Version	Date	Author	Details
1.0	8 th Mar 2019	Deirdre Lonergan	Security Document Created
2.0	5 th August 2020	Marie Mooney	Updated to support People Management Move to Portal
2.1	3 rd Sept 2020	Marie Mooney	Updated based on Internal Access People Review
2.2	22 nd Sept 2020	Marie Mooney	Insertion of additional mapped People Management back office screens

1. Overview

1.1. Purpose of the Guide

This document provides you with guidance on how to **move to People Management on CorePortal** (“Portal”) and **training material** on how People Management in Portal can be used to support:

- **Existing processes** previously completed in Back Office such as:
 - How to Add a New Starter
 - How to Rehire an Employee
 - How to Process an Employee as a Leaver
 - Employee Contract Appointment Management
 - Employee Salary Administration
 - How to Manage Allowances for an Employee
 - How to Manage Employee Personal Record
 - How to Record an Employee’s UK Legislative Details
 - How to Manage Employee Learning & Development Record
 - Employee Personal Records Management – User Defined Field Administration
 - How to Update Key Information on an Employee’s Record
 - How to Record an Employee’s Probation Details
 - Work Schedule Management
 - HR Balance Management
 - Cost Allocation Management
 - Post Profile Maintenance
- **New functionality** in Portal:
 - Menu Profile Matrix
 - Employee Files
 - PayScale Restriction Matrix
 - Social Security Settings
 - Tasks Lists
 - Terms and Conditions
 - Payroll Instructional Forms (v28)
 - Wage Warning Setup
 - Employee Transfers (v28)

 **Note:** The Training, Health & Safety and HESA modules are excluded from Portal Migration at this point.

1.2. Steps to Move to Portal

We want to make the move to People Management on Portal as easy as possible for you and by completing **the 4-step guide** below you will be able to seamlessly move to our Portal solution:

How to Move to People Management on Portal	Approx, Timings
Step 1 – Give yourself a quick overview on what’s in Portal People Management: 1. Review Section 2 which outlines how to access People Management on Portal and navigate through the People Management module. 2. Review Section 3 which explains where the back office screens you access are now mapped to in Portal. It also details the new widgets & functionality available through Portal People Management.	45 mins
Step 2 – Give a People Management User Access to the People Management Dashboard on Portal There have been 2 new menu profiles called PORTALMIGRATION_PEOPLEMGMT_VIEW and PORTALMIGRATION_PEOPLEMGMT_ALL (e.g. view and edit) created. These will need to be assigned to Portal Users who should now be managing People Management on Portal. These menu profiles will give a user access to the following: • All standard widgets on the People Management Dashboard on Portal. • The CorePersonnel Business Area in CoreInsight which will support a user being able to create and run People Management Reports. Steps on how to assign access to a Portal user via the Menu Profiles above is detailed here	30 seconds per user
Step 3 – Train yourself on specific functionality in Portal People Management where required 1. Firstly, review the remaining sections of this document. This will set you up with a good foundation knowledge of People Management on Portal Functionality. 2. Next, we recommend you review the following list of guides, marked as either Mandatory or Optional. We recommend doing this while navigating through the application in tandem. These documents are all available in the same area as this document on the Community Portal	Approx. 30 mins per guide.

Step 4: Review Section 8 which details which screens are retiring, and which will still be available in back office post the retirement date

This section details which screens have a portal equivalent available and will be retiring on the communicated retirement date and which will remain in back office post the retirement date.

15 mins

Note: The menu profiles **PORTALMIGRATION_PEOPLEMGT_VIEW** and **PORTALMIGRATION_PEOPLEMGT_ALL** will be available in the 27.0.14 and 28.0.16 automatic patches onwards.

2. People Management Dashboard Overview

2.1. People Management & Insight Access

The People Management dashboard is the main area that a HR administrator can manage all of their people management processes.

To access the **People Management & CoreInsight Dashboards** users will need to be either be assigned the

1. **PORTALMIGRATION_PEOPLEMGT_VIEW** Menu Profile (which provides them access to only view people management information)
- or
2. **the PORTALMIGRATION_PEOPLEMGT_ALL** Menu Profile (which provides them access to edit and view people management information).

Details on how to complete this step is outlined in Section 2.2 below.

If you need to update or change this menu profile, configuration for each individual widget can be found here – [People Management Configuration](#).

2.2. Assigning a People Management User Access to People Management on Portal

To access the *People Management & CoreInsight Dashboards* users will need to be assigned the **PORTALMIGRATION_PEOPLEMGT_VIEW** or **PORTALMIGRATION_PEOPLEMGT_ALL** Menu Profile which is available on your environment. Details on how to add this menu profile to a user's profile is outlined below:

1. Navigate to the *Security Dashboard* via the Quick Jump
2. Select the *User Management* Tab
3. Search for the user in the *System Users* widget

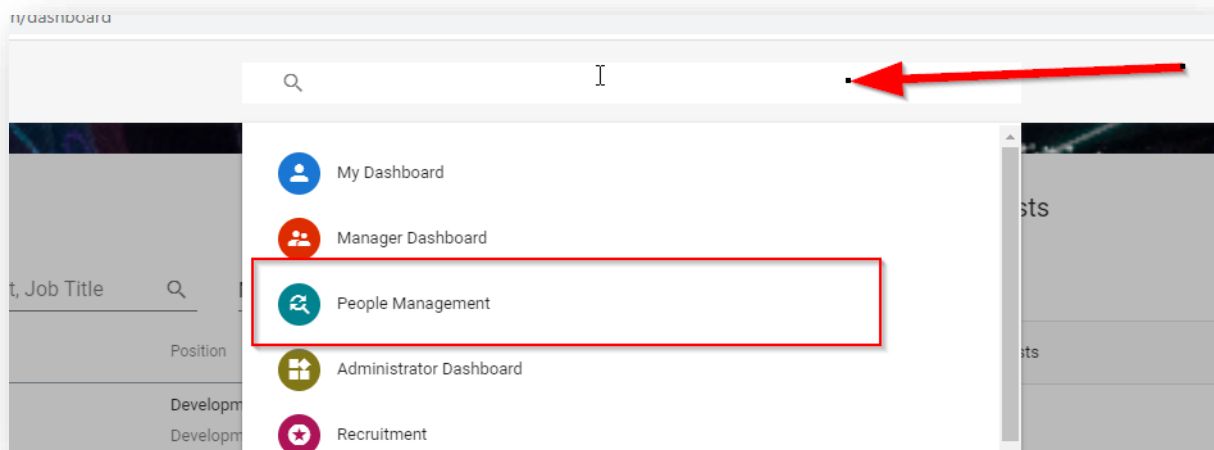

System Users					CREATE NEW USER
Search users		Q	All Active Portal Accounts		
User	Employee	Status	Menu Groups	Menu Options	
000003	Joe Bloggs 000003	Logged Out	13	5516	⋮
000004	John Ryan 000004	Logged Out	7	1249	⋮
000005	Ann Simpson 000005	Yet To Log In	7	1792	⋮
	Tom Innes				

1 - 10 of 2237 < >

1. Select *Manage Account* next  to the user's profile
2. Select the *Menu Security* Tab
3. Search for the profile **PORTALMIGRATION_PEOPLEMGT_VIEW** or **PORTALMIGRATION_PEOPLEMGT_ALL**
4. Enable the option with the toggle
5. The user's access has now been updated.

