1. Overview

1.1. Purpose of the Guide

The purpose of this document is to provide guidance on how to configure and setup the Talent module by creating reference data, job families, career paths and career development plans.

These can be used by and broken down into the following groups:

1. Employees
2. Managers
3. Talent / HR Administrators

This guide includes:

- What is configurable on the Talent Management Administration dashboard and how it is managed.
- A breakdown of default / standard security menu profiles that are available to be assigned to CorePortal users.
- Advice on best practice configuration.

Note:

- This guide does not include:
 - Steps on how to create appraisals, objectives, competencies, or 360 & Peer Reviews.
 - Guidance on dashboard configuration, for the purpose of amending the Talent administration tabs and widget layouts.

2. Initial Configuration

2.1. Talent Management Administration Dashboard

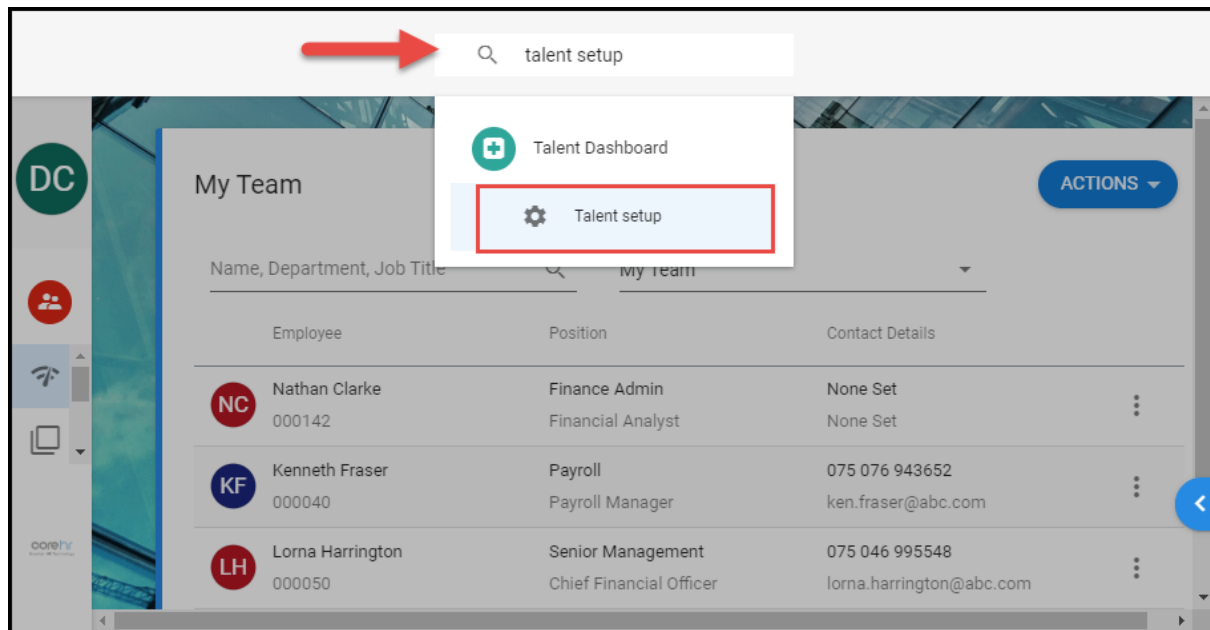

To use the Talent Management module users must have access to the relevant widgets within CorePortal on the Employee Dashboard, Manager Dashboard and Talent Management Admin Dashboard. The Talent Management Administrator dashboard is used to create appraisals, objectives, competencies, compensation and 360 cycles. Users can also manage that information created through business as usual processes or facilitating ad-hoc changes and general management of cycles throughout the year. This is created as a multi-tab dashboard with the various modules being allocated a specific tab. The recommended approach is to separate out each feature where necessary so managers and employees can see all options that are available to them within their own dashboards(s).

3. Talent Setup widget

3.1. Talent Setup

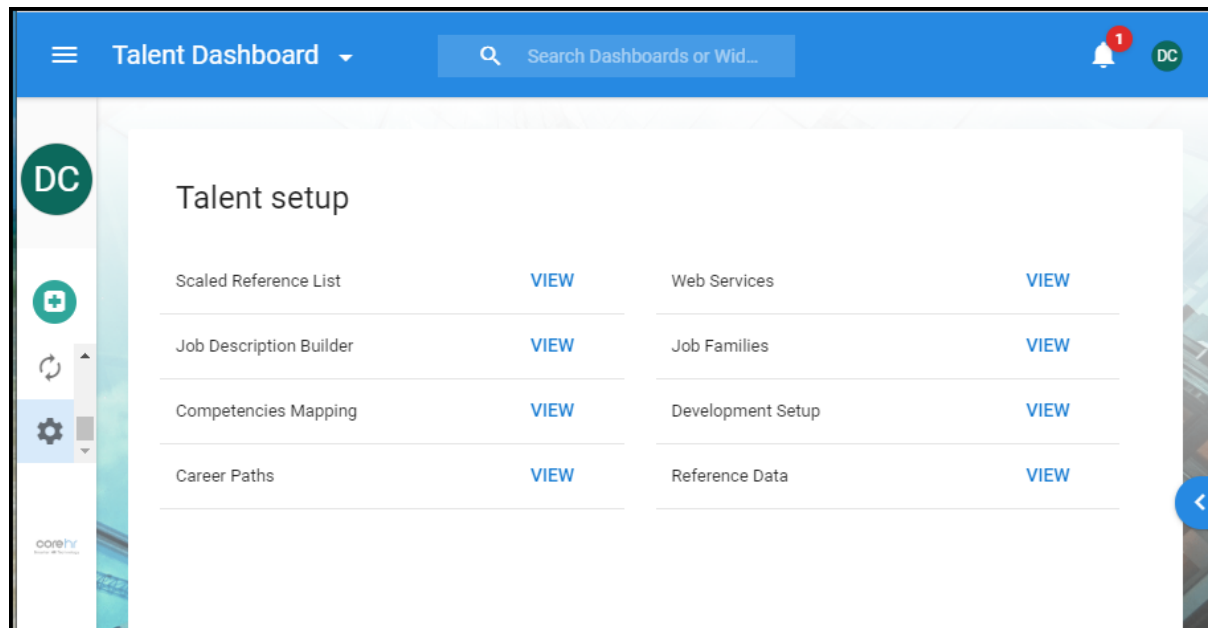

To open the Talent setup tab, follow the steps below:

1. Quick jump to *Talent setup*

2. The following items appear on screen:

- a. [Scaled Reference List](#)
- b. [Job Description Builder](#)
- c. [Competencies Mapping](#)
- d. [Career Paths](#)
- e. [Web Services](#)
- f. [Job Families](#)
- g. [Development Setup](#)
- h. [Reference Data](#)

4. Scaled Reference Lists

4.1. What are Scaled Reference Types

These are reference items that can be assigned colours and levels to be used across the Talent Management product for both an employee and manager. The Appraisals section uses reference lists for system wide ratings.

There are 2 types of Scaled Reference Items:

1. General References
2. Talent Factor References

4.1.1. General References

Balance Score Card

This allows you to measure and track performance by managing different statuses or items that effect an employee's talent management record. There are various ways to capture values or drivers by using a balanced score card technique

A Balance Score Card can be added to the following areas in Talent Management:

Area	Description
Objective Types	Create an Objective Balance Score Card group to assign to an Objective Type.

Descriptor

This type of reference item can be used in the following areas in Talent Management

Area	Description
Review Ratings	Create a Ratings Descriptor group to be used on an employee's review when rating them or signing the review stage off as a manager.

Status

This type of reference item can be used in the following areas in Talent Management:

Area	Description
Objective Workflows	Create an Objective Status group to correctly manage the workflow and statuses of an objective cycle.
Career Development Plans	Creating a Career Development Plan with specifically designed statuses for progress and completion.

