1. Overview

1.1. Purpose of Guide

The purpose of this guide is to provide an overview of and the configuration associated with the *CorePortal Roster* feature. Items covered include:

- Roster functionality
- User processes
- Configuration options

1.2. CorePortal Roster Overview

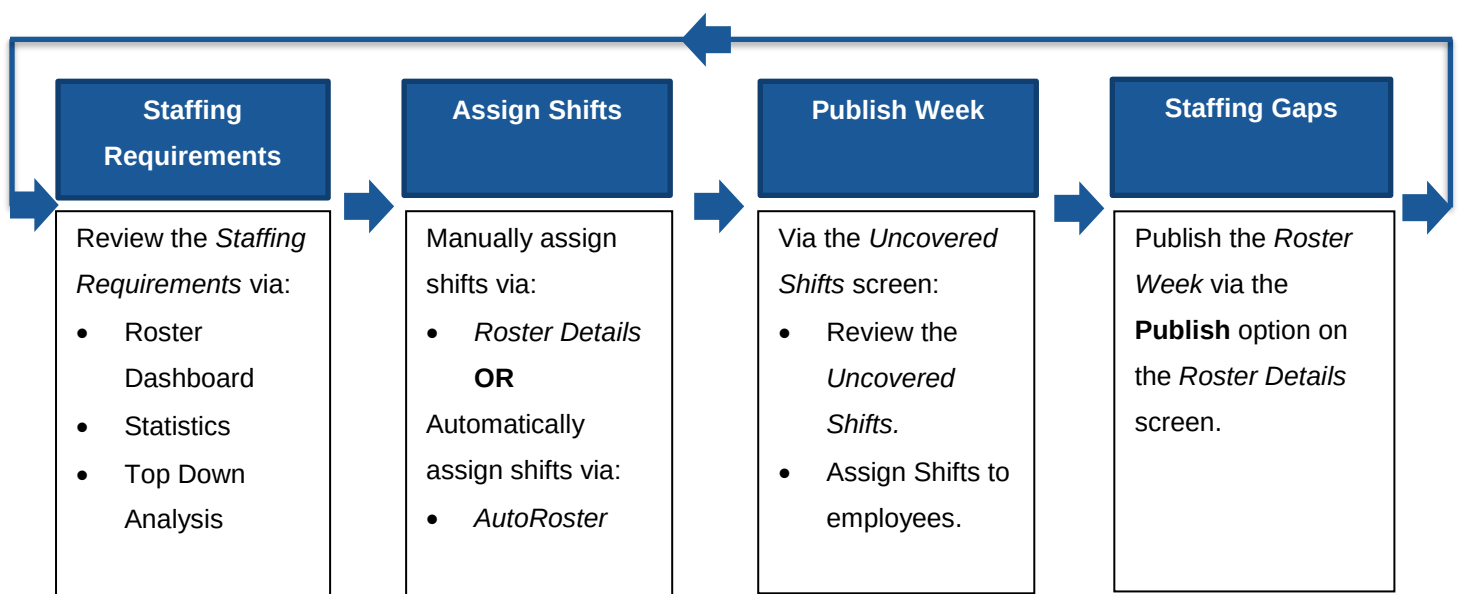

The *CorePortal Roster* function allows you to ensure your organisation has employees rostered to their shifts in the correct place, at the correct time. The *CorePortal Roster* system enables you to successfully plan, schedule, review and publish employee shifts to meet your business needs, therefore, match business demand with resource supply.

Features within the *CorePortal* function include:

- Workforce management dashboard
- Roster dashboard (KPIs)
- Roster creation and change
- AutoRoster
- Uncovered shifts
- Roster notifications
- Statistics
- Qualifications

1.2.1. Roster Cycle

The typical *Roster* process cycle is outlined in the below diagram:

**Note:**

The General Roster Configuration Guide on CoreHR University provides guidance regarding the main aspects of configuration:

- Roster Rules
- Base Requirements
- Validation Rules
- Team Area Configuration, etc.

Therefore, if you are responsible for the setup of the above items, it is recommended that you review the General Roster Configuration Guide before reviewing this guide.

The Roster Employee Self Service Guide on CoreHR University provides guidance regarding the main aspects of ESS processes and configuration. It is recommended for you to review the Roster Employee Self Service Guide after reviewing this guide.

2. Workforce Management Dashboard

2.1. Dashboard Overview

All Time and Attendance, and Roster administration functions, including manager functions, are centralised on the *Workforce Management* dashboard. Both the Time and Attendance, and Roster screens and/or widgets available are automatically configured to appear on this dashboard for ease of user access and workflow. Note that items that appear on the dashboard are subject to your user access.

Screens available from the *Workforce Management* dashboard are listed in the below table:

WFM Dashboard	Screens
Time and Attendance	• Team Scheduling • Approve/Sign Off • Team Balances • Time Exceptions
Roster	• Roster Details • Roster Dashboard • Statistics • Auto Roster • Uncovered Shifts • Validation Rules • Roster Qualifications • Roster Rule Tolerance • Top Down Analysis • Daily Staffing List • Roster Rules • Interface Values • Roster Requirements • Generate Demand • Base Requirements • Team Area Configuration

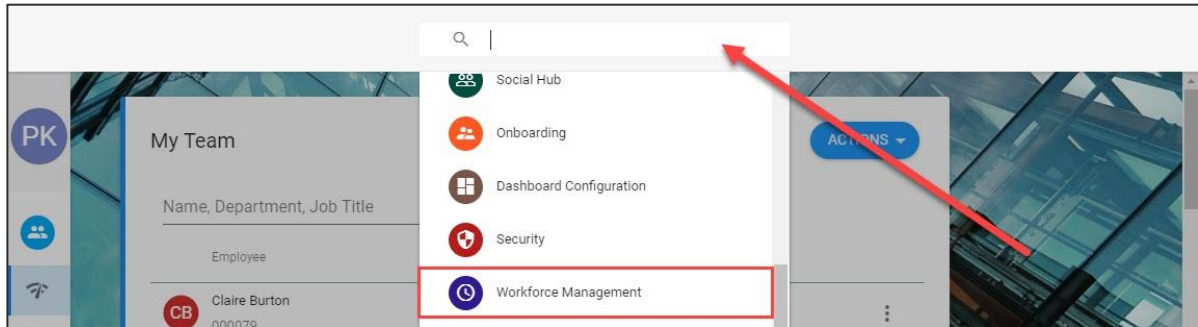

Note:

- Both the *Time and Attendance*, and *Roster* screens are also accessible from widget locations on *Administrator* and *Manager Dashboards*, where applicable.
- This guide only covers the *Roster* screens and processes. Search and review the *Time and Attendance* features on CoreHR University for further details on particular items.

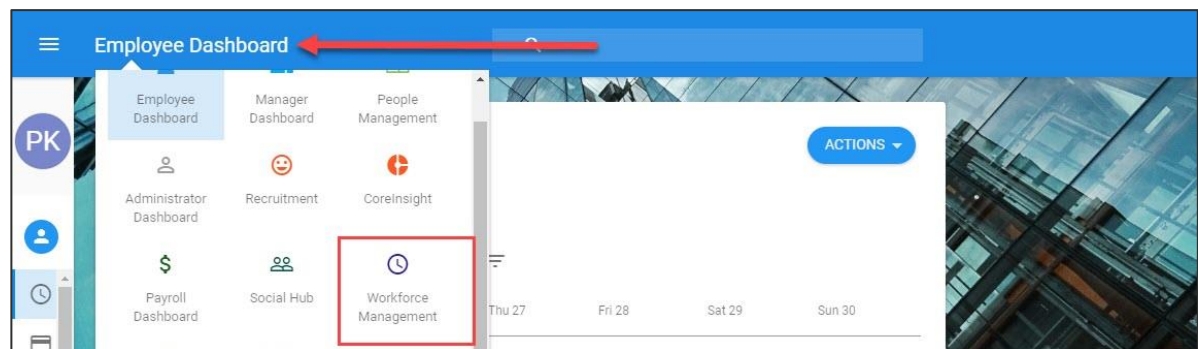

2.2. Accessing Roster

Roster is accessed using any of the 2 options available i.e. the *Quick Jump* menu or the *Dashboard Slide*.

Quick Jump

Dashboard Menu

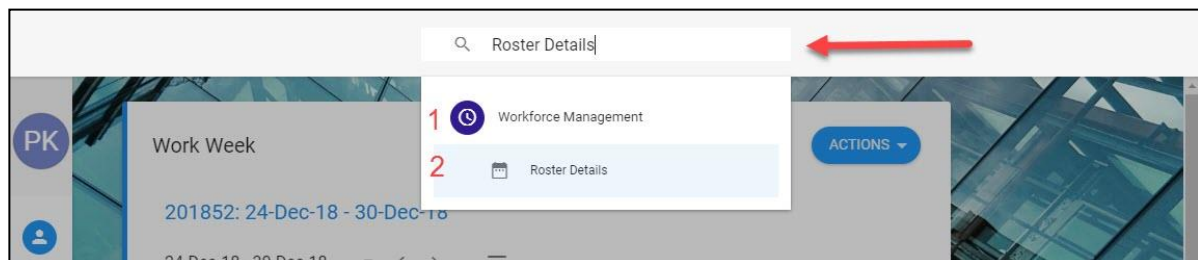

Screen / Widget Search via Quick Jump

It is possible to search for a *Workforce Management* screen or widget name in the *Quick Jump* menu, to jump straight to that object.

For example, searching for the term “Roster Details” returns the following items:

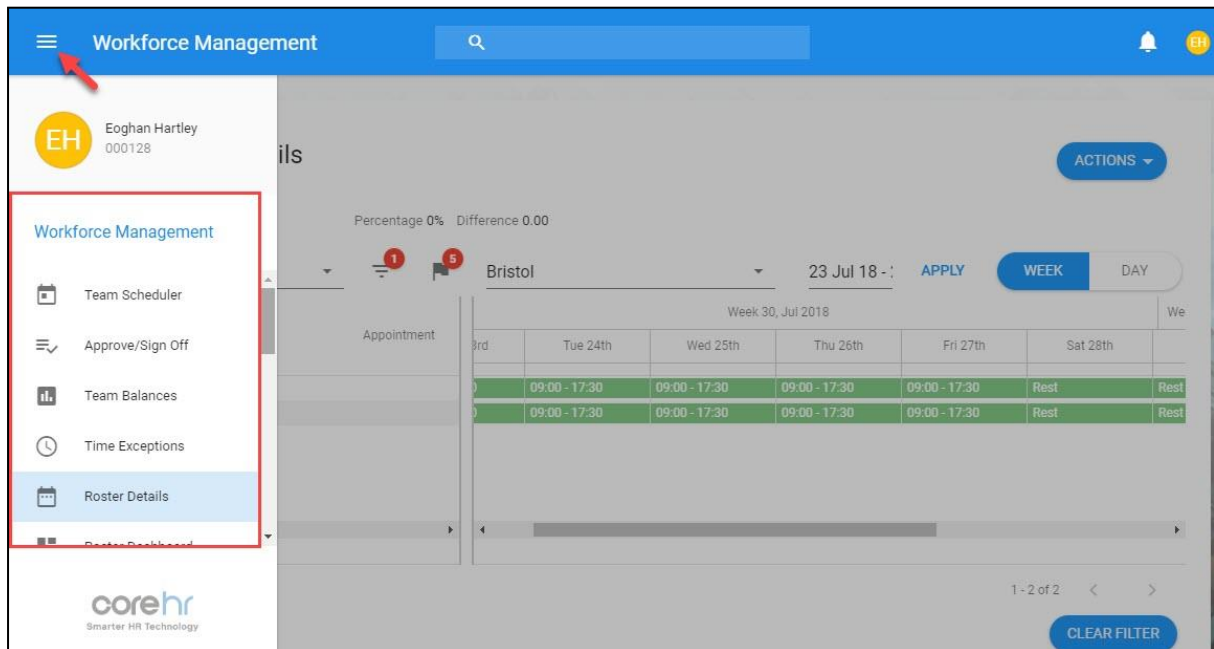

1. The dashboard that the screen is on i.e. *Workforce Management*.
2. The screen itself i.e. *Roster Details*.

Click on any of those items, to jump straight to it i.e. jump to the main dashboard page, the tab, or the actual widget/screen.

2.3. Configure Workforce Management Dashboard Tab Order

Items that appear on the *Workforce Management* dashboard can be listed in an order that is applicable to your needs.

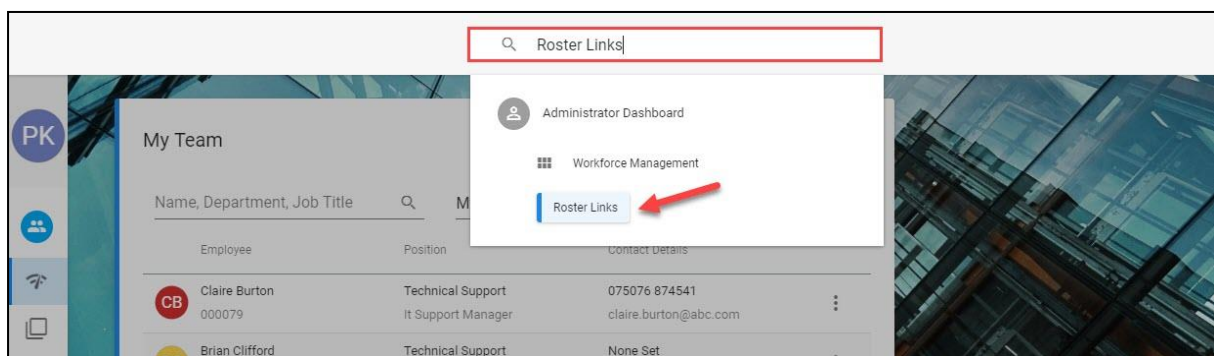

Note:

Items that are visible on the *Workforce Management* dashboard are based on your user access. All screen items are always listed on the *Roster Dashboard Order* screen. However, when you navigate to the *Workforce Management* dashboard, the system automatically checks your access and displays items for which you have access to only. For example, the *Time Exceptions* item displays on the *Roster Dashboard Order* screen, however, if you do not have access to the screen, it does not display on your *Workforce Management* dashboard.

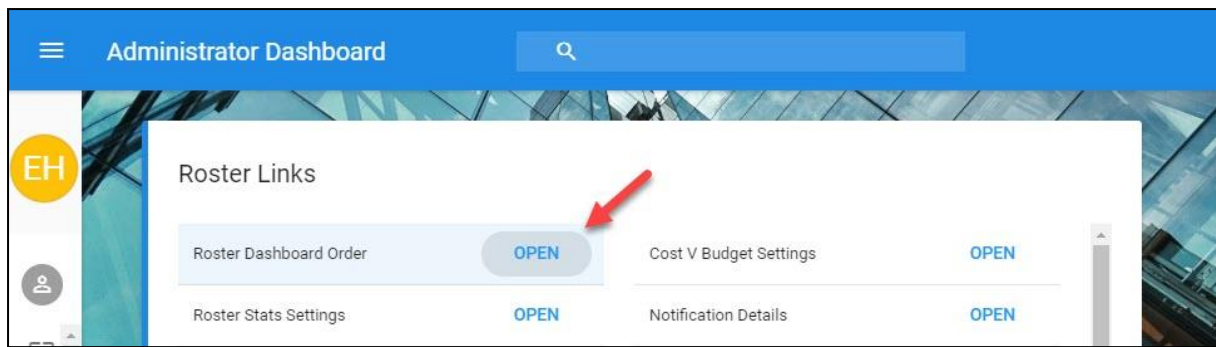

To arrange the order of items listed on the *Workforce Management* dashboard:

1. Quick jump to the *Roster Links* widget.

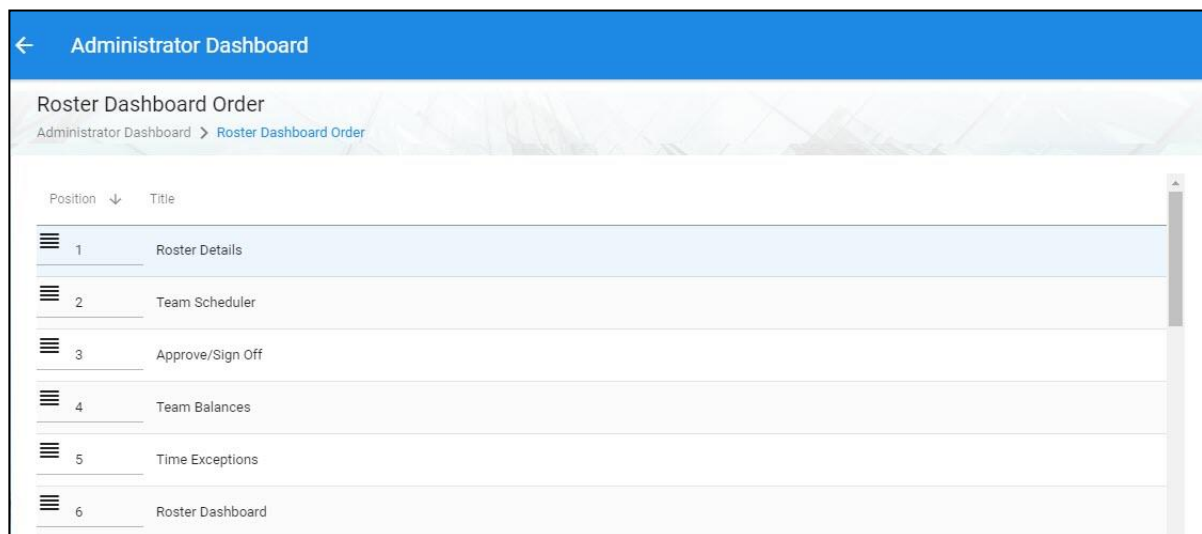

The *Administrator Dashboard* displays, showing the *Roster Links* widget.

2. Click the **Open** button for *Roster Dashboard Order*.

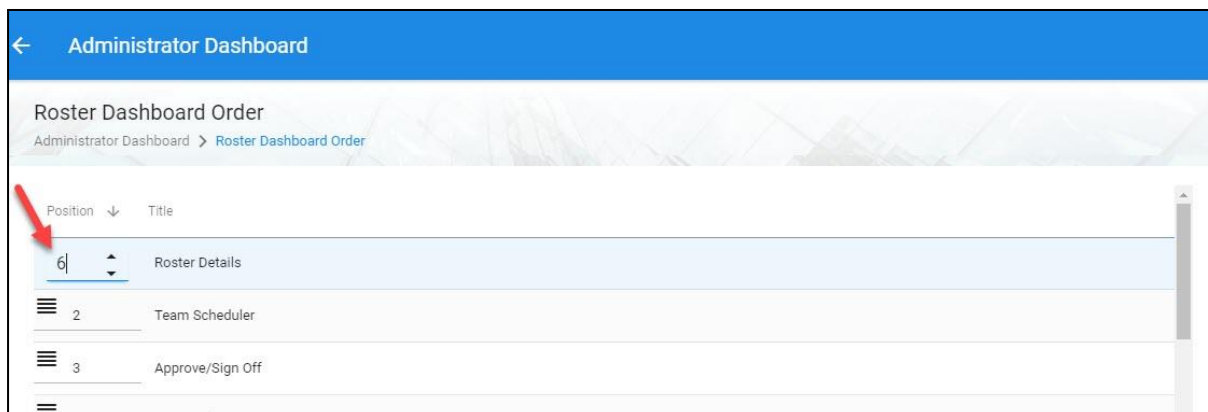

The *Roster Dashboard Order* screen displays.

