1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to use Onboarding Checklists feature in CorePortal.

This will include:

- Guidance on how to view, update or create new onboarding checklists.
- Assigning checklists to employee groups.
- Viewing the onboarding status for all employees.
- Viewing the onboarding status for an individual employee.

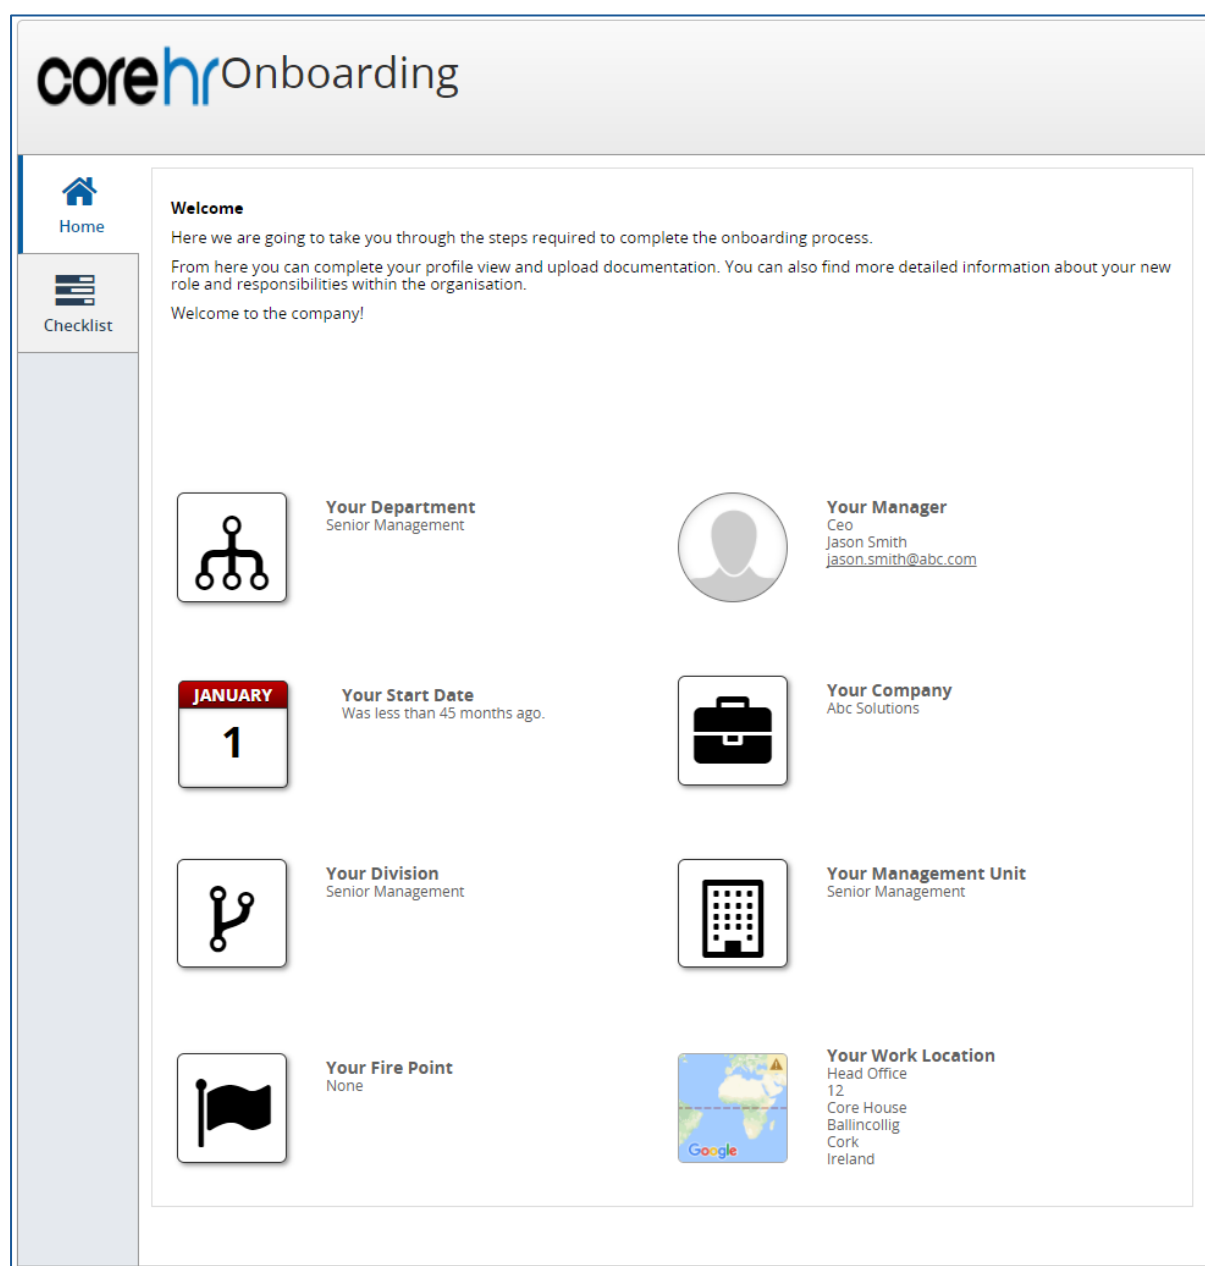

1.2. Overview

1.2.1. What is Onboarding?

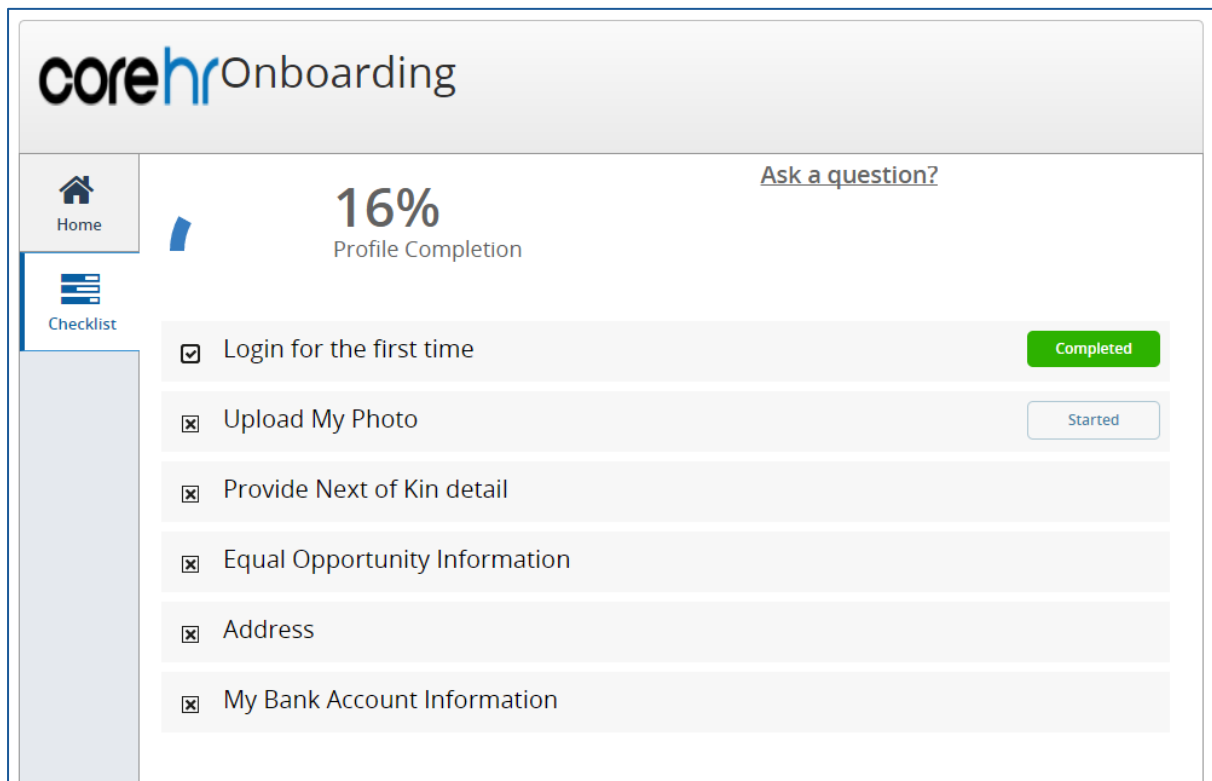

Onboarding checklists are assigned to employee records on CoreHR. These are essentially a list of tasks that must be reviewed and completed by the employee on CorePortal.

Once a checklist has been assigned to the employee, they will be presented with the 'Onboarding Dashboard' when they login to CorePortal. The 'Onboarding Dashboard' includes 2 tabs by default:

- **Home:** Displays a welcome message and some key elements associated with the employee's contract e.g. their department, manager, location etc.

- **Checklist:** The actual list of tasks that the employee must complete as part of their onboarding e.g. confirm address, upload a photo, confirm bank details etc.

This dashboard will always be the first screen that they see on login, until they have fully completed the checklist i.e. all tasks are 'Completed'.

1.2.2. How are Checklists Maintained?

Onboarding checklists are created and managed by the hr administrator, via the 'Onboarding Checklists' widget on the People Management Dashboard.

On install of CoreHR a 'Default Checklist' is created. This checklist will be assigned to all employees by default. The checklist configuration may be updated as required e.g. to add new / remove existing checklist items, change the display of the 'Home' tab etc.

It is possible to have one or many active checklists on CoreHR. If more than one checklist is available, then the checklists may be assigned to different groups of employees e.g. a checklist for senior management, a checklist for fixed-term staff etc. The amount of checklists defined on CoreHR is optional and based on the organisation's requirements. It is possible to simply use the existing 'Default Checklist' for all employees.

1.2.3. Are Onboarding Checklists Mandatory?

The 'Onboarding' feature is an optional feature on CoreHR. This is parameter driven and can be switched on or off.

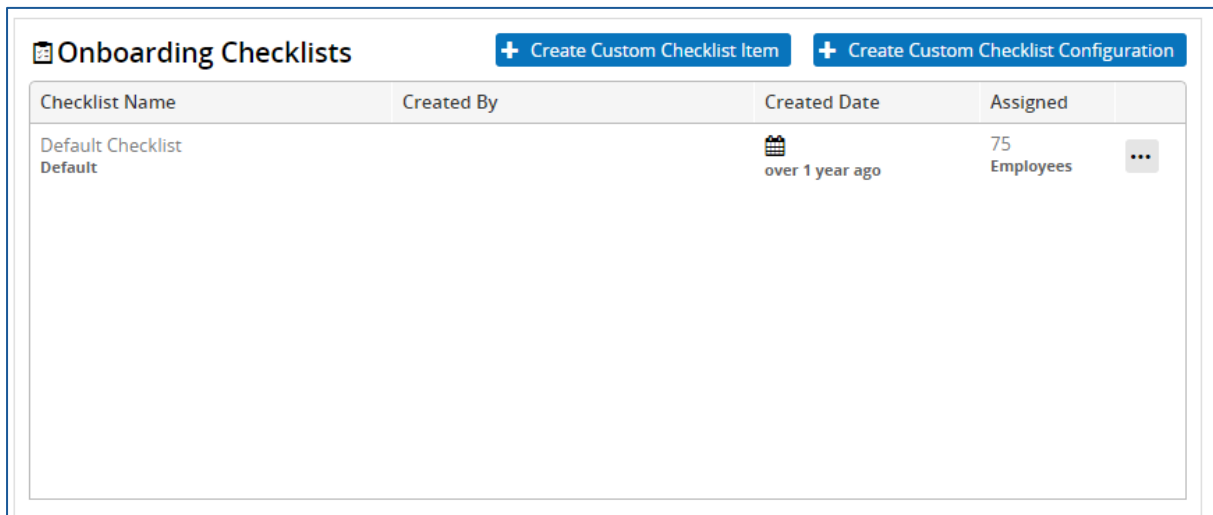

Please note: If this feature is switched on, it will be applicable for every active employee on the system. It is not possible to exclude any employees from this.

