1. Overview

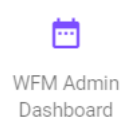

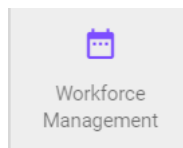

1.1. Purpose of the Guide

This document provides you with guidance on how to **move to Workforce Management on CorePortal (“Portal”)** for both administrator and manager users. The document also provides **training material** on how Workforce Management in Portal can be used to support:

- **Existing processes** previously completed in Back Office such as:
 - Maintaining the WFM elements of an employee’s record
 - Maintaining employee schedules
 - Assigning and maintaining balance assignment
 - Recording and maintaining absences
 - Viewing and maintaining time and attendance information
 - Exception management
 - Sign off hours
 - Generate Timesheets
 - Running future calculations
 - Setting up certain reference data including shift types, work groups, and personalised paycode groups
- **New functionality** in Portal:
 - New WFM Configuration Area
 - Replacement of Employee’s Appointments – Transfer Remaining Entitlement and Absence Records

 **Note:** Occupational Absence and Roster are not included within the scope of this document. Roster screens were previously available on Portal, and no additional screens are included here. Some existing Roster screens have been made available on Person Maintenance – see [section 3.11](#) for admins and [section 8.1.1](#) for managers. The Occupational Absence screens have been available on the Payroll Dashboard from Feature Pack 10. Recording of absences in WFM is covered with the scope of this document.

This guide covers the steps required to move both manager users and admin users to WFM on Portal. Managers will continue to access the Workforce Management Dashboard (aka **WFM Manager Dashboard**), while admin users will use the new **WFM Admin Dashboard**.

If managers in your organisation already use the Manager Self Service and/or Workforce Management Dashboards, please review the manager sections of this guide where indicated. New features available for managers on Portal will be outlined in these sections.

1.2. Steps to Move Admins to Portal

We want to make the move to the admin area of WFM on Portal as easy as possible for you and by completing **the 5-step guide** below you will be able to seamlessly move to our Portal solution:

Note: It is advisable to test the migration to Portal in your Non-Production environments ahead of completing your migration in Production.

How to Move Admins to WFM on Portal	Approx, Timings
Step 1: Give yourself a quick overview on what's in the admin area of Portal WFM: - Review Section 2 which outlines how to access the WFM admin area on Portal and navigate through the WFM module. - Review Section 3 which explains where the back-office screens you access are now mapped to in Portal. Section 4 also details the new widgets & functionality available through Portal WFM.	45 mins
Step 2: WFM Admin Dashboard Once Off Configuration / Set Up Carry out the 5 tasks detailed in Section 5 that are required to enable WFM on Portal. These are: - Assign menu access to the WFM Admin Dashboard - Configure access types for the WFM Admin Dashboard - Assign employee access to WFM Admin Users - Configure the Employee Calendar screen - Configure the WFM Admin Dashboard and Person Maintenance layouts	1 min per user 2 mins 1 min per user 30 mins 5 mins

Step 3: Train yourself on specific functionality in Portal WFM where required 1. Firstly, review the remaining sections of this document. This will set you up with a good foundational knowledge of Portal Functionality in the WFM admin area. 2. Next, we recommend you review the following list of guides. We recommend doing this while navigating through the application in tandem. These documents are all available in the same area as this document on the Customer Success Portal	Approx. 30 mins per guide.
Step 4: Complete a Generate Timesheets Parallel Run in Live Environment Ahead of Retirement Date If you currently run the generate timesheets process in back office you will need to complete a generate timesheets parallel run on Portal from your Production environment. This will ensure that the records transferred from WFM to Payroll in the back office match the Portal transfer. Please refer to Section 6 for more details. If you do not generate timesheets or you already run generate timesheets on Portal, this step is not required.	Approx. 2 hours to run and review reconciliation reports
Step 5: Review Section 12 which details which screens are retiring, and which will still be available in back office post the retirement date This section details which screens have a portal equivalent available and will be retiring on the communicated retirement date and which will remain in back office post the retirement date.	15 mins

1.3. Steps to Move Managers to Portal

Review [Section 1.3.1](#) if managers in your organisation currently use the Manager and/or Workforce Management Dashboards on Portal and do not use the back office. Please review [Section 1.3.2](#) if managers in your organisation currently use the back office.

1.3.1. Our Managers Currently Use Manager and/or Workforce Management Dashboards

If managers in your organisation are already using the Manager and/or Workforce Management Dashboards on Portal, then please review the below as there may be features now on Portal that you wish to make available to managers:

Review Manager Functionality on Portal		Approx, Timings
Step 1: Give yourself a quick overview on what's in the manager area of Portal WFM: Review Section 7.2 which outlines standard manager functionality available on Portal. Some of these features might not be in use in your organisation. Review Section 8 which provides more information on each feature and where to find detailed guides.		45 mins
Step 2: Workforce Management Dashboard Configuration a) Section 9.1.1 will help you to update your existing manager menu profile to grant access to new manager features on Portal. b) If your organisation uses Roster, review Section 9.2.2 which details the manger screens that can be configured to use team area access c) If you do not use MGRESS and WRKGRP as the organisational role and group for managers, then review Section 9.1.3 to align your manager org role and group with the new WFM Person Maintenance screen. d) Configure the Employee Calendar screen e) Configure the WFM Manager Dashboard and Person Maintenance layouts		a. 10 mins review b. 10 mins review c. 10 mins review d. 30 mins e. 5 mins
Step 3: Train yourself on specific functionality in Portal WFM where required Review the list of guides in Section 11 . We recommend doing this while navigating through the application in tandem. These documents are all available in the same area as this document on the Customer Success Portal		Approx. 30 mins per guide.

Step 4: Review Section 12 which details which screens are retiring, and which will still be available in back office post the retirement date This section details which screens have a portal equivalent available and will be retiring on the communicated retirement date and which will remain in back office post the retirement date.	15 mins
--	---------

1.3.2. Our Managers Currently Use the Back office

If managers in your organisation do not currently use the Manager and/or Workforce Management Dashboards on Portal, then please review this section carefully.

We want to make the move to the manager area of WFM on Portal as easy as possible for you by completing **the 4-step guide** below. However, given the complexity involved in Step 2 – which involves analysis of current setup and large volumes of additional configuration and setup – it is advisable that you contact Optimisation Services for a package to assist you with the move.

 **Note:** It is advisable to test the migration to Portal in your Non-Production environments ahead of completing your migration in Production.

How to Move Managers to WFM on Portal	Approx, Timings
Step 1: Give yourself a quick overview on what's in the manager area of Portal WFM: Review Section 7 which outlines how to access the WFM manager area on Portal and navigate through the WFM module. Review Section 8 which explains where the back-office screens you access are now mapped to in Portal.	45 mins
Step 2: Review the configuration tasks in Section 9.2 that are required to enable Workforce Management for managers on Portal a) Assign Access to Managers	Multiple Days – Optimisation Service

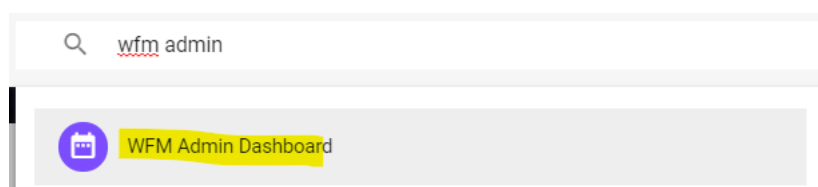

b) Configure Access Type for Managers c) Map from Work Group and Department Access to Organisational Role Access d) Assign Managers Access to Employees e) Complete configuration steps required to enable Manager Self Service f) Configure the Employee Calendar screen g) Configure the WFM Manager Dashboard and Person Maintenance layouts	Package recommended
Step 3: Train yourself on specific functionality in Portal WFM where required Review the list of guides in Section 11. We recommend doing this while navigating through the application in tandem. These documents are all available in the same area as this document on the Customer Success Portal	Approx. 30 mins per guide.
Step 4: Review Section 12 which details which screens are retiring, and which will still be available in back office post the retirement date This section details which screens have a portal equivalent available and will be retiring on the communicated retirement date and which will remain in back office post the retirement date.	15 mins

2. WFM Admin Dashboard Overview

2.1. How to Access the WFM Admin Dashboard

The Workforce Management Admin dashboard is where a WFM administrator can manage their WFM related processes on Portal. To access the **WFM Admin Dashboard** users will need to be assigned menu access. A specific menu profile will be available on your environment to grant access for each feature on the WFM Admin Dashboard. Details on how to configure your menu profile for WFM admin and complete this step is outlined in [Section 5.1](#) below.

Once assigned access, the **WFM Admin Dashboard** can be accessed by selecting **WFM Admin Dashboard** from the quick jump menu.

It is possible to search for a tab or widget name in the Quick Jump menu also, to jump straight to that object.

For example, if searching for the tab called "WFM Configuration", the Quick Jump will return:

1. The dashboard that the tab is on i.e. WFM Admin Dashboard.
2. The tab that you are searching for i.e. WFM Configuration.

Click on one of those items, to jump straight to it i.e. jump to the main dashboard or the tab itself.

2.2. Dashboard Overview

The Workforce Management Admin dashboard contains 8 tabs as standard – WFM Person Maintenance, Generate Timesheets, Calculate Hours, WFM Configuration, Advance Period, Employee Calendars, Sign Off Hours, and Balance Maintenance.

Note: The Employee Calendars and Balance Maintenance features are available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

The Sign Off Hours screen and Generate Timesheets improvements are available from Feature Pack 14. Feature Pack 14 is available on UAT from 20 September 2021 and will be available on Production from 11 October 21.

All other features are currently available on UAT and Production.

WFM Admin Dashboard

WFM Person Maintenance

Generate Timesheets

Calculate Hours

WFM Configuration

Advance Period

Employee Calendar

Sign Off Hours

Balance Maintenance

The Person Maintenance screen allows admins to view and update WFM data for employees they have access to. The type of information that can be maintained here includes schedules, attendance, absence, balances.

WFM Person Maintenance

Search	Q	Active						
Name	Personnel No	Job Title	Work Group	Department	Team Area	Date Started	Reports To

Catherine Keeting	000111	Training Manager	Training	Training		15-Jan-2018	Brian O'Keefe	⋮

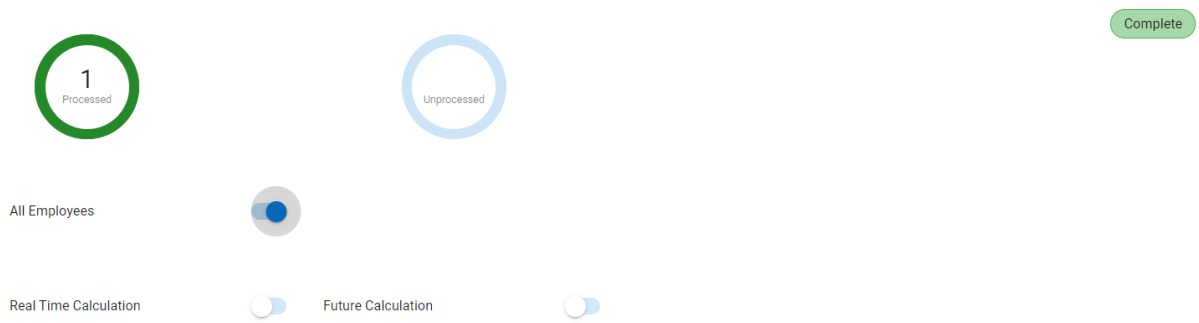

The Generate Timesheets screen allows an admin user to manage the transfer of timesheets from WFM to Payroll on Portal.

Generate Timesheets

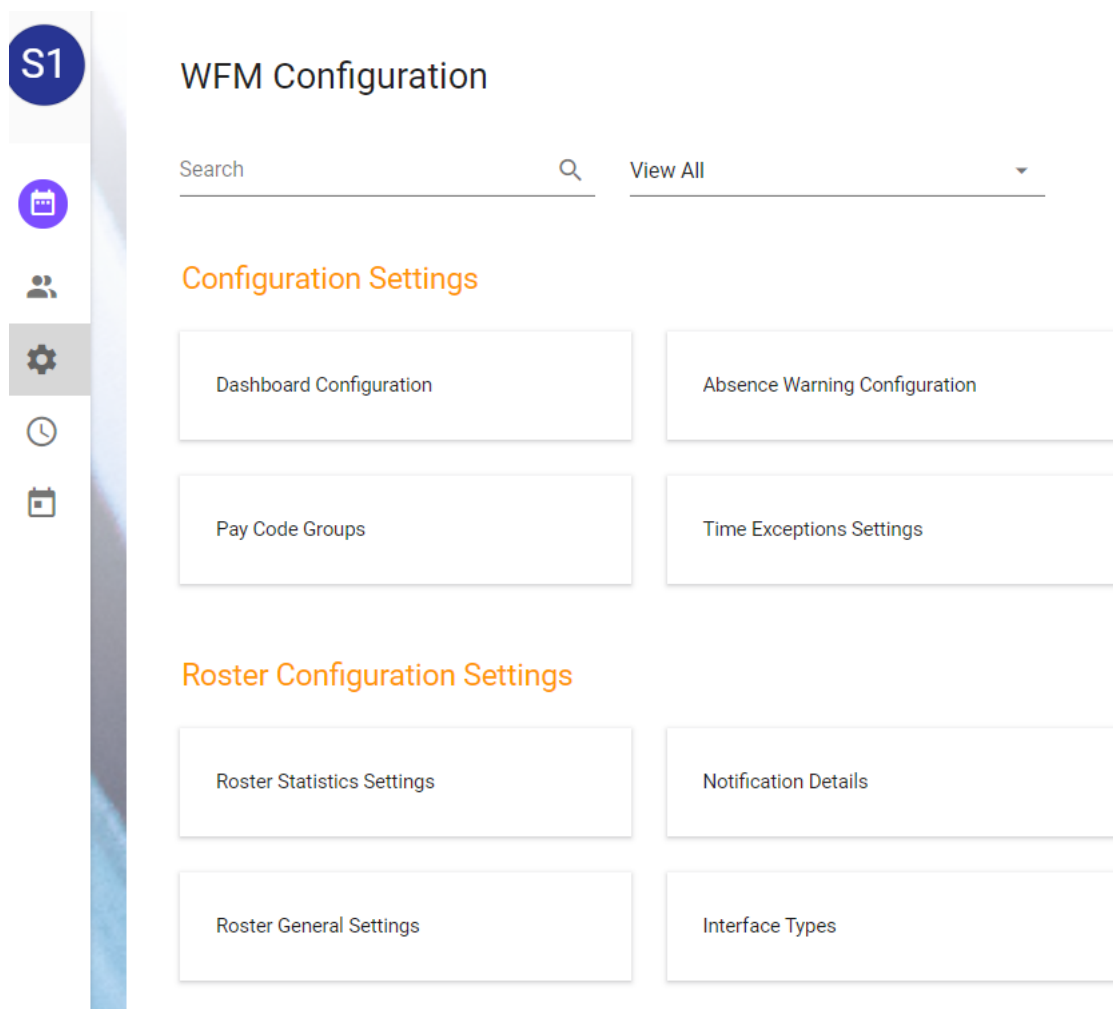

Search	Q					
T&A Company	Calendar	Period Date	Period Code	Stage	Status	
Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Ready To Retrieve	⋮
Default Company	Name Default	Start 11-Nov-2019 End 17-Nov-2019	201946	Retrieve Hours Step 1 of 2 All Work Groups	Process Stopped - Errors ...	⋮

On the Calculate Hours screen an admin user can run future and real time calculations for an employee or groups of employees.

Calculate Hours

The WFM Configuration screen allows admin users to setup and maintain Portal WFM features and configuration, as well as certain reference data.

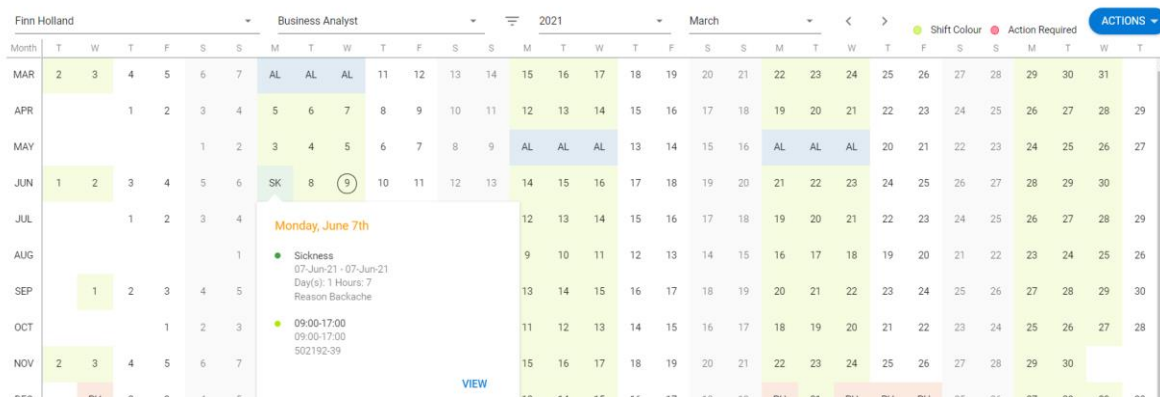

The Advance Period screen is where a user can manage the advancement of CoreTime calendars on their environment, where closing calendar periods is not automated or managed through the Generate Timesheets process.

