1. Overview

1.1. Purpose of Guide

The purpose of this document is to provide guidance on the processes and configuration required for *Employee Self Service* widgets, that are used to support *Roster*, on the *Employee Dashboard*.

Employee Self-Service widgets include:

- Work Week
- Calendar
- Unscheduled Shift Widget

1.2. What is included in Roster Employee Self Service?

The *Roster* functionality allows for employees to complete actions via *Employee Self Service*.

These actions are listed below:

- Submit Roster Availability
- Accept/Reject Uncovered Shifts
- Submit Shifts Swap Requests
- View Co-Workers Roster & Leave

2. Roster Availability

2.1. Overview

Roster Availability feeds into the employee's *Roster* contract and can be used when reviewing what times an employee is available to work within a day. This functionality provides employees with the ability to submit their *Roster* availability. This can be used where the employee's availability may vary between weeks. For example, an employee may not be available to work every second Monday.

The submission of availability to work can then be routed through an approval process, or it can directly update the employees' contract, dependant on configuration.

**Note:**

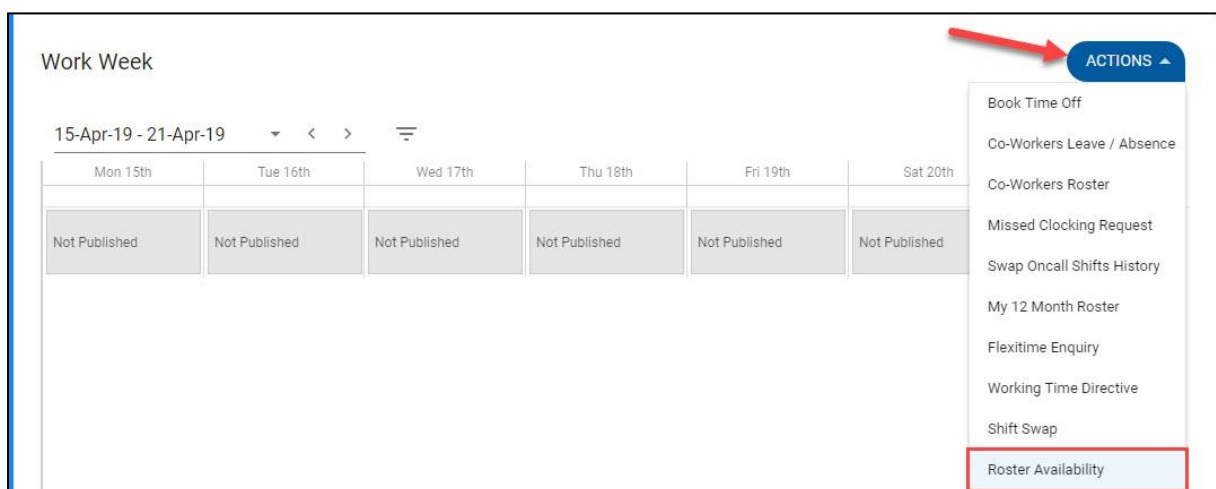

- If the *Roster Availability* approval process is not configured, then no approval process is followed, and the employee's availability submission is saved immediately once submitted.
- It is recommended that all availability submissions are configured to go through an approval process.

2.2. Submit Roster Availability

Roster Availability can be submitted from both the *Calendar* and *Work Week* widgets. In this example, the *Roster Availability* is submitted via the *Work Week* widget.

To submit availability:

1. *Quick Jump to Work Week.*
2. Click the **Actions** button.
3. Select **Roster Availability**.

The *Roster Availability* screen displays.

4. Enter the *Start Date*.

5. Enter the *End date*.

Availability must always be submitted in weekly blocks. However, it is possible to leave the *End Date* blank for open ended availability.

6. Enter the *No of Sundays*. This specifies the max number of Sundays you are able to work.

7. Tick *Late Nights*, if applicable.

This indicates that you are available to work late nights.

The screenshot shows the 'Roster Availability' form. At the top, there's a breadcrumb 'Employee Dashboard > Roster Availability' and a 'HISTORY' button. Below this, there are two date pickers: 'Week Starting *' with the value '15-Apr-2019' and 'Week Ending'. Below the date pickers is the 'Availability Details' section. It contains three fields: 'Max Hours' with a value of '9', 'Number of Sundays' with a value of '1', and 'Late Nights' with a toggle switch that is currently turned on.

8. Enter the *Start Time* and *End Time* for each day you are available to work.

9. Enter the *Start Time* and *End Time* for *Publics Holiday* days, you are available to work.

The screenshot shows the 'Roster Availability' form, specifically the table for daily availability. The table has five columns: 'Day', 'Start Time', 'End Time', 'Split Start Time', and 'Split End Time'. The 'Day' column lists the days of the week from Monday to Sunday, followed by 'Public Holiday'. The 'Start Time' and 'End Time' columns have input fields. The 'Split Start Time' and 'Split End Time' columns have input fields. To the right of each row is a 'CLEAR' button. A red box highlights the 'Start Time' and 'End Time' columns for the first five days (Monday to Friday).

Day	Start Time	End Time	Split Start Time	Split End Time	
Monday	09:00	17:30			CLEAR
Tuesday	09:00	17:30			CLEAR
Wednesday	09:00	17:30			CLEAR
Thursday	09:00	17:30			CLEAR
Friday	09:00	17:30			CLEAR
Saturday					CLEAR
Sunday					CLEAR
Public Holiday					CLEAR

10. Enter the *Split Start Time* and *Split End Time*, if applicable.

Split Shifts allows employees to submit two timeslots for the one day. For example, the employee may be available to work from 09:00 to 13:00 and 15:00 to 17:30.

SAVE

Note:

The *Number of Sundays* and *Late Nights* options are controlled by a *CorePortal* parameter, on *Site Manager > Admin Settings*, called:

- **cp_roster_avail**

If set to 'Y', this displays the *Number of Sundays*, and available for *Late Nights* options. If set to 'N', these options are not visible on screen.

The *Public Holidays* fields are controlled by a *CorePortal* parameter, on *Site Manager > Admin Settings*, called:

- **cp_roster_pubholiday**

If set to 'Y', this displays the *Public Holidays* times on the *Roster Availability* screen. If set to 'N', these times are not visible on screen.

2.2.1. Considerations

The considerations listed below should be taken into account regarding *Roster Availability*:

- The *Roster Availability* function can override availability for one week or multiple weeks at a time, dependant on whether an *End Date* has been entered.
- If open-ended availability is approved, any currently open availability has an *End Date* assigned to them. This is the *Start Date* of the new contract, minus one day.
- If no contracted availability exists for an employee, it is possible to submit open-ended availability for multiple cycles, this creates a new row on the employees *Roster Contract*, once approved.
- If an employee is overriding their availability, or submitting a new request, it is not possible to override availability where the *Start Date* is the same as an existing contract *Start Date*.

2.3. Cycle Availability

It is possible for you to update *Cycle Availability* within the system. This feature is used where an employee's availability may vary between weeks. For example, an employee may not be available to work every second Monday. Therefore, it is possible to add a *Week Starting* date within the system, this date is the start date for *Cycle 1*. By adding a *Cycle 2*, you are then adding your availability times to work for the following week.

2.3.1. Switch On Cycle Availability

The *Cycle Availability* option is controlled by the following CorePortal parameter on *Site Manager > Admin Settings*:

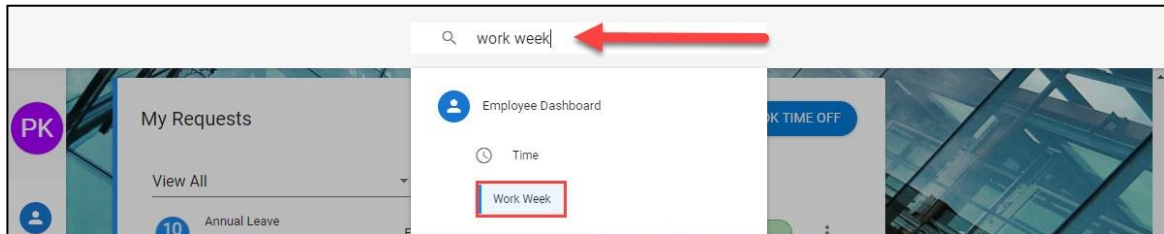

Admin Setting	Explanation
cp_rost_avail_cyc_cntrct	Displays the <i>Cycle Availability</i> option on the <i>Roster Availability</i> screen. This must be set to 'Y' for the option to be visible.

