Version	Date	Author	Details
1.0	20 th Dec 2019	Rory Coakley	Published to CoreHR University

1. Overview

1.1. Purpose of the Guide.

The purpose of this document is to provide guidance on how to generate timesheets. This functionality for generating timesheets was previously completed through the Back Office and is now available on CorePortal. This is a brand new CoreHR feature for V28. There are no changes to the existing Payroll Rules and how they are configured.

This guide will instruct you how to how to:

- Retrieve Hours for Payroll.
- View Generated Payroll Hours detail.
- Transfer hours to Payroll.

1.2. General Overview.

The Generate Timesheets is now available in Portal – from either the Workforce Management Dashboard or the Admin Dashboard. This allows more streamlined payroll integration. This gives you:

- Improved functionality access alongside Payportal.
- View details of converted hours before transferring them to Payroll.
- The possibility of continuing tasks while the applications run in the background.
- An estimation given of the length of the process.
- Notifications given on completion of the processes.

2. Functionality Overview

2.1. Process

The Generate Timesheets process takes place in two steps:

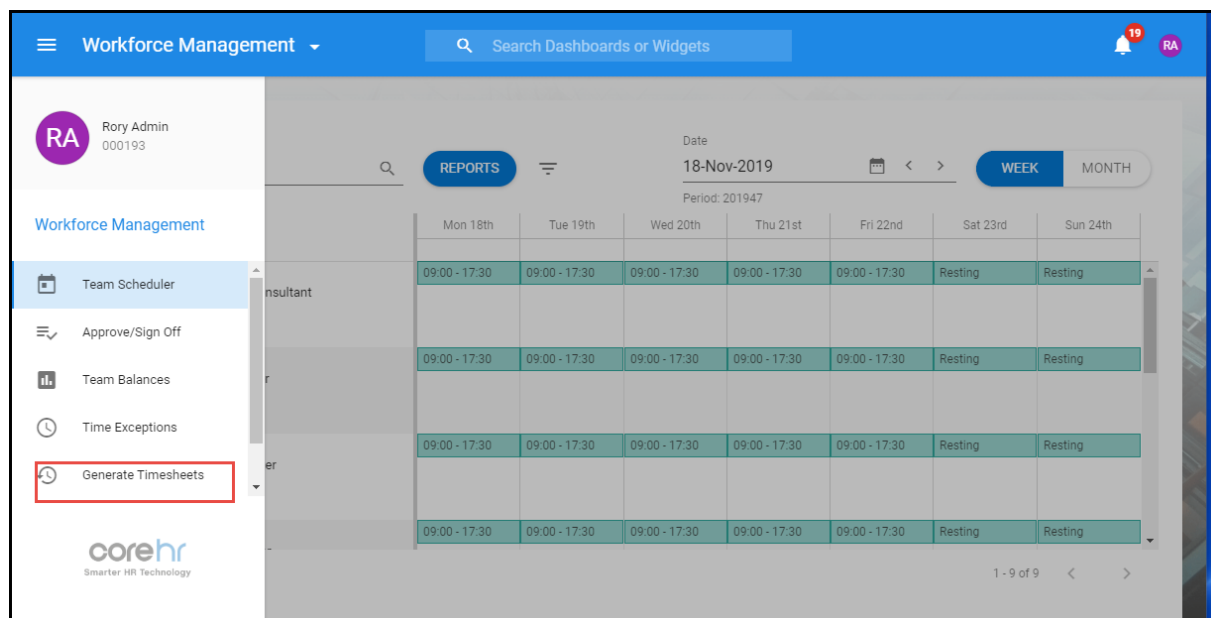

- **Ready to Retrieve: Step 1:** This converts T&A timesheets into Payroll Hours based on payroll rules configured in WFM.
- **Ready to Transfer: Step 2:** This transfers Payroll Hours to CoreHR Payroll or creates an interface file where applicable.

2.2. How to Retrieve Hours

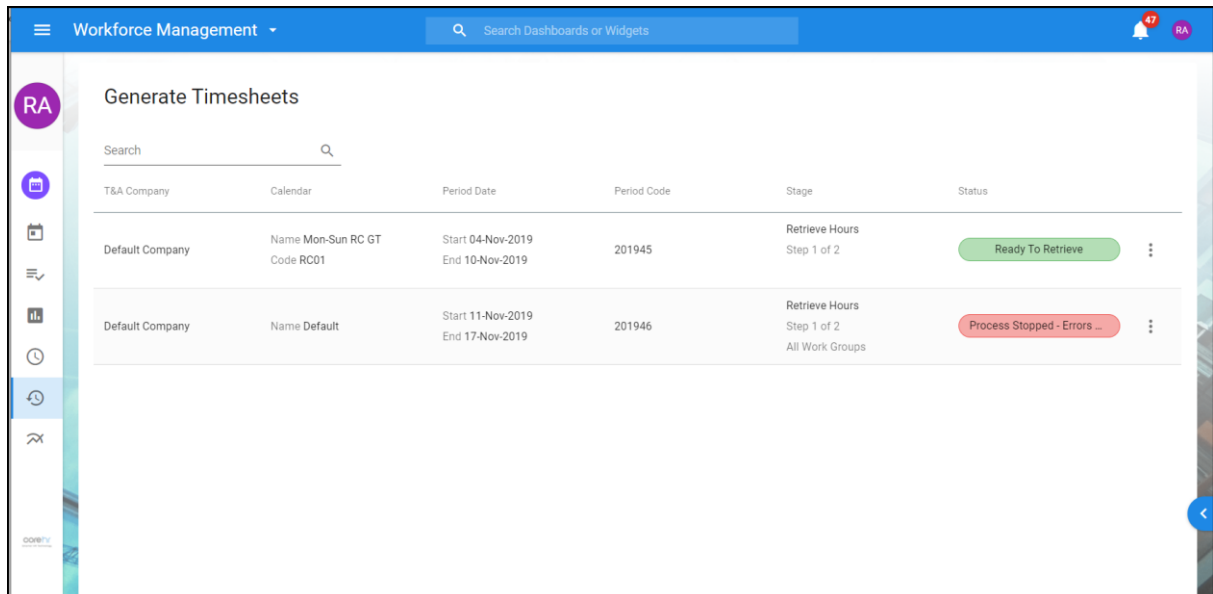

By using the Retrieve Hours function you are converting timesheets in to Payroll hours. This allows you to select specific calendars within a company and send them to Payroll.

2.2.1. Retrieving Hours

1. Quick Jump to the *Workforce Management* section and select **Generate Timesheets**.

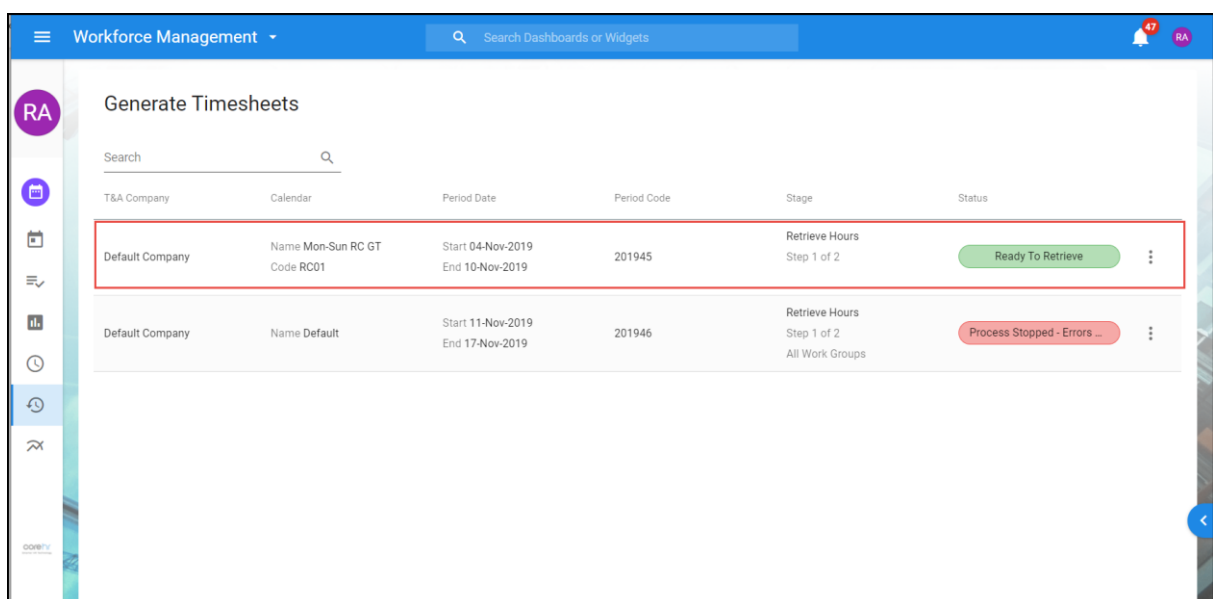

2. This brings you to the main *Generate Timesheets* screen. Here you should be able to see all relevant Time & Attendance calendars which you have access to.

