Version	Date	Author	Details
1.0	16 th Aug 2019	Peter Travers	Published to the CoreHR University
2.0	22 nd July 2020	Julie Hurley	Updated to support Recruitment Move to Portal
3.0	31 st Aug 2020	Julie Hurley	Updated based on Internal Access People Review

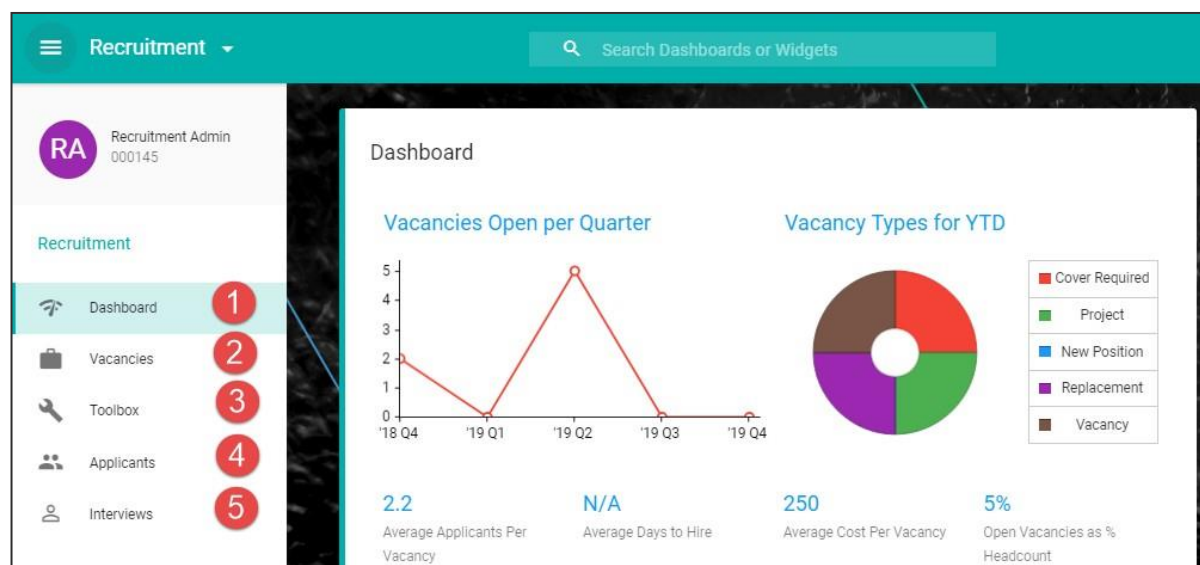

1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use the Recruitment module as a CorePortal ('Portal') user. This guide details how to navigate and use the dashboards and widgets available to Portal users for Recruitment.

1.2. Recruitment Dashboards & Widgets

The *Recruitment Dashboard* is pre-configured with standard settings. The following table provides a list of the tabs and widgets that are available as standard:

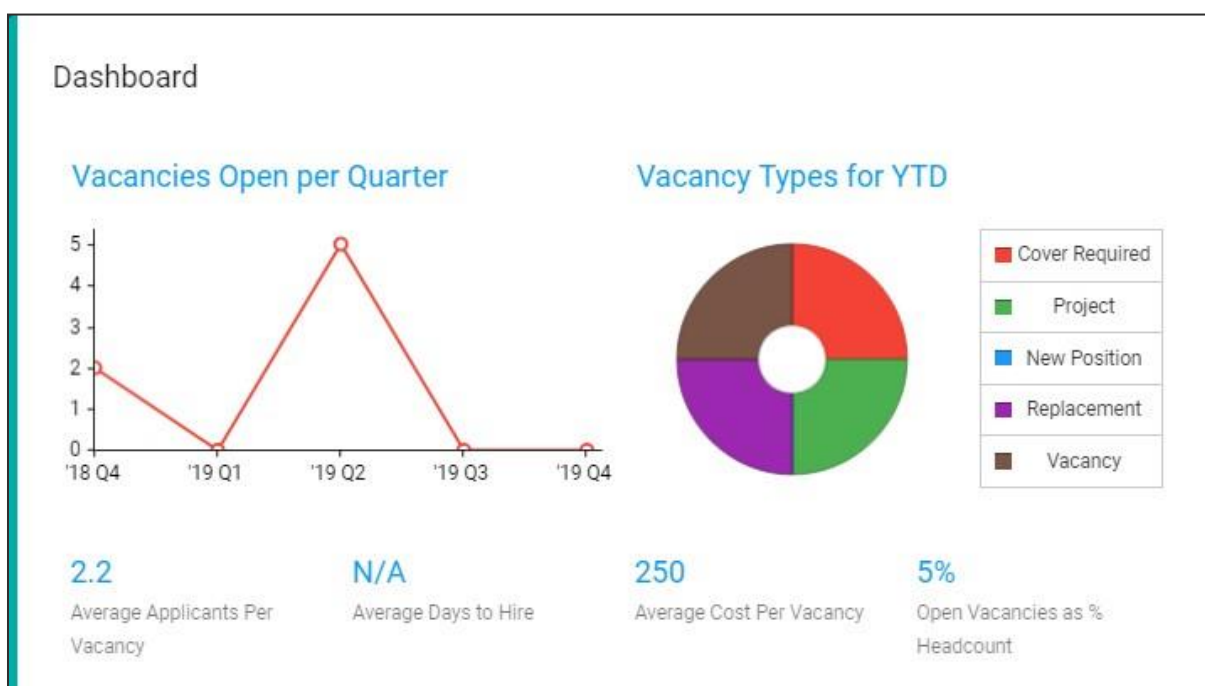

Tab	Widget
1. Dashboard	Dashboard
2. Vacancies	Vacancies Chart
	Vacancies Stream
	Vacancies
3. Toolbox	Toolbox
4. Applicants	Applicants
5. Interviews	Interviews

2. Dashboard Widget

Note: The *Dashboard* widget is displayed by default on the *Recruitment Dashboard*

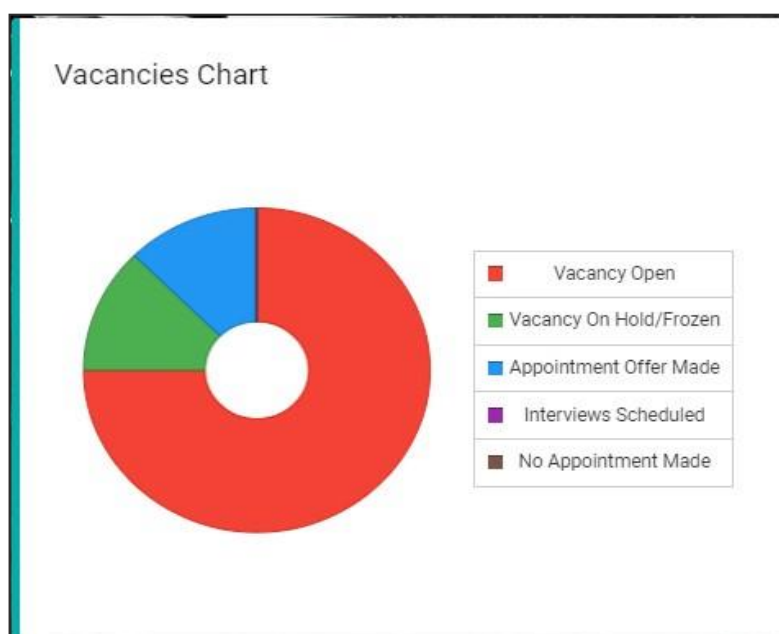

- This can be removed / hidden by removing this tab from the Recruitment Dashboard in Dashboard Configuration.
- The stats shown represent the full set of recruitment data and are **not restricted based on your data access**.

3. Vacancies Chart Widget

Note: The Vacancies Chart widget is displayed by default on the Recruitment Dashboard.

- This can be removed / hidden by removing the widget 'Vacancies Chart' from the Recruitment Dashboard in Dashboard Configuration.
- The stats shown represent the full set of recruitment data and are **not restricted based on your data access**.

4. Vacancies Stream Widget

This widget provides the latest stream of recruitment activity within your organisation. Select View button for further details. This widget is on the recruit dashboard by default and can be removed / hidden but removing the widget 'Vacancies Stream' from the Recruitment Dashboard in Dashboard Configuration. Access to this widget is not controlled by a menu option - however, access to the data that appears on this is controlled by a menu option.

- See document '**Move to Portal - Configuring Recruitment Admin Guide v27+**' on Community Portal for further details.

5. Vacancies Widget

This initial phase of the recruitment process involves setting up a vacancy record. This vacancy holds all the details of the job on offer, interviews, assessment criteria, application forms, documentation, opening & closing times.

Stage	Overview
1. Create Vacancy	Creating the vacancy can be carried out either through managers creating a Staff Request or recruitment administrators creating a vacancy manually via the Recruitment Dashboard. See section Create Vacancy for further details.
2. Update Vacancy	Once the vacancy has been created, the next stage is to update the details within it to ensure all information can be viewed and understood clearly on the job advert. This also allows you to capture details to support the reporting of vacancy details and sharing with the interview panel. See section Update Vacancy and Vacancy Profile for further details.
3. Assign Application Form	An application form needs to be assigned to a vacancy to allow applicants to apply via the external recruitment website. See section Assign Application Form for further details.
4. Edit Vacancy Details	You can return to edit the details of a vacancy at any stage in the recruitment process, even if it has been published to the recruitment website. See section Edit / Update a Vacancy for further details.
5. Set Advertising Dates	One of the main items to set before a vacancy can be published are its advertising dates, either for internal applicants, external applicants or both. See section How to Recruitment Dates for further details.
6. Attach Documents	A vacancy can include supporting documents that can be shared with applicants or panel members that may hold other relevant data not captured on the vacancy. See section Add Documents for further details.
7. Define Questionnaire	Questionnaires are used as part of the application form to specify a distinct set of questions specific to a certain vacancy. See section Questionnaires for further details
8. Publish Vacancy	Before a vacancy is advertised on the recruitment website, there are mandatory items that you need to ensure are captured on the vacancy, to ensure that it is displayed to applicants. See section How to Publish a Vacancy for further details.

5.1. Searching for an Existing Vacancy

To search for an existing vacancy: Go to *Recruitment Dashboard* > *Vacancies tab* > *Vacancies widget*.

Note: The *Vacancies* widget returns vacancies by default based on the below:

- A *Recruitment Status* of "Open".
- 4 open vacancies at a time.
- In order of the recruitment opening date.

1. To view all vacancies, click on the **View All** button which results in vacancies being returned in list format, again ordered by recruitment opening date.
2. To search for vacancies with specific details, the following items can be filtered on via the

button:

- Recruitment Status
- Opened After (Date)
- Opened Before (Date)
- Management Unit
- Department
- Division
- Cost Centre
- Vacancy Type
- Pay Scale / Grade
- Requested By

Filter Vacancies

All Vacancies	▼	On-Hold	▼
Opened After		Opened Before	
Selected date is included in filter		Selected date is included in filter	
Management Unit	▼	Division	▼
Department	▼	Cost Centre	▼
Pay Scale/Grade	▼	Vacancy Type	▼
Requested By	▼		

RESETAPPLY

- Once ready to search with filters applied, click on the **Apply** button. This only brings back vacancies that match your selection.
- To reset this filter at any time, return to the  button and click on the **Reset** button.

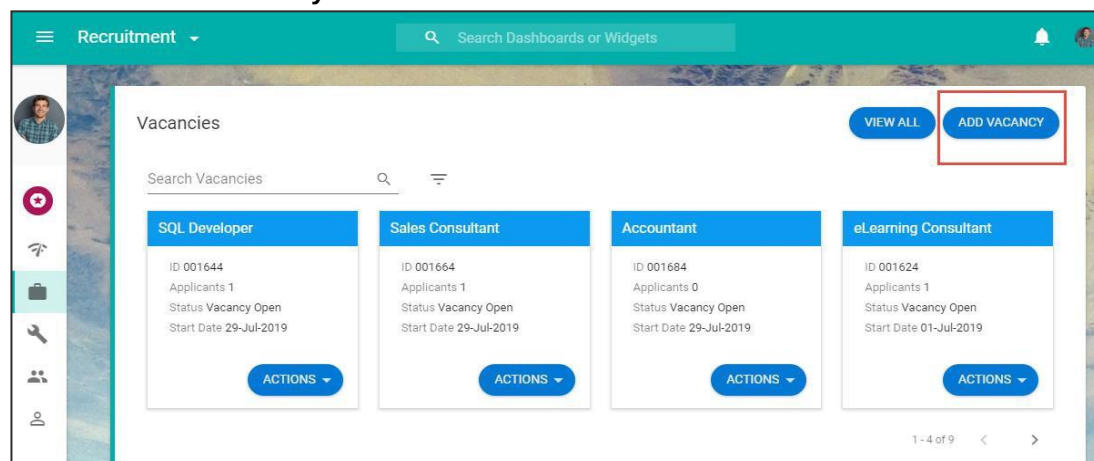

5.2. Add/ Create Vacancy

To add a vacancy, there are two ways that this is carried out:

- Managers create a staff request which goes through full approval process. If fully approved, the vacancy is available here on the *Vacancies* widget. This vacancy needs to be reviewed and updated before it is published / advertised. This process is not covered in this user guide.
- Create vacancy manually via *Vacancies* widget on the *Recruitment* dashboard.

To create the vacancy manually:

- Go to the *Recruitment Dashboard* > *Vacancies* tab > *Vacancies* widget.
- Click the **Add Vacancy** button.

- The *Add Vacancy* screen appears with 4 options available to fill out:

Field	Description	Mandatory?
Description	This is the title of the vacancy and is visible on the <i>Recruitment Dashboard</i> and to internal and external applicants applying for the role.	Yes
Department	This is an optional organisational hierarchy field that can be entered here to link the vacancy to a department. The available departments can be seen on the drop-down box.	No. However, this is important as it drives recruitment data access that needs to be provided to users who are managing vacancies.
Opening Date	This is the recruitment open date that allows the vacancy to be able to be published from either Portal or on the Recruitment Website	Yes
Closing Date	This is the optional final date that a vacancy can be published on either Portal or the Recruitment Website	No

- Ensure that all mandatory fields are filled out.

5. To save and add this vacancy, click the **OK** button.
6. When the vacancy has been created, you can see that on the Vacancy Details -1 screen, the Vacancy ID has been automatically created, with the description and the corresponding dates.

SAVE

Note: At this point, the vacancy has not been published online, as there are many more elements, both mandatory and optional to be added before the vacancy is ready to be published on the Recruitment Website. See section [Publish a Vacancy](#) for a checklist of the items that must be captured at a minimum for a vacancy to be published to internal/external applicants. However, at this stage you should consider editing all other details as you require on the Vacancy to ensure that as much detail as possible is available to share on the corresponding advert.

5.3. Update Vacancy Details

As mentioned in the previous section, the vacancy has been created with minimal details. You now need to review the Vacancy Details screen to provide the remaining information for the vacancy. This serves to support the applicant's engagement in the recruitment process.

This information is needed to ensure that:

- The correct details are available to you to report on and track all tasks associated with the vacancy e.g. recording the vacancy status, linking to a post for onboarding to HR etc.
- All information is provided to support the publishing of the corresponding advert to internal / external applications e.g. attaching application forms, defining advertising dates.

The following sections show you how to update the vacancy with this additional information to help an applicant find the correct information about a vacancy.

**Note:**

- If you have created this vacancy as part of a staff request, many of the details here is automatically populated. However, you should review and update these as required before publishing.
- Each section here provides guidance on where fields may have been automatically populated based on the staff request process.

5.3.1. Vacancy Details – 1

Number of Positions

Item	Explanation
Number of positions	This is the total number of openings that this vacancy has to offer. This correlates to the number of job offers that you can make from this vacancy e.g. set to 2, if you expect to hire two candidates, with two separate job offers.

Attach an Application Form

An application form needs to be added to a vacancy to allow potential applicants apply and submit their application for a vacancy.

It is important to understand what the difference is between an internal and external applicant here.

Applicant Type	Explanation
Internal	These are applicants who apply for a vacancy via the Portal widget <i>Recently Opened Vacancies</i>. These can also be applicants who apply via the Recruitment Website and have registered using an external email address and are linked to an existing employee record at the time of applying.
External	These are applicants who apply for a vacancy via the Recruitment Website and are not registered using an internal email extension and are not linked to an existing employee record at the time of applying. These can also be applicants applying via a user using the agency portal functionality.

Each vacancy can be setup to include two application forms:

Application Form Type	Explanation
Default Application Form	This application form is mandatory. This is provided to external applicants. If an <i>Internal Application Form</i> isn't specified, this is also provided to internal applicants.

Internal Application Form	This can be used to select a separate application form that is provided to internal applicants only.
---------------------------	--

To add an application form to a vacancy:

1. Go to *Recruitment Dashboard > Vacancy tab > Vacancies* widget.
2. Search for the vacancy.
3. Click the **Edit Vacancy** button and go to the *Vacancy Details - 1* screen

4. Add the *Default Application Form*:
 - a. Select an application form from the list of all available *Application Forms*. This includes all application forms that you have configured on your system.

This form is made available to:

 - External applicants only.
 - All applicants, if an internal application form has not been specified.
5. Add an Internal Application Form (Optional):
 - a. Select an application form from the list of all available *Application Forms*. This includes all application forms that you have configured on your system.
 - This only becomes available to select once an application form has been selected as a *Default Application Form*.