4.1.2. Talent Factor References

The following reference data can be created to appear on the *Talent Factors* section on a Review form.

Performance Level

This information can be created to appear on the *Talent Factors* section on a Review form. It shows the level to which the employee is performing at currently.

Current Potential

This information can be used to track an employee's development and potential to develop further in their current role.

Readiness

This information is related to how ready the employee may be to move into a specific talent pool within the organisation.

Promotability

This information can be used to give an employee a score to measure how eligible for a promotion that they may be in terms of performance levels.

Flight Risk

This information refers to the level of risk of departing a department or the company that the employee may be.

The table below shows the items which are advised to be created as part of the standard Talent Management configuration:

Rating	Item	Colour
1	High Flight Risk	Red
2	Medium Flight Risk	Orange
3	No Flight Risk	Green

Note: Ensure that the lowest Rating value matches the least desirable description.

Flight Risk Impact of Loss

This information refers to the impact of the employee's departure has on the business or department.

The table below shows the items which are advised to be created as part of the standard Talent Management configuration:

Rating	Item	Colour
1	High	Red
2	Medium	Orange
3	Low	Green

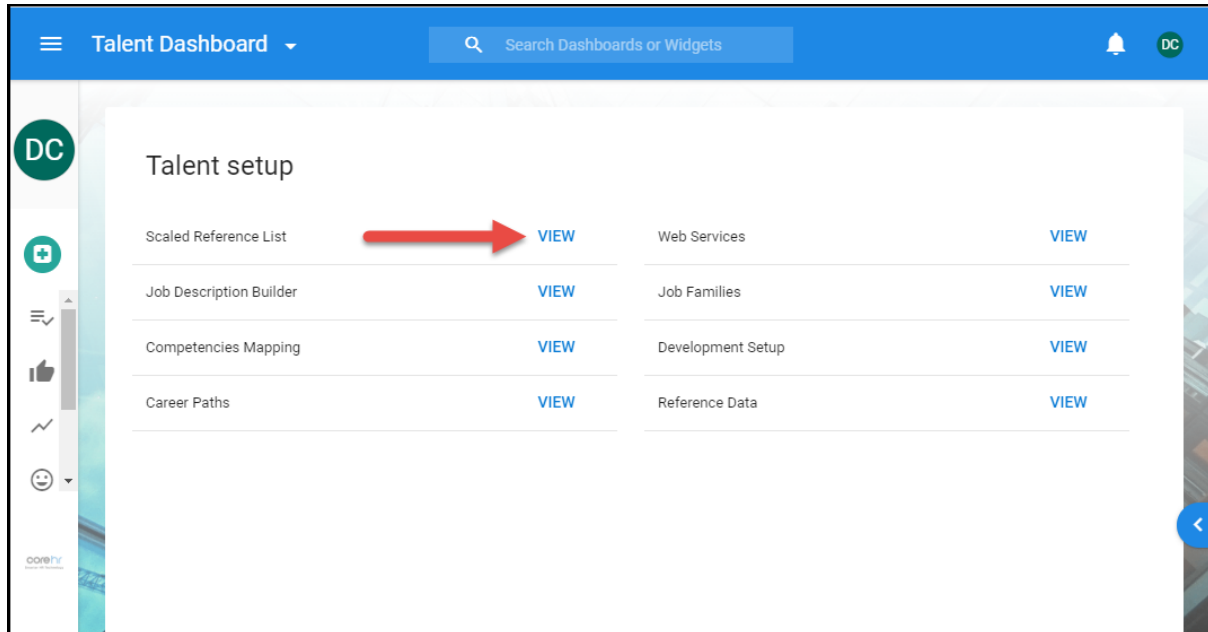

Relevance

This information is related to how relevant the employees training, development and skills are to the current role.

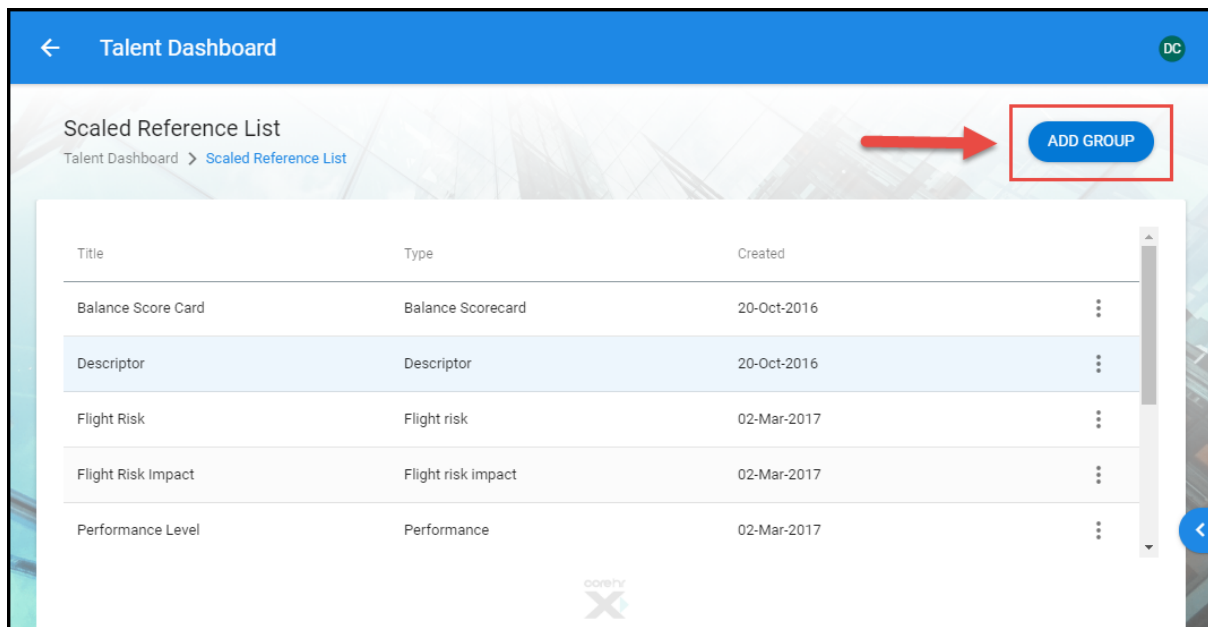

4.2. Creating New Scaled Reference Groups

To create a new scaled reference item, follow the below steps.

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Scaled Reference List* label.

2. Click on the **Add Group** button.

3. Enter a *Title* and select a *Rating Type* from the drop-down box. The following three choices are available:

- a. Status
- b. Descriptor
- c. Scaled Reference

6. Click **OK** to add the status to the reference group.
7. Click **Save** to create the status.
8. The message "Your changes were successfully saved" appears on screen.