2.3. How to Access People Management & Insight

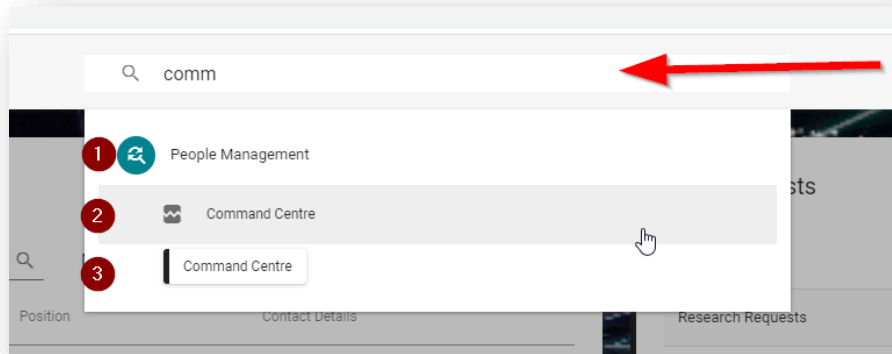

The **People Management dashboard** is accessed by selecting **People Management** from the quick jump menu.

It is possible to search for a tab or widget name in the Quick Jump menu also, to jump straight to that object.

For example, searching for the term “Command Centre” returns the following items:

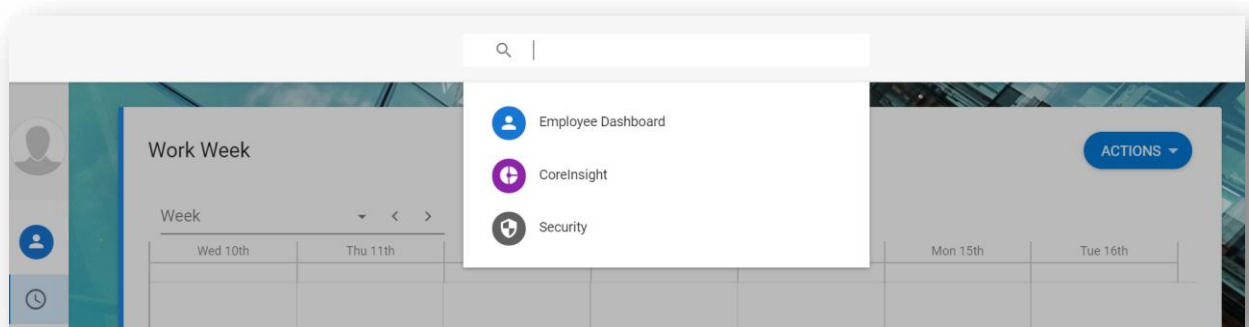

1. The dashboard that the widget is on i.e. *People Management*.
2. The tab that the widget is on i.e. *Command Centre*.
3. The widget itself i.e. *Command Centre*.

Click on any of those items, to jump straight to it i.e. jump to the main dashboard page, the tab or the actual widget.

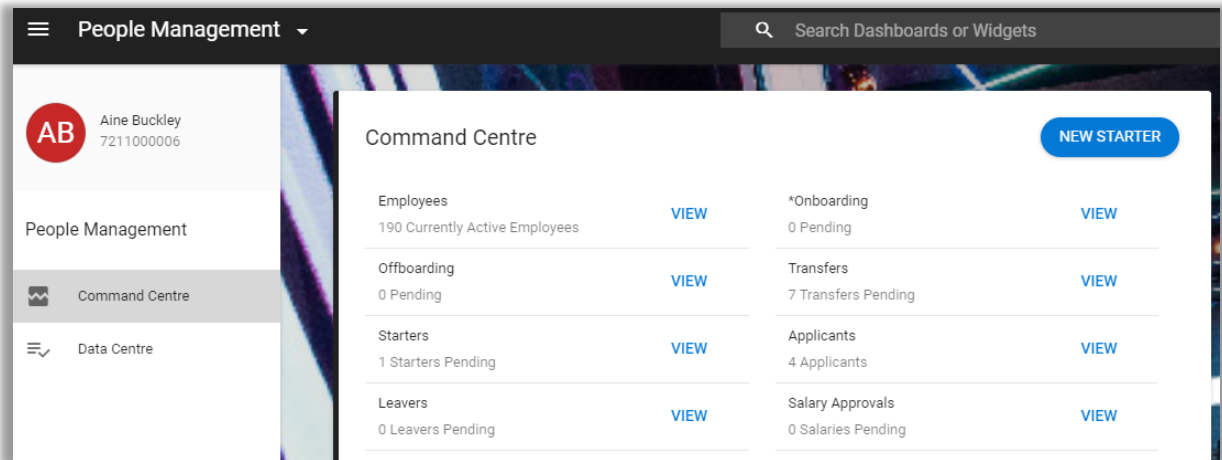

Note: For further details on the People Management Dashboard Configuration and User Guides please see related documents on the Community Portal > Documentation > Move to Portal – People Mgt > **Move to Portal - People Management Dashboard Configuration & User Guide v27+**

The **CoreInsight dashboard** is accessed by selecting **CoreInsight** from the quick jump menu. Access to this is to support running People Management reports.

2.4. People Management Dashboard Overview

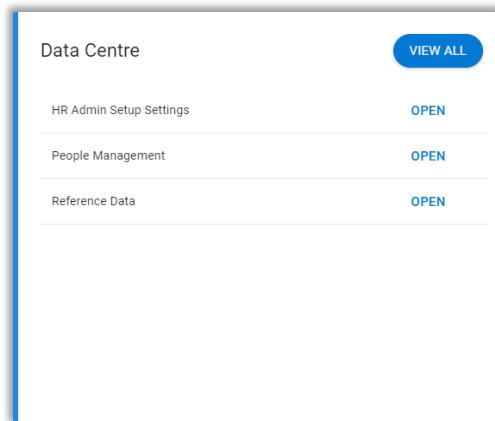

The **People Management dashboard** contains 2 tabs as standard – the Command Centre and Data Centre.

The **Command Centre** is the centre for most of the HR tasks that you will be completing in People Management. The following options are available on this widget:

- Search, View and Edit Employees and their Contract Information
- Starters, Leavers, Rehires
- Onboarding/Offboarding (v28+)
 - (Note: Consultancy Services Required if turning on this feature)
- Probation
- Transfers
- Salary Approvals
- Candidates/Applicants
- New Starter

The **Data Centre** provides a range of options that are used to support the configuration of HR Admin Setup, People Management and Reference Data.

The **CoreInsight dashboard** contains 2 tabs as standard, **Home** (Where a user can Create and run their own Reports) and **Admin Area** (Where a user can run their own reports, shared reports and standard system reports).

Note: The *CoreInsight* dashboard is not available to update in *Dashboard Configuration*.

3. Mapping from Back Office to Portal People Mgmt. and New Functionality

The following section details where the back-office screens you currently access are now mapped to in Portal. It also details the new widgets & functionality available through Portal People Management. For a simple table of the mapping of screens from back office to portal see [Mapping Section here](#)

3.1. Portal Screens Replacing Back Office Forms

3.1.1. Command Centre Widget

A number of the back office screens are now mapped to **one widget** in Portal. The key screens that are mapped to this widget are listed as follows and detailed below in the blue table:

1. Personal Profile
2. View Employee Appointments
3. Maintain Salary Approvals
4. Maintain HR Salary Amendments
5. Set Start Date
6. Dependent Details
7. Appointment History
8. Qualification Details
9. User Reference Details

Back Office Screen	Back Office Path	Portal Path
1. Personnel Profile	CorePersonnel – Maintenance	People Management Dashboard – Command Centre Tab – Command Centre – Employees – View – Actions - Personal Profile
This is where you can search for employees and view their full HR history. This is used to manage some of the employee's personal details on CoreHR, including: a. Employee Details b. Diversity c. Time Management d. Payroll Legislation Options e. Learning and Development

Note This can also be viewed from People Management Dashboard – Data Centre Tab – Data Centre – People Management

For further details on Salary Approvals please see following document on the Community Portal
Move to Portal - People Management Managing Salaries User Guide v27+

4. Maintain HR Salary Amendments

CorePersonnel -
Maintenance – Salary
Administration

People Management Dashboard –
Command Centre Tab – Command
Centre – Employees – View –
Current Salary

Salary Records are linked to an Employee's Contract. Therefore, it is possible to automatically create a salary amendment as part of a contract amendment, where that amendment should have an impact on the employee's salary e.g. a change of hours. It can also be carried out separate to a change in Contract. Salaries can be viewed again via Current Salary detail and are also available to review, with comments, on the Timeline View.

