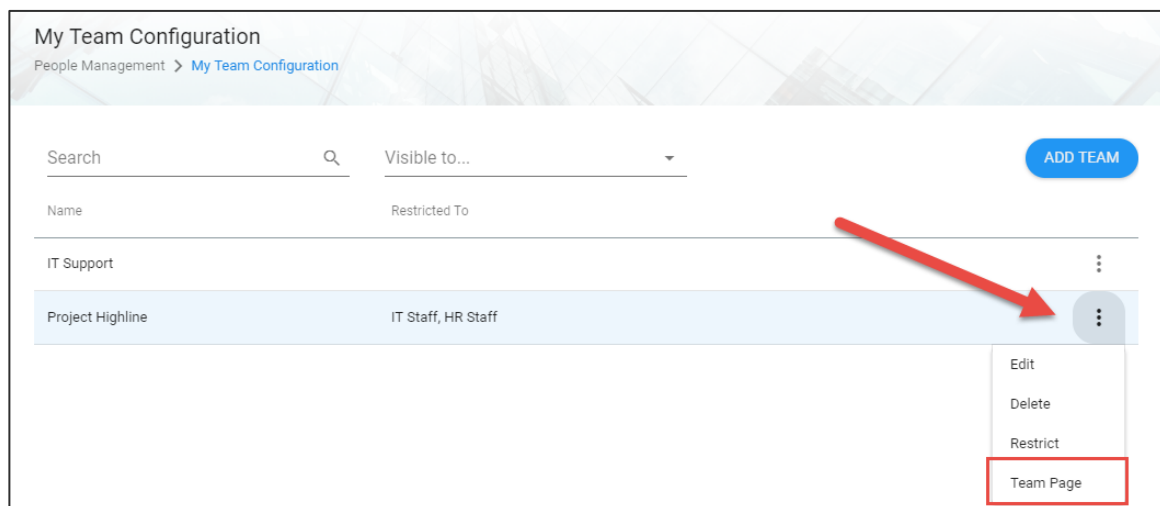

7.4.1. Edit Team Page Description

To edit the team page description:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View My Team Configuration**.

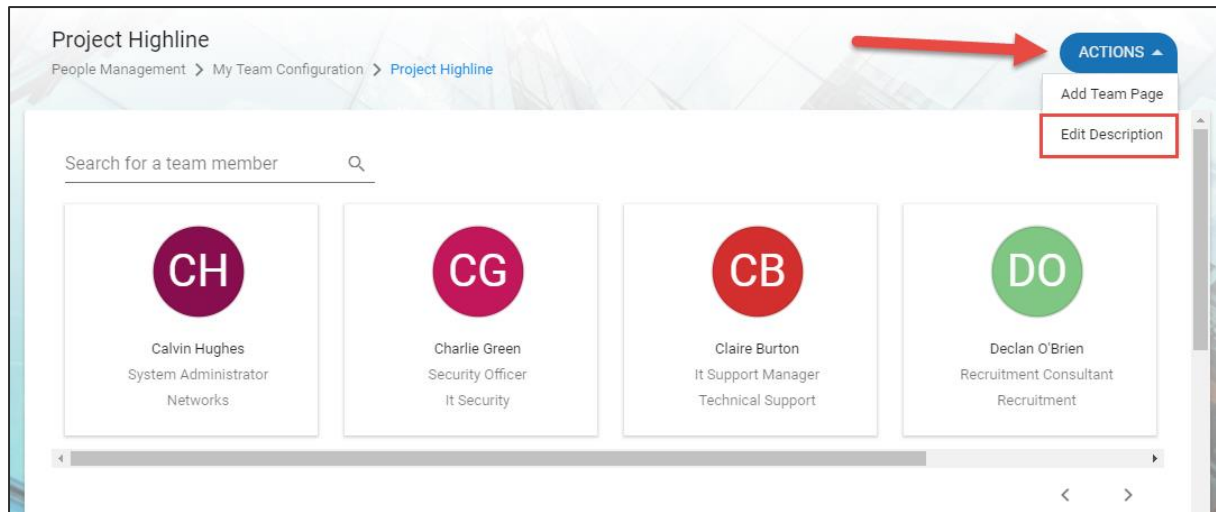

3. Click the  button, on the applicable team name.
4. Select **Team Page**.

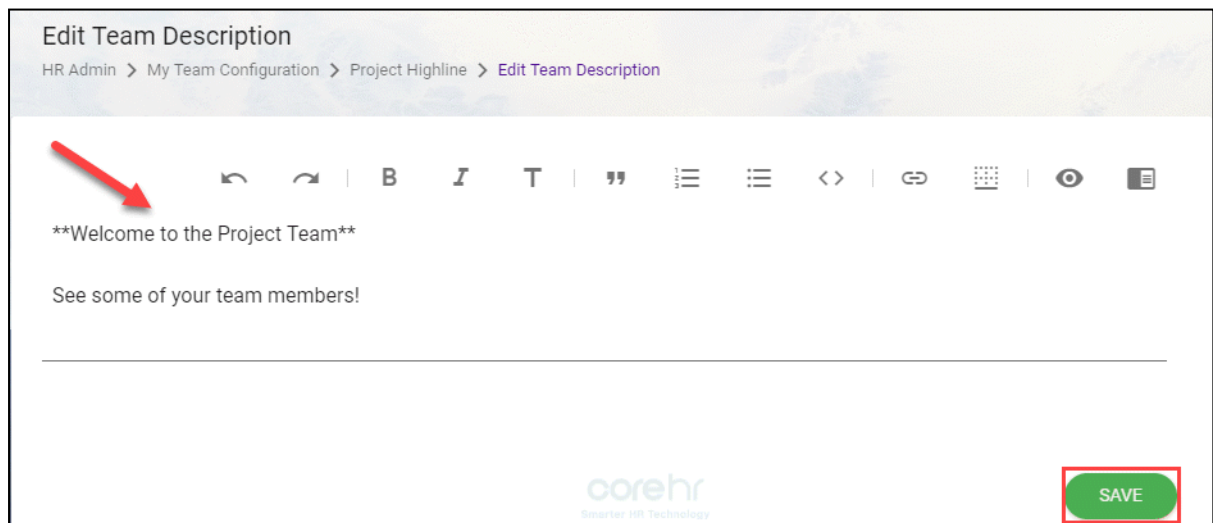

The *Project Highline - Team Page* displays.

5. Click **Actions**.
6. Select **Edit Description**.

The *Edit Team Description* screen displays.

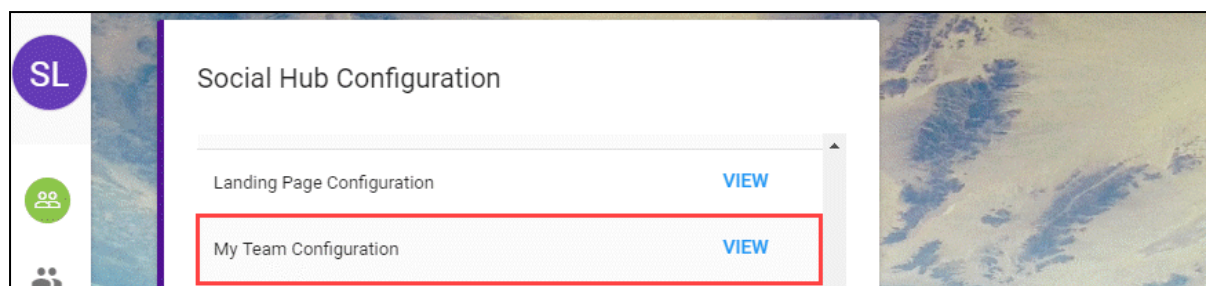

7. Enter the applicable text.
8. Click **Save**.

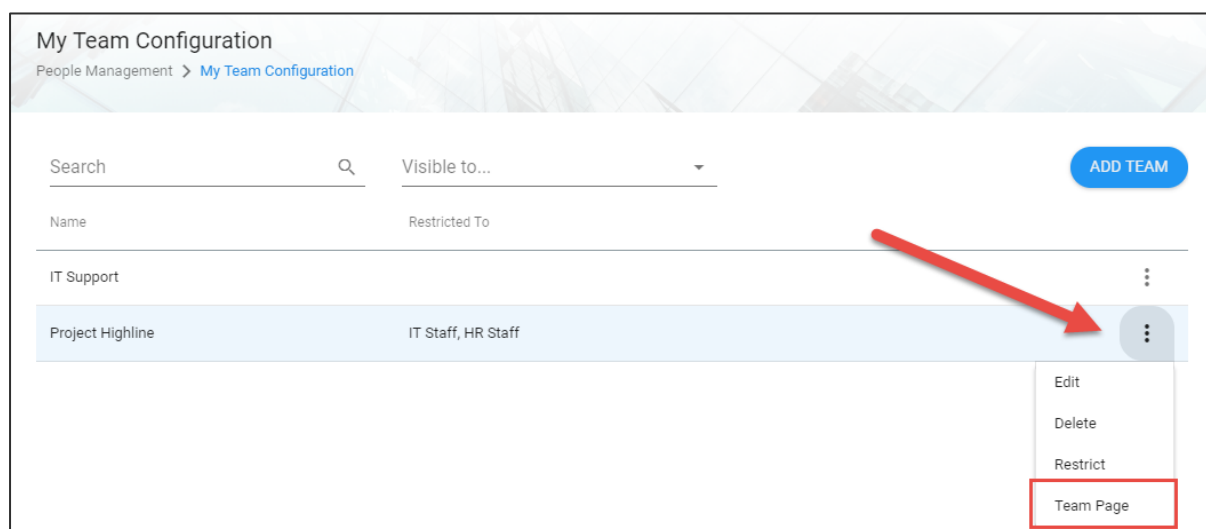

7.4.2. Add Team Page Content

To add a sub team page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View My Team Configuration**.

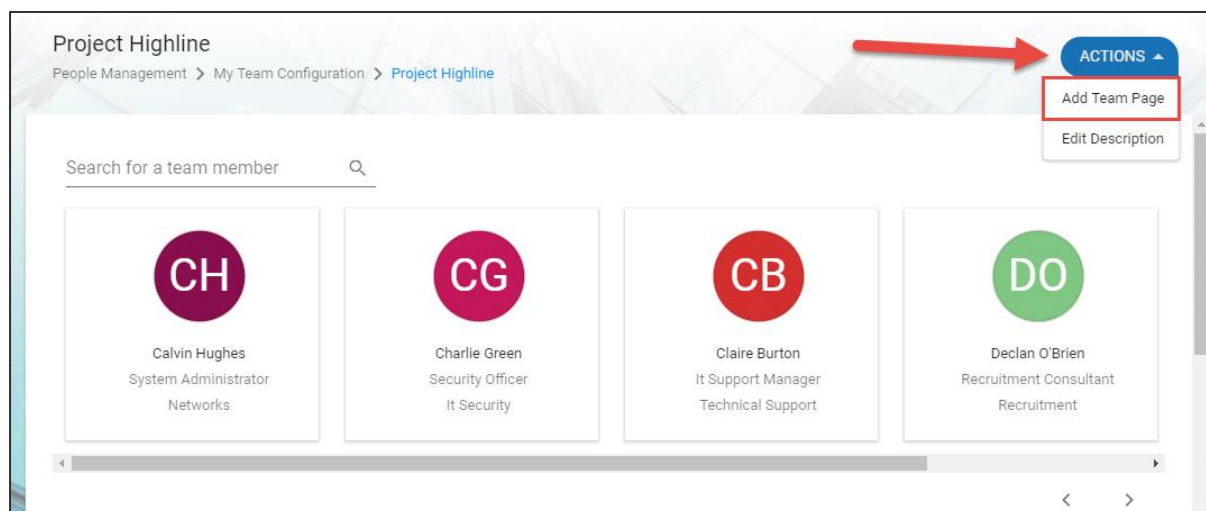

3. Click the  button, on the applicable team name.
4. Select **Team Page**.

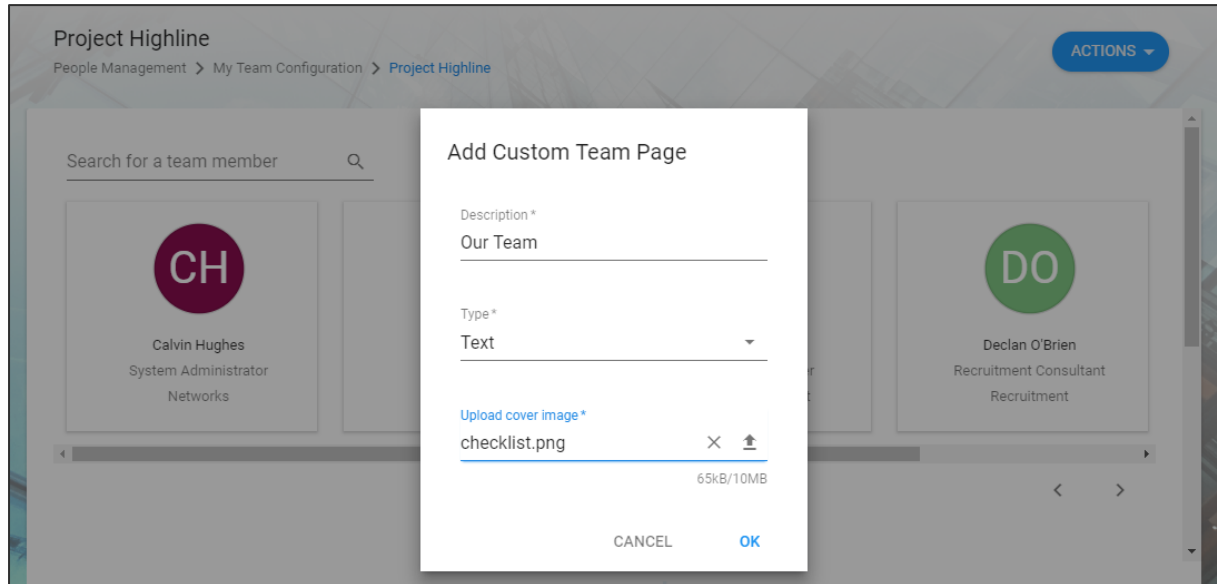

The *Project Highline - Team Page* displays.

5. Click **Actions**.
6. Select **Add Team Page**.

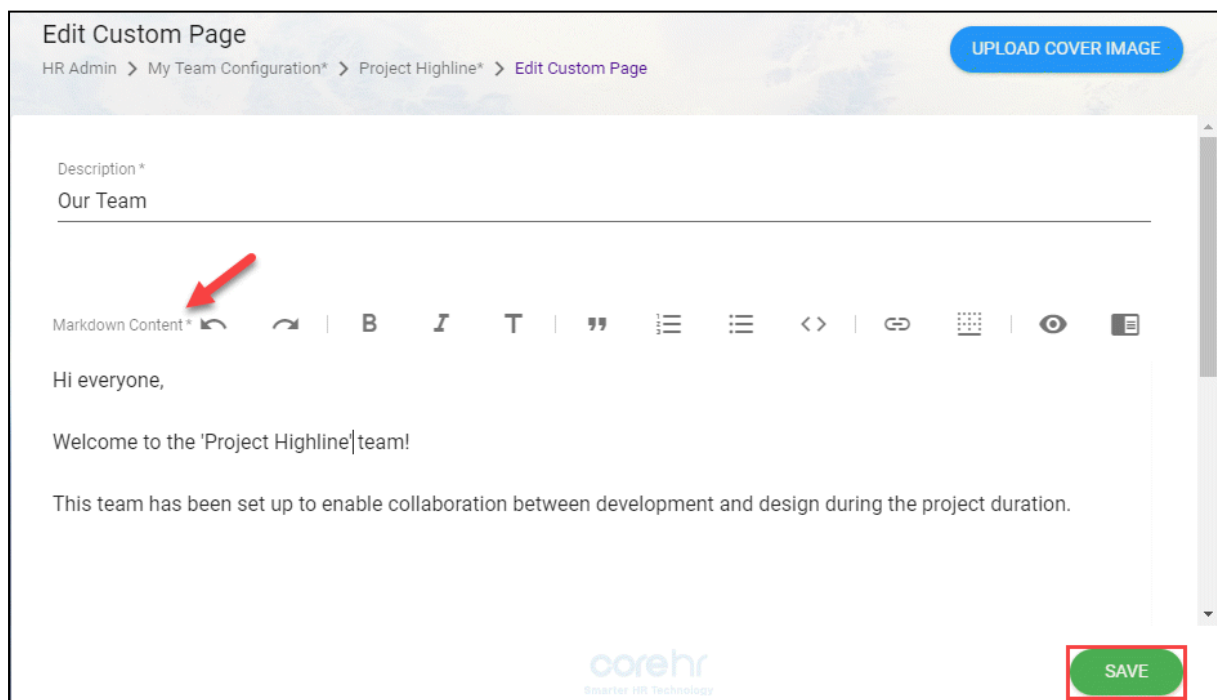

The *Add Custom Team Page* screen displays.

7. Enter the page *Description*.
8. Enter the page *Type*.
9. Select the  button to upload a cover image.
10. Select **OK**.

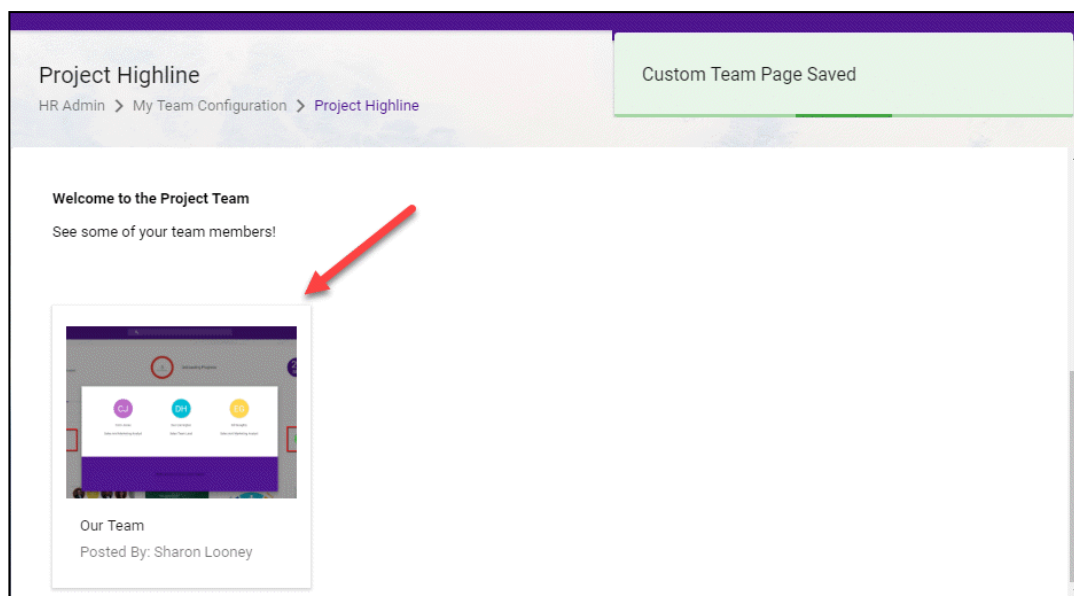

The *Edit Custom Page* screen displays.