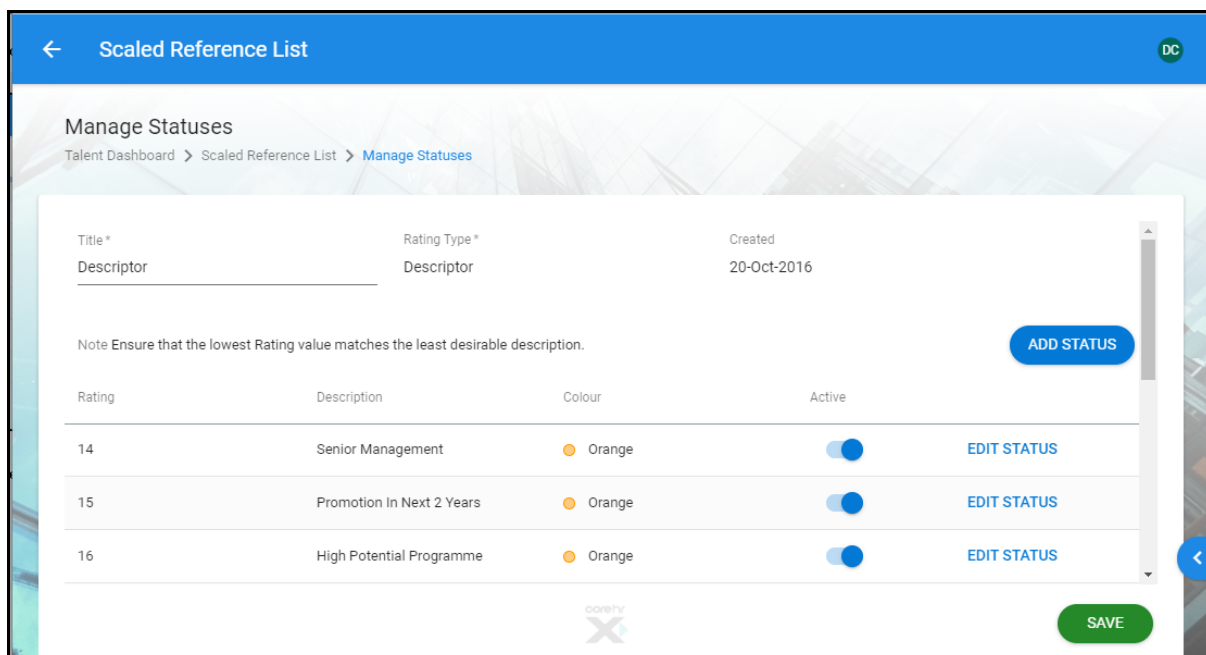

4.3. Editing Scaled Reference Groups

To edit a scaled reference group:

1. Click on the  button against the group and then click on the **Edit** button.

2. On this screen the following details appear:

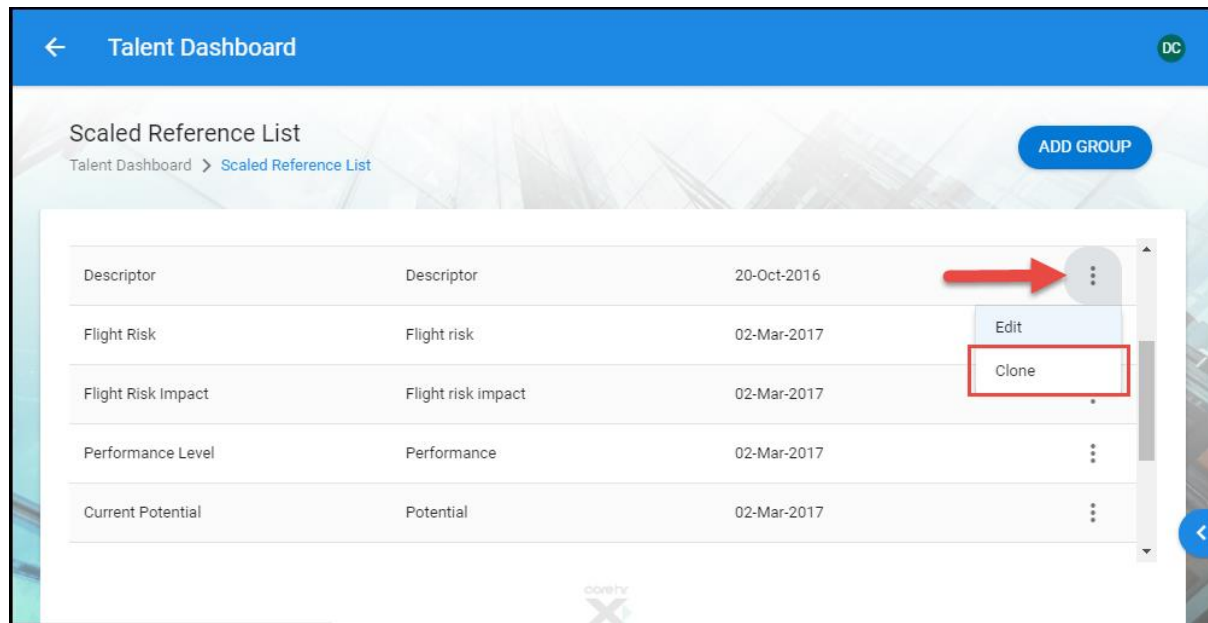

Item	Description
Title	This is the name of the status group, which can be edited.
Rating Type	This shows the type of rating assigned to the group.
Rating	This is the rating or number assigned to each status.
Description	This shows the description of the status.
Colour	This shows the colour assigned to the status.
Active	This allows you to update the status to be active or inactive.
Edit Status	This allows you to edit the following details on screen: • Rating • Description • Colour • Active or Inactive

3. Click on the **Edit Status** to update the details as per the table above.
4. It is also possible to continuously add a status to a group by clicking on the **Add Status** button.

4.4. Cloning Scaled Reference Groups

1. To clone a status group click on the  button against the group and then click on the **Clone** button.

2. Only the following groups can be cloned:
 - a. Status
 - b. Descriptor
 - c. Balance Score Card

5. Job Description Builder

5.1. Career Options / Career Paths

Career Paths on an employee's *Talent Profile* are created from an organisation's *Job Description Profile*. To ensure an employee can create and manage their own career path, an organisation needs to maintain every job title in the company. For more information on using career paths, please refer to the **Talent Management: Performance Reviews - User Guide** found on the PeopleXD University.

5.2. Building a Job Description Profile

Note: Once a *Job Title* has been selected, a record is created as a *Job Description Profile*, regardless of what is entered on the profile.

To create a job description profile, follow the steps below:

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Job Description Builder* label.

2. The following table and image outline the items that appear on screen.

Item	Description
Job Title	This drop-down list is populated by the People Management job title reference items.
Job Category	This drop-down list is populated by the People Management job category reference items.
Key Position	This can be enabled to highlight if the job is a key position or not. Used for reporting purposes.
View	This allows you to open the Job Description profile for each Job Title and edit it.

3. Click the **View** button, which allows you view and edit the Job Title details. The following table and image outlines each section that can be edited on this screen.

Section	Description
Details & Documents	- This allows you to confirm the details of the job category and whether it is a key position or not. - You can also upload a job description document or other documents that are related to this job title by clicking on the Upload Document button.
Linking Talent Pools	This allows you to select existing talent pool categories and link them to this job title.
Qualifications	This allows you to add qualification records to this job title for employees that they can reach.
Training Courses	This allows you to add existing training courses to a job title that can be completed by all employees with this job title.
Continuous Professional Development	This allows you to add a CPD type to a job title. This list is populated by People Management CPD type reference items
Professional Body Membership	This allows you to add a professional body to a job title. This list is populated by People Management professional body reference items.

Section	Description
Skills	This allows you to add job skills from the People Management reference items to a job title.
Languages	This allows you to add languages from the People Management reference items to a job title.

6. Career Paths

6.1. Creating a Career Path

This process allows you to create a career path for job titles in your organisation. There are two methods that a career path can be created for employees.