The most important function of this screen is to run the generate timesheet process for a calendar in two steps – Retrieve Hours and Transfer hours. You can also:

- View errors
- Cancel the process
- View the history information for a specific calendar.

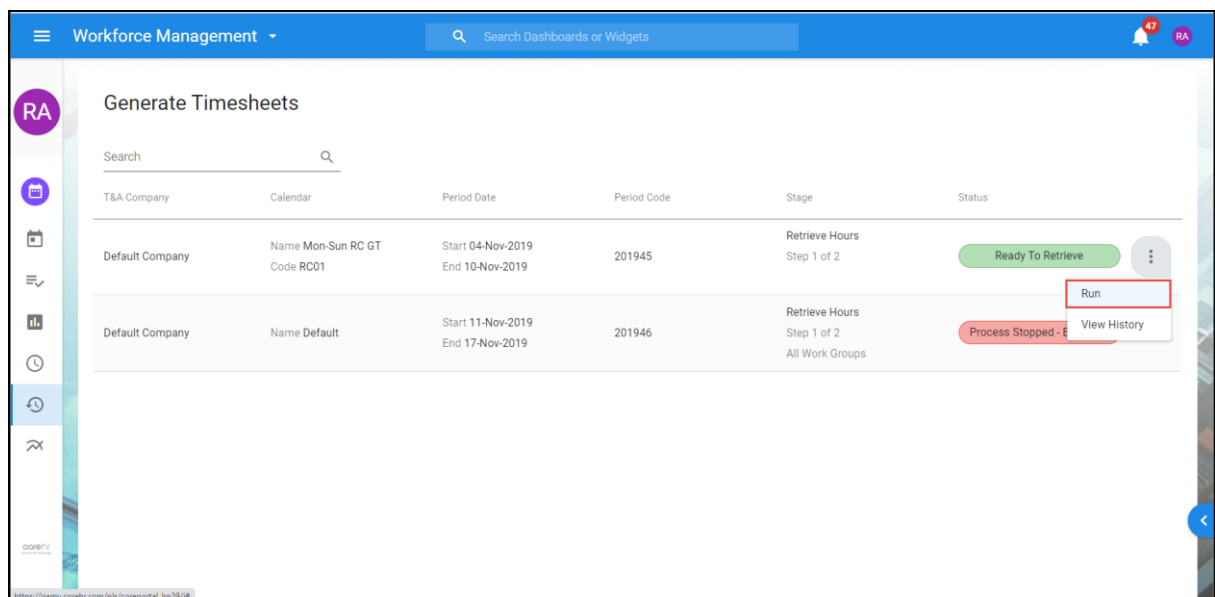

For further information on Errors, please see [Section 4](#)

The following table details the columns on this screen.

Column	Definition
T&A Company	Shows the company which the calendar is in.
Calendar	This gives the name of the specific calendar.
Period Date	Details the inclusive dates for a particular calendar.
Period Code	Number given to specific period.
Stage	Shows what stage the calendar is at in the process itself.
Status	This should let you know the status of the stage.

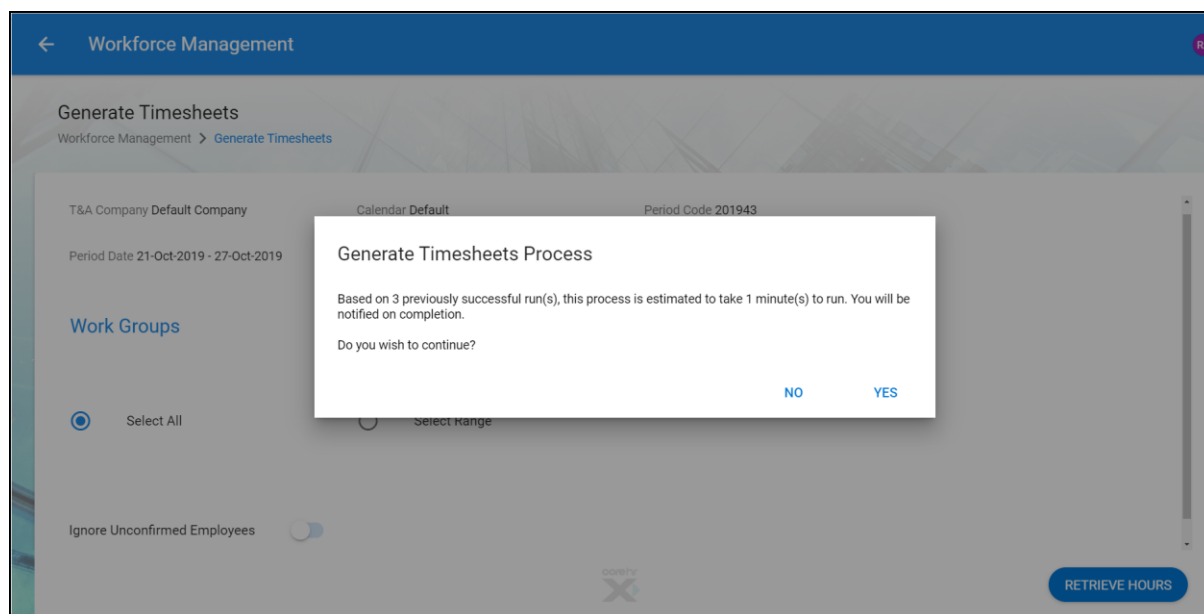

3. Choose Calendar.
4. The relevant company hours will have a status of Ready to Retrieve. Select **Run** from the dropdown menu. For further information on the View History button see [View History Screen](#)

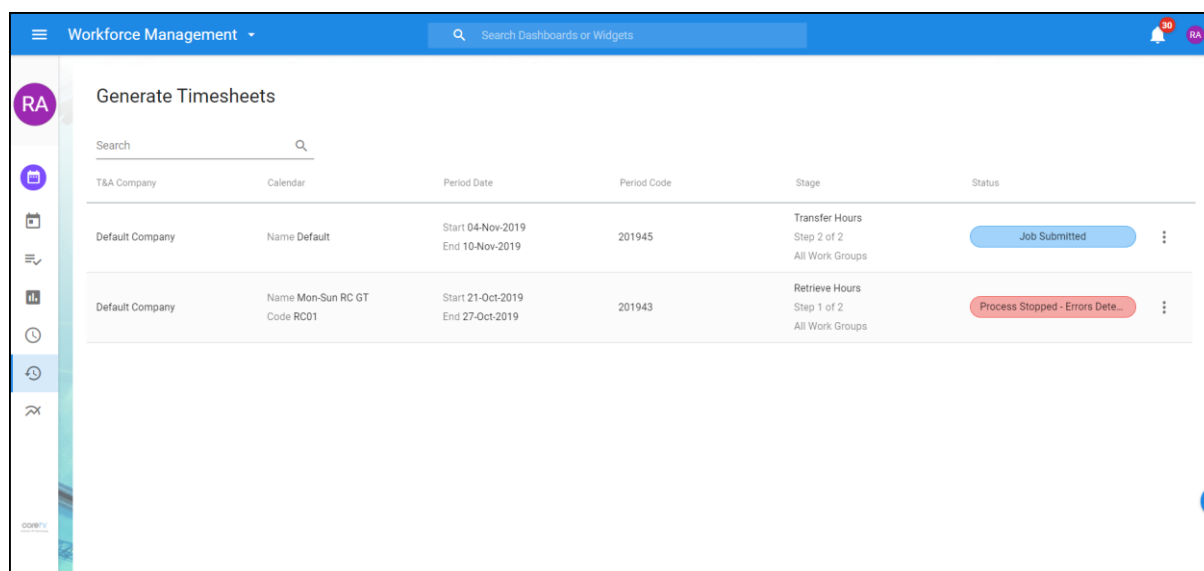

The screenshot shows the 'Generate Timesheets' page within the 'Workforce Management' application. The page has a blue header with a back arrow and the title 'Workforce Management'. Below the header, the page title 'Generate Timesheets' is displayed, followed by a breadcrumb trail 'Workforce Management > Generate Timesheets'. The main content area contains several fields: 'T&A Company Default Company', 'Calendar Default', and 'Period Code 201944'. Below these, the 'Period Date 28-Oct-2019 - 03-Nov-2019' is shown. A section titled 'Work Groups' contains two radio button options: 'Select All' (which is selected) and 'Select Range'. At the bottom right, there is a blue button labeled 'RETRIEVE HOURS'. A small 'coreshift' logo is visible in the bottom center of the main content area.

5. Click **Select All** if you wish all workgroup hours to be transferred
or
Click **Select Range** if you wish to run the Generate Timesheet process for a single workgroup or a range of workgroups.
6. Click **Retrieve Hours**.
7. The system will notify you of how long the process is likely to take, specifically if you are running the Retrieve Hours process for all workgroups. The number of people being processed in a specific calendar will decide the amount of time it takes.

WFM V28: Generate Timesheets - User Guide

8. To continue, click **Yes**.
9. The status column of the calendar should then change to **Job Submitted**.

10. The system is now ready to Retrieve Hours. The screen will update, and you will be notified that the process has completed. You may need to refresh the screen to see a change.
11. The status will then change to Ready to Transfer.

