Version	Date	Author	Details
1.0	2 nd December 2019	Peter Travers	Published to CoreHR University
2.0	12 th October 2020	People XD University	Published to People XD University. Added sections on: • Amending a Contract sequence • Deleting a Contract • Switching a Post • Amending a Historical Sequence

1. Introduction

The purpose of this guide is to provide instructions on how to amend an employee's existing contract on People Management.

This guide does not provide instruction on:

- how to replace a contract.
- how to award an additional contract.
- how to create a salary amendment independent of a contract amendment.

Please refer to the relevant user guides for the above tasks if required.

2. Contract Amendments

2.1. When to Amend a Contract

Contract amendments refer to any date driven amendments that HR are required to make to an employee's existing contract.

These amendments may be pay impacting e.g. a change in hours. These may also be amendments that have no downstream impact on the employee's salary e.g. change of work group, category etc.

It is possible to record these changes on People Management for an employee's existing contract. A timeline or history of all amendments will be tracked for that contract and are available to the hr administrator to review on screen.

2.2. Amendments with No Salary Impact

This refers to the amendment of an existing contract that does not require a corresponding update to the employee's associated salary record.

To amend an employee's existing contract:

1. Quick jump to the *Command Centre* widget in *People Management*.
2. Click **View** at *Employees* and Search for the employee.
3. Click **View** in the employee's relevant row.
4. Be sure that the correct contract is selected.
5. In the *Contracts* tab, click **Update** in the *Amendments* section.

The screenshot displays the 'Brenda Jones (000069)' profile page. The 'Contracts' tab is active, showing a table of amendments. A dropdown menu is open, highlighting the 'Shop Assistant' contract. The 'Amendments' table has columns for Start Date, End Date, Target End Date, Post No, Post Sequence, Reason, Departm..., Hours, FTE, and actions (VIEW, UPDATE). The 'UPDATE' button is highlighted with a red box and a red arrow.

Start Date	End Date	Target End Date	Post No	Post Sequence	Reason	Departm...	Hours	FTE	
17-Jul-2016			502228	3	Hire	Menswe...	20	.533333	VIEW UPDATE

6. The 2-step Edit Contract wizard will appear on screen.
7. On step 1 *Org Structure*, it is possible to edit the following items:
 - Cost Centre
 - Location
 - Workgroup
 - Other Hierarchy fields that are not locked in the Org Structure definition

8. On step 2 *Contract*, it is possible to update the following items
 - Effective Date
 - This is mandatory for all contract amendments. This will display on the employee's *Contract Timeline/History* to identify when the amendment was made.
 - This must be later or the same day than the current contract effective date. It cannot be earlier than the contract start date/last contract amendment.
 - Reason
 - This is mandatory and should be used to track the reason for the contract amendment.
 - Target End Date
 - Planned End Date

9. In this instance, the following fields should not be updated as these may result in a salary change:

- Contracted Hours
- Contracted Weeks
- FTE
- Standard Hours
- Standard Weeks

10. Click on the **Save** button to create the amendment.

2.3. Amendments with Salary Impact

This refers to the amendment of an existing contract that will require a corresponding update to the employee's associated salary record e.g. if an employee's hours are reduced, their salary should be pro-rated in line with this.

To amend an employee's existing contract:

1. Quick jump to the *Command Centre* widget in *People Management*.
2. Click **View** at *Employees* and Search for the employee.
3. Click **View** in the employee's relevant row.
4. Be sure that the correct contract is selected.
5. In the *Contracts* tab, click **Update** in the *Amendments* section.

The screenshot shows the 'Brenda Jones (000069)' profile page. The 'Contracts' tab is selected. In the 'Amendments' section, a table lists contract details. A dropdown menu is open for the 'Shop Assistant' role, showing 'Shop Assistant, Menswear' with appointment ID 502228-3 and contract hours of 20. The 'UPDATE' button in the 'Amendments' table is highlighted with a red box and a red arrow.

Start Date	End Date	Target End Date	Post No	Post Sequence	Reason	Departm...	Hours	FTE

6. The 2-step *Edit Contract* wizard will appear on screen.
7. On step 1 *Org Structure*, it is possible to edit the following items:
 - Cost Centre
 - Location
 - Workgroup
 - Hierarchy fields that are not locked in the Org Structure definition
8. On step 2 *Contract*, it is possible to update the following items
 - Effective Date
 - This is mandatory for all contract amendments. This will display on the employee's *Contract Timeline/History* to identify when the amendment was made.

- This must be $\geq$ the current contract effective date. It cannot be earlier than the contract start date / last contract amendment
- Reason
 - This is mandatory and should be used to track the reason for the contract amendment.
 - The reason code selected here will be very important as this will drive the automated salary amendment process. The actual reason codes listed may differ per implementation so please refer to the **Reason Code - Configuration Guide** for details on how to check if this is configured for a specific organisation.
- FTE
 - Changes to the FTE may have a direct impact on the employee's pay multiplier.
- The following fields may update the automatically calculated FTE:
 - Contracted Hours
 - Standard Hours
 - Contracted Weeks
 - Standard Weeks
- All other contract fields on screen may be updated as part of this amendment, if required.

9. Click on the **Save** button to create the amendment.
 10. The *Amend Salary* window will appear (pending the appropriate Reason Code configuration). This will be pre-populated based on the contract amendment details. Specifically, these fields will be amended automatically for the user:
 - Make Effective From
 - New Multiplier
 - Reason Code
 11. All other fields will be pre-populated with the current salary details.
1. Click **Save** to create the salary amendment.

2.4. Change of Hours

The Change of Hours feature is a quick way for the hr administrator to make a contract amendment that is salary affecting i.e. they can change the employee's contracted hours or weeks, which will update their FTE and this has a downstream impact on the pay multiplier.

This is effectively the same process as [2.3 Amendments with Salary Impact](#), However, with this option, the user is presented with a new screen that is limited to only include contract elements that must be updated when recording the change of hours for an employee.