From here it is possible to re-order the *Workforce Management* dashboard items.

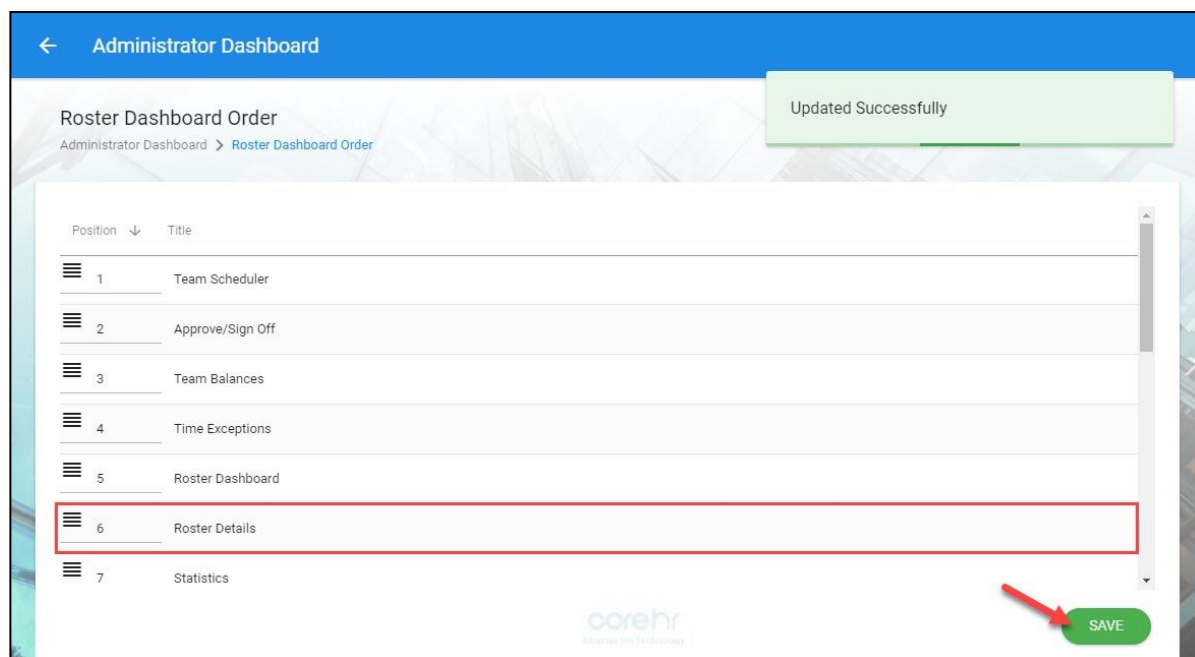

3. Click on the *Position* for the applicable item.

In this example, the *Roster Details* screen is re-ordered to appear 6th on the list.

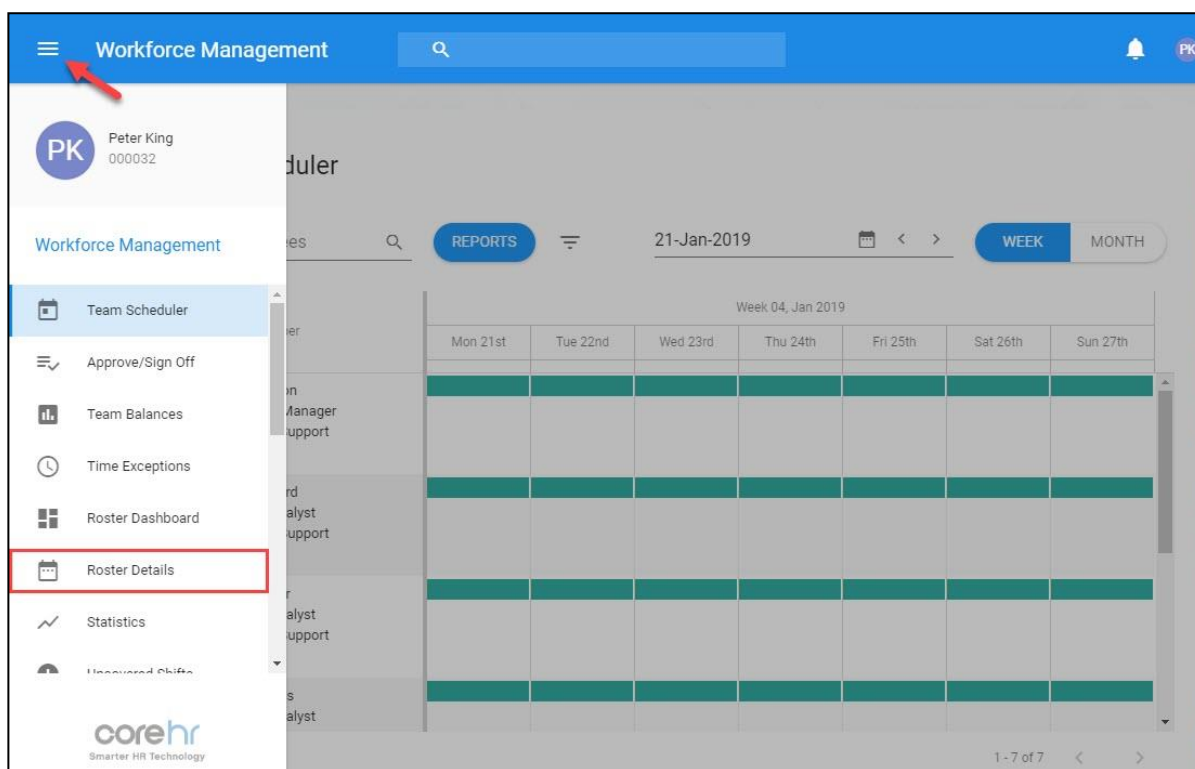

4. Click **Save** to apply the change.

The *Roster Details* screen is now ordered 6th within the list.

The *Roster Details* screen now appears 6th on *Workforce Management* list of items, subject to user access.

3. Roster Details Screen

3.1. Roster Details Screen Overview

The *Roster Details* screen allows you to view rosters for *Team Areas*, within your remit. This screen can display data for *Team Areas* in a *Day* or *Week* view. The below screenshots detail each view.

When on the *Week View*, it is possible to complete rostering tasks for employees within the Team Area, to include:

- Review Employee details
- View the weekly Cost vs Budget figures
- Complete Roster Change - One
- Complete Roster Change - Many
- Enter/Amend Absence Details
- View/Amend existing Roster Contracts
- View/Amend Default Shifts
- View/Amend Home Team Areas
- View/Amend Attendance Details
- View/Amend Clockings
- View Roster Notifications

The main panel of the *Roster Details – Week View* screen displays the *Roster* for the specified *Team Area* and *Roster Period*. Each column represents a day within the week, and each row displays the employee's corresponding *Work Pattern*.

3.1.1. Configure Colour Codes for Work Patterns

It is possible to colour code each *Work Pattern* instance, this is completed via the *Work Pattern* screen in *Back Office*. To do this:

1. Go to *Back office > CoreTime/CoreRoster > System Params > Work Patterns*.
2. Enter the *Code*.

3. Select *Rostering*.
4. Choose the *Highlight Colour* from the *Colour Palette*.
5. Click the  button to save.

Work Patterns

General Details

Code: 7.50HRS | 7 Hour 30 Min Day 09:00-17:30 (1hr Brk)

Default Pay Code: 3600 | Normal Attendance

Default Overtime Code: 3601 | Extra Hours Worked

Default Hours: 7.50

Default Start Time: 09:00

Default End Time: 17:30

Dormant: ☐ Retail Calculation: ☐

Rostering

Pattern Type: RO | Rostering Pattern

Pattern Abbreviation:

When on the *Day View*, it is possible to view breakdown, by time slot, of what employees are rostered to work, this includes the detail of what breaks they are scheduled to take.

It is also possible to display a graphical breakdown of the *Required Vs Rostered* employees at a day level. By displaying the graph on screen, this provides you with the ability to view times in the day that are over or under staffed.

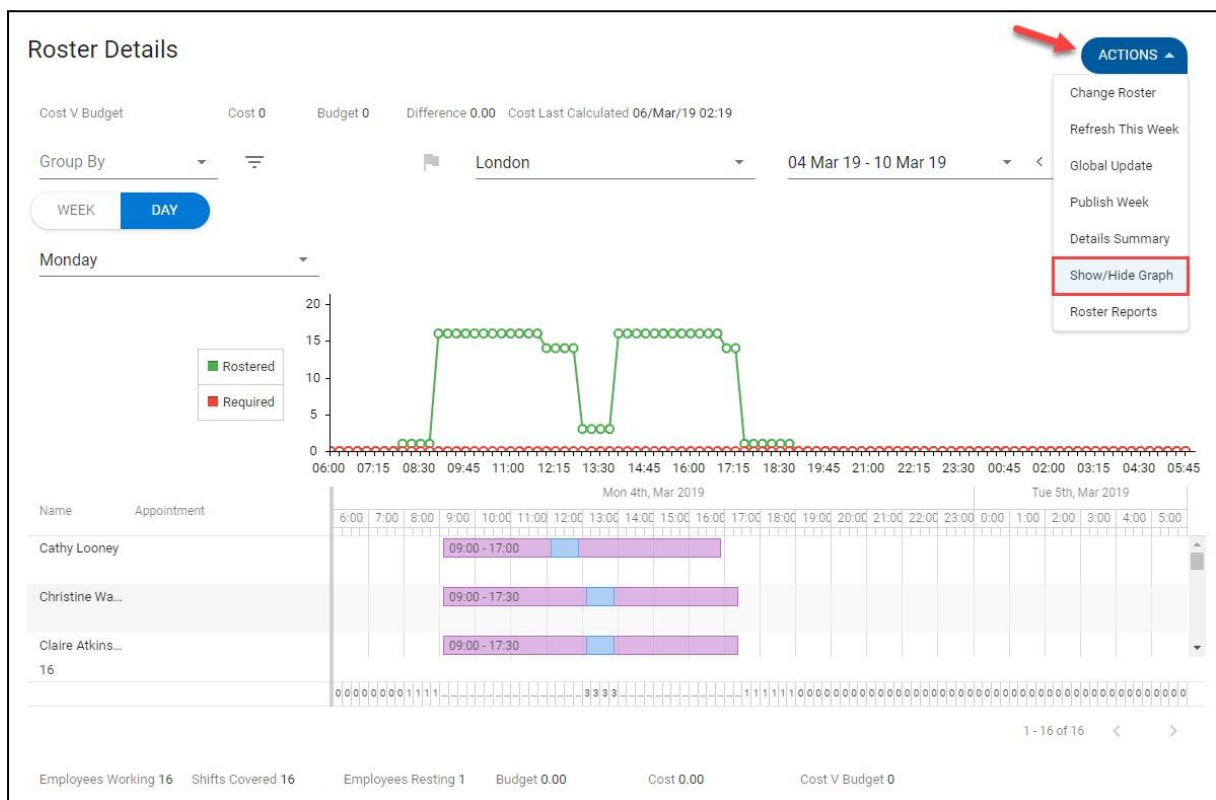

To display the *Day View* graph:

1. Click the **Actions** button.
2. Select **Show/Hide Graph**.

The *Required Vs Rostered* graph now displays on screen.

To remove the graph from the screen, select the **Show/Hide Graph**.

3.1.2. Employee Details Display

The employee details that display to the left of the *Roster Details* screen are controlled by *Admin Settings*. The below screenshot highlights the location of these details.

Roster Details

Configure Employee Details Display

The items displayed here are configurable. The below table details each *Admin Setting* that can show/hide details for employees, dependant on what details you require on the *Roster Details* screen.

To update the screen to show/hide new details for employees:

1. Quick jump to *Site Manager*.
2. Open **Admin Settings**.
3. Search for the required parameter and set to 'Y' to show, or 'N' to hide.

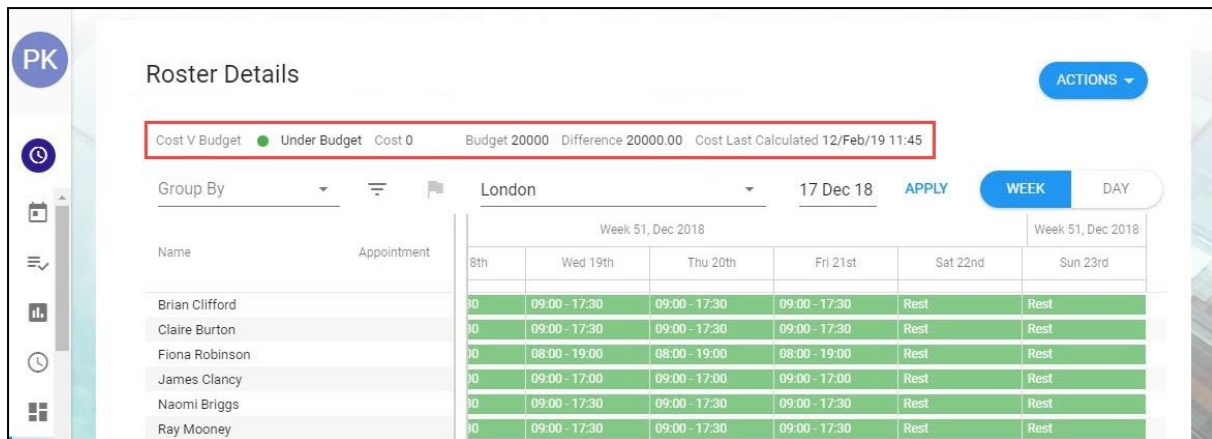

See the table below for the full list of parameters applicable here and the items they correspond to.

Admin Setting	Explanation
cp_roster_show_category	Display Category
cp_roster_show_job	Display Job Title
cp_roster_show_wgroup	Display Work Group
cp_roster_show_dept	Display Department
cp_roster_show_photo	Display Photo
cp_roster_show_position	Display Position
cp_roster_show_expense	Display Expense

cp_roster_show_col_bal	Display Balance
cp_roster_show_col_allow	Display Allowed
cp_roster_show_col_avg	Display Average
cp_roster_show_col_contr	Display Contract
cp_roster_disp_ot	Display Overtime

3.1.3. Cost Vs Budget

The *Costs vs Budget* feature makes it possible to compare the budget for the day or week, against the costs that occur. The *Cost vs Budget* for the *Week View* is automatically shown on top of the grid.

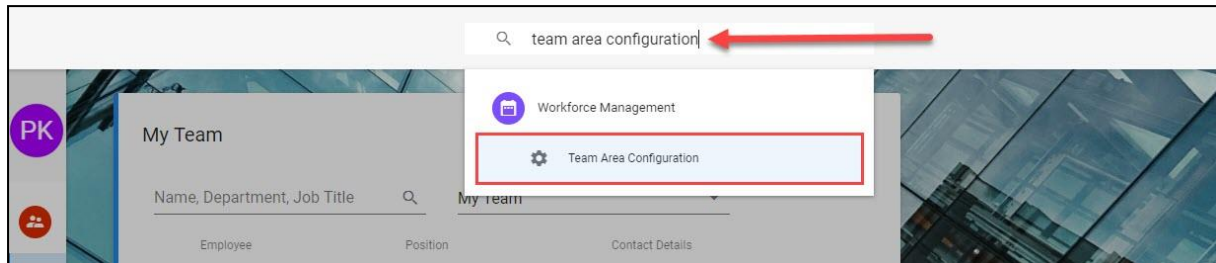

It is also possible to view *Costs* on the *Day View*, shown below.

The *Budget* is assigned per *Team Area*. Here, it is possible to assign a set budget to a group of dates. These dates can be set on a daily, or a weekly level.

To configure the *Team Area Budget*:

1. *Quick Jump to Team Area Configuration.*

2. Select the applicable *Team Area* from the drop-down list.

3. Select **Open Budget**.

The *Budget* screen appears.

4. Enter the *Start Date*.

5. Enter the *End Date*.

- To set on a daily level, you must enter the same required date for the budget into the *Start Date* and *End Date* fields.
- To set the required budget for a weekly level, you must enter the *Start Date* of the week in the *Start Date* field, generally the Monday, and the end date in the *End Date* field, generally the following Sunday.

6. Enter the *Budget*.

7. Click **Save**.

A screenshot of the CoreHR 'Budget' screen. The header shows 'Budget' and 'Workforce Management > Budget'. Below the header is a table with three columns: 'Start Date', 'End Date', and 'Budget'. The table contains one row with the values '15-Apr-2019', '21-Apr-2019', and '100000'. To the right of the table are buttons for 'ADD', 'DELETE', and 'SAVE'. A red arrow points from the 'ADD' button to the table, and another red arrow points from the 'SAVE' button to the bottom right of the screen. The CoreHR logo is visible at the bottom of the screen.

Note:

It is also possible to upload daily and weekly *Budget* values for *Team Areas* via the *WFM Interface File*. For further information, view the WFM Interface file training material on CoreHR University.

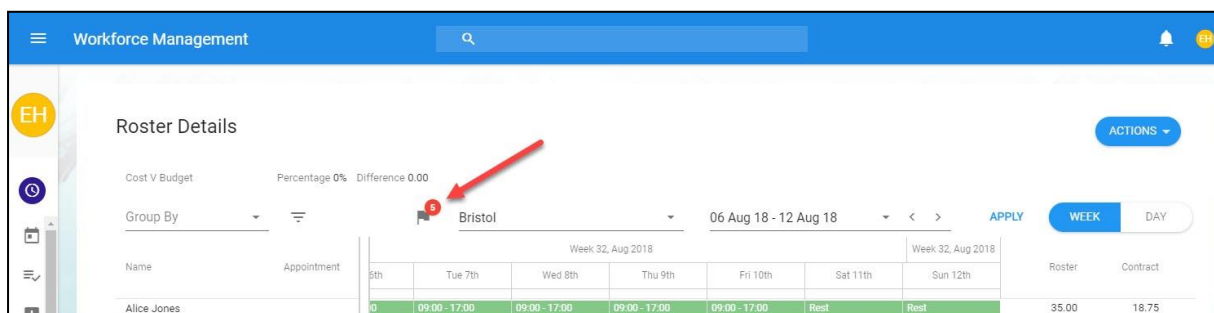

For further information on the full configuration required for *Planned Costs Vs Budget*, view the Planned Costs Vs Budget training material on CoreHR University.

3.2. Roster Notifications

Roster Notifications are configured to highlight when the *Roster* may be under or overstaffed, along with other *Roster Validation Rules* that are applicable to your *Team Area*. Therefore, it is possible to base *Roster Notifications* via the *Validation Rules* that have been defined for and assigned to a *Team Area*.