2.4. Availability History

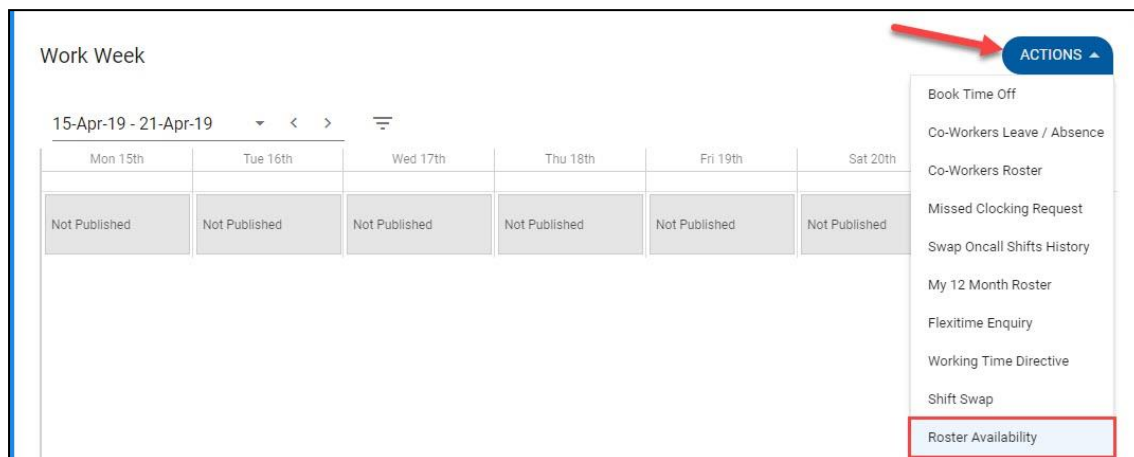

It is possible for employees to view pending *Roster Availability* requests via the *Availability History* screen. This history shows a list of all availability requests and their status.

To view *Availability History*:

1. Quick Jump to Work Week.

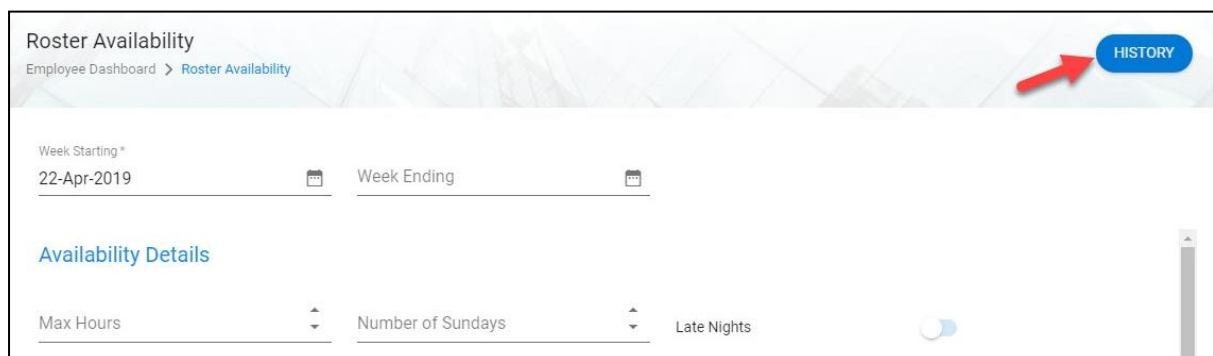

2. Click the **Actions** button.
3. Select **Roster Availability**.

The *Roster Availability* screen displays.

4. Click **History**.

The *Availability History* screen displays. Here you can view all *Roster Availability* submissions, and their status.

5. Click **View**, on the applicable record.

Availability History			
Employee Dashboard > Roster Availability > Availability History			
Start Date	End Date	Status	
11-Jul-2016	17-Jul-2016	Approved	VIEW
08-May-2017		Approved	VIEW
04-Feb-2019	10-Feb-2019	Approved	VIEW
15-Apr-2019	28-Apr-2019	Pending	VIEW

The *Availability Details* screen displays.

This screen shows details regarding the submission for availability.

Availability History			
Employee Dashboard > Roster Availability > Availability History > Availability History

Max Hours	Number of Sundays	Late Nights	
9	1	☐	
Day	Start Time	End Time	Split Start Time
Monday	09:00	17:30	13:00
Tuesday	09:00	17:30	
Wednesday	09:00	17:30	

2.4.1. Availability History User Access

Access to the *Availability History* screen can be controlled by the menu options listed in the table below:

System	Menu Option	Explanation
CorePortal	Hide Employee Availability History	If this menu option is enabled, the <i>Availability History</i> is not displayed for employees.
CorePortal	Hide Manager Availability History	If this menu option is enabled, the <i>Availability History</i> is not displayed for managers.

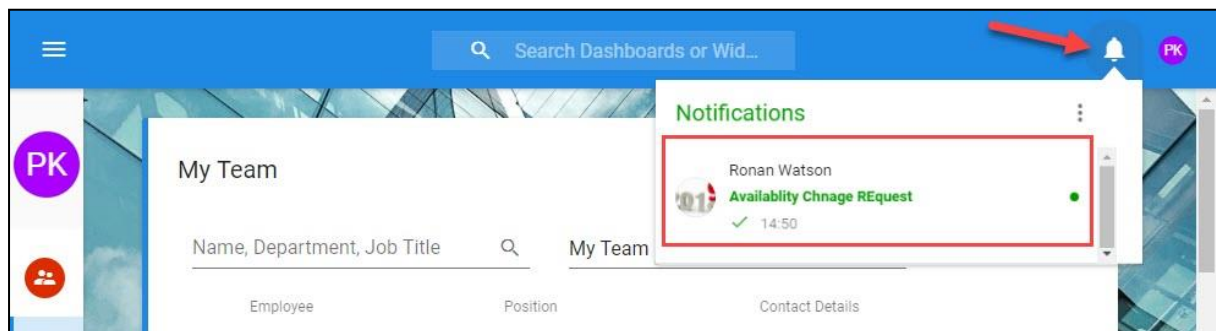

2.5. Approval Process

It is possible for availability submissions to be routed to managers for approval. The approval process follows the same workflow as your *Work Group approvals Organisation Role* configuration.

It is possible for managers to approve the *Roster Availability* from the *My Approvals* screen, accessible from the *Notification Centre*, or the *My Approvals Notifications* widget. Once approved, the *Roster Availability* is then updated on the employee's contract and is picked up by rostering while looking at the *Availability - Validation Rules*.

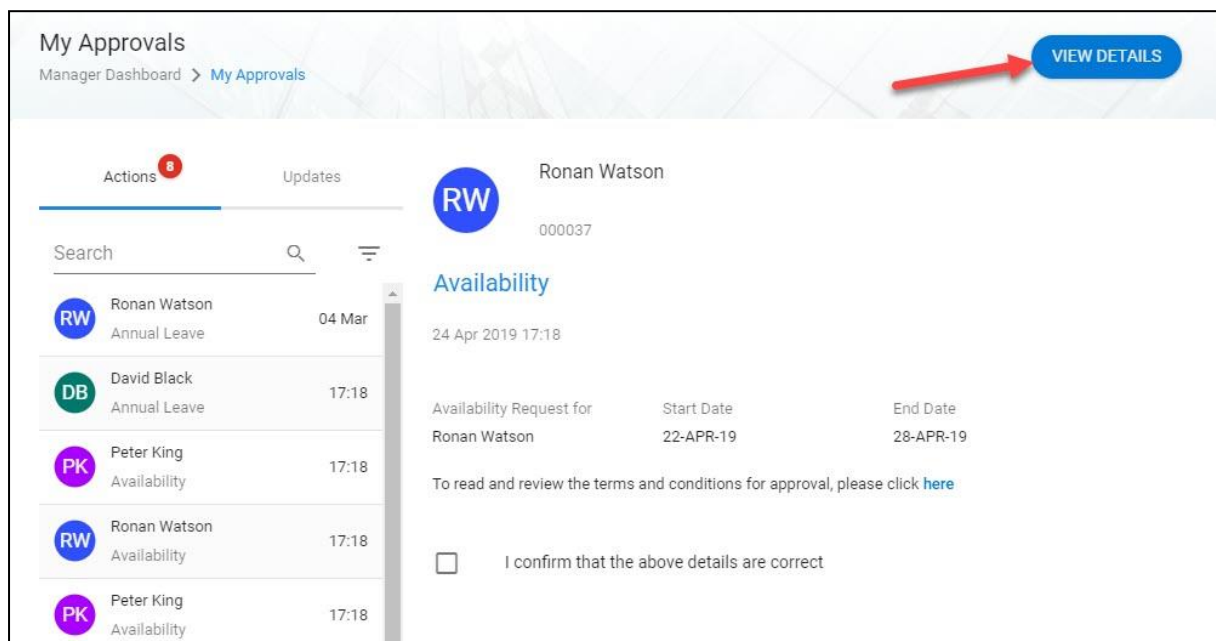

To approve an *Availability Request*:

1. Click the Notifications button .
2. Select the **Availability Change Request** notification.

The *My Approvals* screen displays.

3. Click **View Details**.

The *Availability* details are displayed on screen for review.

- Once reviewed, click the **My Approvals** breadcrumb.

REJECT APPROVE

The *Approval* is now successfully updated and the employee's *Roster Contract* is updated. If a request is rejected, the employee's *Roster Contract* is not updated and the employee is notified that their request has been rejected.

2.5.1. Roster Availability Approval Configuration

To configure the approval process:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Roster Parameters > System Parameters*.
2. Select the **Approvals** tab.
3. Tick the *Employee Availability Approval Process* indicator.
4. Enter the *Availability Process Code*.

