2.2	5 th Jan 2021	Marie Mooney	Included note on HR Task Lists regarding completion of same and dependency to pull employee details across when commencing.

1. Introduction

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on the key concepts and terminology that will be used on People Management when managing employee contracts.

2. Overview

2.1. Posts & Contracts

A *Contract* on CoreHR may also be referred to as a *Post Appointment*.

- As reviewed in the *Managing Post Profiles* user guide, all available posts in the company are setup and maintained on CoreHR. These posts are used to form the blueprint of an employee contract and include key details such as the job title, the location in the organisation, pay scale, sanctioned headcount etc.
- Contracts are created directly from these posts and will inherit these key details. The hr administrator may then update the employee's contract with details specific to that employment e.g. start date, contract hours etc.

For every new contract activity for an employee on People Management (i.e. new hire, replacement contract, additional contract or rehire) the first step is to select a post that has been already set up on CoreHR. That post will then be used to form the basis of the new contract for the employee. However, the hr administrator will still have the ability to update and amend the details for each individual contract of employment, as required.

2.2. Access to Posts

Whenever a new contract is to be created on People Management, the first step required is to select a post. Wherever the *Post* drop down list (or *Post* and *Sequence* lists) is displayed, the list of posts displayed to the end user may vary. This is due to:

- The user's HR Users Access.
- The types of posts that have been setup on CoreHR.

HR Access

Users of the People Management Dashboard must be granted specific access in order to see posts. This access is linked directly to the Organisational Hierarchy that has been defined for the organisation. It is possible to grant users access to all posts so that they can complete the aforementioned activities for all areas of the business. In a more devolved HR team, there may be a requirement to restrict access

for users to specific groups of posts e.g. all posts in Division A. This is prescribed for each individual user and full details on this are available in the [CoreHR University User Data Access](#) user guide for this feature.

Post Types

As reviewed in the [CoreHR University Managing Post Profiles](#) user guide, the Post Profile records set up on CoreHR can be configured as:

- Auto-Authorised
- Auto-Commenced
- Non-Auto

When searching for posts, all *auto* posts will return, based on the user's HR Access.

However, if a post has been defined as *non-auto*, this will only be available to the user if a Post Appointment has been *Planned* and *Authorised*.

2.3. Calculating the Contract FTE

The FTE on a contract identifies whether the employee is working full-time or part time in that contract. This may be input directly by the hr administrator or CoreHR may calculate this automatically based on other contract fields.

The calculation of the FTE is based on the following fields:

For example:

- Standard Hours per Week = 37.5
- Mary is contracted work 37.5 Hours pw so $37.5 / 37.5 = 1$ FTE
- Jack is contracted to work 18.75 Hours pw so $18.75 / 37.5 = 0.5$ FTE The

FTE cannot be greater than 1 on an employee's contract.

3. New Hire Setup

3.1 Auto-Authorised Appointment

New Employee Wizard

1. On the *Command Centre* widget, click the **New Starter** button.

2. The *Search for a Post* screen opens. Use the selection criteria provided to search for the required Post Profile record.
 - The *Search Posts* function provides a quick search option using the Post Number or Post Title only.
 - The **Post Filter** button provides access to another pop-up screen with options to filter posts using the fields defined for the organisational hierarchy data.
 - If multiple structures exist, please select the required structure at the top of the page.
 - Click the **Apply** button to search.
3. Posts that meet the search criteria, will be listed on screen.
 - Only Post Profiles with an Appointment Status of *Auto Authorised* or *Auto Commenced* will appear here.
 - Post Appointments that have been *Authorised* will also display here.

Search for Post

People Management > Search for Post

POST FILTER

support analyst

Post	Post Title	Post Type	Department	Status	Post FTE
502232-0	Support Analyst	Permanent	IT Security	Auto Commenced	2
502240-0	Support Analyst	Permanent		Auto Authorised	10

0 rows selected. 1 - 2 of 2

corehr

NEXT

4. Select the post by selecting the required row and click on the **Next** button to continue.
5. The *Duplicate Employee Check* screen opens. This is a useful step in the new hire process to prompt you to first search the system to ensure that the employee you are about to set up on the system doesn't already exist – either as an active or a dormant record. This is not mandatory and it is possible to skip by selecting the **Create New Employee** button.
 - Use the *Search Name of Social Security* box to search for an employee using the following:
 - Forename
 - Surname
 - PPS Number (Republic of Ireland)/NI Number (United Kingdom)

Note: It is recommended to search based on PPS/NI Number if known as this is a true unique ID per employee and may identify scenarios where an employee exists on the system under another name e.g. an employee previously worked for the company under their maiden name and are rejoining under a married name.

- Any employees (active or dormant) that match the search criteria, will display on the screen.

Move to Portal - People Management Contracts Key Concepts

Duplicate Employee Check

People Management > Search for Post > Duplicate Employee Check

Employee No.	Name	Known As	Date of Birth	Social Security No.	Gender	Department	Action
000020	Claire Jackson		15-JUN-90	*****005D	Female	Compensation & ...	New Contract
000045	Claire Atkinson	Claire	11-SEP-83	*****188D	Female	Finance Admin	New Contract
000079	Claire Burton	Claire	13-FEB-89	*****567T	Female	Technical Support	New Contract
000060	Claire Smith	Claire	05-JUL-75	*****456D	Female	Training	New Contract
000061	Claire Smith	Claire	05-JUL-75	*****456D	Female	Training	New Contract

- If a duplicate employee is identified, select the row of the relevant employee and click **Next**. This will guide the user through the *New Contract* or *Rehire* steps required to link the employee to the contract. Please refer to the relevant user guides for details on these processes.
- If a duplicate employee is not identified, click the **Create New Starter** button. This will open the 4-step *Create New Employee* wizard.

Note: It is possible to control whether the above screens are displayed as part of the New Hire wizard, however it is recommended they are enabled:

To update the settings:

1. Quick jump to the *Site Manager* widget and **Open Admin Settings**.
2. Search for parameter = **cp_newstarter_adv_setup**
3. Click the **Edit** button and update the parameter to Y or N.
4. Click the **Save** button to save changes.

6. Complete Step 1: *Person Information*:

New Starter

People Management > Search for Post > Duplicate Employee Check > New Starter

1 Person Information

2 Organizational Structure

3 Contract Information

4 Salary Information

Person Details

Personnel Number Routine
Default Manual Personnel No.*

Title Forename* Surname*

Middle Name Known As Initials

Date Of Birth* Age Retirement Date

The Person Info step is used to capture some basic personal information for the new employee's HR record.

All mandatory fields are identified on the screen using a *-symbol.