11. Enter the required text. Use the markdown editor to apply simple formatting.
12. Click **Save**.

The *Project Highline – Team Page* screen displays.

The *Our Team – Sub Team Page* is added and is visible for team members to view.

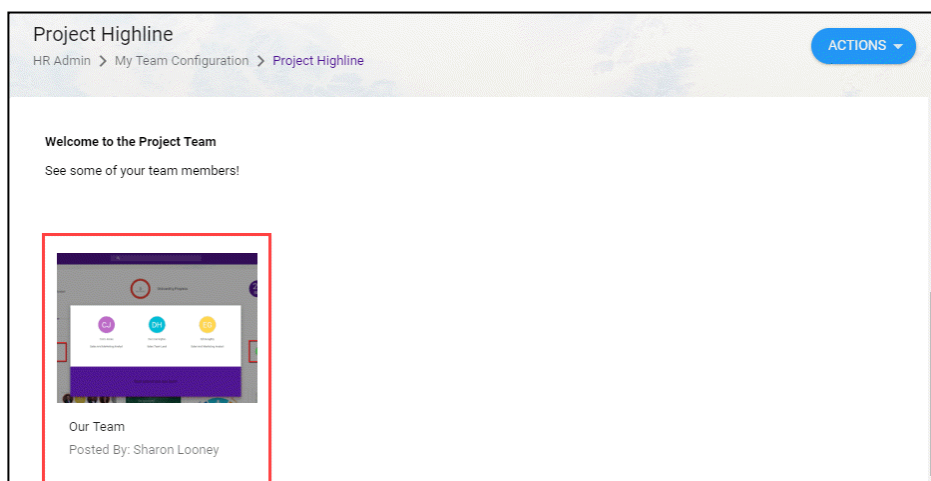

7.4.3. View Sub Team Page Content

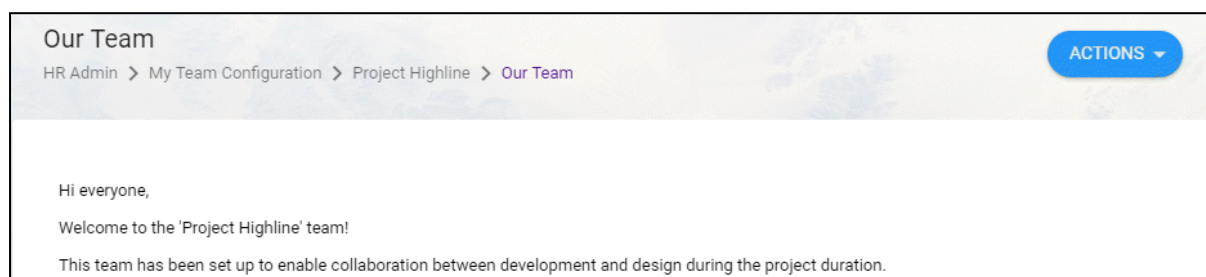

To view team page content:

1. While on the *Team Page*, click on the **Team Page Content**.

In this example, the applicable content is *Our Team*.

The *Our Team* content screen displays for review.

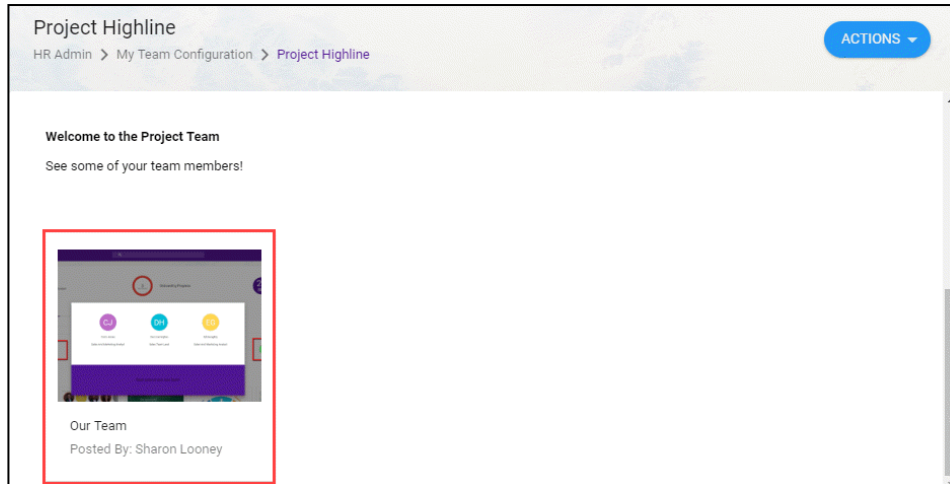

7.4.4. Edit Content

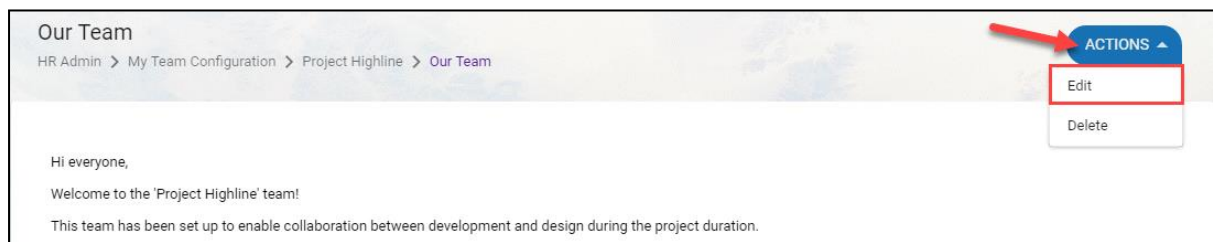

To **Edit** team page content:

1. While on the *Team Page*, click on the **Team Page Content**.

In this example, the applicable page is *Our Team*.

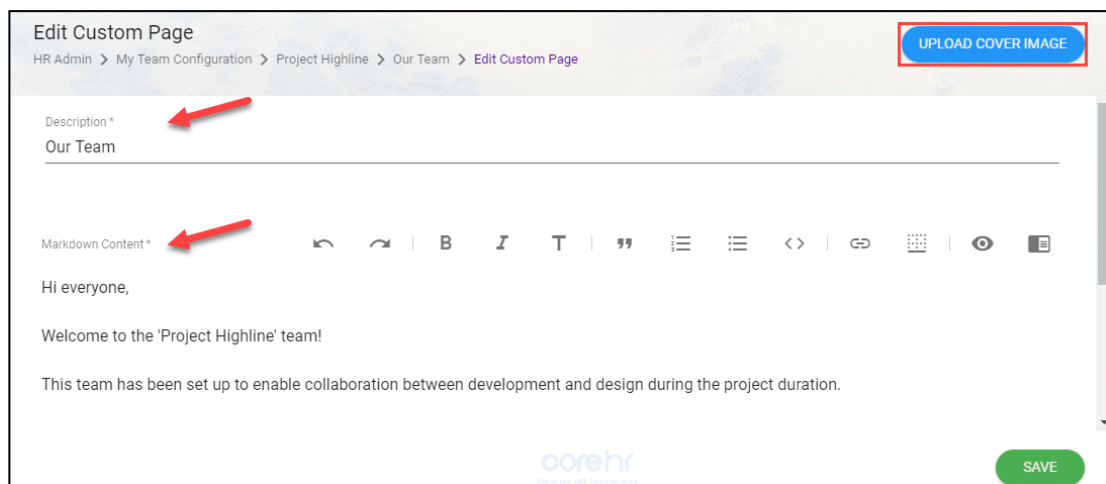

2. Click **Actions**.
3. Select **Edit**.

The *Edit Custom Page* screen displays.

4. Edit the cover image by selecting **Upload Cover Image**, if applicable.
5. Edit the *Description*, if applicable.
6. Edit the *Markdown Content*, if applicable.
7. Click **Save**.

7.4.5. Delete Content

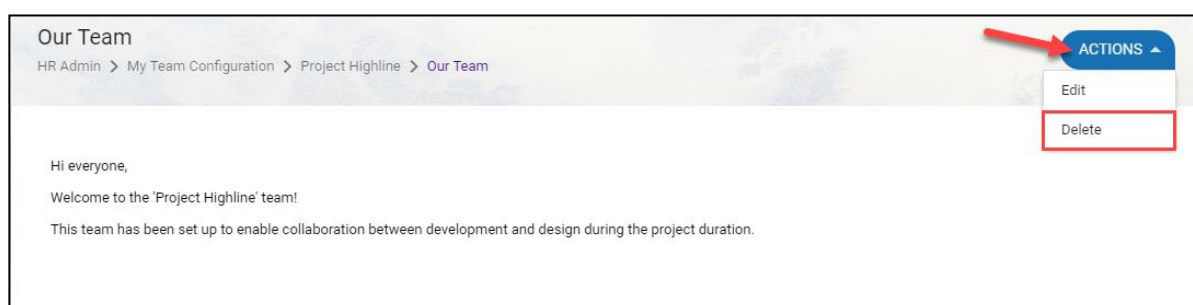

To delete team page content:

1. While on the Team Page, click on the **Team Page Content**

In this example, the applicable page is *Our Team*

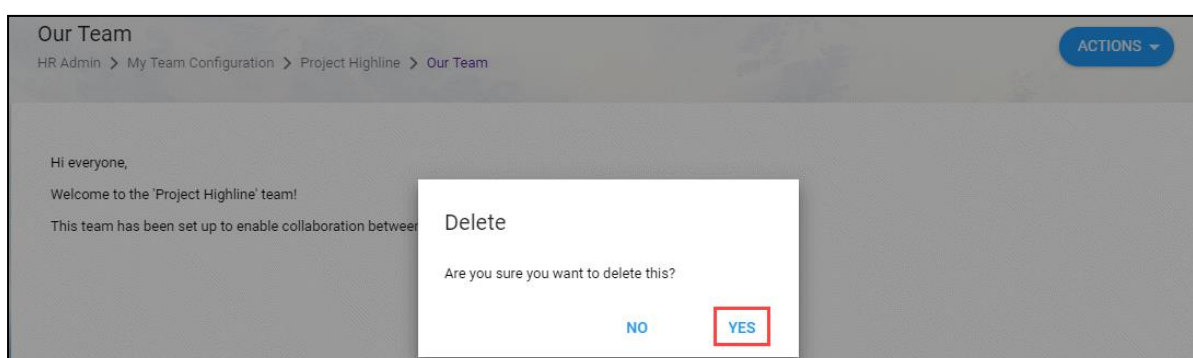

2. Click **Actions**.
3. Select **Delete**.

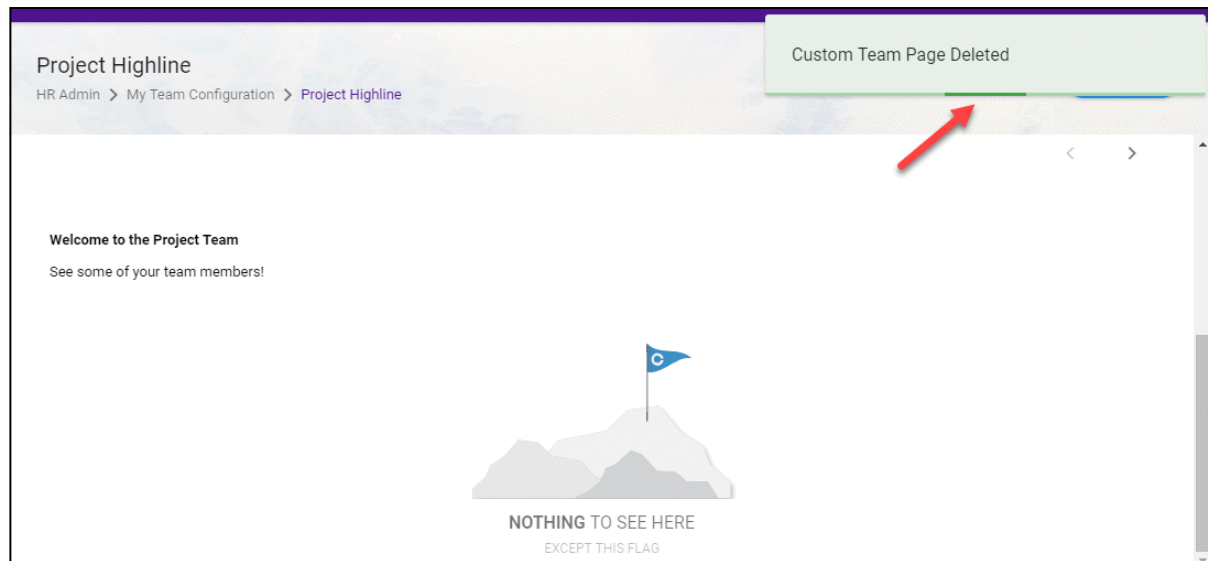

A *Delete* confirmation pop-up message displays.

4. Select **YES**, is applicable.

The *Project Highline – Team Page* displays, the *Our Team* content is deleted.

This cannot be undone.

8. Employee Bio

8.1. Employee Bio Configuration – Screen Overview

The below screenshot and table provide an overview of the *Employee Bio Configuration* screen.

Screen Section	Explanation
Social Networks	The option for employees to add social network links within their employee bio is configured here. The name of the network is added on this screen. The employee can then add a link to their network profile. If no social networks are added here, the option is not available to the employee.
Interest Questions	Interest questions can be rephrased to reflect specific interests, these phrases are then displayed on the employee bio for the user to then answer.
Contact Types	The contact types are configured in this section, these then display on the employee bio for the user to complete. Options available from the <i>Contact Type</i> drop-down lists are drawn from the standard contact type reference data.

Organisation Level Displayed

In this screen section, you decide what level should be displayed on key screens within the *Employee onboarding* pages. The level specified determines who users will see on the below pages:

- Employee Directory
- Team Area
- New Starters

Options available from the *Organisation Level* drop-down lists are drawn from the standard organisation level reference data.

8.2. Configure Employee Bio

To configure the Employee Bio:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Employee Bio Configuration*.

The *Employee Bio Configuration* screen displays.

3. Select **Add**, to add a social network link option, if applicable.

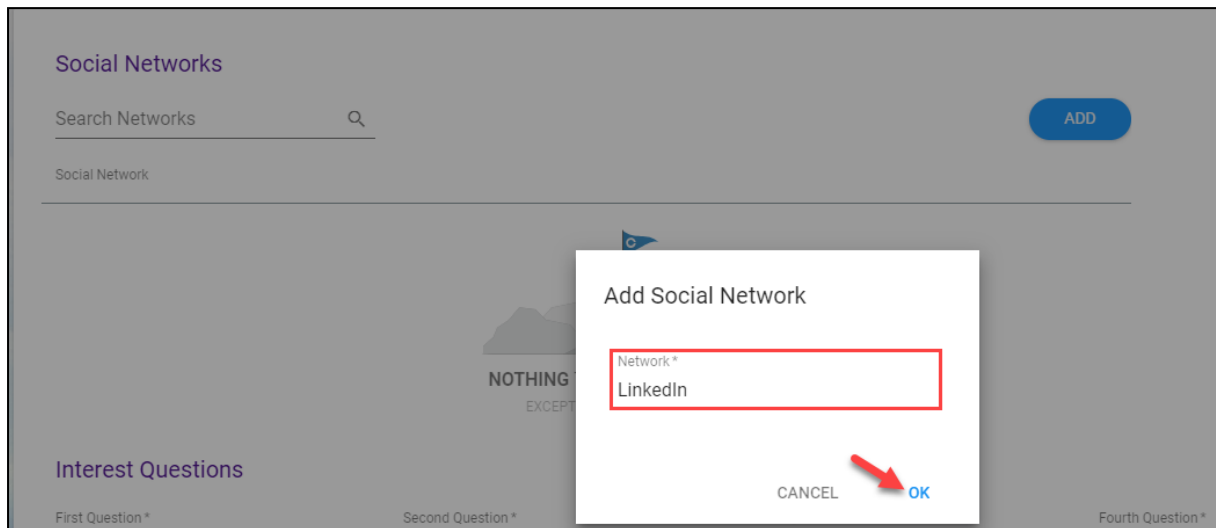

A screenshot of the 'Employee Bio Configuration' screen. The header shows 'Employee Bio Configuration' and a breadcrumb 'Manager Dashboard > Employee Bio Configuration'. The main section is titled 'Social Networks' and contains a search bar labeled 'Search Networks' with a magnifying glass icon. To the right of the search bar is a blue button labeled 'ADD', which is highlighted with a red rectangular box. Below the search bar is a section titled 'Interest Questions' with four input fields: 'First Question *' (containing 'I like'), 'Second Question *' (containing 'I enjoy'), 'Third Question *' (containing 'I love'), and 'Fourth Question *' (containing 'I can't be without'). Below this is a section titled 'Contact Types' with three dropdown menus labeled 'First Contact', 'Second Contact', and 'Third Contact'. At the bottom, there is a label 'Organisation Level Displayed'.

The *Add Social Network* pop-up displays.

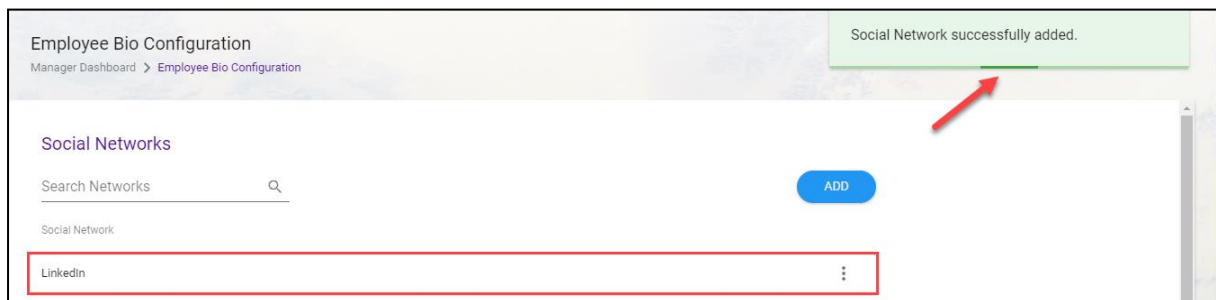

4. Enter the applicable *Network* name.

In this example, the LinkedIn social network name will display on the employee bio, allowing the user to enter their network profile URL. Repeat this process for each social network required.

5. Select **OK**.

A progress bar notification displays on screen, notifying that the social network has been successfully added. The social network is now visible on screen.

6. Next, enter your applicable *Interest Questions*.

All 4 questions are mandatory.

These questions appear on the employee bio for the user to answer.