Current Salary		Allowances	Increment History
Contracts**			
*Key Information	Current Salary €50,000.00	Including Allowances €50,000.00	Next Increment Due 02-Jan-2017

*Cost Allocations			
Start Date	Rate Effective	Pay Scale / Grade	Point
02-Jan-2016	01-Sep-2017	Payscale 7211	3
Rate Type	Rate Amount	Multiplier	Actual Pay
Annual	€50,000.00	1	€50,000.00
Status	Reason		
Approved	UNITTEST		

For further details on Salary Amendments please see following document on the Community Portal ***Move to Portal - People Management Managing Salaries User Guide v27+.***

5. Set Start Date

CorePersonnel -
Maintenance

People Management Dashboard –
Command Centre Tab – Command
Centre – Employees – View -
Contracts - Amend Contract Start
Date

This feature is used to change the start date that has been set up for an employee's contract. This is applicable in the following scenarios:

1. New Hire
2. Rehire
3. Additional Contract

Summary						
Appointment ID 721106-1	Status Started	Emp Status Unit Test Employ...	Start Date 02-Jan-2016	End Date	Substantive 02-Jan-2016	Funding Expiry
Amendments						

End Contract

Amend Contract Start Date

Timeline

Note If the employee's payroll is currently in progress, it is not possible to amend that employee's contract.

For further details on Start Date Amendment please see following document on the Community Portal ***Move to Portal - People Management Contracts Key Concepts User Guide v27+***.

6. Dependent Details

CorePersonnel -
Maintenance

People Management Dashboard –
Command Centre Tab – Command
Centre – Employees – View –
Actions – Personal Profile -
Dependents

This feature provides the ability to view, update and amend the details of an employee's dependants.

EMPLOYEE DETAIL	Dependants					
Contacts						
Next Of Kin	Name	Date of Birth	Gender	Relationship	Country of Birth	Nationality
Dependants	Kate	11-Apr-2018	Female	Daughter	Ireland	Irish

Note: Birth Name field is not available in Portal.

For further details on Dependent Details please see following document on the Community Portal ***Move to Portal - People Management HR Employee Record Overview User Guide v27+***.

7. Appointment History

CorePersonnel –
Maintenance – Post
Management

People Management Dashboard -
Command Centre Tab – Command
Centre - Employees - View -
Actions - Personal Profile -
Contracts

An employee's Appointment History (Contract History) displays a timeline of the contract(s) an employee has held including their current contract. It includes details such as status, start and end dates, related hierarchy to name a few.

9. User Reference Details

CorePersonnel – Maintenance

People Management Dashboard - Command Centre Tab – Command Centre - Employees - View - User Defined Fields

User Defined Fields (UDF) are used within the CoreHR system to hold additional details for employees and can be created and maintained by the HR Administrator. These are used where the CoreHR system does not have a specific field(s) to hold certain employee information so the creation of a UDF is advised. UDFs can be person specific or associated with a contract. Examples include:

- car licence details,
- equipment numbers (laptops),
- etc.

Note: User Reference Details in back office is a view of UDFs linked to employees grouped by UDF. In the Portal mapping it is a view per employee.

The screenshot displays the employee record for Charlotte Hill (500016) in the CoreHR system. The record is categorized as 'HR Generalist' and is 'Active'. The start date is 11-Feb-2019, and the payroll status is 'Open for Process...'. The 'User Defined Data' section is highlighted in the left sidebar. The main content area shows a search bar for UDFs and a table with columns: Name, Appointment, From Date, and To Date. A single entry, 'Company Equipment', is listed. An 'ADD' button is visible in the top right corner of the UDF section.

For further details on User Defined Fields (User Reference Details) please see the following two documents on the Community Portal

1. ***Move to Portal - People Management HR Employee Record Overview User Guide v27+***
2. ***Move to Portal - People Management User Defined Data User Guide v27+***

3.1.2. Data Centre Widget

A number of the back office screens are now mapped to **one widget** in Portal. The screens that are mapped to this widget are listed as follows:

1. People Management Configuration and Maintenance

- a. Post Profile Maintenance
- b. Post Appointment Maintenance
- c. View Post Appointments
- d. Terms and Conditions Profiles
- e. Maintain Organisational Roles
- f. Maintain Organisational Roles by Person
- g. System Users
- h. Substantive Maintenance
- i. View Email Queue
- j. Employment History
- k. Medical Details
- l. Complaint Details
- m. Discipline Details

2. Reference Data Configuration and Maintenance

- a. Standard Reference Data (e.g. qualification codes, job title codes)
- b. Non-Standard Reference Data:
 - i. Cost Centres
 - ii. Other References
 - iii. Organisational Role Types
 - iv. Reason Codes
 - v. Location Codes
 - vi. Project Codes
 - vii. Leaving Reason Codes
 - viii. FTE Hours
 - ix. Event Type
 - x. Salary Types
 - xi. Title Setup

3. HR Admin Setup Settings Configuration and Maintenance

- a. User Defined Field Codes
- b. Service Rules
- c. Employer Notice Period Rules
- d. Personnel Numbering Maintenance
- e. Maintain Letter Group Types
- f. Company Settings
- g. System Parameters

h. Advanced System Parameters

This widget contains several different back office screens and we detail these further below.

Back Office Screen	Back Office Path	Portal Path
1. People Management Configuration and Maintenance		
a. Post Profile Maintenance	CorePersonnel - Maintenance – Post Management	People Management Dashboard – Data Centre Tab – Data Centre – People Management

Post Profile Maintenance allows you to create and manage the Post Profile records that will form the basis of every Post Appointment / Contract that is created for every employee on the system. The aim of this is to ensure that the hr administrator will have an up to date list of all of the posts that are currently available in the system on People Management, which may be selected when:

- **Creating a new starter.**
- **Awarding a promotion or additional contract.**
- **Rehiring an employee.**

Those contracts will be created from the Post Profile records, inheriting predefined information such as the Post Title, Department, Pay Scale etc. Posts will also be available to managers & recruitment administrators as part of the Staff Requests and Recruitment processes. These will be associated with a vacancy and ultimately be used to create the successful applicant's Post Appointment / Contract as an employee.

d. Terms and Conditions Profiles

CorePersonnel - Maintenance
– Post Management

**People Management
Dashboard – Data Centre
Tab – Data Centre – People
Management**

Terms and Conditions (T&C) Profiles are templates of contracted terms and conditions that can be associated with Posts and Contracts. Rules can be defined as to when a profile is relevant to a Post Profile e.g. based on status, location etc.

The following contract elements can be defined:

- Probation Expiry
- Employee and Employer Notice Periods
- Increment Due Date and Hold Indicator
- Allowances

- Balances

Once a T&C Profile is defined on CoreHR, it must be linked to a Post Profile. Once the template is linked to the Post, the T&Cs can be further updated to be more specific to the chosen Post.

e. Maintain Organisational Roles

CorePersonnel – Reference

**People Management
Dashboard – Data Centre
Tab – Data Centre – People
Management**

Organisational roles (org roles) are used to identify employees that have certain managerial or approval responsibilities for specific tasks in the organisation. By default, the following roles are available on CoreHR:

- HR Salary Approver (used for *Salary Approvals*)
- Payroll Salary Approver (used for *Salary Approvals*)
- Reports To (typically used for *Manager Dashboard* access)

This is a highly configurable element of the CoreHR system. An employee can have multiple org roles assigned to their employee record, to allow them to engage in a variety of tasks on CoreHR.