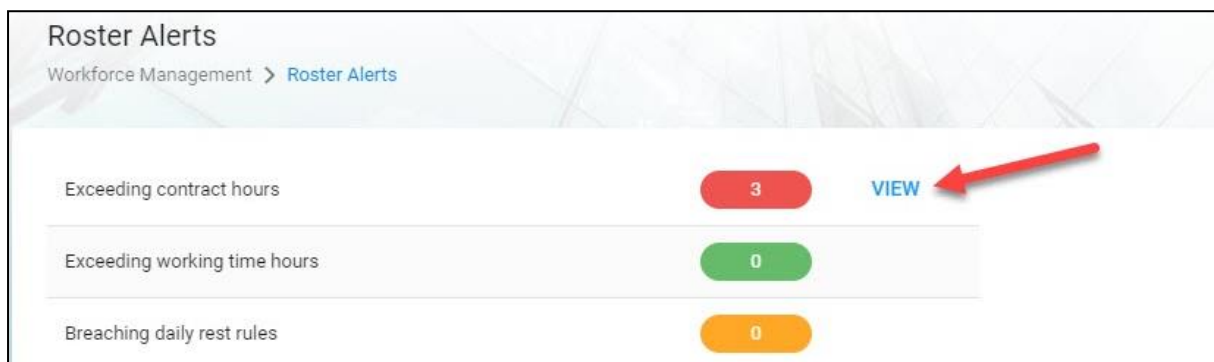

To view the list of *Roster* notifications via the *Roster Details* screen:

1. Click the  button.

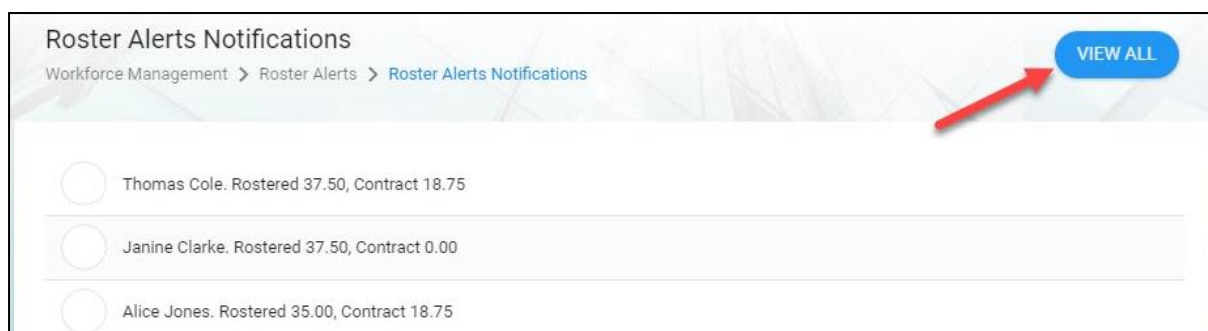

The *Roster Alerts* screen displays.

2. Click **View** on the applicable alert.
In this example, the 'Exceeding contract hours' alert is selected.

The *Roster Alerts Notifications* screen displays.

All employees exceeding their contracted hours are listed.

3. Click **View All**.

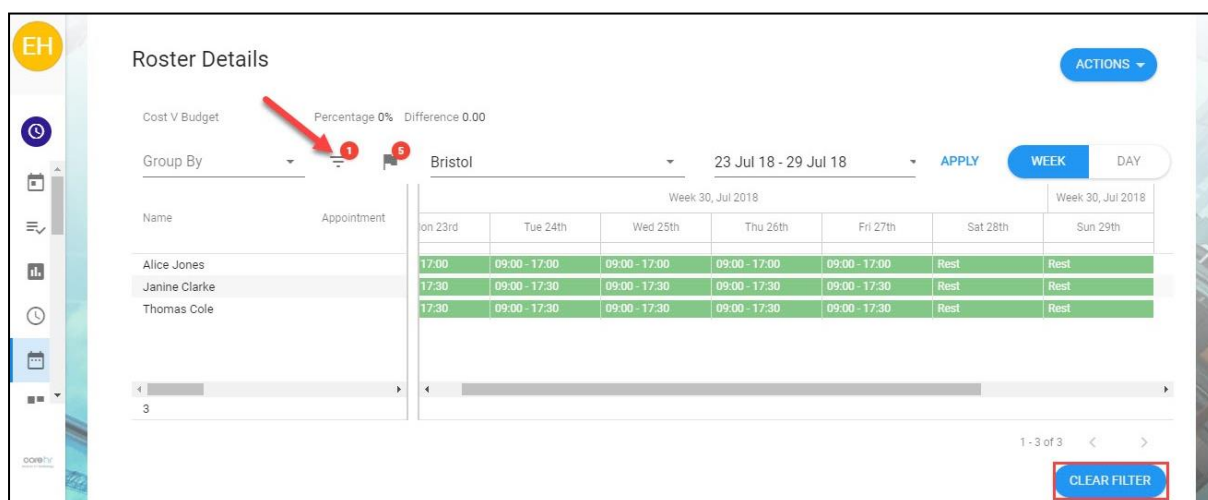

The *Roster Details* screen now displays.

The system has automatically added a filter to the screen, therefore, only employees applicable to the 'Exceeding contract hours' alert are shown on screen.

It is now possible to complete the applicable actions for these employees only.

4. Once complete, it is possible to click the **Clear Filter** button.

Clearing the filter will allow the *Roster Details* screen to display all employees in the *Team Area* again.

3.2.1. Configure the Display of Roster Alerts

The *Admin Setting* detailed in the table below can be configured for *Roster Notifications*.

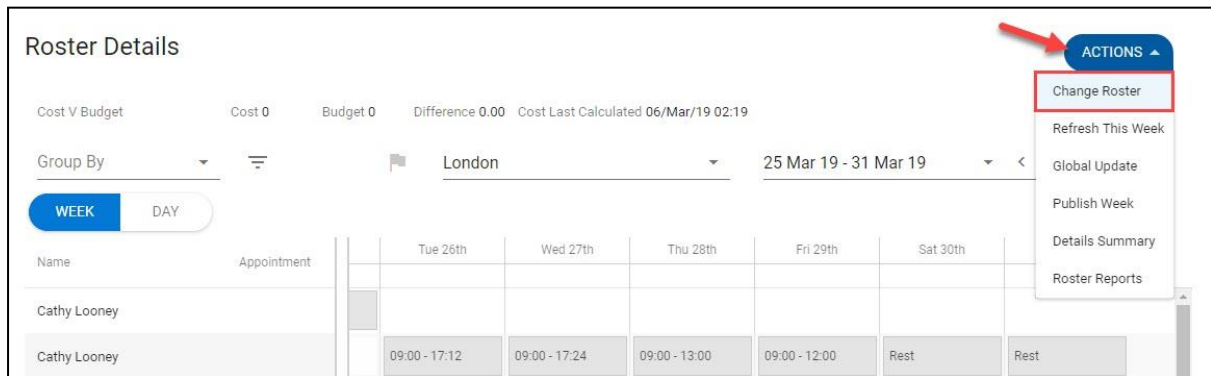

Parameter	Description
cp_roster_notif_hide0	It is possible to hide <i>Roster Notifications</i> from appearing on the <i>Roster Details</i> screen if the notification count is 0. - If set to 'Y', <i>Roster Notifications</i> do not display when the value is 0. - If set to 'N', <i>Roster Notifications</i> display when the value is 0.

3.3. Change Rosters

3.3.1. Change Roster – Many

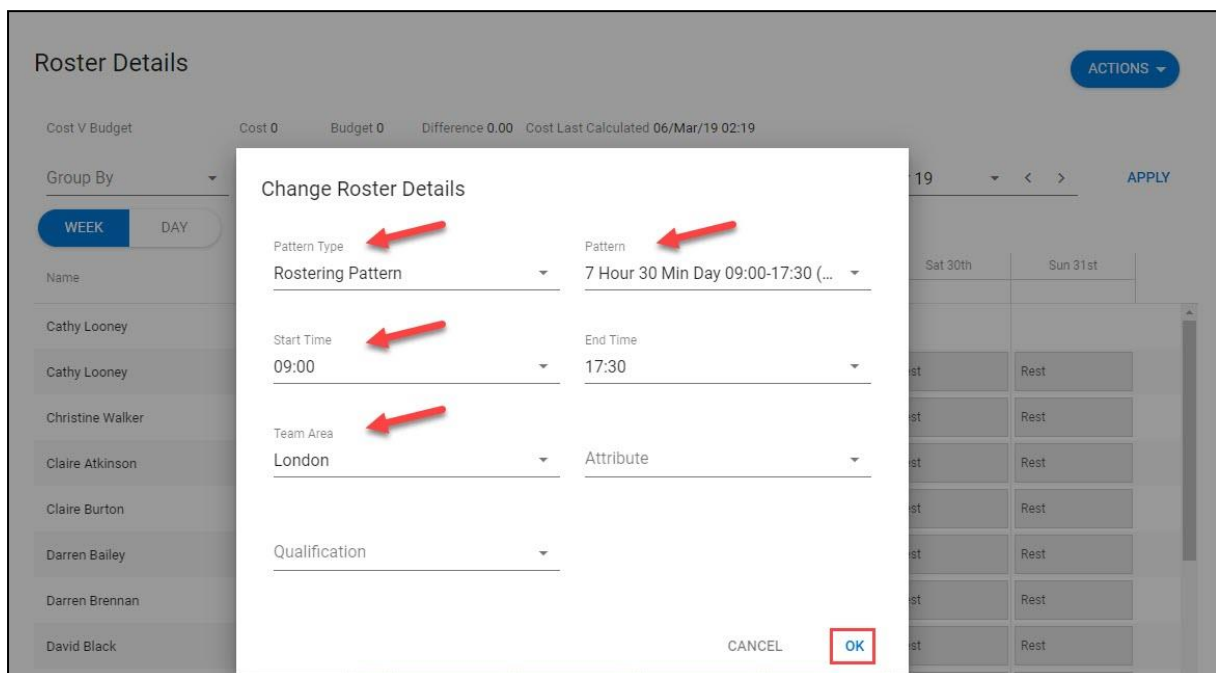

The *Change Roster - Many* option via the *Roster Details* screen is accessible from the **Actions** button. To change multiple employee rosters via the *Roster Details* screen.

1. From the *Roster Details* screen, click **Actions**.
2. Select **Change Roster**.

The *Change Columns* pop-up displays.

3. Select the type from the *Pattern Type* drop-down list.
4. Select the applicable pattern from the *Pattern* drop-down list.
5. Enter the *Start Time*.
6. Enter the *End Time*.
7. Select the team from the *Team Area* drop-down list, if applicable.
8. Click **OK**.

9. Select all applicable employee shifts that require changing.

10. Click **Save**.

Screen Section		Explanation
1	Selected Employees	This section of the screen lists all shifts that have been selected for the roster change. This section is ordered by the <i>Day</i>, and lists the: - Employee Name - Day - Date - Work Type It is possible to delete any shifts from this list. Deleted shifts are not included in the roster change.
2	Shift Information	This section of the screen lists all the changes that are being made to the employee's shifts upon saving. The section lists the: - Work Type - Pattern Type - Pattern - Team Area - Start Time - End Time It is possible to amend all items listed above.
3	Additional Information	This section of the screen allows you to: - Add an <i>Attribute</i> to the shifts - Keep edited breaks - Add, edit or delete breaks

It is also possible to return to the *Roster Details* screen by selecting the **Workforce Management** breadcrumb, as shown in the screenshot below.

Change Roster
[Workforce Management](#) > [Change Roster](#)

Cathy Looney			09:00 - 17:12	09:00 - 17:24	09:00 - 13:00	09:00 - 12:00

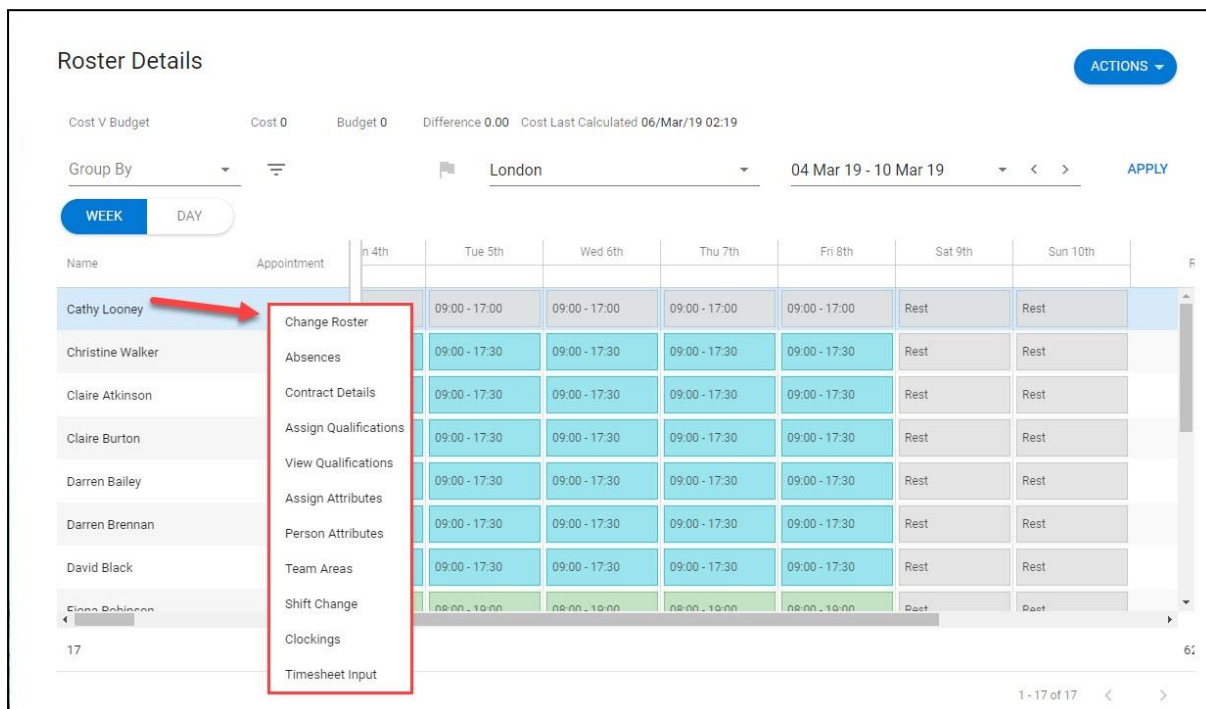

The *Roster Details* screen displays, and the *Roster* is updated successfully.

The screenshot shows the 'Roster Details' screen. At the top right, a green banner displays 'Roster Updated Successfully'. A red arrow points to this banner. Below the banner, there's a section for 'Cost V Budget', 'Percentage 0%', 'Difference 0.00', and 'Cost Last Calculated'. The main area shows a table with columns for 'Name', 'Employee', and dates 'Fri 24th', 'Sat 25th', and 'Sun 26th'. The table contains several rows of data. On the right side, there are buttons for 'APPLY', 'WEEK', and 'DAY'. A dropdown menu labeled 'ACTIONS' is also visible.

3.4. Person Actions

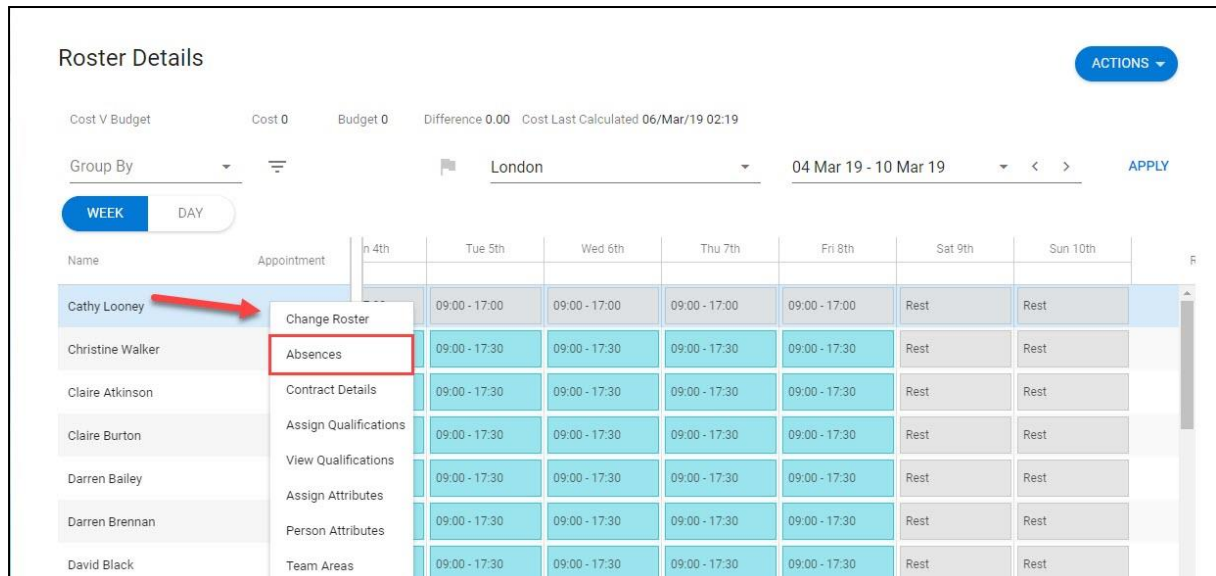

The list of *Person Actions* can be accessed by clicking the employee name on the *Roster Details – Week View* screen. This displays the list of actions that can be completed per employee record.

The screenshot shows the 'Roster Details' screen in 'Week View'. The top section displays 'Cost V Budget', 'Cost 0', 'Budget 0', 'Difference 0.00', and 'Cost Last Calculated 06/Mar/19 02:19'. The main area shows a table with columns for 'Name', 'Appointment', and dates 'Mon 4th', 'Tue 5th', 'Wed 6th', 'Thu 7th', 'Fri 8th', 'Sat 9th', and 'Sun 10th'. The table contains several rows of data. On the right side, there are buttons for 'APPLY', 'WEEK', and 'DAY'. A dropdown menu labeled 'ACTIONS' is visible. A red arrow points to the 'Cathy Looney' row, which has opened a menu with the following options: 'Change Roster', 'Absences', 'Contract Details', 'Assign Qualifications', 'View Qualifications', 'Assign Attributes', 'Person Attributes', 'Team Areas', 'Shift Change', 'Clockings', and 'Timesheet Input'.

3.4.1. Absences

1. Click on the applicable employee.
2. Select **Absences**.

Bristol Central Children	01-Jan-2016	13-Nov-2016

corehr
Simplifying HR Technology

3.4.5. Attributes

An *Attribute* is effectively a means of applying a label to an employee's pattern. This will be the task/job that the employee is scheduled to complete. These *Attributes* are user specified, examples may include 'Cashier', 'Floor', 'Security' or 'Training'. The *Attribute* can then be displayed on the *Roster Details* screen and can also be overridden on a Day Level.

From a CoreHR point of view, the *Attribute* is a job/task that is available within *Roster* to be assigned to an employee, for each pattern they are working within the week.

This function provides the ability to:

- Assign *Attributes* to employees.
- View each employee assigned *Attribute* in *Roster Details*.

- Identify what job/task an employee is scheduled to complete by their *Attribute*.

(09:00 - 13:00) Shop Assistant	3 0	3 0	3 0	3 0	3 0	3 0	3 0

It is possible to view a graphical breakdown per row by viewing the *Graph* option:

1. Select the *Statistics Row* that you require the *Graph* to display for.
2. Click the **Actions** button.
3. Select **Show Graph**.

