1. Overview

The purpose of this document is to provide a step by step guide to setting up and configuring the Team Area structure for a roster within Workforce Management.

The document provides details on how to setup the validation rules and roster rules that are then assigned to the different Team Areas.

The document also explains how to assign the appropriate menu access to managers and system users and how setup managers with delegation access.

2. Team Area and Structure Setup

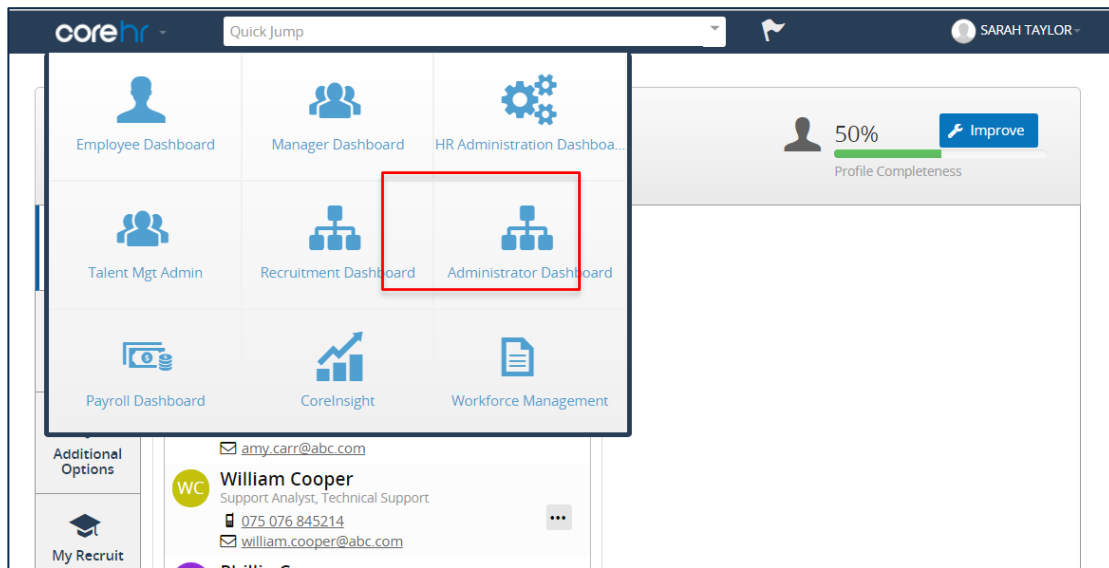

2.1. Team Area Parameters

- A **Roster Team Area** is created to **logically group** similar employees working within the same team. For example, team areas might be based on the different departments in a retail store such as menswear, womenswear, and household.
- Depending on the needs of each team area different rules and criteria can be assigned to each team area to ensure each area is adequately resourced. Several rules can get associated / applied at a roster team level allowing for variation from team to team.
- The **Team Area Parameters** screen is utilised to create the teams that will be accessible in your roster as well as defining, at the team level, the roster criteria (i.e. Area Rules, Validation Rules, Self-Rostering capabilities, etc.) that will be applied to the team in question (and possibly to any sub-teams in the organisational hierarchy) for the time that is specified. Team area parameters must be setup and created at this level for employees to be added to each section.
- Shift Dependencies (i.e. Area Rules) and Roster Validation Rules can be attached to the individual team areas with the date effective facility. This allows for example, for the pre-planning of shift dependencies based on a specific time of the year to facilitate employee holidays.

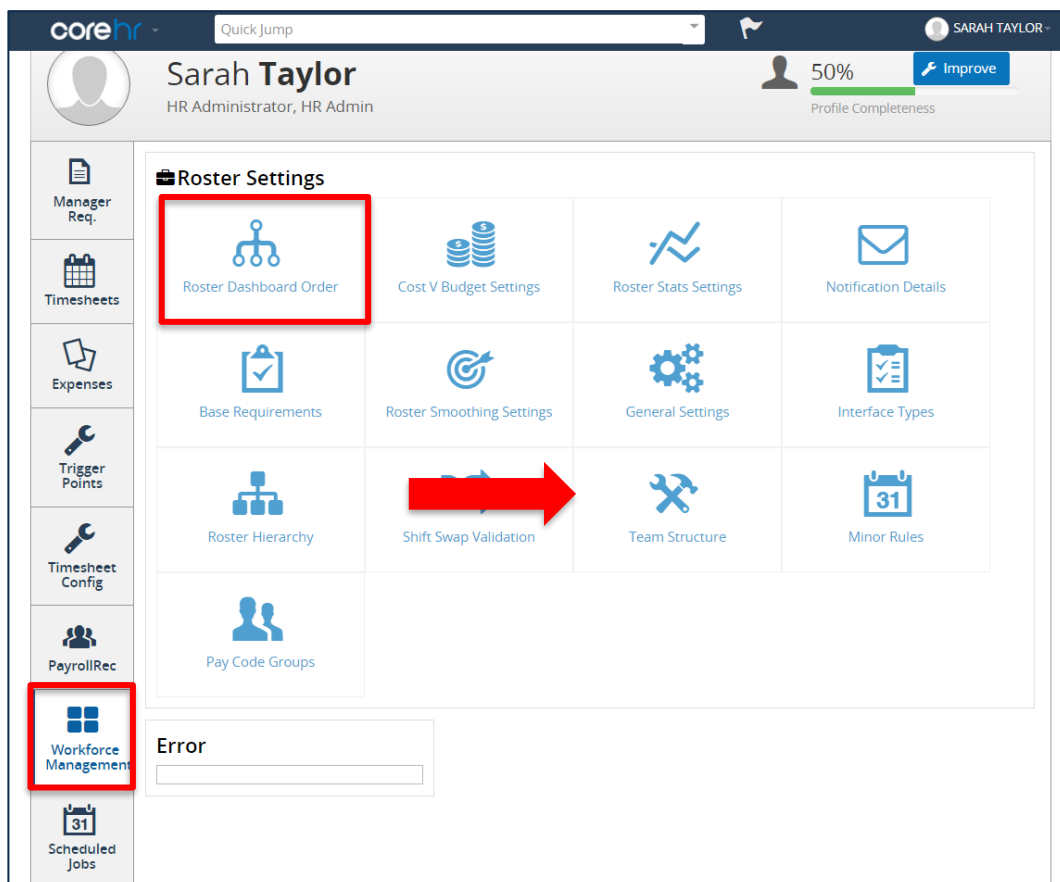

2.2. Area Structure

- The **Area Structure** represents the organisational hierarchy within your organisation. Each **Team Area** that will be represented in the **Area Structure** of your organisation will need to firstly be setup as described in the 'Team Area Parameters' module of this document.
- A manager will only be able to see the roster information for the Team Areas that they have been assigned to.
- If a manager is assigned to more than one **Team Area** they can switch from one to another by selecting the Team Area they wish to view from the drop-down list in the Workforce Management Tab and pressing the green tick to move to that Team Area.

- From the Quick Jump Navigation menu select the **Administrator Dashboard**.

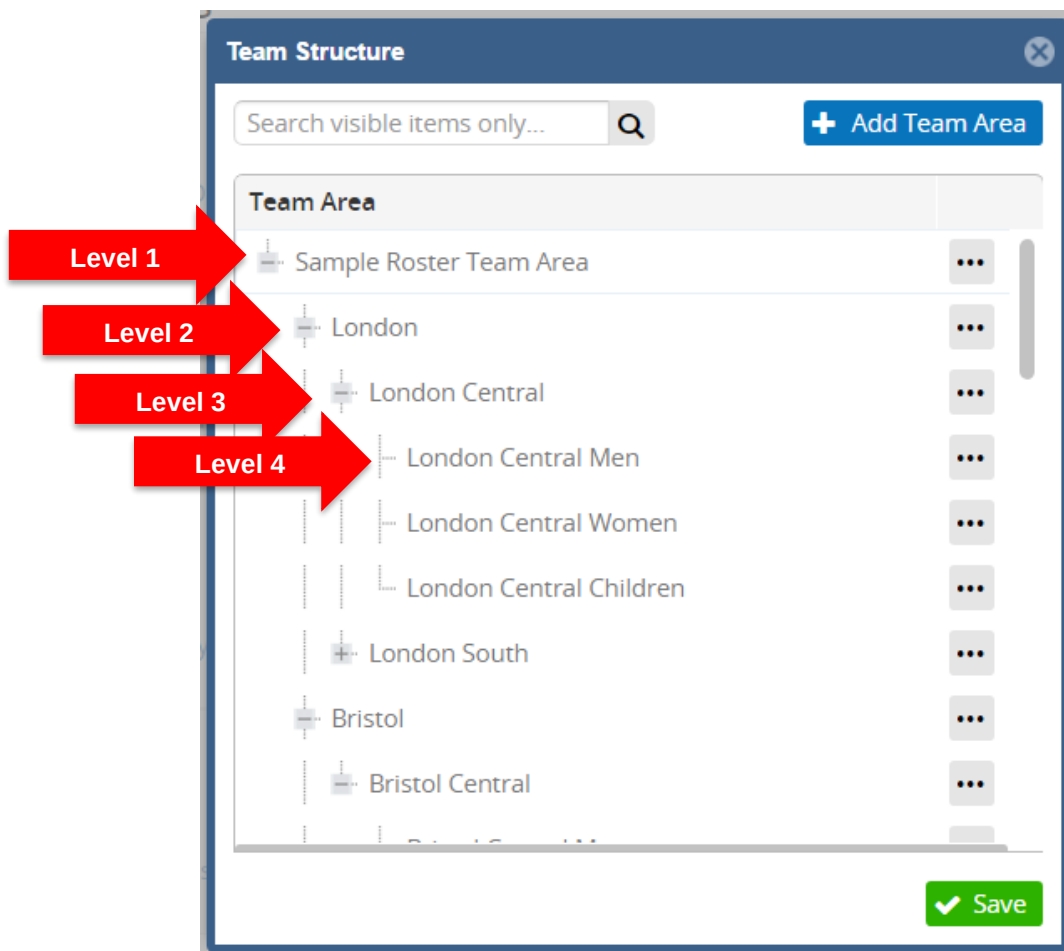

- Select the **Workforce Management** tab and under the **Roster Settings** widget you will see the **Team Structure** option.