For further details on Organisational Roles please see following document on the Community Portal ***Move to Portal - People Management Configuring Organisational Roles User Guide v27+.***

f. Maintain Organisational Roles By Person

CorePersonnel – Reference

**People Management
Dashboard – Data Centre
Tab – Data Centre – People
Management**

This screen allows for the user to search for an employee first and then assign an org role to them for a specified element of the organisation.

2. Reference Data Configuration and Maintenance

Reference Data refers to the data that is available to select by end users of the system on the various pick lists / drop-down lists throughout the CoreHR Application. CoreHR provides a set of pre-configured Reference Data lists. These are reviewed and updated during an implementation to ensure that the data is aligned to an organisation's specific requirements, for record and reporting purposes.

Reference Data may also be updated on the system during the live running to support changing business needs e.g. add a new Job Title or Reason Code. **Standard Reference Data** refers to all reference data items that comprise of the following elements only:

- Reference Code
- Reference Description

Non-Standard Reference Data refers to all reference data items that include additional configuration options.

Objects

This functionality is managed in a similar manner to back office. User Defined Fields (UDF) are used within the CoreHR system to hold additional details for employees and can be created and maintained by the HR Administrator. These are used where the CoreHR system does not have a specific field(s) to hold certain employee information so the creation of a UDF is advised. UDFs can be person specific or associated with a contract. Examples include:

- car licence details,
- equipment numbers (laptops),
- etc.

Email Templates

Core Letters enable a user to generate documentation based on data in the CoreHR system. Documents can be produced per individual employee record or for a group of employees in bulk. Within People Management it can be used for:

- Creation of standard employee correspondence e.g.
 - Contract of Employment
 - Salary Review
- Populating standard HR forms

3.2. Back Office Forms with no Portal Mapping (Continue to Use Back Office)

Please reference the [Appendix](#) in Section 8 for a list of People Management infrequently accessed screens available through back office forms which will not be available through Portal, your access will remain via back office and this will still be available post the communicated retirement data

3.3. New Functionality available through CorePortal

The following is a list of People Management **functionality** now available to users through CorePortal which **was not available through the Back Office forms**.

Some of these features are version specific and may only be available in v28+. Where this is the case, we detail this next to each feature.

By granting a user access to the **PORTALMIGRATION_PEOPLEMGT_ALL** menu profile users will have access to this new functionality.

1. Menu Profile Matrix
2. Employee Files
3. PayScale Restriction Matrix
4. Social Security Settings
5. HR Tasks Lists
6. Terms and Conditions
7. Payroll Instructional Forms (v28+)
8. Wage Warning Setup
9. Employee Transfers (v28+)

Functionality/Feature	Portal Path
1. Menu Profile Matrix	People Management Dashboard – Data Centre Tab – Data Centre - HR Admin Setup Settings
The <i>Menu Profile Matrix</i> feature provides a way to identify groups of employees and automatically assign Menu Profiles to them. There are 2 types of assignments available: 1. Employee Organisation Role Menu Profiles are assigned to employees based on an Organisational Role that they are assigned to. A nightly process identifies any employees with an Organisational Role that is defined in the rule matrix. If the Org Role assignment is effective that day, the process will assign the menu profile. If the Org Role is no longer active, the process will unassign the role.	

2. Employee Account Provisioning

Menu Profiles are assigned to employees as part of the self-registration process. If the employee's current substantive contract meets the requirements in one of these rules, they will be awarded the corresponding menu profile.

Menu Profile Matrix

People Management > HR Admin Setup Settings > Menu Profile Matrix

The rules specified below are applied to an employee through portal account provisioning, or an employee when they are assigned a specific organisational role.

Employee Organisation Role: ▼ ADD

Organisational Role	Reference Type	Reference Attribute	Reference Type	Reference Attribute	Menu Profile	Active	
Payroll Salary Approver	Pay Group	Monthly Payroll 4			COREINSIGHT_USER	☒	DELETE
Payroll Salary Approver	Organisation	Abc Solutions			COREINSIGHT_USER	☒	DELETE
Payroll Salary Approver	Organisation	Abc Solutions			GDPR	☒	DELETE

corehr SAVE

For further details on Menu Profile Matrix please see following document on the Community Portal
New Feature - People Management Configuring Menu Profile Matrix User Guide v27+.

2. Employee Files

People Management Dashboard – Command
Centre Tab – Command Centre – Employees
– View

The *Files* feature in People Management is used to manage documentation associated with an employee's record.

Files may be linked to an employee's record in a number of ways:

- Directly uploaded by the hr administrator on **People Management > Files** screen.
- Generated by the system and automatically uploaded by the **Generate Document** feature on CoreHR.
- Uploaded by the employee via the **My Profile > Documents** screen.
- Uploaded by the manager via the **Employee Profile > Documents** screen OR as per the hr administrator (if hr tasks have been devolved to managers).

CoreHR can be configured to provide a variety of access options to the file for:

- Administrators
- Employees

- Managers

3. PayScale Restriction Matrix

People Management Dashboard – Data Centre Tab – Data Centre - HR Admin Setup Settings

It is possible to restrict the list of Pay Scales that are available to a user to select for an employee's salary, based on certain employee or contract attributes. A matrix of rules can be configured on CoreHR to identify the Pay Scales that are applicable to specific employee attributes e.g. Country, Division, Employment Status etc.

When a hr administrator is creating the salary for an employee, the system will check to see if the record meets any of the rules defined on the matrix and will only display the Pay Scales that match those rules.

For example, if the Pay Scales "Grade 1" and "Grade 2" should only apply to UK based employees, then the hr administrator will only see those Pay Scales when the employee's address is based in Country of UK.

Payscale Restrictions

For further details on PayScale Restriction please see following document on the Community Portal

Move to Portal – People Mgt:

New Feature - People Management Configuring Payscale Restriction Matrix User Guide v27+

4. Social Security Settings

People Management Dashboard – Data Centre Tab – Data Centre - HR Admin Setup Settings

CoreHR provides 2 options for validation on the social security number provided for an employee:

- *PPS Number* for Republic of Ireland
- *NI Number* for United Kingdom

For both of the above, the number entered on the system by the user will be validated to ensure that it is the in the expected syntax for PPS or NI.

The *Social Security Settings* feature provides the option to:

- Identify the default number and validation that will be used on the system.
- Identify other groups of employees that fall into other jurisdictions that are not applicable to the default setting and flag those groups as requiring either another validation routine or none at all.

The screenshot displays the 'HR Admin Setup Settings' page. The 'Social Security Settings' section is active, showing 'Global Settings' and 'Organisational Structure'.