2. Managing Onboarding Checklists

2.1. The 'Onboarding Checklists' Widget

HR administrators can view and manage checklists on People Management Dashboard:

- Select the 'Dashboard' tab
- Scroll to the 'Onboarding Checklist' widget

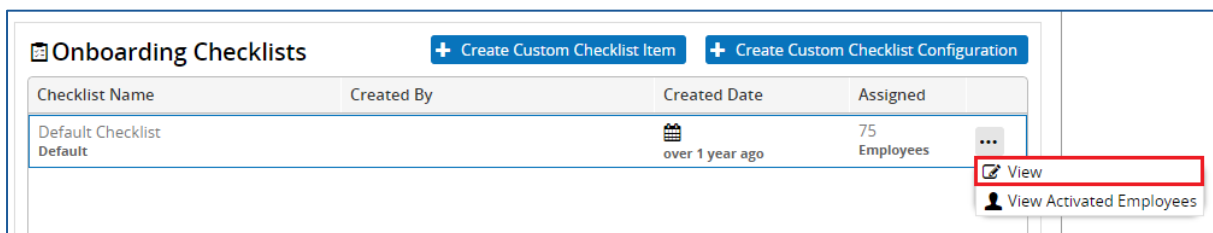

Checklist Name	Created By	Created Date	Assigned	
Default Checklist Default		over 1 year ago	75 Employees	...

- This widget will display a list of all existing checklists on CoreHR.
 - This will always include the 'Default Checklist' which is created on install.
- The following details are displayed for the checklist:
 - **Checklist Name:** The name of the checklist and the status (Default, Active, Inactive)
 - **Created By:** The name of the user than created the checklist. This will be blank for the 'Default Checklist'.
 - **Created Date:** The date that the checklist was created.
 - **Assigned:** How many employees on CoreHR are currently assigned to that checklist.

2.2. Updating the 'Default Checklist' Configuration

To update the checklist configuration:

- Click the  button for the required checklist and select **View**.

Checklist Name	Created By	Created Date	Assigned	
Default Checklist Default		over 1 year ago	75 Employees	 - View - View Activated Employees

- The 'Checklist Editor' window will appear:

2.2.1. Step 1: Details

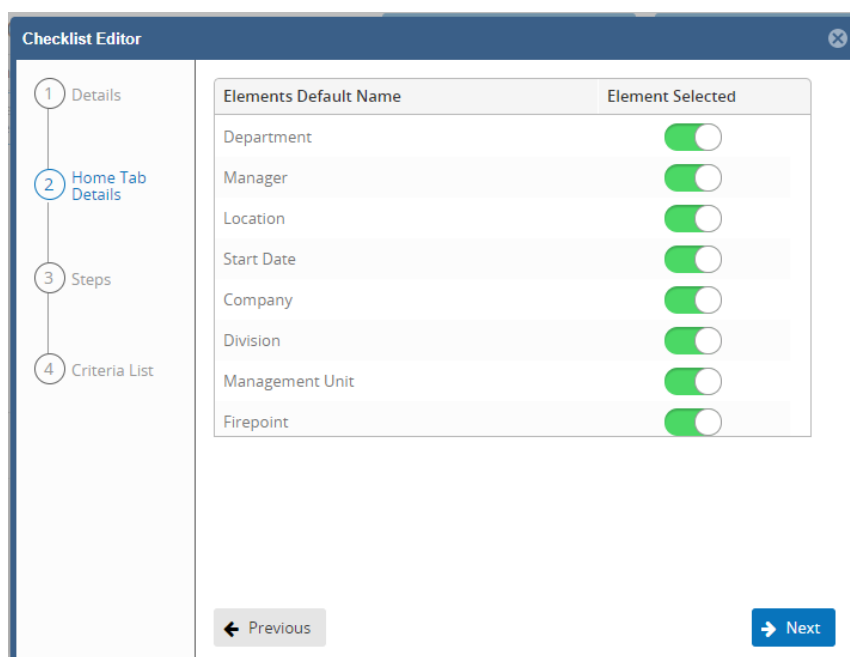

This screen will display the name and creation details for the checklist.

The screenshot shows the 'Checklist Editor' window. On the left is a sidebar with a vertical list of steps: 1 Details (highlighted), 2 Home Tab Details, 3 Steps, and 4 Criteria List. The main content area is titled 'Checklist Editor' and contains three input fields: 'Configuration Name' (with the value 'Default Checklist'), 'Created By', and 'Creation Date'. A blue 'Next' button with a right arrow is located at the bottom right of the window.

Item	Description
Configuration Name	The name of the checklist. This cannot be edited for the 'Default Checklist'.
Created By	The name of the user that created the checklist. This will be blank for the 'Default Checklist'. It is not possible to update this.
Creation Date	The date that the checklist was created. This will be blank for the 'Default Checklist'. It is not possible to update this.

2.2.2. Step 2: Home Tab Details

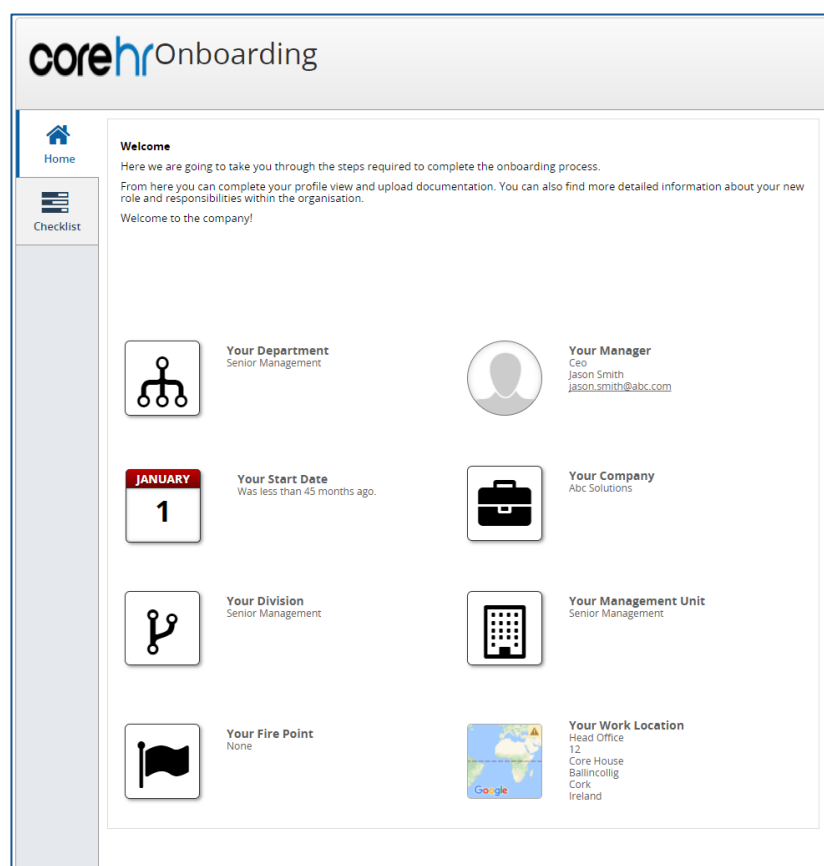

- 'Home Tab Details' step is used to define the items that should be appear on the 'Home' tab of the 'Onboarding Dashboard' i.e. items enabled here:

Elements Default Name	Element Selected
Department	☒
Manager	☒
Location	☒
Start Date	☒
Company	☒
Division	☒
Management Unit	☒
Firepoint	☒

Navigation: Previous (disabled), Next (active)

will display here:

corehr Onboarding

Welcome
Here we are going to take you through the steps required to complete the onboarding process.
From here you can complete your profile view and upload documentation. You can also find more detailed information about your new role and responsibilities within the organisation.
Welcome to the company!

	Your Department Senior Management		Your Manager Ceo Jason Smith jason.smith@abc.com
	Your Start Date Was less than 45 months ago.		Your Company Abc Solutions
	Your Division Senior Management		Your Management Unit Senior Management
	Your Fire Point None		Your Work Location Head Office 12 Core House Ballincollig Cork Ireland

- If the 'Element Selected' indicator is enabled for any element listed, that element will display on screen. If it is disabled, that element will not appear on screen.
- The elements will be displayed on the 'Home' tab in the order that they are listed on the configuration screen.

2.2.3. Step 3: Steps

- This step is used to enable the actual checklist tasks i.e. the elements that are enabled here:

The screenshot shows the 'Checklist Editor' window. On the left is a sidebar with four steps: 1 Details, 2 Home Tab Details, 3 Steps (highlighted), and 4 Criteria List. The main area contains a table with the following columns: 'Elements Default Name', 'Element Selected' (a toggle switch), and an arrow icon. The table lists five elements, all with their 'Element Selected' toggle turned on (green).

Elements Default Name	Element Selected	↑
Upload My Photo	☒	1
Provide Next of Kin detail	☒	2
Equal Opportunity Information	☒	3
My Bank Account Information	☒	4
Address	☒	4

At the bottom of the window are 'Previous' and 'Next' buttons.

will display here:

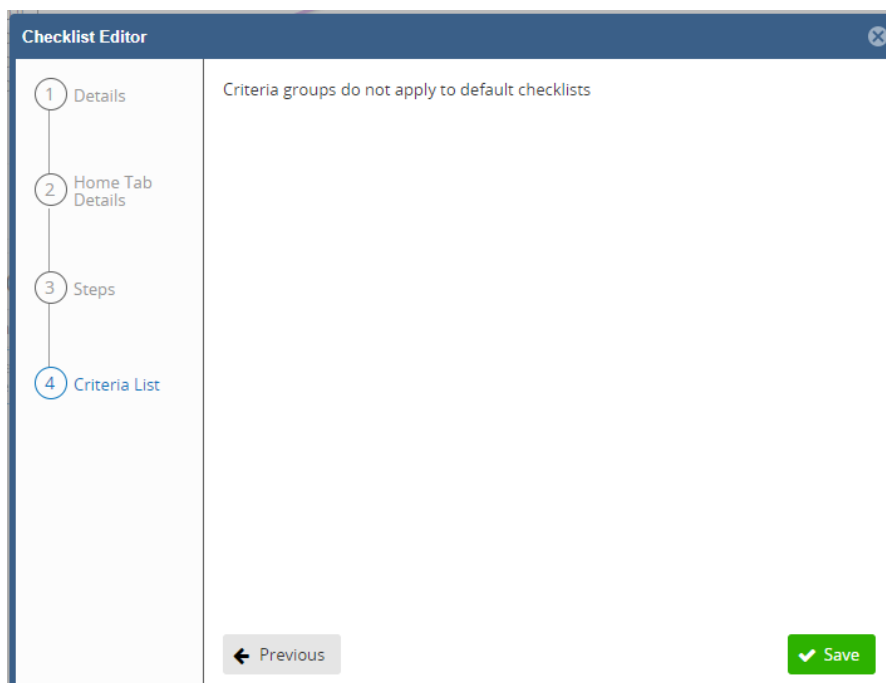

The screenshot shows the 'corehr Onboarding' user interface. At the top, it says 'corehr Onboarding'. Below this is a navigation bar with 'Home' and 'Checklist' tabs. The 'Checklist' tab is active. In the center, it shows '16% Profile Completion' with a blue progress bar. To the right, there is a link 'Ask a question?'. Below this, there is a list of checklist items, each with a checkbox and a status button:

- ☒ Login for the first time Completed
- ☒ Upload My Photo Started
- ☒ Provide Next of Kin detail
- ☒ Equal Opportunity Information
- ☒ Address
- ☒ My Bank Account Information

- If the 'Element Selected' indicator is enabled for any element listed, that element will display as a task on the checklist. If it is disabled, that task will not appear on the checklist.
- Use the  and  buttons to reorder the elements. This will directly update the order of the tasks on checklist.

2.2.4. Step 4: Criteria List

- This step is used to define groups of employees (i.e. criteria groups) and assign the checklist only to the required groups.
- This is not possible for the 'Default Checklist'.

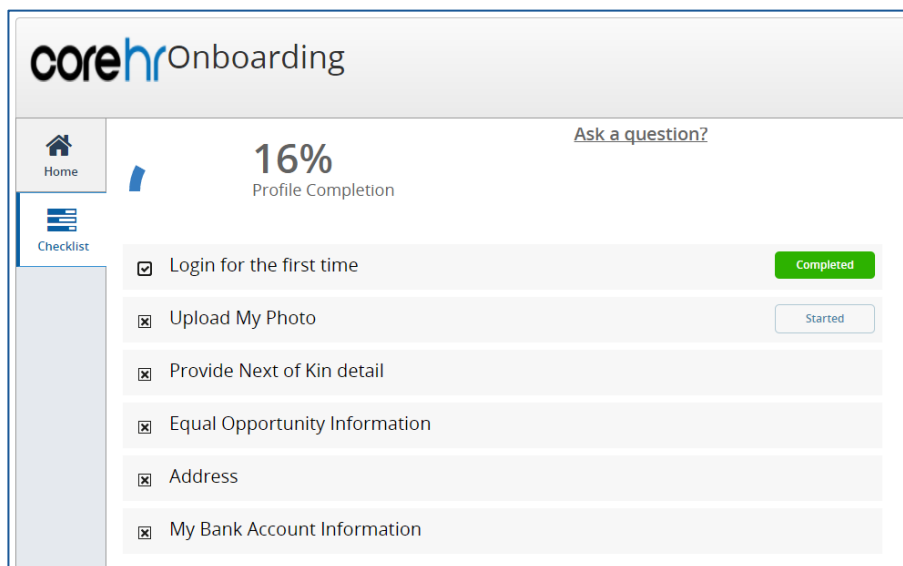

- Click the **Save** button to save changes.