- This form is made available to internal applicants only.
6. Click the **Save** button to commit all the changes made to this screen.

 Note:

- If both options are enabled for a vacancy the application form presented to an applicant depends on the applicant type i.e.
 - External applicants will see the designated *Default Application Form*.
 - Internal applications will see the *Internal Application Form*.
- If only the *Default Application Form* is selected, then all applicants (internal and external) use the same application form.

Recruitment Dates

- Recruitment dates are important for the overall vacancy.
- Internal dates are used for publishing the vacancy to internal employees via Portal.
- External dates are used for publishing the vacancy on the external recruitment website for all applicants

Link to HR Post Appointment

Before an offer is made to a successful applicant, there needs to be a linked appointment attached to a vacancy. This can be completed later in the recruitment process but needs to be done prior to the Job Offer

 **Note:** This Post Appointment is already populated if this vacancy was created as part of the staff request process.

**Note:**

- The appointments that appear on screen here are either Authorised Post Appointments or Auto-Authorised / Auto-Commenced Posts.
- If needed, you can add more than one post to a vacancy. This comes into play when sending out the offer to an applicant, as you are able to choose which post is to be assigned to an applicant if successful.
- You cannot add the same Post Appointment to the vacancy more than once.

5.3.2. Vacancy Details – 2

The Vacancy Details - 2 tab allows more information about the vacancy to be added:

Item	Explanation
Requested By	This is the person who has requested this vacancy to be created. This is pre-populated if the vacancy was created via the staff request approval process.
Reporting To	This is the manager that successful applicants report into once hired. This is pre-populated if the vacancy was created via the staff request approval process.
Job Title	This is the system job title that the successful applicants have once hired.
Vacancy Type	This can be used to group vacancies together. This is pre-populated if used within the staff request approval process.
Position Type	This can be used to group vacancies together. This is pre-populated if used within the staff request approval process.
Company	This is a mandatory field to ensure the vacancy is published online. This is the company as per your organisational hierarchy structure.
Management Unit	This is the management unit as per your organisational hierarchy structure.
Department	This is the department as per your organisational hierarchy structure. This is used to control access to vacancy data within Portal, therefore it is a mandatory field.
Location	This is the location as per your organisational hierarchy structure.
Person	This is the contact person that is shown on the recruitment vacancy for the vacancy.
Email	This is the contact person's email address that is shown on the recruitment website for the vacancy.
Phone	This is the contact person's phone number that is shown on the recruitment website for the vacancy.

Person	Email	Phone		

5.3.3. Current Questions

What are Questionnaires?

Questionnaires can be used on an application form to include a specific question or set of questions per vacancy that are not setup on a standard application form. Questionnaires can include:

- Default sets of questions or 'profiles' that can be applied to many vacancies e.g. right to work questions, sets of questions that are specific to the business unit for the role.
- Ad-hoc questions i.e. questions specifically added for the vacancy being advertised.
- Killer questions i.e. question that if the candidate answers in a particular way, can either prevent an application from being submitted or caution the recruitment administrator as part of the shortlisting process.

Applicant forms are configured to include a variable 'Questionnaire' section. The actual questions that you define on the vacancy is included in the application form. This allows you to create application forms that are capable of gathering vacancy specific details from the applicants.

Setup Default profiles

Question Profiles can be used to avoid having to re-create the same set of questions for a vacancy, multiple times. These must be created in the Back Office.

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Reference > Question Category*.
2. Add a *Question Profile Code* and *Description*.
3. Flag whether the questions on the profile are **Mandatory**.

Question Category Maintenance

Selection Criteria

Question Type:

Maintain Question Profile Codes

Question Profile Code	Description	Mandatory	Active	Effective Date
KILL	Killer Questions	☐	☒	04-JUL-2019
SNR	Senior Management Questions	☐	☒	04-JUL-2019
STD	Standard Questionnaire	☐	☒	04-JUL-2019
		☐	☐	

4. Switch on the **Active** indicator.
5. To add the questions:
 - a. Click on the question profile row.
 - b. Click the **Question Profile** button.
6. Enter a question and select an answer type. The options for answers are the following:

Option	Explanation
Drop-down list	This allows the user to choose one value from a pre-defined list.
Free Text	This allows the user to enter in a block of text that is not limited to a pre-defined list.
Numeric	This allows the user to enter in a value to answer the question.
Radio Button	This allows the user to select 1 option from a set of pre-defined options.
Section Header	This inserts a header onto the questionnaire on the recruitment website. The 'question' entered here becomes the header title.
Section Footer	This inserts a footer onto the questionnaire on the recruitment website. The 'question' entered here becomes the footer title

The below image shows how the header and footer appears on screen:

The screenshot displays the corehr recruitment portal interface. On the left is a 'Navigation Section' with links: Search Vacancies, Application History, My Account, My Profile (with a sub-link 'Click to change profile details'), Equal Opportunities Policy (with a sub-link 'Click here to review a printable version of the Equal Opportunities Policy'), and Logout. The main area is the 'Questionnaire Section' for 'Head of Technology'. It includes a 'Questionnaire Section details' link, an 'Introductory Questions' header, and a text input field for 'Tell us about your Senior Management experiences' with a '950 Characters Left' indicator. Below this is a question: 'How many direct employees were in your team as a Senior Manager?' with a text input field. The 'Section Footer' is a dark blue bar containing 'End of Introductory Questions'. Following this are four questions with radio button options: 'How did you hear about this vacancy? *', 'Do you have evidence of your entitlement to live and work in the Country *', 'Do you need a work permit to allow you to work in the country? *', and 'Do you hold a current full driving licence? *'. The last question has a 'Section Not Applicable' checkbox. At the bottom are four buttons: 'Back', 'Save and Next', 'Next', and 'Save'. Red boxes highlight the 'Section Header' and 'Section Footer'.

7. Add a sequence number for the order this should display on a vacancy and then make the question active and flag as **Mandatory** or **Private**.
 - If a question is marked as **Mandatory**, the applicant has to answer it before moving onto the next section of the application form

- If a question is marked as **Private**, the applicant's question and answer is hidden from the print friendly application form page.

Add Questionnaire to Vacancy

The *Current Question* tab is where questionnaires for a vacancy can be added to and amended.

Add an Ad Hoc Question

The **Add Question** button allows you to add an ad-hoc question to this vacancy that is not linked to any *Question Profile*.

Follow the same steps to create this question as were followed above when adding a question to a profile. These steps, in Portal are as follows:

1. Go to *Recruitment Dashboard* > *Vacancy tab* > *Vacancy widget*.
2. Search for a vacancy.
3. Click the **Actions** button and select **Edit Vacancy**.
4. Select the **Current Questions** tab.
5. Click the **Actions** button and select **Add Question**.
 - a. Add in your *question*.
 - b. Confirm your *answer type*.
 - c. Ensure this is included in an *application form*.

- d. Assign this question to a *Question Category*.
 - e. Confirm its sequence number
 - f. Check if it is mandatory, private or to be included in rating.
6. Click the **Save** button.

The below image shows what the add a question screen is made up of in Portal:

Question Details

Recruitment > Vacancy Details: 001704 - Head of Technology > Question Details

Question *	Answer Type *
What coding language(s) do you know...	Free Text
Application Form *	Category *
Default Application Form	Senior Management Questions
Sequence Number *	Mandatory
10	☒
	Private
	☐
	Include in Rating
	☐

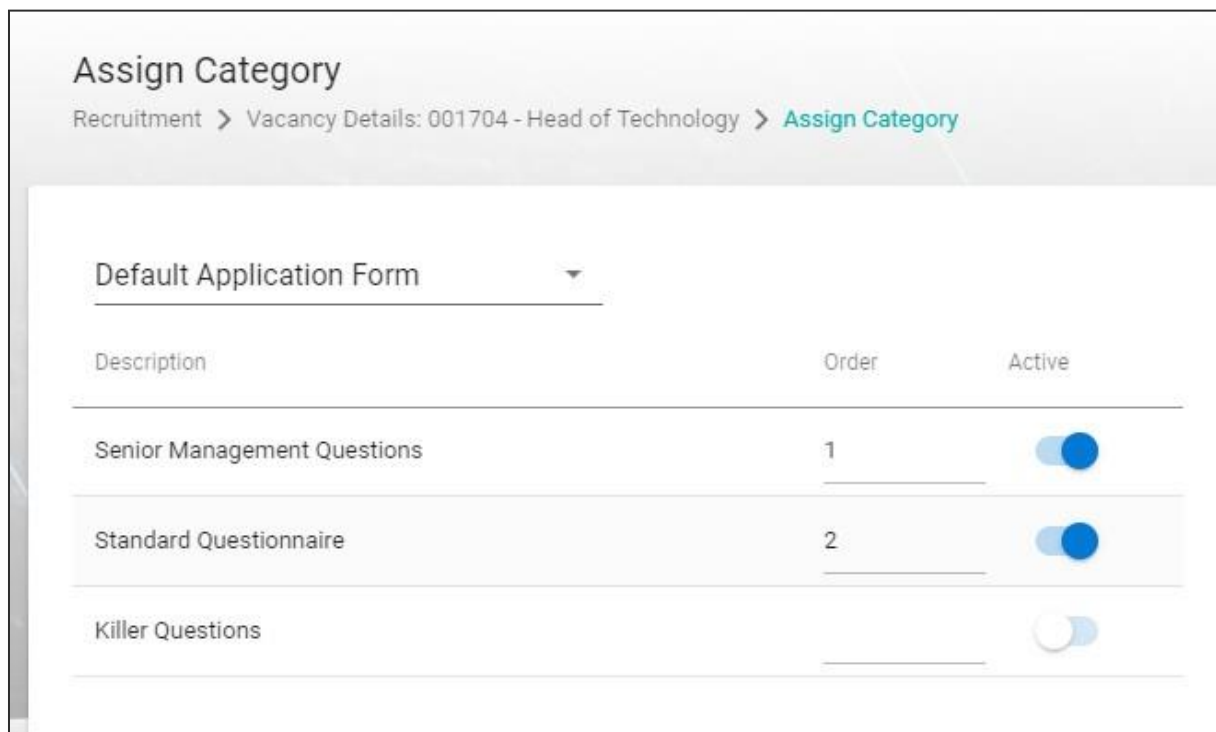

Add Default Questionnaire Profile

You can add one or many questionnaire profiles to your vacancy.

To add a default profile to a vacancy:

1. Go to *Portal Recruitment Dashboard > Vacancy tab > Vacancies* widget.
2. Search for a vacancy.

3. Click the **Actions** button and select **Edit Vacancy**.
4. Select the **Current Questions** tab and click the **Actions** button
5. Click **Assign Category** button to link an existing *Question Profile* that has been created to a vacancy.
 - a. Mark *Question Profile* in the order you want it to show on a vacancy.
 - b. Mark the *Question Profile* as **Active** to enable it to be show on a vacancy. This is used to include all the profile's questions on the vacancy.
 - c. Click **Save**.

Killer Questions

A killer question is one that is an important question set by the recruiter to the applicant that prompts the applicant with certain messages. There are options that can be set as to what happens in relation to questions where the applicant be flagged as:

- Not Applicable.
- Display Warning.
- Stop the Applicant Applying.

Killer Question Settings

Note: Further details on Assessment functionality and for a detailed user guide see document *Move to Portal - Recruitment Interview Panel User Guide v27+* on the Community Portal

5.4. Vacancy Profile

5.4.1. Job Description

The job description for a vacancy is written in a markdown text editor. To create or update a job description for a vacancy:

1. Go to *Recruitment Dashboard > Vacancy tab > Vacancies* widget.
2. Search for a vacancy.
3. Click the **Edit Vacancy** button to open the *Vacancy Details* screen.
4. Select the **Job Description** tab.

This automatically shows the markdown text editor, in edit mode.

5. Provide the required text.
6. Click the **Save** button to commit all the changes made to this screen.

When the vacancy is published online, the *Job Description* appears on the website with formatting and

styles replicated as per the preview options below.

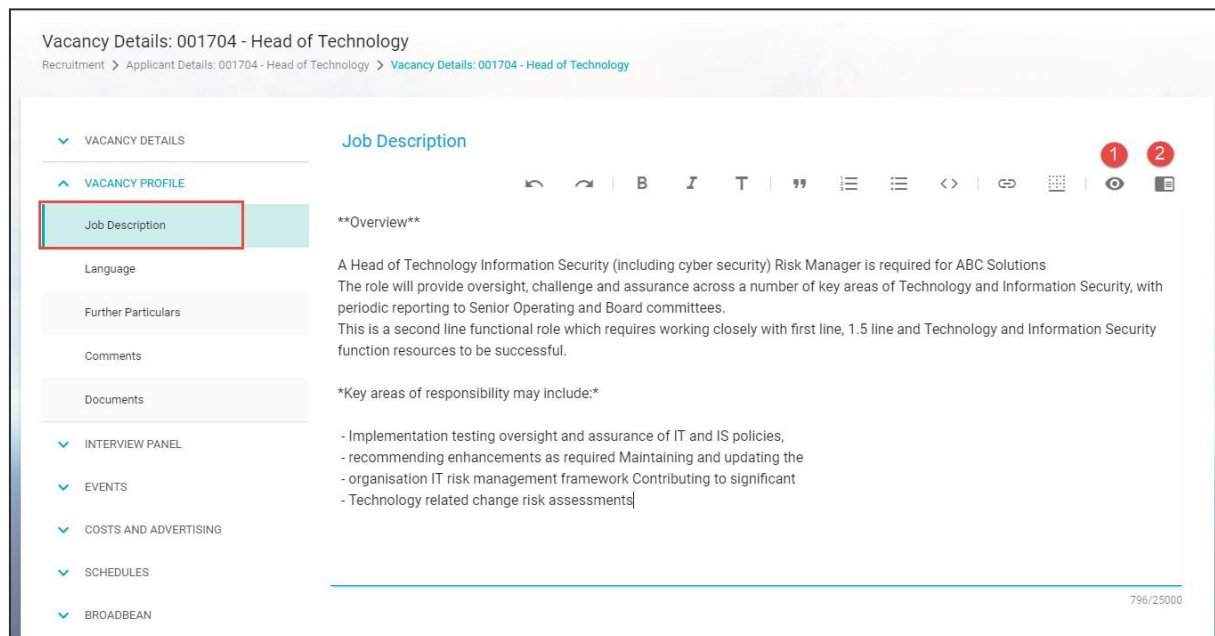

Note:

- The standard options for a markdown text editor are included here, including a preview mode and split view.
- Character limit is 25,000

Preview Options

There are two options available to preview how the text you have provided is displayed on the Recruitment Website.

These are numbered in the screenshot below:

1. Preview Mode

This provides a preview as to what the job description looks like on the recruitment website.

5.4.2. Language, Further Particulars & Comments

These sections allow for the following vacancy information to be captured:

Item	Explanation
Language	This is an additional free text area where more information regarding the vacancy can be entered. The corresponding section can be added to the Job Specification page on the Recruitment Website.
Further Particulars	This is an additional free text area where more information regarding the vacancy can be entered. The corresponding section can be added to the Job Specification page on the Recruitment Website.
Comments	This is an additional free text area where more information regarding the vacancy can be entered. The corresponding section can be added to the Job Specification page on the Recruitment Website.

5.4.3. Documents

Documents can be uploaded to a vacancy, for example to provide the applicant with a detailed job spec file, policies etc.

This is found on the *Vacancy Profile* of a vacancy in Portal.

To upload a document:

1. Go to *Recruitment Dashboard* > *Vacancy tab* > *Vacancies* widget.
2. Search for a vacancy.
3. Click the **Edit Vacancy** button.
4. Expand the *Vacancy Profile* section and select the **Documents** tab.

All documents that are currently linked to the vacancy are displayed here, if any.

5. Click the **Upload Document** button.

The following pop-up box appears:

- a. Provide a *Name* for the document.
- b. Select the *Document* to upload.
- c. Click **OK**.

Item	Description	Mandatory?
Name	This is the name of the document as it appears on the recruitment website.	Yes
Document	This is the actual document that is to be uploaded against this vacancy. Max size is 10MB	Yes

6. When the document is uploaded successfully, click the  button which shows the following items:

- a. **Description** - this allows you to create a description for the document. The character limit for this feature is 4000 characters.
- b. **Options** - see the Document Options section below for more details.
- c. **Download** - this allows you to download the document from this location.
- d. **Delete** - this allows you to delete the document from the vacancy.

You have options to upload a new document, edit the description of an existing document, download a document or delete a document.

5.5. Interview Panel

5.5.1. Interview Panel

Interview Panel members can be added to the vacancy at any stage. These are the employees or the external interviewers that is supporting the vacancy process e.g. by shortlisting applications and facilitating interviews.

There are 2 types of panel members.

Type	Description
Internal	These are employees on the system. You can link the employee record to the vacancy. They then have the option to: - View the vacancy details via the <i>Interviews</i> widget > <i>Interview Panel</i> screen - View the details of upcoming interview schedules on the <i>Interviews</i> widget > <i>Interviews</i> screen.
External	These are panel members who are not staff i.e. not setup as employees on CoreHR. You can record their involvement in the recruitment process and include them in any system generated correspondence to the interviewpanel e.g. Generate Email/Generate Document. However, they do not have access to the Interviews widget like an Internal Panel member would.