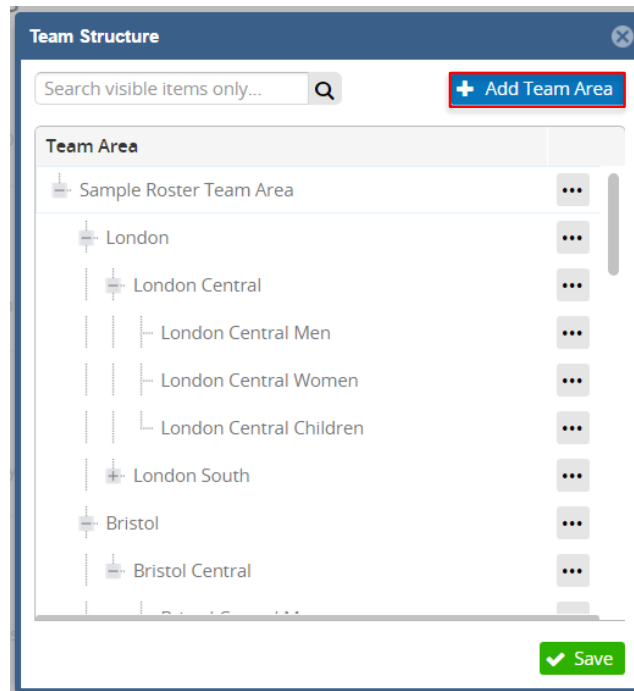

The 'Team Area Structure' window opens. All the levels that exist within the company are displayed. Please note, there can only be one top level. When setting up the structure, employees should be added at the lowest level. In the example below we can see four levels.

Level	Name	Details
Level 1	Sample Roster Team Area	Top level for the company
Level 2	London	Region
Level 3	London Central	Sub Region
Level 4	London Central Men	Lowest level is norally at a department or store level. This is where employees would be assigned.

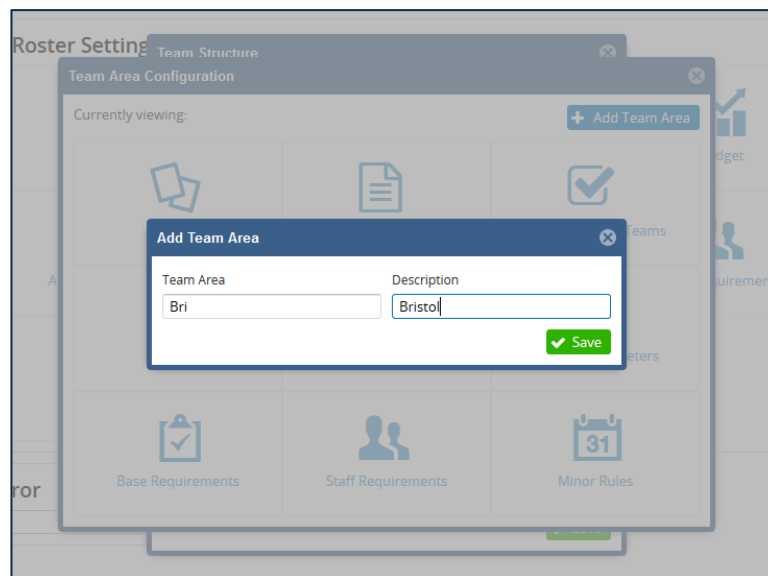

2.2.1. Create a New Team Area

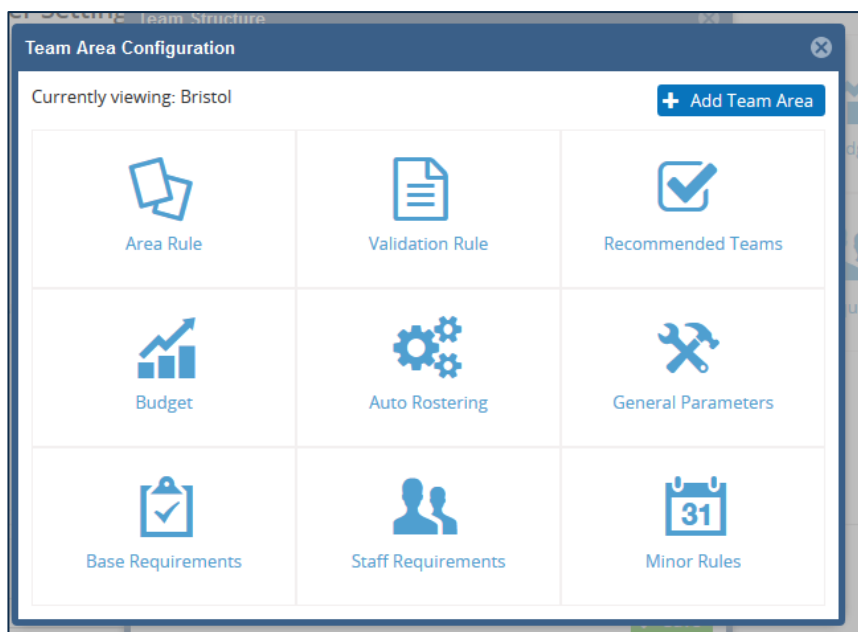

- To create a new Team Area, click on the **Add Team Area** button,

- Enter in the Team Area code and a description, and press the **Save** button.

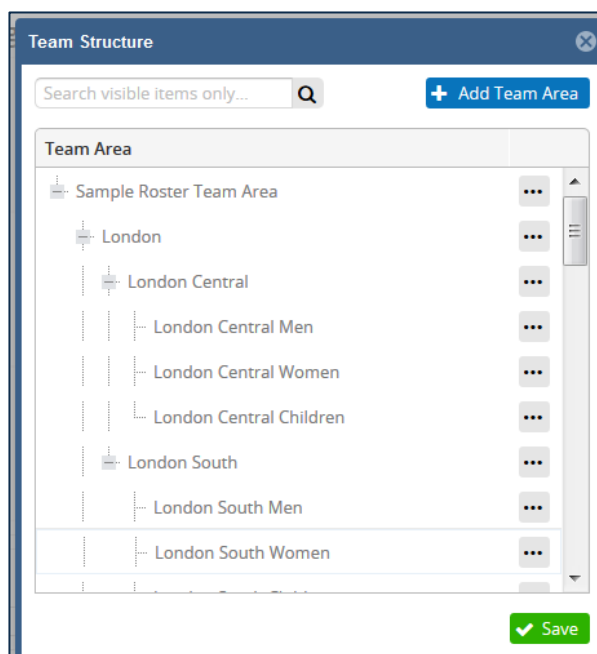

- You will be brought to the 'Team Area Configuration' screen
- From here you can configure the details for the Team Area or you can add in those details at a later stage.

- If you close this window you will be brought back to the 'Area Structure' screen and you can add the team into the structure now.

2.2.2. Add a Team Area to the Structure

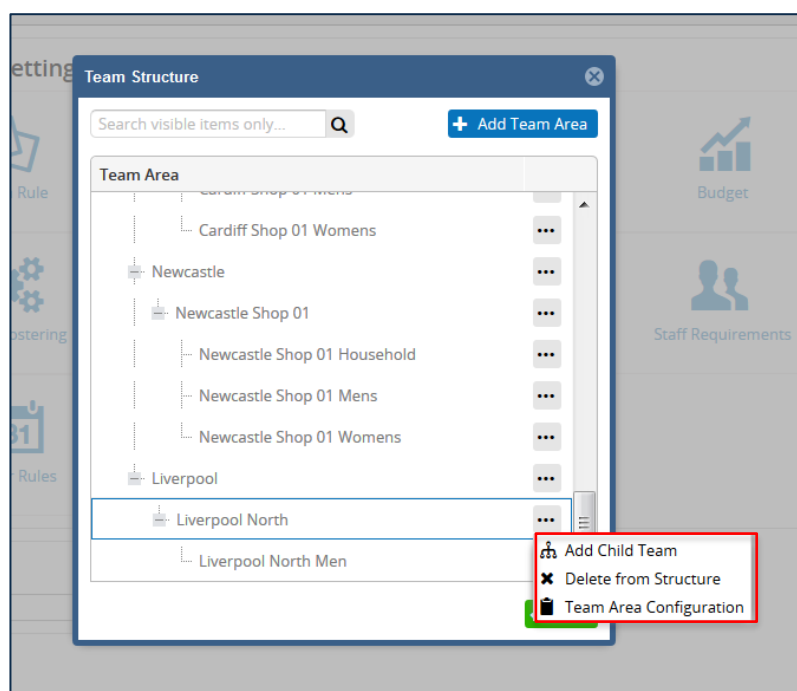

- From the Area Structure select the level you wish to add a sub area to and click on **Add Team Area** button.