2.3. Custom Checklist Items

2.3.1. What are Checklist Items?

A 'Checklist Item' is one of the tasks on the 'Checklist' tab i.e.

The following items are available by default on CoreHR:

- Upload My Photo
- Provide Next of Kin Detail
- Equal Opportunity Information
- Address
- My Bank Account Information

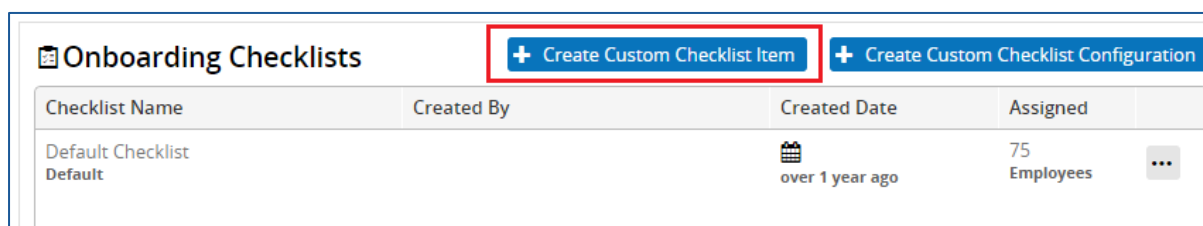

These are standard items on CoreHR and it is not possible to update their configuration.

It is possible to create custom checklist items, to require a user to complete tasks that are not covered by the standard items. Once configured, these items will be available on the 3rd step of the checklist configuration and may be added to one, many or all checklists, including the 'Default Checklist'.

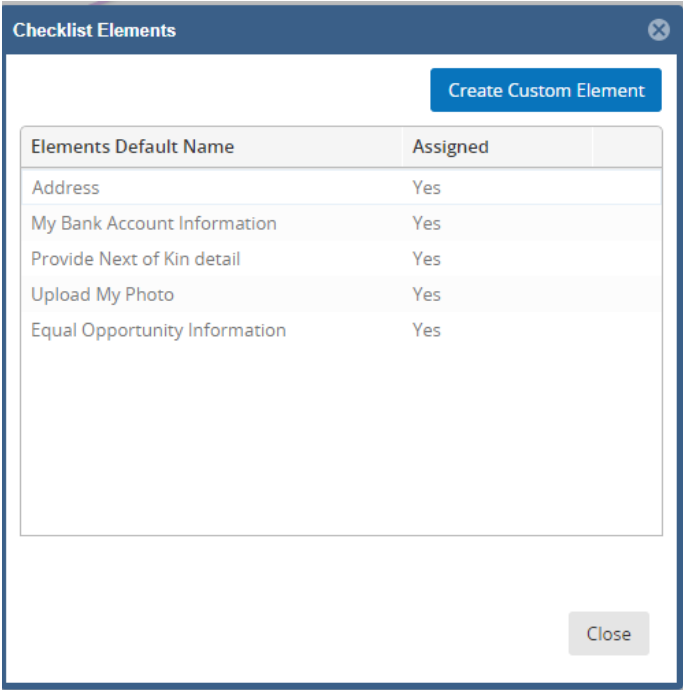

2.3.2. Create a New Checklist Item

To create a custom checklist item:

- Click the **Create Custom Checklist Item** button on the 'Onboarding Checklists' widget:

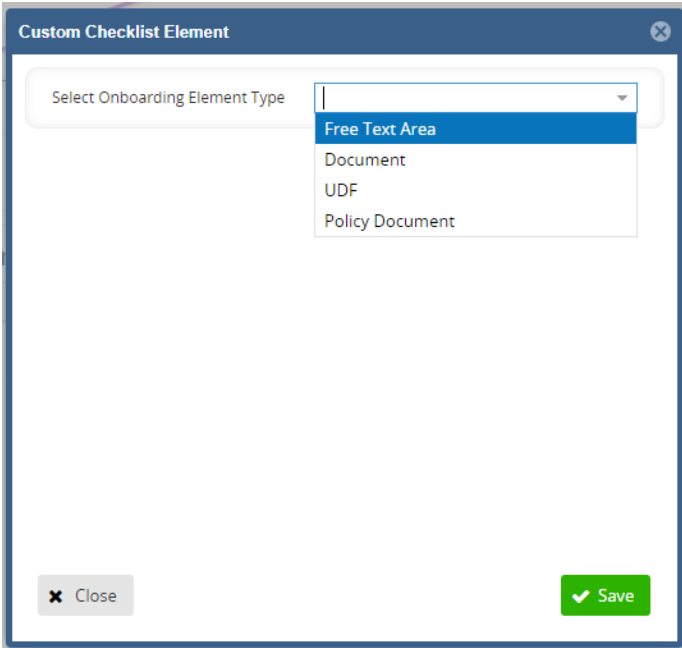

- The 'Checklists Elements' window will pop up.
 - This screen will list all of the elements that are currently available.
 - The 'Assigned' indicator shows where the element is enabled on one or many checklists.
 - The 5 default elements will appear here for display purposes only, but there is no option to edit these i.e. a  button will not display for these

Elements Default Name	Assigned
Address	Yes
My Bank Account Information	Yes
Provide Next of Kin detail	Yes
Upload My Photo	Yes
Equal Opportunity Information	Yes

- Click the **Create Custom Element** button to open the 'Custom Checklist Element' screen.
- It is possible to create 4 different types of element i.e. 'Free Text Area', 'Document', 'UDF', 'Policy Document':

Select Onboarding Element Type

- Free Text Area
- Document
- UDF
- Policy Document

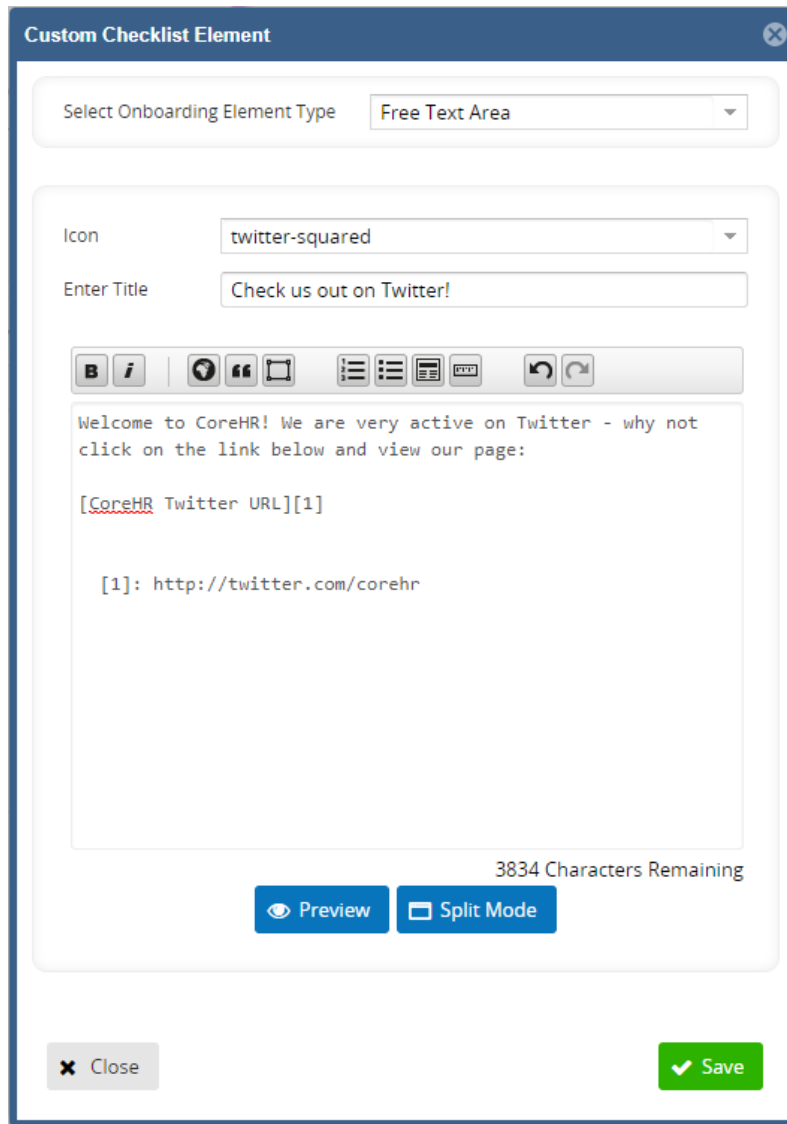

Close Save

2.3.3. 'Free Text Area' Item

A free text area element will allow the user to include a free text message in a task, including links to external sites/environments. This can be most useful to provide links to internal intranet sites or else for more informal use, such as links to company social media sites.

To create a 'Free Text Area' item:

- Select the option 'Free Text Area'
- Select an icon from the drop-down list. This is mandatory.
- Enter a title. This will be the actual task that is displayed on the checklist.
- Enter the text.
 - Use the formatting options to control the display of the text entered.
 - If adding a URL, click the  icon in order to add the template format required for a URL.

Custom Checklist Element

Select Onboarding Element Type: Free Text Area

Icon: twitter-squared

Enter Title: Check us out on Twitter!

Rich Text Editor:

Welcome to CoreHR! We are very active on Twitter - why not click on the link below and view our page:

[CoreHR Twitter URL][1]

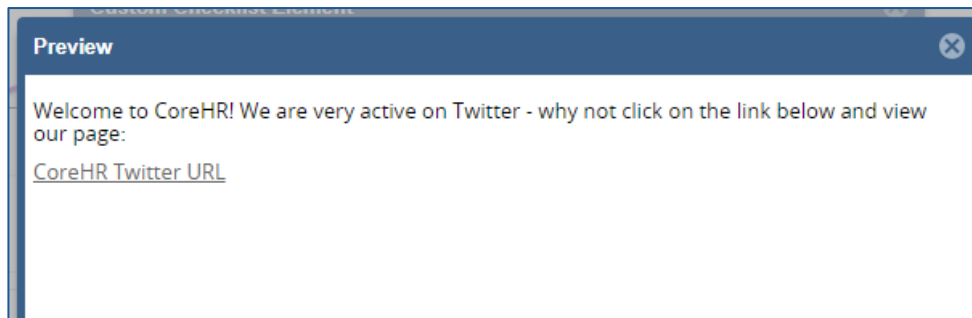

[1]: http://twitter.com/corehr

3834 Characters Remaining

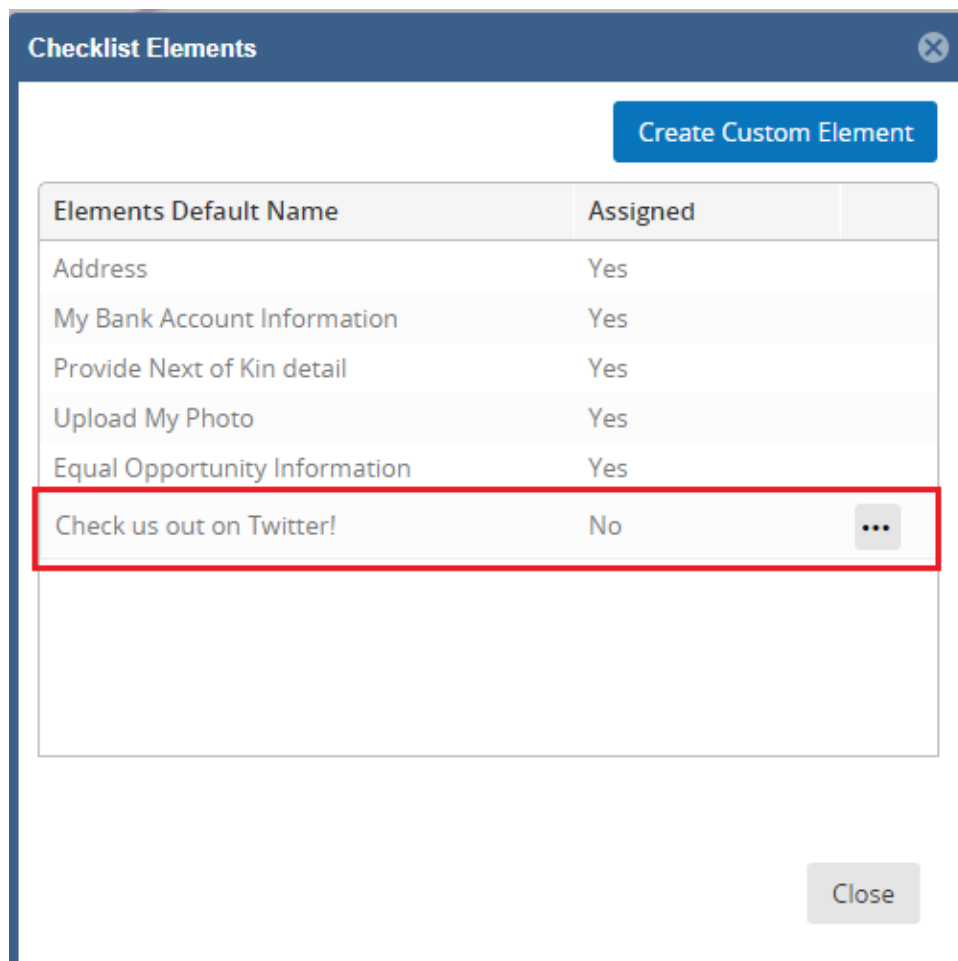

Preview Split Mode

Close Save

- Use the **Preview** and **Split Mode** buttons to preview how the text will appear on the checklist item

- Click the **Save** button to save the item
- The item will be listed on the 'Checklist Elements' screen:

- The 'Assigned' value will be 'No' as this is brand new and not linked to a checklist.

