1. Overview

1.1. Purpose of the Guide

This guide aims to explain the Pay Code screens which have been converted from Back Office to Portal.

It covers the following:

- The Pay Code Screen
- Pay Code Screen Configuration
- Configuring Pay Codes
- Pay Code Groups
- Data Migration

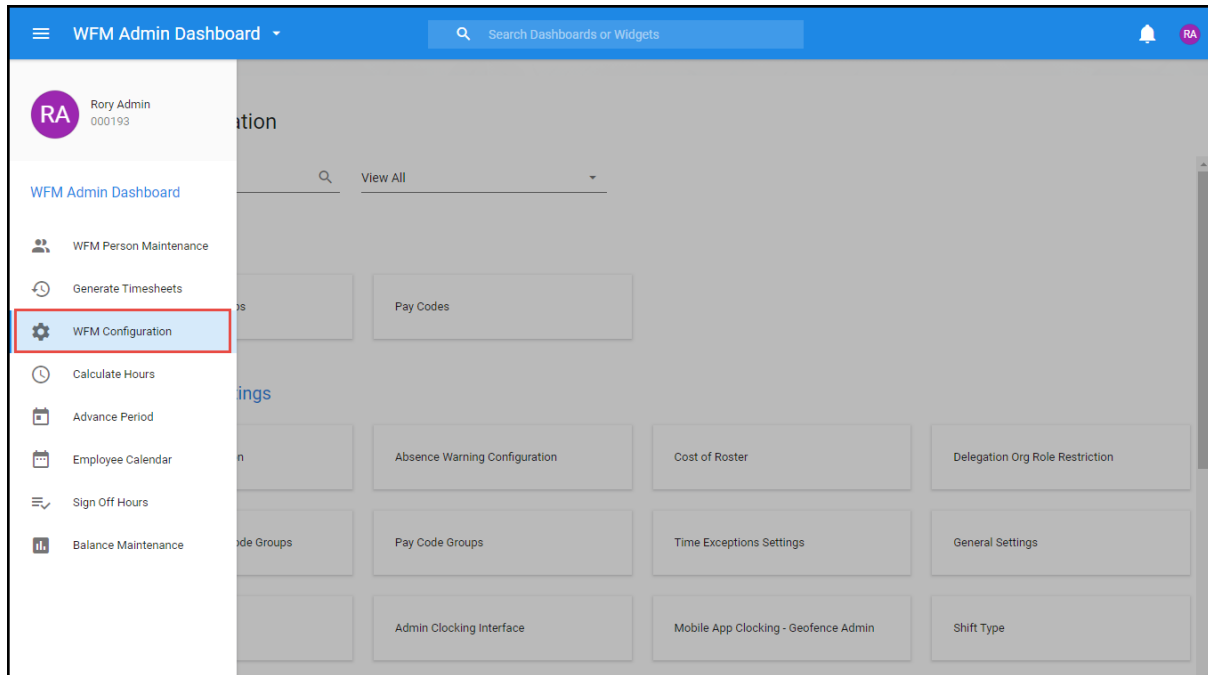

1.2. What is the Pay Code Screen?

The *Pay Codes Screen* maintains codes, which are automatically generated by the system and maintained on an ad-hoc basis by authorized personnel. Portal supports an unlimited amount of Pay Codes, such as Basic, Overtime or Lates. Pay Codes required for Time & Attendance purposes are determined by operational policies. If you are linked to the Pay system, the code and descriptions will already have been set up.

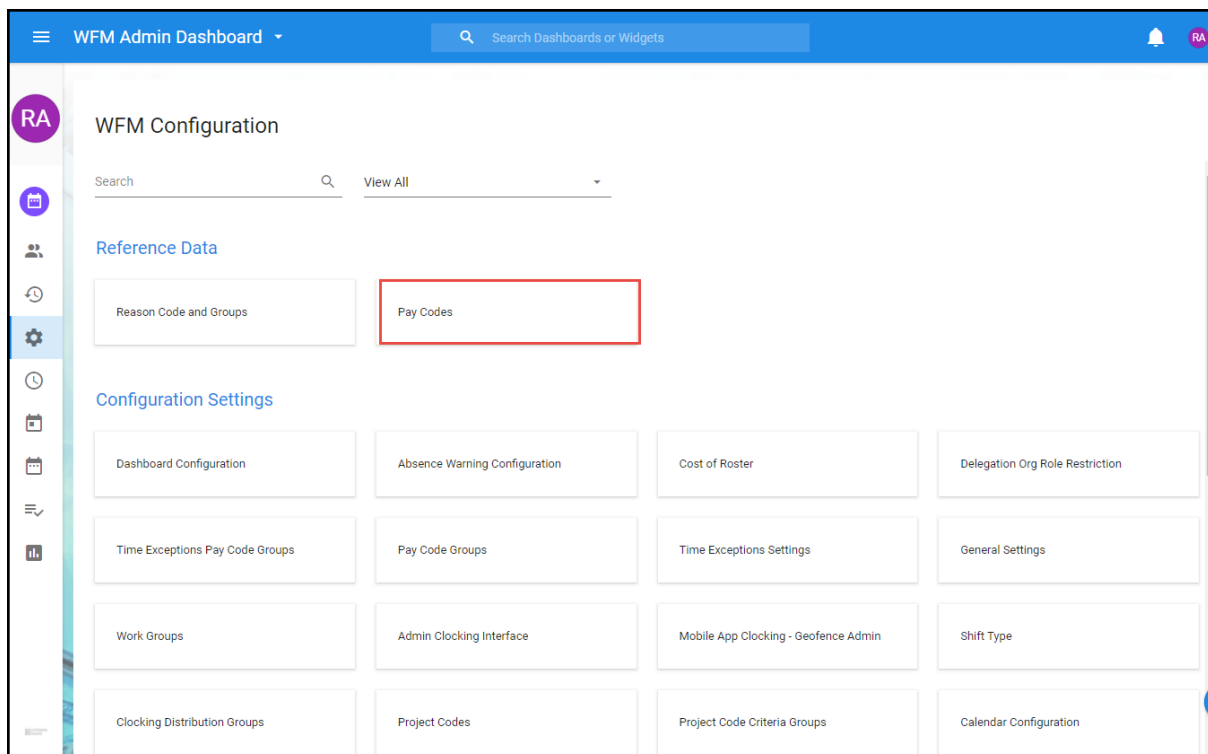

1.3. How to access the Pay Code Screen

The Pay Code Screen can be accessed by the following steps:

1. Quick jump to the *WFM Admin Dashboard*.
2. Select **WFM Configuration**.

3. Under *Reference Data*, Select **Pay Codes**.

4. The *Pay Codes Screen* displays.

WFM Admin Dashboard

Pay Codes

1.4. The Pay Codes Landing Page

When the Pay Codes Landing Page displays, you are presented with a list of WFM pay codes.

Within the page you can:

- Search for a pay code
- Filter the grid for a particular pay code
- Add a pay code group
- View Payroll pay codes

WFM Admin Dashboard

Pay Codes

WFM Admin Dashboard > Pay Codes

access PeopleXD

The following fields are mandatory on the Pay Code Screen:

Field	Details
Pay Code	This identifies the code pertaining to the pay code.
Name	It is recommended that a meaningful short name be used to easily identify the Pay Code
Abbreviation	The abbreviation is used for the purposes of calendar displays and enquiries and for analysis purposes.
Type	This identifies the type of Pay Code e.g., Basic, Overtime, etc. This should be specified when using Basic Rule Groups, for determining which Pay Codes should be used.
Calculate Indicator	This indicates whether calculations are in minutes or in decimal.
Payroll Indicator	You can choose either Decimal, Minutes or Non Payroll.
Label	You can label a pay code as belonging to a specific group.
Active Indicator	This toggle allows you to make a Pay code active or inactive. Once it is inactive it will be hidden from the screen.

Using the Filter Option

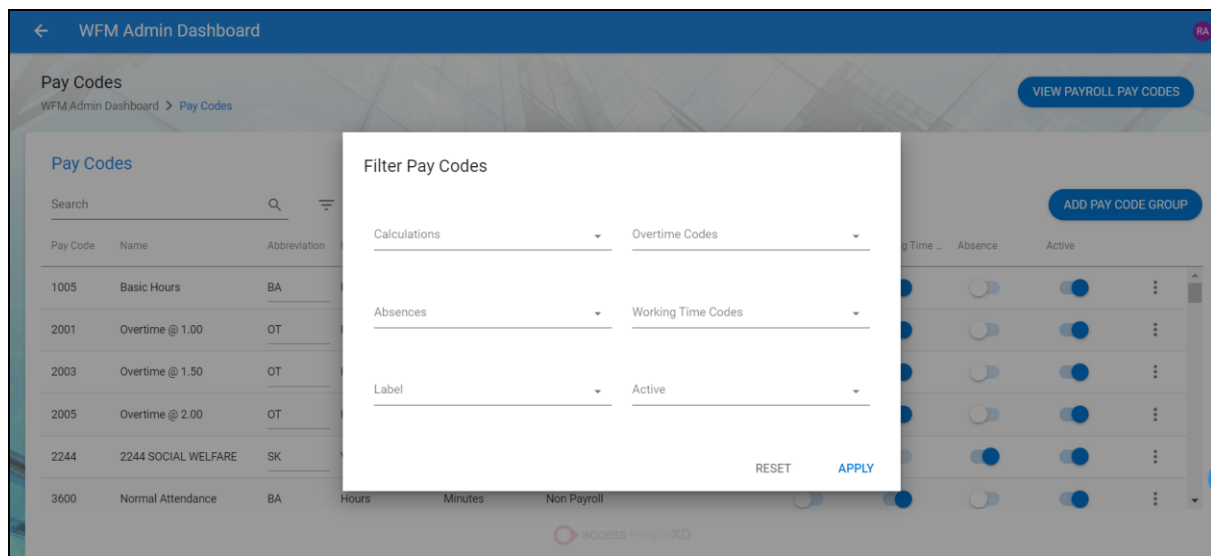

You can apply a filter to return a specific group of Pay Codes on the screen. You can filter by the following:

- Calculations
- Overtime Codes
- Absences

- Working Time Codes
- Label
- Active

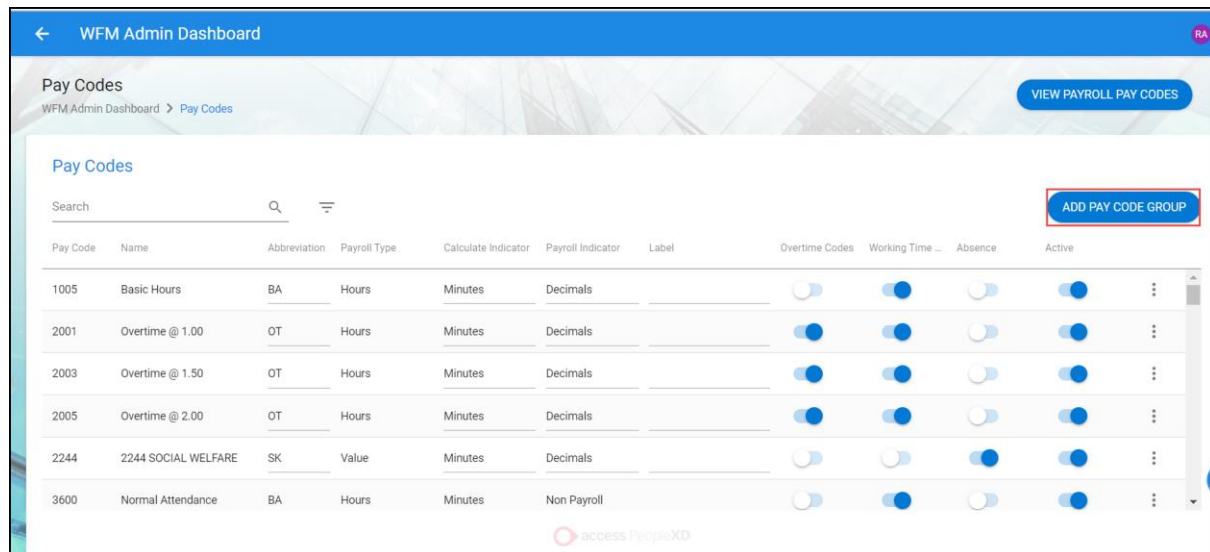

Note: In the case of Calculations, select Decimal or Minutes. In the case of the other fields, select Yes or No.

Once you have made your choices click **Apply** for the filtered results to appear.