A screenshot of the 'Interest Questions' and 'Contact Types' sections. The 'Interest Questions' section is highlighted with a red border and contains four questions: 'First Question *' with the text 'I love', 'Second Question *' with the text 'I can't live without', 'Third Question *' with the text 'My Favourite drink.....', and 'Fourth Question *' with the text 'Tea or Coffee?'. Below this is the 'Contact Types' section, which contains three contact types: 'First Contact' with the text 'EMAIL ADDRESS', 'Second Contact' with the text 'PERSONAL MOBILE NUMBER', and 'Third Contact' with the text 'Walkie Talkie'. Each contact type has a dropdown arrow next to it.

7. Select the applicable contact methods from the *Contact Types* drop-down lists.

First Question *
I love

Second Question *
I can't live without

Third Question *
My Favourite drink.....

Fourth Question *
Tea or Coffee?

Contact Types

A progress bar displays on screen, indicating that the bio configuration has been updated successfully.

9. Policy Documents and Handbooks

The *Policy Documents and Handbooks* area allows you to maintain the various documents that should be reviewed by the employee as part of a checklist item. For example:

- Policies
- Employee Handbooks

**Note:**

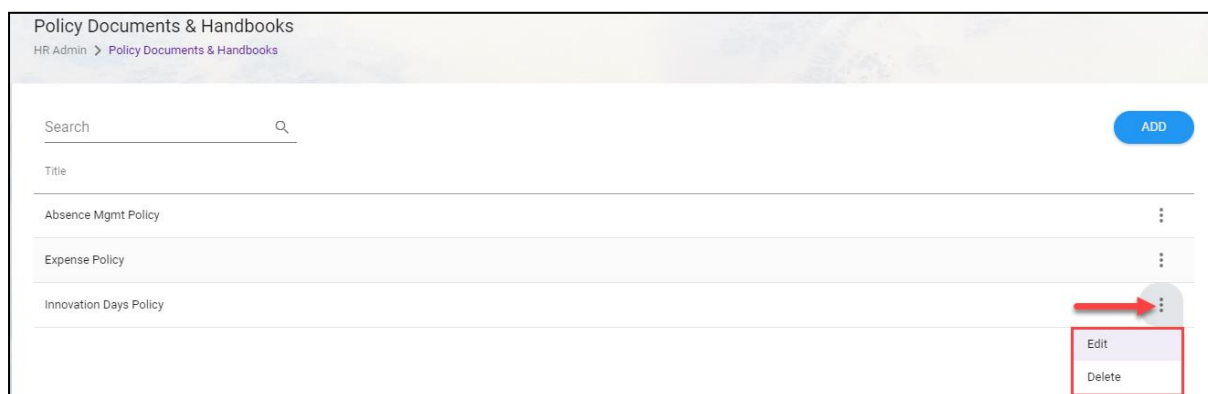

If a checklist item has been released with documents, and has been completed by employees, attaching another document to the item within the *Add Policy* area will not re-release the checklist item for review.

Example scenarios:

- If employees reviewed the checklist item in their *Completed* list, the updated document displays.
- If employees are still to complete the checklist item in their *Tasks Outstanding* list, the updated document displays.

Therefore, the correct process to follow, to ensure that all employees will review the updated documents, is to create a new checklist item.

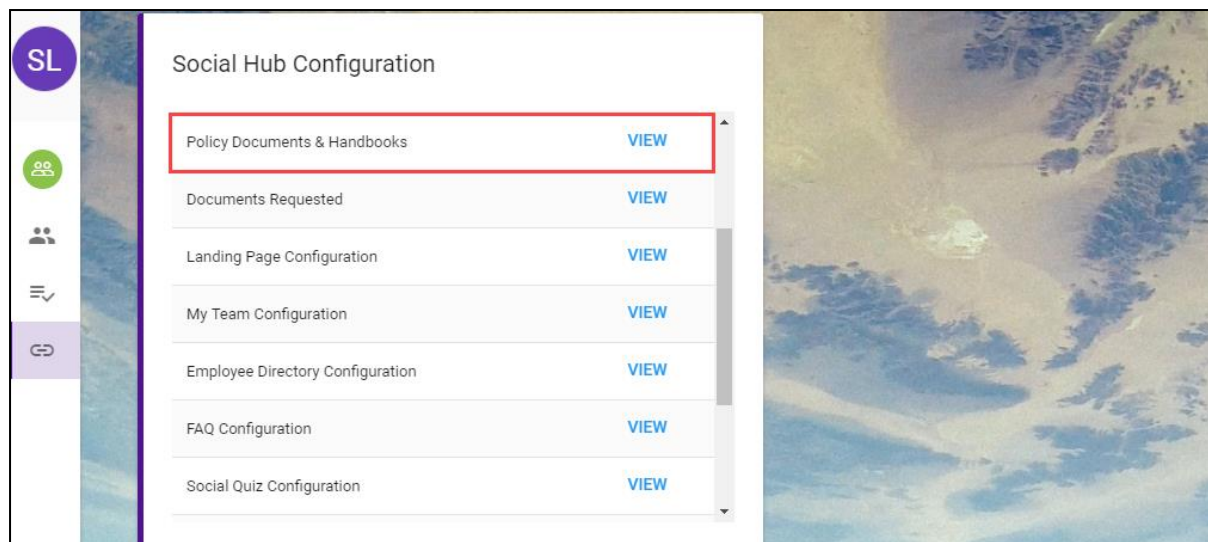

The *Policy Documents & Handbooks* screen lists all documents that have been uploaded to the system. It is possible to: add new, edit, or delete existing documents.

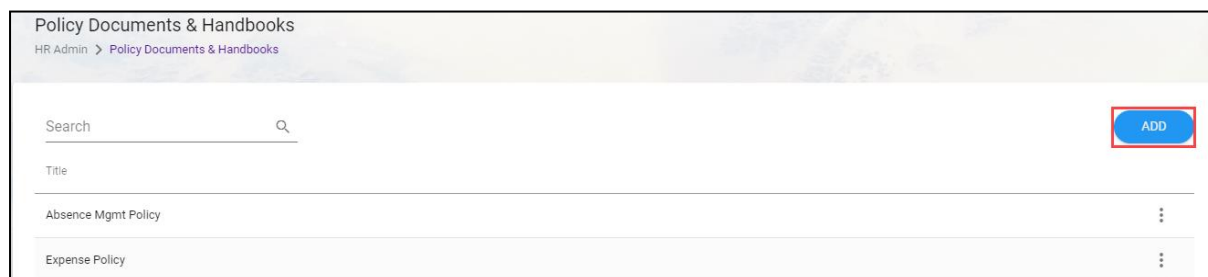

9.1. Add Policy Documents and Handbooks

To add a new policy document or handbook:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Policy Documents & Handbooks*.

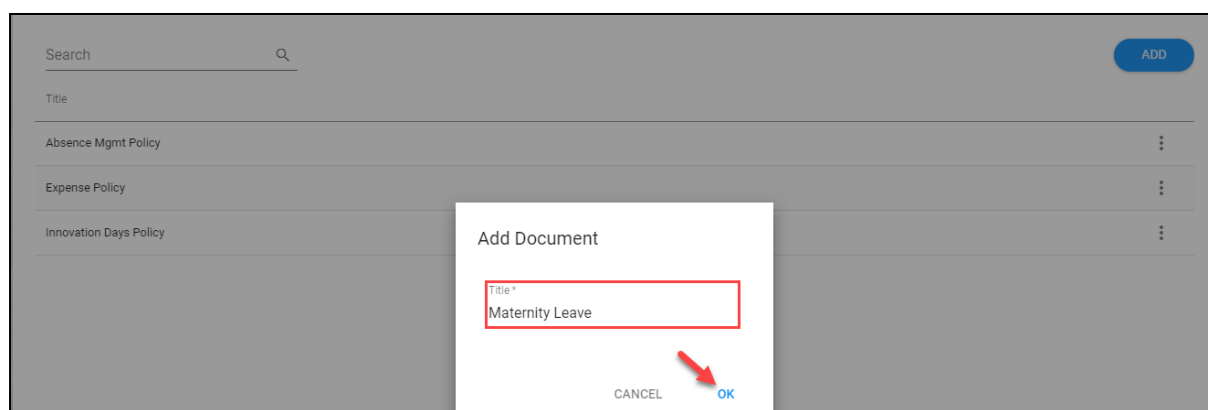

3. Click **Add**.

An *Add Document* pop-up displays.

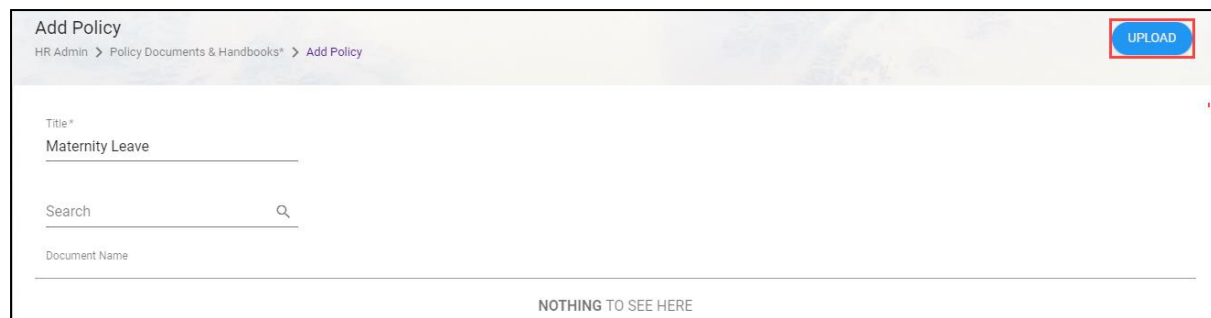

4. Enter a document *Title*.

5. Select **OK**.

The *Add Policy* screen displays.

6. Select **Upload**.

Add Policy
HR Admin > Policy Documents & Handbooks* > Add Policy

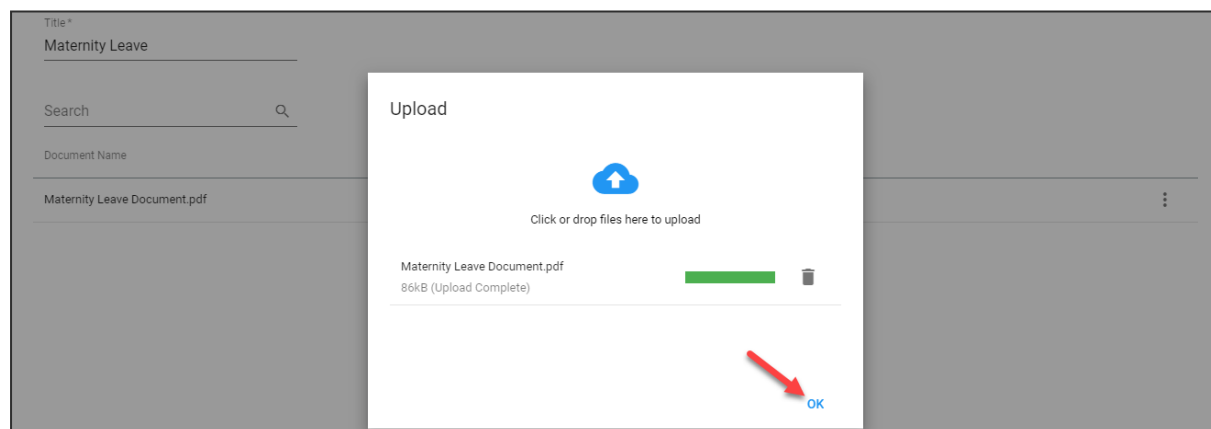

Title*

ADD

Title	
Absence Mgmt Policy	...
Expense Policy	...
Innovation Days Policy	...
Maternity Leave	...

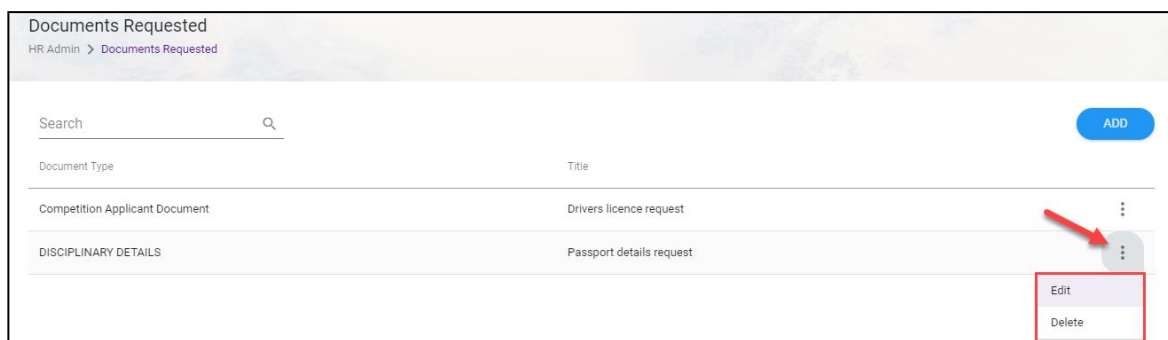

10. Documents Requested

The documents requested area allows you to maintain the various documents that are requested from employees as part of checklist items. Document types are added by selecting a document from the standard list of document types reference data.

**Note:**

- If a document requested is deleted from the *Documents Requested* screen, it will affect the employee's ability to complete their remaining checklist items that contain this document.
- When the employee is completing a checklist item that is linked to one of these documents, the system displays any existing documents of this same type, that are already loaded against the employee record.

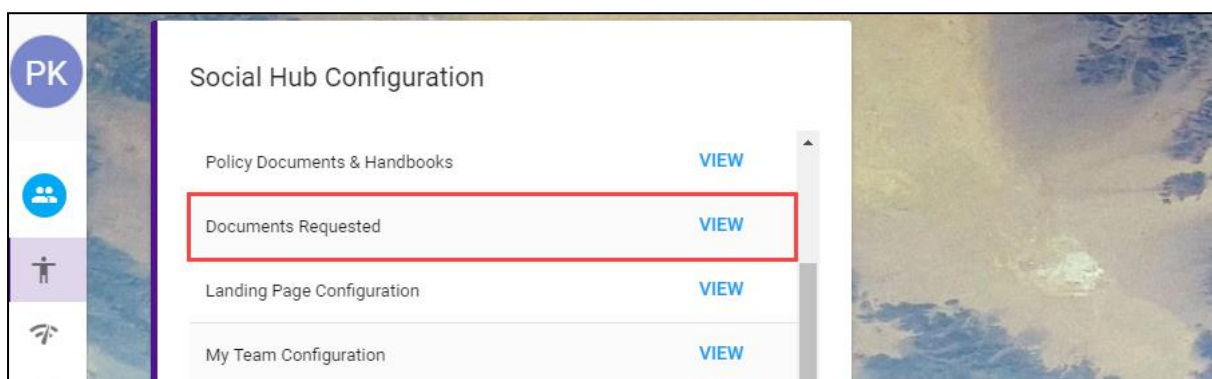

The *Documents Requested* screen lists all document types that have been set up on the system. It is possible to: add new, edit, or delete existing documents.

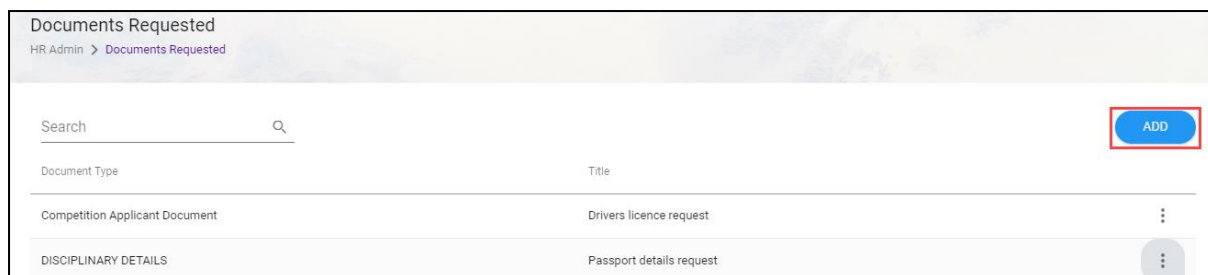

10.1. Add Documents Requested

To add a new policy document or handbook:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Policy Documents & Handbooks*.

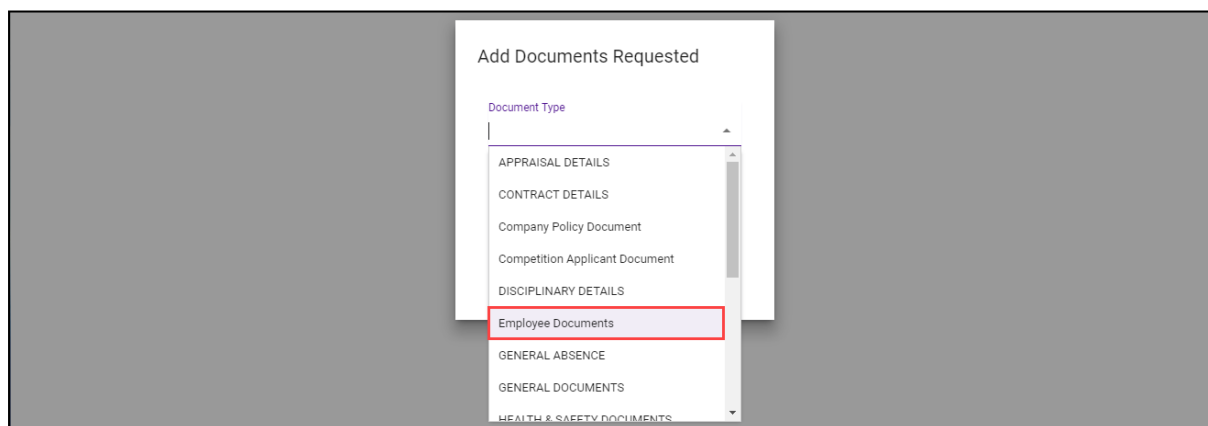

3. Select **Add**.

The *Add Documents Requested* pop-up displays.

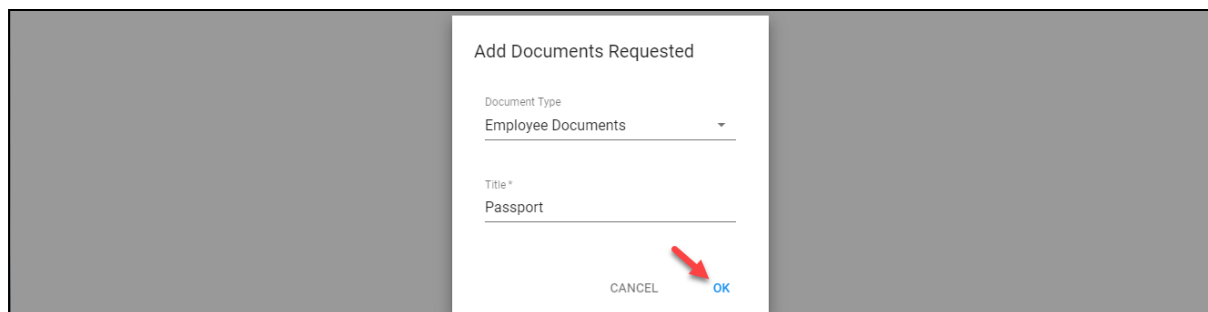

4. Select the type of document you are requesting from the *Document Type* drop-down list. In this example, we are requesting the employee to submit a copy of their passport, therefore the document type selected from the standard list of document types reference data is 'Employee Documents'.