Once this has been added to a checklist, this will be displayed as per the below screenshot:

The screenshot shows the 'corehr Onboarding' interface. On the left is a sidebar with 'Home' and 'Checklist' options. The main area displays a progress bar at 14% Profile Completion and a list of tasks. The tasks are: 'Login for the first time' (Completed), 'Upload My Photo' (Started), 'Provide Next of Kin detail', 'Equal Opportunity Information', 'My Bank Account Information', 'Address', and 'Check us out on Twitter!' (highlighted with a red border). A link 'Ask a question?' is in the top right.

Task	Status
☒ Login for the first time	Completed
☒ Upload My Photo	Started
☒ Provide Next of Kin detail	
☒ Equal Opportunity Information	
☒ My Bank Account Information	
☒ Address	
☒ Check us out on Twitter!	

- The 'Title' is displayed at the checklist task. Click on the task to open the task details:

The screenshot shows a modal window titled 'Check us out on Twitter!'. It contains a Twitter icon, a welcome message, a link to the CoreHR Twitter URL, and an acknowledgment checkbox. At the bottom are 'Close' and 'Save' buttons.

Check us out on Twitter!

Welcome to CoreHR! We are very active on Twitter - why not click on the link below and view our page:

[CoreHR Twitter URL](#)

I acknowledge I have read and understood the contents of this section and by pressing save I am marking it as complete ☐

☒ Close

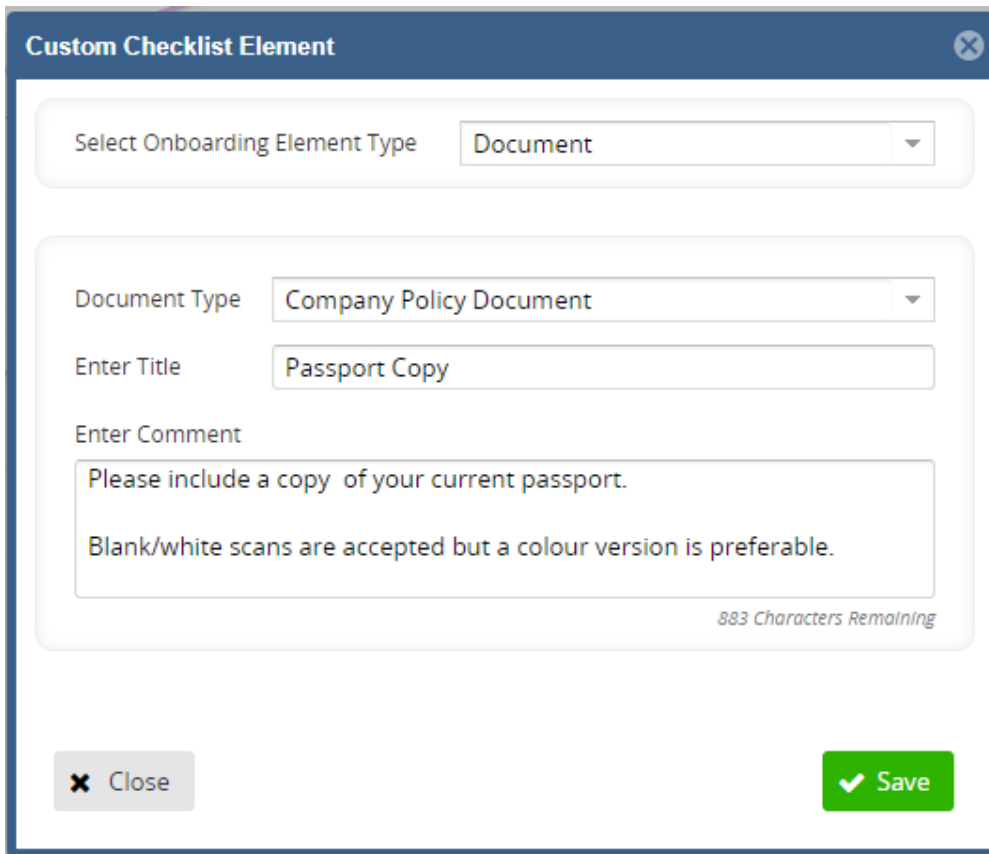

- The 'Title' is the window header
- The icon selected is displayed
- The text is displayed, using the defined formatting
- The acknowledgement message is included by default and must be selected by the user to acknowledge completion of the task.

2.3.4. 'Document' Item

The 'Document' item may be used to create a task on the checklist that requires the employee to upload a document. Documents uploaded by the employee are linked to CoreHR Document Types. This ensures that they can be shared on the 'Files' screen for the hr administrator to view. These may also be shared with employee's and their manager via their access to the 'Employee Profile' screen.

To add a 'Document' item:

- Select the type 'Document' from the drop-down list.
- Select a 'Document Type' from the drop-down list.
 - This list is based on the list of 'Document Types' defined on CoreHR.
 - Only Document Types that are active and are set to 'Person' will be displayed here.
- Enter a title. This will be the actual task that is displayed on the checklist.
- Enter a comment. This will be the message / prompt displayed to the employee when completing this task.
- All fields on this screen are mandatory.
- Click the **Save** button to create the item.

The screenshot shows a modal window titled 'Custom Checklist Element'. It contains the following fields and controls:

- Select Onboarding Element Type:** A dropdown menu with 'Document' selected.
- Document Type:** A dropdown menu with 'Company Policy Document' selected.
- Enter Title:** A text input field containing 'Passport Copy'.
- Enter Comment:** A text area containing the text 'Please include a copy of your current passport. Blank/white scans are accepted but a colour version is preferable.' Below the text area, it says '883 Characters Remaining'.
- Buttons:** A 'Close' button with an 'X' icon and a green 'Save' button with a checkmark icon.

- The item will be listed on the 'Checklist Elements' screen:

Elements Default Name	Assigned
Address	Yes
My Bank Account Information	Yes
Provide Next of Kin detail	Yes
Upload My Photo	Yes
Equal Opportunity Information	Yes
Passport Copy	No
Check us out on Twitter!	Yes

- The 'Assigned' value will be 'No' as this is brand new and not linked to a checklist.

Once this has been added to a checklist, this will be displayed as per the below screenshot:

corehr Onboarding

Ask a question?

- ☒ Login for the first time Completed
- ☒ Upload My Photo Started
- ☒ Provide Next of Kin detail
- ☒ Equal Opportunity Information
- ☒ My Bank Account Information
- ☒ Address
- ☒ Check us out on Twitter! Started
- ☒ Passport Copy

- The 'Title' is displayed at the checklist task. Click on the task to open the task details:

Passport Copy

Please include a copy of your current passport. Blank/white scans are accepted but a colour version is preferable.

No document found

« ‹ | Page 0 of 0 | › » | ↻ No data to display

File to Upload  Browse  Upload

- The 'Title' is the window header.
 - The 'Comments' text is displayed in the blue box at the top of the screen
 - The file upload section is included by default and must be completed by the user to acknowledge completion of the task i.e. the user has to upload a document to complete this task.
- Any document uploaded by the employee will be saved for the specified Document Type.

Note: The user must mark the checkbox to identify that they have completed the task.

2.3.5. 'UDF' Item

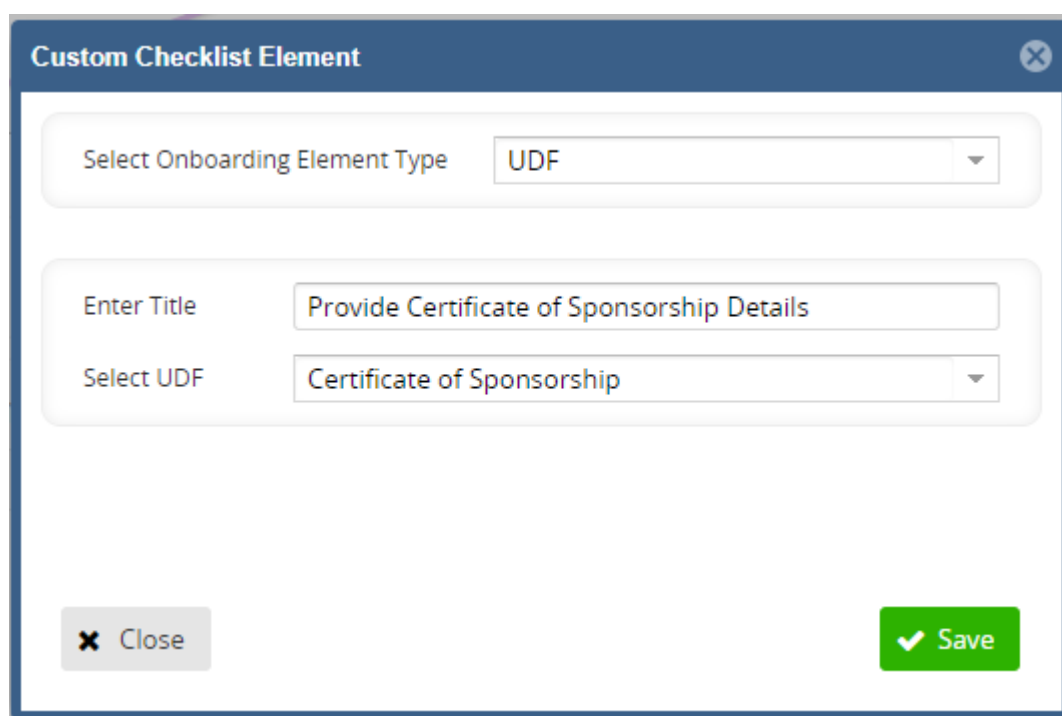

User Defined Fields (UDFs) are configured on CoreHR in order to capture organisation specific data for employees, where a standard system screen / feature doesn't capture this detail. These are highly configurable and are likely to differ greatly per organisation using CoreHR.

UDFs can be configured on CoreHR at 'Employee' or 'Contract' level. Only 'Employee' level UDFs are applicable here.

For the checklist, it is possible to define a checklist item that provides the employee with the actual UDF input screen, so that they may provide the required details directly.

To add a UDF item to the checklist:

- Select the type 'Document' from the drop-down list.
- Enter a title. This will be the actual task that is displayed on the checklist.
- Select a 'UDF' from the drop-down list.
 - Only UDFs that are active and are set to 'Employee' will be displayed here.

- Click the **Save** button to create the Checklist Item

Please note: It is not possible to further define what fields on the UDF will be displayed to the employee. The employee will see all configured UDF items, including the 'From Date' and 'To Date' items.

- The item will be listed on the 'Checklist Elements' screen

Elements Default Name	Assigned	
Address	Yes	
My Bank Account Information	Yes	
Provide Next of Kin detail	Yes	
Upload My Photo	Yes	
Equal Opportunity Information	Yes	
Provide Certificate of Sponsorship Details	No	...
Check us out on Twitter!	Yes	...
Passport Copy	Yes	...

- The 'Assigned' value will be 'No' as this is brand new and not linked to a checklist.

Once this has been added to a checklist, this will be displayed as per the below screenshot:

corehr Onboarding

Ask a question?