Note:

Vacancies will only display to you on the *Interview Panel* screen widget if on the Manager or Employee Dashboards (if configured) only if both of the below two conditions are met:

- They have been added to the *Interview Panel* for a vacancy.
- They have been granted the appropriate Portal menu profile access

An interview panel member can be added to a vacancy by a recruitment administrator as follows:

- Go to *Recruitment Dashboard* > *Vacancies*.
- For chosen vacancy click **Actions** and select **Edit Vacancy**.
- Select **Interview Panel**.
- Click the **Actions** button and select **Add Interviewer**.
- Select the *Interviewer Type* either '*Internal*' or '*External*'
- Select the employee from dropdown list.
- Click Save
- Repeat for all Interviewers

Their details are automatically populated on screen.

- Click **Save**.

10. Repeat the above steps for all interview panel members as required.

Note: Further details on Interview Panel functionality and for a detailed user guide see document ***Move to Portal - Recruitment Interview Panel User Guide v27+*** on the Community Portal

Note: Further details on Shortlisting Assignments functionality and for a detailed user guide see document ***Move to Portal - Recruitment Interview Panel User Guide v27+*** on the Community Portal

5.6. Events

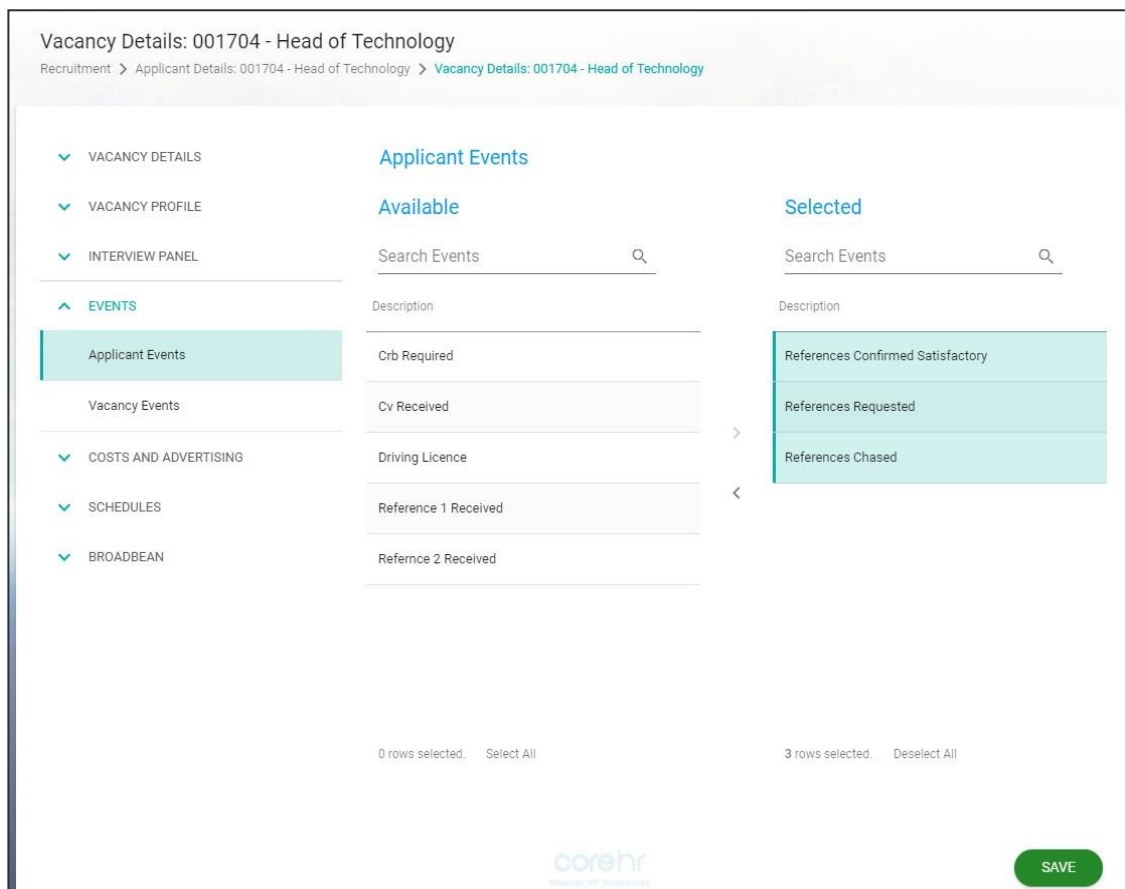

Events are like a checklist that can be used to track tasks that are typically done during the recruitment process. These are usually items that are not within the features of Recruitment and occur outside the system, for example:

- Book a room.
- Notify reception of interviews.
- Check applicant's driver licence.

To manage events against a vacancy or an applicant, the screen can be found on the *Events* section on the *Vacancy Details* screen.

Applicant Events

The following image shows what the *Applicant Events* tab looks like.

The *Available* list is all the standard Applicant Events that you can add to and track for you applicants. You need to add these to the *Selected* list in order to track these per applicant.

To add an item to the selected list:

1. Click on the description of an item on the *Available* list.
2. If multiple items need to be added, select all required items OR click the **Select All** option.

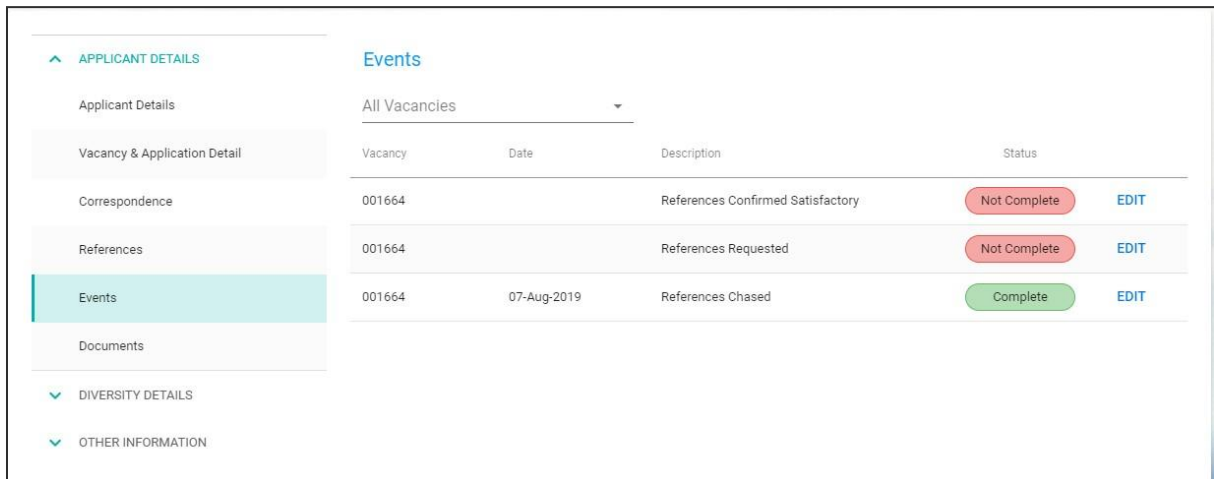

This works for removing items too.

3. Click the > button to move these to the *Selected* list.

The applicant events are now available to update per applicant that applies for the vacancy when the **Save** button is clicked.

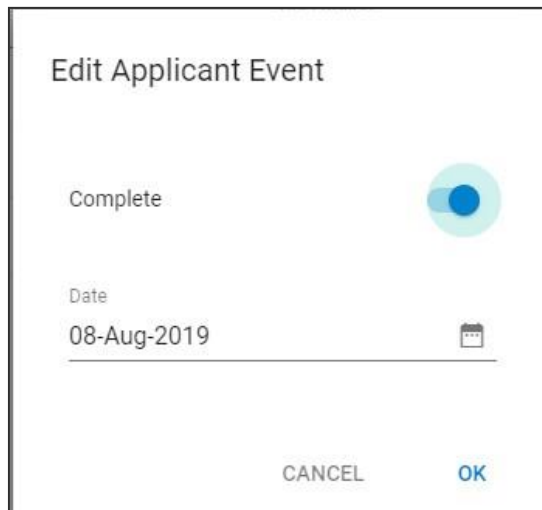

To view these events on the applicant's record:

1. Go to the *Recruitment Dashboard* > *Vacancies tab* > *Vacancies widget*.
2. Search for a vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Click the  button and select **Applicant Details**.
5. Select the **Events** tab.

5.8. Schedules

5.8.1. What is a Schedule

A schedule on a vacancy is used to track interview rounds and assessments associated with the vacancy.

For example

- Pre-interview assessments for a group of candidates.
- Multiple rounds of interviews.

For each schedule you need to define key information such as dates, times and locations. Interview panel members can be assigned to one or all the schedules as required so that they can see the details of who is to be interviewed and access their application details.

Applicants are assigned to each schedule as they progress through the vacancy process. For example, an applicant could be assigned to the following schedules:

- Group assessment
- Interview round 1
- Interview round 2

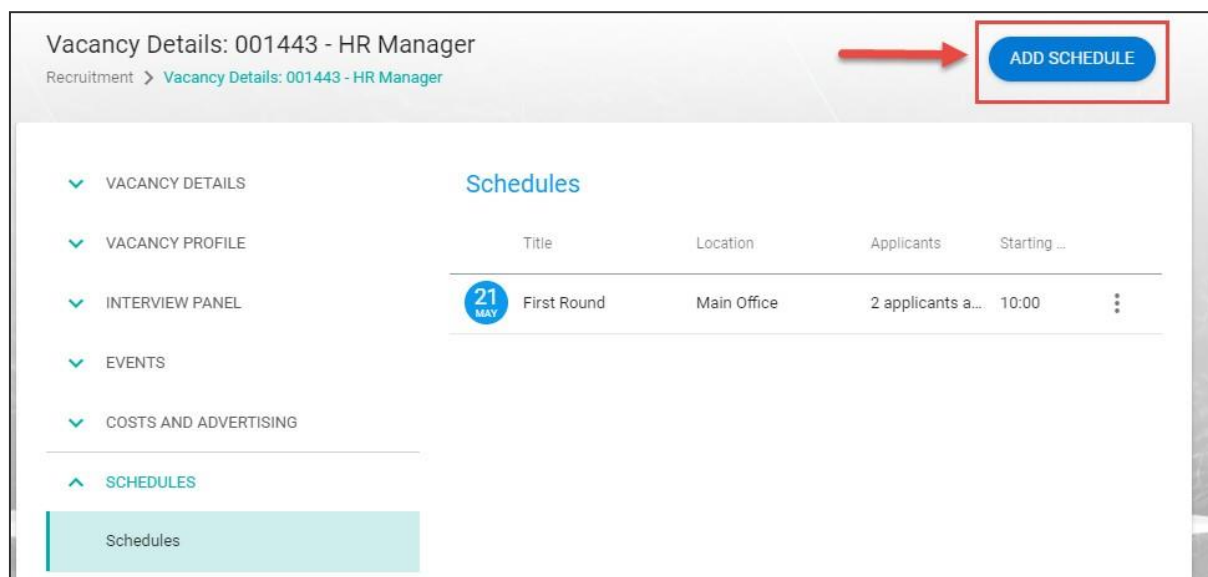

This section provides guidance on how to manage schedules for the vacancy, including:

- How to create a schedule.
- How to assign schedules to applicants.
- How to assign schedules to interview panel members.
- How interview panel members can view the details of upcoming interviews that they are assigned to.
- An overview of the Interview Panel screen.

5.8.2. How to Create a Schedule

To create a schedule:

1. Go to *Recruitment Dashboard > Vacancies > Edit Vacancy > Schedules*.
2. Click **Add Schedule**.

The following items are found on this screen and are needed to be populated to create the schedule:

Item	Explanation	Mandatory
Title	Name of the schedule (e.g. Round 1 Interview).	Yes
Venue	The location this schedule is to take place in.	No
Applicant Status	The applicant status that allows an applicant to be put on this schedule.	Yes
Assign By	There are two options available here: - Groups Only one timeslot is generate based on the times provided. This it typically used for group assessments / interviews where all applicants are attending the same session. - Individual Multiple timeslots are generated based on the times provided. This is typically used for managing individual interviews. i.e. one applicant per interview.	Yes
Schedule	Iteration of this schedule e.g. 1	Yes
Round	Iteration of this schedule in rounds e.g. 1, 2, or 3. For example if there are three rounds of the first-round interview over a certain period.	Yes

Item	Explanation	Mandatory
Start Date	The date the schedule is to start on.	Yes
Start Time	The earliest time that an applicant can be assigned a timeslot.	Yes
End Date	The date the last timeslot is available.	Yes
End Time	The latest time that an applicant can be assigned a timeslot.	Yes
Lead Time	This is the length of time given to a panel between each timeslot if assigned by individual.	Yes
Slots	These are the number of assigned slots allowed if assigned by group.	Yes
Duration	This is the length of each timeslot (i.e. how long is an interview going to take?)	Yes
Further Information	Additional details for the schedule	No
Breaks	Details of break times and durations	No
Interview Timeslot Online	Once enabled, this allows an applicant to pick their own interview timeslot online based on the credentials provided on the schedule.	No

3. Update all of the required details and click **Save**.

 **Note:** On saving the system uses the dates and time details provided to automatically generate interview timeslots. These are now available to assign to your applicants on the vacancy.

4. The next steps to take when a schedule has been created is to:
 - Assign applicants.
 - Assign interview panel members.

5.8.3. Multi-Day Schedules

What are Multi-Day Interview Schedules?

A multi-day interview schedule is a schedule that is configured to take place over several days.

When creating this type of schedule, it is possible to update the following schedule items per day:

- Start Time
- End Time
- Morning Break Time
- Lunch Time
- Evening Break Time
- Board Convened Time

This ensures that when the system automatically identifies available time slots for a schedule, the times associated with individual days are taken into consideration.

It is possible to remove an entire date/dates between the defined start and end dates i.e. schedule dates do not have to run concurrently.

It is also possible to ensure that weekend dates are included OR omitted when defining a multi-day schedule.

 **Note:** This functionality is available for schedules with an *Interview Type* of "Individual".

Creating a Multi-Day Schedule

The first step when creating a multi-day schedule is to create a schedule as normal on the following screen:

1. Go to *Recruitment Dashboard > Vacancies > Edit Vacancy > Schedules > Add Schedules* **OR** *Edit/Assign Schedule*.
2. Ensure that the *Start Date* and *End Date* fields date reflect the overall period for the multi-day schedule i.e. these should start and end on different dates.

The values provided for the following times on the schedule is considered the default time for each day in the overall schedule:

- Start Time
- End Time
- Morning Break Time
- Lunch Time
- Evening Break Time
- Board Convenes Time

This opens the Specific Times screen, with a breakdown of each day in the schedule. On this screen, you can update the schedule details per date, which is covered in the next few sections in this guide.

← Schedule Details

Specific Times
Recruitment > Vacancy Details: 001644 - SQL Developer > Schedule Details > Specific Times

Date	Starts On	Ends On	Board Convenes at	Morning	Lunch	Afternoon
12-AUG-19	09:00	18:00		11:00	14:00	...
13-AUG-19	09:00	18:00		11:00	14:00	...
14-AUG-19	09:00	18:00		11:00	14:00	...
15-AUG-19	09:00	18:00		11:00	14:00	...
16-AUG-19	09:00	18:00		11:00	14:00	...

Note: It is recommended to complete the schedule definition for each individual date before assigning any applicants. If changes are applied after applicants have been assigned to the schedule, they are automatically unassigned.

Changing Times Per Day

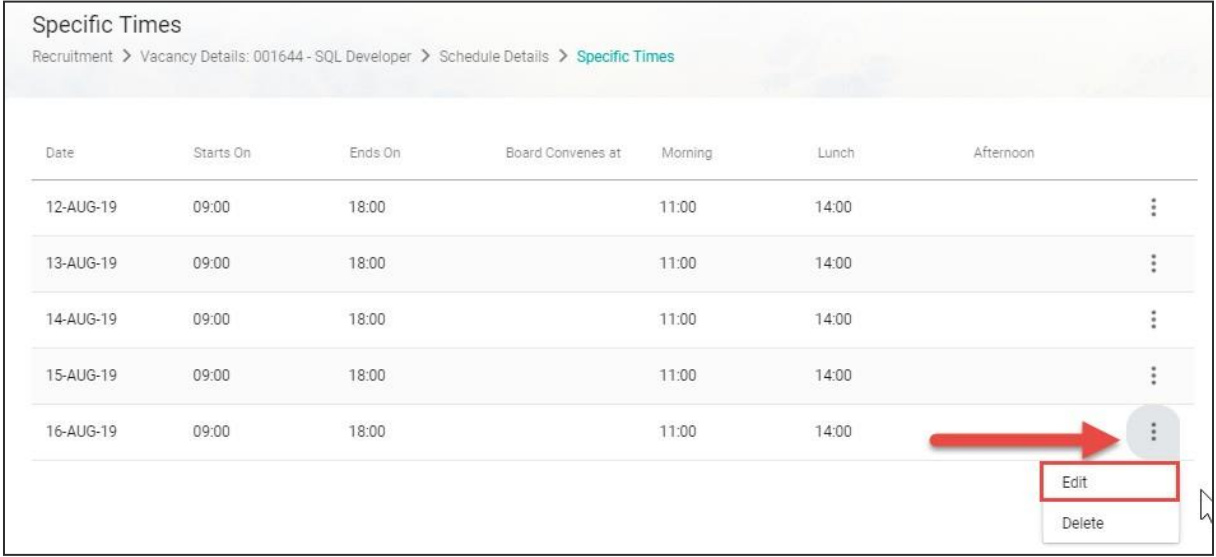

This is a useful option e.g. if you need to amend the times to allow for different break times, a half day etc for different dates.