To access this *Change of Hours* option:

1. Quick jump to the *Command Centre* widget in *People Management*.
2. Click **View** at *Employees* and Search for the employee.
3. Click **View** in the employee's relevant row.
4. Be sure that the correct contract is selected.
5. In the *Contracts* tab, click button **Change Contract Hours**.

The screenshot displays the CoreHR People Management interface for an employee named Bill Kerry (000100). The interface includes a header with the employee's name and an 'ACTIONS' button. Below the header, there is a section for the employee's profile, including a photo, name, and status (Active). A dropdown menu is open, showing the selected contract 'Payroll Administrator' with details like Appointment ID 502204-23 and Start Date 12-Apr-2017. The 'Contracts' tab is selected, showing a table of appointments. At the bottom, there are two buttons: 'REPLACE CONTRACT' and 'CHANGE CONTRACT HOURS', with a red arrow pointing to the latter.

CHANGE CONTRACT HOURS

6. The *Change Working Hours* screen will appear.

The screenshot shows the 'Change Working Hours' form within the People Management system. The breadcrumb trail at the top reads: 'People Management > Employee Search > Bill Kerry (000100) > Change Working Hours'. The form contains several input fields: 'Effective Date*' with a calendar icon, 'Contracted Hours*' with a spinner icon, 'FTE*' with a text input containing '1', 'Target End Date' with a calendar icon, 'Standard Hours' with a spinner icon, 'Reason*' with a dropdown arrow, 'Employee Status*' with a dropdown menu showing 'P - Permanent', and 'Sub Status' with a dropdown arrow. At the bottom center is the 'corehr' logo with the tagline 'Smarter HR Technology'. At the bottom right is a green 'SAVE' button.

7. Update all fields as required:

- All fields marked with a ***-symbol** are mandatory.
- Fields will be pre-populated with the current contract details e.g. current FTE, Contracted Hours etc.
- *Effective Date* entered here will inform the corresponding effective date for the salary change.
- Updating the *Contracted Hours* and/or *Standard Hours* will directly update the FTE

8. Click **Save** to create the amendment

9. The *Amend Salary* window will appear (pending the appropriate Reason Code configuration). This will be pre-populated based on the contract amendment details. Specifically, these fields will be amended automatically for the user:

- Make Effective From (set to the contract Effective Date)
- New Multiplier (set to the contract FTE)
- Reason (set to the contract amendment FTE)

10. All other fields will be pre-populated with the current salary details.

Actual Pay 38000	Actual Pay* This field is required
Current Reason Promotion	New Reason* Change Of Hours
Comments	Comments*

 

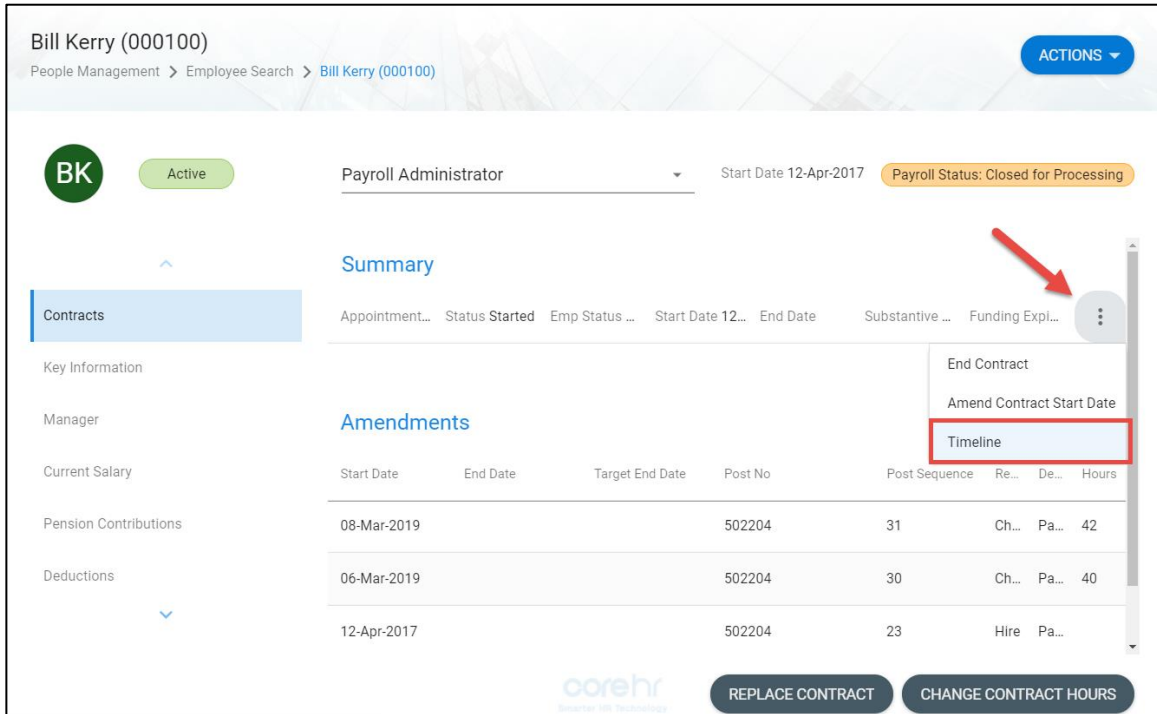

11. Click **Apply Changes** to create the salary amendment.

2.5. Contract Timeline/History

CoreHR will keep a record of all amendments made to the employee's contracts. These amendments may be searched for and view by the hr administrator via 2 options:

1. The **Contract Timeline** option for the employee on the Employee records:

The screenshot shows the employee record for Bill Kerry (000100). The interface includes a sidebar with 'Contracts' selected, a 'Summary' section, and an 'Amendments' table. A dropdown menu is open, showing options: 'End Contract', 'Amend Contract Start Date', and 'Timeline' (highlighted with a red box and a red arrow). The 'Amendments' table lists contract changes with columns for Start Date, End Date, Target End Date, Post No, Post Sequence, Re..., De..., and Hours.

Start Date	End Date	Target End Date	Post No	Post Sequence	Re...	De...	Hours
08-Mar-2019			502204	31	Ch...	Pa...	42
06-Mar-2019			502204	30	Ch...	Pa...	40
12-Apr-2017			502204	23	Hire	Pa...	