Home

11% Profile Completion

Checklist

- ☒ Login for the first time Completed
- ☒ Upload My Photo Started
- ☒ Provide Next of Kin detail
- ☒ Equal Opportunity Information
- ☒ Address
- ☒ My Bank Account Information
- ☒ Check us out on Twitter! Started
- ☒ Passport Copy Started
- ☒ Provide Certificate of Sponsorship Details

- The 'Title' is displayed at the checklist task. Click on the task to open the task details:

The screenshot shows a modal window titled "Provide Certificate of Sponsorship Details" with a close button in the top right corner. The form is organized into sections. The "Timelines" section at the top contains two date pickers: "From Date" and "To Date". Below this is a larger section containing several fields arranged in two columns. The left column includes "Type of CoS Required" (a dropdown menu), "Visa Type" (a dropdown menu), "Date of Issue" (a date picker), "Date last checked" (a date picker), "Passport Expiry Date" (a date picker), and "Notes" (a text input). The right column includes "CoS No" (a text input), "CoS End Date" (a date picker), "Visa Number" (a text input), "Date of Expiry" (a date picker), "Passport Number" (a text input), and "Prof. Accreditation" (a text input). At the bottom left of the modal is a "Close" button with a red 'X' icon, and at the bottom right is a green "Save" button with a document icon.

- All of the fields displayed on the screen will reflect the UDF configuration i.e. this screen will display different fields, depending on the UDF chosen.

Please Note: When the employee clicks **Save** the checklist item is automatically flagged as 'Completed'.

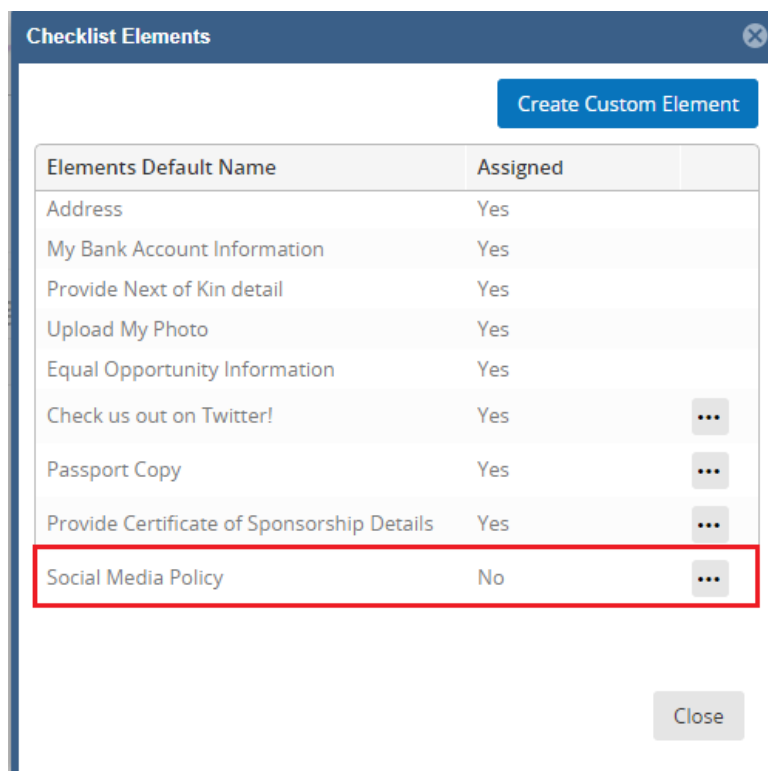

2.3.6. 'Policy Document' Item

The 'Policy Document' type provides the ability to create a task that provides the employee with a file that they must read and confirm that they agree to the policy as defined.

To add a 'Policy Document' item to the checklist:

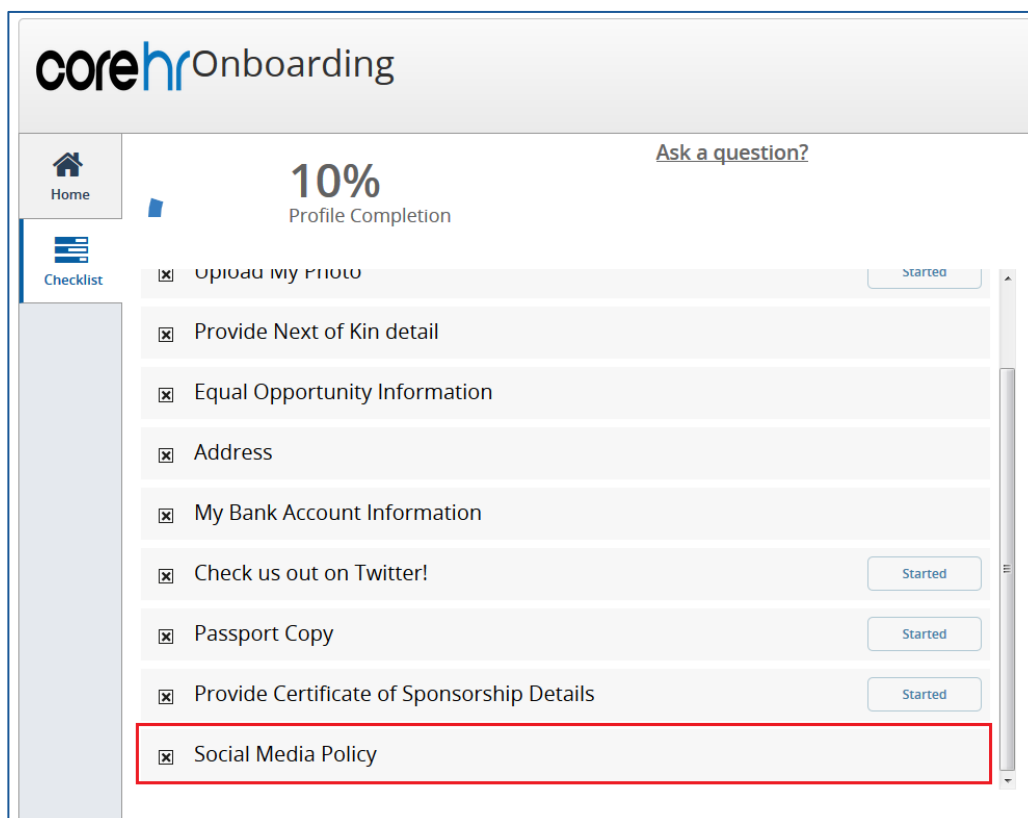

- Select the type 'Policy Document' from the drop-down list.
- Enter a title. This will be the actual task that is displayed on the checklist.
- Click the **Upload Policy** button to browse for the required files to upload:
 - It is possible to upload more than one file if required.

- Click the **Save** button to create the Checklist Item
- The item will be listed on the 'Checklist Elements' screen.

- The 'Assigned' value will be 'No' as this is brand new and not linked to a checklist.

Once this has been added to a checklist, this will be displayed as per the below screenshot:

- The 'Title' is displayed at the checklist task. Click on the task to open the task details

Displaying 1 - 2 of 2

I have read and agree to the policy documents stated above ☐

✕ Close

✓ Save

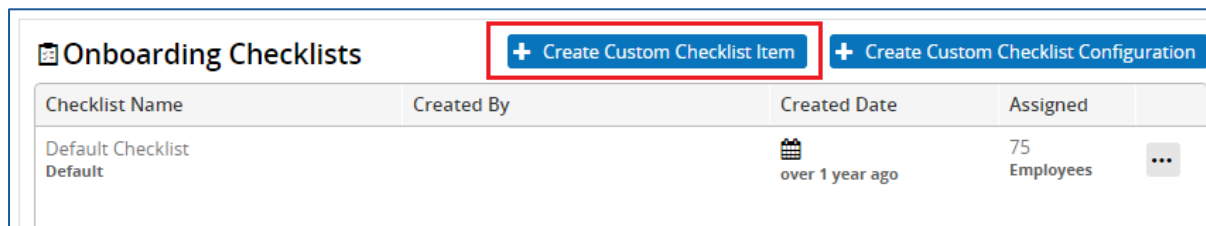

- The 'Title' is the window header.
 - All documents uploaded will be listed. Click on the  icon to view the actual document.
 - The 'Viewed' and 'Last Viewed' fields will update once the document has been viewed by the employee.
- Click the **Save** button to complete the task.
 - The employee must select the checkbox "I have read and agree to the policy documents stated above" in order for the task to be flagged as completed.

Please note: Viewing the document(s) is not enough to complete this task. The checkbox at the end of the screen has to be selected.

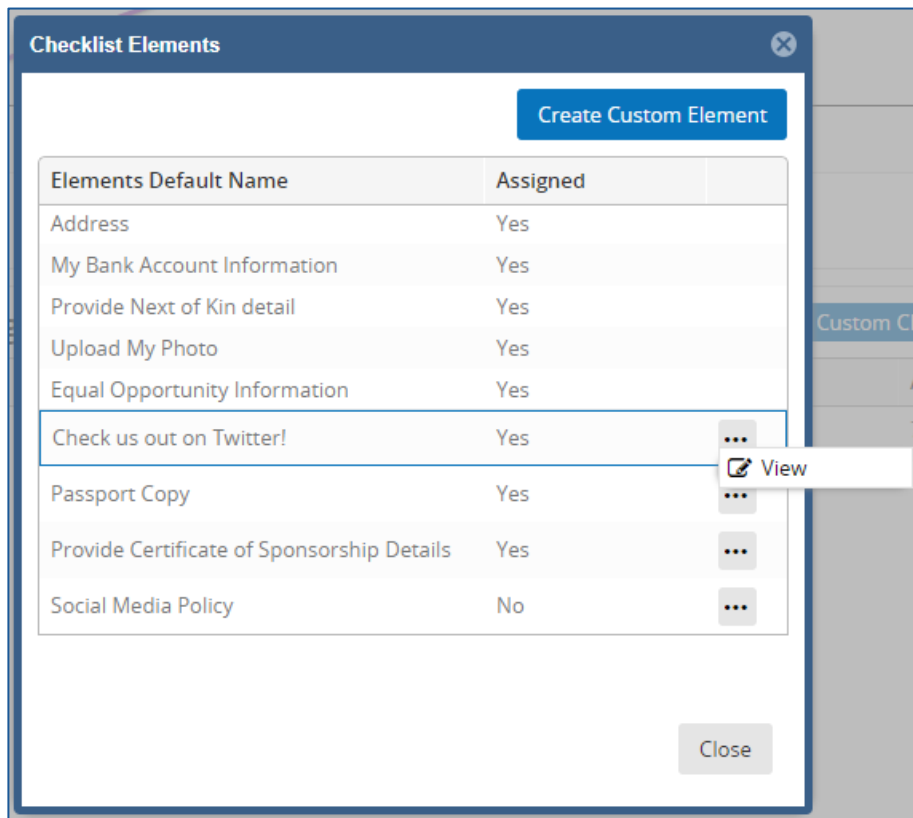

2.3.7. Editing a Checklist Item

To edit a custom checklist item:

- Click the **Create Custom Checklist Item** button on the 'Onboarding Checklists' widget:

- The 'Checklists Elements' window will pop up.
 - This screen will list all of the elements that are currently available.
 - The 'Assigned' indicator shows where the element is enabled on one or many checklists.

- It is only possible to edit custom checklist items
 - These will all include the ... button
- The following items cannot be edited:
 - Upload My Photo
 - Provide Next of Kin Detail
 - Equal Opportunity Information
 - Address
 - My Bank Account Information

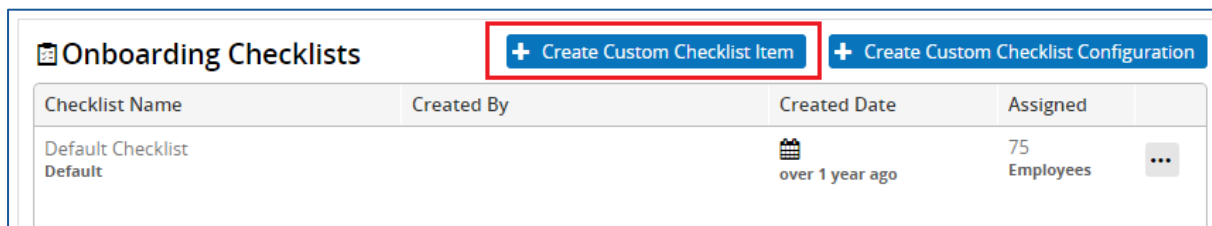

- To edit an item:
 - Click the  button and select the **View** option
 - The 'Custom Checklist Element' screen will open.
 - Edit the item as required.
 - Click the **Save** button to save changes made.

Please note: The user will not be prevented from editing a checklist item that is currently linked to a checklist. Changes made will be immediately reflected on checklists that are already assigned to employees. Keep this in mind as changes applied may impact on users who are currently completing a checklist.