5. HR Tasks Lists

People Management Dashboard – Data Centre Tab – Data Centre - HR Admin Setup Settings

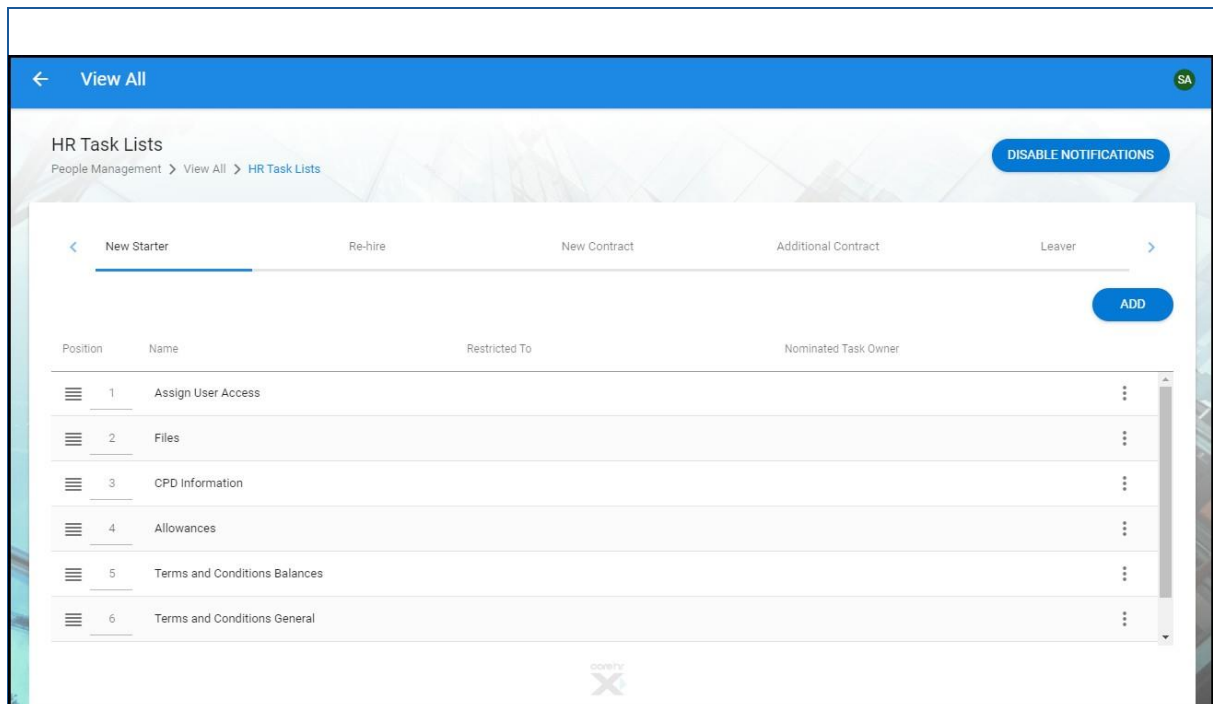

Task Lists are used to define a set of steps that must be completed as part of a New Starter, New Contract, Additional Contract, Rehire or Leaver process.

Once a new contract has been assigned to an employee as part of the new hire, rehire or new contract steps on People Management, the task list will pop up on screen. This will present the user with a list of mandatory steps to be completed. The user can then click on a step and be redirected to the screen required to input the data e.g. if the step is 'Allowances', clicking on this will open the 'Add Allowances' screen.

Different task lists can be created for each process type.

The advantage of using the task list feature includes:

- Ability to direct the user to ensure the required employee and contract details are updated.
- One central location is provided to allow the user to jump directly to the required screens to update the data.
- The task list can be closed and reopened as many times as necessary before completion.

For further details on Task Lists please see following document on the Community Portal ***Move to Portal – People Mgt:***

New Feature - People Management Configuring Task Lists User Guide v27+

6. Terms and Conditions

People Management Dashboard – Data Centre Tab – Data Centre – People Management

Terms and Conditions (T&C) Profiles are templates of contracted terms and conditions that can be associated with Posts and Contracts.

Rules can be defined as to when a profile is relevant to a Post Profile e.g. based on status, location etc.

The following contract elements can be defined:

- Probation Expiry
- Employee and Employer Notice Periods
- Increment Due Date and Hold Indicator
- Allowances
- Balances

7. Payroll Instructional Forms (v28+)

People Management Dashboard – Data
Centre Tab – Data Centre - HR Admin Setup
Settings – Configure Custom Forms

A Payroll Instructional Form is a method of communication that is sent to Payroll directly from HR in terms of details that are going to affect the employee's payroll record once processed. Examples of these items include:

1. Balance adjustments needed for holidays owed to an employee.
2. Outstanding student loan payments.
3. PAYE / Tax Code changes.
4. Holiday/Average Pay calculations.
5. Hours (i.e. Overtime).
6. Adhoc Payments (i.e. Bonuses & once off payments).
7. Pension changes.

8. Pay Awards inc Position and Point updates/increases via Adhoc module (maybe this is covered in the Salary approvals piece)
9. Late Leavers / Joiners / Rejoiners
10. Temp Reinstatements
11. Any cancel/manual payments to be processed
12. Cost Allocation changes

8. Wage Warning Setup

People Management Dashboard – Data Centre Tab – Data Centre - HR Admin Setup Settings

CoreHR provides an option to validate the rate entered for an employee's salary, against minimum, living and / or apprentice wage rates. This is to inform the user if the salary they are providing for the *employee's contract* is too low.

Rates for minimum wage, living wages and apprentice wages can be setup on CoreHR. These can be added to on an annual basis, as new rates are released for each new tax year.

CoreHR will calculate if the salary supplied for an employee's contract meets the minimum / living / apprentice wage rates based on:

- The rates defined on CoreHR and their effective date.

- The employee's date of birth.
- Contracted hours and weeks (or FTE Weeks per Year).
- For apprentice rates, validation is applied to confirm that the employee / contract is apprentice.
- Where multiple countries are setup, the appropriate rates for the employee's Pay Group country.

Minimum wage & apprentice rates are not mutually exclusive. The system will first check to see if the employee's contract is an apprentice type contract.

- **If it is** - apprentice rates are used in validation.
- **If it isn't** - minimum wage rates are used in validation.

Wage Warning Setup

For further details on Wage Warning Setup please see following documents on the Community Portal ***Move to Portal – People Mgt:***

New Feature - People Management Wage Warning Setup Configuration Guide v27+

9. Employee Transfers (v28+)

People Management Dashboard – Command Centre Tab – Command Centre – Transfers – View

In CoreHR, the hr administrator's access to employees on the system is restricted based on their designated *HR Access*. This *HR Access* is aligned to an Organisational Unit e.g. this may be set to:

- Company = *ABC Solutions*
- Department = *Human Resources*
- Division = *Shared Services*

Every employee on CoreHR will be assigned to at least one contract. That contract will specify the Organisation Units that the employee's position is aligned to e.g.

- Company = *ABC Solutions*
- Department = *Human Resources*
- Division = *Shared Services*

If the user has access to the *Department* e.g. *Human Resources*, then they will be able to see the employee record and their contract in that department.

However, if the user doesn't have access to the *Department* e.g. *Finance*, then they will not be able to see the employee record and their contract in that department.

Transfer Requests

If a hr administrator doesn't have access to an employee on CoreHR but requires the ability to transfer them into a new contract within their organisation, then they need to complete a 'Transfer Request'.

For further details on Employee Transfers please see following documents on the Community Portal ***Move to Portal – People Mgt:***

4.2. Standard Personnel Insight Reports Available

To access the Standard Reports available on your environment then enable the menu profile 'CorePortal - CoreInsight Admin' on the menu profile **PORTALMIGRATION_ PEOPLEMGMT_ALL**.