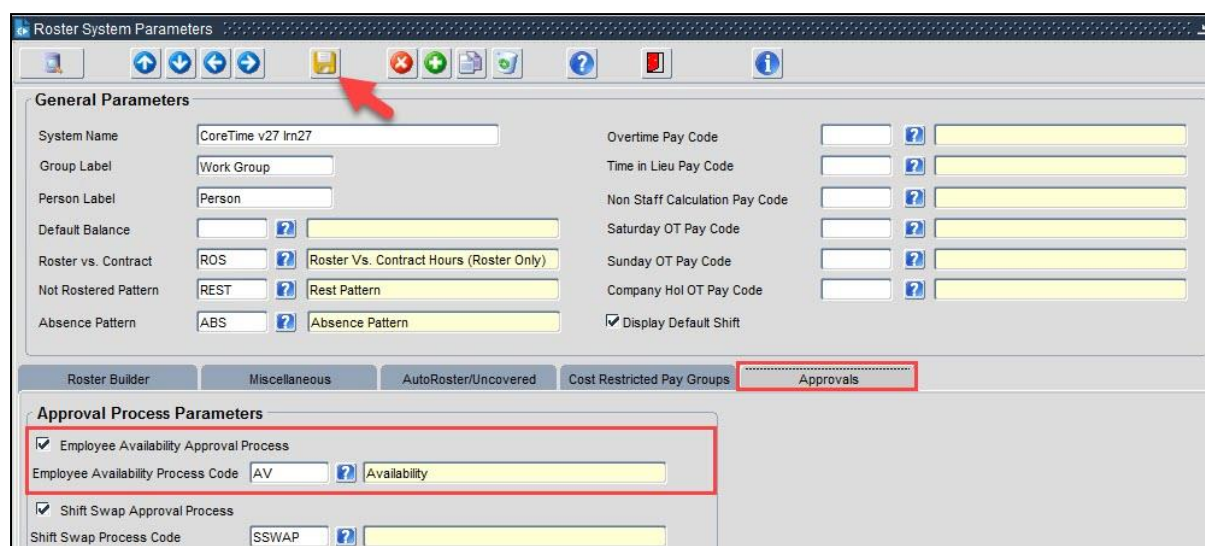

The workflow process should be set up as a standard CoreHR Workflow i.e.

Back Office > CoreHR > CoreHR > Event Management > HR Process Configuration.

The *Availability* workflow process category is called 'EAVL'.

Enter the process code that you have created there.

5. Click the  button to save.

2.6. Roster Availability User Access

The below menu options control the **Roster Availability** option on the *Calendar* and *Work Week* widgets for employees and managers.

System	Menu Option	Explanation
CorePortal	CorePortal - Employee Availability Request	If this menu option is enabled, employees have access to submit <i>Roster Availability</i> .
CorePortal	CorePortal Employee Availability Approval	If this menu option is enabled, managers have access to submit <i>Roster Availability</i> .

3. Shift Swap

3.1. Overview

It is possible for employees to submit a request to swap a shift with another team member. Employees can also accept or reject a request for a *Shift Swap* with another employee. In order for the *Shift Swap* to be successful, managers must first approve a request for a *Shift Swap*. The *Shift Swap* approval workflow is as follows:

1. Employee 1 submits a *Shift Swap* with employee 2.
2. Employee 2 is notified of the swap, and then accepts or reject the *Shift Swap*.
3. If employee 2 accepts the *Shift Swap*, then the swap notifies the manager of employee 2.
4. If the manager approves the *Shift Swap*, the *Roster* is then update for employee 1 and employee 2, to reflect the *Shift Swap*.
5. When the status of the swap changes to approved or rejected, both employees are updated of the approval/rejection.

**Note:**

- The *Shift Swap* workflow process category is called 'SSWAP' and is configured the same as any other workflow process.
- The *Shift Swap* functionality is only available in *Roster* and is not available in a standalone *Time and Attendance* site.
- Manager approval only kicks in if the workflow is attached in *Roster System Parameters*.
- If *Validation Rules* are applied, only employees with a valid rule are available for selection in the drop-down list.
- It is possible for an employee to cancel a *Shift Swap*, if they have initiated the swap. However, it is not possible to cancel the swap once the request has been accepted by the receiving employee.

3.2. Shift Swap Process

3.2.1. Submit a Shift Swap

Shift Swaps can be submitted from both the *Calendar* and *Work Week* Widgets. In this example, the *Roster Availability* is submitted via the *Work Week* widget.

To submit a *Shift Swap*:

1. *Quick Jump to Work Week*.
2. Click the **Actions** button.

3. Select **Shift Swap**.

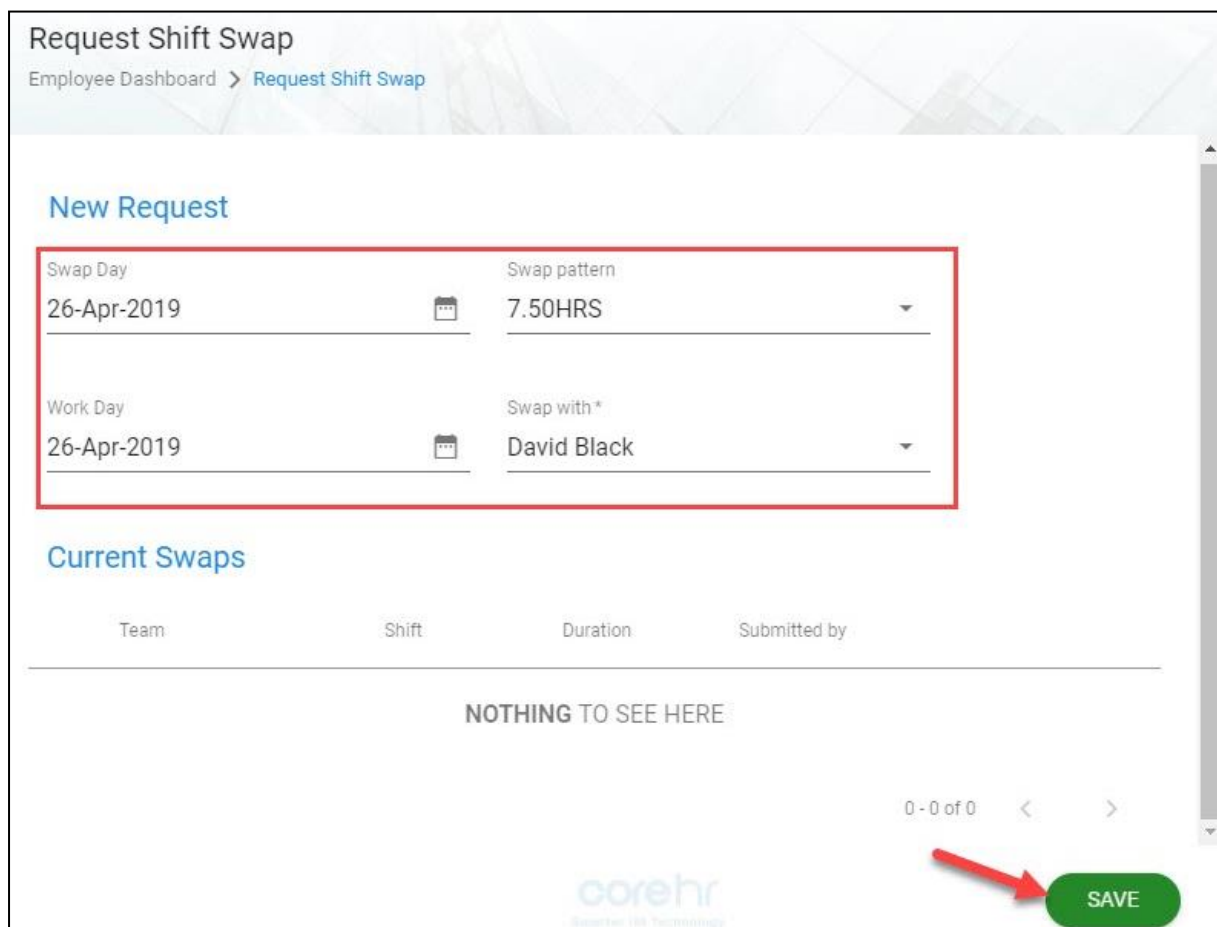

The screenshot shows the 'Work Week' interface with a calendar for the period 22-Apr-19 to 28-Apr-19. The calendar displays shifts for 'London' from 09:00 - 17:30. An 'ACTIONS' menu is open on the right, listing various options: Book Time Off, Co-Workers Leave / Absence, Co-Workers Roster, Swap Oncall Shifts History, My 12 Month Roster, Working Time Directive, and Shift Swap. The 'Shift Swap' option is highlighted with a red box and a red arrow points to the 'ACTIONS' button.

The *Request Shift Swap* screen displays.

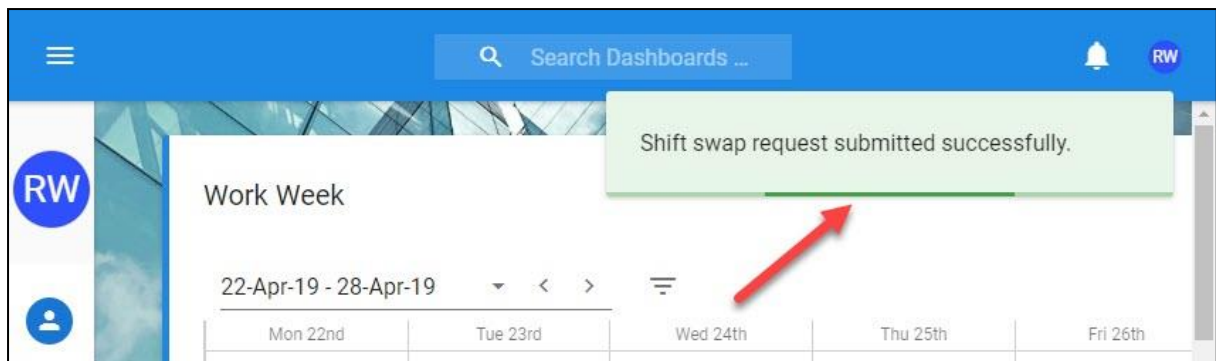

4. Enter the *Swap Day*.
 5. Enter the *Swap Pattern*.
 6. Enter the *Work Day*.
 7. Select the applicable employee from the *Swap with ** drop-down list.
- In this example, the employee has selected 'David Black' to *Shift Swap* with.