2.3.8. Deleting a Checklist Item

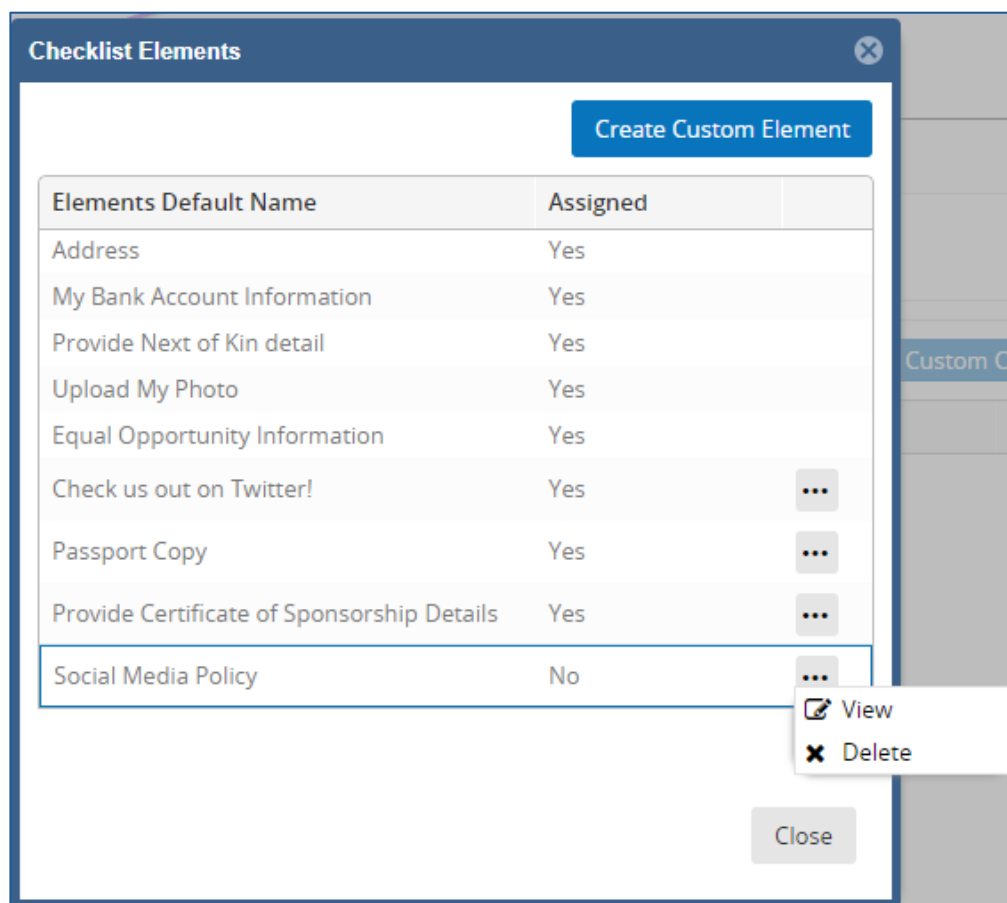

To edit a custom checklist item:

- Click the **Create Custom Checklist Item** button on the 'Onboarding Checklists' widget:

- The 'Checklists Elements' window will pop up.
 - This screen will list all of the elements that are currently available.
 - The 'Assigned' indicator shows where the element is enabled on one or many checklists.
- It is only possible to delete custom checklist items.
 - These will all include the  button.
- The following items cannot be deleted:
 - Upload My Photo
 - Provide Next of Kin Detail
 - Equal Opportunity Information
 - Address
 - My Bank Account Information

- It is only possible to delete an item if the 'Assigned' indicator is 'No'.
 - An item cannot be deleted if it is currently in used on a checklist that has been assigned out.
- To delete an item:
 - Click the  button and select the **Delete** option (only available if Assigned = 'No').
 - The item will be deleted immediately without further warning or prompt for validation.

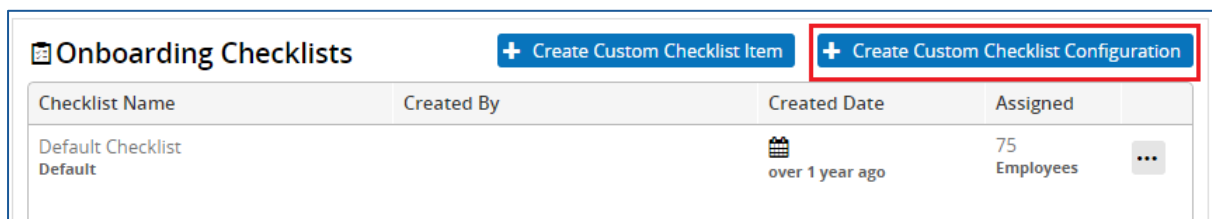

2.4. Creating a New Checklist

2.4.1. Create New / Duplicate Existing

New checklists can be created on CoreHR by the hr administrator if required. This is a useful option where it is required to define a checklist that is specific to only a certain group of employees. It is also possible to create a new checklist as a copy of an existing checklist. This is a useful timesaving measure when configuring similar checklists.

To create a new checklist:

- Click the **Create Custom Checklist Configuration** button on the 'Onboarding Checklists' widget.

- The 'New Checklist' window will pop up:

The 'New Checklist' window is shown. It has a title bar with a close button. Inside, there is a 'Configuration Name' text input field. Below it is a 'Duplicate another profile' toggle switch, which is currently turned off. At the bottom right, there is a green 'Save' button with a checkmark icon.

- Provide a name for the checklist in 'Configuration Name' e.g. 'IT Staff Checklist'
- Enable the **Duplicate another profile** indicator, to create the checklist as a direct copy of an existing checklist.

The 'New Checklist' window is shown again. The 'Configuration Name' field now contains the text 'IT Staff Checklist'. The 'Duplicate another profile' toggle switch is now turned on (green). Below the toggle is a dropdown menu labeled 'Choose a profile to duplicated' with 'Default Checklist' selected. The green 'Save' button is still at the bottom right.

- The drop-down list will display all existing checklist.
- It is possible to create the checklist from scratch by ensuring the **Duplicate another profile** indicator is disabled.
- Click **Save to** open the checklist editor.

2.4.2. Step 1: Details

This screen will display the name and creation details for the checklist.

Checklist Editor

1 Details

2 Home Tab Details

3 Steps

4 Criteria List

Configuration Name
IT Staff Checklist

Item	Description
Configuration Name	Defined on the 'New Checklist' window. This can be edited if required.
Created By	The name of the user that created the checklist. It is not possible to update this.
Creation Date	The date that the checklist was created. It is not possible to update this.

2.4.3. Step 2: Home Tab Details

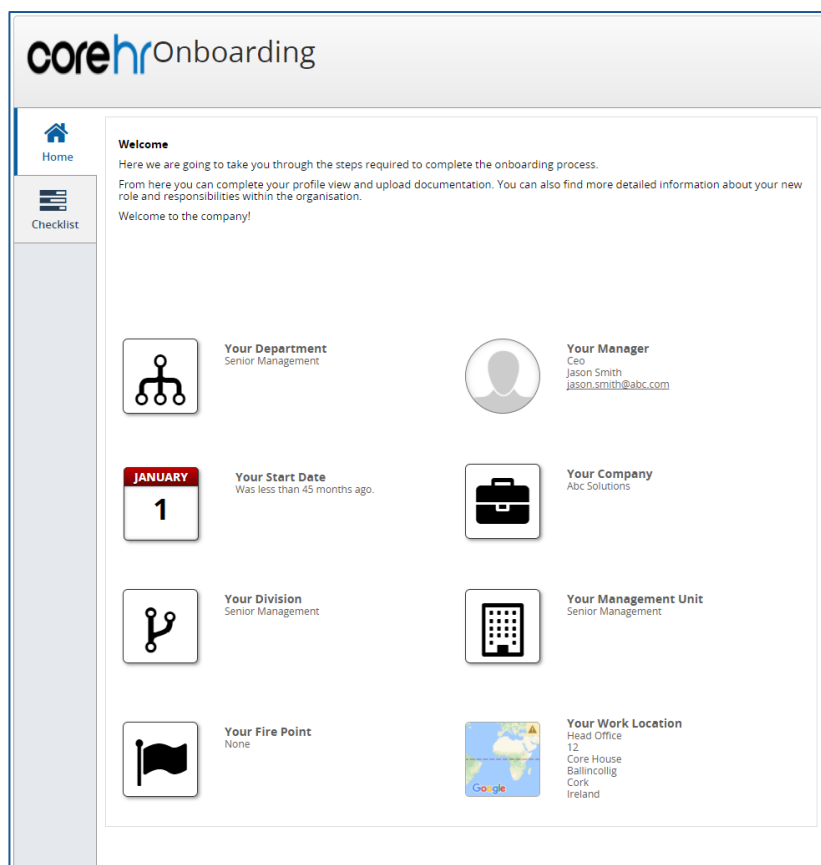

- 'Home Tab Details' step is used to define the items that should appear on the 'Home' tab of the 'Onboarding Dashboard'
- If the checklist is created from scratch, all items are defaulted to disabled.
- If the checklist is created a copy, the elements will be enabled / disabled as per the original.

Elements Default Name	Element Selected
Department	☐
Manager	☐
Location	☐
Start Date	☐
Company	☐
Division	☐
Management Unit	☐
Firepoint	☐

- Enable the required items. Items enabled here:

Elements Default Name	Element Selected
Department	☒
Manager	☒
Location	☒
Start Date	☒
Company	☒
Division	☒
Management Unit	☒
Firepoint	☒

will display here:

- If the 'Element Selected' indicator is enabled for any element listed, that element will display on screen. If it is disabled, that element will not appear on screen.
- The elements will be displayed on the 'Home' tab in the order that they are listed on the configuration screen.

2.4.4. Step 3: Steps

- This step is used to enable the actual checklist tasks:
 - If the checklist is created from scratch, all items are defaulted to disabled.
 - If the checklist is created a copy, the elements will be enabled / disabled as per the original.
- If the 'Element Selected' indicator is enabled for any element listed, that element will display as a task on the checklist. If it is disabled, that task will not appear on the checklist.
- Use the  and  buttons to reorder the elements. This will directly update the order of the tasks on the checklist.

- Items enabled here:

- ☒ My Bank Account Information

2.4.5. Step 4: Criteria List

- This step is used to define groups of employees (i.e. criteria groups) and assign the checklist only to the required groups. This will display all existing groups, if already defined on CoreHR.

The screenshot shows the 'Checklist Editor' window. On the left, a sidebar lists four steps: 1 Details, 2 Home Tab Details, 3 Steps, and 4 Criteria List (which is highlighted). The main area is titled 'Select a group to assign' and features a search bar with the placeholder 'Enter search text...'. Below the search bar is a table with two columns: 'Description' and 'Activate'. The table is currently empty, displaying a 'No data to display' message with a computer icon. At the bottom of the main area, there are two buttons: 'Previous' (with a left arrow) and 'Save' (with a green checkmark).

- Click the **Add Group** button to create a new criteria group. [steps covered in [4.3 Criteria Group](#)].
- Once created, this will display on screen. Enable the **Activate** indicator.

This screenshot shows the 'Checklist Editor' window after a group has been added. The sidebar remains the same. In the main area, the table now contains one row with the description 'IT Staff'. The 'Activate' column for this row shows a green toggle switch that is turned on, along with a three-dot menu icon. The 'Add Group' button is still present at the top right, and the 'Previous' and 'Save' buttons are at the bottom.

- Click the **Save** button to save changes.

- The new checklist will appear on the 'Onboarding Checklists' widget.
 - It will be inactive, as per the label beneath the checklist name.
- While the checklist is inactive, it is possible to Click the  button and select **View**, in order to return to the 'Checklist Editor' and make any further updates required.

Onboarding Checklists + Create Custom Checklist Item + Create Custom Checklist Configuration

2.4.6. Activate the Checklist

Please note: Once a checklist has been activated, it is no longer possible to amend it. Ensure all configuration has been completed, before activation.

To activate a custom checklist:

- Click the  button and select **Activate**.

Onboarding Checklists + Create Custom Checklist Item + Create Custom Checklist Configuration

2.5. Assigning Checklists

2.5.1. How are Checklists Assigned to Employees?

CoreHR automatically assigns checklists to employees via a scheduled system job. This job runs every 5 minutes and will identify any new employees that are not currently assigned to a checklist.

- For any employees created before the next scheduled run, they will be automatically assigned to the 'Default Checklist'.
- When the job runs, the system will identify any new employees and confirm if they should be assigned to another checklist, based on the criteria groups defined i.e.
 - If multiple active checklists exist, the system will identify the required checklist for the employee using the criteria groups defined.
 - If an employee does not match a checklist criteria group, then they will remain with the default checklist.
 - If only the default checklist exists, the employee will remain assigned to that.
- If an employee has started their checklist, their assignment will not be updated i.e.
 - If an employee has started the default checklist, then they will retain the default checklist.
 - If an employee has not started their checklist i.e. they are at 0%, they will be reassigned
- Only an employee's substantive appointment will be checked against the criteria groups for each checklist.
 - If the employee does not match, then they will get the default checklist.
 - No other appointments will be checked against the criteria groups.