Note:

The process will stop if there are errors flagged by the system. To see a list of common errors, please see [Section 4.1](#). These need to be resolved before the system can be continued.

2.3. How to Transfer Hours

Once the Retrieve Hours step is completed and the timesheets have been successfully converted, they are now eligible to be transferred to Payroll. You can review the Control Totals at this stage to make sure they are correct.

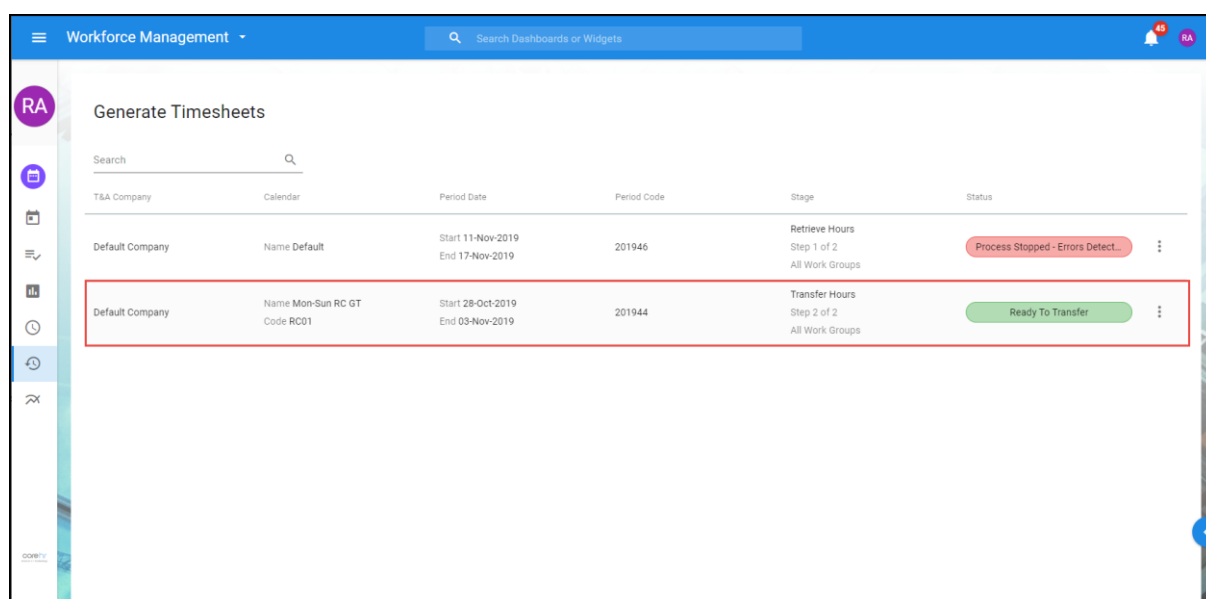

Note:

The timesheets that have been converted are a snapshot which has been taken at the specific time. For Example: If the timesheets were converted at 9 a.m, it is the snapshot from this time which is taken.

2.3.1. Transferring Hours

1. Select the calendar which you wish to transfer. This should now appear as *Ready to Transfer*. The Stage column should read Transfer Hours - Step 2 of 2 on the relevant calendar.

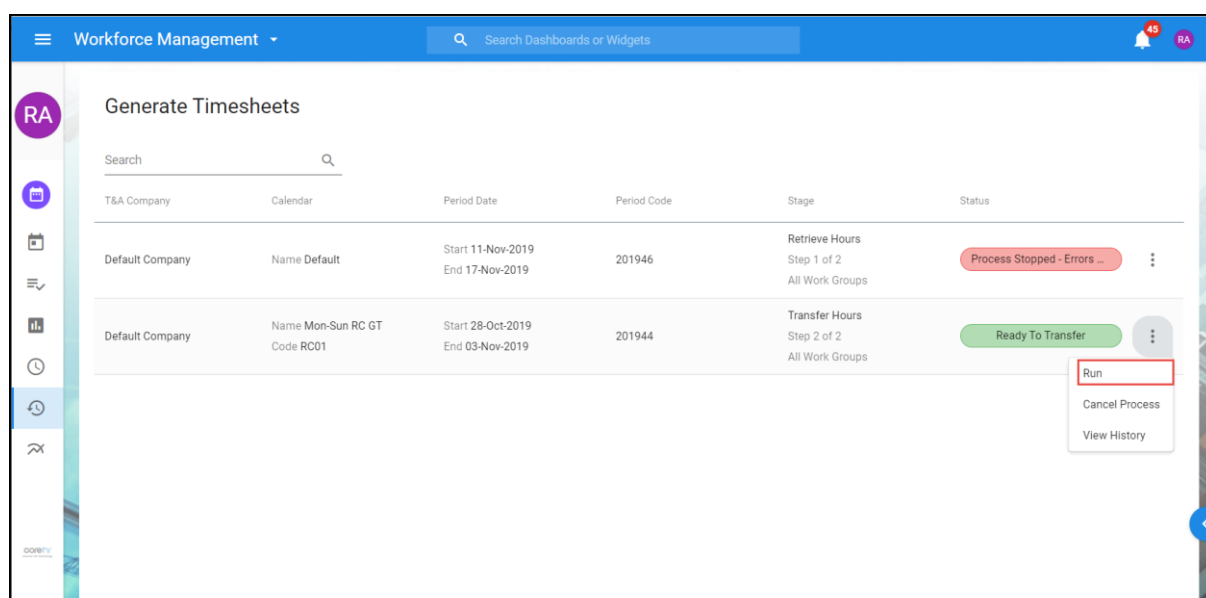

WFM V28: Generate Timesheets - User Guide

2. Select **Run** from the dropdown menu. On the drop-down menu, you also have the choice of selecting either *Cancel Process* or *View History*.

Cancel Process: This will stop the process and allow you to run it again.

View History: This brings you to a screen which will show you any previous runs which have taken place in the process.

**Note:**

You can now Cancel Process on the screen should you wish to. See the table below for a description of the other functionality on the screen.

[CANCEL PROCESS](#) [VALIDATE TRANSFER](#)

3. Click **Validate Transfer** to continue.

Tab	Definition
Pay Group Warnings	Alerts showing potential issues with the Pay group.
Rejected Hours	Gives information on any hours which have been rejected.
Retrieve Hours Warnings	Lists any warnings generated.
Employees to be Transferred	Shows the employees who will be transferred. Click View to see the names or to search for a specific employee.
Employees Not Transferred	Lists the employees who will not be transferred. For example, employees who have no hours recorded in the period will not be transferred.
Cancel Process	Stops the process and allows you to run it again.
Validate Transfer	This button allows you to continue to the next screen.

Note:

Remember to untick the Close Period on Transfer if you have not finalised the hours and do not wish to close the period. This defaults to ticked. This option displays if the Generate Timesheets process has been run for all workgroups. It is not possible to close the period (via this portal process) if the Generate Timesheets process is only being run for a subset of workgroups.

Note:

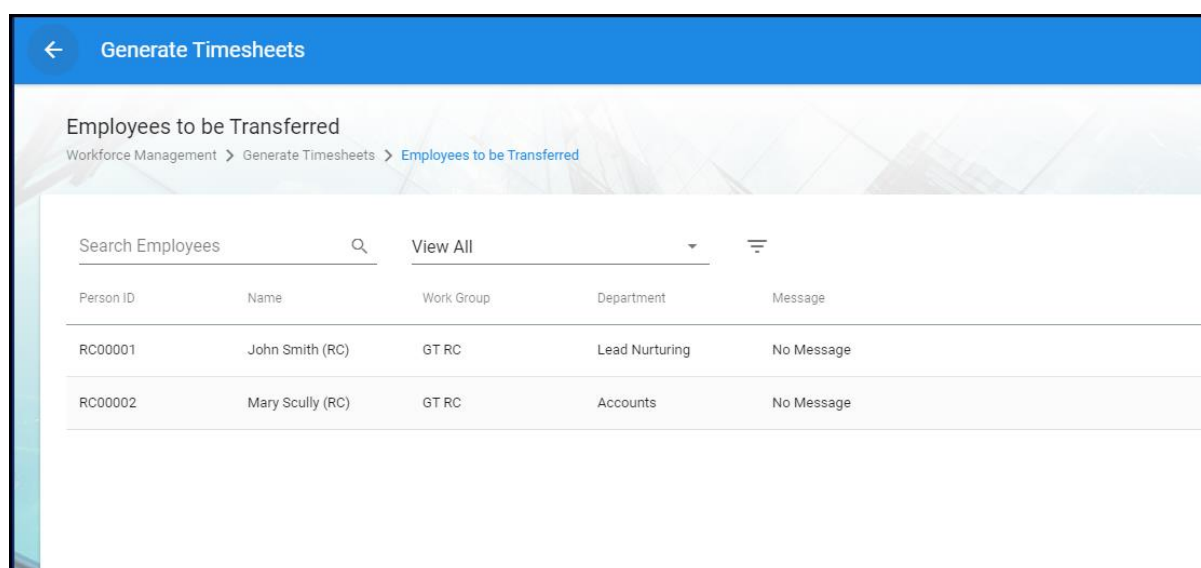

If the system finds an error with the process, it will be stopped. For a list of these errors, please see [Section 4](#)

3. Other Functionality Screens

3.1. Screens

3.1.1. Employees to be Transferred Screen

This screen shows you the employees who will be transferred as part of Retrieve Hours.