Report Name	Report Description
HR - Length of Service	This detail report shows employees and their total length of service and their service history
HR - Staff Probation	This report lists employees and their probation details which the user has privileges to view
HR - Staffing Report Detail Ethnicity	This report shows the Ethnicity, Salary, department and FTE per person and Job Title
HR - Headcount by Location	This report provides a headcount age range analysis by department where Employee Status is S. Data is based on employees' Substantive posts.
HR - Emergency Contact Details	This report lists the emergency contact details of employees on the database which the user has privileges to view

HR - Age Range Per Department	This report lists an age range breakdown of employees with Status = 'S' on the database which the user has privileges to view
HR - Work Permit	This report lists the work permit details of employees on the database which the user has privileges to access.
HR - Diversity Extract	This report lists the diversity details of employees on the database which the user has privileges to view
HR - Qualifications and Subjects	This report lists the qualifications of employees on the database which the user has privileges to view
HR - Professional Bodies	This report lists the professional body records of employees on the database which the user has privileges to view
HR - Staff Numbers	This pivot report shows staff numbers by department broken down by category with an employment status of S
HR - Address Mailing List	This report lists all addresses of employees on the database which the user has privileges to view where the address is not null.
HR - FTE Per Dept and Status	This report lists all employees in the organization broken down by employee status (Commenced, Ended etc.)
HR - Contacts Extract	This report lists all contact data of employees on the database which the user has privileges to view
HR - User Defined Data	This report lists an unfiltered view of user defined data for employees on the database which the user has privileges to view
HR - Medical Records	This report lists all medical records of employees on the database which the user has privileges to view
HR - Disciplinary Details Extract	This report extracts disciplinary details per user
HR - Dependents Extract	This report lists all addresses of employee's dependents on the database which the user has privileges to view
HR - Leaver by Reason	This report lists leaver reasons where populated in the system. The user is prompted for dates to and from to control the date left parameter

HR - 12+ Months Service by Dept	This report lists all addresses of employees who have 12 months plus of service which the user has privileges to view
HR - Headcount by Ethnicity	The report shows a breakdown of ethnic origin by department for current employees
Reasons for staff leaving the business	This report shows all staff which have left the business, including the date they left and the reason why they left
Which business areas have the largest staff retention issues	This reports graphically represents a count of all leavers per work group description
Age Demographics of Leavers	The report shows the number of employees per age grouping by both department and cost centre
Months of the year with the highest attrition rate	The report shows a breakdown leavers per month of year and reasons why
Leaver By Average Length of Service by Work Group	The report shows the average length of service of employees by work group
Average Age Per Department	The report graphically represents the average age of employees by department
Gender Breakdown	The report shows a breakdown employee by gender across the organization
HR Headcount by Ethnicity	The report shows the headcount by ethnic origin for live and dormant employees
HR Manager Requests	This report enables users to view details of all Manager Requests on the system

4.3. Back Office Report Mapping

The below views can be used for reporting in place of the previously used Back Office reports. All reporting will be run from the Insight Report Portal Widget.

Back Office Report	Portal Widget	Business Area	Views
Starters List	Insight Report	Personnel Business Area	Hr Person Master
Leavers List	Insight Report	Personnel Business Area	Hr Person Master

Headcount by Cost Centre	Insight Report	Personnel Business Area	Hr Person Master
Dependents Report	Insight Report	Personnel Business Area	Dependents Details / Hr Person Master

4.4. Create a New Report

To access CoreInsight select CoreInsight from the Quick Jump menu and it will bring you to the CoreInsight Dashboard. From here a user can create personnel reports under the Core Personnel Business Area.

To create a new personnel report

- 1) Select Create Report
- 2) Select to create a new report or clone existing report
- 3) Select Tab or Cross Tab report
- 4) Enter a Report Name and click next
- 5) Select Core Personnel from the available business areas
- 6) Select the necessary views (See section 4.1)
- 7) Select the columns needed from the Available Column section
- 8) Run Report

5. People Management Configuration (Updating the Menu Profiles)

Users should be assigned the **PORTALMIGRATION_PEOPLEMGMT_ALL** and **PORTALMIGRATION_PEOPLEMGMT_VIEW** menu profiles which will provide the relevant access to all the standard functionality for both the People Management & CoreInsight modules.

Your organisation may want to change / disable certain menu options on these profiles and to support you doing this we've collated the dashboard configuration items into one document called '***Move to Portal – People Mgt - Configuring People Management Dashboard User Guide***'. This document is available on the Community Portal.

 **Note:** This document covers the configuration of dashboard widgets only. Some features available to access via the dashboard require their own detailed configuration. Therefore, this guide may direct you to another guide where full instructions are provided to configure a standalone feature.

6. People Management Data Access (Who You See)

User access to the CoreHR system can be broadly split into 2 categories, **Menu Profiles & Data Access**. Therefore, users of the *People Management* dashboard will need to be granted access for both categories. **Menu Profile** Access is covered in Sections 2 and 5 above. Review this section for further information regarding **Data Access**.

Note#1: In order for a back office user of Personnel to now see the same data in Portal People Management you must complete one of the following steps:

1. **OPTION 1** - Request CoreHR to automate the mapping of User Data Access to Portal
OR
2. **OPTION 2** - Grant Data Access manually to People Management Data in Portal

Note#2: As part of a historical major release, your User Data Access may have been migrated already. However, this migration was done at a point in time and it's essential that you review your current User Data Access in Portal People Management, particularly if you decide to pursue option #2 (manual configuration). However, if you choose option #1 (automatic migration) any existing User Data Access will be removed and recreated. Please see below for more information on this.

6.1. OPTION 1 - Request CoreHR to automate the mapping of User Data Access to Portal

CoreHR can facilitate the automatic mapping of Back Office User Data Access to Portal Data Access. We advise this approach where User Data Access in Portal has not yet been setup or else partially completed for Portal People Management.

6.1.1. How to request an automated mapping of User Data Access

Contact PeopleXD.MoveToPortal@theaccessgroup.com to request automated mapping for Non Production and Production environments.

6.1.2. How we map User Data Access

This process involves the following:

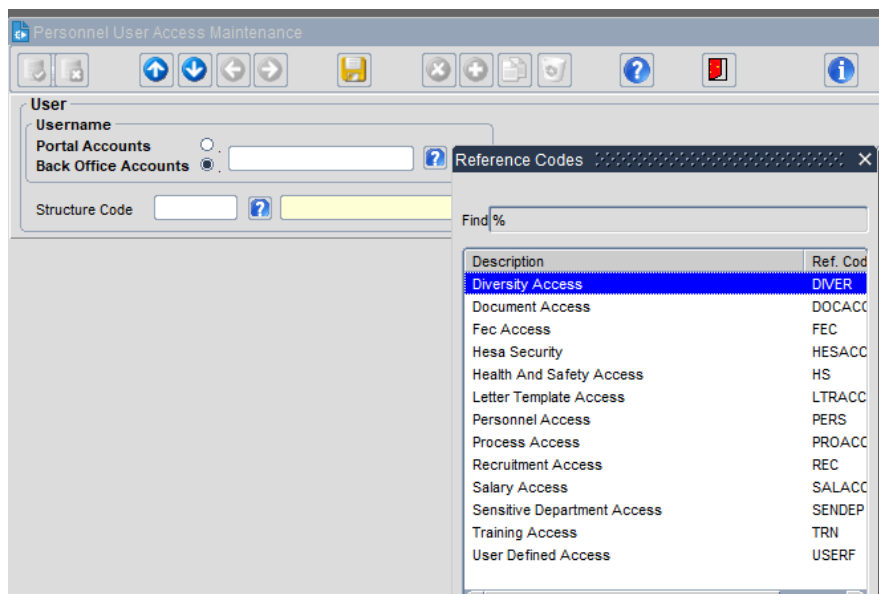

1. All records within the People Management User Data Access tables **in Portal** are **deleted** via a script. This removes any incomplete User Data Access records set up in Portal.
2. An script then runs to repopulate the User Data Access tables in Portal, mapping across the relevant User Data from back office, reflecting those back office users at that current point in time, ensuring the most up to date data access is configured in Portal. This mapping is based off of the Personnel User Access Maintenance Screen, security reference types:

DOCACC	Document Access
PERS	Personnel Access
SENDEP	Sensitive Department Access
USERF	User Defined Access