Note If the employee has multiple contracts, then all contracts will be visible on the Contract History screen, if accessed from here.

This screen will provide a summary view of all amendments that have been made for the employee's contract.

Choosing the **Timeline** dropdown will provide a pop-up screen with a timeline view of all contract amendments made for that contract.

Reason Hire

The top section of the screen will display the key dates of the employee's overall employment with the organisation, for continuous service purposes.

Note This is covered in greater detail in the 'Employee Continuous Service' user guide.

- The current / most recent amendment will be listed at the top.
- Earlier and future instances of the contract will be listed on screen and these will have and *Effective Since* and *Appointment Status* populated.

Other high-level contract details will display including:

- **Post Number:** This is the number of the Post Profile from which the contract was created i.e. 502208. This is used with the initial sequence to create the Contract ID i.e. 502208-7 in the example.
- **Sequence:** Every line of contract history will have a unique sequence for that Post No. When the contract is initially created it gets a *sequence* e.g. 7 in the screenshotted example. When the contract is amended, a new sequence is recorded e.g. 8 and 9 in the screenshotted example.
- **Reason:** This is the Reason supplied by the hr administrator when creating the contract amendment.
- **Department** This is the Department on the contract Org Structure for each line of contract history.

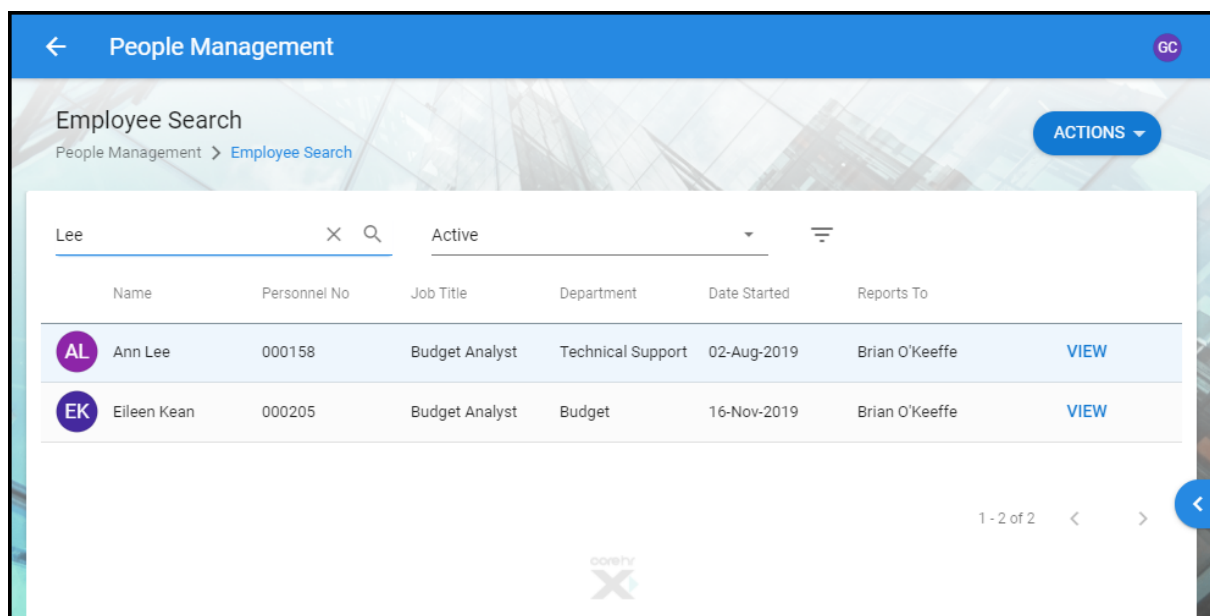

Note It is not possible to make amendments to historical instances of the contract record on this screen.

For full details on how Contract IDs / Appointment IDs are managed as part of contract creation and amendment activities, please see the *Post Management* tutorial in the **CorePersonnel Key Concepts** course.

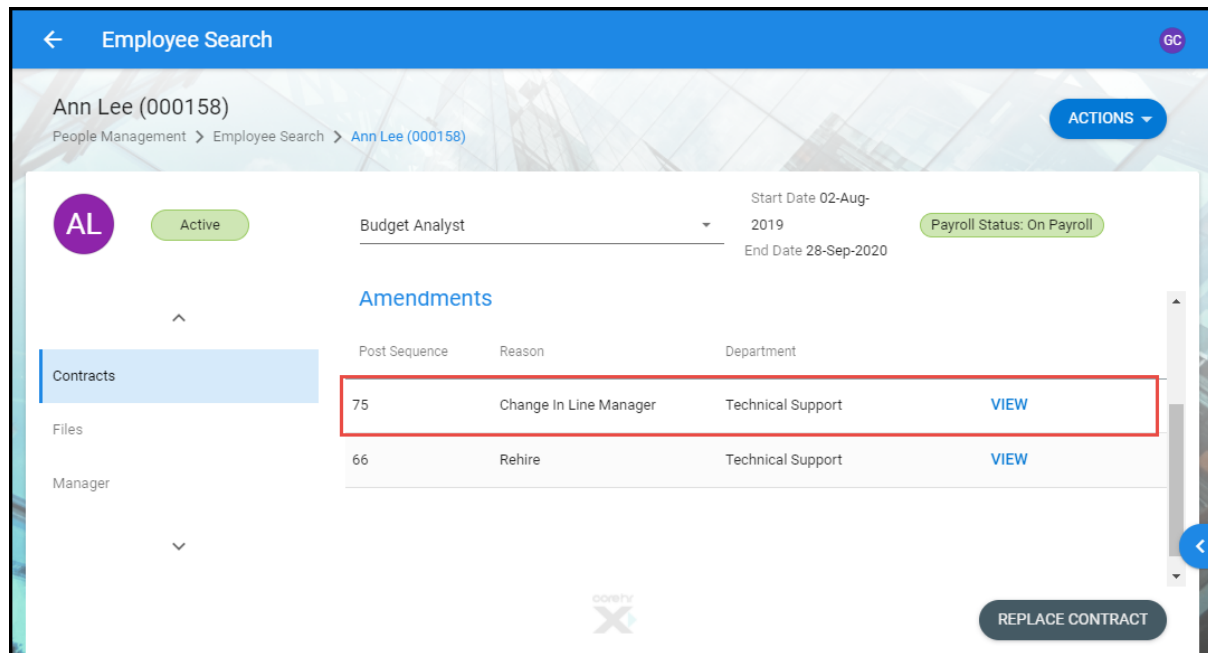

2.6. Historical Sequences

An admin user now has the ability to update historical sequences of an appointment. To carry this out:

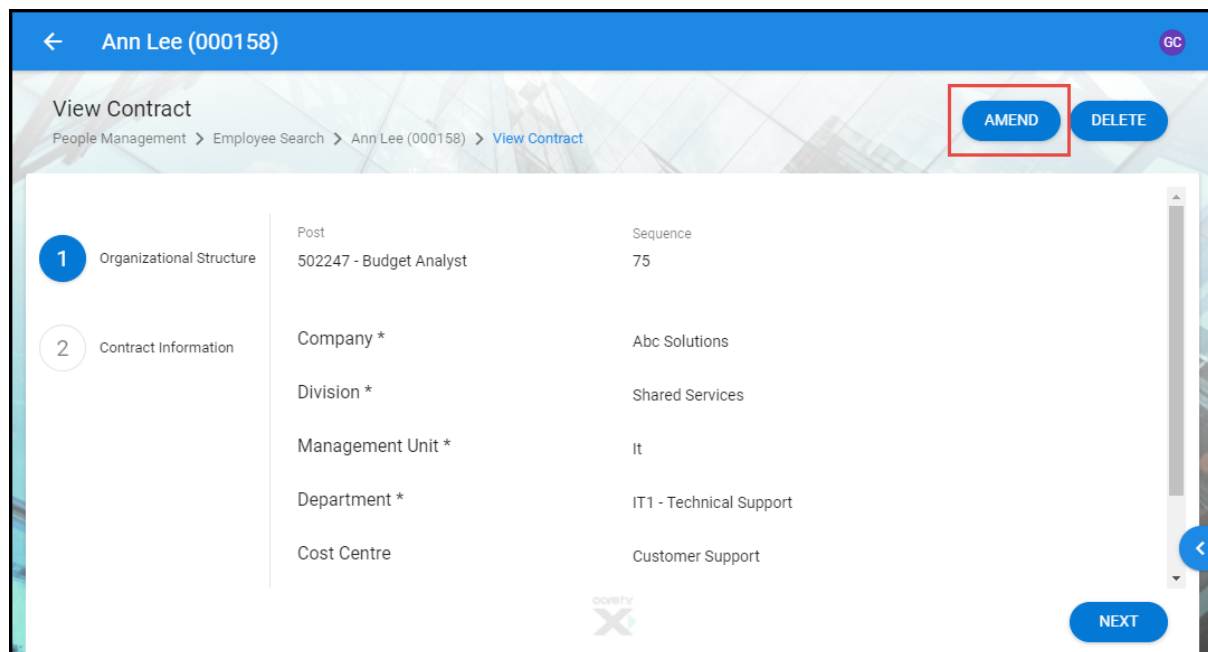

1. Go to the employee's record from the Employee Search screen in People Management

2. Select the Contracts section of the employee record.
3. Select the Amendment that is required to be amended and click on the view button.

4. Within the View Contract screen, click on the **Amend** button.

5. The Organisational Structure and Contract Information sections appear on screen.
 - a. Contract Effective Date cannot be amended
 - b. Organisational Hierarchy attributes assigned to the original post profile cannot be amended.
 - c. All other attributes are editable.

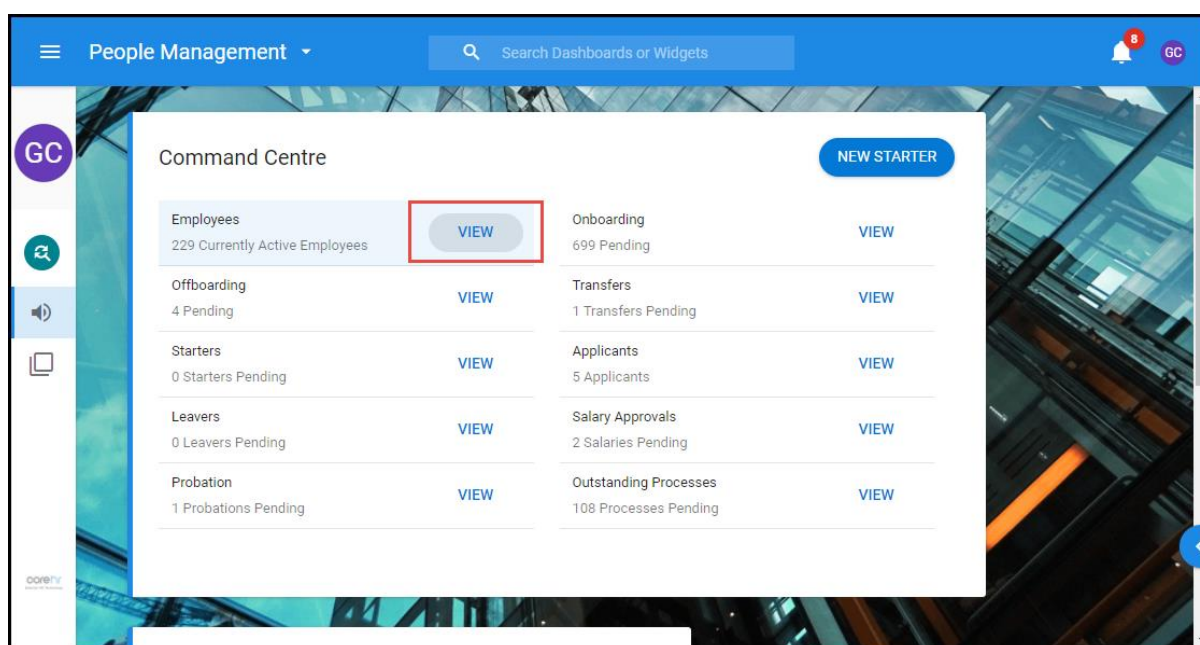

3. Delete Contract

The following menu option grants access to this feature.