Advance Period

Company	Calendar	Current Period Date	Current Period	New Period Date	New Period	
Default Company	Name Default	Start 29-Mar-2021 End 04-Apr-2021	202113	Start 05-Apr-2021 End 11-Apr-2021	202114	TRANSFERRED ACCE...

The Employee Calendars screen displays a graphical calendar view of employee absence and schedule information. Users can enter absences from the calendar and drill down to view existing absence details.

Employee Calendar

The Sign Off Hours screen allows an admin user to see what hours have not yet been signed off (Action Required tab), what is waiting to be signed off (Pending Sign Off tab), and what has been signed off (Signed Off tab). Any hours that have been rejected are displayed in the Rejected tab. Users can action records from each of these tabs – i.e. sign off or view more details.

Note:

For further details on the features available on the Workforce Management Admin Dashboard please see related documents on the Customer Success Portal Site (Select PeopleXD – Workforce Management > Knowledge Base > Move to Portal: Workforce Management)

3. Mapping from Back Office to WFM Admin Dashboard on Portal

The following section details where the back-office screens you currently access are now mapped to Portal. For a simple table of the mapping of screens from back office to portal see the mapping table in [Section 12.1](#).

3.1. Portal Screens Replacing Back Office Forms

3.1.1. WFM Person Maintenance

The Person Maintenance screen is now available on the WFM Admin Dashboard on Portal. Additional screens have also been made available within Person Maintenance, such as Absence Input and Timesheet Input.

Back Office Screen	Back Office Path	Portal Path
Person Maintenance	CoreTime: Pers Data > Person Maintenance	WFM Admin Dashboard > WFM Person Maintenance

This is where an admin can centrally manage employee WFM records. The front screen provides key information for each employee and user can toggle between active employees and leavers.

WFM Person Maintenance

Search	Active							
Name	Personnel No	Job Title	Work Group	Department	Team Area	Date Started	Reports To	
 Cathal Cormack	000257	Budget Analyst	Finance	Budget		02-Jan-2021	John Wallis	⋮
 Catherine Keeting	000111	Training Manager	Training	Training		15-Jan-2018	Brian O'Keeffe	⋮

A user can then drill in to view and maintain the following types of data against employees:

- Key Information
- Work Schedule
- Balances
- Personal Settings
- Work Group Override
- Personal Groups
- Leave Request History
- Badge Details
- Contact Information
- Next of Kin
- Trigger Points
- Team Area Assignment (only applicable to Roster sites)
- Roster Contract (only applicable to Roster sites)
- Shift Swap History (only applicable to Roster sites)
- Uncovered Shifts (only applicable to Roster sites)
- Person Attributes (only applicable to Roster sites)
- Qualifications (only applicable to Roster sites)

Each of these options can be enabled/disabled against a menu profile (menu options for each are given in **Section 27.2 of WFM v28: Person Maintenance Configuration Guide**).

**Record Absence
Details**

**CoreTime: Time Mgt > Record
Absence Details**

**WFM Admin Dashboard > WFM
Person Maintenance >
Absences**

The Absences screen is available from WFM Person Maintenance and allows users to view, edit, and delete absence information recorded against an employee. The Absences summary screen shows all absences recorded against an employee. From here a user can drill into a particular absence to view more detail or edit or delete or view the co-workers absence screen.

Search								ADD ABSENCE
Absence Type	Start Date	End Date	Days	AM/PM	Hours	Weeks	Num Docs	
Annual Leave	26-Apr-2021	29-Apr-2021	4.00		30.00	0.57	0	⋮
Annual Leave	05-Apr-2021	07-Apr-2021	3.00		22.50	0.43	0	⋮

A user can also add a new absence along with associated information including reason, narrative, return to work details, medical cert details, and attach documents.

3.1.2. Employee Calendars

Note: The Employee Calendars feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

Back Office Screen	Back Office Path	Portal Path
Record Absence Details	CoreTime: Time Mgt > Record Absence Details	WFM Admin Dashboard > Employee Calendar

The Employee Calendar screen provides users with a graphical calendar view of an employee's schedule and absence information. Hovering over an absence on the calendar provides the absence and schedule data which can be drilled into view more detail. The Absence Input screen can be opened to input an absence for selected dates on the calendar.

Employee Calendar

Further information on the Employee Calendars screen is provided in the **WFM V28: Employee Calendars User Guide** on the Customer Success Portal.

3.1.3. Calculate Hours

Back Office Screen	Back Office Path	Portal Path
Calculate Hours	CoreTime: Time Mgt > Calculate Hours	WFM Admin Dashboard > Calculate Hours
The Calculate Hours screen allows users to run both future calculations and real time calculations for selected employees. A user can navigate away from the screen while the calculation is running. On returning to the screen, the user is given the status to the calculation and how many employees have been processed and are still to be processed. In additional to running calculations for a range of work groups, there is now the option to run the calculation for a single employee from the Portal screen and the ability to view a history of calculations ran by the user. Further information on the Calculate Hours screen is provided in the WFM (Time & Attendance) v28: Calculate Hours Configuration Guide on the Customer Success Portal.		

3.1.4. Advance Period

Back Office Screen	Back Office Path	Portal Path
Advance Period	CoreTime: Period End > Advance Period	WFM Admin Dashboard > Advance Period
On the Advance Period screen, the calendars that the user has access to are displayed together with the current open period and next period for each calendar.		

Advance Period

Search

Company	Calendar	Current Period Date	Current Period	New Period Date	New Period
Default Company	Name Default	Start 11-Nov-2019 End 17-Nov-2019	201946	Start 18-Nov-2019 End 24-Nov-2019	201947
Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Start 11-Nov-2019 End 17-Nov-2019	201946
Default Company	Name Roster Calendar Code R	Start 31-Dec-2018 End 06-Jan-2019	201901	Start 07-Jan-2019 End 13-Jan-2019	201902

When a user selects a calendar, any exceptions against that calendar for the open period will be displayed at the bottom of the screen.

Exceptions for Default Company in Mon-Sun RC GT Calendar (04-Nov-2019 - 10-Nov-2019)

Work Group	Department	Person	Status
System Work Group / Team SYST	**Do Not Use** SYST	Ella Smith2 000074	Unconfirmed

Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Start 11-Nov-2019 End 17-Nov-2019	201946	TRANSFERRED ACCESS
Default Company	Name Roster Calendar Code R	Start 31-Dec-2018 End 06-Jan-2019	201901	Start 07-Jan-2019 End 13-Jan-2019	201902	TRANSFERRED ACCESS

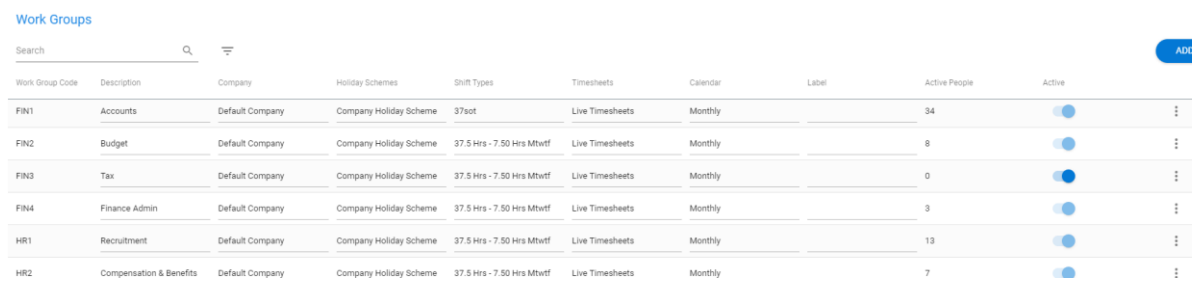

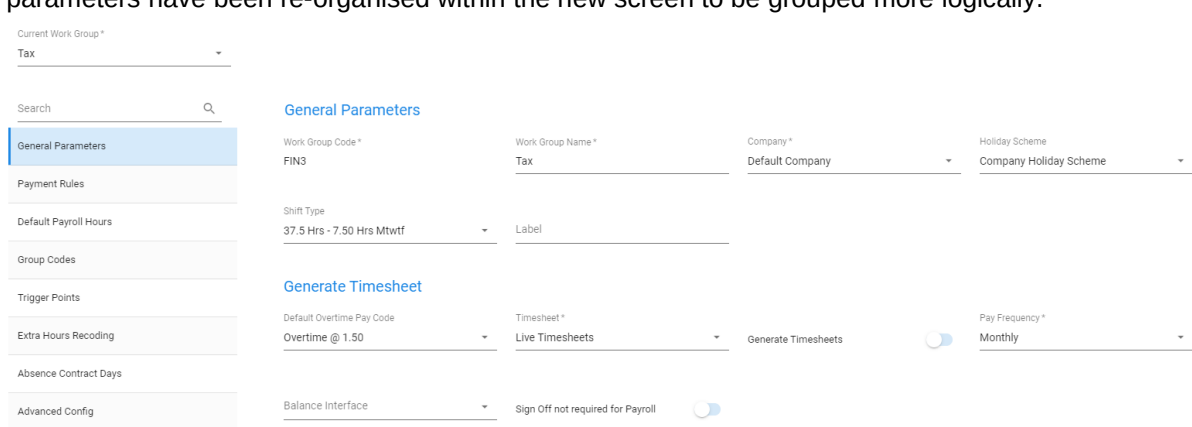

UPDATE PERIOD

Once the period has been advanced, a message displays to the user that the period has been advanced, and the new period dates are now displayed against the calendar.

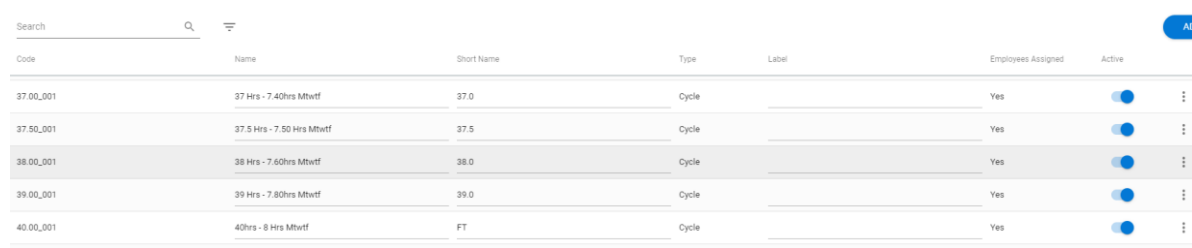

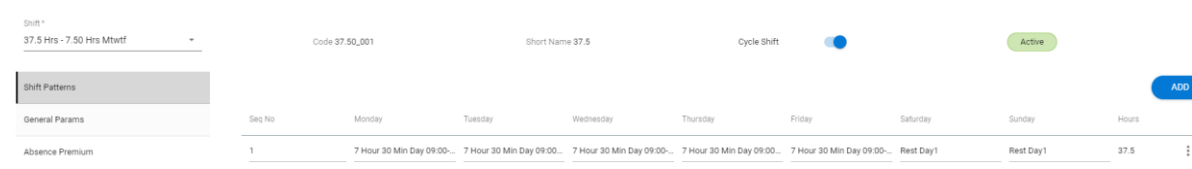

Period Successfully Updated for Calendar Mon-Sun RC GT in Company Default Company

Further information on the Advance Period screen is provided in the **WFM (Time & Attendance) v28 - Advance Period Configuration Guide** on the Customer Success Portal.

3.1.5. Work Groups

Back Office Screen	Back Office Path	Portal Path
Work Groups	CoreTime: System Params > Work Groups	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Work Groups
The work groups screen allows users to create new work groups, edit existing work groups, and delete work groups (only where no employees are assigned to that work group currently or historically). The portal screen has been redesigned to display key information against each work group on a front screen. A count of active employees in each work group, as well as an active indicator and a free text label, are now held against each work group.		
		
A user can then drill into a work group to view/maintain further details. Where applicable, parameters have been re-organised within the new screen to be grouped more logically.		
		
Further information on the Work Group screen is provided in the WFM v28: Workgroups User Guide on the Customer Success Portal.		

3.1.6. Shift Types

Back Office Screen	Back Office Path	Portal Path
Shift Types	CoreTime: System Params > Shift Types	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Shift Types
The shift type screen allows users to create new shift types, edit existing shift types, and delete shift types (only where no employees are assigned to that shift type currently or historically). The portal screen has been redesigned to display details against each shift type on a front screen. An active indicator and a free text label, as well as a column to display whether employees are assigned to that shift type or not, are now held against each shift type.  A user can then drill in to view/maintain the shift type details. 		
Further information on the Work Group screen is provided in the WFM v28: Shift Types User Guide on the Customer Success Portal.		

3.1.7. Generate Timesheets

Note: Generate Timesheet Improvements are available from Feature Pack 14. Feature Pack 14 is available on UAT from 20 September 2021 and will be available on Production from 11 October 21.

Back Office Screen	Back Office Path	Portal Path
Generate Timesheets	CoreTime: Period End > Generate Timesheets	WFM Admin Dashboard > Generate Timesheets Payroll Dashboard > Generate Timesheets

The screen allows admin users to transfer timesheet data from WFM to Payroll similar to the back office screen. The Portal screen can be accessed from either the Payroll Dashboard, or the WFM Admin Dashboard, or from both.

Generate Timesheets

Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Ready To Retrieve
Default Company	Name Default	Start 11-Nov-2019 End 17-Nov-2019	201946	Retrieve Hours Step 1 of 2 All Work Groups	Process Stopped - Errors ...

On the Portal screen a user can now navigate away from the Generate Timesheets screen while the process is running, and return to the screen to check status until complete. The generate timesheets process is still a two-step process – Retrieve Hours and Transfer Hours. Any timesheet exception errors that generate as part of the process can now be actioned by drilling down to the Approve/Sign Off screen or the Timesheet Input screen. This allows the admin user to view more details on the errors that are preventing the process from being completed, and also allows the errors to be actioned and cleared without navigating away from the Generate Timesheets screen. Users can also run a Generate Timesheets parallel from portal to match against hours transferred to payroll via back office – see [Section 6](#) for more details.

Further information on the Generate Timesheets screen is provided in the **WFM (Time & Attendance) v28: Generate Timesheets User Guide** and **WFM V28: Generate Timesheets Parallel Run User Guide** on the Customer Success Portal.

3.1.8. Personalised Pay Code Groups

Back Office Screen	Back Office Path	Portal Path
Personalised Pay Code Group	CoreTime: System Params > Ref K-P > Personalised Paycode Group	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Pay Code Groups

The screen allows users to setup and maintain personalised pay code groups and is available on the WFM Configuration screen.

Further information on the Personalised Paycode Groups screen is provided in the **WFM (Time & Attendance) v28: Pay Code Access Groups** on the Customer Success Portal.

3.1.9. Sign Off Hours

Note: The Sign Off Hours feature is available from Feature Pack 14. Feature Pack 14 is available on UAT from 20 September 2021 and will be available on Production from 11 October 21.

Back Office Screen	Back Office Path	Portal Path
Sign Off Hours	CoreTime: Time Mgt > Sign Off Hours	WFM Admin Dashboard > Sign Off Hours

The Sign Off Hours screen allows an admin user to see what hours have not yet been signed off (Action Required tab), what is waiting to be signed off (Pending Sign Off tab), and what has been signed off (Signed Off tab). Any hours that have been rejected are displayed in the Rejected tab. Each tab highlights the number of records at a particular status. The admin can action any records that have a status of Action Required – i.e. approve the hours – or drill into an employee’s timesheet from the Sign Off Hours screen.

A Bulk Sign Off button is available to sign off all hours for employees the admin has access to that are at the Pending Sign Off stage.

Further information on the Sign Off Hours screen is provided in the **WFM V28 - Sign Off Hours User Guide** on the Customer Success Portal.

3.1.10. Balance Recalculation

Note: The Balance Recalculation feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

Back Office Screen	Back Office Path	Portal Path												
Balance Recalculation	CoreTime: Time Mgt > Balances > Balance Recalculation	WFM Admin Dashboard > Balance Maintenance > View > Balance Recalculation												
The Balance Recalculation screen is available from the Balance Maintenance landing screen. The landing screen displays details against each balance setup on WFM including the open period, the calendar type, and the number of employees assigned to that balance. Balance Maintenance Search <table> <thead> <tr> <th>Code</th> <th>Name</th> <th>Current Period</th> <th>Flexitime</th> <th>Balance Type</th> <th>Employees Assigned</th> </tr> </thead> <tbody> <tr> <td>AL01</td> <td>Annual Leave 01</td> <td>2019 (01-Jan-2019 to 31-Dec-2019)</td> <td>N</td> <td>Fixed Calendar</td> <td>3</td> </tr> </tbody> </table>			Code	Name	Current Period	Flexitime	Balance Type	Employees Assigned	AL01	Annual Leave 01	2019 (01-Jan-2019 to 31-Dec-2019)	N	Fixed Calendar	3

Backache	SK003	Absence
Blood Disorder	SK015	Absence

3.2. Back Office Forms with no Portal Mapping (Continue to Use Back Office)

Please reference [Section 12.2](#) for a list of Workforce Management infrequently accessed screens available through back office forms which will not be available through Portal, your access will remain via back office and this will still be available post the communicated retirement data.