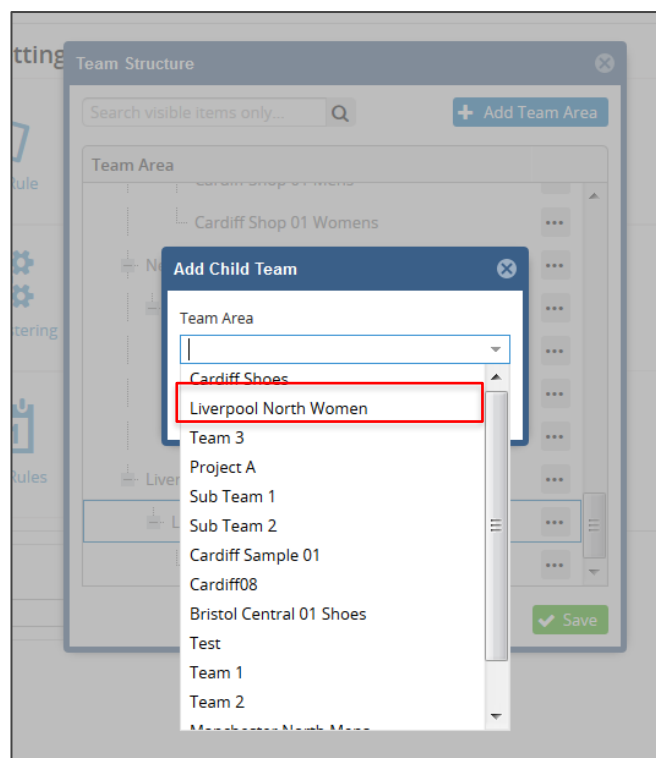

- For example, to add a level four team area, click on the level three you want the new team area to

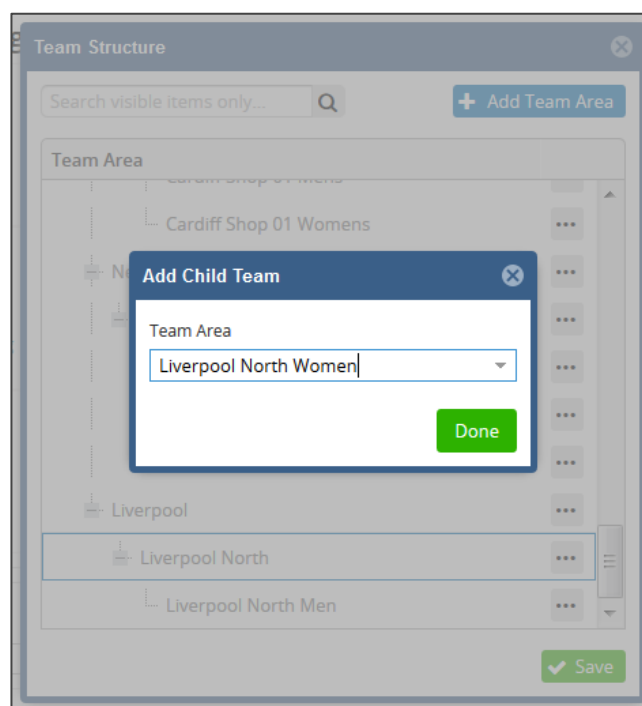

be under and select the button and select **Add Child Team**.

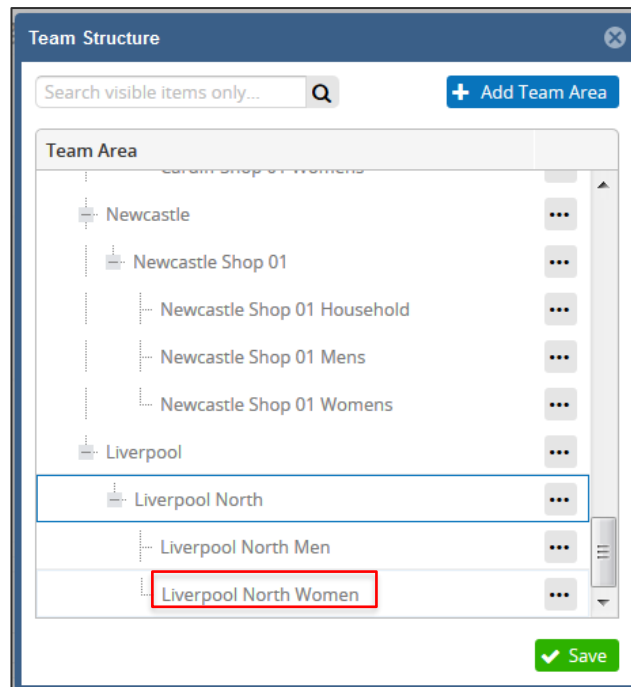

- From the drop-down list, any team area that has been created but not assigned will be listed in the drop-down list.
- Select the team area you want, in this example we want to add the Team Area, Liverpool North Women.

- Press the **Done** button

- The Team Area will now be listed in the Area Structure.