8. Click **Save**.

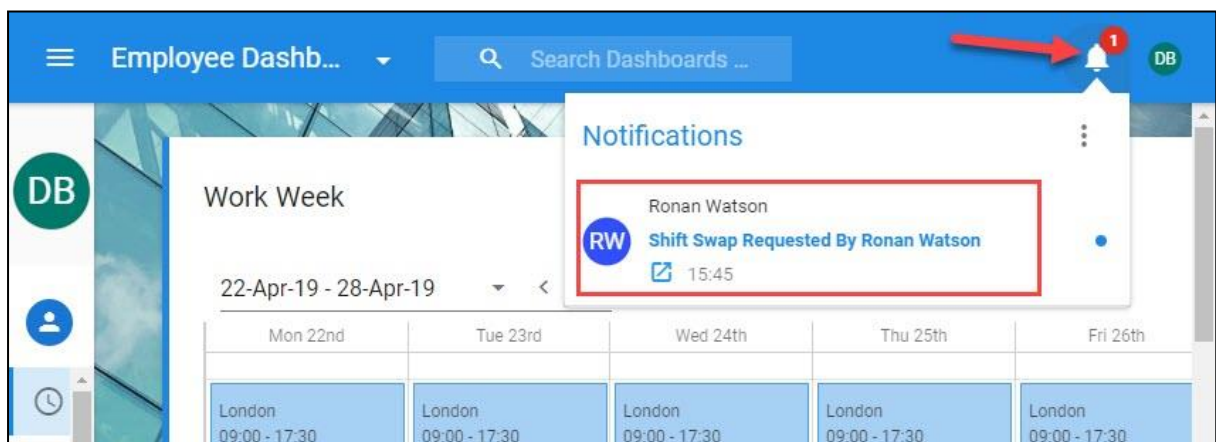

The screenshot shows the 'Request Shift Swap' form. The 'New Request' section contains four fields: 'Swap Day' (26-Apr-2019), 'Swap pattern' (7.50HRS), 'Work Day' (26-Apr-2019), and 'Swap with*' (David Black). The 'Current Swaps' section is empty, displaying 'NOTHING TO SEE HERE'. A red arrow points to the 'SAVE' button at the bottom right.

The *Shift Swap* is now successfully submitted.

The employee 'David Black' now receives a notification to accept the *Shift Swap*.

3.2.2. Accept a Shift Swap

To **Accept** a *Shift Swap*:

1. *Quick Jump to Work Week.*
2. Click the **Actions** button.
3. Select **Shift Swap**.

The *Request Shift Swap* screen displays.

- Click **View** on the *Shift Swap* request.

Shift Swap Approved

Your Shift Swap Request For 26-Apr-19 Has Been Approved By A Manager.

OK

3.3. Configure Shift Swaps

3.3.1. Employee User Access

In order for employees to submit and accept *Shift Swaps*, either of or both of the below widgets must be configured to appear on the *Employee Dashboard*:

- Calendar
- Work Week

In addition to the above widgets, employees must have the below *Menu Options* enabled on their *Menu Profile*:

System	Menu Option	Explanation
CorePortal	Coreportal – Calendar – Time	Allows access to the <i>Calendar</i> widget.
CorePortal	CorePortal – Work Week – Time	Allows access to the <i>Work Week</i> widget.
CorePortal	Coreportal – Roster Employee Shift Swap	Allows access to the <i>Shift Swap</i> button.

3.3.2. Manager User Access

In order for managers to view and approve *Shift Swap* requests, they must have access to the *Notification Centre*, or the *My Approvals Notifications* widget must be configured to appear on the *Manager Dashboard*.

In addition to the above, managers must have the below *Menu Options* enabled on their *Menu Profile*:

System	Menu Option	Explanation
CorePortal	CorePortal Shift Swap Approval	Allows access to <i>Approve Shift Swaps</i> .
CorePortal	CorePortal Workforce Management – Manager Shift Swap History	Allows access to the <i>Shift Swaps History</i> screen.
CorePortal	CoreTime ESS – Shift Swap History	Allows access to the <i>Shift Swaps History</i> screen.
CorePortal	Widget - Manager - My Approvals	Allows access to the <i>My Approvals Notifications</i> widget.

3.3.3. Shift Swap Approval Configuration

To configure the approval process:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Roster Parameters > System Parameters*.
2. Select the **Approvals** tab.

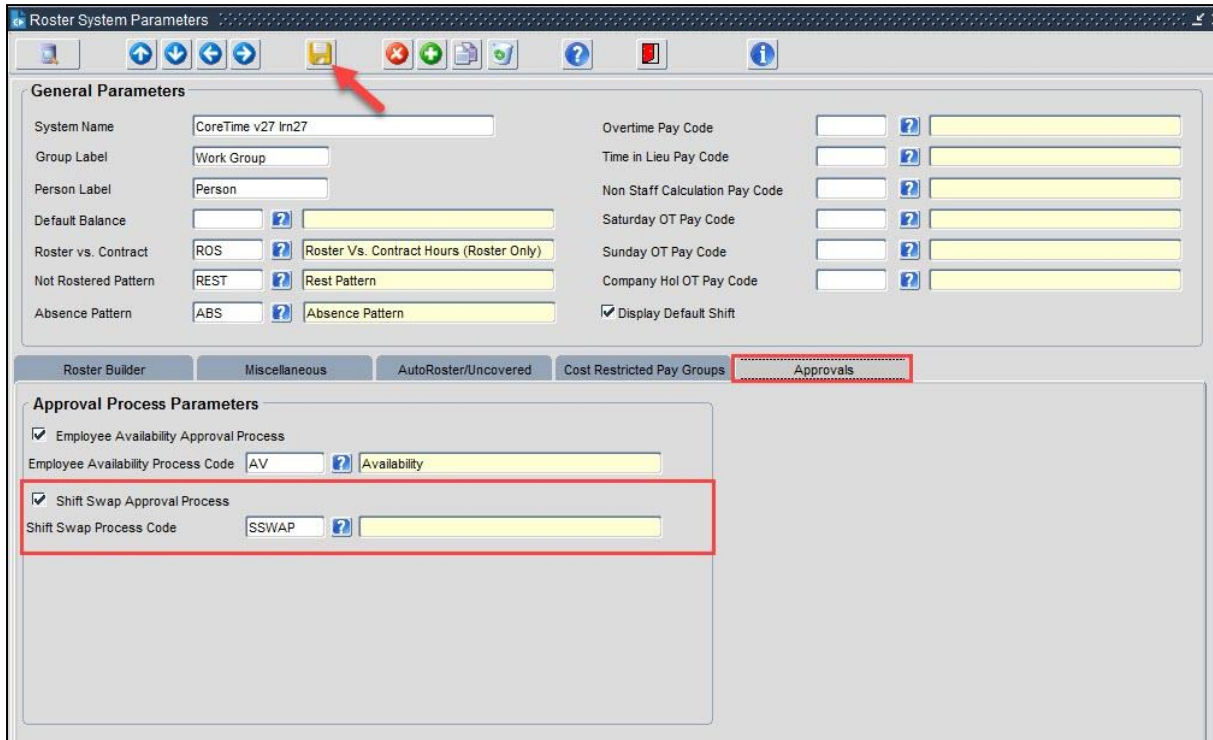

3. Tick the *Shift Swap Approval Process* indicator.
4. Enter the *Shift Swap Process Code*.

This *Shift Swap Process Code* is configured as per all other *Process Code Workflows* in:

- a. *Back Office > CoreHR > CoreHR > Event Management > HR Process Configuration*.

The *Shift Swap* workflow process category is called 'SSWAP'.

5. Click the  button to save.

3.4. Shift Swap Validation Rules

3.4.1. Overview

It is possible for *Shift Swap* specific *Validation Rules* to be assigned to *Team Areas*.

It is also possible to configure *Shift Swap Validation* to determine at which process in the workflow the *Validation Rules* are applied.

For further information, view the General Roster Configuration training material on CoreHR University.

3.4.2. Shifts Swap Validation Rules Reference

The following table details some common *Shift Swap - Validation Rules* that can be assigned to *Teams Areas* within *Roster*.