6.1.1. Automatic Career Paths

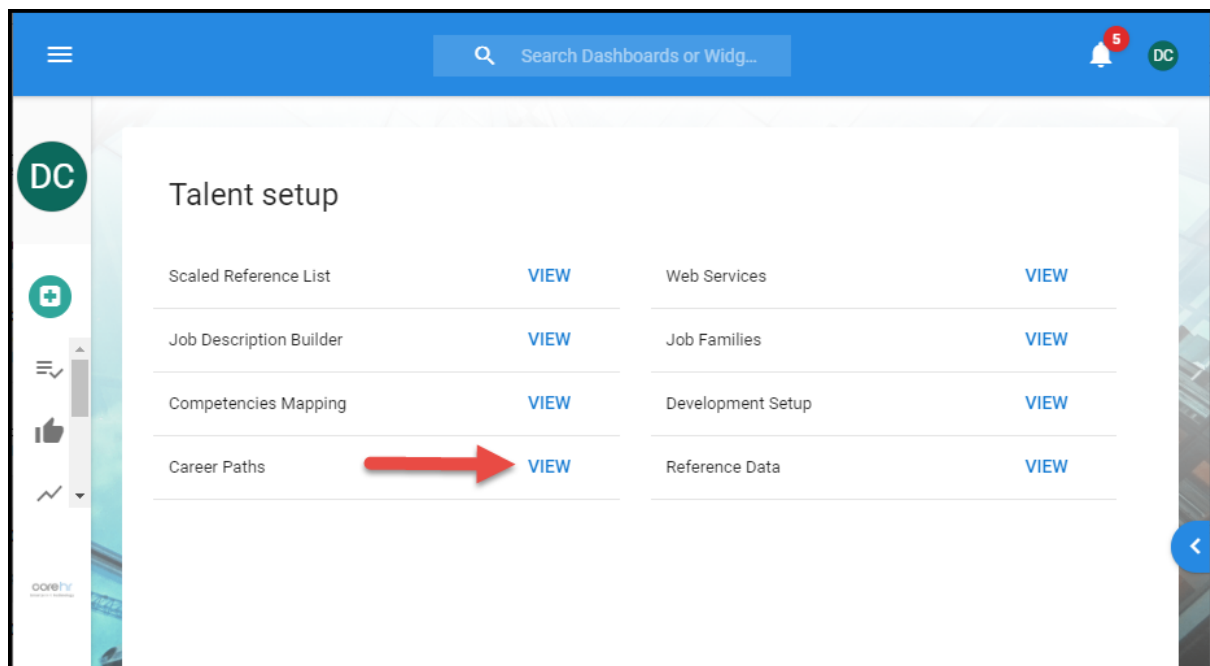

These career paths are created by the historical movement of employees across job titles in your organisation. For example, if Employee A was commenced as a Budget Analyst, and then moved roles to become a Financial Administrator, the software includes this as a career path for Employee B who may be sitting in a Budget Analyst job title.

Note: The automatic career paths are generated nightly and considers any changes made to an employee's appointment history from that day.

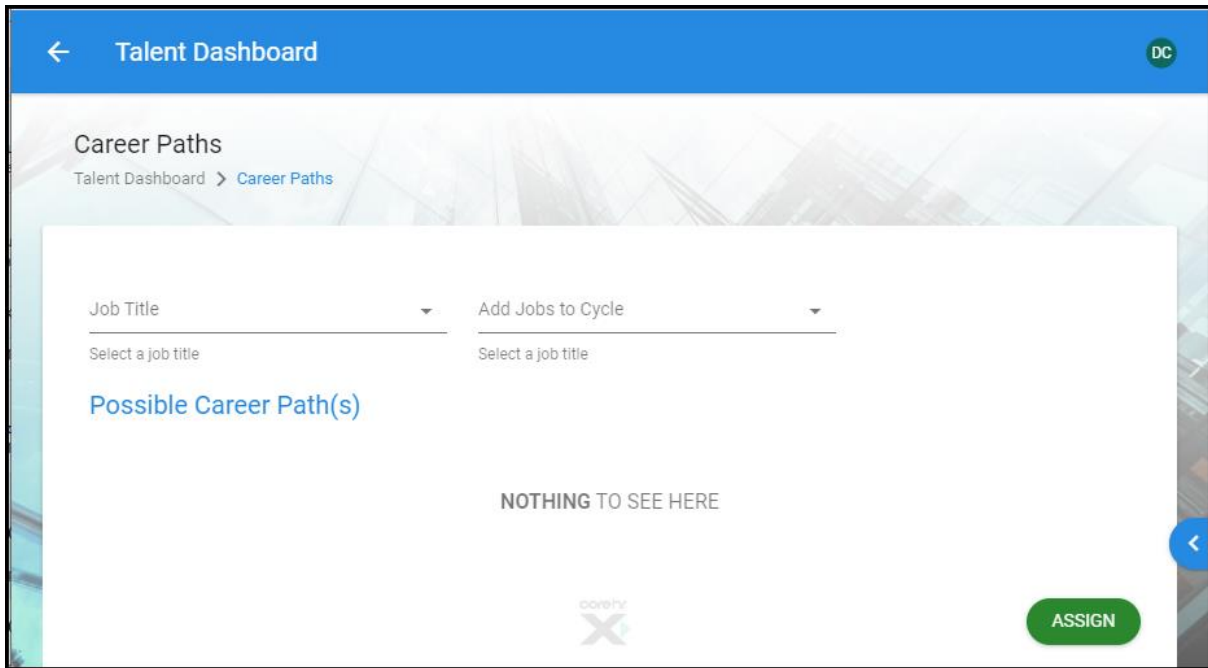

6.1.2. Manual Career Paths

To add a career path to a job title

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Career Path* label.

2. The Career Path screen opens.

The screenshot shows the 'Career Paths' screen within the 'Talent Dashboard'. The header bar is blue with a back arrow and the text 'Talent Dashboard'. In the top right corner, there is a green circle with the letters 'DC'. Below the header, the page title 'Career Paths' is displayed, followed by a breadcrumb trail 'Talent Dashboard > Career Paths'. The main content area contains two side-by-side dropdown menus. The left menu is labeled 'Job Title' and has a placeholder text 'Select a job title'. The right menu is labeled 'Add Jobs to Cycle' and also has a placeholder text 'Select a job title'. Below these menus, the text 'Possible Career Path(s)' is shown in blue. Underneath, the message 'NOTHING TO SEE HERE' is displayed in a light gray font. At the bottom center, there is a faint 'careerv' logo with a large 'X' over it. In the bottom right corner, there is a green button labeled 'ASSIGN'. A blue circular button with a white back arrow is visible on the right edge of the screen.

3. Select a Job Title from the job title drop-down list. This is populated from the job title reference list in People Management.
4. Select a Job Title from the *Add Jobs to Cycle* drop-down list. This is populated from the job title reference list in People Management.
5. Click the **Assign** button which creates the possible career path.

7. Job Families

7.1. Creating a Job Family

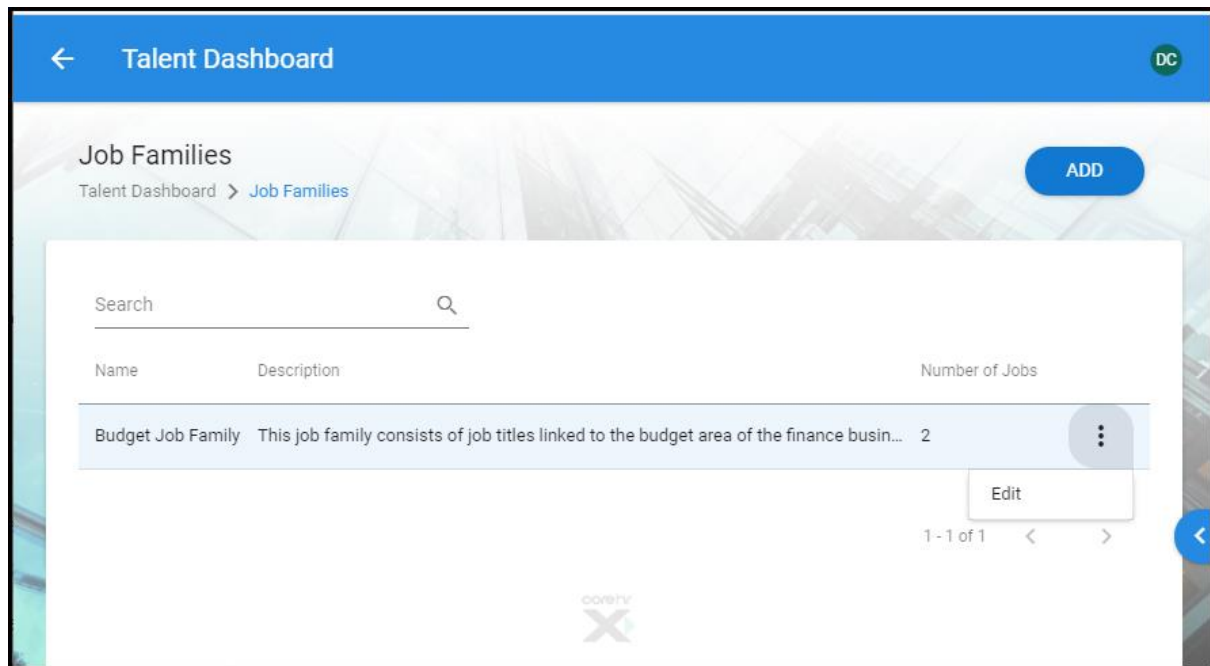

A job family is a group of job titles that are found within the same category of job or department. These are used to roll out competency frameworks to an organisation or to a specific business unit.

