1. Overview

1.1. Purpose of the Guide

The purpose of this guide is to help users configure the Generate Timesheets Parallel Run facility. Parallel Run allows users to report on the parallel tables and to review or report where differences may have occurred in the transferring of hours for a previously completed back office Live Run.

By using the Parallel Run, you can compare to existing Live runs completed through back office and ensure there are no errors before migrating to live running of the Portal version of Generate Timesheets.

This is particularly useful for those sites with large amounts of hours being transferred and is an added backup to those who are migrating from using the previous back office feature to the one on Portal.

The step-by-step process of retrieving hours and transferring them to payroll is covered in a separate document, see [WFM v28 Generate Timesheets User Guide](#).

Note:

It is recommended to complete Parallel Runs prior to the Back Office migration.

1.2. Why use Parallel Run?

In the table below are some of the benefits of using the Parallel Run in tandem with Generate Timesheets:

Benefit	Details
Verification	Verify the migration process, running Generate Timesheets in parallel run mode

	enables comparisons to existing Live Runs completed through back office
Employee/Hours view	You are given a summary and detailed views of employees and hours before transferring to Payroll. This will allow you to check for any hours or employees. For a list of common validation checks, see Section
Feedback	There is an improved user experience as the system gives continuous feedback. This includes factors such as estimated duration of the run, a notification upon completion and the visibility of blocker exceptions .
Background Processing	This system provides a Task list driven background processing. This has the added benefit of freeing up administrative resources which can be used elsewhere.
View Payroll Hours	The system allows you to view generated payroll hours details before transferring them to payroll.
Length of Process:	You are given an estimation of the length of the process.
Notifications:	You are notified upon completion of the process.

Additional Improvements

There have also been some additional improvements such as the following:

Improvement	Details
Basic Rule	Basic Rule functionality has been enhanced so it can be used with user defined calendars.

Employee not on Payroll	The <i>Employee not on Payroll</i> blocker exception has been amended so that processing can be set to continue/warn if the employee has/hasn't timesheet in the period. Additional configuration is needed to enable this.
Balance Recalculation	A balance re-calculation is completed for staff who leave the organisation to ensure balances are up-to-date.

1.3. What is the Parallel Mode?

Generate Timesheets in Parallel Mode.

As mentioned in the previous section, Generate Timesheets has been moved from the back office to Portal. In order to support the transition, the portal version of Generate Timesheets runs a parallel mode to support the re-generation of a previously transferred period that was completed via the back office.

The features within the *Parallel Mode* are the following:

- **WFM company:** Parallel Mode can be enabled per WFM company. If a client has more than one company using Portal, the parallel mode can be run separately for each.
- **Validation:** Parallel mode is run to validate those calendars or periods which have previously been migrated to show that there are no discrepancies found.
- **Leavers:** Parallel Transfers do not impact the live mode. Employees are not marked as leavers.
- **Analysis and Review:** Parallel Run details are stored into backup tables for analysis and review. For further information see [Tables for Parallel Run](#).

- **Insight reporting and analysis:** This includes listings of the hours transferred in parallel mode. Exceptions reports are generated on the parallel lists and are compared highlighting differences between the back-office run and portal runs.

1.3.1. Checklist

Here is a checklist you should complete before configuring the Parallel Mode:

- ✓ Have you been granted access to Portal Generate Timesheets?
- ✓ Do you have access to the WFM Admin Dashboard on Portal?
- ✓ Have you been granted the access for Generate Timesheets Sign Off Hours and Timesheet Input, where it is required?
- ✓ Do you have the Company Setting menu option available from the WFM Configuration Centre?
- ✓ Has Parallel Run been switched on for the required company, under Company Settings in WFM Configuration?

1.3.2. Menu Access

In Menu Security, for the Generate Timesheets Administrators enable Portal's version of the Generate Timesheets

1. Quick Jump to *Menu Security*
2. Search for Generate Timesheets menu option

Screen	Menu Option
Generate Timesheets	WFM Admin > Generate Timesheets (31108715)