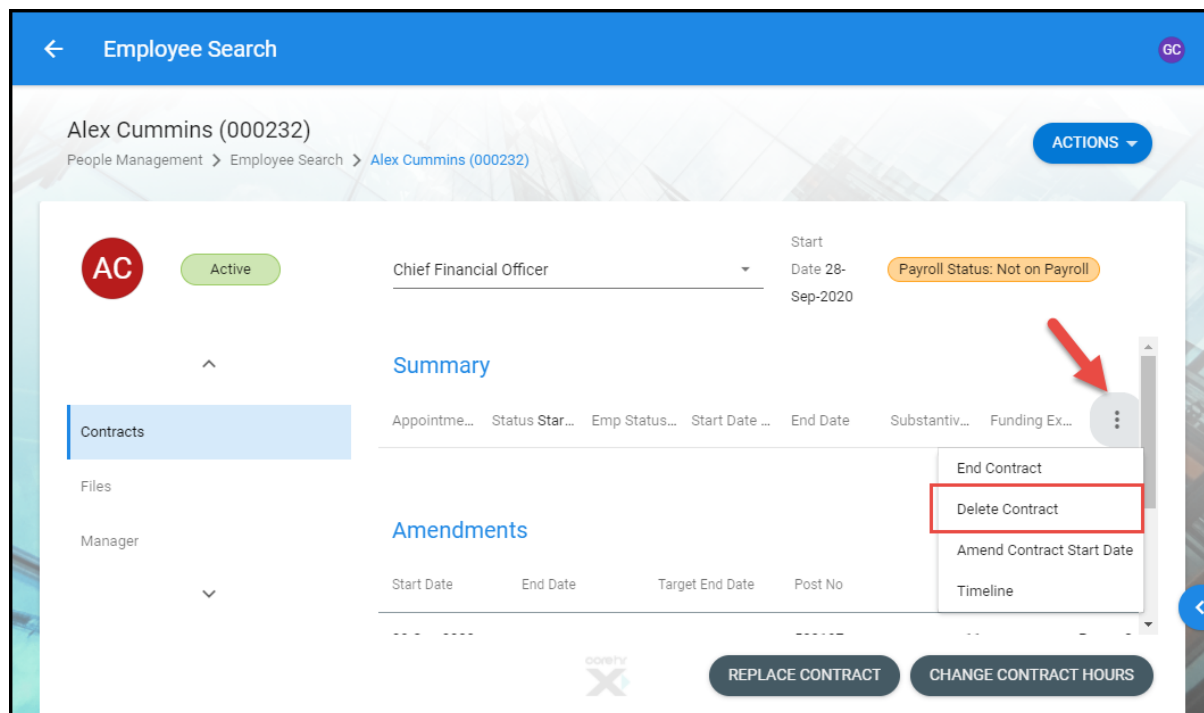

System	Menu Option
Web Services	Delete Appointments
Web Services	Get Appointments Linked Item Talent
Web Services	Get Appointments Linked Items
Web Services	Update Appointments

To delete a contract:

1. Go to the *Command Centre* tab on the *People Management* dashboard.
2. Click the **View** button on the *Employee* section.

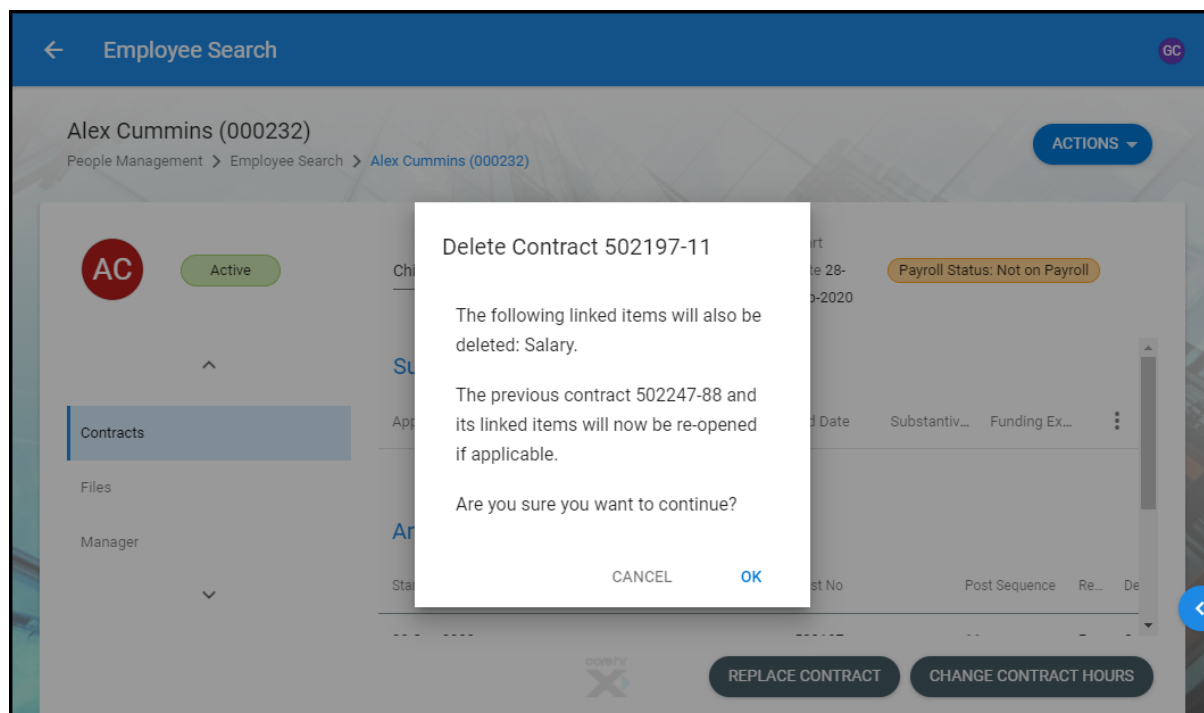

3. Search for the employee in question that is due to be deleted.
4. On the HR Employee Dashboard, go to the *Contracts* section