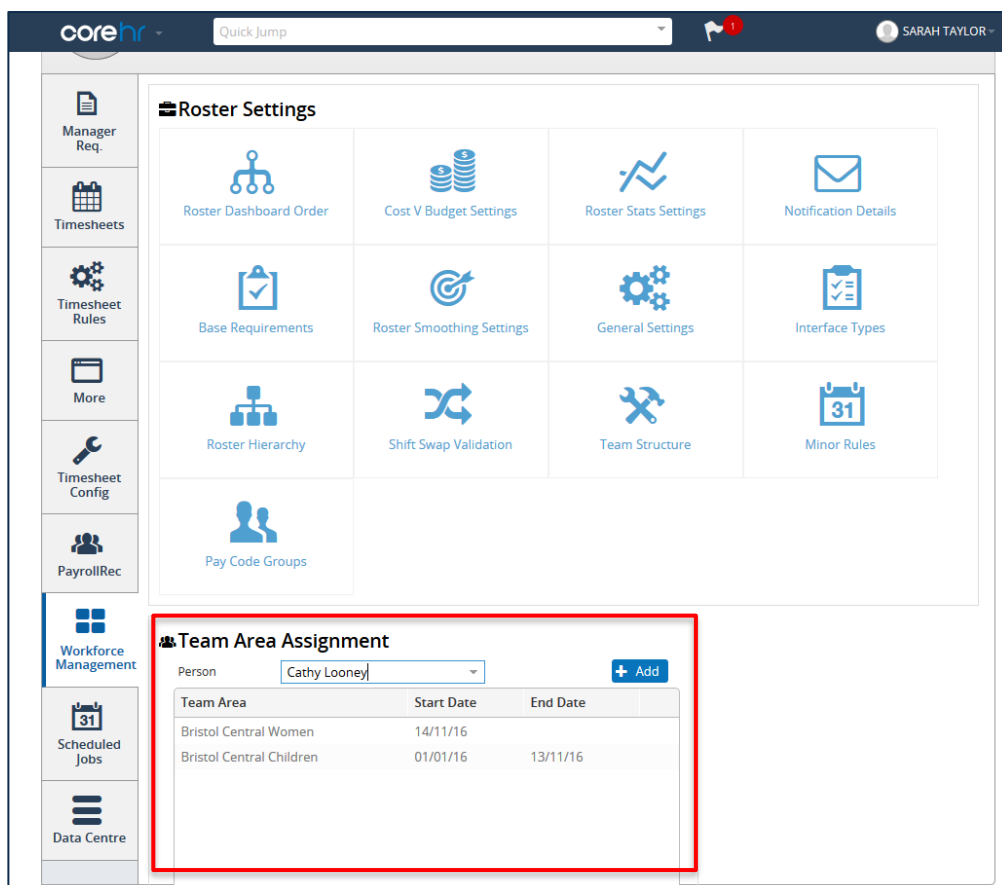

- Press the Save button to confirm the changes

2.3. Person Team Area

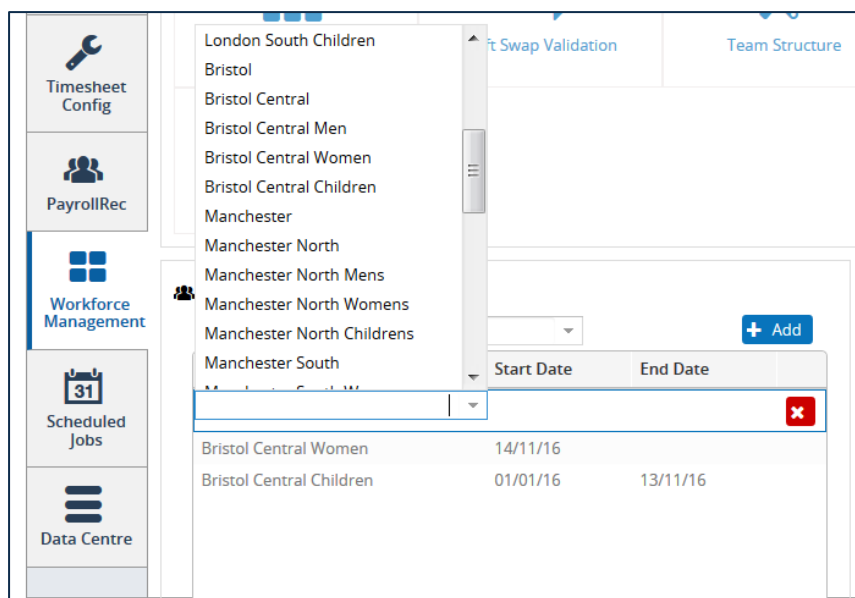

- The **Person Team Area** screen is used to allocate employees to the roster Team Areas that are setup in the **Team Area Parameters** module.
- Each employee that you wish to see appearing in your roster schedule needs to be assigned to a **Team Area** via the Person Team Area screen.
- Employees can only have one team area but can be rostered to work across multiple teams if required.

2.3.1. Assign an Employees to a Team Area

- Select the **Administrator Dashboard** from the quick jump navigation menu.
- Select the **Workforce Management tab**.
- Under the **Team Area Assignment** widget, select the person you want to assign to a Team Area from the drop-down list.

- Select the **Add** button and select the team area from the drop-down list

- If they are already assigned to a team area, you must enter in an end date for the old team area first, and then select the new team area and enter in the start date.
- The employee will then be assigned to the new team area effective from the start date entered.

3. Roster Rules (Shift Dependencies)

Roster Rules define the staffing requirements and employee demand that will apply to the rosters for the various teams that employees are assigned to. The rules are assigned to different **Team Areas**. A **Roster Team Area** is created to logically group similar employees working within the same team.

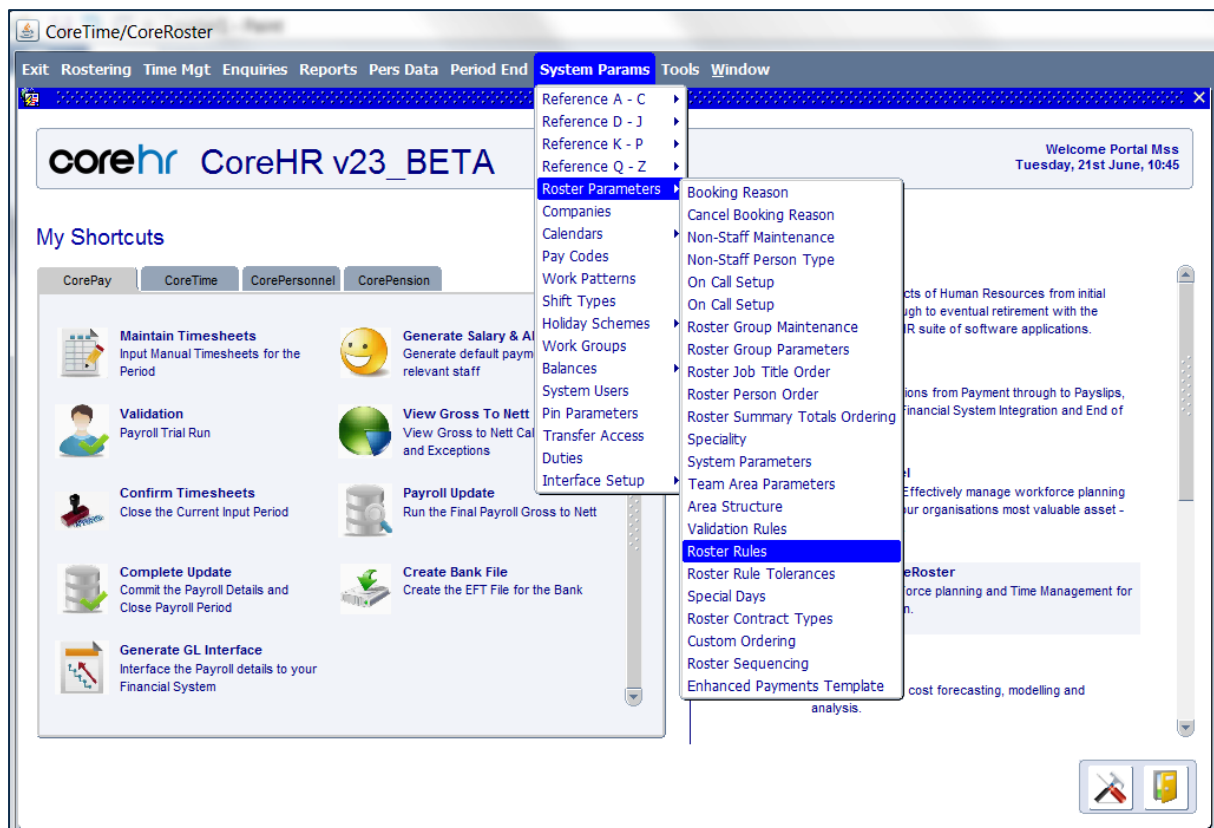

Individual daily roster rules can be created and can then be attached to a specific **Team Area**.

These rules will ensure that the rosters that are created for the 'Team Area(s)' meet all the necessary staffing requirements

- The 'Roster Rules' screen allows for the preparation of the roster rules and shift dependencies that will apply to the rosters that will be created for the various team areas.
- Individual daily roster rules can be created here and can then be attached to a specific team area at a later stage.

3.1. Steps for Creating Roster Rules

- Click on the **System Params** Menu, click on the **Roster Parameters** option and then choose the **Roster Rules** option.

- Enter a Roster Rule Code and Name or select from a **List of Roster Rules**.

- Now click on the **Generate Default** button to generate a default roster rule template to fill in.

The screenshot shows the 'CoreRoster' application window. The 'Roster Rule' section is active, displaying a table with columns: Day, Type, Name, Pattern, Start, End, and Required. The 'Each Day' row is highlighted in yellow. To the left of the table, a 'Rule Detail' sidebar lists the days of the week and 'Public Holiday', with 'Each Day' selected and highlighted in blue. Above the table, there are buttons for 'Generate Default', 'Add Special Day', and 'Copy Rule'.

- To add an identical rule for each day, click on the 'Each Day' record and a popup will be displayed into which you can specify rule criteria that will be applied to each day of the week. Once rule criteria are entered, click "OK" to apply the changes.

The screenshot shows a 'Details for : Each Day' popup window. It contains a table with columns: Job Title, Type Code, Pattern, Name, Start, End, Required, and Priority. The first row is populated with 'ADMINISTRATOR', 'FLEXI', 'Flexi 7.5 hour day', '08:00', '18:00', '1.00', and '1'. To the right of the table are 'Detail ...' buttons for each row. At the bottom are 'OK' and 'Cancel' buttons.

Note: to enter/modify day-specific rules, just click on the day you want to enter/modify the rule(s) for (e.g. Tuesday) and follow the same process as above to enter the rule criteria.

- Click  to save changes &  to quit the screen.

Note: You can assign each level of a roster rule a priority rating (optional) which the system will use when displaying the Work Patterns in the Requirements section of the Roster Builder-Statistics screen. The priority scale ranges from 1 through 10, with 1 being the lowest priority rating and 10 being the highest priority rating.

Note: The most important work pattern (i.e. the work pattern you want to fill first when AutoRostering) should be the first rule on the list for each day. Continue with the least important staffing requirement last on the list.

3.2. Adding Extra Detail to a Roster Rule

Multi-layer rules may also be created for a given day (or each day) to satisfy your roster requirements (e.g. for Tuesday you may need 2 employees but one of these may need to have a specific qualification, skill, competency, etc.).

Note: The recommended rule type configuration would be either Job Title or Qualification

To add another level(s) to an existing rule:

- Open the rule you want to add another level to and click on the **Detail** button on that rule.

The screenshot shows the 'Roster Rules' application window. The 'Rule Detail' section displays a table with columns: Day, Type, Name, Pattern, Start, End, Required. The 'Each Day' rule is selected. The 'Details for: Each Day' dialog box is open, showing the 'Selection Criteria' section with a table for adding details. The 'Detail' button in the table is highlighted with a red box. The dialog box also contains sections for 'Requirements', 'Eligible Contracts', 'AutoRoster Parameters', and 'General Parameters'.

- This will bring up a popup that will allow you to enter qualifications or competencies that can be added to the rule criteria. Once finished entering the sub-rule criteria, click "OK" to apply the changes. You can have multiple qualifications per rule.

Type	Code	Name
Qualification	QUAL1	Qualification 1

- Click to save changes & to quit the screen.

3.3. Adding Roster Contract Types to a Roster Rule

Users can specify Roster Contract Types to fill all or some Roster Rules if required. When auto-rostering the team areas with these rules applied, the auto-roster engine will only try and fill the shifts with employees who are attached to the specified contract types.