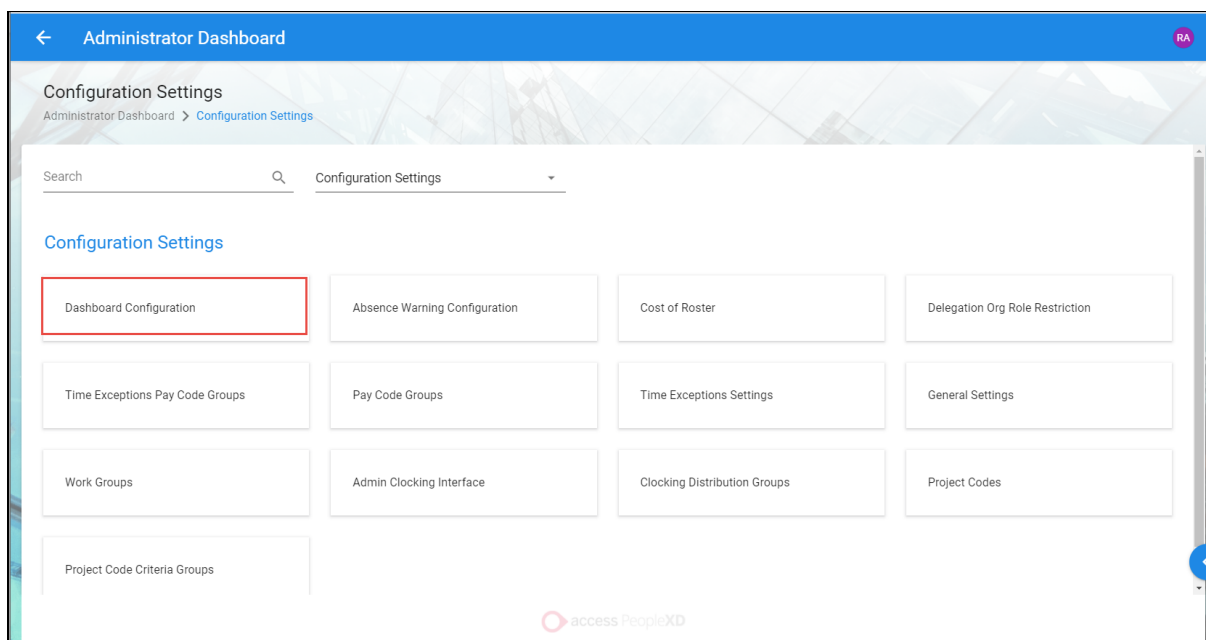

3. Click the toggle and set to **Active**.

For the Payroll Dashboard enable CorePortal Generate Timesheets – Payroll

1.3.3. Menu Access for Dashboard

To set up the menu access for dashboard, you need to switch on the menu profile. Administrators can enable the WFM Admin dashboard and WFM Admin menu ordering by completing the following steps:

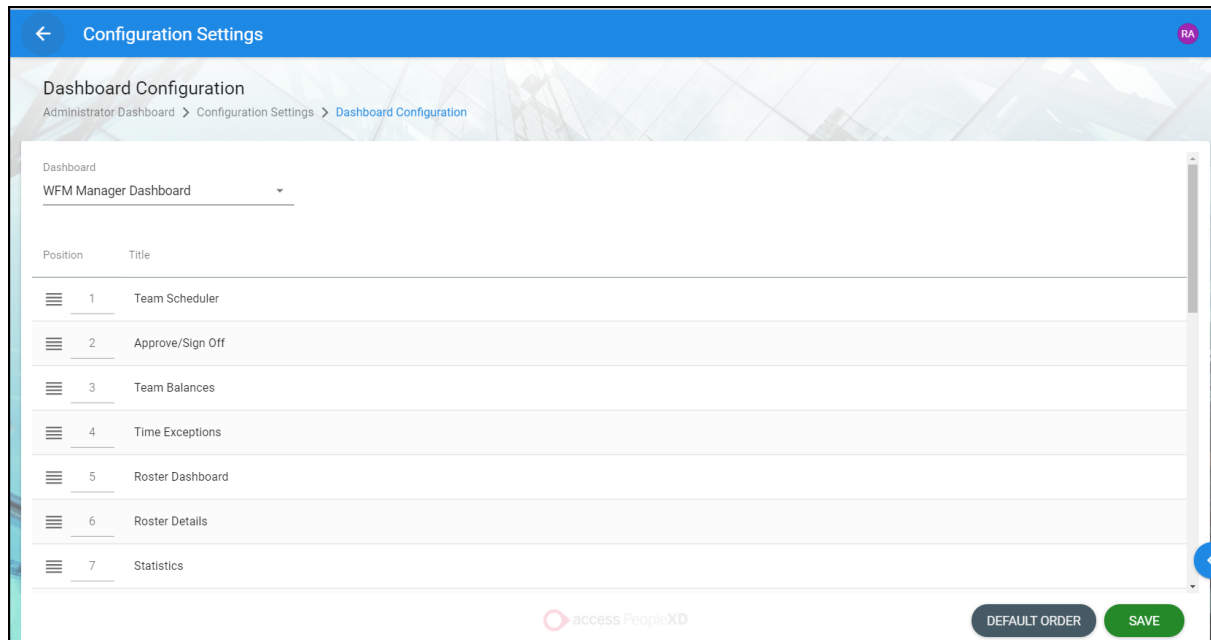

1. Assign the **WFM Admin** menu option.
2. Decide the WFM Admin dashboard ordering.
3. The order of the menu within the Admin Dashboard can be tailored through the *Dashboard Configuration* option located in **WFM Configuration Centre**.