Field	Description
Title	Select from a prescribed list of values
Forename	Free text field for up to 40 characters.
Surname	Free text field for up to 40 characters.
Middle Name	Free text field for up to 40 characters.
Known As	Free text field for up to 40 characters. Prepopulated with forename and can be overwritten
Initials	Automatically populated used Forename and Surname.
Gender	Select from a prescribed list of values.
Date of Birth	Select from a calendar or type in format dd/mm/yyyy
Age	Automatically calculated using the Date of Birth.
Retirement Date	Can be automatically populated based on a system defined retirement age OR can be manually entered in format dd/mm/yyyy
Nationality	Select from a prescribed list of values.
Email Address	Record the company email address for the employee. Validation will be performed to ensure that a valid email address is supplied.
Phone	Free text field for up to 32 characters.
Mobile	Free text field for up to 32 characters.

- To add the employee's address information, select a Country from the drop-down list and the screen will update to display an address layout that has been configured on CoreHR for that country.
- All mandatory fields are identified on the screen using a *-symbol.

 **Note** The address is mandatory and must be entered for all employees as part of the new starter setup. When adding / editing employee addresses, a lookup is now available. This is integrated with Google Map technology. For example, it is possible to enter an employee's post code, select an address match and autofill the address record on screen. This is an optional feature - users can continue to enter any address data and do not have to select an option from the autofill list.

7. Click the **Next** button to proceed to step 2.

8. Complete Step 2: *Organizational Structure*:

The screenshot shows the 'New Starter' form in the People Management portal. The breadcrumb trail at the top reads: 'People Management > Search for Post > Duplicate Employee Check > New Starter'. A 'POST SEARCH' button is in the top right corner. On the left, a vertical navigation bar shows four steps: 1. Person Information, 2. Organizational Structure (highlighted with a blue circle), 3. Contract Information, and 4. Salary Information. The main form area contains the following fields:

Company *	Abc Solutions
Division *	Shared Services
Management Unit *	Finance
Department *	FIN1 - Accounts
Cost Centre	Cost Centre*
Location	Location*
Work Group	Work Group*

At the bottom right, there are 'PREVIOUS' and 'NEXT' buttons. The 'corehr' logo is visible at the bottom center.

The *Organizational Structure* step prompts the user to record the details of where in the organisation the employee's new post will be based.

Details on this screen will be automatically populated based on the post selected at the start of this process. The Post will display in the drop-down list at the top of the screen.

Note It is possible to edit the post selected at this stage if required. The *Post* list will display all *Posts* (auto-authorised/auto-commenced/authorised *Post Appointments*) that the user has been granted access to see (based on their HR Access). The **Post Search** button will open the *Search for a Post* screen used earlier in the process.

- Only fields that have been predefined on the post will be displayed here i.e. in the above screenshot the Company, Division, Management Unit and Department are populated; the Cost Centre, Location and Work Group are not.
- All fields in the linked hierarchy are mandatory and must be populated.
- All other mandatory fields are identified on the screen using a *.

9. Click the **Next** button to proceed to step 3.

10. Complete Step 3: *Contract Information*:

New Starter
People Management > Search for Post > Duplicate Employee Check > New Starter

Simplifying HR Technology

PREVIOUS NEXT

The *Contract* step will require the hr administrator to input further particulars for the employee's contract.

- Some of these fields will be automatically populated based on Post selected e.g. Job Title, Post Type, Category, Sub Category. This is dependent on whether those fields have been populated on the Post.
- All other fields should be completed by the hr administrator as required. All mandatory fields are identified on the screen using a *.

Field	Description	Mandatory
Effective Date	- This the start date for the contract. For a new employee this will be their start date in the organisation and ultimately the first date from which they will be paid for this position. - Select date from a calendar or enter in format dd/mm/yyyy.	Yes
Target End Date	Select date from a calendar or enter in format dd/mm/yyyy.	No
Planned End Date	Select date from a calendar or enter in format dd/mm/yyyy.	No
Job Title	- This will be pre-populated with the Post Title, for the chosen Post. This may be updated to another Job Title if required. Updating the Job Title on the Contract will not update the overall Post Title. - Select from a predefined list of values.	Yes
Job Category	Select from a predefined list of values.	No
Post Type	This will be pre-populated with the Post Type, for the chosen Post. This may be updated to another Post Type if required.	Yes

Field	Description	Mandatory
	Updating the Post Type on the Contract will not update the overall Post Title. Select from a predefined list of values.	
Project	Select from a predefined list of values.	No
Job Description	- Use the Add Job Description button to record a more contract specific description of the role. This may be used in scenarios where the <i>Post/Job Title</i> is too generic for the employee's contract. - Up to 500 alphanumeric characters are available.	No
Comments	- Use the Add Comments button to record additional comments for the contract. - Up to 2000 alphanumeric characters are available.	No
Employee Status	Select from a predefined list of values.	Yes
Sub Status	Select from a predefined list of values.	No
Category	- May be prepopulated from the Post Profile, if this has been defined. - Select from a predefined list of values.	No
Sub Category	- May be prepopulated from the Post Profile, if this has been defined. - Select from a predefined list of values.	No
Contracted Hours	- Used to record the standard working hours per week for the contract. If entered, this will be used with the Standard Hours, to calculate the contract FTE value. - Enter in format 00.00	No
Contracted Weeks	- Used to record the contracted working weeks year for the contract. If entered, this will be used with the Standard Weeks, to calculate the contract FTE value. - Enter in format 00.00	No
FTE	- This may be automatically calculated based on the Contracted Hours, Contracted Weeks, Standard Hours & Standard Weeks. - This may also be directly input / overwritten for the contract. - Enter in format 0.000000	Yes
Standard Hours	- This is a selection of the standard weekly working hours operated in the organisation e.g. 37.5 hours, 40 hours etc. - Select from a predefined list of values.	No

Field	Description	Mandatory
Standard Weeks	- This is automatically populated based on a system configured standard weeks per year. - This may also be directly input / overwritten for the contract.	No
Absence FTE	- This FTE may be used for WFM purposes. Please refer to WFM training for further details if required. - Enter in format 00.00	No
Action	Select from a predefined list of values.	No
Reason	- This is the reason for the contract creation / amendment e.g. 'Hire'. - Select from a predefined list of values.	Yes
Replacing	- This list will be populated with the names of other employees that previously worked in OR are currently working in contracts created for this Post. This may be used to capture the relationship of contracts / employees where a new contract is created specifically to replace an existing one e.g. the contract was created because another employee left that post or was promoted. - If this is a new Post, no names will be available. - Select from a predefined list of values.	No
Pensionable	- This is an indicator to reflect if the employment on this contract is pensionable and should impact on the employee's pensionable service calculations. - This is only relevant if using the 'Pension by Appointment' solution.	No
Acting Up	This is an indicator used to reflect if the employee is 'acting up' into this contract.	No
Secondment	This is an indicator used to reflect if the employee is on secondment into this contract.	No

Note The table above indicates the fields that are mandatory on the CoreHR system to proceed with the contract creation.