To create a new job family

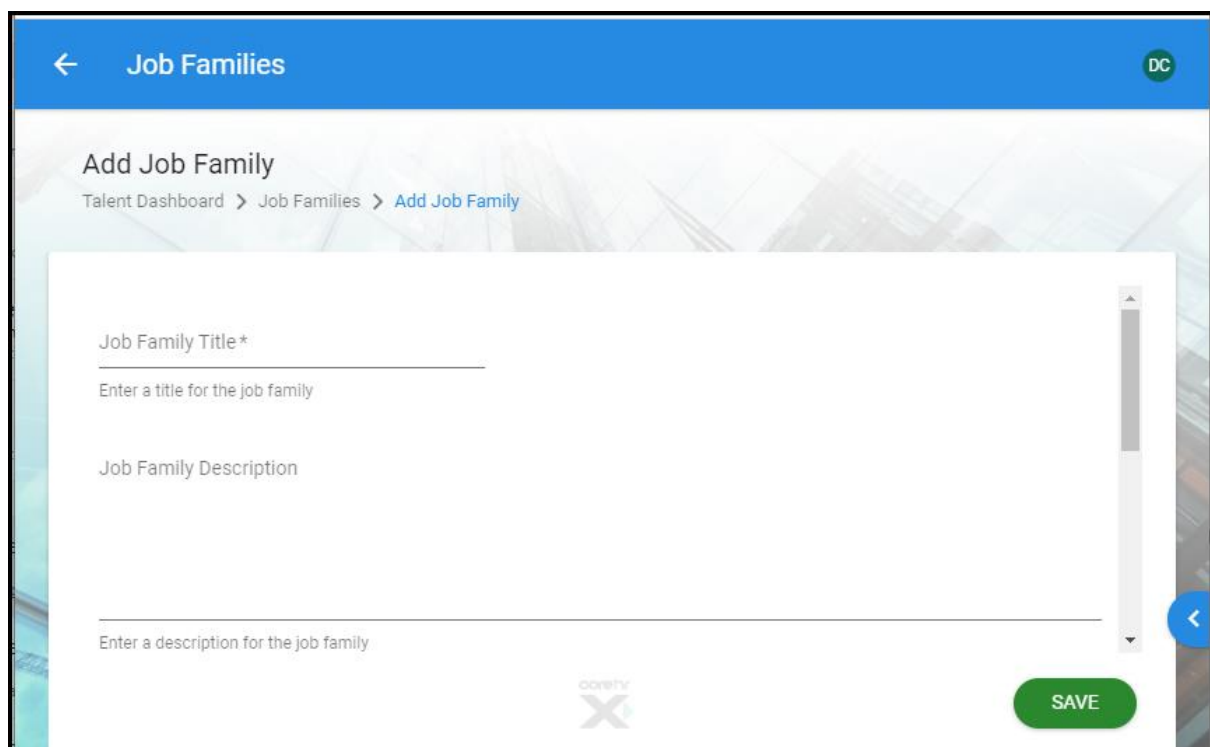

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Career Path* label.

2. The Job Families screen appears, which returns any existing job families in the company.

3. Click the **Add** button.
4. This opens the Add Job Family screen.
 - a. Enter in a title for the job family, which is mandatory.
 - b. Enter in a description for the job family.

5. Search and add the job titles from the *Not Added Jobs* list to the *Added Jobs* list.

8. Competencies Mapping

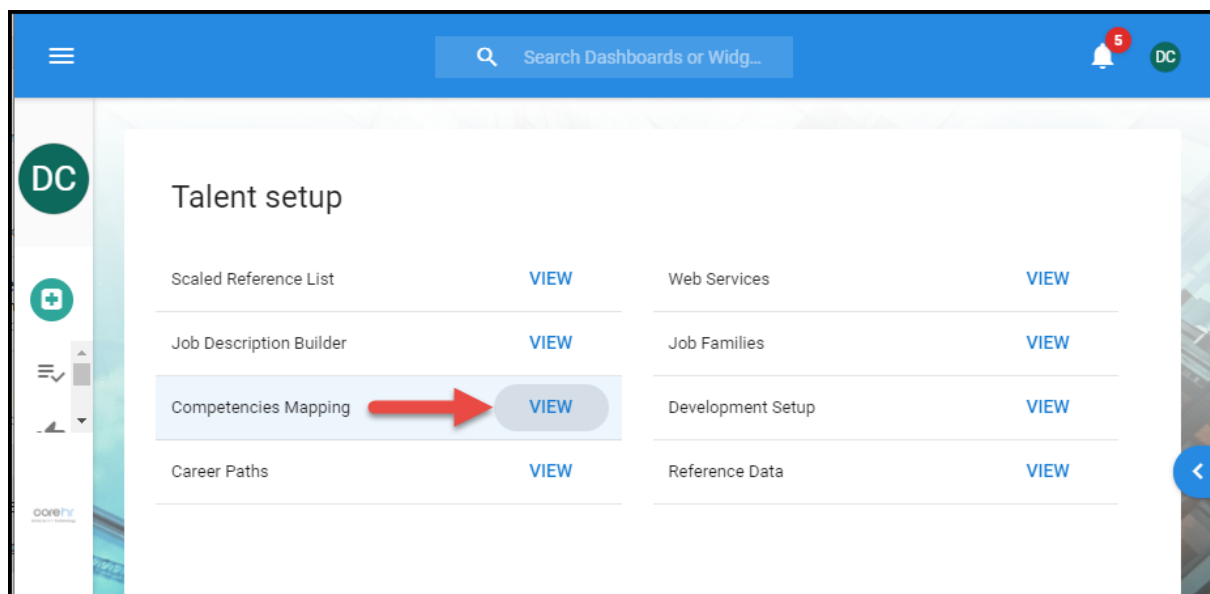

8.1. Assign Competencies

Once a job family has been created, it is possible to assign a competency profile to them via the competencies mapping screen. This also allows you to update a competency's desired level that an employee needs to reach.

Note: Competency frameworks need to be created and activated in advance of mapping competencies to job titles or job families.

To view and create competency mapping details:

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Competencies Mapping* label.

2. This opens the *Competencies Mapping* screen.

The following tables highlights the items found on this screen:

Item	Description
Job Group	Select either Job Title or Job Family.
Job Title / Job Family	Depending on what Job Group is chosen, this list populates with Job Title or Job Family reference data.
Search	This allows you to search on the assigned competencies within a competency framework.
Framework Name	This is the name of the competency framework that has been assigned to a Job Title or Job Family.
Assigned Competencies	This shows the competencies within a competency framework
Desired Level	This allows you to update the desired level that an employee is to work towards.
Assign Competencies	This allows you to assign a specific set of competencies to a job title or job family from a competency framework.