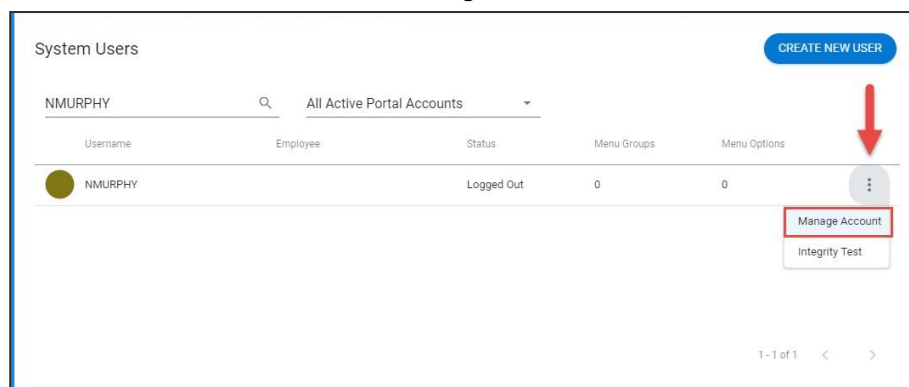

6.1.3. Prerequisites

In order for CoreHR to complete this automatic mapping of User Data Access, you must ensure the following are completed:

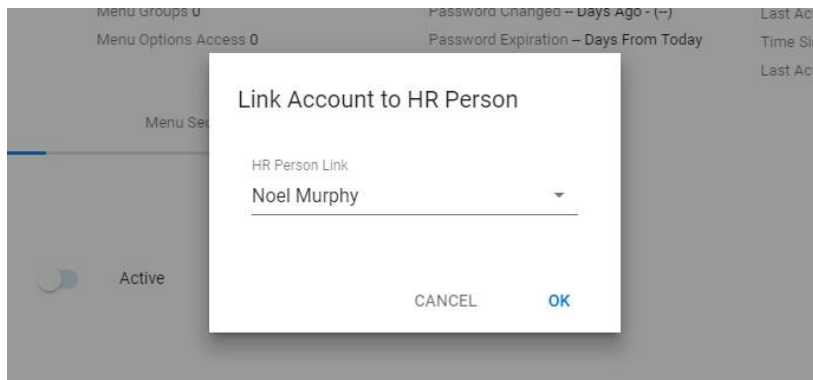

- Review the Personnel User Access in back office and ensure this is correct:
 - **CorePersonnel -> Reference -> Reference Q-Z -> System Users (Personnel User Access Maintenance)**

- Ensure that the users back office username is linked to their employee number (this then links to their portal username) via Portal Security.
 - **Portal -> Quick Jump to System Users -> Select User:**
 1. Click the  button and select **Manage Account**

The *Link Account to HR Person* prompt appears. This is because the new account has not yet been associated with this employee record. Link the user account to an employee record. Select an employee from the drop-down list.

All accounts for employees in your organisation should be linked to the relevant employee record. This is required to ensure that when they login, they can see the expected records.

6.1.4. Assumptions/Constraints

1. It is important to be aware that the above automatic mapping will clear down any existing records on the Portal User Data Access tables as part of the process, therefore if you have already configured users in Portal People Management and want to retain their current access you must complete any further Portal User Data Access manually as detailed in 6.2 below.
2. The scripts **do not** filter on user accounts i.e. if a user is locked, or inactive users. All back office users will be included. It is the customers responsibility to ensure the Personnel Users are correct and up to date.

6.2. **OPTION 2 - How to Grant Data Access manually to People Management Data in Portal**

6.2.1. Granting HR Access (Employee, Contracts, Posts)

To grant access to HR data:

1. Quick jump to the Data Centre widget and **Open People Management.**
2. Search for "HR User Access (Basic)" and click on the corresponding option. The *Data Security Access* screen opens.

3. Search for the employee on the *HR User Access (Basic)* screen.

HR User Access (Basic)

People Management > People Management > [HR User Access \(Basic\)](#)

	Employee	Admin	Manager	Employee	HR Admin	Pay Admin	Recruit A...	Talent	Data Access
PK	Paul Keane (000108)	☐	☐	☐	☐	☐	☐	☐	⋮
PM	Paul Martin (000017)	☐	☒	☒	☒	☐	☐	☐	HR Recruit ⋮

4. In the relevant employee row. Click on the  button for the *HR Admin* option.
5. The Administrator Access screen appears.
6. Select the Structure Code dropdown.
 - If more than 1 Org Structure exists on CoreHR for an organisation, it is vital to select the correct one here.
 - If only 1 exists, select this.
7. The *Structure Level* drop down list will appear.
 - The levels displayed here will reflect the levels that have the *Hierarchy Indicator* enabled on the Org Structure definition.

Administrator Access

People Management > People Management > HR User Access (Basic) > [Administrator Access](#)

PK Paul Keane (000108), Security Officer, It Security

HR Admin Pay Admin Recruit Admin

Structure Code
Abc Solutions

Structure Level

- Company
- Division
- Management Unit
- Department

8. Select a level from the drop-down e.g. *Company*.
- The window expands to include a list of all the active org units for the chosen level
- e.g. if *Company* is selected, this will be a list of companies, if *Department* is selected this will be a list of departments.

- Select the indicator for the Org Unit.

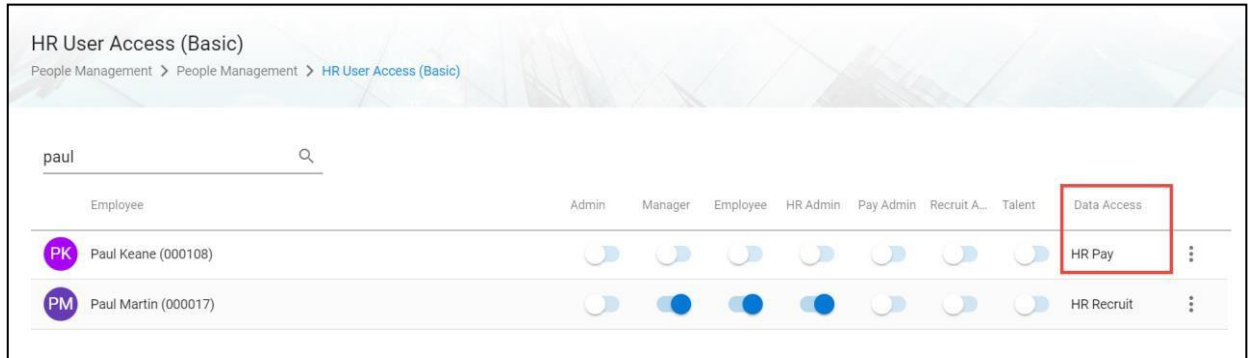

- Use the **Enable All** button to select all org units on screen.

9. Remember! If access is enabled at the top level of the structure, this provides full access to all units beneath. If access is required for only specific sub units, ensure that:

- the org unit at the top level is not enabled.
- the correct level is selected on the *Structure Level* drop down list.
- only the required units are enabled for the selected level e.g.