To change the schedule details for a specific day:

1. Go to the *Specific Times* screen.

Each day on the schedule is available on each row and is populated with the default times that have been setup on the overall schedule.

2. Click the  button for the date and select **Edit**.

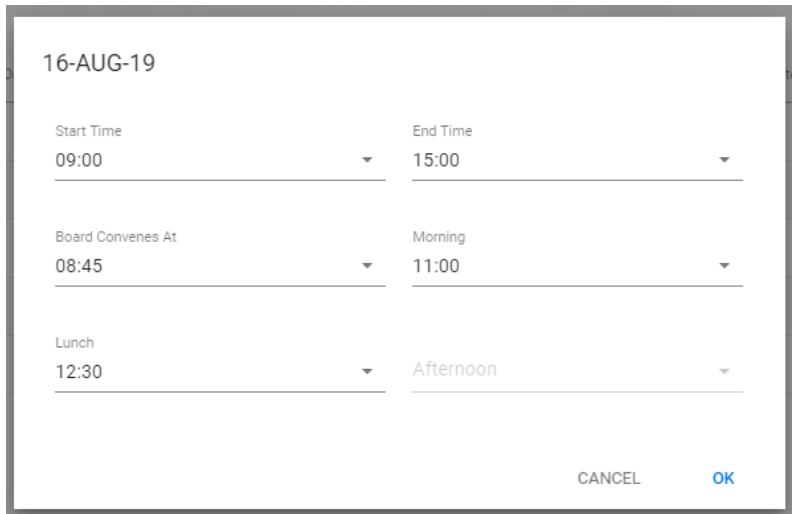

Specific Times
Recruitment > Vacancy Details: 001644 - SQL Developer > Schedule Details > Specific Times

Date	Starts On	Ends On	Board Convenes at	Morning	Lunch	Afternoon	
12-AUG-19	09:00	18:00		11:00	14:00		⋮

16-AUG-19	09:00	15:00	08:45	11:00	12:30	...

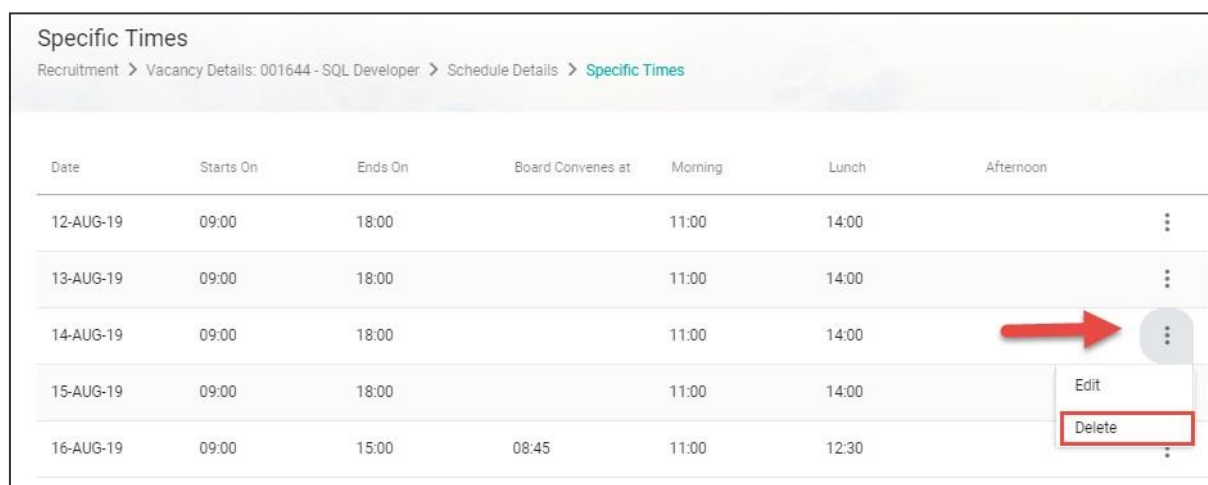

Removing a Date

Removing a date altogether ensures that no time slots are available for that date. To do this:

1. Go to the **Specific Times** screen.

Each day on the schedule is available on each row and is populated with the default times that have been setup on the overall schedule.

2. Click the  button and select **Delete**.

Date	Starts On	Ends On	Board Convenes at	Morning	Lunch	Afternoon
12-AUG-19	09:00	18:00		11:00	14:00	...
13-AUG-19	09:00	18:00		11:00	14:00	...
14-AUG-19	09:00	18:00		11:00	14:00	...
15-AUG-19	09:00	18:00		11:00	14:00	...
16-AUG-19	09:00	15:00	08:45	11:00	12:30	...

The date is automatically deleted from the schedule.

Inclusion / Exclusion of Weekend Dates

When creating a multi-day schedule, the system automatically calculates the days to be included based on the start and end date defined.

The system can be configured to include/exclude weekend dates when creating a schedule. To manage this section:

1. Go to *CoreHR Back Office > CorePersonnel > Recruitment > Recruitment Reference > Recruitment Parameters*
2. Update the **Allow Weekend Parameters** indicator.

5.8.4. Time Slots

The *Time Slots* option on the *Schedule* screen, allows for the recruitment administrator to view all available and assigned Time Slots for the schedule. It is also possible to manually assign time slots to an individual applicant via this screen.

This is based on the time slots identified by the system, using the details specified on the schedule i.e. Start & End Dates, Duration, Lead Time, Breaks etc. Where multi-day schedules are in use, the time slots generated and displayed is based on the day specific times.

The purpose of this screen is to provide an easier way for the recruitment administrator view and manage available time slots for each schedule.

Use of this screen to manage the assignment/unassignment of applicants on the schedule is covered in the next section.

The screen defaults to list all applicants that are linked to the vacancy, regardless of their current *Applicant Status* value.

- The **All Statuses** drop-down may be used to filter the applicants listed by *Applicant Status*.
- The **Search** feature may be used to search for an applicant by name.

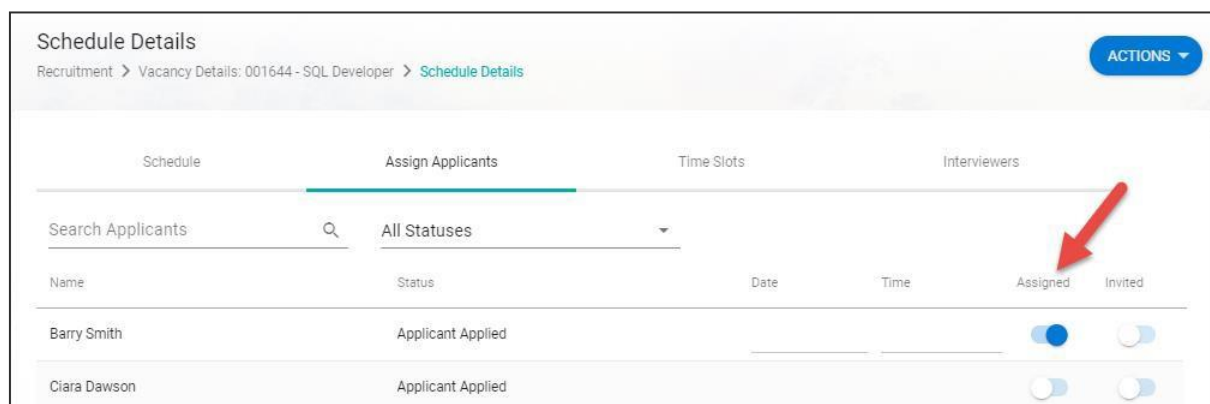

Manually Assigning Interview Time Slots

It is possible to manually assign an interview time slot to each individual applicant. This can be completed on both the *Assign Applicants* screen and on the *Time Slots* screen on the schedule.

Via the Assign Applicants Screen

To manually Assign Applicants via the Assign Applicants screen:

1. Select the **Assigned** indicator for the applicant.

This is saved automatically for the applicant on the schedule. Repeat this step for all applicants that you wish to manually assign.

2. Select the interview date by clicking into the *Date* field for the applicant and choosing from the drop-down list of available options.

Declan Nolan					☐
Peter Smith					☐

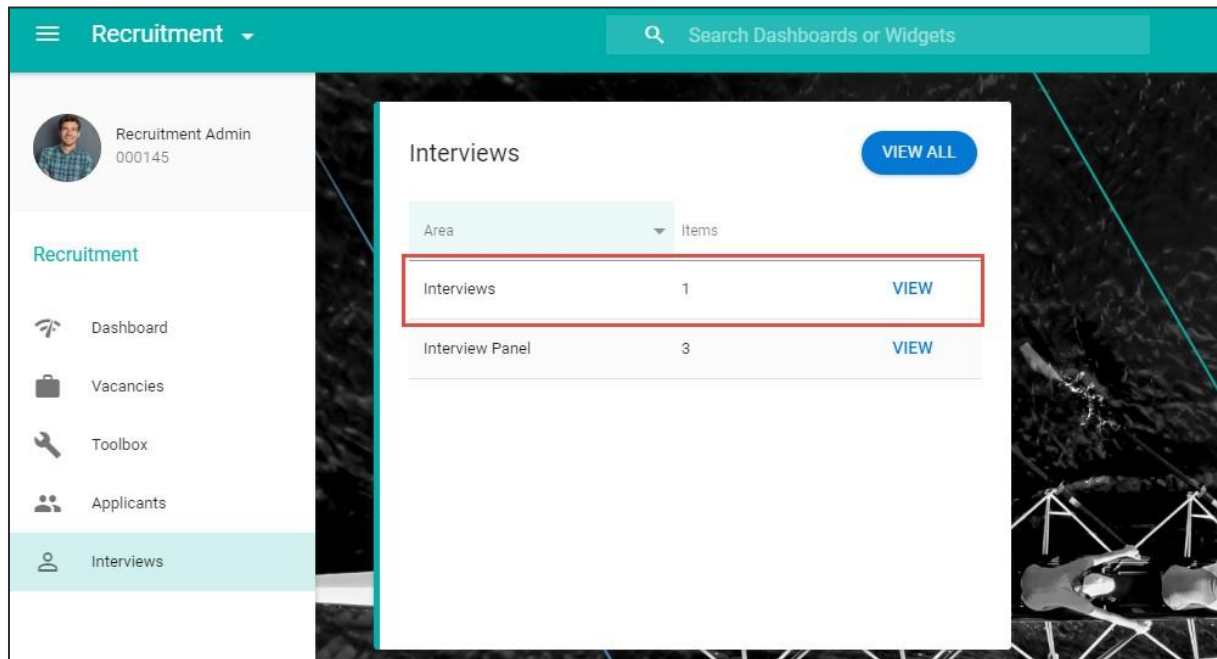

1 - 6 of 6

Those panel members are now assigned to the schedule and is able to view the schedule details and applicants assigned. See the next section for further details on this.

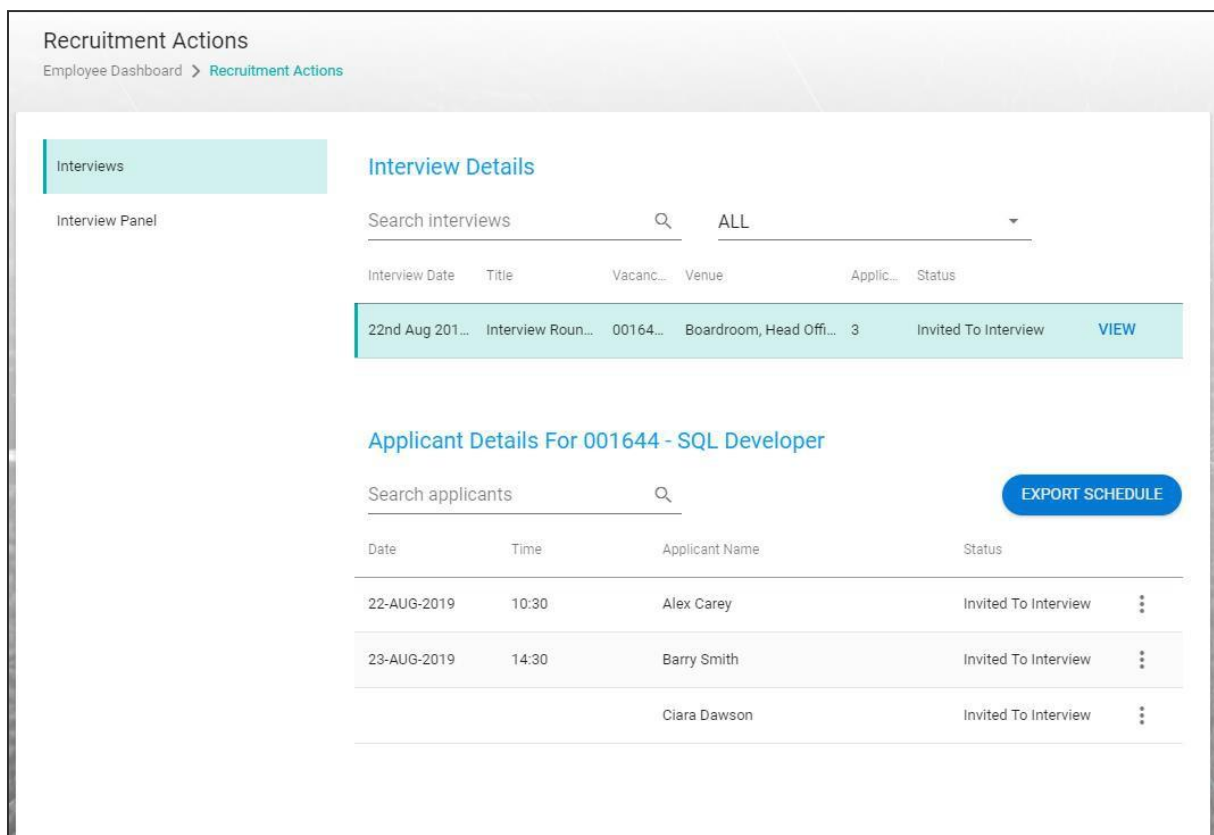

You can use the options **Generate Email** and **Generate Document** under the **Actions** button to send correspondence to the panel members to confirm details of the schedule that they have been assigned to.

Viewing Interview Schedules as a Panel Member

1. Quick jump to the *Interviews* widget on the Manager or Employee Dashboards (if configured)

2. Click the **View** button for the interviews area.
 - The next screen defaults to showing interviews for the next 5 days.
 - Select the drop-down box and click **ALL** to view all dates of schedules you have been assigned to.

 **Note:** Further details on the Interview Panel and detailed user guide are covered in the document *Move to Portal - Recruitment Interview Panel User Guide v27+* on the Community Portal

5.9. Edit / Update the Vacancy

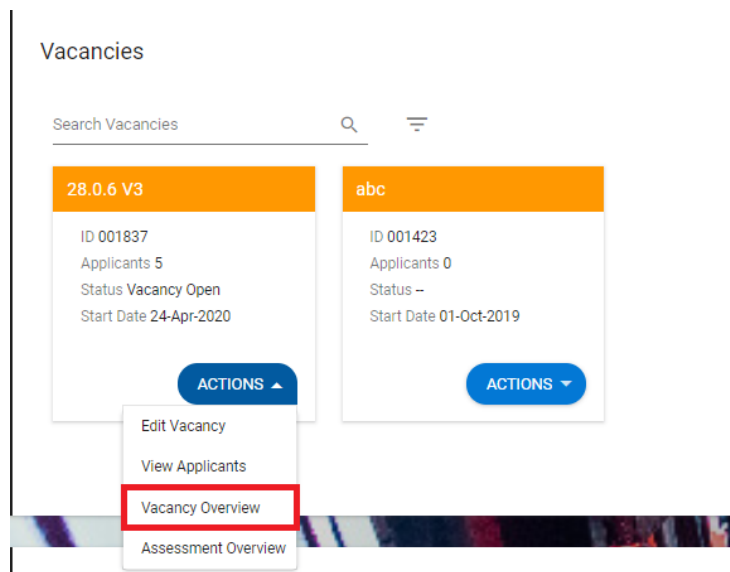

You can return to edit the details of a Vacancy at any stage in the recruitment process.

It is recommended that you complete as much of this as possible before you publish a vacancy, for applicants to review and apply for. However, it is possible to continue to edit this once the vacancy is live and advertised e.g. if you need to add a new document, update contact details etc.

5.10. Assign / Edit Vacancy Owner

To assign / edit a vacancy owner against a vacancy complete the following steps:

1. Go to the *Vacancies* > Select *Vacancy* > Select the *Actions* Dropdown > Select *Vacancy Overview*

2. Select *Actions* on the *Vacancy Overview* Screen > *Edit Vacancy Owner*
3. From the dropdown select the *Vacancy Owner*.

Note: For a **Vacancy Owner** to appear from the *Vacancy Owner* dropdown it requires the owner **having both a portal account and a back office account**. Please ensure the owner is set up this way.