Shift Swap Validation Rule	Explanation
4002 Contract Hours Breach	Neither requester or target will exceed their weekly contracted hours with the shift swap.
4015, 4016, 4017 Work time Directive rules	Neither requester or target breaches the work time directive rules defined for the company.
4022 Cannot swap with a person on Leave	Employees who have scheduled leave periods on the swap date will not appear in the list.
4024 Overlapping Shifts	Employee cannot propose a swap to another employee where the target employee or the requester would inherit a pattern that overlaps with their pattern for that day.
4039 Max 39 hours	Neither requester or target will have rostered hours exceeding 39 hours for the week after the swap.
4502 Recommended team areas	Employee can propose a swap to another employee in another team area if that team area is designated as a recommended team for the home team area.
4533 Under contract hours	Neither the requester or target will be under their contracted weekly hours after the swap.
4551 Job Deviation	The target employees must have the same job title as the requester in order to appear in the list of eligible employees.
4000 Valid Work Pattern	Shift Swap Valid Work Permit ensures employee involved in the swap has a valid work pattern
4001 Outside Availability	Ensures the swap will not roster the employee for time outside of their specified available times.
4003 Contract Daily Hours	Ensures either employee involved in the swap will not exceed their daily roster contract hours as specified on their Roster contract if the swap is completed.
4004 Contract Rostered Hours	Ensures either employee involved in the swap will not exceed their contract rostered days as held on their Roster contract if the swap is completed.
4005 Late Nights	Ensures either employee involved in the swap will not breach their late-night rules as held on their Roster Contract.
4006 Number of Sundays	Ensures either employee involved in the swap will not breach their Number of Sundays rules as held on their Roster Contract.
4008 Available Times	Ensures either employee involved in the swap will not be working outside of their available times on their Roster Contract.
4010 Maximum Basic Hours	Ensures either employee involved in the swap will not be working more than their Maximum Basic Hours as held on their Roster Contract.

Shift Swap Validation Rule	Explanation
4012 Match Job Titles	Ensures either employee involved in the swap both have the same job titles.
4021 Contracted Pattern Only	Only allows employees swap their Primary pattern.
4026 Max Contract Hours	Ensures either employee involved in the swap will not exceed their Max Contract Hours.
4028 Exclude Day Off Request	Ensures employees with a day off requested can't be involved in a swap.
4029 Consecutive Work Day	Ensures the swap will not involve either of the two employees exceeding their consecutive work days.
4031 Max overnights in a week	Ensures the swap will not involve two employees exceeding their max overnights in a week.
4032 ¼ Saturdays off for managers	Ensures the swap will not involve two employees exceeding 1 in 4 Saturday off in a week.
4033, 4034, 4035	Checks the WTD break rules.
4036 Min 1 Sunday Month for Manager	Ensures the swap will not involve either employees breaking the 1 Sunday a month rule for managers.
4037 Split Shifts	Ensures the swap will not result in either employee having a split shift.
4040,4039 Max Hours	Ensures the swap will not result in either employee working more than 37.5 or 39 hours.
4041 Min Daily Hours	Ensures the swap will not result in either employee working less than their minimum hours.
4501 Cannot swap between days	Stops users from completing a swap between two days.

4. Uncovered Shifts

4.1. Overview

As per guidance in the Roster CorePortal Administration training material on CoreHR University, *Uncovered Shifts* give a breakdown of all the staffing gaps for the week, based on the rules assigned to the *Team Area* versus the employees that have been rostered. These *Uncovered Shifts* can then be published out to employees, who can accept shifts on a first accept first rostered basis.

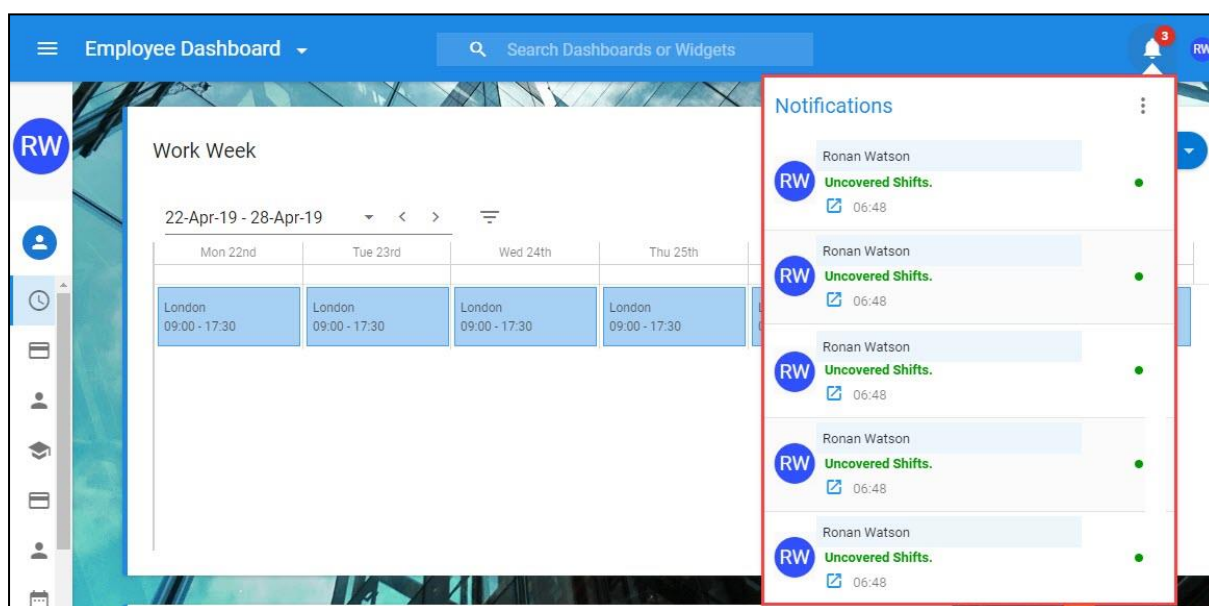

Note:

- There is no approval process for *Uncovered Shifts*, once a shift is accepted by an employee, the employee is rostered onto that shift.
- It is possible to first select who you want to *Publish Uncovered Shifts* to by selecting the employees by name. You can then later publish the *Uncovered Shifts* to the full *Team Area* if the shift has not been accepted by one of the initial employees.

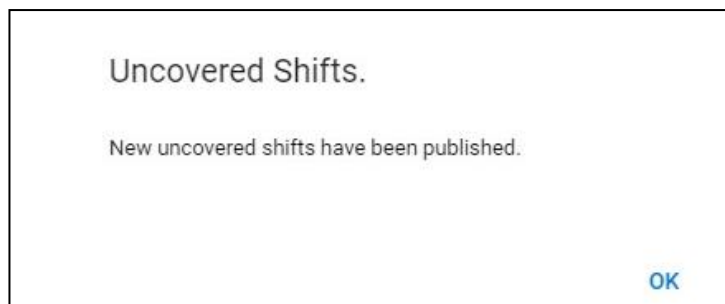

4.2. Viewing Published Shifts

Once an *Uncovered Shift* is published, and the selected employee has passed the applicable *Uncovered Shift - Validation Rules*, that have been assigned to the *Team Area*, it is then possible for the employee to view the shifts on the *Unscheduled Shift Widget*. Employees can then **Accept** or **Reject** the shift. When an *Uncovered Shift* is published to you, a *Notification* is received.

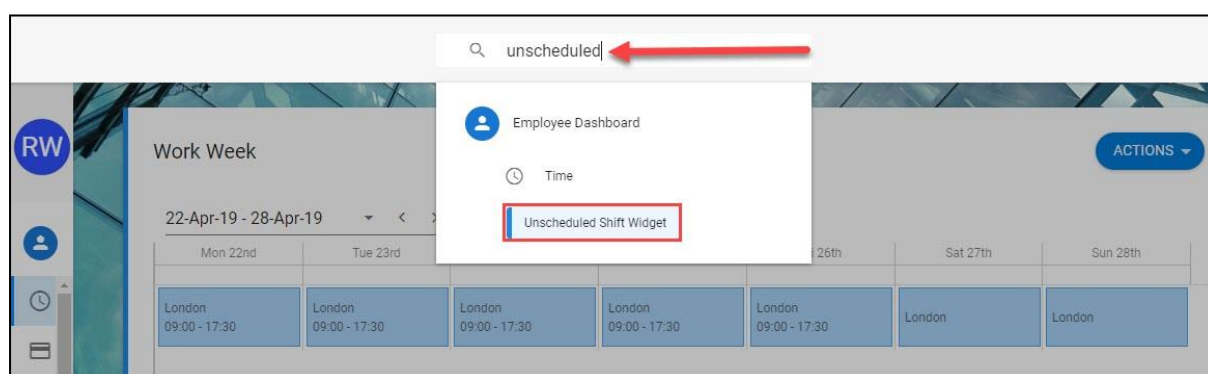

1. Click the *Notifications* button .
2. Select the **Uncovered Shifts** notification.

The *Notification* appears on screen, detailing that new *Uncovered Shifts* have been published to you.