Note:

There is a **Default Order** button which will allow you to put the screens back in their original order before any changes were made.

1.3.4. Switching on the Menu

For administrators to run Parallel Mode, company settings need to be enabled by completing the following.

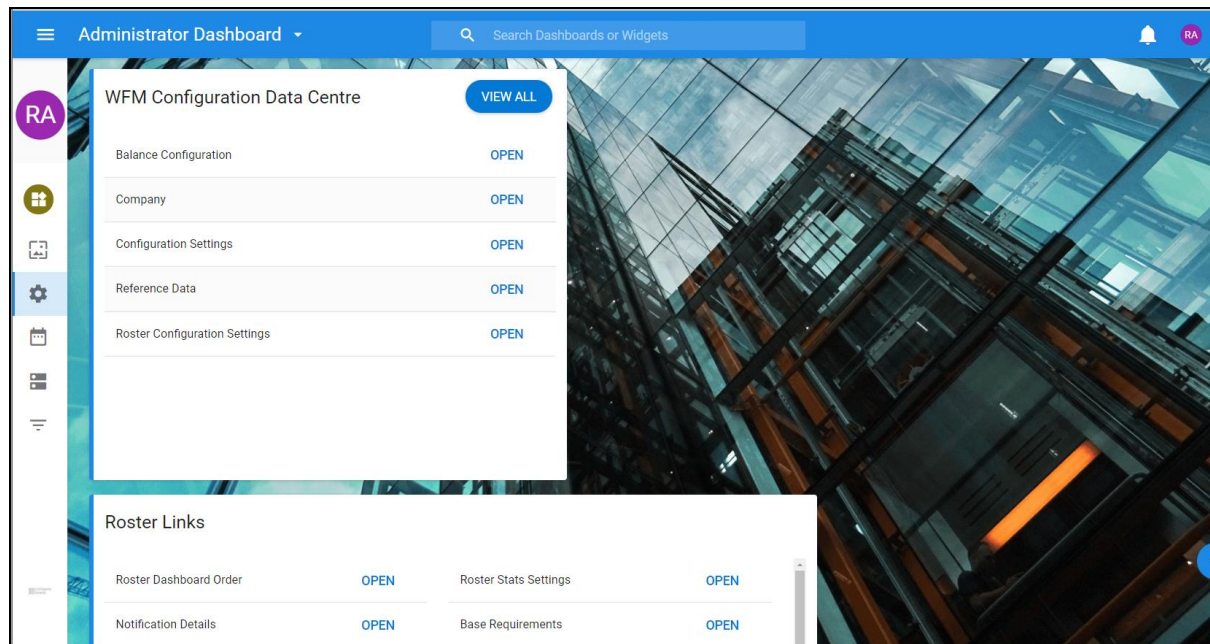

Note:

You may need to log out to refresh the menu security updates

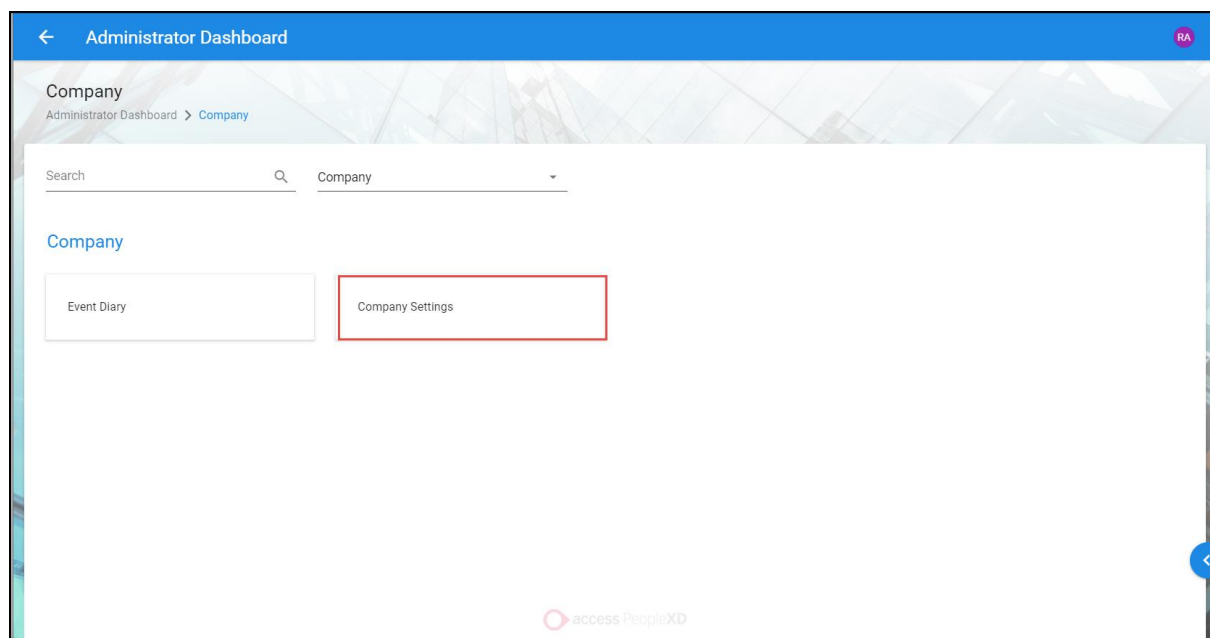

1. Navigate to the **WFM Configuration Data Centre**

WFM: Generate Timesheets Parallel Run - Configuration Guide

2. Select **Company**.

3. Select Company **Settings**.

4. Enable the toggle for **Parallel Run**.

2. Using Parallel Run

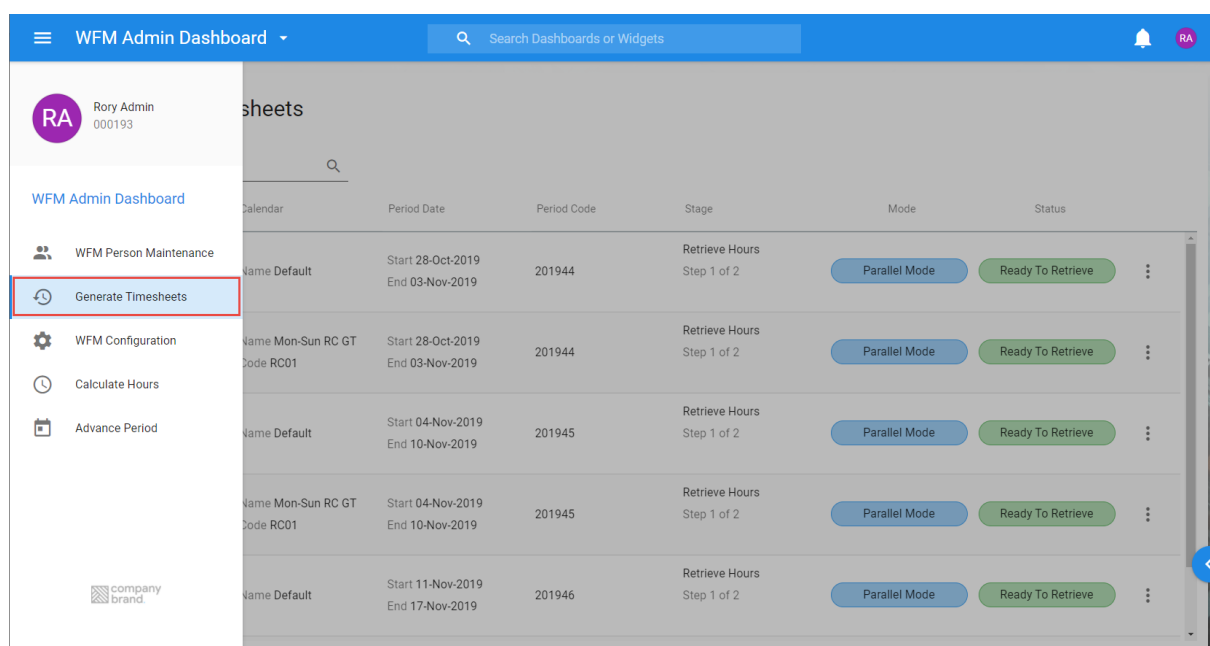

2.1. Overview

In the following sections follow the step-by-step process of running the Parallel Mode in conjunction with the Live Portal Mode and evaluating the results. You are shown:

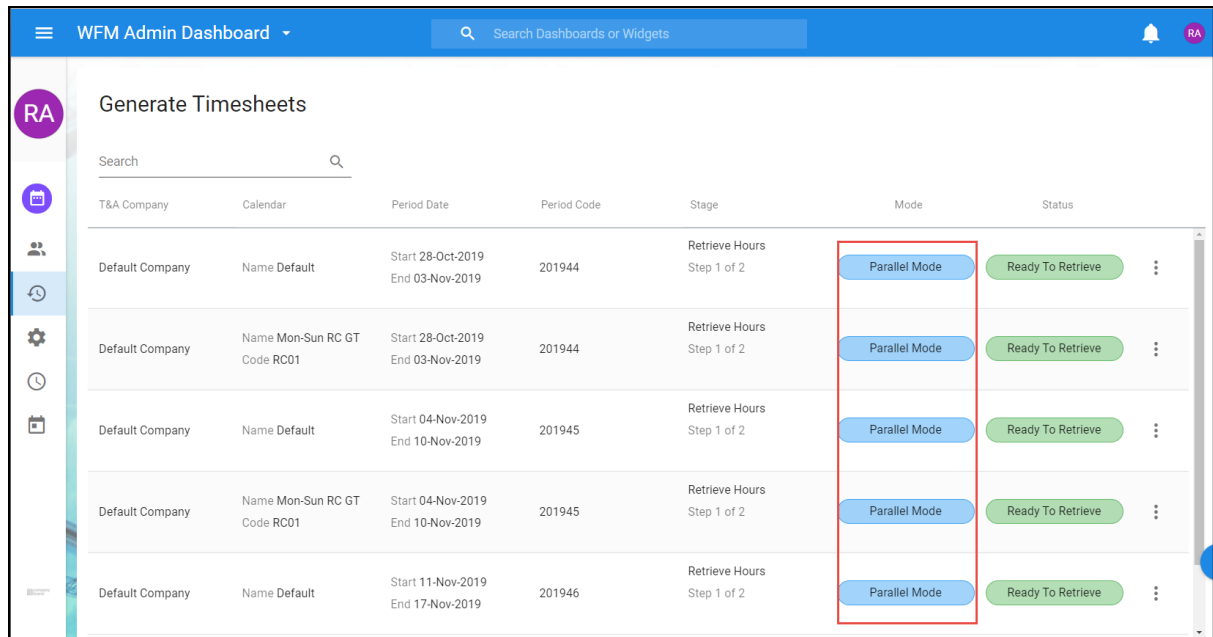

- How to run Generate Timesheets.
- How to Run the Parallel Run
- Errors and messages which you may encounter

2.1.1. Step One: Generate Timesheets Screen on Portal

1. Connect to the Portal version of Generate Timesheets.
2. Quick Jump to *WFM Admin Dashboard*.
3. Select **Generate Timesheets**.

4. The *Parallel Mode* displays on screen.

T&A Company	Calendar	Period Date	Period Code	Stage	Mode	Status
Default Company	Name Default	Start 28-Oct-2019 End 03-Nov-2019	201944	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Mon-Sun RC GT Code RC01	Start 28-Oct-2019 End 03-Nov-2019	201944	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Default	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Default	Start 11-Nov-2019 End 17-Nov-2019	201946	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve

5. Review the screen to ensure Parallel Mode is displayed when the configuration is completed or alternatively contact an XD consultant.

2.1.2. Step Two: Running Generate Timesheets in Back Office

1. Connect to the Back Office.
2. Run Generate Timesheets in either Final or Test mode as normal.

Generate Timesheets For Payroll

Company: 7266 Company ABC Calendar Code: ?

Mode: ☐ Test ☒ Final Period: 202045 09-NOV-2020 15-NOV-2020

Work Group From: BR01 Work Group 1 7266

Work Group To: BR05 Work Group 5 7266 Ignore Unconfirmed: ☐

Buttons: Retrieve Hours, Controls, Create Timesheets, Cancel

Control Totals

No. Of Employees

Transferred: 65 View Det...

Not Transferred: 5 View Det...

Pay Code	Description	Hours	Days
1005	Basic Hours	2371.00	
2001	Overtime @ 1.00	48.00	
3700	ANNUAL LEAVE 3700	40.00	
7501	Basic Pay	3.00	
7502	Overtime	5.00	

OK Total: 2465.00 .00

- Take note of the control totals. These may be used as visual checks when completing a parallel run. The control totals are the following:
 - **Number of Employee Transferring**
 - **Total Hours by Pay Code**
 - **Overall Total**
 - **Number of Employee not Transferring.**
- Select **Create Timesheets** to complete the run and transfer the hours to payroll for processing.
- Continue to process the payroll as normal.