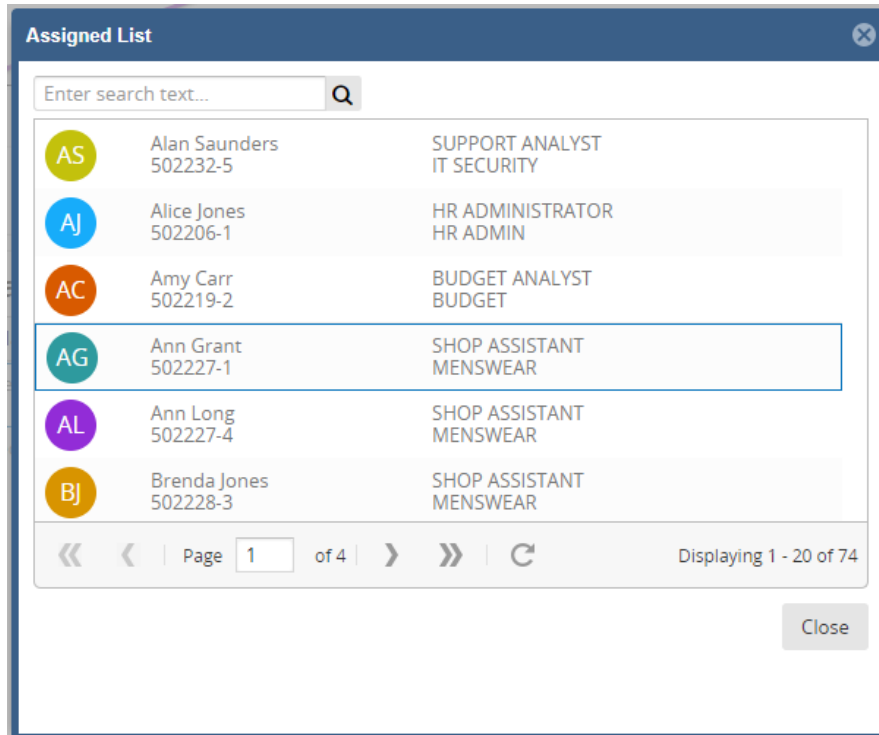

2.5.2. View Assigned Employee

- Click the  button for the checklist and select **View Activated Employees**.

Onboarding Checklists				
		+ Create Custom Checklist Item	+ Create Custom Checklist Configuration	
Checklist Name	Created By	Created Date	Assigned	
Default Checklist Default		 over 1 year ago	75 Employees	
IT Staff Checklist Active	Alice Jones Hr Administrator	 06 Sep 2017 Today	0 Employees	 View  View Activated Employees

- The 'Assigned List' window will pop up.

- All employees that are currently assigned to this contract, regardless of their completion status, will be displayed here.
- Use the search option to search the list based on employee name only.
- The contract details displayed will reflect the employee's substantive contract.

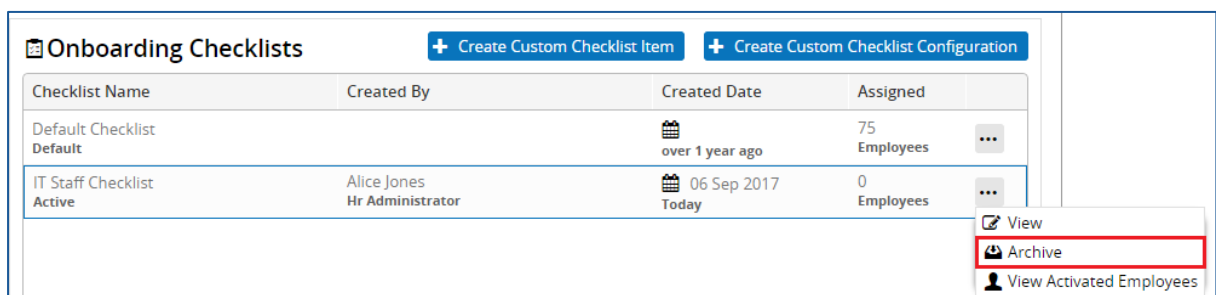

2.6. Archive a Checklist

Archiving a checklist will ensure that the checklist is no longer active and will not be assigned to any more employees.

To archive a checklist:

- Click the  button for the checklist and select **Archive**.

- A confirmation window will pop up. Click **Confirm** to proceed.
- The checklist will be archived and the label 'Archive' will now appear under the Checklist Name.

3. Completing the Checklist

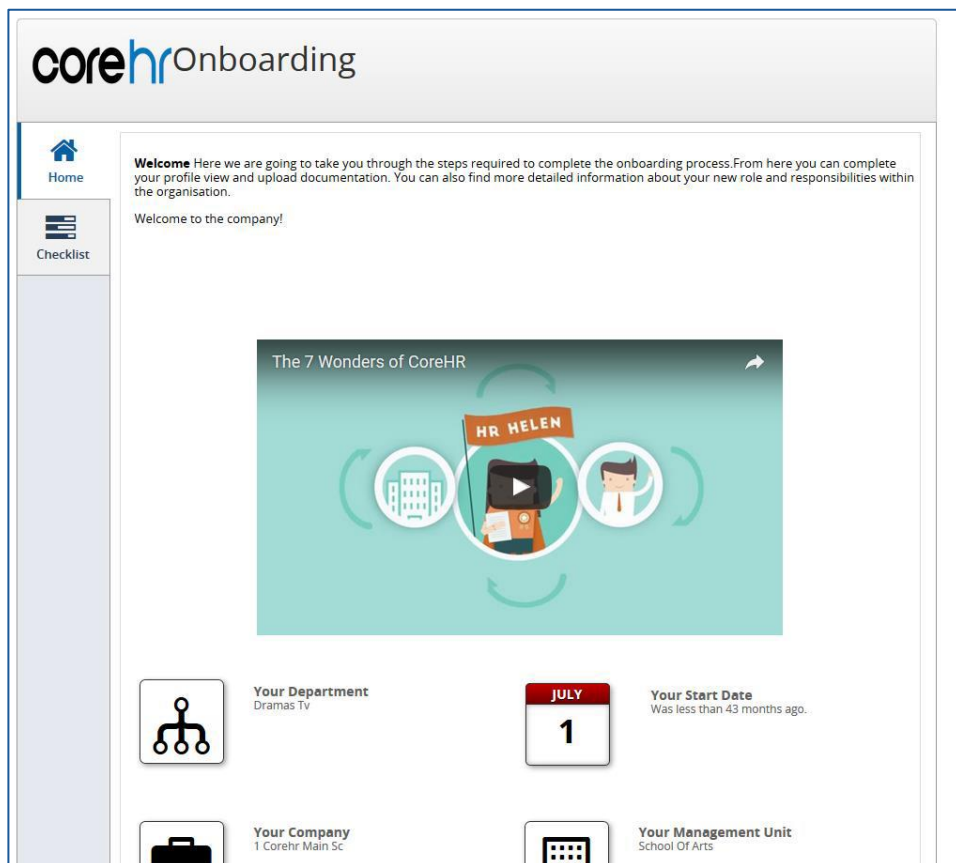

When an active checklist is assigned to an employee, they will be presented with the 'Onboarding Dashboard' when then login to CoreHR.

The 'Home' and 'Checklist' tabs will display as per the checklist configuration. This dashboard will continue to be the first screen that the user sees on login, until they fully complete the checklist i.e. until the checklist progress is 100%.

3.1. 'Home' Tab

This tab provides some key details to the employee, relevant to their employment including:

- A welcome message
- A welcome video
- Key contract details e.g. department, manager, location etc.

The key contract details displayed are based on the items enabled on the step 2 (Home Tab details) of the assigned checklist. These reflect the employee's substantive Post Appointment.

Please refer to the corresponding configuration guide for further details of other configuration options available on this screen.

3.2. 'Checklist' Tab

This is the actual list of tasks that the employee must complete as part of their onboarding e.g. confirm address, upload a photo, confirm bank details etc.

The tasks displayed here will be based on the items enabled on the step 3 (Steps) of the assigned checklist.

The screenshot shows the 'corehr Onboarding' interface. On the left is a sidebar with 'Home' and 'Checklist' tabs. The 'Checklist' tab is active. At the top right, there is a link 'Ask a question?'. Below this, a gauge shows '16%' Profile Completion. The main area lists six tasks, each with a checkbox and a status button:

Task	Status
☒ Login for the first time	Completed
☒ Upload My Photo	Started
☒ Provide Next of Kin detail	
☒ Equal Opportunity Information	
☒ Address	
☒ My Bank Account Information	

To complete a checklist task:

- Click on the task.
- A new window will pop up providing further details to the user on how to complete the task e.g. select a confirmation indicator, upload a document, fill in some details etc.
- When a task has been opened, the task item will display a status of 'Started'.
- Once a task has been fully completed the task item will display a status of 'Completed'.

The 'Profile Complete' gauge at the top of the screen will identify the % complete for the user, based on the number of completed tasks vs the full number of available tasks.

Clicking on the 'Ask a question' will open an email, preconfigured to send to a specified email address.

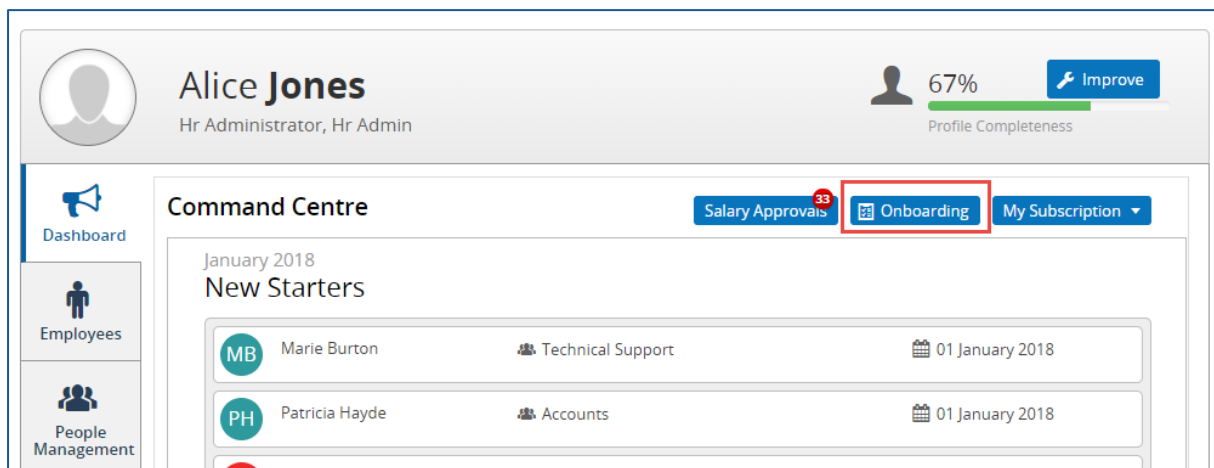

4. Monitoring Employee Onboarding

4.1. Viewing Onboarding Statistics

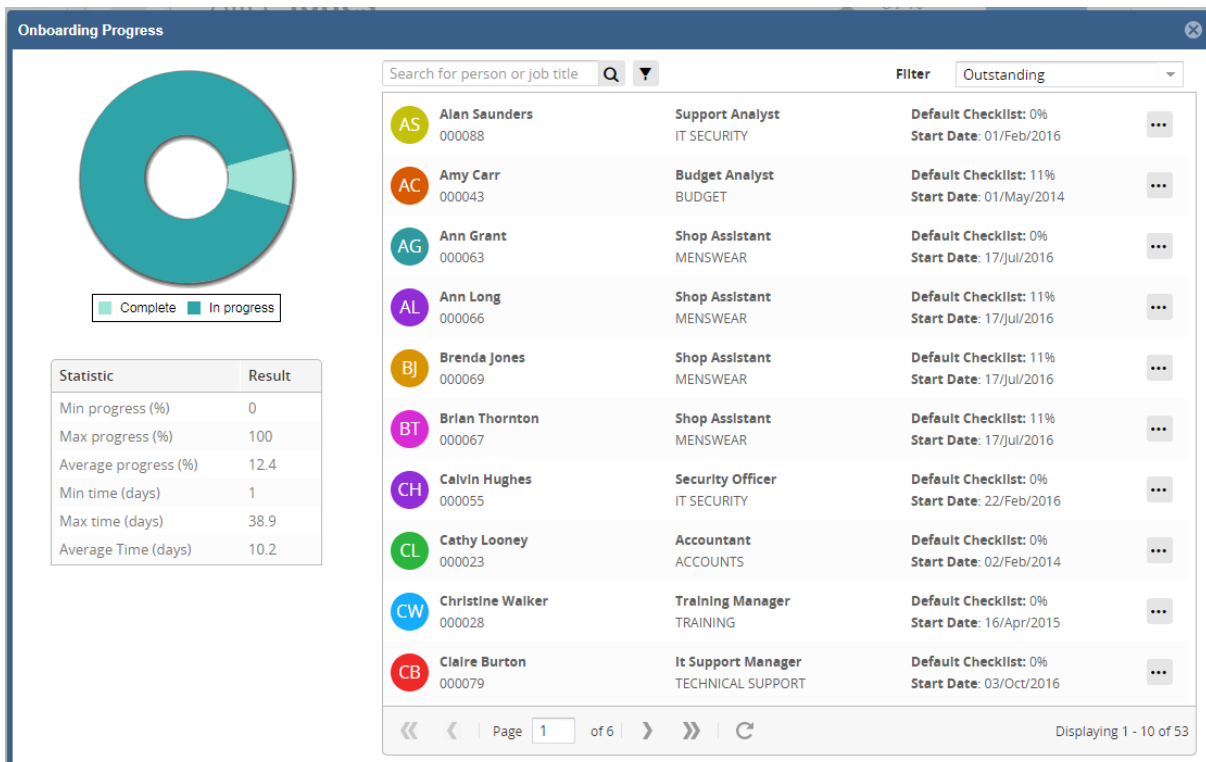

The hr administrator has access to view the onboarding status completion for all employees that they have access to on People Management i.e. if they have access to the employee on the 'Employees' tab, they will have access to view the onboarding completion for that employee.