3. Select a job family or a job title from the job group section of the screen.

5. To assign a new competency, click the **Assign Competencies** button.
6. The *Assign Competencies* screen opens.

The screenshot shows the 'Assign Competencies' page within the 'Competencies Mapping' section. The page has a blue header with a back arrow and the title 'Competencies Mapping'. A user profile icon 'DC' is in the top right. Below the header, the page title 'Assign Competencies' is displayed, followed by a breadcrumb trail: 'Talent Dashboard > Competencies Mapping > Assign Competencies'. The main content area contains a form with a 'Framework *' dropdown menu, which is currently empty and has a red error message 'This field is required' below it. Below the form, a note states: 'Note Core Competencies and Assigned Competencies are not returned here.' Underneath the note is a section titled 'Competencies' in blue. This section contains a search bar with a magnifying glass icon, a 'Category' dropdown, and a 'Competency' dropdown. To the right of the search bar is a blue 'ASSIGN ALL' button. At the bottom right of the form is a green 'SAVE' button. A vertical scrollbar is visible on the right side of the form area. The CoreTV logo is at the bottom center of the page.

7. Select a competency framework from the drop-down list.
8. This returns all the competencies and their categories that are on the competency framework chosen.

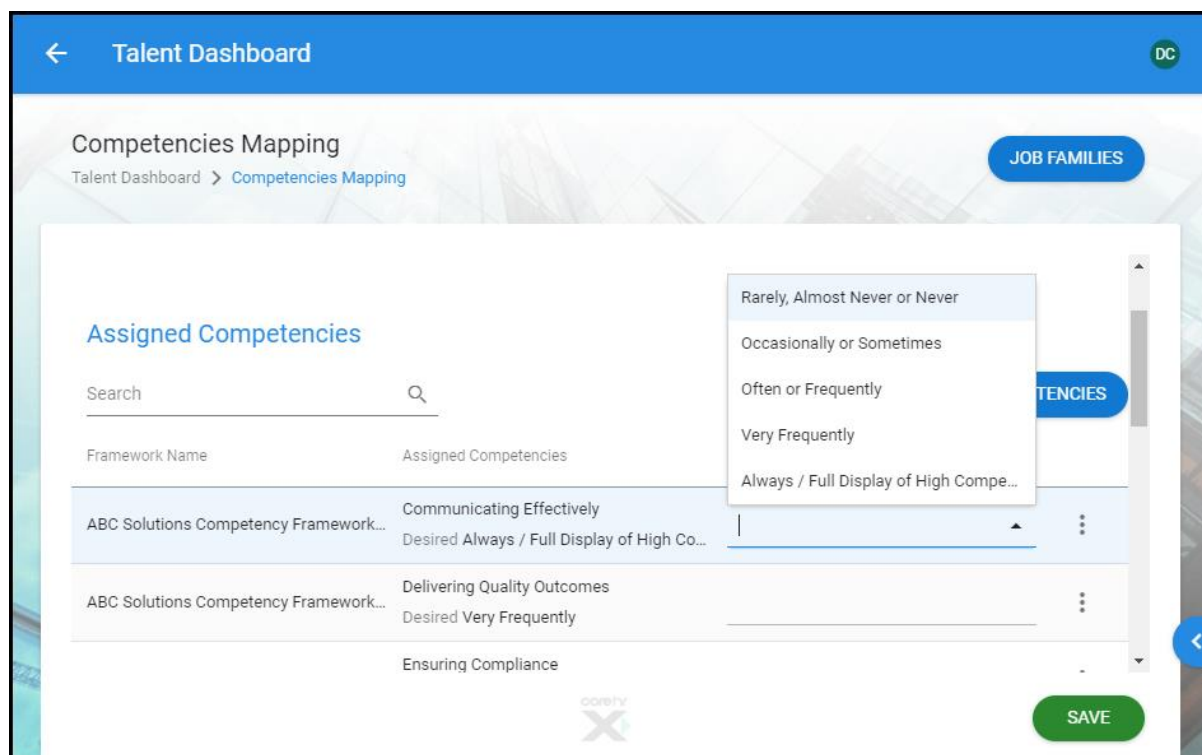

9. To assign a competency click the slider button per competency or click the **Assign All** button.
10. Click the **Save** button.

8.2. Setting a Desired Level

Once a competency has been assigned to a job title or job family, you can set the desired level that an employee is to reach. To do this:

1. On the Assigned Competencies section, select a competency and choose the appropriate competency desired status to allocated to the competency

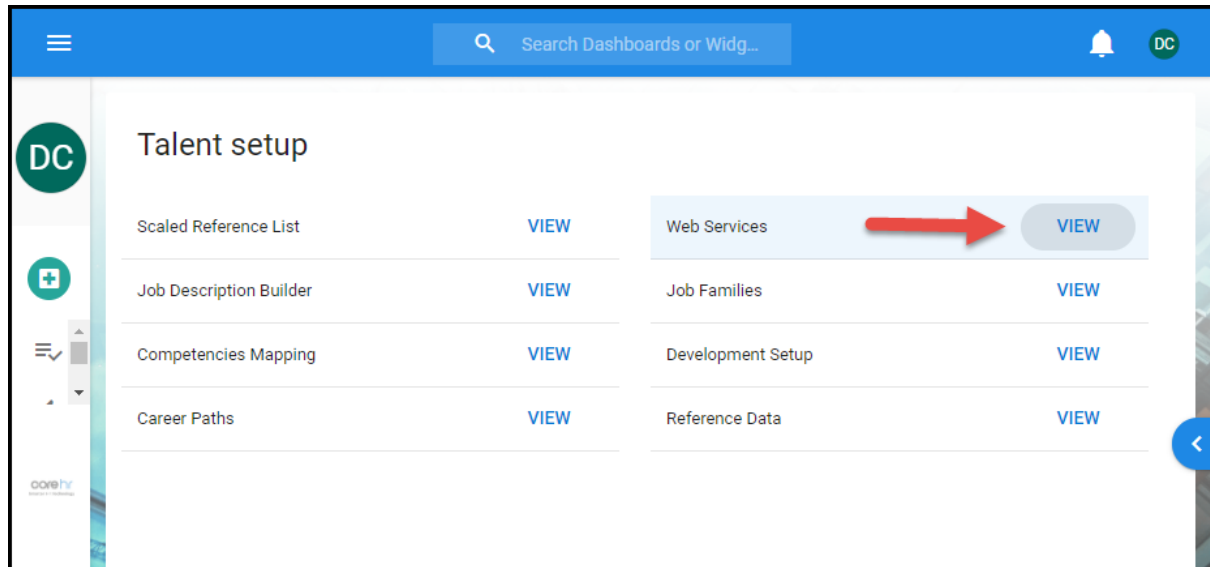

2. Click the **Save** button and the competency desired level is added to the competency.

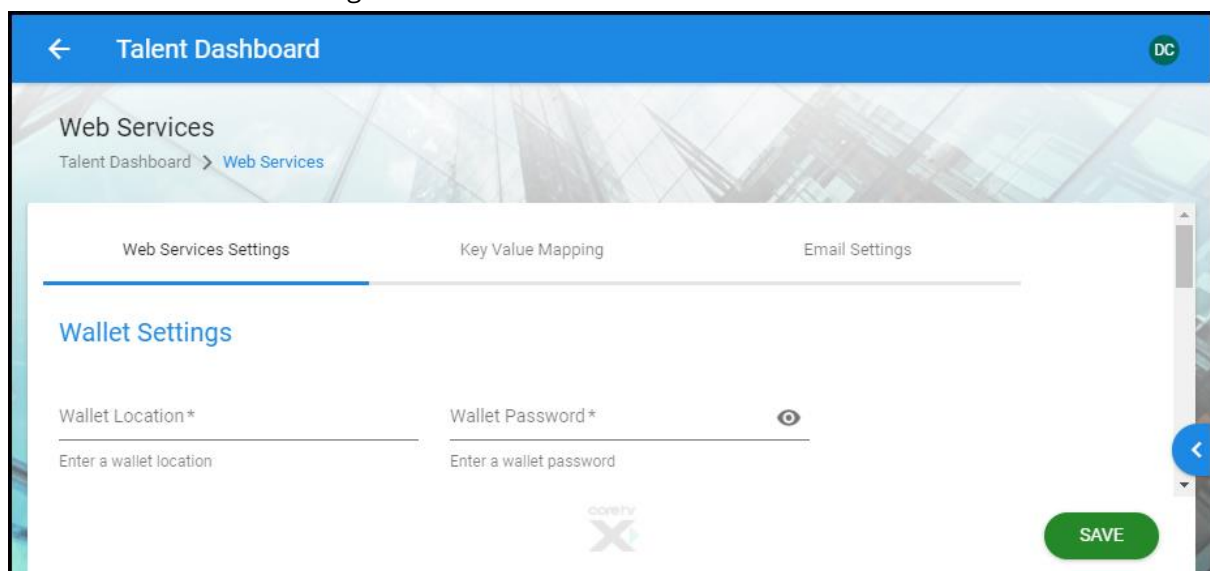

9. Web Services

To view and update Web Services details:

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Web Services* label.