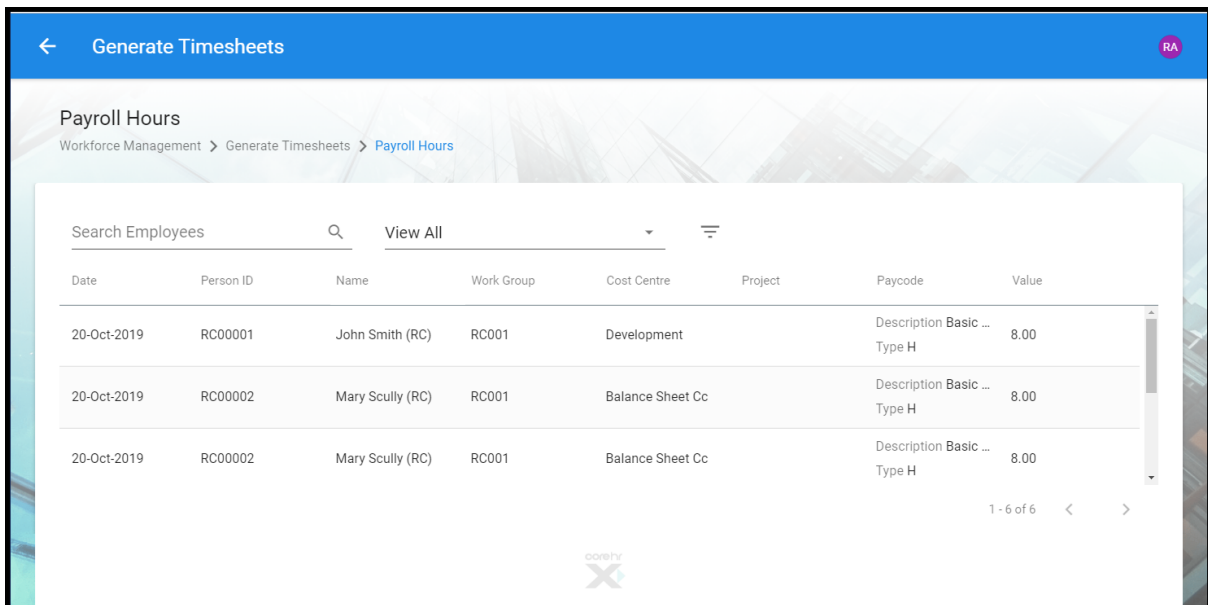

It also contains the following, detailed in the table below

Column	Definition
Person ID	The number which identifies the employee
Name	Name of Employee
Workgroup	Workgroup
Department	Employee Dept
Message	This will include any relevant information
Search Employees	Search functionality for a specific employee
View All	Functionality to view all employees to be transferred.

3.1.2. Payroll Hours Screen

This screen shows:

- The date the hours were Retrieve Hours was completed.
- The ID number of the Employee.
- Name.
- The workgroup which they are affiliated to.
- The Cost Centre they are paid from.
- The Paycode (i.e. Basic or Overtime)
- The Value showing the amount of hours which are to be transferred.

The screenshot shows the 'Generate Timesheets' screen with a blue header bar containing a back arrow and the title 'Generate Timesheets'. Below the header, the 'Payroll Hours' section is visible, with a breadcrumb trail: 'Workforce Management > Generate Timesheets > Payroll Hours'. A search bar labeled 'Search Employees' with a magnifying glass icon and a 'View All' dropdown menu are present. The main table displays payroll data with columns: Date, Person ID, Name, Work Group, Cost Centre, Project, Paycode, and Value. The table contains three rows of data. A scrollbar on the right indicates more data is available. At the bottom right, it shows '1 - 6 of 6' with navigation arrows. A 'coreTV' logo is visible at the bottom center.

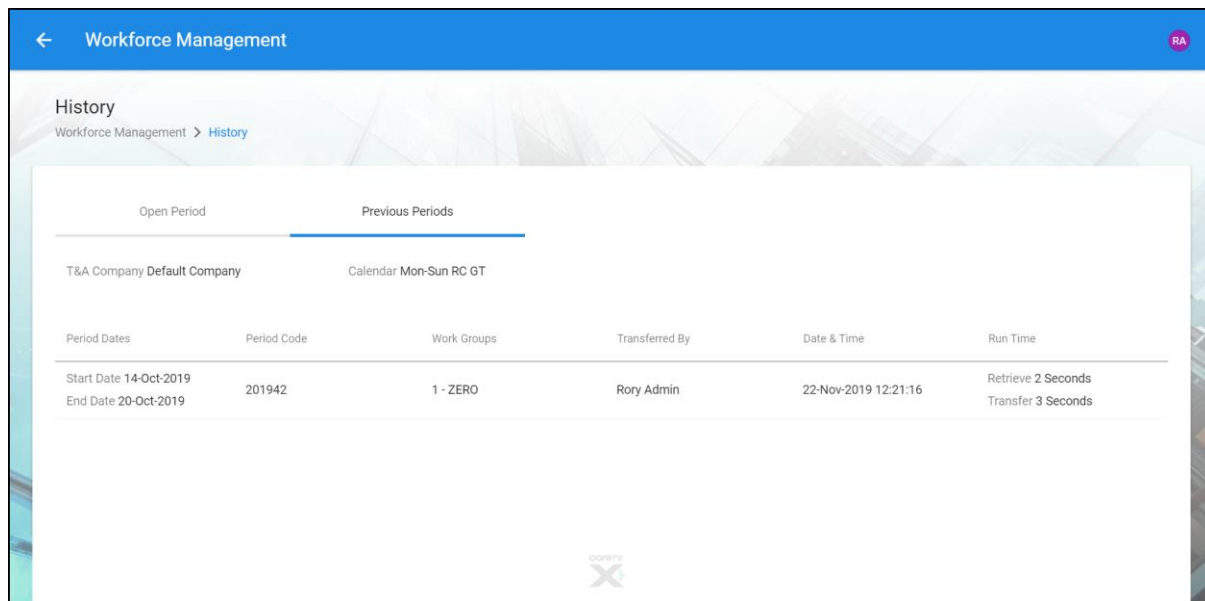

Date	Person ID	Name	Work Group	Cost Centre	Project	Paycode	Value
20-Oct-2019	RC00001	John Smith (RC)	RC001	Development		Description Basic ... Type H	8.00
20-Oct-2019	RC00002	Mary Scully (RC)	RC001	Balance Sheet Cc		Description Basic ... Type H	8.00
20-Oct-2019	RC00002	Mary Scully (RC)	RC001	Balance Sheet Cc		Description Basic ... Type H	8.00

3.1.3. View History Screen

This screen shows:

- The period dates of the process which was run.
- The name of the workgroup which whose timesheets were retrieved.
- The name of the user who completed the process.
- The date and time when this took place.
- The amount of time the process took to run.

It is also possible to see information on previous pay periods as well as open periods.

The screenshot shows the 'History' page in the Workforce Management system. The page has a blue header with a back arrow and the text 'Workforce Management'. Below the header, the title 'History' is displayed, followed by a breadcrumb 'Workforce Management > History'. The main content area features a table with two tabs: 'Open Period' and 'Previous Periods'. The 'Previous Periods' tab is selected. The table lists details for a specific period, including company information, calendar type, period dates, code, work groups, transfer details, and run times.