1.5. Adding a Pay Code Group

By clicking **Add Pay Code Group**, you can create a specific pay code group depending on your needs. This is covered further in [Section 3: Pay Code Groups](#)

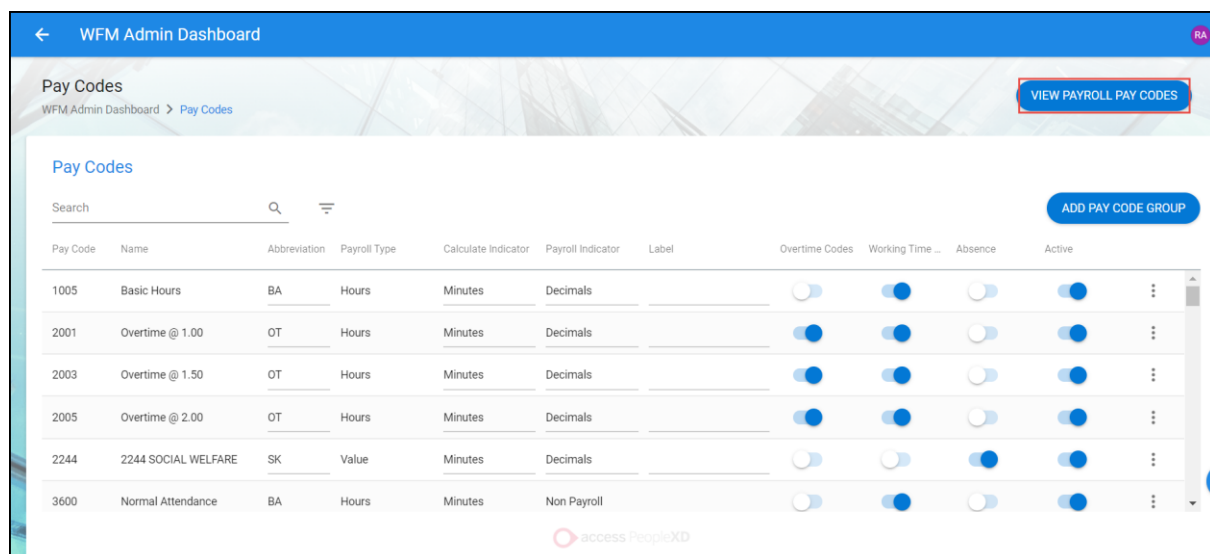

1.6. Viewing and Editing a Pay Code

On the Pay Codes Landing Page, you can view and edit specific pay codes.

Click on the  and select **View/Edit Pay Code** to configure them further. See [Section 2: Paycode Configuration Screens](#) for further information.

1.7. Available Payroll Pay Codes Screen

At the top right hand corner of the landing page, you see the View Payroll Pay Codes button.

When you click the button the page displays, presenting a list of pay codes that are not in WFM.

access PeopleXD

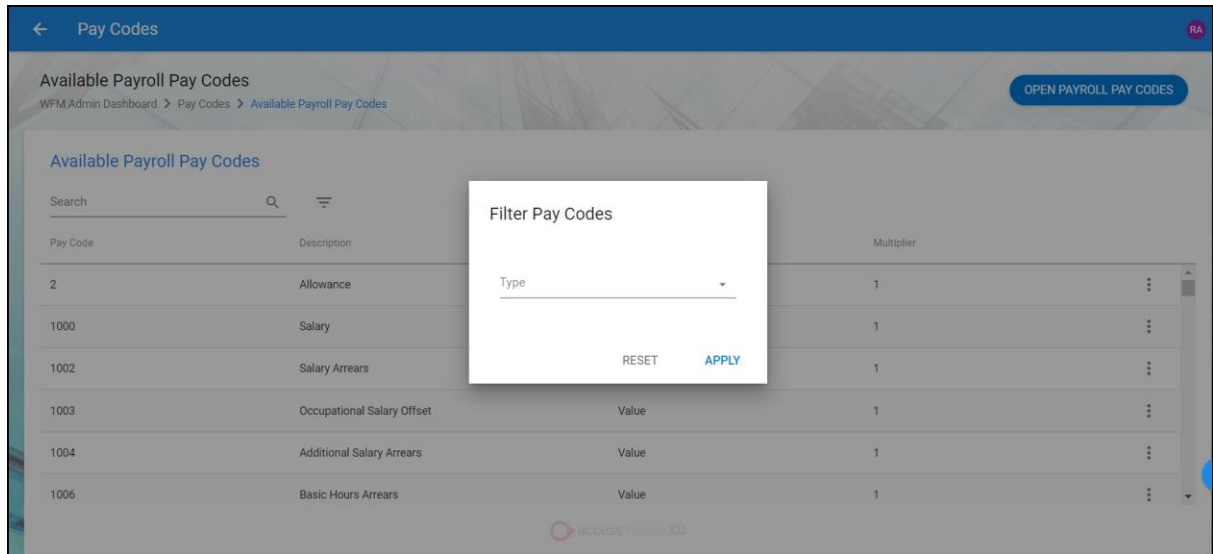

On the page you see the following columns:

- Pay Code
- Description
- Type
- Multiplier

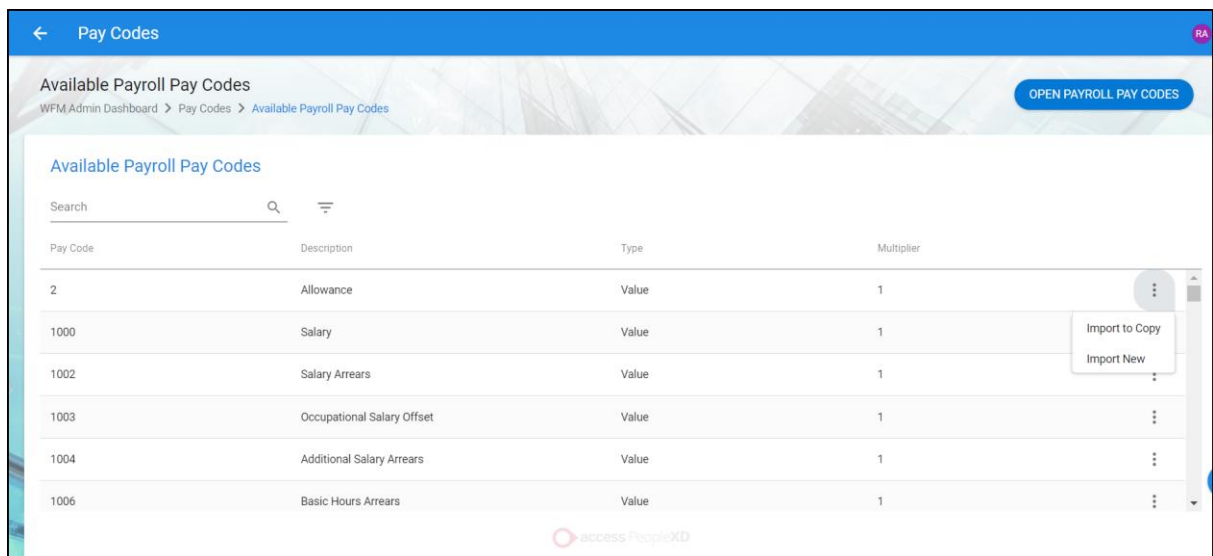

Filter

When searching you may wish to narrow down the results which are returned to give you more specific information. The filter on the top of the page allows you to choose between:

- Days
- Hours
- Units
- Value

By clicking on the ellipsis aligned to the pay code you can choose either **Import to Copy** or **Import New**.

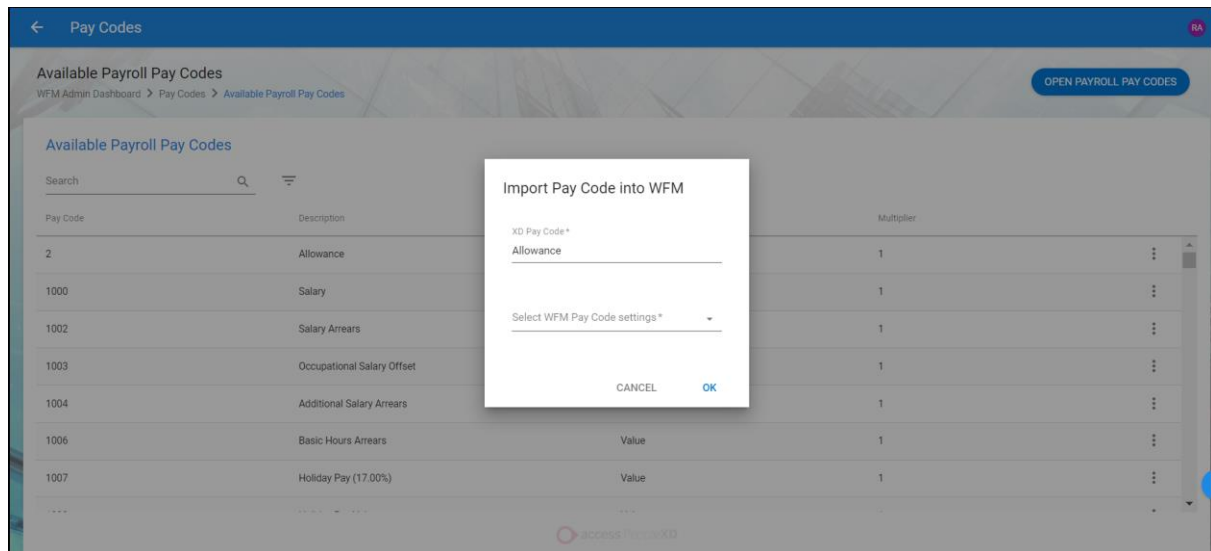

1.7.1. Import to Copy

This allows you to import the Payroll pay code and give it the settings of a WFM pay code.

1. Select the **Pay code**.
2. Select **WFM Pay Code Settings**.

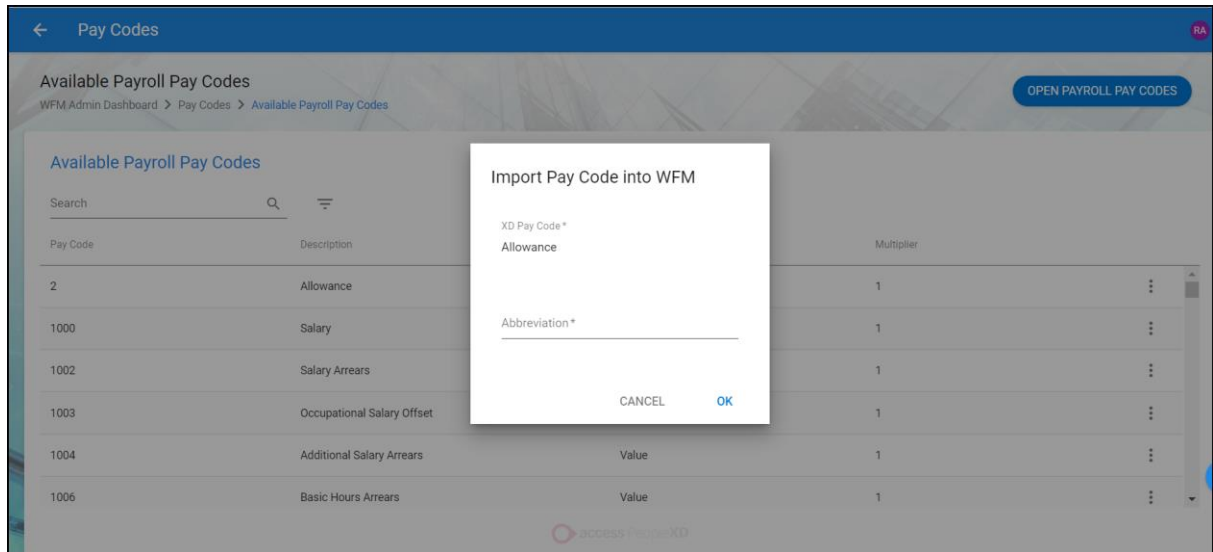

3. Click **OK**.

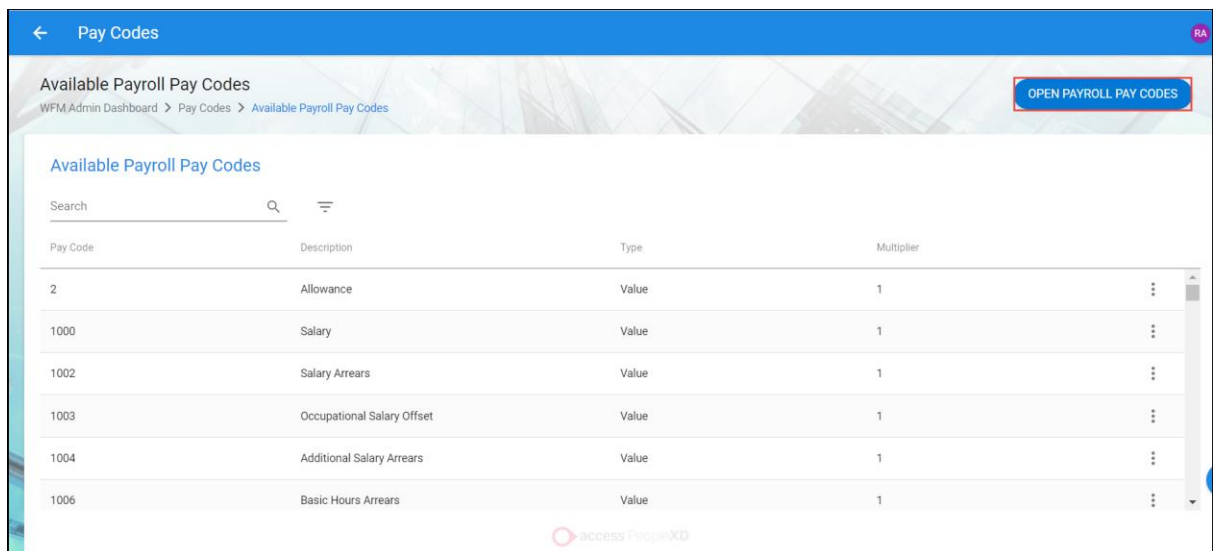

1.7.2. Import New

This allows you to import the Payroll pay code and its configuration into WFM.