11. Click the **Next** button to proceed to step 4.

12. Complete Step 4: *Salary Information*:

New Starter
 People Management > Search for Post > Duplicate Employee Check > **New Starter**

1 Person Information
 2 Organizational Structure
 3 Contract Information
 4 **Salary Information**

Starter Declaration * NI Number Paygroup employee will be paid in *
 1 - Monthly Payroll (UK)

Employee to be paid based on * Scale * Point on Scale
 Personal Grade 5 9999

Multiplier *
 1

This to be paid * Amount to be paid Apply next increment on
 Annual 50000

corehr
 PREVIOUS SAVE

The *Salary* step will prompt the user to provide all the details relevant to the employee's regular salary arrangements, specific to this contract.

All mandatory fields are identified on the screen using a *.

Field	Description	Mandatory
Starter Declaration	Select from a predefined list. Applicable to UK based employees for RTI purposes.	No
PPS/NI/Social Security Number	Enter the employee's PPS Number / NI / Social Security Number. There is validation on this field to ensure that the PPS Number / NI Number entered is a valid number and in the correct format for the jurisdiction. There is an advanced feature that may be enabled to allow for this field to capture other social security type numbers. Please refer to the corresponding configuration guide for further details.	No

Field	Description	Mandatory
Paygroup employee will be paid in	Select from predefined list of values	Yes
Employee to be paid based on	- Select from a predefined list of values. Scale Point: If the salary is set using a standard Scale & Point. Personal: If the salary is directly set on the contract i.e. is not driven from standard company pay scales.	Yes
Scale	- This will be pre-populated with the Pay Scale that has been defined on the Post Profile. - This may be updated if required to a different scale. - Select from a predefined list of values.	Yes
Point on Scale	- This list will be populated based on the selection made for <i>Scale</i> i.e. if <i>Grade 1</i> is selected for <i>Scale</i>, then only the points that have been configured for Grade 1 will be available. - If a <i>Person</i> rate of pay was selected, this will default to 9999.	Yes
Multiplier	- This will be populated with the value set for FTE on the <i>Contract</i> step i.e. if FTE is 0.5, Multiplier will be set to 0.5 to ensure the employee's salary is pro-rated based on their working hours. - This may be overwritten to differ from the FTE if required. - Enter in format 0.000000	Yes
This to be paid	This is the rate at which the value in the <i>Amount</i> field will be paid. This is defaulted to <i>Annual</i> but may be updated to <i>Hourly</i> , <i>Daily</i> or <i>Weekly</i> if required.	Yes
Apply next increment on	- This is the date that the employee will be due to automatically increment to the next point on the Pay Scale, if relevant (subject to the increment rules configured on CoreHR). - Select date from a calendar or enter in format dd/mm/yyyy.	No
Amount	This is the amount that the employee will be paid, relative to the <i>rate of pay</i> selected i.e. their annual salary, their hourly rate of pay etc.	Yes

Move to Portal - People Management Contracts Key Concepts

- Once all of the mandatory salary details have been recorded, click on the **Save** button to complete the wizard.

At this stage, the employee is now linked to the new contract. The next step will be:

- HR Task List may appear if configured. (**Note:** Once the employee is commenced and the task list is fully completed then the detail within the task lists will cascade down to the employee record for example Terms & Conditions if configured.)

OR

- The employee record will appear.

Commence Appointment

When using an *Auto Authorised* Post Profile to create the contract, the contract will initially be created in an *appointed* status. This means that:

- the employee exists on the system and will return as *active* if using the employee search on the People Management dashboard.
- the contract exists for the employee and is available to view on their employee record with a status of *Pending*.

COMMENCE REPLACE CONTRACT CHANGE CONTRACT HOURS

However, until the contract is commenced for the employee, the employee and their contract will not be available to the payroll team to process. The act of *commencing* the appointed contract on a specified *Commenced Date* will confirm that the employee has started in organisation and should be paid the contracted salary amount from that date.

Follow these steps to commence the contract:

Move to Portal - People Management Contracts Key Concepts

1. Go to the *Contracts* screen on the employee record.
2. For a new hire, the employee record should default to display the only contract for the employee. However, if in doubt, select the drop-down option to confirm that the correct contract has been selected. The contract will be flagged as *Pending*.
3. Click the **Commence** option.

The screenshot shows the 'Commence Contract' dialog box overlaid on the employee record for Ann Grant (000063). The dialog box has a title bar 'Commence Contract' and a text input field labeled 'Commencement Date*' with a calendar icon. Below the input field are 'CANCEL' and 'OK' buttons. The background interface shows the 'Contracts' tab selected in the left sidebar, and the 'Summary' section of the contract details. The contract details include Appointment ID, Start Date (25-Feb-2019), End Date, Target End Date, Post No (502200), Post Sequence (6), Re... (Pr...), De... (Se...), Hours, and FTE (1). At the bottom of the background interface are buttons for 'COMMENCE', 'REPLACE CONTRACT', and 'CHANGE CONTRACT HOURS'.

4. Enter the *Date Commenced*.
This must be greater than or equal to the effective date provided in the *Create New Employee* wizard.
5. Click **Save**.

Note:

The *Date Commenced* cannot be earlier than *Effective Date* that was entered when creating the contract. This must be either equal to or later than that date. This date will be the date that the employee will be paid from for this contract.

3.2 Auto-Commenced Appointment

To create a new employee from an Auto-Commenced Post Profile, please follow the guidance provided in 3.1 Auto Authorised Appointment. The process will be almost identical. The key difference here is that, on completion of the 4-step *Create New Employee* wizard, the contract will be created in a *Commenced* status i.e. there is no further requirement to *Commence the Appointment*.

This means:

- The employee exists on the system and will return as *active* if using the employee search on the People Management Dashboard.
- The contract exists for the employee and is available to view their HR *Employee Dashboard/Contract Timeline* with a status of *Commenced*.
- The *Effective Date* recorded on step 2 of the *Create New Employee* wizard will be their *Date Commenced*.
- The employee and the contract will be immediately available to payroll administration to complete onboarding.

3.3 Non-Auto Post Profiles

Creating a new starter using a *non-auto* Post Profile means that the employee's *Contract/Post Appointment* will be created from a standard Post Profile that has not been flagged for *Auto-Authorisation* or *Auto-Commencement*. When using these Post Profiles, the Post will not be automatically available to the hr administrator to select via the *People Management* dashboard > *Add Person* option.