Recruitment v27+ - Recruitment Admin on Portal - User Guide

The screenshot displays the 'Recruitment' portal interface. At the top, a red header bar contains a back arrow and the word 'Recruitment'. Below this, the 'Vacancy Overview' section shows a breadcrumb trail 'Recruitment > Vacancy Overview' and an 'ACTIONS' dropdown menu. The main content area is divided into three columns: 'Applicant Applied' (1), 'Appointment Accepted' (1), and 'Appointment Offer Made' (1). Below these, the 'Vacancy Details' section shows 'Vacancy Title' as 'Solution Architect', 'Vacancy ID' as '001202', 'Status' as '-', 'Start Date' as '2023-01-01', and 'Vacancy Owner' as 'No Vacancy Owner'. A modal titled 'Edit Vacancy Owner' is open, showing a dropdown menu for 'Vacancy Owner *' with options: 'COREHR', 'COREHR_PRT', 'PORTALADM' (highlighted), 'SAMPLE1', 'SAMPLE2', and 'SAMPLE3'. The 'Interview Panel' and 'Recent Applicant Activity' sections are also visible at the bottom.

5.11. Publish a Vacancy

5.11.1. How to Publish a Vacancy

A 'published' vacancy refers to when it is available for internal/external applicants to search and apply for. There is no specific button/trigger/status to publish a vacancy. Once a vacancy has been created, if the following mandatory details have been supplied, it determines if it displays or not.

If any of these details are not supplied, the vacancy may fail to appear to applicants on Portal or the Recruitment Website.

Application Form

A Default Application form must be linked to the vacancy. See Section [Update Vacancy Details](#) for further details.

Advertising Dates & Times on Vacancy Details - 1

The following table shows the items on the *Vacancy Details -1* screen that need to be entered to ensure a vacancy is published to applicants.

Item	Explanation
Internal - Opening Date	This is used as the earliest date a vacancy is to be published to internal applicants on the <i>Recently Opened Vacancies</i> widget on the <i>Employee Dashboard</i> .
Internal - Opening Time	This is used as the time the vacancy is to be published to internal applicants on the <i>Recently Opened Vacancies</i> widget on the <i>Employee Dashboard</i> .
Internal - Closing Date	This is used as the latest date a vacancy is to be published to internal applicants on the <i>Recently Opened Vacancies</i> widget on the <i>Employee Dashboard</i> .
Internal - Closing Time	This is used as the latest time a vacancy is to be published to internal applicants on the <i>Recently Opened Vacancies</i> widget on the <i>Employee Dashboard</i> .
External - Opening Date	This is used as the date the vacancy is to be published to external applicants on the recruitment website.
External - Opening Time	This is used as the time the vacancy is to be published to internal applicants on the recruitment website.
External - Closing Date	This is used as the latest date a vacancy is to be published to external applicants on the recruitment website.
External - Closing Time	This is used as the latest date a vacancy is to be published to external applicants on the recruitment website.

Note: The Opening Times and Closing Times default to 00:00 if there is a date entered but no time specified.

Company and Authorisation on Vacancy Details - 2

The following table shows the items on the *Vacancy Details -2* screen that need to be entered to ensure a vacancy is published to applicants.

Item	Description
Company	This is the company on the organisational hierarchy that must be added to the vacancy to display on the recruitment website.
Authorisation Details	This is the final level of approval (authorisation) on a vacancy before it can be published on the recruitment website. This is accessed via the Actions button > Authorisation Details . All recruitment admins can complete this task. Consider this final checkpoint, before the vacancy is published.

To authorise a vacancy:

1. Go to *Portal Recruitment Dashboard > Vacancies tab > Vacancies* widget.
2. Search for a vacancy.
3. Click on the **Actions** button and select. **Edit Vacancy**.
4. Select the **Vacancy Details-2** tab.
5. Click on the **Actions** button and select **Authorisation Details**.

This opens the *Authorisation Details* screen.

6. Enter a Date which is the authorisation date. Your username is entered as the *Authorised By* user.

Job Description

Job Description for this Vacancy

Head of Technology

Overview

A Head of Technology Information Security (including Cyber Security) Risk Manager is required for ABC Solutions. The role will provide oversight, challenge and assurance across a number of key areas of Technology and information security, with periodic reporting to Senior Operating and board committees.

Key Areas of responsibility include:

- Implementation Testing oversight and assurance of IT and IS policies
- Recommending enhancements as required
- Maintaining and updating the organisation IT risk management framework
- Contributing to significant technology related change risk assessments

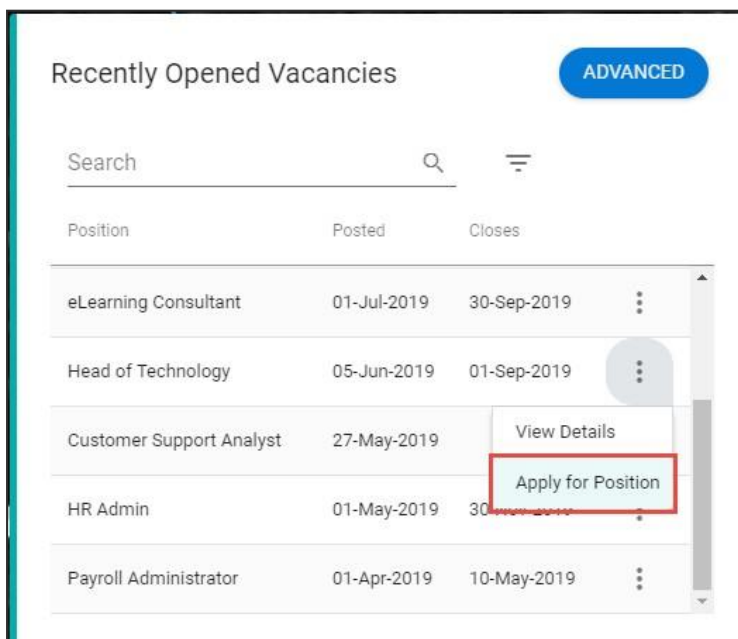

Job ID : 001704 Close Date : 01-Sep-2019

[Return to Summary](#) [Save](#)

If you have configured the *Copy of Previous Application Forms* screen, this appears first if you have applied for vacancies in the past.

The screenshot shows the corehr portal interface. At the top, the logo 'corehr' is visible. Below it, a dark blue bar displays 'GMT Date & Time 13-August-2019 15:17'. A welcome message 'Welcome Back Recruitment Admin' is shown. On the left, a 'Navigation Section' lists links: Search Vacancies, Application History, My Account, My Profile (with a sub-link to change profile details), Equal Opportunities Policy (with a sub-link to review a printable version), and Logout. The main content area is titled 'Copy of Previous Application Forms'. It contains a table with columns: Vacancy ID, Job Title, Vacancy Description, and Select. The table lists two vacancies: 001385 (Training Administrator, Client Training Administrator) and 001584 (Payroll Administrator). Each row has a 'Select' button. Below the table is a 'New Application' button.

Vacancy ID	Job Title	Vacancy Description	Select
001385	Training Administrator	Client Training Administrator	Select
001584		Payroll Administrator	Select

New Application

- There is also an option on the *Recently Opened Vacancies* widget only, for internal applicants to jump to the main Recruitment Website and browse for all vacancies listed there. To do this, click the **Advanced** button.

The screenshot shows the 'Recently Opened Vacancies' widget. At the top right, a blue button labeled 'ADVANCED' is highlighted with a red rectangle. Below the title, there is a search bar and a filter icon. The table below has columns: Position, Posted, Closes, and a vertical ellipsis for actions. The table lists five vacancies: eLearning Consultant (01-Jul-2019 to 30-Sep-2019), Head of Technology (05-Jun-2019 to 01-Sep-2019), Customer Support Analyst (27-May-2019), HR Admin (01-May-2019 to 30-Nov-2019), and Payroll Administrator (01-Apr-2019 to 10-May-2019).

Position	Posted	Closes	
eLearning Consultant	01-Jul-2019	30-Sep-2019	⋮
Head of Technology	05-Jun-2019	01-Sep-2019	⋮
Customer Support Analyst	27-May-2019		⋮
HR Admin	01-May-2019	30-Nov-2019	⋮
Payroll Administrator	01-Apr-2019	10-May-2019	⋮

This opens the recruitment website on the *Search Vacancies* screen.

Note: You will notice that you are already logged in as an internal applicant with the option to search and apply for vacancies.

The screenshot shows the corehr portal interface. At the top, the logo 'corehr' is displayed. Below it, a dark blue bar contains the text 'GMT Date & Time 13-August-2019 15:22' and 'Welcome Back Paul Martin'. On the left, a 'Navigation Section' lists links: Search Vacancies, Application History, My Account, My Profile (with a sub-link 'Click to change profile details'), Equal Opportunities Policy (with a sub-link 'Click here to review a printable version of the Equal Opportunities Policy'), and Logout. The main content area is titled 'ABC Solutions Open Vacancies' and includes a welcome message: 'Welcome to the ABC Solutions Recruitment Website. Please enter your search criteria below to search for Vacancies currently open within the Organisation.' Below this, there are search filters: 'Job Title' (a dropdown menu set to 'All'), 'Vacancy ID' (a text input field), 'Vacancy Type' (checkboxes for 'All' (checked), 'Manual', 'Named Appointment', and 'Professional/Technical'), 'Department' (a dropdown menu with options 'All', 'Admin Security', 'Budget', and 'Digital Marketing'), and 'Keyword Search' (a text input field). A blue 'Search' button is located at the bottom right of the search criteria section.

External Applicants

As an external applicant, the vacancy is published to the recruitment website and appear initially on the search results screen once you search for a vacancy. The vacancy only appears between the external open date and external closing date as is specified in section Vacancy Details - 2 above.

Note: Applicants need to register/login here to apply for the vacancy.

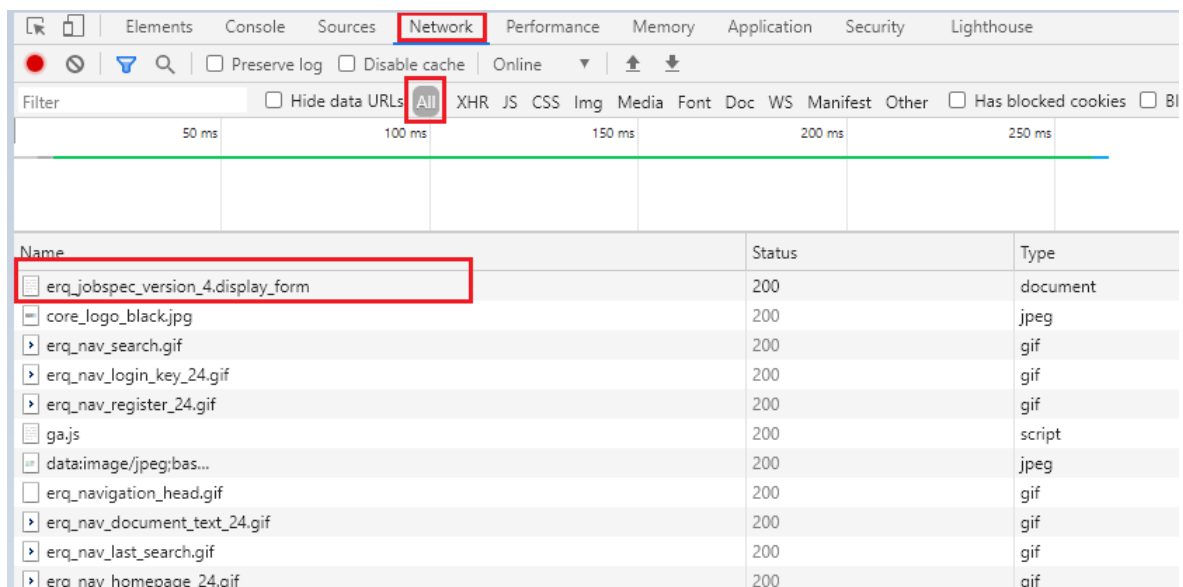

This screenshot is identical to the one above, showing the corehr portal interface. However, the top dark blue bar now displays 'GMT Date & Time 08-August-2019 12:21' and 'Welcome Back Recruitment Admin'. The rest of the page, including the navigation section and search criteria, remains the same.

5.11.3. How to Create a Direct Recruitment URL / Link to External Vacancy / Competition

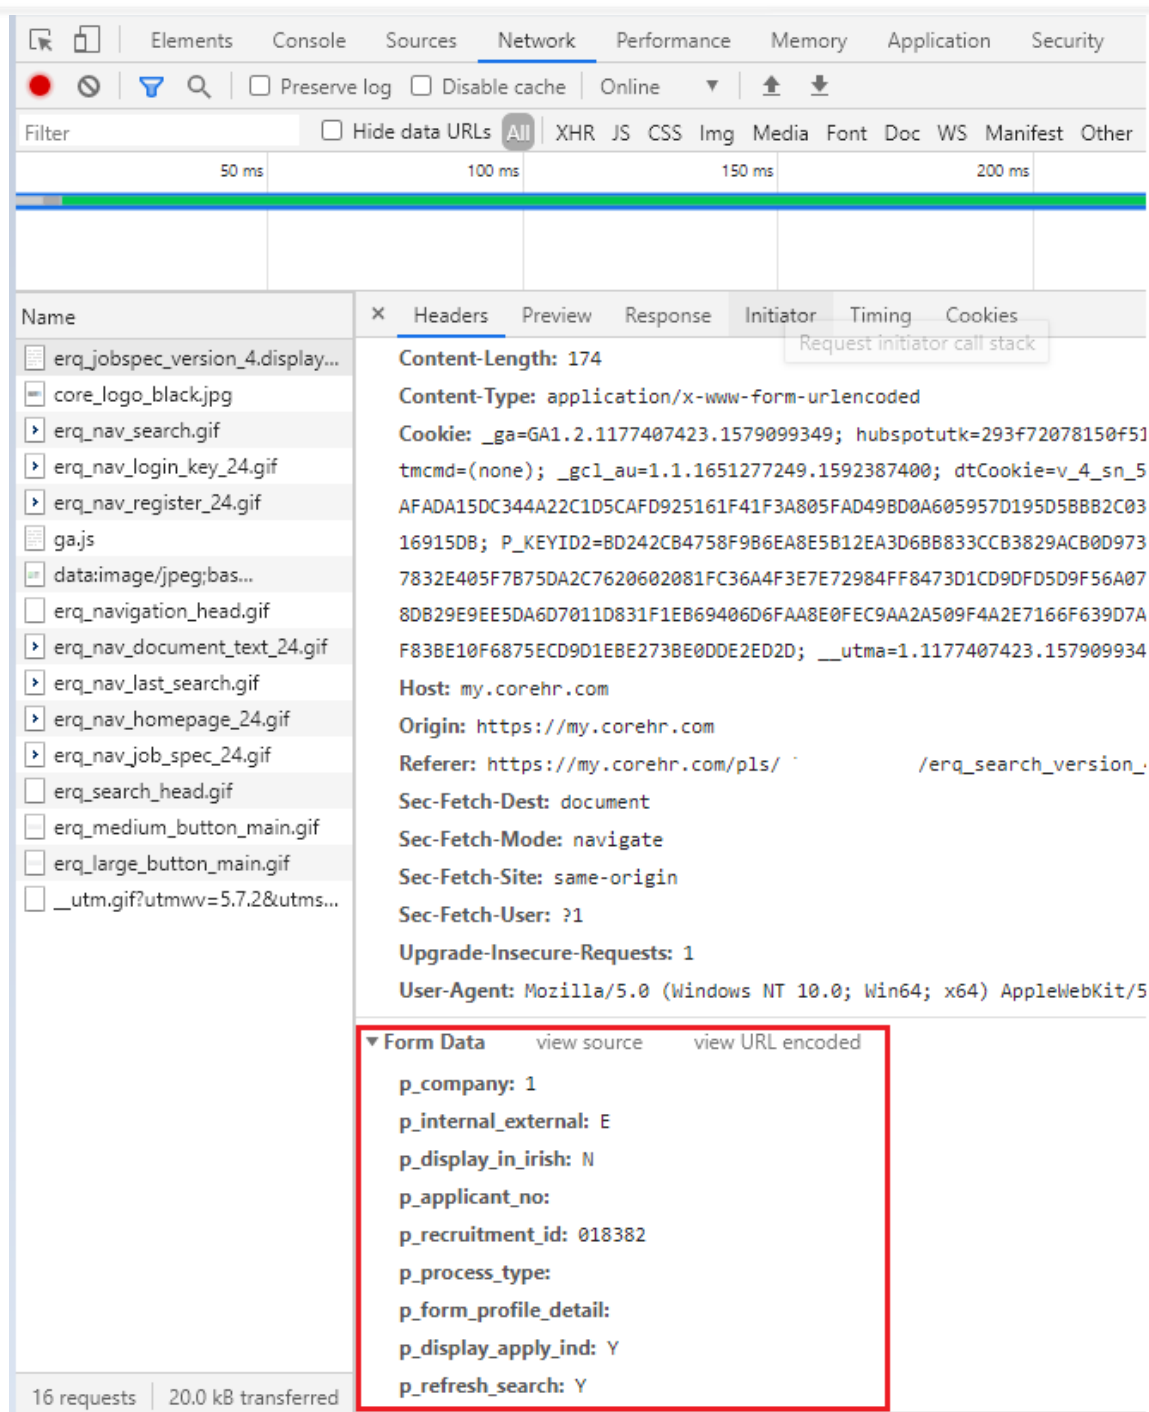

This details how you can create a direct URL to a specific vacancy / competition on the external recruitment website.