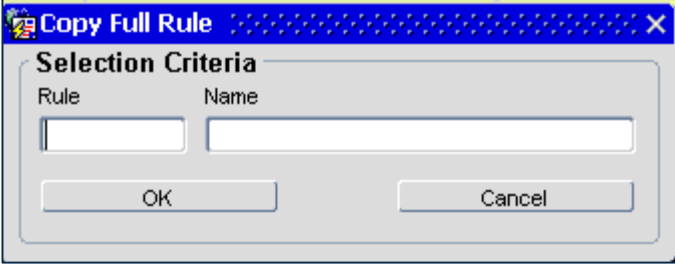

- Open the rule you want to add another level to and click on the Detail button on that rule.
- This will bring up a popup that will allow you to enter a priority (1 to 10, 1 being highest priority and 10 being lowest) on each Roster Contract Type created on the system. Once finished entering the contract type criteria, click “OK” to apply the changes.

Contract Type	Contract Name	Auto Roster Priority
A1	Full Time Employees	1
A2	Part Time Employees	
A3	Weekend Employees	
A4	Nightshift Employees	
A5	Workshare Employees	

- Click to save changes & to quit the screen.

3.4. Steps in Copying Roster Rules

- Click on the ‘System Params’ Menu, click on the ‘Roster Parameters’ option and then choose the ‘Roster Rules’ option.
- Select the set of Roster Rules that you wish to copy from a ‘List of Roster Rules’ .
- Click on the ‘Copy Rule’ button to bring up the ‘Copy Full Rule’ dialog box

A screenshot of a Windows-style dialog box titled "Copy Full Rule". The dialog has a blue title bar with a close button (X) in the top right corner. Below the title bar, the text "Selection Criteria" is displayed. Underneath, there are two labels: "Rule" and "Name". Each label is followed by a text input field. At the bottom of the dialog, there are two buttons: "OK" on the left and "Cancel" on the right.

- In the 'Copy Full Rule' dialog box, enter a rule code and name for the new rule that you wish to create.
- Click **OK** to finalize the creation of the new roster rule.

3.5. Assign Area Rules in Portal

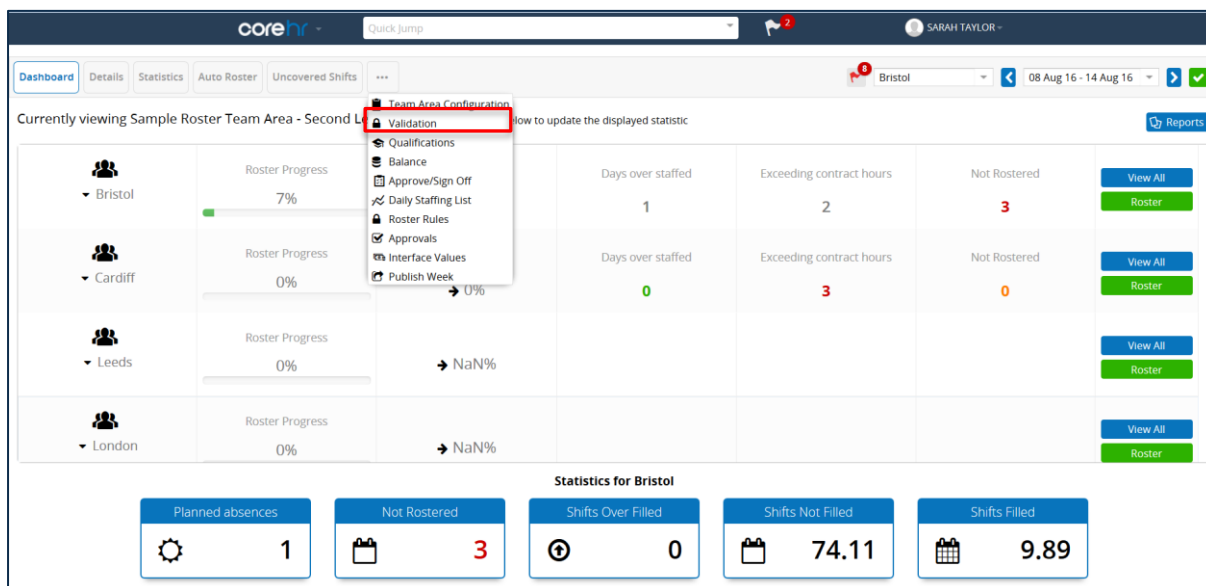

Once the set of Area Rules has been created, they can be assigned to a team area in CorePortal. From the

4. Roster Validation Rules

4.1.1. Assign Validation Rules

The **Validation Rules** screen allows for the creation of roster validation rule templates that will hold the rules which team rosters will be validated against. These validation rules will ensure that the team rosters created are not in violation of the organisational rules that you have defined (e.g. ensure employees do not exceed their contract hours).

- Once a validation rule template has been defined it can be attached to the appropriate 'Team Area(s)' at a later stage.
- To open the validation rule screen, click on the more further information button  and select the Validation option from the list below.

The screenshot shows the CoreHR dashboard interface. At the top, there's a navigation bar with 'corehr' logo, a search bar, and user information 'SARAH TAYLOR'. Below the navigation bar, there's a 'Team Area Configuration' dropdown menu that is open, showing options like 'Qualifications', 'Balance', 'Approve/Sign Off', 'Daily Staffing List', 'Roster Rules', 'Approvals', 'Interface Values', and 'Publish Week'. The 'Validation' option is highlighted. The main content area shows a table of roster progress for different team areas: Bristol (7%), Cardiff (0%), Leeds (0%), and London (0%). To the right of the table, there are statistics for Bristol: Days over staffed (1), Exceeding contract hours (2), and Not Rostered (3). At the bottom, there are five summary cards: Planned absences (1), Not Rostered (3), Shifts Over Filled (0), Shifts Not Filled (74.11), and Shifts Filled (9.89).

- Select from the drop down set of rules you want to review.

4.1.2. Creating Validation Rules

- From the Workforce management screen, click on the  menu button and select the **Validation** option.

The screenshot shows the CoreHR Workforce Management interface. The top navigation bar includes 'Dashboard', 'Details', 'Statistics', 'Auto Roster', 'Uncovered Shifts', and a 'More' menu button (three dots). The 'More' menu is open, showing options like 'Team Area Configuration', 'Validation', 'Qualifications', 'Balance', 'Approve/Sign Off', 'Daily Staffing List', 'Roster Rules', 'Approvals', 'Interface Values', and 'Publish Week'. The 'Validation' option is highlighted with a red box. Below the menu, the 'Currently viewing Sample Roster Team Area - Second L' is displayed. The main content area shows a table with columns for 'Days over staffed', 'Exceeding contract hours', and 'Not Rostered'. The 'Not Rostered' column shows a value of 3 for Bristol. At the bottom, there are statistics for Bristol: Planned absences (1), Not Rostered (3), Shifts Over Filled (0), Shifts Not Filled (74.11), and Shifts Filled (9.89).

- Enter a Roster 'Template Code' and 'Name' or select from a 'List of Rule Codes'

The screenshot shows the 'Validation Rules' screen. At the top, there is a 'Select Template' dropdown menu. Below it, there are buttons for '+ Add New', 'Delete Template', and 'Cancel Changes'. The main area is a table with columns: Code, Name, Severity, Selected, Mandatory, and Weight. A 'New Template' dialog box is open in the center, showing a 'Template Code' field with the value '4' and a 'Name' field with the value 'Liverpool'. There is a 'Save' button at the bottom right of the dialog box. At the bottom right of the main screen, there is a 'Save Changes' button.

- Once it has been created you will be able to select it from the drop down list

There are different types of rules that you can turn on in the validation rules section.

- Validation rules – are the rules applied to the team area on any given day
- Autorostering rules are the validation rules that are checked when the autoroster process is ran
- Uncovered rules are the set of validation rules that the system checks when the autoroster process has been ran and there are still gaps in the roster. These rules are normally more lenient than the autoroster rules.

WFM Roster V26: Team Area and Rule Setup

When the autoroster and uncovered shifts processes are ran we will see these validation rules being applied and based on the rules, each employee will be assigned a score and their status will be set to fail or pass in the uncovered shifts process.

We can see the validation rules being applied also on the 'Dashboard' screen. The colours for each of the columns on this page can be configured so they are red if overstaffed or orange if understaff etc.