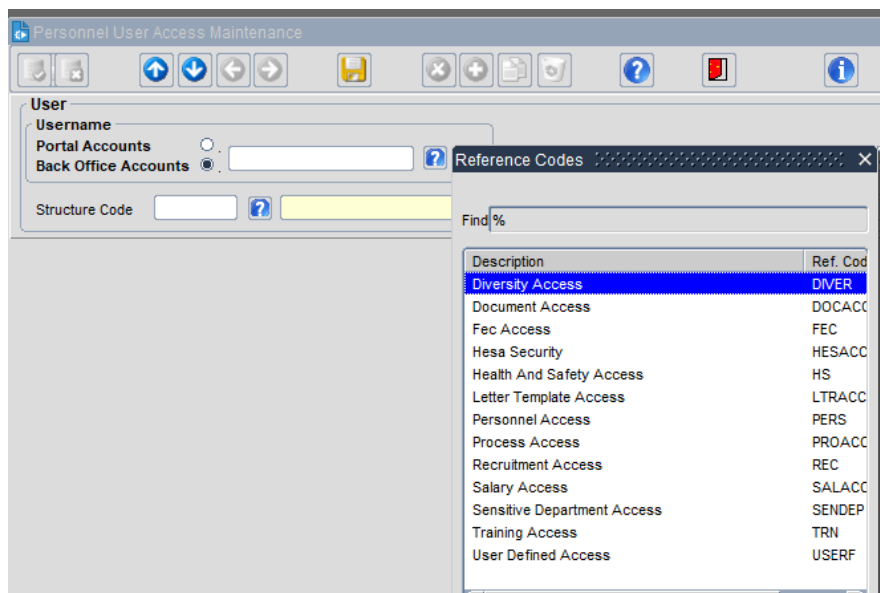

10. Changes to the user access settings are automatically saved.

On returning to the *Data Security Access* screen, the *Data Access* column will display a label of *HR*, indicating that this employee has been granted access to see HR data on the system (employees, contracts & posts).

6.2.2. Mapping Personnel User Access from back office account to Portal account

A back office user is linked to the required security type reference data via the Personnel User Access Maintenance screen in back office i.e. Document Access, Personnel Access, Sensitive Department Access and User Defined Access.

To grant access to sensitive HR data:

- A users Portal account must also be linked to the same security type reference data as is linked to their back office account. This can be done within **Portal Security -> Setup -> System Users**.
 1. Select their Portal Account
 2. Select the necessary security type i.e. Document Access, Personnel Access, Sensitive Department Access and User Defined Access
 3. Select the necessary Structure Code and/or Access Level

7. Training

Additional training guides (as referenced throughout this document) on Portal People Management are available on the CoreHR Community Portal ('**Move to Portal – People Mgt**' folder).

When reviewing these guides, we recommend doing this while navigating through the application in tandem.

7.1. User, Configuration and Process Guide Documentation v27+

User/Process guide documentation is readily available to all customers on the Community Portal. Here is a listing of those guides and summary of content, recommended as **Mandatory or Optional**.

Document	Summary
Move to Portal - People Management Dashboard Configuration & User Guide v27+ (Mandatory)	The purpose of this document is to provide an overview of the <i>People Management</i> dashboard on CorePortal, including detailed guidance on the standard tabs and widgets that are enabled for this feature. Items covered include: • How to access the <i>People Management</i> dashboard. • The standard tabs and widgets that are available on this dashboard. • How to search for employees on <i>People Management</i>. • How to use the <i>Data Centre</i> widget. It also provides detailed guidance on how to configure the <i>People Management</i> dashboard on CoreHR. The dashboard is preconfigured on install of CoreHR. This guide identifies the key configurable elements of the dashboard, including: • Access to the dashboard in CorePortal. • The standard dashboard tabs. • The standard dashboard widgets. • All menu options and other configurable elements required to support the tabs and widgets.
Move to Portal - People Management HR Employee Record Overview User Guide v27+ (Mandatory)	The purpose of this document is to provide an overview of the employee records on the <i>People Management</i> dashboard on CorePortal and detailed guidance on the Personal Profile section of the employee record. These screens are used by hr administrators to access and amend some of the employees' personal details and contracts on <i>People Management</i>.

Move to Portal - People Management Post Profiles User Guide v27+ (Optional)	The purpose of this user guide is to provide guidance on how to create and manage the Post Profile records on CoreHR, that will form the basis of every Post Appointment / Contract that is created for every employee on the system.
Move to Portal - People Management Contracts Key Concepts User Guide v27+ (Mandatory)	The purpose of this document is to provide some clarity on the key concepts and terminology that will be used on People Management when managing employee contracts, including: • How to change their start and end date. • How to update their contract details. • What elements of the employee's record get updated. • What elements of the employee's record do not get automatically updated.
Move to Portal - People Management Managing Salaries User Guide v27+ (Mandatory)	The purpose of this document is to provide an overview of how employee salary records are accessed and managed on People Management. This includes: • An overview of key concepts and terminology related to salary records. • How salaries are created. • Where to view salaries for the employee. • Creating a salary amendment. It also provides an overview of the 'Salary Approval' process in CoreHR and how this controls the creation and management of the salary and allowance records for employees' contracts.
Move to Portal - People Management Configuring Organisational Roles User Guide v27+ (Optional)	The purpose of this document is to provide guidance on how Organisational Roles are configured on CoreHR. This document will provide guidance on how to: • Create & edit organisational role types. • Assign organisational roles to employees. This will also provide an overview of: • areas of the system where organisational roles are used to support the completion of tasks. • advanced organisational role options (covered in separate user guides).

Move to Portal - People Management User Defined Data User Guide v27+ (Optional)	The purpose of this document is to provide detailed guidance on how to use the User Defined Data functionality on CoreHR. Guidance is provided on: • How to add a UDF to an employee record. • The difference between person and contract UDFs on the employee's record. • Updating a UDF. • Deleting a UDF.
Move to Portal - People Management Document and Email Generation User Guide v27+ (Optional)	The 'Document and Email Generation' feature on CoreHR allows a user to automatically generate documents / letters / emails based on employee data e.g. employee contracts, letters of offer, hr forms etc.

7.2. New Functionality User Guides v27+

User and Configuration guide documentation for new features listed in [Section 3.3](#) is readily available to all customers on the Community Portal. Here is a listing of those guides. These are optional training guides and are available on the CoreHR Community Portal ('**Move to Portal – People Mgt**' folder).

Feature Name	Guide
Employee Files	New Feature - People Management Configuring Employee Files User Guide v27+
Menu Profile Matrix	New Feature - People Management Configuring Menu Profile Matrix User Guide v27+
PayScale Restriction Matrix	New Feature - People Management Configuring Payscale Restriction Matrix User Guide v27+
Social Security Settings	New Feature - People Management Configuring Social Security Settings User Guide v27+
Task Lists	New Feature - People Management Configuring Task Lists User Guide v27+
Terms and Conditions	New Feature - People Management Configuring Terms and Conditions User Guide v27+ New Feature - People Management Terms and Conditions User Guide v27+
Employee Transfers v28+	New Feature - People Management Employee Transfers User Guide v28+

Payroll Instructional Forms v28+	Move to Portal - People Management Payroll Instructional Forms User Guide v28+
Wage Warning Setup	Move to Portal - People Management Wage Warning Setup Configuration Guide v27+

8. Appendix: Back Office to Portal Mapping Table

A complete mapping of all the back office and equivalent portal screens. Where there is a portal equivalent available then the back-office screen will no longer be available post the communicated retirement date.

Note: Where no mapping is available in Portal – this screen will still be available post the communicated retirement date.

8.1. Screens with a Portal Mapping available (Back Office will be Retired for These Screens)

Form/Screen Name	Mapped Widget Name/Path
PER021S: Personnel Profile	People Mgmt Dashboard -> Command Centre -> Employees -> View -> Actions -> Personal Profile
PER625: Appointment History	People Mgmt Dashboard -> Command Centre -> Employees -> View -> Actions -> Personal Profile -> Contracts
PER030: Dependent Details	People Mgmt Dashboard -> Command Centre -> Employees -> View -> Actions -> Personal Profile -> Dependent Details
PER1035: Qualification Details	People Mgmt Dashboard -> Command Centre -> Employees -> View -> Actions -> Personal Profile -> Learning & Development
PER685: View Employee Appointments	People Mgmt Dashboard -> Command Centre -> Employees -> View -> Contracts
