Purpose of this Document

This document is intended to show all IPs associated with Access Group PeopleXD products, this includes Portal, Back-Office and Webservices. These IPs cater for access to the applications and themselves and functionality within the applications.

This document should be used for troubleshooting in the event of connectivity issues to the application(s) or issues within the applications themselves relating to tools/operations reliant on a connection to a Third Party.

Portal/API

Production

Hostname	IP Address
My.corehr.com	193.120.176.185
Api.my.corehr.com	185.146.180.6
Api.corehr.com	185.146.180.16

UAT

Hostname	IP Address
Uatmy.corehr.com	212.2.176.96
Uatapi.corehr.com	185.146.180.161
api.uatmy.corehr.com	185.146.180.164
Api.uatmy	172.16.209.146 172.16.209.147

DR

Hostname	IP Address
Drmy.corehr.com	212.2.176.98
Drapi.corehr.com	185.146.180.162

Back-Office/Discoverer

Unlike Portal, Back-Office is not external facing. Therefore, you need to ensure that you have provide the relevant IP(s) to the Access Group for whitelisting. In support of this, you need to ensure that there are no Firewall Rules blocking the following IP addresses.

Production

Hostname	IP Address
wshradm.corehr.com (Back-Office Production)	185.146.180.10
hradm.corehr.com (Discoverer Production)	193.120.176.187

UAT

Hostname	IP Address
uatwshradm.corehr.com (Back-Office)	185.146.180.140
uathradm.corehr.com (Discoverer)	212.2.176.112

DR

Hostname	IP Address
drwshradm.corehr.com (Back-Office)	185.146.180.141
drhradm.corehr.com (Discoverer)	212.2.176.113

Third Party

The following are Third Party IP addresses external to the Access Group which applications are reliant on for functionality. An example of these would be Widgets, i.e a Widget for Google Maps would need to connect to the Google Maps API.

Website	Hostname	IP(s) IPV4 / IPV6	Aliases
https://maps.googleapis.com	maps.googleapis.com	2a00:1450:400e:802::200a 142.251.39.106	fonts.gstatic.com

Third Party Use-Case

Hostname: <https://maps.googleapis.com>

Use-case: Allows access to Google Maps APIs to enable google maps functionality within the application.

Hostname: <https://cdn.wootric.com/wootric-sdk.js>

<https://eligibility.wootric.com>

<https://production.wootric.com>

Use-case: Wootric is a cloud-based customer experience and feedback management software that helps measure and enhance client satisfaction. Primarily catering small to large businesses, the platform uses artificial intelligence to provide insights into customers' happiness with single question micro-surveys.

Hostname: <https://fonts.googleapis.com>

<https://fonts.gstatic.com>

Use-case: Allows access to Google Fonts APIs.

Hostname: https://*.gstatic.com

Use-case: Enables access to all underlying gstatic domains and IPs. Gstatic is a domain used by google to increase bandwidth, this is to enable faster response times when using google APIs within your application.

Hostname: https://*.googleapis.com

Use-case: Enables access to all underlying googleapi domains and IPs.

Hostname: <https://app.launchdarkly.com/sdk/>
<https://events.launchdarkly.com/events/>
<https://clientstream.launchdarkly.com/eval/>

Use-case: The above hostnames are used to enable access to LaunchDarkly APIs which in turn are used for feature flagging within the application.

Hostname: <https://x.vimeo.com>
https://*.vimeo.com

Use-case: Allows access to Vimeo APIs for embedding videos within the application.

Hostname: https://*.youtube.com

Use-case: Allows access to YouTube APIs for embedding videos within the application.