2. Within the Web Services screen, the following 3 tabs are available to select:
 - a. Web Services Settings
 - b. Key Value Mapping
 - c. Email Settings

Note: Content for Talent Management Web Services is currently being created and is in progress. Contact the PeopleXD University for further details.

10. Development Setup

10.1. Career Development Plan Reference Data

This section is to select a status list that is to be used by employees as part to their career development plan. A status group is required to be created as per [section 4.1.1 General References](#) before a career development plan status is allocated.

To confirm the status type to be used for a career development plan, select the appropriate option from the *Reference Type* drop-down list and then click the **Save** button.

The screenshot shows the 'Development Setup' page in the Talent Dashboard. A dropdown menu for 'Reference Type*' is open, showing 'Status' as the selected option. Below the dropdown is a table with three rows of status options. A green 'SAVE' button is located at the bottom right of the form.

	Reference Type*	Colour
1	Unable to complete	Light Purple
10	Test	Dark Orange
2	No Longer Required	Orange

11. Reference Data

11.1. What are Talent Reference Types?

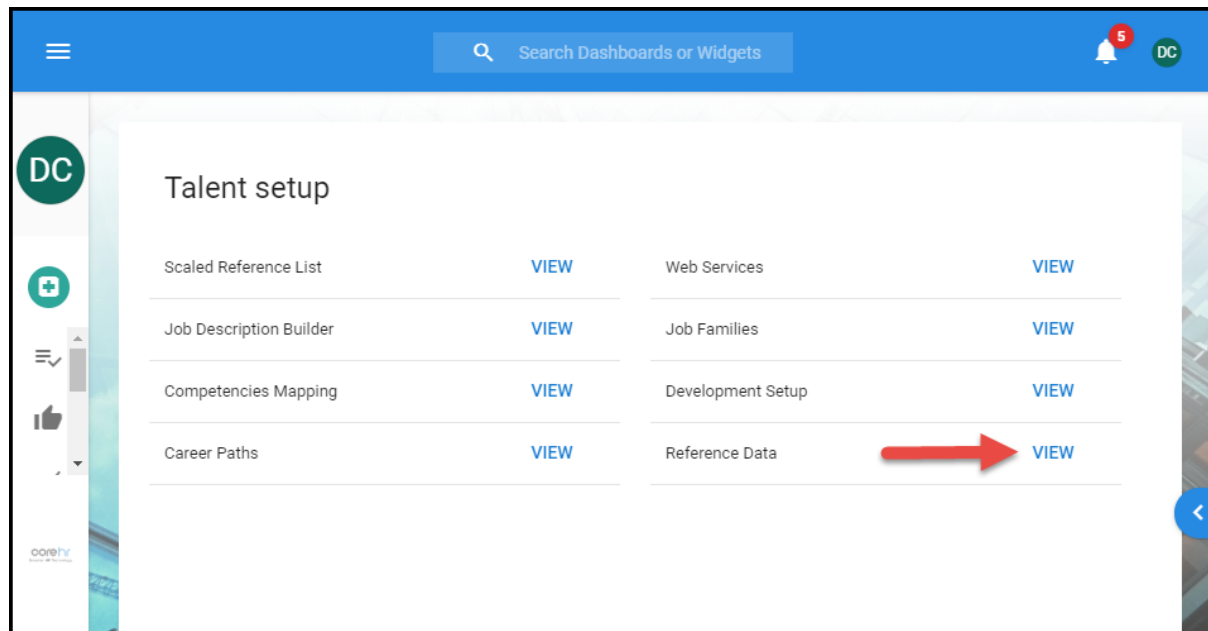

The following table outlines the reference types that are maintained on this screen.

Item	Description	Where it can be found	
Career - Willing to Relocate	This lists the reference data that shows how eager employee may be to relocate office or location as part of this role.	Employee's Profile →	Talent Career Preference
Career - Willing to Travel	This lists the reference data that shows how eager an employee may be to travel at certain times as part of this role.	Employee's Profile →	Talent Career Preferences
Career Preference	This lists the reference data where the employee can outline what their ideal next role might be.	Employee's Profile →	Talent Career Preferences
Objective Priority Scale	This allows you to create different priorities for objective types.	Objective Types	
Recognition Awards	These are used to rate employees using the recognition functionality.	Employee's Profile →	Talent Talent Summary
Recognition Level Threshold	For each level, you have a minimum and maximum badge. You must ensure that you have continuity between the sequences.	Employee's Profile →	Talent Talent Summary
Talent Pool	This creates the different talent pools that are used for job description profiles and an employee's talent profile.	Talent Dashboard →	Admin Job Description Builder.
Talent Pool Category	This creates the different talent pool categories that are used for job description profiles and an employee's talent profile.	Talent Dashboard →	Admin Job Description Builder.

11.2. Adding a Reference Item

To add a new reference item, follow the below steps:

1. On the *Talent Setup* tab, click on the **View** button that corresponds to the *Reference Data* label.

2. Select the reference type to be added to
3. Click the **Add** button.

The screenshot shows the 'Talent Dashboard' interface. The main section is titled 'Reference Data' with a breadcrumb 'Talent Dashboard > Reference Data'. Below this, there's a modal window titled 'Career - Willing to Travel'. On the left of the modal is a sidebar with three options: 'Career - Willing To Relocate', 'Career - Willing To Travel' (which is selected and highlighted in blue), and 'Career Preference'. Above the table in the modal is a search bar and an 'ADD' button, which is highlighted with a red rectangle. The table has three columns: 'Code', 'Description', and 'Active'. It contains two rows of data. At the bottom of the modal is a 'SAVE' button. The background of the dashboard shows a cityscape image.

Code	Description	Active
1	100% of the time	☒
2	75% of the time	☒

4. Enter in the code & description, enable the active slide and click the **Save** button.

Note: The following rules apply to the above reference data:

- Cannot duplicate reference codes
- Reference code alphanumeric expect for Career options, which are numeric only.
- Reference code is not editable once saved.