Firstly, the HR administrator needs to go the *People Management* tab to complete the following two steps:

- Plan Appointment
- Authorise Appointment

The output of this activity will be a *planned & authorised* contract record with its' own unique *Contract ID/Appointment ID*. That record will then be available to the hr administrator to select via the *Add Person* option.

Plan Appointment

To plan a new Post Appointment/Contract

1. Go to the *Data Centre > People Management* tab.
2. Search for "Post Profile Maintenance" and select the corresponding option.

Move to Portal - People Management Contracts Key Concepts

3. Search for the *Post Profile* that the *Post Appointment/Contract* will be planned against.

4. Update the *Post Appointment/Contract* fields as required

Field	Description	Mandatory
Post Number/Seq.	Post Number is prepopulated from the Post Profile. The Sequence value will be automatically calculated for this new record on save.	Yes
Post Profile Type	This is automatically populated from the Post Profile	Yes
Status	This is automatically populated based on the status of the Post Appointment creation. This will display as <i>Planned</i> at this stage.	Yes
Date	This date will be automatically populated on save with the value provided for <i>Planned Start Date</i> .	Yes
Pension %	This is a memo only field.	No
FTE	This will default to 1. This may be overwritten if required. Enter in format 0.000000	Yes
FTE %	This is read only and will display the FTE value in % format.	No
Project	Select from a predefined list of values.	No
Job Text	May be used to record a more contract specific description of the role. This may be used in scenarios where the <i>Post/Job Title</i> is too generic for the employee's contract. Up to 500 alphanumeric characters are available	No
Hierarchy Fields	The display of the Org Structure/Hierarchy fields on this screen is dependent on the configuration per organisation.	Yes
Planned Start Date	This is the date that the contract is planned to be started from. This may ultimately become the contract start date. Enter in format DD/MM/YYYY or select from calendar.	Yes
Planned End Date	Enter in format DD/MM/YYYY or select from calendar.	No
Planned Post Type	This is automatically populated with the Post Profile Type but may be overwritten if required. Select from a predefined list of values.	Yes
Planned Pay Details Not Required	This indicator may be used to reflect a contract that will have no salary details associated with it. If enabled, the pay details on screen will be greyed out.	No
Planned Pers Rate Type	This will default to <i>Scale Point</i> but may be updated to <i>Personal</i> if required.	Yes
Planned Pay Scale	This will default to the Pay Scale provided on the Post Profile but may be changed if required. Select from a predefined list of values.	Yes

Field	Description	Mandatory
Planned Point	If <i>Scale Point</i> , select from a list of the <i>points</i> for the chosen Pay Scale.	Yes
	If <i>Personal</i> , this will be defaulted to '9999'.	
Planned Salary	If <i>Pay Scale</i> , this will be automatically populated with the amount for the selected <i>Pay Scale Point</i> .	Yes
	If <i>Personal</i> , enter the amount to be paid. This should correspond to the rate type chosen i.e. if <i>Annual</i> enter the annual salary.	
Rate	This rate associated with the to the employee e.g. Annual, Weekly, Monthly or Hourly.	Yes
	Select from a predefined list of values.	
Planned Multiplier	This is used to indicate if the employee will receive a pro-rated salary and is typically linked to the contract FTE e.g. if they will be working 0.5 FTE then they should receive 0.5 of the salary amount.	Yes
	This list will be populated with the names of other employees that previously worked in OR are currently working in contracts created for this Post. This may be used to capture the relationship of contracts / employees where a new contract is created specifically to replace an existing one e.g. the contract was created because another employee left that post or was promoted.	
Planned Replaces Employee	- If this is a new Post, no names will be available. - Select from a predefined list of values.	No
Reason for Planning Post	This is a free text field that may be used to capture additional comments re the new position.	No

- Once all details have been provided, click on the **Save** button at the top of the page to save the new Post Appointment / Contract.

Once saved, the following changes will appear on screen:

- A new *Sequence* will be generated for the Post Appointment. This together with the Post Number will be used to generate the *Appointment ID* for this new record.
- The *Selection* list of items will expand to include a number of new options for the Post Appointment.

Post Appointment

Post Number: 502209 Seq: 8 Post Title: REC RECRUITMENT CONSUL

Post Profile Type: P PERMANENT Status: PLANNED

Date: 07-Jan-2018 Pension %: FTE: 1.00 FTE%: 100

Company:

Selection:

- 1 - Planned Appointment
- 2 - Actual Appointment
- 3 - Authorise Appointment
- 4 - End Appointment
- 5 - User Data
- 6 - Comments
- 7 - Status Detail
- 8 - Cost Allocation

The Post Appointment now exists on CoreHR in a *Planned* status. At this stage, the Post Appointment will not be available to the hr administrator in CorePortal. This record must first be *authorised* in order to become available on CorePortal.

Authorise Appointment

The Post Appointment may be *Authorised* immediately once planned. However, it is also possible to authorise at a later stage if required. The steps required to complete this both immediately OR later are detailed below.

Option 1: Authorise Immediately Once Planned

1. On the *Post Appointment Maintenance* screen, select the option **3 – Authorise Appointment** from the *Selection* list.

Post Appointment

Post Number: 502209 Seq: 8 Post Title: REC RECRUITMENT CONSUL

Post Profile Type: Status: AUTHORISED

Date: Pension %: FTE: 1.00 FTE%: 100

Company:

Selection:

- Choose
- 1 - Planned Appointment
- 2 - Actual Appointment
- 3 - Authorise Appointment
- 4 - End Appointment
- 5 - User Data
- 6 - Comments
- 7 - Status Detail
- 8 - Cost Allocation

2. On the *Authorise Appointment* screen, enter the date from which the appointment will be authorised. This date cannot be earlier than the Planned Start Date.
3. Click **OK**.
4. Click on the **Save** button at the end of the screen to save the update.
5. The *Status* field should now show a value of "Authorised".

Option 2: Authorising at a Later Stage

This option may be required if the user has exited the *Post Appointment Maintenance* screen without first authorising the record. It is not possible to jump back into that screen from the Post Profile Maintenance screen. Instead, follow the steps outlined below:

1. Go to *Data Centre > People Management*.
2. Search for "Post Appointment Maintenance" and click on the corresponding option.

The *Post Appointment Maintenance* screen opens

3. Use the selection criteria provided to search for the planned Post Appointment.
To improve the search process, ensure that *Appointment Status* is "Planned".

4. Double click on the Post Appointment record to access the Post Appointment.
5. From here, complete all of the steps outlined in *Option 1: Authorise Immediately Once Planned*.