5. Enter a *Title* for the document.

This is the name of the document requested that is displayed to the employee, on their checklist item.

6. Select **OK**.

The *Documents Requested* screen displays.

In this example, we can now see the *Document Type* and *Title* has been added to the list.

The screenshot displays the 'Documents Requested' section of a user interface. At the top, there is a breadcrumb trail: 'Manager Dashboard > Documents Requested'. A green notification box in the top right corner states 'Documents Requested Saved'. Below the breadcrumb, there is a search bar with the placeholder text 'Search' and a magnifying glass icon. To the right of the search bar is a blue 'ADD' button. The main content area features a table with two columns: 'Document Type' and 'Title'. Red arrows point to these column headers. The first row of the table contains the text 'Employee Documents' under 'Document Type' and 'Passport' under 'Title'. A vertical ellipsis (three dots) is visible at the end of the first row, indicating more options or actions.

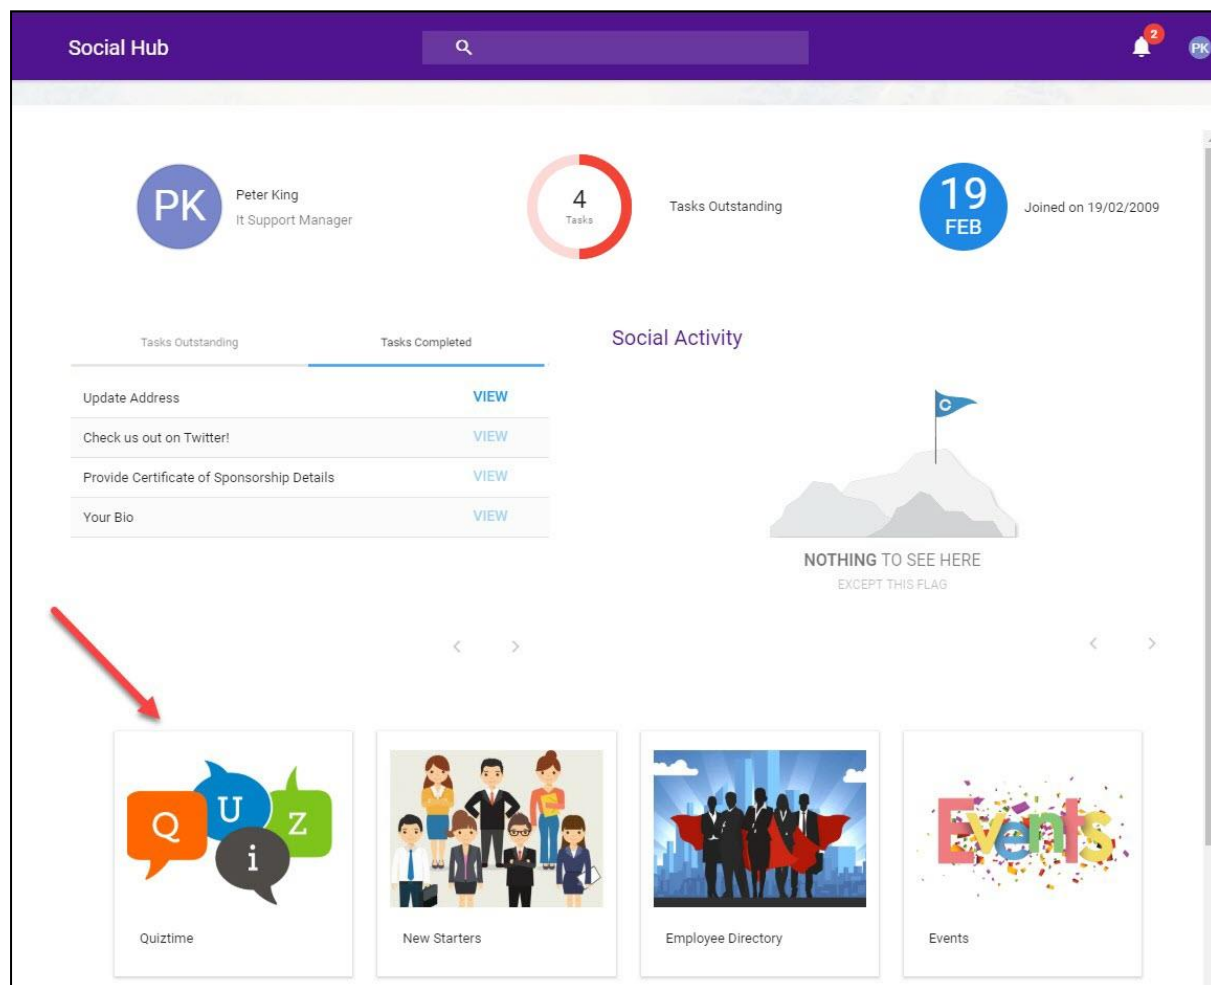

Document Type	Title
Employee Documents	Passport

11. Social Hub Dashboard (Landing Page)

Content pages, and their position, that display on the *Social Hub* dashboard landing page are added within the *Landing Page Configuration* screen. The below types of pages can be added to the *Landing Page*:

- Custom pages
- System pages

An example of the *Landing Page*, with added *System Pages* is shown in the below screenshot.

Actions that can be completed on this screen include:

- Previewing the landing page layout, by selecting the **Preview Layout** button.
- Re-ordering the position of the pages by clicking and dragging the  button on the applicable page.

Both items are highlighted in the screenshot below.

Landing Page Configuration

6	Check us out on LinkedIn	

Landing page preview

Quiztime New Starters Employee Directory Events FAQ

Further actions that can be completed on this screen include:

- Add page
- Delete page
- Upload a cover image
- Restrict pages

11.1. Adding Custom Pages

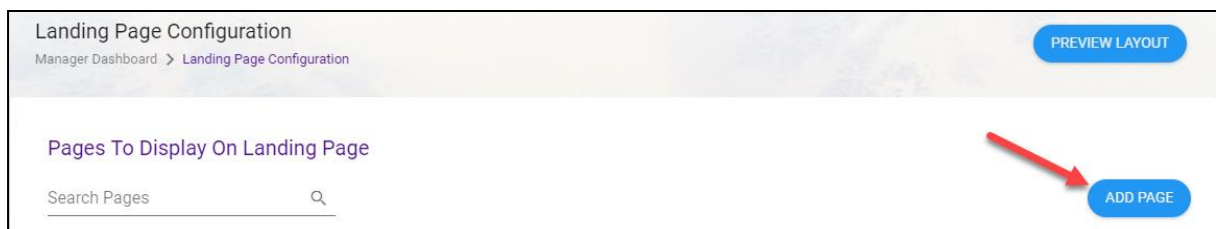

It is possible to select any custom page that has been created on the system. If the custom page has been restricted when it was created, then the restriction will also be displayed on this screen, if not it will be global and available for all employees to view.

To add a custom page:

1. Quick jump to the *Social Hub Configuration* widget
2. Select **View** *Landing Page Configuration*

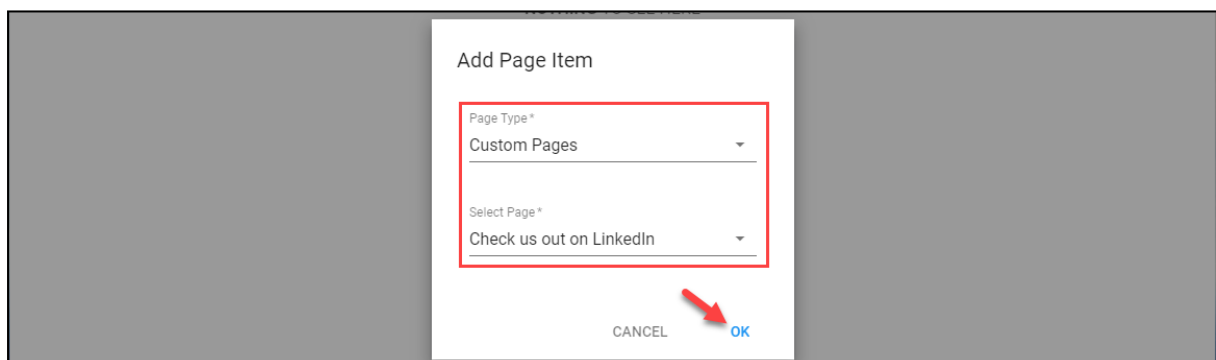

3. Select **Add Page**.

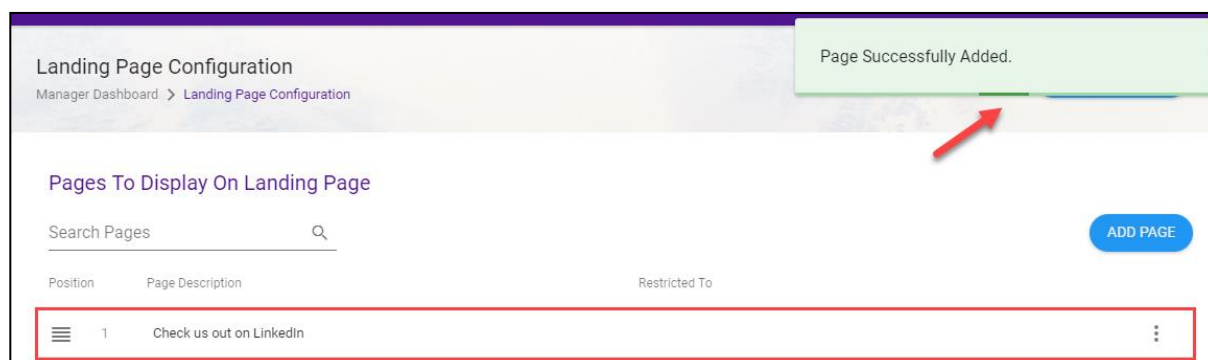

The *Add Page Item* pop-up displays.

4. Select the **Custom Pages** from the *Page Type* drop-down list.
5. Select the applicable page from the *Select Page* drop-down list.
In this example, the 'Check us out on LinkedIn' custom page is selected.
6. Click **OK**.

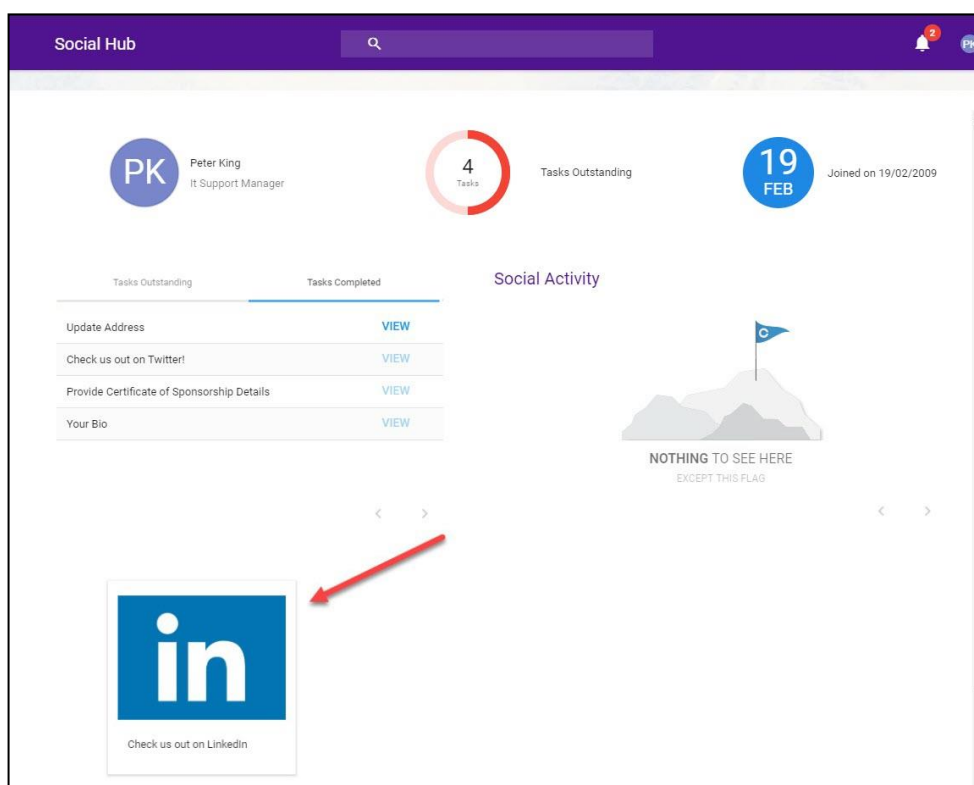

The *Landing Page Configuration* screen displays.

The 'Check us out on LinkedIn' *Custom Page* is now present on the list of pages. Currently this is the only page present on the *Landing Page*.

The screenshot on the next page details the *Social Hub – Landing Page* now visible to employees.

11.2. Adding System Pages

It is possible to select any *System Pages* to add to the *Landing Page*. *System Pages* are pre-configured pages that include:

- New Starters
- My Team Area

- Employee Directory
- Quiztime
- Events
- FAQ

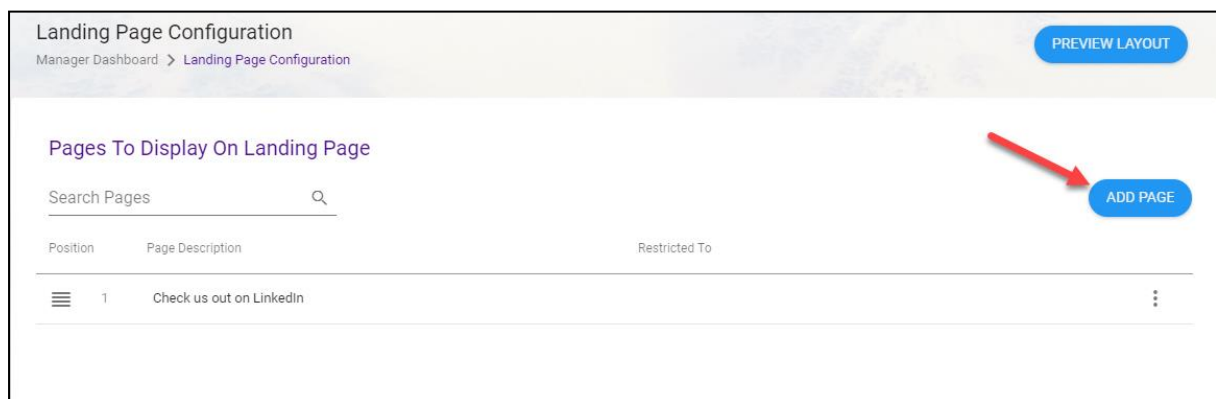

Once added, all of these will be displayed by default to all employees on their *Social Hub* dashboard landing page, until they are explicitly restricted at a later stage. See section [6.6 Restrict](#) for further information.

To add a system page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Landing Page Configuration*.

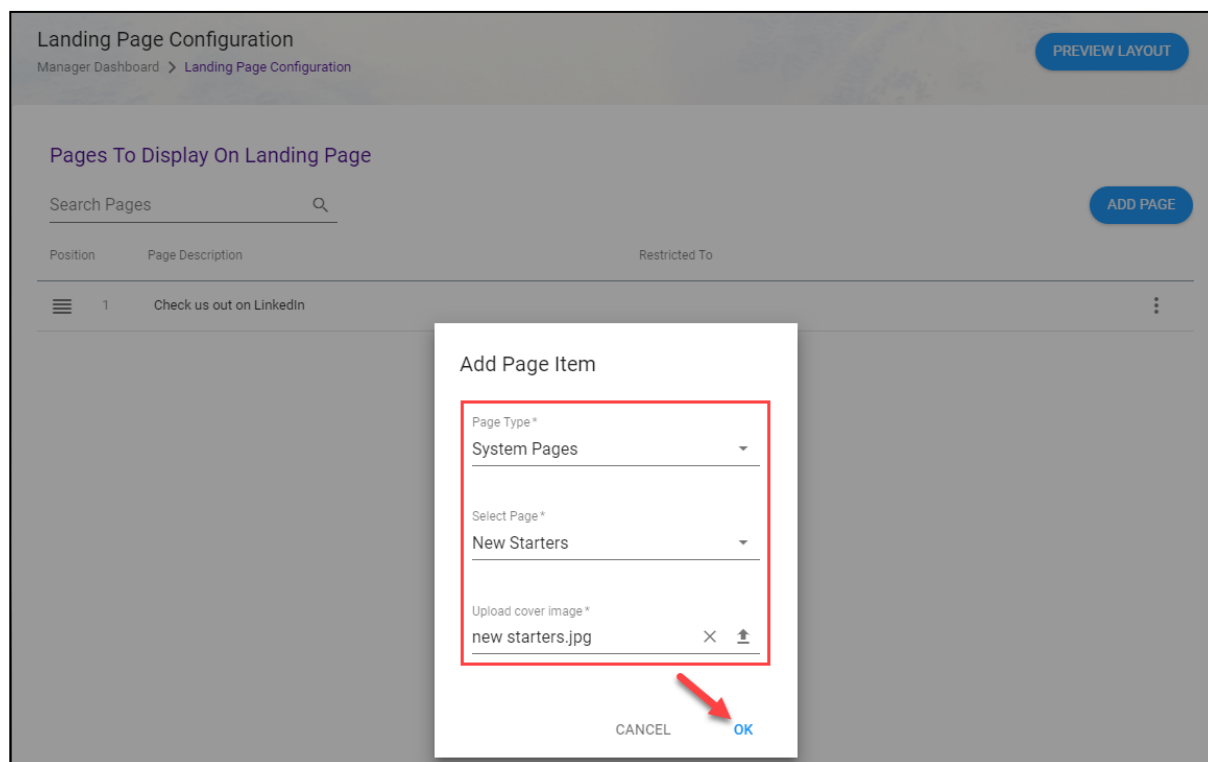

3. Select **Add Page**.

The *Add Page Item* pop-up displays.

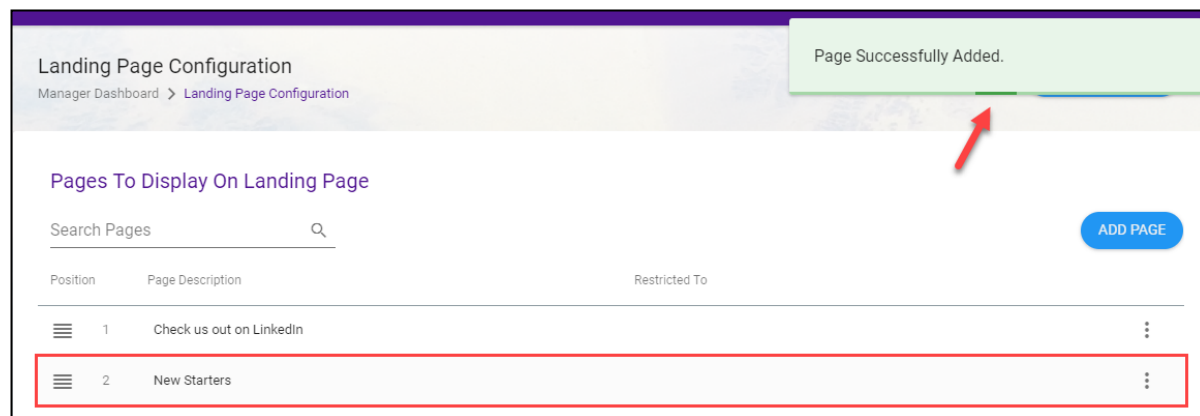

4. Select the **System Pages** from the *Page Type* drop-down list.
 5. Select the applicable page from the *Select Page* drop-down list.
- In this example, the 'New Starters' system page is selected.