12. Talent Data Access

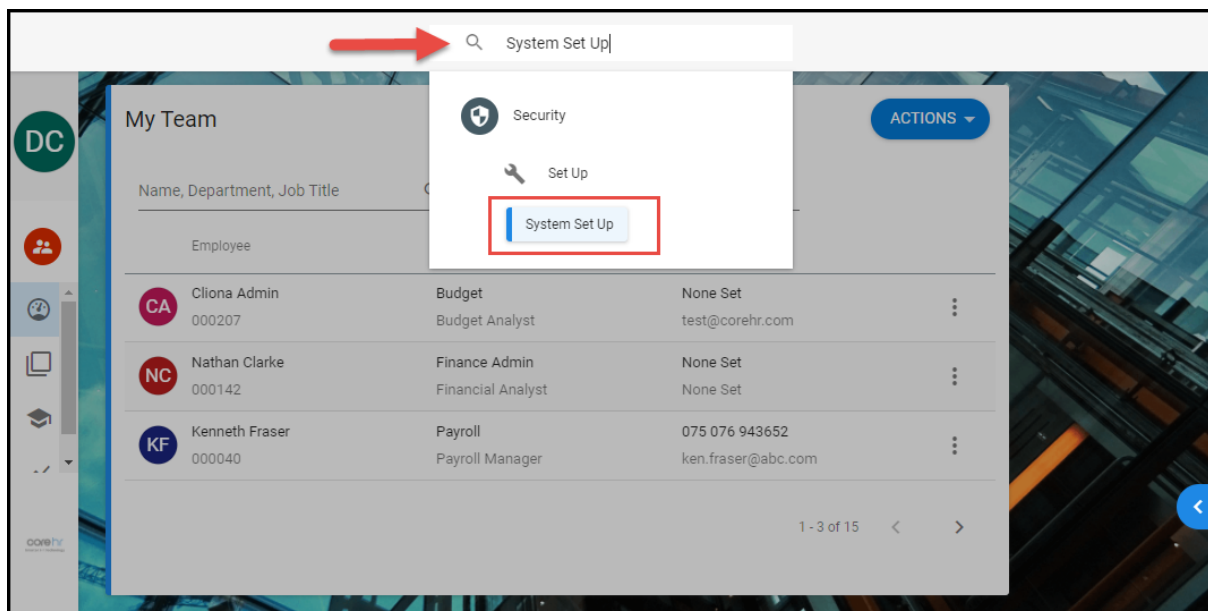

12.1. Overview

Data Access in Talent Management is based on both Organisation Role assignment as a manager and People Management data as a Talent Management Administrator.

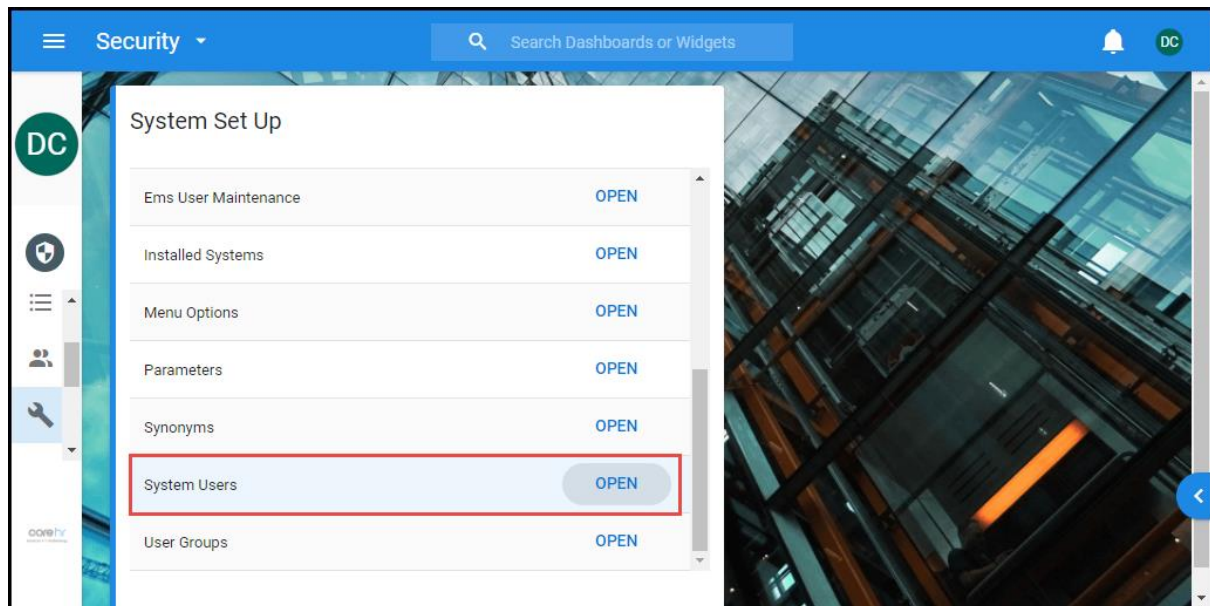

12.2. Talent Administration Data

To access the data for every employee in Talent Management, access needs to be granted as part of the People Management System Users within the Security module.

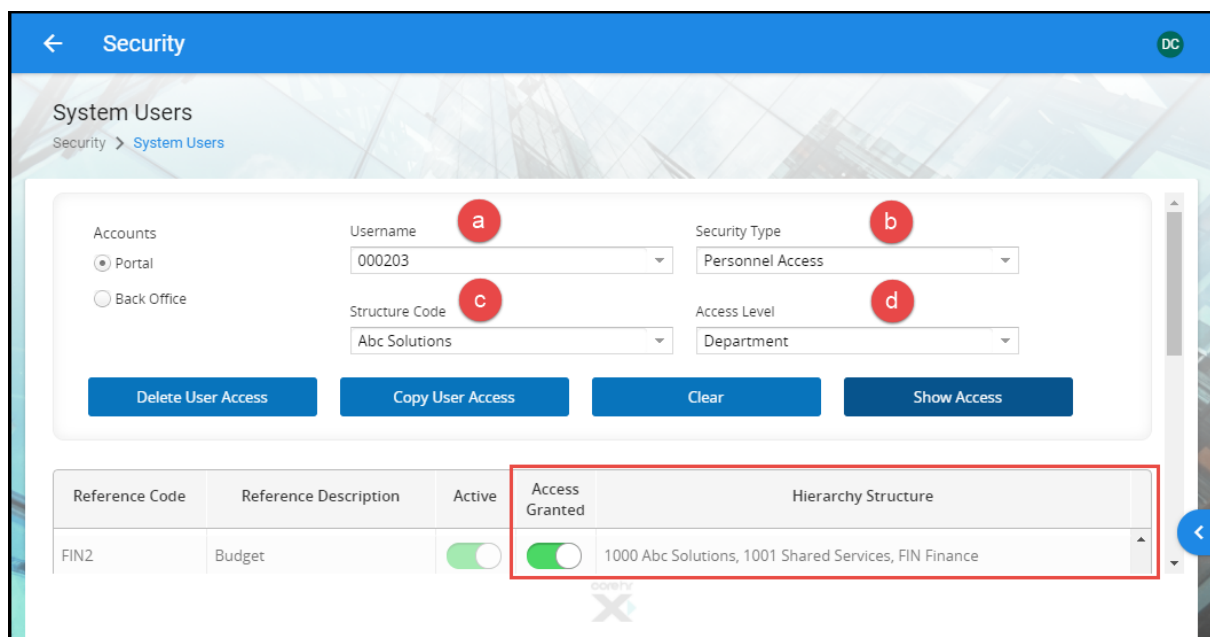

1. Quick jump to *System Set Up* on the Security Dashboard

2. Select *System Users* and click the **Open** button which corresponds to it.

3. The System Users screen appears

4. Ensure the following options are selected before assigning access to a username:

- a. Username
- b. Security Type = Personnel Access
- c. Structure Code
- d. Access Level

5. Access is saved automatically. Access is now replicated on both People Management Dashboard and Talent Admin Dashboard for the user in question.

12.3. Talent Manager Access

Access to the Data shown to a manager on the Manager Dashboard is linked to their Org Role privileges and their My Team widget by default. Any other employees shown on Talent Manager widgets have been assigned by a Talent Admin or linked to an employee's historical appointment details.

13. Menu Profiles

There are three default menu profiles that have been created with standard Talent Management menu options enabled to reduce the effort involved when configuring Talent Management.

The following tables outlines what these are and what is included within them.

Menu Profile	Built for	Description
CorePortal_PDP_Employee	Employees	This menu profile includes the basic employee access for reviews, objectives, competencies along with other talent profile access
CorePortal_PDP_Manager	Managers	This menu profile includes the access required by a manager to sign off on employee appraisals, objectives and competencies, with additional access to create meetings and view reports.
CorePortal_PDP_Admin	Talent Management Administrators / HR team.	This menu profile includes all administrative functions to create, edit and delete appraisals, objectives and competencies along with other full admin access to the Talent Admin dashboard.