Note: These steps below are related to a user running Google Chrome. For other browsers - please discuss and work together with Local IT Department to ensure the correct steps are taken.

1. Using Google Chrome visit E-Recruitment / External Recruitment Website
2. Select F12 on the Keyboard (This brings up a screen called DevTools)
 - Select Network
3. Select the Vacancy/Competition on the main screen (that you want to create the link for)
4. Click on **erq_jobspec_version_4.display_form** in Dev Tools (see below example screenshot)

5. Scroll to the bottom of this screen where you will see the **Form Data** Information (we will use this data to create the direct recruitment URL)

The screenshot shows the 'Network' tab of a web browser's developer tools. A list of requests is on the left, and the 'Headers' tab is selected for the first request, 'erq_jobspec_version_4.display...'. The 'Form Data' section is highlighted with a red box, showing the following data:

- p_company: 1
- p_internal_external: E
- p_display_in_irish: N
- p_applicant_no:
- p_recruitment_id: 018382
- p_process_type:
- p_form_profile_detail:
- p_display_apply_ind: Y
- p_refresh_search: Y

6. The URL will be made up as follows:

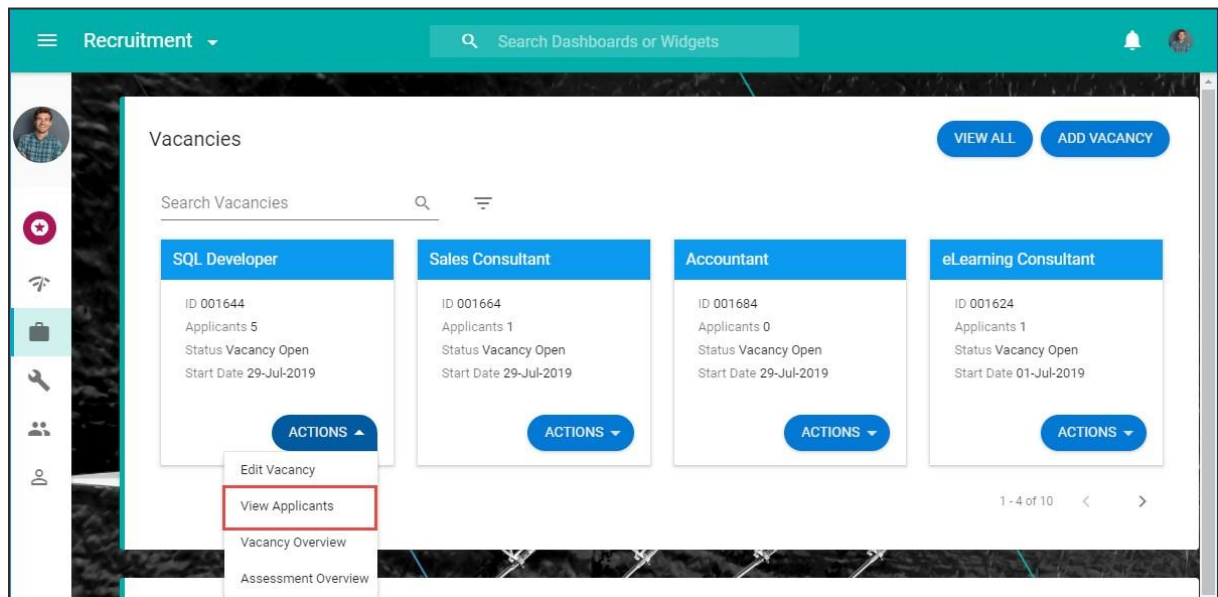

- **Original default URL** – e.g.
https://qamy.corehr.com/pls/coreportal_qa281/erq_jobspec_version_4.display_form
- **Add a '?' at the end** – e.g.
https://qamy.corehr.com/pls/coreportal_qa281/erq_jobspec_version_4.display_form?
- **Then add the individual form data with a '&' between each one** – e.g. the final URL should look something like this

- https://qamy.corehr.com/pls/coreportal_qa281/erq_jobspec_version_4.display_form?p_company=1&p_internal_external=E&p_display_in_irish=N&p_applicant_no=&p_recruitment_id=018382&p_process_type=&p_form_profile_detail=&p_display_apply_ind=Y&p_refresh_search=Y

5.12. Viewing Applicants of a Vacancy

To view applicants for a vacancy:

1. Go to *Recruitment Dashboard > Vacancies tab > Vacancies widget*.
2. Search for a vacancy
3. Click the **Actions** button and select **View Applicants**.

This brings you to a screen where all applicants who have applied for this vacancy is displayed.

 Ciara Dawson	Applicant Applied		<1 Year	Abc Solutions		0%	REMOVE

5.12.3. Update Applicant Status

The process of updating an applicant's status is one of the main features in recruitment that is needed to move applicants along from having applied to being invited to interviews, eventually being sent an offer to the job and then becoming a successful applicant that is to be hired into People Management.

There is also an email feature which allows for an email to be generated, based on the update of the applicant's Applicant Status value on the system. Details of this are provided in the ***Move to Portal - Configuring Recruitment Admin Guide v27+*** user guide.

Updating Applicant Status Manually

To update an applicant's status manually:

1. Go to *Recruitment Dashboard > Vacancies tab > Vacancies widget*.
2. Search for a vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Search for an applicant.
5. Click on the  button and select **Edit Status**.

This opens the Edit Status pop-up box with the following options:

- Current Status* (the applicant status the applicant has now).
- Status* (the new applicant status for the applicant).
- Comments (optional comment that you can include at this point).

Edit Status: Declan Carey

Current Status

Updating Applicant to be included for...

CANCEL OK

Possible options for a user to update an applicant's status to are explained below in this table:

Description	Explanation
Applicant Applied	Initial status that an applicant has when applying.
Applicant Shortlisted	Applicant put on shortlist
Applicant Successfully Hired	Applicant has been brought onto people management as a new starter, rehire or change in contract
Application Pack Sent Out	An application pack has been sent out to interview panel members to view their applicants.
Appointment Offer Made	Your organisation has sent an offer letter to the applicant in question.
Appointment Offer but Declined	The applicant as refused to accept your job offer.
Invited to Interview	The applicant has been invited to an interview.

Description	Explanation
Offer Accepted	The applicant has accepted the offer that you have provided.
Successful at Interview	The applicant has been successful at the interview round of this vacancy.
Unsuccessful at Interview	The applicant has gone through the interview process but has not been selected to go forward to any other rounds.
Withdrawn Application	This applicant has withdrawn their application.

Note: Your organisation may configure many other applicant statuses to be used in the recruitment process. Please refer to the ***Move to Portal – Configuring Recruitment Admin Guide v27+*** on the Community Portal for steps on setting up new applicant statuses or editing existing ones.

Updating Applicant Status in Bulk

It might be easier to update and manage the applicant statuses of applicants in bulk if there are changes to be made across many applicants. To do this:

1. Go to *Recruitment Dashboard > Vacancies tab > Vacancies widget*.
2. Search for a Vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Within this screen, click on the **Actions** button and select **Bulk Update**.

Applicant Details: 001644 - SQL Developer

Recruitment > Applicant Details: 001644 - SQL Developer

Search Applicants

Applicant	Type	Status	Experience	Location	Comments	Progress
LB Lucy Black (A1873) Budget Analyst	Internal	Applicant Applied	<1Year	UK	0	0%
EC Edward Callahan (A1892)	External	Applicant Applied	<1Year	Ireland	0	0%

Actions:

- Compare Applicants
- Bulk Update**
- Generate Applications
- Generate Document
- Generate Email

By clicking Bulk Update, the status of multiple applicants can be updated at one. The user can then select applicants depending on their status, and update from one status to another.

This screen defaults to showing all applicant statuses.

5. Select the applicants that you wish to update by clicking on each applicant, one after the other. These become highlighted.

Choose the *New Status* to update all selected applicants

5.13. Generate / Merge Applicant Packs

The Generate Applications feature in recruitment is used to make applications available in an interview pack for interviewers in the following way:

- For each selected application, all documents attached to the application which are not in .pdf format are converted into .pdf format.
- The applicant's online application is then merged with all the .pdf documents and the converted .pdf documents.
- All applicant details generated can then be merged into one file (i.e. containing all applicant applications) which can then be printed out for interview panel members as part of the interview pack.

To access the generate applications feature:

1. Go to *Recruitment Dashboard > Vacancies tab > Vacancies widget*.
2. Search for a Vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Within this screen, click on the **Actions** button and select **Generate Applications**.

Generate Applications in progress message appears

The items on the following items appear on screen when the document has been merged successfully:

Item	Explanation
Created Document	This shows as either Yes or No. It is an indicator showing they the generation process is complete.
Error	This shows as Error if there was a problem in the generation process
View Creation Document	Click the  button and select View Creation Document , to allow you to view and download the document that has been generated for this applicant.
View Generation Errors	Click the  button and select View Generation Errors , to allow you to view any errors that may have stopped the generation process from completing.

5.13.2. Merge Applications screen

This feature allows you to generate application forms belonging to all applicants and merge them together into one document that can be easily be print read by an interview panel member.

To carry this out:

2. Go to *Portal Recruitment Dashboard > Vacancies tab > Vacancies* widget.
3. Search for a vacancy.
4. Click on the **Actions** button and select **View Applicants**.
5. Within this screen, click on the **Actions** button and select **Merge Applications**.
6. Select the applicants you want to display their applications in the merged file and click on the **Merge Application** button.

Once complete, a single PDF file is available for you to download, that includes all of the individual 'generated applications' for each applicant

5.14. Applicant Correspondence

5.14.1. Sending Correspondence to Applicants

At all stages throughout the recruitment process, it is possible to automatically generate correspondence to the applicant from the system.

For example:

- An automatic notified to confirm the application has been received.
- An email to confirm that they have been shortlisted.
- An email to invite them to attend an interview.
- A hard copy of a printed offer letter.

There are several ways that correspondence can be configured.

Correspondence Type	Description
Recruitment website alerts	These are automated notifications sent to the applicant triggered by a task that they have completed on the recruitment website e.g. submitting an application.
Applicant Status emails	When an applicant status is updated, you can configure the system to give you the option to send an email directly to the applicant e.g. if the status was update to Application Withdrawn, an option may appear with a pre-populated email that you can update, attach documents to, and send to the applicant. See the <i>Move to Portal – Configuring Recruitment Admin User Guide v27+</i> available on the Community Portal for further details.
Generate Document	The document and email generation functionality is available in recruitment to produce a mail merged document which includes vacancy and applicant details e.g. this could be used to produce a hard copy of the job offer letter. This is a suitable option for any correspondence that need to be sent to the applicant rather than emailed. See <i>Document and Email Generation</i> user guide on the CoreHR University for full details on how to configure these and where they are available from.
Generate Email	As per Generate Document, this allows you to generate an email to send to one or many applicants using a pre-configured email template e.g. you could use this option to send an email in bulk to all applicants who have not been shortlisted for a vacancy.

Correspondence Type	Description
	See Document and Email Generation user guide on the CoreHR University for full details on how to configure these and where they are available from.
EMS	EMS alerts can also be sent to applicants and interview panel members as records are updated in the system. The following are the relevant EMS event categories for recruitment: • Recruitment Advertising Events • Recruitment Applicant Events • Recruitment Events

7.2. What is the Applicant Correspondence Screen?

Note: All of this functionality is covered in a separate user guide called **Move to Portal - Recruitment Applicant Correspondence v27+** user guide on the Community Portal.

Applicant correspondence is displayed on the Applicant Details screen, under *Applicant Details > Correspondence*.

5.14.3. What Correspondence Types are Not Included?

The following applicant correspondence types are not captured / displayed on the *Applicant Details > Correspondence* screen.

- Any reply emails from an applicant, in response to an email that has been sent from CoreHR. Those emails are not captured on CoreHR. They are directly emailed to the mailbox of the 'From' email address.
- Applicant notifications via the Recruitment Website are not be included in the correspondence section. These are the job alert notifications that the applicants can sign up for:

Notification Options

Select the notification options below. To select multiple items use CTRL+ Click

Switch on email notifications ☐

Notify me when vacancies are advertised ☐

Send one notification every night with new adverts ☐

Notify me when vacancies are closing ☐ Hours before closing date

Notify me when I have unsubmitted applications ☐ Hours before closing date

- Emails triggered to send to the applicant via the *Email Parameters* settings i.e. *CoreHRBack Office > CorePersonnel > Recruitment > Recruitment Reference > ERecruitment Web Parameters > Email Parameters*.
- Any correspondence not sent to the applicant e.g. sent to the interview panel, references etc.

Any other email / correspondence type not listed in above.

5.15. Successful Applicants

5.15.1. Identifying Successful Applicants

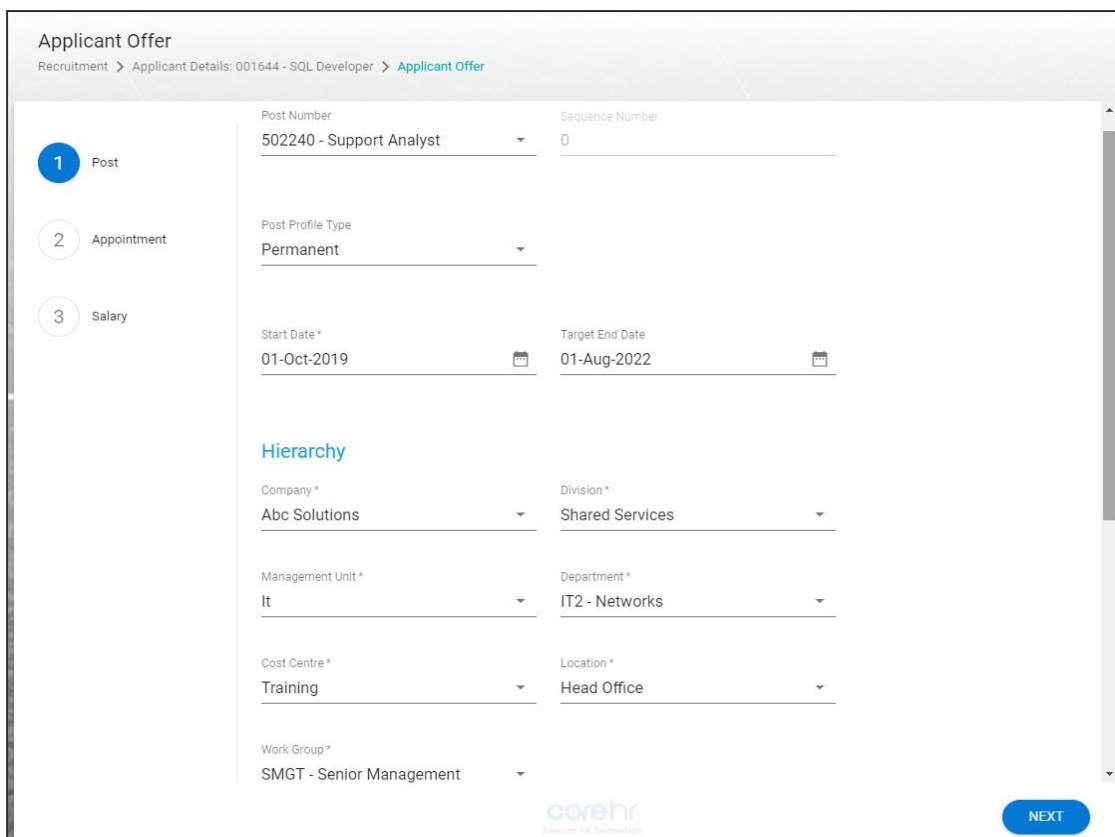

A successful applicant is one that has gone through the recruitment process and has passed any interview rounds or assessments and has been shortlisted for the role. This applicant is now awaiting an offer for the job in your organisation.

5.15.2. Applicant Offers

Create Offer

This is the final stage of the recruitment campaign for a vacancy. To create a job offer, it is required that you give an applicant the correct status to correctly show that an offer has been made. This means that applicant offers are triggered based on the selection of an appropriate applicant status value. This status is *Appointment Offer Made*.

1. Go to *Recruitment Dashboard > Vacancies tab > Vacancies widget*.
2. Search for a Vacancy.
3. Click on the **Actions** button and select **View Applicants**.
4. Search for an applicant.
5. Click on the  button and select **Edit Status**
6. Select "Appointment Offer Made" and the following *Offer Wizard* screens opens:

**Note:**

- If the Staff Request process and / or Post Management is being used, the appointment that has been linked to the vacancy is used here to pre-populate the offer details.
- This includes information on the Post screen and the Salary screen; however details can be updated as required.

- This is a 3-step wizard that guides you through the selection of the post that this applicant is to sit into once successfully hired.
- As part of the vacancy creation, please review section [Vacancy Details - 1](#) where the linked post details becomes available to be seen here.