6. Select the  button on the *Upload cover image* field to upload a cover image.
7. Select **OK**.

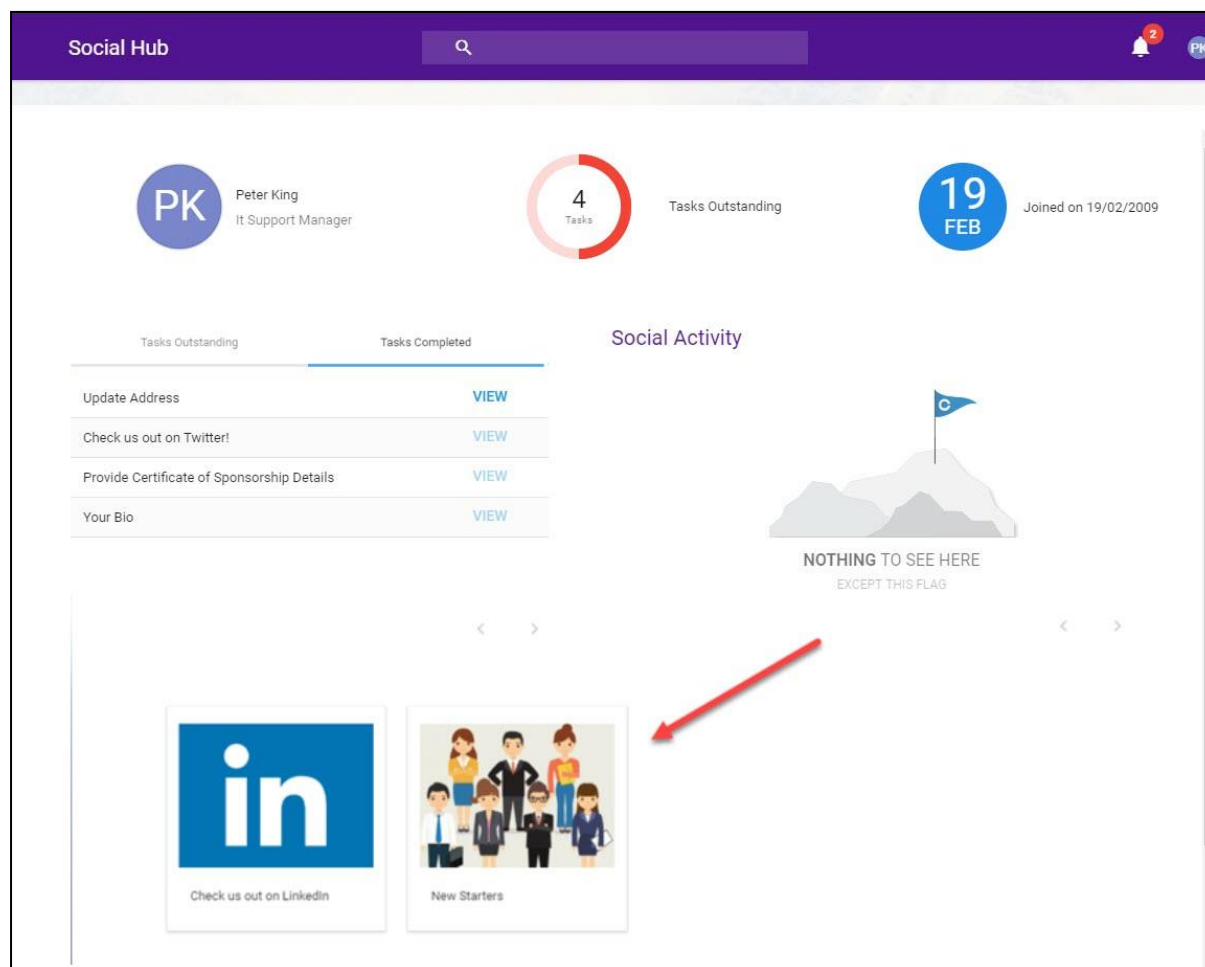

The *Landing Page Configuration* screen displays.

The 'New Starters' *System Page* is now present on the list of pages.

The below screenshot details the *Social Hub – Landing Page*, now visible to employees.

11.3. Upload a Cover Photo

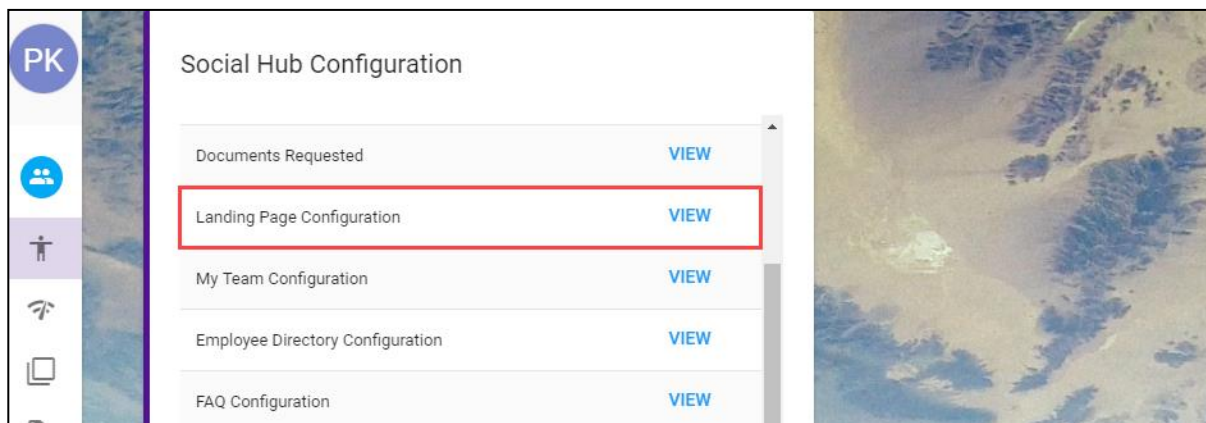

Note:

- By choosing the **Upload a cover image** option, this will override the image uploaded during the creation of the *Custom Page*.
- System Pages have no cover image by default, a cover image must be uploaded when adding a *System Page* to the *Landing Page*.

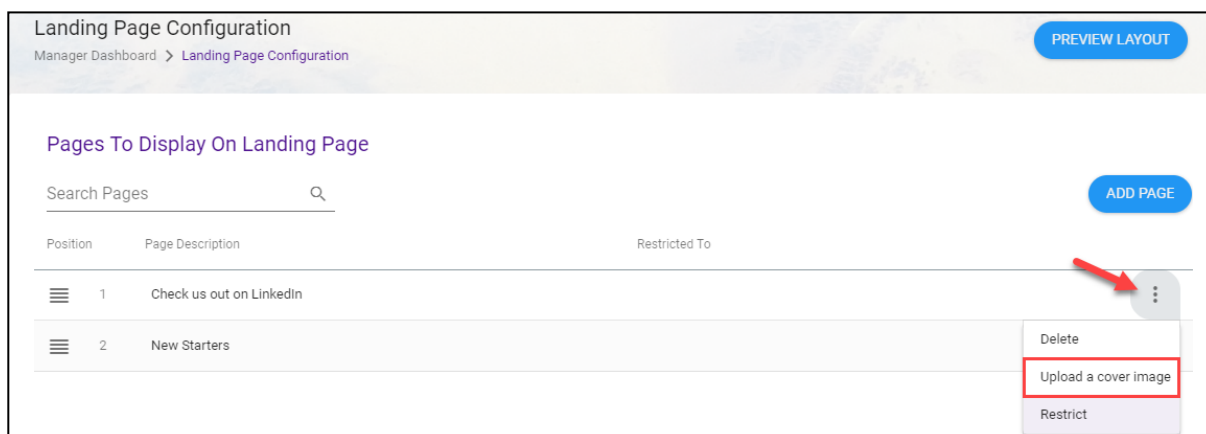

To upload a new cover image for a custom or system page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Landing Page Configuration**.

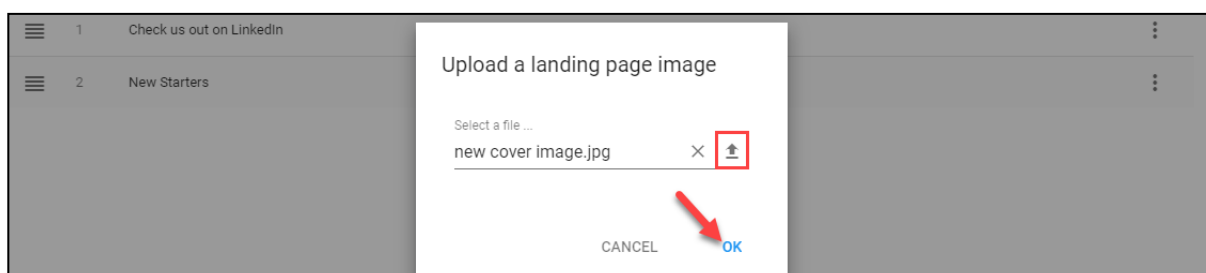

3. Select  button on the applicable page.
In this example, a new cover image for the 'Check us out on LinkedIn' custom page is uploaded.

4. Select **Upload a cover image**.

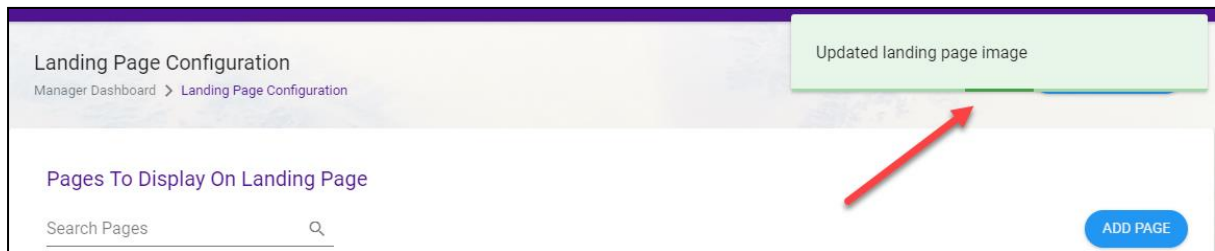

The *Upload a landing page image* pop-up displays.

5. Select the  button on the *Select a file* field, to upload a cover image.
6. Select **OK**.

The *Pages To Display On Landing Page* screen displays, with a notification indicating that the landing page image is updated.

The below screenshot details the new cover image for the 'Check us out on LinkedIn' *Custom Page*, on the employee *Social Hub - Landing Page*.

11.4. Restrict Pages – from Landing Page Configuration

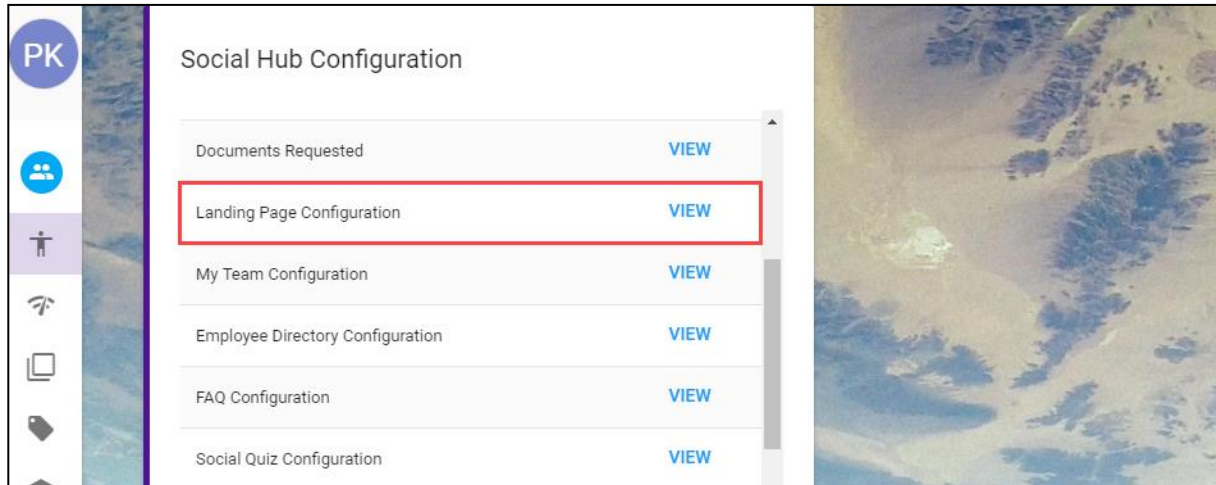

It is possible to restrict both *Custom Pages* and *System Pages* from the *Landing Page Configuration*, so they are only visible to specific groups of employees.

Note:

The *Team Area – System Page* is the only exception to adding restrictions on the *Landing Page Configuration* screen. This is because the restriction is already configured during the *Team Area* page creation.

To add a restriction to a custom or system page:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Landing Page Configuration**.

3. Select the  button on the applicable page.

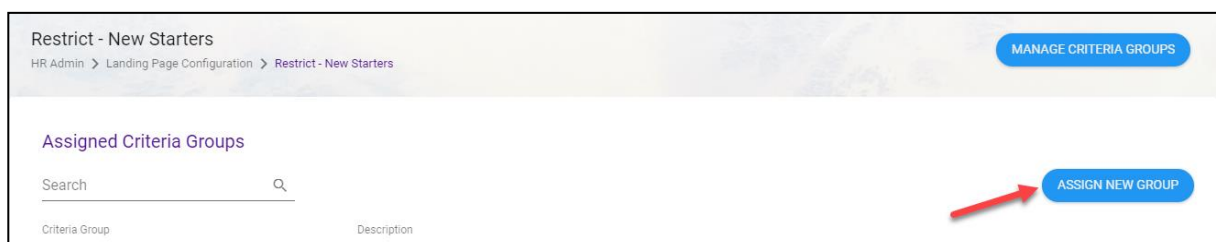

4. Select **Restrict**.

In this example, a restriction is being added to the *New Starters – System Page*

The *Assigned Criteria Groups* screen displays.

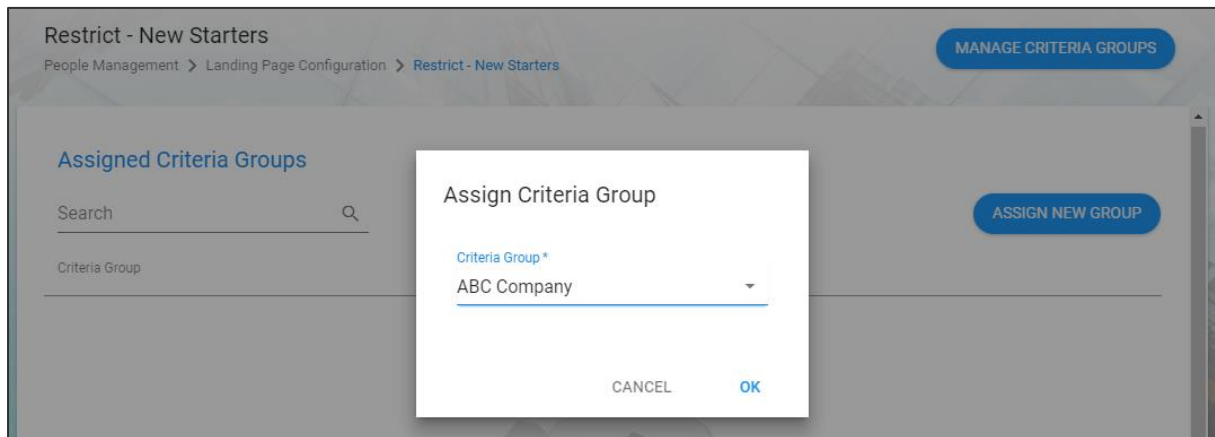

5. Select **Assign New Group**.

The *Assign Criteria Group* pop-up displays.

6. Select the applicable group from the *Criteria Group* drop-down list.

7. Select **OK**.

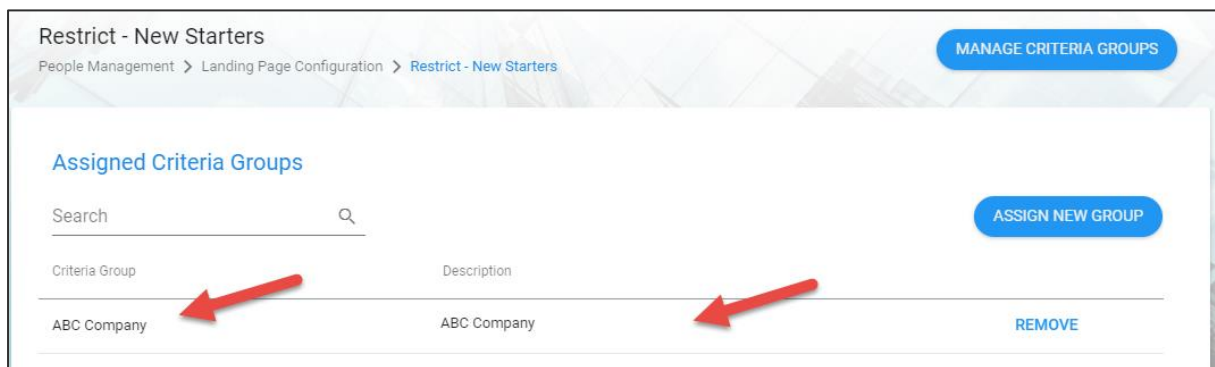

The *Assigned Criteria Groups* screen displays.

The criteria group has now been added to the *New Starters – System Page*.

Only employees in “ABC Company” can now view this page.

This process can be repeated multiple times, to add multiple criteria groups.

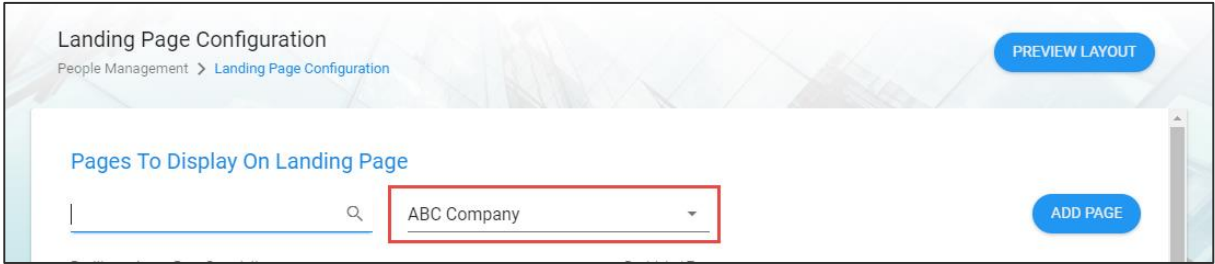

11.4.1. The ‘Visible To’ Filter

It is also possible to filter the landing page content and can preview what is visible for specific groups of users.