1. Select an **Abbreviation** to denote the Pay Code.
2. Click **OK**.

Open Payroll Pay Codes

By clicking the **Open Payroll Pay Codes** button on the top right hand corner of the screen you are taken to a screen with specifically Payroll Pay Codes.

2. Pay Code Configuration Screens

This section aims goes through the various screens where you can configure the pay codes, depending on the kind of information you need to show. The following screens can be used to configure pay codes:

- Summary
- Leave Request Settings
- Leave Request Documentation
- Absence Settings
- Input Validation
- Payroll Integration
- Calculate Settings
- Costing
- Time Sheet Claims
- Rostering
- Additional Absence Items
- Rest Day Absences
- Mutually Exclusive
- Annual Hours
- Advance Settings

2.1. Summary Screen

The summary screen holds the General Parameters where you can configure the pay codes and has all of the essential information.

The screenshot shows the 'Pay Codes' configuration interface. At the top, there's a breadcrumb trail: 'WFM Admin Dashboard > Pay Codes > Basic Hours'. Below this, the 'Current Pay Code' is set to 'Basic Hours' and the 'Pay Code' is '1005'. The 'Payroll Type' is 'Hours', 'Calculate Indicator' is 'Minutes', and 'Payroll Indicator' is 'Decimals'. A left sidebar contains a search bar and a list of settings: Summary (selected), Leave Request Settings, Leave Request Documents, Absence Settings, Input Validation, Payroll Integration, Calculate Settings, and Profile. The main area is titled 'General Parameters' and contains several fields and toggle switches. Fields include 'Name' (Basic Hours), 'Abbreviation' (BA), 'Calculate Indicator' (Minutes), and 'Payroll Indicator' (Decimal). There are also fields for 'Label', 'Pay Code Order', 'Balance Affect' (Positive), and 'Working Time Code'. Toggle switches are present for 'Exception Code', 'Requires Approval', 'Requires Reason', 'Overtime Codes', 'Reason Group', 'Requires Recode', and 'Requires Narrative'. A 'SAVE' button is located at the bottom right.

The table below details the following fields:

Field	Details
Pay Code	The number code associated with a specific pay code.
Name	Name of the pay code.
Abbreviation	It is mandatory to enter an abbreviation when creating a pay code. The abbreviation is used for the purposes of calendar displays and enquiries and also for analysis purposes. More than one time code can use the same the abbreviation code.
Payroll Type	This identifies the type of Pay Code being used. This should be specified when using Basic Rule Groups.
Label	A label can be used to identify a pay code as belonging to a specific group. For example, you can give a label of AL if you are referring to Annual Leave.

Pay Code Order	This allows you to decide in which order the Pay Codes should be displayed on screen in Leave Request and Absence Entry.
Balance Affect	This indicates whether the pay code will have a positive or negative effect on the balances.
Exception Code	You can highlight pay codes as exceptional events on the system. These require further processing by a manager.
Absence	If the Absence indicator is selected, Pay Codes can be marked as Absence codes, such as Holiday or Sick.
Overtime codes	This indicator, when selected, marks a Pay Code as an Overtime Code.
Requires Recode	This highlights pay codes for recoding when they are being approved. This means that the hours generated against this pay code must be recoded to another pay code, so the hours can be signed off.
Requires Approval	This highlights pay codes which need to be approved. Any hours associated with such a Pay Code need to be approved prior to payment. Pay Codes submitted as a Leave Request do not require the <i>Requires Approval</i> indicator.
Requires Reason	If the <i>Requires reason</i> indicator is turned on, a reason must be provided when this code is inputted. The reason must be selected from a pre-defined list of reason codes.
Reason Group	This field allows you to attach a list of reason codes, or reason group, to a pay code. If a Reason Group is attached to a pay code, only those codes in the group can be selected via

	the Maintain Hours or Record Absence Details screen.
Requires Narrative	Enable this toggle if you wish the pay code to have further information.

2.2. Leave Request Settings Screen

The Leave Settings Screen allows you to configure the pay codes specific to leave requests.

The various fields on the screen are explained in the grid below:

Field	Details
Allow Leave Requests	If the <i>Allow Leave Requests</i> indicator is enabled, employees can request this leave type via the <i>Leave Request Screen</i> .
Leave Request Process Code	This field specifies the leave request and approval process that apply for this timecode. i.e., either line manager or HR.
Leave Request Cancel Process Code	Use the Leave Request Cancel Process field to choose the cancel leave request process for this timecode. I.e., whether this cancelled

	request should go to the line manager for notification or whether the notification should go to the line manager and to HR.
Display on Co-Worker Roster	The pay code is displayed when viewing a co-worker's roster/schedule.
Disable AM/PM on Leave Request	This disables the selection of AM/PM for this pay code.
ESS narrative required	If the <i>ESS narrative required indicator</i> is turned on, the comments field on the <i>Leave Request Screen</i> must be completed when this leave type is requested. For this leave type, the comment field is mandatory on the <i>Leave Request Screen</i> .
Restrict input of this code on the ESS to today's date	The <i>ESS input restriction</i> functionality allows you to define the latest date that leave can be requested for (via the ESS Leave Request screen) per Leave Type. Leave requests for dates after this date are not allowed.
Plus/Minus Days	If you wish to stop future booking you can specify that yesterday is the latest date that can be requested. This is done by specifying '-1' in the <i>ESS Input Restriction - days</i> field.
Carried Forward Request to balance Period End Date	Any annual leave days which have been carried forward.
Minus Days	Any days which have been specifically deducted.
Allow Future Absences	If selected, this pay code may be used for future absences.
Attach Holiday Periods	This allows you to attach holiday periods when you enter the pay code in Record Future Absence and Maintain hours.

Allow Advance Payments

If selected, this pay code may be used when employees are paid in advance.

2.3. Leave Request Documentation Screen

An admin or a manager may wish to upload any supporting documentation specific to a pay code. The *Leave Request Documentation Screen* allows you to upload documentation against the pay code.

The screenshot displays the 'Pay Codes' section in the WFM Admin Dashboard, specifically the 'Basic Hours' settings for 'Pay Code 1005'. The interface includes a sidebar with navigation links: Summary, Leave Request Settings (highlighted), Leave Request Documents, Absence Settings, Input Validation, Payroll Integration, Calculate Settings, Costing, Time Sheet Claims, and Rostering. The main content area is divided into sections: 'Leave Request Settings' with toggles for 'Allow Leave Requests', 'Disable AM/PM on Leave Request', 'Leave Request Process Code', 'Leave Request Narrative Required', 'Leave Request Cancel Process Code', 'Attach Holiday Periods', 'Display on Co-Worker Roster', and 'Allow Advance Payments'; 'Input Restriction' with a toggle for 'Restrict input of this code to today's date' and a 'Plus/Minus Days' field; and 'Carried Forward Request' with a toggle for 'Carried Forward Request' and an 'Available from Balance Period End Da...' field. A 'SAVE' button is located at the bottom right.

Field	Details
Document Type	This field records the type of documentation uploaded against the Paycode.
Warning Level	Warning, Stop or Allow.
Document Lead Time	This field allows you to decide in the case of an absence, for example to decide on the number of days before documentation is required.

2.4. Absence Settings Screen

The Absence Settings Screen shows the toggles and settings which allow you to configure the absence and leave pay codes.

Field	Details
Holiday	If this indicator is selected, the pay code is marked as a holiday pay code.
Sick	If this indicator is selected, the pay code is marked as a sick pay code.
Maternity Code	If this toggle is enabled, it marks the pay code as a Maternity code.
Work related Absence	If this toggle is enabled, it marks the pay code as a Work Related Absence.

Allow Absence Detail	If enabled, this leave type will be available for selection through the <i>Absence Entry Screen</i> (Manager & Admin).
Maintain via Absence Details Only	Pay codes enabled may only be entered as an absence via Team Scheduler or Record Absence Details. They may not be entered as Attendance-only via Timesheet Input or Maintain Hours.
Return to Work Interview	This should be enabled if a Return to Work Interview is associated with this leave type. You can then record interview details when leave is recorded against this pay code.
Return to Work Narrative Required	If <i>Return to work narrative</i> is turned on, you are obliged to enter a return to work narrative when the absent staff member returns to work.
Unauthorized Absence	If this indicator is selected, it marks the pay code as an Unauthorised Absence code.
Authorized Absence	If this indicator is selected, it marks the pay code as an Authorized Absence code.
Historical Occupational Absence	This marks the pay code as a historical absence.
Occupational Absence Type	Choose from the dropdown what kind of leave it is, e.g. Sick Leave or Maternity leave etc.
Records Absence Detail Process Code	This field is used to link this timecode to an Absence Process. Absence Processes kick off when new absences are booked. They are used to define who gets notified when absences are booked.

	This process is only kicked off when new absences are booked as opposed to when they are updated or deleted.
Ignore Company Holiday	If <i>Ignore company holidays</i> is enabled, any company holidays falling during an instance of this leave type will count as a leave day.
Ignore Include Rest Days on Company Holidays	If this is enabled rest days are not included on company holidays
Skip Company Holidays with Overlapping Leave on Rest Day	If this toggle is enabled, company holidays which overlap on rest days are not included.
Process Code	Use this field to link this timecode to an Absence HR Process. Absence Processes are processes which are kicked off when new absences are booked (either manually via the Record Absence Details or automatically when a leave request is approved).
Pay Code Group	The pay code group which corresponds to the specific absence.
Mandatory field change	This shows any mandatory field changes which can be added such as reason codes.

2.5. Input Validation

The grid below details the fields which appear on the *Input Validation Screen*.

Field	Details
Future Calculations	This toggle when enabled allows future dates to be part of the calculation.
Future Calc Not Delete	Enable this toggle to allow future calculation of hours for Payroll for this paycode.
Do not Lock Day	Enable this toggle so the day does not lock on insert, update or delete. The exception is delete in maintain hours.
Max Value Per Day	This field denotes the maximum value added to a pay code per day.
Sign Off Warning Level	You can choose whether the unauthorised action is given a warning or is stopped.
Min Value Per Day	Minimum value added to a pay code per day.
Medical Salary Type	This allows you to choose from the dropdown for pay codes specific to medical salaries.
Enforce Position and Point	Click on this to enforce entry of a position and scale point when entering hours for an employee against a pay code.

Stop Overtime Booking	Enable this toggle to stop a user from booking overtime if a full day absence has been recorded.
Restrict Entry to Valid Balance Period	You can choose between Stop, Warn and No Restriction in this field. Stop: To ensure that hours recorded against this pay code are entered against a valid balance period. Warn: To alert the user when this is not the case but to allow the entry No Restriction: To apply no restriction to the entry of this pay code in relation to a balance period.
Apply Validation	The Consecutive Days Validation enables configuration of the system to warn/stop the user when inputting in excess of the pre-defined Consecutive Days value for this pay code. Used to apply consecutive days validation i.e., to restrict a user booking an employee on more than 2 consecutive days.
Warning Level	Stop, Warn or No Restriction.
Consecutive Days	<i>The Consecutive Days Validation</i> enables configuration of the system to warn/stop the user when inputting in excess of the pre-defined Consecutive Days value for this pay code.
Balance Code	This allows you to choose a code against the
Apply Validation	The Adjoining Days Validation enables configuration of the system to warn/stop the user inputting this pay code when identified pay codes are in adjoining days.

Warning Level	You can choose to either give a warning or stop the process completely depending on which of these you choose from the drop down.
Rest Type Code	If this is enabled, the code forces a rest day in adjoining days.
Adjoining Pay Code	The Adjoining pay codes enables configuration of the system to warn/stop the user inputting this pay code when identified pay codes are in adjoining days. Where the current Time Code adjoins the time codes specified in the Adjoin Time Code list, users receive an on-screen message warning them that the number of days have been exceeded. The alert level can be stop (cannot continue) or warning (can continue).

How to add an Adjoining Pay Code

To add an adjoining pay code on the *Input Validation Screen*, complete the following steps:

1. Click **Add** on the right hand side above the field.
2. Select the pay code from the drop-down menu.
3. Click **Save**.

Field	Details
Shift Premium	This field stores the shift premium, which can be applied to this pay code.
Premium Pay Code	This indicates whether the pay code is a premium pay code for shift premiums.
Acting Up Pay Code	This is used in conjunction with “acting up” where hours identified as acting up types are transferred to payroll at the acting up time code.
Pay Allocate Only	This is indicative of allocated pay only.
No Banked Hours	This indicates that the pay code is not used in the calculation of banked hours.
Pay in Days	Click on to pay time recorded against this pay code in days.
Include in Overtime Rules	Click on this to include the pay code in the overtime rule at the generate timesheets stage.
Rounding Code	On sites using an ASCII Payroll Interface, when a multiplier has been applied to a calculated

	pay code, a rounding code can be applied to the resultant values.
ASCII File Element	The ASCII File Element field is used to specify which timecodes should contribute to the Basic Hours total on the BI Timesheet Reconciliation report and which timecodes should be treated as allowances on the Timesheet Reconciliation report.
Code Type	This allows you choose the specific type of leave.
Pay Value at Negative	When this is enables the pay value shows as negative where a pay code has been allocated This applies to regular timesheet method only.
Do Not Apply Shift Premium	When this toggle is enabled, a shift premium is not applied.