(09:00 - 13:00) Security Officer	2 0	2 0	2 0	2 0	2 0	2 0	2 0

The *Graph* now displays on screen.

Note that it is possible to switch between a *Line* or *Bar Chart Graph*.

4.1.1. Configure the Display of Employees on Statistics

Columns can be hidden from the *Statistics* screen through the below *Admin Settings*:

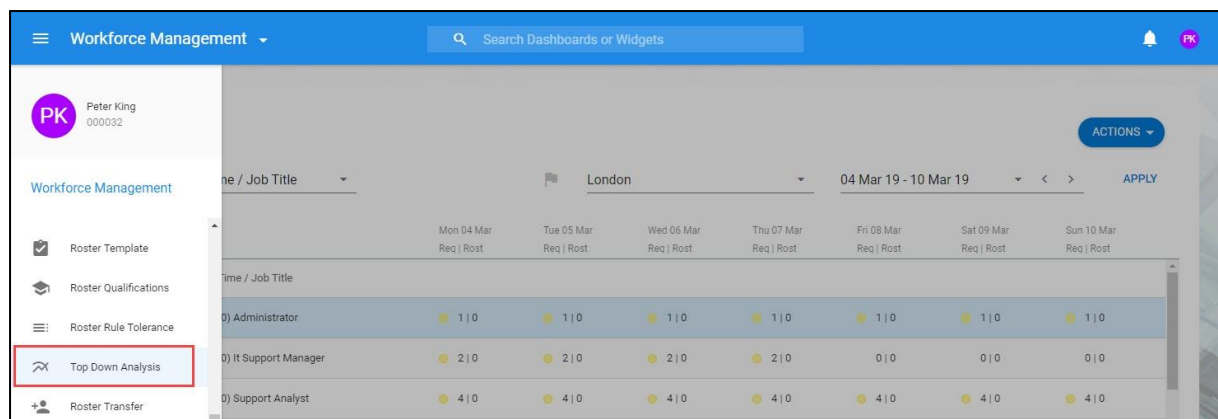

Admin Setting	Description
cp_rost_stats_hide_trans	This hides 'Transferred In' employees on the <i>Roster Statistics</i> screen. I.e. Employees who have been transferred into the <i>Team Area</i> .
cp_rost_stats_non_staff	This hides 'Non Staff' employees on the <i>Roster Statistics</i> screen. I.e. Employees who are not members of the <i>Team Area</i> .

4.2. Top Down Analysis

The *Top Down Analysis* screen provides an overview of how your *Team Areas* are performing, and also shows a breakdown of the *Required* versus *Rostered* data.

To view the *Top Down Analysis* screen:

1. Select **Top Down Analysis** from the *Workforce Management Dashboard*.

The *Top Down Analysis* screen

This screen generates data based on a daily overnight regeneration job. However, it is also possible to manually **Regenerate** data via the option on screen. This is highlighted in the screenshot below.

The *Top Down Analysis* screen allows you view a breakdown of multiple *Team Area Staffing Requirements* in the one view. It is possible to filter the selection criteria, change the *Team Area*, and specify the *Roster* period.

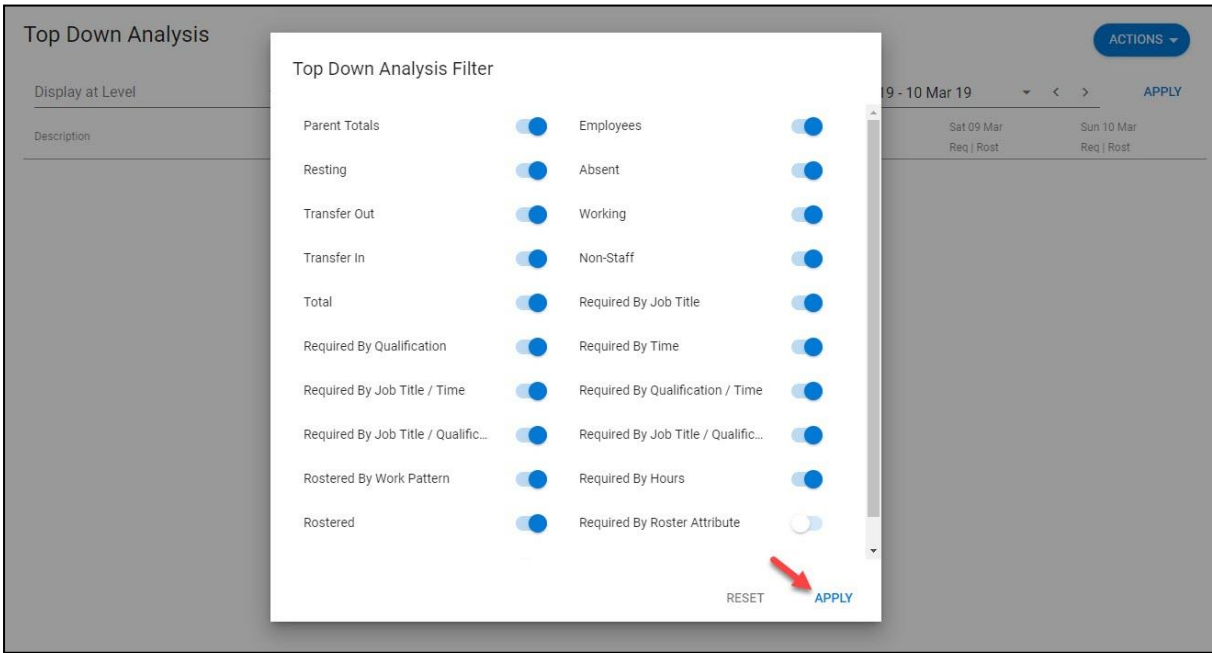

To filter the selection criteria:

1. Click the  filter icon.

The *Top Down Analysis Filter* displays.

2. Tick or untick the applicable fields.
3. Click **Apply**.

Your required selection criteria now determine the data that is displayed on screen.

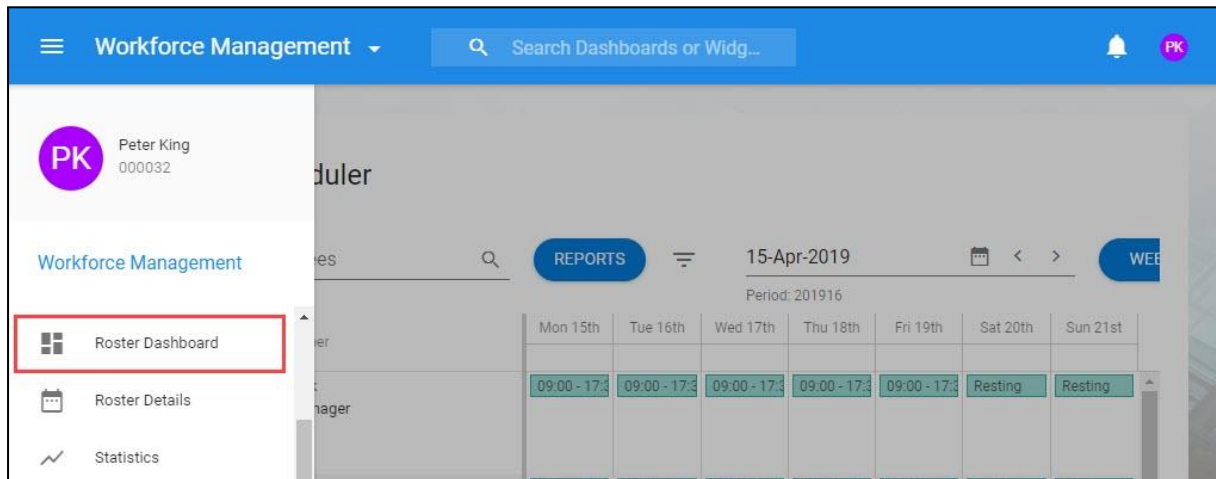

5. Roster Dashboard

5.1. Roster Dashboard Overview

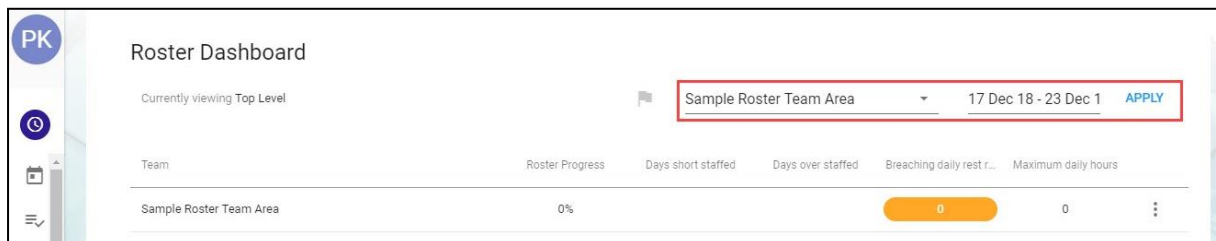

The *Roster Dashboard* allows you to review the roster progress for your *Team Area*. It also allows you to view statistics regarding *Validation Rule* breaches.

To access the *Roster Dashboard*:

1. Select **Roster Dashboard** from the *Workforce Management Dashboard*.

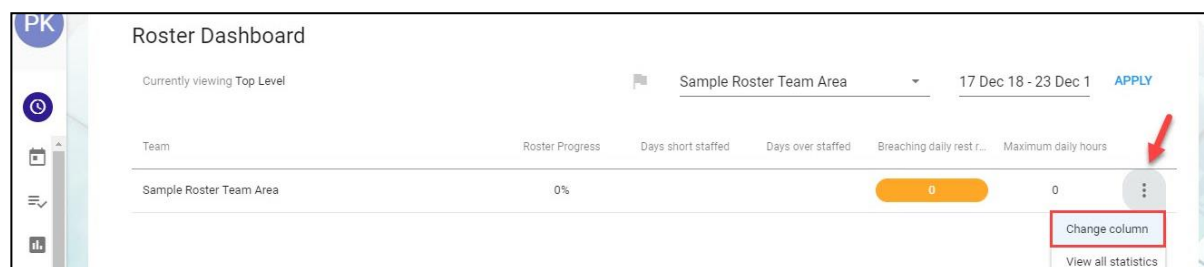

The *Roster Dashboard* screen displays statistics based on the *Team Area* and period. It is possible to specify the *Team Area* and period dates as shown below.

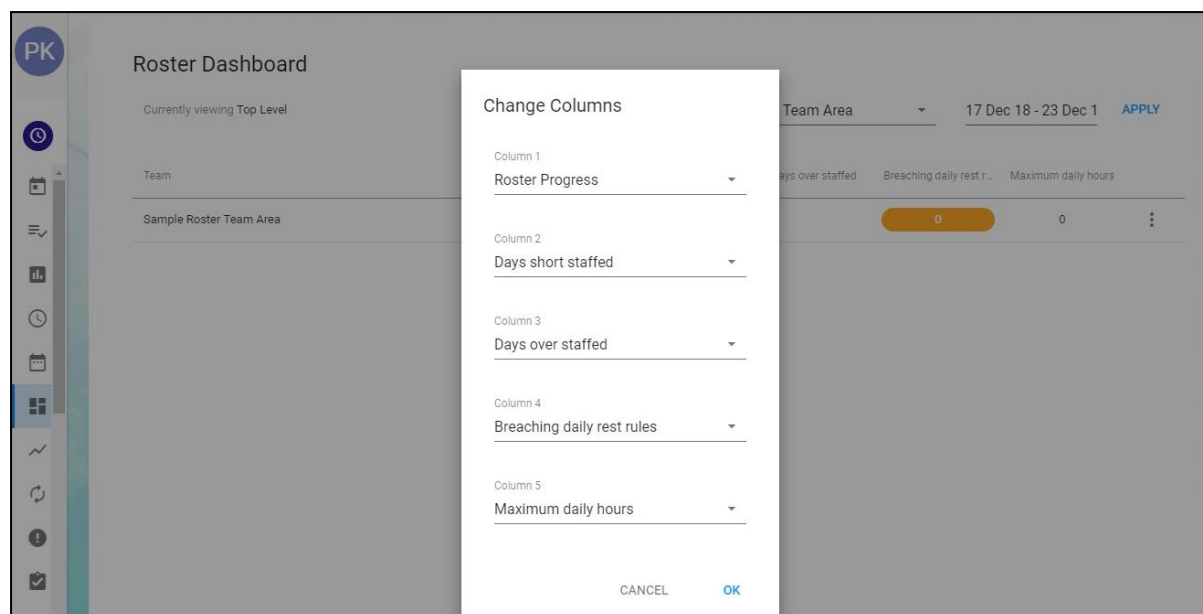

Columns visible on the *Roster Dashboard* are configured by:

1. Clicking the  button.
2. Select **Change Column**.

The *Change Columns* screen displays.

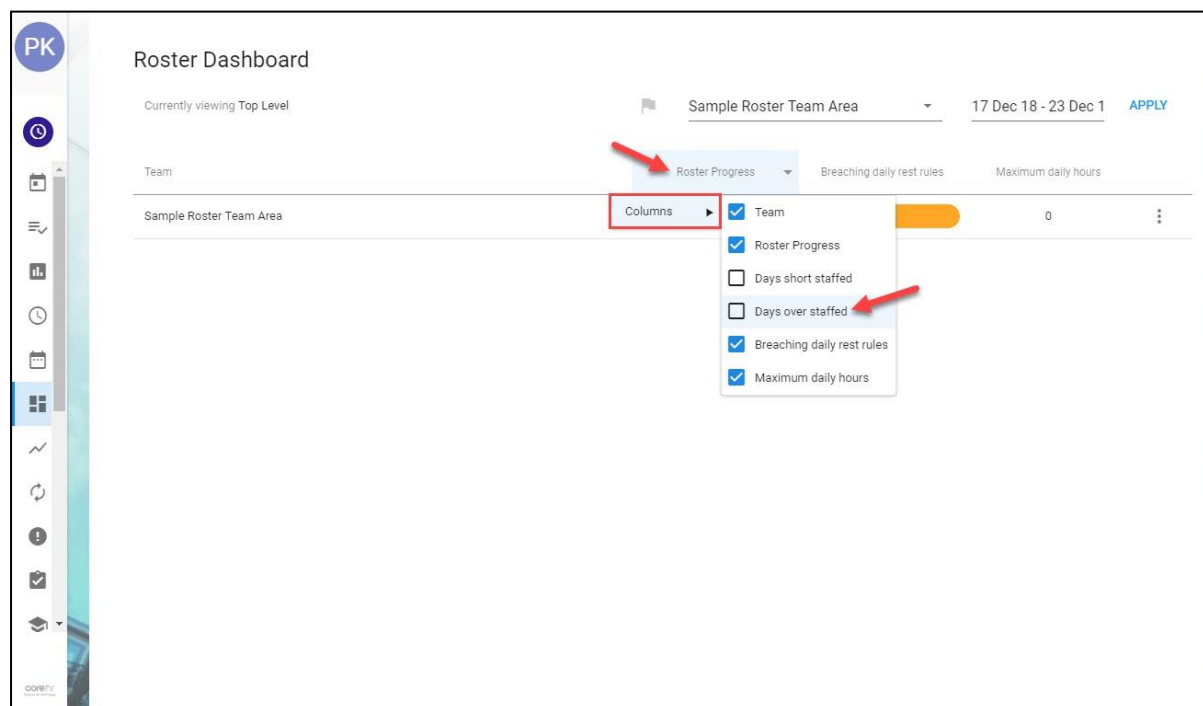

Here it is possible to specify the data types that appear in each of the 5 columns.

It is also possible to disable columns temporarily, if necessary. To do this:

1. Click on the applicable column name.
2. Click **Columns**.
3. Untick the applicable columns, as necessary.

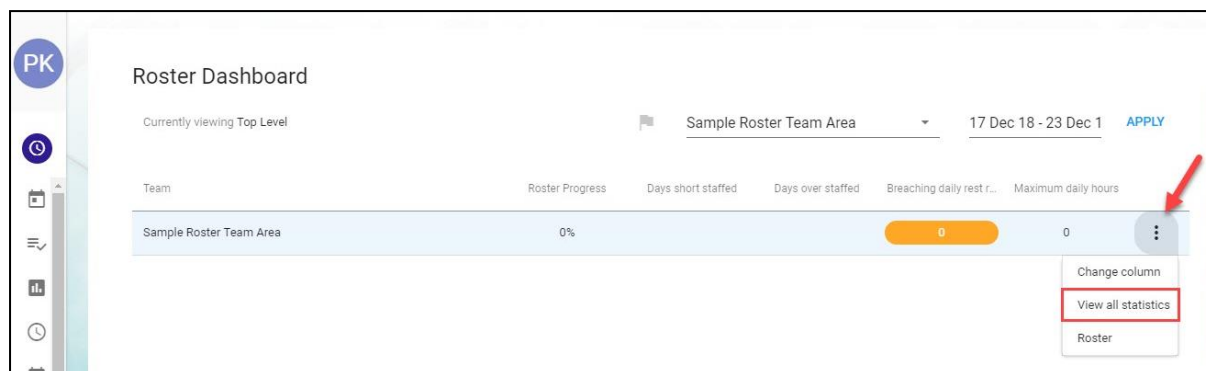

The columns are automatically be removed from the dashboard.

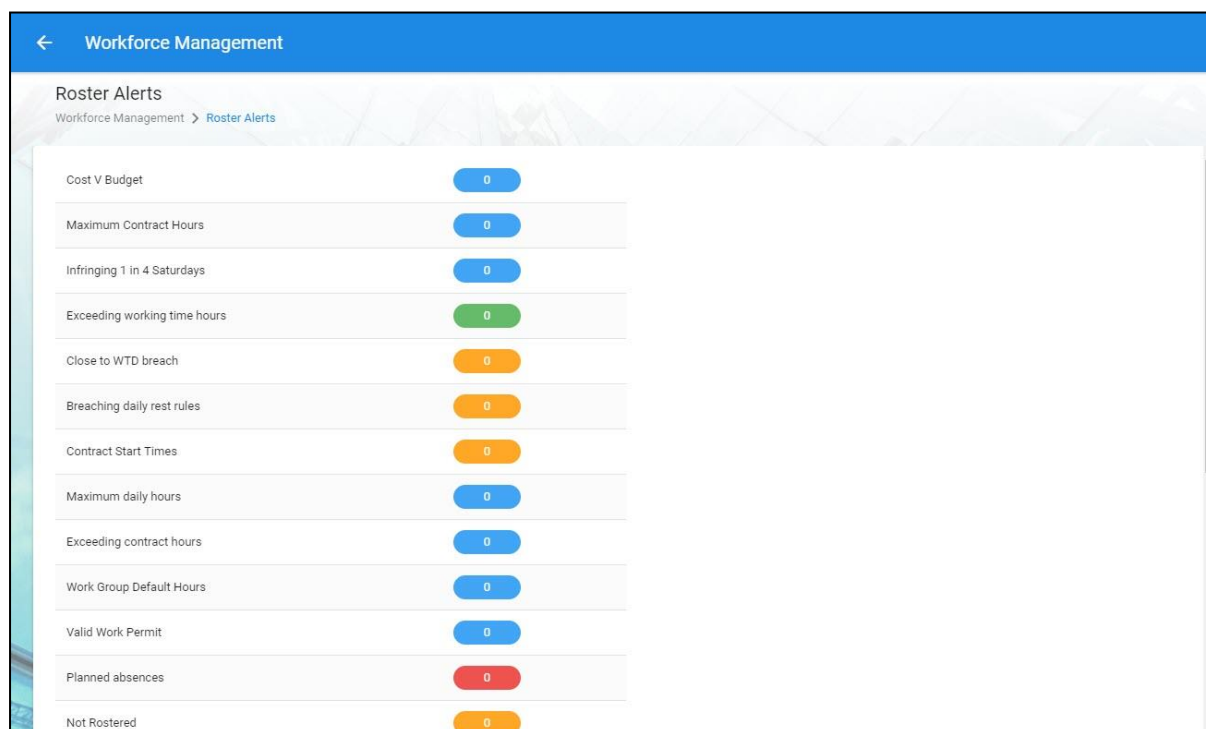

The *Statistics for Team Area* grid, and all other statistics visible from the **View All** button, highlighted in the below classic UI screenshot, are visible from the *Roster Alerts* screen.