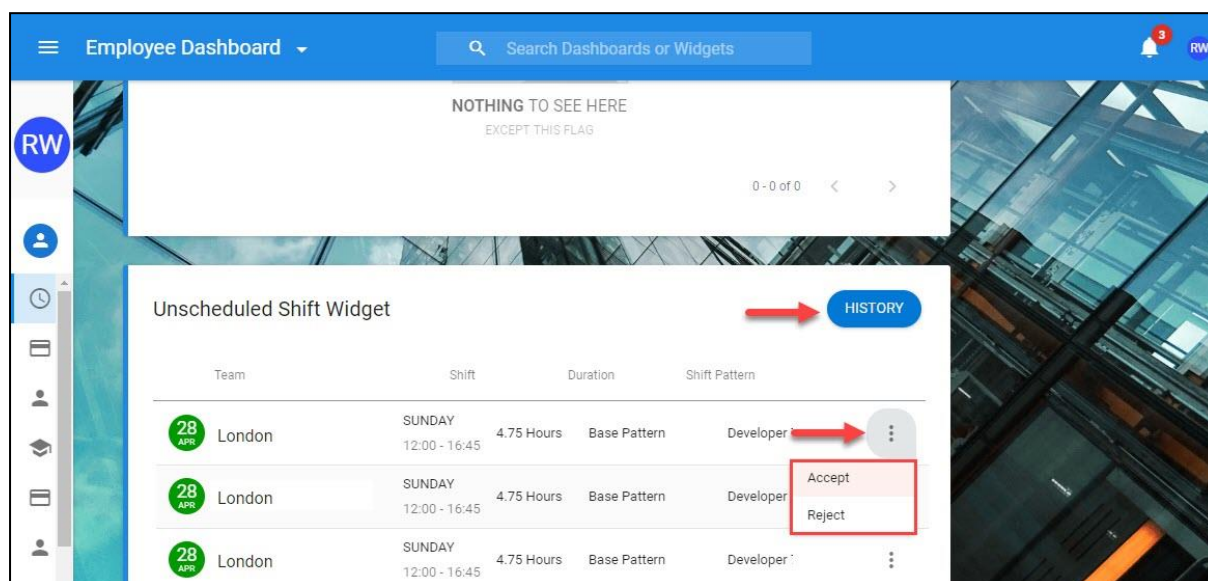

3. Quick Jump to the *Unscheduled Shifts Widget*.

The *Unscheduled Shift Widget Displays* on screen.

Here it is possible to:

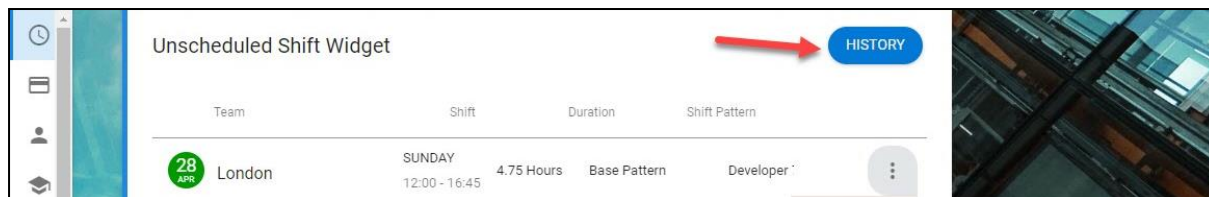

- View All Uncovered Shifts that have been published to you
- View your history of Accepted Uncovered Shifts
- Accept Uncovered Shifts
- Reject Uncovered Shifts

4.2.1. Uncovered Shift History

To view your history of all *Uncovered Shifts* that have been publish to, and accepted by you:

1. On the *Unscheduled Shift Widget*, click **History**.

The *Uncovered Shift History* screen displays.

Here you can view shifts you have previously accepted.

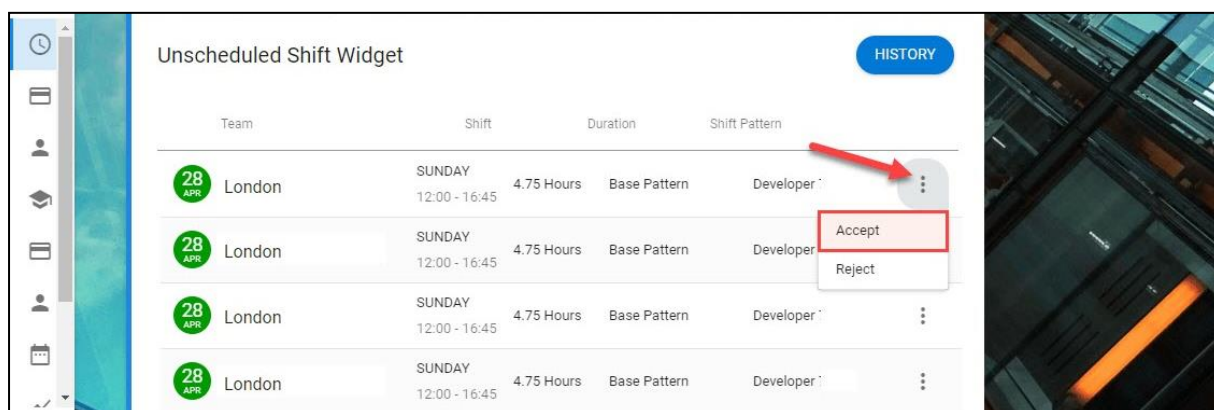

Uncovered Shift History				
Employee > Uncovered Shift History				
Team	Shift	Duration	Shift Pattern	Person
28 APR London	SUNDAY 12:00 - 16:45	4.75 Hours	BASE	Ronan Watson
22 APR London	MONDAY 09:00 - 17:00	8 Hours	7.00HRS	Ronan Watson

4.2.2. Accepting Published Shifts

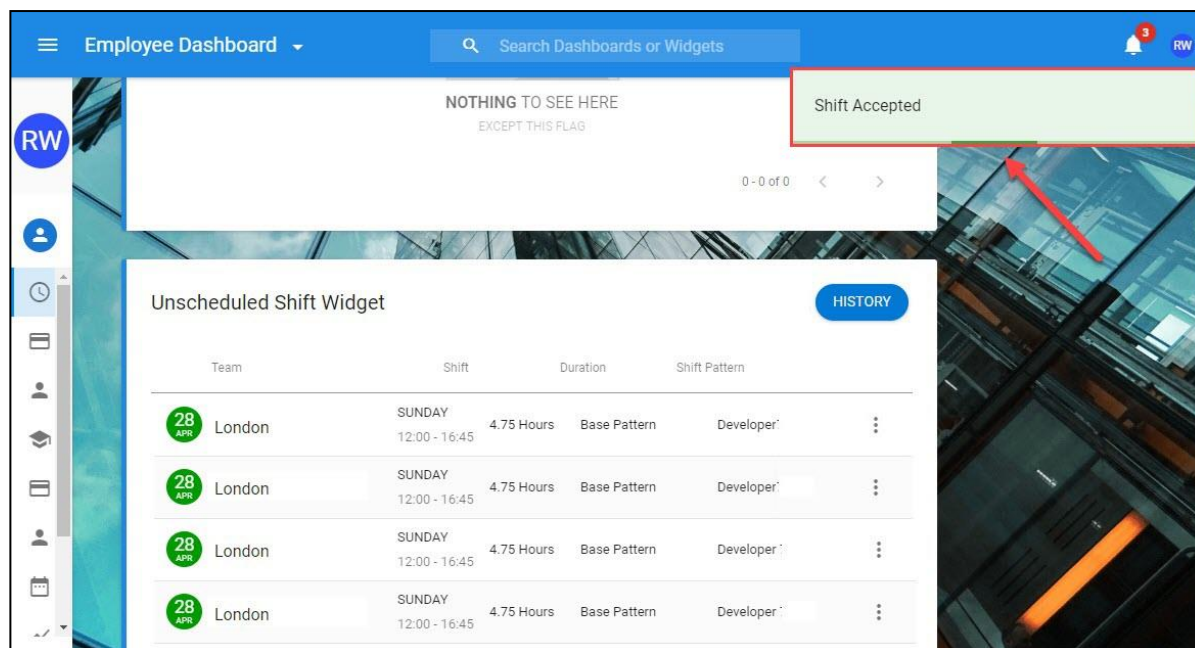

If you accept an Uncovered Shift, this shift is then automatically added to your schedule. This overrides your current shift on the day. Shifts are accepted on a first accept, first rostered basis. If another employee has accepted a shift also published to you, you can view this detail and the employee who has accepted the shift, via the *Uncovered Shift History* screen.

To accept an *Uncovered Shift*:

1. On the *Unscheduled Shift Widget*, click the  button.
2. Select **Accept**.

The *Uncovered Shift* is now accepted and automatically assigned to your roster for that day.