12. Ensure that the following fields are filled out as this is filtered through to the New Starter wizard when the successful applicant is being brought into people management:

- Pay Rate Type
- Pay Scale
- Scale Point
- Rate (Hourly, Daily, Weekly or Annual)
- Multiplier (This should be consistent with the FTE value on the Appointment screen)

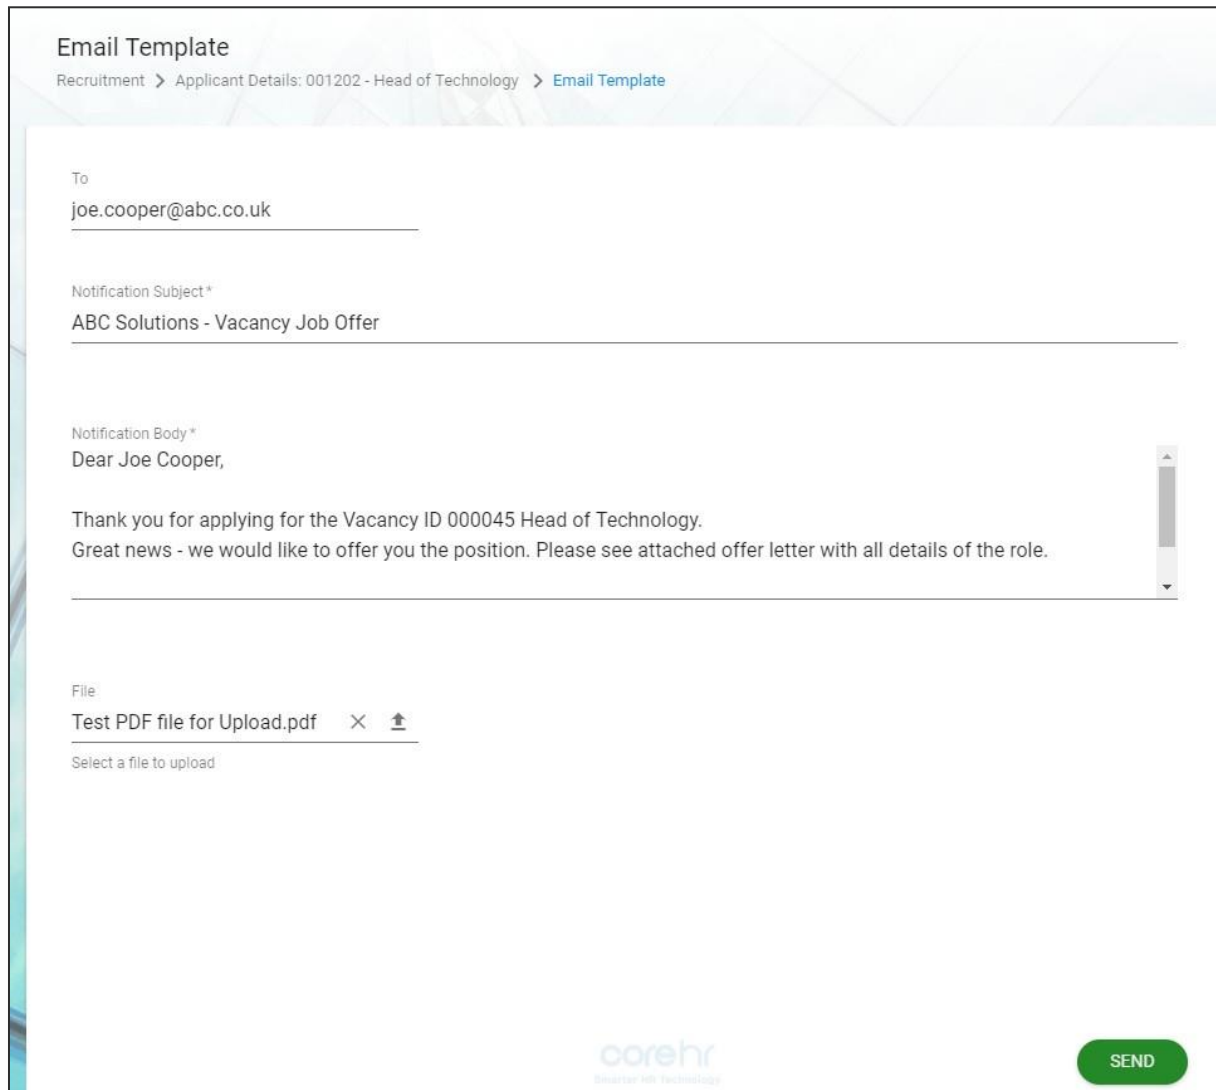

- Amount

13. Click the **Save** button to confirm the job offer details.

The applicant's status has now updated to be *Appointment Offer Made*.

Manual Job Offer

Offers can also be made using the Applicant Status Email functionality. If configured, the Email Template screen opens when the Applicant Status has been updated. This email is pre-configured but can be updated as required and you can also attach documentation before sending the mail.

The screenshot shows the 'Email Template' configuration interface. At the top, there is a breadcrumb trail: 'Recruitment > Applicant Details: 001202 - Head of Technology > Email Template'. The main form area contains the following fields:

- To:** A text field containing 'joe.cooper@abc.co.uk'.
- Notification Subject *:** A text field containing 'ABC Solutions - Vacancy Job Offer'.
- Notification Body *:** A large text area containing the message: 'Dear Joe Cooper, Thank you for applying for the Vacancy ID 000045 Head of Technology. Great news - we would like to offer you the position. Please see attached offer letter with all details of the role.'
- File:** A section for attaching files, showing a single attachment 'Test PDF file for Upload.pdf' with a close button (X) and an upload icon.

At the bottom right of the form is a green 'SEND' button. The CoreHR logo is visible in the bottom center.

Note: This offer email is pre-configured based on the new applicant status. This includes fields automatically populated from the vacancy. Refer to the **Move to Portal - Configuring Recruitment Admin Guide v27+** on the Community Portal for details on how to create these.

Applicant Accepts / Rejects Offer

Option 1: Online Acceptance

If the applicant has been issued the offer online and accepted/rejected this:

- Their Applicant Status is updated.
- You can track a history of this on the Applicant Correspondence screen.

Option 2: Manually Acceptance/Rejection

The recruitment administrator can update the Applicant Status to reflect whether they have accepted/rejected the offer.

When an applicant has been flagged with the correct Applicant Status to say that they have accepted the offer, they are ready to be onboarded to HR as an employee.

Note: Applicant Status configuration and settings are covered in the *Move to Portal - Configuring Recruitment Admin Guide v27+* User Guide on the Community Portal.

5.15.3. Onboarding Successful Applicants to HR

Searching for a Successful Applicant

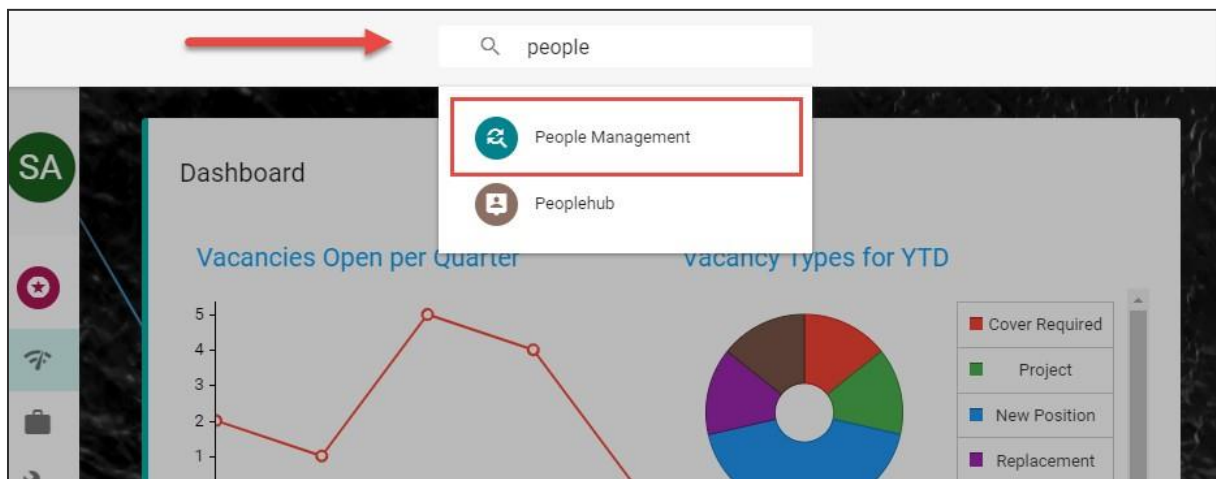

Once a successful candidate has accepted the job offer and has been set to the correct applicant status, the applicant is available to review on the *Applicants* section of the *Command Centre* in People Management.

To get to this area:

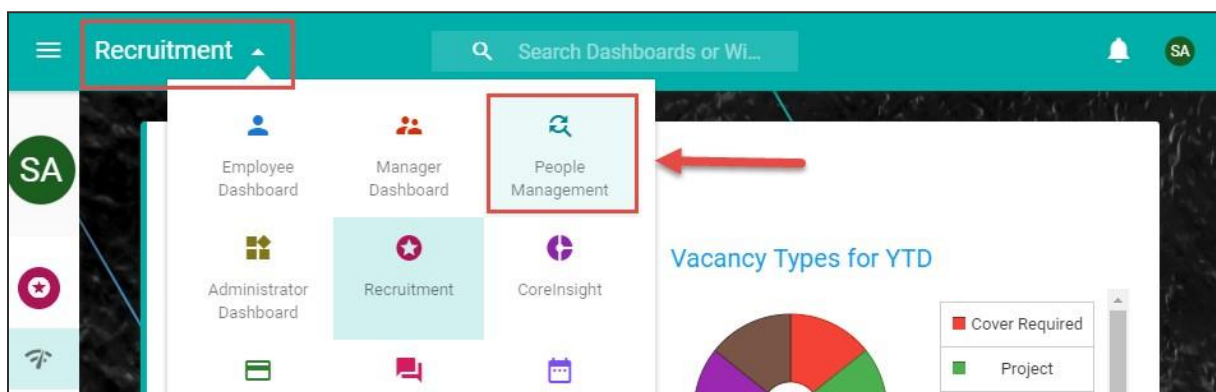

1. Quick jump to *People Management*.

There are two access points:

- a. The **People Management** option on the Quick Jump menu.

- b. The **People Management** option on the Dashboard menu:

2. Select the *Dashboard* tab > *Command Centre* widget > *Applicants*.

The screenshot shows the 'People Management' dashboard. On the left is a sidebar with icons for SA, a magnifying glass, a speaker, and a grid. The main area is titled 'Command Centre' and contains a grid of statistics with 'VIEW' buttons. The 'Applicants' row is highlighted with a red box.

Category	Count	Action
Employees	204 Currently Active Employees	VIEW
Transfers	1 Transfers Pending	VIEW
Applicants	8 Applicants	VIEW
Salary Approvals	0 Salaries Pending	VIEW
Onboarding	887 Pending	VIEW
Starters	1 Starters Pending	VIEW
Leavers	0 Leavers Pending	VIEW
Probation	4 Probations Pending	VIEW

- Click on the **View** button.

This screen shows all available successful applicants that have had offers accepted via the recruitment module.

Note: The applicant only appears on this screen once their offer has been accepted and their applicant status updated accordingly.

The screenshot shows the 'Successful Applicants' screen. It includes a search bar and a table with columns: Name, Applicant No, Personnel No, Vacancy ID, Vacancy Name, Start Date, Post Code, and Action. The table lists eight successful applicants. At the bottom right is an 'APPLY' button.

Name	Applicant No	Personnel No	Vacancy ID	Vacancy Name	Start Date	Post Code	Action
Cathy Looney	A1874	000023	001384	Budget Admini...	07-Aug-2017	502219-0	New Appointm...
Liam Gordon	A1872		001384	Budget Admini...	07-Aug-2017	502219-0	New Starter
Joan Mullins	A1850		001383	Training Admini...	07-Aug-2017	502201-0	New Starter

Bob Hawke	A1894		001463	Junior Accounts	16-Apr-2018	502241-0	New Starter
Fiona Robinson	A1931	000033	001443	HR Manager	21-May-2018	502207-0	New Appointm...
Carey Declan	A2193	000226	001624	eLearning Cons...	11-Mar-2019	502209-9	New Appointm...

The following table outlines the items that are seen on this screen:

Item	Explanation
Name	The name of the successful applicant.
Applicant No	The unique applicant number given to the applicant.
Personnel No	This is the employee reference of an existing employee of the organisation if they already exist in the system.
Vacancy ID	This is the unique vacancy number given to the vacancy the applicant applied for.
Vacancy Name	The name of the vacancy.
Start Date	This is the planned start date the applicant will have.
Post Code	This is the appointment id / post number the applicant is assigned to once successfully hired.
Action	This is the type of applicant to be onboarded. - New Starter - New Appointment - Rehire

Creating a New Starter

Following on from searching for the applicant one of the actions highlighted for an applicant is New Starter.

Note:

- The applicant is flagged as a *New Starter* on this screen i.e. someone who has never worked in your organisation before. This is confirmed as the *Personnel No* field is not populated for the applicant.
- This applicant is given a new personnel no that does not exist on the system already.

View Contract button

This opens the *Applicant Offer* screen in read-only mode for you to review. This is the same screen as you would have amended and updated with the appropriate offer details for the applicant.

Applicant Link button

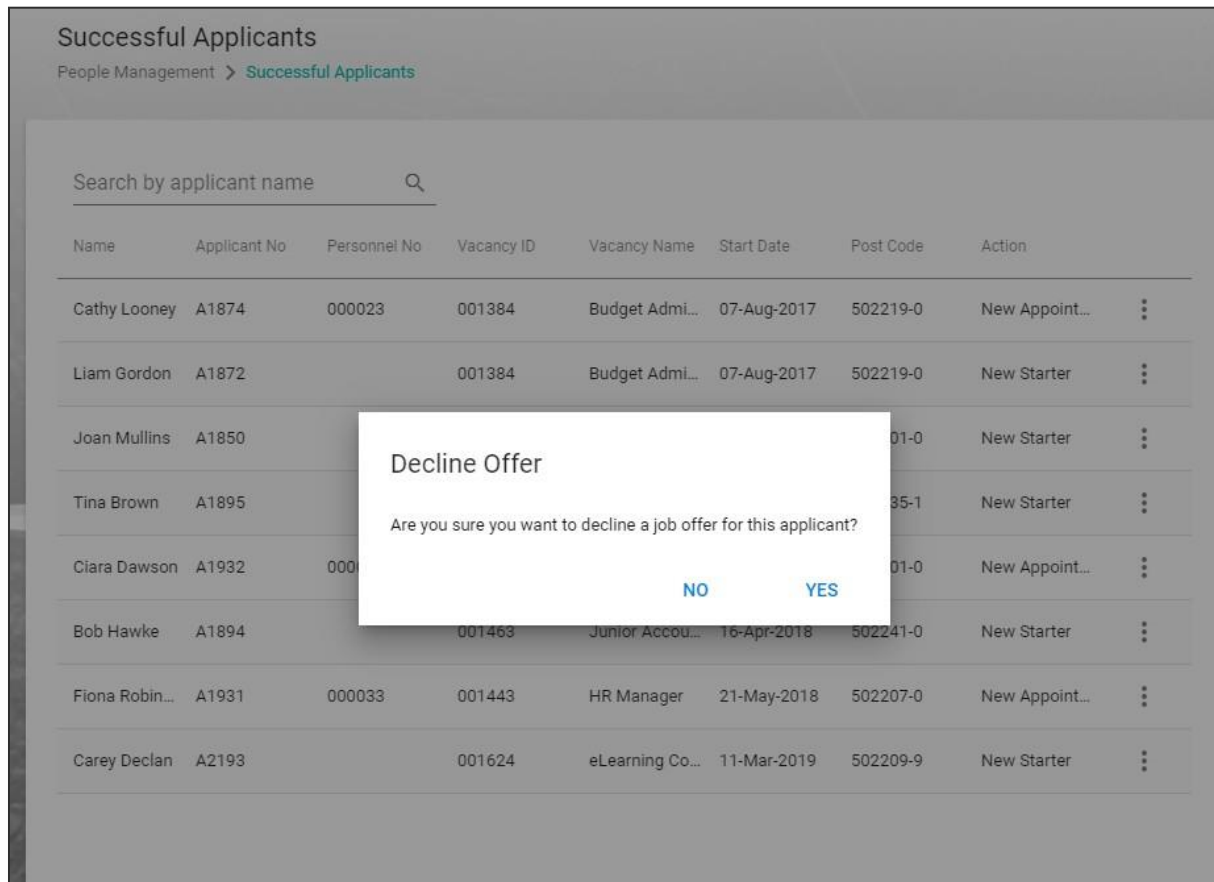

This allows you to view and update any employee record that may be already set-up on the system for this applicant's record. To link an employee or an applicant:

1. Click on the **Link Employee / Link Applicant** dropdown lists.
2. Find the record in question that may be linked or duplicated by this applicant.
3. The Employee Link & Applicant Link sections is populated by your choice

If there is now an employee linked to this applicant, the applicant is no longer flagged as a new starter.

Decline Job Offer

This option is available for you to remove the applicant from the *Successful Applicants* screen, if the applicant is no longer required/available to fill the role that was offered to them. Once the **Decline Job Offer** option is selected, the following confirmation message is shown:

The applicant is then removed from the successful applicant list if the **Yes** button is clicked.

Apply button

This button allows you to complete the onboard process for the applicant record. To do this:

1. Ensure an applicant record is highlighted on screen and click the **Apply** button.
2. The *Duplicate Employee* screen appears which allows you to carry out a search for a record that might match this applicant's details
 - a. Enter the applicant's name or PPS No / Social Security Number
 - b. Click on the  button to search

Note: CoreHR recommends that you search by PPS No / Social Security number as the name supplied on the application may not match exactly to the details that are currently stored on the system for that employee.