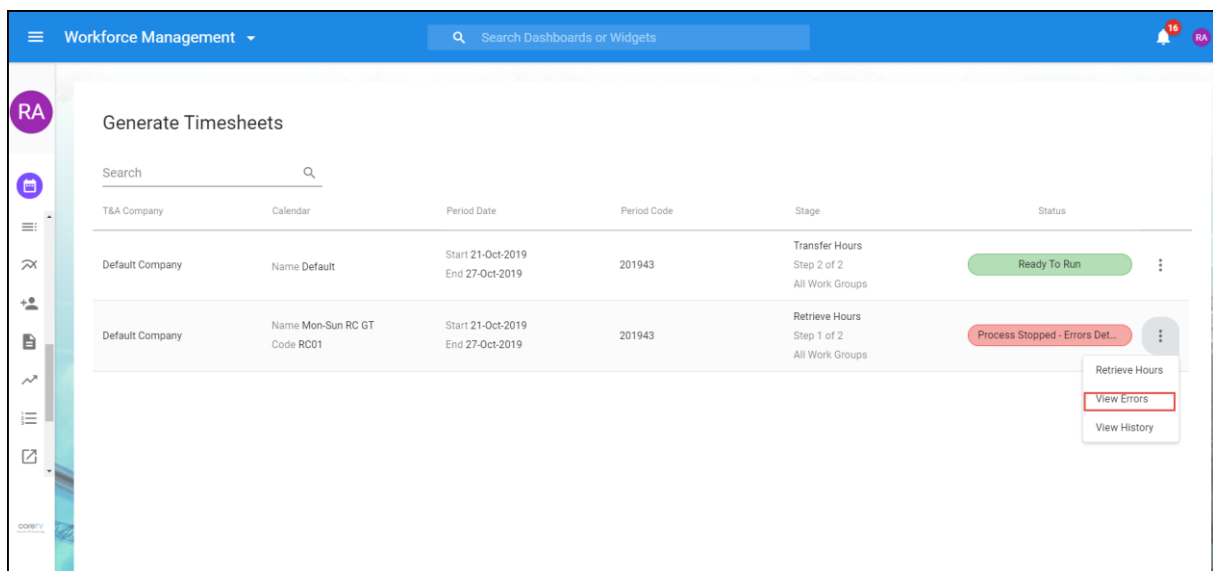

Open Period		Previous Periods			
T&A Company Default Company		Calendar Mon-Sun RC GT			
Period Dates	Period Code	Work Groups	Transferred By	Date & Time	Run Time
Start Date 14-Oct-2019	201942	1 - ZERO	Rory Admin	22-Nov-2019 12:21:16	Retrieve 2 Seconds
End Date 20-Oct-2019					Transfer 3 Seconds

4. Retrieve Hours - Errors

When the system generates an error, you will see a message saying *Process Stopped- Errors Detected*.

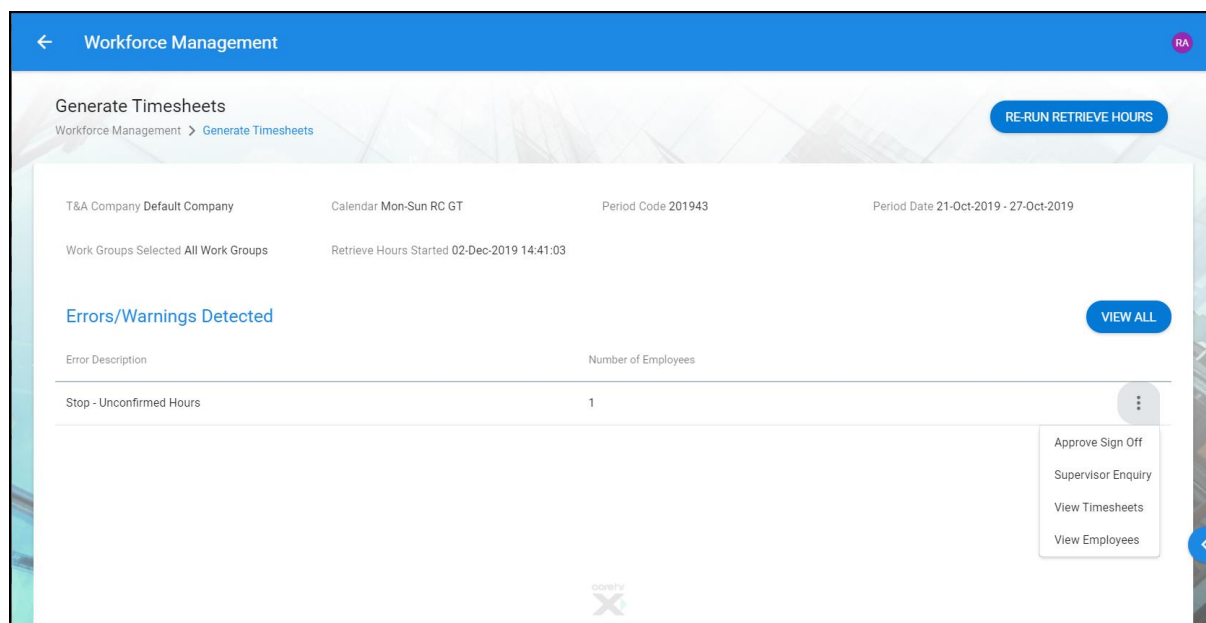

From here you can select

- View Errors: This allows you to investigate any errors which have caused the process to stop.
- Retrieve Hours: This allows you to restart the process once more once you have solved the errors.
- View History: This shows you a list of any previous attempt to retrieve hours.

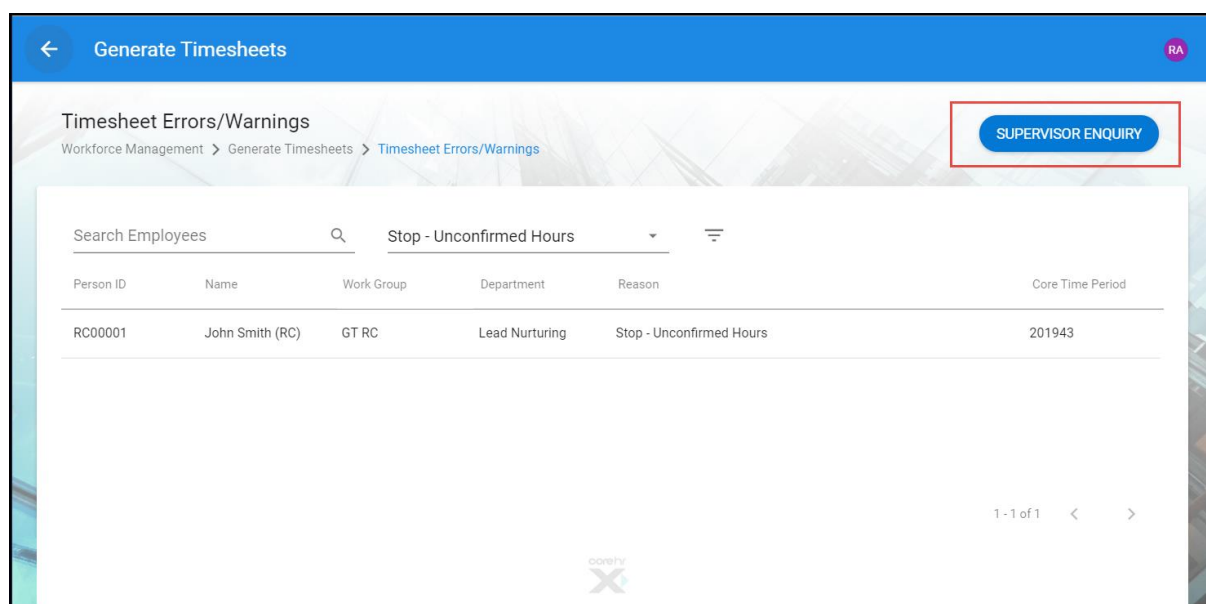

If you click *View Errors* you are taken to a screen where you can choose

- Supervisor Enquiry
- View Employees
- Approve Signoff
- View Timesheets

- When you click the *View Error* button on the previous screen it brings you to *Timesheet Errors/Warnings* screen.
- This screen will also allow you to access the Supervisor screens.

4.1. Table of Process Errors

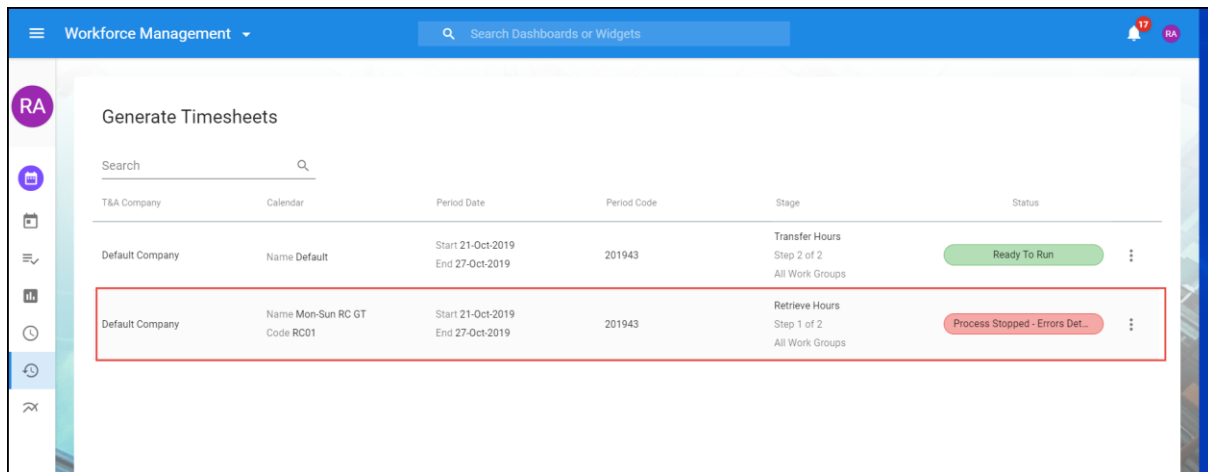

The Retrieve Hours/Transfer Hours process can be stopped for several reasons.