2.7. Calculate Settings

The settings on this screen influence what is added or deducted to calculations by configuring the pay code.

The screenshot shows the 'Pay Codes' configuration page for 'Basic Hours'. The left sidebar contains a search bar and a list of settings categories. The main content area is titled 'Calculate Settings' and displays various configuration options for 'Pay Code 1005'. These options include toggle switches for 'Premium Code', 'Must Work', 'Deduct from Shift Hours', 'Effect Basic', 'Shift Bonus', 'Do Not Amalgamate in Calc', 'Do Not Delete in Calc', 'Adjust Flexitime', and 'Keep Manually Entered'. There are also dropdown menus for 'Fill Basic Type' (currently set to 'Basic') and 'Attendance Type'. A 'SAVE' button is located at the bottom right of the settings area.

Field	Details
Premium Code	This indicates whether the pay code is a premium pay code for shift premiums.
Must Work	This indicates that hours at this pay code must be worked.
Deduct from Shift Hours	If this indicator is selected, the hours generated at the pay code will be deducted from shift hours.
Effect Basic	This pay code will affect basic if this indicator is selected.
Fill Basic Type	This field allows you to choose between Basic and Overtime.
Shift Bonus	If selected, this pay code can be used when setting up bonuses on shifts in the Shift Types form.
Do Not Amalgamate in Calc	Enable to stop hours against this code being amalgamated in the calculation.
Do Not Delete in Calc	Enable to stop hours against this code being deleted in the calculation.

Attendance Type	This indicates what attendance type should be attached to the pay code.
Adjust Flexitime	If the <i>adjust flexitime</i> indicator is turned on, this identifies the codes as been part of the flexitime rules, thus hours recorded at these codes are added to basic hours (part of the calculation routine) to generated flexi positive if a person has exceeded their normal hours or flexi negative if a person has not exceeded their normal hours
Keep Manually Entered	This toggle enables you to enter manually.

2.8. Costing

The *Costing Screen* allows you to apply a cost centre for the pay code.

The screenshot shows the 'Pay Codes' section of the WFM Admin Dashboard. The 'Basic Hours' tab is selected. The 'Current Pay Code' is 'Basic Hours', and the 'Pay Code' is '1005'. The 'Payroll Type Hours' is 'Basic Hours', 'Calculate Indicator Minutes' is 'Basic Hours', and 'Payroll Indicator Decimals' is 'Basic Hours'. The 'Cost Centre Allocation' section has a 'Cost Centre' dropdown. The 'Cost of Roster' section has a 'Cost Multiplier' dropdown and two toggle switches for 'Exclude from Costing' and 'Exclude from Cost Display'. A 'SAVE' button is at the bottom right.

Field	Details
Cost Centre	Denotes which the department the pay code is aligned to.
Cost Multiplier	Enter a cost multiplier for this code. If code exists on payroll, then it's multiplier must be 0 or less.
Exclude from Costing	When this is enabled, it should exclude from costing against normal cost centres for planned costs.
Exclude from Cost Display	Enable this to exclude from the cost being displayed on screens.

2.9. Timesheet Claims Screen

This screen allows you to configure pay codes pertaining to the timesheets which have been submitted.

The screenshot shows the 'Pay Codes' configuration screen for 'Basic Hours'. The 'Time Sheet Claims' section is active, displaying the following configuration:

- Current Pay Code:** Basic Hours
- Pay Code:** 1005
- Payroll Type:** Hours
- Calculate Indicator:** Minutes
- Payroll Indicator:** Decimals
- Search:** (Empty search bar)
- Time Sheet Claims:**
 - Claim Process Code:** Salary Approval General
 - Completed Process Code:** Salary Approval General
 - Unsubmitted Process Code:** Salary Approval General
 - Timesheet Claim Pay Code:** ☒

A 'SAVE' button is located at the bottom right of the screen.

Field	Details
Claim Process Code	This is the HR Process that starts when a claim is saved, similar to the process when a Leave Request is made.

Completed Process Code	This is an optional code to notify participants when the administrator actions the completed claim, such as when an admin rejects a completed claim.
Unsubmitted Process Code	This is an optional code to notify the employee when the administrator actions the unsubmitted claim.
Timesheet Claim Pay Code	Enable this toggle for the pay code to appear in the portal timesheet summary claims screen.

2.10. Rostering

This screen allows you configure pay codes against the roster.

Field	Details
Do not fill uncovered	Switch this toggle on if you do not wish to fill uncovered shifts.
Exclude Day from Roster availability	This toggle allows you to exclude days from showing available on the roster.
Roster availability	This shows how available the absence is for rostering.

Uncovered weeks	This influences the number of uncovered weeks.
Short name	You can identify a pay code by adding a short name to it which in turn appears on screens displaying the Pay Code.
Portal Absence Colour Code	The Colour Code identifies the Pay Code for Absences.
WTD Multiplier	This is used in working time package calculations.

2.11. Additional Absence Items

The *Additional Absence Items Screen* allows you to add further configurations to absence pay codes in addition to those on the *Absences* screen.

Field	Details
Country	If you are a multi country site, this allows you to choose the specific country you are based in.

Absence Type

With this option you can configure whether the leave should be Parental, Maternity, Paternity etc.

2.12. Rest Day Absences

Rest Day Absences allows for the automatic generation of Social Welfare pay codes on employee rest days to facilitate correct social welfare calculations.

Specific pay codes generated on employee rest days are configured based on different employee indicators. These can be used to control whether or not rest day absence pay codes impact Sick Leave balance.

The screenshot shows the 'Pay Codes' configuration interface. The left sidebar contains a menu with options: Basic Hours, Time Sheet Claims, Rostering, Additional Absence Items, Rest Day Absences (selected), Mutually Exclusive, Annual Hours, and Advance Settings. The main content area is titled 'Rest Day Absences' and includes a search bar, a dropdown for 'Current Pay Code' (set to 'Basic Hours'), and fields for 'Pay Code 1005', 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimals'. Below these are dropdowns for 'Rest Day Absence Rule Type' and 'Global Rest Day Absence Pay Code', and a toggle for 'Apply Work Pattern Default Hours'. A table with columns for 'Code', 'Monday', 'Tuesday', 'Wednesday', 'Thursday', 'Friday', 'Saturday', and 'Sunday' is present, with a 'DELETE' button at the bottom right. An 'ADD' button is also visible. The footer shows the 'access PeopleXO' logo and a 'SAVE' button.

Field	Details
Rest Day Absence Rule Type	Here you can enter an absence rule type to determine how rest days are populated.
Global Rest Day Absence Pay Code	Here you can enter a global pay code for rest day absence. This will be user in the event of a specific rest day absence rule not being available

Apply Work Pattern Default Hours

When this toggle is enabled, it applies the default hours on the work pattern.

2.13. Mutually Exclusive

The screenshot shows the 'Mutually Exclusive' configuration screen. On the left is a sidebar with a search bar and a list of options: Warning Level, Time Sheet Claims, Rostering, Additional Absence Items, Rest Day Absences, Mutually Exclusive (selected), Annual Hours, and Advance Settings. The main content area has a header 'Basic Hours' and a breadcrumb 'WFM Admin Dashboard > Pay Codes > Basic Hours'. Below this, there are fields for 'Current Pay Code*' (Basic Hours), 'Pay Code 1005', 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimals'. The 'Mutually Exclusive' section has a 'Warning Level' dropdown and a 'Validate Per Appointment' toggle switch. Below this is a table with the following data:

Pay Code	Warning Level	Validate Per Appointment	DELETE
2001 - Overtime @ 1.00			

At the bottom right, there are 'ADD', 'DELETE', and 'SAVE' buttons. The 'access PeopleXD' logo is visible at the bottom center.

The table below details the fields on the *Mutually Exclusive Screen*.

Field	Details
Warning Level	This allows you to choose between Warning or Stop.
Validate Per Appointment	This generates an error for person/appointment level rather than just for person level.

2.14. Annual Hours

This section details how the fields which apply to the *Annual Hours Screen*.

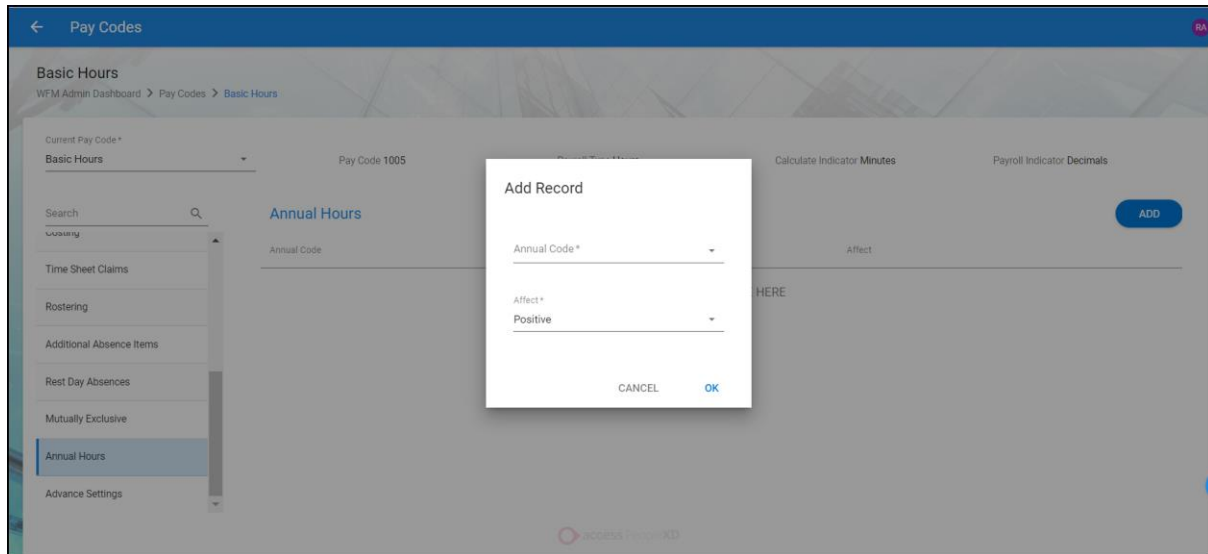

The screenshot shows the 'Pay Codes' application interface. At the top, there's a blue header with a back arrow and the text 'Pay Codes'. Below this, a breadcrumb trail reads 'WFM Admin Dashboard > Pay Codes > Basic Hours'. The main content area is titled 'Basic Hours' and contains several fields: 'Current Pay Code *' (set to 'Basic Hours'), 'Pay Code 1005', 'Payroll Type Hours', 'Calculate Indicator Minutes', and 'Payroll Indicator Decimals'. On the left, there's a search bar and a list of categories: 'Cursing', 'Time Sheet Claims', 'Rostering', 'Additional Absence Items', 'Rest Day Absences', 'Mutually Exclusive', 'Annual Hours' (highlighted), and 'Advance Settings'. The 'Annual Hours' section is active, showing a table with columns 'Annual Code', 'Description', and 'Affect'. The table is currently empty, displaying 'NOTHING TO SEE HERE'. An 'ADD' button is located in the top right corner of the table area. The bottom of the screen features the 'access PeopleXO' logo.

Field	Details
Annual Code	This is used in overnight calculation for annual hours adjustment.
Description	This fields gives any pertinent information regarding the hours.
Affect	This can be either positive or negative.

How to add a record to Annual Hours

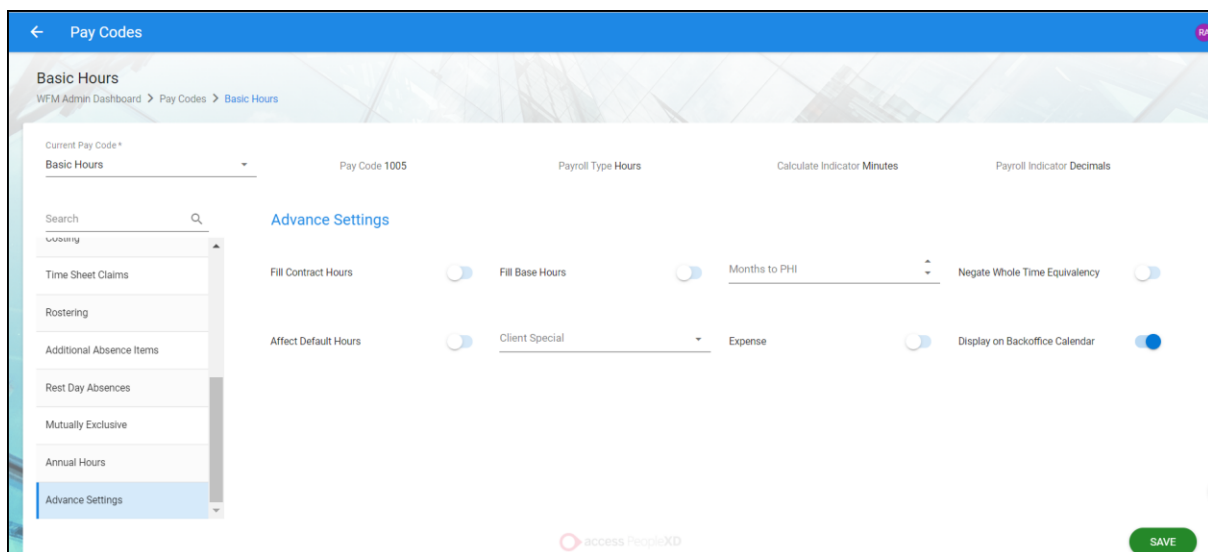

To add a record to the Annual Hours Screen, complete the following steps:

1. Click on the **Add** button
2. Fill in the **Annual Code**.
3. Add in **Positive** or **Negative** on the **Affect**.
4. Click **OK**.