Once the Post Appointment has been planned *and* authorised, it will be available on CorePortal People Management dashboard, to select via the *Create New Employee* wizard.

New Employee Wizard

To add a new employee to the planned & authorised Post Appointment/Contract:

1. Quick jump to the *Command Centre* in *People Management*.
2. Click the **Add Person** button.
3. The *Search for a Post* screen will appear. Use the selection criteria provided to search for the required Post Appointment record.
 - The *Search Posts* search box provides a quick search option using the Post Number or Post Title only.
 - The **Post Filter** button provides access to another pop-up screen with options to filter posts using the fields defined for the organisational hierarchy data.
 - If multiple structures exist, please select the required structure at the top of the page
 - Click the **Apply** button to search
 - The Post Appointment will return on screen. In order to ensure that the correct Post Appointment is selected, take note of the following elements:
 - Appointment Status will be “Authorised” (not *Auto Authorised*)
 - *Post No/Sequence* will reflect the *Post Number/Seq* that was visible on the back office Post Appointment Maintenance screen

Post	Post Title	Post Type	Department	Status	Post FTE
502209-9	Recruitment Consultant	Permanent	Recruitment	Authorised	1

1 row selected. 1 - 1 of 1

4. Select the post by clicking in the relevant row and click on the **Next** button to continue.
The *Duplicate Employee Check* screen opens. This is a useful step in the new hire process to prompt the user to first search the system to ensure that the employee they are about to set up on the system doesn't already exist – either as an active or a dormant record. This is not mandatory and it is possible to skip by selecting the **Create New Employee** button.

5. Use the *Search Employee* box to search for an employee using Forename, Surname, PPS Number (Republic of Ireland), NI Number (United Kingdom).

Note It is recommended to search based on PPS/NI Number if known as this is a true unique ID per employee and may identify scenarios where an employee exists on the system under another name e.g. an employee previously worked for the company under their maiden name and are re-joining under a married name.

Any employees (active or dormant) that match the search criteria, will display on the screen.

Duplicate Employee Check

People Management > Search for Post > Duplicate Employee Check

NEXT

The Person Info step is used to capture some basic personal information for the new employee's HR record. All mandatory fields are identified on the screen using a *-symbol.

Please see [Step 1: Person Info](#) for a full description of all available fields on this screen.

Click the **Next** button to proceed to step 2.

7. Complete Step 2: *Organizational Structure*

The *Organizational Structure* step prompts the user to record the details of where in the organisation the employee's new post will be based.

All available fields on this screen will be automatically populated based on the details provided when planning the Post Appointment, at the start of this process. The Post Number & Sequence will display at the top of the screen.

Note It is possible to edit the post selected at this stage if required. The *Post* list will display all Posts (auto-authorised/auto-commenced/authorised Post Appointments) that the user has been granted access to see (based on their HR Access). The **Post Search** button will open the *Search for a Post* screen used earlier in the process.

- It is possible to update the following fields for the Post Appointment/Contract:
 - Cost Centre
 - Location
 - Workgroup
 - Other Org Structure fields may not be changed.
8. Click the **Next** button to proceed to step 3.
9. Complete Step 3: *Contract Information*
- The *Contract* step will require the hr administrator to input further particulars for the employee's contract.
- Many of these fields will be automatically populated based on the details provided for the planned Post Appointment selected e.g.
 - Effective Date (i.e. Planned Start Date), Planned End Date, Job Title, Post Type, Category, Sub Category.
 - All other fields should be completed by the hr administrator as required. All mandatory fields are identified on the screen using a *-symbol.
10. Click the **Next** button to proceed to step 4.
11. Complete Step 4: *Salary Information*
- The *Salary* step will prompt the user to provide all the details relevant to the employee's regular salary arrangements, specific to this contract.
- Many of these fields will be automatically populated based on the planned pay details provided for the planned Post Appointment e.g.
 - Employee to be paid based on
 - Scale
 - Point
 - Amount
 - All mandatory fields are identified on the screen using a *-symbol.
12. Once all of the mandatory salary details have been recorded, click on the **Save** button to complete the wizard.

At this stage, the employee is now linked to the new contract. The next step will be:

- HR Task List may appear if configured. (**Note:** Once the employee is commenced and the task list is fully completed then the detail within the task lists will cascade down to the employee record for example Terms & Conditions if configured.)

OR

- The employee will appear.

Commence Appointment

When using an *Authorised* Post Appointment to create the contract, the contract will initially be created in an *appointed* status. This means that:

- the employee exists on the system and will return as *active* if using the employee search on the People Management dashboard
- the contract exists for the employee and is available to view on their Employee Dashboard with a status of *Appointed*.

However, until the contract is commenced for the employee, the employee and their contract will not be available to the payroll team to process. The act of *commencing* the appointed for a specified *Commenced Date* will confirm that the employee has started in organisation and should be paid the contracted salary amount from that date.

Please refer to [3.1.2 Commence Appointment](#) for full details on the options available to commence the employee's Post Appointment/Contract.

4. Copying a New Starter

4.1 Copying a New Starter

Within an Employee Record, an option is available within the **Actions** button called *New Starter Copy*. Using this feature loads the standard new starter wizard which requires you to complete as per [3.1.1 New Employee Wizard](#).

The following table outlines the items that are copied over and the ones that are not.

Item	Copied	Description
Personal Information	No	Must be entered in from scratch for the new starter.
Organisational Structure	Yes	Can be updated to reflect employees correct information before contract is commenced.
Contract Details	Yes	- Defaults in the details from the Post Profile (as per existing new starter process) - The contract details are not copied, and the user must complete the remaining fields.
Roster Team Area	Yes	The person's team area is copied based on the contract start date entered and does not assign future team area assignments.

Note: The Copy New Starter feature is available on both the People Management Dashboard and also within the Devolved HR options on the My Team widget on the Manager Dashboard.

4.2 Non-Auto Post Restriction

If the current employee is within a non-auto authorised or auto commenced post, a new sequence of the post profile needs to be authorised prior to the copy process being carried out. A message is displayed when trying to copy a new starter from employee who has a planned post with no available sequences.

The screenshot shows the 'Employee Search' page for Alice Jones (000013). The page displays her profile, including her role as 'Hr Administrator', start date '01-Jan-2011', and payroll status 'Open for Processing'. A red arrow points to a message box in the top right corner that reads: 'Unable to copy authorised post without planned instance(or sequence) via Post Management'. The message box has a 'DISMISS' button. Below the message, the 'Contracts' section is visible, showing a table of appointments. The 'Amendments' section is also visible, showing a table of contract changes.

REPLACE CONTRACT CHANGE CONTRACT HOURS

5. Overview of Start Date Corrections

5.1 Overview of Start Date Corrections

What Contracts can be Updated?