Note:

Portal Parallel Run writes to temporary tables which are matched to previously transferred details to enable validation of the process or highlighting of exceptions. See the [list of tables](#)

2.1.3. Step Three: Portal Screen Periods

1. Connect to Portal and navigate to the **Generate Timesheet** option located on the *WFM Admin Dashboard* or *Payroll Dashboard*.
2. On entry to the screen ensure **Parallel Mode** is displayed for each calendar.

**Note:**

If Parallel Mode does not display, stop and revisit the configuration steps. Alternatively, contact your XD consultant. See Section 1.2.4. [Switching on Menu](#)

3. The Portal Screen lists three previous periods to support any re-runs for any previously completed runs completed via back office.

2.1.4. Step Four: Generate Timesheets Company Display

1. When using Portal, Generate Timesheets automatically displays the
 - Company
 - Calendars
 - Period Dates
 - Period,
 - Stage
 - Mode
 - Status

WFM: Generate Timesheets Parallel Run - Configuration Guide

T&A Company	Calendar	Period Date	Period Code	Stage	Mode	Status
Default Company	Name Mon-Sun RC GT Code RC01	Start 21-Oct-2019 End 27-Oct-2019	201943	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Default	Start 28-Oct-2019 End 03-Nov-2019	201944	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Mon-Sun RC GT Code RC01	Start 28-Oct-2019 End 03-Nov-2019	201944	Retrieve Hours Step 1 of 2 RC001 - RC001	Parallel Mode	Job Submitted
Default Company	Name Default	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve
Default Company	Name Mon-Sun RC GT Code RC01	Start 04-Nov-2019 End 10-Nov-2019	201945	Retrieve Hours Step 1 of 2	Parallel Mode	Ready To Retrieve

- The status **Ready to Retrieve** is the first step in the process which validates that the hours are signed off and no exceptions occur.

- Select **Run** from  menu. For further information on the View History button see View History Screen in the Generate Timesheets User Guide.

2.1.5. Step Five

- Under *Work Groups*, click **Select All** or **Select Range** of Work Groups.

The screenshot shows the 'Generate Timesheets' configuration interface within the 'Workforce Management' system. The top navigation bar includes a back arrow and the title 'Workforce Management'. Below this, the page title 'Generate Timesheets' is displayed, followed by a breadcrumb trail 'Workforce Management > Generate Timesheets'. The main configuration area includes a 'Parallel Mode' toggle, which is currently set to 'Parallel Mode'. Below this, four configuration fields are shown: 'T&A Company Default Company', 'Calendar Mon-Sun RC GT', 'Period Code 201943', and 'Period Date 21-Oct-2019 - 27-Oct-2019'. A section titled 'Work Groups' contains two radio buttons: 'Select All' (which is selected) and 'Select Range'. At the bottom right of the configuration area, there is a blue button labeled 'RETRIEVE HOURS'.

2. Once selected click **Retrieve Hours**.
3. If previous runs have taken place, the system notifies you how long the process is likely to take, based on the previous amount of time taken.
4. The Retrieve Hours process is submitted to run in the background and the control is returned to the selection when the job status is submitted.

2.1.6. Step Six: Transfer Hours

1. Once the Job has completed the status will change to **Ready to Transfer**. This shows that all hours are signed off and there are no exceptions in the retrieve hours process
2. The Job Status can be checked by selecting **View Progress** for the company selected. For further information on the Job Status see Generate Timesheets User Guide.
3. If an error occurs, it will need to be resolved for the process to continue. Please see the list of errors detailed in the table below.

Errors Table

Error/Warning	Details
Unconfirmed Hours	The employee has hours within the T&A period which have not been signed off.
Unconfirmed Historical Hours	Historical Hours have not been confirmed and must be confirmed for payment
No Employee record on Payroll	The Employee has not been set up on Payroll. This message can be configured to no longer show as a STOP. Instead, it can be configured to be a warning generated by the system.
No Employee Record and hours exist	The Employee has not been set up on Payroll. This message can be configured to no longer show as a STOP. Instead, it can be configured to be a warning generated by the system.
No Basic Rule Pattern/ No Under/overflow Pattern	The employee is a Basic or Salary Rule employee, but the overflow or underflow patterns have not been attached to the workgroup or employee.
Cannot transfer Unconfirmed Hours linked to Claims (Work Group is "Sign Off not Required")	Mismatch in configuration. Claim takes precedence (final level claim does approve/sign off)
Expiring -Held Timesheets	Timesheets from a previous period have not been previously signed off.
Warning- Held Timesheets	Timesheets from a previous period have not been signed off.
Held Timesheets to be Processed	Held Timesheets for the specified employee and period will be transferred to Payroll in this period.
Warning - Unapproved Codes	Hours confirmed but not approved. Hours will not be paid but will also not be stopped
Warning - Hours generated by User Defined Calendar run	Overlap due to switching between calendars.