2.15. Advance Settings

This section details the pay codes which are detailed as part of advanced settings.

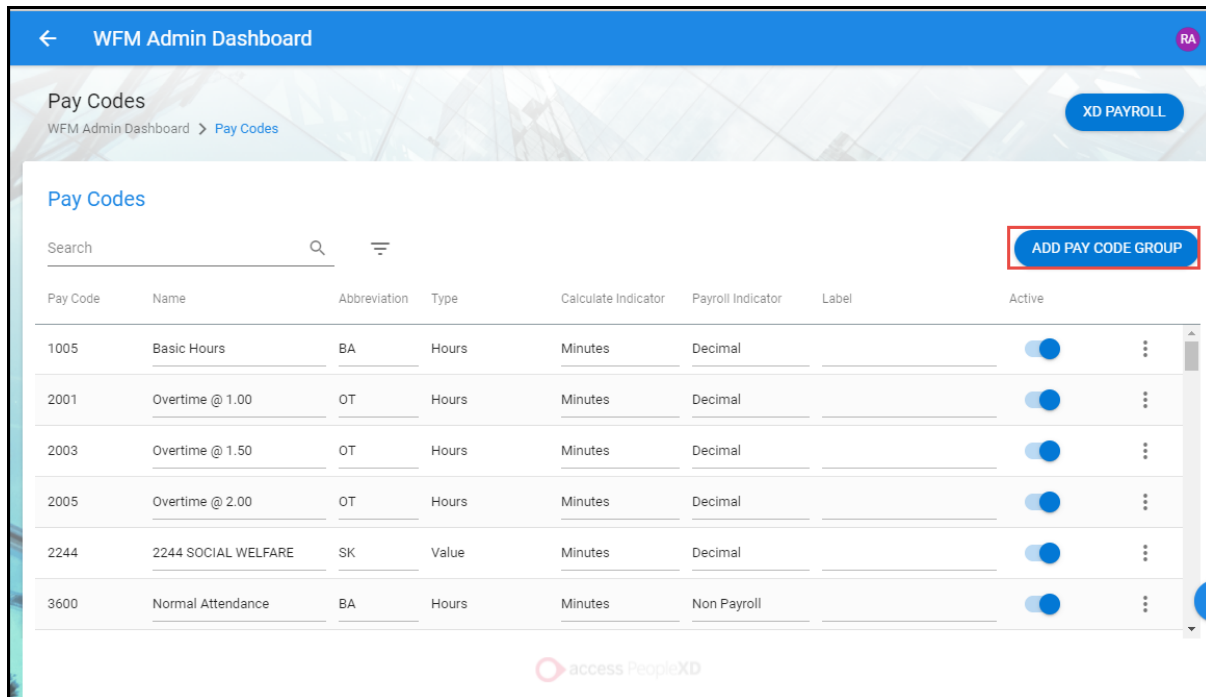

Field	Details
Fill Contract Hours	When enabled, this toggle generates contract timesheets.
Fill Base Hours	When enabled, this toggle generates base timesheets.

Months to PHI	This toggle relates to the start and end date of absence documentation.
Negate Whole Time Equivalency	This toggle affects the roster planner.
Affect Default Hours	If this toggle is enabled, hours such as default holiday hours, generate a difference at the default pay code for the day.
Client Special	This is used in Generate Timesheets for Shift Rule.
Expense	This indicates that the pay code is an expense code.
Display on Back Office Calendar	This references the main procedure used by 'My Calendar' i.e 12 month calendar.

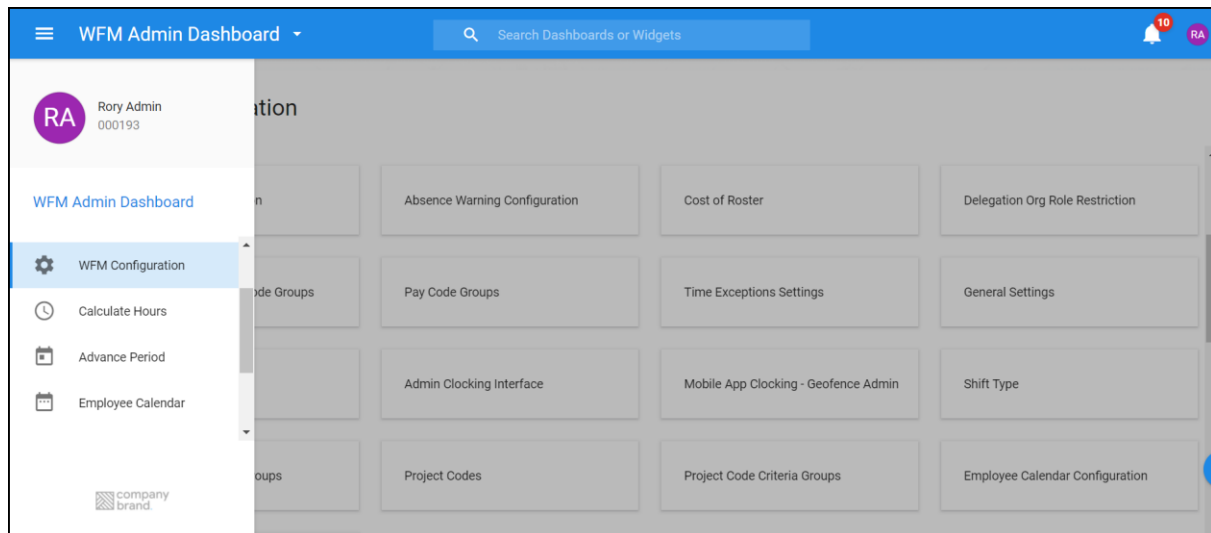

3. Pay Code Groups Screen

As we have previously seen, you can enter the *Pay Code Groups Screen* from the Pay Code Landing Page. In this section, you see how to access the screen and how to use it. Alternatively you can access it via the WFM Admin Dashboard as explained in the following section.

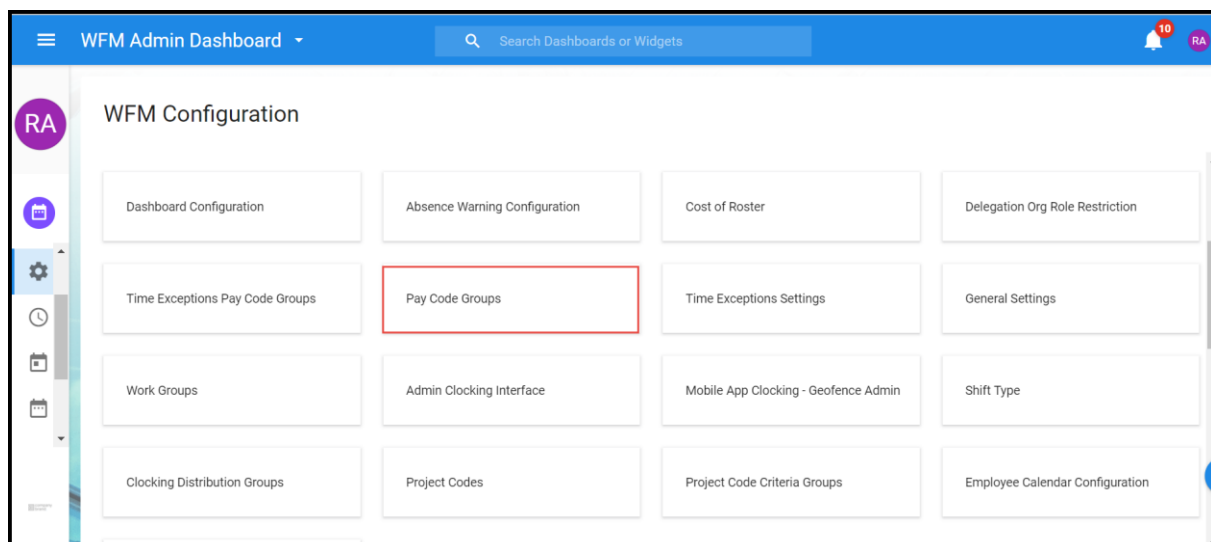

3.1. Accessing the Pay Code Group Screen

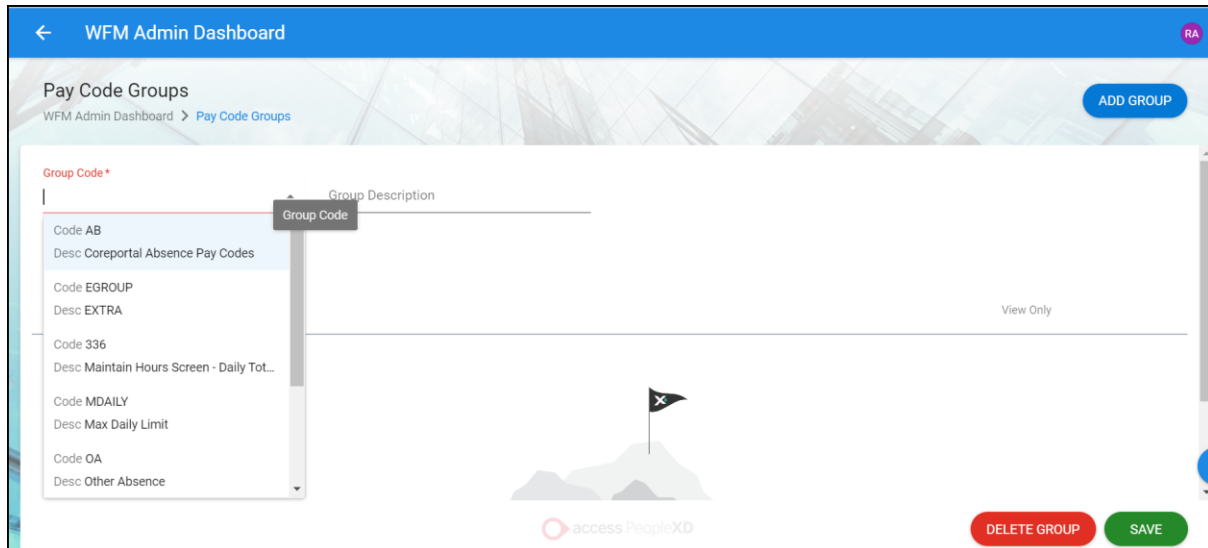

1. Go the *WFM Admin Dashboard*.
2. Select **WFM Configuration**.

3. Select **Pay Code Groups**.

4. The Page displays. If you wish to access a Pay Code Group which has been previously set up, then choose the code from the dropdown menu.

3.2. Adding a Pay Code Group on the Pay Code Screen

On this page unless you are already using a specific pay code group, you need to set one up. Once this is set up you will be able to add employees to it.

1. Select **Add Group**.

The screenshot shows the 'Pay Code Groups' management page. A modal titled 'Manage Pay Code Groups' is open in the center. The modal contains two input fields: 'Group Code' and 'Group Description'. At the bottom of the modal are 'CANCEL' and 'OK' buttons. The background page is dimmed and shows the 'Pay Code Groups' header with a breadcrumb trail 'WFM Admin Dashboard > Pay Codes > Pay Code Groups'. There is an 'ADD GROUP' button in the top right. Below the modal, the 'Group Code*' and 'Group Description' fields are visible on the main form. At the bottom right of the page, there are 'DELETE GROUP' and 'SAVE' buttons.

2. Fill in the **Group Code**.
3. Fill in **Group Description**.
4. Click **OK**.

The screenshot shows the 'Pay Code Groups' management page with data entered. The 'Group Code*' field contains 'EGROUP' and the 'Group Description' field contains 'EXTRA'. An 'ADD' button is visible on the right side of the form. Below the form, there is a table of 'Pay Code' entries. The table has three rows, each with a 'Pay Code' description, a toggle switch, and a 'DELETE' button. The 'Pay Code' entries are 'Overtime @ 1.00', 'Overtime @ 1.50', and 'Overtime @ 2.00'. At the bottom right of the page, there are 'DELETE GROUP' and 'SAVE' buttons.

Pay Code	View Only	
Overtime @ 1.00	☐	DELETE
Overtime @ 1.50	☐	DELETE
Overtime @ 2.00	☐	DELETE

4. Select the Pay Codes which you wish to be added to the group. These can be selected once you click **Add** on the right-hand side of the screen.

5. If you wish, move the toggle to **View Only**. There is a **Delete** button if you wish to delete any of the pay codes.
6. Once you have added as many of the pay codes as needed or relevant, click **Save**.
7. To delete the Pay Group, should you wish to click **Delete Group**.

The screenshot displays the 'Pay Codes' management interface. At the top, a blue header bar contains a back arrow, the title 'Pay Codes', and a user profile icon labeled 'RA'. Below the header, the main content area is titled 'Pay Code Groups' and includes a breadcrumb trail: 'WFM Admin Dashboard > Pay Codes > Pay Code Groups'. An 'ADD GROUP' button is located in the top right corner of the main area.