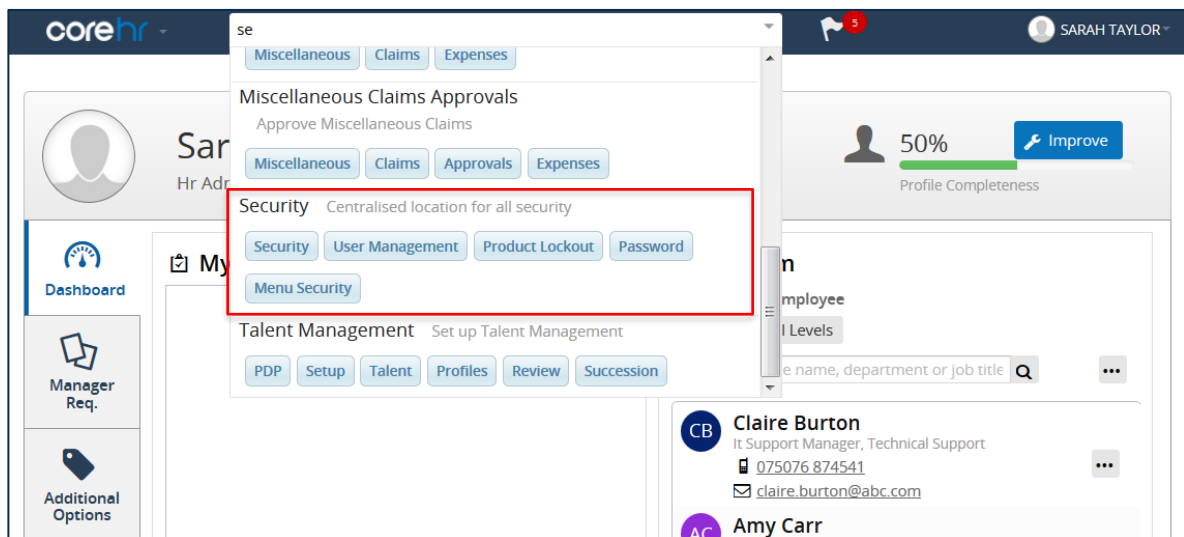

5. User Security Access and Menu Security

To provide a manager with access to Workforce management they will need to have the following:

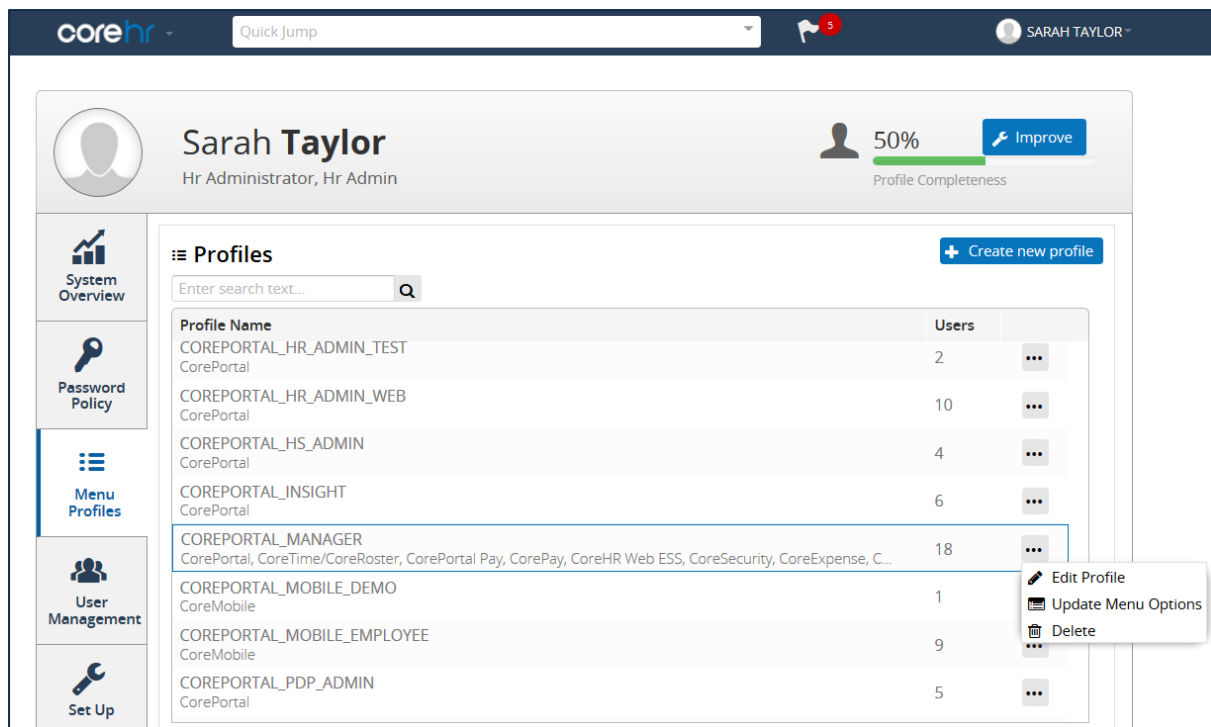

- User Security Menu Access
- Have a portal account attached to their employee number
- Access to team areas on System Users

Access to Workforce Management is controlled via a 'User Security' menu option, the option is called CorePortal - Workforce Management and can be found under the CorePortal Installed Systems.

- From the quick jump drop down menu select the Security option

- Select the **Menu Profiles** tab, search for the manager profile and from the menu option select **Update Menu Options**

5.1.1. System Users Team Area Access

The team areas the employee has access to, are controlled by the team area access as set in **System Users**. All users will need to be set up with access to either, 'Manager Self Service' in Systems Users or set up in 'User Security' to be given access to a team area. All users will need to be assigned to their employee number on the system user's screen.

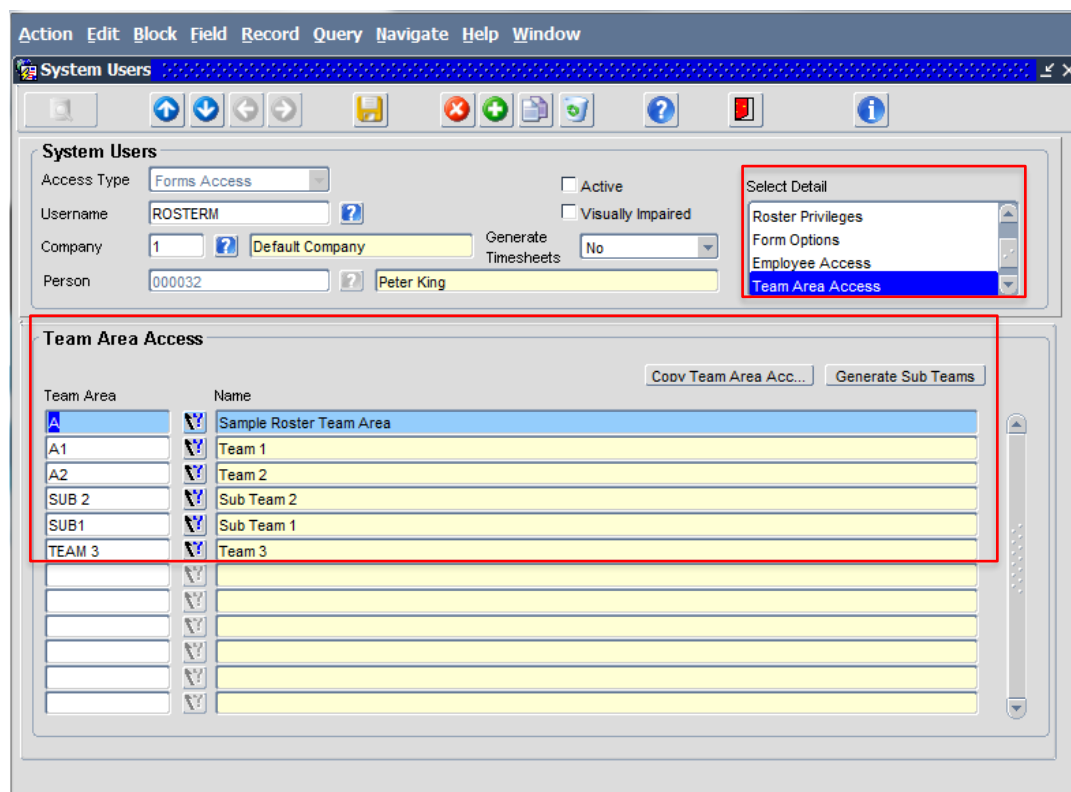

- To give a manager access to a Team Area, go to:
 - **System Params > System Users**