4. New Functionality – WFM Admin Dashboard

4.1. New Functionality available through CorePortal

The following is a list of Workforce Management Admin **functionality** now available to users through CorePortal which **was not available through the Back Office forms**.

These features are version specific and only be available in v28+.

1. New WFM Configuration Area
2. Replacement of Employee's Appointments – Transfer Remaining Entitlement and Absence Records

Functionality/Feature	Portal Path
WFM Data Centre	WFM Admin Dashboard > WFM Configuration
The WFM Data Centre allows admins to maintain system parameters associated with new functionality as well as WFM reference data such as shift types, work groups, and personalised pay code groups. The Data Centre is an amalgamation of the previous widgets Roster Links and Time &	

Attendance settings. The configuration screens are grouped into Configuration Settings, Roster Configuration Settings, and Company Settings.

WFM Configuration

Search View All

Configuration Settings

Dashboard Configuration	Absence Warning Configuration	Cost of Roster
Time Exceptions Pay Code Groups	Pay Code Groups	Time Exceptions Settings
Work Groups	Admin Clocking Interface	Shift Type
Project Codes	Project Code Criteria Groups	

A menu profile available on your environment called WFM_CONFIG_SCREEN will give you access to the screen.

Further details are available from Section 2.1.20 of **CoreHR XD v28: Workforce Management Release Notes (V17)** on Customer Success Portal.

Replacement of Employee's Appointments – Transfer Remaining Entitlement and Absence Records

People Management > Command Centre > Employees > View > Contracts > Replace Contract

This feature only applies to organisations where WFM is configured to be multi-appointment. The new process replaces the current manual process where People Management Admins are required to manually calculate entitlements remaining from the previous appointment, complete adjustments to the new appointment's entitlement to reflect the remaining carry over, and re-enter future dated leave/absence records.

The following steps have been automated as part of the transfer of balances:

- The previous appointments balance is pro-rata calculated at date of replacement to determine entitlement remaining.
- The new appointments balance is assigned and the entitlement remaining from the previous appointment is applied to the carried forward.
- Narrative is included on the carried forward adjustments to support the transfer.

- Any leave/absence records that commence on or after the new appointment start date are automatically transferred, keeping employee calendars up to date.

Configuration is required to enable this feature and details are available from Section 2.1.7 of **CoreHR XD v28: Workforce Management Release Notes (V17)** on Customer Success Portal.

5. Once Off Configuration - WFM Admin

Listed below are the primary configuration/set up tasks that are involved in migrating admins from CoreTime on Back Office to WFM on Portal. Completing these steps will enable you to have your solution fully set up before you begin your training. Our recommendation is that you complete these steps first on your Non-Production environment and once ready complete these steps again on your Production environment.

Tasks No	Task Detail
Step 1	Assign WFM Admin Users Access to the WFM Admin Dashboard on Portal
Step 2	Configure the WFM Admin Dashboard Access Type
Step 3	Assign WFM Admin Users Access to Employees on the WFM Admin Dashboard
Step 4	Configure the new Employee Calendar screen for admins
Step 5	Configure the WFM Admin Dashboard Order

5.1. Assign WFM Admin Users Access to the WFM Admin Dashboard

To access the WFM Admin Dashboard you will need to create a menu profile for admins and assign this profile to users. The menu profile will give admins access to the screens on the WFM Admin dashboard, but not access to view employees and employee data on these screens – this is covered in step 3 ([section 5.3](#)).

5.1.1. Creating your WFM Admin Menu Profile

A specific menu profile is available on your environment for each feature outlined in the [admin dashboard overview](#) above. The menu profile for each feature is listed in the table below. These menu profiles enable all options for that feature – see [section 5.1.2](#) below on further refining a feature where applicable.

Feature	Menu Profile
Person Maintenance	WFM_PERSON_MAINTENANCE_ADMIN
Calculate Hours	WFM_CALCULATE_HOURS
Advance Period	WFM_ADVANCE_PERIOD
Work Groups	WFM_WORKGROUP_CONFIG_ACCESS

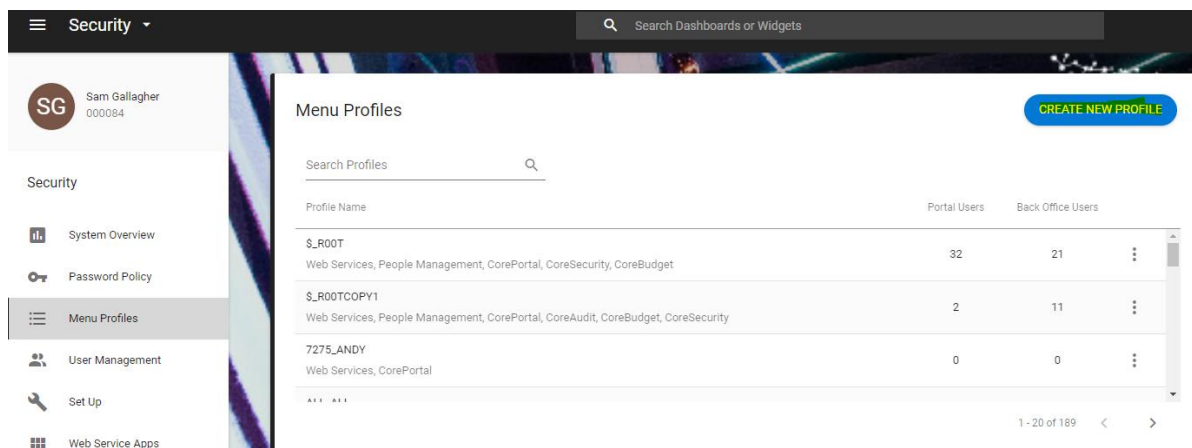

Shift Types	WFM_SHIFTS_TYPES
Generate Timesheets	WFM_GENERATE_TIMESHEETS
Sign Off Hours	SIGN OFF HOURS
Settings	WFM_CONFIGURATION_SETTINGS
Balance Recalculation	WFM_BALANCE_ADMIN
Activate Balance	WFM_BALANCE_ADMIN
Employee Calendars	WFM_EMP_CALENDAR_ADMN

A new menu profile import/merge feature is available in Security to help you create the menu profile for admins by merging the profiles in the table above for features you wish to enable.

Note: The Import/Merge Menu Profile feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

Follow the steps below to create your WFM admin menu profile using the import/merge menu profile feature:

1. Create the name of you WFM admin menu profile.
 - a. On Security > Menu Profiles, click Create New Profile.

- b. Enter a code and description for the WFM Admin menu profile and click create.
2. Search for the Menu Profile you have just created and under the more options button against the profile, select Import Menu Options.

Menu Profiles

CREATE NEW PROFILE

PORTALMIGRATION_WFM_ADMIN

Web Services, CorePortal, People Management

4

1

- Manage Menu Options
- Edit Profile Description
- Duplicate
- Download Menu Profile
- Import Menu Options
- Delete Profile and Remove Options

3. Select the "From Existing Menu Profile" option and click ok.
4. In the "From Profile" field, select the first menu profile from the list of features above that you want to merge into your WFM Admin profile (i.e. WFM_SHIFTS_TYPES or WFM_PERSON_MAINTENANCE_ADMIN, etc), and click ok
5. The selected menu profile has now been merged with the WFM Admin menu profile that you created.
6. Repeat steps 2-4 to add/merge each additional feature required to your WFM admin profile.

5.1.2. Refining your WFM Admin Menu Profile

Within some screens there may be options that you want to disable for users, as the standard menu profiles will grant access to all options within a feature. Please refer to the table below on where to find the menu options to disable options within a feature where applicable.

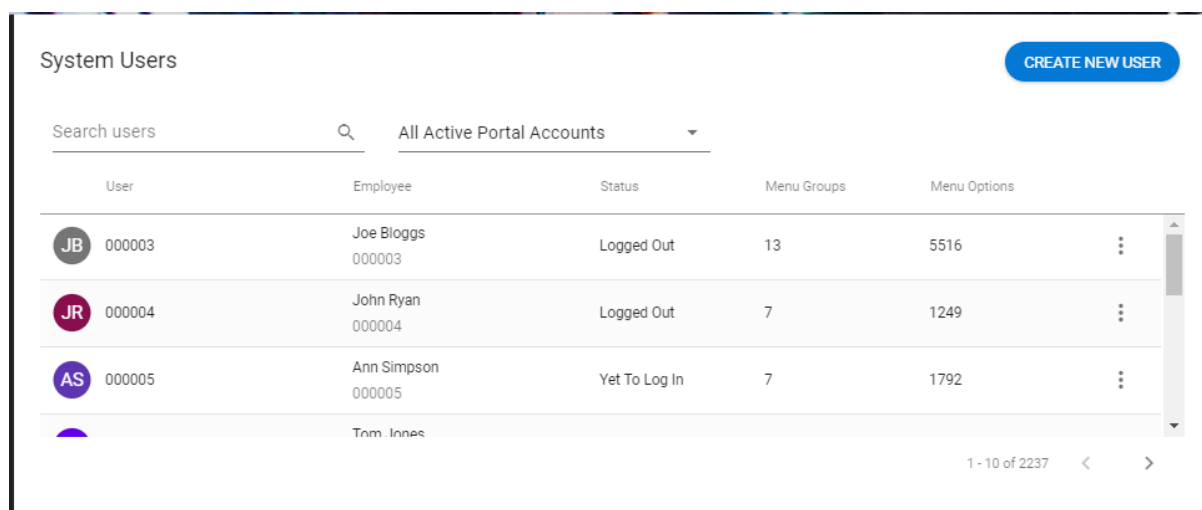

Functionality/Feature	Documentation
WFM Person Maintenance	To enable/disable the various options within the WFM Person Maintenance screen for admins refer to Section 27.1 of WFM v28: Person Maintenance Configuration Guide
Advance Period	To enable/disable the transfer access feature within the Advance Period screen refer to Section 3 of WFM (Time & Attendance) v28 - Advance Period Configuration Guide
Generate Timesheets	To enable/disable the various options within the Generate Timesheets screen refer to Section 5.2 of WFM (Time & Attendance) v28: Generate Timesheets User Guide

Sign Off Hours	To enable/disable the bulk sign off option within the Sign Off Hours screen refer to Section 3 of WFM V28 - Sign Off Hours User Guide
Activate Balance	To enable/disable Activate Balance refer to Section 3.4 of WFM V28 - Balances User Guide
Balance Recalculation	To enable/disable Balance Recalculation refer to Section 2.4 of WFM V28 - Balances User Guide

5.1.3. Assigning the WFM Admin Menu Profile to Users

To access the *WFM Admin Dashboard*, users will need to be assigned the WFM Admin Menu Profile that you have created. Details on how to add this menu profile to a user's profile is outlined below:

1. Navigate to the *Security Dashboard* via the Quick Jump
2. Select the *User Management* Tab
3. Search for the user in the *System Users* widget

System Users					CREATE NEW USER
Search users		All Active Portal Accounts			
User	Employee	Status	Menu Groups	Menu Options	
JB 000003	Joe Bloggs 000003	Logged Out	13	5516	⋮
JR 000004	John Ryan 000004	Logged Out	7	1249	⋮
AS 000005	Ann Simpson 000005	Yet To Log In	7	1792	⋮
	Tom Innes				

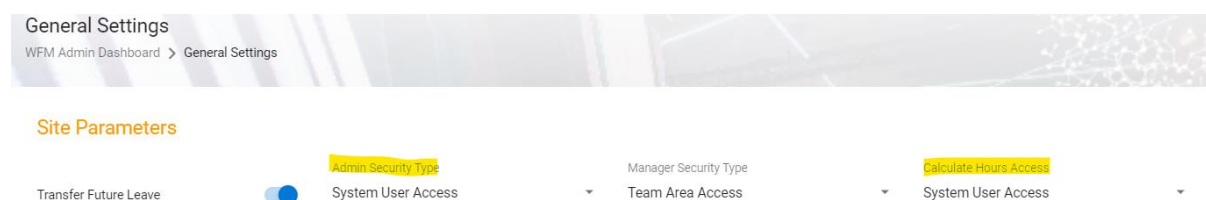

4. Select *Manage Account* from the three dots () next to the user's profile
5. Select the *Menu Security* Tab
6. Search for the WFM Admin profile that you have created
7. Enable the toggle opposite the profile
8. The user's access has now been updated

5.2. Configure the WFM Admin Access Type

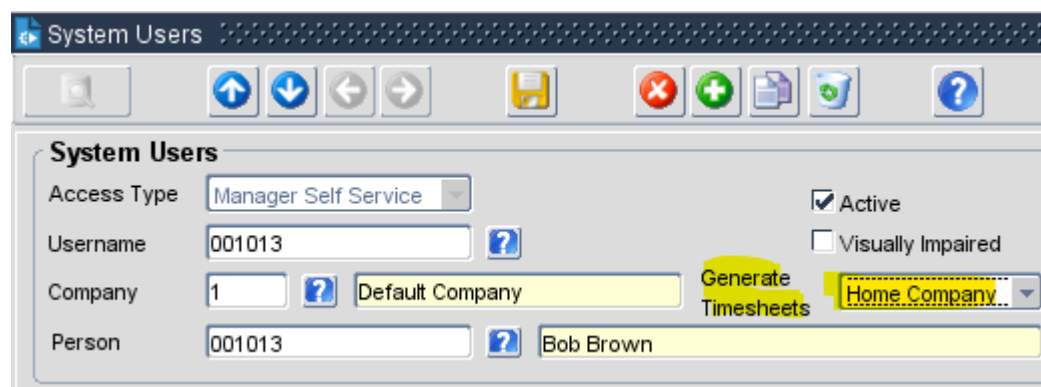

Access to employees on the WFM Admin Dashboard can be determined by one of three access types. The three access types are:

1. System Users (incl. Generate Timesheets access) – this replicates back office access that is setup on the CoreTime System Users screen.
2. Structure Code Access – this is the default setting and uses admin access from People Management and applies it to the WFM Admin Dashboard.
3. Team Area Access – this should only be considered if Roster is utilised by your organisation for all employees. Access to employees on the WFM admin dashboard is determined by the roster team areas that the admin has been granted access to.

If you want to change the access type on your environment from System Users, this can be completed on WFM Admin Dashboard > WFM Configuration > General Settings. The Admin Security Type parameter determines access on Person Maintenance, Balance Recalculation, Activate Balance, and Employee Calendars. The Calculate Hours Access parameter separately determines access on the Calculate Hours screen.

Access to employees on Generate Timesheets, Advance Period, and Sign Off hours are not controlled by these parameters. The existing Generate Timesheets parameter on System Users (CoreTime Back Office: System Params > System Users) determines access for Generate Timesheets, Advance Period, and Sign Off Hours, and should not need to be changed.

The table below provides an overview of the access types available in the different areas of the WFM Admin Dashboard:

Screen	Parameter	Access Types Available
--------	-----------	------------------------

WFM Person Maintenance	WFM Admin Dashboard > WFM Configuration > General Settings > Admin Security Type	Structure Code / System Users / Team Area
Balance Recalculation	WFM Admin Dashboard > WFM Configuration > General Settings > Admin Security Type	Structure Code / System Users / Team Area
Activate Balance	WFM Admin Dashboard > WFM Configuration > General Settings > Admin Security Type	Structure Code / System Users / Team Area
Calculate Hours	WFM Admin Dashboard > WFM Configuration > General Settings > Calculate Hours Access	Structure Code / System Users / Team Area
Employee Calendars	WFM Admin Dashboard > WFM Configuration > General Settings > Admin Security Type	Structure Code / System Users / Team Area
Generate Timesheets	CoreTime Back Office: System Params > System Users > Generate Timesheets	Home Company / All Companies / No
Advance Period	CoreTime Back Office: System Params > System Users > Generate Timesheets	Home Company / All Companies / No
Sign Off Hours	CoreTime Back Office: System Params > System Users > Generate Timesheets	Home Company / All Companies / No
WFM Configuration	NA	NA

5.3. Assigning WFM Admin Users Access to Employees

The section below outlines the steps required to grant an admin user access to employees for each access type available on the WFM admin dashboard. However, please first review if the required access is already setup for users:

- For System User access, if a back office user was linked to their personnel number on CoreTime System Users, then the setup steps are not required. To check if a user has System User access for Portal, go to CoreTime: System Params > System Users in the back office
 - Enter the user's **employee number** in the **Username field**. If there is an existing profile where the username is the user's personnel number, then this account will be used for System User access on the WFM Admin Dashboard.

- The work group and department System User access will be populated in the Access Details section of the screen

The screenshot shows the 'System Users' screen. The 'Access Type' is set to 'Manager Self Service'. The 'Username' field contains '001013'. The 'Company' field is set to '1' with a dropdown showing 'Default Company'. The 'Person' field contains '001013' with a dropdown showing 'Bob Brown'. The 'Generate Timesheets' dropdown is set to 'Home Company'. The 'Access Details' section shows 'Work Group' as 'SYST' (System Work Group / Team) and 'Department' as 'SYST' (System). The 'Select Detail' dropdown is set to 'Access Details'.

- For Generate Timesheets access, the Generate Timesheets parameter should be set to either Home Company or All Companies

This screenshot is similar to the previous one, but the 'Generate Timesheets' dropdown is highlighted in yellow, and the 'Home Company' option is also highlighted in yellow.