The central form is divided into two sections. The top section is for adding a new pay code, featuring a 'Group Code*' dropdown menu set to 'EGROUP' and a 'Group Description' text field containing 'EXTRA'. An 'ADD' button is positioned to the right of this section. The bottom section is a table listing existing pay codes. The table has two columns: 'Pay Code' and 'View Only'. The 'View Only' column contains toggle switches and 'DELETE' buttons for each row.

Pay Code	View Only
	☐ DELETE
Overtime @ 1.00	☐ DELETE
Overtime @ 1.50	☐ DELETE
Overtime @ 2.00	☐ DELETE

At the bottom of the interface, there is a footer bar with the 'access PeopleXD' logo on the left and two buttons, 'DELETE GROUP' (red) and 'SAVE' (green), on the right.

4. Pay Code Access Groups

Pay Code Access Groups which are also known as Personalised Pay Code Groups – are used to restrict user access to Pay Codes. Applying a Pay Code Group to a manager's **WFM** System User account will restrict the pay code selection available to the manager when inputting employee's timesheets and absences.

In Portal, Manager's absence and timesheet entries can be linked to pay code groups assigned at employee level. Managers can be granted access to additional pay codes within the group that are marked as *manager only*.

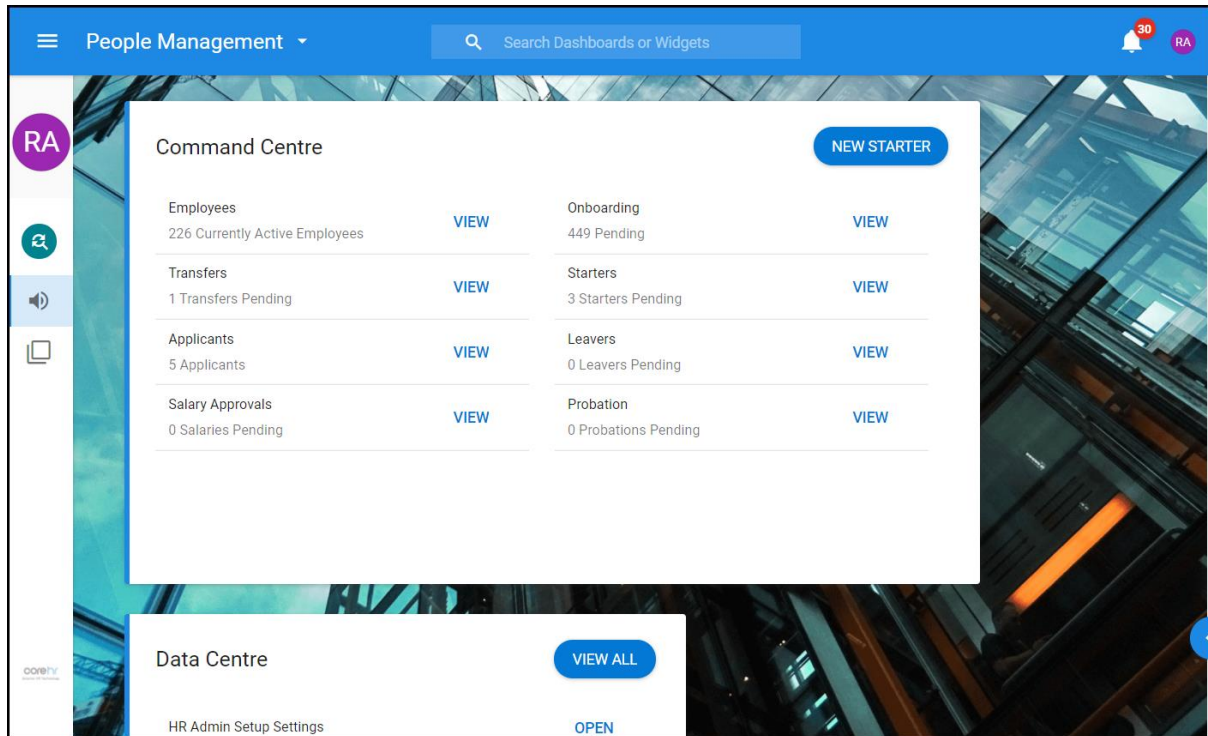

4.1. How to Assign a Pay group at Employee Level.

Once the Pay Code Groups have been created, they can be assigned at person level or appointment level. This means that the specific employee will be part of the chosen pay group.

4.1.1. By Person & Appointment

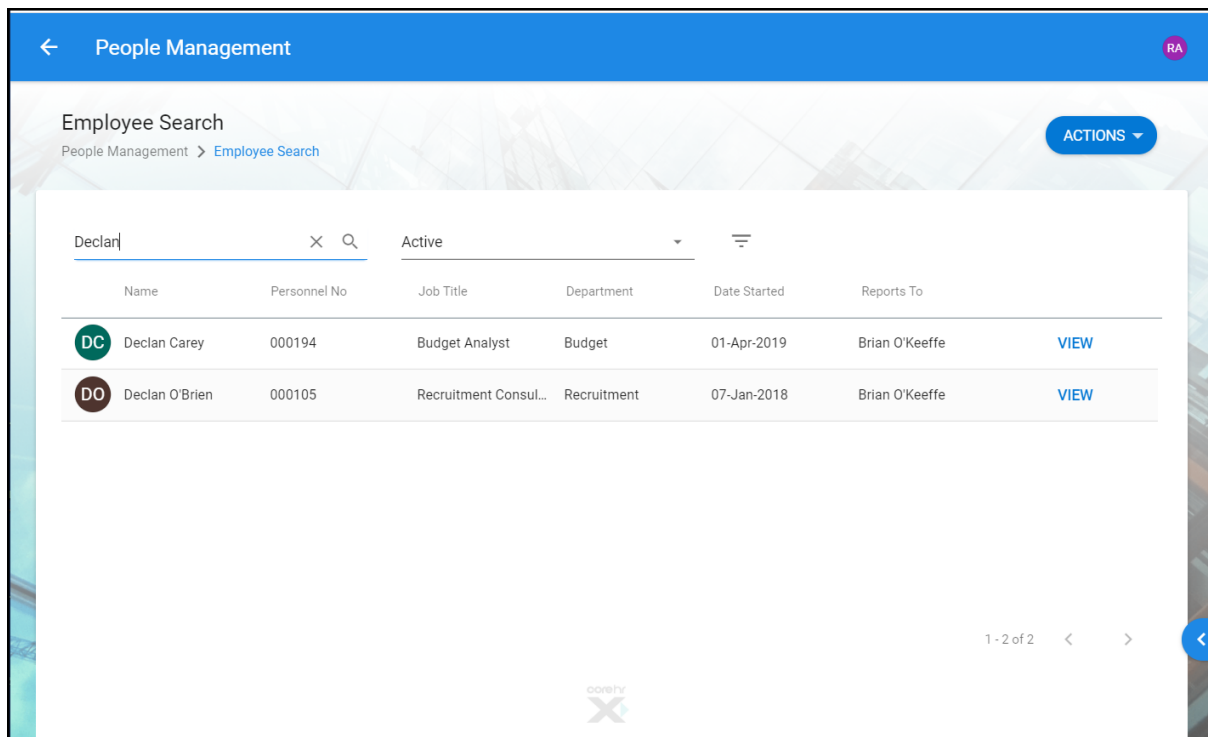

To access the screen:

1. Quick jump to *Command Centre* widget on the *People Management* screen.

2. Go to **Employees** using the search facility and find relevant employees.

3. Select **View**.

4. Scroll down to **Pay Code Access Groups** on the left-hand column which displays the Pay Code Assignment Screen.

Employee Search

Declan Carey (000194)

DC Active Budget Analyst Start Date 01-Apr-2019 Payroll Status: On Payroll

Pay Code Access Groups

Pay Code Grouping Assignment Level Default

EXTRA Appointment Person DELETE

Additional Groups

Work Pattern Group Cost Centre Pattern

SAVE

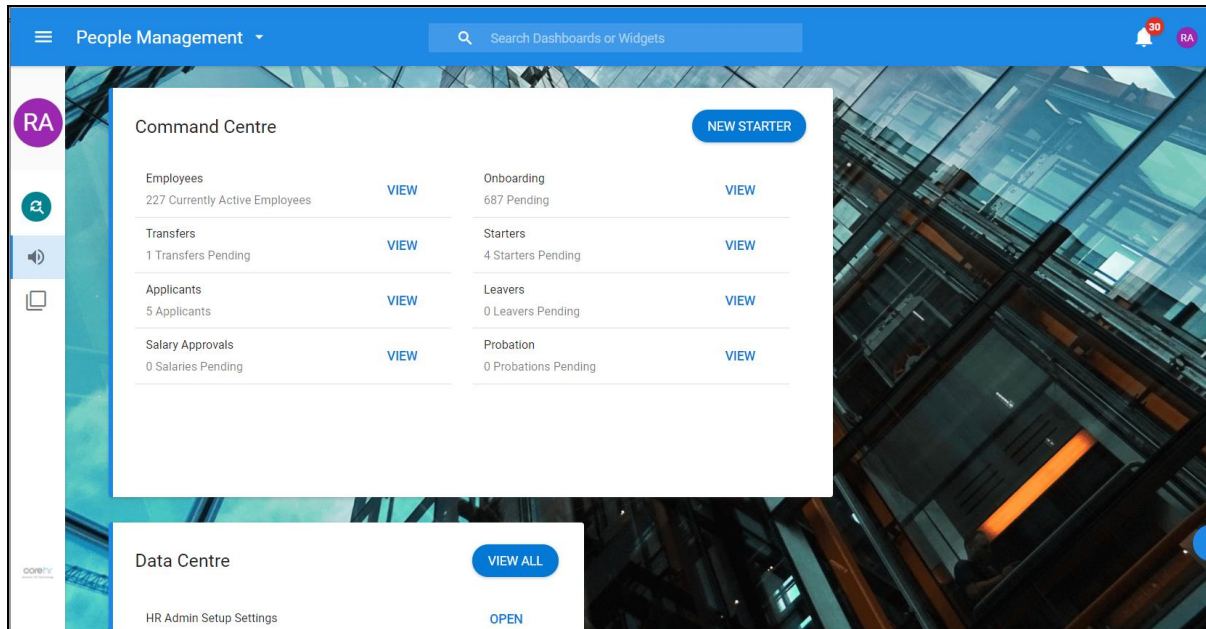

5. Click **Add**. Select the **Pay Code Access Group**.
6. Select the desired assignment level column i.e., Person or Appointment. Groupings assigned at the *Person* level will be for all the employee's Appointments unless a grouping is assigned to an Appointment. Groupings assigned at the appointment level override the Person Level for the Appointment being viewed.
7. Upon saving, the default indicator will update to Y to indicate which is the default grouping used for the person or person/appointment combination.

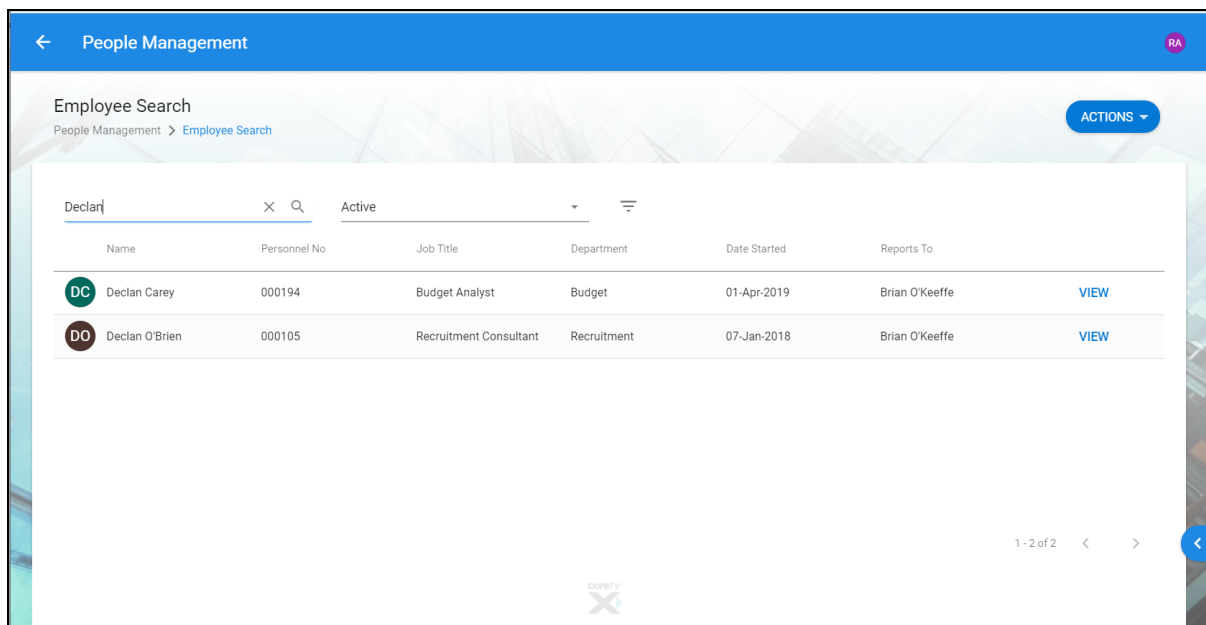

Note: At the employee level, multiple pay code groups can be assigned

4.1.2. How to Delete a Pay Code Group Assignment

1. Quick jump to *People Management*.

2. In the *Command centre*, click **View** after the Employees section.

3. Search for the relevant employee.
4. Click **View**.

5. You see the Pay Groups which they have access to listed under Pay Code Grouping and Appointment Level.
6. Click **Delete**.
7. You will then receive a warning.
8. Select **Yes**.