This functionality is used to change the start date that has been set up for an employee's contract. This is applicable in the following scenarios:

1. New Hire
2. Rehire
3. Additional Contract

For options 1 & 2 above:

1. **New Hire:** When a start date is changed for the contract that was set up for the employee as a new hire, the following dates are updated:
 - a. Contract Start Date
 - b. Date First Joined
2. **Rehire:** When a start date is changed for the contract that was set up for the employee as a rehire, the following dates are updated:
 - a. Contract Start Date
 - b. Latest Start Date

Changes to additional contracts will not result in any update to the *Date First Joined* or the *Rehire Date*.

If the substantive contract is updated, the corresponding *Substantive Date* is also be updated.

What Contracts Cannot be Updated?

The start date for the following contracts cannot be updated using the *Amend Contract Start Date* functionality:

- ☐ Replacement Contracts.
- ☐ Contracts that have been processed on Payroll.

What Else is Updated for the Employee's Contract?

The following elements of the employee's contract will be reviewed and potentially updated, when the start date is changed.

- ☐ Salary
- ☐ Allowance
- ☐ Cost Allocations
- ☐ Pension
- ☐ BIK

- ☐ Deductions
- ☐ Substantive Date
- ☐ Org Roles

Each of these elements will be reviewed and flagged to the user as requiring / not requiring an update. The details of what will be updated will also be made clear.

Impact on Payroll

Where an employee has already been set up on payroll, this is also considered as part of the change start date process:

- There are restrictions put in place to ensure that payroll is not negatively impacted by this process.
- *Start Date & Latest Start Date* are updated for the employee's payroll record.
- Changes to any pay related elements of the employee's contract will be reflected in payroll:
 - Salary
 - Allowance
 - BIK
 - Deductions
 - Pension Scheme
 - Cost Allocations

6. How to Change an Employee's Start Date

6.1 Change an Employee's Start Date

To change the employee's start date:

1. Open the employee record in People Management.
2. Select *Contracts*.
3. Click the  button and select **Amend Contract Start Date**.

4. On the *Amend Contract Start Date* prompt, enter the new start date and click **OK**:

The *Amend Contract Start Date* screen opens.

The screen displays a list of all of the additional elements associated with that contract that will be updated as part of this task. Scroll down the screen to see all elements.

← Noel Murphy (000138)

Amend Contract Start Date

People Management > Employee Search* > Noel Murphy (000138)* > Amend Contract Start Date

New Starting Date:
18-Feb-2019

Changing the appointment Start Date to 18-Feb-2019 will update the following items marked below

Cost Allocation

2 record/s require no action

Pension

1 record/s will be automatically updated

corehr

REVIEW

REVIEW

SAVE

Each item includes a summary of the changes that will / will not be amended e.g.

- X record/s need to be reviewed.
- X record/s will be automatically updated.
- X record/s will be automatically deleted.
- X record/s will require end date input.
- X record/s will require no action.

5. Click the **Review** button for each of the contract elements to view further details.

In the screenshot below, the details of an amendment to the employee's salary are displayed. The employee's current salary details are displayed i.e. Effective Date, Grade, Point & Approval Status.

Salary

People Management > Employee Search > Noel Murphy (000138) > Amend Contract Start Date > Salary

No Action Required

Effective Date	Grade	Point	Approval Status	Resolution	
11-Feb-2019	GR2 - Grade 2	1	Approved	System will update	INFO

corehr
Simplifying HR Technology

SAVE

Move to Portal - People Management Contracts Key Concepts

Click the **Info** button to see what will be changed. In this case, the *Effective Date* will be changed.

In the next screenshot, the corresponding records will not require a change. In this example, the cost allocations associated with the employee's record have a start date that is equal to the new start date. The *Resolution* column indicates that it will not be changed.

Cost Allocation

People Management > Employee Search > Noel Murphy (000138) > Amend Contract Start Date > Cost Allocation

No Action Required

Start Date	End Date	Cost Centre	Project	Expense	Percent	New End Date	Resolution	
18-Feb-2019		CONTROL - Hr	-	-	50		Not changing	INFO
18-Feb-2019		1 - Default	-	-	50		Not changing	INFO

In some cases, the system cannot automatically update the record for you. If this is the case, the record is listed under the *Action Required* section of the screen. Here you will be either:

- Guided to enter a new end date e.g. see this example for a BIK record.
 - To do this, click **Update**
 - Enter the new date and click **OK**.

BIK

People Management > Employee Search > Peter Thompson (000139) > Amend Contract Start Date > BIK

Action Required

Start Date	End Date	Pay Code	Std Value	New End	Resolution	
01-Feb-2019	15-Feb-2019	3500 - Company Car	150		Input end date	UPDATE

- Click **Save** on that screen to save the new date.

OR

- You will be notified that you are required to make an update manually on the employee's record e.g. see this example for an org role:

Org Roles

People Management > Employee Search > Peter Thompson (000139) > Amend Contract Start Date > Org Roles

Action Required

Org Role	Org Group	Org Group Item	Structure C...	Date From	Date To	New End Date	Resolution

Allowances

Allowances associated with the contract, will be updated in accordance with the allowance start and end dates.

See examples below of how the allowance is updated, for the various date scenarios.

Original contract start date = 1st Feb 2019

Move to Portal - People Management Contracts Key Concepts

New contract start date = 18th Feb 2019

- If the **allowance start date = the original contract start date**, the data will be automatically updated.

The screenshot shows the 'Allowances' page for Peter Thompson (000139) under 'Amend Contract Start Date'. The page indicates 'No Action Required'. A table lists allowances, and a red box highlights the 'Resolution' column.

Start Date	End Date	Pay Code	Approval Status	New End Date	Resolution
01-Feb-2019		3010 - Adhoc Value Allowance	Approved		System will update

An 'INFO' link is visible next to the resolution text.

- If the **allowance start date is greater than the original contract start date & less than the new contract start date**, the data will be automatically updated.
- If the **allowance start date = the original contract start date**, but the **end date is less than new start date**:
 - Allowance start date is automatically updated to the new contract start date.
 - User will need to manually input a new end date on the allowance record.

The screenshot shows the 'Amend Contract Start Date' page. The 'Allowances' table shows an 'Action Required' status for an allowance ending on 15-Feb-2019. A red arrow points to the 'Action Required' text. Another red box highlights the 'Resolution' column with the text 'Input end date' and an 'UPDATE' link. A modal window titled 'Update' is open, showing that the allowance start date will be updated to 18-FEB-19 and asking for a new end date. A red arrow points to the 'New End Date' input field in the modal, which contains '01-Mar-2019'.