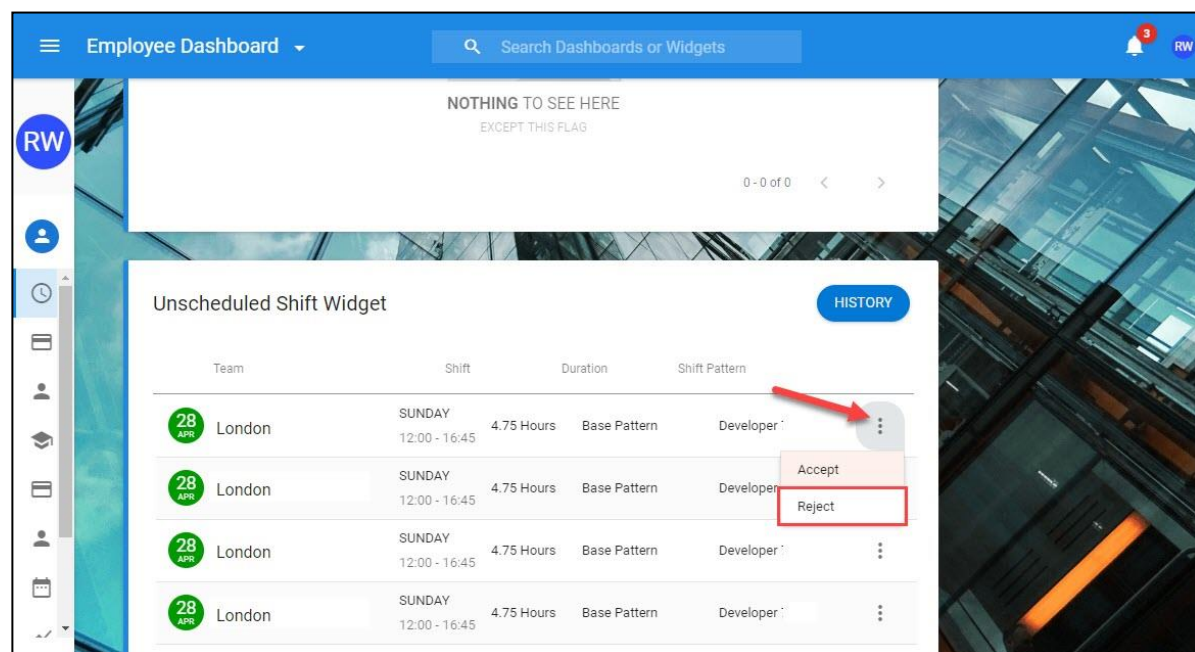

4.2.3. Rejecting Published Shifts

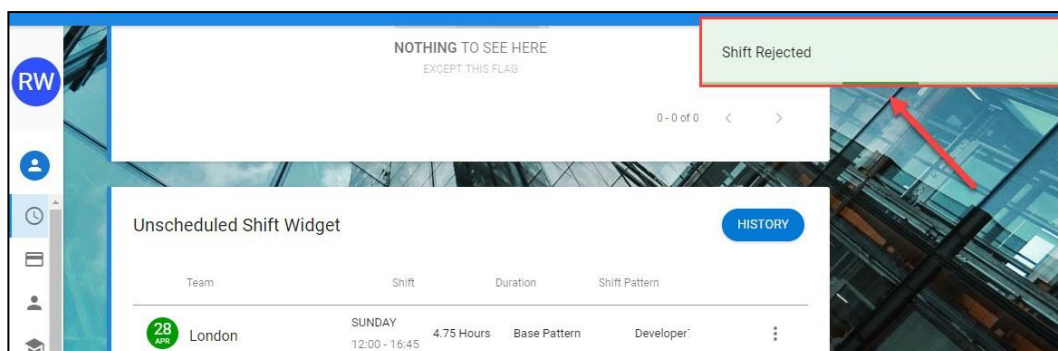

If you reject an *Uncovered Shift*, the shift is no longer visible on your *Unscheduled Shifts Widget* to accept at a later stage. The shift is still available for other employees to accept or reject.

To reject an *Uncovered Shift*:

1. On the *Unscheduled Shift Widget*, click the  button.
2. Select **Reject**.

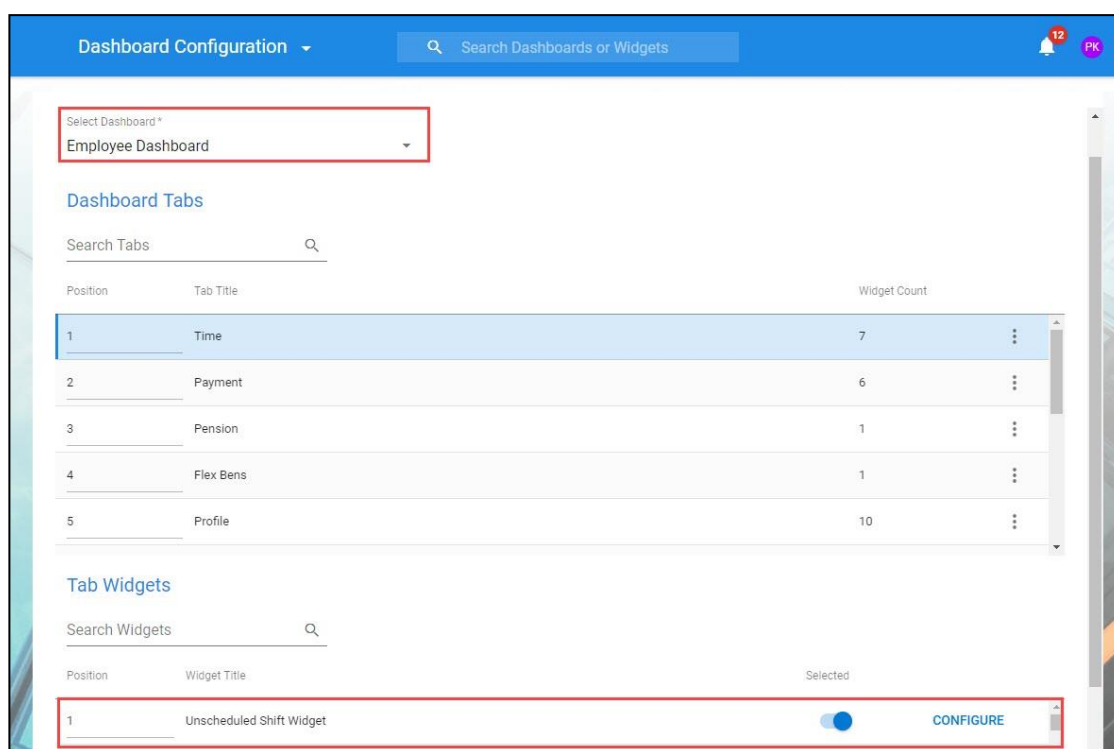

The *Uncovered Shift* is now rejected and is no longer visible to you on the *Unscheduled Shift Widget*.

4.3. Uncovered Shifts Configuration

In order for you to view *Uncovered Shifts*, the *Unscheduled Shifts Widget* must be configured to appear on the *Employee Dashboard*.

It is possible to restrict access to stop employees from viewing *Uncovered Shifts* via the *Unscheduled Shifts Widget*. This is controlled by the below *Menu Option*, that can be enabled on the applicable *Menu Profile*:

System	Menu Option	Explanation
CorePortal	Hide Unscheduled Shifts	Removes access to view <i>Uncovered Shifts</i> via the <i>Unscheduled Shift Widget</i> .

5. Co Workers Roster & Leave

5.1. Overview

The *Co-Workers Roster & Leave* features allows for employees to view their team members Roster and Leave for a specified week.

- The *Co-Workers Roster* feature can be used for employees to view their team members roster, based on being in the same *Team Area*, on the day.
- The *Co-Workers Leave* feature can be used for employees to view their team members leave, based on being in the *Work Group*, on the day.

The below table provides examples of how the *Co-Workers Roster & Leave* feature displays employee team members:

Example	Explanation
Example 1	If the employee is working in the 'Cork' <i>Team Area</i> on Monday, they see all other employees rostered on the 'Cork' <i>Team Area</i> on the Monday. Employees working in other <i>Teams Areas</i> are not visible for the day.
Example 2	If the employee is working in the 'Kilkenny' <i>Team Area</i> on Tuesday and for the rest of the week, they see all other employees rostered on the 'Kilkenny' <i>Team Area</i> for the rest of the week. Employees working in other <i>Teams Areas</i> are not visible for the day.
Example 3	If the employee is working across two <i>Team Areas</i> on the one day, they see all other employees rostered to work in both <i>Team Areas</i> for the day.

5.1.1. Viewing Co Workers Roster & Leave

To view *Co-Workers Roster*:

1. *Quick Jump to Work Week*.
2. Click the **ACTIONS** button.
3. Select **Co-Workers Roster**.

The screenshot shows the 'Work Week' interface. At the top, there's a date range '22-Apr-19 - 28-Apr-19'. Below this is a table with columns for days of the week (Mon 22nd to Sat 27th) and rows for projects (Project A). The 'ACTIONS' button is highlighted with a red arrow, and the 'Co-Workers Roster' option in the dropdown menu is highlighted with a red box.

The *Co-Workers Roster* screen displays for review.

Here is it also possible to view team members with *Absences Only* within the week, and to specify the *Roster* week.

5.2. Configuration

5.2.1. User Access

The following Menu Options controls what screens are available for employees to view, these must be enabled on the applicable menu profile:

System	Menu Option	Explanation
CorePortal	Coreportal – Calendar – Time	Allows access to the <i>Calendar</i> widget.
CorePortal	Widget - Time - My Work Week	Allows access to the <i>Work Week</i> widget.
CorePortal	Coreportal – Calendar – Coworkerroster	Allows access to the below options: - Co-Workers Leave / Absence - Co-Workers Roster

5.2.2. Switch on the Screen

To switch on the *Co-Workers Roster & Absence* screen, the following CorePortal parameter (*Site Manager > Admin Settings*) must be set to 'Y'.

Admin Setting	Explanation
cp_show_new_coworkers	Turn on the new version of the <i>Co-Worker Absences</i> screen.