To access the *Roster Alerts* screen:

1. Click the  button.
2. Select **View All Statistics**.

The *Roster Alerts* screen displays.

The *Roster Alerts* that are displayed here are dependent on the *Validation Rules* that have been assigned to the *Team Area*. For further information on *Validation Rules*, view the **General Roster Configuration** guide on CoreHR University.

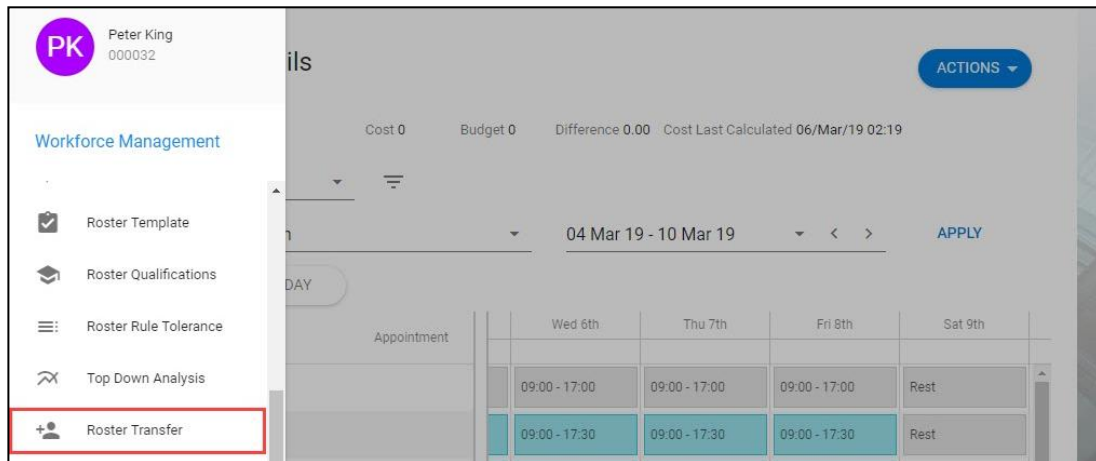

6. Roster Transfer

6.1. Transfer an Employee to a Team Area

It is possible to permanently transfer employees to other *Team Areas*, if required. The transferred employee remains in the new *Team Area* until they are transferred back.

To transfer an employee to a *Team Area* via the *Roster Transfer* screen:

1. Select **Roster Transfer** from the *Workforce Management Dashboard*.

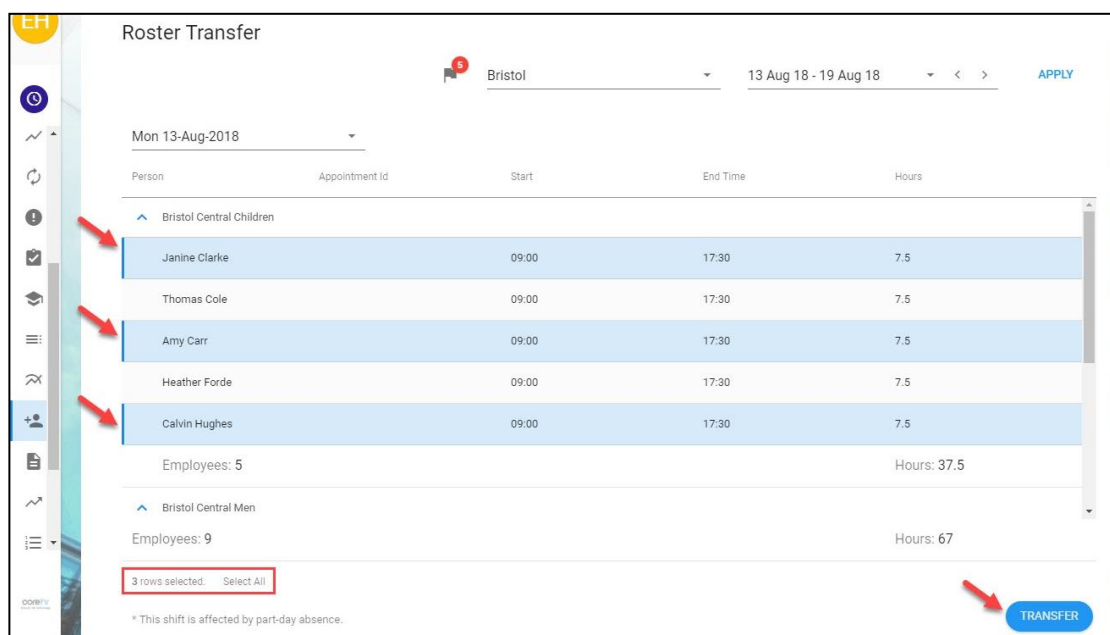

2. Click on the employee record to highlight it.

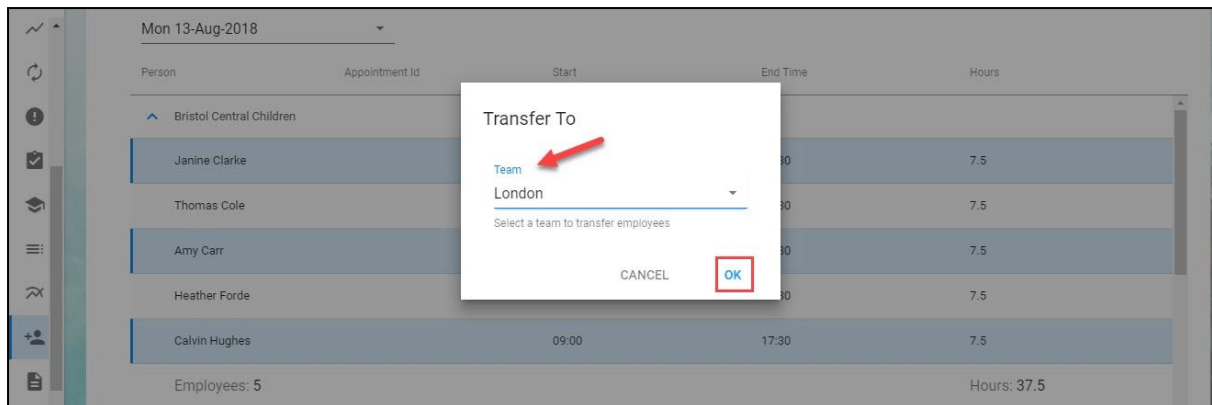

It is possible to:

- Select multiple employees.
- **Select All** employees.

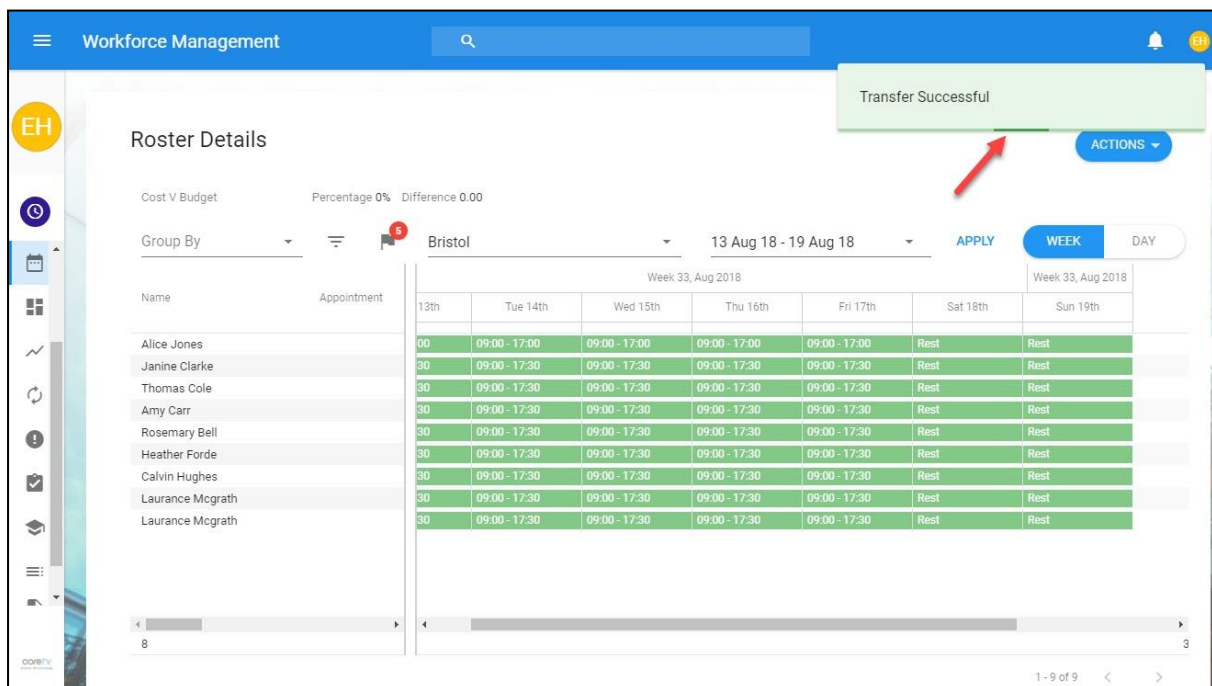

3. Click the **Transfer** button.

4. Select the applicable *Team Area* from the *Team* drop-down list.
5. Click **OK**.

The *Roster Details* screen displays, with an on-screen notification stating that the transfer is successful. Once the transfer is complete, the employees will no longer display in their original Team Area, unless transferred back again.

7. AutoRoster

7.1. AutoRoster Overview

AutoRoster is a process that can be run to automatically generate a *Team Area's Roster*. The *AutoRoster* process considers a set of rules, dictating the logic that gets applied, for filling the staffing requirements of a *Team Area*. This means that the *AutoRoster* process looks at the business logic and organisational rules you require the system to apply, when choosing the most appropriate employees to fill each *Roster* gap.

The *AutoRoster* process looks at the *Validation Rules*, that have been assigned to the *Team Area*, and the employee *Roster Contract Details*, that have been configured within the system. Based on these criteria, the process then rosters employees accordingly subject to their availability and suitability.

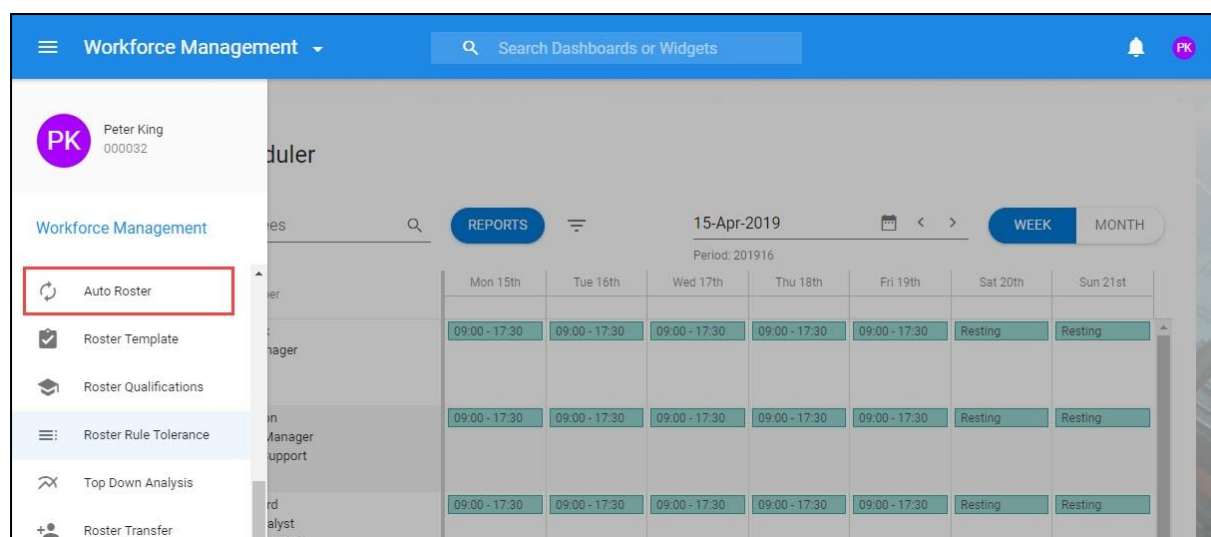

It is possible for the *AutoRostering* process to be configured so that certain days are priority. For example, busier days such as Saturdays or Sundays can be rostered to fill staffing requirements first.

There are multiple ways to configure AutoRoster, subject to your organisational requirements. For further information on the AutoRoster configuration options, view the **General Roster Configuration** training material on CoreHR University.

7.2. Run AutoRoster

To run the *AutoRoster* process for a *Team Area*:

1. Select **AutoRoster** from the *Workforce Management Dashboard*.

2. Select the *Team Area* from the drop-down list.
3. Specify the *Roster Week*.

4. Enter the *Log Level*.

It is recommended to keep this level at 0 for daily tasks. For further information, view section [7.2.2. AutoRoster Log](#).

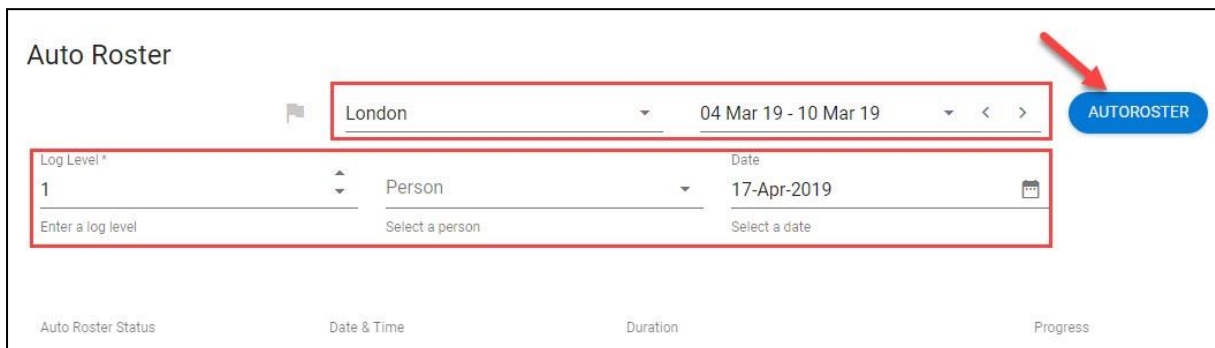

5. If applicable, select the *Person* from the drop-down list.

Here you can select an employee if you require to see why they have failed the *AutoRoster* validation process. For further information, view section [7.2.2. AutoRoster Log](#).

6. Enter the *Date*.

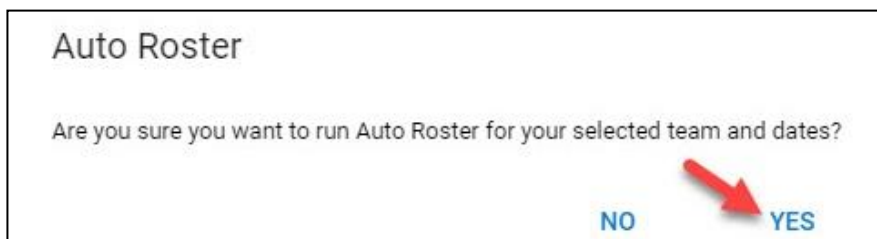

This relates to log detail for a selected date only.

7. Select **AutoRoster**.

An on-screen confirmation pop-up displays.

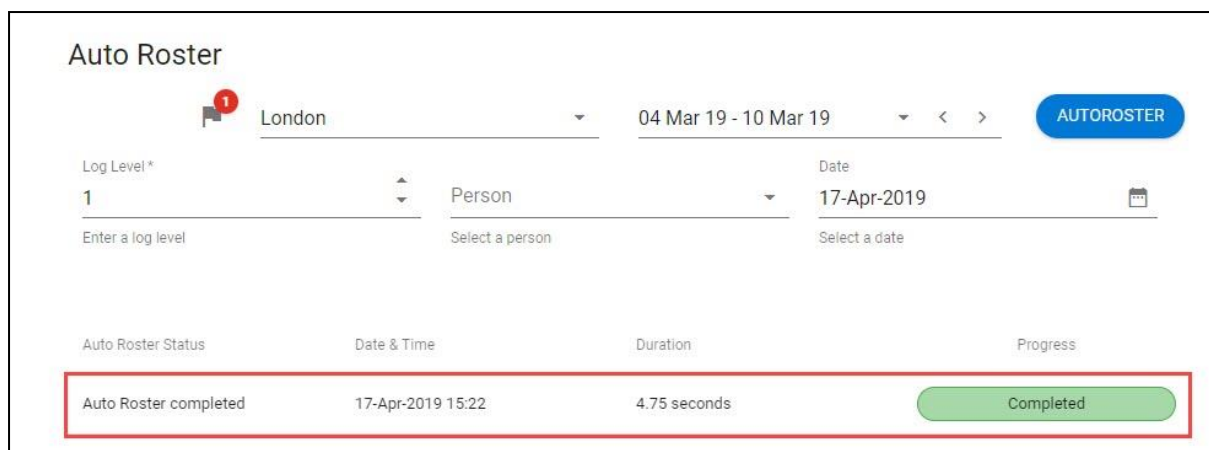

8. Click **Yes**.

Once the *AutoRoster* process is running the screen is masked with the loading icon.

The *AutoRoster* process now runs through a number of checks, multiple times, to fill the hours that are currently *Unrostered*. For each pass/run the AutoRoster process tries a different set of validations to try and fill the hours. The *AutoRoster* has now completed, shown in the screenshot below. The following items are populated on screen:

- AutoRoster Status
- Date & Time
- Duration
- Progress

The screenshot shows the 'Auto Roster' interface. At the top, there's a location dropdown set to 'London' with a red notification icon, and a date range '04 Mar 19 - 10 Mar 19'. An 'AUTOROASTER' button is on the right. Below these are input fields for 'Log Level*' (set to 1), 'Person' (set to Person), and 'Date' (set to 17-Apr-2019). A table at the bottom shows the 'Auto Roster Status' as 'Auto Roster completed', 'Date & Time' as '17-Apr-2019 15:22', 'Duration' as '4.75 seconds', and a green 'Completed' button. A red box highlights the bottom row of the table.