6.3 Impact on Payroll

Payroll Currently in Process

If payroll is currently in process for that employee, it is not possible to amend their contract.

- A message will be displayed to confirm that payroll is in progress.

Contract Has Already Been Processed on Payroll

If the employee's contract has already been processed on payroll, then it is no longer possible to change the start date using this functionality.

- An error message will appear on screen to alert the user of this fact.

However, if the employee exists on payroll but the contract has not yet been processed, they can still amend the date i.e.

- The contract start date is in a future payroll period.
- OR*
- The contract start date is in the current payroll period but the payroll has not been processed as far as the 'Confirm Timesheets' step.

7 How to Configure

7.1 User Access to 'Amend Contract Start Date'

The following menu option is required to see the **Amend Contract Start Date** option on the *Contracts* screen i.e.

System	Menu Option
People Management	Amend Contract Start Date

8 Contract Amendments

8.1 When to Amend a Contract

Contract amendments refer to any date driven amendments that HR are required to make to an employee's existing contract.

These amendments may be pay impacting e.g. a change in hours. These may also be amendments that have no downstream impact on the employee's salary e.g. change of work group, category etc.

It is possible to record these changes on People Management for an employee's existing contract. A timeline or history of all amendments will be tracked for that contract and are available to the hr administrator to review on screen.

8.2 Amendments with No Salary Impact

This refers to the amendment of an existing contract that does not require a corresponding update to the employee's associated salary record.

To amend an employee's existing contract:

- Quick jump to the *Command Centre* widget in *People Management*.
- Click **View** at *Employees* and Search for the employee.
- Click **View** in the employee's relevant row.
- Be sure that the correct contract is selected.
- In the *Contracts* tab, click **Update** in the *Amendments* section.

The screenshot displays the 'Brenda Jones (000069)' profile page. A red arrow points to the 'Shop Assistant' dropdown menu in the 'Contracts' tab. Another red arrow points to the 'UPDATE' button in the 'Amendments' table.

Contracts Tab:

- Employee: Brenda Jones (000069)
- Status: Active
- Contract: Shop Assistant (Appointment ID: 502228-3, Contract Hours: 20, Start Date: 17-Jul-2016)
- Payroll Status: Closed for Processing

Amendments Table:

Start Date	End Date	Target End Date	Post No	Post Sequence	Reason	Departm...	Hours	FTE	ACTIONS
17-Jul-2016			502228	3	Hire	Menswe...	20	.533333	VIEW UPDATE

At the bottom of the page, there are buttons for 'REPLACE CONTRACT' and 'CHANGE CONTRACT HOURS'.

The 2-step Edit Contract wizard will appear on screen.

- On step 1 *Org Structure*, it is possible to edit the following items:
 - Cost Centre
 - Location
 - Workgroup
 - Other Hierarchy fields that are not locked in the Org Structure definition

NEXT

- On step 2 *Contract*, it is possible to update the following items
 - Effective Date
 - This is mandatory for all contract amendments. This will display on the employee's *Contract Timeline/History* to identify when the amendment was made.
 - This must be later or the same day than the current contract effective date. It cannot be earlier than the contract start date/last contract amendment.
 - Reason
 - This is mandatory and should be used to track the reason for the contract amendment.
 - Target End Date
 - Planned End Date

In this instance, the following fields should not be updated as these may result in a salary change:

- Contracted Hours
- Contracted Weeks
- FTE
- Standard Hours
- Standard Weeks
- Click on the **Save** button to create the amendment.

8.3 Amendments with Salary Impact

This refers to the amendment of an existing contract that will require a corresponding update to the employee's associated salary record e.g. if an employee's hours are reduced, their salary should be pro-rated in line with this.

To amend an employee's existing contract:

- Quick jump to the *Command Centre* widget in *People Management*.
- Click **View** at *Employees* and Search for the employee.
- Click **View** in the employee's relevant row.
- Be sure that the correct contract is selected.
- In the *Contracts* tab, click **Update** in the *Amendments* section.

The screenshot displays the 'Brenda Jones (000069)' profile page. A red arrow points to the 'Shop Assistant' dropdown menu in the 'Contracts' tab. Another red arrow points to the 'UPDATE' button in the 'Amendments' table. The 'Amendments' table has columns: Start Date, End Date, Target End Date, Post No, Post Sequence, Reason, Departm..., Hours, FTE, and a 'VIEW' button. The first row shows an amendment starting on 17-Jul-2016 for Post No 502228, Post Sequence 3, Reason Hire, Departm... Menswe..., Hours 20, and FTE .533333.

- The 2-step *Edit Contract* wizard will appear on screen.
- On step 1 *Org Structure*, it is possible to edit the following items:
 - Cost Centre
 - Location
 - Workgroup
 - Hierarchy fields that are not locked in the Org Structure definition
- On step 2 *Contract*, it is possible to update the following items
 - Effective Date
 - This is mandatory for all contract amendments. This will display on the employee's *Contract Timeline/History* to identify when the amendment was made.

- This must be $\geq$ the current contract effective date. It cannot be earlier than the contract start date / last contract amendment
- Reason
 - This is mandatory and should be used to track the reason for the contract amendment.
 - The reason code selected here will be very important as this will drive the automated salary amendment process. The actual reason codes listed may differ per implementation so please refer to the **Reason Code - Configuration Guide** for details on how to check if this is configured for a specific organisation.
- FTE
 - Changes to the FTE may have a direct impact on the employee's pay multiplier.
- The following fields may update the automatically calculated FTE:
 - Contracted Hours
 - Standard Hours
 - Contracted Weeks
 - Standard Weeks
- All other contract fields on screen may be updated as part of this amendment, if required.

- Click on the **Save** button to create the amendment.
- The *Amend Salary* window will appear (pending the appropriate Reason Code configuration). This will be pre-populated based on the contract amendment details. Specifically, these fields will be amended automatically for the user:
 - Make Effective From
 - New Multiplier
 - Reason Code
- All other fields will be pre-populated with the current salary details.
- Click **Save** to create the salary amendment.

8.4 Change of Hours

The Change of Hours feature is a quick way for the hr administrator to make a contract amendment that is salary affecting i.e. they can change the employee's contracted hours or weeks, which will update their FTE and this has a downstream impact on the pay multiplier.

Move to Portal - People Management Contracts Key Concepts

This is effectively the same process as Amendments with Salary Impact, however, with this option, the user is presented with a new screen that is limited to only include contract elements that must be updated when recording the change of hours for an employee.

To access this *Change of Hours* option:

- Quick jump to the *Command Centre* widget in *People Management*.
- Click **View** at *Employees* and Search for the employee.
- Click **View** in the employee's relevant row.
- Be sure that the correct contract is selected.
- In the *Contracts* tab, click button **Change Contract Hours**.