- For Structure Code access, if a user already has access to employees on People Management and requires access to the same employees on WFM Admin, then the setup steps are not required
- For Team Area access, if a user already has access to employees on Roster Details screen and requires access to the same employees on WFM admin Dashboard, then the setup steps are not required

If an admin user does not have the required access, please review the steps below on assigning access for each Access Type:

5.3.1. System Users

1. In CoreTime back office, open the System Users screen (CoreTime > System Params > System Users)
2. Select Manager Self Service in the Access Type field
3. Enter the user's **personnel number** in the **Username field**
4. Select the T&A company from the list of values
5. Enter the employee's personnel number in the Person field

6. If required, set Generate Timesheets access to Home Company or All Companies (Generate Timesheets, Advance Period, and Sign Off Hours screens on WFM Admin Dashboard use this access)

The screenshot shows the 'System Users' form. The 'Access Type' is 'Manager Self Service'. The 'Username' is '8866'. The 'Company' is '1'. The 'Person' is 'Johnny McGee'. The 'Generate Timesheets' dropdown is set to 'Home Company'. The 'Select Detail' dropdown is open, showing 'Access Details', 'Access Privileges', 'Roster Privileges', and 'Form Options'.

7. To grant access to all employees against the T&A company associated with the username:
 - a. Under Access Privileges in the Select Detail section, enable 'Always Access All Work Groups / Departments'

The screenshot shows the 'System Users' form. The 'Access Type' is 'Manager Self Service'. The 'Username' is '8866'. The 'Company' is '1'. The 'Person' is 'Johnny McGee'. The 'Generate Timesheets' dropdown is set to 'No'. The 'Select Detail' dropdown is open, showing 'Access Details', 'Access Privileges', 'Roster Privileges', and 'Form Options'. The 'Access Privileges' dropdown is selected. Below the form, the 'Access Privileges' section is visible, showing the 'Always Access All Work Groups / Departments' checkbox checked.

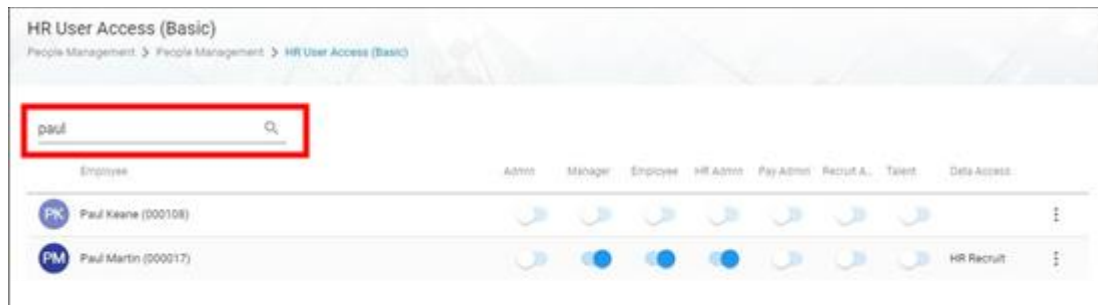

8. To grant access to a restricted group of employees against the T&A company associated with the username:
 - a. Under Access Details in the Select Detail section, add the work group and department combinations that the user should have access to

The screenshot shows the 'System Users' form. The 'Access Type' is 'Manager Self Service'. The 'Username' is '8866'. The 'Company' is '1'. The 'Person' is 'Johnny McGee'. The 'Generate Timesheets' dropdown is set to 'Home Company'. The 'Select Detail' dropdown is open, showing 'Access Details', 'Access Privileges', 'Roster Privileges', and 'Form Options'. The 'Access Details' dropdown is selected. Below the form, the 'Access Details' section is visible, showing the 'Work Group' and 'Department' fields populated with 'SYST', 'System Work Group / Team', and '7001', '7002', '7003', 'Development 7000', 'Product 7000', and 'Operations 7000'.

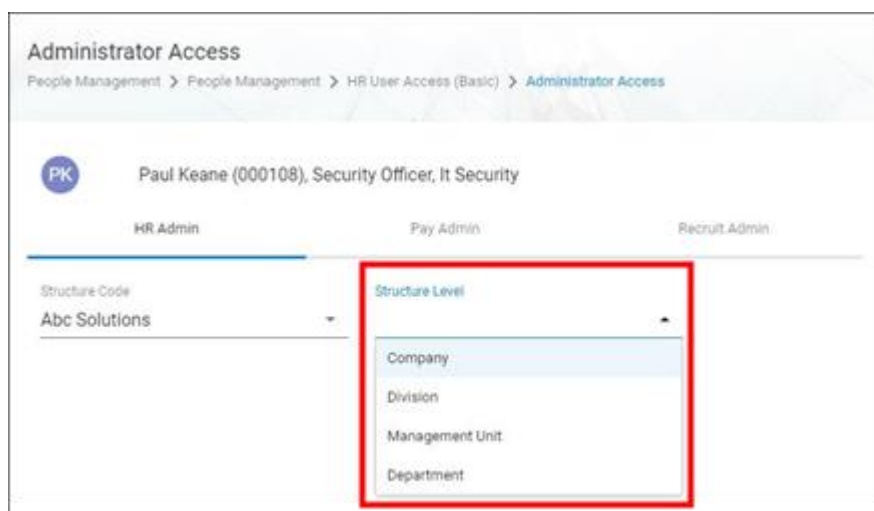

9. Save

5.3.2. Structure Code Access

1. Quick jump to the Data Centre widget and Open People Management
2. Search for “HR User Access (Basic)” and click on the corresponding option. The Data Security Access screen opens

3. Search for the employee on the HR User Access (Basic) screen
4. In the relevant employee row. Click on the button for the HR Admin option
5. The Administrator Access screen appears
6. Select the Structure Code dropdown
 - a. If more than 1 Org Structure exists for an organisation, it is vital to select the correct one here
 - b. If only 1 exists, select this
7. The Structure Level drop down list will appear
 - a. The levels displayed here will reflect the levels that have the Hierarchy Indicator enabled on the Org Structure definition

8. Select a level from the drop-down e.g. Company
9. The window expands to include a list of all the active org units for the chosen level

- a. e.g. if Company is selected, this will be a list of companies, if Department is selected this will be a list of departments

Budget	☐

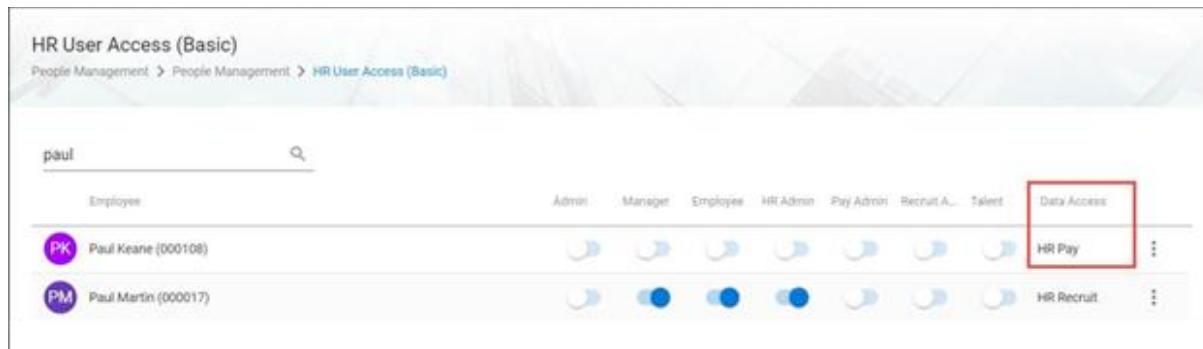

12. Remember! If access is enabled at the top level of the structure, this provides full access to all units beneath. If access is required for only specific sub units, ensure that:

- a. the org unit at the top level is not enabled
- b. the correct level is selected on the Structure Level drop down list
- c. only the required units are enabled for the selected level

13. Changes to the user access settings are automatically saved.

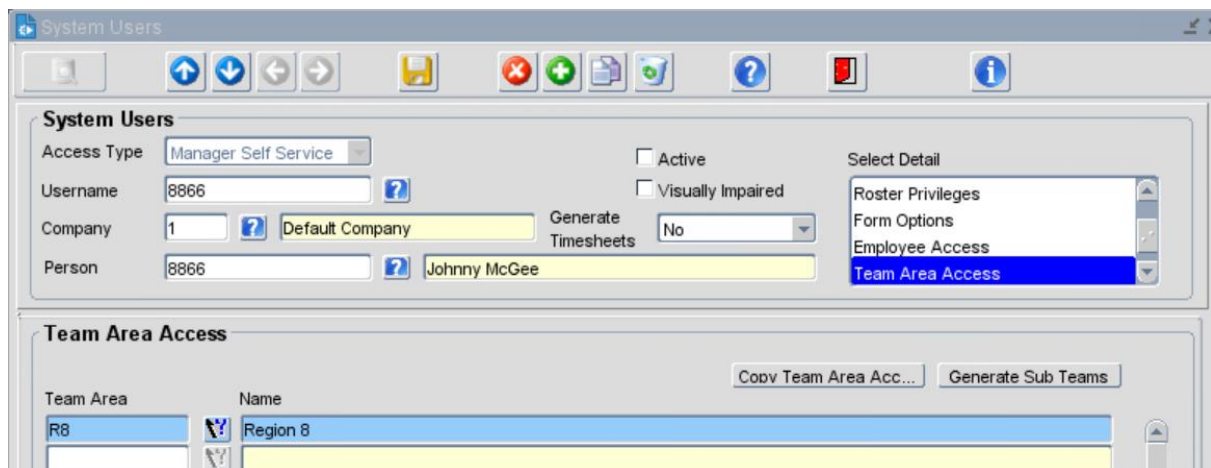

14. On returning to the Data Security Access screen, the Data Access column will display a label of HR, indicating that this employee has been granted access to:

- a. HR data on People Management (employees, contracts & posts)
- b. WFM Admin screens using Structure Code access

5.3.3. Team Area Access

1. In CoreTime back office, open the System Users screen (CoreTime > System Params > System Users) and enter/select the user's personnel number from the Username field
2. Select Team Area Access from the Select Detail section
3. Enter/select the team area codes that the user should have access to
 - a. If a parent team area is selected, a user will have access to all team areas under the parent team in the roster hierarchy

4. Save

5.4. Configure the Employee Calendar Screen for Admins

The employee calendar screen needs to be configured before it can be used by admins. The configuration items available mean that you can set colours to highlight work days, each type of absence, and where an action is required in the case of a leave request. You can also set the abbreviation to display to admins for each absence.

This is completed on WFM Admin Dash > WFM Configuration > Calendar Configuration. Please refer to section 2 of the **WFM v28: Employee Calendars User Guide** for more information, and on how to configure the screen for admins.

5.5. Configure the Person Maintenance and WFM Admin Dashboard Order

The ordering of tabs on the WFM Admin Dashboard and within the WFM Person Maintenance screen for admins can be changed at a site level:

1. This is completed on WFM Admin Dashboard > WFM Configuration > Configuration Settings > Dashboard Configuration
2. Select WFM Admin Dashboard in the Dashboard field
3. Reorder the position of screens as required (any screens listed on the Dashboard Configuration screen that users do not have menu profile access for will not be visible to users)

Position	Title
1	WFM Person Maintenance
2	Generate Timesheets
3	WFM Configuration
4	Calculate Hours
5	Advance Period
6	Employee Calendar
7	Sign Off Hours
8	Balance Maintenance

4. Select Person Maintenance Admin in the Dashboard field and repeat steps 2-3

6. Generate Timesheets Parallel Run

Note: You only need to review this section if you currently run generate timesheets in the back office. If you run generate timesheets but currently do this on Portal, you do not need to review this section. Also, if you do not run generate timesheets you do not need to review this section.

6.1. What is Parallel Mode?

When Parallel Mode is enabled for Generate Timesheets, you can generate timesheets on Portal for a CoreTime input period that was previously transferred in Live mode from the back office. Parallel timesheets from WFM will be transferred to a parallel table which will allow you to run reconciliation reports against what was actually transferred to Payroll when the same period was completed from back office.

Please review Section 1 of the **WFM V28: Generate Timesheets Parallel Run User Guide** for more information. Section 1.3.4 of the same guide will show you how to enable Parallel Mode, as this will be disabled by default.

6.2. How do I Complete a Parallel Run?

Please see Section 2 of the **WFM V28: Generate Timesheets Parallel Run User Guide** for the steps to run Generate Timesheets in Parallel Mode, and for the steps to create and run reports from Insight to reconcile the parallel transfer to the live transfer.

You can complete multiple parallels ahead of your retirement date. Once you are happy that the timesheets that are transferring via Portal match what is transferring via back office, Parallel Mode can be disabled. This means that timesheets will now be transferring directly to Payroll when generate timesheets is run from Portal.

You will need to ensure that you have at least one Generate Timesheets parallel completed on your Production environment ahead of your retirement date, as the TAF019 Generate Timesheets screen in back office will not be available after your retirement date.

6.3. Should I Run a Parallel on UAT?

A generate timesheets parallel on UAT is not mandatory. The Generate Timesheets parallel on Production will reconcile timesheets sent via back office with timesheets sent via Portal, which can be run for multiple CoreTime periods ahead of your retirement date. However, it is advised to run Generate Timesheets in Parallel Mode and in Live mode first on UAT. This will ensure that you are familiar with the process for both the parallel mode and the live mode ahead of running these on Production.

The steps for running a generate timesheets parallel are detailed in section 3 of the **WFM V28: Generate Timesheets Parallel Run User Guide**.

7. WFM Manager Dashboard Overview

7.1. How to Access the Workforce Management Dashboard

The Workforce Management dashboard is where a manager completes their WFM related processes. To access the **Workforce Management Manager Dashboard** users will need to be assigned menu access. A specific menu profile will be available on your environment to grant access for each new feature. Details on how to configure your menu profile for managers and complete this step is outlined

in [Section 9.1.1](#) or [Section 9.2.1](#) further below, depending on whether managers in your organisation currently use MSS features or not.

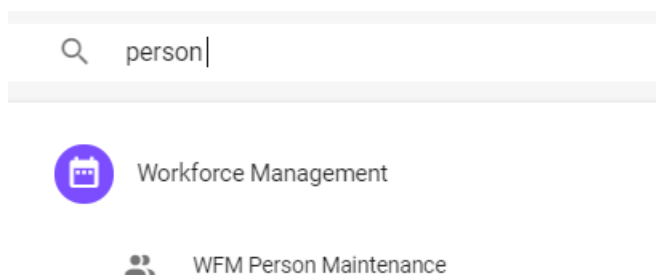

Once assigned access, the **WFM Dashboard** for managers is accessed by selecting **Workforce Management** from the quick jump menu.

It is possible to search for a tab or widget name in the Quick Jump menu also, and jump straight to that object.

For example, if searching for the tab called "WFM Person Maintenance", the Quick Jump will return:

1. The dashboard that the tab is on i.e. WFM Dashboard.
2. The tab that you are searching for i.e. WFM Person Maintenance

Click on one of those items, to jump straight to it i.e. jump to the main dashboard or the tab itself.

Note:

For further details on the features available on the Workforce Management Admin Dashboard please see related documents on the Customer Success Portal (Select PeopleXD – Workforce Management > Knowledge Base > Move to Portal: Workforce Management)

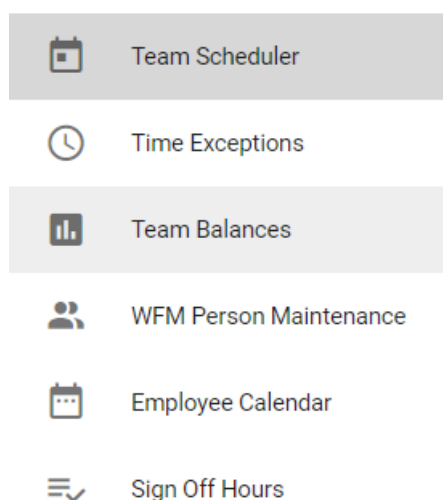

7.2. WFM Manager Dashboard Overview

7.2.1. Dashboard Overview

The Workforce Management dashboard contains 6 tabs as standard – WFM Person Maintenance, Team Scheduler, Time Exceptions, Sign Off Hours, Team Balances, and Employee Calendar. The My Approvals section of the Notification Centre is also available.

Note: The Employee Calendars feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021. The Sign Off Hours screen is available from Feature Pack 14. Feature Pack 14 is available on UAT from 20 September 2021 and will be available on Production from 11 October 21. All other features are currently available on UAT and Production.

Workforce Management

The Person Maintenance screen is where managers can view and update WFM data for employees they have access to. The type of information that can be maintained here includes schedules, attendance, absence, balances.

WFM Person Maintenance

Name		Personnel No	Appointment Id	Job Title	Work Group	Department	Team Area	Date Started
FH	Finn Holland	000974	502192-39	Business Analyst	System Work Grou...	System		14-Feb-2021

The Team Scheduler provides managers with a weekly view of the schedules of employees that they have access to, as well as other time and attendance information such as clock records, absences, and attendance. Managers can also drill into other screens from here such as Timesheet Input and Absence Input to maintain time and attendance information for their employees.

JM Johnny McGee	Business Analyst	System	20 DAYS	

The Employee Calendars screen displays a graphical calendar view of employee absence and schedule information.