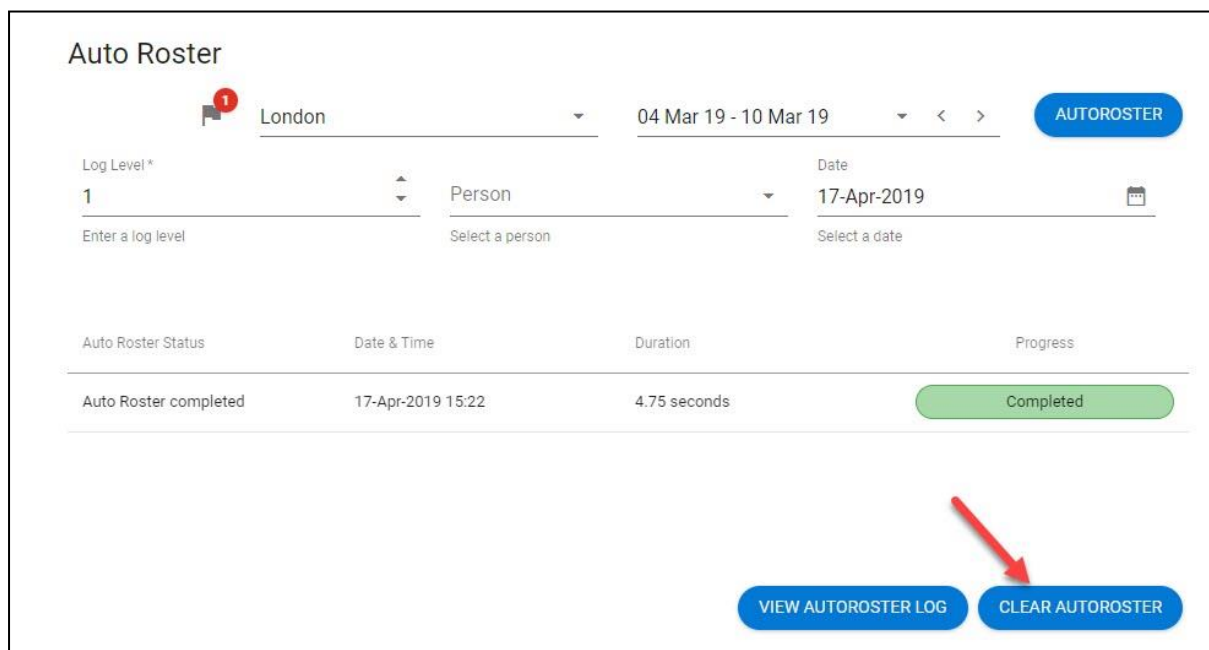

Employees in the *Team Area* have now been assigned to shifts, where applicable. This can be seen by reviewing the *Roster Details* screen for the *Team Area*.

7.2.1. Clear AutoRoster

Clearing the *AutoRoster* reverses the process. Therefore, any employees that have been rostered to shifts for the week via the *AutoRoster* process are removed from these shifts as if the process had not been run. The *AutoRoster* process can be run and cleared multiple times until the *Roster* is *Published*.

To Clear *AutoRoster*:

1. Click the **Clear AutoRoster** button.

This screenshot is identical to the one above, showing the 'Auto Roster' interface with the 'Completed' status. At the bottom right, there are two buttons: 'VIEW AUTOROASTER LOG' and 'CLEAR AUTOROASTER'. A red arrow points directly to the 'CLEAR AUTOROASTER' button.

**Note:**

Manual changes to employee *Roster Details* are not reversed by selecting the **Clear AutoRoster** option. The **Clear AutoRoster** option reverses the *AutoRoster* process only.

7.2.2. AutoRoster Log

It is recommended that the *AutoRoster Log Level* remains at 0 (this generates no log) while completing daily tasks. However, it is possible to specify the *Log Level*, *Person*, and *Date* on screen when running the *AutoRoster* process to generate a detailed log. You can then review this log to understand why an employee may have failed the *AutoRoster* validation process.

Running the log for a specified employee displays information for the selected employee only, and a summary of information for the other employees within the *Team Area*. Only employees within the *Team Areas* and their sub *Team Areas* you are running the *AutoRoster* for, are available for selection.

To retrieve the *AutoRoster Log*:

1. Select the *Team Area* from the drop-down list.
2. Specify the *Roster Week*.
3. Enter the *Log Level* 1.
4. If applicable, select the *Person* from the drop-down list.
5. Enter the *Date*.
6. Select **AutoRoster**.

The screenshot shows the 'Auto Roster' interface. At the top, there's a title 'Auto Roster'. Below it, there are several input fields: a dropdown for 'Team Area' (currently 'London'), a dropdown for 'Roster Week' (currently '04 Mar 19 - 10 Mar 19'), a dropdown for 'Log Level' (currently '1'), a dropdown for 'Person' (currently 'Colm GI'), and a date field for 'Date' (currently '17-Apr-2019'). A red arrow points to a blue button labeled 'AUTOROSTER'. Below these fields, there are four columns: 'Auto Roster Status', 'Date & Time', 'Duration', and 'Progress'. The interface is clean and modern, with a white background and blue accents.

The *AutoRostering* process is now complete and the following items are populated on screen:

9. Click **View AutoRoster Log**.

The log file is then downloaded to your machine.

The screenshot shows the 'Auto Roster' interface. At the top, there's a location dropdown set to 'London' and a date range '04 Mar 19 - 10 Mar 19'. A blue 'AUTOROSTER' button is in the top right. Below these are input fields for 'Log Level *' (set to 1), 'Colm GI' (a person's name), and 'Date' (set to 17-Apr-2019). A table below shows the status of the Auto Roster process:

Auto Roster Status	Date & Time	Duration	Progress
Auto Roster completed	17-Apr-2019 15:22	4.75 seconds	Completed

At the bottom right, there are two buttons: 'VIEW AUTOROSTER LOG' and 'CLEAR AUTOROSTER'. A red arrow points to the 'VIEW AUTOROSTER LOG' button.

Roster Log Level User Access

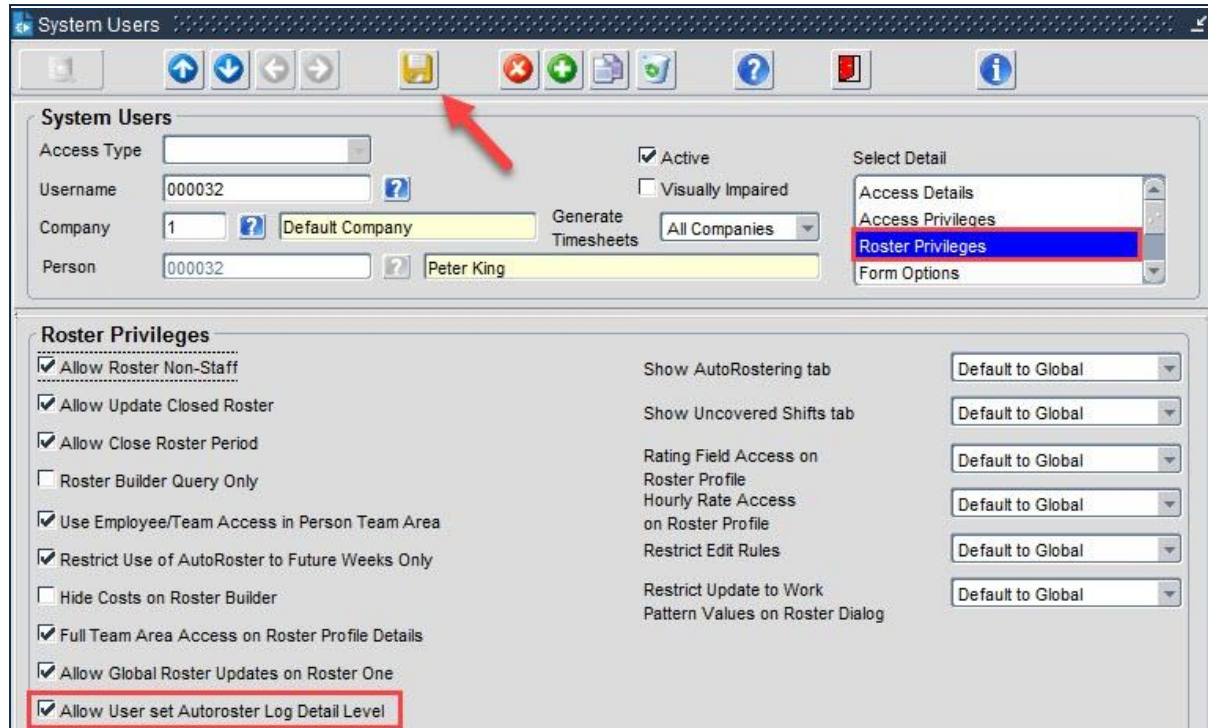

Where it is required to run the *AutoRoster Log* at a higher level, greater than 1, you need to be granted user access. Only selected users should be given this access, as running the log at a level higher than 1 slows down the *AutoRoster* process run.

**Note:**

The level 3 log file should only every be used if asked to support *CoreHR* queries, i.e. to support queries with CoreHR Customer Support.

To grant user access:

1. Go to *Back office > CoreTime/CoreRoster > System Params > System Users*.
2. Select the **Manager Self Service Access Type**
3. Enter the *Username*.
4. Select **Roster Privileges**.
5. Tick the *Allow User set Autoroster Log Detail Level* indicator
6. Click the  button to save.

7.2.3. AutoRoster Breaks

The system will automatically assign breaks to a day based on *WTD Rules*, when a shift is amended the break is recalculated. Configuration can allow *AutoRoster* of breaks to the most optimal times in the day to reduce staff shortages. This is to try preventing all employees getting put on the same break time if they are working the same shift.

When breaks are being applied, the system completes a check to try reducing all employees getting the same break, this is done by checking the employees start time and end time and then staggering the breaks across the day.

Working Time Parameters

Working Time Group: WTD Working Time Directive

UK Site: ☒

Pav Code Groups:

AutoRoster Break Rules

Rule Type	From	To	Break After	Duration	Paid	Shift Duration	No Break in First	No Break in Last	Max Consecutive Hours	Split Break After	Minimum Split Duration
Standard	0.00	4.00		0.25	☒		1.00	1.00	5.00	10.00	
Standard	4.00	8.00		1.00	☒		1.00	1.00	5.00	10.00	0.50
Standard	8.00	12.00		0.25	☒		1.00	1.00	5.00	10.00	0.50
Minor	4.00	10.00		1.00	☒		1.00	1.00	5.00	10.00	
					☐						
					☐						
					☐						

Standard/Minor Rules

☒ One Rule Only ☐ Multiple Rules

Gap between breaks: 3

Minor Age Threshold:

Note:

AutoRoster does not consider the staffing demand for the day when calculating breaks, it complies with *WTD* compliance only.

For further information on the full configuration required for *Break Recalculation*, view the Roster General Configuration and Break Recalculation training material on CoreHR University.

8. Uncovered Shifts

8.1. Uncovered Shifts Overview

Uncovered Shifts display staffing gaps in the period, where the *AutoRoster* has not been able to fill the full staffing requirement. *Uncovered Shifts* then identifies what employees are best suited to filling the gaps, based on a scored basis. The below screenshot shows the *Uncovered Shifts* screen after the process has been run. Each *Uncovered Shift* for the *Team Area* and *Roster* week is displayed on screen for review.

Uncovered Shifts								
Rules			London		22 Apr 19 - 28 Apr		APPLY	
Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill	Publish
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Affiliate	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday	Affiliate	Start 09:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐

When manually assigning individual shifts, there are 4 status types that are displayed against employees when the system validates who is available/suitable to cover a shift:

Uncovered Shifts								
Rules			London		22 Apr 19 - 28 Apr 19		APPLY	
Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill	Publish
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...	Cathy Looney 720410-2 Score 1000 Roster Rules Fail Claire Atkinson 720410-3 Score 1000 Roster Rules Fail Darren Bailey 720413-18 Score 1000	☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐

The below table outlines each status.

Status Type	Explanation
Successful	- Employee is available to cover the full shift based on the <i>Validation Rules</i> applied. - Employee can still be selected.
Extend	- Employee's shift either starts at the end of the gap or ends at the start of the gap. Extending the shift will allow for smaller gaps in the day to be covered. - The shift is then added as an additional row on the day where the patterns must be different for both segments.
Maybe	- Employee can cover some of the shift based on their available times. - It is then possible to amend the times as required, to reflect the times the employee is available to work.
Fail	- Employee has failed <i>Validation Rules</i> and is not available to cover the gap. - Employee can still be selected, however, if the employee is already working you must identify if the shift should be replaced or added as an additional shift on the day.

8.2. Run Uncovered Shifts

To run *Uncovered Shifts*:

1. Select **Uncovered Shifts** from the *Workforce Management Dashboard*.

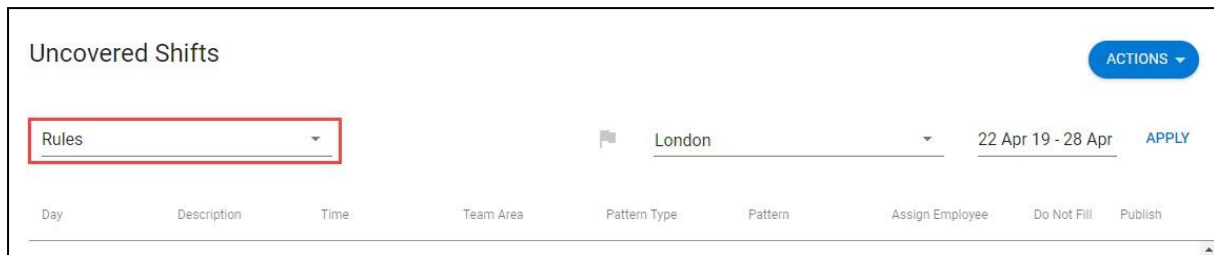

The screenshot shows the Workforce Management Dashboard interface. On the left sidebar, under 'Workforce Management', the 'Uncovered Shifts' option is highlighted with a red box. The main content area displays a roster grid for 'London' from '04 Mar 19' to '10 Mar 19'. The grid shows shifts for various employees, with some shifts highlighted in green and others in grey. The top of the dashboard includes a search bar and a navigation menu.

The *Uncovered Shifts* screen displays.

2. Select the applicable option you want to run *Uncovered Shifts* for, from the drop-down menu.

Options include:

- **Rules** – This returns all staffing requirement gaps (recommended option).
- **Absences** – This returns staffing requirement gaps based on employee absences.
- **Vacancies** – This returns a full list of staffing requirement gaps, minus absences.

The screenshot shows the 'Uncovered Shifts' interface. At the top right is an 'ACTIONS' button with a dropdown arrow. Below it, there's a 'Rules' dropdown menu, which is highlighted with a red rectangular box. To the right of the 'Rules' menu is a 'Team Area' dropdown menu showing 'London', also with a red box. Further right is a date range '22 Apr 19 - 28 Apr' and an 'APPLY' button. Below these elements is a table header with columns: Day, Description, Time, Team Area, Pattern Type, Pattern, Assign Employee, Do Not Fill, and Publish.

3. Specify the *Team Area* and *Roster* week.

4. Click **Apply**.

Clicking *Apply* starts the *Uncovered Shifts* process.

This screenshot is similar to the previous one, but the 'London' dropdown menu under 'Team Area' is now highlighted with a red rectangular box. The 'Rules' dropdown menu is no longer highlighted. The 'APPLY' button remains visible to the right of the date range.

This process now generates a list of shift vacancies/gaps that currently exist on the *Roster*, by comparing the employee shift assignments against the defined staffing requirements.

Once complete, the screen displays details of the *Team Area's Uncovered Shifts*, this includes the:

- Day
- Description
- Start and End Time of the shift
- Team Area
- Pattern Type
- Pattern
- Assign Employee (scored list of employees to fill the shift)
- Do not fill (allows you to exclude the shift from automatic assignment in *AutoRoster*)
- Publish (allows you to publish the shift to the selected employee)

Uncovered Shifts								
Rules			London		22 Apr 19 - 28 Apr		APPLY	
Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill	Publish
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern T...	7 Hour Day 09:00-1...		☒	☐

Next, you must fill the *Uncovered Shifts* as outlined in section [8.3. Fill Uncovered Shifts](#).

8.3. Fill Uncovered Shifts

8.3.1. Assign Employee to Shift

To assign an employee to an *Uncovered Shift*:

1. Select *Assign Employee* on the applicable shift.
Select an employee from the dropdown List.

Uncovered Shifts								
Rules			London		22 Apr 19 - 28 Apr 19		APPLY	
Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill	Publish
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...	Cathy Looney 720410-2 Score 1000 Roster Rules Fail Claire Atkinson 720410-3 Score 1000 Roster Rules Fail Darren Bailey 720413-18 Score 1000 	☒	☐

Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐
Monday 22-Apr-2019	Analyst	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☒	☐

2. Click the **Actions** button.
3. Select **Validate**.

This saves the changes.

Uncovered Shifts								
Rules			London		22 Apr 19 - 28 Apr 19		Actions Adjust Patterns Validate Publish Published History Auto Roster	
Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill	Publish
Monday 22-Apr-2019	Affiliate	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...	Cathy Looney	☒	☐
Monday 22-Apr-2019	Affiliate	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...	Claire Atkinson	☒	☐

8.3.2. AutoRoster Employees to Shifts

To *AutoRoster* employees to the Uncovered shifts:

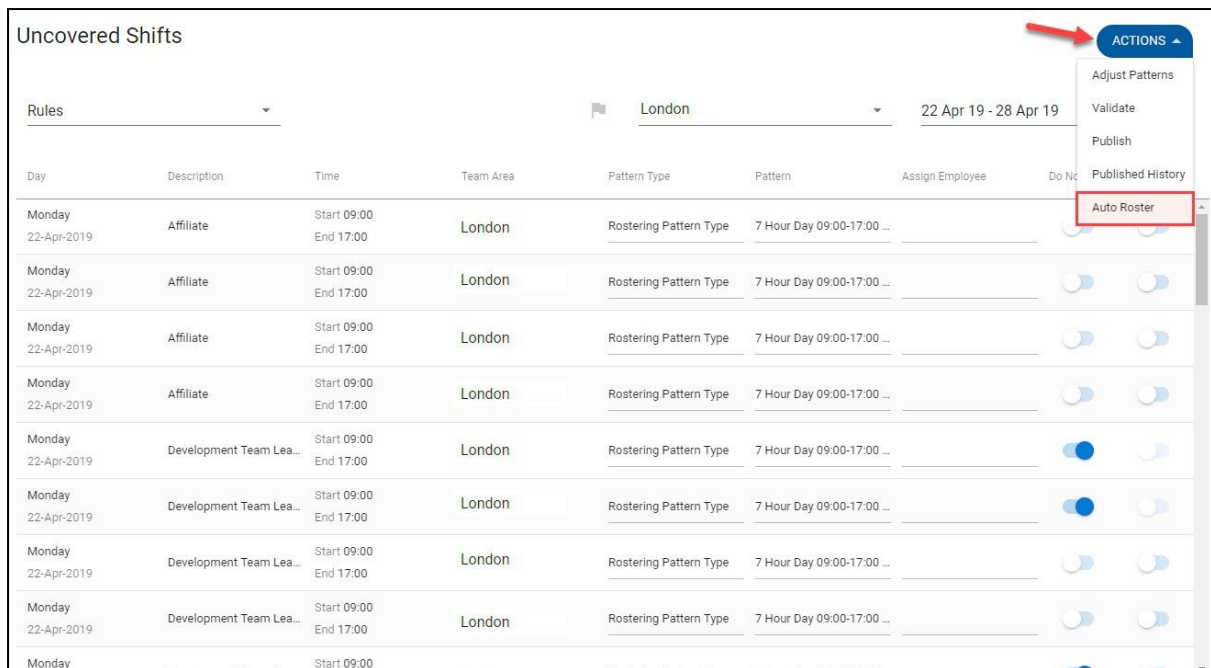

1. Untick or tick the *Do Not Fill* indicator, on the applicable shifts.

This allows you to exclude applicable shifts from automatic assignment via *AutoRoster*.