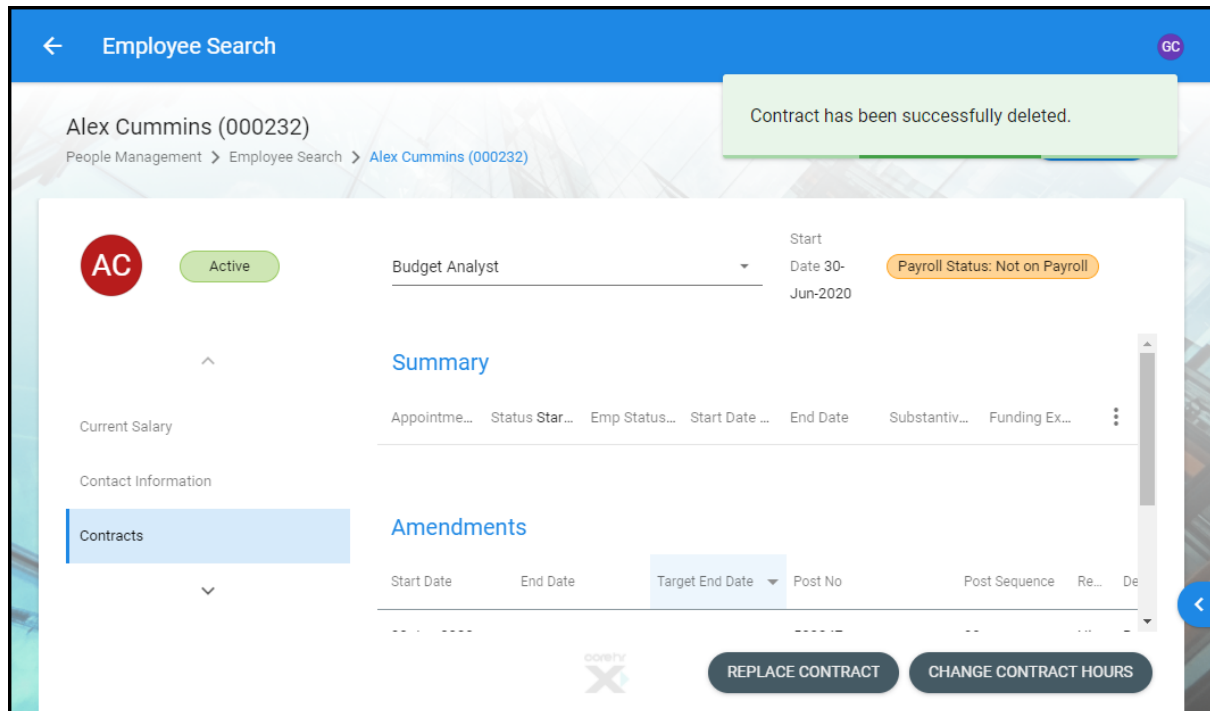

5. Click on the  button on the Summary section.
6. The **Delete Contract** button is available to use.

3.1. Replacement Contracts

For replacement contracts when the **Delete Contract** function is triggered, the following warning message appears on screen:

1. Click the OK button
2. A confirmation message appears confirming the deletion has been successful.

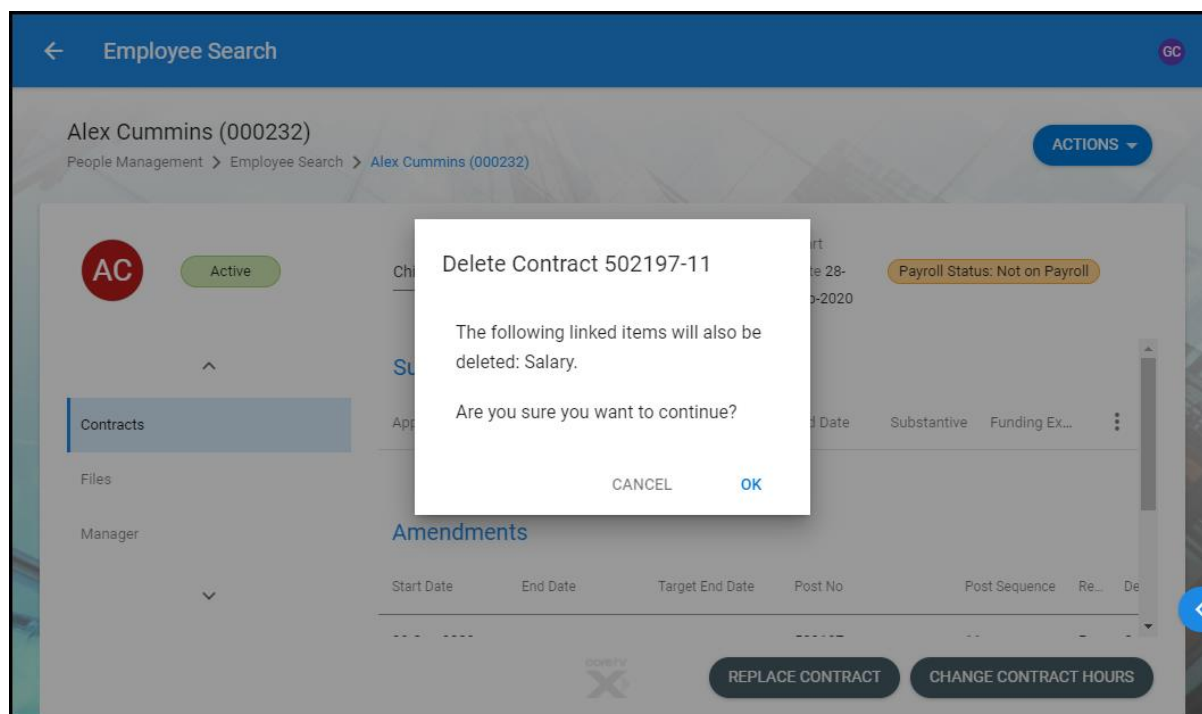

Note:

- All linked data to the replacement (current) contract will be deleted. This includes:
 - Salary
 - Allowances
 - Cost Allocations
 - Terms & Conditions
 - Pensions
 - User Defined Data
 - Documents
 - Events & Workflows
 - Task
- For replacement contracts, all previous post data will be reactivated.
- For linked appraisal and objective cycles, these will move back to employee's previous contract.