Employee Calendar

The notification centre allows managers to action leave requests that have been submitted by employees reporting to them. The Notification Centre is accessed by clicking on the bell icon on the top right of any screen within Portal.

8. Mapping from Back Office to WFM Manager Dashboard on Portal

The following section details where the back-office screens you currently access are now mapped to in Portal. For a simple table of the mapping of screens from back office to portal see the mapping table in [Section 12.1](#).

8.1. Portal Screens Replacing Back Office Forms

8.1.1. Person Maintenance

The Person Maintenance screen is now available on the Workforce Management Dashboard on Portal. Additional screens have also been made available within Person Maintenance, such as Absence Input and Timesheet Input.

Back Office Screen	Back Office Path	Portal Path
--------------------	------------------	-------------

This is where a manager can centrally manage employee WFM records. The front screen provides key information for each employee and user can toggle between active employees and leavers.

WFM Person Maintenance

Search	Q	Active	▼					
Name	Personnel No	Job Title	Work Group	Department	Team Area	Date Started	Reports To	
 Cathal Cormack	000257	Budget Analyst	Finance	Budget		02-Jan-2021	John Wallis	⋮
 Catherine Keeting	000111	Training Manager	Training	Training		15-Jan-2018	Brian O'Keefe	⋮

A user can then drill in to view and maintain the following types of data against employees:

- Timesheet Input
- Absences
- Key Information
- Work Schedule
- Balances
- Personal Settings
- Work Group Override
- Personal Groups
- Leave Request History
- Badge Details
- Contact Information
- Next of Kin
- Trigger Points
- Team Area Assignment (only applicable to Roster sites)
- Roster Contract (only applicable to Roster sites)
- Shift Swap History (only applicable to Roster sites)
- Uncovered Shifts (only applicable to Roster sites)
- Person Attributes (only applicable to Roster sites)
- Qualifications (only applicable to Roster sites)

Each of these options can be enabled/disabled against a menu profile (menu options for each are given in **Section 27.2 of WFM v28: Person Maintenance Configuration Guide**).

The Absences screen is available for admins from WFM Person Maintenance and allows users to view, edit, and delete absence information recorded against an employee. The Absences summary

screen shows all absences recorded against an employee. From here a user can drill into a particular absence to view more detail or edit or delete or view the co-workers absence screen.

Search	Q	≡						ADD ABSENCE
Absence Type	Start Date	End Date	Days	AM/PM	Hours	Weeks	Num Docs	
Annual Leave	26-Apr-2021	29-Apr-2021	4.00		30.00	0.57	0	⋮
Annual Leave	05-Apr-2021	07-Apr-2021	3.00		22.50	0.43	0	⋮

A user can also add a new absence along with associated information including reason, narrative, return to work details, medical cert details, and attach documents.

Managers can access the Timesheet Input, Person Absences, and Roster Change for each employee from the Team Scheduler. A filter is also available for managers with access to multiple teams, which allows them to only view a certain team or teams.

8.1.3. Time Exceptions

Back Office Screen

Back Office Path

Portal Path

Approve Hours

CoreTime: Time Mgt > Approve Hours

Workforce Management > Time Exceptions

The Time Exceptions screens displays records that require action (approval or recode) on an employee’s timesheets. A count of the number of outstanding items requiring action for a week or user defined calendar period is highlighted to the manager. The information needed by the manager to action the exceptions is displayed, including the rostered start and end time of the employee’s shift on that date and their first and last clock time. Additional information including other clockings and scheduled break times can be viewed by drilling into a record.

Employee	Roster	Clock	Day	Paycode	Hours	Actions Required	Approve	Reject	Comments
Johnny McGee Business Analyst	09:00 17:30	First 09:00 Last 18:15	08-Apr-2021	Overtime @ 1.50	0.45	Approval/Rejection			0
Johnny McGee Business Analyst	09:00 17:30	First 09:00 Last 18:30	06-Apr-2021	Overtime @ 1.50	1.0	Approval/Rejection			0

The actions a manager can take against an exception on this screen are determined by how a paycode is configured – i.e. it is only possible to recode a paycode that is configured to require recode, or to approve a paycode that requires approval. To clear exceptions, managers can also drill down against an exception to the Absence Input screen, Timesheet Input, or Roster Change screen (Roster sites only).

8.1.4. Sign Off Hours

Note: The Sign Off Hours feature is available from Feature Pack 14. Feature Pack 14 is available on UAT from 20 September 2021 and will be available on Production from 11 October 21.

Back Office Screen	Back Office Path	Portal Path
Sign Off Hours	CoreTime: Time Mgt > Sign Off Hours	Workforce Management > Sign Off Hours

The Sign Off Hours screen allows managers to see what hours have not yet been signed off (Action Required tab), what is waiting to be signed off (Pending Sign Off tab), and what has been signed off (Signed Off tab). Any hours that have been rejected are displayed in the Rejected tab. Each tab highlights the number of records at a particular status. The manager can action any records that have a status of Action Required – i.e. approve the hours – or drill into an employee's timesheets from the Sign Off Hours screen.

Sign Off Hours

Further information on the Sign Off Hours screen is provided in the **WFM V28 - Sign Off Hours User Guide** on the Customer Success Portal.

8.1.5. Team Balances

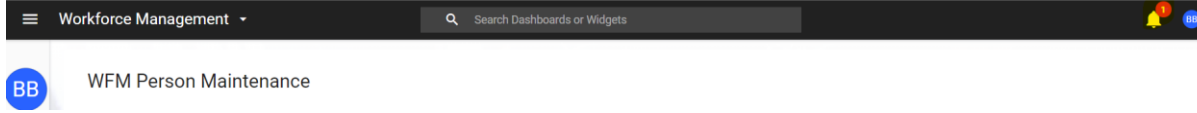

Back Office Screen	Back Office Path	Portal Path
Current Balance Enquiry	CoreTime: Enquiry > Current Balance Enquiry	Workforce Management > Team Balances

The Team Balances screen provides managers with an overview of the balances assigned to their team. Up to five balances can be displayed on the screen against employees.

Team Member	Job Title	Department	Annual Leave
 Cliona Admin	Budget Analyst	Budget	28 DAYS
 Nathan Clarke	Financial Analyst	Finance Admin	24 DAYS

Managers can drill down to view the balance detail against each employee. A filter is also available for managers with access to multiple teams, which allows them to only view a certain team or teams.

8.1.6. Notification Centre

Back Office Screen	Back Office Path	Portal Path
Approve Leave Request	CoreTime: Time Management > Approve Leave Request	Notification Centre > My Approvals
Managers can action leave request approvals from My Approvals in the Notification Centre. The Notification Centre is available by clicking on the bell icon from the top right of the screen in XD.  All outstanding leave request approvals from their team are displayed to managers within My Approvals. A particular approval can be selected to view and action. When selected, the leave request details are displayed and additional details are available to drill down to, including the balance details for that employee and the booked absences and schedules for the employee's co-workers. Once reviewed, the manager has the option to approve or reject the request.

Further information on the Employee Calendars screen is provided in the **WFM V28: Employee Calendars User Guide** on the Customer Success Portal.

8.2. Back Office Forms with no Portal Mapping (Continue to Use Back Office)

Please reference [Section 12.2](#) for a list of Workforce Management infrequently accessed screens available through back office forms which will not be available through Portal, your access will remain via back office and this will still be available post the communicated retirement data.

9. Once Off Configuration – WFM Manager

Review [Section 9.1](#) if managers in your organisation currently use the Manager and/or Workforce Management Dashboards on Portal and do not use the back office. Please review [Section 9.2](#) if managers in your organisation currently use the back office.

9.1. Our Managers Currently Use Manager and/or Workforce Management Dashboards

Listed below are the primary configuration/set up tasks that are involved in enabling new features for managers on Workforce Management. Completing these steps will enable you to have your solution fully set up before you are beginning your training. Our recommendation is that you complete these steps first on your Non Production environment and once ready complete these steps again on your Production environment.

Tasks No	Task Detail
Step 1	Assign Managers Access to new WFM Portal Features
Step 2	Configure/Review Access Type for Managers
Step 3	Configure/review Org Role and Group for Person Maintenance

Step 4	Configure the new Employee Calendar screen for managers
Step 5	Configure the Workforce Management Dashboard Order

9.1.1. Assign Managers Access to New Features on the WFM Dashboard

To access new features on the Workforce Management Dashboard, you will need to update the existing menu profile assigned to managers.

Updating your WFM Manager Menu Profile

A specific menu profile is available on your environment for new features outlined in the [manager dashboard overview](#) above. The menu profile for each new feature is listed in the table below. These menu profiles enable all options for that feature – see the next [section](#) on further refining a feature where applicable.

Feature	Menu Profile
Person Maintenance	WFM_PERSON_MAINTENANCE_MGR
Employee Calendars	WFM_EMP_CALEDAR_MGR
Sign Off Hours	Automatically enabled for menu profiles where Approve/Sign Off is enabled. This screen replaces the existing Portal Approve/Sign Off Hours screen which can be switched off by disabling this menu option: Manager Toolbox Profile - Approve/Sign Off Hours (23660)

A new menu profile import/merge feature is available in Security to help you update the menu profile assigned to managers by merging the profiles in the table above for features you wish to enable.

 **Note:** The Import/Merge Menu Profile feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

Follow the steps below to update your existing manager menu profile using the import/merge menu profile feature:

1. Search for the existing manager Menu Profile and under the more options button against the profile, select Import Menu Options.

Menu Profiles

CREATE NEW PROFILE

PORTALMIGRATION_WFM_ADMIN

Profile Name

Portal Users

Back Office Users

PORTALMIGRATION_WFM_ADMIN

Web Services, CorePortal, People Management

4

1

- Manage Menu Options
- Edit Profile Description
- Duplicate
- Download Menu Profile
- Import Menu Options
- Delete Profile and Remove Options

2. Select the “From Existing Menu Profile” option and click ok.
3. In the “From Profile” field, select the first menu profile from the list of features above that you want to merge with your manager profile (i.e. WFM_EMP_CALENDAR_MGR or WFM_PERSON_MAINTENANCE_MGR), and click ok
4. The selected menu profile has now been merged with the existing manager menu profile.
5. Repeat steps 2-4 to add merge additional features to your manager profile.

Refining your WFM Manager Menu Profile

Within some screens there may be options that you want to disable for users, as the standard menu profiles will grant access to all options within a feature. Please refer to the table below on where to find the menu options to disable options within a feature.

Functionality/Feature	Documentation
WFM Person Maintenance	To enable/disable the various options within the WFM Person Maintenance screen for managers refer to Section 27.2 of WFM v28: Person Maintenance Configuration Guide
Sign Off Hours	This screen will be automatically enabled for managers where the Approve/Sign Off screen is enabled against a menu profile. To enable/disable the Sign Off Hours screen refer to Section 3 of the WFM V28: Sign Off Hours User Guide. This screen replaces the existing Portal Approve/Sign Off Hours screen which can be switched off by disabling this menu option:

- Manager Toolbox Profile -Approve/Sign Off Hours (23660)

9.1.2. Configure Access Type for Managers – Roster Sites Only

Note:

You do not need to review this section unless you are interested in using Roster Team Area access for WFM Person Maintenance or the Employee Calendar screens.

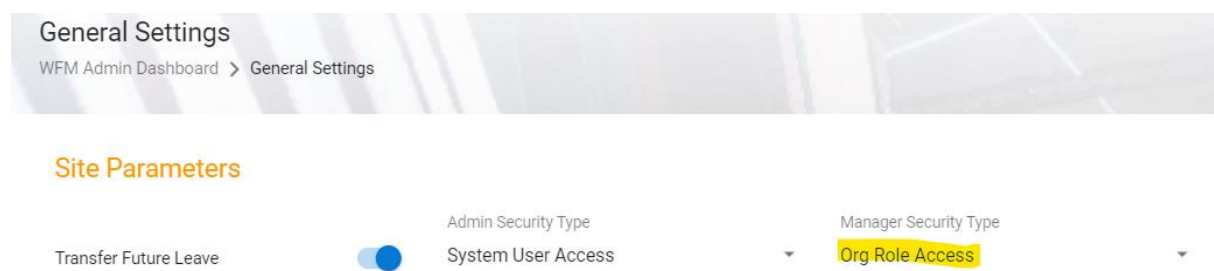

All employees in your organisation need to be on Roster (i.e. assigned to a team area) for you to be able to use Roster Team Area Access

Access to employees on the Workforce Management Dashboard is determined by Organisational Role access for the Team Scheduler, Team Balances, Sign Off Hours screens, and the Notification Centre Approvals area.

The WFM Person Maintenance, Employee Calendar, and Time Exceptions screens can either be set by Organisational Role or Team Area access:

1. Organisational Role – this is the default setting and will be the manager access type on the WFM Person Maintenance screen, Employee Calendar, and Time Exceptions screen.
2. Team Area Access – this should only be considered **if Roster is used** by your organisation. Access to employees on the WFM manager dashboard is determined by the team areas that the manager has been granted access to.

If your organisation uses Roster for **all staff** and you want to change the access type on your environment from Organisational Role to Team Area access for the WFM Person Maintenance and Employee Calendar screens, this can be completed on WFM Admin Dashboard > WFM Configuration > General Settings, and updating the Manager Security Type parameter.

If your organisation uses Roster for **all staff** and you want to change the access type on your environment from Organisational Role to Team Area access for the Time Exceptions screen, this can be completed on WFM Admin Dashboard > WFM Configuration > Time Exception Settings. On the Time Exceptions Settings screen, go to Settings > General Settings and disable the Org Role Access (On)/Transaction Access (Off) parameter. This will use Roster Team Area access on the Time Exceptions screen rather than Org Role access.

Time Exceptions Settings
WFM Admin Dashboard > Time Exceptions Settings

1 Employee Info

2 Settings

Org Group
Work Group

Org Role

The table below highlights the access types available in the different areas of the Workforce Management Dashboard for managers:

Screen	Access
Team Scheduler	Org Role
Team Balances	Org Role
Sign Off Hours	Org Role
Time Exceptions	Org Role or Team Area
WFM Person Maintenance	Org Role or Team Area
Employee Calendar	Org Role or Team Area
Leave Request Approvals (Notification Centre)	Org Role

9.1.3. Configure Org Role and Group for Person Maintenance

Note: By default, the organisational role for WFM manager features is MGRESS (Reports To Manager) and the organisational group is WRKGRP (Work Group). This is also the default org role and group for the new WFM Person Maintenance screen.

If this org role and group (MGRESS/WRKGRP) are used for existing MSS features (team scheduler, approve/sign off, team balances, time exceptions), then you do not need to review this section.

If existing WFM manager features (team scheduler, approve/sign off, team balances, time exceptions) are not configured to use MGRESS (Reports To Manager) as the org role and WRKGRP (Work Group) as the org group, then you will need to update the org role and org group admin settings for the WFM Person Maintenance screen:

- cp_pers_maint_org_role should be set to the org role used for existing MSS features

- cp_pers_maint_org_group should be set to the org group used for existing MSS features
- To update these admin settings:
 - Search for the Site Manager widget in the Quick Jump
 - Open Admin Settings from the Site Manager widget
 - Search for the parameters specified above and update the Current Value to the org role and group used in your organisation

Coreportal Parameters

cp_pers_maint_org_

×

Search Whole Phrase

▼

Parameter Description	Parameter Code	Product Name	Current Value
Org Role used for determining employees included for a manager in person maintenance	cp_pers_maint_org_role	CoreTime	MGRESS
Org Group used for determining employees included for a manager in person maintenance	cp_pers_maint_org_group	CoreTime	WRKGRP

9.1.4. Configure the Employee Calendar Screen for Managers

The employee calendar screen needs to be configured before it can be used by managers. The configuration items available mean that you can set colours to highlight work days, each type of absence, and where an action is required in the case of a leave request. You can also set the abbreviation to display to managers for each absence.

This is completed on WFM Admin Dash > WFM Configuration > Calendar Configuration. Please refer to section 2 of the **WFM v28: Employee Calendars User Guide** for more information, and on how to configure the screen for managers.

9.1.5. Configure the Person Maintenance and Workforce Management Dashboard Order

The ordering of tabs on the Workforce Management Dashboard and within the WFM Person Maintenance screen for managers can be changed at a site level. You may want to change the position of the new WFM screens on Portal for managers.

1. This is completed on WFM Admin Dashboard > WFM Configuration > Configuration Settings > Dashboard Configuration
2. Select WFM Manager Dashboard in the Dashboard field
3. Reorder the position of screens as required (any screens listed on the Dashboard Configuration screen that users do not have menu profile access for will not be visible to users)

Dashboard Configuration
WFM Admin Dashboard > Dashboard Configuration

Dashboard
Person Maintenance Manager

Position	Title
1	Key Information
2	Work Schedule
3	Absences
4	Balances
6	Person Settings
7	Work Group Override
8	Personal Groups
9	Leave Request History
10	Badge Details
11	Contact Information
12	Next Of Kin

6. Select Person Maintenance Manager in the Dashboard field and repeat steps 2-3

9.2. Our Managers Currently Use Back Office

Listed below are the primary configuration/set up tasks that are involved in migrating managers from CoreTime on Back Office to WFM on Portal. Completing these steps will enable you to have your solution fully set up before you are beginning your training. Our recommendation is that you complete these steps first on your Non Production environment and once ready complete these steps again on your Production environment.