WFM V28: Generate Timesheets - User Guide

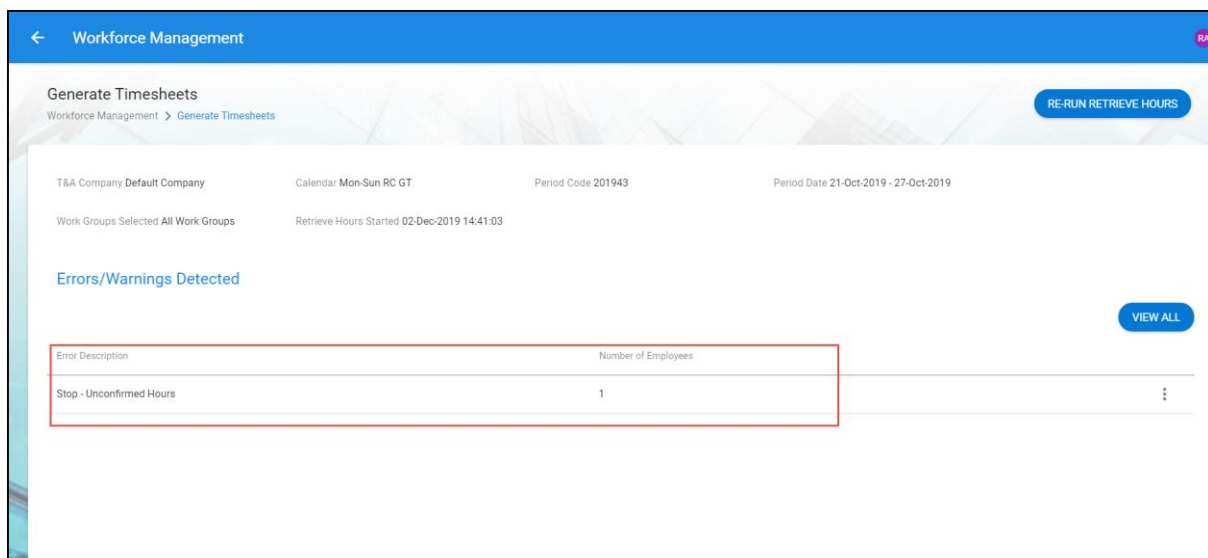

If the Retrieve Hours identifies any exceptions (e.g unconfirmed hours)

- The User gets a notification letting them know that exceptions were identified.
- The status is updated to 'Process Stopped – Errors Detected'.
- There is an option to view the errors.

The system will flag the error which you can then see on the *View Errors* screen.

Here we can see that the error is Unconfirmed Hours.

Note:

The following table is not an exhaustive list. It details common errors which are detected by the system and what they mean.

Error/Warning	Reason
Unconfirmed Hours	The employee has hours with in the T&A period which have not been signed off.
Unconfirmed Historical Hours	Historical Hours have not been confirmed and must be confirmed for payment
No Employee record on Payroll	The Employee has not been set up on Payroll. This message can be configured to no longer show as a STOP. Instead it can be configured to be a warning generated by the system. See Section 4.1.1
No Employee Record and hours exist	The Employee has not been set up on Payroll. This message can be configured to no longer show as a STOP. Instead it can be configured to be a warning generated by the system. See Section 4.1.1
No Basic Rule Pattern/ No Under/over flow Pattern	The employee is a Basic or Salary Rule employee, but the overflow or underflow patterns have not been attached to the workgroup or employee.
Cannot transfer Unconfirmed Hours linked to Claims (Work Group is “Sign Off not Required”)	Mismatch in configuration. Claim takes precedence (final level claim does approve/sign off)
Expiring -Held Timesheets	Timesheets from a previous period have not been previously signed off.
Warning- Held Timesheets	Timesheets from a previous period have not been signed off.
Held Timesheets to be Processed	Held Timesheets for the specified employee and period will be transferred to Payroll in this period.
Warning – Unapproved Codes	Hours confirmed but not approved. Hours will not be paid but will also not be stopped
Warning – Hours generated by User Defined Calendar run	Overlap due to switching between calendars.
Warning – Hours also generated by another Calendar run	Overlap due to someone switching between calendars.

**Note:**

Once the errors are actioned you must Re-run Retrieve hours. Otherwise the changes will not take effect.

4.1.1. Configuration for Warning - Employees not on payroll

As pointed out in the table above, the system gives a warning if employees are not on payroll. This does not stop the process like the other messages do. This needs to be configured in order for the warning to be given.

To Configure:

1. Connect to the Back Office.
2. Navigate to Core Time.
3. Select *System Params>Control Params*.
4. Enter the company and then add in *Warning – Employees not on Payroll*.
(NO_EMPLOYEE_FUTURE_WARN)

4.2. Sign Off Hours

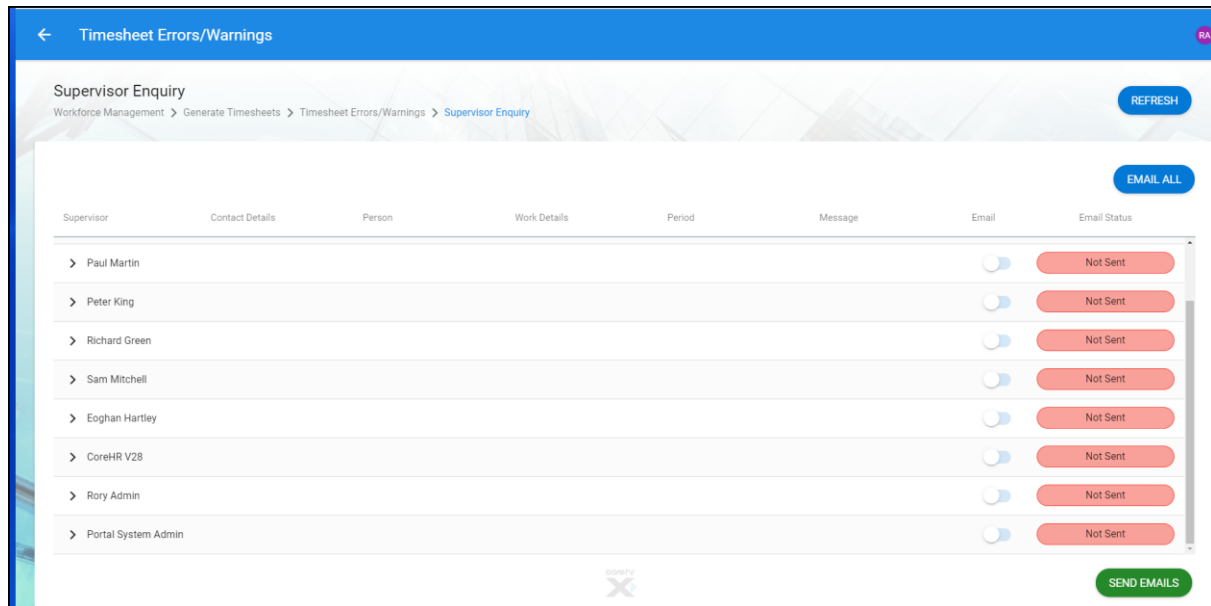

The *Sign Off Hours* screen allows you to sign off hours to continue without having to leave the process. This screen allows an admin to sign off the employees who are listed. It gives further information as to why the process stopped.

Approve/Sign Off						
Workforce Management > Generate Timesheets > Approve/Sign Off						
Planned Values 0.00		Actual Values 0.00		Last Calculated NA		
Search Employees		View All		Period* 14 Sep 20 - 20 Sep 20		
Team Member	Basic	Overtime	Exceptions	Annual Leave	Other Leave	Status
Tom Adams Operations Manager	39 hours Over 4 hours	4 hours				Action Required
Matt Cole Developer	32 hours Over 32 hours					pending
Dean Forrest Ceo7296	40 hours Over 40 hours	3 hours				Action Required
Sharon Freeman Development Team Lead	39 hours 10 mins Over 39 hours 10 mins					pending
Dan Harrington Development Team Lead	40 hours Over 40 hours	5 hours				pending
Tom Kendrick Product Manager	40 hours Over 40 hours	1 hour				Action Required
Sean Lee Cto	40 hours Over 40 hours					pending