Warning - Hours also generated by another Calendar run

Overlap due to someone switching between calendars.

2.1.7. Step Seven: Review the Transferring Details

Compare Transfer details to the Back-office run. On the top right hand of the screen, there is a table which shows

- Employees transferred
- Employees not transferred.

Review the Checklist:

- ✓ Do the Employee numbers transferring match the numbers taken from the back office?
- ✓ Do the **Hours To be Transferred** match those shown in the back-office forms?

The screenshot shows the 'WFM Admin Dashboard' with the 'Generate Timesheets' section. The top navigation bar includes 'WFM Admin Dashboard' and 'Generate Timesheets'. Below this, there are filters for 'Parallel Mode', 'TSA Company Company ABC', 'Calendar Default', 'Period Code 202045', and 'Period Date 09-Nov-2020 - 15-Nov-2020'. The 'Work Groups Selected All Work Groups' and 'Hours Retrieved 10-May-2021 13:05:15' are also visible.

The 'Warnings' section shows a table with the following data:

Warning	Count	Action
Pay Group Warnings	0	
Rejected Hours	0	
Retrieve Hours Warnings	1	VIEW

The 'Employees' section shows a summary table:

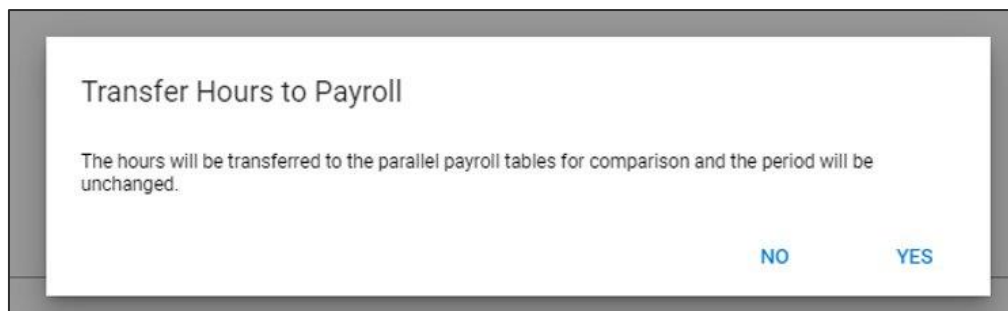

Category	Count	Action
Employees Transferred	56	VIEW
Employees Not Transferred	4	VIEW

The 'Hours to be Transferred' section shows a table with the following data:

Paycode	Description	Type	Value	Action
1005	Description Basic Hours	Type H	2411.00	VIEW
2001	Description Overtime @ 1.00	Type H	45.00	VIEW
3700	Description ANNUAL LEAVE 3700	Type H	40.00	VIEW
7501	Description Basic Pay	Type H	3.00	VIEW
7502	Description Overtime	Type H	5.00	VIEW

At the bottom of the screen, there are buttons for 'CANCEL PROCESS' and 'VALIDATE TRANSFER'.

If the details match, select **Validate Transfer** and then **Transfer** to complete the Run.

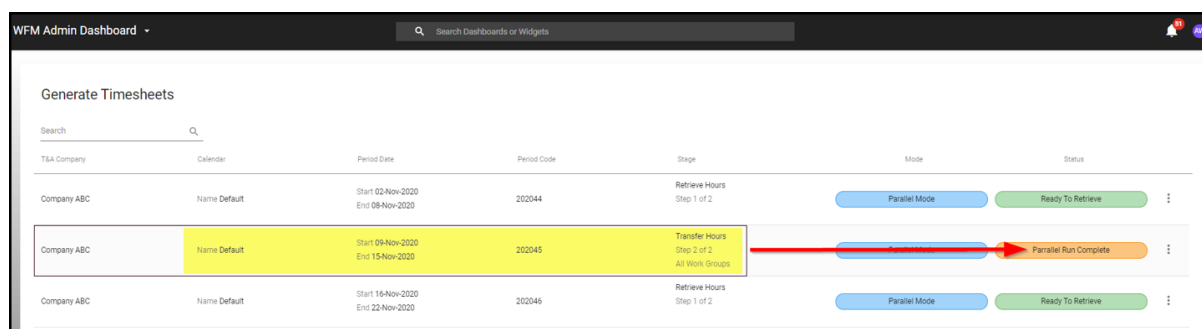

Note:

If the values are not matching, please review the [Changes appendix check list](#). If no details have changed, please contact customer support.

2.1.8. Step Eight: Parallel Run Completed

When the Portal Generate Timesheets has completed successfully the Status is changed to **Parallel Run Completed**.