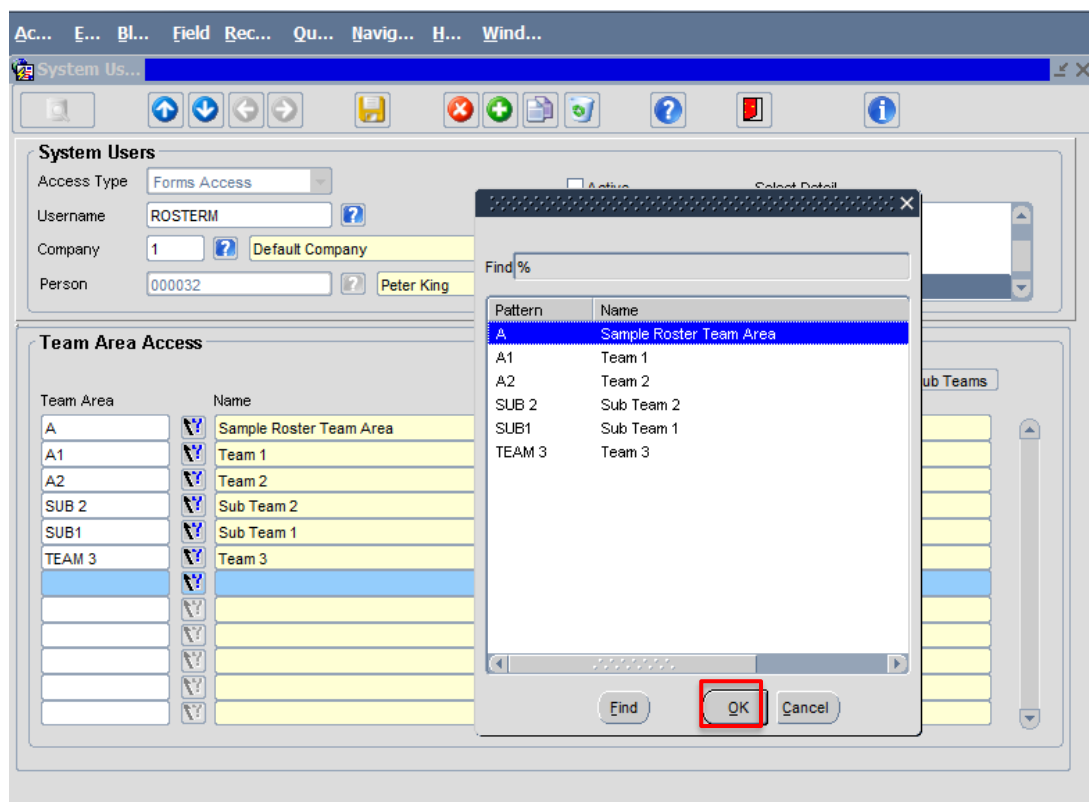

- Enter the username of the employee or click on the search icon and select the user from the list and press OK. In the example below we will search for Peter King.

- From the 'Select Details' section select **Team Area Access**, and the list of all the team areas that the user has access to will appear

- To add another team area, click into the next available line and select the more information icon. A list of all team areas will appear.

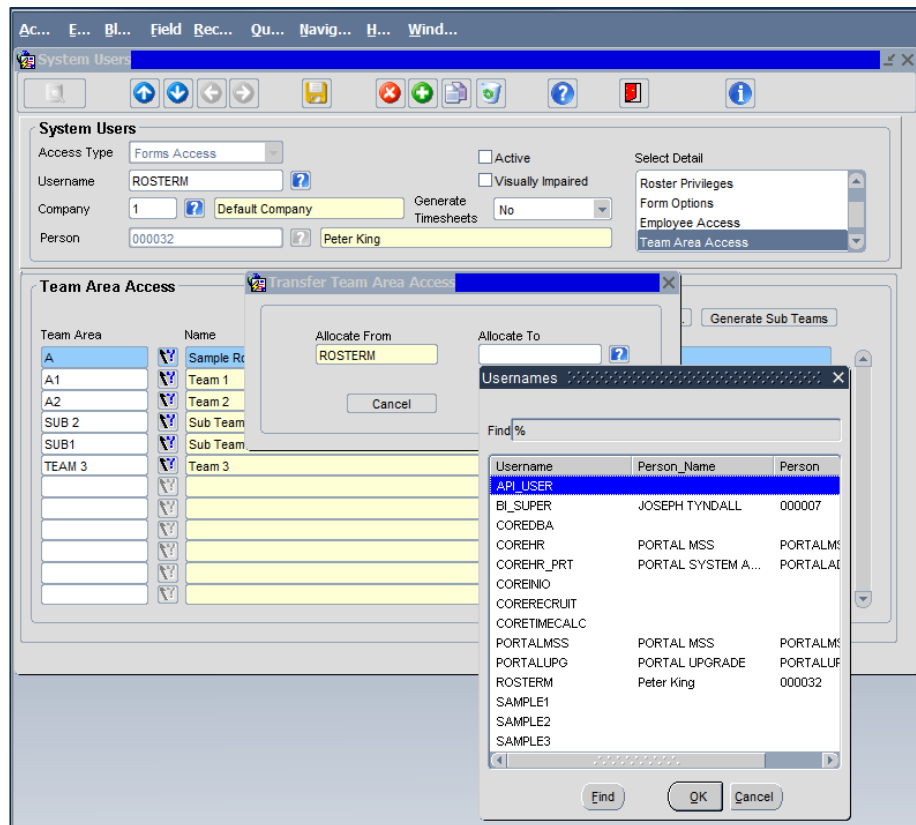

- Select the Team Area you want and press **OK**

- You can transfer team area access from one employee to another or to a new employee by selecting the **Copy Team Area Access** button.

The screenshot shows a software window titled "System Users" with a menu bar (Action, Edit, Block, Field, Record, Query, Navigate, Help, Window) and a toolbar. The "System Users" section contains fields for Access Type (Forms Access), Username (ROSTERM), Company (Default Company), Person (000032), and Peter King. There are checkboxes for Active and Visually Impaired, and a dropdown for Generate Timesheets (No). A "Select Detail" list on the right includes Roster Privileges, Form Options, Employee Access, and Team Area Access (highlighted). Below this is the "Team Area Access" section, which has a "Copy Team Area Acc." button (highlighted with a red box) and a "Generate Sub Teams" button. A table lists team areas and names:

Team Area	Name
A	Sample Roster Team Area
A1	Team 1
A2	Team 2
SUB 2	Sub Team 2
SUB1	Sub Team 1
TEAM 3	Team 3

- Access can be assigned at a higher level in the hierarchy and a user can select the option **Generate Sub Team** to grant the user access to all the sub teams at the point in time. If team areas are subsequently added to the hierarchy, they should be manually added to the employee's access.
- Select the user you want to give team area access to from the drop down list, click **OK** and allocate and they will have access then.

5.1.2. System Users

- The 'System Users' screen controls the system access within Core's Time Management and Roster Management systems. Access to the Time Management system is controlled by restricting a username to work group/department combinations.
- Access to the roster management system is controlled by restricting a username to a defined list of roster team areas.
- Each 'System User' (i.e. manager/supervisor) should only be given access to the 'Work Groups'/'Departments' and roster 'Team Areas' that fall within their remit. This will ensure that each 'System User' will be able to see and manipulate the time & attendance data and roster schedules of his/her staff only while allowing a more senior user to have access to all 'Work Groups'/'Departments' combinations and all roster 'Team Areas'.

The screenshot shows the CoreRoster application interface. At the top is a blue title bar with the "CoreRoster" logo and name. Below it is a menu bar with options: Action, Edit, Block, Field, Record, Query, Navigate, Help, and Window. The main window has a tab titled "System Users". A toolbar below the tab contains various icons for navigation and actions. The "System Users" section includes fields for Access Type (set to "Forms Access"), Username ("USER1"), Company ("1" and "Core International"), and Person. There are also checkboxes for "Active" and "Generate Timesheets" (set to "No"). A "Select Detail" dropdown menu is open, showing options: "Access Details" (selected), "Access Privileges", "Roster Privileges", and "Form Options". Below this is the "Access Details" section, which features two tables. The first table, "Work Group", has one row with "Core Default Work Group". The second table, "Department", has one row with "DEFAULT DEPARTMENT". Both tables have multiple empty rows below them. A vertical scrollbar is visible on the right side of the "Access Details" section.

The screenshot shows the 'System Users' window in CoreRoster. The 'Access Type' is set to 'Forms Access'. The 'Username' is 'USER1', 'Company' is '1', and 'Person' is empty. The 'Active' checkbox is checked. The 'Generate Timesheets' dropdown is set to 'No'. The 'Select Detail' dropdown is set to 'Team Area Access'. The 'Team Area Access' section shows a table with columns 'Team Area' and 'Name'. The first row is 'Team A'. There are 10 empty rows below it. A 'Generate Sub Teams' button is in the top right of this section.

Team Area	Name
A	Team A

Steps in Allocating System User Access

1. Select the 'System Users' option from the 'System Params' Menu.
2. Enter a 'Username' or select from a 'List of Users' 
3. The screen will default to the 'Access Detail' selection. From here, using the 'List of Values' buttons, select the 'Work Group'/'Department' combinations that you wish the 'Username' to have access to for Time and Attendance purposes.
4. Click on the 'Access Detail' selection. From here, using the 'List of Values' button, select the 'Team Area(s)' that you wish the 'Username' to have access to for Roster Management purposes.

Note: If you add a 'Team Area' that has been assigned sub-teams on the 'Area Structure' screen, you can click on the 'Generate Sub Teams' button to automatically insert all the corresponding sub-teams instead of manually adding each sub 'Team Area'.

Click  to save changes &  to quit the screen.

6. Delegation of Team Area Access

Users can delegate their team area access to a colleague, this allows the colleague access to the selected team areas for the selected dates. Once the employee has access to the team on the system date that is checked they will be able to view the team area. If the employee does not have access to the team on the system date they should see the Team Area in the available dropdown list.

Who the user can delegate the Team Area access to is dependent on two items:

- Do I have access to team areas (to ensure I am a manager)
- What level in the hierarchy should I check to see my managers (see below example). Global parameter required to hold the level. Should only check immediately above in the hierarchy to get the employees under that section in the hierarchy.
- For example: if the level was set to level 3 when we go to delegate we would see all employee who have access to a team area and are in the Munster store or sub stores, if this was set to level 2 you would only see other managers within the Waterford or Cork store or sub stores depending on which team you are in.
- All delegation will have a from and a too date for how long the user access can be delegated. The end date can be left open ended if required.