4.3. Supervisor Enquiry Screens

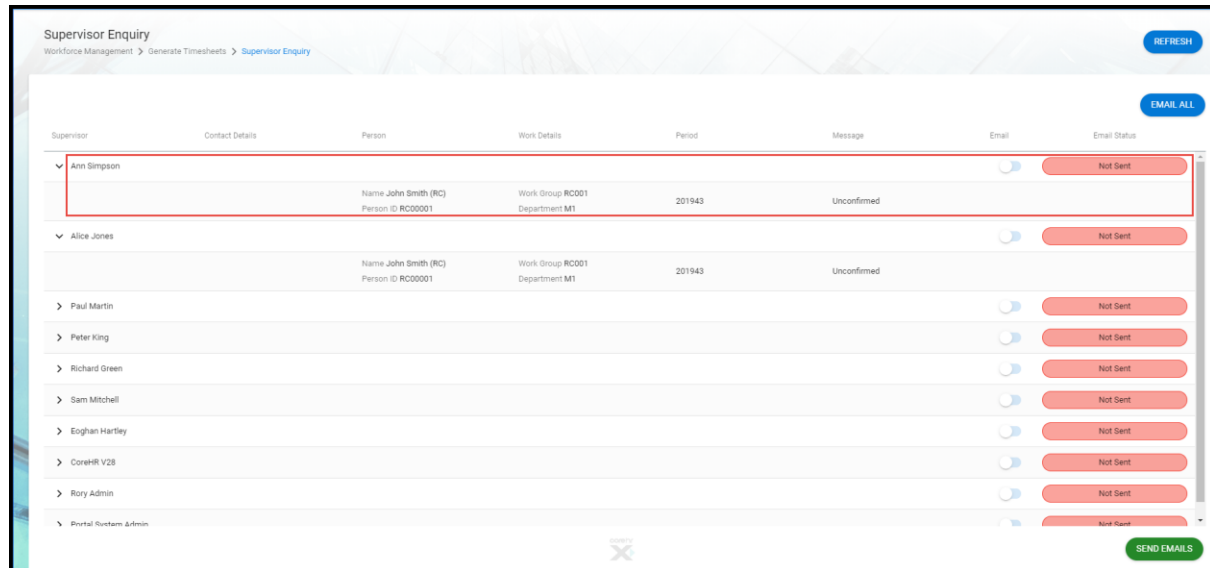

The *Supervisor Enquiry* screen shows you:

- a list of managers and who they report to.
- email address and a contact number so the manager can be contacted to take appropriate action.

In this screen we see:

- Employee Details and who they specifically report to.
- If emails have been sent informing them of action to be taken.
- Contact Details
- Workgroup
- The possibility of emailing all employees in a workgroup where applicable.

4.4. View Timesheets

The View Timesheets screen allows a manager or admin to manually make changes to the timesheet which has stopped the process

The dropdown menu gives you the following options:

Option	Explanation
Approve Hours	Hours can be manually approved to allow the process to continue.
Reject Hours	Hours can be rejected to allow the process to continue.
Add Reason	Reason can be given for changes made to specific hours.
Add/Review Comments	Allow you to add to add or view comments to the specific timesheets
Delete	Deletes the hours which are causing the errors in the process.

CALCULATE ATTENDANCE **SAVE**

4.4.2. Reject Hours

1. Click **Reject Hours**
2. Select day as appropriate
3. Add comment.
4. Click **OK**

The screenshot displays the 'Generate Timesheets' application interface. A modal window titled 'Reject' is open in the center. The modal contains the following fields and options:

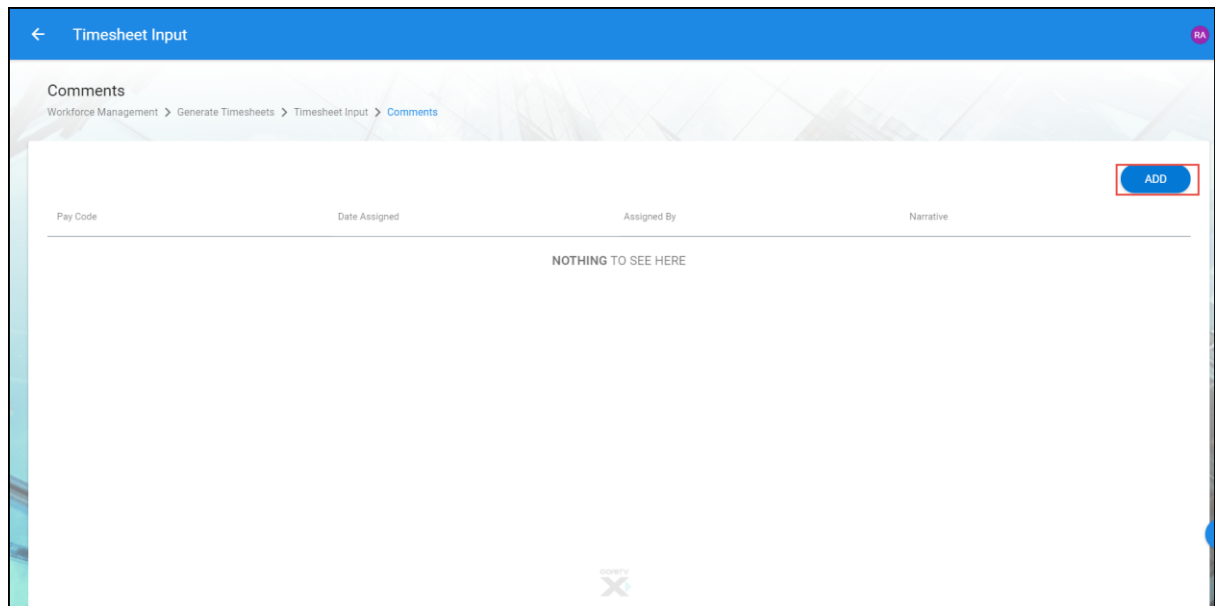

- Day ***: A dropdown menu with 'All Days' selected. Below it, a note says 'Select a single day or all applicable days'.
- Pay Code**: A dropdown menu with 'Basic Hours' selected.
- Comment ***: A text input field.
- CANCEL** and **OK** buttons at the bottom.

The background interface shows the 'Timesheet Input' section for 'Employee John Smith (RC)' at 'Location Head Office'. It includes a table with columns for 'Pay Code', 'Type', 'Location', and 'Cost Centre'. The table has one row: 'Basic Hours', 'M', 'Head Office', 'Development'. To the right of the table, there are columns for 'Fri 25th', 'Sat 26th', 'Sun 27th', and 'Total'. The 'Total' column shows '8.00'. At the bottom right, there are buttons for 'CALCULATE ATTENDANCE' and 'SAVE'.

4.4.3. Add/View Comments

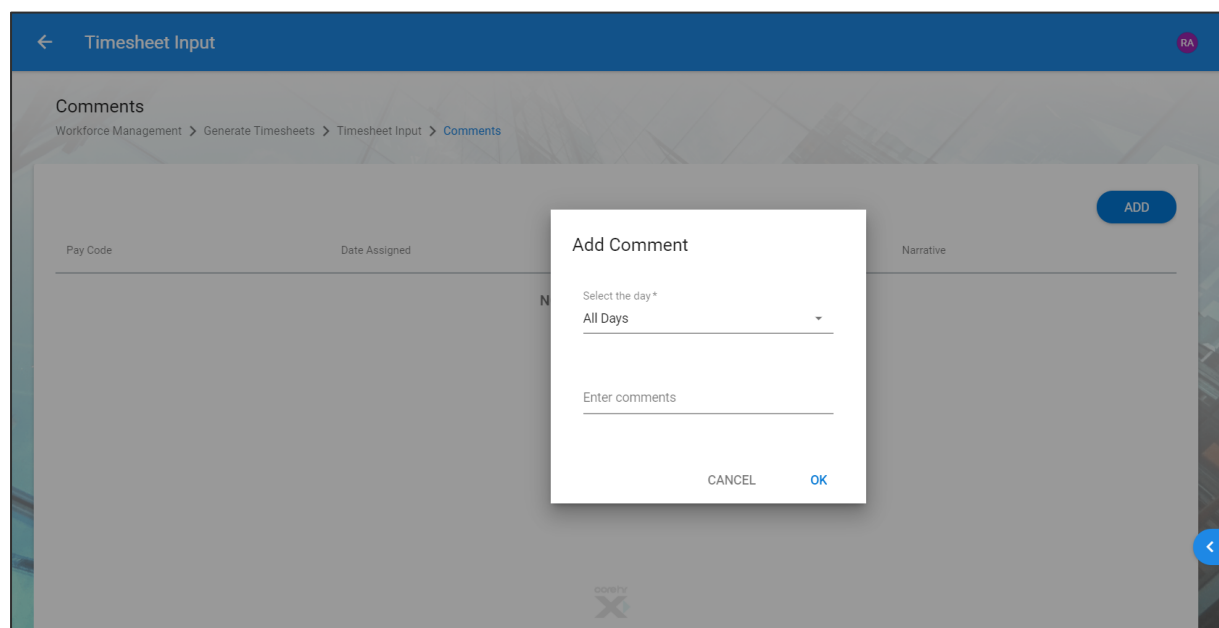

1. Under the Add View Comments screen you see any comments specific to the timesheet.

WFM V28: Generate Timesheets - User Guide

The screenshot shows the 'Timesheet Input' screen with a blue header bar. Below the header, there's a breadcrumb trail: 'Workforce Management > Generate Timesheets > Timesheet Input > Comments'. The main content area is titled 'Comments' and contains a table with columns: 'Pay Code', 'Date Assigned', 'Assigned By', and 'Narrative'. The table is currently empty, displaying 'NOTHING TO SEE HERE'. A blue 'ADD' button is located in the top right corner of the table area, highlighted with a red box.