Tasks No	Task Detail
Step 1	Assign Managers Access to Workforce Management
Step 2	Configure Access Type for Managers
Step 3	Map from Work Group and Detartment Access to Organisational Role Access
Step 4	Assigning Managers Access to Employees
Step 5	Configure Manager Self Service
Step 6	Configure the new Employee Calendar screen for managers

Step 7	Configure the Workforce Management Dashboard Order
---------------	--

9.2.1. Assign Managers Access to the WFM Dashboard

To access the Workforce Management Dashboard, you will need to create a menu profile for managers and assign this profile to users. The menu profile will give managers access to the screens on the Workforce Management dashboard, but not access to view employees and employee data on these screens – this is covered in step 5 ([section 9.2.4](#)).

Creating your WFM Manager Menu Profile

A specific menu profile is available on your environment for new features outlined in the [manager dashboard overview](#) above. The menu profile for new features (where available) is listed in the table below.

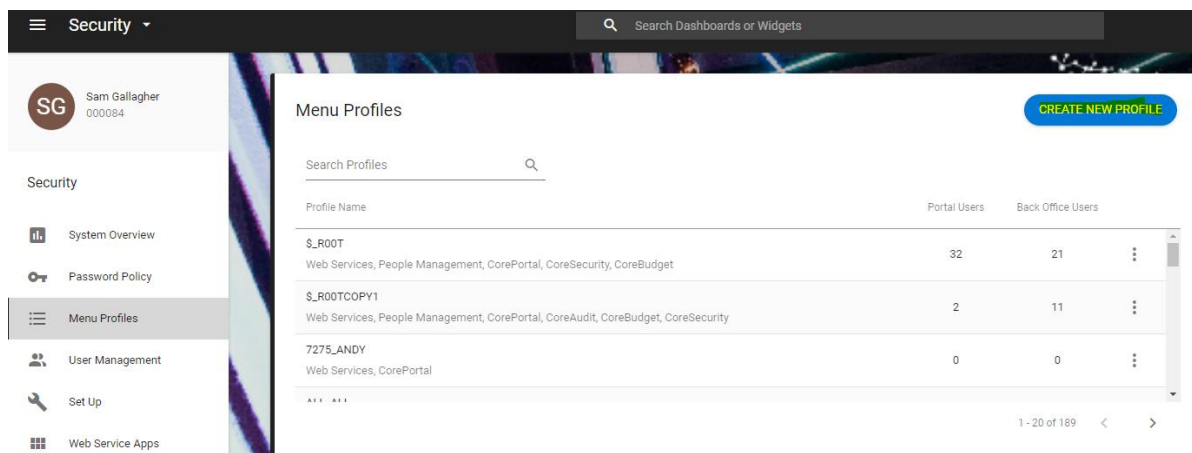

Feature	Menu Profile
Person Maintenance	WFM_PERSON_MAINTENANCE_MGR
Employee Calendars	WFM_EMP_CALENDAR_MGR
Team Scheduler	See next section on refining profiles for menu options to enable
Team Scheduler - Timesheet Input	See next section on refining profiles for menu options to enable
Team Scheduler - Absence Input	See next section on refining profiles for menu options to enable
Team Scheduler - Roster Change	See next section on refining profiles for menu options to enable
Time Exceptions	See section on refining profiles
Sign Off Hours	Automatically enabled for menu profiles where Approve/Sign Off is enabled
Team Balances	See next section on refining profiles for menu options to enable
Notification Centre	See next section on refining profiles for menu options to enable
Insight	See next section on refining profiles for menu options to enable
Roster Screens	See next section on refining profiles for menu options to enable

A new menu profile import/merge feature is available in Security to help you create the menu profile for managers by merging the profiles in the table above for features you wish to enable.

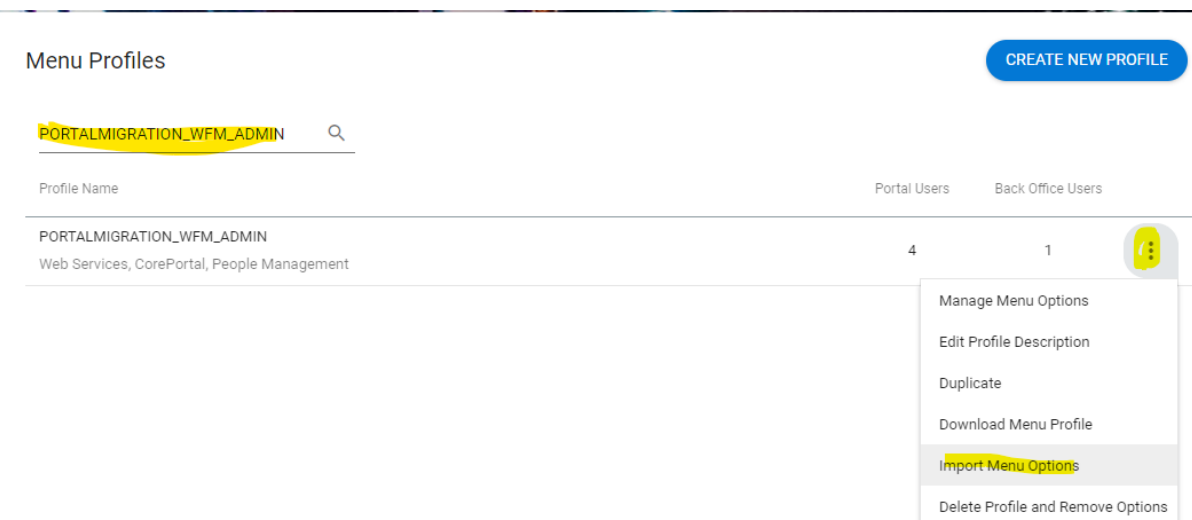

Note: The Import/Merge Menu Profile feature is available from Feature Pack 15. Feature Pack 15 is available on UAT from 04 October 2021 and will be available on Production from 25 October 2021.

Follow the steps below to create your manager menu profile using the import/merge menu:

1. Create a manager menu profile to merge other profiles with
 - a. On Security > Menu Profiles, click Create New Profile.

- b. Enter a code and a description for the manager menu profile and click create.
2. Search for the Menu Profile you have just created and under the more options button against the profile, select Import Menu Options.

3. Select the "From Existing Menu Profile" option and click ok.

4. In the “From Profile” field, select the first menu profile from the list of features above that you want to merge with your manager profile (i.e. WFM_EMP_CALENDAR_MGR or WFM_PERSON_MAINTENANCE_MGR, etc), and click ok
5. The selected menu profile has now been merged with the manager menu profile that you created.
6. Repeat steps 2-4 to add merge additional features to your manager profile.
7. See table in the next [section](#) for menu options to enable other features
 - a. To enable these options against your manager profile, select Manage Menu Option from the more options button
 - b. Search for each option you wish to switch on and enable to active toggle

1395003	Q	All		
Menu Option		Menu ID	System	Active

Refining your WFM Manager Menu Profile

Within some screens there may be options that you want to disable for users, as the standard menu profiles will grant access to all options within a feature. Please refer to the table below on where to find the menu options to enable/disable options within a feature.

Functionality/Feature	Documentation
WFM Person Maintenance	To enable/disable the various options within the WFM Person Maintenance screen for managers refer to Section 27.2 of WFM v28: Person Maintenance Configuration Guide
Team Scheduler	The below menu options are required to give access to the screen: • Manager Toolbox - Team Scheduler (1395003) • Widget - Time - My Work Week (1146765)
Team Scheduler > Timesheet Input	The below menu options are required to give access to the screen: • CorePortal - Timesheet Input V2 (770124388) • Timesheets > Get team (086a32a86a4abab1fd24181d1be2751b)
Team Scheduler > Person Absence	The below menu option is required to give access to the screen: • Core Portal - Manager Person Absence Screen (202690346)
Team Scheduler > Roster Change	The below menu option is required to give access to the screen:

	Manager Toolbox - Roster Change Window (2058762)
Time Exceptions	The below menu options are required to give access to the screen: - CorePortal - Time Exceptions screen Access (39101260) - Get geofencing exception (4828754e937db0980a05ae10595fd)
Team Balances	The below menu option is required to give access to the screen: CorePortal – Manager View Team Balance (225500)
Notification Centre > My Approvals	The below menu options are required to give access to the screen for leave request approvals: - CorePortal - Notification Actions Tab (123001645) - Widget - Time - My Balances (1568669) - Coreportal - Calendar - Time (1047084) - Manager Toolbox - My Team Calendar - Time (1716254)
Sign Off Hours	This screen will be automatically enabled for managers where the Approve/Sign Off screen is enabled against a menu profile. To enable/disable the Sign Off Hours screen refer to Section 3 of the WFM V28: Sign Off Hours User Guide. This screen replaces the existing Portal Approve/Sign Off Hours screen which can be switched off by disabling this menu option: Manager Toolbox Profile -Approve/Sign Off Hours (23660)
Roster Screens	Roster screens are enabled on the manager's Workforce Management dashboard by default. These menu options need to be enabled against the manager menu profile to ensure that manager's do not have access to these screens. These screens are <u>only applicable to customers using roster</u>: - Hide Dashboard (839524738) - Hide Details (816202689) - Hide Autoroster (980551134) - Hide Uncovered Shifts (794274347)

	• Hide Roster Rules (461200529) • Hide Rule Tolerances (929478179) • Hide Daily Staffing (403698057) • Hide Statistics (1066065168) • Hide Top Down Analysis (236545462) • Hide Qualifications (870111480) • Hide Team Area Configuration (857670430) • Hide Validation (671597111) • Hide Base Requirements (778834009) • Hide Staff Requirements (17668188) • Hide Roster Interface (648290428) • Hide Generate Demand (741116565)
--	---

Assigning the Manager Menu Profile to Users

To access the Workforce Management Dashboard, users will need to be assigned the manager menu profile that you have created. Details on how to add this menu profile to a user's profile are outlined below:

1. Navigate to the *Security Dashboard* via the Quick Jump
2. Select the *User Management* Tab
3. Search for the user in the *System Users* widget

System Users

CREATE NEW USER

Search users

Q

All Active Portal Accounts

User	Employee	Status	Menu Groups	Menu Options
JB 000003	Joe Bloggs 000003	Logged Out	13	5516
JR 000004	John Ryan 000004	Logged Out	7	1249
AS 000005	Ann Simpson 000005	Yet To Log In	7	1792
	Tom Jones			

1 - 10 of 2237

9. Select *Manage Account* from the three dots () next to the user's profile
10. Select the *Menu Security* Tab
11. Search for the manager profile that you have created
12. Enable the toggle opposite the profile

13. The user's access has now been updated

9.2.2. Configure Access Type for Managers

Access to employees on the Workforce Management Dashboard is determined by Organisational Role access for the Team Scheduler, Team Balances, Sign Off Hours screens, and the Notification Centre Approvals area.

The WFM Person Maintenance, Employee Calendar, and Time Exceptions screens can either be set by Organisational Role or Team Area access if required:

1. Organisational Role – this is the default setting and will be the manager access type on all manager screens on Portal if your organisation does not use Roster.
2. Team Area Access – this should only be considered **if Roster is utilised** by your organisation. Access to employees on the WFM manager dashboard is determined by the team areas that the manager has been granted access to. This applies to Person Maintenance, Employee Calendar, and Time Exceptions. Team Scheduler, Team Balances, Sign Off Hours screens, and the Notification Centre Approvals area are still determined by Organisational Role.

Note: For a back-office manager using CoreTime to now see the same employees in Portal WFM, you must first review the Manager Security Type. On the WFM Manager dashboard on Portal, access is defined by Organisational Role access. This differs to how access is currently setup for managers in the back office which is by work group and department combination on the CoreTime System Users screen. This work group and department access is no longer available on Portal for manager access.

Action: Please review the implications of changing from work group and department access to organisational role access in [Section 9.2.3](#) below.

If your organisation uses Roster for **all staff** and you want to change the access type on your environment from Organisational Role to Team Area access for the WFM Person Maintenance and Employee Calendar screens, this can be completed on WFM Admin Dashboard > WFM Configuration > General Settings, and updating the Manager Security Type parameter.

General Settings

WFM Admin Dashboard > General Settings

Site Parameters

Transfer Future Leave ☒

Admin Security Type
System User Access

Manager Security Type
Org Role Access

If your organisation uses Roster for **all staff** and you want to change the access type on your environment from Organisational Role to Team Area access for the Time Exceptions screen, this can be completed on WFM Admin Dashboard > WFM Configuration > Time Exception Settings. On the Time Exceptions Settings screen, go to Settings > General Settings and disable the Org Role Access (On)/Transaction Access (Off) parameter.

Time Exceptions Settings

WFM Admin Dashboard > Time Exceptions Settings

The table below highlights the access types available in the different areas of the Workforce Management Dashboard for managers:

Screen	Access
Team Scheduler	Org Role
Team Balances	Org Role
Sign Off Hours	Org Role
Time Exceptions	Org Role or Team Area
WFM Person Maintenance	Org Role or Team Area
Employee Calendar	Org Role or Team Area
Leave Request Approvals (Notification Centre)	Org Role

9.2.3. Map from Work Group and Department Access to Organisational Role Access

The organisational role that will define manager access on Portal is the work group. A manager will be assigned access to one or more work groups, which will give them access to view employees in those work groups on the Workforce Management Dashboard.

This is different to how back office access is controlled. In the back office, **work group and department combination** define access to employees. As the method of granting manager access to employees has changed between back office and Portal, please review this section carefully. Work group and department combination may or may not map directly to work group access:

1. The work group department combination **will not** map directly to work group org role access where employees in a work group sit in different departments and those work groups and department combinations have different managers. See example 1 below.
2. The work group department combination **will** map directly to work group org role access where employees in a work group sit in different departments and these work group and department combinations **always** have the same manager. See example 2 below.
3. The work group department combination **will** map directly to work group org role access where all employees in a work group sit in the same department. See example 3 below.

Note:

Where work group and department combination does not map directly to work group access 1) new work groups need to be created, and 2) employees need to be assigned to the new work groups.

Example 1 – employees in the same work group but different departments and different managers

Employee	Work Group	Department	Manager
Linda	WG01	01	Bob
John	WG01	02	Aileen
Sarah	WG02	05	Bob
David	WG03	07	Bob

For back office, Bob and Aileen would have needed the below access:

Manager	Work Group	Department
Bob	WG01	01
Bob	WG02	05
Bob	WG03	07
Aileen	WG01	02

To ensure that Bob and Aileen will have access to the same employees on Portal, they will require the below access:

Manager	Work Group
---------	------------

Bob	WG01
Bob	WG02
Bob	WG03
Aileen	WG0102

Work group WG0102 is a new work group that is required to be set up to ensure employees in work group WG01 and department 02 are split out from employees in work group WG01 and department 01 on Portal. This will ensure that Bob and Aileen have access to the same group of employees on Portal.

Example 2 – employees in the same work group and different departments but same manager

Employee	Work Group	Department	Manager
Linda	WG01	01	Bob
John	WG01	02	Bob
Sarah	WG02	05	Bob
David	WG03	07	Bob

For back office, Bob would have needed the below access:

Manager	Work Group	Department
Bob	WG01	01
Bob	WG01	02
Bob	WG02	05
Bob	WG03	07

On Portal, Bob will need:

Manager	Work Group
Bob	WG01
Bob	WG02
Bob	WG03

As there is no overlap between manager access to work groups and department combination, no new work groups need to be created.

Example 3 – employees in the same work group and same department

Employee	Work Group	Department	Manager
Linda	WG01	01	Bob
John	WG01	01	Bob
Sarah	WG02	05	Bob
David	WG03	07	Aileen

For back office, Bob and Aileen would have needed the below access:

Manager	Work Group	Department
Bob	WG01	01
Bob	WG02	05
Aileen	WG03	07

On Portal, Bob and Aileen will need:

Manager	Work Group
Bob	WG01
Bob	WG02
Aileen	WG03

As employees in a work group sit in the same department, no new work groups are required.

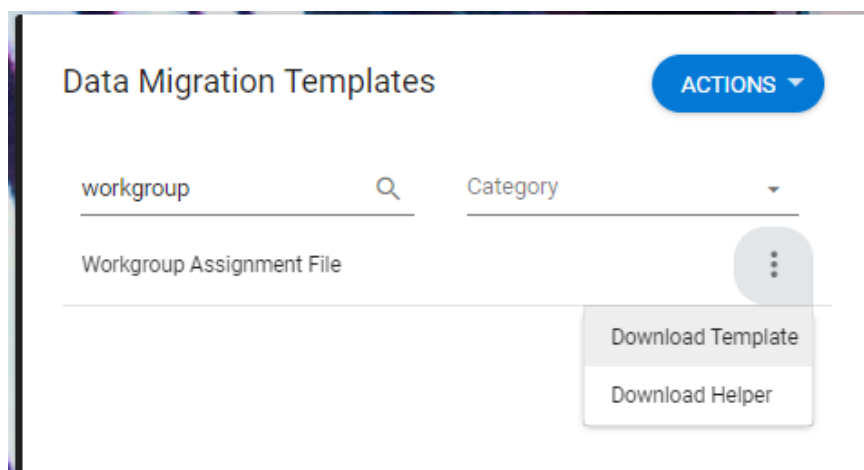

Where work group and department access do not map directly to work group access, then 1) new work groups will need to be created to split employees into different work groups; and 2) employees will need to be assigned to the new work groups. Please see below on these two steps.