2. Select the **Actions** button.

3. Select **Auto Roster**.

This now auto populates the *Uncovered Shifts* with the most appropriate employees, based on a scored list.

Day	Description	Time	Team Area	Pattern Type	Pattern	Assign Employee	Do Not Fill
Monday 22-Apr-2019	Affiliate	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☐
Monday 22-Apr-2019	Affiliate	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☐

Monday 22-Apr-2019	Development Team Lea...	Start 09:00 End 17:00	London	Rostering Pattern Type	7 Hour Day 09:00-17:00 ...		☐

8.3.3. Configuring the Do Not Fill Indicator

By default, all shifts on the *Uncovered Shifts* screen are marked as *Do Not Fill*, this is controlled by an *Admin Setting*.

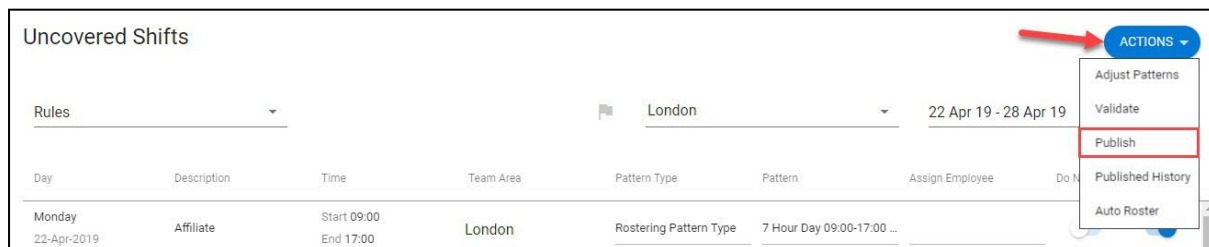

To update the *Do Not Fill* parameter default:

1. Quick jump to *Site Manager*.
2. Open **Admin Settings**.
3. Search for the below parameter.

Admin Setting	Description
cp_dnf_prefilled	If set to 'Y', the system sets all Do not fill indicators to be ticked on by default, setting this parameter to 'N' sets the indicators to be unticked by default. It is still possible for you to manually update the Do Not Fill indicator on the Uncovered Shifts screen per shift.

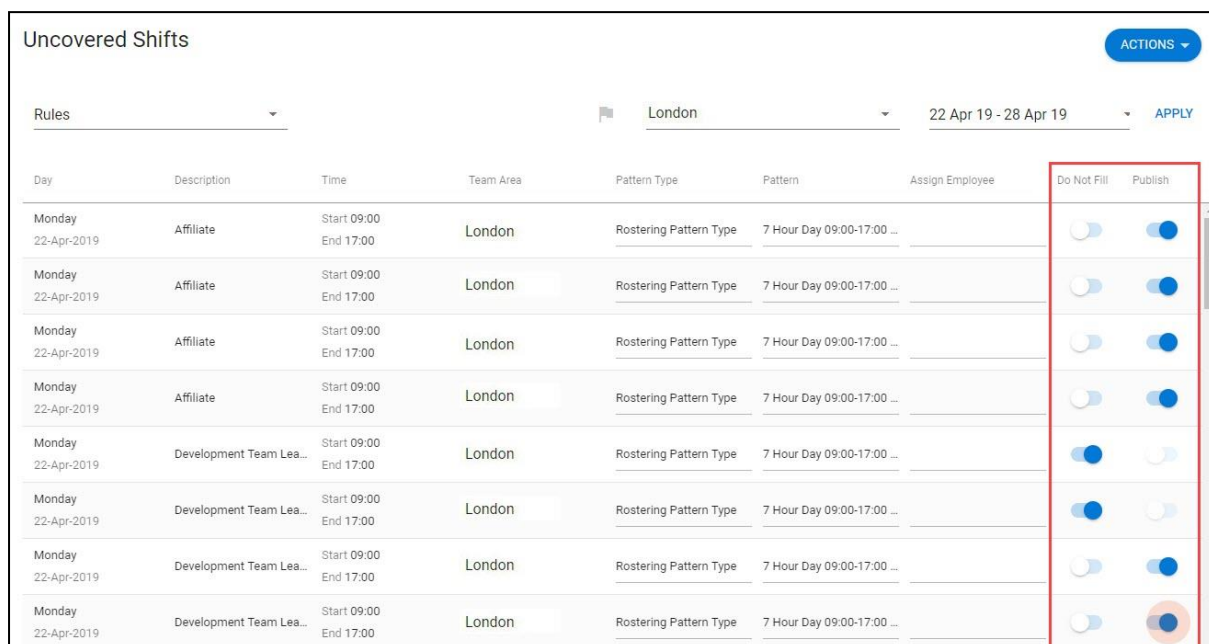

8.4. Publish Uncovered Shifts

It is possible to publish *Uncovered Shifts* to employees. This process then allows the applicable employees to accept the shifts they want to cover. It is possible to select one, multiple, or all *Uncovered Shifts* to *Publish*.

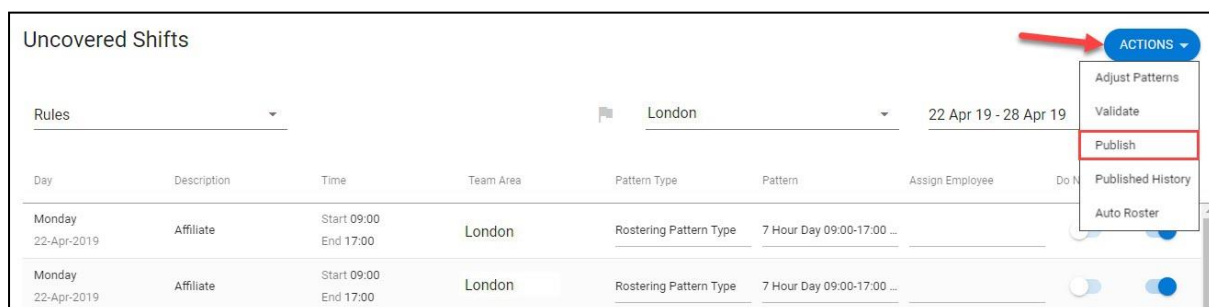

To *Publish Uncovered Shifts*:

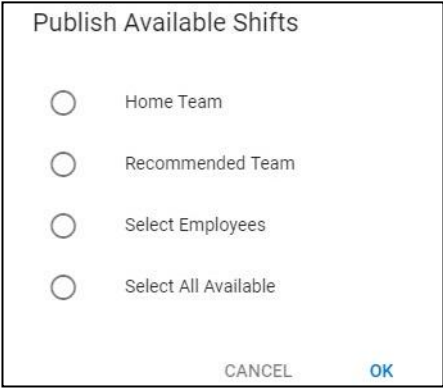

1. Tick the *Do Not Fill* indicator, on the applicable shifts.
2. Tick the *Publish* Indicator, on the applicable shifts.

3. Click the **Action** button.
4. Select **Publish**.

The *Publish Available Shifts* screen displays.

Publish Available Shifts

☐ Home Team

☐ Recommended Team

☐ Select Employees

☐ Select All Available

CANCEL OK

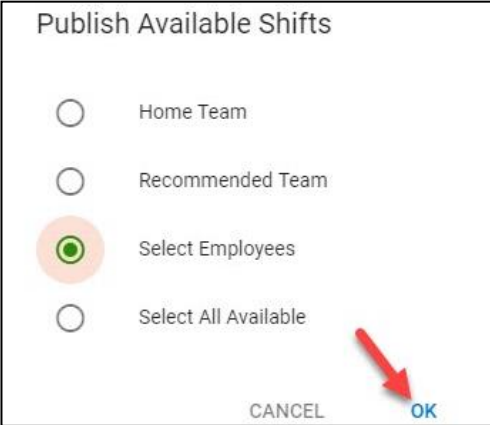

Here, it is possible to identify who you want to publish the Available Shifts to. The following options are available:

Option	Explanation
Home Team	This option publishes the <i>Roster</i> to all available employees in the <i>Home Team Area</i> .
Recommended Team	This option publishes the <i>Roster</i> to all employees in <i>Recommended Team Areas</i> , that are attached to the <i>Home Team Area</i> . For further information, view the <i>Roster Before Period is Published</i> training material on CoreHR University.
Select Employees	This option provides you with the list of employees to <i>Publish the Uncovered Shifts to</i> .
Select All Available	This option provides you with the list of available to work employees only, to <i>Publish the Uncovered Shifts to</i> .

5. Select the applicable option.

In this example, the **Select Employees** option is selected.

6. Click **OK**.

9. Publish Week (Shifts)

9.1. Publish Week Process

Once all the applicable changes have been made to the *Roster*, and you are satisfied that the staffing requirements have been filled, it is then possible to publish the week's *Roster*. Once the week has been published, the *Roster* is visible to the employees within the *Team Area* immediately. If changes are made to the *Roster* for individual employees after it has been published, it is then possible to send an update notification to notify the employees of the change.

Note:

There is an *Admin Setting* within the system that should be set to 'Y' if you do not want employees to be able to view the roster before the week is published. This setting hides the visibility of roster to employees, for the week, until it is published. This *Admin Setting* is called:

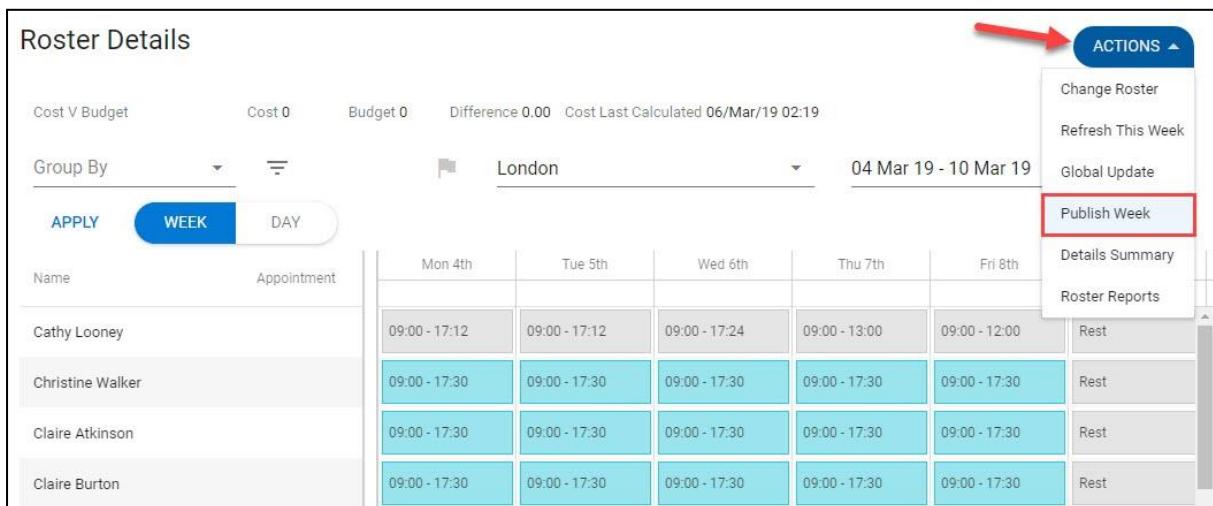

- **cp_roster_hide_til_pub**

To update the *Hide Roster* parameter:

1. Quick jump to *Site Manager*.
2. Open **Admin Settings**.
3. Search for the above parameter.

To publish the week:

1. On the *Roster Details* screen, click the **Actions** button.
2. Select **Publish Week**.

The screenshot shows the 'Roster Details' interface. At the top, there are filters for 'Cost V Budget', 'Cost 0', 'Budget 0', 'Difference 0.00', and 'Cost Last Calculated 06/Mar/19 02:19'. Below these are 'Group By' and 'Location' (London) dropdowns, and a date range '04 Mar 19 - 10 Mar 19'. There are buttons for 'APPLY', 'WEEK', and 'DAY'. The main table lists employees and their appointments for the week. The 'Actions' button in the top right corner is highlighted with a red arrow, and its dropdown menu is open, showing options like 'Change Roster', 'Refresh This Week', 'Global Update', 'Publish Week' (which is highlighted with a red box), 'Details Summary', and 'Roster Reports'.

Name	Appointment	Mon 4th	Tue 5th	Wed 6th	Thu 7th	Fri 8th	
Cathy Looney		09:00 - 17:12	09:00 - 17:12	09:00 - 17:24	09:00 - 13:00	09:00 - 12:00	Rest
Christine Walker		09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest
Claire Atkinson		09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest
Claire Burton		09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	09:00 - 17:30	Rest

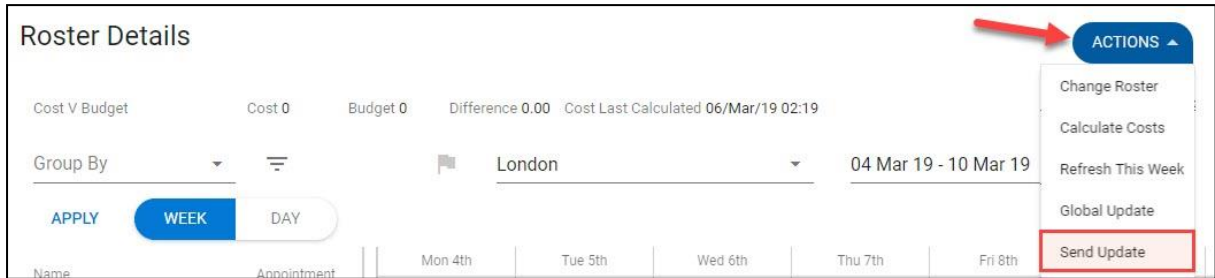

The *Publish Week* screen displays.

Here it is possible to specify the text that is displayed when employees are notified that the week has been published.

If any changes are made to *Rosters* for employees after the *Roster* has been published. It is then possible to notify the applicable employees by sending an update.

To send an update:

1. Click the **Actions** button.
2. Select **Send Update**.

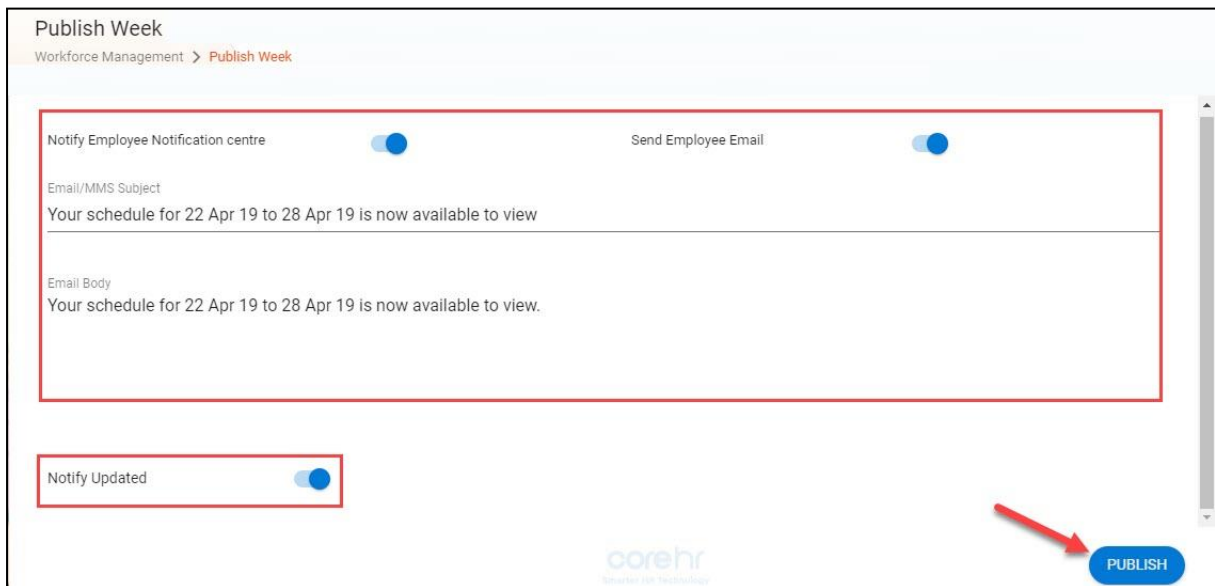

The screenshot shows the 'Roster Details' interface. At the top, there are fields for 'Cost V Budget', 'Cost 0', 'Budget 0', 'Difference 0.00', and 'Cost Last Calculated 06/Mar/19 02:19'. Below these are filters for 'Group By' (set to 'WEEK'), 'Location' (set to 'London'), and 'Period' (set to '04 Mar 19 - 10 Mar 19'). A table with columns for 'Name', 'Appointment', and days of the week (Mon 4th to Fri 8th) is visible. On the right, an 'ACTIONS' dropdown menu is open, showing options: 'Change Roster', 'Calculate Costs', 'Refresh This Week', 'Global Update', and 'Send Update'. The 'Send Update' option is highlighted with a red box and a red arrow points to the 'ACTIONS' button.

The *Publish Week* screen displays. Here it is possible to specify the text that is displayed when employees are notified that their *Roster* has been updated.

3. Tick *Notify Employee Notification centre*.
4. Tick *Send Employee Email*.
5. Enter the *Email/MMS Subject*.
6. Enter the *Email Body*.
7. Tick the *Notify Updated* indicator.

When ticked on, this means that only employees whose *Rosters* have changed receive the update notification. Therefore, employee's whose *Rosters* have not changed, since the initial publishing of the *Roster*, do not receive the update notification.

8. Click **Publish**.

The screenshot shows the 'Publish Week' screen. It has a breadcrumb trail 'Workforce Management > Publish Week'. There are two toggle switches at the top: 'Notify Employee Notification centre' (checked) and 'Send Employee Email' (checked). Below these are text input fields for 'Email/MMS Subject' and 'Email Body', both containing the text 'Your schedule for 22 Apr 19 to 28 Apr 19 is now available to view'. At the bottom left, there is a 'Notify Updated' toggle switch (checked). At the bottom right, there is a 'PUBLISH' button, which is highlighted with a red arrow.

10. Time Exceptions

10.1. Time Exceptions Overview

Time Exceptions are generated when an employee works over or under the hours they are scheduled to work. Exceptions are generated when the clocking's entered on an employee's timesheet do not match the *Roster Details* on the *Workforce Management* details. The *Time Exceptions* screen allows for full *Exception Management*.