3. If there is no match, click on the **Create New Employee** button.

- Salary Information. This screen allows you to assign a pay group to the employee and confirm their pay details are correct.

 **Note:** If there are any details that are not pre-populated or completed at the time of proceeding on each screen, the system prompts you for completion.

Once the wizard has been completed and the employee successfully rehired, their employee record opens automatically. Typically, this opens on the Task List screen, if you have a Rehire task list configured.

6. Toolbox Widget

Functionality available from the toolbox widget are summarised in the below table. Where additional information is required to use this functionality, we detail this in the next sub sections.

Stage	Overview
Anonymisation	Applicant data can now be anonymised for the purposes of making this information available to interview panel members. Each item corresponds to a section on the applicant's application form. Each item can be set to display or hide. These settings are only applied to the interview panel tab on the interviews widget. When an applicant's application form (Print Friendly) is opened from the view applicants option within this tab then only the sections items will be displayed that have been set to Display via the anonymisation configuration screen. The detail as seen on View Applicants screen when accessed from the interview panel tab will also be anonymised depending on which section has been set to Hide.
Applicant Cleardown	Applicant Cleardown is a feature that allows you to schedule a nightly process to delete / anonymise applicant details for vacancies that have been closed greater than 6 or 12 months. This replaces functionality in back office that is accessed from Recruitment > Recruitment Maintenance > Applicant Clear Down. See section Applicant Cleardown for more information.
Applicant Status	As part of the Recruitment process, applicants are flagged with different statuses such as Applicant Acknowledged, Applicant Rejected etc. Information on how to manage this is available in the document 'Move to Portal - Configuring Recruitment Admin Guide v27+' which is available on the Community Portal.
Applicant Talent Pool	This navigates you the E-Recruitment Applicant Keyword search area and allows you to search applicant profiles based on certain keywords / reference data.
Manage Users	This section supports managing users access i.e. who you see with Recruitment on Portal. This is driven by Department Level Access. Once you have access to the data in a department, you will be able to see all vacancies setup in that department and applicant information for those vacancies. See section Manage Users for more information.
Panel Member Types	This is used to track the type of interview member or panel member, for example: • Internal • External

	Information on how to manage this is available in the document 'Move to Portal - Configuring Recruitment Admin Guide v27+' which is available on the Community Portal.
Pay Scale Bands	This allows you to add pay scale band reference data for use in your recruitment process. Each vacancy can include a Grade and Salary field. This is generally used to share salary / pay related information when the vacancy is advertised. The actual Pay Scale can also be set on the vacancy e.g. Grade 1. This Pay Scale Band functionality allows for the Grade and Salary to be automatically updated to reflect a salary range, based on the Pay Scale selected i.e. once the Pay Scale is set on the vacancy e.g. "Grade 1" then the Grade and Salary is automatically updated to the corresponding salary range for that grade e.g. "£25,000 - £35,000". For further details on this see document Pay Scale Bands – User Guide on the CoreHR University.
Recruitment Admin	This navigates you to E-Form Maintenance pop out screen and from here you can configure your recruitment website and associated application forms.
Staff Request Parameters	This is a listing of Staff Request Parameters if your organisation is already using staff requests.
Staff Requests	This navigates a user to the Staff Request screen. This is only applicable if your organisation already uses staff requests.
Template Document	Allows you to upload a template document.

6.1. Applicant Cleardown

Applicant Cleardown is a feature that allows you to schedule a nightly process to delete / anonymise applicant details for vacancies that have been closed greater than 6 or 12 months.

- This replaces functionality in back office that is accessed from Recruitment > Recruitment Maintenance > Applicant Clear Down.

How the process manages different type of applicants for the closed vacancy:

The applicant cleardown process will either cleardown (i.e. delete), anonymise (i.e. diversity details) or not touch applicant data (if selected). See the details below for each applicant type and how the process works.

Applicant Type	Cleardown / Anonymise Outcome
Successful Applicant i.e. applicant is now an employee	- The record is not cleared down by this process. Nothing will be deleted or anonymised i.e. the applicant has been successfully onboarded from Recruitment through People Management. - Note: this is not just based on the applicant status but the candidate being fully set up on CoreHR for a contract against this vacancy.
Unsuccessful Applicant who has other open applications	- The application for the closed vacancy is deleted. - Diversity details are anonymised. - All other applications and applicant records remain unaffected.
Unsuccessful Applicant with no other existing applications	- The application and applicant record is deleted. - Diversity details are anonymised.
Applicant packs that have been created for the vacancy	- The applicant's individual application pack is deleted - The full merged application pack for all applicants is deleted.

Note: Documents have been attached directly to the vacancy i.e. under Vacancy > Actions > Edit Vacancy > Vacancy Profile > Documents will not be cleared down / deleted as these are held against the vacancy and not against an applicant.

How the process manages Applicant Diversity Details

Applicant Diversity Details / Equal Opportunities & Monitoring information is not deleted when an applicant is cleared down. This ensures that organisations can continue to report on this data while maintaining the applicant's anonymity.

This information is anonymised (so that the applicant cannot be recognised) and is stored in a view in Insight so that it may be reported on. No identifying information is maintained for the employee. None of these fields are copied:

- Applicant Number
- NI Number / PPS / Number / Social Security Number

To report on this data in Insight, use the Core Recruitment area and the Applicant Archive view

Setting Up the Applicant Cleardown Process

To manage the Applicant Cleardown process:

- Quick Jump to Recruitment Dashboard
- In Recruitment select the 'Toolbox' tab and select Applicant Cleardown.

3. The Applicant Cleardown screen will pop up.

4. Set the Clear down data after value to either

Applicant Type	Cleardown / Anonymise Outcome
Do not clear	Applicant data is not cleared down. This is the default setting.
6 Months	When the nightly process runs, this will look back at vacancies that have a close date greater than 6 months ago and clear down the associated applicant data.
12 Months	When the nightly process runs, this will look back at vacancies that have a close date greater than 12 months ago and clear down the associated applicant data.

5. Click the Update Task button to save changes

Nightly Cleardown Job that Cleardown Applicant Records

The nightly system job that kicks off the clear down process is RUN_ERQ_APPLICANT_CLEARDOWN. This is viewable through the Administrator Dashboard > Scheduled Jobs tab > Scheduled Jobs widget.

6.2. Manage Users

Note: For a back office user of recruitment to now see the portal vacancies you must link their back office account to their personnel number in Portal Security.

1. To complete this Navigate to *Portal Security*
2. Select *User Management* tab
3. Select *System Users* Widget
4. Select '*All Back Office Accounts*' from the dropdown
5. Search for their back office user
6. Select *Manage Account*
7. Select *Link to HR Person*
8. Search for their *Personnel Number* and press *OK* to save.

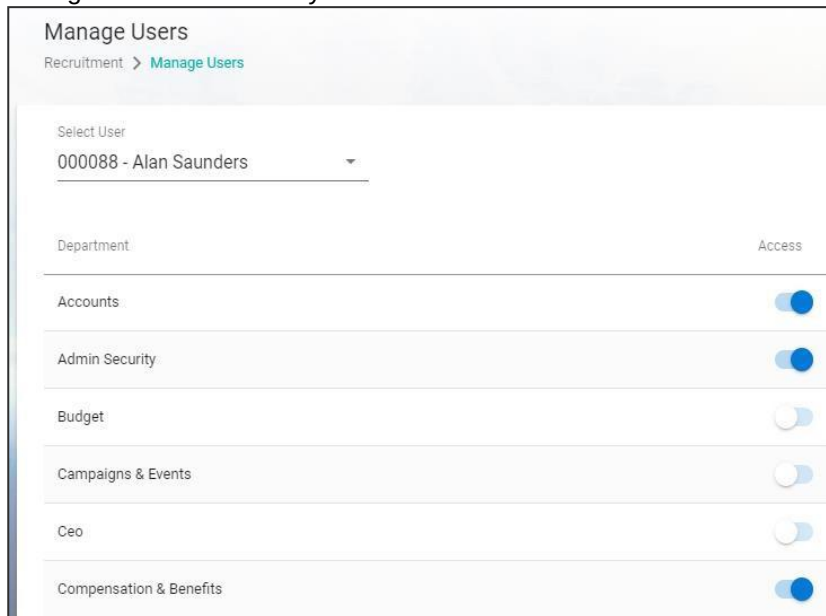

Once complete this will give their portal user the same access as back office for Recruitment only.

How to Grant Data Access to Recruitment Data

Follow these steps:

1. Select the **Toolbox** tab.
2. Open **Manage Users**.
3. Search for a user.
You can search for the user based on name or employee number.
4. Select *Department* that user should have access to.
 - a. Search for the *Departments* required.
 - b. Toggle  on.

Setting saves automatically.

The screenshot shows the 'Manage Users' interface. At the top, there's a breadcrumb 'Recruitment > Manage Users'. Below that is a 'Select User' dropdown menu showing '000088 - Alan Saunders'. Underneath is a table with two columns: 'Department' and 'Access'. The table lists several departments with their corresponding access toggles.

Department	Access
Accounts	☒
Admin Security	☒
Budget	☐
Campaigns & Events	☐
Ceo	☐
Compensation & Benefits	☒

7. Applicants Widget

7.1. Overview

7.1.1. Applicants Tabs

Once a vacancy has been created, you are able to view applicants that have applied for the vacancy or manually add an applicant to the vacancy (bypassing online applications). The applicant record on Recruitment can hold the following details:

- Applicant's personal detail
- Vacancy & Application Detail
- Correspondence
- References
- Events
- Documents
- Diversity Details
- Other Information (User Defined Fields)

Applicant Details Screen

Within this section, there are 6 distinct options to give a user access to:

1. Applicant Details
2. Vacancy & Application Detail
3. Correspondence

7.1.2. Applications Tabs

The Applications tab is used to review the online application that an applicant has submitted to your organisation to be considered for the role.

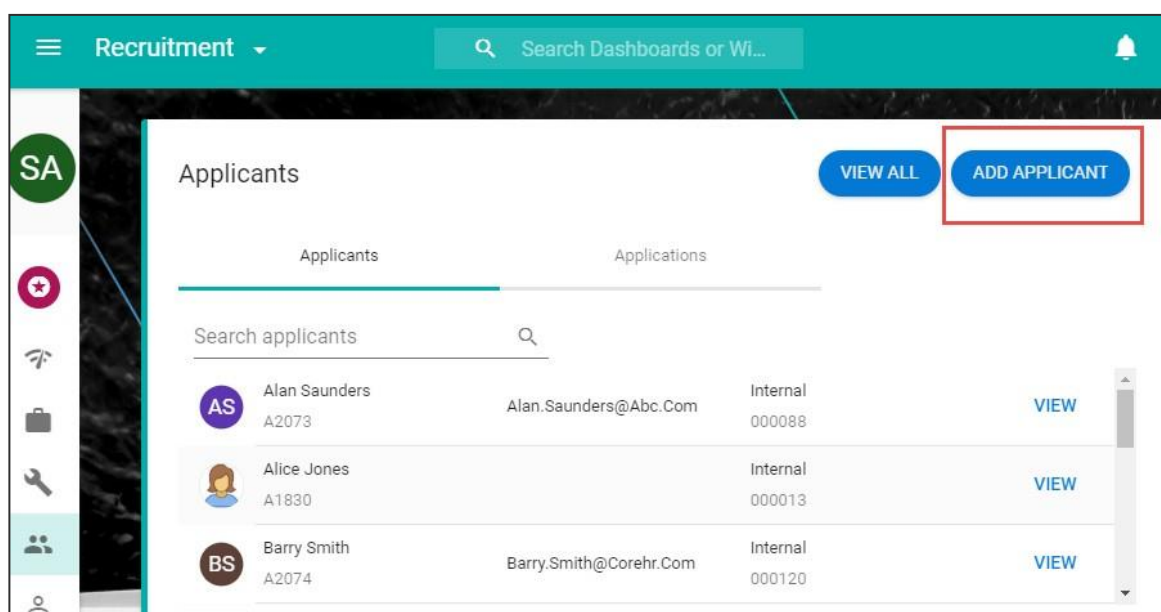

The screenshot displays the 'Applicants' section of a recruitment portal. At the top, there are two buttons: 'VIEW ALL' and 'ADD APPLICANT'. Below these, there are two tabs: 'Applicants' and 'Applications'. The 'Applications' tab is highlighted with a red box. Under the 'Applications' tab, there is a search bar labeled 'Search applications' with a magnifying glass icon and a filter icon. Below the search bar, there is a table of applications. The table has three columns: Applicant Name, Vacancy ID, and Experience. The first row shows 'Lucy Black' (ID A1873) with '15 Years' experience. The second row shows 'Tina Brown' (ID A1895) with '<1 Year' experience. The third row shows 'Edward Callahan' (ID A1892) with '<1 Year' experience. To the right of the table, there is a 'Menu' button with a dropdown list containing 'View details', 'History', and 'Talent Pool'. At the bottom right, there is a pagination indicator '1 - 10 of 30' with left and right arrow icons.

Applicant	Vacancy ID	Experience
Lucy Black A1873	001384	15 Years
Tina Brown A1895	001385	<1 Year
Edward Callahan A1892	001385	<1 Year

7.2. Create an Applicant Manually

There is an option for you to create an applicant manually on behalf of a user that may not have the access to login to Portal as an internal applicant or register as an external applicant via the recruitment website. To do this:

1. Go to *Recruitment dashboard > Applicants tab > Applicants widget*.
2. Click **Add Applicant**.

3. The following options are available to select from on the *Add Applicant* pop-up box:

Item	Explanation
Select person	This is a drop-down box with all employees listed for you to link this applicant to. If selected, the other 3 options automatically populate. Leave this blank if the applicant is external.
Forename	First name of the applicant.
Surname	Second name of the applicant.
Email Address	Email Address of the applicant.

4. Click **Ok** to save.
5. This opens the *Vacancy Detail* screen.

7.3. Link to Vacancy Manually

To add any existing applicant to a vacancy:

1. Go to *Recruitment dashboard > Applicants tab > Applicants widget*
2. Search for the applicant.
3. Click on the **View** button.
4. Select the *Vacancy & Application Detail* tab.
5. Click on the **Add to Vacancy** button.
6. Select the vacancy from the drop-down list and save.

Add to Vacancy

Competition*

001443 - HR Manager

001644 - SQL Developer

001664 - Sales Consultant

001684 - Accountant

001624 - eLearning Consultant

001704 - Head of Technology

001544 - HR Admin

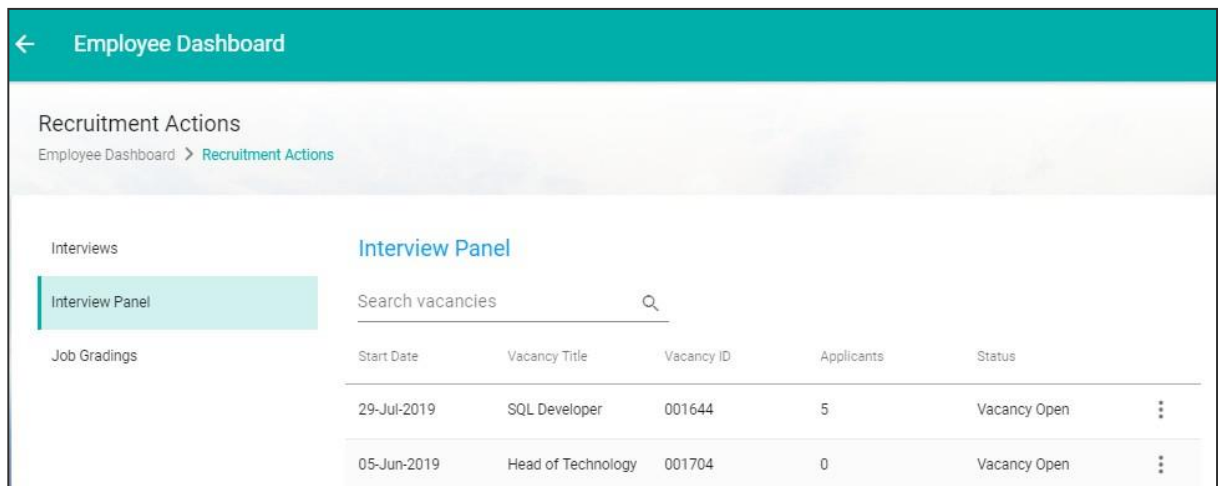

001604 - Executive Administrator

001564 - HR Admin Manager

 **Note:** Existing applicants can be added to a vacancy manually via this process. However, the application form is blank as it was not filled out on the recruitment website.

8. Interviews Widget

The *Interviews and Interview Panel* functionality on the Interviews widget, allows for the Interview Panel members to further interact with their vacancies, beyond just managing the interviews that they have been assigned to.

This includes:

- Using the *Interview Panel* screen to:
 - View the vacancies that you are on the interview panel for.
 - View the applicants that have applied for that vacancy.
 - View the vacancy details e.g. job description and associated documents.
 - Update the Applicant Status and Vacancy Status for those applicants/vacancies.
- Setting up *Shortlisting Groups* for a vacancy to group the applicants that are available to each individual panel member for a vacancy to see on the Interview Panel widget.
- Using *Assessment Scorecards* to allow interview panel members to complete the assessment for each applicant they have access to on either:
 - A scheduled interview.
 - The interview panels.

 **Note:** All of this functionality is covered in a separate user guide called ***Move to Portal - Recruitment Interview Panel User Guide v27+*** on the Community Portal.