3.2. Additional Contracts

For additional contracts when the **Delete Contract** function is triggered, the following warning message appears on screen:

○

Note:

- All linked data to the additional contract will be deleted. This includes:
 - Salary
 - Allowances
 - Cost Allocations
 - Terms & Conditions
 - Pensions
 - User Defined Data
 - Documents
 - Events & Workflows
 - Task

Note

- If the additional post has already been paid, then user will get a message stating that contract can't be deleted as it has already been processed by payroll.
- If the appointment has an appointment status of ended, it cannot be deleted.

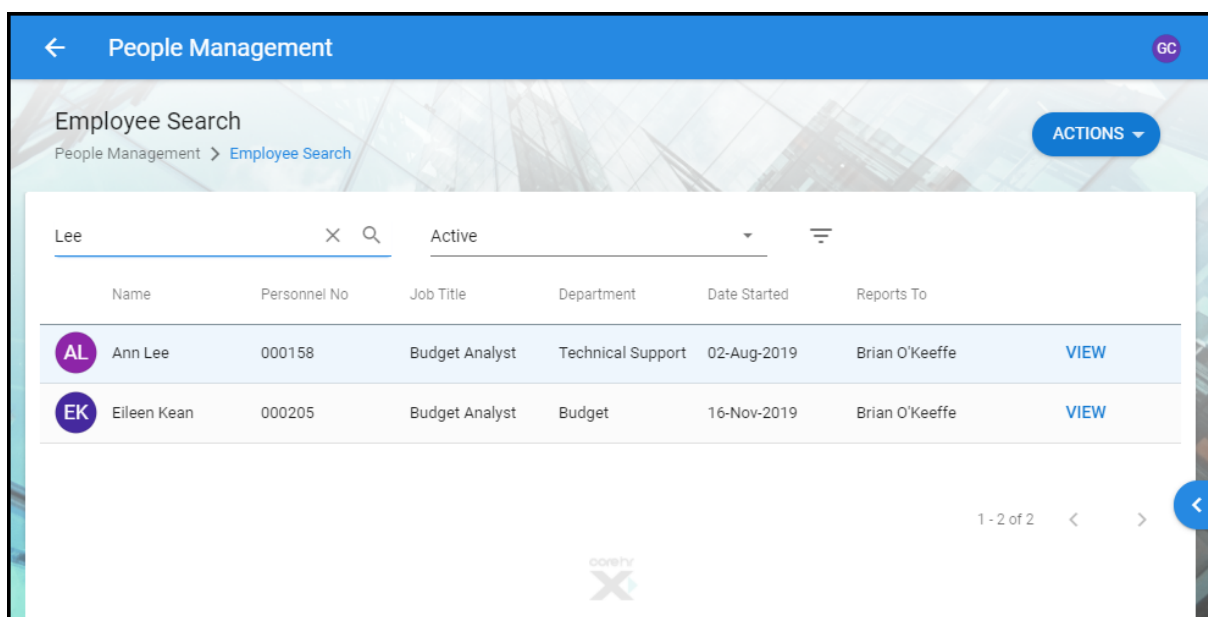

4. Delete Amendment

The following menu option can be enabled to grant access to delete the latest sequence of an appointment / contract.

System	Menu Option	Description
People Management	Delete Contract Amendment	This gives access to a user to be able to delete the latest sequence of an appointment / contract.

To delete an amendment:

1. Go to the employee's record from the Employee Search screen in People Management

2. Select the Contracts section of the employee record.
3. Select the Amendment that is required to be deleted and click on the view button.

5. The following warning message appears on screen:
"Please confirm you wish to delete. Do you wish to confirm the deletion of the chosen Contract Amendment?"
6. Click Yes to continue.