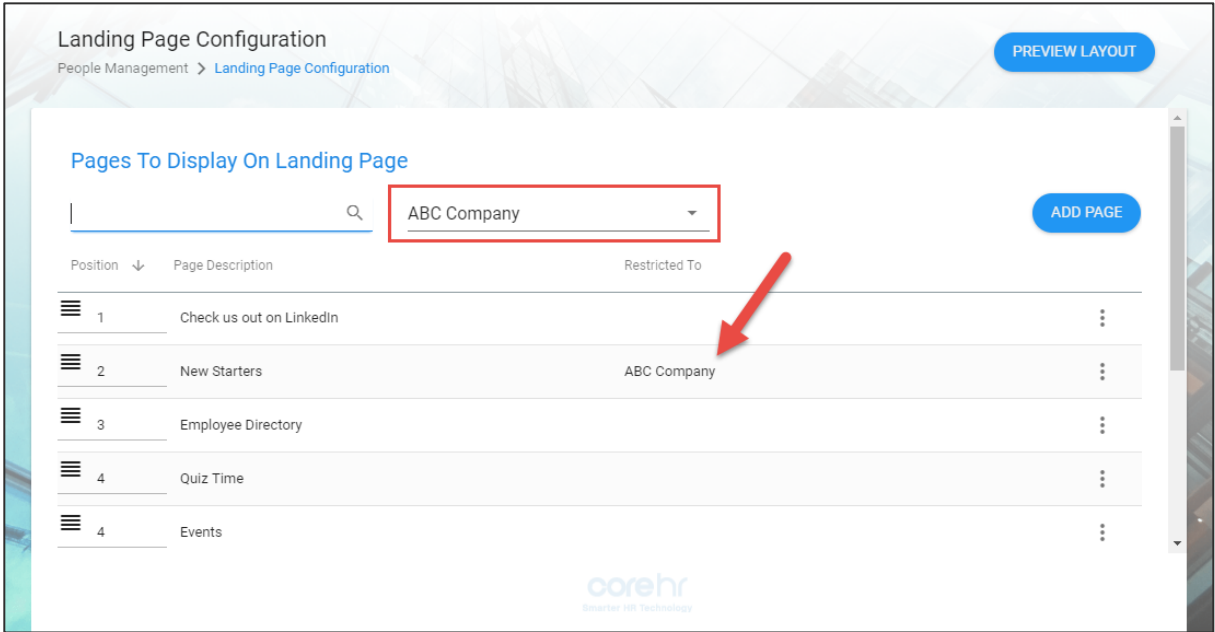

To see who a page is visible to:

1. Quick jump to *Social Hub Configuration* widget.
2. Select **View Landing Page Configuration**.
3. Select the applicable group from the *Visible to* drop-down list.

In this example, we want to see if the “ABC Company” restriction to the *New Starters – System Page* has been successful. Therefore, “ABC Company” is selected from the drop-down list.

The below screenshots details that the *New Starters* page is restricted to be viewed by “ABC Company” employees only. Note that the other pages listed on this screen are also visible to “ABC Company” employees, as they are not restricted to other criteria groups.

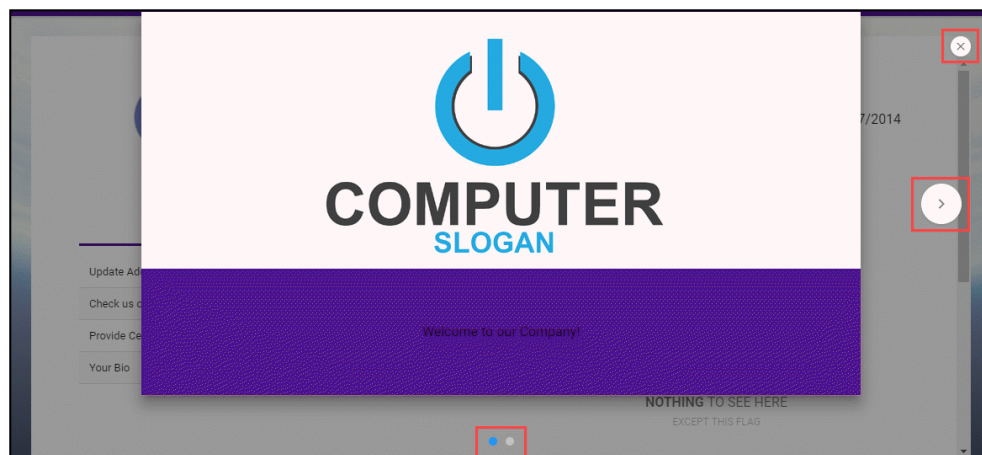

12. Welcome Board

When employees enter *Employee onboarding*, a welcome board can be presented. Employees can then navigate through a sequence of steps before accessing the main content within the *Social Hub*. There are 3 main card types that can be added to the welcome board, outlined in the table below.

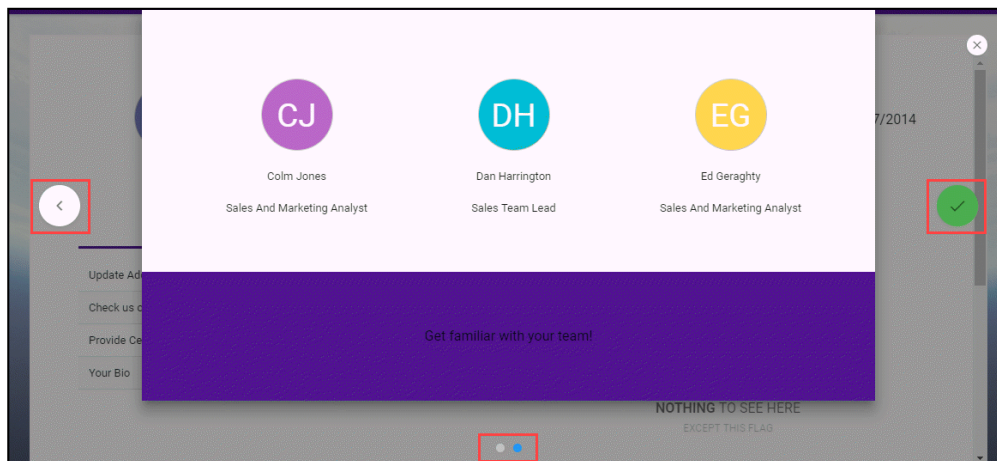

Card Type	Explanation
Message Card	Displays a greeting message, from a specified person within the organisation.
Logo Card	Displays an image, and a greeting message.
Team Card	Displays a view of employee's team members, as dictated by the <i>My Team Configuration</i> setup, along with a greeting message.

The below screenshots detail an example employee view *Welcome Board*, the employee can navigate through a sequence of welcoming cards, then mark the activity as complete.

Logo Card

Team Card

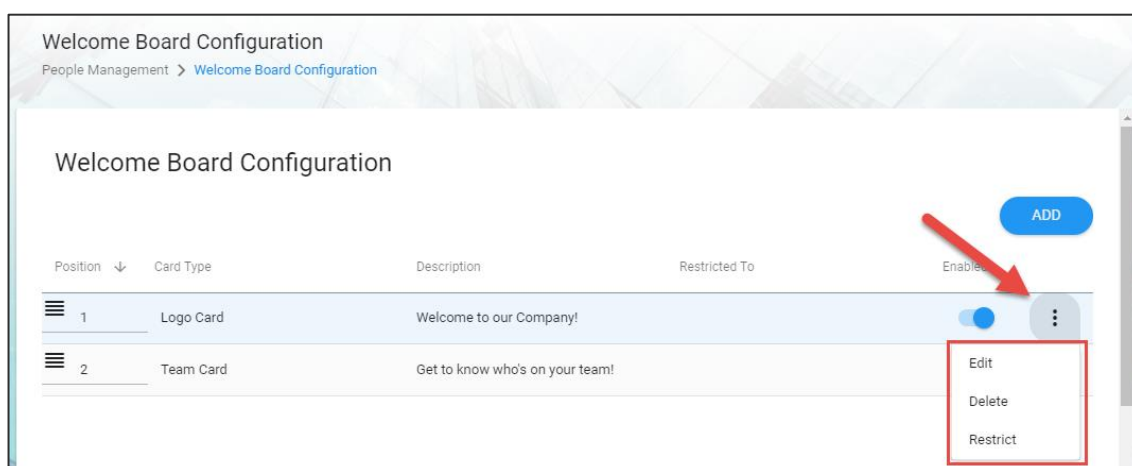

Once the *Welcome Cards* have been added to the *Welcome Board Configuration* screen, the following actions can be applied:

Action	Explanation
Made Active	Cards must be Enabled for them to be displayed on the <i>Welcome Board</i> .
Restricted	If restricted and active, cards only display for employees who match the restriction grouping.
Ordered	Cards can be re-ordered to appear on the <i>Welcome Board</i> as required.

The *Welcome Board* steps that are presented to the employee are configured within the *Welcome Board Configuration* area.

The *Welcome Board Configuration* screen lists all cards that have been set up on the system. Here you can add new, edit, restrict or delete cards.

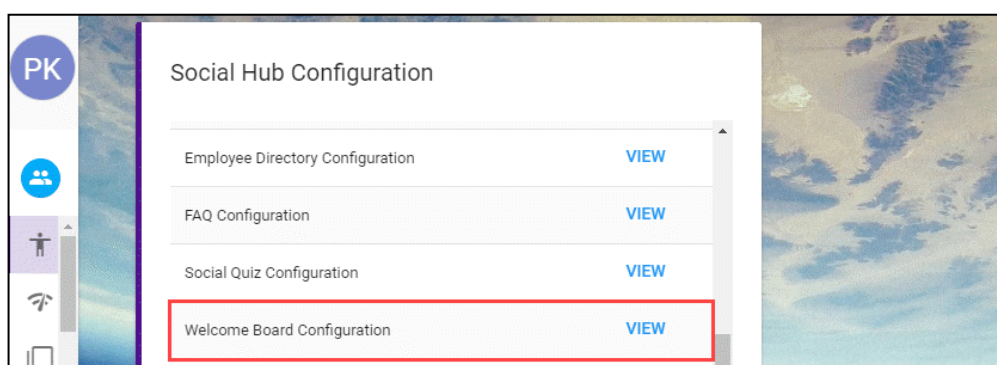

12.1. Adding Welcome Board Cards

12.1.1. Adding a Logo Card

To add a logo card:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Welcome Board Configuration*.

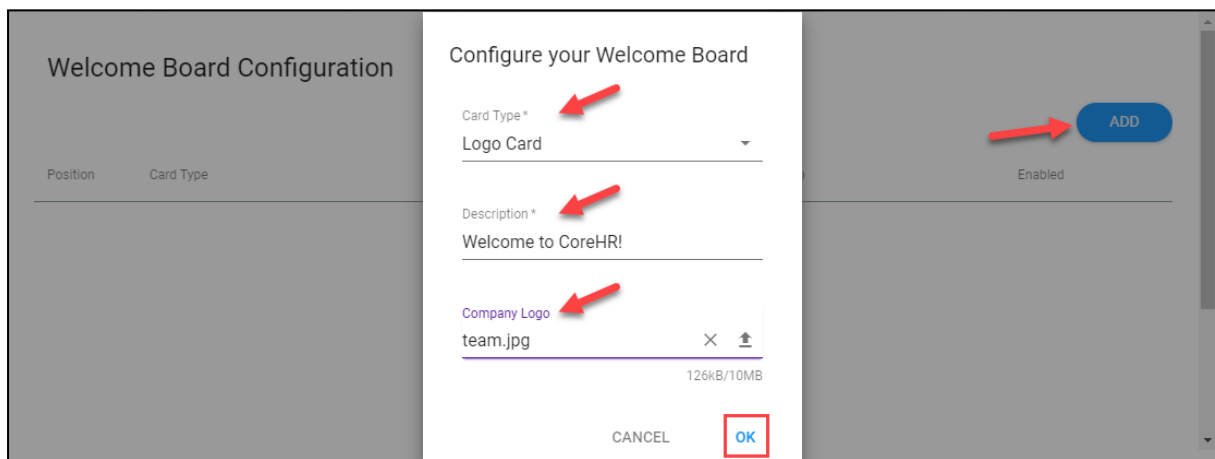

3. Click **Add**.

The *Configure your Welcome Board* pop-up displays.

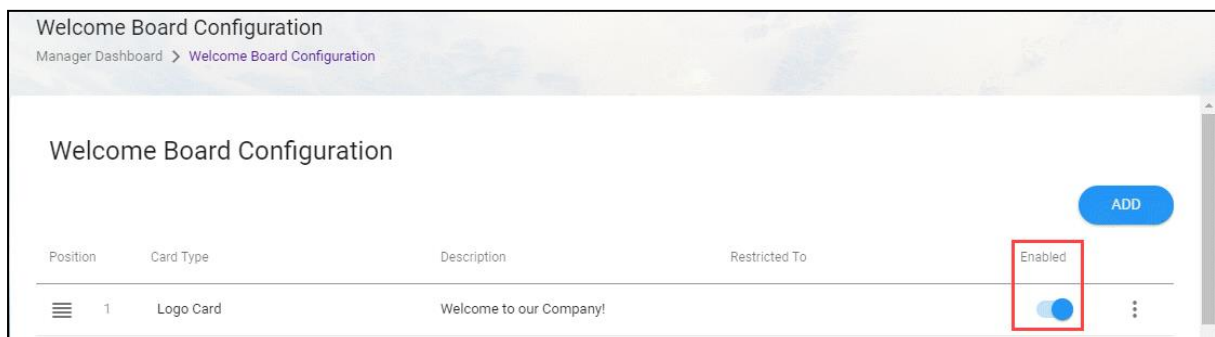

4. Select **Logo Card** from the *Card Type* drop-down list.
5. Enter the card *Description*.
6. Select the  button to upload the applicable Logo.
7. Click **OK**.

The *Welcome Board Configuration* screen displays.

The 'Welcome to our Company!' *Logo Card* is now present on the list of cards.

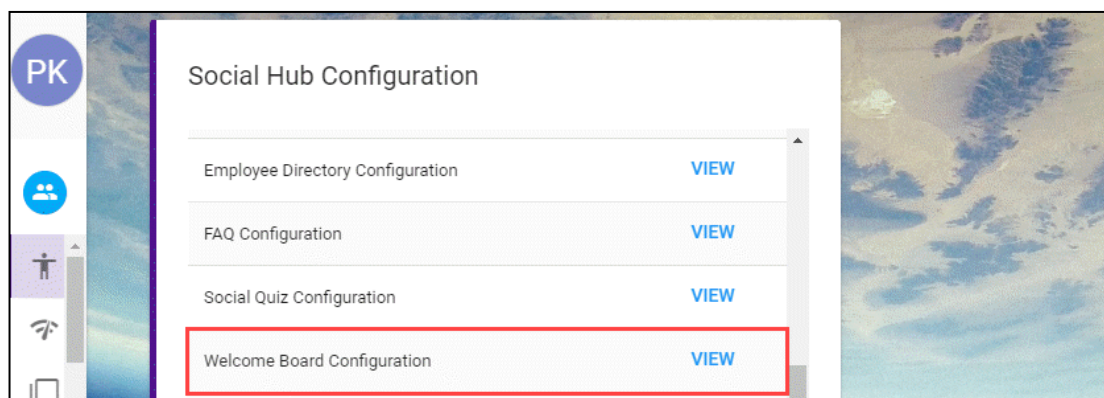

8. Tick the *Enabled* indicator to ensure the *Logo Card* is visible on the employee *Welcome Board*.

12.1.2. Adding a Team Card

To add a team card:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Welcome Board Configuration*.

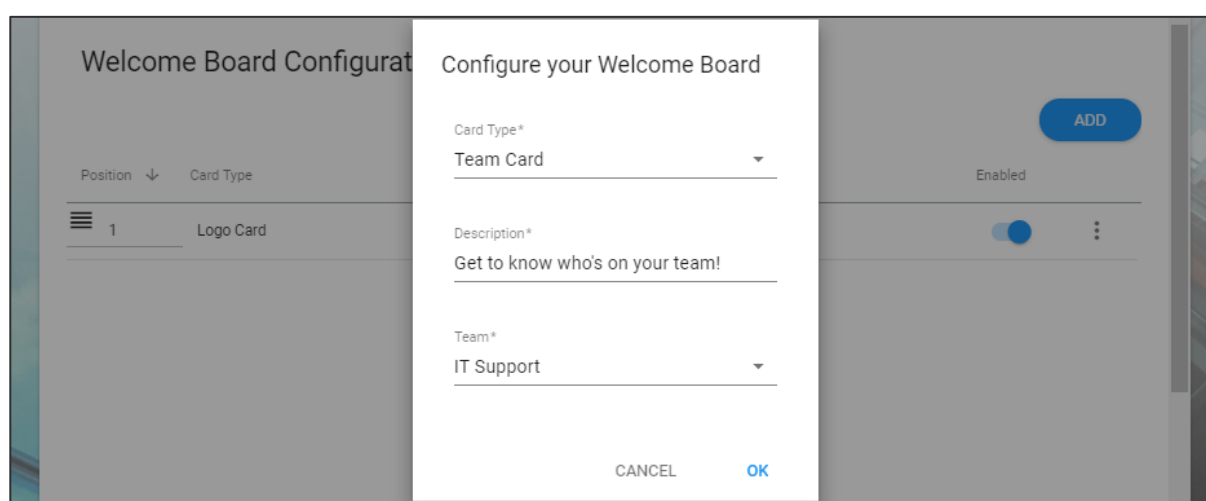

3. Select **Add**.

The *Configure your Welcome Board* pop-up displays.