9. Click **Save**

4.2. How to Assign a Pay Code Group to an Admin or Manager

In both Timesheet Entry and Absence Entry, the Pay codes lists which return to manager and employees can be limited through use of pay codes groups. Pay code groups are assigned to Managers either by System users or Work Groups. In these cases, the system user level configuration takes precedence over the work groups level.

The default manager configuration is:

1. **No Pay Code Grouping applied:**

In this case there are no limits applied and all pay codes are returned.

2. **System User Level/Organisational Role**

Pay Code groups which are assigned at System User/Organisational roles level take precedence over the Work Groups.

Within site settings, the *Manager Before Org Roles Access* decides if an Organisation role or Username take precedence.

 **Note:** The setting *Manager Before Org Roles Access* setting applies to all indicators set within System Users > Access Privileges section.

3. Employees Work Group

The personalised groups assigned to an employee's work group dictates codes. As an example, if a manager has employees in various work groups, the list of pay codes available will also vary.

V28 Enhancements:

Managers Portal Absence Entry and *Timesheet Entry* link to the pay code groups assigned at the employee level.

- If the configuration is set, this overrides the three examples above i.e., the pay codes listed are dictated by the groups assigned to the employee records.
- If an employee has no pay code grouping assigned, the system defaults back to whichever one of the options explained above is set as the default.

 **Note:** Linking Manager Input to Employee Pay Code Groups only applies to Portal Screens.

Username / Organisational Role Level

The username field supports username or organisation roles entry e.g., Line Manager.

Where it is applied at system user level, the manager or administrator entry is restricted to the grouping that is assigned to their username or organisational role. This applies to the following screens:

- *Portal Timesheet Input & Absence Entry.*
- *Back-Office Maintain Hours & Record Absence Details*

Configuration

To configure, complete the following steps:

1. Connect to the Back Office.
2. Navigate to System Users. Here you see the menu option location is Core time > System Params> System Users >
3. Enter the Username or Organisation roles name.
4. Select Access Privileges within Selection Details on the right-hand side of the screen.
5. Enter the required Pay Code Access Group located on the bottom left of the screen

 **Note:** Advanced configuration supports a precedence order. You can have the order of username overriding organisational role or the other way around.

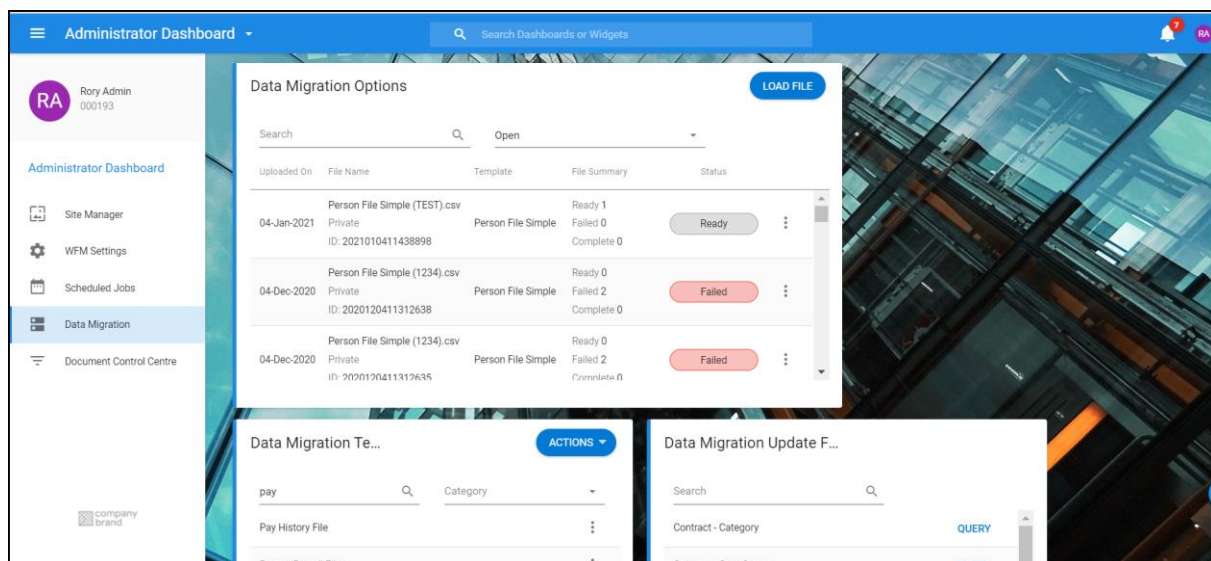

5. Data Migration

Pay codes now support Data migration, once the pay codes exist on Payroll. This section guides you through the process of migrating data using the Data Migration Template and the Data Migration Helper File.

Note:

Before you download the Data Migration Template, you will need to download the Helper file. This is a csv file which gives a breakdown of the fields on an excel sheet and gives you guidance on filling out the template. See the section below for further guidance.

1. Go to *Administrator Dashboard* and select **Data Migration**.

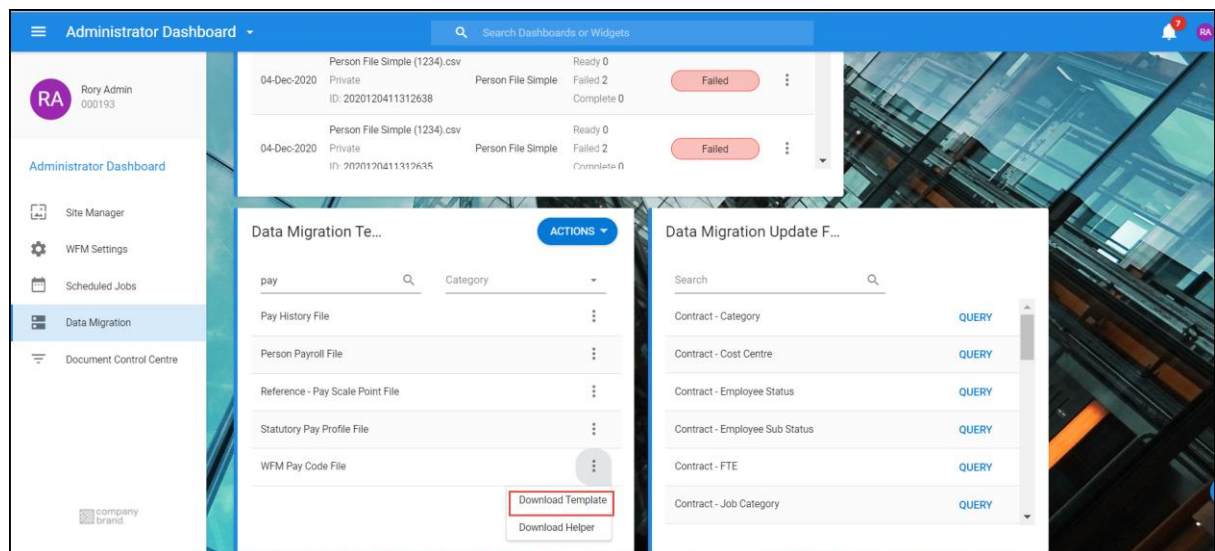

2. On the Data Migration Template, select WFM Pay Code file.
3. From the three dot menu, select **Download Helper**. You can use the search bar to find it more easily. Once the file downloads, open the folder and the Helper Excel sheet. Here you can get specific information on how to populate the fields etc.

WFM: Pay Codes - User Guide

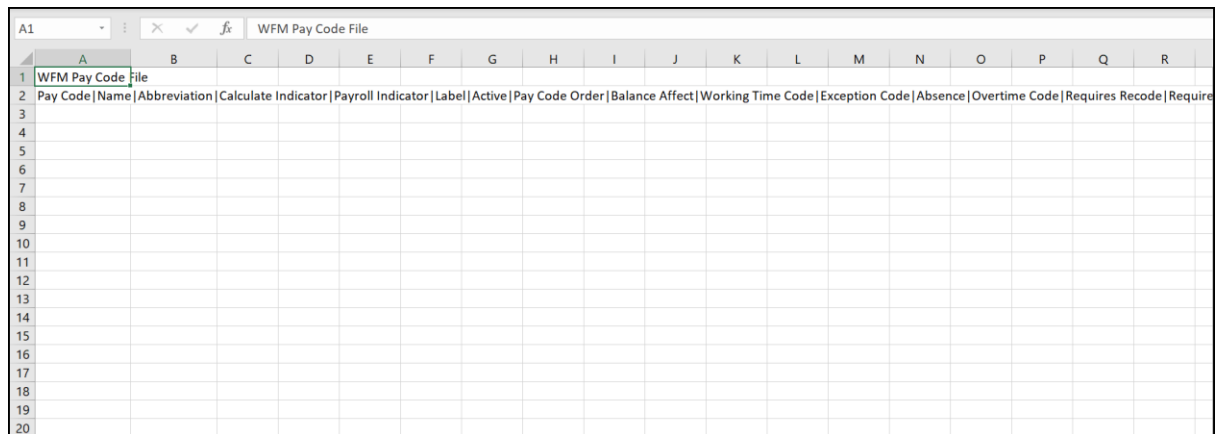

User Information Allows a user to load pay code details						
Field Name	Type	Size	Importance	Data Category	Data Sub Category	Field Help Information
Pay Code	Numeric	9999	Mandatory	Reference	Code	- Numeric code associated with a specific pay code - Max length of 4 - Have to be a unique number - On integrated sites the pay code has to exist in payroll
Name	Alphanumeric	50	Mandatory	Reference	Description	- Name of pay code - On integrated sites the name must match the payroll pay code name
Abbreviation	Alphanumeric	2	Mandatory			- Abbreviation of the pay code - Letters should be capitalised - The abbreviation is used for the purposes of calendar displays
Calculate Indicator	Alpha	1	Optional	Indicator	D or M	- This indicates whether calculations are in minutes or in decimal - Will default to M if nothing is set
Payroll Indicator	Alpha	1	Optional	Indicator	D,M or N	- You can choose either Decimal, Minutes or Non Payroll - Cannot be set to minutes on integrated sites - Will default to D if nothing is set
Label	Alphanumeric	50	Optional			- Label is used to identify a pay code as belonging to a specific group - Cannot contain spaces
Active	Alpha	1	Optional	Indicator	Y or N	- Populate with Y or N to indicate if a pay code is active - Will default to Y if nothing is set
Pay Code Order	Numeric	9999	Optional	Transactional		- Populate with the number that decide in which order the Pay Codes are to be displayed and Absence Entry
Balance Affect	Alpha	1	Mandatory	Indicator	P or N	- Indicates whether the pay code will have a positive or negative effect on the balance
Working Time Code	Alpha	1	Optional	Indicator	Y or N	- Populate with Y or N if the pay code is a working time pay code
Exception Code	Alpha	1	Optional	Indicator	Y or N	- Populate with Y if the pay code should indicate exceptional events on the system
Absence	Alpha	1	Optional	Indicator	Y or N	- Populate with Y if the Pay Code should be marked as Absence codes, such as Holiday - Both Overtime and Absence cannot be set to Y
Overtime Code	Alpha	1	Optional	Indicator	Y or N	- Populate with Y to mark the Pay Code as an Overtime Code - Both Overtime and Absence cannot be set to Y

- When you have finished reading the Helper file, download the template.

- Open the template once the file downloads. You can now add whichever specific Data you wish on the excel sheet.