2.1.9. Step Nine: Final Step: Parallel Run Reporting

The Final Step is to confirm the parallel run has completed successfully.

To complete, this step:

1. Navigate to *Insight*.
2. Run a *Timesheet Comparison & Details* report. The comparison report matches the employee/hours transferred from the **Live** run with those from the **Parallel** run.

3. If there are no differences between the Live and the Parallel tables then nothing is returned.
4. A detailed report lists the Timesheets completed in the Parallel Run, delving deeper in to the data, verifying that which was created as part of the Parallel Run.

 Note:

You are recommended to run both the reports to verify the parallel run.

Insight Report for Timesheet Para Hours

1. Navigate to Insight & create a New Insight Report.
2. Select type **Table** and enter the report name.
3. Search for **Timesheet Para**.
4. Select **Timesheets Para Hours (Time)**
5. Include all the columns and add two Filters to the report for (TNA Period & Calendar Name)

 Note:

If there are no User Defined Calendars in operation, the calendar name is *Default*. Otherwise enter the User Defined calendar name e.g., Monthly.

Insight Report for Timesheets Para Dets

1. Navigate to Insight.
2. Create a New Insight Report.
3. Select type Table and enter the report name
4. Search for 'Timesheet Para ' (see screen shot) & select '*Timesheets Para Dets (Time)*'
5. Include all the columns and add two Filters to the report for (TNA Period & Calendar Name)

 Note:

You are recommended at a minimum to run the **Timesheet Para Hours (Time)** report to compare hours and pay codes. If the Generate Timesheet process is configured to transfer additional items to payroll such as cost centre and project, it is also recommended to run the ***Timesheets Para Dets (Time) report.***

Insight Report for Timesheet Para Time

1. Navigate to Insight
2. Create a New Insight Report.
3. Select type 'Table' and enter the report name
4. Search for Timesheet Para. Select *Time*.
5. Include all the columns and add two Filters to the report (TNA Period & Calendar Name)

Insight Report for CT ASCII Timesheet Para Hours

1. Navigate to Insight & create a New Insight Report.
2. Select type **Table** and enter the report name.
3. Search for 'ct ascii'. Select 'Ct Ascii Timesheet Para Hours (Time).
4. Include all the columns and add two Filters to the report for (Period & Calendar Name)

3. Controls and Tables

3.1. Views for Parallel Run

View	Description
ctci_ct_time_sheet_para_hours	This table compares the hours and pay codes per person, period or source (calendar_code) for ct_time_sheet (live table) / ct_time_Sheet_parallel
ctci_timesheet_para_hours	This table compares hours and pay codes per person, period or source (calendar_code) for timesheet (live table) / timeSheet_parallel
ctci_timesheet_para_dets	This table compares other details such as cost centre, project, position, scale_point, appointment_id, expense per row for ct_time_sheet (live table) / ct_time_Sheet_parallel. Note: You should assume that the matching row (period/person/pay_code/hours/day) exists on both tables. There should be no differences found in ctci_ct_time_sheet_para_hours
ctci_ct_time_sheet_para_dets	This compares the other details such as cost centre, project, position, scale_point, appointment_id and expense per row for ct_time_sheet (live table) / ct_time_Sheet_parallel. Note: You should assume that the matching row (tna_period/empno/pay_code/hours/day) exists on both tables i.e. no differences found in ctci_timesheet_para_hours

WFM: Generate Timesheets Parallel Run - Configuration Guide

ctci_person_timesheets_para	This is a copy of ctci_person_timesheets. It is used for manual parallel comparison of ct_Time_sheet and ct_Time_sheet_parallel
ctci_ct_ascii_timesheet_para_dets	
ctci_ct_ascii_timesheet_para_hours	

To view the Live Process of the Generate Timesheets see [WFM V28 Generate Timesheets User Guide](#).

4. Appendix

The following table is an appendix of the differences which may occur during the Parallel Run process.

Difference Reason	Details
Hours Adjustment	Employee hours previously adjusted between the Back-Office Run and Portal Run.
Changes	The Project Codes or Cost Centre on the Employee Timesheet may have changes.
New Joiners	New Joiners added between the runs.
Transfers	Employee Transfers to another company.
Rule Transfers	Transfers made to another rule. For Example: The Rule was Basic Rule but now changed to Salary rule.
End Date	Person given an end date.
Default Hours Changes	Changes in the default hours on a work group or person.
Contract Hours	Change to contract hours for a person.
Rule Change	The rule itself has changed.
Pay Code Changes	Changes to a pay code e.g. pay_min_Dec set to non payroll.