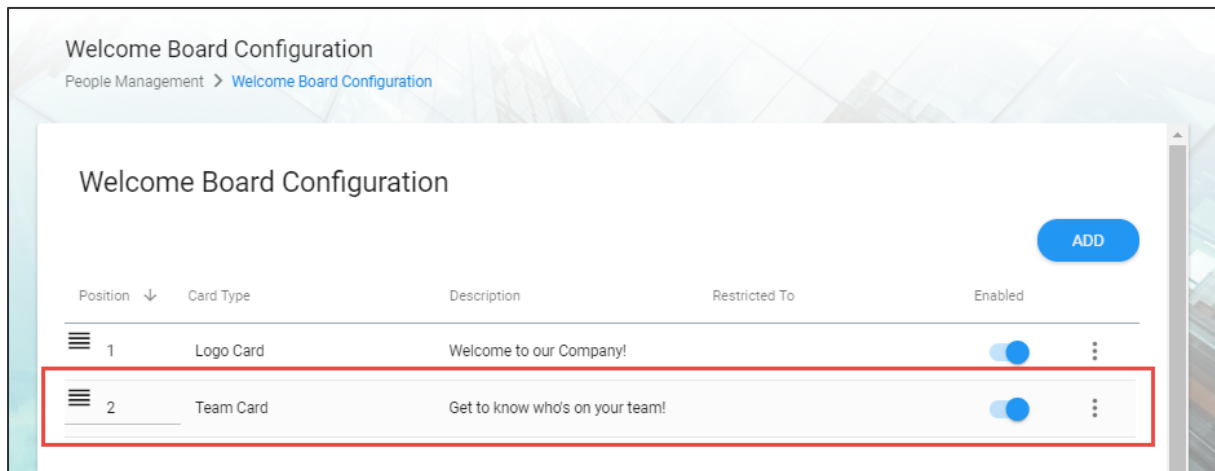

4. Select **Team Card** from the *Card Type* drop-down list.
5. Enter the card *Description*
6. Select the applicable team from the *Team* drop-down list.
Available teams in the drop-down list are taken from the *My Team Configuration*.
7. Select **OK**.

The *Welcome Board Configuration* screen displays.

The 'Get to know who's on your team!' *Team Card* is now present on the list of cards.

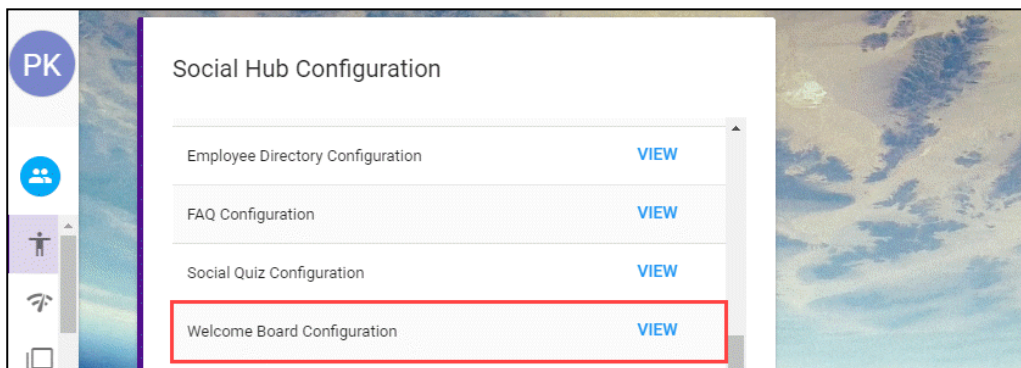

8. Tick the *Enabled* indicator to ensure the *Team Card* is visible on the employee *Welcome Board*.

12.1.3. Adding a Message Card

To add a team card:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Welcome Board Configuration*.

3. Click **Add**.

The *Configure your Welcome Board* pop-up displays.

4. Select **Message Card** from the *Card Type* drop-down list.
5. Enter the card *Description*.
6. Select a person from the *Welcome Message From* drop-down list.
7. Enter the *Greeting* text.

8. Enter the *Welcome Message* text.
9. Select **OK**.

Configure your Welcome Board

Card Type* **Message Card**

Description* **A message from our CEO**

Welcome Message From* **CEO**

Greeting* **Greetings!**

This field is required

Welcome Message*

We are thrilled to have you on board!
Have a look around our social on-boarding platform and get yourself familiar with our great company culture.

CANCEL **OK**

The *Welcome Board Configuration* screen displays.

The 'A message from our CEO' *Message Card* is now present on the list of cards.

10. Tick the *Enabled* indicator to ensure the *Message Card* is visible on the employee *Welcome Board*.

Welcome Board Configuration					
People Management > Welcome Board Configuration					
ADD					
Position	Card Type	Description	Restricted To	Enabled	
1	Logo Card	Welcome to our Company!		☒	⋮
2	Team Card	Get to know who's on your team!		☒	⋮
3	Message Card	A message from our CEO		☒	⋮

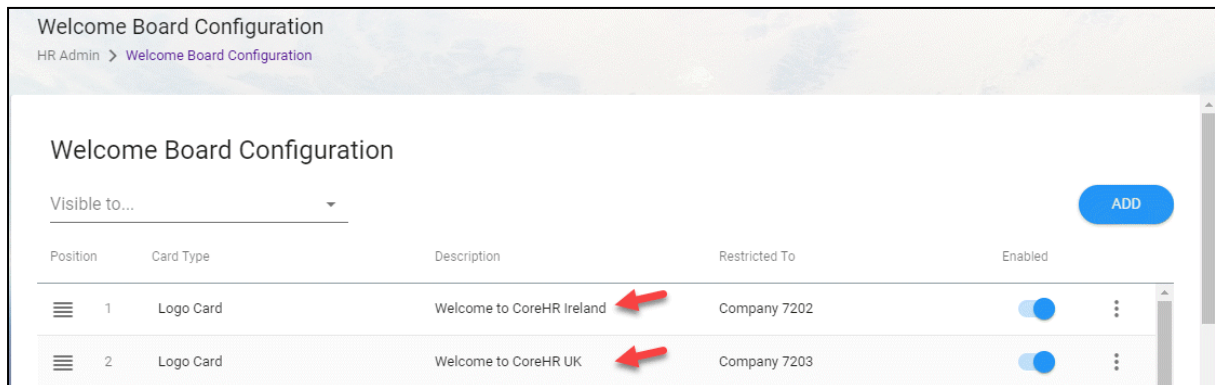

12.2. Restrict Cards

It is possible to restrict cards, so that they are only visible to specific groups of employees (criteria groups) on the *Welcome Board*.

In the following example, an organisation has two companies, different logos are used for each company.

- Company UK *Logo Card* for 'Company 7203'
- Company Ireland *Logo Card* for 'Company 7202'

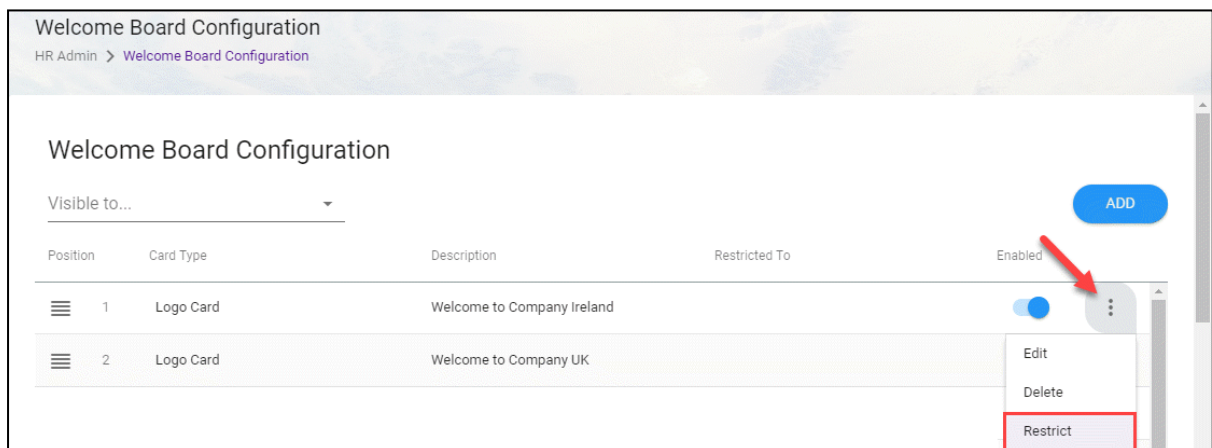

Therefore, it is necessary that the two *Logo Cards* used are restricted to be viewed by employees within their own company only. This is shown in the below screenshot.

To add a restriction to a card:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Welcome Board Configuration**.
3. Select the  button on the applicable card.
4. Select **Restrict**.

In this example, a restriction is being added to the 'Welcome to Company Ireland' – *Logo Card*.

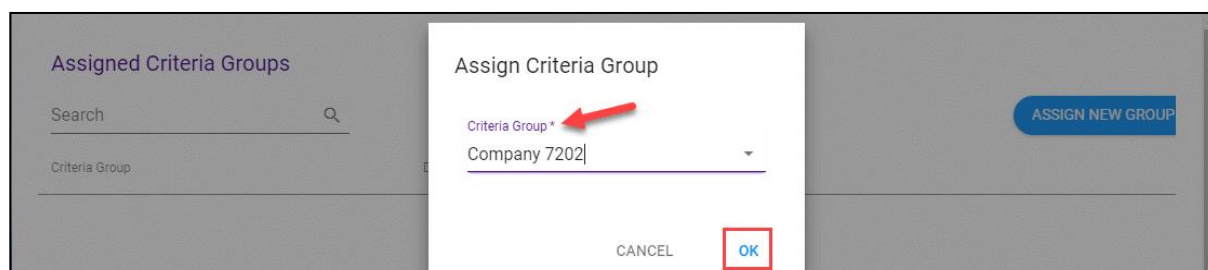

The *Assigned Criteria Groups* screen displays.

5. Select **Assign New Group**

The *Assign Criteria Group* pop-up displays.

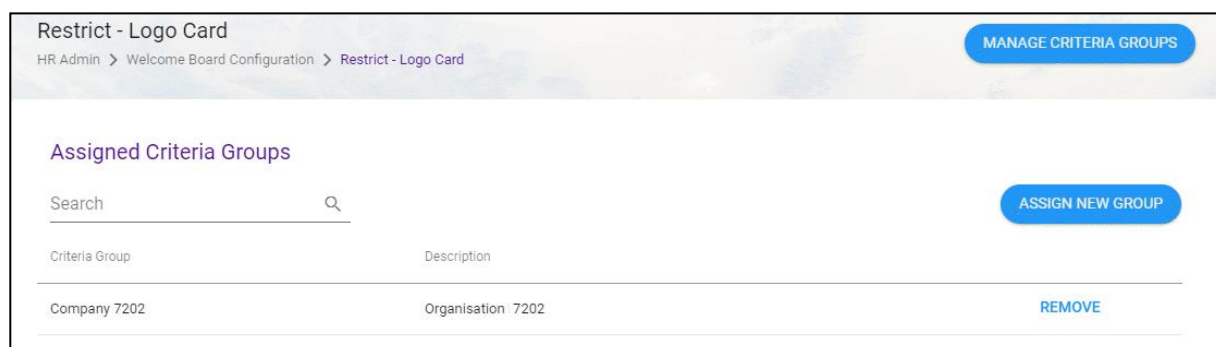

6. Select the applicable group from the *Criteria Group* drop-down list.
In this example, the Logo Card is being restricted to all employees in 'Company 7202'.
7. Select **OK**.

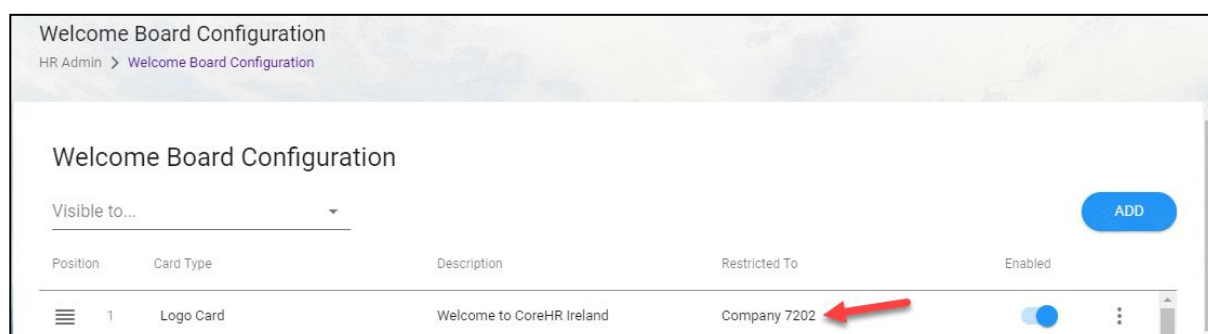

The *Assigned Criteria Groups* screen displays.

The criteria group has now been added to the 'Welcome to Company Ireland' – *Logo Card*. Only employees in 'Company 7202' can now view this card.

This process can be repeated multiple times, to add multiple criteria groups.

The 'Welcome to Company Ireland' – *Logo Card* also shows as restricted on the *Welcome Board Configuration* screen.

13. Staff Grouping

The *Staff Grouping* screen allows you to create and manage all *Criteria Groups* used within the *People Management* product. These area groups are listed below:

- Onboarding
- UDFs
- Salary Workflow Approvals
- Employee Requests
- Letters
- Global

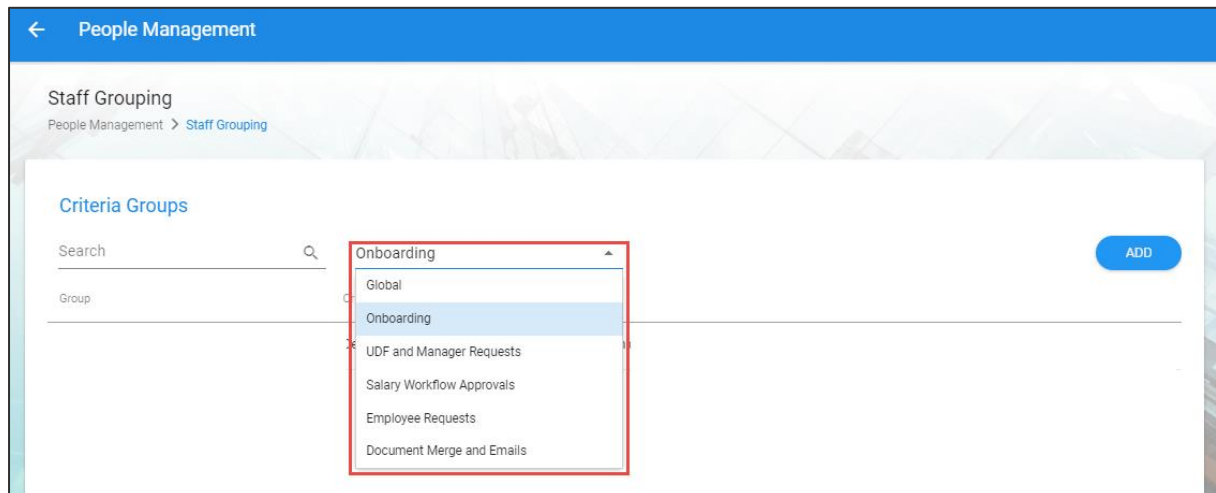

It is possible to create *Global - Criteria Groups*, that can be used across all the areas listed above, therefore, creating separate groups for each area is not needed.

Note:

Any *Criteria Groups* that have been created within the previous onboarding module (pre-v27) will exist within the *Social Onboarding* options.

The below screenshot shows the *Staff Grouping* screen and grouping areas available from this screen.

By creating *Criteria Groups* within *Employee onboarding*, this then allows you to restrict any applicable items to only be visible to specified *Criteria Groups*. Items that can be restricted are listed below:

- Checklist items
- Custom pages
- System pages
- Welcome board cards

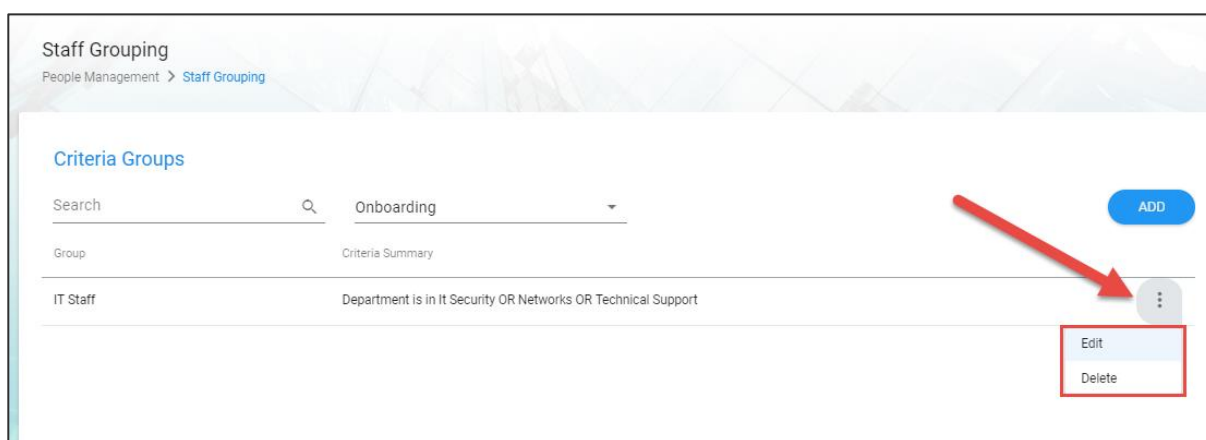

Note:

When restricting *Social Onboarding* content such as checklist items, pages, and welcome board cards to certain groups of employees, the *Criteria Groups* available to choose from in the applicable drop-down lists are drawn from a combined list of the following group areas:

- Onboarding
- Global

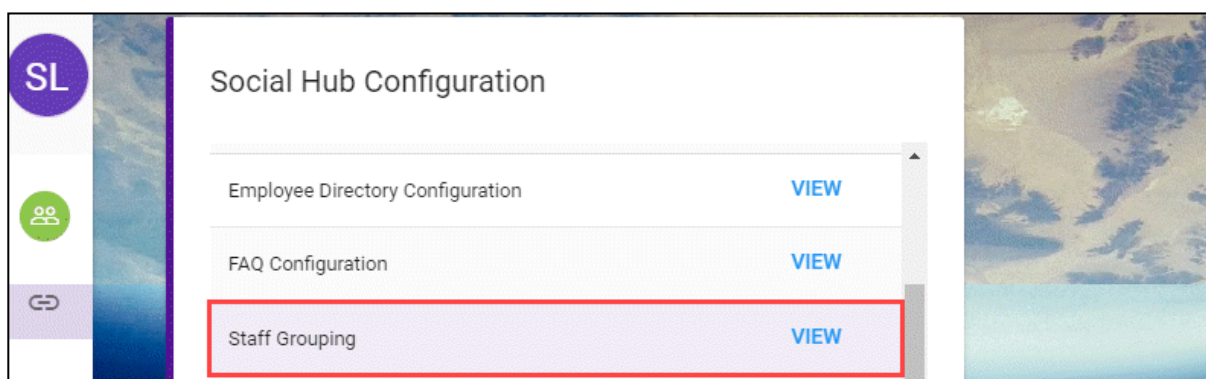

The *Staff Grouping* screen lists all *Criteria Groups* that have been set up on the system. The below screenshot shows that there is one *Criteria Group* added for the 'Onboarding' area. From this screen, it is possible to add new, edit, or delete existing *Criteria Groups*.