Creating New Work Groups

Please refer to section 2.3.2 of the **WFM v28: Workgroups User Guide** on how to setup new work groups.

Assigning Employees to New Work Groups

The Data Migration tool can be used to assign employees to new work groups where required with the *Work Group Assignment File*. You can download the template for this file and the helper document on completing the file from the Data Migration Templates widget. Please refer to the **Data Migration: User Guide** for further information on using the tool.

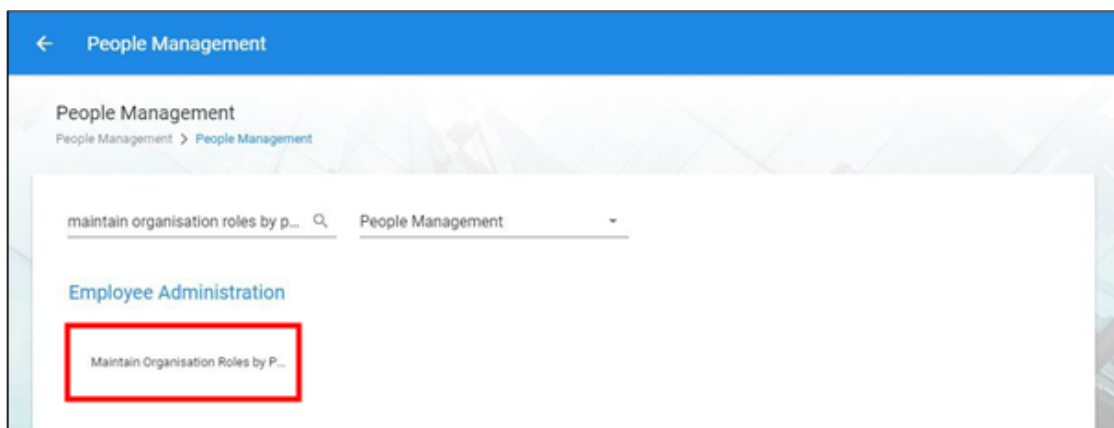

If you do not have the Data Migration tool configured, please refer to **Data Migration: Configuring the Data Migration Tool**.

9.2.4. Assigning Managers Access to Employees

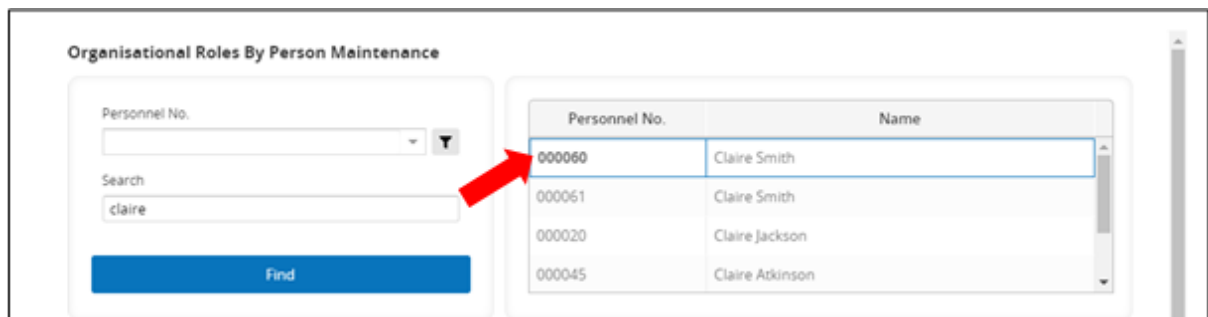

Organisational Role

To assign an org role to an employee via the Maintain Org Roles by Person screen:

1. Quick jump to the Data Centre widget on the People Management dashboard
2. Click Open for People Management
3. Search for Maintain Organisation Roles by Person and click on the corresponding option under Employee Administration

4. Use the search option at the top of the screen to do a keyword search on employee name: Enter the employee name and click Find
5. The active employees matching the search criteria entered display on the Personnel No list at the left of the screen

6. Click on the employee that the Org Roles should be assigned to
7. In the Personnel No field either:
 - a. enter the employee's personnel number, if known OR
 - b. select the employee from the drop-down list
8. Any org roles already assigned to the selected employee will be listed in the centre of the screen

Organisational Roles By Person Maintenance

Personnel No.

 Search

Personnel No.	Name
000108	Paul Keane
000017	Paul Martin

Structure

Role	Org Group	Date From	Date To	Org Group Item Code	Org Group Item Description
Head Of Department	Department	12-Dec-2017		HR5	Hr Admin
Level 2 Approver	Department	21-Mar-2016		HR2	Compensation & Benefits
Level 2 Approver	Department	21-Mar-2016		HR3	Training
Level 2 Approver	Department	21-Mar-2016		HR4	Payroll
Level 2 Approver	Department	21-Mar-2016		HR1	Payroll

9. To assign an org role to the selected employee:

- Select the required Org Structure from the Structure drop down list. This will be defaulted if there is only 1 structure set up on CoreHR
- Click the Add button to create a new row
- Select the org role from the Role drop down list
- Select the Org Group that the role will be defined against
 - E.g. Department for the Head of Department; Pay Group for Payroll Salary Approver; Work Group for Reports to Manager etc
- Enter a Date From
 - This is the date the employee will be recognised on CoreHR as having that role
- Enter a Date To
 - This is optional
 - Identifies the date that the employee ceased in that role
- Select the Org Group Item
 - This list is directly related to the 'Org Group' already selected e.g. a list of work groups If the 'Org Group' is set to "Work Group".
 - Directly input the reference data code for the group item if known OR select from the drop-down list
 - Click the Save button to save the new record.

The employee is now identified as having the Org Role for the selected element of the organisation.

Team Area Access

1. In CoreTime back office, open the System Users screen (CoreTime > System Params > System Users) and enter/select the user's personnel number from the Username field
2. Select Team Area Access from the Select Detail section
3. Enter/select the team area codes that the user should have access to
 - a. If a parent team area is selected, a user will have access to all team areas under the parent team in the roster hierarchy

The screenshot shows the 'System Users' interface. Under 'System Users', the 'Access Type' is 'Manager Self Service', 'Username' is '8866', 'Company' is '1', 'Person' is '8866', and 'Name' is 'Johnny McGee'. The 'Select Detail' dropdown is set to 'Team Area Access'. Below this, the 'Team Area Access' section displays a table with two columns: 'Team Area' and 'Name'. The table contains one entry: 'R8' in the 'Team Area' column and 'Region 8' in the 'Name' column. There are buttons for 'Copy Team Area Acc...' and 'Generate Sub Teams'.

4. Save

9.2.5. Configuration required to enable MSS

Global Params

This step is mandatory where managers are moving to portal.

Screen Path: CoreTime Back Office > System Params > Ref D-J > Global Params – CoreTime MSS

1. Enable **Core MSS Site** and **Organisational Role**
2. Save

The screenshot shows the 'Global Parameters' interface. Under 'CoreTime MSS', 'Core MSS Site' is checked, and 'Manager Toolbox Authorise' is set to 'Approve and Sign-Off'. Under 'Employee Access Based on', 'Organisational Role' is selected.

Manager Organisation Role

This step is mandatory where managers are moving to portal.

Screen Path: Portal > People Management > Data Centre > Reference Data > Organisational Role Types

1. Click **Add**

2. In the new row enter MGRESS as the **Role Type**, Reports To Manager as the **Description**, and enable both the **Active** and **ESS Approver** indicators

Maintain Organisational Role Types

Role Type	Description	Salary Approval Process	Approval Group	Approval Sequen...	Active	ESS Approv...	Questionn... Access	Delegate	Manager Rollup
MGRESS	Reports To Manager	☐			☒	☒	None	☐	☐

Leave Requests – Enabling Workflow Processes

This step is required where leave requests will be used on MSS – i.e. employees will submit certain types of leave, such as annual leave, which will be routed to their manager for approval.

Screen Path: CoreTime Back Office > System Params > Ref A-C > Control Params

1. Enter/select your CoreTime company(s) in the **Company** field
2. Go to Advanced Options
3. Enter a new row by clicking the Green Plus symbol
4. Paste this text into the row – “LEAVE REQUEST PROCESSES”
5. Tick the **Enabled** indicator against the row

The screenshot shows the 'Control Parameters' window. In the 'Parameters' section, the 'Company' field is set to '1' and the 'Current Period' is '202134'. The 'Advanced Options' section is expanded, showing a list of options. The 'LEAVE REQUEST PROCESSES' option is highlighted, and its 'Enabled' checkbox is checked.

6. Save

Leave Requests – Process Codes

This step is required where leave requests will be used on MSS – i.e. employees will submit certain types of leave, such as annual leave, which will be routed to their manager for approval.

Raise a request with the peoplexd.movetoportal@theaccessgroup.com to create the workflow processes for leave requests (LR100 and CA001) on your environment.

Leave Requests – Pay Code Updates

This step is required where leave requests will be used on MSS – i.e. employees will submit certain types of leave, such as annual leave, which will be routed to their manager for approval.

Screen Path: CoreTime Back Office > System Params > Pay Codes

1. Enter/select a pay code that employees should be able to submit as leave requests to be approved by their managers
2. Enable **Allow Leave Request**

Pay Codes

General Details

Pay Code: 3700 ANNUAL LEAVE 3700 Colman Hours
 Abbreviation: AE Colour: 2
 Short Name: Colman Type: Segment: None

General Parameters - 1

☒ Requires Approval ☒ Absence ☒ Allow Future Absences
☐ Requires Recode ☐ Bank Holiday ☐ Allow Advance Payments
☐ Requires Reason ☐ Maternity Code ☒ Allow Leave Requests
☐ Requires Narrative ☒ Holiday ☒ Allow Absence Details
☐ Exception Code ☐ Sick ☒ Display on Co-Workers Roster

3. In General 3, enter/select LR100 in the **Leave Request Process Code** field, and enter/select CA001 in the **Leave Request Cancel Process Code** field

Pay Codes

General Details

Pay Code: 3700 ANNUAL LEAVE 3700 Colman Hours
 Abbreviation: AE Colour: 2
 Short Name: Colman Type: Segment: None

General Parameters - 3

☐ Stop Overtime Booking ☐ Stop Enhanced Payment RFA ☐ Do Not Amalgamate in Calc.
 Code Type: Reason Group: Leave Request Process Code: LR100 Leave Request - LM only
 Leave Request Cancel Process Code: CA001 Cancel Process - notify LM

4. Save
5. Repeat steps for other pay codes that employees should be able to submit as leave requests

Leave Requests – Disable Old Notifications

This step is required where leave requests will be used on MSS – i.e. employees will submit certain types of leave, such as annual leave, which will be routed to their manager for approval.

Screen Path: CoreTime Back Office > System Params > Ref A-C > CoreTime Mail Parameters

1. Select Leave Request Processed from the **E-Mail Event** list
2. Under Message Text, delete all text from the **Subject** field and from the **Body** field

3. Save
4. Select Leave Request Submitted from the **E-Mail Event** list
5. Under Message Text, delete all text from the **Subject** field and from the **Body** field
6. Save

Employee Leave Request Screen

This step is required where leave requests will be used on MSS – i.e. employees will submit certain types of leave, such as annual leave, which will be routed to their manager for approval.

Screen Path: Portal > Security > Menu Profiles

To update the employee leave request screen for MSS approvals, the following menu options should be enabled against the **employee** menu profile:

Option Name	System	ID
CORE WEB ESS MENU - LEAVE REQUEST HIDE APP PERSON	CoreHR Web ESS	1256188
CORE WEB ESS MENU - LEAVE REQUEST PART DAY LEAVE	CoreHR Web ESS	824960

Create MSS Balance Groups

This step is required where managers will have visibility of balances assigned to employees.

Screen Path: CoreTime Back Office > System Params > Ref D-J > Global Params – CoreTime MSS Balances

1. Enter a **Balance Group** code and **Label** for each type of balance.
2. Up to 5 Balance Groups can be created. In the **Display Order** field, number these 1 to 5.

Balance Group	Label	Display Order	Non Balance
AL	Annual Leave	1	☐
PL	Parental Leave	2	☐
			☐
			☐
			☐
			☐
			☐

3. Save

Assign MSS Balance Groups

This step is required where managers should have visibility of balance assigned to employees.

Screen Path: CoreTime Back Office > System Params > Balances > Parameters

1. Enter/select a balance code
2. Go to MSS Parameters
3. In the **Balance Group** field, enter/select the balance group code that the balance should be grouped under. Multiple balances can be grouped against a balance group.

Balance Selection

Code: 7000AL Name: Annual Leave 7000

Note: The balance code you enter will determine the display order of balances. The balance that you wish to be displayed first should be given the lowest value, e.g. if you wish Holidays to be first, assign a code such as 'A', '1', or 'A1' to the holiday balance.

- Transfers
- Linked Balances
- Days Of The Week
- Compare Balances
- Carried Forward Rules
- Override In Period Limits
- MSS Parameters**

MSS Parameters

Balance Group: AL Name: Annual Leave

4. Save
5. Repeat for each balance

Manager Timesheet Template Setup

This step is required where managers are required to view and maintain timesheets and clockings for employees.

Screen Path: Portal > Administrator Dashboard > Timesheet Config widget

1. Click **Create New Template**
2. On the 1 – Details screen
 - a. Select Manager in the **Choose Template Type field**
 - b. In the **Template Title** field enter Manager Template

- c. In the **Template Description** field enter Default Manager Template
- d. Select today's date in the **Effective From** field

The screenshot shows the 'Create Timesheet Template' form. The sidebar on the left has five steps: 1. Details (highlighted), 2. Timesheet Settings, 3. Clock Settings, 4. Column Selection, and 5. eTimesheet Actions. The main form area contains the following fields:

- Choose Template Type***: A dropdown menu with 'Manager' selected.
- Template Title***: A text field with 'Manager Template' entered.
- Template Description***: A text field with 'Default Manager Template' entered.
- Effective From***: A date field with '08-Mar-2021' entered.
- Deactivate On**: A date field with a calendar icon.

At the bottom right, there is a blue 'NEXT' button. The footer of the form area says 'access PeopleX.D'.

3. Click **Next** to go to 2 – Timesheet Settings
 - a. In the General Configuration section, enable the **Display Locked Indicator** field
 - b. In the Grid Legend section, select a colour to highlight **Requires Approval, Requires Reason Code, Rejected, Narrative Attached, and Recode**.
4. Click **Next** to go to 3 – Clock Settings
 - a. Enable the **View Clock Times** indicator if managers can view clock times
 - b. Enable the **View Calculate Attendance** indicator if managers can calculate employee hours
5. Click **Next** to go to 4 – Column Selection
 - a. Click to **Add** button to add any required columns to display to managers in addition to paycode – i.e. external rate of pay, cost centre, etc.
6. Click **Next** to go to 5 – eTimesheet Actions
 - a. Enable the **Manager Absence Entry** indicator
7. Click **Next** to go to 6 – eTimesheet Grouping
 - a. Click Save

Default Manager Timesheet Template

This step is required where managers are required to view and maintain timesheets and clockings for employees

Screen Path: CoreTime Back Office > System Params > Ref A-C > Control Params

1. Enter/select your CoreTime company(s) in the **Company** field
2. Go to General Parameters – 3
3. In the **Team Sched. Timesheet Template** field select the Manager Timesheet Template
4. Save

Time Exceptions Setup

This step is required where managers are required to approve hours before employee timesheets can be transferred to payroll.

Screen Path: Portal > WFM Admin Dashboard > WFM Configuration > Configuration Settings > Time Exceptions Settings > 2 – Settings

1. In the **Org Role** field select Reports to Manager

2. Save

Sign Off Summary Display

This step is required where managers are required to approve and/or sign off hours before employee timesheets can be transferred to payroll.

Screen Path: CoreTime Back Office > System Params > Reference K-P > MSS Summary Sign Off Display

1. For Column One enter a **Heading** to describe the type of pay codes that will be summarised in that column
2. In the lower part of the screen under **Pay Code** enter the pay codes that come under the heading entered in step 1
3. Save

4. Repeat for Columns Two to Five.

The screenshot shows the 'MSS Sign Off Summary Display' window. It contains five columns, each with a heading, base hours on, pay code listing, display difference checkbox, total column versus dropdown, and a list of pay codes.

Column One	Column Two	Column Three	Column Four	Column Five
Heading: Basic	Heading: Overtime	Heading: Late/Missed CI	Heading: Annual Leave s	Heading: Others
Base Hours On: Pay Code Listing	Base Hours On: Pay Code Listing	Base Hours On: Pay Code Listing	Base Hours On: Pay Code Listing	Base Hours On: Pay Code Listing
Display Difference: ☒	Display Difference: ☐	Display Difference: ☐	Display Difference: ☐	Display Difference: ☐
Total Column Versus: Contract	Total Column Versus: Contract	Total Column Versus: Contract	Total Column Versus: Contract	Total Column Versus: Contract
Pay Code: 1005 BASIC HOURS	Pay Code: 2001 OVERTIME @ 1.00 CI	Pay Code: 3602 Unexplained Absen	Pay Code: 3700 ANNUAL LEAVE 370	Pay Code: 625 SUNDRY PAYMENT

Configure Portal Admin Settings

This step is mandatory where managers are moving to portal.