To view the onboarding statistics for the entire group of employees (that the user has access to):

- On the 'Dashboard' tab, click the **Onboarding** button.

- The 'Onboarding Progress' screen will appear.

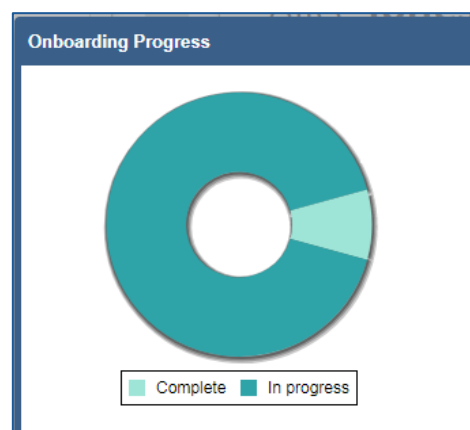

- The employees listed will be restricted to only the employees that the user has access to in HR Admin.

4.1.1. Statistics

The chart at the top right of the screen provides a view of the total Completed vs total In Progress checklists, for the employees that are listed on screen.

Hovering the cursor over the chart section will provide the number and the % value for that section.

If a user searches for an employee on this screen, the chart will update dynamically to display stats related to the selected records.

The list of statistics beneath the chart will also dynamically update to display data specific for the set of employees listed on screen.

- **Min Progress:** the % complete value for the employee that has the least amount of their checklist completed.
- **Max Progress:** the % complete value for the employee that has the most of their checklist completed.
- **Average progress:** the avg % complete for the group of employees.
- **Min time (days):** the min number of days taken to complete a checklist.
- **Max time (days):** the max number of days taken to complete a checklist.
- **Average Time (days):** the avg number of days taken to complete a checklist.

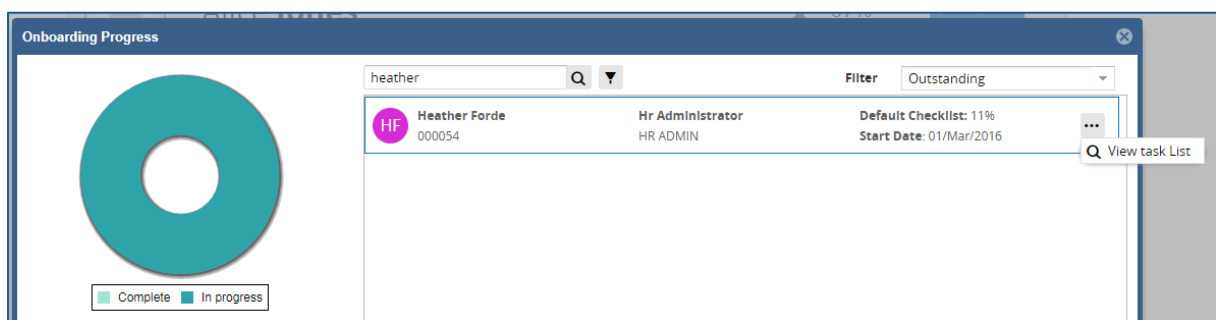

Statistic	Result
Min progress (%)	0
Max progress (%)	100
Average progress (%)	12.4
Min time (days)	1
Max time (days)	38.9
Average Time (days)	10.2

4.1.2. Employees

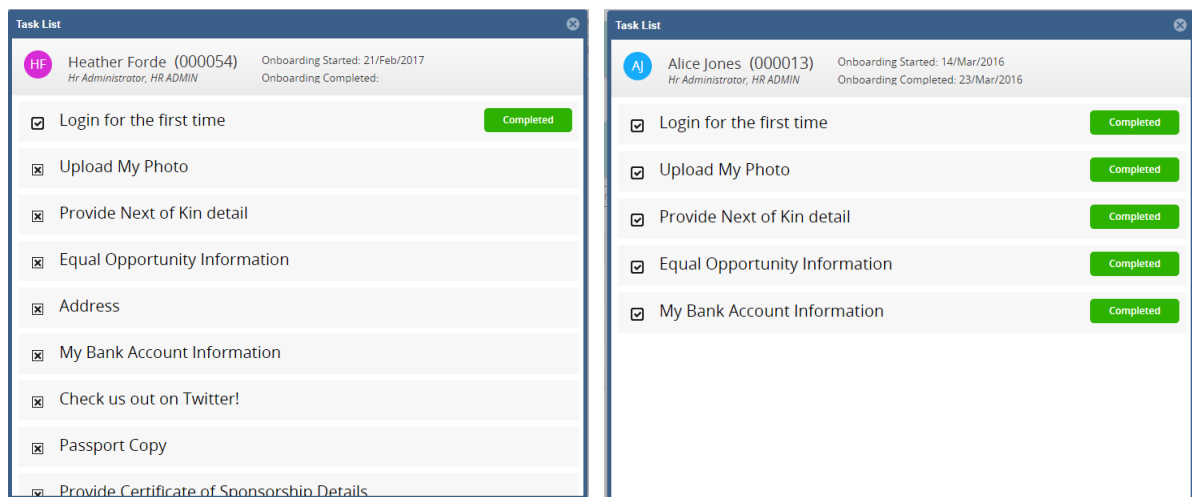

- The following details will be displayed per employee:

 Alan Saunders 000088	Support Analyst IT SECURITY	Default Checklist: 0% Start Date: 01/Feb/2016
--	---------------------------------------	--

- Name
 - Personnel Number
 - Job Title (substantive Post Appointment only)
 - Department (substantive Post Appointment only)
 - Start Date i.e. the date the employee joined the company
 - Checklist name e.g. 'Default Checklist'
 - % Completion based on the number of completed tasks vs the full number of available tasks.
- Use the search option at the top of the screen to search for an employee using their name only.
 - To view the actual checklist for the employee:
 - Click the  button for the employee and select **View Task List**

- The 'Task List' window will pop up.
 - All tasks defined for the checklist will be displayed.
 - If a task is completed, the 'Completed' label will be displayed.
 - If a task is started but not completed, the 'Started' label will be displayed.
 - If a task hasn't been started, no label will display.

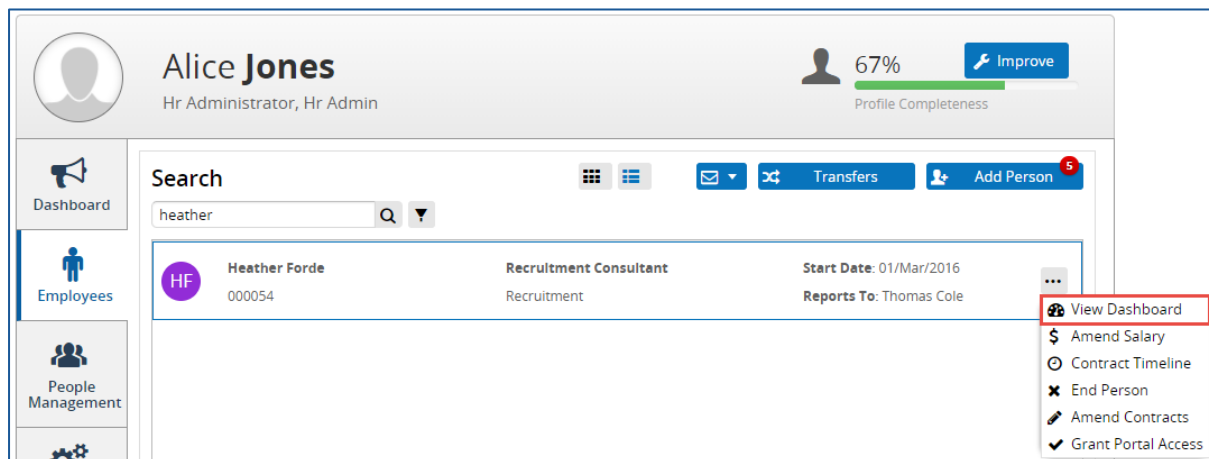

- 'Onboarding Started' will display the date that the user started the first task on their checklist.
- 'Onboarding Completed' will display the date that the user fully completed their checklist.

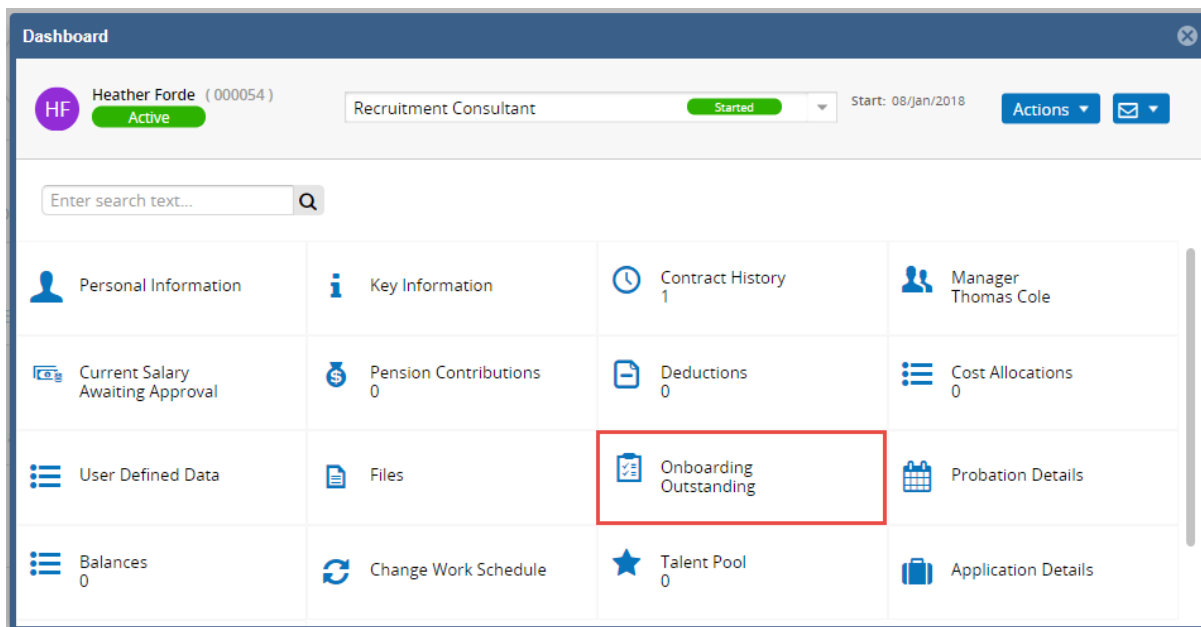

4.2. Viewing Onboarding on the Employee HR Dashboard

It is also possible to view the onboarding status for an employee, via the 'HR Employee Dashboard'.

- Search for the employee and select **View Dashboard**

- On the 'Dashboard' window, tab to the second page.
- The 'Onboarding' item is displayed on screen.
- The status will be displayed as
 - 'Outstanding' i.e. not started or partially completed
 - 'Completed'

- Click on the **Onboarding** option to open the task list for the employee