CHANGE CONTRACT HOURS

- The *Change Working Hours* screen will appear.

The screenshot shows the 'Change Working Hours' form within the People Management portal. The breadcrumb trail at the top reads: 'People Management > Employee Search > Bill Kerry (000100) > Change Working Hours'. The form contains several fields: 'Effective Date*' with a calendar icon, 'Contracted Hours*' with a dropdown arrow, 'FTE*' with the value '1', 'Target End Date' with a calendar icon, 'Standard Hours' with a dropdown arrow, 'Reason*' with a dropdown arrow, 'Employee Status*' with the value 'P - Permanent' and a dropdown arrow, and 'Sub Status' with a dropdown arrow. At the bottom center is the 'corehr' logo with the tagline 'Simpler HR Technology'. At the bottom right is a green 'SAVE' button.

- Update all fields as required:
 - All fields marked with a ***-symbol** are mandatory.
 - Fields will be pre-populated with the current contract details e.g. current FTE, Contracted Hours etc.
 - *Effective Date* entered here will inform the corresponding effective date for the salary change.
 - Updating the *Contracted Hours* and/or *Standard Hours* will directly update the FTE
- Click **Save** to create the amendment
- The *Amend Salary* window will appear (pending the appropriate Reason Code configuration). This will be pre-populated based on the contract amendment details. Specifically, these fields will be amended automatically for the user:
 - Make Effective From (set to the contract Effective Date)
 - New Multiplier (set to the contract FTE)
 - Reason (set to the contract amendment FTE)
- All other fields will be pre-populated with the current salary details.

REPLACE CONTRACT CHANGE CONTRACT HOURS

Note If the employee has multiple contracts, then all contracts will be visible on the Contract History screen, if accessed from here.

This screen will provide a summary view of all amendments that have been made for the employee's contract.

Choosing the **Timeline** dropdown will provide a pop-up screen with a timeline view of all contract amendments made for that contract.

Contract Timeline			
People Management > Employee Search > Bill Kerry (000100) > Contract Timeline			
BK Bill Kerry Payroll Administrator			
2019	Effective Since 08-MAR-19 Appointment Status Confirmed Future	Department Payroll Job Title Payroll Administrator	Post Number 502204 Sequence 31 Reason Change Of Hours
	Effective Since 06-MAR-19 Appointment Status Confirmed Future	Department Payroll Job Title Payroll Administrator	Post Number 502204 Sequence 30 Reason Change Of Hours
	Effective Since 12-APR-17 Appointment Status Commenced	Department Payroll Job Title Payroll Administrator	Post Number 502204 Sequence 23 Reason Hire

The top section of the screen will display the key dates of the employee's overall employment with the organisation, for continuous service purposes.

Note This is covered in greater detail in the CoreHR University 'Employee Continuous Service' user guide.

- The current / most recent amendment will be listed at the top.
 - Earlier and future instances of the contract will be listed on screen and these will have and
 - Effective Since* and *Appointment Status* populated.
- Other high-level contract details will display including:
 - Post Number:** This is the number of the Post Profile from which the contract was created i.e. 502208. This is used with the initial sequence to create the Contract ID i.e. 502208-7 in the example.
 - Sequence:** Every line of contract history will have a unique sequence for that Post No. When the contract is initially created it gets a *sequence* e.g. 7 in the screenshotted example. When the contract is amended, a new sequence is recorded e.g. 8 and 9 in the screenshotted example.
 - Reason:** This is the Reason supplied by the hr administrator when creating the contract amendment.
 - Department** This is the Department on the contract Org Structure for each line of contract history.

Note It is not possible to make amendments to historical instances of the contract record on this screen.

For full details on how Contract IDs / Appointment IDs are managed as part of contract creation and amendment activities, please see the *Post Management* tutorial in the CoreHR University **CorePersonnel Key Concepts** course.

9 Ending a Contract

9.1 Ending an Individual Contract

To end a contract for an employee:

1. Go to *Command Centre > Employees*.
2. Search for the employee and select **View** to open their employee record.
3. Select the **Contracts** tab.
4. Select the contract that you plan to end from the contracts list:

Location After Leaving	Select from a predefined list.	No
Comments	Record additional comments re the end of the contract if required. Up to 80 characters.	No
End All Contracts	This will be disabled by default when the <i>End Contract</i> screen. This is not relevant in this scenario and should be disabled if only ending a single contract. If this is enabled, this ends all open contracts for the employee on the give Leave Date and makes them a Leaver.	No

- Click **Actions** and select **Notice Periods** for the option to record Employee Resignation OR Employer Notification dates.

Notice Periods

Employee Resignation 	Employer Notification 
Employee Notice Period	Employer Notice Period
Employee Leave Date	Employer Leave Date

CANCEL OK

This screen is typically used if using Terms and Conditions functionality as these may automatically populate the Notice Periods and help to define the employee's Leave Date.

- Click **Actions** and select **Leaving Summary** to open the *Leaving Summary* screen. This will provide a summary view of other contract elements that will be ended as part of the leaving process including:
 - Cost Allocations
 - Allowances
 - Deductions
 - Annual Leave Balance
 - Pension Scheme Assignments
 - It is also possible to capture additional comments at the end of this screen.
- Click **Actions** and select **Appointment Details** to see a read only view of the Org Structure and Contract screens for the contract that is being ended as part of this process. The most recent contract amendment will be displayed. This is for review purposes only and no updates may be made on these screens.
- Click **Save** to end the contract.

The contract is now ended. It will continue to be available to the hr administrator to view (subject to their HR access) on the employee's record. However, it will be in an "Ended" status.

The contract will still appear on the contract list

- Status will be “Ended”
- The contract date range will display the start date to end date.

9.2 Substantive Date Impact

When the substantive contract has been ended and the end date has passed, the system will automatically identify the new contract to be flagged as substantive.

The next substantive contract may be:

1. The only contract that remains. OR
2. If multiple additional contracts exist:
 - The contract with the greatest FTE
 - If FTE is the same for both, the contract with the earliest start date
 - IF FTE and start date are the same, the contract with the earliest input date

For Example

The “Payroll Administrator” was the substantive contract before it was ended, as identified by the star.

Contracts

Key Information

Administrator|

Contract	Appointment ID	Start Date	Status
Administrator, Senior Management	502200-4	28-Jan-2019	Started
Payroll Administrator, Payroll	502204-14	02-Oct-2017	Started

Start Date 28-Jan-2019 Payroll Status: C

Once the contract has been ended, the “Administrator” contract is now identified as the substantive contract. The *Substantive Date* the date after the last contract ended.