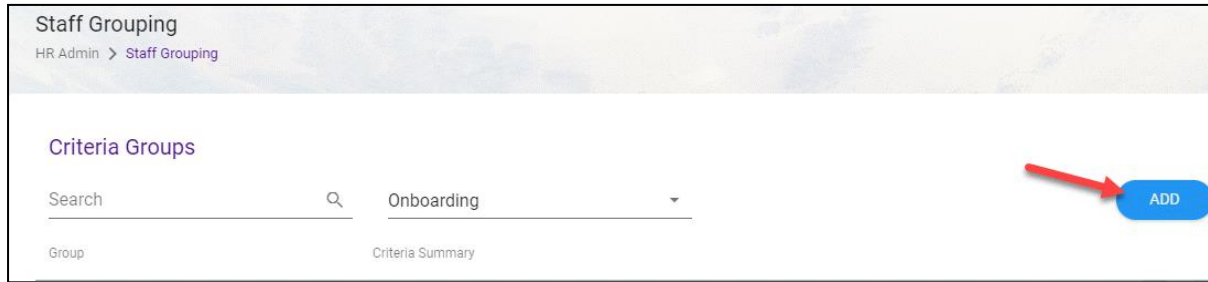

13.1. Creating Criteria Groups

To create a criteria group:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View** *Staff Grouping*.

3. Click **Add**.

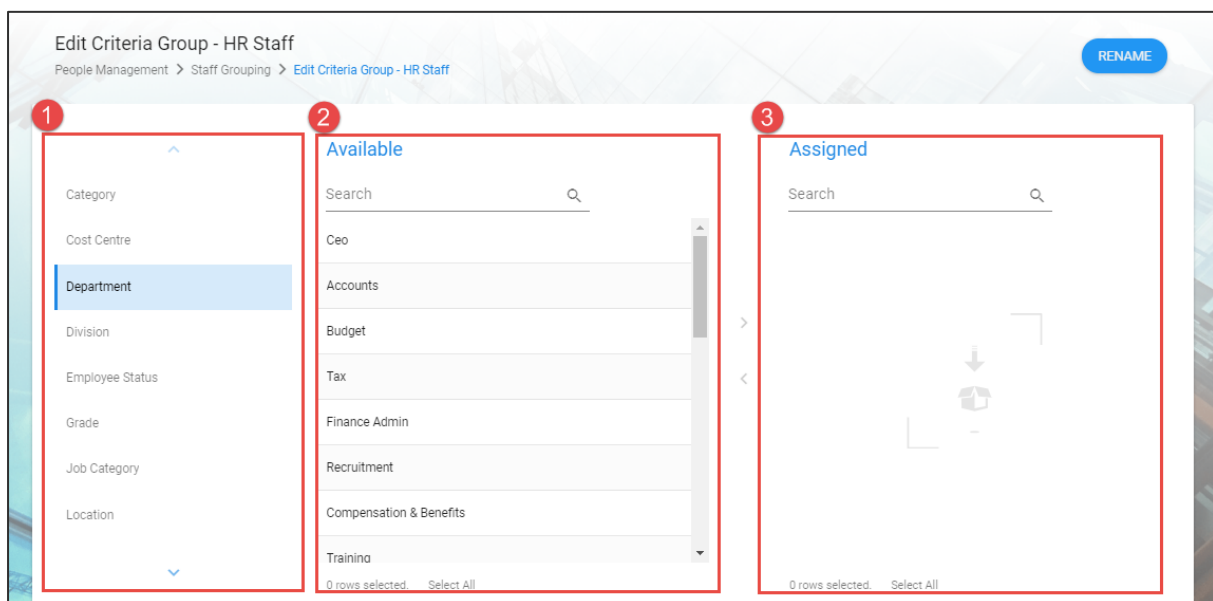

The *Edit Criteria Group* screen displays.

Screen Overview:

Criteria Groups are made up of employees who hold the same specified attributes on their contracts.

For example:

- Select the applicable contract attribute type in 'Section 1' of the screen below.
In this example, the 'Department' attribute is selected.
- 'Section 2' of the screen then populates with all available options for this attribute.
In this example, all 'Departments' within the organisation are listed.
- Next, select the applicable 'Departments' from the *Available* list and add them to the *Assigned* list (Section 3).
In this example, all employees who hold the assigned Department on their contract are then present on the *Criteria Group*.

4. Select the applicable **contract attribute** from the list.

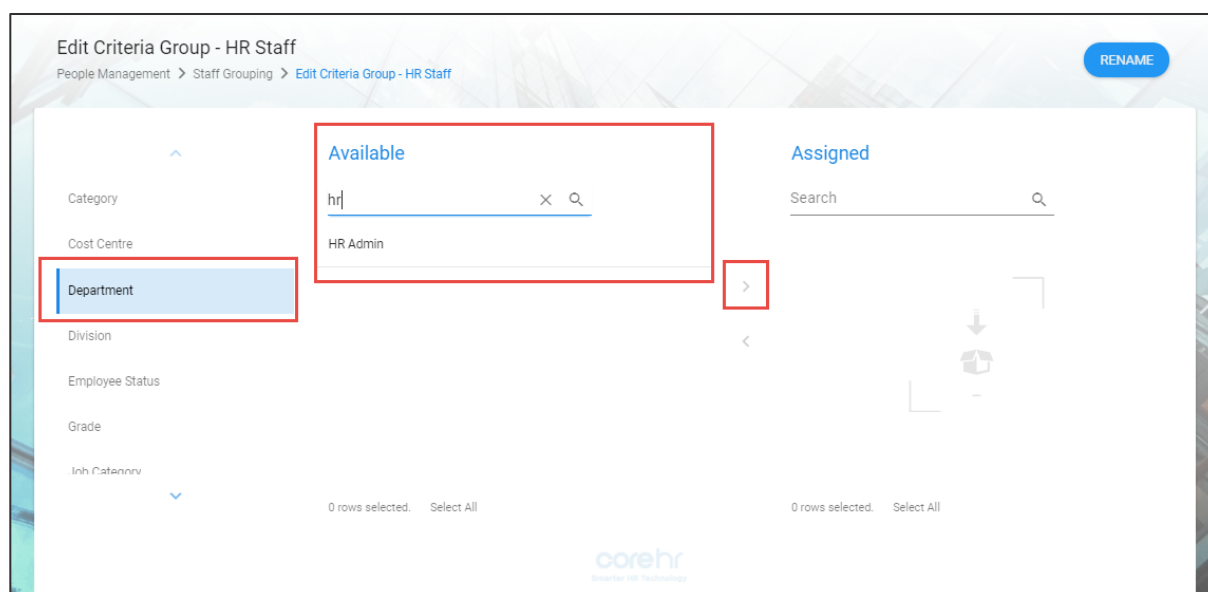

In this example, for the 'HR Staff' *Criteria Group*, all employees who have the following attributes are required to be part of this group.

- a. Work within a 'HR' department.
- b. Are 'Permanent' employees.

Therefore, the 'Department' attribute is selected.

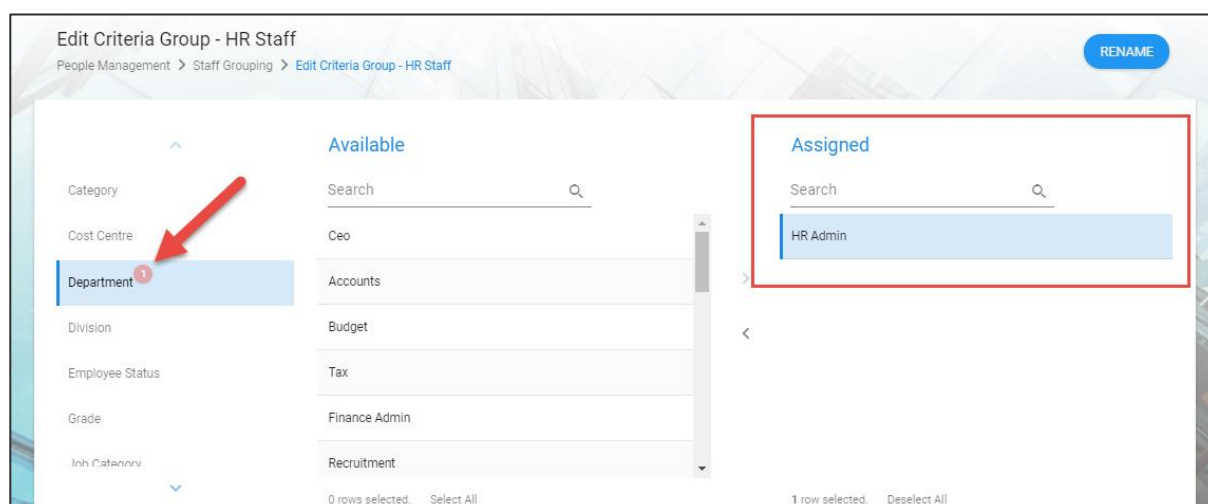

5. Click to highlight the applicable items within the *Available* list.

6. Select the  button to move the items into the *Assigned* list.

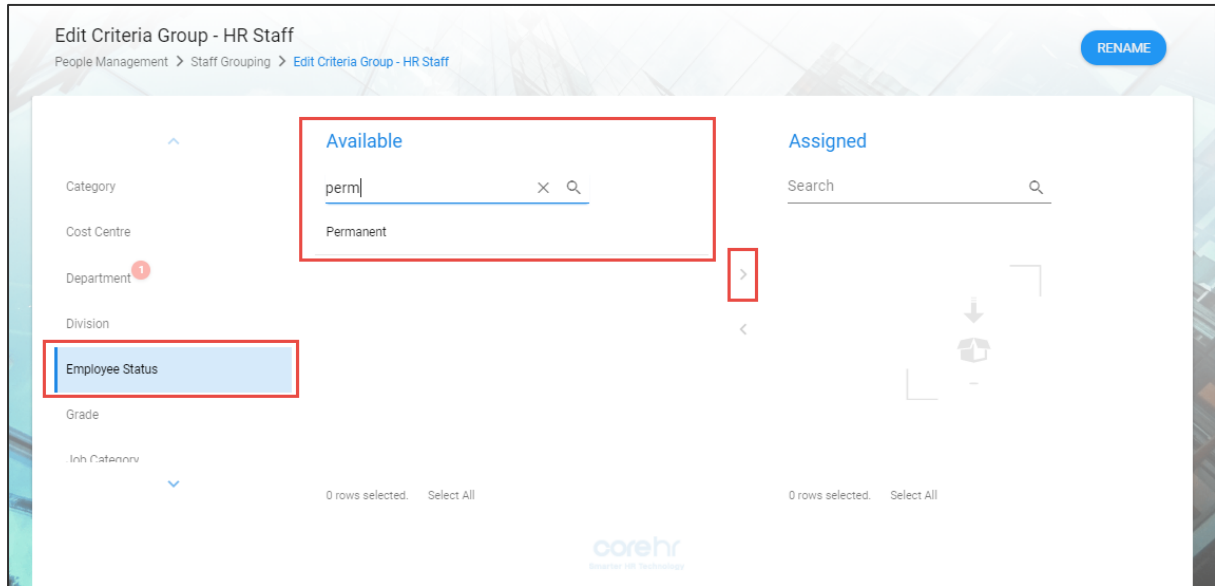

The required departments are now assigned to the *Criteria Group*.

The 'Department' attribute now has a tag attached to it. This indicates the number of departments that have been assigned to the *Criteria Group*.

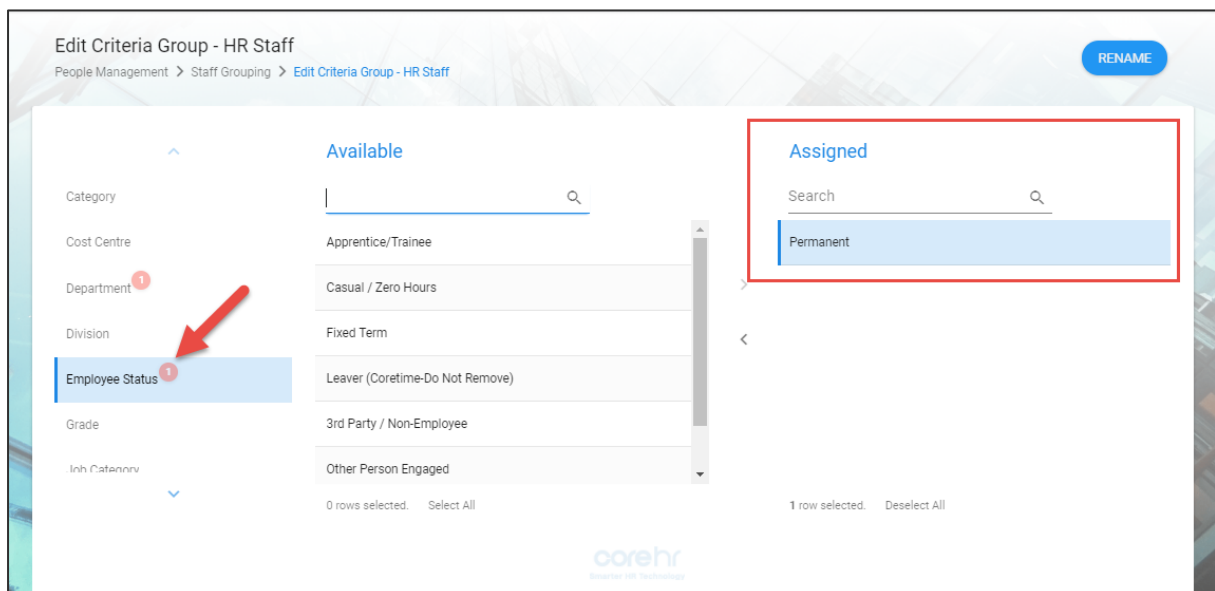

- Next, the 'Employment Status' attribute is selected.
- Click to highlight the applicable items within the *Available* list.
- Select the  button to move the items into the *Assigned* list.

The required employment status is now assigned to the *Criteria Group*.

The 'Employment Status' attribute now has a tag attached to it. This indicates the number of employment statuses that have been assigned to the *Criteria Group*.

This screen saves automatically.

By returning to the *Staff Group* screen, the Criteria Group is added to the system. This screen details a *Criteria Summary* of the group for quick reference.

This Criteria Group can now be used for:

- Restrictions on onboarding content.
- The *My Team Configuration* screen.

14. Notifications

These email notifications are sent to the *Email* contact type on the employee's record. These notifications are not shared on the *Notification Centre*.

14.1. Configure Summary Tab (Weekly Emails)

Weekly *Summary* emails are sent to employees on Sunday night, if:

- An employee has uncompleted items in their checklist.
- An employee is starting with the company and joining their social team in the next 14 days.

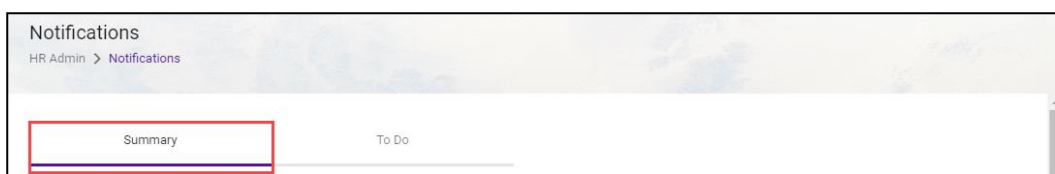

Requires	Detail
Scheduled Job	ONBOARDING_WEEKLY_EMAIL

To configure the weekly summary emails:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Notifications**.

3. Select the **Summary** tab.

4. Enter the *Greeting* text.
5. Switch **On** the *Incomplete Employee onboarding Items* indicator, if applicable.
This will add any incomplete employee onboarding items to the weekly summary email.
6. Enter the *Body* text.

14.2. Configure To Do Tab (Daily Emails)

Daily emails are sent to employees who have been assigned a new *Checklist Item* to complete.

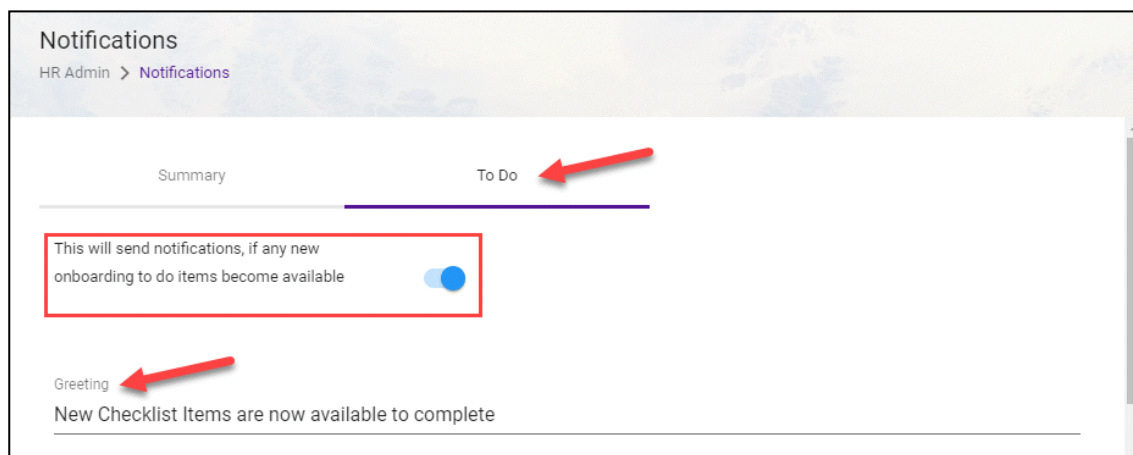

Requires	Detail
Scheduled Job	ONBOARDING_DAILY_EMAIL

To configure the daily summary emails:

1. Quick jump to the *Social Hub Configuration* widget.
2. Select **View Notifications**.

3. Select the **To Do** tab.
4. Switch **On** the *New Onboarding To Do* indicator, if applicable.
This will send notifications, if any new onboarding to do items become available.
5. Enter the *Greeting* text.

6. Scroll down, then enter the *Body* text.
7. Enter the *Sign Off* text.
8. Select **SAVE**.

15. Reporting in CoreInsight

It is possible to create reports via *CoreInsight* for *Employee onboarding*. The following *Employee onboarding* views listed have are located within the *Core Personnel* business area.

Note: These views do not replace existing historical onboarding views, which can still be used.

16. User Access to Employee onboarding

16.1. Default Security Menu Profiles

Access to *Employee onboarding* is controlled by *Security Menu Profiles*.

CoreHR provide 3 default pre-configured *Menu Profiles* that are applicable to the 3 general user types for Employee onboarding.

We recommend that you use these default menu profiles to manage user access to *Employee onboarding*.

User Type	Menu Profile	Description
Administrator	SOCIAL_ONBOARD_ADMIN	Has access to onboarding progress menu options for the <i>Command Centre > Onboarding Progress</i> screen Has access to all configuration screens i.e. <i>Employee onboarding Configuration</i> widget and Content Security Policy screen.
Manager	SOCIAL_ONBOARD_MGR	Has access to onboarding progress menu options for the <i>My Team > Employee onboarding</i> screen No access to configuration.
Employee	SOCIAL_ONBOARD_EMP	Access to the <i>Social Hub</i> dashboard only. No access to configuration or progress screens.