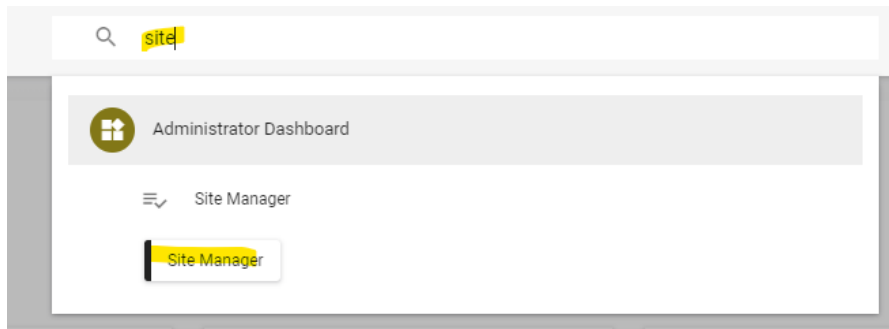

Screen Path: Portal > Administrator Dashboard > Site Manager > Admin Settings

You will need to configure each Portal parameter to the corresponding value from the table below:

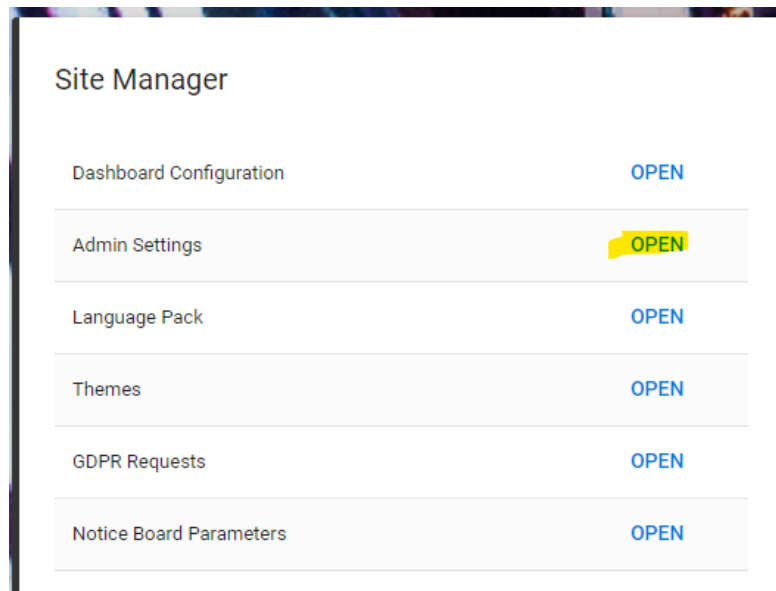

Portal Parameter	Value
cp_team_org_role	MGRESS
cp_team_org_group	WRKGRP
cp_shift_sch_org_role	MGRESS
cp_shift_sch_org_group	WRKGRP
cp_app_signoff_org_role	MGRESS
cp_app_signoff_org_group	WRKGRP
cp_sch_balance_org_role	MGRESS
cp_sch_balance_org_group	WRKGRP
ctabsr_org_role	MGRESS
ctabsr_org_group	WRKGRP
cp_time_app_l_role_name	MGRESS
cp_time_app_l_role_type	WRKGRP
cp_leave_org_role	MGRESS
cp_leave_org_group	WRKGRP
cp_roster_access_role	MGRESS
cp_sch_who_filter_option	WRKGRP
cp_lv_req_process_role	Y
cp_sch_att_scrn	Y
att_input_new	N
att_input_use_timesheet	Y
ct_lr_personlised_codes	Y

To do this:

7. Navigate to the Site Manager widget by searching in the Quick Jump

8. Select **Admin Settings** from the widget

9. Search for the first parameter from the portal parameter table above

Admin Settings

Administrator Dashboard > Admin Settings

Coreportal Parameters

cp_team_org_role

Search Whole Phrase

Parameter Description	Parameter Code
Org Role used for selecting My Team in manager toolbox, setting this overwrites CorePersonnel report to structure. Therefore leave blank if you wish to use CorePersonnel Reports to structure.	cp_team_org_role

10. If the **Current Value** is different to the value for that parameter from the portal parameter table, then update this value

Parameter Code	Product Name	Current Value
cp_team_org_role	CorePortal	MGRESS

11. To do this click the **Edit** button opposite the parameter, update the value in the popup screen and click OK

Current Value
MGRESS 

12. Repeat steps 3-5 for the other parameters from the table above

9.2.6. Configure the Employee Calendar Screen for Managers

The employee calendar screen needs to be configured before it can be used by managers. The configuration items available mean that you can set colours to highlight work days, each type of absence, and where an action is required in the case of a leave request. You can also set the abbreviation to display to managers for each absence.

This is completed on WFM Admin Dash > WFM Configuration > Calendar Configuration. Please refer to section 2 of the **WFM v28: Employee Calendars User Guide** for more information, and on how to configure the screen for managers.

9.2.7. Configure the Person Maintenance and Workforce Management Dashboard Order

The ordering of tabs on the Workforce Management Dashboard and within the WFM Person Maintenance screen for managers can be changed at a site level:

1. This is completed on WFM Admin Dashboard > WFM Configuration > Configuration Settings > Dashboard Configuration
2. Select WFM Manager Dashboard in the Dashboard field
3. Reorder the position of screens as required (any screens listed on the Dashboard Configuration screen that users do not have menu profile access for will not be visible to users)

Dashboard Configuration
WFM Admin Dashboard > Dashboard Configuration

Dashboard
Person Maintenance Manager

Position	Title
1	Key Information
2	Work Schedule
3	Absences
4	Balances
6	Person Settings
7	Work Group Override
8	Personal Groups
9	Leave Request History
10	Badge Details
11	Contact Information
12	Next Of Kin

13. Select Person Maintenance Manager in the Dashboard field and repeat steps 2-3

10. CoreInsight Reports

10.1. WFM Admin Access for Insight

The menu options in the table below can be enabled against your WFM Admin menu profile. These will grant users access to the Insight Dashboard including the Core Time Business Area and Core Data Validation Area which allows them to view and create reports in the WFM area. The profile also gives access to the admin area of Insight where a user can edit, clone, and delete reports on XD.

Option Name	System	ID

 **Note:** For more information on how to use Insight please refer to **Reporting v28: CoreInsight Fundamentals - User Guide** and to **XD Reporting: Insight Admin Area**

10.2. Manager Access for Insight

The menu options in the table below can be enabled against your manager menu profile. These will grant users access to the Insight Dashboard including the Core Time Business Area which allows them to view WFM reports shared with them.

Option Name	System	ID
CorePortal - Insight	CorePortal - Insight	282998129
CorePortal - Insight Area Core Time	CorePortal - Insight Area Core Time	20809
CorePortal - Insight View Reports	CorePortal - Insight View Reports	20775

10.3. CoreTime Insight Reporting Views

The main reporting views in the CoreTime business area are listed below.

Business Area	View	Description
CoreTime Business Area	Calc Hours Header (Time)	This is a transactional view that provides details on timesheet claims submitted from the Timesheet Summary widget.
CoreTime Business Area	Ct Shift Pattern (Data Validation)	This is a reference view that provides the work patterns against a shift type.
CoreTime Business Area	Person Absence Detail (Time)	This is a transactional view that provides details on absences recorded on XD.
CoreTime Business Area	Person Auxiliary Pattern (Time)	This is a transactional view that provides details on ad-hoc overrides/updates made to an employee's shift.
CoreTime Business Area	Person Balance Adjust (Time)	This is a transactional view that provides details on manual and automatic adjustments made against an employee's balance.
CoreTime Business Area	Person Balance History (Time)	This is a transactional view that provides details of balances assigned to employees for each period that the balance has been active.

CoreTime Business Area	Person Balances (Time)	This is a transactional view that provides details of balances assigned to employees for the current period only.
CoreTime Business Area	Person Calculated Hours (Time)	This is a transactional view that provides details of records that have generated on an employee's timesheet.
CoreTime Business Area	Person Clockings (Time)	This is a transactional view that provides details of clocking records against employees.
CoreTime Business Area	Person Leave Requests (Time)	This is a transactional view that provides details of leave requests submitted by employees.
CoreTime Business Area	Person Master (Time)	This view provides details held against an employee's record from HR and WFM.
CoreTime Business Area	Person Shift (Time)	This is a transactional view that provides the shift types assigned to employees.
CoreTime Business Area	Person Timesheets (Time)	This is a transactional view that provides details of timesheet records that have been transferred to Payroll from WFM.
CoreTime Business Area	Shift Types (Time)	This is a reference view that provides details held against shift types.
CoreTime Business Area	User Type (Time)	This view provides details on the CoreTime System User records setup on WFM.
CoreTime Business Area	Work Groups (Time)	This is a reference view that provides details held against work groups.
CoreTime Business Area	Work Patterns (Time)	This is a reference view that provides details held against work patterns.
Data Validation Business Area	CT Shift Pattern (Data Validation)	This is a reference view that provides the work patterns per day of the week configured against shift types.

10.4. Standard CoreTime Insight Reports Available

These standard reports can be copied, modified, and extended to suit your reporting requirements by a user with admin Insight access.

Report Name	Report Description
Time - Balance History	This report shows the details against balances assigned to an employee for each historic and current periods.
Time - Absence Analysis Per Day of Week	This report provides a breakdown of hours per day of the week and pay code

Time - Reasons For Absence	This report provides the reasons entered against absences recorded for employees.
Time - Absence Details Report	This report lists absence occurrences per person, with start and end dates and the count of days per absence.
Time - Hours Analysis	This report provides a breakdown of hours per date, department and pay code
Time - Clocking History	This report provides details of the clock records captured against employees.

10.5. Back Office Reports

Listed below are heavily used CoreTime reports and enquiries that are still available to run in the Back Office. Plans are currently underway to have all heavily used reports available within Portal.

Screen	Name	Menu Path
TAF026	Attendance	CoreTime: Enquiries > Attendance
TAF037	Current Balance Enquiry	CoreTime: Enquiries > Current Balance Enquiry
TAF257	Roster Enquiry	CoreTime: Enquiries > Roster Enquiry
TAF559	Unconfirmed Hours Enquiry	CoreTime: Enquiries > Unconfirmed Hours Enquiry
TAF227	Balance Detail	CoreTime: Reports > Balances > Balance Detail
TAF274	Balance Summary	CoreTime: Reports > Balances > Balance Summary
TAF279	Daily Clockings / Hours	CoreTime: Reports > Daily Clockings / Hours
TAF092	Pay Code Hours	CoreTime: Reports > Pay Code Hours
TAF345	Pay Code Instance	CoreTime: Reports > Pay Code Instance
TAF260	Pay Code Occurrence	CoreTime: Reports > Pay Code Occurrence

11. Training

Additional training guides (as referenced throughout this document) on Portal Workforce Management are available on the Customer Success Portal (Select PeopleXD – Workforce Management > Knowledge Base > Move to Portal: Workforce Management).

When reviewing these guides, we recommend doing this while navigating through the application in tandem.

11.1. User, Configuration and Process Guide Documentation v27+

User/Process guide documentation is readily available to all customers on the Customer Success Portal. Here is a listing of those guides and summary of content.

Document	Summary
WFM (Time & Attendance) v28 - Advance Period Configuration Guide	The purpose of this guide is to demonstrate advancing T&A company calendars and user defined calendars on Portal. This guide will outline how to: • Advance the Time and Attendance calendar on Portal • Grant access to company and user defined calendars
WFM (Time & Attendance) v28: Calculate Hours Configuration Guide	The purpose of this guide is to provide guidance on the Calculate Hours screen on Portal. The screen allows users to calculate both future calculations and real time calculation for selected employees. This guide will outline: • An explanation of the screen and the key fields • Types of calculations • How to configure the Calculate Hours screen
WFM (Time & Attendance) v28: Generate Timesheets User Guide	The purpose of this document is to provide guidance on the generate timesheets process on Portal. There are no changes to the existing Payroll Rules and how they are configured. This guide will instruct you how to how to: • Retrieve Hours for Payroll • View Generated Payroll Hours detail • Transfer hours to Payroll
WFM V28: Generate Timesheets Parallel Run User Guide	The purpose of this guide is to help users configure the Generate Timesheets Parallel Run facility. Parallel Run allows users to report on parallel tables and to review or report where differences may have occurred in the transferring of hours for a previously completed back office Live Run. By using the Parallel Run feature, you can compare to existing Live runs completed through back office and ensure there are no errors before migrating to live running of the Portal version of Generate Timesheets.
WFM (Time & Attendance) v28: Pay Code Access Groups	The purpose of this document is to provide an overview of Pay Code Groups (aka Personalised Pay Code Groups) on Portal. This guide includes: • How to setup and maintain Pay Code Groups • Assigning Pay Code Groups to employee, managers, and admins

WFM V28 - Balances User Guide	The purpose of this guide is to provide guidance on the balance maintenance screens which have moved from Back Office to Portal. The Balance Screens in Portal removes the need for administrators to complete the daily balances tasks in the back office. These tasks are: • Balance Recalculation • Activate Balances
-------------------------------	---

WFM v28: Person Maintenance Configuration Guide	The purpose of this guide is to provide an overview of the WFM Person Maintenance screen on Portal which is available to both admins and managers. The guide also provides the menu options to enable/disable features within the WFM Person Maintenance screen
WFM v28: Workgroups User Guide	The purpose of this guide is to provide an overview of the Work Group screen which has been re-designed for Portal. The guide also provides guidance on the menu options required to enable/disable features within the Work Group screen
WFM v28: Shift Types User Guide	The purpose of this guide is to provide an overview of the shift Type screen which has been re-designed for Portal. The guide also provides guidance on enabling/disabling the screen
WFM V28 - Sign Off Hours User Guide	The purpose of this guide is to provide an overview of the Sign Off Hours screen on Portal which has replaced the Approve/Sign Off Hours screen. The screen can be used by both admins and managers. The guide covers: • How to sign off hours • Description of the tabs on the screen • Bulk sign off and Reject Hours • Configuring the screens
WFM V28: Employee Calendars User Guide	The purpose of this guide is to provide guidance on the new Employee Calendars screen which is available to admins and managers. The screen allows users to view and record absences for employees they have access to on a 12 month view. Employees also have access to the screen to view their own absences. The guide also details the different options available to configure the screen.

Reporting v28: CoreInsight Fundamentals - User Guide	This document provides guidance on how to use CoreInsight including: • How to access CoreInsight • How to view reports • How to create new reports • How to manage reports e.g. updating report settings, sharing, scheduling etc • Configuration & user access required for CoreInsight This is intended to provide general guidance on how to use CoreInsight. This does not include: • Product-specific reporting • Advanced report examples
XD Reporting: Insight Admin Area	The purpose of the guide is to provide an overview of the Admin Area of XD Insight which allows an admin user to manage Insight Reports.
Data Migration: Configuring the Data Migration Tool	This document provides guidance on how to configure the data migration tool on PeopleXD
Data Migration: User Guide	This document provides an overview on how to use the data migration tool
XD Reporting - Insight User Security	The purpose of this document is to provide guidance on managing access to the Insight Dashboard as well as access to view, edit, and create reports. The guide also covers access to business areas/views and access to employee data in different products.

12. Appendix: Back Office to Portal Mapping Table

A complete mapping of all the back office and equivalent portal screens is provided in the table below. Where there is a portal equivalent available then the back-office screen will no longer be available post the communicated retirement date.

Note: Where no mapping is available in Portal – this screen will still be available post the communicated retirement date.

12.1. Screens with a Portal Mapping available (Back Office will be Retired for These Screens)

Form/Screen Name	Mapped Widget Name/Path
TAF001-Person Maintenance	WFM Admin Dashboard > WFM Person Maintenance Workforce Management Dashboard > WFM Person Maintenance
TAF004-Work Groups	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Work Groups
TAF009-Shift Types	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Shift Types
TAF013-Calculate Hours	WFM Admin Dashboard > Calculate Hours
TAF019-Generate Timesheets	WFM Admin Dashboard > Generate Timesheets Payroll Dashboard > Generate Timesheets
TAF029-Sign Off Hours	WFM Admin Dashboard > Sign Off Hours Workforce Management Dashboard > Sign Off Hours
TAF082-Maintain Person Shift Type	WFM Admin Dashboard > WFM Person Maintenance > Work Schedule
TAF095-Advance Period	WFM Admin Dashboard > Advance Period
TAF213-Activate Balance	WFM Admin Dashboard > Balance Maintenance > View > Activate Balance
TAF214-Balance Adjustment	WFM Admin Dashboard > WFM Person Maintenance > Balances > Balance Adjustment
TAF221-Balance Recalculation	WFM Admin Dashboard > Balance Maintenance > View > Balance Recalculation
TAF336-Maintain Hours	WFM Admin Dashboard > WFM Person Maintenance > Timesheet Input Workforce Management Dashboard > WFM Person Maintenance > Timesheet Input

TAF338-Record Absence Details	WFM Admin Dashboard > Employee Calendar Workforce Management Dashboard > Employee Calendar
TAF341-Personalised Pay Code Group	WFM Admin Dashboard > WFM Configuration > Configuration Settings > Pay Code Groups