 **Note:** If the appointment only has 1 sequence remaining after a delete, the deletion is not possible.

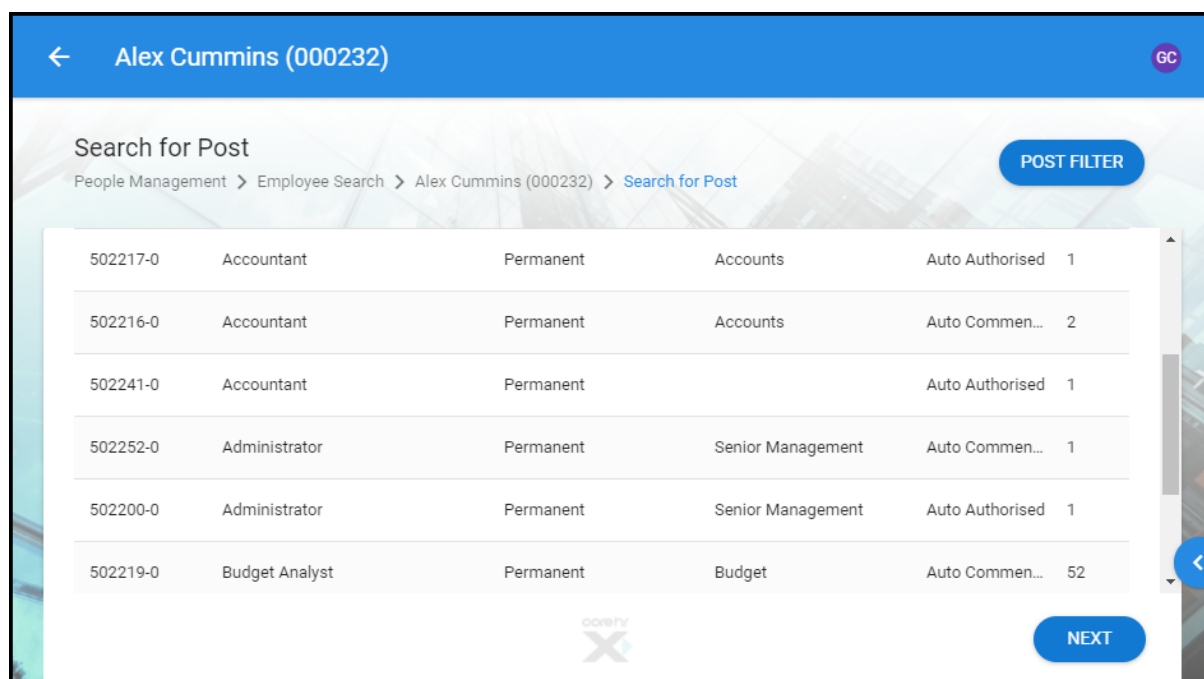

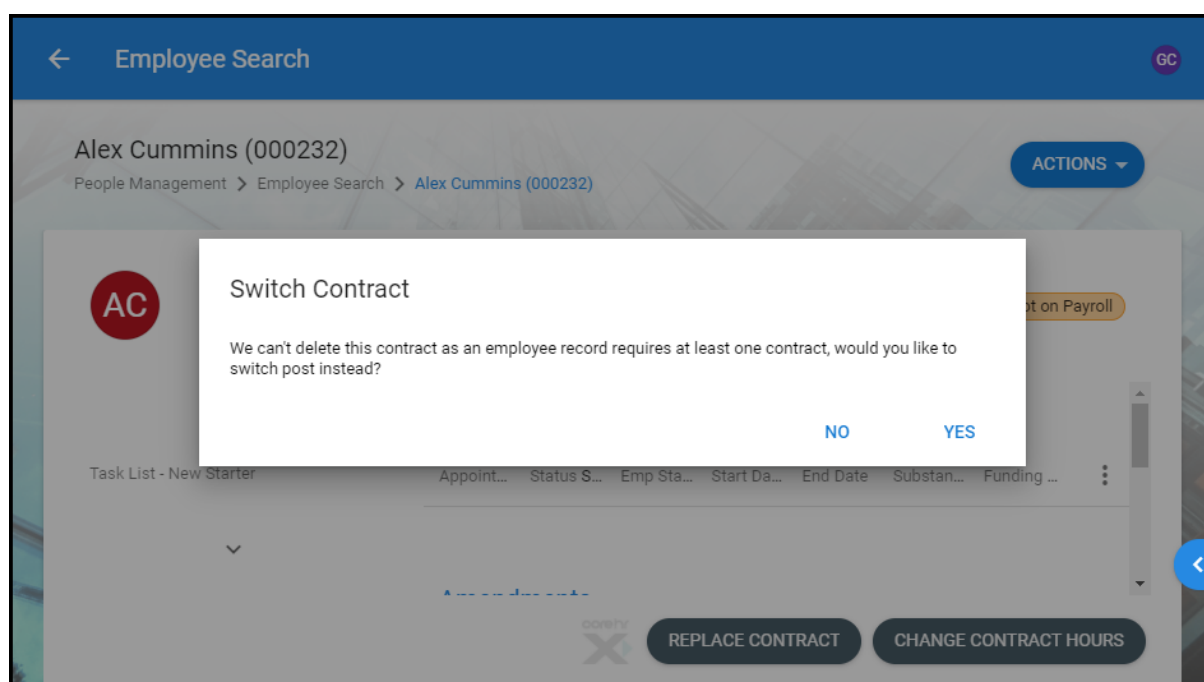

5. Switch Post

Carrying out this process allows the employee to keep their current appointment ID however the post number and post sequence changes to the post that have been switched to.

System	Menu Option	Description
People Management	Undo Appointment	This gives access to a user to be able to delete the latest sequence of an appointment / contract.
Web Services	Update Appointments	This is the web service option for updating appointments.

1. On a substantive contract, the switch post option becomes available if you are trying to delete the record as per Delete Appointment section. The following message appears on screen:

"We can't delete this contract as an employee record requires at least one contract, would you like to switch post instead?"

2. Search for an existing post to switch the employee to.
3. Click the **Next** button.
4. Enter in the Organisational Structure and populate the Contract Information sections

On a switch, the existing Post Number and Post Sequence is updated to align with the the appointment record that is being switched.

For example:

- Employee Noelle Grant is currently commenced in a System Administrator Post. There is an existing record on her employee profile that shows:
 - Appointment ID = A-1
 - Post Number = A
 - Post Sequence = 1
- The switch post process begins, and the following Budget Manager post is selected:
 - Post Number = B
 - Post Sequence = 3
- The existing System Administrator post can now be replaced with the Budget Manager post.
- The existing Appointment ID stays the same (i.e. A-1), however the Post Number becomes B with a Post Sequence of 3.
 - Appointment ID = A-1
 - Post Number = B
 - Post Sequence = 3

**Note**

- This option can only be used on contracts that are not ended.
- The posts available for selection need to be authorised in advance of selection.

5.1. Task List

When the Switch Post feature has been utilised, the task list on the employee profile is regenerated for the new post assigned to the employee. The follow occurs:

- Outstanding task list items that are still applicable appear on the task list and flagged as to be completed.
- For task list items already marked as complete and are no longer relevant based on the setup of the new post are highlighted to be reviewed.

For example.

- New Starter Task list has items restricted by Department X and Department Y.
- Existing Post A is based in Department X.
- Use the Switch Post functionality to switch to Post B as per above example.
 - Switched Post B is based in Department Y.
- The following occurs:

Restricted Department	Task List Item Status	Shown / Hidden
Y	Outstanding	Shown
Y	Complete	Shown
X	Outstanding	Hidden
X	Complete	Shown
N/A	Outstanding	Shown
N/A	Complete	Shown

The image below highlights a task list item that was completed as part of a previous post and now needs to be reviewed with the status of *Review*.