10.1.1. What is Exception Management?

Exception Management is intended for use by managers, supporting the:

- Listing of items to be *Actioned*, with *Supporting Information*.
- Actions to be taken. For example, *Approve/Reject*, or *Recode Exception* (where the options have been pre-determined).
- Completion of *Actions* from a single screen, with the ability to *Drill Down* to employee's *Timesheet*, *Absence Record* or *Roster*.
- Access via single screen, highlighting the number of exceptions that require *Action*.

Some example exceptions can include:

- Employee clocks in/out earlier or later than *Rostered*
- Employee does not show up to work
- Employee forgets to clock out after work
- Missed clockings

The screenshot displays the 'Time Exceptions' interface. At the top, there's a date range '24 Dec 18 - 30 Dec 18' and an 'APPLY' button. Below this, a tab bar shows 'Action Required' (with a red notification icon) and 'All Exceptions'. A search bar is present. The main table has columns: Employee, Roster, Clock, Day, Paycode, Hours, Actions Required, Approve, Reject, and Comments. Two rows are visible: Claire Burton and William Cooper. A red arrow points to a three-dot menu icon in the 'Comments' column for Claire Burton, which is open, showing options: 'View Roster/Clock Details', 'Timesheet', 'Absence details', 'Comment/Reason', and 'Change Roster'.

Employee	Roster	Clock	Day	Paycode	Hours	Actions Required	Approve	Reject	Comments
Claire Burton	09:00 17:30	First Last	24-Dec-2018	Overtime @ 1.50	1.0	Approval/Rejection	☐	☐	0
William Cooper		First Last	24-Dec-2018	Overtime @ 2.00	2.0	Approval/Rejection	☐	☐	

For full detail and configuration regarding *Exception Management*, view the *Exception Management* training material on CoreHR University.

11. Roster Qualifications

11.1. Roster Qualifications Overview

It is possible for qualifications to be added to the system and assigned to employee records. These qualifications are then taken into account by the *Validation Rules* that are specified for *Rostering* processes, to determine employee's suitability, for filling staffing requirements. If an employee has an expired qualification:

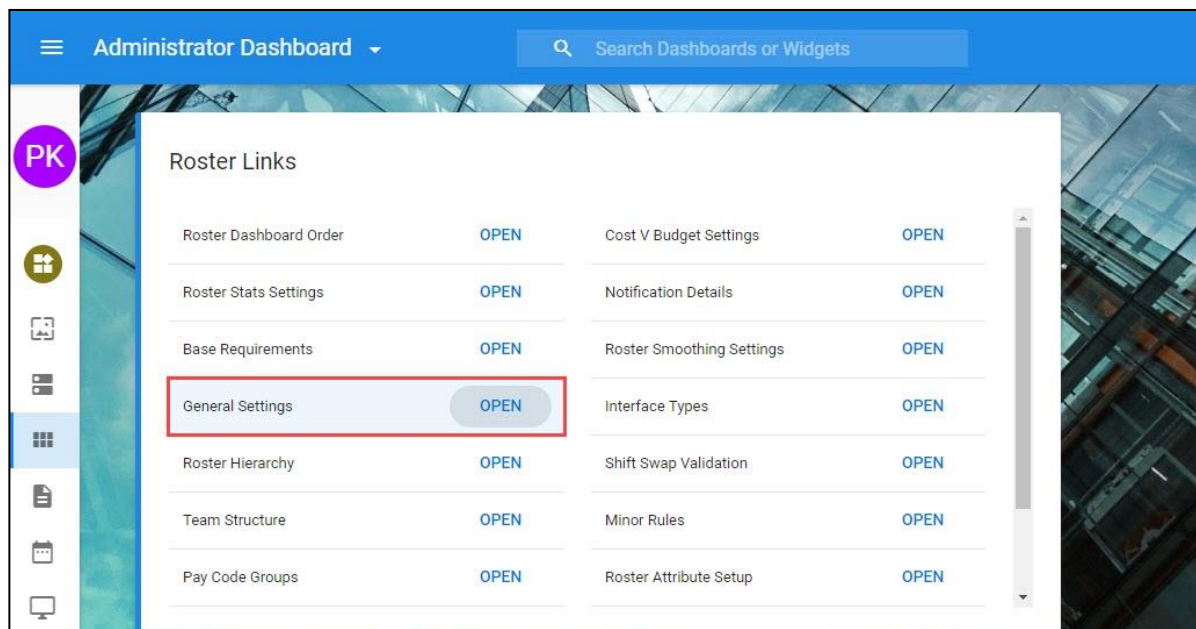

- The qualification does not display in the *Qualification* drop-down list to choose from when actioning the following processes:
 - Roster Change - One
 - Roster Change - Many
- The qualification is not considered by the *Validation Rules*.

For the *Roster* to determine if a qualification is active or not, the *Start* and *End Dates* on the employee's qualification must be defined. Therefore, only *Active* qualifications are taken into account by the *Validation Rules*.

11.1.1. Enable Qualifications

To enable the *Qualifications* functionality:

1. *Quick Jump to Roster Links*.
2. Click **Open General Settings**.

3. Click the **General Settings** tab.
4. Tick on *Display Qualifications*.

5. Tick on *Assign Qualifications*.

The screenshot shows the 'General Settings' page. At the top, there's a breadcrumb 'Administrator Dashboard > General Settings'. Below this, there are two tabs: 'General Settings' (selected, indicated by a red arrow) and 'Auto Roster Settings'. The 'General Settings' section contains several toggle switches: 'Extend Uncovered Maybes' (off), 'Hours greater than overtime' (off), 'Display availability on day view' (on), 'Breaks by duration' (on), 'Calculate WTD breaks' (on), and 'Published recommended teams' (off). There's also a dropdown for 'Delegation level for Team Areas'. Below this is a section titled 'Qualifications'. It contains two toggle switches: 'Display Qualifications' (on) and 'Assign Qualifications' (on, highlighted with a red box). To the right of these is a dropdown menu labeled 'Qualification by day' with 'Rules based' selected.

6. Select the applicable option from the *Qualification by day* drop-down list.

This setting determines how the *Group By - Qualification* function displays on the *Roster Details - Day View* Screen. The options available to choose from are detailed in the table below:

Qualification by day	Explanation
Combine Qualifications	If the <i>Combine Qualifications</i> option is selected, the <i>Roster Details - Day View</i> by qualification is person based. If an employee has more than one qualification, they appear under a qualification combination group rather than in each individual qualification group.
Individual Qualifications	If the <i>Individual Qualifications</i> option is selected, the <i>Roster Details - Day View</i> by qualification is person based. If an employee has more than one qualification, they appear under each individual qualification, therefore, there are no combination groups.
Rules Based	- If the <i>Rules based</i> option is selected, the <i>Roster Details - Day View</i> is based by qualification. The employee only appears if they satisfy the current rules, if the rule is marked as <i>Match Qualification</i>. - If an employee has more than one qualification, they appear under each individual qualification, with an * appended to their name. This represents the number of other qualifications satisfying the current rules. There are no combination groups.

- Click **Save**.

11.2. Add Qualification Codes to the System

Qualifications are represented by *Education/Skill Codes* in *CorePersonnel*. To add a new qualification to the system:

- Quick jump to the *Data Centre* widget on *CorePortal*.
- Select **View Reference Data**.
- Select **Education Codes**.

- Click **Add**.
- Enter the *Education/Skill Code*.
- Enter the *Description*.

Education Code	Description	Analysis Code	Description	E-Recruitment Order	Include

 Registered Health Visitor

Level _____ Course Name _____

11.3. Add Qualifications to Employee Records

Note:

If *Qualifications* have been added to the employee's record via the *HR People Management* dashboard, these are available to view here in *Roster*. Alternatively, qualifications can be added to the employee's record directly in *Roster*. These will also be updated on the main HR record and visible in *People Management*.

To add a new qualification to an employee record:

1. *Quick Jump to Roster Details.*
2. Click on the applicable employee record.
3. Click **View Qualifications**.

Context menu for Cathy Looney:

- Change Roster
- Absences
- Contract Details
- Assign Qualifications
- View Qualifications**

The *View Qualifications* screen displays.

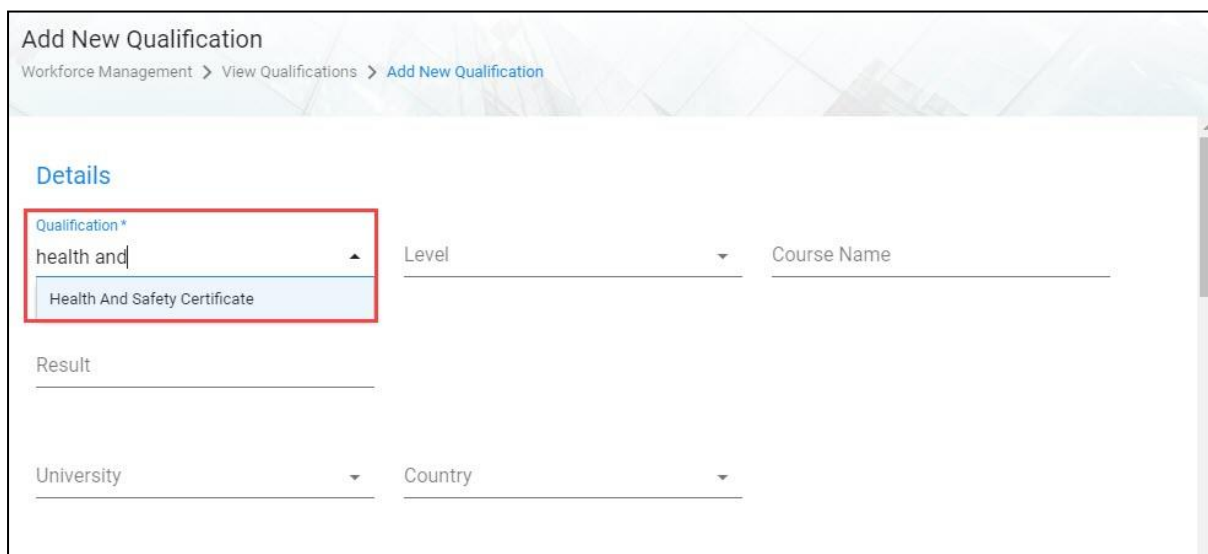

- Click the **Add** button.

The *Add New Qualification* screen displays.

Note that the only mandatory field on this screen is *Qualification*, however it is necessary to populate the *Courses Date – Date From* field to make the qualification active within the system.

- Select the applicable *Qualification* from the drop-down list.

- Scroll down to the *Course Dates* section.
- Select the *Roster Priority* from the drop-down list.

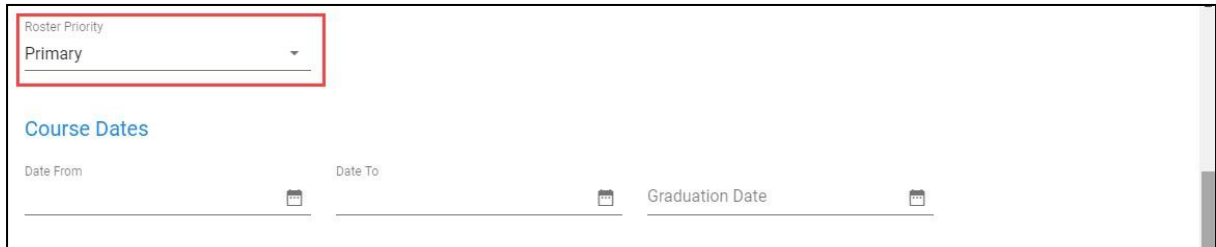

This provides the ability to *AutoRoster* based on the priority attached to the *Qualification*. This can be marked as **Primary** or **Secondary**.

Qualifications marked as **Primary** are filled first by *AutoRoster*. **Secondary** *Qualifications* are looked at on the second run through, and if there is still a gap the **Secondary** *Qualifications* are then filled on a secondary basis. Therefore, this *Rosters* employees based on their **Primary**

Qualification first and only *Rosters* them on their **Secondary Qualification** if the **Primary Qualification** is not available.

This functionality corresponds with the following *Validation Rules*:

- 1027 Autorostering : Qualification Priority
- 2027 Uncovered : Qualification Priority

A screenshot of a web form. At the top, there is a dropdown menu labeled 'Roster Priority' with 'Primary' selected. Below this, there is a section titled 'Course Dates' in blue. Under 'Course Dates', there are three input fields: 'Date From', 'Date To', and 'Graduation Date'. Each field has a calendar icon to its right.

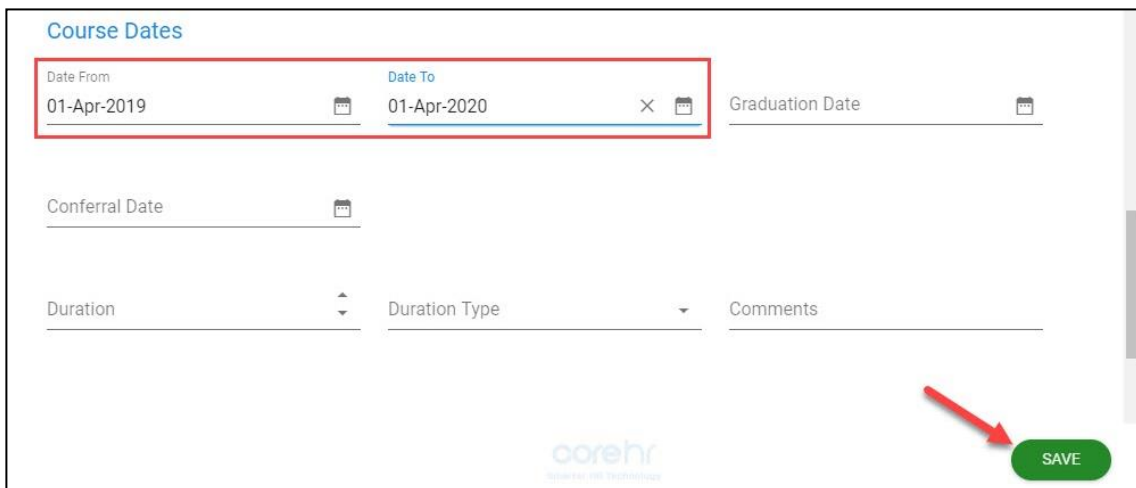

8. Enter the *Date From*.

The *Qualification* is active within the system from this date forward, allowing you to assign it to employee shifts.

9. Enter the *Date To*, if applicable.

The *Qualification* is inactive within the system after this date, stopping you from assigning it to employee shifts.

10. Click **Save**.

A screenshot of the 'Course Dates' form. The 'Date From' field is filled with '01-Apr-2019' and the 'Date To' field is filled with '01-Apr-2020'. Both fields have a red box around them. The 'Graduation Date' field is empty. Below these fields are 'Conferral Date', 'Duration', 'Duration Type', and 'Comments' fields. At the bottom right, there is a green 'SAVE' button with a red arrow pointing to it. The CoreHR logo is visible at the bottom center.

The *Qualification* is now active on the employee's record and can be assigned to their shifts.

11.4. Assign Qualifications to Employee Shifts

11.4.1. Person Actions

To assign qualifications to an employee's shift:

1. *Quick Jump to Roster Details.*
2. Click on the applicable employee record.
3. Click **Assign Qualifications**.

5. Select the *Qualification* from the drop-down list.
6. Click **OK**.

The *Qualification* is now assigned to the employees shift.

7. Click **Save** to complete.

11.4.2. Roster Change – One & Many

It is possible to assign *Qualifications* to employees working days during the *Roster Change* processes.

Change Roster – One

You can specify what qualification an employee is working for the day. If the employee has only one qualification attached to their record, this qualification defaults in the *Qualification* field.

Change Roster – Many

You can specify the qualification many employees are working with for the day.

For full guidance on the *Roster Change* processes, view section [3.3. Change Rosters](#).

11.5. Order Day View by Qualifications

It is possible to identify what qualification an employee is working on for their shift, by grouping the *Roster Details - Day View* screen by *Qualification*. This option is applied when you are enabling the *Qualification* functionality on the system. For further information on configuration, view section [11.1.1. Enable Qualifications](#).

There are three options available to choose from when displaying employees against *Qualification* on the *Day View*.

- Combine Qualifications
- Individual Qualifications
- Rules Based

Combine Qualifications Example

If *Combine Qualifications* is configured, the *Day View* lists employees under a qualification combination group, rather than in each individual qualification group. You can see in the below example that the view is broken in to groups of qualification's, therefore:

- Employees with a 'Diploma', 'First Degree', and a 'Master of Arts' form one combination.
- Employees with a 'First Degree' and a 'Other Higher Degree', form another combination.

11.6. Match Qualification Per Day

If the *Team Area Roster Rules* has a 'Qualification' *Roster Rule Type* configured. The *Match Qualification* per day functionality ensures that employees are only counted as having the qualification, if they are marked as working the qualification on the day.

Therefore, the qualification must be assigned to the employee's shift on the day. If an employee has a qualification, but it is not assigned to their shift on the day, the qualification is not included in the count for employees who can work the shift. This is based on the *Roster Rules - Match Qualifications* indicator.

Example 1:

An employee has two qualifications, 'Diploma' and 'Degree'. However, the qualifications are not assigned to the employee's shift for the day.

- There are two *Roster Rules* configured:
 - One rule for the 'Diploma' qualification, that is not marked as *Match Qualification*.
 - One rule for the 'Degree' qualification, that is not marked as *Match Qualification*.
- Therefore, the employee is included in the count for both the 'Diploma' and 'Degree' qualifications as the *Match Qualification* indicator is not ticked.

Example 2:

An employee has two qualifications, 'Diploma' and 'Degree'. However, the qualifications are not assigned to the employee's shift for the day.

- There are two *Roster Rules* configured:
 - One rule for the 'Diploma' qualification, that is marked as *Match Qualification*.
 - One rule for the 'Degree' qualification, that is marked as *Match Qualification*.
- Therefore, the employee is not included in the count for both the 'Diploma' and 'Degree' qualifications as the *Match Qualification* indicator is ticked and the qualifications are not assigned to the employee's shift for the day.

Example 3:

An employee has two qualifications, 'Diploma' and 'Degree'. The qualifications are assigned to the employee's shift for the day.

- There are two *Roster Rules* configured:
 - One rule for the 'Diploma' qualification, that is marked as *Match Qualification*.
 - One rule for the 'Degree' qualification, that is marked as *Match Qualification*.
- Therefore, the employee is included in the count for both the 'Diploma' and 'Degree' qualifications as the *Match Qualification* indicator is ticked and the qualifications are assigned to the employee's shift for the day.

11.6.1. Enable Match Qualification

To enable the Match Qualification indicator on a Roster Rule:

1. Quick Jump to Roster Rules.
2. Specify the *Day*.
3. Tick the *Apply changes to this week only* indicator, if applicable.
4. Specify the *Team Area*.
5. Specify the *Week*.
6. Click **Apply**.

11.6.2. Match Qualification - Statistics

The *Statistics* screen checks the *Match Qualification* indicator when calculating the statistics for qualification-based *Roster Rules*. Therefore:

- If the *Match Qualification* indicator is ticked on, *Statistics* only include employees in the count where the qualification is specified.
- If the *Match Qualification* indicator is ticked off, *Statistics* calculate as is. If an employee has more than one qualification, they are be included in the count for both qualifications.