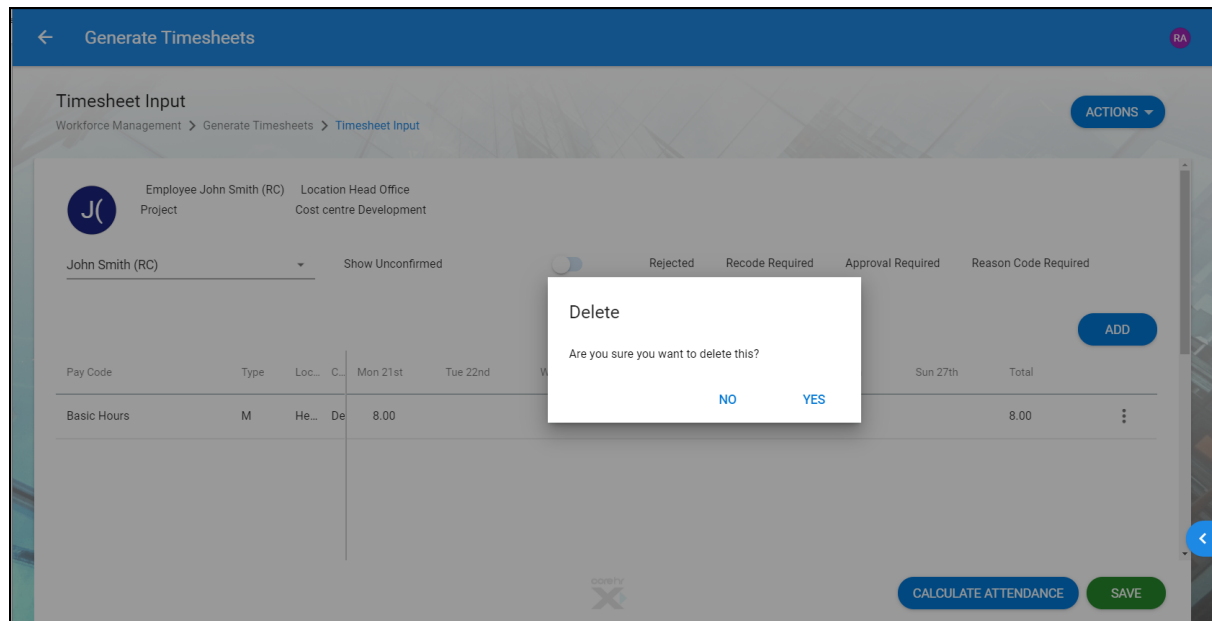

2. Click **Add** to add a comment in relation to the hours which are posted.
3. Click **OK**.

The screenshot shows the 'Timesheet Input' screen with the 'Add Comment' modal open. The modal has a title 'Add Comment' and contains a dropdown menu labeled 'Select the day *' with 'All Days' selected. Below the dropdown is a text input field labeled 'Enter comments'. At the bottom of the modal are two buttons: 'CANCEL' and 'OK'. The background of the screen is dimmed.

4.4.4. Delete Hours

1. Select **Delete**
2. Click **Yes**

Note:

Once the hours are actioned you must Re-run Retrieve hours. Otherwise the changes will not take effect.

4.5. View Employees

The *View Employees* screen can be accessed from the *View Errors* screen. It details:

- Person ID
- Name
- Workgroup
- Department
- Reason for the Error

- Time Period

This allows a manager to specifically which employee timesheet is stopping the process.

The screenshot displays the 'Generate Timesheets' interface. At the top, there is a blue header bar with a back arrow and the text 'Generate Timesheets'. Below this, the main content area has a title 'Timesheet Errors/Warnings' and a breadcrumb trail: 'Workforce Management > Generate Timesheets > Timesheet Errors/Warnings'. A 'SUPERVISOR ENQUIRY' button is located in the top right corner. The interface features a search bar labeled 'Search Employees' and a dropdown menu currently set to 'Stop - Unconfirmed Hours'. Below these, a table lists the error details:

Person ID	Name	Work Group	Department	Reason	Core Time Period
RC00001	John Smith (RC)	GT RC	Lead Nurturing	Stop - Unconfirmed Hours	201943

At the bottom right, there is a pagination indicator '1 - 1 of 1' and a blue circular button with a left arrow. The 'coreity' logo is visible at the bottom center.

5. Generate Timesheets Configuration

5.1. General Configuration

Note:

There is no change to existing configuration relating to which employees transfer to payroll or which hours are transferred to Payroll.

To be configured for Generate Timesheets, please ensure the following:

	Configuration Item
1.	Generate Timesheets access (System Users) granted to the user CoreTime Back Office > System Params > System Users screen
2.	Portal screen access granted to the User CorePortal > Security Dashboard > Menu Profiles CorePortal > Security Dashboard > User Management
3.	(If Applicable) Supervisor enquiry contact column configured CorePortal > Admin Dashboard > Site Manager > Admin Params

The same company/workgroup/person configuration required to configure the T&A hours to Payroll hours conversion.

Users will need Generate Timesheet access via System User. Access continues to be at two levels:

- Run Generate Timesheets for the users own T&A Companies
- or**
- Run Generate Timesheets for all T&A Companies

Back Office> CoreTime> Navigate> System Params> System Users

5.2. Access to Generate Timesheets on CorePortal

CorePortal Generate Timesheets - WFM	Displays the Generate Timesheets on the Workforce Management Dashboard
CorePortal Generate Timesheets - Payroll	Displays the Generate Timesheets screen on the Workforce Management Dashboard
CorePortal Generate Timesheets – Supervisor Enquiry	Give the user access to the Supervisor Enquiry Screen
CorePortal Generate Timesheets – Supervisor Enquiry – Contact Details	Displays the Contact column on the Supervisor Enquiry screen The Contact types (Mobile number etc) to display are defined in (Portal) Admin Settings
WFM – Generate Timesheets	New Admin Dashboard
CorePortal Generate Timesheets – Approve Sign Off Admin Access	Administrator access to signoff
CorePortal Generate Timesheets - Timesheets Admin Access	Administrator access to drill to Timesheet Input

5.3. Configuration of Supervisor Enquiry screen

5.3.1. Contact Type Configuration

The text of the supervisor enquiry email can be specified from CoreTime/CoreRoster >System Params>Reference A-C>Coretime Mail Parameters.

Emails should be sent via the EMS system.

CoreTime Mail Parameters

E-Mail Event

							Extra
							Extra
							Extra

Under the *Global Parameters* screen, there is also a section where you can decide who has a supervisory role as well as who they report to and which employees they have access to.

The screenshot shows the 'Global Parameters' window with the 'General 2' tab selected. The 'Supervisor Enquiry Employee Access' section is highlighted with a red box. It contains two dropdown menus: 'Organisational Role' set to 'Reports To Manager' and 'Organisational Group' set to 'Work Group'. Other sections visible include 'Indicators' with various checkboxes, 'Reference Types' with input fields, 'Display LOV Columns' with radio buttons, 'Sign-Off Hours' with input fields, 'Future Calculation' with a dropdown and checkbox, 'Record Absence Detail Employee Access' with dropdowns, 'Occupational Absences' with checkboxes and an input field, and 'Clocking Interface' with a dropdown.

Up to three contact types can be displayed on the Supervisor Enquiry.

- Contact Types are defined in Personnel CorePersonnel *Back Office* > *Reference* > *Reference A – C* > *Contact Types*

5.3.2. Supervisor Enquiry – Contact Details menu security turned ON

1. Contact Data is only displayed if the following menu security item turned on 'Core Portal Generate Timesheets - Supervisor Enquiry – Contact Details'
2. The Contact Types displayed are configurable via Admin Params (Site Manager)

5.4. Generate Timesheet and Balance Re calculation for Leavers (Back End)

Currently some customers input employee end dates on the same day the Generate Timesheets is in final mode. If the end date is within the period being closed, the result is that the employee gets marked as a leaver before the recalculation runs at the end of the Generate Timesheet process or overnight. Leavers are excluded from the balance recalculation. The implication is that the employees closing annual leave balance on CoreHR is incorrect and could lead to the employee being overpaid.

Additional Considerations:

- The balance configuration must include links to pro-rata end dates, otherwise it's excluded.
- The balance open period should contain the T&A period being closed.
- With Generate Timesheets, the balance recalculation only applies to leavers that fall within the current period being processed.

5.5. Generate Timesheet Processing and Employee not on Payroll

- In previous versions of the Generate Timesheets to payroll, the system stopped processing for future dated employees in WFM that had not been onboarded into payroll.
- From V28 the *stop* has been altered to '*warn*' where future date employee exists and no attendance has been recorded (i.e. start date is after the end of the current WFM period)

Examples:

- If employees are starting in the future (i.e start date later than the end of the period being processed)
- If there are no attendance hours entered for the period.
- Issuing of a warning message to allow the generate timesheet process to continue.
- Warning message text "*Warning - No Employee record on Payroll* (Future new starter)

Additional Considerations

- Work Group is set to 'Live' and marked as Generate Timesheets.
- Employee is not set as non-generate timesheets at person level.
- If future dated employees have attendance recorded in the period being closed, the existing stop process remains.