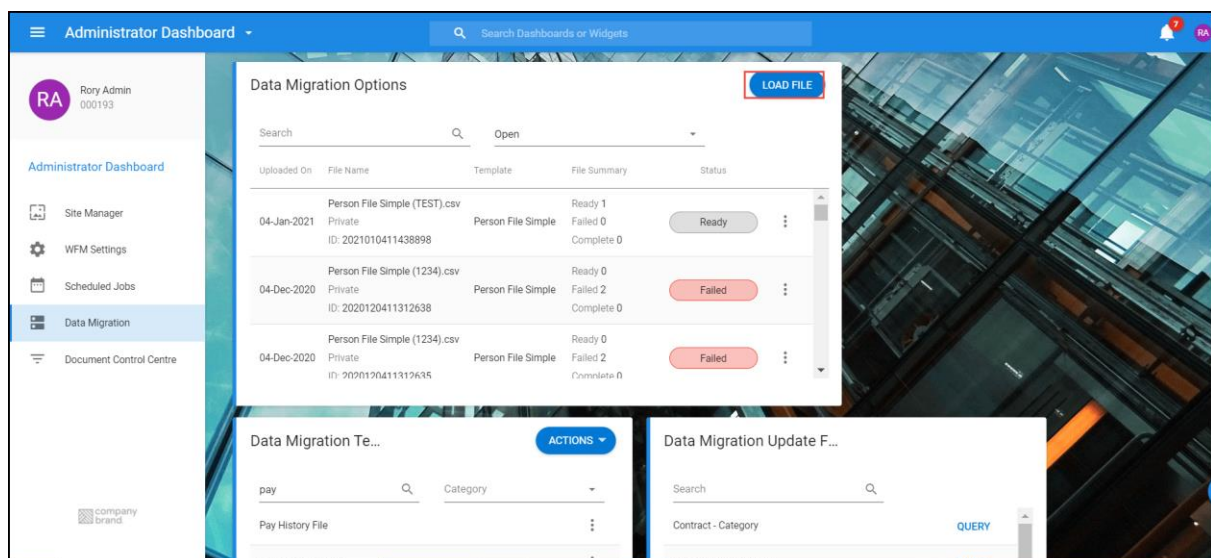

WFM: Pay Codes - User Guide

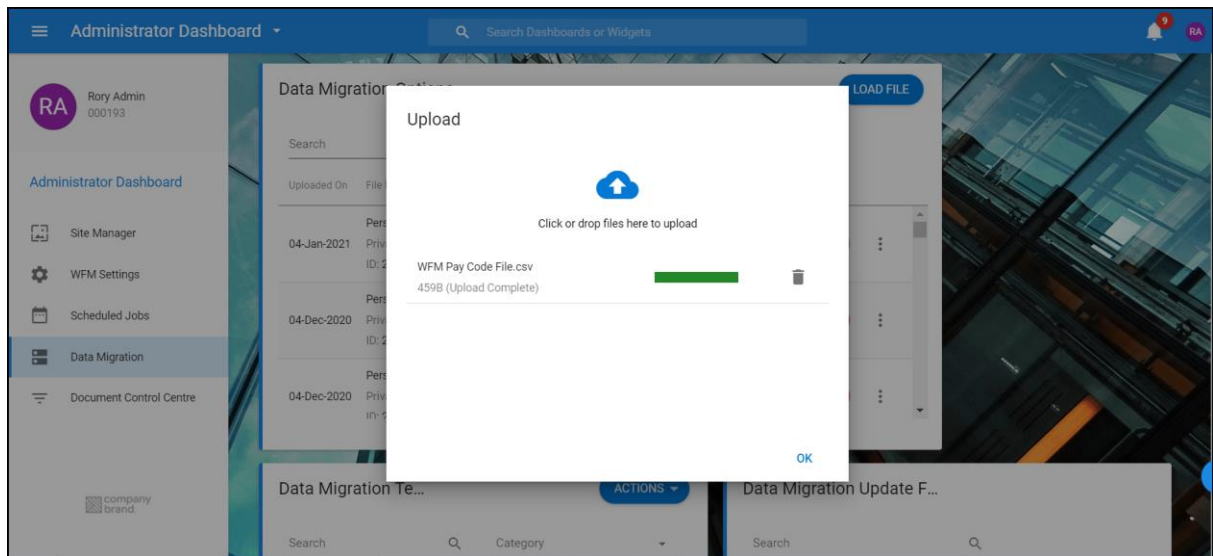

The screenshot shows an Excel spreadsheet with the following columns: Pay Code, Name, Abbreviation, Calculate Indicator, Payroll Indicator, Label, Active, Pay Code Order, Balance Affect, Working Time Code, Exception Code, Absence, Overtime Code, Requires Recode, and Requires. The rows are numbered 1 through 20. The first row is highlighted in green.

Pay Code	Name	Abbreviation	Calculate Indicator	Payroll Indicator	Label	Active	Pay Code Order	Balance Affect	Working Time Code	Exception Code	Absence	Overtime Code	Requires Recode	Requires

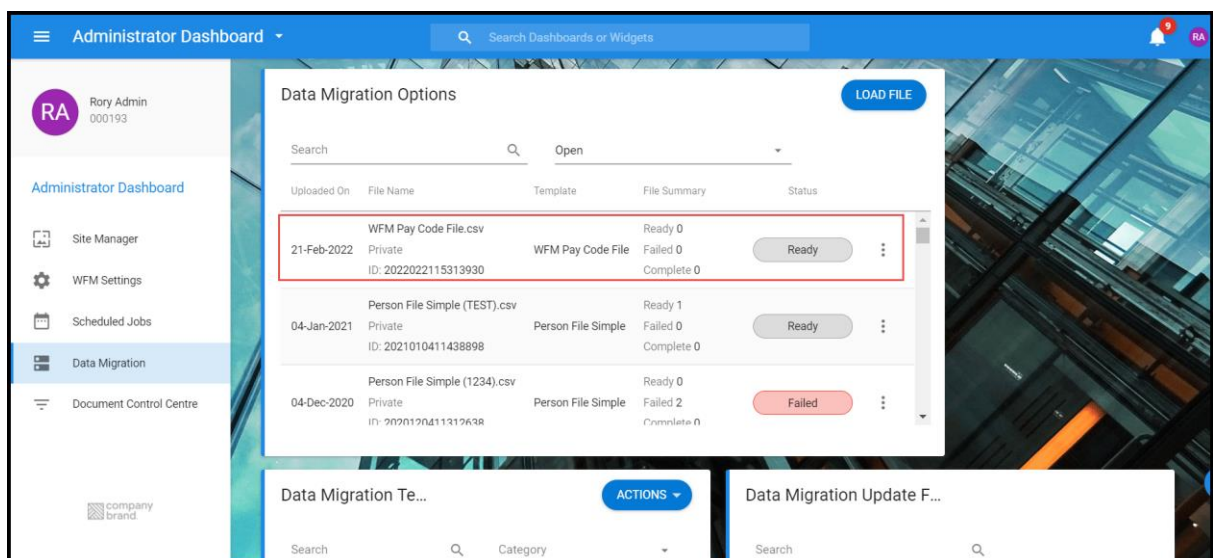

- Once you have saved the file as a csv locally, go back to the screen and select Load File.

- Upload the file to the system by either clicking and selecting the file or by drag and drop.
Click **OK**.

8. When the file successfully uploads you will see it under Data Migration Options and the status is Ready.

9. Click on the ellipsis and select **Edit**. When the screen opens, you see the information which you have entered on the csv file.
10. Click **Process All Records** for the information to go through.

For further information see the Data Migration User Guide on University.

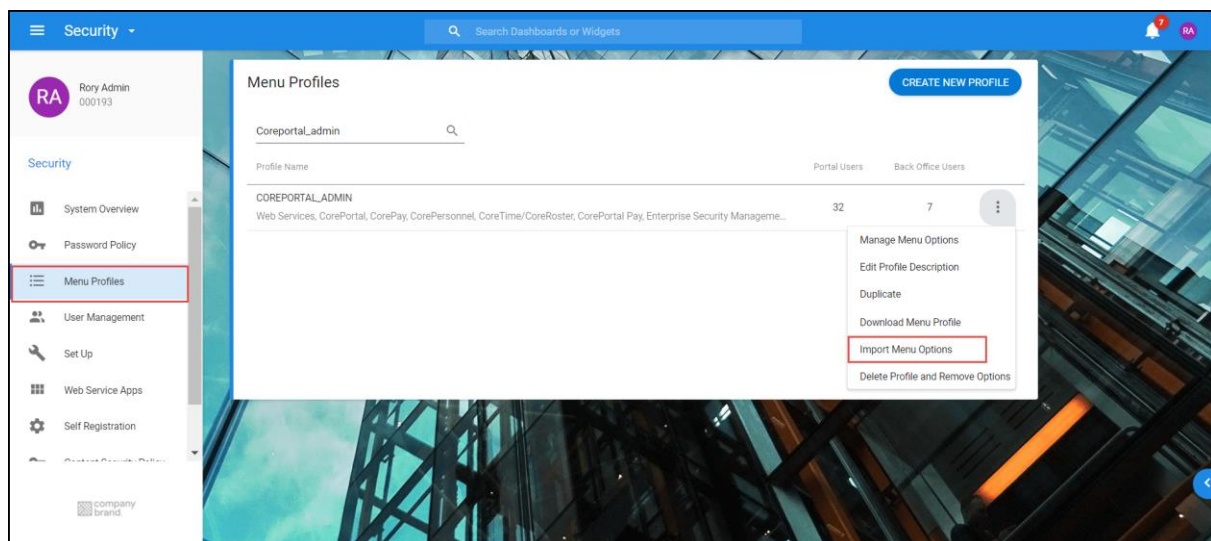

6. Menu Options

6.1. Importing Menu Profiles

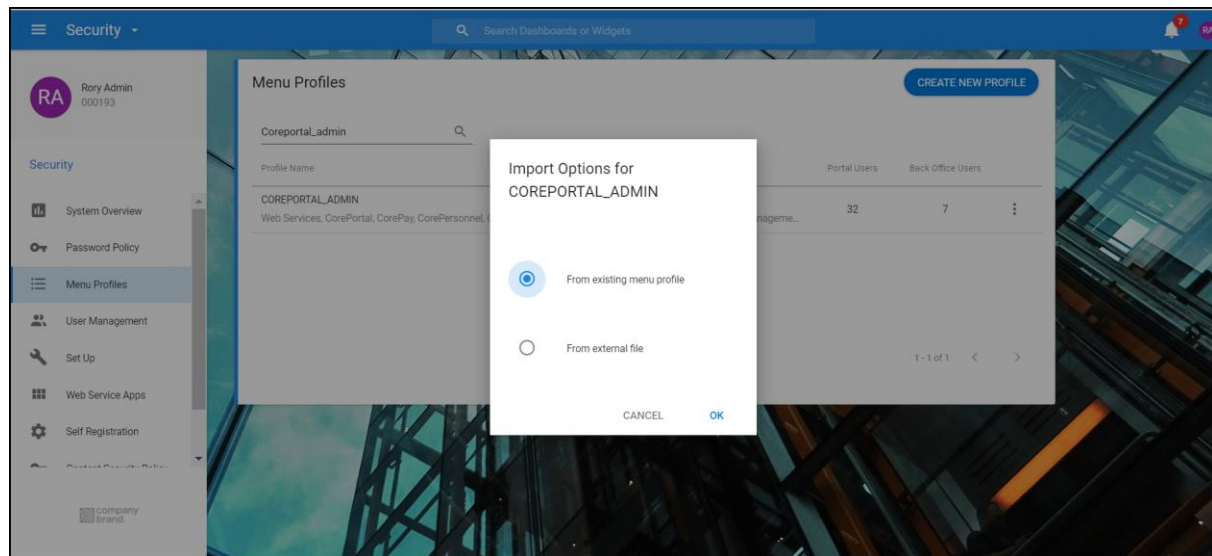

You will see below the menu options needed to access the *Pay Codes Screen*. However you can now import menu profiles to make the process easier.

To import the menu profiles, complete the following steps:

1. Navigate to *Security*.
2. Click on the **Menu profiles** tab.
3. Select **Menu Profiles** and choose the menu profile you wish to use e.g. CorePortal_admin.

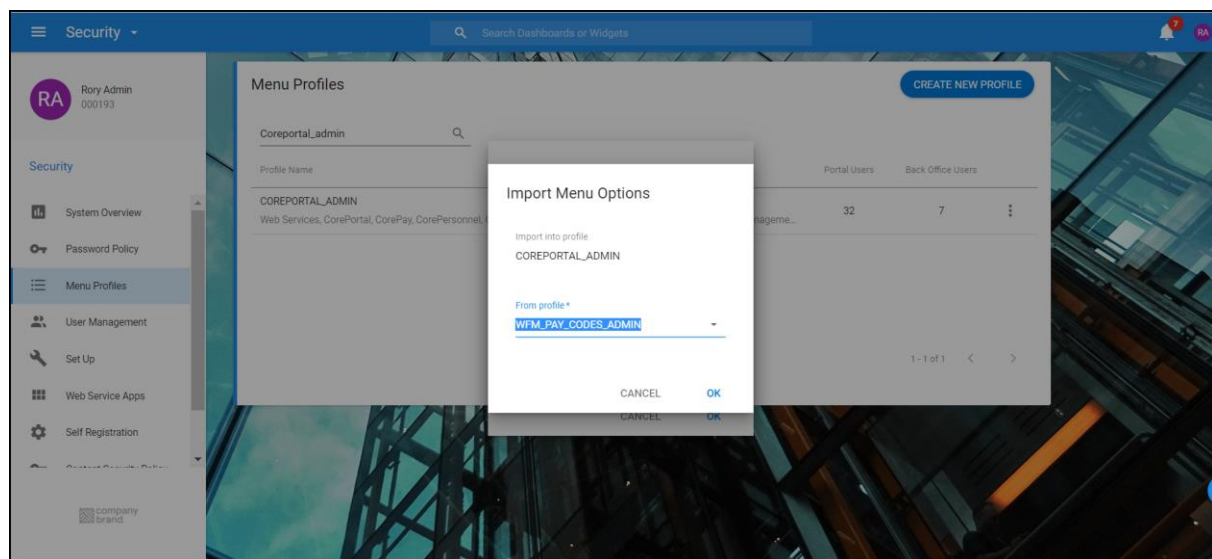

4. From the three dot menu select **Import Menu Options**.

5. Select **From existing menu profile**.

6. Click **Ok**.

7. You receive a message confirming the import.

8. Select **OK**.

9. The menu options are all enabled.

6.2. Menu Profiles

The following menu options need to be switched on for access to the Pay Code Configuration screens:

View	Menu Option
Pay Codes Configuration	WFM Configuration > Reference Data > Pay Codes 1036289163
Pay Code Groupings	WFM Configuration > Reference Data > Pay Codes > Pay Code Grouping 582475451
Open Payroll Pay Codes	WFM Configuration > Reference Data > Pay Codes > Open Payroll Pay Codes 159246908
Advance Settings	WFM Configuration > Reference Data > Pay Codes > Advance Settings 893294584