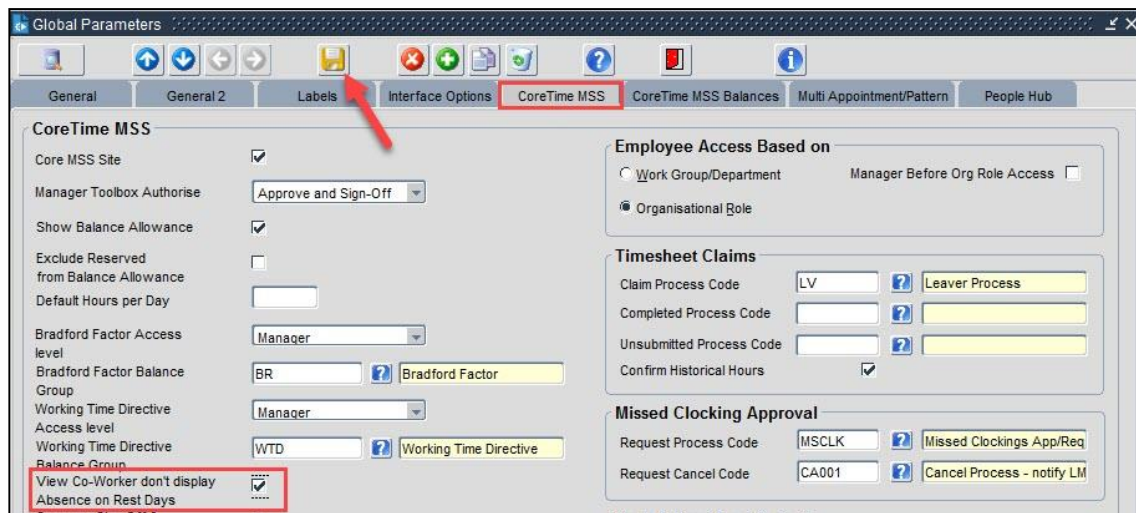

5.2.3. Hide Absences on Rest Days

There is an option available on the *Global Parameters* screen to control if an absence is displayed on a rest day for the *Co-Workers Absence* screen.

- If ticked on the absence does not display for the rest day.
- If ticked off the absence displays on the rest day.

To Hide Absences on Rest Days:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Reference D – J > Global Parameters*.
2. Select the **CoreTime MSS** tab.
3. Tick on the *View Co-Worker don't display Absence on Rest Days* indicator.
4. Click the  button to save.

The screenshot shows the 'Global Parameters' window with the 'CoreTime MSS' tab selected. The 'View Co-Worker don't display Absence on Rest Days' checkbox is checked. The 'Save' button icon in the top toolbar is highlighted with a red arrow.

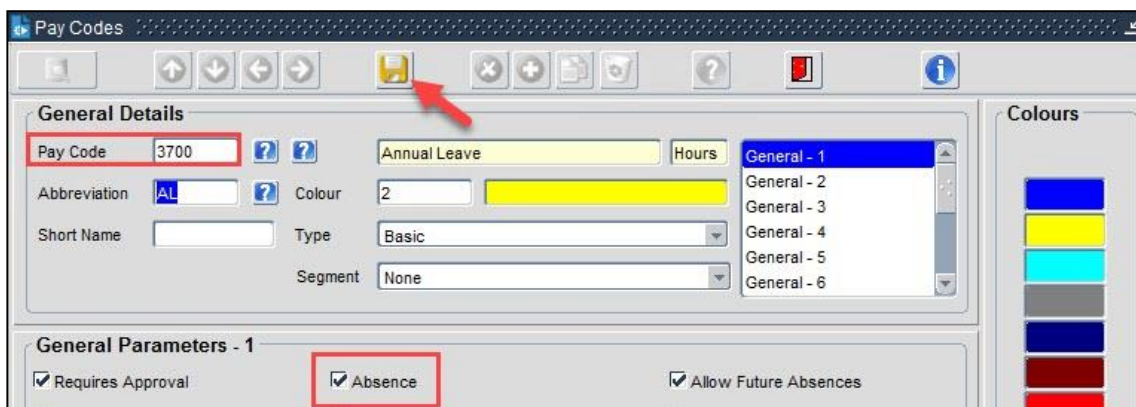

5.2.4. Absence Pay Codes

Mark the Pay Code as Absence

In order for an employee to be picked up as absent and displayed on the *Co-Workers Leave* screen, the *Pay Code* must be marked as *Absence*.

To mark the Pay Code as absence:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Pay Codes*.
2. Enter the applicable Pay Code.
3. Tick on the **Absence** indicator.
4. Click the  button to save.

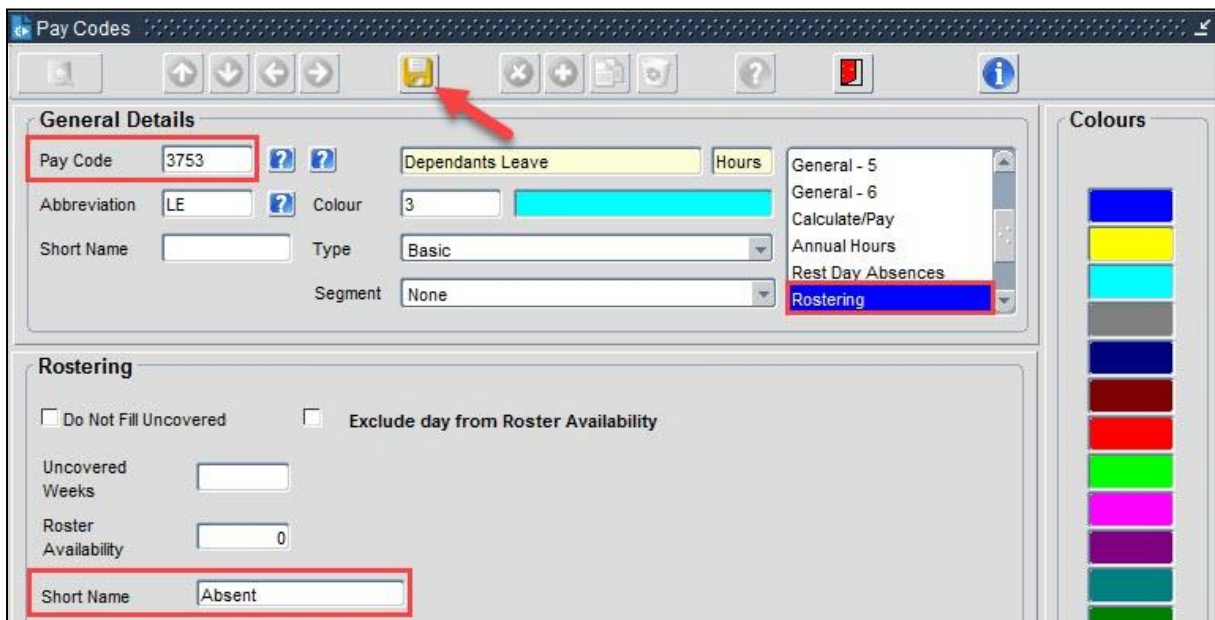

The screenshot shows the 'Pay Codes' window. The 'Pay Code' field is set to '3700'. The 'Absence' checkbox in the 'General Parameters - 1' section is checked. The 'Save' button icon in the top toolbar is highlighted with a red arrow.

Pay Code Description

A *Short Name Description* can be used to override the *Pay Code Description* on the *Co Workers Leave* screen. This can be used where you do not want employees to see the absence description. By entering 'Absent', this displays the text for employees who are on leave within the *Team Area*. For example, this could be used for *Pay Codes* such as 'Bereavement', or other sensitive information *Pay Codes*.

To *Short Name Description*:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Pay Codes*.
2. Enter the applicable *Pay Code*.
3. Select **Rostering**.
4. Enter the *Short Name*.
5. Click the  button to save.

The screenshot shows the 'Pay Codes' configuration window. In the 'General Details' section, the 'Pay Code' field is set to 3753, 'Abbreviation' is LE, 'Short Name' is empty, 'Type' is Basic, and 'Segment' is None. In the 'Rostering' section, the 'Short Name' field is set to 'Absent'. A red arrow points to the save button in the top toolbar. A red box highlights the 'Rostering' option in the 'Colours' list on the right.

Absence Colour

The *Portal Absence Colour Code* field allows you to apply a highlighting colour to each *Absence Pay Code*. This colour then displays on the *Co-Workers Leave* screen.

To specify a *Portal Absence Colour Code*:

1. Go to *Back Office > CoreTime/CoreRoster > System Params > Pay Codes*.
2. Enter the applicable *Pay Code*.
3. Select **Rostering**.
4. Select the applicable colour from the *Portal Absence Colour Code* list of values.
5. Click the  button to save.

5.3. Additional Configuration Options

The below table details additional CorePortal parameters (on *Site Manager > Admin Settings*) that can be configured regarding the *Co-Workers Roster & Leave* functionality.

Portal Admin Setting	Explanation
cp_hide_workgrp	Hide the <i>Work Group</i> display on <i>Co-Workers Leave</i> screen.
cp_coworker_ros_show_wp	Show <i>Work Pattern</i> on <i>Co-Workers Leave</i> screen, on a public holiday.
cp_emp_coworker_group	Allows you to change the group the <i>Co-Worker Leave</i> screen is based off. This is normally set to 'WRKGRP' but can be updated to other elements such as 'DEPT'.
calendartimeplannermax	The max number of employees to show on the <i>Co-Workers leave</i> screen. Defaults to 100.
cp_team_ros_heading_lbl	Heading label for the <i>Team Roster Calendar</i> .
ct_co_shifts_req_abs	Show <i>Requested Absences</i> on <i>Co-Workers Leave</i> screen.
ct_co_roster_booked_abs	Show <i>Booked Absences</i> on <i>Co-Workers Leave</i> screen.