6.1.1. Assign access to the Delegation widget

To display the option in the delegation widget users will need to have the menu option switched on

- Go to the Quick Jump Drop down navigation window select the **Security** dashboard.
- From the **Security** dashboard select the **Menu Profiles** tab

The screenshot shows the CoreHR user interface. At the top, there's a header with the CoreHR logo, a 'Quick Jump' search bar, and a user profile for 'PETER KING'. Below the header, there's a sidebar with navigation options: 'System Overview', 'Password Policy', 'Menu Profiles' (highlighted with a red box), 'User Management', 'Set Up', and 'Web Service Apps'. The main content area is titled 'Profiles' and contains a table of profiles. The 'COREPORTAL_MANAGER' profile is selected, and a dropdown menu is open, showing options: 'Edit Profile', 'Update Menu Options', and 'Delete'. The 'Update Menu Options' option is highlighted.

Select the menu profile that you want to edit and click **Update Menu Options**

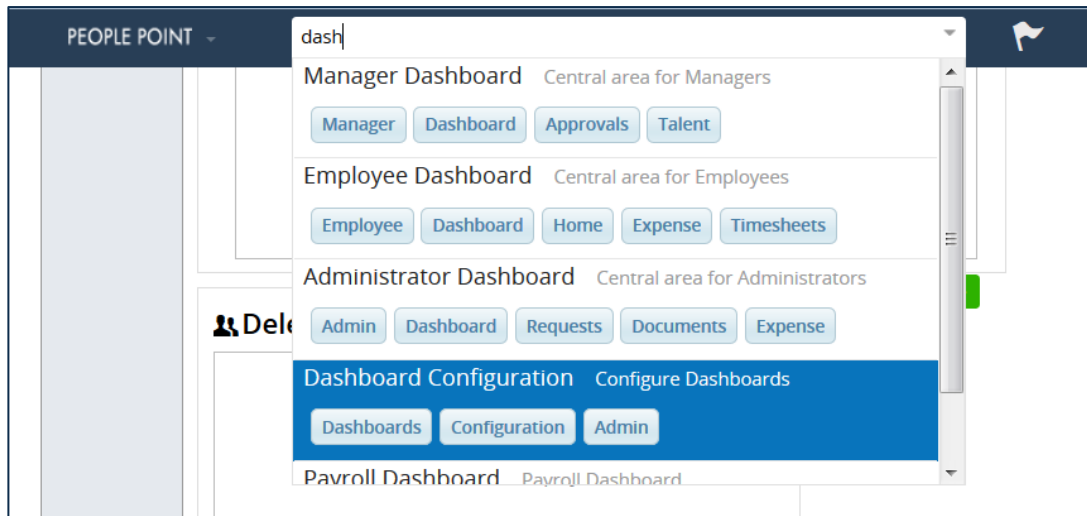

Under the menu profile button select the

The screenshot shows the 'Update Menu Options' dialog box. At the top, there's a 'System' dropdown set to 'CorePortal'. Below it is a search bar with 'team area' entered. To the right of the search bar is a '+ Expand All' button. Below the search bar is a table with two columns: 'Menu Option' and 'Selected'. The table lists several menu options, and the 'Coreportal - Team Area Delegation' option is highlighted with a red box and has its checkbox checked.

Menu Option	Selected
Coreportal - Administrator My Team Area	☐
Coreportal - Manager My Team Area Update	☒
Coreportal - Manager My Team Area View	☒
Coreportal - Team Area Delegation	☒
Coreportal - Team Area Person	☐
Coreportal - Team Area Person Assignment	☐
Events - Access - Team Area	☐

At the bottom right of the dialog box is a green 'Save' button with a checkmark icon.

The Team Area Delegation widget needs to be added to the required Dashboard. To do this go to the quick jump drop down menu and select Dashboard Configuration

Select the Dashboard, next select the Workforce Management Tab and then search for the Delegation widget. Click on the tick box next to the widget and it will be added to the dashboard.

Dashboard Configuration

Select Dashboard: Administrator Dashboard

Widget Catalogue | Add Page Tab

2	Roster Links	← 100% →	⚙️	✅
3	Team Area	← 66% →	⚙️	✅
4	Delegation	← 50% →	⚙️	✅
	360 Reviews	← 100% →	⚙️	❌
	Payroll Widget Admin	← 100% →	⚙️	❌

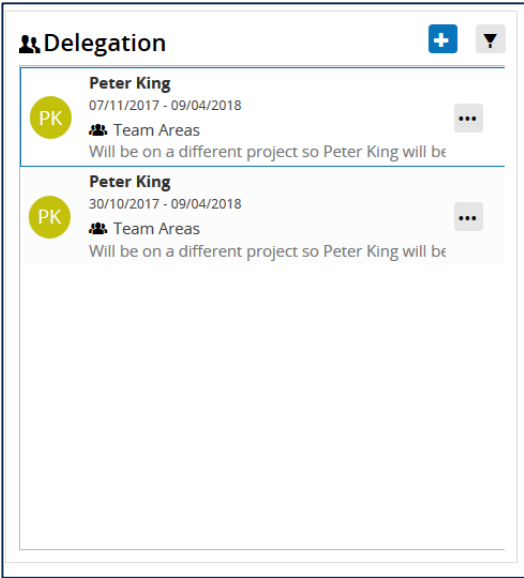

This will allow users to see the option to delegate 'Team Area' on the delegate widget dropdown. If the above menu option is turned off the user will not have the option to see the Team Area option in the delegation widget.

The 'Add Approver Delegation' dialog box contains the following fields and controls:

- Type:** A dropdown menu with options: Team Area, Expense, HourlyTimesheet, Org Role, and Team Area (highlighted).
- To Date:** A date input field with a calendar icon.
- Reason:** A text input field.
- Authorization:** A toggle switch labeled 'I authorise this individual to approve on my behalf'.
- Buttons:** 'Team Areas' (blue), 'Cancel' (grey), and 'Save' (green).

- The manager can now access the Delegation widget from the manager dashboard and delegate access to their employees.

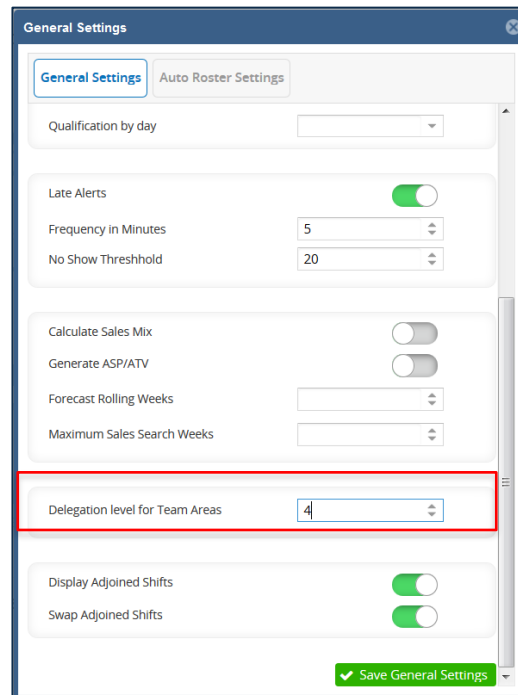

The 'Delegation' widget displays a list of delegation entries for Peter King:

Delegation		
Peter King	07/11/2017 - 09/04/2018	...
Team Areas	Will be on a different project so Peter King will be	
Peter King	30/10/2017 - 09/04/2018	...
Team Areas	Will be on a different project so Peter King will be	

6.1.2. Set the Delegation level

The below needs to be applied, for the user to display in the dropdown list

- The level at which delegation should be applied, is configured on the Roster Admin **Dashboard → General Setting → Delegate Roster Team Area level**.
- The level is based on how far up the Roster Hierarchy that we check to find managers.

The screenshot shows the 'General Settings' window with two tabs: 'General Settings' and 'Auto Roster Settings'. The 'General Settings' tab is active. It contains several sections of settings:

- Qualification by day:** A dropdown menu.
- Late Alerts:** A toggle switch that is turned on.
- Frequency in Minutes:** A numeric input field with the value '5'.
- No Show Threshold:** A numeric input field with the value '20'.
- Calculate Sales Mix:** A toggle switch that is turned off.
- Generate ASP/ATV:** A toggle switch that is turned off.
- Forecast Rolling Weeks:** A numeric input field.
- Maximum Sales Search Weeks:** A numeric input field.
- Delegation level for Team Areas:** A dropdown menu with the value '4' selected. This section is highlighted with a red rectangular box.
- Display Adjoined Shifts:** A toggle switch that is turned on.
- Swap Adjoined Shifts:** A toggle switch that is turned on.

At the bottom right of the window is a green button labeled 'Save General Settings' with a checkmark icon.

- The employee available to select in the dropdown is based on the employees who have access to a team area and are under the specified levels as set on the 'Delegate Roster Team Area' Level.
- If a user is not a manager and they don't have access to team areas they will not be available for selection.
